Preface xxix

Introduction xxx
History of the STEDT Project . . . xxx
Original Plan of STEDT . . . xxx
The ST/TB Family in its Areal Context . . . xxx
Typological diversity of TB: Indosphere and Sinosphere . . . xxx
Scope and subgrouping of the TB family . . . xxx
Evolving notions of ST/TB subgrouping . . . xxxi
Teleo- and meso-reconstruction . . . xxxi
The problem of nomenclature . . . xxxii
Special Challenges for ST/Eytmologization . . . xxxii
Phonological System of Proto-Tibeto-Burman . . . xxxiii
Organization of the Etymologies . . . xxxiii
The "tagging" process . . . xxxiii
Supporting forms and their attribution . . . xxxiii
Glosses of the supporting forms . . . xxxiii
Notes . . . xxxiii
Chinese comparanda . . . xxxiv
Treatment of loanwords . . . xxxiv
The Representation of Semantic Associations . . . xxxiv
Regularity and variation . . . xxxiv
Notational conventions and pan-allofamic formulas . . . xxxv
Parallel but surprising examples . . . xxxvi
Notational conventions with respect to variation . . . xxxvi
Similarities and differences between Tibeto-Burman and Indo-European patterns of variation . . . xxxvi
More on the concept of word family: blood relatives vs. adoptive ones . . . xxxvii
Etymological accuracy and rectification of possible errors . . . xxxvii
Desiderata for the future . . . xxxvii

A Short History of STEDT Software and Database Development xxxviii
Overview . . . xxxviii
A Timeline . . . xxxviii
Database Design and the Workflow of Etymologization . . . xxxviii
Supporting the workflow of "etymologization" . . . xxxviii
The Invention of "Tagging" . . . xxxviii
Production of the final "camera-ready" Dictionary-Thesaurus . . . xxxviii

1 The Body 1

1.1 Body Parts 3

1.1.1 Body 3
(1) PTB ***sya-n ≍ *sin*** FLESH / ANIMAL / BODY / AGENTIVE NOMINALIZER . . . 3
(1a) PTB ***sya-n*** FLESH / MEAT / GAME ANIMAL . . . 3
Chinese comparandum . . . 9
(1b) PTB ***sin*** BODY / OWNER / AGENTIVE NOMINALIZER . . . 9
Chinese comparandum . . . 9
(2) PTB ***guŋ*** BODY / BACK . . . 9
Chinese comparandum . . . 10
(3) PTB ***s-kəw*** BODY / CHEST / THORAX / CORPSE . . . 10
Chinese comparandum . . . 11
(4) PTB ***pum*** BODY / BELLY . . . 11
(5) PTB ***g-zuk*** BODY . . . 12
(6) PTB ***tyaŋ*** BODY . . . 12
(7) PTB ***t(s)ak*** BODY . . . 12
(8) PTB ***lu-s*** BODY . . . 12
(9) PTB ***puŋ*** BODY / TORSO / CORPSE . . . 13
(10) PTB ***tsyi*** BODY . . . 13
(11) PTB ***ti*** BODY . . . 13
(12) PTB ***k(y)am*** BODY . . . 13
(13) PTB ***(p/b)aŋ*** BODY . . . 13
(14) PTB ***du*** BODY . . . 13
(15) PTB ***nam*** BODY / ANIMAL . . . 14
(16) PTB ***s-twat*** BODY (UPPER) . . . 14
(17) PTB ***s-pi ≍ *pay*** BODY . . . 14
(18) PTB ***-pu ≍ *-pwa*** SUFFIX (nominalizer; bulk-provider) . . . 14
(19) IA ***jyu*** BODY . . . 15
(20) IA ***aŋ*** BODY / LIMB / MEMBER . . . 15
(21) PTB ***kwak*** BODY / TRUNK . . . 15
(22) PTB ***t(y)u*** HAIR . . . 15

1.1.1.1 Flesh/Meat 15
(1) PTB ***s-nya-k ≍ *hyak*** FLESH / MEAT . . . 15
Chinese comparandum . . . 16
(2) PTB ***mey*** FLESH / MEAT / GAME ANIMAL . . . 16
Chinese comparandum . . . 16
(3) PTB ***ka-y*** FLESH / MEAT . . . 16
Chinese comparandum . . . 16
(4) PTB ***m-dwaŋ*** FLESH / MEAT . . . 16
(5) PTB ***kan*** FLESH / MEAT . . . 17
(6) PTB ***m(y/w)an ≍ *min*** FLESH / MEAT / ANIMAL . . . 17
(7) PTB ***ta(m)-*** FLESH / MEAT . . . 17
(8) NEIA ***dwar*** FLESH / MEAT / ANIMAL . . . 17
(9) PDeng ***bre-ŋ*** FLESH / MEAT / ANIMAL . . . 17
(10) PTB ***ri-dak*** ANIMAL . . . 17
(11) PTB ***s/g-la*** FLESH / MEAT / DEER . . . 18
Chinese comparandum . . . 18
(12) PTani ***dɯn*** MEAT . . . 18
(13) PTB ***dzay ≍ *tsaːy*** CATTLE / LIVESTOCK / DOMESTIC ANIMAL . . . 18

1.1.1.2 Lean (Meat) 18
(1) PTB ***gray*** LEAN / THIN . . . 19
(2) PTB ***s-na*** LEAN (MEAT) . . . 19
(3) PTB ***m/s-kam*** LEAN (MEAT, PERSON) . . . 19
(4) PTB ***syi*** LEAN (MEAT, PERSON) . . . 19
(5) PTB ***m-dzyaŋ*** LEAN . . . 19
(6) PTB ***ni*** LEAN (MEAT) . . . 19
(7) PTB ***kruk ≍ *s-gyuk*** LEAN (MEAT) . . . 20
(8) PTB ***(ŋ/k)wak*** LEAN (MEAT) . . . 20

1.1.2 Life/Breathe/Exist 20
(1) PTB ***sryal*** BREED / BRING UP . . . 20
Chinese comparandum . . . 20
(2) PKar ***ʔbəᴮ*** RAISE, FEED (ANIMALS) . . . 20

1.1.2.1 Life/Live/Alive 20
(1) PTB ***dat*** LIVE / ALIVE . . . 20
Chinese comparandum . . . 20
(2) PKir ***b(l/r)o(n/m)*** LIVE . . . 20
(3) PKir ***let*** LIVE / SURVIVE / BE SAVED / BURN / SHINE . . . 20
(4) PTB ***srwak*** LIFE . . . 21
(5) PTB ***ta*** LIVE . . . 21
(6) PTB ***ts(y)ow*** LIVE . . . 21
(7) PTB ***mwa-n/s*** LIFE / BREATH . . . 21
(8) PLB ***lwa*** LIVE / ALIVE . . . 21
(9) PNN ***ryəŋ*** ALIVE . . . 22
(10) PCN ***a-kam*** LIFE . . . 22
(11) PKC ***nuŋ-I*, *nun-II*** LIVE / ALIVE . . . 22

1.1.2.2 Breath/Breathe 22
(1) PTB ***m-sak*** BREATH(E) / LIFE . . . 22
Chinese comparandum . . . 25
(2) PTB ***h(r)u*** BLOW / BREATH(E) / LIFE . . . 25
Chinese comparandum . . . 25
(3) PTB ***d-buk*** BREATH(E) / LIFE . . . 25
(4) PTB ***g/m-swan*** BREATH(E) / LIVE . . . 26
(5) PTB ***dwam*** BREATH(E) / LIVE . . . 26
(6) PTB ***ti*** BREATHE . . . 26
(7) NEIA ***ha*** BREATHE . . . 26
(8) PTB ***raŋ***[1] BREATHE / DRAW (BREATH) . . . 26
(9) PL ***ku*** BREATHE . . . 26
(10) PTB ***g-haŋ*** GASP / PANT . . . 27
(11) PTani ***tur*** ALIVE . . . 27
(12) PTB ***s(y)am-s*** BREATH / LUNG / SPIRIT / VOICE / HEART . . . 27
Chinese comparandum . . . 28
(13) PTB ***waŋ*** BREATHE . . . 28
(14) PCN ***tʃh [a/ə] n*** BREATHE . . . 28
(15) PTB ***r-ŋam*** BREATHE / PANT . . . 28
(16) PTB ***s-ləy*** PANT . . . 28
(17) PTB ***duŋ ≍ *duk*** BE / BREATHE . . . 28

1.1.2.3 Existence 28
(1) PTB ***s/g-ray ≍ *way*** BE / COPULA / NOMINALIZER / SUBORDINATOR / GOD . . . 28
(1a) PTB ***g-ray*** BE / COPULA / NOMINALIZER / SUBORDINATOR . . . 28
(1b) PTB ***g-ray*** GOD / CREATOR . . . 28
(1c) PTB ***way*** BE / COPULA / NOMINALIZER / SUBORDINATOR . . . 28
Chinese comparandum . . . 29
(1d) PTB ***s-ray*** PLURALIZER . . . 29
(2) PTB ***g-na-s*** STAY / REST / DWELL / BE / LIVE / ALIGHT / PERCH . . . 29
(3) PLB ***C-prik*** BE / BE ABLE . . . 30
(4) PNN ***C-nəːŋ*** LIVE / BE . . . 30
(5) PTB ***s-ri-t ≍ *s-rut*** BE / EXIST / COPULA . . . 30
Chinese comparandum . . . 30
(6) NEIA ***ley*** BE / EXIST / HAVE . . . 30
(7) PTB ***ʔum*** DWELL / EXIST / LIVE / STAY . . . 30
(8) PTB ***tsam*** STAY / SPEND (time) . . . 30
(9) PTB ***nay*** COPULA / BE . . . 31
(10) PTB ***g-sa(ŋ)*** GOD / CREATOR . . . 31

1.1.2.4 Be able 31
(1) PTk ***ʃap*** HAVE THE ABILITY . . . 31

1.1.3 Hungry 31
(1) PTB ***mwat ≍ *ŋ(w)at*** HUNGRY / THIRSTY . . . 31
Chinese comparandum . . . 32
(2) PTB ***b-kri-n/s*** HUNGRY . . . 32
Chinese comparandum . . . 32
(3) PTB ***nwaŋ*** HUNGRY . . . 32
(4) PTB ***kwa-k*** HUNGRY / THIRSTY . . . 33
(5) PKir ***sok*** HUNGRY . . . 33
(6) PTB ***wan*** HUNGRY . . . 33
(7) PBod ***l-tok*** HUNGRY . . . 33
(8) PCN ***hja [ː] m*** BE HUNGRY . . . 33
(9) PCC ***kraam*** FAMINE / DEARTH . . . 33
(10) PTB ***ywaŋ-s*** HUNGRY . . . 33
(11) PNC ***kial*** HUNGRY . . . 33
(12) PTk ***tʰaj*** HUNGRY . . . 33

1.1.3.1 Thirsty 34
(1) PTB ***si(p)*** THIRSTY / HUNGRY . . . 34
(2) PTB ***s-wi ≍ *s-way*** DRIED UP / THIRSTY . . . 34
(3) PTB ***s-pa(ŋ/k)*** THIRSTY . . . 35
(4) PTB ***g-ra(ŋ/k)*** THIRSTY / HUNGRY . . . 36
(5) PNN ***s-lal*** THIRSTY / HUNGRY . . . 36
(6) PTB ***wat*** THIRSTY . . . 36
(7) PTB ***pu*** THIRSTY . . . 36
(8) PKir ***min*** THIRST . . . 36
(9) PTB ***bal*** TIRED / THIRSTY . . . 36
Chinese comparandum . . . 37
(10) PTB ***k(w)am*** THIRSTY / DRIED OUT . . . 37
Chinese comparandum . . . 37
(11) PTB ***(k/g)a(ː)ŋ*** ROAST / TOAST / DRY / HOT / BURN / THIRSTY . . . 37
Chinese comparandum . . . 38
(12) PTB ***gru ≍ *grwa*** DRY / DRIED OUT . . . 38
(13) PTB ***kan*** DRY (UP) . . . 39
Chinese comparandum . . . 39
(14) PKC ***haal*** CRAZE / THIRST . . . 39
(15) PTk ***rew*** THIRST . . . 39

1.1.3.2 Satiated/Full/Enough 39
(1) PTB ***m-pup*** SATIATED . . . 39
Chinese comparandum . . . 40
(2) PBod ***tsim*** SATED / SATISFIED . . . 40
(3) PTB ***(g/k)aŋ*** FULL / SATIATED . . . 40
(4) PTB ***m-gra-ŋ*** SATIATED / PROVISIONS / GRAIN . . . 40
Chinese comparandum . . . 40
(5) PTB ***kru*** SATIATED . . . 40
(6) PTB ***m-dyat*** SATIATED . . . 41
(7) PTB ***s/k-wa*** SATIATED . . . 41
(8) PLB ***gyi***[2] SATIATED . . . 41
(9) PTB ***ka-s*** SATIATED . . . 41
(10) PTB ***m-nyəw-t/s*** FULL / SATIATED . . . 41
(11) PTB ***mwa*** FULL / SATIATED . . . 42

(12) PTB *luk ENOUGH / SATIATED . . . 42
Chinese comparandum . . . 42
(13) PTB *(p/b)liŋ FULL / FILL . . . 42
Chinese comparandum . . . 43
(14) PLB *N-bri[1]/[2] FULL / COMPLETE . . . 43
(15) PKC *kim COMPLETE / FULL . . . 44
(16) PCN *p[a/ə]n COMPLETE / SUFFICIENT / FULL . . . 44
(17) PKar *kəʔ[D] FEEL FULL (AFTER EATING) . . . 44
(18) PTB *m-nywa(n/t) FULL (of container) . . . 44
(19) PTk *poj FULL / COMPLETE . . . 44
(20) PTB *l-(t/d)yam FULL / FLAT / STRAIGHT . . . 44
Chinese comparandum . . . 44
(21) PTB *taw FULL / SATIATED . . . 44
(22) PKC *ɗayʔ SUFFICE / ENOUGH . . . 44

1.1.4 Wake/Conscious/Alert **45**
(1) PTB *s-nəw AWAKE / AWAKEN . . . 45
(2) PTB *m-sow ARISE / AWAKE / AWAKEN . . . 45
(3) PTB *s(y)a AWAKE . . . 45
(4) PTB *(t)sin-t WAKE . . . 46
(5) PBm *bun AWAKE . . . 46
(6) PTB *(t/d)uŋ WAKE . . . 46
(7) PTB *s(y)u-ŋ/k WAKE UP / MORNING / CLEAR-HEADED / SOBER UP . . . 46
Chinese comparandum . . . 46
(8) PTB *b/s-raŋ MORNING / AWAKE / ALERT . . . 46
Chinese comparandum . . . 47
(9) PTB *tu GET UP / RISE / AWAKEN . . . 47
(10) PTB *g-r(y)ap STAND . . . 47
Chinese comparandum . . . 49
(11) PTB *kyi LIFT / RAISE / AWAKE . . . 49
Chinese comparandum . . . 49
(12) PKir *pok AWAKEN / AROUSE . . . 49
(13) PKC *khraŋ-I, *khraŋʔ-II AWAKE . . . 49
(14) PKC *hriim RECUPERATE / REVIVE . . . 49
(15) PTB *kruk ROUSE / AWAKEN / DISTURB . . . 49
Chinese comparandum . . . 50
(16) PTk *niŋ STAND . . . 50
(17) PTani *dak STAND (posture) . . . 50
(18) PKar *thəŋ[B] STAND (v.) . . . 50
(19) PKC *phoo(k/ŋ) STARTLE / ALARM / WAKE UP . . . 50
(20) PTani *ɦut[2] WAKE UP . . . 50
(21) PTB *tsywar AWAKE . . . 50
(22) PTB *swat AWAKE . . . 50
(23) PTB *dar AWAKE . . . 50

1.1.4.1 Sleep/Be asleep **51**
(1) PTB *s-y(i/u)p SLEEP . . . 51
(2) PTB *g-(d)z(i/u)m SLEEP . . . 55
Chinese comparandum . . . 55
(3) PTB *m/s-nyal SLEEP / SLEEPY / LIE DOWN . . . 55
Chinese comparandum . . . 56
(4) PTB *r/s-mwəy SLEEP / DREAM . . . 56
Chinese comparandum . . . 57
(5) PTB *g/r-nyit SLEEP / NOD . . . 57
(6) PTB *(k/g)li-n SLEEP . . . 57
(7) PTB *ka(r) SLEEP . . . 57
(8) PTB *draŋ SLEEP / DREAM . . . 57
(9) PTB *g-laːm LIE DOWN . . . 57
(10) PTani *(g/k)rət LIE DOWN . . . 57
(11) PKC *ŋuu NOD / DOZE . . . 57
(12) PTk *pi SLEEP . . . 57

1.1.4.2 Dream **57**
(1) PTB *s/r-ma(ŋ/k) DREAM . . . 57
Chinese comparandum . . . 61
(2) PTB *m-ŋwa DREAM . . . 61
(3) PKir *sen SEE (DREAM) . . . 61

1.1.5 Strength **61**
(1) PTB *g/m/b-raŋ STRONG / FIRM / TENSE . . . 61
Chinese comparandum . . . 61
(2) PTB *d-baŋ STRENGTH / POWER . . . 61
Chinese comparandum . . . 62
(3) PTB *ʔan STRENGTH . . . 62
(4) PTB *tsyi-k STRENGTH . . . 62
(5) PTB *b-tsan STRONG / FIRM / STEADFAST . . . 62
(6) PTB *twal STRONG / HARD / TOUGH . . . 62
(7) PTB *sak ROUGH / SCALY . . . 62
(8) PTB *kywaŋ HARD / SOLID . . . 63
(9) PTB *tsak-t HARD / SOLID . . . 63
(10) PTB *s-ra HARD / DIFFICULT / POOR / DISTRESSED . . . 63
Chinese comparandum . . . 63
(11) PTB *kak HARD / DIFFICULT . . . 63
(12) PTB *s-yak HARD / DIFFICULT . . . 64
Chinese comparandum . . . 64
(13) PCN *a-ʒ[a/ə]n POWER / WRATH . . . 64
(14) PTB *k-ra STRENGTH / WIN / CLASSIFIER FOR PEOPLE . . . 64
(15) PTB *r-kaŋ STRONG . . . 65
Chinese comparandum . . . 65
(16) PKC *tsak STRONG / TOUGH . . . 65
(17) PTk *ʃon WEAK . . . 65

1.1.5.1 Sick/Hurt/Ache **65**
(1) PTB *na-n/t ILL / PAIN / SORE / ACHE / DIFFICULT / EVIL SPIRIT . . . 65
Chinese comparandum . . . 67
(2) PTB *tsa-t ⪤ *dza-t HOT / FEVER / HURT / ILL / HUNGRY . . . 67
Chinese comparandum . . . 68
(3) PTB *t(u/i)(k/ŋ) HURT / ACHE . . . 68
Chinese comparandum . . . 68
(4) PTB *m-gu ILL / HURT / ACHE . . . 68
(5) PTB *s-nyuŋ SAD / TIRED / ILL / ACHY . . . 69
(6) PKir *ŋet ILL / ACHE . . . 69
(7) PTB *r-kyi SICK / ACHE . . . 69
(8) PTB *bran CONVALESCE / RECOVER / RETURN . . . 69
Chinese comparandum . . . 69
(9) PTB *s-ra-y DISEASE / ILLNESS / AILMENT / DISCOMFORT / HOT . . . 69
(10) PCC *zoy FEEBLE . . . 70
(11) PTB *h(i/u)t NUMB / ACHE / HURT . . . 70
(12) PCN *khuʔ WOUND / INJURY / SCAR . . . 70

1.1.5.2 Swollen/Swell/Bloated **70**
(1a) PTB *s-b[w]a(m/p) SWELL / SWOLLEN / FAT / THICK / ROUNDED PART . . . 70
(1b) PTB *bwap CALF / LEG . . . 71
(2) PTB *bwar SWELLING / GOITER . . . 71
(3) PTB *bwat PREGNANT / SWOLLEN . . . 71
(4) PTB *l/m-ba GOITER . . . 72
(5) PKir *hom SWELL . . . 72
(6) PKar *hɲɔʔ[D] SWOLLEN, SWELLING . . . 72
(7) PKC *puar BLOAT / ARROGANT / FULL / SWELL . . . 72
(8) PKC *ɓaw BUMP / SWELL . . . 72
(9) PKC *wuuŋ SWELL / SWOLLEN . . . 72
Chinese comparandum . . . 72
(10) PTk *wuur SWELL / BE SWOLLEN . . . 72

1.1.6 Die/Deathly **72**
(1) PTB *səy DIE . . . 72
Chinese comparandum . . . 75
(2) PTB *s-miːt EXTINGUISH / SHUT ABRUPTLY / WINK / BLINK / DIE . . . 75
Chinese comparandum . . . 76
(3) PTB *g/s-ma-t/n PERISH / BE SPENT / BE LOST / LOSE / DISAPPEAR / EXHAUSTED / FORGET . . . 77
(4) PTB *taŋ DIE / DROP DOWN / CESSATIVE . . . 77
(5) PTB *s-pwap DIE / DEAD / CORPSE . . . 77
(6) PKir *het DIE . . . 77
(7) PTB *tsu DEAD, SPIRIT OF . . . 78
(8) PTB *swan DIE / SPIRIT OF DEAD / NON-VIABLE . . . 78
(9) PTB *(g/k)um DIE / KILL . . . 78
Chinese comparandum . . . 78
(10) PTB *kay DIE . . . 78
(11) PTani *ju DEMON / EVIL SPIRIT . . . 78
(12) PTB *grwaŋ DIE (respectful) . . . 78
(13) PKC *p(h)a(a)m DIE / WASTED . . . 78
(14) PKC *raaw SPIRIT . . . 78

1.1.6.1 Carcass/Dead Body **78**
(1) PTB *s-maŋ BODY / CORPSE . . . 78
(2) PTB *s-raw WITHERED / RESIDUE / CORPSE . . . 79
Chinese comparandum . . . 80
(3) PTB *ʔu BODY / CORPSE . . . 80
(4) PTB *rwa(ŋ/k) BODY / CORPSE . . . 80
(5) PTB *s-lwaŋ BODY / CORPSE / DISCARDED OBJECT . . . 80
(6) PTB *tuŋ CORPSE . . . 81
(7) PTB *s-pur CORPSE . . . 81
(8) PTB *dzal CORPSE . . . 81
Chinese comparandum . . . 81
(9) PTB *moy CORPSE . . . 81
(10) PTB *ŋun CORPSE . . . 81

1.2.1 Head/Headed **81**
(1) PTB *d-bu-s HEAD / CENTER / SENIOR MALE RELATIVE / UNCLE . . . 81
Chinese comparandum . . . 85
(1a) PTB *du HEAD . . . 85
Chinese comparandum . . . 85
(2) PTB *m/s-gaw HEAD . . . 85
Chinese comparandum . . . 88
(3) PTB *kuk HEAD / SKULL / WEAR ON THE HEAD . . . 88
(4) PTB *s-kawŋ HOLLOW / HOLLOW OBJECT / HEAD . . . 88
(5) PTB *k-lu HEAD . . . 88
Chinese comparandum . . . 89
(6) PTB *d-kyil CROWN OF HEAD . . . 89
(7) PTB *p-laŋ HEAD / FOREHEAD . . . 89
(8) PTB *(p/b)wa(ŋ) HEAD . . . 90
(9) PTB *l-t(y)ak UPPER SURFACE / TOP / ABOVE / CLIMB / LIFT / ASCENDING / PALATE . . . 90
Chinese comparandum . . . 91
(9a) PTB *s-tak HEAD . . . 91
(10) PTB *m-k(u/i)m PILLOW / BLOCK / BENCH / BEDSTEAD . . . 91
Chinese comparandum . . . 92
(11) PTB *s-mwan PILLOW / CUSHION . . . 92
(12) PTB *pil HEAD . . . 92
(13) IA *kbal HEAD / SKULL / FOREHEAD . . . 92

1.2.1.1 Skull **93**
(1) PTB *twat FOREHEAD / SKULL . . . 93
(2) PTB *kwam SKULL . . . 93
(3) PTB *grap SKULL . . . 93

1.2.1.2 Crown/Pate **93**
(1) PKC *tshiip TOP / CROWN (of head) . . . 93

1.2.1.3 Fontanel **93**
(1) PTB *s/l-ŋwa-y FONTANELLE / SKULL . . . 93
(2) PTB *(d/t)ip FONTANELLE / PATE . . . 93
(3) PTB *(r/w)a-y FONTANELLE . . . 94
(4) PTB *m-tswak FONTANELLE . . . 94

1.2.2 Horn(ed)/Antler **94**
(1a) PTB *m/g-(r)wa-ŋ/k/t HORN / ANGLE / CORNER . . . 94
Chinese comparandum . . . 95
(1b) PTB *nu-(ŋ/k) ⪤ *nwa-(ŋ/k) HORN . . . 95
(2) PTB *d-krəw HORN . . . 95
(3) PTB *r-ki HORN . . . 96
(4) PTk *ci HORN . . . 97
(5) PTB *bak ANTLER . . . 97

1.2.2.1 Comb/Crest **97**
(1) PTB *tsywak COCKSCOMB . . . 97
(2) PTB *l-mawk COCKSCOMB / CREST . . . 97
(3) PTB *m-tsywaŋ COCKSCOMB . . . 97
(4) PTB *prya(p/m) COCKSCOMB . . . 97
(5) PTB *r-tsey SUMMIT / CREST / COCKSCOMB . . . 97
(6) PTB *tsyar COCKSCOMB . . . 98

1.2.2.2 Comb (Hair) **98**
(1) PTB *ʔ-g[w]əy-s COMB (FOR HAIR) . . . 98
(2) PTB *m-si-t COMB / RAKE . . . 99
(3) PTani *tu(k/p) COMB (v.) . . . 99
(4) PTani *fi COMB (n.) . . . 99

1.2.3 Hair of Head **99**
(1) PTB *n-dzi-k HAIR (HEAD) . . . 99
(2) PTB *r-(n/m)ey HAIR OF HEAD . . . 100
(3) PTB *s-kra HAIR OF HEAD / HEAD . . . 101
(4) PTB *kriŋ HAIR (HEAD) / THREAD / SINEW / TENDON . . . 101
(5) PTani *dum HEAD / HAIR . . . 102
(6) PTB *(t)sam HAIR (head) . . . 103
Chinese comparandum . . . 106

1.2.3.1 Cowlick/Flexure **106**
(1) PTB *boy COWLICK . . . 106
(2) PTB *kwan or *kwa(l/r) COWLICK / TUFT OF HAIR . . . 106
Chinese comparandum . . . 106

1.2.3.2 Queue/Braid **106**
(1) PTB *(p/b)(r)a(n/t) BRAID / PLAIT / INTERWEAVE . . . 106
Chinese comparandum . . . 107

(4) PKC *kolʔ BALD / BARREN . . . 108
(5) PNC *tol BALD / SHAVEN . . . 108

1.2.4 Brain **108**
(1) PTB ***s-nəw-k** BRAIN . . . 108
Chinese comparandum . . . 109
(2) PTB ***g-ts(y)u(k/ŋ)** ⩙ ***g-ts(y)i-k** BRAIN / MARROW . . . 109
(3) PTB ***t(w)a(k/ŋ)** BRAIN / MARROW . . . 110
(4) PTB ***s-nip** BRAIN . . . 110
(5) PTB ***s/k-lwak** BRAIN . . . 110
(6) PTB ***(s/h)la** BRAIN / MARROW . . . 111
(7) PTB ***(k/g)lat** BRAIN / MARROW . . . 111
(8) PTB ***p(u/i)-k** BRAIN . . . 111

1.2.5 Face **111**
(1) PTB ***s-ma-y** FACE / CHEEK / FRONT / AHEAD / FIRST . . . 111
(2) PTB ***zyal** FACE / MOUTH . . . 112
(3a) PTB ***r-ŋwa-l** FACE / FRONT . . . 113
Chinese comparandum . . . 113
(3b) PTB ***ŋar** TOPKNOT / FOREPART / FRONT SIDE . . . 113
(3c) PTB ***s-ŋa** BEFORE / FRONT . . . 113
(4) PTB ***s-myal** FACE . . . 114
Chinese comparandum . . . 114
(5) PTB ***s-li** FACE . . . 114
(6) PTB ***pluŋ** FACE . . . 114
(7) PTB ***g-dwaŋ** FACE / FRONT PART . . . 115
(8) PTB ***(t)si** FACE / CHEEK . . . 115
(9) PTB ***kul** FACE . . . 115
Chinese comparandum . . . 115
(10) PTB ***b-ram** FACE . . . 115
(11) PTB ***ts(y/w)ak** FACE . . . 115
(12) PTB ***n(y)a-n** BLUSH / RED . . . 115
Chinese comparandum . . . 115
(13) PTani ***-mo:** FACE / CHEEK . . . 115

1.2.5.1 Forehead/Temples **116**
(1) PTB ***ta-y** FOREHEAD . . . 116
(2) PTB ***s-mawŋ** FOREHEAD . . . 116
(3) PTB ***m-twaŋ** FOREHEAD / HEAD / HAIR (OF HEAD) / HORN . . . 116
(4) PTB ***d-(p)ral** FOREHEAD / FACE . . . 117
(5) PL ***s-ka²** FOREHEAD . . . 117
(6) PTB ***g(w/r)aŋ** FOREHEAD . . . 117
(7) PTB ***s-ŋa-k** FOREHEAD / COCKSCOMB . . . 118
Chinese comparandum . . . 119
(8) PLB ***pu²** FOREHEAD . . . 119
(9) PTB ***kup** FOREHEAD . . . 119
(10) PTB ***haŋ** FOREHEAD / FACE . . . 119
(11) PCC ***bek** TEMPLE (of head) . . . 119

1.2.5.2 Jaw/Cheek **119**
(1) PTB ***m/s-ba** CHEEK / JAW / CHIN . . . 119
(2) PTB ***bwaŋ** CHEEK . . . 120
(3) PTB ***m-b(y/r)aŋ** CHEEK . . . 120
(4) PTB ***pow** CHEEK . . . 120
(5) PTB ***(t)s-wa(s/r)** CHEEK / BUTTOCK / CHIN . . . 120
(6) PTB ***g(y/w)ar** CHEEK / CHIN / JAW . . . 121
(7) PTB ***tsyi(p/m)** CHEEK / CHIN . . . 121
(8) PTB ***ney** CHEEK / CHIN . . . 121
(9) PTB ***wam** CHEEK / FACE . . . 121
(10) NEIA ***dzyay** ⩙ ***tsyay** CHEEK / JAW / CHIN . . . 121
(11) PTB ***gra** CHEEK / JAW . . . 122
(12) PTB ***kap** JAW / CHEEK / CHIN . . . 122
Chinese comparandum . . . 122
(13) PTB ***tsyaŋ** JAW . . . 122
(14) PTB ***b-rup** CHEEK / JAW . . . 122
(15) PTB ***k(w)aŋ** CHEEK / JAW / CHIN / FACE . . . 122
(16) PTB ***tri** JAW / CHIN . . . 122
(17) PTB ***kyit** ⩙ ***krik** LOWER JAW . . . 122
(18) PTB ***m-gal** JAW . . . 122
(19) IA ***gālā** CHEEK . . . 123
(20) IA ***baŋgar** JAW . . . 123
(21) PTB ***s-bi** ⩙ ***s-bay** CHIN / CHEEK . . . 123
(22) PTB ***gam** JAW / CHIN / MOLAR . . . 123
Chinese comparandum . . . 124
(23) PTB ***s-gram** CHEEK / FACE / JAW . . . 124
(24) PKC ***ɓeel** CHEEK . . . 125

1.2.5.3 Chin **125**
(1) PTB ***l/m-da(n/ŋ)** CHIN / CHEEK . . . 125
(2) PTB ***s-tu(n/m)** CHIN / CHEEK . . . 125
(3) PTB ***m/s-k(w)a-y** MOUTH / OPENING / SPREAD / DOOR / FACE / JAW . . . 125
Chinese comparandum . . . 128
(4) PTB ***s-kow** CHIN . . . 128
(5) PTB ***li** CHIN / DIMPLE . . . 128
(6) PTani ***čok** CHIN . . . 128
(7) PTB ***ŋam** CHIN / CHEEK / JAW . . . 128
(8) PTani ***praŋ** CHIN . . . 128

1.2.5.5 Beard/Moustache/Facial Hair **129**
(1) PTB ***ra** MOUSTACHE / BEARD / CHIN . . . 129
(2) PTB ***s-ma-ŋ** BEARD / MOUSTACHE . . . 129
(3) PTB ***(t)su-ŋ** HAIR / MANE / BEARD . . . 129
(4) PTB ***siŋ** ⩙ ***syaŋ** CHIN / JAW / BEARD . . . 130
(5) PTB ***(t)sya-y** BEARD / MOUSTACHE . . . 130
(6) PTB ***kway** MOUSTACHE / BEARD . . . 130
(7) PTB ***yar** MOUTH / MOUSTACHE / BEARD . . . 130
(8) PTB ***r-gya-n** BEARD . . . 130
(9) IA ***dāṛhi** BEARD . . . 130
(10) PTB ***g-wu** BEARD . . . 131

1.2.6 Eye **131**
(1) PTB ***s-myak** ⩙ ***s-mik** EYE . . . 131
(1a) PTB ***s-mik** EYE . . . 131
Chinese comparandum . . . 137
(1b) PTB ***s-myak** EYE . . . 137
(2) PTB ***dzyuŋ** ⩙ ***tsyuŋ** EYE . . . 142
(3) PTB ***m-du** EYE / EYEBALL . . . 142
(4) PTB ***s-kywar** EYEBALL / EYEBROW / EYELASH . . . 142
(5) PTB ***s-ruŋ** ROUNDED PART . . . 142
(6) PTB ***sey** FRUIT / ROSE / ROUND OBJECT . . . 142
(7) PTB ***b-ras** RICE / FRUIT / BEAR FRUIT / ROUND OBJECT . . . 145
Chinese comparandum . . . 145
(8) PTB ***s-nuk** BEAN / EYE . . . 145
Chinese comparandum . . . 146
(9) PTB ***(k/g)um** EYEBROW / EYELASH . . . 146
(10) PTB ***ba** or ***pa** EYELASH / EYELID . . . 146
(11) PTB ***s-(b)r(i/u)m** EYELASH / EYELID . . . 146
(12) PTB ***r/s/g-wa** WATER / RAIN . . . 146
Chinese comparandum . . . 148
(13) PTB ***si** WATER . . . 148
(14) NEIA ***gon** EYE . . . 148

1.2.6.1 Eyeball **149**
(1) PTB ***g-(d/r)a** EYEBALL . . . 149

1.2.6.2 Iris/Pupil **149**

1.2.6.4 Eyelid **149**

1.2.6.5 Eyelash **149**

1.2.6.6 Eyebrow **149**

1.2.6.7 Tears **149**
(1) PTB ***b-ləy-k** TEARS . . . 149
Chinese comparandum . . . 150

1.2.6.10 See/Look **150**
(1) PTB ***mraŋ** SEE . . . 150
Chinese comparandum . . . 151
(2) PTB ***m-kya(ŋ/n)** SEE / KNOW . . . 151
Chinese comparandum . . . 151
(3) PTB ***m/s-twaŋ** SEE / SHOW . . . 151
Chinese comparandum . . . 152
(4) PTB ***s-nyam** THINK / BRAIN . . . 152
Chinese comparandum . . . 152
(5) PTB ***ka(n/ŋ)** KNOW / SEE . . . 152
Chinese comparandum . . . 152
(6) PTani ***kaŋ** LOOK . . . 152
(7) PTk ***jaŋ** LOOK . . . 153
(8) PBod ***l-ta-s/t** LOOK . . . 153
Chinese comparandum . . . 153
(9) PTB ***ney** LOOK / TRY TO . . . 153
(10) PKC ***hmuu-I**, ***hmu?-II** SEE / FIND / GET / SHOW . . . 154
(11) NEIA ***huŋ** SEE . . . 154

1.2.6.12 Blink/Wink **154**
(1) PKC ***khrep** BLINK . . . 154
(2) PTk ***ʃep** BLINK . . . 154

1.2.6.13 Squint **154**
(1) PKC ***ka(a)y** SQUINT (eyes) . . . 154

1.2.6.14.2 Blind **154**
(1) PTB ***p-law(ŋ/k)** BLIND . . . 154
(2) PTB ***dwa(ŋ/k)** BLIND . . . 155
(3) PTB ***tsy(w)at** BLIND / TIGHTLY CLOSED . . . 155
(4) IA ***kāṇa** BLIND . . . 155
(5) PTk ***pew** BLIND . . . 155

1.2.7 Ear **156**
(1) PTB ***r/g-na** EAR / HEAR / LISTEN . . . 156
Chinese comparandum . . . 162
(2) PTB ***nam** EAR . . . 162
(3) PTB ***puŋ** HOLE . . . 162
(4) PTB ***m-tsywa-(k/ŋ)** EAR . . . 162
(5) PTB ***l-kwaŋ** EAR . . . 162
(6) PTB ***s-ri** EAR . . . 162
(7) PTB ***byaŋ** EAR / EARLOBE / FLAT THING . . . 163
(8) PTB ***b(r)aŋ** EAR / LOBELIKE PART . . . 163
(9) PTB ***myaŋ** EAR . . . 164
(10) PTB ***tsy(u/i)(l/r)** EAR . . . 164
(11) PTB ***kyap** EAR . . . 164
(12) PAsak ***rip-hi** EAR . . . 164
(13) PTB ***ruŋ** HOLE / ORIFICE / EAR . . . 164
(14) NEIA ***twar** EAR (in compounds) . . . 164

(16) NEIA ***ko(n/r)** EAR . . . 166
(17) PNC ***bil** EAR . . . 166
(18) PTani ***ña-ruŋ** EAR . . . 167

1.2.7.1 Earlobe **167**

1.2.7.2 Eardrum **167**

1.2.7.3 Earwax **167**
(1) PTB ***s-p(w)a-(p/k)** EARWAX . . . 167
(2) PTB ***tsyu** EARWAX . . . 167
(3) PTB ***ku** DIRT / FILTH . . . 167
Chinese comparandum . . . 167

1.2.7.4 Hear/Listen **167**
(1) PTB ***s-ta-s** ⩙ ***ta-n** HEAR . . . 167
(2) PTB ***s-nyan** HEAR / LISTEN . . . 168
Chinese comparandum . . . 169
(3) PTB ***(k/g)ra** HEAR / LISTEN / SOUND . . . 169
(4) PTk ***ʃa** HEAR . . . 169
(5) PCN ***ja** HEAR . . . 170
(6) PKC ***ŋaay** LISTEN / HARK . . . 170
Chinese comparandum . . . 170

1.2.7.5 Deaf **170**
(1) PTB ***(b/p)a:ŋ** DEAF . . . 170
(2) PTB ***tawŋ** DEAF . . . 171
(3) PTB ***l-ywa(ŋ/n)** DEAF . . . 171
Chinese comparandum . . . 171
(4) PTk ***kʰok** DEAF . . . 171
(5) PKar ***ʔəŋ^A** DEAF . . . 171

1.2.8 Nose **171**
(1) PTB ***s-na** ⩙ ***s-na:r** NOSE . . . 171
(2) PTB ***bu(k/ŋ)** NOSE / NOSTRIL . . . 176
(3) PTB ***l-di** NOSE . . . 177
(4) PTB ***bi** NOSE . . . 177
Chinese comparandum . . . 177
(5) PTB ***(k/g)ywaŋ** NOSE . . . 177
(6) PTB ***t(w)a(ŋ/n)** NOSE . . . 179
(7) PTB ***-ts(y)a** NOSE . . . 179
(8) PTB ***ka** ⩙ ***ŋa** NOSE . . . 179
(9) PKC ***hniit** BLOW (nose) . . . 179
(10) PKar ***k-mlɔN^A** TRUNK (OF AN ELEPHANT) . . . 179

1.2.8.1 Nostril **179**

1.2.8.3 Snout **179**
(1) PTB ***tun** SNOUT . . . 179

1.2.8.5 Smell **179**
(1) PTB ***s-mu(y/r)** SMELL / FRAGRANT . . . 179
(2) PTB ***bu** STINK / SMELL BAD . . . 180
(3) PTB ***(d/t)um** SMELL . . . 180
(4) PTB ***bat** SMELL / ODOR . . . 180
(5) PTB ***b-s(u/a)ŋ** SMELL / SCENT / FRAGRANT . . . 180
(6) PTB ***s-ŋu** SMELL . . . 180
(7) PTB ***s-rim** SMELL . . . 180
(8) PNN ***sri:ŋ** SMELL . . . 181
Chinese comparandum . . . 181
(9) PTB ***m/s-nam** SMELL . . . 181
(10) PKC ***thuu** STINK / SMELL (bad) . . . 184

1.3 Mouth and Throat **184**

1.3.1 Mouth **184**
(1) PTB ***s-mu:r** MOUTH / LIP / HOLD IN MOUTH / CHEW / FACE / GILLS . . . 184
Chinese comparandum . . . 186
(2) PTB ***ku(w)** MOUTH . . . 186
Chinese comparandum . . . 186
(3) PTB ***nap** MOUTH . . . 186
(4) PTB ***ak** CRACK OPEN / MOUTH / CHIN . . . 187
(5) PTB ***s-muk** MOUTH . . . 187
(6) TGTM ***suŋ** MOUTH . . . 187
(7) PTB ***ban** MOUTH / LIP . . . 187
(8) PTB ***(b/p)i** MOUTH . . . 188
(9) PTB ***m-p(r)(w)aŋ** MOUTH . . . 188
(10) PTB ***l-tywa** MOUTH / BEAK / FOOD / STOMACH . . . 188
Chinese comparandum . . . 189
(11) PTB ***tsywaŋ** MOUTH / BEAK . . . 189
(12) NEIA ***ki** MOUTH / LIP . . . 189
(13) PTB ***kwaŋ** MOUTH . . . 189
(14) PTB ***s-ŋyar** MOUTH . . . 189
(15) PTB ***nwaŋ** MOUTH . . . 189

1.3.1.1 Palate **189**
(1) PTB ***(t/d)a(ŋ/k)** PALATE / TOP PART . . . 189
(2) PLB ***ŋa-m** PALATE . . . 189
(3) PTB ***kur** PALATE . . . 190
(4) PTB ***d/r-kan** PALATE / GUMS . . . 190
(5) PTB ***ha(m/p)** PALATE . . . 190

1.3.1.3 Yawn/Gape **190**
(1) PTB ***ha-y** YAWN . . . 190
(2) PTB ***m-ha(:)m ≍ *kam** YAWN . . . 190
Chinese comparandum . . . 191
(3) PKC ***ʔaaŋ-I**, ***ʔaan-II** OPEN (mouth) . . . 191

1.3.1.4 Blow **191**
(1) PTB ***mu(r/l)** BLOW . . . 191
(2a) PTB ***pu** BLOW . . . 191
Chinese comparandum . . . 191
(2b) PTB ***pur** BLOW . . . 191
(3) PTB ***tsuy** BLOW . . . 191
Chinese comparandum . . . 192
(4) PTB ***hywan** BLOW . . . 192
(5) PTB ***s-la** BLOW . . . 192
(6) PTB ***swar** BLOW / BLOW NOSE / BREATHE / LUNG . . . 192
(7) PTB ***k/s-mut** BLOW (with mouth) . . . 192
(8) PKC ***tsheem** BLOW / FAN (v.) . . . 194
(9) PTk ***pʰan** BLOW . . . 194
(10) PTk ***ri** BLOW . . . 194

1.3.2 Lip **194**
(1) PTB ***m-ts(y)ul** NOSE AND MOUTH / LIP / LOWER PART OF FACE . . . 194
Chinese comparandum . . . 195
(2) PTB ***s-nyas** LIP . . . 195
(3) PTB ***r-ka(:)m** LIP / MOUTH / EDGE / BANK . . . 196
Chinese comparandum . . . 196
(4) PTB ***b(i/u)l ≍ *byal** LIP / LOBE / LID . . . 196
(5) PTB ***b-lu** LIP . . . 197
(6) PTk ***caj** LIP . . . 197

1.3.2.1 Suck/Suckle **197**
(1) PTk ***tsim** SUCK (as a leech) . . . 197

1.3.2.2 Kiss **197**
(1) PKC ***hnam** KISS . . . 197

1.3.3 Tongue **197**
(1a) PTB ***m/s-lay ≍ *s-ley** TONGUE . . . 197
(1b) PTB ***s/m-l(y)a-t** TONGUE . . . 199
Chinese comparandum . . . 200
(1c) PTB ***s-lyam** TONGUE / LICK / FLAME . . . 200
Chinese comparandum . . . 201
(1d) PTB ***s-lya:w** LICK / TONGUE . . . 201
(1e) PTB ***m/s/g-lyak** LICK / TONGUE . . . 201
Chinese comparandum . . . 203

1.3.4 Tooth **203**
(1) PTB ***s/p-wa** TOOTH . . . 204
(2) PTB ***m-dzyway** TOOTH / TUSK . . . 207
(3) PTB ***s-k-lu** TOOTH . . . 208
(4) PTB ***bu(k/p)** TOOTH (MOLAR) / WISDOM TOOTH . . . 208
(5) PTB ***b/k-(l)aŋ** TOOTH . . . 208
(6) PTB ***s-wik** TUSK / FANG / CANINE TOOTH . . . 208
(7) PTB ***d-yu(ŋ/k)** TOOTH . . . 209
(8) PTB ***twaŋ** TOOTH / MOLAR . . . 209

1.3.4.1 Eyetooth/Tusk/Canine Tooth **209**
(1) PTB ***s-ŋya** TUSK / TOOTH . . . 209
Chinese comparandum . . . 209
(2) PTB ***k(w/y)aŋ** TUSK / MOLAR . . . 209
(3) IA ***dārhā** TUSK / CANINE TOOTH . . . 210

1.3.4.2 Molar **210**
(1) IA ***bangār-** MOLAR . . . 210
(2) PTB ***pwi(y)-n** FEMALE / MOTHER / BIG / MOLAR . . . 210
Chinese comparandum . . . 210

1.3.4.3 Gums **210**
(1) PTB ***r/m-nil** GUMS . . . 210
Chinese comparandum . . . 211
(2) PL ***diŋ** GUMS . . . 211
(3) PTB ***(r/n)iŋ** GUMS . . . 211
(4) PTB ***kwaŋ** PALATE / GUMS . . . 211

1.3.4.4 Bite/Hold in Mouth **211**
(1) PTB ***g-wa-t** BITE / CHEW . . . 211
(2) PTB ***C-tsat** BITE DOWN ON . . . 211
(3) PTB ***k(w)ak ≍ *k(y)ak** BITE / CHEW . . . 212
(4) PTB ***par** HOLD IN MOUTH / BITE . . . 212
(5) PTB ***hap** BITE / SNAP AT / MOUTHFUL . . . 212
(6) PTB ***kri:t** GRIND . . . 213
(7) PKar ***ʔɛNᴮ** BITE (v.) . . . 213
(8) PKC ***tsuu-I**, ***tsuk-II** PECK / BITE . . . 213
(9) PKC ***pet-I**, ***peʔ-II** BITE . . . 213
(10) PKC ***tewʔ** NIBBLE / BITE / GNAW . . . 213
(11) PKC ***seʔ** BITE . . . 213
(12) PTB ***gam** PUT INTO MOUTH, SEIZE WITH MOUTH . . . 213
Chinese comparandum . . . 214

2.4.3 Animal Qualities **616**
(1) PKC *hraaŋ-I, *hraan-II WILD / FRANTIC / ANGRY . . . 616

3 Natural Objects, Plants, Foods **617**

3.1.0 Plants **619**
(1) PTB *dziŋ PLANT (n.) / TREE . . . 619

3.1.1 Names of trees and shrubs **619**
(1) PKC *ɓ(o/u)ŋ BANYAN . . . 619
(2) PKC *hmooŋ ≍ *hmuuŋ BANYAN . . . 619
(3) PKC *rii BANYAN . . . 619
(4) PKC *hriaŋ BIRCH TREE . . . 619
(5) PTB *grwa BIRCH . . . 620
Chinese comparandum . . . 620
(6) PKC *paaŋ COTTON . . . 620
(7) PKar *thəNᴬ DIPTEROCARPUS . . . 620
(8) PKC *θaar PINE (tree) / FIR . . . 620
(9) PTB *m/s-r(a/o)w PINE / FIR . . . 620
(10) PTB *taŋ PINE / FIR . . . 620
Chinese comparandum . . . 621
(11) PTB *ri(ː)m RATTAN / CANE . . . 621
(12) PTani *soŋ RATTAN / CANE . . . 621
(13) PTB *si(ŋ/k) TREE / WOOD / FIREWOOD . . . 621
Chinese comparandum . . . 629
(14) PTB *glaŋ WILLOW / POPLAR . . . 629
Chinese comparandum . . . 629

3.1.2 Plant parts and types **629**
(1) PTani *fiəː BAMBOO (large species) . . . 629
(2) PKar *ʔbaŋᴮ BAMBOO SHOOT . . . 629
(3) PTB *r/g/s-pʷa BAMBOO . . . 629
Chinese comparandum . . . 630
(4) PKC *maaw BAMBOO . . . 630
(5) PTB *ma BAMBOO . . . 631
(6) PKC *tuay BAMBOO-SHOOT . . . 632
(7) PTB *s-m(y)ik CANE / SPROUT . . . 632
(8) PTB *s-nam EAR / SPIKE OF GRAIN . . . 632
(9) PTB *m-da FERN / BRACKEN . . . 632
(10) PTani *kreː ? GINGER . . . 633
(11) PTk *hol GINGER . . . 633
(12) PTB *kyaŋ GINGER . . . 633
Chinese comparandum . . . 633
(13) PTB *pwaːy HUSKS / SHAVINGS / CHAFF . . . 633
Chinese comparandum . . . 634
(14) PTB *g-ram INDIGO . . . 634
Chinese comparandum . . . 634
(15) PKC *thiŋ-luaŋ LOG . . . 634
(16) PTB *tum ≍ *dum LOG / HUNK OF WOOD / SECTION OF SOMETHING LONG . . . 634
(17) PKC *mim MAIZE . . . 634
(18) PTani *fior PANJI (pointed spike) . . . 634
(19) PTani *puːrʔ ROOT . . . 635
(20) PKar *rwiᴮ ROOT . . . 635
(21) PTB *(b/p)ul ROOT / STUMP / TREE . . . 635
Chinese comparandum . . . 635
(22) PKC *phel SLIVER / SPLINTER . . . 635
(23) PKC *θuŋ STICK / STALK / STEM . . . 635
(24) PKC *θuu SUGAR CANE . . . 635
(25) PTk *ʃat THORN . . . 635
(26) PKC *hliŋ THORN . . . 635
(27) PKC *ɗo(o)ŋ TIP / END / SPROUT . . . 635
(28) PTB *kuːŋ TREE / BRANCH / STEM . . . 636
Chinese comparandum . . . 636
(29) PKar *məŋᴮ TRUNK (OF A TREE), FIRE WOOD . . . 636
(30) PCN *th-ləjʔ VINE / VEIN / SINEW . . . 636

3.1.3 Leaves **636**
(1) PNC *teʔ LEAF . . . 636
(2) PTB *s-nas LEAF . . . 636
Chinese comparandum . . . 637
(3) PCN *a-wa LEAF . . . 637
(4) PTB *lay LEAF / PAPER . . . 637
(5) TGTM *ᴬbaː leaf . . . 637

3.1.4 Seeds and flowers, nuts **637**
(1) PTB *baːr BLOOM / FLOWER . . . 637
Chinese comparandum . . . 638
(2) PTB *muːm BUD . . . 638
(3) PTB *r-moy BUD / BLOSSOM / BLOSSOMING . . . 638
(4) PKC *ɓor BUNCH (flower) . . . 638
(5) PTB *b/s-wat FLOWER . . . 638
(6) PTani *pun FLOWER . . . 639
(7) PKar *phɔᴬ FLOWER . . . 639
(8) PKC *huum GRAIN (of unhusked rice and millet) . . . 639
(9) PKC *θaŋ GRAIN / SEED . . . 639
(10) PTB *(m/b)rəw GRAIN / SEED / LINEAGE . . . 639
Chinese comparandum . . . 640
(11) PTani *ñat¹ MILLET (Job's tear) . . . 640
(12) PTani *jak MILLET (fox-tail) . . . 640
(13) PKC *θaaŋ MILLET / RICE PADDY . . . 640
(14) PTB *bay PEA / BEAN / SMALL WEIGHT OR COIN . . . 640
(15) PTk *saam RICE (HULLED) . . . 640
(16) PTani *pim RICE (cooked) . . . 640
(17) PCN *a-tsaŋ RICE (husked, uncooked) . . . 640
(18) PTani *am-bɯn RICE (uncooked) . . . 641
(19) PTB *bu RICE . . . 641
(20) PTB *ma-y ≍ *mey RICE / PADDY . . . 641
Chinese comparandum . . . 641
(21) PTB *li SEED . . . 641
(22) PTB *yəw SEED . . . 642
(23) PKC *tshii SESAME SEED . . . 642
(24) PTB *s-nam SESAME . . . 642
(25) TGTM *ᴬkan food (cooked rice) . . . 642
(26) TGTM *ᴮgrwa/ᴬgrwa wheat . . . 642

3.1.5 Fruits and vegetables **642**
(1) PTani *ko-pak BANANA . . . 642
(2) PKC *ɓan-hlaa BANANA . . . 642
(3) PTB *mow-t BANANA . . . 643
(4) PKC *ɓok-ɓoon ≍ *ɓuk-ɓu BRINJAL / EGGPLANT . . . 643
(5) PKC *man-taat BRINJAL / EGGPLANT . . . 643
(6) PKC *ʔan-kram CABBAGE / MUSTARD / GREENS . . . 643
(7) PKar *haKᴰ CHILI PEPPER / PUNGENT . . . 643
(8) PTani *kuŋ CUCUMBER . . . 643
(9) PKC *yil CUCUMBER . . . 643
(10) PKar *ʔdejᴬ CUCUMBER . . . 643
(11) PTani *braŋ-jom EGGPLANT . . . 643
(12) PKar *s-gaNᴬ EGGPLANT . . . 643
(13) IA *laśuna- GARLIC . . . 643
(14) PKar *srɔᴮ HEMP . . . 643
(15) PKC *seer LEMON / LIME (sour) . . . 644
(16) PKar *khɔʔᴰ MANGO . . . 644
(17) NEIA *haːy MANGO . . . 644
(18) PCC *vul MEDLAR / WILD APPLE . . . 644
(19) PTB *b-tsuŋ ONION . . . 644
Chinese comparandum . . . 644
(20) PTB *swa-n ONION / GARLIC . . . 644
Chinese comparandum . . . 645
(21) PKC *may-tay PEACH . . . 645
(22) PTB *s-ŋak PLANTAIN / BANANA . . . 645
(23) PKar *luNᴮ PUMPKIN (ashy) . . . 645
(24) PTB *maːy PUMPKIN / GOURD . . . 645
(25) PLB *pu PUMPKIN / GOURD . . . 646
Chinese comparandum . . . 646
(26) PLB *blum² TARO . . . 646
(27) PKC *ɓaal TARO / ARUM . . . 646
(28) PTB *g/s-rwa TARO / YAM / TUBER . . . 646
Chinese comparandum . . . 647
(29) PTani *lap WILD GREEN ONION . . . 647
(30) PTB *kywəy YAM . . . 647
(31) PTk *paj YAM . . . 647
(32) PKC *ɓaa YAM . . . 647
(33) PTB *m-n(w)ay YAM / TARO . . . 647
(34) TGTM *ᴮnoː garlic . . . 647

3.1.6 Extracts and processed forms **647**
(1) PKC *taay BEER RESIDUE . . . 647
(2) PKC *ɗaay BIRD-LIME . . . 647
(3) PKC *meʔ ≍ *hmeʔ CURRY . . . 647
(4) TGTM *ᴮkʰu CURRY / SIDE DISH . . . 648
(5) PTB *h(y)an CURRY / VEGETABLE DISH . . . 648
(6) PNC *vuy FLOUR . . . 648
(7) PKC *tshaŋ FLOUR / BREAD . . . 648
(8) PL *raŋ² GREEN VEGETABLE / CABBAGE / MUSTARD . . . 648
(9) PTB *yəw LIQUOR . . . 648
Chinese comparandum . . . 648
(10) PTani *poŋ LIQUOR . . . 648
(11) PTB *m-dzəy LIQUOR . . . 649
(12) PTB *(d/t)uk POISON . . . 649
Chinese comparandum . . . 650
(13) PTB *pʷu POISON . . . 650
(14) PKC *tuur POISON . . . 650
(15) PKC *ruu POISON / POTION . . . 650
(16) PKar *throʔᴰ RESIN . . . 650
(17) PTB *h(w)aŋ RICE / CURRY . . . 650
(18) PKC *ʔaay SPICE / TURMERIC / YELLOW . . . 651
(19) PCN *m-(w)a STRAW . . . 651
(20) PNC *bii THATCH . . . 651
(21) PKC *(ŋaay-)ɗii THATCH . . . 651
(22) PTB *r-tsaːl VEGETABLE . . . 651
(23) PTani *fioː VEGETABLE / CURRY . . . 651
(24) PL *ʔgyak VEGETABLE / GREENS / MUSTARD / CABBAGE . . . 651

(26) TGTM *ᴬbap beer-mash . . . 652
(27) TGTM *ᴮtaŋ dish, plate, pot . . . 652

3.1.7 Fungi **652**
(1) PTk *waar MUSHROOM . . . 652
(2) PTB *g-r(u/i)n MUSHROOM / FUNGUS . . . 652
Chinese comparandum . . . 652
(3) PTB *g/s-məw MUSHROOM / FUNGUS . . . 652
(4) PKC *paa MUSHROOM / FUNGUS / TOADSTOOL . . . 653

3.1.8 Other wild plants **653**
(1) PKC *yuun CREEPER / ROPE . . . 653
(2) TGTM *ᴬtʃhi FODDER / GRASS . . . 653
(3) PTB *r-tswa-n GRASS . . . 653
Chinese comparandum . . . 654
(4) PTB *s-yəy GRASS . . . 654
(5) PTB *m(r)(u/a)k GRASS / WEEDS . . . 654
(6) PCC *ram ≍ *hram GRASS / WEEDS . . . 655
(7) PTani *čul SEEDLING . . . 655
(8) PKC *phal SHEAF . . . 655

3.1.9 Vegetative/Agricultural activity **655**
(1) PTB *low FIELD . . . 655
(2) PNC *yaaŋ PLAINS-FIELD / FIELD (in plains) . . . 655
(3) PTB *di PLANT (v.) / PADDY FIELD . . . 655
(4) PCC *tsiiŋ-I, *tsiin-II PLANT (v.) / SOW . . . 656
(5) PTani *diː ~ *diŋ PLANT (v.t.) . . . 656
(6) PNC *pooy SOW . . . 656
(7) PKC *tuʔ SOW / PLANT (v.) . . . 656
Chinese comparandum . . . 656

3.1.10 Verbs involving plants **656**
(1) PNC *vul DROOP / WITHER . . . 656
(2) PCN *liŋ PLANT (v.) . . . 656
(3) PCN *thj [a/ə] m PLANT (v.) / TRANSPLANT . . . 656
(4) PTB *(g/k)ay PLANT . . . 656
(5) PTB *s-min RIPE / COOKED / DELICIOUS . . . 656
(6) PTB *m-bup ROT / SPOTTED / WRITE . . . 658
(7) PKar *səŋᴬ ROTTEN, BAD SMELL . . . 659
(8) PCN *ph-ruk SOW / SCATTER / THROW (seeds) . . . 659
(9) PKC *phuu-I, *phuuk-II TRANSPLANT / UPROOT . . . 659
(10) PTani *san WITHER / DRY . . . 659
(11) PTB *hwaːy WITHER / FADE . . . 659
Chinese comparandum . . . 659

3.2.1 Weather and seasons **659**
(1) PKC *hu(u)y AIR / WIND . . . 659
(2) PTB *s-dim CLOUD . . . 659
(3) PTB *mway CLOUD / FOG . . . 660
(4) PTB *kyam COLD / SNOW / ICE . . . 660
(5) PKC *ɗaay DEW . . . 660
(6) PTB *(d)zil DEW . . . 660
(7) PTB *muːŋ ⪤ *r/s-muːk FOGGY / DARK / SULLEN / MENACING / THUNDER . . . 661
Chinese comparandum . . . 661
(8) PTB *s-ŋar FROST / ICE . . . 661
(9) PTB *ryal HAIL . . . 662
(10) PTB *syar HAIL / SLEET . . . 662
Chinese comparandum . . . 663
(11) PKC *wuur ICE / FROST / SNOW . . . 663
(12) PTB *s-lyap LIGHTNING / FLASH / GLITTER / BUTTERFLY . . . 663
Chinese comparandum . . . 663
(13) PTB *m/s-raŋ RAIN . . . 663
(14) PTB *m-dzya RAINBOW . . . 664
(15) PTB *twaŋ RAINBOW . . . 664
Chinese comparandum . . . 664
(16) PTB *laŋ RAINBOW . . . 664
(17) PTB *si RAINBOW . . . 664
(18) PDeng *hu(y) RAINBOW . . . 665
(19) PTB *s/m-kwa RAINBOW . . . 665
(20) PTB *dzyaŋ RAINBOW . . . 665

(26) PTB *s-la RAINBOW . . . 665
(27) PTB *zuːr RAINY SEASON . . . 665
(28) PTB *r-məw SKY / HEAVENS / CLOUDS . . . 666
(29) PTani *pam SNOW . . . 670
(30) PTB *s-pʷal SNOW / ICE / FROST / HAIL . . . 671
(31) PCC *thruaŋ-(ruaʔ) SPRING RAIN . . . 671
(32) PCC *traw STORM (in spring) / HURRICANE . . . 671
(33) PKC *khraal SUMMER / DRY SEASON . . . 671
(34) PTani *gum THUNDER . . . 672
(35) PTB *glyaːk THUNDERBOLT / LIGHTNING . . . 672
(36) NEIA *doŋ WEATHER FORMATIVE / RAIN . . . 672
(37) PKC *tsiin ⪤ *tseen WET / RAIN (continously) . . . 673
(38) PTB *g-ləy WIND (n.) . . . 673
(39) PTB *buŋ WIND (n.) . . . 674
Chinese comparandum . . . 674
(40) TGTM *ᴮgliŋ snow . . . 674

3.2.2 Planets/Meteorological objects/Sky **674**
(1) NEIA *t(s)iŋ CELESTIAL / SKY / WEATHER . . . 674
(2) PTB *m-ka-n HEAVENS / SKY / SUN . . . 675
Chinese comparandum . . . 675
(3) PTk *caaŋ MOON . . . 675
(4) PTB *s/g-la MOON / MONTH . . . 675
(5) PTB *krəy MOON / MOONLIGHT . . . 679
(6) PTB *g(r/l)aːy SCATTER / SOW / DISPERSED WIDELY / WIDE / STAR . . . 680
Chinese comparandum . . . 681
(7) PKC *waan SKY / HEAVEN . . . 681
(8) PTB *s-kar STAR . . . 681
(9) PTB *swar STAR . . . 682
(10) PNN *dzi STAR . . . 682
(11) PTk *ra STAR . . . 682
(12) PTk *la STAR . . . 682
(13) PKar *chaᴮ STAR . . . 682
(14) PTB *s-ŋʷ(y)a-t STAR / MOON . . . 682
Chinese comparandum . . . 683
(15) PNN *liːt STAR / MOON . . . 683
(16) PKar *miᴮ SUN . . . 683
(17) PTB *s-nəy SUN / DAY / DWELL . . . 683
Chinese comparandum . . . 689
(18) PTB *g-nam SUN / SKY . . . 689
Chinese comparandum . . . 691
(19) PTB *r(i/u)ŋ SUN / SUNSHINE . . . 691

3.2.3 Water and other liquids **691**
(1) PTani *putˡ FOAM . . . 691
(2) PCN *a-juŋ RIVER . . . 691
(3) PCC *hnaa SOURCE (water) . . . 691
(4) PTB *r-laŋ STEAM . . . 691
Chinese comparandum . . . 691
(5) PKC *tuy-khuu ⪤ *tuy-huu STEAM / VAPOR . . . 691
(6) PNN *C̥-yuːŋ WATER . . . 691
(7) PCN *ki WATER . . . 691
(8) PTB *r/m-ba WAVE (in water) / RIPPLE . . . 691
Chinese comparandum . . . 692

3.2.4 Elements, metals, alloys **692**
(1a) PTB *d-ŋul SILVER . . . 692
Chinese comparandum . . . 693
(1b) PTB *mul SILVER . . . 693
(2) PKar *swaᴮ CHARCOAL . . . 693
(3) PTB *grəy COPPER . . . 693
(4) PTani *ɯn GOLD . . . 693
(5) PTB *syaːl ⪤ *syiːr IRON . . . 693
(6) PTB *syam IRON . . . 694
(7) PNN *yaːn IRON . . . 695
(8) PTk *ri IRON . . . 695
(9) PTB *l-tsyak IRON / IRON INSTRUMENT . . . 696
Chinese comparandum . . . 696
(10) PKC *suan LEAD (metal) . . . 696
(11) PTB *kar LEAD / BRONZE . . . 696
(12) PTB *(t)swa-y ⪤ *t(s)wa-y RUST / DROSS / STAIN / EXCREMENT . . . 696
(13) PCN *maj SALT . . . 697
(14) PTB *hyam SALTY . . . 697
Chinese comparandum . . . 697
(15) IA *gan ⪤ *gat ⪤ *gay SULFUR . . . 697

3.2.5 Landforms and geographical features **697**
(1) PTB *b-liŋ FOREST / FIELD . . . 697
Chinese comparandum . . . 697
(2) PKar *klaᴬ FOREST / JUNGLE . . . 697
(3) PTB *gliŋ GROUND / LAND / ISLAND . . . 697
(4) PKC *mual HILL / MOUND . . . 698
(5) PKC *klaaŋ HILL / MOUNTAIN . . . 698
(6) PCC *vaaw JUNGLE (near hillside field) . . . 698
(7) PTB *ram JUNGLE / FOREST / COUNTRY / FIELD . . . 698
Chinese comparandum . . . 698
(8) PTB *ri MOUNTAIN . . . 698
(9) PTk *pʰuŋ MOUNTAIN . . . 699
Chinese comparandum . . . 699
(10) PTani *di MOUNTAIN / HILL . . . 699
(11) PTB *m/r-duŋ MOUNTAIN / HILLOCK . . . 699
Chinese comparandum . . . 700
(12) PTB *s-gaŋ MOUNTAIN / RIDGE / HILL . . . 700
Chinese comparandum . . . 700
(13) PKC *ɗil POND / LAKE . . . 700
(14) PKC *lii POOL / LAKE / POND . . . 700
Chinese comparandum . . . 700

(40) PCN ***ɣaʔ** SWIM / SLICE . . . 848
(41) PTB ***s-nyak** WET . . . 848
(42) PNC ***koot** WET . . . 848
(43) PTani ***ǰu-ǰaŋ** WET . . . 848
(44) PTk ***ju** WET . . . 848
(45) PKar ***cɔ*[B]** WET . . . 848
(46) PTB ***pwam** WET . . . 848

6.7.0 Movement **849**
(1) PKC ***kluŋ-I, *klun-II** ARRIVE / RETURN . . . 849
(2) PKC ***hrial** AVOID / GO (round) . . . 849
(3) PKC ***weel** CIRCLE / GO (round) . . . 849
(4) PKC ***pial** DEVIATE / AVOID / STRAY . . . 849
(5) PTB ***s-lay ≍ *ley** PASS / EXCEED . . . 849
(6) PCC ***heel** SKIRT (v.) / GO (round) . . . 849
(7) PKC ***pal** WADE / PASS BY / TREAD ON / WALK ON . . . 849

6.7.1 Inward **849**
(1) PKC ***nayʔ** APPROACH . . . 849
(2) PTk ***da** ARRIVE . . . 849
(3) PTk ***ʃuŋ** ARRIVE . . . 849
(4) PKar ***tə*[B]** ARRIVE . . . 849
(5) PKC ***khleŋ** ARRIVE / REACH . . . 849
(6) PKC ***phaa-I, *phaak-II** ARRIVE / REACH / ATTAIN . . . 849
(7) PNC ***tum** ENTER . . . 850
(8a) PKC ***luut** ENTER . . . 850
(8b) PKC ***hluʔ** INSERT . . . 850
(9) PTk ***tsaŋ** ENTER . . . 850
(10) PKar ***nVʔ*[D]** ENTER . . . 850
(11) PCN ***ʒa** GO IN / ENTER . . . 850
(12) PKC ***peem** IMMIGRATE / MIGRATE . . . 850
(13) PKC ***th(u/a)n** INFUSE / POUR IN / PUT IN . . . 850
(14) PL ***luk** or ***lap** ENTER . . . 850
(15) PKC ***hrolʔ** INSERT / POKE . . . 850
(16) PKC ***san** INSERT / PUT IN . . . 850
(17) PKC ***ɓaan** REACH . . . 850
(18) PKC ***phaan** REACH . . . 850
(19) PKC ***yep-I, *yeʔ-II** TUCK IN / INSERT . . . 850

6.7.2 Outward **850**
(1) PTB ***hwaŋ** COME (OUT) / ENTER . . . 850
Chinese comparandum . . . 851
(2) PTB ***s-prwa-k** COME OUT / EMERGE / BRING OUT . . . 851
(3) PKC ***poot ≍ *puut** COME OUT / EMERGE / PROTRUDE . . . 851
(4) PTB ***s-twak** COME OUT / GO OUT / EMERGE . . . 851
Chinese comparandum . . . 853
(5) PKC ***ph(u/o)l** EXHUME / TAKE OUT . . . 853
(6) PTani ***len** EXIT (v.) . . . 853
(7) PTB ***(d/t)wan** GO OUT / COME OUT / PULL . . . 853
(8) PKar ***lwɛ*[A]** GO . . . 853
(9) PKC ***lan** PROCEED / CONTINUE ON . . . 853
(10) PCC ***peeŋ-I, *peen-II** TURN AWRY / BRANCH OFF . . . 853

6.7.3 Awkwardly, Irregularly, Abruptly **854**
(1) PKC ***hnoʔ** HASTEN . . . 854
(2) PTB ***grim** HASTEN . . . 854
Chinese comparandum . . . 854
(3) PKC ***ploot** SLIP OUT . . . 854
(4) PKC ***teŋ** SLIP / FALL DOWN . . . 854
(5) PTB ***(b/p)lya-l** SLIP / SLIPPERY . . . 854
Chinese comparandum . . . 854
(6) PKC ***waay** STRAY / LOST / WANDER . . . 854
(7) PTB ***ʔut** SWAGGERING / NOISY . . . 854
(8) PKar ***khiŋ*[A]** TILTED . . . 854
(9) PTB ***dar ≍ *d(u/i)r** TREMBLE / SHIVER (fear, cold) . . . 854
Chinese comparandum . . . 855
(10) PKC ***looŋ-I, *loŋʔ-II** WALLOW / ROLL ABOUT . . . 855

6.7.4 Regular, Cyclic, Smoothly **855**
(1) PTB ***r-t(y/w)ak** KICK . . . 855
Chinese comparandum . . . 855
(2) PKC ***tool-I, *tolʔ-II** SLIDE / BACKSLIDE / GLIDE (v.i.) . . . 855
(3) PKC ***tholʔ** SLIDE / BACKSLIDE / GLIDE (v.t.) . . . 855
(4) PCC ***hlaaŋ-I, *hlaan-II** STEP (v.) / LIFT UP / LIFT DOWN . . . 856
(5) PKar ***thu*[B]** SWAY / SWING . . . 856
(6) PTani ***kor** TAKE A STEP . . . 856
(7) PTB ***grwat** TRAVEL / GO THROUGH . . . 856
Chinese comparandum . . . 856
(8) PKC ***laaŋ-I, *laan-II** TRAVEL / VISIT . . . 856
(9) PKC ***yin** TRAVEL / VISIT . . . 856
(10) PKar ***jam*[B]** TREAD . . . 856
(11) PCC ***leeŋ-I, *leen-II** VISIT / WANDER . . . 856
(12) PCN ***tsaj** WALK . . . 856
(13) PKC ***waak-I, *waʔ-II** WANDER / CRAWL / ROAM . . . 856
(14) PCC ***lek** WAVE (v.) / FLASH . . . 856

6.7.5 Medium Primary (e.g. air) **857**
(1) PTB ***byar ≍ *p(i/u)r** FLY (v.) . . . 857
Chinese comparandum . . . 857
(2) PTB ***(p/b)yam** FLY (v.) . . . 857
(3) PNC ***leeŋ-I, *leen-II** FLY (v.) . . . 858
(4) PTk ***praj** FLY . . . 858
(5) PTani ***bjaŋ** SWIM . . . 858
(6) PTB ***pyaw** SWIM / FLOAT / RAFT . . . 858
Chinese comparandum . . . 858

6.7.6 Circularly **858**
(1) PKC ***kup** CIRCLE / EMBRACE . . . 858
(2) PKC ***wial** CURL UP / ENTWINE . . . 859
(3) PKC ***lip** CURL UP / EVAGINATE / TURN INSIDE OUT . . . 859
(4) PTB ***sik** PINCH / TWIST . . . 859
(5) PKC ***liŋ** ROLL UP / CURL UP . . . 859
(6) PTk ***niŋ** SPIN . . . 859
(7) PLB ***ʔ-gyaŋ*[1]** SPIN / ROTATE / TOP (toy) . . . 859
(8) PTB ***s-mwəy** SPINDLE / TWIRL . . . 859
Chinese comparandum . . . 859
(9) PTB ***m-p(y)up** TURN OVER / ROLL OVER / SEARCH FOR . . . 859
Chinese comparandum . . . 860
(10) PTani ***rjat*[1]** TWIST (STRANDS OF ROPE) . . . 860
(11) PTk ***rej** TWIST . . . 860
(12) PTB ***m/s-na:y** TWIST / KNEAD / SOFTEN . . . 860
(13) PTB ***wyat** TWIST / TURN . . . 860
(14) PTB ***s-wa:y** WHIRL / BRANDISH / WAVE (v.) . . . 861
Chinese comparandum . . . 861

6.7.7 Up, etc. **861**
(1) PTani ***čaŋ** ASCEND . . . 861
(2) PKC ***ka(a)(y/l)** ASCEND / CLIMB UP . . . 861
(3) PTk ***ka** CLIMB / ASCEND . . . 861
(4) PTB ***kak** EXPENSIVE / AT ITS PEAK . . . 861
Chinese comparandum . . . 861
(5) PCC ***phok-I, *phoʔ-II** LEVER / RAISE / TIP UP . . . 861
(6) PTB ***dzwaŋ** LOFTY / ELEVATED . . . 861
(7) PTB ***syar** RISE / EAST . . . 862

6.7.8 Downward **862**
(1) PTB ***s/ʔ-yuk** DESCEND . . . 862
(2) PTB ***zak** DESCEND . . . 862
(3) PTk ***ta** DESCEND . . . 863
(4) PKar ***laŋ*[A]** DESCENT / GO DOWN / SET . . . 863
(5) PTB ***l(i/u)p** SINK INTO / DIVE . . . 863

6.7.9 Manner is primary **863**
(1) PTB ***ga:r ≍ *ga** DANCE / SING / LEAP / STRIDE . . . 863
(1a) PTB ***ga:r** DANCE / SING / LEAP / STRIDE . . . 863
Chinese comparandum . . . 863
(1b) PTB ***ga** DANCE / LEAP / STRIDE . . . 863
Chinese comparandum . . . 864
(2) PKC ***loon** CRAWL . . . 864
(3) PTk ***bo** CRAWL . . . 864
(4) PL ***Nkak** CRAWL / CREEP . . . 864
(5) PKC ***yaam** CREEP / CRAWL / SPREAD . . . 864
(6) PKC ***laam** DANCE . . . 864
Chinese comparandum . . . 864
(7) PKC ***yaam** FLEE . . . 864
(8) PTB ***hywa(p/m)** JUMP . . . 864
(9) PTB ***p(r)wak** JUMP . . . 864
(10) TGTM ***[A]ts*[h]*joŋ** JUMP . . . 865
(11) PTQ ***N-tsak** JUMP . . . 865
(12) PKC ***yuaŋ-I, *yuan-II** JUMP / BOUNCE / FLY (v.) / LEAP . . . 865
(13) PTB ***b-(l/r)əy** RUN . . . 865
(14) PTB ***gan ≍ *k(y)at** RUN / DANCE / KICK . . . 865
(15) PCC ***tlaan** RUN / FLEE . . . 866
(16) PTk ***jaam** RUN / FLEE . . . 866
(17) PTB ***plwaŋ** RUN / FLEE / JUMP UP . . . 866
Chinese comparandum . . . 867
(18) PTB ***(g/h)yar** RUN / RIDE / GO BY VEHICLE . . . 867
(19) PTB ***sam** RUN / WALK . . . 867
(20) PTani ***dan** SHAKE . . . 867
(21) PTk ***nuk** SHAKE . . . 867
(22) PKC ***hlok-I, *hloʔ-II** SHAKE / LIFT UP . . . 867
(23) PKC ***thiŋ-I, *thin-II** SHAKE / SHUDDER . . . 867
(24) PKC ***pet** SPRING / SPRINT . . . 867
(25) PKC ***let-I, *leʔ-II** TRANSLATE / FLIP OVER / RESPOND . . . 867
(26) PTk ***tsɛt** WALK . . . 867

6.7.10 Move with something else **867**
(1) PTani ***mon** CHASE . . . 867
(2) PTk ***saam** CHASE . . . 867
(3) PCN ***ri** CHASE / HUNT / FOLLOW / DRIVE . . . 867
(4) PKC ***ɗooy** CHASE / PURSUE . . . 868
(5) PTB ***s/ʔ-(l/r)way** DIVERT / PUSH ASIDE . . . 868
(6) PTk ***t*[h]*aaw** DRIVE . . . 868
(7) PNC ***hool** DRIVE / CHASE . . . 868
(8) PTB ***m/s-yuy** FOLLOW . . . 868
Chinese comparandum . . . 868
(9) PKC ***hroo(ŋ/k)** FOLLOW / GO ALONG / PROCEED . . . 868
(10) PTB ***s-n(y)aŋ** FOLLOW / REPEAT . . . 868
Chinese comparandum . . . 868
(11) PKC ***yoʔ** FOLLOW / WALK ON . . . 868

(12) PTB ***dzywan** RIDE . . . 868
(13) PKC ***tsi(i)l** TRAMPLE / TREAD OUT / WALK ON . . . 868
(14) PTani ***ča** TREAD / TRAMPLE . . . 869

6.7.11 Movement (general) 869
(1) PTB ***s-wa** BE IN MOTION / GO / COME . . . 869
Chinese comparandum . . . 869
(2) PTB ***la-y** ⩙ ***ra** COME . . . 869
Chinese comparandum . . . 870
(3) PKC ***huŋ** COME . . . 870
(4) PTB ***pay** COME / GO . . . 870
(5) PKar ***khaN**^{A} CROSS (v.) . . . 871
(6) PTB ***g(o/a)w** CROSS OVER . . . 871
Chinese comparandum . . . 871
(7) PTk ***kɐn** CROSS . . . 871
(8) PTB ***bywan** GO (out) / COME (out) . . . 871
(9) PTani ***in** GO . . . 871
(10) PTB ***ʔay** GO / DIRECTIONAL PARTICLE / TRANSITIVE MOTION . . . 871
(11) PKC ***kal** GO / PACE / WALK . . . 872
(12) PKC ***θeʔ** GO / WALK . . . 872
(13) PTani ***bruɯ** MOVE (v.i.) . . . 872
(14) PTB ***ywa-n** MOVE . . . 872
(15) PKC ***tsaaŋ** MOVE . . . 872
(16) PTB ***m-kyit** MOVE . . . 872
(17) PKC ***taaŋ** REMAIN . . . 872
(18) PKC ***ɗiŋ-I**, ***ɗin-II** STAND / STOP . . . 872
(19) PKC ***plooŋ-I**, ***ploon-II** VISIT / MOVE . . . 872

6.8.0 Striking, hitting verbs 872
(1) PTB ***m/r-tuk** CUT / KNOCK / POUND . . . 872
Chinese comparandum . . . 873
(2) PTB ***twak** BITE / CHEW / PECK AT / HOOK ONTO . . . 873
Chinese comparandum . . . 873
(3) PTB ***r-duŋ** BEAT / STRIKE / POUND / FLOG . . . 873
Chinese comparandum . . . 874
(4) PTB ***(d/t)(u/i)p** BEAT / STRIKE . . . 874
Chinese comparandum . . . 874
(5) PTB ***(d/t)a:y** POUND / CRUSH . . . 874
(6) PKC ***ɗeeŋ-I**, ***ɗeen-II** HAMMER / BEAT / HIT / PELT . . . 875

頭懸梁，錐刺股
Tóu xuán liáng, zhuī cì gǔ.
Hanging our hair from roof-beams,
pricking our thighs with awls.*

*This expression refers to the study practices of two celebrated young scholars: *Sūn Jìng* 孫敬 of the Han Dynasty would tie his hair to a roof-beam to avoid dozing off, while *Sū Qín* 蘇秦 of the Warring States period would keep himself awake by pricking his thigh with an awl. Both later had distinguished careers. At STEDT we have been inspired by their example.

Preface

As the STEDT project was nearing the end of its 28-year run in 2014-15, we became more and more preoccupied with trying to figure out how best to preserve and disseminate our databases and etymologies. Obviously there would be no point in contemplating a printout of the more than 500,000 records in our main lexical database, On the other hand, it did not seem beyond the realm of possibility to prepare a printed version of our nearly 6000 etymologies, presenting our reconstructions along with their "supporting forms" from individual Tibeto-Burman languages and Chinese.

This latter idea was put forth with the greatest persuasiveness by J.B. Lowe, who felt that the STEDT project owed it to the scholarly community and the general public to make available a tangible snapshot of our latest etymological thinking as the project came to a close. To demonstrate the feasibility of this idea, J.B. contacted the UC Berkeley Library Bindery, which produced a handsomely bound draft version of the etymologies that came to two folio volumes totaling 1,137 pages.

Meanwhile my main concern was to revise or "rectify" all the etymologies before they were enshrined in print, paying special attention to the numerous weakly attested roots ("WAR's") among them. I carried out this "WARfare" to the best of my ability over a period of several months, with the indispensable assistance of a succession of talented Stedtniks who navigated me through the labyrinth of our lexical and etymological databases.

Finally we have had to call a halt. This printed version accurately represents my latest thinking, but I have no illusions that every detail of my analyses will stand the test of time. It is my hope that some way will be found to periodically update and expand both the electronic and printed versions of our lexical database and our etymologies. In any case, a limited run of the present 2-volume printed version is now available at the relatively modest price of $250. To order a copy, please email me at *matisoff@berkeley.edu*.

United in zeal for TB/ST studies,

James A. Matisoff Berkeley, June 2015

Introduction

History of the STEDT Project

The great Sino-Tibetan language family, comprising both Chinese and Tibeto-Burman (TB),[1] is comparable in time-depth and internal diversity to Indo-European, and equally important in the context of world civilization. The overwhelming cultural and numerical predominance of Chinese is counterbalanced by the sheer number of languages (some 250–300) in the rest of the family.

After the existence of the Tibeto-Burman family was posited in the mid-19th century, British scholars, missionaries, and colonial administrators in India and Burma began to study some of the dozens of little-known "tribal" languages of the region that seemed to be genetically related to the two major literary languages, Tibetan and Burmese. This early work was collected in the monumental *Linguistic Survey of India* (Grierson 1903–28), three sections of which (Vol. III, Parts 1, 2, 3) are devoted to wordlists and brief texts from TB languages.

Further significant progress in TB studies had to wait until the late 1930's, when the eccentric amateur comparativist Robert Shafer headed a Depression-era project called "Sino-Tibetan Linguistics", sponsored by the eminent anthropologist A.L. Kroeber of U.C. Berkeley.[2] With admirable thoroughness, the project staff assembled all the lexical material then available on TB languages, enabling Shafer to venture a detailed subgrouping of the family at different taxonomic levels, called (from higher to lower) divisions, sections, branches, units, languages, and dialects. This work was finally published piecemeal in a two-volume, five-part opus called *Introduction to Sino-Tibetan* (1966–74).

Shafer's junior collaborator Paul K. Benedict based his own work on the same body of material as Shafer, but achieved much more usable results. In an unpublished manuscript entitled *Sino-Tibetan: a Conspectus* (ca. 1942–43; henceforth *STC*), Benedict adopted a more modest approach to supergrouping and subgrouping than Shafer, stressing that many TB languages had so far resisted precise classification. While Shafer had included Tai in Sino-Tibetan, Benedict (1942a) banished it from the family altogether, relating Tai instead to Austronesian.[3] Shafer's pioneering work, valuable as it was, suffered from his mistrust of phonemics, with a consequent proliferation of pseudo-precise and arcane phonetic symbols. Benedict's structural insight, his flair for isolating that which is crucial from masses of data, enabled him to formulate sound correspondences with greater precision, and to distinguish between regular and exceptional phonological developments.

The publication of a revised and heavily annotated version of *STC* in 1972, with J. Matisoff as contributing editor, laid the foundations for modern Sino-Tibetan historical/comparative linguistics. In this recension, nearly 700 Proto-Tibeto-Burman (PTB) roots were reconstructed (494 of them in numbered cognate sets, with about 200 more scattered throughout the text and footnotes), as well as some 325 comparisons of PTB roots with Old Chinese etyma, largely as reconstructed in Karlgren 1957 (*Grammata Serica Recensa*, henceforth *GSR*). While Benedict focused principally on five key, phonologically conservative TB languages (Tibetan, Burmese, Lushai [=Mizo], Kachin [=Jingpho], Garo), he also used data from more than 100 others, judiciously making allowances for inadequacies of transcription where necessary.[4] How well has *STC* stood the test of time? The short answer is: remarkably well. The work has been reviewed about 15 times, almost always in a highly favorable tone,[5] and has been translated into Chinese.[6] In fact nearly all 700 of the TB cognate sets in *STC* have been shown to be perfectly valid, though many of the reconstructions have had to be changed slightly in the light of new data, and in a couple of cases etyma which had been reconstructed separately have been shown to be variant forms ("allofams") of the same word-family.[7]

Despite its brilliance, however, the *Conspectus* is notoriously difficult to use, largely due to its complex apparatus of footnotes, which often (especially in the Chinese section) occupy more of the page than the text itself. These notes include Benedict's original ones from the 1940's, as well as those he and I added before publication in 1972. Some 200 valid etymologies are squirreled away in these convoluted notes, but they also contain a number of errors, unsubstantiated speculations, and over-complications. Benedict himself realized the limitations of the data he had to work with, and never intended *STC* to be more than an overview or "conspectus" of its vast subject. Neither did he structure it as a practical handbook which systematically tabulated the sound correspondences among the major languages of the family at all canonical points of the syllable. (Such information is certainly extractable from the terse but labyrinthine pages of *STC*, but at the cost of considerable labor.) Towards the end of his life, which ended tragically in a car accident on July 21, 1997, Benedict does seem to have felt the need to embark on such a systematic project, although it never actually got off the ground.

After the publication of the *Conspectus*, further progress in intra-TB and TB/Chinese comparison seemed to depend on multiplying the number of reliably reconstructed etyma, as well as systematizing and refining the methodological underpinnings of the reconstructions. In the mid-1970's, when I was attempting to apply the principles of glottochronology in order to subgroup the TB family, the very first item of "basic vocabulary" that I looked at happened to be 'belly / stomach'. Much to my initial dismay, I quickly found that it was futile to use a simple wordlist to try to subgroup a family as complex and ramified as TB. In fact it was impossible even to deal in isolation with a single point in semantic space; etyma with the meaning 'belly' or 'stomach' spilled over into concepts like 'cave / hole', 'swelling', 'calf of leg', 'liver', 'guts', etc. I became preoccupied with notions of semantic variability, semantic fields, and the field of bodypart nomenclature in particular. At the same time I could not help noticing the morphophonemic variations displayed by almost every etymon previously or newly reconstructed. Instead of guiltily sweeping these variational phenomena under the rug, I began to revel in them. In *Variational Semantics in Tibeto-Burman* (Matisoff 1978b, henceforth *VSTB*) I set out to establish an explicit methodology for handling phonosemantic variation in word families, introducing the notion of "allofams" and a notation for diagramming patterns of semantic association ("metastatic flowcharts"). In those pre-computer days, I naturally had to assemble my data by hand, copying out bodypart words from dictionaries and sorting them into synonym sets on filecards, then grouping them into putative cognate sets. The older sources used by Shafer and Benedict were supplemented by an ever-increasing volume of new material in the 1970's and 1980's, much of it from post-Cultural Revolution China, but also from India, Nepal, and Thailand. It eventually became apparent that the job of digesting these massive amounts of new and old data would be vastly facilitated by the use of computers. The hitch was my own ignorance of computer technology beyond the level of simple word-processing. Fortunately I somehow got the idea of applying to federal granting agencies for a longterm project to create a computerized etymological dictionary of Tibeto-Burman / Sino-Tibetan based on semantic principles, i.e. an etymological thesaurus.[8] In 1987, the Sino-Tibetan Etymological Dictionary and Thesaurus Project (STEDT) got under way, funded jointly by the National Science Foundation and the National Endowment for the Humanities. Thanks to the efforts of a succession of computer-savvy graduate students (see the *Acknowledgments*), a massive lexical database of forms from over 250 TB languages and dialects has been created, mostly of bodypart terminology at first, but then extending to all the other areas of the lexicon. It has been a race between the vertiginous progress of computer technology (when we started in the Pleistocene, 1987, we were using Mac Pluses!) and our ever-expanding needs for disk capacity, memory, and operating speed. The hard-won experience gained at the STEDT project has inspired similar lexical database projects in the U.S. and abroad.

Original Plan of STEDT

It was originally planned to publish the *Sino-Tibetan Etymological Dictionary and Thesaurus* as a series of printed volumes, each containing full details on all the etymologies in a given semantic area, starting with bodyparts and then proceeding to animal names, natural objects, verbs of motion, and all the rest of the lexicon:

Volume I: *Body Parts*
Volume II: *Animals*
Volume III: *Natural Objects, Plants, Foods*
Volume IV: *Kinship Terms, Ethnonyms, Social Roles*
Volume V: *Culture, Artifacts, Religion*
Volume VI: *Verbs of Motion, of Manipulation, and of Production*
Volume VII: *Adjectival Verbs*
Volume VIII: *Abstract Nouns and Verbs, Psychological Verbs, Verbs of Utterance*
Volume IX: *Shape, Size, Color, Measure, Number, Time, Space*
Volume X: *Grammatical words*

The sheer amount of the etymologizable data soon made it clear that this was unrealistic, and that each projected volume of STEDT would have to be split up into smaller units or "fascicles", e.g. in the case of *Body Parts* into ten subdivisions, as follows:

1. *Body (general)*
2. *Head and Face*
3. *Mouth and Throat*
4. *Torso*
5. *Limbs, Joints, and Body Measures*
6. *Diffuse Organs*
7. *Internal Organs*
8. *Secretions and Somatophonics*[9]
9. *Reproductive System*

Every subpart and sub-subpart of the lexicon expanded and bloomed into a major project.

I decided to start with the reproductive system, not only because of its prurient interest but also because it seemed like the point of departure for all things. Accordingly a printed manuscript of some 480 pages was produced in 1997–98, called *Sino-Tibetan Etymological Dictionary and Thesaurus, Volume I: Bodyparts, Fascicle 1: The Reproductive System*, containing 286 pages of forms assembled into 174 cognate sets, divided into nine chapters: (1) Egg, (2) Birth, (3) Navel, (4) Breast, (5) Vagina, (6) Womb, (7) Penis, (8) Copulate, (9) Body Fluids. As part of the front matter, I put together a 60 page essay on the initial consonants and consonant clusters of Proto-Tibeto-Burman.

As it turned out, perhaps fortunately, that introductory essay soon took on a teratoid life of its own, and became an example of what one might call in Proto-Tibeto-Burman

***kʷəy**	**lətak**	**rəmay**	**gəyaːp**	**way**
dog	ACC	tail	wag	COP/NOM

or "the tail wagging the dog".[10] Was I not responsible for dealing with the whole proto-syllable, not just the initial consonants? I delayed publication of the "Reproductive Fascicle" until I could get the whole job done.[11] Eventually, the "introductory essay", then entitled *System and Philosophy of Tibeto-Burman Reconstruction*, grew to become *Handbook of Proto-Tibeto-Burman* (Matisoff 2003a, henceforth *HPTB*).

The phonological approach of *HPTB* is complementary to the main thrust of the STEDT project, which is semantically organized.

The ST/TB Family in its Areal Context

Typological diversity of TB: Indosphere and Sinosphere

The TB family, which extends over a huge geographic range, is characterized by great typological diversity, comprising languages that range from the highly tonal, monosyllabic, analytic type with practically no affixational morphology (e.g. Loloish), to marginally tonal or atonal languages with complex systems of verbal agreement morphology (e.g. the Kiranti group of E. Nepal). While most TB languages are verb-final, the Karenic and Baic branches are SVO, like Chinese.

This diversity is partly to be explained in terms of areal influence from Chinese on the one hand, and Indo-Aryan languages on the other. It is convenient to refer to the Chinese and Indian spheres of cultural influence as the "Sinosphere" and the "Indosphere".[12] Some languages and cultures are firmly in one or the other: e.g. the Munda and Khasi branches of Austroasiatic, the TB languages of Nepal, and much of the Northeast Indian branch of TB (notably Meithei = Manipuri) are Indospheric; while the Hmong-Mien family, the Kam-Sui branch of Kadai, the Loloish branch of TB, and Vietnamese (Mon-Khmer) are Sinospheric. Others (e.g. Thai and Tibetan) have been influenced by both Chinese and Indian culture at different historical periods. Still other linguistic communities are so remote geographically that they have escaped significant influence from either cultural tradition (e.g. the Aslian branch of Mon-Khmer in Malaya, or the Nicobarese branch of Mon-Khmer in the Nicobar Islands of the Indian Ocean).

Elements of Indian culture, especially ideas of kingship, religions (Hinduism/Brahminism, Buddhism), and *devanāgarī* writing systems, began to penetrate both insular and peninsular Southeast Asia about 2000 years ago. Indic writing systems were adopted first by Austronesians (Javanese and Cham) and Austroasiatics (Khmer and Mon), then by Tai (Siamese and Lao) and Tibeto-Burmans (Pyu, Burmese, and Karen). The learned components of the vocabularies of Khmer, Mon, Burmese, and Thai/Lao consist of words of Pali/Sanskrit origin. Indian influence also spread north to the Himalayan region. Tibetan has used *devanāgarī* writing since A.D. 600, but has preferred to calque new religious and technical vocabulary from native morphemes rather than borrowing Indic ones.

What is now China south of the Yangtze did not have a considerable Han Chinese population until the beginning of the current era (Ramsey 1987; Norman 1988). In early times the scattered Chinese communities of the region must have been on a numerical and cultural par with the coterritorial non-Chinese populations, with borrowing of material culture and vocabulary proceeding in all directions (Benedict 1975a; Mei Tsu-lin & Norman 1976; Sagart 1990). As late as the end of the first millennium A.D., non-Chinese states flourished on the periphery of the Middle Kingdom (Nanchao and Bai in Yunnan, Xixia (Tangut) in the Gansu/Qinghai/Tibet border regions, Lolo (Yi) chieftaincies in Sichuan. The Mongol Yuan dynasty finally consolidated Chinese power south of the Yangtze in the 13th century. Tibet also fell under Mongol influence then, but did not come under complete Chinese control until the 18th century.

Whatever their genetic affiliations, the languages of the East and SE Asian area have undergone massive convergence in all areas of their structure—phonological, grammatical, and semantic.[13] Hundreds of words have crossed over genetic boundaries in the course of millennia of intense language contact, so that it is often exceedingly difficult to distinguish ancient loans from genuine cognates.

Scope and subgrouping of the TB family

The exact number of TB languages is impossible to determine, not only because of the elusiveness of the distinction between "languages" and "dialects", and the fact that a number of languages remain to be discovered and/or described, but especially because of the profusion and confusion of different names for the same language.[14] At the present state of our knowledge we can estimate that the Tibeto-Burman family contains approximately 440 languages, which may be broken down into population categories as indicated in Figure 1.

According to Ethnologue estimates, there are twelve Tibeto-Burman languages with over a million speakers: Burmese, Nuosu (Yi/Lolo), Amdo Tibetan, Meit(h)ei (= Manipuri), S'gaw Karen, Khams Tibetan, Bodo, Eastern Tamang, Central Tibetan, Eastern Pwo Karen, Garo, and Rakhine. Though care has obviously been taken to obtain the most reliable data, such figures can often be quite misleading, since ethnic identity and linguistic competence do not always coincide: of the 8 million people who identify themselves as Tujia, only about 70,000 can actively use the Tujia language, the rest having shifted to Chinese (Lewis *et al.* 2014). Designations like *Yi* and *Karen* actually apply to large numbers of related

[1] Some scholars, especially in China, consider Sino-Tibetan to include the Tai-Kadai (TK) and Hmong-Mien (HM) (=Miáo-Yáo) language families as well. While there is definitely a striking typological similarity among Chinese, TK, and HM, this is undoubtedly due to prolonged ancient contact rather than genetic relationship.

[2] For a readable and humorous account of this project, see Benedict 1975b.

[3] To this putative megalolinguistic grouping, later to include Hmong-Mien and Japanese as well as Tai-Kadai and Austronesian, Benedict gave the name "Austro-T(h)ai" (see Benedict 1975a, 1990).

[4] Peiros & Starostin (1996) followed Benedict' s example in their choice of key TB languages, basing their Sino-Tibetan reconstructions on Written Tibetan, Written Burmese, Lushai, Jingpho, and Chinese, all of which are treated as if they belonged on the same taxonomic level. See the discussion in Handel (1998, Ch. 3).

[5] A notable exception is the intemperate review by Miller (1974), which bitterly criticizes the fact that the notes added in 1972 sometimes modify points made in the original text (ca. 1942). See the defense of *STC* against Miller's attack by Matisoff (1975a).

[6] See Le Saiyue & Luo Meizhen 1984.

[7] E.g. ***dyam** ≍ ***tyam** [*STC* #226] 'full; fill' and ***dyam** [*STC* #227] 'straight' ; see Matisoff (1988b).

[8] The shining example of an etymological thesaurus in the field of Indo-European is Carl Darling Buck's *A Dictionary of Selected Synonyms in the Principal Indo-European Languages* (1949).

[9] By "somatophonics" I mean sneezes, belches, farts, and the like.

[10] The presence of the accusative particle ***lətak** is motivated by the semantic anomalousness of this phrase, which has also caused the fronting of the object ***kʷəy** 'dog' to initial position.

[11] It was later published as Matisoff 2008, henceforth *TBRS*.

[12] See Matisoff 1990 ("On megalocomparison.")

[13] An excellent recent study of such phenomena is Thomason & Kaufman 1988.

[14] See Matisoff 1986b, and STEDT Monograph #2 (Matisoff *et al.* 1996).

[15] Based on Lewis *et al.* 2014.

Number of Speakers	*Number of Languages*
more than 1,000,000	12
500,000 – 999,999	13
250,000 – 499,999	15
100,000 – 249,999	41
50,000 – 99,999	37
25,000 – 49,999	52
10,000 – 24,999	82
fewer than 10,000	185

Figure 1: TB languages by number of speakers[15]

but often not mutually intelligible "dialects", which might as well be called separate languages. At the bottom of the scale are some 185 languages with fewer than 10,000 speakers, many of which are highly endangered,[16] to the point where children are no longer learning to speak them.

Although much of the geographical area covered by TB languages[17] has been chronically inaccessible to fieldwork by scholars from outside, there has been an explosion of data in the past 25 years, especially from China[18] and Nepal, but also increasingly from India and Burma.

Evolving notions of ST/TB subgrouping

Millennia of language contact due to migrations, intermarriage, and warfare have presented us what I have described as "an interlocking network of fuzzy-edged clots of languages, emitting waves of mutual influence from their various nuclear ganglia. A mess, in other words."[19] While subgrouping such a recalcitrant family is difficult, there is certainly no need to go so far as van Driem by denying that TB subgroups exist at all, or by claiming that even if they do exist, there are so many of them that there is no point in talking about them![20]

In the published version of *STC* (1972), P.K. Benedict wisely refrained from offering a pseudo-precise family-tree model of the higher-order taxonomic relationships in TB, presenting instead a schematic chart where Kachin (= Jingpho) was conceived as the center of geographical and linguistic diversity in the family. See Figure 2.

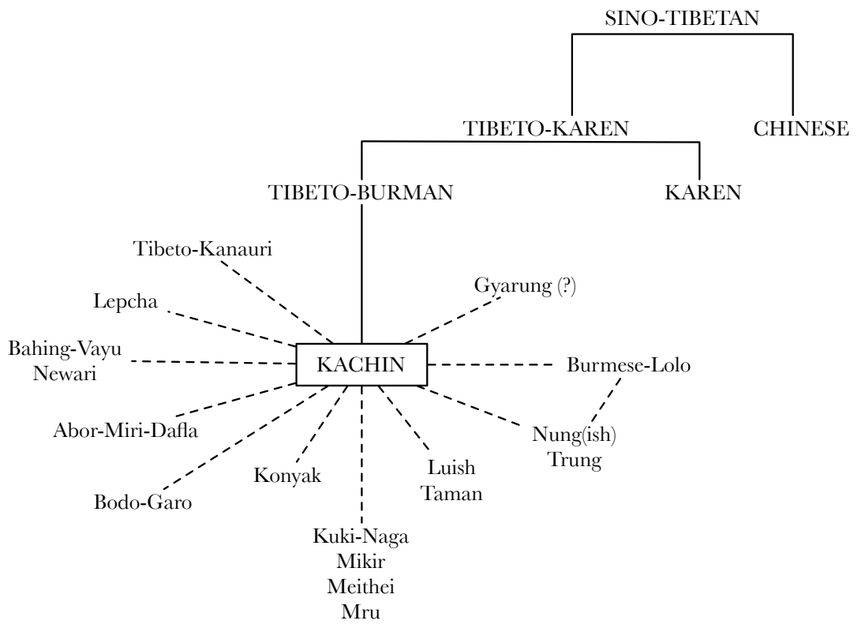

Figure 2: Schematic chart of Sino-Tibetan languages[21]

A simpler scheme was used heuristically at STEDT until very recently (see *HPTB*:5 and *TBRS*:xxix), as shown in Figure 3. It differed from *STC* in several respects:

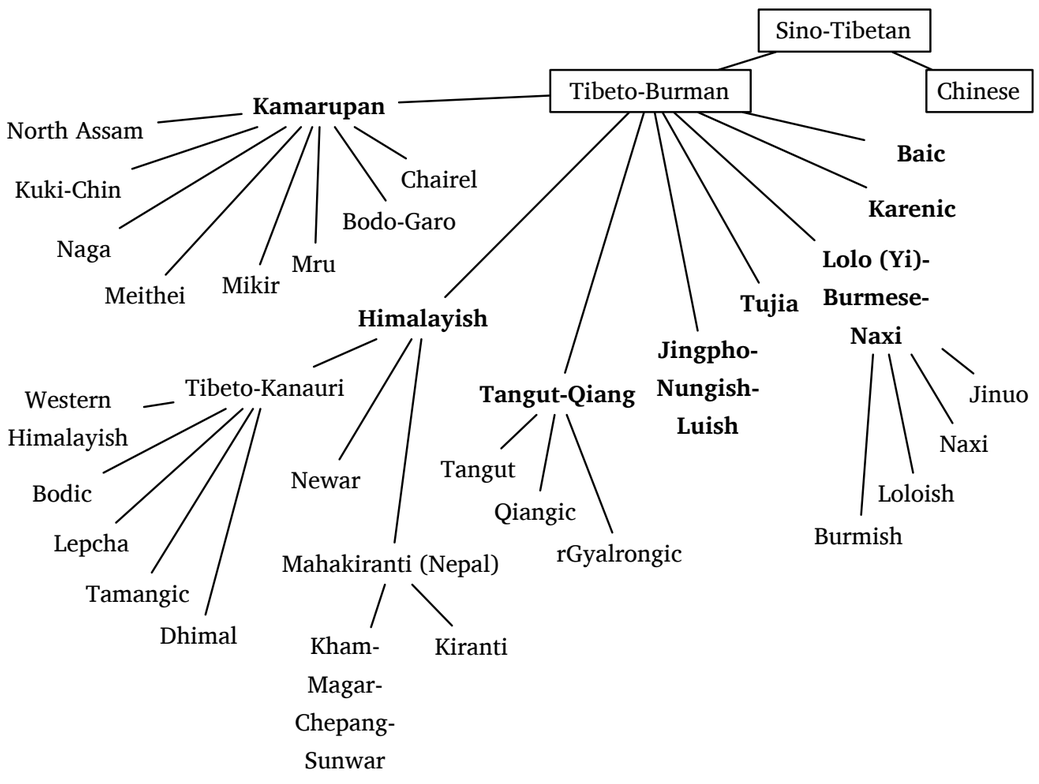

Figure 3: Previous STEDT family tree of ST languages

- Karenic is no longer regarded as having a special status, but is now considered to be a subgroup of TB proper.
- Baic, hardly mentioned (under the name "Minchia") in *STC*, but later hypothesized by Benedict to belong with Chinese in the "Sinitic" branch of Sino-Tibetan, is now also treated as just another subgroup of TB, though one under particularly heavy Chinese contact influence. Both Karenic and Baic have SVO word order, unlike the rest of the TB family.
- The highly ramified Kuki-Chin and Naga groups were provisionally amalgamated with Bodo-Garo (=Barish) and Abor-Miri-Dafla (=Mirish) into a supergroup called by the purely geographical name of *Kamarupan*, from the old Sanskrit name for Assam.
- The important Tangut-Qiang languages (deemed to include rGyalrong [=Gyarung =Jiarong] and the extinct Xixia [=Tangut]) were hardly known to Western scholars at the time *STC* was written (ca. 1942–3) or published (1972). It seems doubtful that a special relationship exists between Qiangic and Jingpho, or between Qiangic and Lolo-Burmese, as some Chinese scholars maintain.[22]
- The Nungish and Luish languages were grouped with Jingpho (=Kachin). Jingpho was also recognized to have a special contact relationship with the Northern Naga (=Konyak) group.[23]
- The somewhat idiosyncratic Mikir (Karbi), Meithei (=Manipuri), and Mru languages were included under Kamarupan.
- The Himalayish (=Himalayan) group is considered to include Bodic (i.e. Tibetanoid) languages, as well as Kanauri-Manchad, Tamang-Gurung-Thakali, Kiranti (=Rai), Lepcha, and Newar. It remains to be seen whether this is anything more than a geographic grouping.
- The relatively well-studied Lolo-Burmese (LB) group (= *STC*'s "Burmese-Lolo") is deemed to include the somewhat aberrant Jinuo language of Xishuangbanna, Yunnan.[24] The Naxi/Moso language is quite close to LB, but stands somewhat outside the core of the family.[25]
- The rather mysterious Tujia language of Hunan and Hubei (not mentioned in *STC*) has so far not been assigned to a subgroup.

Most recent subgrouping schema

My most up-to-date reconsideration of TB subgrouping has been motivated by very recent research on the Luish languages (HUZIWARA Keisuke 2008, 2012; Sangdong 2012), as well as on Jingpho dialects (KURABE Keita 2013). It now seems clear that Jingpho's closest relatives are the formerly obscure languages of the Luish[26] group, with the Northern Naga group also fairly close, and the Bodo-Garo group more distantly related. On the other hand, Nungish (once believed to be especially close to Jingpho) now seems to constitute an independent subgroup, so that the many lexical similarities it shows with Jingpho are due to contact rather than to any particularly close genetic relationship.[27] These matters were explored in detail in Matisoff 2013a, which offers (p. 39) a "Jingpho-Asakian Stammbaum", here reproduced as Figure 4.

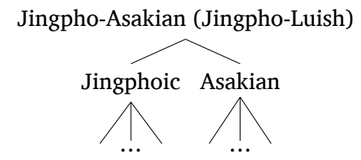

Figure 4: Jingpho-Asakian Stammbaum

Extending this position of the family tree to include Northern Naga and Bodo-Garo, we may re-interpret Burling's *Sal* grouping, as displayed in Figure 5 (cf. Matisoff 2013a:40).

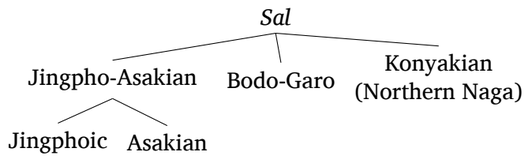

Figure 5: Elaboration of the *Sal* hypothesis

A further change in the previous STEDT schema is my recent abandonment of the cover-term "Kamarupan" for sociolinguistic reasons.[28] For now we are substituting "NE Indian Areal group".

We may now present the latest version of our subgrouping scheme, as shown in Figure 6.

Finally, we are left with the major question of where Chinese fits into the picture. The standard view has always been that the primary split in the ST family is between Chinese (= Sinitic) on the one hand, and TB on the other. This is now being questioned by certain scholars who claim that there are no clear innovations shared by TB as a whole with respect to Chinese, or that there is an especially close relationship between Chinese and a particular branch of TB.[29] If we adopt such a point of view, that would make Sinitic just another branch of a superfamily we might call "Sino-Tibeto-Burman" (STB). It seems prudent, however, to treat this as an open question for the time being.

Teleo- and meso-reconstruction

While in the abstract it might seem super-virtuous to refrain from venturing to reconstruct at the PTB (or *a fortiori*, the PST) level until satisfactory reconstructions are available at every subgroup level, in fact this is neither possible nor necessary. The data are still uneven in the various branches of the family, ranging from the overwhelmingly copious to the tantalizingly sparse, from the phonologically accurate to the poorly transcribed. As mentioned above, as far back as the early 1940's[30] Benedict made brilliant use of "teleoreconstructive" methods by relying mainly on five criterial, phonologically conservative languages: Written Tibetan, Written Burmese, Jingpho, Lushai (Mizo), and Bodo. Teleoreconstruction sometimes involves peeking outside a subgroup in order to come up with a meso-reconstruction; i.e. making educated guesses.[31] Thus final stops may sometimes be reconstructed for Proto-Karenic by looking elsewhere in TB. W.T. French (1983) used similar techniques in his reconstruction of some aspects of his Proto-Northern Naga.[32] As in all scientific inquiry, the main thing is to form precise and correctable hypotheses, i.e. hypotheses that can be tested.

The mesolanguages on which we have relied include the following:

- Proto-Bodo (Burling 1959)
- Proto-Ersuic (Yu 2012)
- Proto-Karenic (Haudricourt 1942–5, 1975; Jones 1961; Burling 1969; Luangthongkum 2013; Solnit in prep; SHINTANI Tadahiko 2012)
- Proto-Kiranti (Michailovsky 1991)
- Proto-Kuki-Chin (VanBik 2009)
- Proto-Northern Chin (Button 2011)
- Proto-Lolo-Burmese (Burling 1967; Matisoff 1969, 1972b, 1974, 1978a, 1979, 1986b, 2010a; Bradley 1979b)
- Proto-Tamangic (Mazaudon 1978, 1994)
- Proto-Tangkhulic (Mortensen 2012)
- Proto-Tani (Sun 1993a)

Nevertheless large gaps remain in our knowledge. We have nothing approaching well-worked out reconstructions for such key subgroups as Qiangic, rGyalrongic, Baic, and Nungish. Still unclear is the exact genetic position of many transitional languages like Chepang, Kham, Lepcha, Newar (all lumped currently with "Himalayish"), or Meithei, Karbi, Mru (close to the Kuki-Chin branch), or Naxi/Moso (close to Lolo-Burmese), or the mysterious Tujia of Hunan/Hubei. As mentioned above, the position of the crucially important Jingpho language has been undergoing reevaluation, with current opinion returning to the notion of a special relationship with Northern Naga and Bodo-Garo, and especially with the hitherto obscure Luish (= Asakian) group of Manipur, Arakan, and Bangladesh. It remains to be seen whether the large "Kamarupan" (languages of the NE Indian area) and the "Himalayish" groups are anything more than purely geographic divisions of the family, and if so what the internal relationships among their many parts might be.

Whenever possible (i.e. when the data are sufficient and the sound-laws are well enough known) we can reconstruct a given etymon at several subgroup levels. A few examples from our database:

[16] See Matisoff 1991b.

[17] The approximate distribution of TB languages by primary country is as follows: India 133, China 133, Nepal 65, Burma 58, Bhutan 24, Bangladesh 18, Thailand 4, Laos 4, Vietnam 3 (Lewis *et al.* 2014).

[18] Among the most valuable of these new sources are Sun Hongkai, Xu Jufang *et al.* (1991), containing 1004 synonym sets in 52 languages and dialects; and Dai Qingxia and Huang Bufan (1992), with 1822 synonym sets in 50 languages and dialects.

[19] *VSTB*:2.

[20] See his review (2003) of Thurgood & LaPolla 1984, *The Sino-Tibetan Languages*.

[21] Reproduced from *STC*, p. 6; *VSTB*, p. 3; *HPTB*, p. 4.

[22] A supergroup called "Rung" was proposed by Thurgood (1984), into which he placed, among others, some Qiangic languages, Nungish, and Lepcha. This grouping was based partly on shared "proto-morphosyntax", and partly on nomenclature, including the *-rong* of *rGyalrong*, the Nungish language *Rawang*, and the Lepcha autonym *Rong*.

[23] The *Linguistic Survey of India* (Grierson, 1903–28) recognized a "Bodo-Naga-Kachin" group, an idea revived by Burling (1983), whose "Sal" supergroup comprises Bodo-Garo (Barish), Northern Naga (Konyak), and Jingpho (=Kachin). Burling's name for this grouping is derived from the etymon ***sal** 'sun' (ult. < PTB ***tsyar** 'sunshine'), one of a number of roots which is attested chiefly in these languages. See *HPTB*:393–4 and below.

[24] Chinese scholars have further divided the Loloish languages of China into six nuclei, although no attempt is made in this volume to distinguish them. In Matisoff 2010a I examined Loloish tonal developments and the fate of the PLB rhyme ***-a** in terms of this six-way grouping, with inconclusive results.

[25] I have grouped Naxi with Lolo-Burmese proper in a supergroup called "Burmo-Naxi-Lolo" Matisoff 1991c. On the basis of some shared tonal developments, I have also entertained the idea of a special relationship between Lolo-Burmese and Jingpho, to which I assigned the jocular designation *Jiburish* (< **Ji-**(ngpho) + **-bur**(mish) + (Lolo)**ish**). See Matisoff 1974, 1991c.

[26] This group needs to be renamed (I suggest Asakian), since "Luish" is a pejorative exonym. See below, "The problem of nomenclature".

[27] If anything, Nungish now seems to be closer to LB than to Jingpho.

[28] See below, "The problem of nomenclature".

[29] Cf. van Driem's "Sino-Bodic" grouping (Driem 1997), and my critique of it (Matisoff 2000c).

[30] I.e., the manuscript version of *STC*, finally published in 1972.

[31] This method must of course be applied with due caution, and I feel that Benedict applied it too loosely with respect to the vexed question of the existence of a reconstructible tonal system at the PTB level. See e.g. Benedict 1973 ("Tibeto-Burman tones, with a note on teleo-reconstruction"). Neither *HPTB* nor the STEDT database makes any attempt to reconstruct tones at the PTB level, although tones can indeed be reliably reconstructed for certain subgroups (e.g., Lolo-Burmese, Tamangic, Karenic, Kuki-Chin).

[32] I would in fact recommend such a teleological approach to Sinologists as well, since TB evidence will be crucial in evaluating the competing reconstructions of Old Chinese that have been proposed in the past few decades.

When a meso-reconstruction can clearly be subsumed under a PTB etymology, we include it (along with its entire suite of supporting forms) under the PTB etymon in question. While it is always gratifying to be able to do this, in may cases it is not yet possible, so that we include the meso-reconstruction as a stand-alone item. These roots of limited distribution are actually highly important for a finer subgrouping of the TB family, since they might eventually permit the establishment of "isogloss bundles" distinguishing one subgroup from another.

The problem of nomenclature

Tibeto-Burman languages are notorious for the multiplicity of names by which they are referred to. These may include the name they use for themselves (autonym), as opposed to the name(s) other groups use for them (exonyms). Languages are frequently referred to by the principal town in which they are spoken (loconyms). Some exonyms are now felt to be pejorative, and have been abandoned, thus acquiring the status of "paleonyms" for which "neonyms" have been substituted.[33] A certain Angamoid Naga group call themselves and their language *Memi* (autonym), and their chief village they call *Sopvoma*; but other groups use *Mao* for this village or its people (exonym), and either *Mao* or *Sopvoma* (exonymic loconym) for their language. There is an older term *Imemai* (probably an autonymic paleonym) which refers to the same language and people.

Some names are used in both a broader and a narrower sense, both for a specific language and for a group of languages that share a close contact relationship. The Maru, Atsi, and Lashi[34] (who speak Burmish languages) consider themselves to be "Kachin" in the broad sense, and in this the Jingpho themselves seem to agree, even though the Jingpho language belongs to a different TB subgroup.

In recent years cultural sensitivities have forced the abandonment of many language names that had been well established in the academic literature. The important Central Chin language that used to be called *Lushai* (a name which is said to mean "long-headed") should now properly be called *Mizo*. A Karenic group that used to be known by the Burmese exonym *Taungthu* (lit. "mountain folk") now prefers their autonym *Pa-o*. The Southern Loloish people formerly known by the Tai exonym *Phunoi* (lit. "little people") should now be called by their autonym *Coong*. The language group that has just been shown to be particularly close to Jingpho has traditionally been called Luish, although this has been shown now to be a pejorative exonym based on the Meithei word for "slave". It is now recommended to change this group's name to *Asakian* (Matisoff 2013a). Speakers of several TB languages of Nepal now object to the Indianized versions of their names with the Indo-Aryan **-i** suffix (e.g. *Newari, Magari, Sunwari*), and prefer to omit the suffix, even though this can lead to ambiguity between the names of the people and their languages (*Newar, Magar, Sunwar*). The autonomy of the most widely spoken TB language of Manipur is Meithei, but for political reasons the preferred name is Manipuri (with the IA suffix **-i**!). There is an Eastern Tani language of Assam usually call Mising, but many leading members of that speech community fear the mockery and mispronunciation of English speakers, who might consider their "Mising" language to be somehow *missing* something—so they now prefer the palatalized variant *Mishing*. The psychological dimensions of these issues are often as fascinating as they are paradoxical. Chinese linguists now feel that the term *Lolo(ish)*, widely used outside of China, is offensive, and insist that the proper respectful term is *Yi*, written with the character 彝 'type of sacrificial wine vessel'. Yet this is only a recent substitution for the homophonous character 夷 'barbarian; savage group on the fringes of the Chinese empire'.

The nomenclatural confusion is particularly acute at the subgroup level, where multiple names for the same TB subgroup have proliferated. Some of this nomenclatural variation goes back to differences between Benedict and his former collaborator and supervisor Robert Shafer, e.g. Shafer's *Barish* and *Mirish* are the same as Benedict's *Bodo-Garo* and *Abor-Miri-Dafla*, respectively. An important group of at least a dozen TB languages spoken in East Nepal is known either as *Kiranti* or *Rai*.[35] An extreme example of proliferation is furnished by the well-established and non-controversial group I call Lolo-Burmese, which has also been referred to as Burmese-Lolo, Yi-Burmese, Burmese-Yi, Burmese-Yipho, Yipho-Burmese, Yi-Myanmar, Myanmar-Yipho—and even Myanmar-Ngwi!

As mentioned above, I had used the name *Kamarupan* as a cover-term for the dozens of TB languages of NE India and adjacent areas (see Figure 3), but several scholars have objected to this largely on the grounds that it has distinctly Indo-Aryan connotations, which might irritate TB groups. See, e.g. R. Burling, "On *Kamarupan*" (1999), and the reply by Matisoff, "In defense of *Kamarupan*" (1999a). I am now certainly willing to abandon this term, although I cannot think of any alternative more concise terms than "TB languages of NE India and adjacent areas". For now, we have chosen the acronym "NEIA" for these languages, and this term appears in body of this work.[36]

Special Challenges for ST/Eytmologization

The relative lack of anciently attested languages—only Chinese, Tibetan, Tangut (Xixia), Burmese, Meithei, Newar, and a few scantily-recorded others—is largely compensated for by the sheer number of modern TB languages (250–300). Special difficulties are presented by the monosyllabic nature of the ST/TB morpheme, a problem shared by other mono- or sesqui-syllabic language families of mainland Southeast Asia (Hmong-Mien, Tai-Kadai, Mon-Khmer).[37] Furthermore, in many TB subgroups these monosyllables are severely eroded phonologically, often losing all the syllable-final consonants.

There are in fact great differences among the TB subgroups with respect to their presentation of proto-entities. WT is especially valuable for its presentation of prefixes; both WT and Kuki-Chin faithfully preserve nasal, stopped, and liquid finals. On the other hand, groups like Loloish and Asakian have

[33] The terminology for the various types of TB language names was developed in Matisoff 1986b: "The languages and dialects of Tibeto-Burman: an alphabetic/genetic listing, with some prefatory remarks on ethnonymic and glossonymic complications." In John McCoy and Timothy Light, eds., *Contributions to Sino-Tibetan Studies*, pp. 1–75. This article was later (1996) expanded into a STEDT Monograph, with the assistance of J.B. Lowe and S.P. Baron.

[34] Referred to as Langsu, Zaiwa, and Leqi in Chinese sources.

[35] Neither of these names is considered to be pejorative. According to K.P. Malla (p.c. 2008), "*Kirāt* is a loose label in Old Indo-Aryan for the cave-dweller, attested in late Vedic texts as well as in the *Mahābhārata*." Rai is "a Nepali word, linked to IA *raaya* 'lord', given to the Khambu chiefs by the Gorkhali rulers in the late 18th century."

[36] This would be similar the the "SHWING" group of Austronesian, i.e. the "South Halmahera West New Guinea Group".

[37] As opposed, e.g., to Austronesian, with its juicy disyllabic roots. For the term *sesquisyllabic*, see below.

retained only indirect traces of earlier prefixes, and have largely or completely undergone erosion of their post-vocalic consonants. rGyalrongic has developed syllable-initial consonant combinations which often surpass those of WT in complexity, but many of the will undoubtedly prove to be secondary. It is therefore a boon to find languages which preserve and erode differently: Hmong-Mien specialists are fortunate that Hmong preserves *initials better, while Mien preserves the pHM *finals better. Recent advances in research in Proto-Asakian[38] have been facilitated by the fact that Kadu preserves *finals better, while Sak preserves *initials better. Such differential preservation often makes for extreme differences in surface form between perfect cognates, e.g. WT **brgyad** / Lahu **hí** 'eight'.

Phonological erosion makes it tough to distinguish between phonologically similar etyma in the same semantic field:

LOUSE ***s(y)ar** and ***s-r(y)ik**. What do you do with a form like **ʂɐ**?

MIND/BREATH ***s(y)am** and ***sak**

MOUTH ***muːr** and ***muk**

FACE ***s-maːy** and ***s-myal**

As an extreme example, we have reconstructed no fewer than 11 etyma meaning NECK/THROAT with initial velars or velar clusters:[39] #389 ***s-gwa-n** ≍ ***r-gwa-n** NECK/NAPE (probably related to #495 ***kwa** THROAT/NECK); #481 ***s-key-k** ≍ ***m-key-k** NECK; #486 ***l-kwak** THROAT/NECK; #488 ***k-raw** ≍ ***k-law** THROAT/PALATE; #489 ***k/s-rawk/ŋ** ≍ ***k-rwak/ŋ** THROAT; #491 ***grey-k** THROAT; #493 ***kak** THROAT; #494 ***ka** THROAT/NECK; #3361 ***gwaŋ** NECK/THROAT; #5651 ***ku** NECK/THROAT.

Some of these putative etyma may ultimately be combinable (e.g. #389 and #495, #481 and #491).[40] It is necessary to constantly rectify one's reconstructions in the light of new data (see below, "Etymological accuracy and rectification of possible errors"), and equally imperative to try to establish "sound laws" by finding parallel examples (see below, "Parallel but surprising examples").

Phonological System of Proto-Tibeto-Burman

Most reconstructions conform to the PTB syllable canon posited in *HPTB*:11–13, shown in Figure 7:

(P_2) (P_1) C_i (G) V (:) (C_f) (s)

Figure 7: Original PTB syllable canon

The initial consonant C_i could be preceded by up to two prefixes, with the inner prefix (P_1) usually assumed to be historically prior to the outer one (P_2).[41] Since one must also assume that some sort of schwa-like vowel must have intervened between the prefix and the root-initial (especially in doubly-prefixed forms like WT **brgyad** 'eight'), this canon actually crosses the boundary between monosyllable and sesquisyllable.[42] While it is sometimes possible assign a clear meaning to a prefixal element,[43] this is not generally the case.[44] (Should it be objected that the term "prefix" should be reserved for fully meaningful elements, we could use the neutral term "formative" instead.) In fact, the semantic and morphophonemic behavior of the prefixes is one of the most interesting aspects of TB morphology.[45] New prefixes are being created all the time, via the reduction (a.k.a. prefixization) of destressed initial constituents in compounds (e.g. PLB ***bəw²-rwak** 'ant' with the first syllable meaning 'bug' > WB **pərwak**). Morphophonemically the prefixes can interact with the root-initial in a variety of ways, including what I have called "prefixal preemption", when a prefix drives out a weak initial like a nasal, liquid, or semivowel.

The C_i may be followed by one of four glides */**-w-, -y-, -r-, -l-**/, or even by certain sequences of two of them (especially **-yw-**).

The PTB vowel system in open syllables is displayed in Figure 8 (see *HPTB*:159–160). Low frequency open-syllable rhymes are in parentheses or square brackets:

(-i) **-u**
-əy **-əw**
[-e] **[-o]**
-ey **-ow**
(-ew) **(-oy)**
-ay **-aw**
-aːy **-aːw**
a

Figure 8: PTB open vowels

The only monophthong of high frequency is ***-a**. Although ***-i** and ***-u** (especially ***-u**) are reconstructible, in many languages they have merged with ***-ey** and ***-ow**, respectively. The core of the system is ***-a** plus a set of falling diphthongs.

Very recently I have banished the weakly attested mid-vowels (**-e**, **-o**) from PTB reconstructions altogether, both in open and closed syllables, substituting for them a set of rising and falling diphthongs /***-wa(-)**, ***-ya(-)**, ***-aw(-)**, ***-ay(-)**/.[46] These formerly reconstructed mid vowels appear in square brackets in Figure 8.

The reinterpretation of some of the formerly reconstructed mid vowels as falling diphthongs necessitates a slight revision in the syllable canon, to permit sequences like */**-wk, -yk, -wŋ, -yŋ**/. We may now revise the PTB syllable canon as shown in Figure 9:

(P_2) (P_1) C_i (G_1) (G_2) V (:) (w/y) (C_f) (s)

Figure 9: Revised PTB syllable canon

Vowel length is reconstructed for PTB, with most of the evidence coming from the Kuki-Chin branch. This is an area where variation is rife, and a length contrast is only shakily reconstructible for the family as a whole.[47]

The set of final consonants includes nasals, stops, liquids, and **-s**: /***-m -n -ŋ -p -t -k -r -l -s**/. The rarest of these is ***-s**, reconstructible in only a few etyma. In both open and closed syllables, a suffixal ***-s** appears in languages like WT (e.g., WT **zas** 'food' < ***dzya** 'eat'; **sbugs** 'hole' ≍ **sbug** 'pierce').

No attempt is made to reconstruct tones beyond the subgroup level, since it is far from proven that a single system of tonal contrasts can be set up for PTB.

It should be noted that many TB languages have much simpler syllable canons, e.g., Lahu (Central Loloish), where native syllables consist maximally of an initial consonant, a vowel, and a tone:

T
(C_i) V

Organization of the Etymologies

The "tagging" process

Etymologization of the thousands of forms in the STEDT database is a laborious and time-intensive process. In principle we are responsible for etymologizing every syllable of every form in the database, by subsuming each syllable under a particular etymon or word-family. This is done by "tagging" the syllables with a numeral representing its provenience, whether it be a root already established in the prior literature or one newly reconstructed by STEDT. The computer can then assemble all similarly tagged forms to create a cognate set. Under favorable circumstances every syllable of a compound can indeed receive a proper tag, e.g. Lahu **g̈û-tu-šī** 'navel' can be shown to be formed from three well-established roots **g̈û** < #137 ***pʷam** 'belly, stomach, waist', **tu** < #520 ***du** 'navel, umbilical cord', and **šī** < #1019 ***sey** 'fruit, rose, round object'. But in reality, of course, a great many of our millions of syllables remain to be tagged, and many will never be etymologized. Such is the case with the five-syllable Lahu word **á-lâ-mì-ší-jɔ** 'rainbow', none of which can yet be assigned to an etymon.[48]

Besides our numerical tags a number of alphabetical symbols are also used: *p* for 'prefix', *s* for 'suffix', *b* for 'borrowing',[49] and *m* for 'morpheme'. The latter tag is assigned to an etymologically obscure constituent of a compound the other members of which have been assigned an etymology.

Supporting forms and their attribution

Each record in our database is ascribed to a particular source. Many of these forms, especially from well-documented languages like Written Tibetan, Written Burmese, or Jingpho, are cited from more than one source. Even when the form is cited identically in multiple sources, we include each citation.[50] When a given form is cited somewhat differently in the sources, our practice of "following copy" is especially useful, particularly when one or more of the sources might not be totally accurate phonemically, or where subphonemic phonetic detail is provided in one source but not another.[51] Great care has also been taken to attribute etymologies to their original source, if they were not newly created at STEDT.

The STEDT database contains forms from sources of many different kinds, including:

- printed books, monographs, articles, especially dictionaries and grammars of individual languages
- synonym lists (i.e. groups of forms from different languages with the same meaning, but with no reconstructions provided), e.g. Luce 1985; Sun Hongkai et al. 1991 (ZMYYC); Huang Bufan & Dai Qingxia, eds. 1992 (TBL)
- semantically based questionnaires solicited by STEDT from fieldworkers working on particular languages
- monographs and treatises of an etymological nature, including works which provide reconstructions at the subgroup level

The supporting forms for an etymology are cited subgroup by subgroup, in a fixed order. As explained above, meso-reconstructions are subsumed (along with their own supporting forms) under general PTB etymologies whenever possible.

For some key languages, special points need to be made:

Written Tibetan

In Jäschke 1881/1958 the letter known as "a-chung" is written with a subscript circle in initial position, e.g. **◌̣bu** 'insect'. For this we have substituted the symbol **ḫ**, e.g. **ḫbu** 'insect'.

Jäschke symbolizes aspiration by a backward apostrophe, for which we substitute **-h-**, e.g. **kha** 'bitter', instead of **k'a**.

Jäschke writes the palatal series of stops with the cumbersome symbols "**c̀**, **c̀'**, **j̀**", for which we substitute "**c**, **ch**, **j**".

Written Burmese

Already in the Rhyming Dictionary of Written Burmese (1941/1977), Benedict's original "**ts**, **tsh**, **dz**" were changed to "**c**, **ch**, **j**". The unaspirated member of this series can also occur syllable finally, so that, e.g. Benedict's tshats 'joint' has been reinterpreted as **chac**.

The low back nasal rhyme is sometimes written as "**-oŋ**" (as in the RDWB) and sometimes as "**-auŋ**" (as in HPTB).

The three WB tones in open syllables have been described and symbolized in many different ways, but our preferred notation is: no tonemark for the modal tone (e.g. **la** 'come'), a circumflex for the heavy tone (e.g. **lâ** 'yes/no question particle'), and an apostrophe for the creaky tone (e.g. **la'** 'moon').

Jingpho

Tones are not indicated in the classic source, Hanson (1906/1954). Dai Qingxia et al. (1983) use the system devised by Chao Yuen-ren for Chinese dialects, i.e. a system of super- or sub-script numerals. Other authors (e.g. Matisoff 1974, 1991) use diacritical marks. Thus, 'house' may be written as **nta** (Hanson), **n⁵⁵ta⁵¹** (Dai et al.), or **ń-tâ** (Matisoff).

Chinese

Old (= "Archaic") Chinese forms cited from Karlgren's Grammata Serica Recensa (1957) are cited exactly as he wrote them. OC forms cited from Coblin (1986) are according to Li Fang-kuei, while those cited from Schuessler (2007) or Baxter/Sagart (2013) are in the latest versions of their own systems.

Glosses of the supporting forms

In almost all cases, the gloss given in each particular source is preserved, unless it is so awkward or misleading as to require emendation.[52] Even if the glosses in consecutive records are identical, the gloss is repeated for each individual record, instead of using a symbol like the "ditto-mark".

If a gloss is too long to fit onto a single line, it is "wrapped" so that the additional lines are indented under the first one.

Many glosses are ambiguous due to the peculiarities of homophony or homography in the English lexicon, e.g. *bark*, *bear*, *boil*, *calf*, *drop*, *fly*, *quiver*, *right*, *scale*, *sow*, *tear*, *wind*, etc.[53] Some sources take pains to disambiguate such glosses by providing additional information, e.g. 'bark (of dog)' vs. 'bark (of tree)'; 'wind (n.)' vs. 'wind (v.)', etc. Many other sources, however, are not so helpful, and it has been up to us to try to figure out which alternative is correct, on the basis of comparative evidence.

Notes

Notes may appear at any point in an etymology. The loosely-hierarchical taxonomy of notes used is as follows:

(a) **"chapter notes"**, which introduce new thesaurus (semantic) sections; note that this moniker is not completely accurate: chapter notes may introduce volumes and fascicles as well.

(b) **"etymon notes"**, which present points about an etymon as a whole. Details on their composition is given further below.

(c) **"subgroup notes"** pertain to a particular subgroup.

(d) **"source notes"**, copied from the original source document, appear as footnotes with record notes, start with the indicator *[Source Note]*.

(e) **"record notes"** are associated with a specific supporting form. They appear as alphabetcally numbered footnotes at the end of the tabular cognate set display (and the numbered restarts with each set).

(f) **"internal notes"** are reminders made by STEDTniks in the course of their work and do not appear in the printed work.

[38] e.g. Huziwara Keisuke 2008, Sangdong 2012, Matisoff 2013a.

[39] This is perhaps further confirmation of the frequently noted tendency of words for these parts of the body to have "guttural" initials.

[40] This classic problem of distinguishing co-allofams from reflexes of separate roots has bedeviled Tibeto-Burmanists from the beginning. Benedict (*STC*) hesitated before assigning ***g-yak** and ***s-rak** ASHAMED to two separate roots (#452 and #431); similarly with ***m-da** and ***b-la** ARROW (pp. 111–112 and #449). I now believe that two separate roots I set up in *GSTC* (Matisoff 1985a) actually reflect the same etymon, so I would now combine CATTLE/DOMESTIC ANIMAL ***dzay** (#129) with ELEPHANT/CATTLE ***tsaːy** (#143). In 1988 I tried to show that two homophonous roots set up in Benedict (*STC*) (***dyam** STRAIGHT and ***dyam** FULL/FILL) are actually one and the same root (Matisoff 1988b). For many similar examples, see Matisoff 2013a.

[41] To take a synchronic example, the etymon ***m-lyak** 'lick' must be reconstructed with a nasal prefix that is found in several branches of the family (e.g. Chungli Ao **mánák** ~ **məzək**, Jg. **mətá?**, Akha **myè?**). The reflex in Tangkhul Naga, however, is **khəməlek**, with a secondary velar prefix that now occurs before all TN verbs.

[42] This term, introduced in Matisoff 1973, describes morphemes that are "one syllable and a half" in length.

[43] The pioneer in attempting to do so at the PTB level was Wolfenden 1929.

[44] The stronghold of sesquisyllabicity in Southeast Asia is the Mon-Khmer family, but specialists in that family have despaired of attaching any particular meanings to the "minor syllables" with schwa-like vocalism.

[45] See the extended discussion in *HPTB*:87–156.

[46] See Matisoff to appear. Notations like ***-wa(-)** mean "***wa** in both open and closed syllables".

[47] See *HPTB*:237–45.

[48] Words for RAINBOW tend to by multisyllabic and unanalyzable in many TB languages, undoubtedly because of the mythic significance of rainbows. Not a single root for RAINBOW can be reconstructed at the PTB level.

[49] For more details about the treatment of borrowings, see below, "Treatment of loanwords".

[50] Paper is not a problem electronically, but in printed publications (e.g. *TBRS*) the form only appears once, with multiple attributions separated by commas.

[51] Cf. the multiple transcriptions of the Written Burmese form for BREAST/MILK under ***s-nəw**: **no¹** (Sun Hongkai et al. 1991:281.39); **nuí** (Weidert 1987:327; *STC*:419); **núi** (Coblin 1986:48); **nui'** (Matisoff 1987; Marrison 1967; Benedict 1976a); **nui.** (Marrison 1967); **nuiw'** (Luce 1985). Records marked with the abbreviation "JAM-Ety" refer to my own etymological notes compiled in the pre-STEDT era, derived especially from older, classic sources. These specific sources can easily be tracked down from the *Bibliography*.

[52] Our practice of "following copy" does not extend to obvious errors, e.g. misspellings in the gloss. It is always best to bear in mind Ralph Waldo Emerson's apothegm "A foolish consistency is the hobgoblin of little minds…"

[53] This problem is of course not unique to English. Cf. the French verbs *voler* 'fly; steal' and the corresponding nouns *le vol* 'flight; theft'.

Notes at the level of a semantic category or etymon are shown "inline", that is, as paragraphs in the running text. "Subgroup notes", "source notes", and "record notes" are shown as footnotes.

Many etyma have **Chinese comparanda** and these are rendered as a separate section following their associated etymon (see details below).

Etymon notes provide such information as:

(a) **richness of attestation:** This ranges from a minimum of two perfectly cognate forms, each from a different branch of the family (e.g. #2625 ***d-rum** 'pine for'), to etyma with support from dozens of languages (e.g. #230 ***s-hywəy-t** 'blood').

(b) **distribution of the etymon among the subgroups:** e.g., "***dum** 'kiss/suck' is firmly established in Tani, N. Naga, and Barish, with convincing but so far isolated cognates in Chepang (Himalayish) and Nesu (Loloish)."

(c) **distribution of a phonological feature:** e.g. "In ***m-prwaŋ** 'mouth', the ***m-** prefix is only directly attested in Qiangic, Tani, and S. Chin."

(d) **meso-roots** to be subsumed under the PTB reconstruction.

(e) **allofams:** variant forms that follow well-established patterns (see below, "Notational conventions and pan-allofamic formulas" & following).

(f) **irregularities:** apparently related forms that vary in a non-structured way, perhaps due to borrowing from a related language, or to a now lost morphological element. Such forms are included in some etymologies in hopes that the irregularities will be explained in the future.

Chinese comparanda

After the evidence for a TB etymon is presented, one or more Chinese comparanda are often suggested in the interests of pushing the reconstruction further back to the PST stage.[54] However, no attempt is made to choose among the often contradictory reconstruction schemes for Old Chinese, and I usually have not tried to set up PST forms, as *STC* sporadically attempted to do.

In addition to these sources, OC reconstructions are also cited from GONG Hwang-cherng (2000, 2001), Coblin (1986), PAN Wuyun (2000), Schuessler (2007, 2009)), and the new Baxter/Sagart system (Baxter & Sagart, 2011).[55]

Many of the comparanda have been discussed by Zev Handel; his contributions are indication by the inclusion of his initials "ZJH" at the end of the section. Stephen Baron recently returned to the project and has reviewed and improved a number of the comparanda. His initials ("SPB") appear along with items he has revised. A comparandum cited without attribution is the responsibility of JAM.

Treatment of loanwords

As mentioned above, obvious loanwords from non-TB languages are tagged as such in our database, with the symbol "b" for "borrowing". When the source of the borrowing is clear, this information is provided, e.g. "bChinese", "bIndic", "bMon".

If an etymon of Indic origin has been borrowed into a large number of TB languages, as is frequently the case in the Himalayan and Northeast Indian areas, we sometimes include the Indic root among our etymologies, marked as "IA" (Indo-Aryan). A couple of examples:

- IA ***ghoDā** HORSE > Apatani **go-ra**, Mizro **sa-*kor***, Lotha Naga **ku^{1}rə^{1}**, Tibetan (Jirel) **gorā**, Khaling **ghora**, Bodo **goray**, Chang **kuri**, etc.
- IA ***battakh** DUCK > Chinbon **papak**, Mongsen Ao **phàtàk**, Chaudangsi **bətək**, Phom **bat^{55}æk^{55}**, Jingpho **khai^{33}*pjek^{55}***, Raji **bətək**, etc.

It sometimes happens that there is an accidental phonological resemblance between a non-TB etymon and a genuine TB root with a similar meaning. In the rare cases where it is hard to decide between borrowing and chance resemblance, we tag the lexical item as "b?".

The Representation of Semantic Associations

As opposed to the organization of *HPTB*, where the etymologies are presented according to their phonological shape, the etymologies in this *Etymological Dictionary and Thesaurus* are arranged by their semantic content.[56]

Every gloss that appears anywhere in our database has been assigned to one or more semantic categories, according to a system we have developed known as SEMCAT.

Many of the points in semantic space in this Dictionary/Thesaurus, as well as each of the chapters of *TBRS*, are provided with semantic diagrams, called "metastatic flowcharts" in STEDT parlance. These diagrams were first introduced in *VSTB*, and have been used subsequently in many of my articles.[57]

They are intended to represent the paths of semantic association undergone by etyma, as established by comparative/historical and/or internal synchronic evidence. An association between two points (X,Y) in semantic space may be established either synchronically or diachronically, either on the basis of a single language or comparatively. I rely on three basic types of evidence:[58]

1. *Synchronic intra-lingual vagueness.* A given daughter language has a single form that means X or Y according to context, e.g. Karbi **artho** means either 'blood vessel' or 'tendon' or 'muscle' or 'nerve'. In many Chin languages reflexes of ***m-luŋ** can mean either HEART or LIVER.
2. *Inter-lingual semantic shift of phonological cognates,* i.e. reflexes of the same etymon mean X in Lg. A but Y in Lg. B, e.g.:
   PTB ***r-kliŋ** 'marrow/brain' > Karbi **arkleŋ** 'marrow', Dimasa **buthluŋ** 'brain';
   PTB ***s-p^{w}ik** 'bowels/stomach' > Karbi **phek** 'bowels', Lahu **ɔ̀-*ɬɬ*-qō** 'stomach'.
3. *Association via compounding.* Three points (A,B,C) in semantic space are related, such that in some language a compound of two morphemes, A + B, has the meaning C. In other words, an etymon appears as a constituent in compounds, such that part of the meaning of the compound derives from it, e.g.:
   FOOT + EYE → ANKLE (Lahu **khɨ-mêʔ-šī** < **khɨ** 'foot' + **mêʔ-šī** 'eye'); similarly Indonesian **mata-kaki** 'ankle' (< **mata** 'eye' + **kaki** 'foot'), which establishes the association EYE ⟷ ANKLE[59]

Certain graphological conventions are observed in the metastatic flowcharts:

1. Points in semantic space between which an association has been established are connected by solid lines. If a point is a bodypart, it is labeled in capital letters. An association between two points that are both bodyparts is an "intra-field association", e.g.:

   EGG ——— **TESTICLE**

   BRAIN ——— **MARROW**

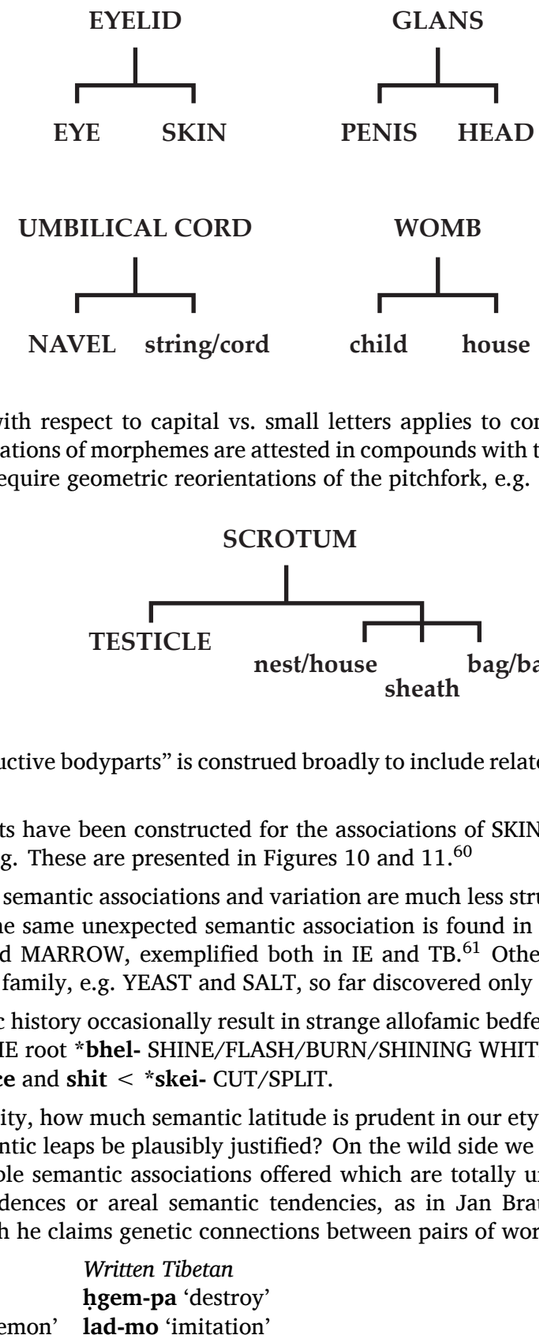
2. If the association crosses into another semantic field (e.g., if it is between a bodypart and a non-bodypart), the non-bodypart point is labeled with small letters, e.g.:

   PENIS ——— **banana**

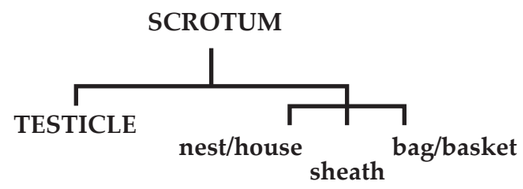
   NAVEL ——— **center**

3. Antonymic associations (cases where the etymon has acquired opposite meanings) are diagrammed by a curved *yin-yang* type of line, e.g.:

4. Compounds are diagrammed by a pitchfork-like symbol, with the two constituents appearing at the points of the fork, and the overall meaning of the compound indicated at the tip of the handle, e.g.:



The same convention with respect to capital vs. small letters applies to compounds. In cases where several different combinations of morphemes are attested in compounds with the same meaning, graphic constraints sometimes require geometric reorientations of the pitchfork, e.g.



The category of "reproductive bodyparts" is construed broadly to include related verbs (e.g., KISS, SUCK, LOVE, SQUIRT).

More complex flowcharts have been constructed for the associations of SKIN, based on the analysis of etyma with that meaning. These are presented in Figures 10 and 11.[60]

In all language families, semantic associations and variation are much less structured than phonological variation. Sometimes the same unexpected semantic association is found in widely different language families, e.g. BRAIN and MARROW, exemplified both in IE and TB.[61] Other associations seem to be confined to a particular family, e.g. YEAST and SALT, so far discovered only in TB.[62]

The vagaries of semantic history occasionally result in strange allofamic bedfellows, e.g. Eng. **black** and **blank**, from the same PIE root ***bhel-** SHINE/FLASH/BURN/SHINING WHITE AND VARIOUS BRIGHT COLORS, or Eng. **science** and **shit** < ***skei-** CUT/SPLIT.

Given this unpredictability, how much semantic latitude is prudent in our etymologies, and under what circumstances can semantic leaps be plausibly justified? On the wild side we have megalo-comparative fantasies with implausible semantic associations offered which are totally unsupported by reasonable phonological correspondences or areal semantic tendencies, as in Jan Braun's *Sumerian and Tibeto-Burman* (2001), in which he claims genetic connections between pairs of words like the following:

Sumerian	*Written Tibetan*
gim 'axe'	**ḥgem-pa** 'destroy'
alad 'protective demon'	**lad-mo** 'imitation'
šinig 'tamarisk'	**snyigs-pa** 'degenerated; grown worse'
peš 'three'	**gsum** 'three'

Deciding how much semantic latitude to allow among putative cognates is definitely an art rather than a science.[63] Here as elsewhere a middle-of-the-road approach is necessary, neither overly conservative nor too wildly speculative.

Regularity and variation

Every spoken language is rife with variation on both the phonological and semantic planes, some of it rule-governed and some of it sporadic. Thus, despite the qualms of certain extreme neogrammarians, we must assume that this is true for proto-languages as well. It must be admitted that a lot of guesswork is involved in etymologizing material from hundreds of languages and dialects at once, without having established the "sound laws" in advance. The problems are especially acute when comparing phonologically depleted languages with those having richer syllable canons. When there is a partial phonological similarity between distinct etyma with the same meaning, it is not easy to decide by simple inspection to which etymon we should assign a phonologically slight form in a daughter language.

There is a dialectical relationship between synchronic data and sound laws. The "laws" are derived by inference from the data in the first place, but once proto-forms are reconstructed, they can be used to guide us in our hunt for cognates in languages not yet examined (even if they have undergone semantic change). Almost every TB/ST etymology so far proposed presents problems and complications—irregularities—in some language or other, which is par for the course even in the much better known Indo-European family. Part of our task is to indicate where the exceptions, problems, and irregularities lie, in the hope that they can ultimately be explained. The concept of "regularity" itself is by no means simple, nor does it mean the same thing to different scholars.[64]

Those who lack what I have called "Proto-Sprachgefühl"[65] can produce abstract, formulaic reconstructions bristling with strange symbols but devoid of any phonetic or typological plausibility.[66] Given sufficient semantic latitude and proto-forms that are complex enough, one can formulate "sound laws" in such a way that they appear completely regular and exceptionless. At an extreme level we find "megalocomparative" proposals of genetic relationship that turn received notions upside down (e.g. Sino-Mayan, Sino-Caucasian, Sino-Austronesian, Japanese-Dravidian), and which can lead the unwary down fruitless paths, obscuring the differences among cognates, borrowings, and chance resemblances.[67] Various tricks of analysis that I have lumped under the rubric of "proto-form stuffing" can help the Nostraticist or Sino-Mayanist convince himself that his fantastical comparisons are "perfectly regular". Paradigmatically, one can multiply the number of proto-phonemes. If you reconstruct 35 proto-vowels, any anomalous vowel correspondence can be regarded as "regularly reflecting" a separate proto-vowel. Syntagmatically, if you reconstruct etyma like ***mrgsla,*** and the monstrous proto-cluster ***mrgsl-** occurs only in a single etymon, any set of reflexes in the daughter languages can be said to be "regular".[68]

The time-depth of PST is perhaps 6000 years B.P., about at the limits of the comparative method. We can hardly afford to insist on "perfect regularity" of correspondence among our putative cognates. But instead of resorting to "proto-form stuffing" to try to explain away problems, what is needed is an explicit theory of variational phenomena. TB and ST etyma, like those of other language families, are not independent isolated entities, but stand in complex phonosemantic relationships with each other. It has been recognized for a long time that words in Chinese and TB languages participate in morphophonemic groups of partially resemblant forms that have been called "word families".[69] In *VSTB* I developed the

[54] Most of these comparanda have already been included in *HPTB*.

[55] See "A Concise Introduction to Old Chinese Phonology" by Zev Handel (*HPTB*:543–574), which treats the major differences in the reconstructive systems of Karlgren (*GSR*), LI Fang Kuei (1976, 1971/1980), and William Baxter (1992).

[56] This is also the organizational plan of *TBRS*, which deals entirely with a single semantic area, the Reproductive System. (This was originally supposed to constitute Fascicle Nine of Vol I (Body-parts). Most of the examples in this section are drawn from *TBRS*, since it is there that the semantic associations of the etyma have been investigated most thoroughly.)

[57] See, e.g., Matisoff 1980 ("Stars, moon, and spirits"), 1985a ("God and the ST copula"), 1985b ("Arm, hand, wing"), 1988b ("Property, livestock, talent"), 1991a ("Grammatization in Lahu"), 1991d ("Mother of all morphemes"), 1994a ("Buttock and heel"), 2000d ("Three TB word-families"), and 2004 ("Areal semantics").

[58] See the discussion in *VSTB*:194–200.

[59] The same formation is found in many other TB languages, e.g.:

	FOOT	*EYE*	*ANKLE*
Lalung	**ia-thong**	**mi**	**ia-thong-mi**
Limbu	**lāŋ**	**mik**	**lāŋ-mik**
Lushai (Mizo)	**ke**	**mit**	**ke-mit**
Meithei	**khu**	**mit**	**khu-mit**
Tangkhul	**phei**	**mik-ra**	**phei-mik-ra**
Written Burmese	**khre**	**myak-ci'**	**khre-myak-ci'**

[60] As a desideratum for the future, one might envision three-dimensional semantic diagrams like those used to model molecules in organic chemistry!

[61] See *VSTB*, pp. 182–3, 203.

[62] See Matisoff 2003a (*HPTB*:34) and 2003b. Yeast is traditionally used for brewing liquor rather than for baking bread in East and SE Asia. Both salt and yeast are efficacious substances that have dramatic effects on the taste of food or drink; their lack renders the food or drink insipid. Cf. Proto-Kuki-Naga ***m-tsyi** 'salt' and Jingpho **mətsi**, Lahu **dî** 'yeast' (Lahu voiced initials come from *prenasalized ones).

[63] As in many other respects, Benedict was also a pioneer in the field of SE Asian areal semantics. Cf. his brilliant article "Semantic differentiation in Indo-Chinese" (1939).

[64] See Matisoff 1992 ("Following the marrow") and 1994d ("Regularity and variation").

[65] See Matisoff 1982.

[66] Recent examples of this genre include Sedláček 1970; Weidert 1975, 1979, 1981, 1987; Peiros & Starostin 1996.

[67] See Matisoff 1990 ("On megalocomparison"). Megalocomparison has the apparent advantage of non-falsifiability, since, as Haudricourt has observed, one can never prove that any two languages are not related. But non-falsifiable hypotheses are not scientific. When presented with alternative non-falsifiable proposals it is impossible to choose among them.

[68] This is actually the proto-form offered in Weidert 1981:25 for an etymon meaning 'spirit, ghost, shadow' (reconstructed as ***m-hla** in *STC* #475). As I have observed (Matisoff 1982:22), "It is always possible and sometimes necessary to invent an *ad hoc* explanation for an anomalous case. It is even true that some such *ad hoc* 'solutions' are more plausible than others. The only harm is in deluding oneself that an explanation which covers only a single case establishes a 'regularity'."

[69] See the pioneering study of Karlgren (1933), "Word families in Chinese".

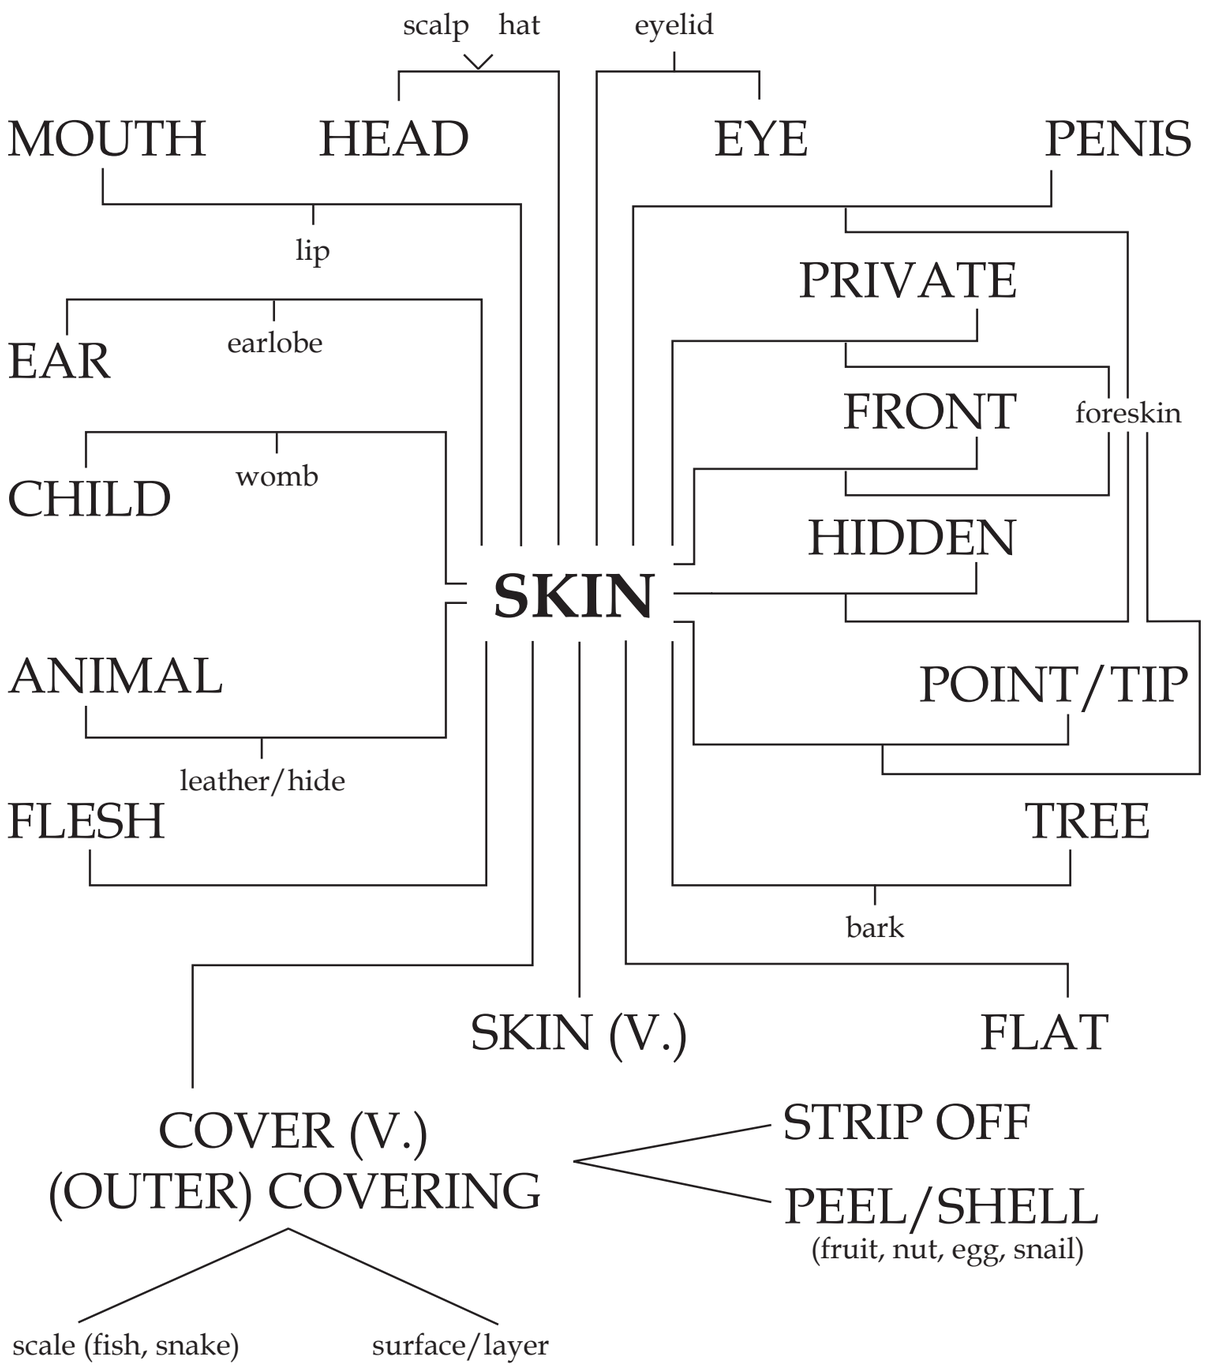


Figure 10: SKIN flowchart #1

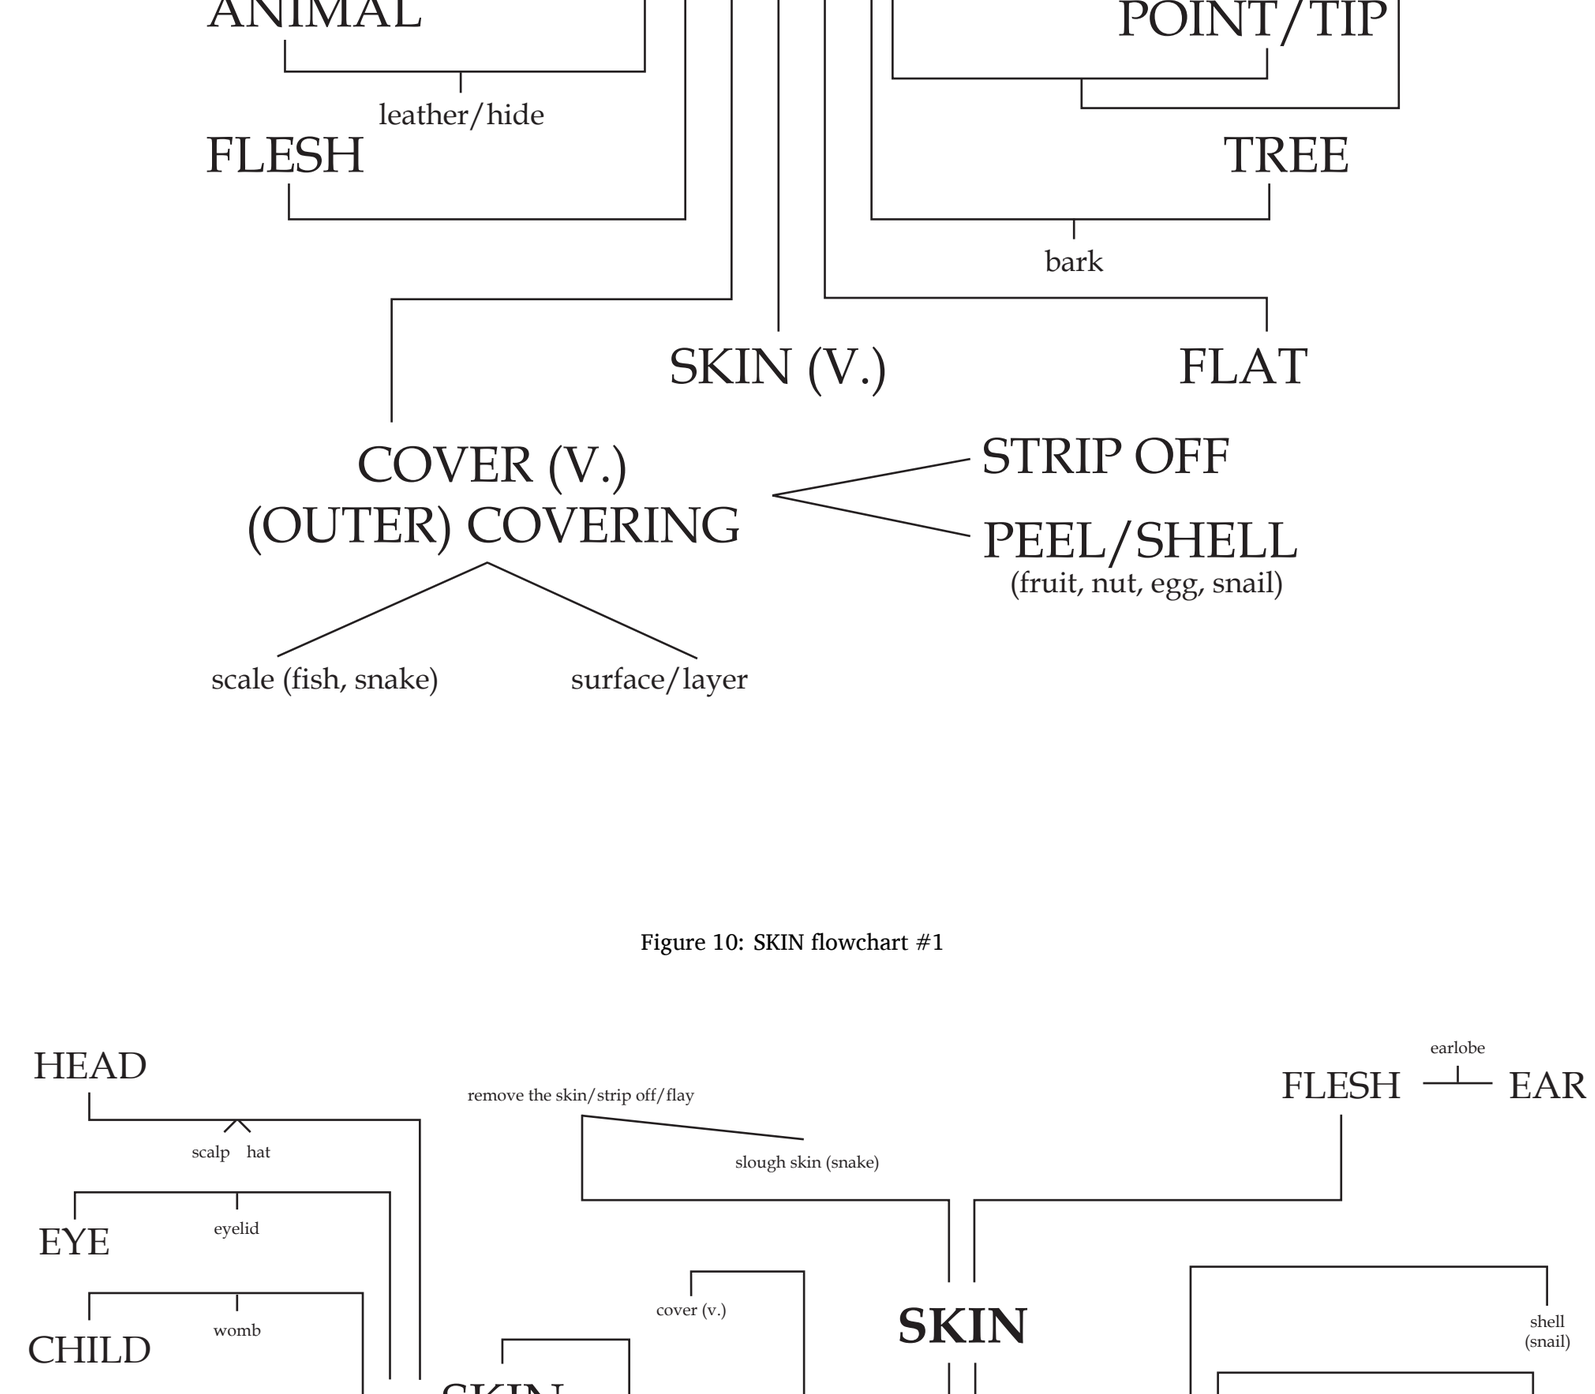

Figure 11: SKIN flowchart #2

notion of the *allofam*, or individual member of a word-family, and advocated the formulation of "allofamic reconstructions" that accommodated all the well-attested variants deemed to descend from the same proto-word-family. The symbol ⩙ was introduced to symbolize an allofamic relationship between variant forms, i.e., "A ⩙ B" means that "A and B are synchronic allofams of each other", while "*A ⩙ *B" means that there is a word-family relationship between A and B at the proto-level.[70]

Needless to say, extreme care must be used in claiming that different forms are variants of the same etymon. Allofamic theory must be applied in a controlled and constrained way.[71] Not everything may be said to vary with everything else! It is sometimes quite difficult to decide whether partially resemblant forms represent separate etyma or whether they are merely allofams of the same word-family. Not only must each proto-allofam fit our canonic template (above, "Phonological System of PTB"), but the type of variation posited must be abundantly replicated in other examples. We do not attempt to conceal such uncertainties, but frequently entertain the possibility that etyma set up as independent might actually be co-allofams, or *vice versa*.

Notational conventions and pan-allofamic formulas

The best attested patterns of variation in ST/TB are all exemplified in the etymologies of Fascicle 1.9 (*The Reproductive System*, previously published as *TBRS*). They include the following:

[70] This symbol ⩙, a combination of > 'goes to' and < 'comes from', is meant to suggest that neither variant is necessarily deemed to have temporal priority, but that both must be set up to account for attested forms. Other related symbols are A ⩱ B "A is not an allofam of B," and A ?⩙? B "is A an allofam of B?" Driem 2012.

[71] See the extended discussion in Ch. XII of *HPTB* (pp. 491–534), "Allofamic variation in rhymes".

1. Voicing vs. voicelessness of the initial consonant:[72]

   ***gwap ≍ *kwap** (11a) HATCH/INCUBATE/COVER
   ***prat ≍ *brat** (75) BREAK/WEAN
   ***tuŋ ≍ *duŋ** (44a) NAVEL

2. Variation between fricative and affricate:

   ***(t)sum** (45) NAVEL
   ***(t)sip ≍ *(t)sup** (107) NEST/WOMB/SCROTUM[73]

3. Presence vs. absence of medial **-y-**:

   ***b(y)at** (81) VAGINA
   ***l(y)ap** (151) COPULATE

   A special case of this pattern is the alternation between dental and palatal fricatives and affricates:

   ***s(y)awk** (61) DRINK/SUCK/SMOKE
   ***dz(y)əw** (56) BREAST/MILK
   ***ts(y)uːŋ** (44b) NAVEL

4. Variation between labial stop and labial semivowel:

   ***pu ≍ *wu** (1a, 1b) EGG
   ***pam ≍ *wam** (98a, 98b) WOMB/PLACENTA/NEST

5. Variation between different prefixes:

   ***r-ga ≍ *m-ga ≍ *d-ga ≍ *s-ga** (141) COPULATE/LOVE/WANT
   ***m-tow ≍ *s-tow** (3) EGG
   ***m-ŋal ≍ *l-ŋal** (100) WOMB/PLACENTA

6. Variation between **-u-** and **-i-** in closed syllables:

   ***dul ≍ *dil** (2b) EGG/TESTICLE
   ***m-dzup ≍ *m-dzip** (55) SUCK/SUCKLE/MILK/KISS
   ***tsyur ≍ *tsyir** (66) MILK/SQUEEZE/WRING

7. Variation between medial **-ya-** and **-i-**:

   ***s-riŋ ≍ *s-ryaŋ** (39) LIVE/ALIVE/GREEN/RAW/GIVE BIRTH
   ***s-nik ≍ *s-nyak** (124) PENIS/COPULATE
   ***b-rim ≍ *b-ryam** (46) NAVEL/UMBILICAL CORD

8. Alternation between medial **-wa-** and **-u-**:

   ***tsyul ≍ *tsywal** (105) WOMB/PLACENTA

9. Alternation between final homorganic stops and nasals:

   ***glim ≍ *glip** (15) BROOD/INCUBATE EGGS
   ***s-nəwn ≍ *s-nəwt** (53c) BREAST/MILK/SUCK
   ***tsiŋ ≍ *tsik** (78) VAGINA

As some of the above examples illustrate, some roots show more than one type of variation. When a posited allofamic reconstruction (e.g. ***sir ≍ *sit** (6) EGG) does not fall into a well-attested variational category, I comment on it. Handel makes similar remarks with respect to some of my TB comparisons with OC.

Occasionally, when the phonosemantic variation among the allofams is considerable, and when each variant is amply attested, we split up the presentation of the data into subroots that are designated by the same number but with different lower case letters, e.g.: ***p-wu** (1) EGG is split into ***wu** (1a) and ***pu** (1b); ***m/s-la(ː)y ≍ *s-tay** (40) NAVEL/CENTER/SELF is split into ***m/s-la(ː)y** (40a) and ***s-tay** (40b); ***m-ley ≍ *m-li ≍ *m-ney** (114) PENIS is broken down into ***m-ley ≍ *m-li** (114a) and ***m-ney** (114b).

As I put it 42 years ago, "We must steer an Aristotelian middle path between a dangerous speculativism and a stodgy insensitivity to the workings of variational phenomena in language history."[74]

Parallel but surprising examples

Despite our concern with variational phenomena, we are always on the lookout for "sound laws" that can be established on the basis of parallel examples. A particularly striking sample is displayed in Figure 12, which demonstrates that PTB *prefixed laterals before the rhyme ***-əy** developed into Lahu syllables with initial **h-** and the vowel **-ɔ**:

	Old Burmese	Lahu	Akha	Jingpho	WT	Proto-TB
'wind'	**le**	**mû-hɔ**		**būŋ-lī**	**rdzi**	***g-ləy**
'boat'	**hle**	**hɔ-lɔ̀ʔ-qō**		**lī**		***m-ləy**
'heavy'	**lê**	**hɔ̂ ve**		**lī**	**lći**	***s-ləy-t**
'grandchild'	**mliy > mrê**	**hɔ̄-ē**	**ɔ̀-pà**	**məlī**		***b-ləy**
'four'	**lê**	**ɔ̂**	**ɔ̀**	**məlī**	**bźi**	***b-ləy**
'bow/sling'	**lê**	**hɔ̂-ma**	**ca-ɔ̀**	**ləlī**	**gźu**	***d/s-ləy**

Figure 12: Lahu reflexes of **-əy** after complex laterals

Yet even in this beautiful example there is an exceptional reflex in the Lahu word for 'four', which lacks initial **h-**. Surely this slight irregularity does not impugn the whole "sound law", although it must be pointed out with hopes that it can ultimately be explained.[75] Parallelism of variational patterns is very welcome, both within a language and across languages. See Figure 13, which exemplifies the same pattern of variation between homorganic final stop and nasal (#9 above) in Chinese and Lahu, two quite distantly related languages. After palatal initials, WT fairly regularly has **-u** corresponding to front vowels in other languages.

PST/PTB ***sywar** > OC ***sân ≍ *sât** and PLB ***swan ≍ *swat**

1. PTB ***sywar** 'flow/pour/scatter'
   WT **ḥtshor-ba** 'escape; flow out, run over'; Lepcha **tśhor** 'the pouring of water; Garo ***sol*-aŋ** 'flow'; Dimasa **di-*sor*** 'id.'; Jingpho **šēn** 'flow (as tears, sweat, water poured on ground)'
2. PLB ***swan ≍ *swat**
   ***swan$^{1/2}$** > WB **swan** 'pour out, spill, shed', **swân** 'pour upon, cast by pouring liquid into a mold'; Lahu **šē** 'pour; sow, broadcast'; Akha **sè** 'sow seeds, **sjè** 'pour'; Mpi **se^{1}** 'sow, broadcast'
   ***swat** > Lahu **šêʔ** 'pour, spill'; Akha **sjéq**; Sani **sɤ^{44}**; Bisu **šèt**
3. OC ***sân ≍ *sât**
   ***sân** > 散 [*GSR* 156a-b] (Mand. *sàn*) 'disperse'
   ***sât** > 撒 [*AD* 767] (Mand. *sā, sǎ*) 'scatter; let loose'

Figure 13: Parallel patterns of variation in Lolo-Burmese and Chinese: SCATTER/POUR

Notational conventions with respect to variation

A few notational conventions with respect to my PTB reconstructions should be mentioned:

- Variant reconstructed forms are indicated in several ways. They are usually written with the "allofam symbol" ≍ between them, e.g.: ***glim ≍ *glip** BROOD / INCUBATE; ***s-riŋ ≍ *s-r(y)aŋ** LIVE / ALIVE / GREEN / RAW / GIVE BIRTH. Sometimes, however, I use an alternative notation with parentheses, e.g.: ***(t)si** COPULATE/LOVE; this is equivalent to ***si ≍ *tsi**. Slashes may also be used, e.g. ***p/buk ≍ *p/bik** BORN/GIVE BIRTH; this is equivalent to ***puk ≍ *buk ≍ *pik ≍ *bik**. Finally, still another way of indicating proto-variation is by means of a "vertical reconstruction", e.g.:

  * **t / d** **uŋ** NAVEL. This means the same as ***tuŋ ≍ *duŋ**.

- Parentheses are especially appropriate for those frequent cases where there is variation or indeterminacy between dental and palatal fricates; in fact that is one of my principal motivations for writing the palatal series as sequences of dental plus **-y-**, rather than writing them with *hačeks* or grave accents, e.g.:

  ***ts(y)uːŋ** NAVEL / CENTER (= ***tsuːŋ ≍ *tšuːŋ)**
  ***s(y)awk** DRINK / SUCK / SMOKE (= ***sok ≍ *šok)**

- Etyma which show variation between initial ***p-** and ***w-** are reconstructed with the morphophonemic symbol ***p^{w}-,** which is roughly equivalent to treating the stop element as a prefix (***p-w-**).[76] Thus, a reconstruction like ***p^{w}u** EGG / BIRD / ROUND OBJECT implies the existence of two subroots, ***pu** and ***wu,** whatever the ultimate explanation for this variation might prove to be.
- In the original version of *STC* (ca. 1943), Benedict reconstructed two PTB high long vowels ***-iy** and ***-uw,** contrasting with the much less frequent short high vowels ***-i** and ***-u.** In the published version (1972) he modified the reconstruction of these long vowels to ***-əy** and ***-əw,** a practice which I follow myself. Occasionally, however, when the evidence does not permit us to decide between a long and a short high proto-vowel, it is convenient to revert to the earlier notation, with parentheses, e.g. ***b-ni(y)** 'petticoat' (*STC* #476); ***sru(w)** 'relative' (*STC* p. 108).

In cases where an etymon exhibits several different variational patterns, it is often advantageous to display these simultaneously in complex expressions that we call pan-allofamic formulas or "PAF's" for short. A typical example is provided in Figure 14, presented in vertical format.

BELLY/STOMACH

	p			
***s-**		**u**		
	b		**(ː)**	**(k)**
***ʔ-**		**i**		
	w			

Figure 14: A typical PAF

A PAF is merely a convenient and concise way of representing several types of variation at once. In this case they include (a) different prefixes attested with the root; (b) voicing alternation and lenition of the labial root-initial; (c) variation between the high vowels **-u-** and **-i-**; (d) evidence for long vowels in some reflexes; (e) presence or absence of a final velar stop. All of these variational patterns are directly instantiated in the various daughter languages. When necessary, such PAF's are broken down into their individual allofams, with each supporting form assigned to a particular variant.

To avoid misunderstandings, several points must be made with respect to our PAF's:

PAF's are to be sharply distinguished from "pseudo-micritizing devices" for making *ad hoc* comparisons look regular. Extreme examples of this approach are Benedict's "split cognates" in Austro-Tai, where purported reflexes of the same etymon need have no proto-phoneme in common, e.g.

DOG Proto-Austro-Tai * **[wa] kl̥əwm [a]** > Proto-Tai ***hma**, Proto-Hmong-Mien ***klu** (Benedict 1975a:272–3)

- Not all mathematically possible variants provided for in a PAF are necessarily needed to cover all the reflexes that have been found. Thus, strictly speaking, Figure 14 (BELLY/STOMACH) would permit 72 allofams: 3 prefixes (***s-**, ***ʔ-**, or zero[77]), × 3 root- initials × 2 vowels × 2 degrees of vowel length × 2 codas (zero or ***-k**). Certain mutual dependencies are not indicated in Figure 14, e.g. the fact that the alternation between **-u-** and **-i-** is only found in closed syllables, i.e. in syllables where there is evidence of final **-k**.
- A PAF makes no claims about the relative antiquity of the various allofams that it represents. Such judgments may sometimes be inferred from the notes accompanying our etymologies, where the relative frequency and subgroup-distribution of the variants are usually detailed.
- It may well turn out that certain variational patterns that have been observed reflect some deeper underlying regularity yet to be discovered. As discussed above, one way to attack an explanation based on variation is to propose a new proto-entity. Thus, e.g., we could reconstruct all etyma showing **-u- ≍ -i-** variation with a special proto-vowel, say ***i**. This "stuffing" of the proto-inventory buys us little, however, and I prefer simply to document the variational patterns which are well-documented, leaving them for future comparativists to evaluate.

Similarities and differences between Tibeto-Burman and Indo-European patterns of variation

Prefixal variation

To have different prefixes attached to the same root is an extremely common phenomenon in TB, partly because prefixes may arise from the reduction of the first syllables of compounds, and also because certain TB languages seem to prefer a particular prefix to generalize throughout large parts of the lexicon. Consonantal prefixes play a very minor role in IE etymologies. The only example I can think of is the s-mobile, a prefixal ***s-** that appears with a certain root in some languages but not in others, e.g. PIE ***(s)teg-** 'cover' > Lat. *tegō*, German *decken*, OE þeccan, but Greek *stegō* and Russian *stog*.[78]

Manner of articulation of the root-initial

As noted above, variation in the voicing of initial consonants is pervasive in TB, largely due to the influence of prefixes, which in many instances have disappeared, leaving only indirect traces. Thus the voiced series of obstruents in Lahu (/b d j g/) has been demonstrated to derived from Proto-Lolo-Burmese *prenasalized initials, which still survive as such in many Loloish languages like Luquan and Nasu (see Matisoff 1972b). In Indo-European, on the other hand, a discrepancy in voicing can sometimes be a fatal objection to a candidate for cognacy.

Alternation between initial labial stop and w-

In as many as 20 TB etymologies, some languages have a labial stop while others have **w-** (even though the "regular" correspondences are between stops and stops and semivowels and semivowels); e.g. PIG WT **phag**/WB **wak**. This phenomenon, which I have called "extrusional", occurs mostly before the vowel **-a-**.[79]

Vocalic alternations

Conversely, vowel alternations ("ablaut" or "gradations") are thoroughgoing and well-structured in IE, but quite sporadic in ST/TB, either confined to particular languages (e.g. Written Tibetan), or due merely to phonetic factors, without semantic content (e.g. alternation between medial **-i- ≍ -u-**, especially in the environment of a labial C_i and/or C_f. Even less phonetically motivated is the variation between **-i- ≍ -ya-** found in several roots, notably EYE ***mik ≍ *myak**. Very occasionally a single etymon exhibits both types of alternation, e.g. BODY HAIR ***mul ≍ *mil ≍ *myal**; FLY ***pur ≍ *pir ≍ *byar**.

Variation between homorganic final stops and nasals

This is common both in Chinese and TB, perhaps due to the influence of suffixes which have since disappeared; but this phenomenon is unknown in IE. See Figure 13, above (SCATTER/POUR).

Tonal variations

Nothing is more common than for a ST/TB etymon to show tonal variation, either within a single language, or within a single subgroup, or across subgroups. These variations may be highly structured, even rule-governed (with clear conditioning), or they may be quite sporadic. Nevertheless tones usually do correspond very well within a subgroup, so that tonal anomalies must receive special attention. Tonally impoverished IE, on the other hand, must do without this sort of correspondence (except perhaps with respect to the pitch accents of Greek and Sanskrit, which sometimes do correspond regularly).

Root extensions/augments in final position

One variational feature shared by both TB and IE is the phenomenon of extra consonants tacked onto the end of a root, with no clear reason for it. First a couple of examples from TB:

A very similar example from Indo-European involves the morpheme ***wer-** TURN/BEND, called "the base of various Indo-European roots" (Morris 1981:1549). See Figure 15.

[72] Nothing is more common in TB word families than variation of voicing in initial consonants, largely due to the pervasive influence of prefixes on the manner of the initial. This is in sharp contrast to the situation in Indo-European or Austronesian, where such variation in manner is quite rare, and is usually not tolerated in reconstructions.

[73] This etymon also illustrates #6, below.

[74] Matisoff 1972a ("Tangkhul Naga and comparative TB"), p. 282.

[75] This exceptional Lahu reflex is reminiscent of Latin *ānser* 'goose' < PIE ***ǵ^{h}ans-**, since the expected Latin reflex of ***ǵ^{h}-** is *h-*. This irregular vowel-initial Latin form is usually described as a "cockneyism."

[76] For extended discussion of this issue, see Matisoff 2000a.

[77] The fact that many daughter languages show no trace of a prefix is indicated by the hyphens in the PAF.

[78] A good list of these roots is to be found in the index to the *Lexikon der indogermanischen Verben* (Rix *et al.* 2001).

[79] See Matisoff 2000a.

More on the concept of word family: blood relatives vs. adoptive ones

According to the broad definition of “word family” adopted at STEDT, a family may include “blood relatives” (i.e. native words directly descended from an earlier stage of a given language), as well as words borrowed from a related language (“adoptive relatives”). It is the task of the analyst to distinguish these two types of family members. In TB, this problem is often acute, e.g. with respect to the Baic languages of Yunnan, which have been overwhelmed with different strata of loanwords from Chinese over the millennia. Indo-European also has countless examples of this mixed type of word family, as in Figure 16.

1. Inherited Germanic material
   (a) ***wod-ōr-** [suffixed o-grade] > PGmc ***watar** > OE *wætar* > WATER
   (b) ***wēd-o-** [suffixed lengthened grade] > PGmc ***wēd-** > OE *wæt, wēt* > WET
   (c) ***wod-** [o-grade] > PGmc ***wat-skan** > OE *wæscan, wacsan* > WASH
   (d) ***we-n-d-** [nasalized form] > PGmc ***wintruz** ‘wet season’ > OE *winter* > WINTER
   (e) ***ud-ro**, ***ud-r̥-** [suffixed zero-grade] > PGmc ***otraz** > OE otor > OTTER
2. Borrowings from other Indo-European languages
   (a) ***ud-ōr-** [suffixed zero-grade] > Greek *hudōr* ‘water’ > HYDRO- (including CLEPSYDRA, DROPSY)
   (b) ***u-n-d-ā-** [suffixed nasalized zero-grade] > Latin *unda* ‘wave’ > UNDULATE, INUNDATE, ABOUND, REDUNDANT, SURROUND
   (c) ***ud-skio-** [suffixed zero-grade] > Scot. and Ir. Gaelic *uisge* ‘water’ > *uisquebaugh* ‘eau de vie’ > WHISKEY
   (d) ***wod-ā-** [suffixed o-grade] > Russ. *voda* ‘water’, with *-ka* ‘diminutive’ > VODKA

Figure 16: English reflexes of the PIE etymon ***wed-** ⪤ ***wod-** ⪤ ***ud-** WATER (adapted from AHD 73)

Etymological accuracy and rectification of possible errors

Our STEDT etymologies have been undergoing a constant process of “rectification”, and may be roughly divided into three types: (a) those to be accepted as is; (b) those to be accepted with modifications; and (c) those to be rejected. As with all scientific hypotheses, our reconstructions are falsifiable in the light of new data or better analyses. There are all too many ways in which one can make etymological mistakes, and I have been guilty of all of them at one time or another.[80] A rough taxonomy of errors would have to include the following:

Treating a loanword as native

I was at first delighted when I ran across the Jingpho form **wé?-wū** ‘screw’, since its first syllable looked like an excellent match with Lahu **ɔ̀-vè?** ‘id.’, for which I then had no etymology. Could this be a precious example of the rare PTB rhyme ***-ek**? But the screw is hardly an artifact of any great antiquity, and it would be *prima facie* implausible that a root with such a meaning would have existed in PTB. The truth quickly became apparent. The modern Burmese form for ‘screw’, **wé?-?u** (WB **wak-?u**), the obvious source from which both Jingpho and Lahu borrowed these words, means literally “pig-intestine”. The semantic association is the corkscrew-like appearance of a pig’s small intestine. This etymology is also interesting from the viewpoint of distinguishing native vs. borrowed co-allofams. The usual, native words for ‘pig’ in Jingpho and Lahu are **wà?** and **và?**, respectively; but the doublets borrowed from Burmese have front vowels, as in spoken Burmese. Unless a native speaker of Jingpho knows Burmese, s/he is unlikely to realize that the first syllable of **wé?-wū** means ‘pig’, especially since this syllable is in the high-stopped tone, while ‘pig’ is low-stopped. The native Lahu speaker is even less likely to recognize the source of **ɔ̀-vè?**, since the morpheme for ‘intestine’ has been completely dropped from the original Burmese compound, rather like the way our word *camera* (< Lat. ‘room; chamber; vaulted enclosure’) is a shortening of the old compound *camera obscura* (“dark chamber”).[81]

Combining reflexes of unrelated roots

When two forms bearing a semantic resemblance in a phonologically depleted language differ only in tone, it is tempting to try to relate them. I once entertained the possibility that such pairs of Lahu forms as **phu** ‘silver, money’ / **phû** ‘price, cost’ and **mu** ‘high, tall’ / **mû** ‘sky’ were co-allofams, though they can easily be shown to descend from quite separate etyma: **phu** < PTB ***plu** (*STC* p. 89) / **phû** < PTB ***pəw** (*STC* #41); **mu** < PTB ***mraŋ** (*STC* p. 43) / **mû** < PTB ***r-məw** (*STC* #488).[82]

Failure to recognize that separately reconstructed etyma are really co-allofams

An opposite type of error is to overlook the etymological identity between sets of forms, assigning them to separate etyma when they are really co-allofams. Thus *STC* sets up two independent PTB roots, both with the shape ***dyam**, one meaning ‘full; fill’ (*STC* #226) and the other glossed as ‘straight’ (*STC* #227). Yet it can be shown that the latter root also means ‘flat’, and that all reflexes of #226 and #227 may be subsumed under a single etymon, with the underlying idea being “perfection in a certain dimension”.[83]

Similarly, I was slow to recognize that two roots I had set up separately, PLB ***dzay²** ‘cattle; domestic animal’ (Matisoff 1985a #129) and NE Indian ***tsa:y** ‘elephant; cattle’ (#143) are really one and the same.[84]

Double-dipping

This embarrassing situation occurs when an author inadvertently assigns the same form in a daughter language to two different etyma, perhaps within the pages of the same book, but more likely in separate articles. At different times I have compared Chinese **chún** 唇 ‘lip’ (OC **ɗi̯wən**) to both PTB ***dyal** and ***m-ts(y)ul**, finally deciding in favor of the latter.[85] It is of course perfectly legitimate to change one’s mind, as long as one explains why. The best course is to present the alternative etymologies together, inviting the reader to choose between them.

[80] The discussion in this section is adapted from *HPTB*, pp. 538–40.

[81] There is a difference in detail between the two cases, however: the deleted ‘intestine’ is the head of the compound “pig-intestine”, but the deleted *obscura* is the modifier in the collocation “dark-chamber”.

[82] See Matisoff 1973/1982:29; such speculations were debunked in the 2nd printing (1982), p. 675.

[83] See Matisoff 1988a:4–9.

[84] I have argued that a third root set up in Matisoff 1985a (*GSTC* #106), ***(t)sa:y** ⪤ ***(d)za:y** ‘temperament / aptitude / talent’, is also related, the common notion being ‘property (either material or intellectual)’. See Matisoff 1985a:44–45; 1988a:10–13.

[85] See *HPTB* 9.2.1, 9.22(4), 9.2.4.

Misanalyses of compounds

A vast number of words in TB languages are di- or tri-syllabic compounds, a fact which greatly complicates the task of etymologization. Many traps lie in wait for the analyst, leading to potential errors of several kinds.

Wrong segmentation This can happen when a form in an inadequately transcribed source is not syllabified. The Pochury and Sangtam forms for ‘star’, transcribed as **awutsi** and **chinghi**, respectively, in the little glossaries compiled by the *Nagaland Bhasha Parishad*,[86] should be segmented as **a-wu-tsi** and **ching-hi**, and not as **a-wut-si** and **chi-nghi**, as I imprudently did in Matisoff 1980:21.

Misunderstanding the meaning of a constituent A special case of this problem is mistaking an affix for a root, especially likely to occur when no grammatical description exists for a language. Several Naga languages have disyllabic forms for ‘moon’ with similar final syllables, e.g. Chang **litnyu**, Konyak **linnyu**, Phom **linnyü**, Sangtam **chonu**, Liangmai **chahiu**. Yet these final elements do not constitute a new root meaning ‘moon’, as I had originally guessed; rather they represent an abstract formative, ultimately grammaticalized from a root ***n(y)u** ‘mother’, that occurs in nouns from all sorts of semantic fields (e.g. Chang **chinyu** ‘center’, **henyu** ‘ladder’, **lamnyu** ‘road’, **pinyu** ‘snake’).[87]

Choosing the wrong syllable of a compound for an etymology This can happen when two different syllables of a compound are phonologically similar, especially if one is dealing with a poorly known language with depleted final consonants, e.g. forms like Guiqiong Ganzi **tʃhə⁵⁵sɑ̃⁵⁵** and Ersu **ʂʅ⁵⁵ji⁵⁵** ‘otter’. Which syllables are to be ascribed to PTB ***sram**?

By its very nature, comparative/historical investigation of such a complex language family as TB/ST is an open-ended enterprise. As described above, changes continue to be made in the details of the STEDT reconstructive system,[88] as well as in our conception of the subgrouping of the family.[89]

Desiderata for the future

I am acutely aware of the incompleteness of this Dictionary-Thesaurus. We still have a long way to go before comparative/historical TB/ST studies are as advanced as they deserve to be. Despite the quickening pace of research, our knowledge of the various branches of this multifarious family remains highly uneven. With a few important exceptions,[90] reliable reconstructions at the subgroup level are not yet available, so that “teleo-reconstruction” has to be resorted to.[91] Many more roots remain to be reconstructed at all taxonomic levels of the family.

Much remains to be done on the Chinese side as well, and we seem destined for a period of flux until the dust settles and competing reconstructions have sorted themselves out.

A large lacuna in this work is the lack of a systematic treatment of tone. This is not because the topic does not interest me, but rather because it merits a book-length treatment by itself. We are only just coming to appreciate the richness and variety of TB tone systems as more and more data become available.[92] The big questions are still open, especially the key issue of monogenesis vs. polygenesis: Can we reconstruct a single tonal system at the PTB level? At the PST level? If so, was this original system primarily phonational or melodic? Or are tonogenesis and tonoexodus cyclical processes, with tones having arisen repeatedly and independently in the various branches of TB, so that even if there was an “original” system, it can no longer be recovered?

Despite the fact that changes continue to be made in our reconstructions (see above), STEDT continues to build upon previous research rather than repudiating it. Perpetual revolution gets to be fatiguing after a while.[93] Historical linguistics is a cumulative enterprise. Thanks to the foundation laid by pioneering scholars, especially Paul K. Benedict, a solid body of TB/ST etymological knowledge has been accumulated, in terms of which new etymologies must be evaluated. No longer can one get away with reconstructing whatever one pleases, no matter how typologically bizarre or ad hoc or mechanistic the reconstruction might be.

All in all, it is hard not to be optimistic about the future of TB/ST linguistics, as fieldwork opportunities increase and new generations of talented researchers enter the discipline. Eventually it seems inevitable that scholars throughout the world will share their information more and more, granting mutual access to their databases for the common good. On the other hand, too many TB languages are endangered, and may well disappear before they have been adequately recorded.

In any case, “the reconstruction of PTB is a noble enterprise, where a spirit of competitive territoriality is out of place. We should pool our knowledge and encourage each other to venture outside of our specialized niches, so that we begin to appreciate the full range of TB languages...”[94]

[86] Kumar 1972 (*Hindi Pochury English Dictionary*), 1973a (*Hindi Sangtam English Dictionary*).

[87] See Matisoff 1980 (“Stars, moon, spirits”), p. 35; for the suffixal use of morphemes meaning ‘mother’, see Matisoff 1991d (“The mother of all morphemes”).

[88] Cf. the recent reinterpretation of the PTB mid-vowels ***-e(-)** and ***-o(-)** as rising and falling diphthongs (above).

[89] Cf. the recent reevaluation of the genetic position of Jingpho, Luish and Nungish (above).

[90] These bright spots include Proto-Karen (Haudricourt, Jones, Solnit), Proto-Northern Naga (French), Proto-Tani (J. Sun), Proto-Tamangic (Mazaudon), Proto-Kiranti (Michailovsky), Proto-Kuki-Chin (VanBik), Proto-Northern Chin (Button), and Proto-Lolo-Burmese (Burling, Matisoff, Bradley). See the References.

[91] See Benedict 1973.

[92] For a rough typology of TB tone systems, see Matisoff 1999b. Weidert 1987is an attempt to reduce all TB tone systems to a single proto-phonational contrast among clear, breathy, and creaky voice qualities, but is marred by an over-formalistic and disorganized presentation which renders it virtually incomprehensible. See the review by JAM (1994c).

[93] As Leon Trotsky found to his cost in 1940.

A Short History of STEDT Software and Database Development

Overview

The STEDT project spanned a revolutionary period in computer technology – from 1987, when (compared to today) very little was possible, and what was possible normally required a substantial programming team with lots of experience, to the present, 2015, when everyone is expected to use computerized devices of several sorts, and "collaboration" and "data sharing" are the norm. Today, databases are everywhere.

The STEDT project at times led the effort and pointed the way in computational historical linguistics; at other times, it labored to catch up as the technology "took off".

A Timeline

In 1987, when the STEDT project started, there was no World Wide Web. (There was, of course, an internet, but it was restricted to the military and a few academic institutions.) Only mainframe computers were connected to each other via networks, and very few people used email. Most people used a device called a "modem" to "dial up" via a telephone line to access the internet and services. The ability to print specialized characters such as IPA was limited. Most people were happy that their computer (if they had one) handled both upper- and lower-case characters. Indeed, the ability to make book-quality copy required access to expensive equipment usually available only to publishers. PDFs[1] did not exist, nor was it possible to attach a document to an email (one could, however, "FTP"[2] a file from one computer to another, provided the proper software was installed on both sides).

"Microcomputers", however, did exist, and were becoming ubiquitous – the IBM PC was becoming standard office equipment, and the Apple Macintosh™had been invented a few years previously to replace the Apple II and its variations. Indeed, the Mac incorporated new-fangled features such as a *mouse*, *windows* (movable, resizable "windows" on the screen), and, *gasp* *icons*.

And the idea of "word processing", the creation and editing of usable documents using a computer was just becoming a commonly understood term.[3]

Against this backdrop, the design of a system to create the Dictionary-Thesaurus and the gathering and inputting of data supporting that effort began. The first bitmap version of the STEDT font was created, and data was entered into HyperCard™stacks. [4] The project had three Mac Pluses™, each with a 40MB hard disk, the maximum possible at that time. Since there was no centralized database, software was developed to export the data from the Stacks into delimited text files which could be combined and sorted into larger aggregations.

By 1989, an initial version of a publishing suite was completed, written in Spitbol [5], which read the delimited files, sorted the data (internally), and output "camera-ready copy" in RTF[6]. In addition, a TrueType™version of the STEDT font had been created, enabling the publication of handsome dictionary pages on the project's newly-acquired PostScript™printer, a LaserWriter™.[7]

By 1990, the data and analysis supporting what was to be *Fascicle I: Body Parts* was completed, and it was on this marvelous printer that the first draft of this fascicle was printed. By then, a clear picture had emerged of the requirements of the system: the need to incorporate several levels of notes and footnotes; the ability to include graphics (mainly "semantic flowcharts") inline; the "5-level organization" of the content; the need to (and means to) produce the front-matter and back-matter associated with the D-T (tables of contents and figures, indexes of various flavors, and so on.); and of course the need to be able to iteratively produce, on demand, draft versions of the final document for review and revision. The essence of this data flow is shown in Figure 18. The process was a strict file-to-file pipeline, in which required bits of data were incorporated in several steps, culminating with a final marked-up document (in this case in RTF), ready for printing.

Several "microcomputer database systems" became available around this time. Previous incarnations of these software components (e.g. DBASE™) were clunky and often had restrictions on their ability to handle linguistic data (as opposed to accounting data). They handled only short, fixed-length fields, and balked at "special characters".

By 1992, STEDT data had been loaded into FoxPro™, one of the leading database systems at that time – essentially a rewrite of DBASE, without its many shortcomings, fully relational, with lots of features. The relational table structure still in use today was implemented (see Figure 17); and the first "reports" which allowed users to browse the growing database were created. The hardware too was improving. Much faster computers with larger hard disks (e.g. the Apple Quadra™) were now connected to each other by Ethernet cables, and multiple users were able to access the database at the same time. A client-server architecture was possible for the first time. The "draft fascicles" became at this point a type of report produced by using the database reporting facilities available. While the reports lacked some of the fine details desired, nay required, for final publication (e.g. nice footnotes, and inline formatting), the situation had been infinitely improved by the ability to "push a button" to produce these documents, and the ability for multiple users to access and update the database at the same time.

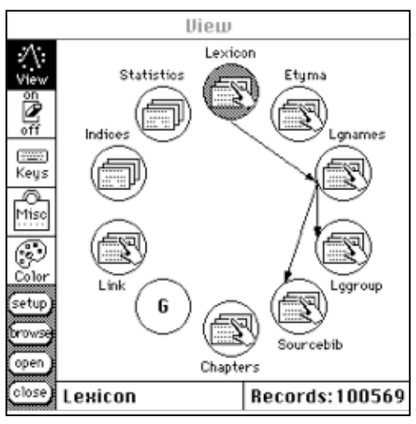

Figure 17: Relational database layout in FoxPro, circa 1992

By 1996, the database had migrated to another database platform, FileMaker Pro™, which had become a popular and flexible system for work of this sort. This new technology made it possible to incorporate data from other database (i.e. other FileMaker Pro files) and from other sources (e.g. images). An elaborate system of linked databases (called "Ancillary databases") was produced and operated for some time for the benefit of the STEDT staff and visitors. However, the system was never very portable, nor was there a desire to publish these data in their early and preliminary state. This version remains as a "legacy document" awaiting the attention of a future generation who may wish to resurrect it from its ashes.

With the advent of the World Wide Web at about this time, it became clear that the STEDT database would eventually need to be available to the world, and besides the FileMaker version (absent further programming) was limited to use in the office; the idea of "web access" was very appealing, as it opened the possibility of having the process of *etymologization* opened up to collaborators all over the world.

Therefore, at the beginning of the 21st century, an effort was made to migrate the data and software to its current implementation as a web-based application backed by a powerful database system. Several software development iterations (some still operational on the STEDT website and available in GitHub[8]) were developed. The current online application and publication tools are written in PERL, using the *CGI::Application framework*.[9] and run on a so-called "LAMP stack".[10]

Today, the STEDT database is freely searchable by anyone anywhere who has an internet connect web browser.[11] In addition, the database itself and the software used to create the etymological structure and generate the "final PDF" is available as opensource software and open data for the world to use.[12]

Database Design and the Workflow of Etymologization

Supporting the workflow of "etymologization"

While the constraints of late 20th-century software and hardware did inhibit some of the development of the software tools needed to produce the most compendious of thesauri produced to date, it was the conceptual issues surrounding the organization of the materials and specifying a robust and durable workflow that were even more restrictive.

Beside managing the basic data being input, some means of organizing it into a semantically-based etymologically-organized whole needed to be designed and implemented.

At first, i.e. for the first couple of decades of the project, the database served the needs of the goal of publishing a thesaurus. Indeed, to this day, the thesaurus remains the primary deliverable – the database and its *accoutrements* are secondary.

Analyzing the tasks, we noted that producing the dictionary entailed completing at least the following subtasks:

- CREATING A DATABASE: collecting, evaluating, entering, indexing, and ultimately archiving all significant lexical data available on the Sino-Tibetan languages.
- PERFORMING AN ETYMOLOGICAL ANALYSIS OF THE DATA: phonological reconstruction and semantic analysis of the Sino-Tibetan lexicon at various diachronic levels, according to the accepted principles of linguistic reconstruction (i.e. the comparative method).
- PREPARING THE DATA FOR PUBLICATION: Several access points must be provided both for the initial data analysis and for the final publication. Extensive supporting material was required in the form of bibliography, explanations of coding conventions and abbreviations, and other front and back matter.
- DISSEMINATING THE RESULTS: the publishing of the physical Etymological Dictionary and Thesaurus in two "tomes". The promulgation of the database and its analysis in machine-readable form for use by other scholars in the field.

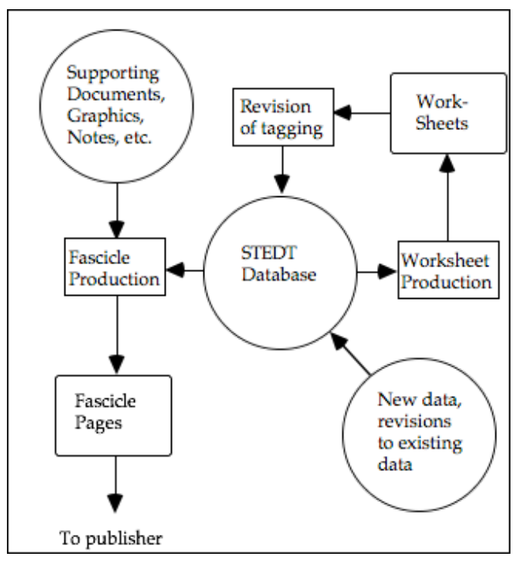

Figure 18: Etymologization and fascicle production, workflow circa 1990

Each of these tasks required a different approach and skillset. Some of them (e.g. "creating a database") were relatively conventional and well-understood, if a bit difficult in implement in the computational milieu at the time.

The Invention of "Tagging"

We needed a means, an implementable formalism, to record the relationship between modern forms and their reconstructed ancestor. Requirements:

- allows marking (extraction) of individual morphemes in modern forms
- no specific knowledge of the sound laws required
- tolerates phonosemantic variations and accommodates allofamic representations: extrusions, affixes,
- allows flexible (re-)organization of related allofams
- quick, easy, intuitive

Production of the final "camera-ready" Dictionary-Thesaurus

The layout of the printed D-T has changed little since it was first conceived of in 1987: Etyma are sequenced within a semantic hierarchy by phonological form and solidity of attestation. Under each etymon, the supporting forms are listed by language subgroup; within subgroup the forms are ordered by language name and then by gloss. This is implemented conceptually via a five-level sort key (semantic node, etyma sequence, language subgroup, language name, gloss) associated with each supporting form. The first version of the D-T was produced by a SPITBOL program which produced MS Word RTF files. These files were edited by hand to include the front and back matter, and to generate a table of contents. The latest and final version of the D-T is generated by a PERL script which extracts sorted data from the database and outputs a series of LaTeX files which are concatenated with front and back matter content to produce a "master document". This file is compiled using various LaTeX facilities to produce the table of contents, include the graphic components (mostly semantic flowcharts), the bibliography, and the backmatter indexes. The process is now fully automatic: a new updated version of the D-T in PDF format is produced nightly. This large document (1,126 11"x17" folio-sized pages) can be downloaded and examined at any time. The nightly file contains the latest database updates and any changes to the front and back matter text that have been checked in to the repository. Thus, the process of producing final camera ready copy is really simply a matter of choosing which nightly version to designate as the final D-T. A somewhat simplified example of a single cognate set is shown in Figure 5 below. Note the following significant details of the arrangement:

- The "5-level sort key" for Milang form shown would be: $2.1.1 + 11.00 + 2.1 + \text{Milang} + \text{skull}$
- A variety of other material is interpolated into the flow of the text, including notes at various levels, figures and diagrams, and commentary. In this case, a semantic flowchart has been associated with the chapter 2.1.1, and the supporting forms have two footnotes.
- The "cognate morpheme", that is, the portion of the transcribed lexical item that is deemed to be distinctly related to the etymon, is rendered in boldface – *in the context in which it is cited, it is important to note!*

[1] Portable Document Format, invented by Adobe in 1991, but only made opensource in 2008 as ISO 32000 1:2008, and so available for use by STEDT. http://en.wikipedia.org/wiki/Portable_Document_Format

[2] File Transfer Protocol, RFC114, http://tools.ietf.org/html/rfc114

[3] This term is still in use, but is rapidly becoming dated. http://en.wikipedia.org/wiki/Word_processor

[4] HyperCard was supposed to create a revolution in software development, making it possible for ordinary mortals to write their own highly interactive applications.

[5] A dialect of SNOBOL IV.

[6] Rich Text Format, Microsoft's™proprietary markup language

[7] Contrast the progression of the STEDT project with the development of another similar, but smaller effort, the effort to produce the *Dictionary of Lahu*. This was an early computational lexicographic project of some complexity – a custom font was designed, as well as custom tools for formatting the final copy that was reproduced electrographically by UC Press. The effort is handsomely documented in DL and in its derivative the *English-Lahu Lexicon*.

[8] https://github.com/stedt-project

[9] http://search.cpan.org/ markstos/CGI-Application-4.50/lib/CGI/Application.pm

[10] Linux, Apache, MySQL, Perl.

[11] http://stedt.berkeley.edu/search.

[12] In a self-referential, or "meta" sort of way, it is possible to include a link to this *final PDF* both in this PDF and its printed equivalent, whichever you happen to be reading. The link, which will hopefully endure for some time to come is: http://stedt.berkeley.edu/dissemination/stedt.pdf

- Redundant information, e.g. repeated identical glosses, are elided from the display to increase readability and make the very complex display less busy.
- The source of every form cited is included alongside the form. This is a novel feature of the D-T.

As originally conceived, the D-T was to be published as a conventional printed reference work, probably as part of the linguistic series managed by the UC Press. However, times have changed and the demand for a printed work has diminished; the substantial cost of publishing a work of this sort is now deemed unnecessary: the PDF will be made available publicly, and a few "reference copies" of the two tome set will be produced for depository libraries, the Library of Congress and a few other interested parties. The bindery at the UC Berkeley Library has agreed to produce these tomes from the generated PDF at cost, provided a handsome imitation leather cover and a hand-stitched binding.

Acknowledgments

NSF and NEH Support

I am deeply grateful to the National Science Foundation and the National Endowment for the Humanities for their unswerving support of the *Sino-Tibetan Etymological Dictionary and Thesaurus* (STEDT) Project since 1987, even through times of budgetary stringency. I would especially like to thank Dr. Paul G. Chapin and Dr. Joan Maling, of the Language, Cognition, and Social Behavior division of NSF; and Dr. Guinevere Greist, Dr. Helen Agüera, Dr. Martha Bohachevsky-Chomiak and Dr. Nadine Gardner of the Research Tools Division of NEH. I can only hope that the fruits of this project will repay their confidence and patience.

Grants to the *Sino-Tibetan Etymological Dictionary and Thesaurus* project from:

* The National Science Foundation (NSF), Division of Behavioral & Cognitive Sciences, Grant Nos. BNS-86-17726, BNS-90-11918, DBS-92-09481, FD-95-11034, SBR-9808952, BCS-9904950, BCS-0345929, BCS-0712570, and BCS-1028192.
* The National Endowment for the Humanities (NEH), Preservation and Access, Grant Nos. RT-20789-87, RT-21203-90, RT-21420-92, PA-22843-96, PA-23353-99, PA-24168-02, PA-50709-04, PM-50072-07, and PW-50122-08.

Administrators

Several Organized Research Units and academic departments of the Berkeley campus have given their moral or practical support to the STEDT project, including the Center for Southeast Asia Studies, the Center for Chinese Studies, the Department of Linguistics, the Department of South and Southeast Asian Studies, the Department of East Asian Languages and Cultures, and especially the Institute of International and Area Studies, to whose administrative staff I am deeply obliged: Karin Beros, Management Services Officer and all-around trouble-shooter, who was instrumental in solving the practical problems of getting the project started back in 1987; Jerilyn C. Foushée, who has handled our budget and helped with our grant proposals and reports since 1987; and Nell Haskell (1987–95) and Kerttu K. McCray (1995–2002), who have kept track of personnel matters. Since 2009, the STEDT grants have been administered by the Linguistics Department, under the able stewardship of Paula Floro and Belén Flores.

Contributors

I would like to thank Anthony Meadow, founder of the Bear River Associates software development firm, now in Oakland, who generously gave many hours of his time during 1986–87 in *pro bono* consultations about how to formulate the computer needs of the project in our original grant proposals to NSF and NEH.

The importance of data contributors cannot be overstated, and STEDT would like to express the deepest gratitude to the many linguists, native speakers, and other individuals who advanced the project by contributing lexical and/or etymological data to the database. Below is a list of some of these contributors in alphabetical order of surname/family name. Some contributors have no doubt been inadvertently missed, and we apologize for any omissions. (Asterisks indicate contributions that have not (yet) been imported.)

STEDTniks

Out of the approximately 70 individuals (undergraduates, graduate students, post-docs) who have worked at STEDT since 1987, I am here singling out 14 for special mention because of the significance of their contributions to the project. They are cited approximately in the order in which they have received their highest degrees from U.C. Berkeley or elsewhere. It should be understood that these brief mentions in no way do justice to the brilliance of their accomplishments, or to the love I feel for them all.

Randy J. LaPolla. (STEDT, 1987–90); Ph.D. Berkeley, 1990.) Has since taught at City University of Hong Kong, La Trobe University (Melbourne), and now at Nanyang Technological University (Singapore). Specialties include Nungish, Qiangic, comparative TB grammar. Edited early STEDT monographs and questionnaires.

Jackson (Tianshin) Sun. (STEDT 1990–1992; Ph.D. Berkeley, 1993.) Now teaching, conducting research, and administrating at Academia Sinica, Taipei. Specialties include Qiangic, rGyalrongic, and the NE Indian branch of Tibeto-Burman to which he assigned the now generally accepted name "Tani".

John B. Lowe (STEDT 1987–2000; 2010–2015; Ph.D. Berkeley, 1995.) An experienced library scientist and software engineer before joining STEDT as one of the founding members of the team, John's role has been crucial to the success of the project. He designed and implemented most of the computational apparatus used by STEDT over the years; he invented "tagging" and in 1987 presciently designed the organization and layout of the Dictionary-Thesaurus substantially as it is today.

Zev J. Handel. (STEDT 1991–1998; Ph.D. Berkeley, 1998.) Now Associate Professor of Chinese Language and Linguistics at University of Washington. Specialties include Chinese historical phonology, Sino-Xenic writing systems. Has contributed extensive notes on the Chinese comparanda cited in connection with TB etymologies in several STEDT publications.

Ju Namkung. (STEDT 1993–1997; M.A. Berkeley, 1995.) Currently a web and software developer in the Seattle area. She edited the widely used STEDT Monograph #3, Phonological Inventories of Tibeto-Burman Languages (1996). Editorial assistant (1996–1997) for the journal then published at STEDT, Linguistics of the Tibeto-Burman Area (LTBA).

Jonathan P. Evans. (STEDT 1990–2005; Ph.D. Berkeley, 1999.) Now Associate Research Fellow at Academia Sinica, Taipei. Specialties include Qiangic grammar and historical phonology (especially the development of rudimentary tonal systems), and language contact between Chinese and coterritorial TB languages.

Richard S. Cook. (STEDT 1998–2011; Ph.D. Berkeley, 2003.) Independent researcher, specializing in the history of Chinese characters and the Chinese lexicographical tradition. Played a central role in the production of the Handbook of Proto-Tibeto-Burman. Created electronic versions of several key reference works, which have become "ancillary STEDT databases".

Kenneth VanBik. (STEDT 1997–2006; Ph.D. Berkeley, 2006.) Now teaching at San Jose State University. A native speaker of Lai Chin and Burmese, he has contributed many PTB etymologies based on his newly discovered Chin/Burmese cognates. His dissertation was a full reconstruction of Proto-Kuki-Chin, with over 1350 cognate sets.

David Mortensen. (STEDT 2003–2006; Ph.D. Berkeley, 2006.) Now teaching at University of Pittsburgh. Originally with a background in the Hmong-Mien family, he now also specializes in the Tangkhulic branch of the Naga languages, as well as in theoretical phonology. Played a major role in the production of the English-Lahu Lexicon.

Nina J. Keefer. (STEDT 2000–2008; M.A./M.J. Berkeley [Group in Asian Studies, Graduate School of Journalism].) Editorial Assistant for LTBA (2001–2004) and my chief assistant in the production of the English-Lahu Lexicon. Background in Burmese culture and religion. Currently working as a forensic mental health nurse in Canada.

Liberty A. Lidz. (STEDT 1998, 2009-2014). Ph.D. University of Texas at Austin (2010). Specialist in languages of the Na(xi) group, closely related to Lolo-Burmese, and author of a dissertation grammar on Yongning Na. She did extensive data analysis for the STEDT project, having tagged roughly 43% of

the forms tagged in the database at the time of publication, as well as contributing a number of new etymologies and working closely with the P.I. to rectify existing PTB roots.

Dominic Yu. (STEDT 2004–2012; Ph.D. Berkeley, 2012.) Now employed as an International UI Software Engineer at Apple. Specialist in Qiangic languages, especially those in the Ersuic group. Formatted and produced The Tibeto-Burman Reproductive System (2008). He continues to make key contributions to the structure of the STEDT database and website.

Daniel W. Bruhn. (STEDT 2009–2014; Ph.D. Berkeley, 2014.) Now a Globalization Engineer at PayPal. Specialist in the languages of the Central Naga group. A Jack-of-all-trades, he has contributed significantly to all STEDT projects, including the incorporation of new sources into our database, modifications to our underlying code, improvements in our website, and formatting of our publications.

Chundra A. Cathcart. (STEDT 2011–2015; Ph.D. Berkeley, expected 2014–5.) Currently on the STEDT staff. Specializes in the comparative/historical study of the Indo-Aryan family, and frequently identifies loans from IA languages into Tibeto-Burman. Is assisting the P.I. in the preparation for publication of a large corpus of Lahu texts.

Visiting Scholars

The STEDT project has been greatly enriched by the specialized expertise, unpublished data, and intellectual stimulation provided by a succession of visiting scholars, who have spent anywhere from a few weeks to more than two years at the project headquarters. Two especially deserve special mention:

Martine Mazaudon. (STEDT 1987–89, 1990–91; Doctorat 3e Cycle, Paris V, 1971; Doctorat d'Etat, Paris III, 1994.) Now a Researcher Emerita at the Centre National de la Recherche Scientifique (Paris), specializing in the Tibeto-Burman languages of the Tamangic group of Central Nepal. Spent two full years at STEDT.

Boyd Michailovsky. (STEDT 1987–89, 1990–91; Ph.D. Berkeley, 1981; Doctorat 3e Cycle, Paris III, 1981; Doctorat d'Etat, Paris III, 2004.) Now a Researcher Emeritus at the Centre National de la Recherche Scientifique (Paris), specializing in the Tibeto-Burman languages of the Kiranti (Rai) group of Eastern Nepal. Spent two full years at STEDT.

DAI Qingxia and XU Xijian (Oct.–Nov. 1989) Nationalities University (Beijing), TB languages of China; ZHANG Jichuan (Nov. 1990) Chinese Academy of Social Sciences (Beijing), Tibetan dialects; the late Rev. George Kraft (1990–99), Khams Tibetan; Nicolas Tournadre (Feb. 1991) University of Paris III, Tibetan; SUN Hongkai and LIU Guangkun (April–May, 1991) Chinese Academy of Social Sciences (Beijing), TB languages of China; YABU Shiro (April–Aug. 1994) Osaka Foreign Languages University, Burmish languages and Xixia; William H. Baxter III (May, 1995) University of Michigan, Old Chinese; Balthasar Bickel (Sept.–Oct. 1996; Feb.–Mar. 1997) University of Zürich and Johann Gutenberg University (Mainz), Kiranti languages; LIN Ying-chin (1997–98) Academia Sinica, Taipei (Xixia, Muya); David B. Solnit (1998–) STEDT, Karenic; WU Sheng-hsiung (Spring, 2002) Taiwan Normal University, Chinese phonology; IKEDA Takumi (2002–03) Kyoto University, Qiangic languages; Yashawanta Singh Manipur University (Imphal) Meithei; Maung Maung (Aaron Tun) (2011) Payap University (Chiangmai), Lahu; LI Yan (2013–14) Shaanxi Normal University (Xi'an) Historical linguistics and dialectology.

Complete List of STEDTniks

Most of all, I am indebted to the phalanges of talented students, past and present, who have been working at STEDT anywhere from five to 20 or 30 hours per week, performing a host of vital tasks such as the inputting and proofreading of hundreds of thousands of lexical records, the development of special fonts and relational database software, computer maintenance and troubleshooting, formatting articles for our journal *Linguistics of the Tibeto-Burman Area*, and editing the publications in the STEDT Monograph Series. 70 researchers have contributed to the STEDT project since 1987, mostly graduate students working as research assistants in the Berkeley Linguistics and East Asian Languages and Cultures Departments, but also including several undergraduate volunteers and non-enrolled or former students. Here they are, in an alphabetical honor roll:

- Madeleine Adkins
- Jocelyn Ahlers
- Shelley Axmaker
- Kenny Baclawski
- Stephen P. Baron
- Leela Bilmes (Goldstein)
- Michael Brodhead
- Daniel Bruhn
- Chundra Cathcart
- Jeff Chan
- Patrick Chew
- Melissa Chin
- Isara Choosri
- Richard Cook
- Jeff Dale
- Amy Dolcourt
- Julia Elliot
- Jonathan P. Evans
- Allegra Giovine
- Cynthia Gould
- Daniel Granville
- Joshua Guenter
- Kira Hall
- Zev J. Handel
- Takumi Ikeda
- Alexander Jacobson
- Annie Jaisser
- Matthew Juge
- Daniel Jurafsky
- David Kamholz
- Nina Keefer
- Jean Kim
- Kyung-Ah Kim
- Heidi Kong
- Aimée Lahaussois (Bartosik)
- Randy J. LaPolla
- Jennifer Leehey
- Anita Liang
- Liberty Lidz
- John B. Lowe
- Jean McAneny
- Pamela Morgan
- David Mortensen
- Karin Myrhe
- Ju Namkung
- Toshio Ohori
- Weera Ostapirat
- Jeong-Woon Park
- Jason Patent

Conventions Used in Citing the Source of Individual Wordforms

The wide variety of sources included in the database make it difficult to provide a single pointer to a wordform in a source. Typically, an inline bibliographic citation includes something like the author's name, a year (with alphabetic disambiguator if needed) and a page number.

In the STEDT database, many sources do not have page numbers; and at any rate a page number is often not the most useful identifier. We therefore developed an informal system for marking provenance:

- If the source is short and has no page numbers, we have usually omitted source identfiers. A reader who is curious to examine the wordform in its context must locate the hardcopy and find the item using the collation and indexing conventions provided.
- For etymological sources, e.g. the *Conspectus* (*STC*), we used the etymological set number; since many forms are cited that do not belong to sets, we have indicated the page and note number where the form is to be found, e.g. 123n5.
- A number of sources utilize some sort of hierarchical (e.g. semantic) organization of the forms. In most of these cases, we used the hierarchical numbering system provided.

Miscellaneous

allofam a variant of an etymon

allofam box a computer display where all the allofams of an etymon are grouped together within a box on the screen

chapter the smallest section of a fascicle, containing all the etyma reconstructed with a given gloss, e.g. KIDNEY

extra-fascicular etyma etyma that are cited outside of their normal fascicle to illustrate a particular point

fascicle a major section of a STEDT volume, comprising many chapters with closely related glosses, e.g. INTERNAL ORGANS

metastatic flowchart a diagram illustrating the patterns of semantic association displayed by an etymon

meso-reconstruction reconstruction of an etymon at the subgroup level, deemed to be descended from that same etymon at a higher taxonomic level

meso-root an etymon reconstructed at the subgroup level

pan-allofamic formula (PAF) an abstract reconstruction intended to display simultaneously all the patterns of variation attested for a given etymon

rectification the process by which etymologies are subjected to reanalysis, to determine whether they should be accepted as is, accepted with modifications, or rejected

root canal the process through which a STEDT etymology is made public, so that it can be commented upon

semantic flowchart SEE metastatic flowchart

semcat a semantic category; each STEDT etymology is assigned to one or more of them

supporting forms forms from individual languages that support an etymology

volume one of the ten major divisions of STEDT, e.g. BODY-PARTS

weakly attested root a promising etymology, but with insufficient support

> goes to; becomes

< comes from; is derivable from

* indicates a reconstructed form (e.g. PTB ***b-ləy**), or acts as a synonym for "proto-" (e.g. *labials, *Kuki-Chin)

A ⋉ B A and B are co-allofams; A and B are members of the same word-family

A ?⋉? B Are A and B co-allofams? Do A and B belong to the same word family?

A ⋉̸ B A and B are not co-allofams; A and B do not belong to the same word family

Clf. classifier

lit. literally

ult. ultimately

The Body

1.1 Body Parts

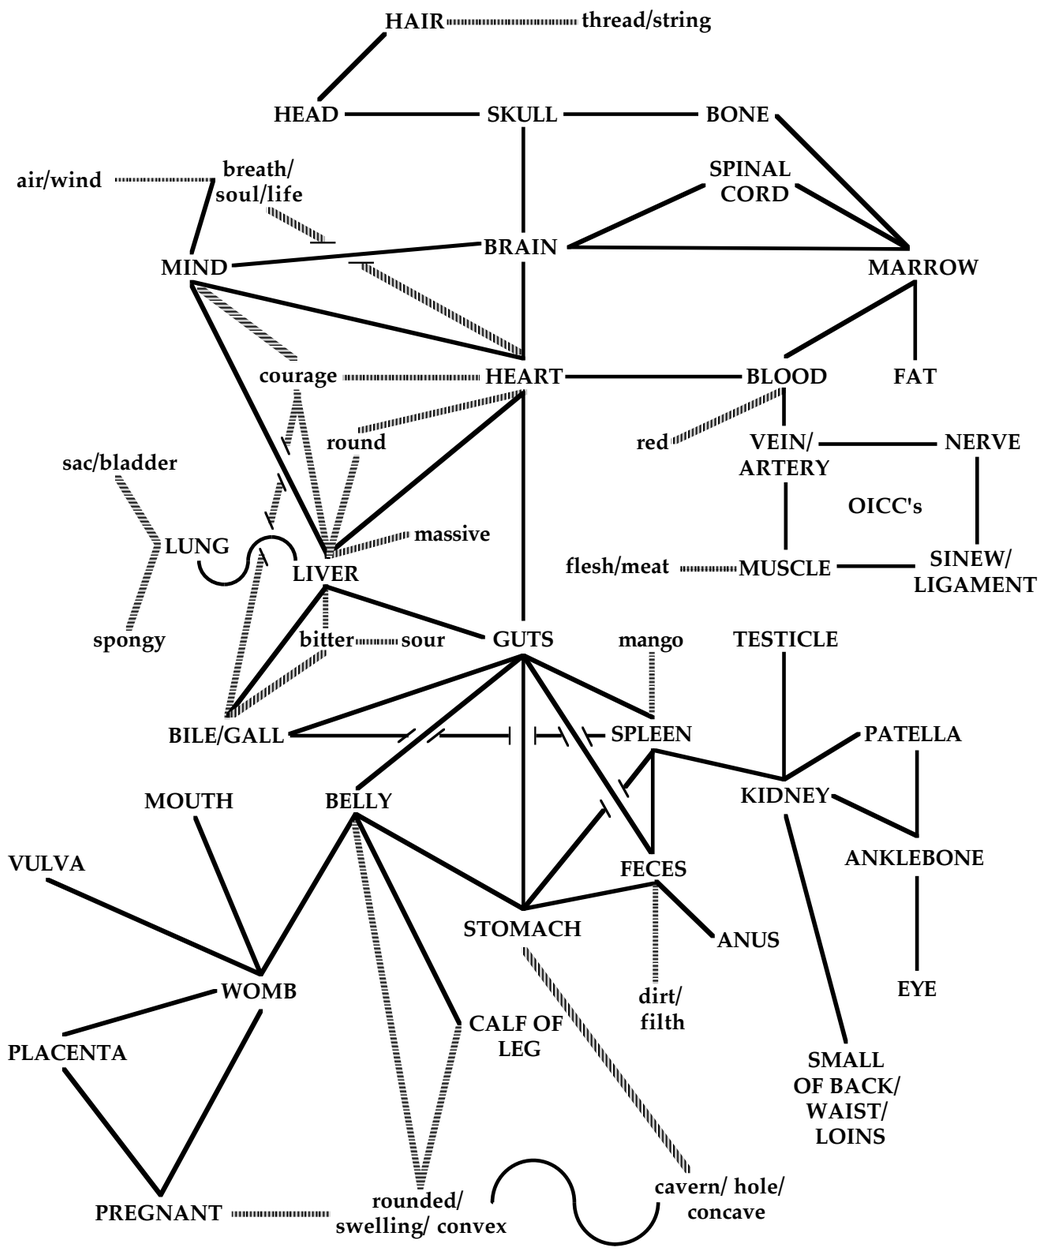

Figure 19: 1.1 *Body Parts*

1.1.1 Body

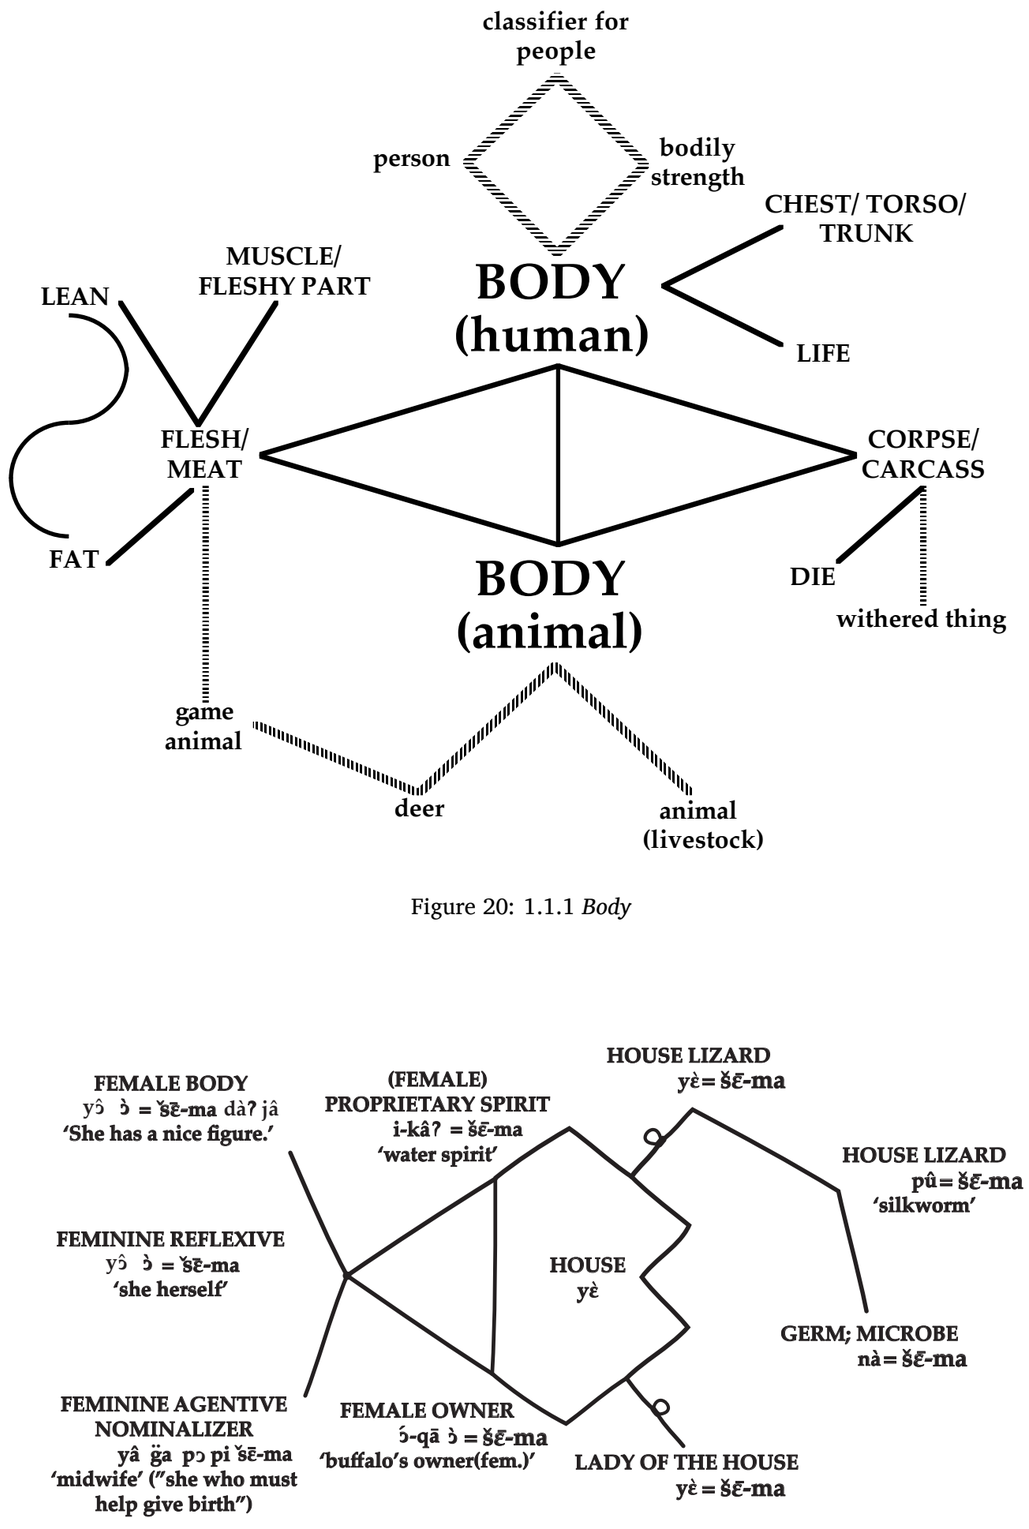

Figure 20: 1.1.1 *Body*

(1) PTB *sya-n ⩬ *sin FLESH / ANIMAL / BODY / AGENTIVE NOMINALIZER

This richly attested root must be considered distinct from PTB ***r-sa*** VEIN / SINEW / INTERNAL CHANNEL / PULSE (§1.6.6), although certain forms (especially those meaning ‘muscle’) seem to show overlap between the two roots.

The **-n** suffix is directly attested in Jingpho, Geman/Kaman, and Chinese.

This morpheme appears as a prefix in numerous animal names and words for parts of the body. See *HPTB*:102 and *STC*:106-108.

We are positing an allofamic relationship between the forms with medial ***-ya-*** and ***-i-***. See *HPTB*: 278, 306, 449.

(1a) PTB *sya-n FLESH / MEAT / GAME ANIMAL

6.1.2.2. Central Loloish

Lahu (Black)	ɔ̀-**šē**-ma	body (female)	Matisoff 1987
	ɔ̀-**šē**-phâ	body (male)	Matisoff 1987

Chinese comparandum

身 OC ***śi̱ĕn***, *GSR* #386a-c; Mand. **shēn**.

Unclear whether Chinese 身 is to be considered a comparandum for **both** the current etymon PTB ***sin** BODY / OWNER / AGENTIVE NOMINALIZER (§1.1.1) **and** PTB ***sya-n** FLESH / MEAT / GAME ANIMAL (§1.1.1). If so, this would support the allofamic relationship between the two etyma argued for in PTB ***sya-n** ⩙ ***sin** FLESH / ANIMAL / BODY / AGENTIVE NOMINALIZER (§1.1.1).

(2) PTB *guŋ BODY / BACK

This etymon should be kept distinct from the similarly-shaped forms PTB ***(k/g)um** BACK / BODY (§1.4.8) which occurs mostly in forms for 'back' and means 'body' only by extension, and PTB ***(k/ʔ)uk** BEND / CROOKED / RETURN / BACK / YEAR (§9.1) which also occurs in some forms meaning 'back'. All three roots are etymologically unrelated.

Many Loloish forms have reflexes which might be attributed equally well to PTB ***s-kəw** BODY / CHEST / THORAX / CORPSE (§1.1.1) or PTB ***(k/g)um** BACK / BODY (§1.4.8). In the absence of more precise

research into Northern Yi rhyme correspondences, we are here adopting the rather arbitrary choice of attributing all Loloish forms meaning BACK to the present root.

See *STC* p. 182, n. 479; *HPTB*: 19, 309.

There is a good Chinese comparandum, 躬 .

[a] Laryngeality of Meithei **hak** unexplained.

(7) PTB *t(s)ak BODY

This etymon has reflexes ranging from an affricate **ts-** (Lotha), to a simple dental stop **t- or th-**, to a dental sibilant (Mizo, Nocte), to an **h-** (Meithei, Moyon, Maring). [For a similar range of reflexes, cf. PTB ***(t)sum** MORTAR (§5.5).

We can assume a development in Meithei from ***ts-** to ***s-** to **h-**; the Moyon and Maring forms might well be borrowings from Meithei.

VanBik reconstructs a binome ***tak-shaa** for Proto-Kuki-Chin, where the second element is the general etymon PTB ***sya** MEAT / FLESH / ANIMAL.

(11) PTB *ti BODY

This root seems to be confined to the final syllable of compounds, both in TB and in Chinese.

A similar root, PTB ***tsyi** BODY (§1.1.1), which usually occurs in non-final position in compounds, may be allofamically related.

Another possible co-allofam is PTB ***m-di** BUTTOCKS / HIPS / FLESHY PART / WAIST / BACK (§1.7.5).

6.1.2.1. NORTHERN LOLOISH

Nasu	gɯ^{21} **p^{h}e^{33}**	body	CHEN Kang 1986b:1.1
Yi (Dafang)	gɤ^{31} **p^{h}i^{31}**	body	Matisoff 1994b

(18) PTB *-pu ≷ *-pwa SUFFIX (nominalizer; bulk-provider)

This morpheme is actually a general noun suffix in Tibetan and other languages. For ease of reference, however, nouns with this suffix relating to the body are here assembled in one place. See Jäschke:324-325.

Written Tibetan has the three suffixes **-pa**, **-ba**, and **-po**, which sometimes have nominalizing force, but often merely serve to provide an additional syllable to a noun root. After a verbal root, **-pa** behaves rather like English ‘to’, used in the citation form of verbs, creating a kind of infinitive or verbal noun.

Bai (Jianchuan)	**tshɑ̠^{44}** jo^{31}	lean (person)	XU Lin & ZHAO Yansun, eds. 1984

(6) PTB *ni LEAN (MEAT)

The Nusu voiceless nasals point to an **ʔ-** prefix at the PLB stage. The Lahu mid tone is also compatible with the glottal prefix.

It has been suggested that there is a connection between this root and PTB ***r-ni*** RED (§9.4), since lean meat has a red appearance due to the lack of fat marbling, but this remains to be seen.

8. Bai			
Bai (Jianchuan)	**tsɯ**^{33}	alive / be living	Zhao Yansun 1990:1.12

[a] The two Xide forms a^{21}ʂ^{33} **su**^{33} and dʑo^{33}**-dʑu**^{34} may be explained in terms of the presence or absence of the medial ***-y-***.

(7) PTB *mwa-$^{\mathbf{n}}_{\mathbf{s}}$ LIFE / BREATH

This etymon is well-attested in Karenic and Newar, with likely cognates in Limbu and Loloish. Qiangic has developed an **-s** suffix.

Many of the Karenic forms are compounds containing both PTB ***m-sak*** BREATH(E) / LIFE (§1.1.2.2) and the present root.

2.2. Newar			
Newar	**mwa:**	alive / be living	Shakya & Hargreaves 1989:1.12

1.1.2.2 Breath/Breathe

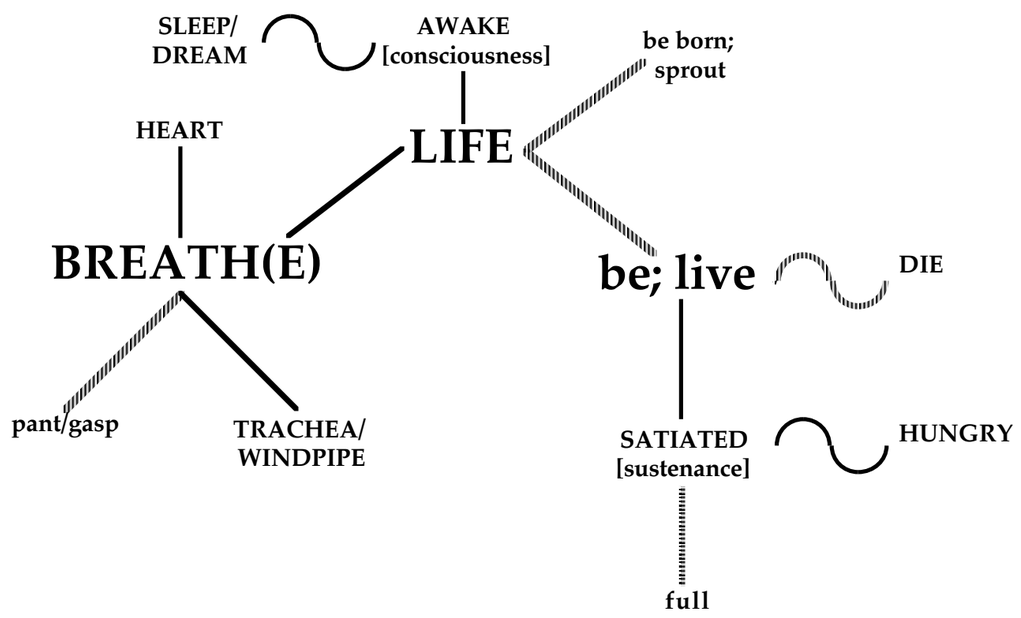

Figure 24: 1.1.2.2 *Breath/Breathe*

In the semantic flowchart, the connection BREATH(E)-HEART is found in Karenic.

(1) PTB *m-sak BREATH(E) / LIFE

Chinese character; *STC* #485; *LTSR* #123 (PLB ***C-sak**[1]); *GSR* 925a ***si̯ə̯k**; WTF pp.462-3.

For now, Karenic syllables **θaʔ** etc. have been assigned to this etymon. But note that the tones are different; compare Jones sets #150 BREATH(E) [pp. 124-5] and #410 CHEST [pp. 140-1].

The basic meaning of this root is the "breath of life" with semantic extensions into HEART (as locus of the life force), CHEST (as locus of the heart), or AIR / STEAM / VAPOR.

0. Sino-Tibetan (previously published reconstructions)

Akha (Yunnan)	sàq **ɣɔ́**	breathe, breath	Hansson 1989:475
Hani (Lüchun)	shà ɣó (-**ɣɔ́** ?)	breathe, breath	Hansson 1989:475

(9) PL *ku BREATHE

This sparsely attested verbal root occurs after the noun PTB ***m-sak** BREATH(E) / LIFE (§1.1.2.2).

[a] Hayu shows variation between homorganic final nasal and stop.

[b] For the same final -s (of unknown function), cf. also Qiang (Mawo) **χsəs**.

[c] This Qiang Mawo form bears a superficial resemblance to Chepang and Magar **sās**, although the latter two are undoubtedly borrowings from IA (cf. Sanskrit **śvas-**). The initial velar spirants in the Qiang Mawo and Ergong forms seem cognate to the prefixal **g-** in WT.

6.1.2. LOLOISH

Lolopho	sɛ̲^{31} **gɒ^{33}**	breathe (v.)	DAI Qingxia 1989n:9.2.1

6.1.2.2. CENTRAL LOLOISH

Ahi	sɛ̲^{21} **ku^{22}**	breathe (v.)	LUO Meizhen 1990:9.2.1

6.1.2.3. SOUTHERN LOLOISH

Hani (Pijo)	à sàq **kú**	breathe, breath	Hansson 1989:475
Hani (Khatu)	à shà **kú**	breathe, breath	Hansson 1989:475

(10) PTB *g-haŋ GASP / PANT

This root bears a strong resemblance to NEIA ***ha*** BREATHE (§1.1.2.2), and might well be combined with it in the future.

1.7.3.1. JINGPHO

Jingpho	**gəāŋ**	gasp, as in death throes (v.)	Benedict 1972:33

(13) PTB *waŋ BREATHE

This root was previously subsumed under PTB ***hwaŋ*** COME (OUT) / ENTER (§6.7.2), with the semantic connection residing in the in-and-out movement of the breath. Now, however, it seems preferable to consider these to be separate roots.

1.5. Mikir [Karbi]

	ri **naŋ** sop	thirsty, be (v.)	Huang Bufan & Dai Qingxia, eds. 1992:1478.07

(4) PTB *kwa-k HUNGRY / THIRSTY

The final ***-k*** in this etymon is directly reflected by Jingpho, Lahu, and perhaps Baic. The Lisu form **kwa^{55}** is paradoxically not definite evidence for the medial ***-w-*** since Lisu regularly extrudes a labial glide between a velar initial and a vowel **-a** (cf. 'bitter' PTB ***b-ka*** > Lisu **khuɑ^{31}**).

We must resolutely reject any comparison with Japanese **kawaku** 'be dry, thirsty'.

(6) PTB *wan HUNGRY

This root requires further confirmation, but looks fairly solid. The Kayan form shows a velar prefix.

This root looks rather similar to PTB ***wat*** THIRSTY (§1.1.3.1), but we are keeping them separate for now. The present root seems always to mean 'hungry' while PTB ***wat*** THIRSTY (§1.1.3.1) apparently always means 'thirsty'.

1.1.3.1 Thirsty

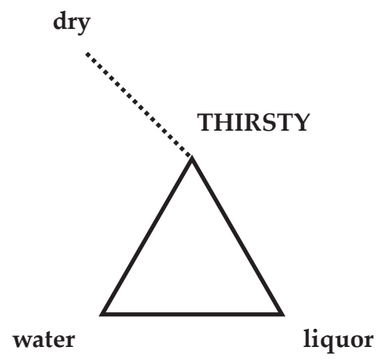

Figure 26: 1.1.3.1 *Thirsty*

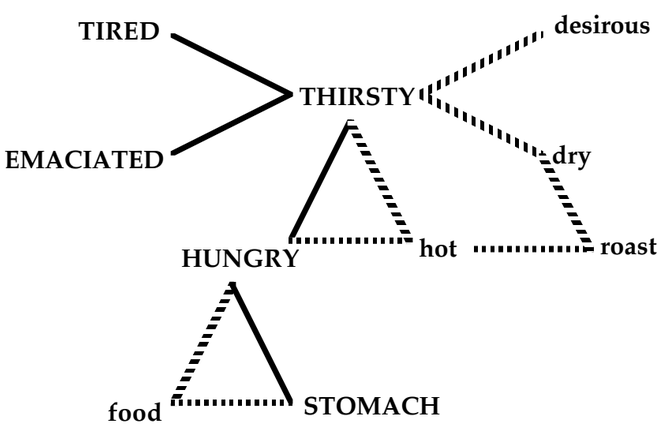

Figure 27: 1.1.3.1 *Thirsty*

(1) PTB *si(p) THIRSTY / HUNGRY

This etymon is particularly well-attested in Lolo-Burmese, where there is strong evidence for the final ***-p**.

Other languages seem to point to an open-syllable variant.

The Qiang (Mawo) binome **ʨi pi** might possibly be a dimidiation of the monosyllable with final **-p**. The term 'dimidiation' is due to Peter Boodberg, who used it to describe the practice of using two Chinese characters to transcribe a single syllable.

(2) PTB *s-wi ≷ *s-way DRIED UP / THIRSTY

This root seems almost exclusively to be attested in Lolo-Burmese, where both the prefixed and unprefixed variants occur: e.g. Lahu **vi** < ***-wi ≷ fi̱** < ***s-wi**. Semantically, however, this is not a simplex / causative pair; **fi̱** refers to a mass of water drying up or being emptied out, while **vi** focuses on the drying out of a wet object. Furthermore, **vi** < PLB *Tone 1, but **fi̱** < PLB *Tone 2.

Several languages point to a diphthongal rhyme ***-ay**.

(4) PTB *g-ra $\begin{matrix}\text{ŋ}\\\text{k}\end{matrix}$ THIRSTY / HUNGRY

The Jingpho forms descend from the allofam with final velar stop.

The Burmish forms apparently descend from a variant ***g-ra(w)ŋ**.

A couple of languages show final **-n** instead of **-ŋ** (Atong, Trung).

(6) PTB *wat THIRSTY

This root seems fairly solid. The final **-p** in Athpare seems to be due to assimilation to the labial nasal in the following syllable. Kulung **wam ma siy-a** shows complete assimilation to the initial of the second syllable.

The second syllable of Bantawa **cak-wa-sü-** and the first syllable of Limbu **P-wa mi:kt-** seem to descend from an independent root PTB ***r/s/g-wa** WATER / RAIN (§1.2.6).

This root looks rather similar to PTB ***wan** HUNGRY (§1.1.3), but we are keeping them separate for now. The present root seems always to mean 'thirsty' while PTB ***wan** HUNGRY (§1.1.3) apparently always means 'hungry'.

1.1. "North Assam"

Sulung [Puroik]	lok^{33}**və^{ˈ}t^{33}**	thirsty	Sun Hongkai et al. 1991:898.52

(9) PTB *bal TIRED / THIRSTY

Note the interesting semantic association between TIRED and THIRSTY.

Jingpho has a doublet **bá ≍ bàn**, with the latter directly reflecting the ***-l**.

This root is very likely allofamic with PTB ***baŋ** TIRED / EXHAUSTED (§8.3.1), but it seems best to keep them separate for now.

0.1. Tibeto-Burman (previously published reconstructions)

Chinese comparandum

S412

(10) PTB *k(w)am THIRSTY / DRIED OUT

Three different prefixes are attested with this root: Written Tibetan has **s-**, but some modern dialects have **r-**. The voiced initial in the Lahu form reflexes a nasal prefix at the PLB level.

The Written Tibetan doublet **skam-po** 'dry' and **skom-pa** 'thirst' strongly supports the reconstruction of ***-wa-**.

This root bears some resemblance to PTB ***krwap** RUSTLE (§9.3), the common core of meaning perhaps residing in the dry sound made by fallen leaves.

(11) PTB *$\begin{matrix}\mathbf{k}\\\mathbf{g}\end{matrix}$a(ː)ŋ ROAST / TOAST / DRY / HOT / BURN / THIRSTY

STC sets up two separate roots: PTB ***(t)s(y)ow** FINGER (§1.5.6) ***kaːŋ** and glossed 'roast / toast / burn' and PTB ***(t)si** FINGER (§1.5.6) ***kaŋ** glossed 'dry up'. We regard these two sets as reflecting the same etymon.

The sense of "thirsty" is not recognized in *STC* #330, 331.

	kɔ^{33}; ɬi^{13}	dry(clothes)nr fire;dry(kang)	SUN Hongkai et al. 1991:631.22
Yi (Liangshan)	ko^{33}	dry out; warm up	MA Linying *et al.* 2008:index
Yi (Nanhua)	ka^{33}	dry by fire (v.)	HUANG Bufan & DAI Qingxia, eds. 1992:1374.37
	kʌ^{33}	dry (clothes) near fire; warm (oneself) near fire	SUN Hongkai et al. 1991:631.24; SUN Hongkai et al. 1991:632.24

6.1.2.2. CENTRAL LOLOISH

Lahu (Black)	qɔ	roast or bake; expose to heat	Matisoff 1988a:p. 250
Lisu	ko^{33}	warm oneself by (a fire) (v.)	HUANG Bufan & DAI Qingxia, eds. 1992:1474.40
	kọ^{33}	dry by fire (v.)	HUANG Bufan & DAI Qingxia, eds. 1992:1374.40
	ko^{44}	dry (clothes) near fire; warm (oneself) near fire	SUN Hongkai et al. 1991:631.27; SUN Hongkai et al. 1991:632.27
Lisu (Northern)	kɔ^{33}	dry or warm up with fire; bake; air in sunshine (V.)	Bradley 1994
Yi (Sani)	qo^{44}	dry by fire; warm oneself by (a fire) (v.)	HUANG Bufan & DAI Qingxia, eds. 1992:1374.39; HUANG Bufan & DAI Qingxia, eds. 1992:1474.39

Chinese comparandum

炕 OC (not in *GSR* #698, probably ***k’ûng**), ‘heated brick bed / dry / to roast’; Mand. **kàng**.

(12) PTB *gru ≷ *grwa DRY / DRIED OUT

This forms seems to show variation between PLB tones *1 and *2.

The rhyme **-wa** regularly gives Lahu **-u**. The Lahu front velar **k-** reflects a ***gr-** cluster.

1.7.3.2. ASAKIAN: ***r-ków*** DRY

**Asakian*	*r-**ków**	dry	HUZIWARA Keisuke 2012:#116
Ganan	**kɔ́**	dry	HUZIWARA Keisuke 2012:#116
Kadu	**ʔə kú**	dry	HUZIWARA Keisuke 2012:#116
Sak	**rəkú**	dry	HUZIWARA Keisuke 2008:240

1.1.3.2 Satiated/Full/Enough

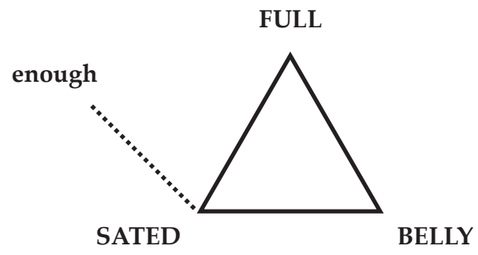

Figure 28: 1.1.3.2 *Satiated/Full/Enough*

(1) PTB *m-pup SATIATED

This root has an interesting distribution; it has so far been found in Lolo-Burmese, Karenic, and Bai. The nasal prefix is amply attested in Lolo-Burmese.

It is not clear whether Chinese 飽 'satiate' is related to this etymon.

Chinese (Old/Mid)	**pộg/pɑuː**	satiate	Karlgren 1957:1113d

9.0.3. Modern Chinese

Chinese (Mandarin)	**bǎo**	satisfied, full	Evans *et al.* 1991

Chinese comparandum

飽 OC ***pộg***, *GSR* #1113d; Schuessler 2007:158 ***prûʔ***; Mand. **bǎo**.

(2) PBod *tsim SATED / SATISFIED

Since the Motuo form looks like a borrowing from Tibetan, further confirmation is required before setting this root up for Proto-Bodic, and *a fortiori* for PTB as a whole.

2.1.2. Bodic

Tsangla (Motuo)	**tsʰim**	sated, too full	Sun Hongkai *et al.* 1980

2.1.2.1. Tibetan

Tibetan (Written)	**tshim** pa	satisfied, content	Matisoff 1994b

(3) PTB * $\begin{matrix}\mathbf{g}\\\mathbf{k}\end{matrix}$ **aŋ FULL / SATIATED**

This root appears in many Tibetan dialects with the meaning 'full'. The notion of 'satiated' is attested in Ergong and Sak.

The Ergong forms reflect a labial prefix, perhaps ***b-***.

1.7.3.2. Asakian

Sak	**kaŋ**	satiated	Huziwara Keisuke 2008:90a

2.1.2.1. Tibetan

Tibetan (Alike)	**kaŋ**	full (adj.)	Huang Bufan & Dai Qingxia, eds. 1992:0984.05

[a] [Source Note] cf. 'good'.

(10) PTB *m-nyəw- $^{\mathbf{t}}_{\mathbf{s}}$ FULL / SATIATED

This root bears a certain resemblance to PTB ***m-nywa(n/t)*** FULL (of container) (§1.1.3.2), but we are keeping it separate for now. Both the ***-t*** and the ***-s*** suffixes are attested in rGyalrongic, with occasional forms having a ***-k*** or ***-p*** coda.

The reflexes have meanings referring either to the fullness of a container or of one's stomach.

The mid tone Naic forms indicate that they descend from a non-suffixed allofam.

Chinese comparandum

裕 OC ***gi̯ug**, *GSR* #1202h 'indulgent, abundant, opulent'; Schuessler 2007:589 ***lokh**; Mand. **yù**.

(13) PTB * $\begin{matrix}\textbf{p}\\\textbf{b}\end{matrix}$ liŋ FULL / FILL

Contra *STC* #142, Lahu **bî** 'full' is not from this etymon, but rather from PLB ***N-bri^{1}/^{2}** FULL / COMPLETE (§1.1.3.2).

As discussed in Matisoff 1988 ("Straight, flat, full"), this root is allofamically related both to PTB ***(p/b)lyaŋ** PLANK / PALM / FLAT SURFACE / WING (§1.5.1) and PTB ***(p/b)lyaŋ** STRAIGHT / STRAIGHTEN (§7.1.5), the common semantic core being "a complete or ideal realization of a quality appropriate to a particular dimensionality in space".

(18) PTB *m-nywa n t FULL (of container)

This root has so far been attested only in Tamangic and rGyalrongic. The meaning always seems to refer to the contents of a container rather than to satiety from eating. The rGyalrongic forms show evidence both of a palatal and labial glide, but no trace of a final **-t**. The Tamangic forms, on the other hand, attest to an alternation between final stop and nasal, as well as evidence of a palatal semivowel (but not of a labial one).

	√^{H}**send**-	wake up (?tr.) (v.)	Michailovsky 1991:198

(5) PBm *bun AWAKE

There is a possible cognate to this Proto-Burmish root in Lotha Naga. If this is valid, the root should be promoted to the PTB level.

1.3.1. Central Naga (Ao Group)			
Lotha Naga	**phan** Nthia	awake / be awake	Nienu 1990c:1.17
6.1.1. Burmish			
Bola	**pɔn**^{31}	wake	Dai Qingxia 1989g:2386
Bola (Luxi)	**pɔn**^{31}	wake up (v.)	Huang Bufan & Dai Qingxia, eds. 1992:1739.32
Langsu (Luxi)	**pum**^{35}	wake up (v.)	Huang Bufan & Dai Qingxia, eds. 1992:1739.31
Lashi	**puːn**^{33}	awake / be awake	Dai Qingxia 1989m:1.17
Leqi (Luxi)	**puːn**^{33}	wake up (v.)	Huang Bufan & Dai Qingxia, eds. 1992:1739.33
Maru [Langsu]	**pum**^{35}	awake; be awake; wake up	Dai Qingxia 1989l:1.17; Sun Hongkai et al. 1991:583.43
Atsi [Zaiwa]	**pun**^{21}	wake	Xu Xijian & Xu Guizhen, eds. 1984
	pun^{21}	wake up (v.)	Huang Bufan & Dai Qingxia, eds. 1992:1739.30
	pun^{21}	wake up	Sun Hongkai et al. 1991:583.42

(6) PTB * $\begin{matrix}\text{t}\\\text{d}\end{matrix}$ uŋ WAKE

This poorly attested root requires further confirmation.

1.1.2. Deng			
Idu	**thoŋ**^{35}	wake up	Sun Hongkai et al. 1991:583.50
	t^{h}oŋ^{35}	awake / be awake	Sun Hongkai 1991f:1.17
Yidu	**thoŋ**^{35}	wake up (v.)	Huang Bufan & Dai Qingxia, eds. 1992:1739.25
6.1.2.3. Southern Loloish			
Bisu	**dùŋ**	wake up; awake	Bradley 199x; Bradley 1979b:767S

(7) PTB *s(y)u- $\begin{matrix}\text{ŋ}\\\text{k}\end{matrix}$ WAKE UP / MORNING / CLEAR-HEADED / SOBER UP

Written Burmese **sok-kra** ‘Venus; morning star’ is a loan from Sanskrit **śukra** ‘Venus’, **śukravāra** ‘Friday’, contra *LTSR* #125 and DL:1219, so is therefore not to be assigned to the stopped final allofam of this root. The most convincing evidence for the latter is the Lahu form below.

An interesting semantic extension of this root is “sober up after drunkenness” (cf. the Trung forms).

See also PTB ***(t)s(y)aŋ** CLEAR / PURE / CLEAN (§9.6.1) for a phonosemantically similar etymon.

1.7.3.1. Jingpho			
Jingpho	cha **su**	awake / awaken (v.)	Marrison 1967

1.1.4.1 Sleep/Be asleep

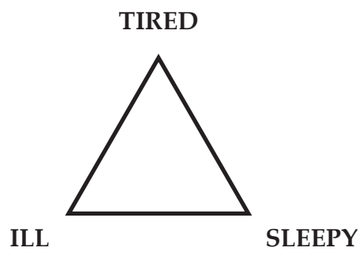

Figure 30: 1.1.4.1 *Sleep/Be asleep*

(1) PTB *s-y $\begin{matrix}\textbf{i}\\\textbf{u}\end{matrix}$ p SLEEP

This is one of the most widespread TB roots to show the variation between medial ***-i-*** and ***-u-***. There might be an allofamic relationship between this root and PTB ***g-(d)z(i/u)m*** SLEEP (§1.1.4.1).

This root frequently occurs as the first syllable in binomes meaning DREAM, where the second element is from PTB ***s/r-ma(ŋ/k)*** DREAM (§1.1.4.2).

Written Burmese **sip** 'put to sleep' illustrates a rare survival of the causative prefix ***s-***; most Burmese morphological causatives simply have an aspirated initial.

Tibetan has developed the meaning HIDE for this root.

	ŋi: ma- **se** ma	dream	Michailovsky 1991:46

1.1.5 Strength

(1) PTB *$\begin{matrix}\mathbf{g}\\\mathbf{m}\\\mathbf{b}\end{matrix}$**-raŋ STRONG / FIRM / TENSE**

A few forms (Chepang, Burmish) show final **-m** instead of **-ŋ**.

For a possibly related root, where the ***r** is prefixal rather than part of an initial consonant cluster, see PTB ***r-kaŋ** STRONG (§1.1.5).

This root is set up as ***graŋ** ≍ ***kraŋ** in *HPTB*:267.

There is apparently a doublet at the PKC level: PKC ***khrooŋ** ‘strong’, ***khraŋ-I, khran-II** ‘grow / increase / rise’.

0. Sino-Tibetan (previously published reconstructions)

**Sino-Tibetan*	***krang/mkrang**	hard / strong	Coblin 1986:91

	tɕhi̱[44] ɣɯ̱[42]	strength	Xu Lin & Zhao Yansun, eds. 1984

(5) PTB *b-tsan STRONG / FIRM / STEADFAST

We set up this root with an initial affricate to accommodate the Tibetan and Northern Naga forms. At the PLB level, the initial had simplified to a sibilant, a development which is replicated in scattered forms elsewhere, e.g. Sangtam **a ze** and Kayan Pekon **sên**.

0.1. Tibeto-Burman (previously published reconstructions)

**Tibeto-Burman*	***b-tsan**	strong; firm; steadfast	Matisoff 1985a:016; Matisoff 2003a:616

7. Karenic

Kayan (Pekon)	âu **sên** âu klə̣̀n	stable and firm, solid (Velab.)	Manson 2010
	sên	firm (ADJ.)	Manson 2010

[a]"... staunch, immovable; safe, sure; definite, decided."

(6) PTB *twal STRONG / HARD / TOUGH

This root may be safely reconstructed for Proto-Tani, although it might ultimately be of Indo-Aryan origin. Cf. Sanskrit *sthūra-* ~ *sthūla-* 'stout, broad, strong'.

1.1.1. Tani: ***tol** STRONG

**Tani*	***tol**	strong	Sun 1993a:405

1.1.1.1. Western Tani

Apatani	**tor**-nan	security	Sun 1993b
Bengni	a-jak a-**tɯr**	strong	Sun 1993b
	a-**tɯr**	strong; strength	Sun 1993a; Sun 1993b
	hi:-**tɯr**	hard (work)	Sun 1993b
Bokar	**tor**	strong; strength	Sun 1993a; Sun 1993b; Sun 1993b
	tor	strength (physical) (n.)	Huang Bufan & Dai Qingxia, eds. 1992:0675.24
Bokar Lhoba	**tor**	strength	Sun Hongkai et al. 1991:513.51
Galo	at-**tor**-na	hard	Das Gupta 1963
	at **tor**	hard; firm (adj.)	GLDC 2009; GLDC 2009
	tor-nɤ	hardy; strong (of bamboo, post, etc.)	Das Gupta 1963; Das Gupta 1963
	tor nam	strong; hard; exert (strength/force) (vi.)	GLDC 2009; GLDC 2009; GLDC 2009
	'lɨɨ **tor**	hard stone; stone (hard) (n.)	GLDC 2009; GLDC 2009
Miri, Hill	a **tɯr**	hard, strong, rough, tough	Simon 1976
Nishing	a **tarr**	strong	Das Gupta 1969
Tagin	**tor** nam	strong	Das Gupta 1983
	tor nɤ hɤ mi	strong boy	Das Gupta 1983

1.1.1.2. Eastern Tani

Padam [Abor]	**tol**	strong	Sun 1993a
Damu	**tor**	harden	Sun 1993b
	tor-nə	hard	Sun 1993b
Milang	**tol**-ɲi	strong; hard; brave	Tayeng 1976; Tayeng 1976; Tayeng 1976
	tol-ɲi-ru-ŋa	robust	Tayeng 1976
Mishing [Miri]	**tor**	strong	Sun 1993a

1.7.1.1. Bodo

Bodo	**tura turi**	stout / strong	Bhat 1968

2.1.1. Western Himalayish

Byangsi	**tàr** mo	brave (adj.)	Sharma 2003:936
Darma	**tar**-nu	strong	Krishan 2003:797
Rongpo	kə **Tor**	hard (adj.)	Sharma 2003:682 [a]

2.1.2. Bodic

Tsangla (Motuo)	kak[55]**tar[55]**	hard	Zhang Jichuan, ed. 1986
	kak **tar**	hard	Sun Hongkai et al. 1991:831.7
Tsangla (Tilang)	kak-**tara**	hard	Zhang Jichuan, ed. 1986
Motuo Menba	kak **tar**	hard	Huang Bufan & Dai Qingxia, eds. 1992:1034.07

[a][Source Note] (IA).

(7) PTB *sak ROUGH / SCALY

0.1. Tibeto-Burman (previously published reconstructions)

**Tibeto-Burman*	***sak**	rough	Matisoff 2003a:612

1.7.3.2. Asakian

Sak	**so?**	rough (vi.)	Huziwara Keisuke 2008:346-1

2.1.2.1. Tibetan

Tibetan (Written)	nya-**sag**	fish-scale	Jäschke 1881:p.184
	sag	brawn, callosity; scale	Jäschke 1881:p.571

2.3.4. Western Kiranti

Thulung	**sak** teor	coarse, rough (to touch)	Allen 1975

2.4. Kham-Magar-Chepang

Chepang	**cek**-	be rough texture (va.)	Caughley 2000
	cek-ʔo	rough	Caughley 1972:12.C.29
	cek.lo?	plant (sp.), shrub with large rough leaves - crushed to put on suppurating wound; Pilea symmeria (n.)	Caughley 2000
	cek.ʔo	rough (adj.)	Hale 1973:12c.29

6.1. Lolo-Burmese: ***sak** ROUGH

**Lolo-Burmese*	***sak**	rough (GD 53.)	Matisoff 1972b:115
	***sak**	rough	Matisoff 1972b:115

6.1.1. Burmish

Burmese (Written)	**sôŋ**	rough (= ka-sôŋ = ka-sok)	Benedict 1976a

6.1.2.1. Northern Loloish

Yi (Wuding)	**sɑ̱**[2]	rough / coarse	Huang Bufan & Dai Qingxia, eds. 1992:1038.38

6.1.2.2. Central Loloish

Ahi	**sɛ 44**	rough	Matisoff 1972b:115
Jinuo	a[44]**sa**[42]	rough / coarse	Huang Bufan & Dai Qingxia, eds. 1992:1038.44

Lahu (Black)	**šâʔ**	rough	Matisoff 1972b:115
Lisu (Northern)	ji^{55}**sæ^{35}**	crude; coarse (V.)	Bradley 1994
	ji^{55}**sæ^{35}**læ^{33}	prickly; rough; coarse	Bradley 1994
	lɔ^{33}**sæ^{35}**	rough millstone	Bradley 1994
Lisu	**syá2**	rough	Matisoff 1972b:115
Lisu (Central)	**syá^{2}**	rough, be (not smooth) (v.)	Fraser 1922
Lisu (Northern)	**sæ^{35}**	coarse (V.)	Bradley 1994
	sæ^{35}ŋɔ^{21} ma^{21} ŋa^{33}	very coarse	Bradley 1994
Lisu	**sɛ^{35}**	rough / coarse	Huang Bufan & Dai Qingxia, eds. 1992:1038.40
Sani [Nyi]	**se 33**	rough	Matisoff 1972b:115
Yi (Sani)	**se^{33}**	rough / coarse	Huang Bufan & Dai Qingxia, eds. 1992:1038.39

6.1.2.3. Southern Loloish

Akha	**sa HS**	rough	Matisoff 1972b:115
Hani (Lüchun)	**sa̱^{33}**tu̱^{33}ne^{33}	rough / coarse	Huang Bufan & Dai Qingxia, eds. 1992:1038.41
Mpi	**sa^{3}**	rough (to the touch)	Srinuan Duanghom 1976

(8) PTB *kywaŋ HARD / SOLID

This root has so far only been uncovered in a few Himalayan languages.

2.1.2.1. Tibetan

Tibetan (Written)	**kyoṅ**	hard	Marrison 1967
	kyong	hard, solid	Matisoff 1994b

2.1.4. Tamangish

Manang (Gyaru)	**gyoŋ^{1}**	hard	Nagano 1984:352
Manang (Prakaa)	**^{2}kyoŋ** pə	hard	Hoshi Michiyo 1984:0440
Tamang (Sahu)	**koŋ**-pa	hard, solid	Matisoff 1994b
Thakali (Tukche)	**'koŋ** ɔ-wɔ	hard	Hari 1971:12.B.7

(9) PTB *tsak-t HARD / SOLID

The Jingpho binome means literally "hard-liver" (cf. **məsìn** 'liver', which is opposed to **sìn-wóp** 'lungs', lit. "soft/spongy liver"). This metaphorical antonymy is discussed at length in *VSTB*:198-9.

1.3.1. Central Naga (Ao Group): ***a-tʃhak** DIFFICULT / HARD / DEAR, COSTLY

**Central Naga*	*a-**tʃhak**	DIFFICULT / HARD / DEAR, COSTLY (be v.)	Bruhn 2014a:III.252
**Ao*	*a-**tʃhak**	DIFFICULT / HARD (be v.)	Bruhn 2014a:II.164
Ao (Chungli)	a^{3}-**sak^{1}**	difficult, hard (be v.)	Bruhn 2014a:II.164
	shi **sak**	dear (expensive)	Marrison 1967
	si **sak**	expensive	French 1983:501
	ta **sak**	hard, difficult; difficult	French 1983:501; Marrison 1967
Ao (Mongsen)	**c^{h}àk**	hard (be v.)	Temsunungsang 2009:14
Ao (Mongsen: Longchang)	te **chak**	dear (expensive); difficult	Marrison 1967; Marrison 1967
	tə **cak**	difficult, expensive	French 1983:501
Lotha Naga	**tshək^{2}**-	costly (be v.)	Bruhn 2014a:III.252
	tsak a	dear (expensive)	Marrison 1967
	tssük a	dear	Murry *et al.* 1978:28
Sangtam	a mi a **thsak**	costly	Kumar 1973a
	a **thsa**	difficult	Marrison 1967
Yimchungrü	a mo a **chak**	dear (expensive)	Marrison 1967
	a mo **chak**	costly	Kumar 1973b:80

1.3.4. Tangkhulic: ***ʃak** DIFFICULT / HARD

**Tangkhulic*	***ʃak**	difficult / hard	Mortensen 2012:699
Huishu	kə-**soʔ**	difficult / cold	Mortensen 2012:Verbs.154
Tangkhul	ka **sak** a	hard(2)	Matisoff 1994b
	sək	difficult; hard, difficult	Bhat 1969:87; Matisoff 1994b
Ukhrul	kə-**sɐk**	difficult, costly (be v.)	Mortensen 2012

1.7.3.1. Jingpho

Jingpho	sin^{31} **tʃaʔ^{31}**	liver	Liu Lu, ed. 1984
	sin^{31}**tʃaʔ^{31}**	liver (nbp.)	Huang Bufan & Dai Qingxia, eds. 1992:0145.19
	sīn^{31}**tʃaʔ^{31}**	liver	Sun Hongkai et al. 1991:273.47

2.4. Kham-Magar-Chepang

Chepang	**cak**-ʔo	hard	Caughley 1972:12.B.7

(10) PTB *s-ra HARD / DIFFICULT / POOR / DISTRESSED

This etymon bears a fortuitous resemblance to PLB ***ša^{1}** EASY / CHEAP (§9.6.1), a root with the opposite meaning.

2.1.2.1. Tibetan

Tibetan (Alike)	**ʂa** mo	hard; solid	Huang Bufan & Dai Qingxia, eds. 1992:1034.05; Huang Bufan & Dai Qingxia, eds. 1992:1043.05

Na (Yongning)	lo˧**hɑ**˧	difficult, hard to do	Michaud 2006–2009
Naxi (Yongning)	lo^{33}**xɑ^{33}**	difficult	Sun Hongkai et al. 1991:879.29

Chinese comparandum

粗 ***N-s^{ʕ}ra** 'coarse, crude, thick; vulgar, rude'
鹵 ***r^{ʕ}aʔ { [r] ^{ʕ}aʔ}** 'rustic, coarse'

(11) PTB *kak HARD / DIFFICULT

The verb in the Lahu expression **mû qhâʔ ve** 'have a drought' might possibly be from this etymon (**mû** 'heaven, sky'), i.e., literally 'heaven is difficult'.

0. Sino-Tibetan (previously published reconstructions)

Sino-Tibetan	*khaɣ/khak	bitter / difficult	Coblin 1986:44
	*ʔyak ≍ kak	difficult	Matisoff 1983:70

**Chin*	***tsak**	STRONG / TOUGH	VanBik 2009:567

1.2.1.1. NORTHERN CHIN

Paite	**taak**	tough	VanBik 2009:567

1.2.2. CENTRAL CHIN

Lai (Hakha)	**tsak**-I, tsa?-II	strong, be tough (be v.)	VanBik 2009:567
Lai (Falam)	**tsàk**-INV	strong, be tough (be v.)	VanBik 2009:567
Lushai [Mizo]	**chak**	strong	Marrison 1967
	chàk	strong (physically), powerful, vigorous, fast, speedy, quick walking	VanBik 2009:567
	chak	strong (vi.)	Bhaskararao 1996:2162

(17) PTk *ʃon WEAK

1.3.4. TANGKHULIC

**Tangkhulic*	***ʃon**	weak	Mortensen 2012:780
Tangkhul	**śon**	weak	Bhat 1969:100
Ukhrul	kə-**ʃon**	weak due to old age (be v.)	Mortensen 2012

1.1.5.1 Sick/Hurt/Ache

(1) PTB *na- $\frac{\text{n}}{\text{t}}$ ILL / PAIN / SORE / ACHE / DIFFICULT / EVIL SPIRIT

Chinese characters. *GSR* 152d-f, *STC* p.159, *STC* #80, *LTSR* #136, PLB ***nat*** ⩙***nan***. Split into allofams ***na**, ***nan**, ***nat**.

All three allofams (open-syllable, nasal-final, and stop-final) are well attested.

A few languages (Tangsa, Bisu, Sangkong) have developed the homorganic stop in this root.

0.1. TIBETO-BURMAN (PREVIOUSLY PUBLISHED RECONSTRUCTIONS)

**Tibeto-Burman*	***na**	ill (v.i.)	Weidert 1987:198
	***na**	pain (v.)	Weidert 1987:817
	***na**	ill, (be v.)	Michailovsky 1991:96
	***na**	ill; ill, pain	Matisoff 1983:10; Benedict 1972:80
	***na (*A)**	sick	Coblin 1986:132
	***na-n** ⩙ **na-t**	ill / suffer / hurt / evil spirit	Matisoff 2003a:603

1.1.2. DENG

Darang [Taraon]	xɑ³¹ po⁵⁵ **ɲɑŋ³⁵**	tuberculosis	SUN Hongkai *et al.* 1980
Kaman [Miju]	**nât**	disease	Weidert 1987:1188
	nʌ̀i	ill (v.i.)	Weidert 1987:198
	sɑu³⁵ **nɑt⁵⁵**	tuberculosis	SUN Hongkai *et al.* 1980
	tʌ́-**nât**	ill (v.i.)	Weidert 1987:198
Idu	jā ko **ɲa** ga	stomach ache	Pulu 1978
	tā-**na**	toothache	Pulu 1978

1.2. KUKI-CHIN: ***naa-I**, ***nat-II** PAINFUL / SICK			
**Chin*	***naa-I**, **nat-II**	PAINFUL / SICK	VanBik 2009:825
1.2.1.1. NORTHERN CHIN			
Paite	**na**	pain	VanBik 2009:825
Sizang	a **nā**	pain	VanBik 2009:825
Thado	**náa-I**, **nàt-II**	sick, ache, pain, hurt	VanBik 2009:825
Tiddim	**na:^{3}** > **nat^{3}**	feel pain	VanBik 2009:825
1.2.1.2. SOUTHERN PLAINS CHIN			
Khumi	**noó**	ache (e.g head), hurt, ill, sick	VanBik 2009:825
1.2.2. CENTRAL CHIN			
Lai (Falam)	**nằa-I**, **nàt-II**	painful, sick (be v.)	VanBik 2009:825
Lushai [Mizo]	**ná**	ill (v.i.)	Weidert 1987:198
	na ⩙ nat	ill; illness (vs.)	Benedict 1972:80
	náa-I, **nàt-II**	sick or ill, to be painful, to hurt, to ache (be v.)	VanBik 2009:825
1.2.4. "OLD KUKI"			
Kom Rem	kʌ-**ná**	ill (v.i.)	Weidert 1987:198
1.3.1. CENTRAL NAGA (AO GROUP)			
Ao (Chungli)	^{2}a^{2}**nɯ**	pain (v.)	Weidert 1987:817
Lotha Naga	e^{1}-**no^{1}**-lan^{3}	ailment (n.)	Bruhn 2014b
	no^{1}-	hurt, be painful (vi.)	Bruhn 2014b
	ē **n̰ō**	pain	Acharya 1975
	no a	pain (n.)	Marrison 1967
	No ChoNori	sick / be ill / hurt (be.)	Nienu 1990c:12.2
	^{1}e^{1}**no**	ill (v.i.)	Weidert 1987:198
1.3.3. ZEME GROUP			
Rongmei / Nruanghmei	a-**næu**	ill (v.i.)	Weidert 1987:198
1.3.4. TANGKHULIC: ***na** HURT			
**Tangkhulic*	***na**	hurt	Mortensen 2012:773
Tusom	tsɯ-k^{h}ə-**na**	hurt	Mortensen 2012:Verbs.130
1.4. MEITHEI			
Meithei	**na**	ill (v.i.)	Weidert 1987:198
	na bə	illness	Abbi & Mishra 1985
	na bə	sick / be ill / hurt (be v.)	Singh 1991:12.2
1.5. MIKIR [KARBI]			
Mikir [Karbi]	rèng-**nō**-	sick / be ill / hurt (be v.)	Grüssner 1979:193
1.7.1.1. BODO			
Bodo	sa **nai?**	ill (v.i.)	Weidert 1987:198
Lalung [Tiwa]	sha **na**	sick (be v.)	Balawan 1965:63
1.7.1.2. GARO			
Garo	sak-**na**-a	get pain / hurt	Weidert 1987:198
1.7.2.1. TANGSA-NOCTE			
Tangsa (Yogli)	**da**	sick	French 1983:561
1.7.3.1. JINGPHO			
Jingpho	**nát**	spirit; demon[1]; deity (animist)	Matisoff 1985a:036; Matisoff 1974:366
	nat, hpi, tsu	spirit	Marrison 1967
	nat^{55}	ghost	LIU Lu, ed. 1984
	nat^{55}	ghost / spirit (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0669.19
	nat^{55}	ghost / demon	SUN Hongkai et al. 1991:523.47
	sin^{31} wop^{55} a^{31} **na^{31}**	tuberculosis	LIU Lu, ed. 1984
	^{3}nat	spirit / demon	Weidert 1987:1188
	ə na	illness	Benedict 1972:80
	?ə nà	illness	Matisoff 1974:114
2.1.1. WESTERN HIMALAYISH			
Kanauri	**na**	hurt (vs.)	Benedict 1972:80
Pattani [Manchati]	**nəd** pa	sick	Sharma 1982
2.1.2. BODIC			
Tsangla (Central)	sha rang **nga** ma	headache	Egli-Roduner 1987:37 7
Tsangla (Motuo)	lo **ne?**	tuberculosis	SUN Hongkai *et al.* 1980
	nat pa	sick person	SUN Hongkai *et al.* 1980

6.2. Naxi

Laze (Xiangjiao)	æ˧**bæ˧**	goiter	Michaud 2006–2009:315

7. Karenic

Pa-O	kəthɔ̄ŋ **pú**	goiter	Solnit 1989
Karen (Sgaw/Hinthada)	**bua^{33}** jɔ^{31} dę^{55} kę^{31}	hunchback	Dai Qingxia 1989k:263
	mi^{33} **bua^{33}** p^{h}o^{55}	eyeball	Dai Qingxia 1989k:104.1

[a] This form is also cited in DL:852 as **pè-pɨ** 'crop of bird; (human) breast, chest'. It is co-allofamic with **pè-pì(-qu)** 'chicken's breast' (cf. also **pè-qu** 'goiter').

(1b) PTB *bwap CALF / LEG

This root is only one allofam of a complex word family, including ***s-bwam** 'plump / swollen', set up as a separate root in *STC* #172. This allofamy was recognized in *LTSR* #92, which reconstructs PLB ***m-pwap** ⪤ ***C-pwam** 'swell up / be swollen / stout / calf of leg'.

0.1. Tibeto-Burman (previously published reconstructions)

**Tibeto-Burman*	***bop**	calf (leg) (2); calf of leg; calf of the leg	Weidert 1987:1091; Matisoff 2003a:585; Benedict 1972:30

1.2.2. Central Chin

Lushai [Mizo]	**bop**	leg; hind leg (animal); leg, hind leg of an animal	Weidert 1987:1091; Matisoff 1987; Benedict 1972:30

1.7.3.1. Jingpho

Jingpho	**bop** ⪤ lə **bop**	calf of the leg	Benedict 1972:30
	^{1}lə^{1}**bop**	calf (leg)(2)	Weidert 1987:1091

2.1.3. Lepcha

Lepcha	(ă-)**bop**	large (as belly)	Benedict 1972:30

(2) PTB *bwar SWELLING / GOITER

This etymon is very possibly related to PTB ***s-b^{w}a(m/p)** SWELL / SWOLLEN / FAT / THICK / ROUNDED PART (§1.1.5.2).

1.2.2. Central Chin

Lushai [Mizo]	hrok-**puar**	goiter	Matisoff 1987

	ong-**puar**	goiter	Matisoff 1987
	or **puar**	goiter	Matisoff 1987
	ór-**púar**	goitre	Weidert 1987:504

1.2.3. Maraic

Lakher [Mara]	rao **pua**-pa	goiter	Matisoff 1987:256

2.1.2.1. Tibetan

Tibetan (Amdo:Zeku)	**hwa**	goiter	Sun 1985a:313
Tibetan (Sherpa:Helambu)	**powa**	goiter	Bishop 1989:4.1.1 [a]
Tibetan (Written)	gn̰an **fibur**	boil (n.)	Sun Hongkai et al. 1991:285.1
	ḥbur-ba	rise, be prominent (v.)	Jäschke 1881:394
	ḥbur-ma	embossment, relievo (n.)	Jäschke 1881:394
	ḥbur-po	protuberance; tumor (n.)	Jäschke 1881:394
	fibur fibur	protruding / raised (adj.)	Huang Bufan & Dai Qingxia, eds. 1992:0970.01

[a] < **lba-ba**.

(3) PTB *bwat PREGNANT / SWOLLEN

This root is very likely related to PTB ***s-b^{w}a(m/p)** SWELL / SWOLLEN / FAT / THICK / ROUNDED PART (§1.1.5.2), although further confirmation would be welcome.

[a] Several Lolo-Burmese languages have reflexes of more than one allofam, e.g. Lahu **phòʔ** 'swell up' < PLB ***C-pwap**, and **pè** 'goiter' < PLB ***bum^{1}**.

6.1.1. BURMISH			
Bola	vɛ̃[31] **pɔt[55]**	pregnant	DAI Qingxia 1989g:1912
Lashi	wɔm[33] **pu:t[31]**	pregnant (be v.)	DAI Qingxia 1989m:10.4.14
6.1.2.1. NORTHERN LOLOISH			
Gazhuo	si[53] ma[33] ko[21] **po[35]**	pregnant (be v.)	DAI Qingxia 1989c:10.4.14
6.1.2.2. CENTRAL LOLOISH			
Jinuo (Baya/Banai)	vu[55] **pø[33]**	pregnant	DAI Qingxia 1989h:1981
Jinuo (Youle)	ɣo[55] **pø[44]**	pregnant (be v.)	GAI Xingzhi, ed. 1986
8. BAI			
Bai (Jianchuan)	tǫ[42] **fv̩[44]**	pregnant (be v.)	ZHAO Yansun 1990:10.4.14

(4) PTB * $\frac{\text{l}}{\text{m}}$ -ba GOITER

This root is distinct from PTB ***bwar*** SWELLING / GOITER (§1.1.5.2). Written Tibetan preserves both etyma: **lba-ba** from the present root and **ḥbur** from PTB ***bwar*** SWELLING / GOITER (§1.1.5.2).

1.1.2. DENG			
Darang [Taraon]	tab-**ba:**	goiter	Matisoff 1987
	tɯ[55] **bɑ[31]**	goiter	SUN Hongkai *et al.* 1980
Digaro	tə **ba**	goitre	Benedict 1972:96n276
2.1.2.1. TIBETAN			
Tibetan (Batang)	**ba[231]**	goiter	DAI Qingxia 1989a:4.1.1
Spiti	**ba**	goiter	Bodh 1991:4.1.1
Tibetan (Written)	**lba**-ba	goitre; goiter; wen	Weidert 1987:504; Matisoff 1987; Sun 1985c:313
3.2. QIANGIC			
Qiang (Mawo)	**ʂpə**	goiter	SUN Hongkai 1991g:4.1.1
6.2. NAXI			
Moso	**ba** ~ **mba**	goitre	Benedict 1972:96n276

(5) PKir *hom SWELL

The stronghold of this etymon is the Kiranti group, although there is also a good Karbi cognate. The gloss of Karbi **ham-bi** 'kidney, ankle bone, kneecap' seems strange at first glance, but becomes clear in collocations: **kengphu a-ham-bi** 'kneecap' (lit. "knee's rounded part") and **keng ham-bi** 'ankle bone' (lit. "foot's rounded part"). Cf. *VSTB*: 222-223.

1.5. MIKIR [KARBI]			
Mikir [Karbi]	**ham**-bi	kidney, anklebone, kneecap; kidney	Matisoff 1978b:(2); Marrison 1967; Matisoff 1987
2.3. KIRANTI			
**Kiranti*	***hom**-	swell (v.)	Michailovsky 1991:175
2.3.1. EASTERN KIRANTI			
Athpare (Rai)	**hom**-e	swell, rise (sun)	Ebert 1997
	hom ma	swell, rise (sun)	Ebert 1997
Limbu	**hɔmt**-	swell up, become edemic; swell (v.)	Michailovsky 1989b; Michailovsky 1991:175
Yakha	**hom** ma:	swell / be swollen (v.)	Kohn 1990:12.4
2.3.2. SOUTHERN KIRANTI			
Bantawa	**hom**	swell up	Rai 1985
	hom-	swell (v.)	Michailovsky 1991:175; Michailovsky 1991:175
	hom-	swell (v.i.)	Rai *et al.* 1984:30
	homs-	cause to swell (v.)	Michailovsky 1991:175
	hom awo	swollen	Rai *et al.* 1984:30
	hop	swell up	Rai 1985
	hopt-	blister (v.)	Michailovsky 1991:175
	hopʈ-	swell (v.)	Michailovsky 1991:175
Chamling	**hom**-a	swell (v.)	Michailovsky 1991:175
Kulung	**həm**-	swell (v.)	Michailovsky 1991:175
	həm-a	swell (v.)	Rai *et al.* 1975
2.3.3. CENTRAL KIRANTI			
Khaling	√**hom**-	swell (v.)	Michailovsky 1991:175
2.3.4. WESTERN KIRANTI			
Bahing	**homd**-	swell (v.)	Michailovsky 1991:175
Sunwar	**hom**-	swell (v.)	Michailovsky 1991:175
	√[L]**hom**-	swell (v.)	Michailovsky 1991:175
Thulung	**hom**-	swell (v.)	Michailovsky 1991:175; Allen 1975
	hom si	cucumber	Allen 1975
	hop ci umu	swelling; boil, swelling	Michailovsky 1991:175; Allen 1975

(6) PKar *hɲɔʔ[D] SWOLLEN, SWELLING

7. KARENIC			
**Karen*	***hɲɔʔ**[D]	swollen, swelling	Luangthongkum 2013:288

9.0.1. Old Chinese			
Chinese (Old)	**hmjet**	extinguish; destroy	Baxter 1992:428; Baxter 1992:989
	mi̱at	drown, extinguish, destroy	Matisoff 1983:59 [a]

[a] Assamese dialect.

[b] This WT form has been interpreted elsewhere as a fusion of **mi** NEGATIVE + **red-pa** BE, the latter related to WT **srid-pa** COPULA. See *GSTC*:64.

[a] *GSR* 294b.

Chinese comparandum

滅 OC ***mi̱at**, *GSR* #294b 'drown, extinguish, destroy'; Schuessler 2007:385 ***met**; B & S 2011: ***met**; Mand. **miè**.

威 OC ***χmi̱wɑt**, *GSR* #294a 'extinguish, destroy'; Schuessler 2007:385 ***hmet**; B & S 2011: ***m̥et**; Mand. **xuè**.

沒 OC ***mwət**, *GSR* #492b 'disappear, die, destroy'; Schuessler 2007:389-90 ***mə̂t**; B & S 2011: (***mˤut**); Mand. **mò**.

曼 OC ***χi̱wɑd**, *GSR* #293a-b 'wink; signal with eyes'; Schuessler 2007:548 ***hmat** or ***hmet**; Mand. **xuè**.

(3) PTB * g s -ma- t n PERISH / BE SPENT / BE LOST / LOSE / DISAPPEAR / EXHAUSTED / FORGET

This etymon resembles PTB ***s-myak** VANISH / GET LOST (§9.5), but must be kept distinct, as witness the two Jingpho forms **myé?** from PTB ***s-myak** VANISH / GET LOST (§9.5), and **mat** from the present root.

Some languages (e.g., Lotha, Rongmei, Tangkhul, Tsangla) have developed a dental nasal suffix instead of a dental stop.

0.1. Tibeto-Burman (previously published reconstructions)

**Tibeto-Burman*	***ma-t**	lose (v.)	Weidert 1987:808
	***ma-t**	lose; disappear; exhausted; spent	Matisoff 2003a:601; Matisoff 2003a:601; Benedict 1972:425

(4) PTB *taŋ DIE / DROP DOWN / CESSATIVE

1.1.2. Deng

Darang [Taraon]	taːbrẽ **thaːng**	carcass / corpse	Matisoff 1987
Kaman [Miju]	**táŋ**-sîi	die (v.)	Weidert 1987:192

1.5. Mikir [Karbi]

Mikir [Karbi]	thì-**táng**-ló	die / be dead	Grüssner 1979:83

2.3.3. Central Kiranti

Dumi	**thaːŋ** 'si nɨ	descend, go / come down	Driem 1993
	thaːŋ nɨ	drop, allow fall (v.)	Driem 1993
	thaːŋ nɨ	with saːyɨ "life force", become ill, die / be near death.	Driem 1993

6.1.2.2. Central Loloish

Jinuo (Baka)	ʃղ^{35} **to**^{44} a^{44}	dead	Dai Qingxia 1989i:1547

(5) PTB *s-pwap DIE / DEAD / CORPSE

This promising root could use some further confirmation.

2.3.4. Western Kiranti

Thulung	**pup**- (TE)	die (v.)	Allen 1975

3.3. rGyalrongic

Ergong (Northern)	rdak^{53} **sp^{h}op**^{13}	carcass / dead animal	Sun Hongkai 1991c:1.15
	sp^{h}op^{13}	corpse / dead body	Sun Hongkai 1991c:1.14

3.3.1. rGyalrong

rGyalrong (Maerkang Caodeng (B))	tə33 **ʃpɔ^{ᴘ}44**	corpse	Nagano & Prins 2013:0176
Caodeng	tə-**ʃpop**	corpse	Sun 1997a
rGyalrong (Maerkang Japhug Shaerzong (B))	tɯ **ɕpɤβ**	corpse	Nagano & Prins 2013:0176

(6) PKir *het DIE

2.3. Kiranti

**BSDTK*	***het**-	die (v.)	Michailovsky 1991:45

2.3.4. Western Kiranti

Bahing	**hett**-	die (?) (v.)	Michailovsky 1991:45
Thulung	**heat**-	die, to die down (v.)	Michailovsky 1991:45

(7) PTB *tsu DEAD, SPIRIT OF

This root is solidly established for PTB on the basis of the Jingpho and Burmese reflexes, with good confirmation from the Limbu form. It also is well attested in Qiangic, although the vocalism of some of these forms remains to be explained. The cognacy of the rGyalrongic forms is possible but not certain.

1.7.3.1. JINGPHO			
Jingpho	**tsù**	spirit	Matisoff 1974:36
	ʔə **tsù**	disembodied spirit	Matisoff 1974:36
2.3.1. EASTERN KIRANTI

8. Bai

Bai (Jianchuan)	ɕi^{33} ŋɯ̃^{21} ɕi^{33} **mæ**^{33}	carcass / dead animal	Zhao Yansun 1990:1.15 [a]

[a] Although the second syllable of this Mongsen Ao form, **tə-sə-maŋ**, appears to reflect the PTB ***s-** prefix, in reality the form is a compound of the roots **sə** 'die' and **maŋ** 'body', with the nominal prefix **tə-**.

[b] Pumi **m̥** reflects the ***s-** prefix.

[c] The medial -**ɻ**- (usually < ***-r-**) is unexplained.

[a] Jianchuan **ɕi**^{33} **ŋɯ̃**^{21} **ɕi**^{33} **mæ**^{33} lit. "dead ox, dead horse". Probably refers to all draft animals (e.g. water buffalo).

(2) PTB *s-raw WITHERED / RESIDUE / CORPSE

0.1. Tibeto-Burman (previously published reconstructions)

**Tibeto-Burman*	***raw**	dry; dead; old; carcass; withered; residue; corpse	Matisoff 2003a:610; Benedict 1972:268

	(**u**) phe^{35}	spleen	Nienu 1990b:9.8
	u hu	tooth	Marrison 1967
	u mo	body	Marrison 1967
3.1. TANGUT			
Tangut [Xixia]	**ʔụ**	corpse; dead body; carcass; dead animal	DAI Qingxia 1989e:1.14; DAI Qingxia 1989e:1.15

[a] It is possible that this Angami form is a borrowing from IA ***p(l/r)i:han** SPLEEN (§1.7.4); however, the **ú-** prefix is evidently of TB origin, occurring in many body-part words.
[b] Angami ^{5}**u** is a general body-part prefix.
[c] The vowel of Angami ^{2}**mie** seems an unlikely reflex of ***-o** (< NEIA ***mo** VAGINA (§1.9.5)); yet the alternative of assigning this form to PTB ***ma:k** SON-IN-LAW / GENITALS / PENIS / MALE / VAGINA (§1.9.7) seems no better, since the regular Angami reflex of ***-ak** seems to be **-o** (e.g. WEAVE ***dak** > Ang. **do**; ANT ***-rwak** > Ang. **cho**).

(4) PTB *rwa $\begin{matrix}\text{ŋ}\\\text{k}\end{matrix}$ BODY / CORPSE

A number of languages in Eastern Nepal have developed final labials in this root, also showing alternation between final stop and nasal: ***rwam** ≍ ***rwap**. We regard these forms as secondary, due most likely to assimilation of the final to the labial glide.

It is possible that Karbi **rèng-** 'die / be dead' and Dumi **rəŋ** gəliːm 'soul / the disincarnate spirit of a dead person' are also somehow related, perhaps reflecting an allofam like ***ryaŋ**.

Also to be compared to this root is PTB ***s-lwaŋ** BODY / CORPSE / DISCARDED OBJECT (§1.1.6.1) with lateral initial.

1.1.1. TANI: ***rom** GHOST (ANCESTRAL)			
**Tani*	***rom**	ghost (ancestral)	Sun 1993a:173
1.1.1.1. WESTERN TANI			
Bengni	a-**ram**	ghost (ancestral); spirit (of the dead)	Sun 1993a; Sun 1993b

Tangkhul	mī **roŋ**	carcass / corpse	Matisoff 1987
	sā **roŋ**	carcass / corpse	Matisoff 1987
1.5. MIKIR [KARBI]			
Mikir [Karbi]	ar **rak**	carcass / corpse	Matisoff 1987
	ar **wák**	carcass / dead animal	Grüssner 1979:12 [a]
	rèng-	die / be dead	Grüssner 1979:99
1.7.1. Bodo-Garo			[b]
1.7.1.1. BODO			
Bodo	mə **dəm**	body; health	Bhat 1968; Matisoff 1987
2.3. KIRANTI			
**Kiranti*	***ram**	body	Michailovsky 1991:17
2.3.1. EASTERN KIRANTI			
Limbu	**jam**	body	Michailovsky 1991:17
	P-**jam**	body	Michailovsky 1989b
2.3.2. SOUTHERN KIRANTI			
Bantawa	**yam**	body	Rai 1985
	yam sa	body-flesh / body-meat	Rai 1985
Chamling	**ram**	body	Michailovsky 1991:17; Winter 1985:30 [c]
Kulung	**gam**	body	Michailovsky 1991:17
2.3.3. CENTRAL KIRANTI			
Dumi	**ram**	body; fleshly body, limbs	Michailovsky 1991:17; Driem 1993
	ri **ram**	body	Driem 1993
	rəŋ gəliːm	<soul> the disincarnate spirit of a man / woman who has died an	Driem 1993
Khaling	**rwaam**	body	Michailovsky 1991:17
	rwām	body	Matisoff 1987
2.3.4. WESTERN KIRANTI			
Sunwar	**raːM**	body	Michailovsky 1991:17
	rą̄ː	body	Matisoff 1987
Thulung	**reom**	body (human; animal); body	Michailovsky 1991:17; Allen 1975
	reop	body (human; animal); body	Michailovsky 1991:17; Allen 1975
3.3.1. RGYALRONG			
rGyalrong	kə rn̥ɛ **wam**	carcass / dead animal	DAI Qingxia 1989d:1.15
	ta **wam**	corpse / dead body	DAI Qingxia 1989d:1.14

[a] **ar-** is a common Karbi prefix; maybe this is a haplologized form < ***ar-rwak**.
[b] Bodo shows frequent variation between intervocalic **-d-** and **-r-**, as witness the alternate name Boro for the language.
[c] Chamling **bu-lim** 'body' represents different etyma.

(5) PTB *s-lwaŋ BODY / CORPSE / DISCARDED OBJECT

At first glance, WB seems to contradict this reconstruction, since the regular reflex of PTB ***-waŋ** is **-waŋ**. However, there are possible WB allofams **lwaŋ'** and **hlwaŋ'**, which are in its favor. These latter two WB forms are a simplex / causative pair, so we reconstruct the ***s-** prefix to accommodate the causative allofam.

For a similar semantic connection between CORPSE and WITHERED OBJECT, see PTB ***s-raw** WITHERED / RESIDUE / CORPSE (§1.1.6.1).

1.5. MIKIR [KARBI]			
Mikir [Karbi]	**lang**	body	Matisoff 1987
1.7.3.2. ASAKIAN			
Kadu (Kantu)	**lɑŋ**^{4}	body	Luce 1985:K.49

6.1.1. BURMISH			
Bola	saʔ^{55} **t^{h}ɔ^{35}**	die (breath one's last)	DAI Qingxia 1989g:1781

(7) PTB *s-pur CORPSE

This root has so far mostly been found in Himalayan languages, and further confirmation from other branches of the family would be welcome.

2.1.2.1. TIBETAN			
Tibetan (Written)	**pur**	carcass / corpse	Matisoff 1987
	sku-**spur**	carcass / corpse	Matisoff 1987
	spur	carcass / corpse	Matisoff 1987
2.1.3. LEPCHA			
Lepcha	**pur**	carcass / corpse	Matisoff 1987
3.2. QIANGIC			
Muya	**pø^{24}**	corpse (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0162.15
Muya [Minyak]	**pø^{35}**	corpse / dead body	SUN Hongkai 1991h:1.14

(8) PTB *dzal CORPSE

This etymon needs further confirmation.

1.1.2. DENG			
Kaman [Miju]	**dzɑl^{35}**	corpse (shi)	SUN Hongkai *et al.* 1980
	dzɑl^{35}	corpse (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0162.23
2.3.1. EASTERN KIRANTI			
Limbu	**tse:**	corpse , bier (?.)	Michailovsky 1989b
9.0.1. OLD CHINESE			
Chinese (Old/Mid)	**dz'iɑ**/dz'iᵉ-	bone with meat on	Karlgren 1957:5o
	dz'i̯ə̆r/dz'iᵉ-	carcass, bones of an animal	Karlgren 1957:358r
	dz'i̯ə̆r/dz'iᵉ~dz'iᵉ-	bones with meat on	Karlgren 1957:358q
9.0.3. MODERN CHINESE			
Chinese (Mandarin)	**tsï**	carcass, bones of an animal; bone with meat on	Karlgren 1957:358r; Karlgren 1957:5o
	ts'ï	bones with meat on	Karlgren 1957:358q

Chinese comparandum

髊 OC ***dz'iɑ***, *GSR* #5o; Mand. **cī**.
豉 OC ***dz'i̯ə̆r***, *GSR* #358r; Mand. **zì**.
骴 OC ***dz'i̯ə̆r***, *GSR* #358q; Mand. **cī**.

(9) PTB *moy CORPSE

1.7.3.1. JINGPHO			
Jingpho	**mói**	corpse	Matisoff 1974:277
	mói mang	carcass / corpse	Matisoff 1987
6.1.1. BURMISH			
Burmese (Written)	**mwe**	relics of the body of a Buddh; relics of Buddha	Matisoff 1974:277; Benedict 1976a
	ʔə **mwe**	inheritance	Matisoff 1974:277

(10) PTB *ŋun CORPSE

This etymon is evidently valid, but more confirmation would be welcome.

1.3.4. TANGKHULIC: ***ŋun*** CORPSE				
**Tangkhulic*	***ŋun**	corpse	Mortensen 2012:472	
Huishu	ʔa-**ŋun**	corpse	Mortensen 2012	
Kachai	ʔa-**ŋun**	corpse / dead body	Mortensen 2012:BodyParts.017	
Tangkhul	ā **ŋun**	carcass / corpse	Matisoff 1987	
Ukhrul	ʔa-**ŋun**	corpse	Mortensen 2012	
3.1. TANGUT				
Tangut [Xixia]	**ngi̯u̯^{2}**	body	Sofronov c1978	
8. BAI				
Bai (Jianchuan)	ɕi^{33} **ŋɯ̃^{21}** ɕi^{33} mæ^{33}	carcass / dead animal	ZHAO Yansun 1990:1.15	[a]

[a] Jianchuan **ɕi^{33} ŋɯ̃^{21} ɕi^{33} mæ^{33}** lit. "dead ox, dead horse". Probably refers to all draft animals (e.g. water buffalo).

1.2.1 Head/Headed

[a] Literally "breast-head".

[b] The syllabic nasals in the Nesu and Noesu compounds are possibly developments from a previous **w-** or zero initial. A similar, though opposite development can be seen in the correspondence of Cantonese initial **ŋ-** and Mandarin **w-** (e.g. Cantonese 'five' and 1st.pro vs. Mandarin 'five' and 1st.pro).

[a] Lit. "head-skin".

[a] These disyllabic Jinuo forms are perhaps dimidiations (Boodberg's coinage) of the original sesquisyllable ***k-liŋ**.
[b] Literally "penis-head".
[c] The last syllable (**nêʔ**) probably means 'wet' (cf. modern computer slang 'wet-ware').
[d] Literally "breast-head".
[e] Ls. **ts^{h}e^{44}** cannot be from ***tsam**, since ***-am** > Ls. **-o**.

[a] Cf. Bai **tɯ^{21} mɑ^{35} pi^{35}**.
[b] Literally "breast-head".
[c] The many binomes PTB ***d-bu-s** HEAD / CENTER / SENIOR MALE RELATIVE / UNCLE (§1.2.1) + PTB ***du** HEAD (§1.2.1) demonstrate the distinctiveness of the two etyma.

9.0.1. OLD CHINESE

Chinese (Old/Mid)	**d'u/d'ə̱u**	head	CHOU Fa-kao 1972:118e [a]
Chinese (Old)	**dug**	head	Coblin 1986:92

9.0.2. MIDDLE CHINESE

Chinese (Middle)	**dəu**	head	Coblin 1986:92

[a] *STC* assigns the Chinese dental-initialled form to this etymon, assuming prefix-preemption (***d-bu** > ***d-wu** > ***du**), but another possible prototype is PTB ***du** HEAD (§1.2.1), here.

Chinese comparandum

頭 OC ***d'u**, *GSR* #118e 'head'; B & S 2011: ***m-tˁo**; Mand. **tóu**.

(1a) PTB *du HEAD

This root seems quite distinct from PTB ***tuk** ≷ ***twak** HEAD / SKULL / NECK (§1.4.2). It occurs frequently as the second element in Loloish compounds. Note that the Jingpho form previously transcribed as **du** is inaccurate: the correct form is **dù?**, so that it is correctly assigned to PTB ***tuk** ≷ ***twak** HEAD / SKULL / NECK (§1.4.2).

1.3.2. ANGAMI-POCHURI GROUP

Angami (Kohima)	(u) **tsü**[31] kha[33]	forehead / brow	Nienu 1990a:3.2
Chokri	(u) **tu**[31] kha[33]	forehead / brow	Nienu 1990b:3.2

1.7.3.2. ASAKIAN

Lui	ku-**tu**	head	Matisoff 1987

2.3.1. EASTERN KIRANTI

Yakha	li: go: u **tu** kəruk	glans penis	Kohn 1990:10.3.2
	tu khruk	head	Weidert 1987:903
	tu khəruk	head	Kohn 1990:2.1
	ʈu khruk	head	Weidert 1987:903

6.1.2. LOLOISH

**Loloish*	***ʔ-du**[2]	head	Bradley 1979b:88B
Lolopho	dæ[33] ʮ[55] **duɯ**[33]	glans penis	DAI Qingxia 1989n:10.3.2
	pɒ[31] pɒ[31] ʮ[55] **duɯ**[33]	nipple	DAI Qingxia 1989n:5.4.1

6.2. Naxi

Naxi (Eastern)	ɣo^{33}**k^{h}uɑ^{31}**	head	He Jiren & Jiang Zhuyi, eds. 1985

[a] Literally "penis-head".
[b] Literally "breast-head".

(5) PTB *k-lu HEAD

Many languages (e.g. in the Chin group) reflect the simple form ***lu***. Other languages (e.g. Chang, Lotha, Naxi) show disyllabic forms, which are plausibly analyzed as sequences of PTB ***m/s-gaw*** HEAD (§1.2.1) and PTB ***k-lu*** HEAD (§1.2.1). In still other languages (e.g. Camling, Dumi, Milang), these two syllables have been compressed into one. For our present purposes, we are treating the latter two cases as reflecting the monosyllabized root, whether or not they are presently disyllabic.

The forms assigned to this root are distinct from Qiangic and Burmish compounds for HEAD where the last element descends from PTB ***s-lum*** ROUND (§9.7.2).

This etymon is perhaps related to PTB ***lu-s*** BODY (§1.1.1) and/or to WB **lu** 'person' .

1.1.1.2. Eastern Tani

Milang	tuk-**kyu**	skull	Tayeng 1976

1.1.2. Deng

Darang [Taraon]	**kru**-krā:	earhole	Matisoff 1987
	kru-na:	ear	NEFA (India) 1963; Matisoff 1987 [a]

(8) PTB * p/b wa(ŋ) HEAD

This root is not reconstructed in J. Sun (1993), where it seems to be treated as a suffix following PTani ***dum*** HEAD / HAIR (§1.2.3). The final **-r** in the Bokar forms is probably a secondary effect of the back unrounded vowel. Darang has a final **-m**, perhaps an effect of the preceding rounded vowel.

Jingpho provides evidence for both the open- and nasal-final allofams: Hanson (p.42) gives both **u-baw** and **u-bawng** 'a head', the latter marked 'Hkauri dialect' or 'in religious poetry' (p.71). Dai et al. 1983 (p.851) glosses **u³¹ po³³** as 'chicken head' (**ù-** is a prefix in many words referring to birds).

The second syllables of the Milang, Tagin, Idu, and Galo forms for 'horn' resemble this root, but we are keeping them separate for now (see PTB ***m/g-(r)wa-ŋ/k/t*** HORN / ANGLE / CORNER (§1.2.2)).

(9) PTB *l-t(y)ak UPPER SURFACE / TOP / ABOVE / CLIMB / LIFT / ASCEND / PALATE

This root looks as if it is related to PTB ***s-tak*** HEAD (§1.2.1).

Several forms point to a variant with back vowel, perhaps ***twak ≍ *twaŋ***, e.g. WT **thog-ma** 'upper end, uppermost place', Limbu **thuŋ-daŋ**, **thuŋ-tho**.

STC (p. 52) entertains the possibility that the general Kiranti root ***taŋ*** HORN is related to this etymon, although it seems better to assign it to PTB ***m-twaŋ*** FOREHEAD / HEAD / HAIR (OF HEAD) / HORN (§1.2.5.1).

This root has developed the metaphorical extension of meaning from CARRY UPWARD into BEAR / ENDURE / CARRY A MENTAL BURDEN, in a manner quite similar to English **bear** (v.).

In Lahu, this root has been grammaticalized into an accusative particle, used mostly with animate objects. See DL:676-677 and Matisoff 1973/1982:3.641 (*The Grammar of Lahu*).

A number of Chinese comparanda have been proposed, for what is evidently a rather complicated word family.

For an allofamically related root in this semantic area, see PTB ***s-tyaŋ*** UPPER PART / RISE / RAISE / TOP / SUMMIT (§9.2.1).

Naxi (Yongning)	**do**^{33}	ascend	SUN Hongkai et al. 1991:743.29
Naxi (Lijiang)	**ndo**^{33};tʂhuɑ^{55}	ascend	SUN Hongkai et al. 1991:743.28

9.0.1. OLD CHINESE

Chinese (Old/Mid)	**d̂ị̂ə̂ng**	lift; to present; support, assist	Karlgren 1957:896c
	tị̂ək	mount / advance / promote	CHOU Fa-kao 1972:916a-c

[a]Lahu has developed two allofams of this root: the verb **tâʔ** from PLB ***ʔtak**^{H}, meaning both ASCEND and HOIST / CARRY ON SHOULDERS, and the spatial noun **thàʔ** UPPER SURFACE from PLB ***C-tak**^{L}, the latter ultimately grammaticalizing to **thàʔ** ACCUSATIVE PARTICLE. See *LTSR* #42, Matisoff 1973/1982: p. 158, DL:676.

Chinese comparandum

陟 OC ***tị̂ěk**, *GSR* #916a-c 'ascend, promote'; Schuessler 2007:619 ***trək**; B & S 2011: ***trək**; Mand. **zhì**.
拓 **tuò**

(9a) PTB *s-tak HEAD

This rather sparsely attested root looks as if it is related to PTB ***l-t(y)ak** UPPER SURFACE / TOP / ABOVE / CLIMB / LIFT / ASCEND / PALATE (§1.2.1) [q.v.].

The Lepcha form with medial **-y-** is evidence for the ***s-** prefix (see Benedict 1941).

2.1.3. LEPCHA

Lepcha	a-**tyak**	glans penis	Matisoff 1987 [a]
	a-**t'yak**	head	Matisoff 1987
	a-**t'yak** kiṅ	forehead	Matisoff 1987

2.1.4. TAMANGISH

Thakali	**Ta** 'yuhyo 'la-la	nod (with head) (v.)	Hale 1973:02b1.64
Thakali (Tukche)	**Ta**	head	Matisoff 1987
	ʈɔ	head	Hari 1971:1.38
	ʈɔ 'juhjo 'lɔ-lɔ	nod (head)	Hari 1971:2.B.1.64
	^{H}**ʈə**	head	Mazaudon 1994:64

7. KARENIC

Palaychi	hóq **táq**	head	Matisoff 1987; Jones 1961:207

[a]The Lepcha **-y-** is from prefixal ***s-**.

(10) PTB *m-k $\overset{u}{i}$ m PILLOW / BLOCK / BENCH / BEDSTEAD

This is one of several roots showing alternation between initial velar and glottal stop (= Ø) initial: PTB ***(k/ʔ)uk** BEND / CROOKED / RETURN / BACK / YEAR (§9.1), PTB ***ʔap ≍ *gaːp** SHOOT (§6.2.2), PTB ***k-ra(p/m)** NEEDLE (§5.11.6), etc. (cf. *HPTB*:57). In this case, the crucial language for establishing the alternation is Written Burmese (**khuṁ** 'block', **ûṁ** 'pillow').

The reflexes of this root also illustrate the widespread variational pattern between medial **-i-** and medial **-u-**.

Lahu (Banlan)	u: **g'a**ˇ	fontanelle	Bradley 1979a:103

[a] Also means 'skull'.
[b] The etymon appears here in "prefixized" form.

(4) PTB *m-tswak FONTANELLE

This etymon has so far only been found in Bodic. The Western Himalayish forms are probably borrowings from Tibetan.

2.1.1. WESTERN HIMALAYISH			
Bunan	**tshog** ma	fontanel (soft spots in baby s	Sharma 1991a:2.3
Pattani [Manchati]	**tshòŋ** mo	fontanel (soft spots in baby s	Sharma 1991b:2.3
2.1.2.1. TIBETAN			
Spiti	**tsho** ma	fontanel (soft spots in baby s	Bodh 1991:2.3
Tibetan (Written)	**mt'sog**-ma	fontanel	Matisoff 1987 [a]

[a] Cf. WT **gtsug** 'crown of head'.

1.2.2 Horn(ed)/Antler

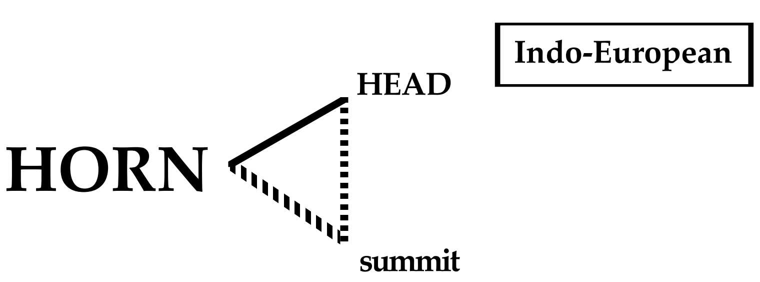

Figure 37: 1.2.2 *Horn(ed)/Antler*

(1a) PTB * {m / g} -(r)wa- {ŋ / k / t} HORN / ANGLE / CORNER

STC #85 originally reconstructed this root as ***ruŋ**, but this was later changed to ***rwaŋ** (*STC* p.32, n.101), treated as an allofam of ***rwa** (see *STC* p.75, n.231).

Initial **-r-** in this root was preemptible after either **n-** (e.g. PK ***noŋ**, Dolakha Newar **ŋwɔ̃**) or **-g-** (e.g. Chinese *jiǎo* 角).

Forms like Limbu **ùl taŋ**, Yakha **ùl taŋ** 'horn' are probably not from this root, but could rather be from PTB ***m-twaŋ** FOREHEAD / HEAD / HAIR (OF HEAD) / HORN (§1.2.5.1).

The second syllables of the Milang, Tagin, Idu, and Galo forms resemble PTB ***(p/b)wa(ŋ)** HEAD (§1.2.1), but we are keeping them separate for now.

[a] [Source Note] Bwe has an rregular [sic] tone. Modern Bwe should have tone 33(A3) instead of Tone 11 (D3).

(2) PTB *d-krəw HORN

There are two phonosemantically similar roots PTB ***m/g-(r)wa-ŋ/k/t** HORN / ANGLE / CORNER (§1.2.2) and PTB ***r-ki** HORN (§1.2.2).

For now, all Qiangic forms for HORN are assigned to these latter roots, rather than to the present root; all Himalayish forms are assigned to 814, while all Lolo-Burmese forms are deemed to descend from the present root.

0.1. Tibeto-Burman (previously published reconstructions)

**Tibeto-Burman*	***kruw**	horn (animal); horn	Michailovsky 1991:94; LaPolla 1987:167; Benedict 1972:37

	ʔə-**kìi**	horn (of animal); antler (of deer)	Mortensen & Keogh 2011:BodyParts.035; Mortensen & Keogh 2011:BodyParts.036

1.3. "NAGA" AREAL GROUP

Maring	**chi**	horn (n.)	Marrison 1967
	ci	horn	Brown 1837

1.3.2. ANGAMI-POCHURI GROUP

Khezha	’è **cí**	horn (of animal)	Yabu 1994:2.10
Mao	o **kei**	horn	Marrison 1967
Sema [Sumi]	a **ki** bo	horn; horn (of animal); antler (of deer)	Marrison 1967; Achumi 1998a:2.10; Achumi 1998a:2.11

1.3.3. ZEME GROUP

Maram	**chi**	horn	Marrison 1967
Puiron	ta **ki**	horn	Marrison 1967
Rongmei / Nruanghmei	ta-**ki**	horn	Brown 1837

1.3.4. TANGKHULIC

**Tangkhulic*	***ci**	horn	Mortensen 2012:353
Tangkhul	āŋa **chi**	horn / antlers	Matisoff 1987
Tusom	ʔə-n-**tsɯ**	horn (of an animal)	Mortensen 2012:BodyParts.034

1.4. MEITHEI

Meithei	mə **ci**	horn (of animal)	Singh 1991:2.10
	mə **ci** (səji-gi)	antler (of deer)	Singh 1991:2.11

1.7.3.2. ASAKIAN

Lui	ma **chī**	horn / antlers	Matisoff 1987

3.2. QIANGIC

Qiang (Mawo)	zdu **ɹəqə̨**	antler (of deer)	SUN Hongkai 1991g:2.11
Qiang (Taoping)	**zɑ̰[33] qə[55]**	horn	SUN Hongkai, ed. 1981
Qiang (Yadu)	**z̰æq**	horn	DAI Qingxia 1989q:329

3.3.1. RGYALRONG

rGyalrong	**ɾ̥ə** pək	antler (of deer)	DAI Qingxia 1989d:2.11	[a]

[a] Apparently all that is left of PTB ***r-ki** HORN (§1.2.2) in this form is the rhotic prefix!

(4) PTk *ci HORN

1.3.4. TANGKHULIC

Champhung	ra-**tsɯ**	horn	Brown 1837
Huishu	ʔa-nə-**tsik**	horn; antler	Mortensen 2012:BodyParts.031
Kachai	ʔa-ŋə-**tsɐ**	horn (of animal), antler (of deer)	Mortensen 2012:BodyParts.030
Tangkhul	anga **chi**	horn	Marrison 1967
	ci	horn	Bhat 1969:91
Tankghul (Central)	m-**ci**	horn	Brown 1837
Tangkhul (Northern)	a-kat-**sɯ**	horn	Brown 1837
Tangkhul (Standard)	ŋa-**ci**	horn	Brown 1837
Ukhrul	a-ŋə-**ci**	horn	Mortensen 2012
	kə-**ci**-kar	very long and growing sideways (horn) (be v.)	Mortensen 2012
	ʔa-ŋə-**ci**	horn	Mortensen 2012

(5) PTB *bak ANTLER

This interesting root shows lenition in Yakha. It occurs as final element in compounds with PTB ***r-ki** HORN (§1.2.2).

1.2.4. "OLD KUKI"

Kom Rem	rəki **bak**	antler (of deer)	Toba & Kom 1991:2.11

2.3.1. EASTERN KIRANTI

Yakha	taŋ ga: **wəhak**	antler (of deer)	Kohn 1990:2.11

3.3.1. RGYALRONG

rGyalrong	**ɾ̥ə pək**	antler (of deer)	DAI Qingxia 1989d:2.11	[a]

[a] Apparently all that is left of PTB ***r-ki** HORN (§1.2.2) in this form is the rhotic prefix!

1.2.2.1 Comb/Crest

(1) PTB *tsywak COCKSCOMB

1.4. MEITHEI

Meithei	mə **tok**	comb (of rooster)	Singh 1991:2.9

2.1.2.1. TIBETAN

Tibetan (Batang)	the[55] **tɕo[53]**	comb (of rooster)	DAI Qingxia 1989a:2.9
Tibetan (Sherpa:Helambu)	tar **chow**	comb (of rooster)	Bishop 1989:2.9

3.2. QIANGIC

Muya [Minyak]	**tʰɯ[55]dʑo[33]**	comb (of rooster)	SUN Hongkai 1991h:2.9
Qiang (Mawo)	qi **dʑu**	comb (of rooster)	SUN Hongkai 1991g:2.9

3.3. RGYALRONGIC

Ergong (Northern)	**tʰər[53] ɕok[33]**	comb (of rooster)	SUN Hongkai 1991c:2.9

6.1.1. BURMISH

Langsu (Luxi)	**tʃoʔ[31]**pjɛn[35]	cockscomb (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0297.31
Leqi (Luxi)	**kjɔɾ[31]**pjɛn[33]	cockscomb (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0297.33
Atsi [Zaiwa]	**tʃoʔ[21]** pan[21]	cockscomb	XU Xijian & XU Guizhen, eds. 1984
	voʔ[21]**tʃo[21]**pan[21]	cockscomb (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0297.30

6.1.2.1. NORTHERN LOLOISH

Gazhuo	ɣ[53]**tso[35]**to[31]	cockscomb (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0297.47

(2) PTB *l-mawk COCKSCOMB / CREST

The ***l-** prefix is set up on the basis of the isolated rGyalrongic form **lmu**. Further cognates are undoubtedly to be found, both in Qiangic and Karenic.

3.3. RGYALRONGIC

Ergong (Daofu)	**lmu**	comb (of rooster)	DAI Qingxia 1989b:2.9

6.1.1. BURMISH

Burmese (Rangoon)	tɕɛʔ[4]**mɑuʔ[4]**	cockscomb (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0297.27
Burmese (Written)	krɑk[4]**mɔk[4]**	cockscomb (n.)	HUANG Bufan & DAI Qingxia, eds. 1992:0297.26
	mok-	crest, comb	Benedict 1976a; LaPolla 1987:78
	ə-mok	crest, comb	Benedict 1976a; LaPolla 1987:78

7. KARENIC

Pa-O	chjà tə **mɔ́k**	comb of chicken	Solnit 1989

(3) PTB *m-tsywaŋ COCKSCOMB

1.2. KUKI-CHIN: ***tshuaŋ** CREST / COMB (n.)

**Chin*	***tshuaŋ**	CREST / COMB (n.)	VanBik 2009:585

1.2.1.1. NORTHERN CHIN

Paite	**suang**	crest	VanBik 2009:585
Sizang	āk **suang**	cock’s comb	VanBik 2009:585
Thado	**súoŋ**	crest	VanBik 2009:585

1.2.2.2 Comb (Hair)

(1) PTB *ʔ-g^{w}əy-s COMB (FOR HAIR)

This phonologically unstable root is reconstructed with a labiovelar initial. The reflexes are divided between forms with labial and velar initials, sometimes even within a single subgroup, like Lolo-Burmese. Some reflexes have overt labiovelar initials, like Digaro **se-*kwi*** and the Karenic root ***khwiʔ**^{D}.

The Sulung form **biek**^{33} has an unexplained final **-k**, and the Bai form **su**^{55}***phī***^{21} has an unexplained nasal element.

0.1. Tibeto-Burman (previously published reconstructions)

1.2.3 Hair of Head

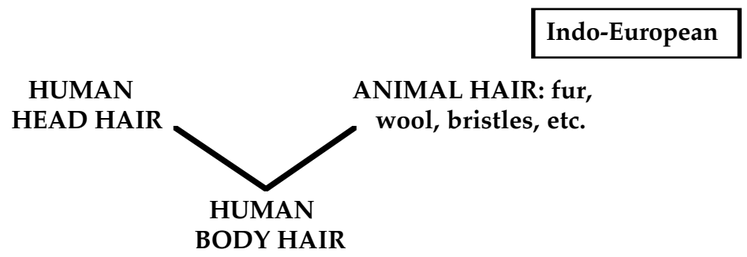

Figure 38: 1.2.3 *Hair of Head*

Figure 39: 1.2.3 *Hair of Head*

(1) PTB *n-dzi-k HAIR (HEAD)

***n-dzi**. This etymon may be related to two verbs, PLB ***?tsik** 'be stuck onto' (Lh. **cí** 'be stuck in place; **pâ-cî?-mu** 'beard'), and PLB ***?dzik** 'be joined; join to' (Lh. **cí**) [*LTSR* #45]. Cf. PTB ***tsik** JOINT (§1.5.8). Lahu informants vouch for the semantic connection, feeling that hairs are "stuck onto" the head or face. This perhaps should be taken with a grain of salt, however.

[a] The inclusion of the Ao ‘banana leaf / aspidistra leaf’ forms is somewhat doubtful, as the large leaves of the banana and Aspidistra plants are not very similar to body hair (though perhaps they resemble giant green feathers). [dwbruhn, 2014 Feb 3]

[b] [Source Note] mouth-hair

(3) PTB *s-n(y)ak BRAID

This root is well established, even though it has so far only been found in rGyalrongic and Burmish.

Several forms show a development from ***-k*** to ***-t*** in reflexes with front vowels (Caodeng **tə́-sɲet**, Longchuan Achang **net^{35}**). These front vowels, in turn, probably arose through the influence of a medial ***-y-***.

1.2.3.4 Bald

A great number of verbs are usable with HEAD to convey the meaning of BALD, e.g. WB **khôŋ proŋ** ‘head + clean/clear’ ; WB **thip proŋ** ‘top + clean/clear’ ; **khôŋ tûm** ‘head + dull/blunt’ ; **khôŋ tûm-tui** ‘head + blunt-short’ ; **û phrâñ** ‘head + slow (?).’

(1) PLB *k-liŋ BALD

6.1.1. BURMISH			
Achang (Xiandao)	**liŋ**^{35}	bald	DAI Qingxia 1989f:1392
	u^{31} **liŋ**^{35} kɔk^{35}	bald person	DAI Qingxia 1989f:246
6.1.2.2. CENTRAL LOLOISH			
Jinuo (Baya/Banai)	a^{44} **kli**^{55}	bald	DAI Qingxia 1989h:1436.1
Jinuo (Baka)	a^{44} **k^{h}ø**^{55}	bald	DAI Qingxia 1989i:1436
	a^{44} k^{h}ø^{55} **lø**^{55}	bald	DAI Qingxia 1989i:1436.1 [a]
Sani [Nyi]	o^{55} **læ**^{33}	bald person	MA Xueliang 1989:370.1

rGyalrong	tə **pjo**	brain	DAI Qingxia 1989d:2.5

[a] The zero-initial in **ek**- is unexplained (perhaps < ***yik?***).

1.2.5 Face

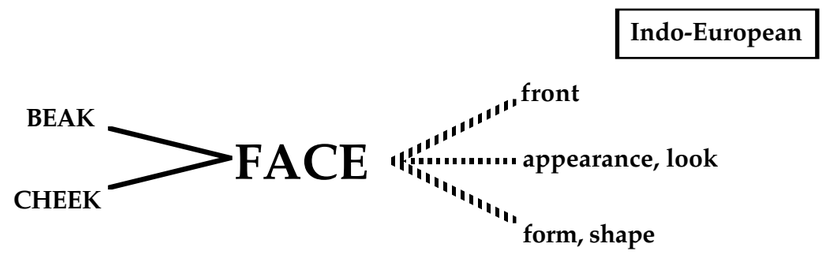

Figure 49: 1.2.5 *Face*

FACE —— **EYE**

Figure 50: 1.2.5 *Face*

(1) PTB *s-ma-y FACE / CHEEK / FRONT / AHEAD / FIRST

GSTC #109.

Several putative reflexes have back vowels (Chepang **mo.hor**, Yi [Xide] **a**[55]**-mo**[21], Lisu **mu**[5]**prgh**[1]**du**[3]). Two West Himalayish languages have forms with final dental stop and mid vowel (Bunan and Pattani **mod**), which makes it tempting to reconstruct a separate root ***mwa-t***, although this is premature.

This root seems to have developed the meaning TOOTH in Karenic.

Also possibly related is PKC ***muy*** FIGURE / LOOK (§8.1).

6.1.2.2. CENTRAL LOLOISH

Sani [Nyi]	ŋ^{55} **zɑ**^{44}	mouth	MA Xueliang 1989:322.5

[a] WT **ż̀al** is an honorific form for **kha** 'mouth'.

(3a) PTB *r-ŋwa-l FACE / FRONT

The final liquid is attested directly in Kaman, Karbi, Tsangla, and Tshona, and indirectly in Manang, Thakali, Bantawa, and Chinese (all of which have a final nasal). The final **-i** in Bantawa **ŋai wa** and Chamling **ngai** is also perhaps a reflex of this final liquid. The ***r-** prefix is attested in rGyalrongic.

The Written Tibetan rhyme **-o** is a regular reflex of PTB ***-wa** (cf. PTB ***s/p-wa** TOOTH (§1.3.4) > WT **so**).

There is no apparent relation to PTai ***hnaa-C** 'face'.

The final nasals in the Tamang and Magar forms are either to be attributed to the final **-l** or to assimilation from the nasal initial.

There is a Chinese comparandum (顏) reconstructed in *GSR* 199c with final **-n**. Again, it is possible to assign this to PTB ***ŋar** TOPKNOT / FOREPART / FRONT SIDE (§1.2.5) rather than to the present allofam.

[a] This root very frequently occurs in compounds, either with PTB ***s-myak** EYE (§1.2.6) or PTB ***s-na** ≍ ***s-na:r** NOSE (§1.2.8). See e.g. Lipho **pha**[21]**mę̱**[33] (with PTB ***s-myak** EYE (§1.2.6)) vs. Nusu (Central) **p[h]ɹɑ˞**[55] **n̥ɑ**[35] (with PTB ***s-na** ≍ ***s-na:r** NOSE (§1.2.8)). To complicate matters further, the EYE morpheme may occur in either order with PTB ***pluŋ** FACE (§1.2.5). See e.g. Lahu **mɛ̂ʔ-phû** vs. Lisu **hpi**[5]**-myá**[3].

[b] Lalo **me**[21] is distinct from the morpheme for 'eye', **ʔmi̱**[33].

[c] Southern Nusu **n̥ɔ**[31] is distinct both from 'eye' **miq̱**[31] and 'nose' **n̥i**[55]. However, comparison with other forms leads us provisionally to assign it to PTB ***s-na** ≍ ***s-na:r** NOSE (§1.2.8).

[d] These two Nanhua forms, **phe**[21]**mę̱**[33] and **t[h]a̱**[21]**mę̱**[33], are perhaps evidence of dialect mixture. The PLB cluster ***pl-** sometimes loses the lateral element, but sometimes develops into a retroflex stop (as in Mojiang and Dafang). It is possible that the Nanhua form with retroflex initial is borrowed from such a dialect.

(2) PTB *s-mawŋ FOREHEAD

This root is of restricted occurrence, although the Lepcha / WB correspondence looks particularly good; Lepcha medial **-y-** is a frequent reflex of the PTB ***s-*** prefix, as shown long ago in Benedict (1941), while the WB voiceless nasal has a similar origin.

The Tujia form is also provisionally assigned to this root.

2.1.3. Lepcha

Lepcha	mik-**myoṅ**	brow	Matisoff 1987

5. Tujia

Tujia (Southern)	ŋai^{13} **mɛ̃^{33}**	forehead	Tian Desheng & He Tianzhen, et al., eds. 1986
Tujia	ŋɯe^{21} **mĩ^{21}**	forehead / brow	Chen Kang 1986d:3.2

6.1.1. Burmish

Burmese (Written)	myak-**hmoŋ**	forehead	Matisoff 1987

(3) PTB *m-twaŋ FOREHEAD / HEAD / HAIR (OF HEAD) / HORN

WT attests to both the **g-** and **m-** prefixes with this root.

Several Kiranti forms (Kulung, Chamling, Limbu) meaning HORN are assigned to the present root.

1. NE Indian Areal Group

Miji	**tok** jaŋ	forehead	Simon 1979

7. Karenic

Kayan (Pekon)	ka **dá**	forehead (N.)	Manson 2010
Pa-O	kə **tɔ̀ŋ**	forehead	Solnit 1989

[a]Phunoi prefix **bə̆-** < ***m-**.
[b]Phunoi regularly denasalizes.

(4) PTB *d-(p)ral FOREHEAD / FACE

Jingpho **-n** is the regular reflex of PTB **-l**.

Forms with dental stop initial (e.g. Jingpho, Northern Naga, Kuki-Chin) might have arisen through preemption by the **d-** prefix found in Written Tibetan. Alternatively, these dentals might just represent a simplification of the unwieldy **dpr** cluster.

8. Bai			
Bai (Bijiang)	**ŋɑ̱^{44}** tɐ^{44} pɐ̃^{ɹ21}	forehead	Xu Lin & Zhao Yansun, eds. 1984
	ŋɑ^{44}te^{44}pe^{ɹ21}	forehead	Sun Hongkai et al. 1991:233.37

[a] This is a borrowing from Marma (Arakanese) **nəphúja**.

[b] The Loloish glottal prefix is reflected directly by Lalo and Yi (Weishan), and indirectly by the very low tone in Lahu **nā**, and by the voiceless nasals in Nusu (Central) and Jinuo.

(2) PTB *bwaŋ CHEEK

This root probably stands in an allofamic relationship with PTB ***m-b(y/r)aŋ** CHEEK (§1.2.5.2). The latter etymon is reconstructed with ***-y-** ⋉ ***-r-**, so that three different glides would be represented in a single word family.

Trung [Dulong] (Dulonghe)	nɯ^{31} **bǎŋ**^{53}	cheek	SUN Hongkai, ed. 1982

(3) PTB *m-b(y/r)aŋ CHEEK

The nasal prefix shows up in certain Chin languages (Cho, Womatu), and has preempted the root initial in Northern Naga.

This root bears a striking resemblance to PTB ***bwaŋ** CHEEK (§1.2.5.2), suggesting that they belong to a word family which contains no fewer than three of the posited PTB glides: ***-y-**, ***-r-**, ***-w-**.

Lolopho	**bo**^{31} y̩^{44}	beard	DAI Qingxia 1989n:8.1.2.1

6.1.2.1. Northern Loloish

Yi (Dafang)	**bu**^{21} ts^{h}o^{55}	beard	CHEN Shilin *et al.* 1985

(5) PTB *(t)s-wa(s/r) CHEEK / BUTTOCK / CHIN

This rather unusual reconstruction is meant to capture the alternation between reflexes with fricates and those with the labial semivowel. Note especially the WT forms **k'ur-t'sós** 'cheek', **ḫpoṅ-t'sos** 'buttock', and **'os-sko** 'chin'.

This root frequently occurs as a non-initial syllable in compounds.

1.1.1.1. Western Tani

Apatani	a-jo **so?**-ko	jaw (upper)	Sun 1993b
	a-kã **so?**-ko	jaw (lower)	Sun 1993b

(21) PTB *s-bi ⪤ *s-bay CHIN / CHEEK

This root is independent from PTB ***m/s-ba** CHEEK / JAW / CHIN (§1.2.5.2), despite a certain phonological resemblance between the two. The independence of the two roots is demonstrated by their co-occurrence in compounds, e.g. Lahu **pâ-pi(-li)** 'dimple' and **pâ-pì-qu** 'chin'.

Karenic has separate reflexes of the two roots.

	pi **tùn**	chin, heel	Matisoff 1987
	pi^{33} **tun^{11}**	chin	Bradley 1977
8. BAI			
Bai (Jianchuan)	mɪ̃^{42} **tũ^{55}** kʰui^{55}	cheekbone	ZHAO Yansun 1990:3.11.1

(3) PTB * $\substack{\text{m}\\\text{s}}$ -k(w)a-y MOUTH / OPENING / SPREAD / DOOR / FACE / JAW

Of the two prefixes set up for this root, ***m-** is much better attested. The ***s-** prefix appears in Dimasa, as well as in Written Tibetan **sgo** 'door'. The current etymon comprises three roots set up separately in *STC* (468, 469, 470), which Benedict judges as "apparently all related" (p. 120).

There is a likely Chinese comparandum 戶, OC ***g'o** [*GSR* #53a-b] 'door, opening'.

Kuki-Chin (and perhaps other) languages show variation between a plain and aspirated initial.

There is some slight evidence for an allofam with medial **-y-**, ***m-k(y)a**, as witness rGyalrongic forms like **tə mɟja**, **tA mgya**, and **tə-mdʒa** 'chin'.

[a] This Lahu form seems to be a fusion of the bare root ***ka** plus a second element meaning GO (see PTB ***?ay** GO / DIRECTIONAL PARTICLE / TRANSITIVE MOTION (§6.7.11)).

[b] The first syllable of this Akha form occurs with a large number of nouns, mostly animal names. It is possible that this morpheme is only a prefix here.

[c] [Source Note] Thai: khaaŋ33.

(7) PTB *ŋam CHIN / CHEEK / JAW

This root is solidly attested in Bantawa and Zaiwa, as well as in Loloish. The initial element in the Asakian form might also be cognate, but the Batang Tibetan form is suspect, in that there does not appear to be a Written Tibetan cognate.

(1) PTB *ra MOUSTACHE / BEARD / CHIN

This root is very likely related to PTB ***ra** GOAT (§2.1.8), the obvious connection being the goatees of hircine animals. However, in view of the large semantic difference between the two roots, we are keeping them separate for the time being.

The nasalization in the second syllable of one of the Idu forms seems due to the effect of the initial nasal in the third syllable.

1.1.2. DENG			
Darang [Taraon]	the **ra** mum	moustache	Matisoff 1987

(1a) PTB *s-mik EYE

A number of languages (e.g., Kuki-Chin, Meithei, Nocte, Andro) have developed a final dental stop in this root, undoubtedly due to the preceding high vowel.

Tsangla has acquired the homorganic final nasal in this root.

This etymon frequently occurs as first element in compounds meaning ANKLE ("eye-foot").

Dhimal	**mi**	eye	LaPolla 1987:88; Benedict 1972:402
	mi muĩ	eyelash / brow	King 1994

2.2. Newar

Newar	**mi**-khā	eyeball	Malla 2007
	mikh ā-gwa(l)	eyeball	Matisoff 1987

[a] This form shows an interesting semantic association between WING and EYELID, possibly because both of these body parts can flutter.

[a] The literal meaning of this compound is "frog-eye."

Newar (Dolakhali)	**mi** kha	eye	Genetti 1990b
Newar (Kathmandu)	**mi** kha	eye	Genetti 1990c
Newar	**mi** khā	eye; eyeball	Matisoff 1987; Shakya & Hargreaves 1989:3.4; Shakya & Hargreaves 1989:3.4.2

[a] These two Nanhua forms, **phe²¹mę̱³³** and **tʰʌ̱²¹mę̱³³**, are perhaps evidence of dialect mixture. The PLB cluster ***pl-** sometimes loses the lateral element, but sometimes develops into a retroflex stop (as in Mojiang and Dafang). It is possible that the Nanhua form with retroflex initial is borrowed from such a dialect.

[a] See the similar Newar form **mi khā phu si**.

	bom **zrong**	cheek	Marrison 1967
	ke **roŋ**	hip	French 1983:511
	ke **rong**	hip	Marrison 1967
2.3.1. EASTERN KIRANTI			
Yakha	nam ci **yəŋ**	cheek	Kohn 1990:3.11
	nam ci **yəŋ** seŋ kwɔ:k	cheekbone	Kohn 1990:3.11.1
2.3.2. SOUTHERN KIRANTI			
Bantawa	nga-**lüng**	cheek	Rai *et al.* 1984:56

[a] It looks superficially as though the last syllable of this Chang form goes with PTB ***b/g-raŋ*** CHEST (§1.4.4.3), but since **-laŋ** appears as a formative in several rounded bodyparts, we assign this syllable to PTB ***s-ruŋ*** ROUNDED PART (§1.2.6), following French 1983: 540.

(6) PTB *sey FRUIT / ROSE / ROUND OBJECT

This morpheme frequently occurs as the last constituent in compounds referring to round or spherical objects, e.g. HEART (cf. Lahu **ni-ma-šī**).

Many rGyalrongic forms seem to reflect proto-rGyalrongic ***t-sey***.

(7) PTB *b-ras RICE / FRUIT / BEAR FRUIT / ROUND OBJECT

An Austronesian connection has long been suggested for this root (cf. Malay **bəras** < Proto-Indonesian ***bəɣa/s** 'husked rice') although this etymology has been rejected by Benedict (1975:104), who prefers to relate the WT form to Chinese □ 'cooked rice or millet' (OC ***b'i̯wăn**; *GSR* 262i), on the grounds that the basic meaning of the TB etymon is FRUIT / BEAR FRUIT (cf. WT **ḫbras-bu** 'fruit, corn, grain'). See Gong 2001:23.

Bai (Jianchuan)	tã^{33} **ɕui**^{33}	bile	Zhao Yansun 1990:9.5.1

(14) NEIA *gon EYE

This weakly attested root appears mostly as the second syllable of Bodo-Garo compounds, with possibly a couple of cognates in Bodic.

1.7.1.1. Bodo

Bodo	me **gón**	eye	Weidert 1987:1094; Bhat 1968; Matisoff 1987

	me **gón** mi kí	excrement of the eye	Bhat 1968
	mo?-**gon**	eye	Matisoff 1987
	payrew me **gón**	embroidery (kind of, like the eye of pigeon)	Bhat 1968

Garo (Bangladesh)	mik-**on**	eye	Burling 1992
	mik-**on**	eye; pupil of eye (n.)	Burling 2003:6.22-II:idx
	mik-**on** bi-rong	iris of eye (n.)	Burling 2003:6.22-II:idx
2.1.2. BODIC			
Tsangla (Motuo)	miŋ **k^{h}oŋ** taŋ	eye	SUN Hongkai *et al.* 1980
Tshona (Mama)	me?^{53} **kɔŋ**^{55}	eye	SUN Hongkai *et al.* 1980

1.2.6.1 Eyeball

(1) PTB *g-$\frac{\text{d}}{\text{r}}$a EYEBALL

The Bodic and Magar forms resemble the second syllable of WT **mig-ḳbras** 'eyeball' (lit. "eye-fruit"). For a semantically similar compound, cf. Sema **anhe thi** 'eyeball'.

1.3.4. TANGKHULIC			
Tangkhul	mik **thā**	eyeball	Matisoff 1987
2.1.2. BODIC

1.2.6.6 Eyebrow

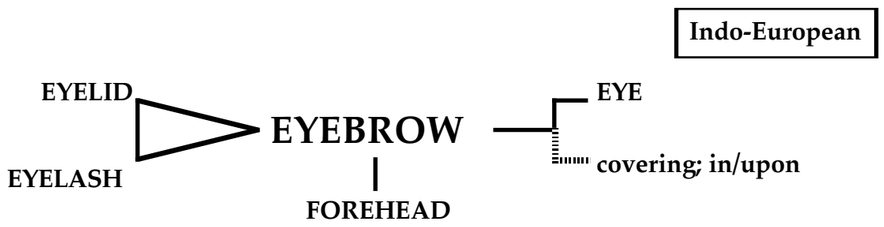

Figure 78: 1.2.6.6 *Eyebrow*

1.2.6.7 Tears

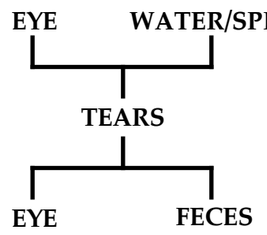

Figure 79: 1.2.6.7 *Tears*

(1) PTB *b-ləy-k TEARS

The Tangut doublet (**lwi^{1} ⩙ mbi̯ə̯** 'tears') is unexplained.

The **m-** which occurs in initial position in some forms (e.g. Mpi **m^{4}pi^{6}**) is evidently a reduction of PTB ***s-myak ⩙ *s-mik** EYE (§1.2.6).

Cf. also PTB ***m-t(w)əy-n ⩙ *m-ti-s** WATER / FLUID / LIQUID / RIVER / SOAK / SPIT (§1.9.9).

(3) PTB * $\frac{m}{s}$ -twaŋ SEE / SHOW

This etymon is a simplex/causative pair, with the former marked by the nasal prefix and the latter by prefixal ***s-***. Written Tibetan shows variation of the final nasal (**mthoŋ** 'see' ⪤ **ston** 'show').

(4) PTB *s-nyam THINK / BRAIN

Three phonetically similar etyma must be distinguished in this semantic area: PTB ***s(y)am-s** BREATH / LUNG / SPIRIT / VOICE / HEART (§1.1.2.2), PTB ***s/k-n(y)i-k/ŋ** HEART / MIND / BRAIN (§1.7.1), PTB ***s-nyam** THINK / BRAIN (§1.2.6.10).

The Tani reflexes of this etymon appear as the second element in the PTani binome ***pVk-ni** ‘brain’; these binomes are tagged under PTB ***p(u/i)-k** BRAIN (§1.2.4).

(7) PTk *jaŋ LOOK

1.3.4. Tangkhulic

**Tangkhulic*	***jaŋ**	look	Mortensen 2012:707
Kachai	kʰə-**ja**	look at (v.)	Mortensen 2012:BodyParts.045
Tusom	kʰə-ŋə-**hã**	look (v.)	Mortensen 2012:BodyParts.050
Ukhrul	kʰə-**jɐŋ**	look	Mortensen 2012

(8) PBod *l-ta-$^{s}_{t}$ LOOK

WT reflects three allofamic variants: an open syllable as well as forms with both the ***-t*** and ***-s*** suffixes.

This root seems restricted to Tibetan dialects and the Kiranti languages, with the latter forms likely borrowings from the former.

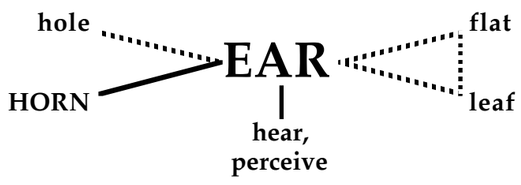

Figure 81: 1.2.7 *Ear*

Figure 82: 1.2.7 *Ear*

Figure 83: 1.2.7 *Ear*

(1) PTB * r/g -na EAR / HEAR / LISTEN

This root has acquired a variety of final consonants in Himalayish languages, including **-k** (Kiranti, Tamangic), **-ŋ** (Kanauri), **-r** (Lepcha), and **-m** (Written Tibetan).

There is a fortuitous resemblance between this root and an Indo-European synonym (cf. Sanskrit **karṇa-**). The velar prefix is well attested in Bodo-Garo, Asakian, and Naga languages.

(2) PTB *nam EAR

This root seems quite independent of the much more widespread etymon for EAR, PTB ***r/g-na*** EAR / HEAR / LISTEN (§1.2.7).

The Sangtam development of PTB ***-am*** to ***-aŋ*** is regular (cf. Bruhn 2014:400).

1.1.1.2. Eastern Tani

(12) PAsak *rip-hi EAR

This root has so far only been identified in Asakian.

1.7.3.2. ASAKIAN

Chairel	**rīphī**	ear	Luce 1985:K.58
Lui	**rīphī**	ear	Matisoff 1987

(13) PTB *ruŋ HOLE / ORIFICE / EAR

This root is well-attested in Tani, and probably also in Qiangic and Central Naga.

This root occurs as second element in compounds with PTB ***r/g-na*** EAR / HEAR / LISTEN (§1.2.7). There is a fortuitous resemblance between this etymon and PTB ***m/g-(r)wa-ŋ/k/t*** HORN / ANGLE / CORNER (§1.2.2), which has a certain specious plausibility since the ears are located on the sides of the head like horns.

Angami (Khonoma)	te na **long**	ear	Marrison 1967:GEM

2.1.2. BODIC

Baima	nɑ[35] nga[53] ɦo[13] **ru[53]**	nostril	SUN Hongkai 1991a:3.5.2

3.2. QIANGIC

Muya [Minyak]	sɯ[55]ndʑɯ[35]**rø[35]**	nostril	SUN Hongkai 1991h:3.5.2
Qiang (Mawo)	stə qə[1] **dʐu**	nostril	SUN Hongkai 1991g:3.5.2
	stə **ʐu**	nostril	Sun 1986

8. BAI

Bai (Jianchuan)	ŋ̃v̩[21] k[h]v̩[44] tɯ̃[21] **ʔuĩ[33]**	nostril	ZHAO Yansun 1990:3.5.2

[a]Tagin **nyaruŋ a roŋ** implies that **ruŋ** HORN/EAR is distinct from **aroŋ** HOLE (cf. Jackson's Mirish reconstruction for HOLE).

(14) NEIA *twar EAR (in compounds)

The scattered reflexes of this root all have dental stops, but these may well reflect an earlier fricative ****swar**. See *HPTB*: 31-32.

1.2.4. "OLD KUKI"

Moyon	na **thúr** ten ná	earlobe	Kosha 1990:3.6.1

1.5. MIKIR [KARBI]

Mikir [Karbi]	no ang **thor**	earhole	Matisoff 1987

[a][Source Note] as in **ja-ru** 'ear'.

1.7.1.1. Bodo

Bodo	kamá se **tor**	bulge just opposite to the ear lobe	Bhat 1968

(15) PTB *dwa(ː)ŋ HOLE / ORIFICE / CAVE / PIT / WELL (FOR WATER)

This root typically appears as the final morpheme in words for bodily orifices (anus, ear, mouth, nostril, throat, trachea, vagina), as well as words describing inanimate openings like caves and wells.

The Tiddim forms meaning 'hole' with initial **w-** appear to be cognate, although the loss of the initial dental stop is not parallelled elsewhere. Note the Tiddim allofam **daŋ** 'throat' where the initial stop is preserved.

The apparent lateral prefix in the second syllable of the WT word for 'throat' (**'ol-ldoṅ**) seems to be merely a perseverative effect of the preceding syllable with final **-l**.

Cf. Chinese **tǔng** 'tube' , *GSR* 1176g.

0. Sino-Tibetan (previously published reconstructions)

Hani (Khatu)	ná **tì**	ask, listen	Hansson 1989:68

[a] As demonstrated by Benedict 1943, Lepcha medial **-y-** often derives from the PTB ***s-** prefix.

(2) PTB *s-nyan HEAR / LISTEN

This etymon refers to either visual or auditory perception. Some reflexes have **ny-** onsets, while others have **hy-** or zero, but this is easily explicable in terms of an ***s-** prefix.

1.2.8 Nose

Indo-European

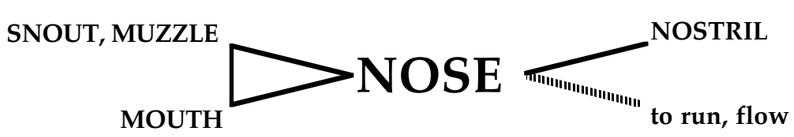

Figure 87: 1.2.8 *Nose*

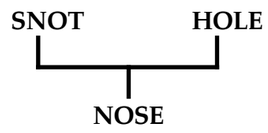

Figure 88: 1.2.8 *Nose*

Figure 89: 1.2.8 *Nose*

(1) PTB *s-na ≷ *s-na:r NOSE

Chantyal **nak/nakh** is a borrowing from Nepali **nāk**, but the superficially similar Tiddim form **na:k[3]** is a genuine descendant of PKC ***hnaar**. (The development of final **-r** to a velar is regular in Tiddim.)

A few Tani languages (Idu, Kaman) have developed secondary final consonants (**-m, -ŋ**)). There are separate but perhaps related roots: PTB ***m/s-nam** SMELL (§1.2.8.5), PTB ***s-nap** SNOT / NASAL MUCUS (§1.8.2). Cf. all the English words relating to the nose that begin with the clusters *sm-* or *sn-*.

Noteworthy is the Qiang (Mawo) reflex with initial **st-** rather than **sn-**. This obstruentization of **n-** after the **s-** prefix had hitherto been noted only in Kanauri and Chinese. See *HPTB*:103.

(2) PTB *bu $\begin{matrix}\text{k}\\\text{ŋ}\end{matrix}$ NOSE / NOSTRIL

In several languages including Written Tibetan, this etymon means NOSTRIL rather than NOSE, suggesting that there might be a connection with PTB ***d-(p/b)u-k*** BELLY / STOMACH / CAVE (§1.7.6) and PTB ***d-pu:k*** BELLY / VITALS / HOLLOW OBJECT / CAVE (§1.7.6).

Reflexes with final **-m**, as in some Tani languages and Darang, seem to have arisen by assimilation to the labial initial.

Apatani has developed a high front vowel in this root, still another example of the variation between **-u-** and **-i-** in the environment of labials.
