

Prof. Franz Adlkofer

Prof. Dr. med. Franz Adlkofer, born in 1935, received his doctorate from the Max Planck Institute for Biochemistry in Munich in 1965 and his post-doctoral education in internal medicine from the Free University of Berlin till 1976. From 1976 to 1992 Prof. Adlkofer worked for the industry. Since 1992 he is Executive Director and since 2002 Member of the Board of VERUM - Foundation for Behaviour and Environment in Munich. His special interest concentrates on the investigation of diseases caused by behaviour and environment. Until 2004 he lectured on this topic at the Free University of Berlin.

To investigate the biological effects of electromagnetic fields, Prof. Adlkofer organized and coordinated the EU-funded research project REFLEX between 1999 and 2004. In addition, the VERUM Foundation promoted complementary research and sponsored numerous scientific workshops in this area. Prof. Adlkofer is author and co-author of many scientific papers and presentations at national and international meetings.
