*Troglodytes troglodytes* is a widespread breeder across most of Europe, which accounts for less than a quarter of its global breeding range. Its European breeding population is extremely large (>23,000,000 pairs), and was stable between 1970–1990. The species underwent a slight increase overall during 1990–2000, with populations across the vast majority of its European range—including the sizeable one in the United Kingdom—stable or increasing. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag. %	References
Albania	1,000 – 5,000	02	(0)	(0–19)	
Andorra	500 – 700	99–01	(0)	(0–19)	1,3
