

## CONSTITUENCY POLL HORNSEY & WOOD GREEN

**Fieldwork:** 3 March 2015, conducted and tabulated by Survation Ltd using methodology specified by the Liberal Democrats.

**Sample:** 403 adults aged 18+, contacted by telephone through random selection from the complete BT directory of households in the Hornsey & Wood Green wards.

**Margin of error:** 4.8%, rising to 5.4% for the weighted voting intention question (Table 9).

**Balancing:** Sample balanced by 2010 general election vote; 2011 Census gender and age demographics for the constituency; and by population of each ward.

**Weighting:** Weighted by likelihood to vote where those saying '10' are given a weighting of 1, '9' given a weighting of 0.9 etc, down to those saying '0' who are excluded. For all those who say they are likely to vote 1-9 but are either undecided or refused to answer their voting intention, weight by 0.3 of their 2010 vote; add to the relevant party's pool before weighting by likelihood to vote as above.

**Methodology:** Prompt names of declared candidates and party affiliation from Conservatives, Labour, Liberal Democrats, Ukip and Green Party in random order. Offer an 'other' option at the end. If requested, record verbatim which party specified.
