

# **Environmental profile of PV mass production: globalization**

Mariska de Wild-Scholten

26<sup>th</sup> European Photovoltaic Solar Energy Conference, Hamburg  
8 September 2011

# Outline

---

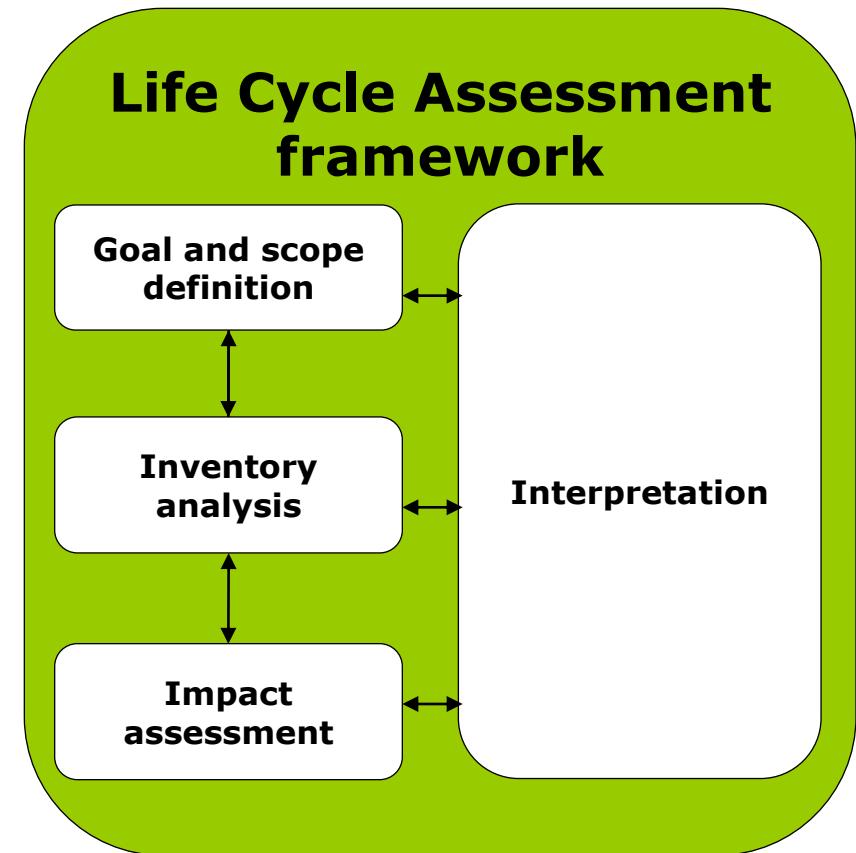

- Life Cycle Assessment
  - Energy payback time
  -  Carbon footprint
  - Data request
- & Globalization  
of the PV industry

# Life Cycle Assessment

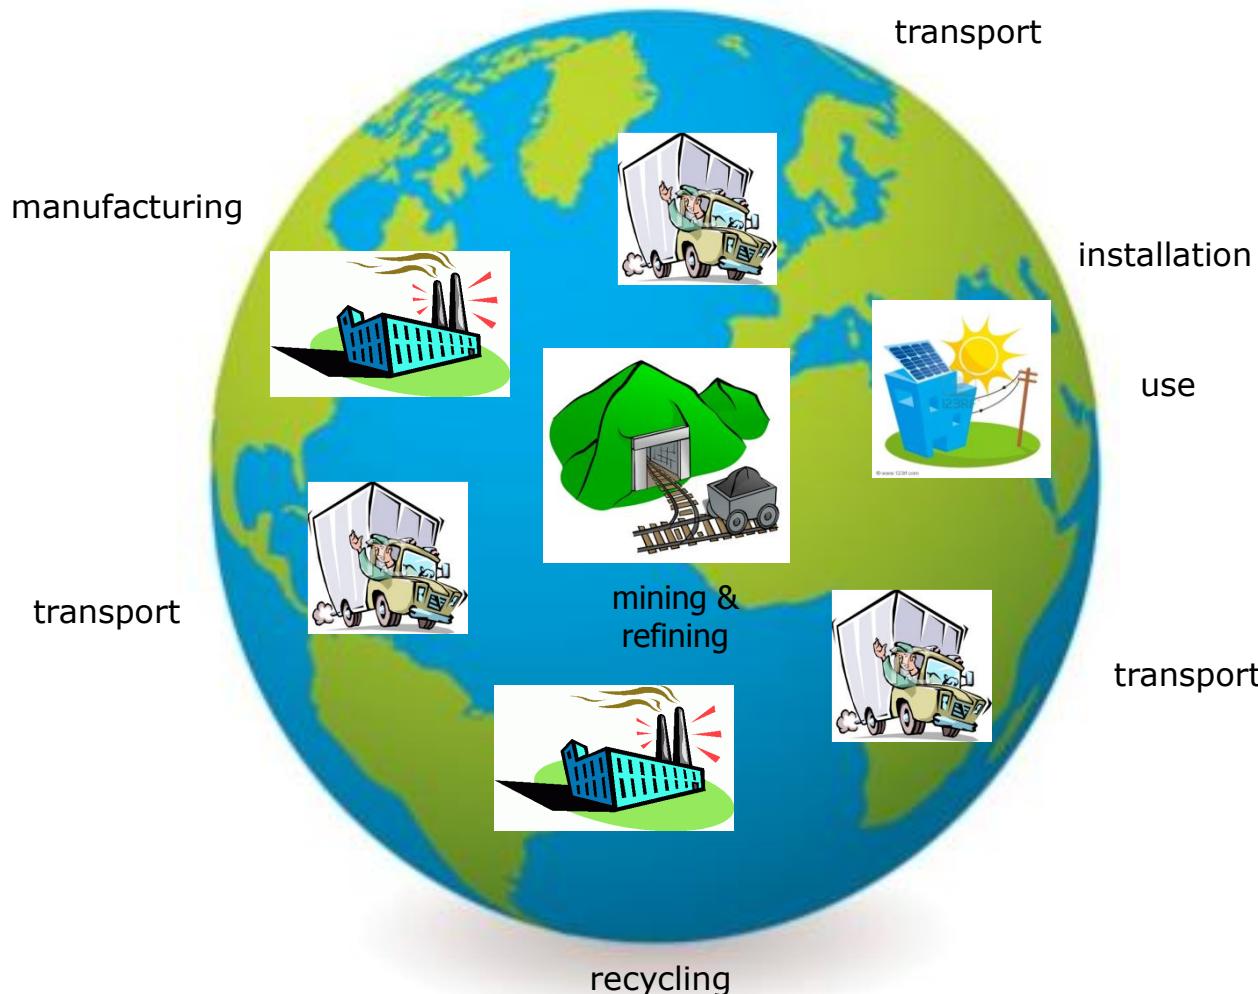

---

Determination of environmental impact of a product from cradle to grave/cradle

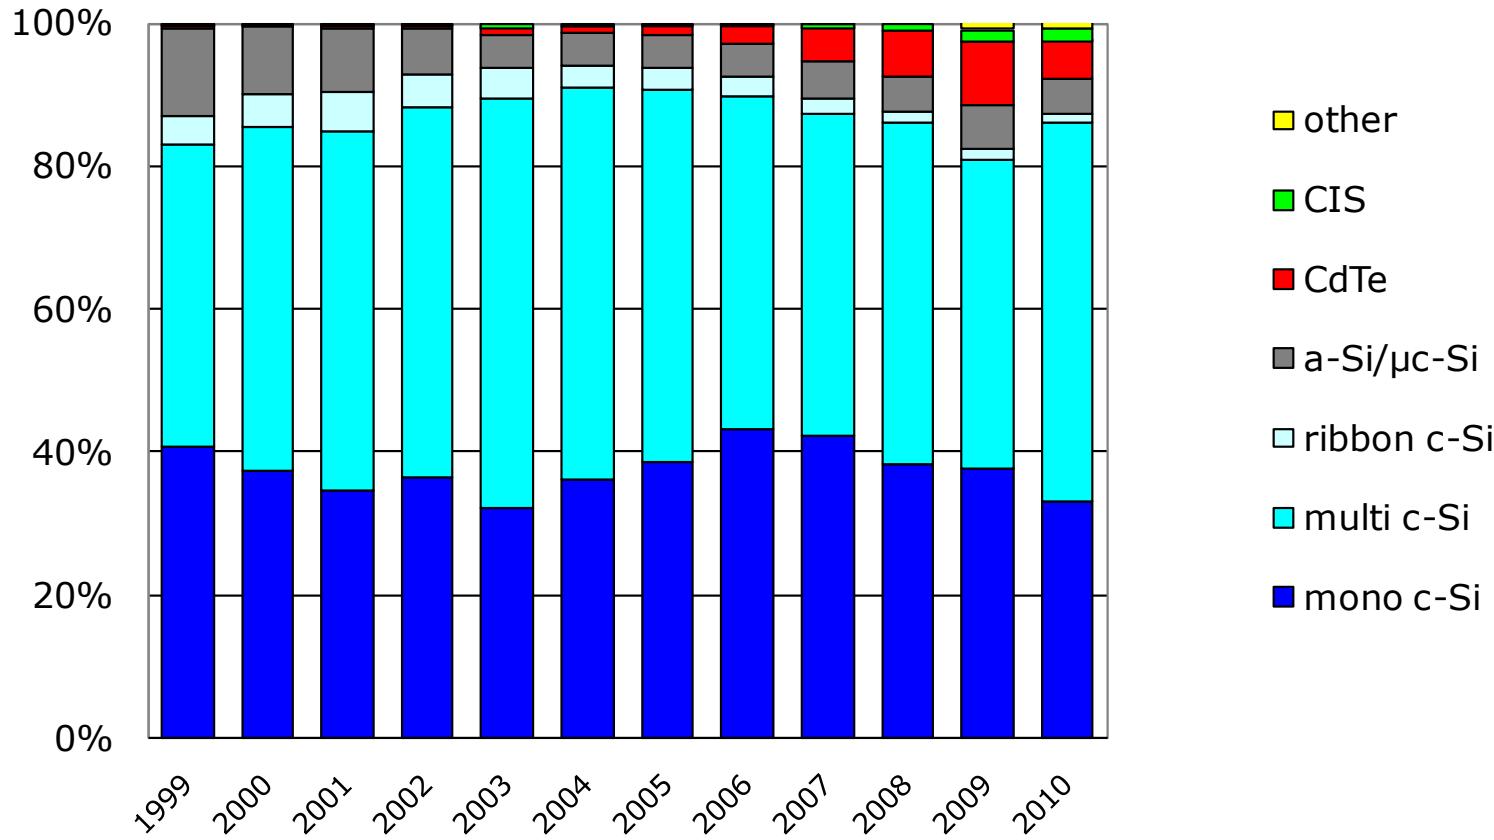

## ISO14040 series

# Life Cycle

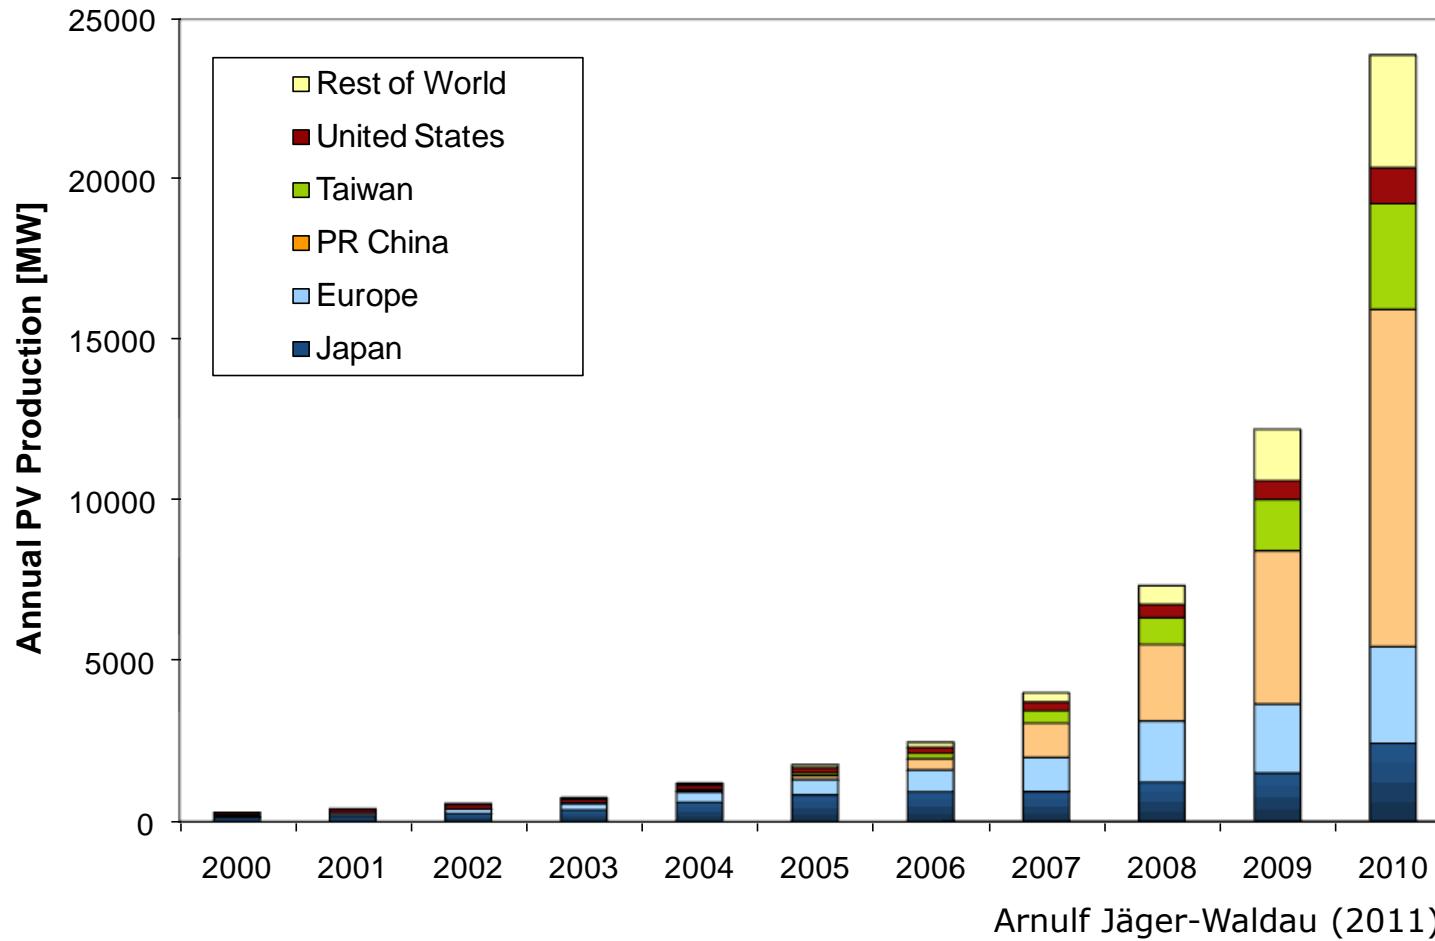

# Market share of cell technologies

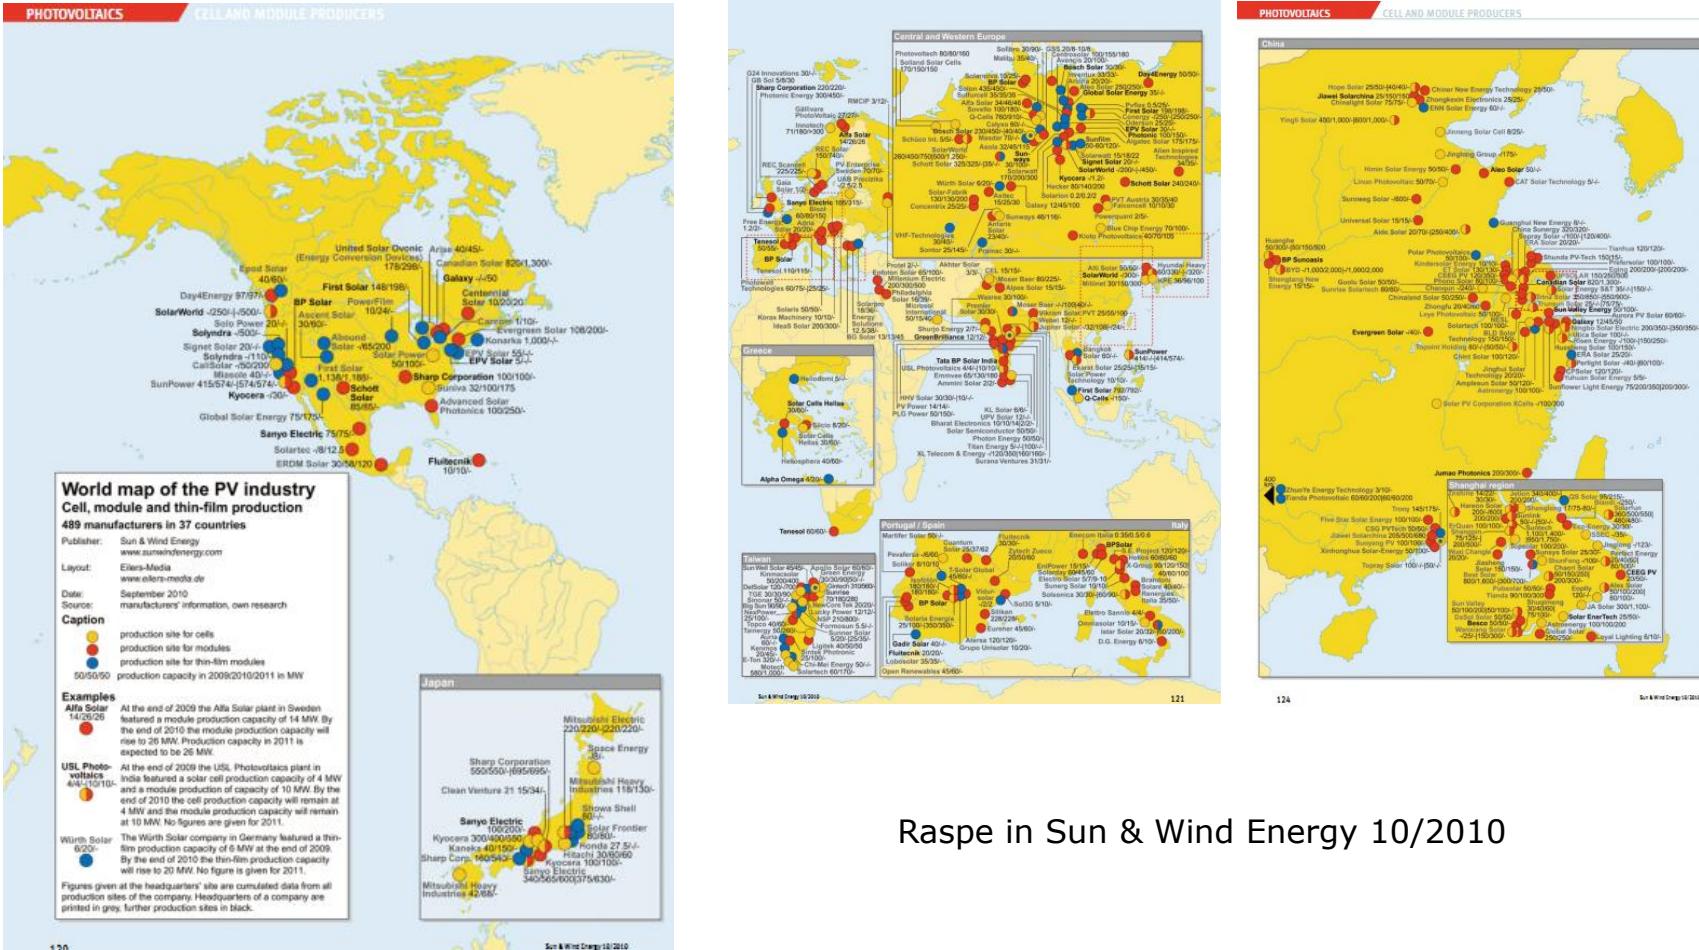

Photon International March 2011

# Global PV production

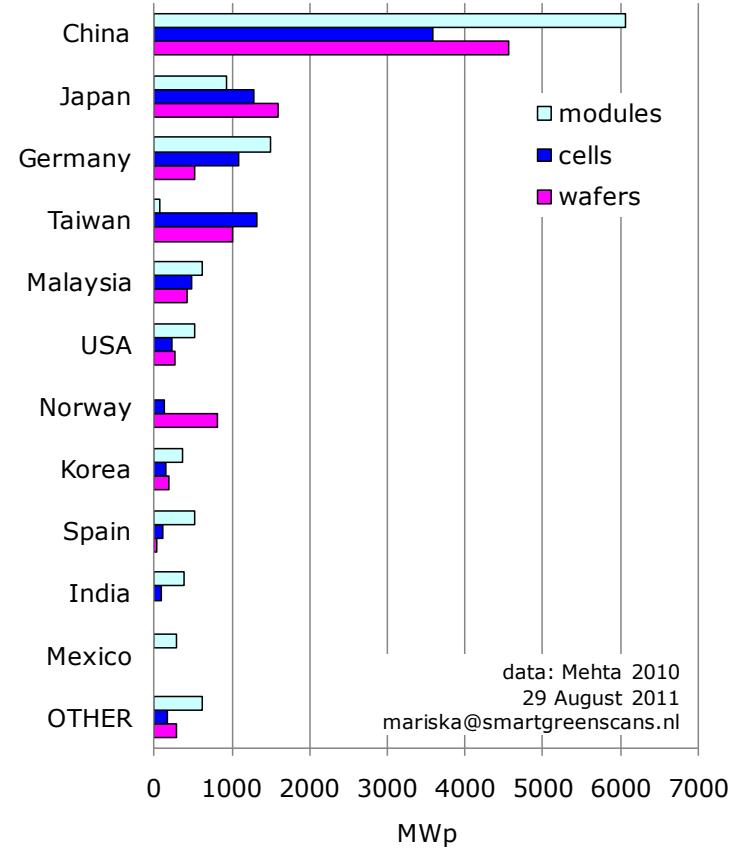

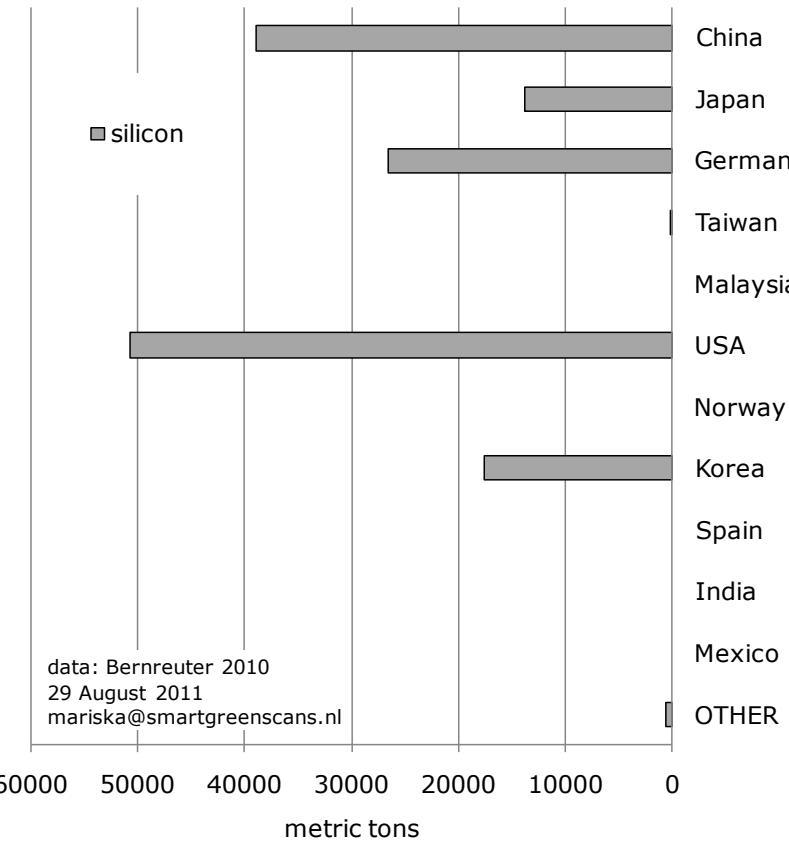

# Global PV production

Raspe in Sun & Wind Energy 10/2010

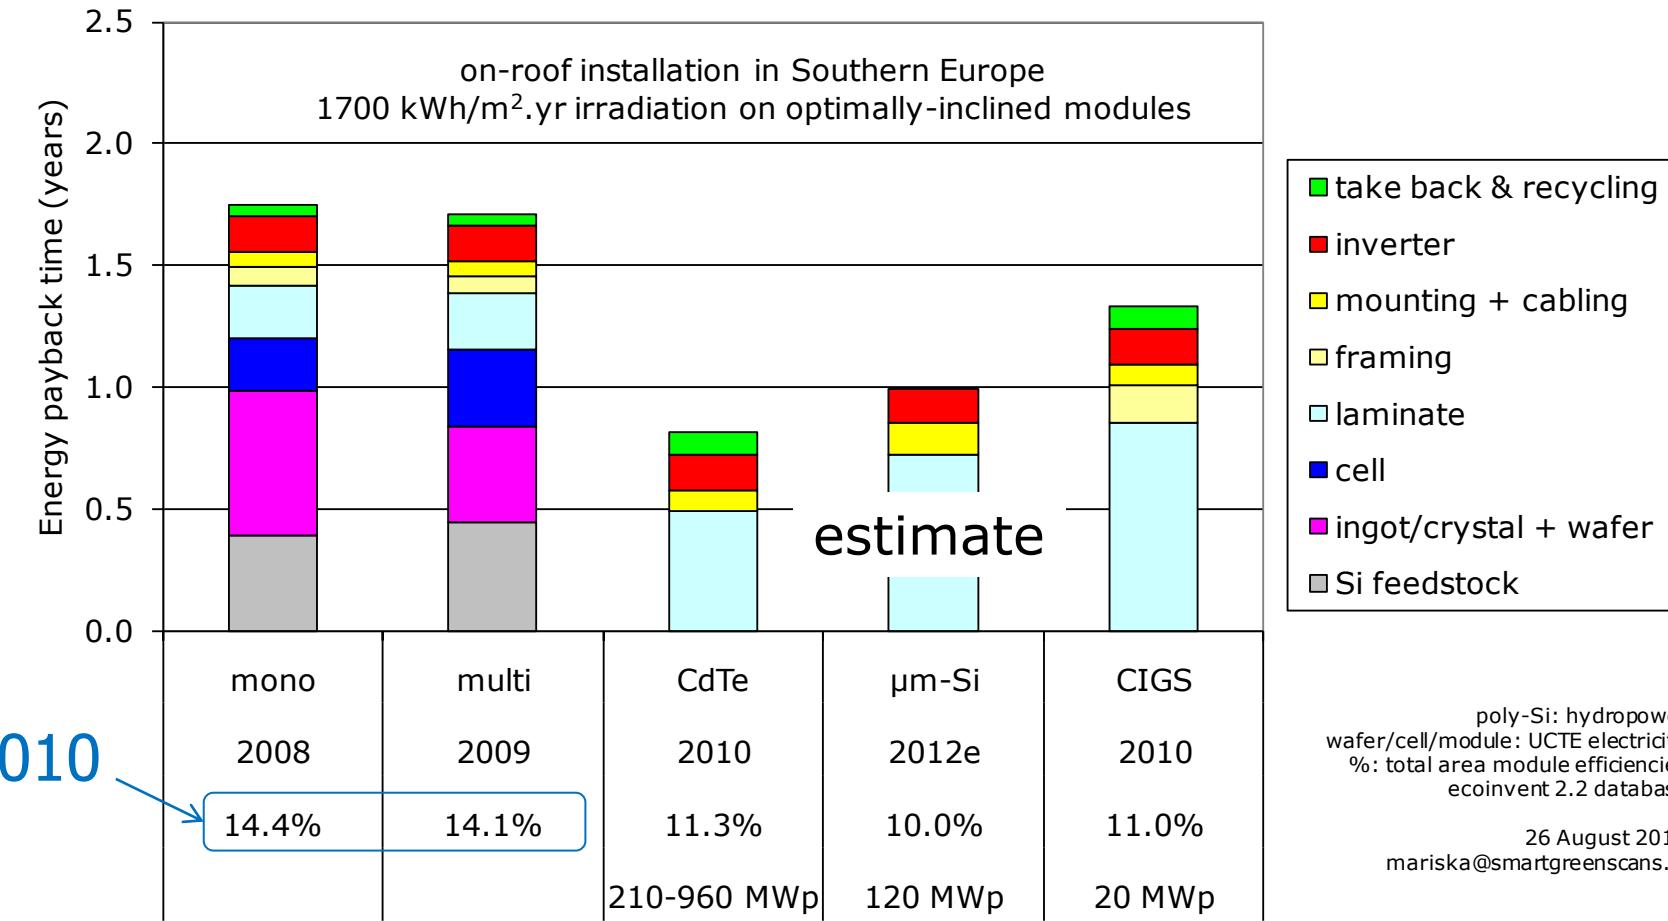

# Global PV production

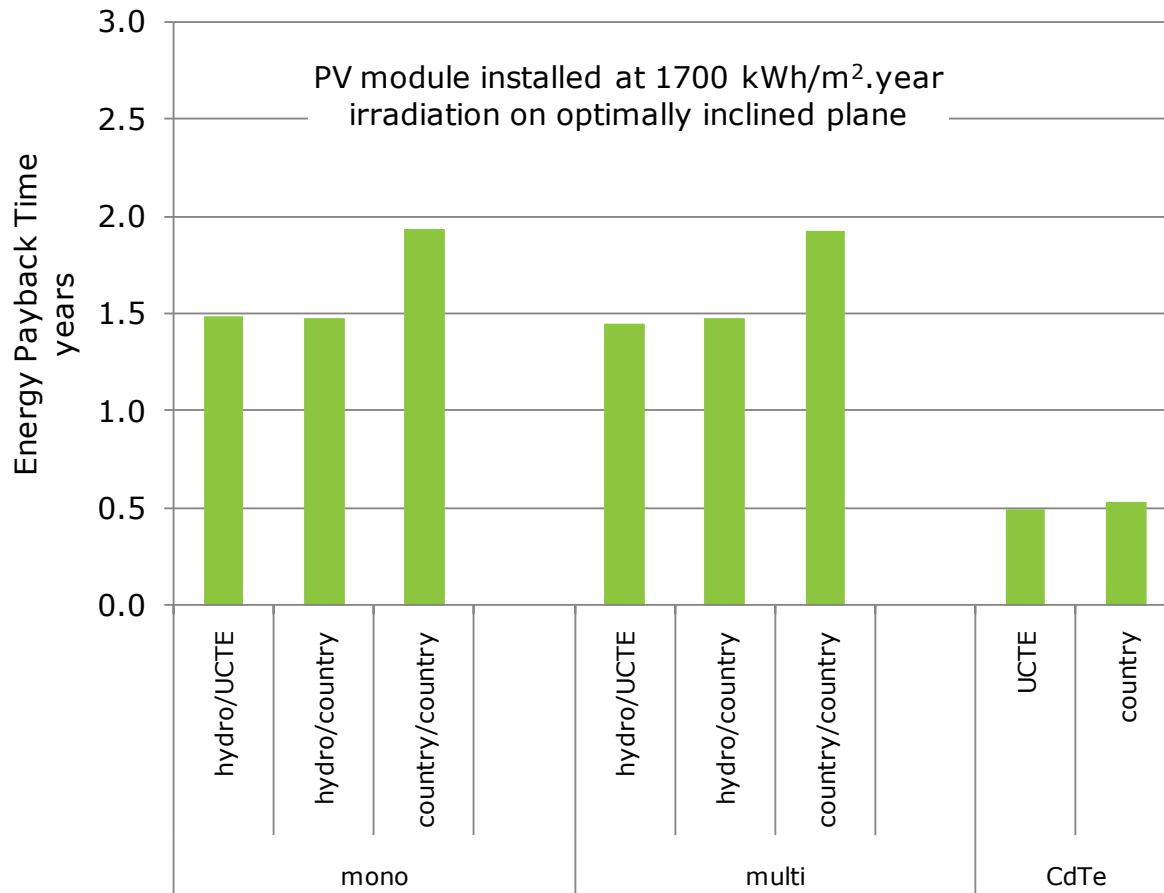

Poly-silicon production partly with local electricity  
(hydropower or CHP) instead of country mix

# Energy payback time

# Energy payback time

# Energy payback time

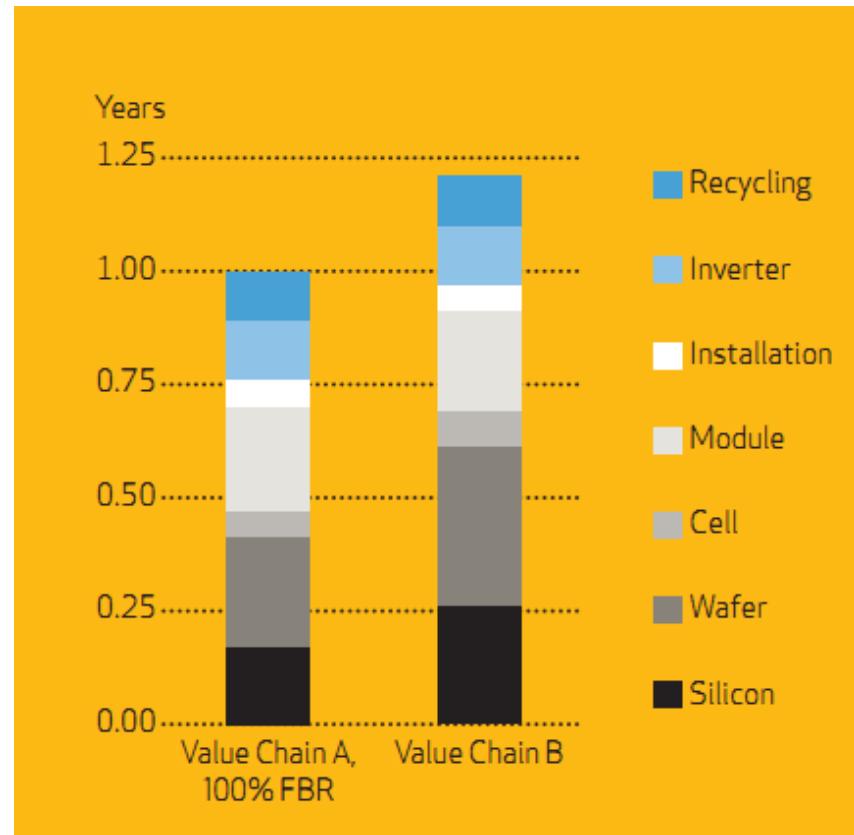

sensitivity

# Installation location

**Comparison of yearly global irradiation incident on optimally-inclined photovoltaic modules in 25 European Union member countries and 5 candidate countries**

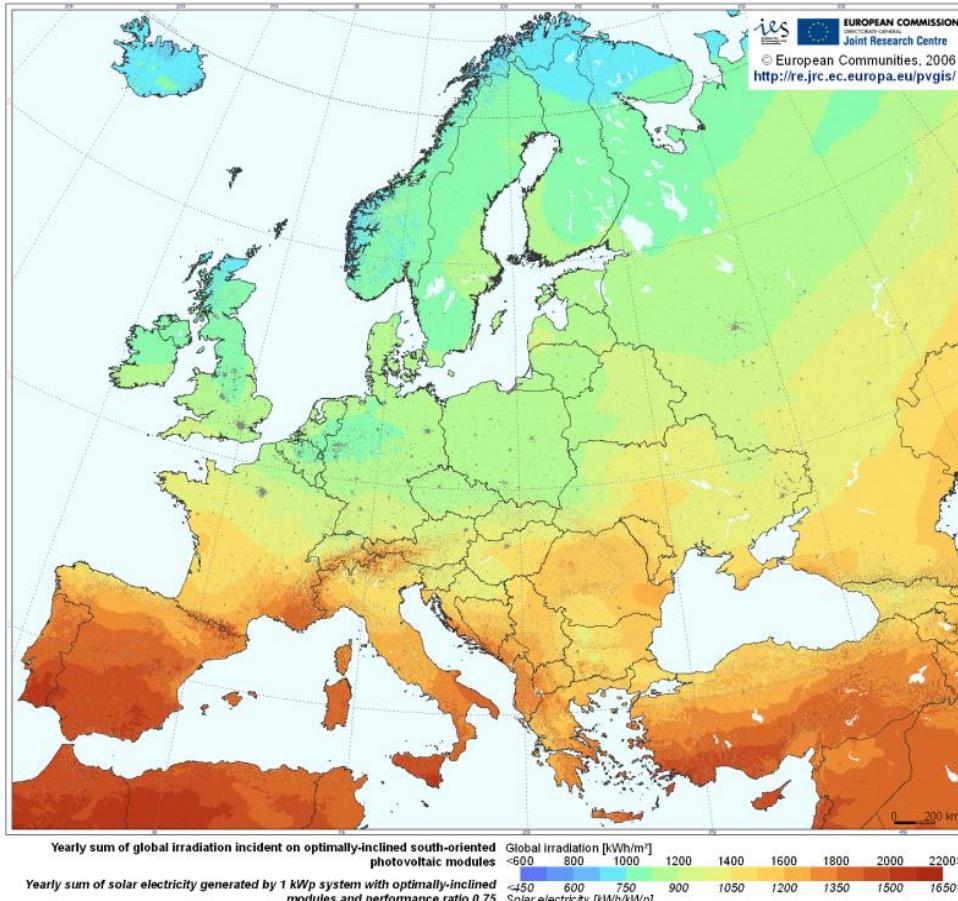

The country averages are connected by the red line. The minima/maxima in each country are shown as dashed lines, while the boxes show the range in which 90% of built-up areas in the country fit.

# Data request

- Update renewable energy data in GEMIS:
  - Project financed by BMU (German Federal Ministry for the Environment, Nature Conservation and Nuclear Safety)
  - draft/final report ready 31 October/November 2011
- Update ecoinvent database:
  - deadline data delivery to ecoinvent 31 December 2011
- Excel data template is available on request (english & chinese)

# Conclusions

Energy payback time & environmental impacts / kWh produced depend on production and installation location.

For commercial roof-top PV system with Siemens poly-Si from hydropower and wafer/cell/module from UCTE electricity, installed in Southern Europe (1700 kWh/m<sup>2</sup>.year)

- Energy payback time ~0.8-1.7 years
- Carbon footprint ~19-34 g CO<sub>2</sub>-eq/kWh
  
- More data needed to reduce uncertainty in analysis & make it more representative
