-lite (= F. -lite, G. -lith, -lit), a frequent ending in names of minerals (also in names of certain fossils, as coprolite, and of certain types of mineral structure, as axiolite), represents the Gr. $\lambda i\theta$ os stone; the words in which it occurs are mostly intended to correspond to assumable Gr. formations, so that in actual use the ending is almost always -olite, with the thematic or combining o usual in Gr. compounds; there are a few exceptions, as auerlite, chesterlite. The form -lite, which was used in some original English formations (actyno-lite chester). lite, etc.) by Kirwan in 1794, is due to the example of the French geologists, who used -lite instead of the older -lithe, the two spellings representing one and the same pronunciation in Fr. The adoption of the abnormal form was prob, helped by the analogy of Chrysolite, where the t instead of th is due to the fact that the Gr. word came at an early period into Eng. by way of med.L. and OF.

-lith, a terminal element representing Gr. λίθος stone, in adaptations of actual or assumed Gr. compounds. The words with this ending are chiefly terms of Biology and Pathology, as coccolith, cyatholith, discolith, helmintholith, hippolith; other examples are acrolith, aerolith, laccolith, monolith. In terms of mineralogy -LITE is commonly used instead of the instead of -lith.

The long vowel in OE. Ittel is vouched for by metrical evidence (Sievers in Beitrage X. 594) and certain features of the declension (Sarrazin ibid. IX. 365), as well as by the early ME. Intel. Iiitel, suggest that the y may have been short in some dialects, and perh. generally in the syncopated flexional forms. The modern dialects that are marked by a large Scandinavian element in the vocabulary mostly have the vowel long, the pronunciation being (Iat'l) or the like; this seems to point to influence from the ON. A. adj. The opposite of great or much. Compar. LESSER; superl. LEAST.

These forms, however, are not quite coextensive in application with the positive, so that in certain uses the adj. has no recognized mode of comparison. The difficulty is commonly evaded by resort to a synonym (as smaller, smallest); some writers have ventured to employ the unrecognized forms littler, littlest, which are otherwise confined to dialect or imitations of childish or illiterate speech.

I. Opposed to great. Often synonymous with small.

small.

Its customary antithetic association (in mod. Eng.) is with great or big, not with large; on the other hand, small is the customary antithesis of great or large, but not of big. One difference between the two synonyms is that little is capable of emotional implications, which small is not.

A back-formation from the name Liverpool.] A name arbitrarily given to the bird figured in the arms of the city of Liverpool.

It was intended for the eagle of St. John the Evangelist, the patron saint of the corporation, but owing to the unskilful delineation there have been many guesses as to the identity of the bird represented. In some ornithological books the name is given to the Glossy Ibis.

1668 in Picton Lipool Munic, Rec. (1883) 1. 269 The Armes of this towne viz' the Leaver. 1688 R. Holme Armoury II. xii. 266/2 He beareth Azure, the Head of a Lever couped proper: of some termed a Shovellers head: this fowl is...in

Low Dutch Lepler, or Lepelaer, or Lefler; from the Germane termed Lofler, which we more finely pronounce Lever: Yet Mr. Ray in the translation of the Ornithology terms this Bird, a Spoon Bill. 1833 Picton Memor. L'pool 1. 18 Mr. Gough Nichols has .. shown .. that the so-called liver or cormorant was intended to represent the symbolic eagle of St. John the Evangelist.

1. A name popularly applied to reptiles of the genus *Lacerta*, and to other reptiles resembling these in shape and general appearance, having an elongated body, a long tail, four legs, and a sealy or granulated hide. Ordinarily, the name relates to the small animals of the genus Lacerta and other genera of the order Lacertilia; by extension, animals like the crocodile, the agama, the iguana, or the great fossil saurians, are often spoken of as lizards. In scientific books, the name is commonly used as coextensive with that of the order Lacerti-lia, which includes many animals which, as lacking either limbs or scales, or both, would not be popu-

thing.

1817 CHIEF JUSTICE MARSHALL in II. Wheaton Rep. 11.

211 Entries made in a wilderness would most generally refer to some prominent and notorious object which might direct the attention to the neighbourhood in which the land was placed; and then to some particular object which should exactly describe it. The first of these has been denominated the general or descriptive call, and the last the particular object call, of the entry. But, If, after having reached the neighbourhood, the locative object cannot be found within the limits of the descriptive call, the entry is equally defective.

1V. 18. (More fully Lock-nospital.) A hospital for the treatment of venereal diseases. (Now usually with capital 1...)

The 'Lock lazar-house' in Southwark, which is mentioned as having received a bequest in 1452, was afterwards employed as a hospital for venereal diseases, and its name came to be used as a general designation for institutions of that kind. The origin of the name is uncertain; it has been conjectured that the 'Lock lazar-house' was so called as being specially isolated or quarantined.

Not from ON. lig felled tree (f. OTeut. *lig-, ablant-variant of *leg- Lie v.l.), which could only have given *low in ond. Eng. The conjecture that the word is an adoption from a later stage of Scandinavian (mod. Norw. laag, Sw. dial. laga), due to the Norwegian timber-trade, is not without plausibility, but is open to strong objection on phonological grounds. It is most likely that clog and logge arose as attempts to express the notion of something massive by a word of appropriate sound. Cf. Du. log clumsy, heavy, dull; see also Luc sb. and v. Napier does not explain his view of the literal meaning of logarithmus. It is commonly taken to mean 'ratio-number', and as thus interpreted it is not inappropriate, though its fitness is not obvious without explanation. Perhaps, however, Napier may have used Adyor merely in the sense of 'reckoning', 'calculation' (cf. Logistic).]

One of a particular class of arithmetical functions, invented by John Napier of Merchiston (died 1617).

invented by John Napier of Merchiston (died 1617), and tabulated for use as a means of abridging calculation. The essential property of a system of logarithms is that the sum of the logarithms of any two or more numbers is the logarithm of their product. Hence the use of a table of logarithms enables a computer to substitute addition and subtraction for the more laborious operations of multiplication and division, and likewise multiplication

plication and division, and likewise multiplication and division for involution and evolution.

The word is now understood to refer only to systems in which the logarithm of any number a** is *, a being a constant which is called the base of the system. The logarithms (of sines) tabulated by Napier himself were not logarithms in this restricted sense, but were functions of what are now called the Napierian (also Neperian), hyperbolic, or natural logarithms, the base of which, denoted by the symbol e or e, is 271828+. This system is still in use for analytical investigations, but for common purposes the system used is that invected by Napier's friend Henry Briggs (died 1630), the base of which is 10; the Briggsian or Briggian logarithms are also known as common or decimal logarithms. For binary, Gaussian logarithm, see the adjs. Logistic logarithms.

In mathematical notation 'the logarithm of' is expressed by the abhreviation 'log' prefixed to numeral figures or

logarithms.

In mathematical notation 'the logarithm of' is expressed by the abhreviation 'log,' prefixed to numeral figures or algebraical symbols. When necessary, the base of the system is indicated by adding an inferior figure: thus 'log10 a' means 'the logarithm of a to the base 10'.

The proper scope of this department of study has been and is much controverted, and books on 'logic' differ widely in the range of subjects which they include. The definition formerly most commonly accepted is 'the art of reasoning'; for various modern definitions see the later quots. At all times the vulgar notion of 'logic' has been largely that it is a system of rules for convincing or confounding an opponent by argument.

Logic (lρ'dzik), -logical (lρ'dzikăl), endings originally occurring in adaptations (through F. and L.) of Gr. adjs. in -λογικός, derived from adjs. and sbs. in -λογος, -λογον, which have derivative nouns of quality or function in -λογία, represented in Eng. by -Logy. As the meaning of an adj. in -logic(al) may with substantial correctness be rendered by 'pertaining to —logy', such adjs. are commonly apprehended as derivatives of the related sbs. (as if f. -logy + -IC). In general, the existence of a in 1. — logy now implies the potential existence of a correlative adj. in -logical (the exceptions being confined to a few of the older words, such as a pology, which have corresponding adjs. of different formation). For the difference in meaning between adjs. in -logic and the (now much more frequent) adjs. in -logical, see -ICAL, and cf. the note under GEOLOGIC I.

1859 BARTLETT Dict. Americanisms, Logy, heavy, slow, stupid. . He's a logy man, i. e. a slow-moving, heavy man. 'He is a logy preacher', i.e. dull. 1883 Harper's Mag. Aug. 452/2 Outside ballast .. made boats logy. 1887 Detroit Free Press 21 May 2/3 He [Barnum] is heavier, and a trifle logy. 1890 in Leffingwell Upland Shooting 459 They [greyhounds] became 'logy' and out of heart.

b. Used as sb.: A heavy fish.

1897 R. Kieling Captains Courageous 61 'He's a logy. Give him room accordin' to his strength', cried Dan. 'I'll

help ye. 'No. you won't', Harvey snapped, as he hung on to the line. 'It's my first fish'.

-logy (lŏdzi), earlier written -logie, an ending occurring originally in words adapted from Gr. words in -λογία (the earliest examples, e.g. they logy, having come through F. -logie, med.L. -logia). These Gr. words for the most part are parasynthetic derivatives; in some instances the terminal element is λόγος word, discourse (e.g. in τετραλογία tetralogy, τριλογία trilogy); more commonly it is the root λογ- (ablaut-variant of λεγ-, λέγειν to speak: cf. Logos). In the latter case, the shs. in -λογία usually denote the character, action, or department of knowledge proper to the person who is described by an adj. or sb. in -λόγος, meaning either '(one) who speaks (in a certain way)', or '(one) who treats of (a certain subject)'. Hence the derivatives in -λογία are of two classes, (1) those which have the sense of 'saying or speaking', examples of which are the words anglicized as battology, brachylogy, cacology, dittology, culogy, patillogy, tautology; and (2) names of sciences or departments of study. As the words of the last-mentioned class have always a sb. for their first element, and o is the combining vowel of all declensions of Gr. sbs., the ending of these compounds is in actual nse always -0λογία, becoming -0LOGY in Eng. The names of sciences with this ending are very numerous: some represent words already formed in Gr.. as theology, astrology; many represent formations which might legitimately have existed in Gr., as geology, zoology, psychology; others are of hybrid composition, as sociology, terminology, insectology. The modern formations in -logy follow the analogy of Gr. formations in having o as the combining vowel; exceptions are petralogy (an incorrect form which, some writers prefer to petrology because it shows the derivation from πέτρα rock, not from πέτροs stone) and mineralogy (F. minéralogie which may be viewed as a contraction for *mineralogy. The suffix -ology is freely used in the formation of humorous nonce-wds., some of which are illustrated below. All the modern formations in -logy may be said to imply correlative formations in -Logical and -Logist; in the case of some of the older words, the related personal designation ends in -LOGER or -LOGIAN. (Cf. -LOGUE.) Hence

cinds in -LOGER or -LOGIAN. (Cf. -LOGUE.) Hence

For examples of the OFr. and med. L. terms see J. M. Manly in Harrard Studies Philol. y Lit. 1. (1892) 88 ff. The main difficulty is that these terms appear, whenever their sense can be determined, to mean the octave of Pentecost, or Trinity Sunday. Prof. Manly, however, points out that there is evidence that 'Pentecost' was sometimes used for the season beginning at Easter and closed by Whitsunday, so that the transference of the name 'close of Pentecost' from Trinity Sunday to Whitsunday, though lacking direct evidence, is not improbable. The use may have been merely local English; the Ayenbite and Shoreham both belong to Kent.]

The name was orig, applied e 1300 to the members of a branch of the Cellite or Alexian fraterrity (also called lotte-broeders), who devoted themselves especially to the care of the sick and the providing of funeral rites for the poor. In the course of the 14th c. it was often used of other semi-monastic orders, and sometimes, by opponents, of the Franciscans. Usually it was taken to connote great pretensions to piety and humility, combined with views more or less heretical. Hence early mod.G. lotthart, chiefly applied to the Beghards.] the Beghards.1

13. a. Phonetics and Prosody. Applied to a vowel (in mod. use also to a consonant) when its utterance has the greater of the two measures of duration that are recognized in the ordinary classification of speech-sounds. Also, in *Prosody*, of a syllable: Belonging to that one of the two classes which is supposed to be distinguished from the other by occupying a longer time in utterance. (Opposed to *short*.) Long mark: the mark (-) placed over a vowel letter to indicate long quantity.

(Opposed to short.) Long mark: the mark (-) placed over a vowel letter to indicate long quantity. In Greek and Latin metre, a syllable is reckoned long (1) when it contains a long vowel or a diphthong, and (2) when its vowel is followed by more than one consonant (to the latter rule there are certain exceptions). A short syllable is conventionally supposed to occupy one time-unit (mara) in utterance, and a long syllable two. The distinction between the two classes of syllables, with criteria nearly identical with those of Gr. and Latin, is recognized in the prosody of many other peoples; in Skr. the equivalents of 'long' and 'short' are used of vowels only, syllables being classed as 'heavy' and 'light'.

Various inaccurate uses of the terms long and short were formerly almost universal in Eng., and are still common. (1) The vowel of a 'long' syllable, if 'naturally' short, was said to be 'long by position'. (2) By a confusion between the principles of quantitative and those of accentual verse, the stressed syllables, on the periodical recurrence of which the rhythm of English verse depends, were said to be 'long', and the unstressed syllables' short'. (3) In ordinary language 'the long a, e, t, o, or u' denotes that sound of the letter which is used as its alphabetical name, while 'the short a, e, t, o, or u' denotes the sound which the letter most commonly has in a stressed short syllable (in the notation used in this Dictionary, respectively a, e, i, p, v).

Long, obs. form of LUNG; aphetic f. Along.

-long (lon), †-longs suffix, forming advs. The earliest instance is endlong, from ON. endlang-radj., 'extending from end to end', 'the whole length of'. The word is properly a compound of Long a.; but in Eng. it was principally used as adv.,

Long a.; but in Eng. it was principally used as adv., and developed the sense 'end-wise', 'end foremost', so that it became parallel in meaning to words like sideling, headling, backling. The ending -long thus came to be regarded as a variant of -LING suffix 2. Hence, on the one hand, the occasional 14th c. form endelyng for endlong, and, on the other hand, the substitution of headlong(s, sidelong(s, flatlong(s for the earlier headling(s, sideling(s, flatling(s, | Longa (lenga), Mus. b. with adv. of manner († or advb. phrase): To have a certain look or appearance.

This use is often indiscriminately condemned, but is justly censurable only where look is virtually equivalent to seem, so that it requires a predicative complement and not a qualification of manner. (So. e.g., in quot. 1645.) Owing, however, to the prejudice excited by the inaccurate use, look now rarely occurs with advs. of manner other than well, ill. hadly. In some early instances the apparent adv. may possibly le an adj. in 141.

Prof. Skeat (Concise Etym, Dict.) suggests that the word may be a, ON, hloop, hlamp Learsh, comparing the Sw. lop-knut, Da. lbb knude, lob-fie, running-knot. These compounds, however, seem to be merely modern Germanisms; the relevant sense of the verb, Sw. löpa, Da. lbbe, being app, foreign to early Scandinavian, and due to the influence of the corresponding G. langen (LG. lopen). Further, the mod-Sc. form of ON. hloop would be regularly loop, pronounced (lap), whereas the word loop is in Sc. pronounced (lap), the spelling loop; in G. Douglas is ambiguous, but probrepresents (lāp); cf. drowige = droop. The Irish and Gael. lub, formerly suggested by Prof. Skeat, presents at least a noteworthy resemblance of sound and meaning to the Eng. word.]

13. As a prefixed title, forming part of a person's customary appellation. Abbreviated Ld., formerly † L. (pl. 1.L.), Lo.

The rules now accepted for its use are as follows. In other than strictly ceremonial use it may be sobstituted for 'Marquis', 'Earl', or 'Viscount' (whether denoting the rank of a peer, or applied 'by courtesy' to the eldest son of a peer of higher rank); the word of, when it occurs in the more formal designation, being dropped. Thus 'Lord Hartington', 'Lord Derby', 'Lord Manvers', 'Lord Palmerston', may be used instead of 'The Marqois of Hartington', 'The Earl of Derby', 'Earl Manvers', 'Viscount Palmerston'. A baron (whether a peer, or a peer's eldest son known by the title of his father's barony) is always called by his title of peerage (either a sonname or a territurial designation) preceded by 'Lord', as 'Lord Tennyson'; if the Christian name is mentioned for distinction, it comes first, as 'Alfred, Lord Tennyson'. The territorial titles given by courtesy to judges in Scotland are treated like those of barons, as 'Lord Monboddo'. The younger sons of dukes and marqoises have the courtesy title of 'Lord' followed by the Christian name and surname, as 'Lord John Russell'. These rules were, for the most part, already formulated in the 16th c, but were for a long time seldom accurately observed except by experts in heraldry. In early use the prefixed title had most commonly the form my Lord (see 15) or the Lord. The latter survives in certain furmal uses, and in the superscription of letters.
