Laws of motion: chiefly used spec. for the three following propositions formulated by Newton: (1) A body must continue in its state of rest or of uniform motion in a straight line, nnless acted on by some external force; (2) Change of motion takes place in the direction of the impressed force, and is proportional to it; (3) Action and reaction are equal, and in contrary directions.

c. In certain sciences, particular 'laws' are known by the names of their discoverers, as in the following examples. (Most of these terms are of general European currency, their equivalents being used in

Fr., Ger., It., etc.)
(a) Astronomy.

(a) Astronomy.

Bade's law, an empirical formula representing the distances of the orbits of the other planets from the orbit of Mercury as forming an approximate geometrical progression. Kepler's laws, the three propositions established by John Kepler (1571-1630) with regard to the planetary motions: (1) That the planets move in ellipses, the sun being 15-2

in one of the foci; (2) That the radius vector of a planet describes equal areas in equal times; (3) That the square of the periodic time of a planet is directly proportional to the cube of its mean distance from the sun.

One of the important rules known to us as 'Kepler's laws'.

(b) Physics.

Avogadro's law, the law that equal volumes of different gases, pressure and temperature being equal, contain the same number of molecules. Boyle's law, the principle, published by Robert Boyle about 1662, that the volume of a given mass of gas (the temperature being constant) varies inversely as the pressure. Charles's law, the law discovered by Alex. César Charles (1746-1823) that for every degree centigrade of rise in temperature, the volume of a gas increases by -00366 of its amount at zero. Dulong and Petit's law, the law that all the chemical elements have approximately the same atomic heat.

1860 Maxwell Sci. Papers (1890) I. 380 Boyle and Mariotte's law. 1863 Atkinson Ganot's Physics 110 The laws of the compressibility of gases were studied separately by Boyle and by Mariotti. . Each of these philosophers arrived at the same law, which in England bears the name of Boyle's, and on the continent of Mariotti's. Ibid. 288 Dulong and Petit's law may be thus expressed; the same quantity of heat is needed to heat an atom of all simple bodies to the same extent. 1880 CLEMINSHAW IT. Nurt: Atomic Theory v. 95 The 'law', as it is generally called, of Avogadro and Ampère may be enunciated as follows: Equal volumes of the 'absolute temperature' (Charles's Law, often attributed to Gay Lussac).

(c) Philology.

Grimm's law, the rule formulated by Jacoh Grimm (in the and ed. of his Deutsche Grammatik, 1822) with regard to the

Gay Lussac).

(c) Philology.

Grimm's law, the rule formulated by Jacoh Grimm (in the 2nd ed. of his Deutsche Grammatik, 1822) with regard to the representation in the Germanic langs, of certain consonants of the primitive Aryan language. Grimm's statement was that original aspirates became medize in Gothic, Low German, English, Old Norse, etc. and tennes in High German; original medize became tenues in Gothic, etc., and 'aspirates' is supposed to be represented by spirants and afficiates) in High German; and original tenues became 'aspirates' in Gothic, etc., and medize in High German. The formula is no longer accepted as correct, but the name of 'Grimm's law' is still applied to its rectified form, which is too complicated to he stated here. Verner's law, discovered by Karl Verner of Copenhagen in 1875, deals with a class of exceptions to Grimm's law, and is to the effect that an original Germanic voiceless spirant, when following or terminating a primitively anaccented syllable, became a voiced spirant, which in the historic Germanic langs, is under certain conditions represented by a media; the 2 which according to the 'law' results from s is, except in Gothic, normally represented by r. Grassmann's law, published by Hermann Grassmann in 1863, is that when primitive Aryan had two aspirates in the same or successive syllables the former of them was in Sanskrit changed into the corresponding media, and in Greek into the corresponding tenuis.

(d) Pol. Econ.

Gresham's law, the principle, involved in Sir Thomas Gresham's letter to Q. Elizabeth in 1558, that 'had money drives out good', i.e. that when delased money (sc. coins reduced in weight or fineness, or both) is current in the same country with coins of full legal weight and fineness, the latter will tend to be exported, lenving the inferior money as the only circulating medium.

1858 Macleoo Elem. Pol. Econ. 477 As he was the first to perceive that a bad and debased currency is the cause of the disappearance of the good money, we are only doing what is just, in calling this great fundamental law of the currency by his name. We may call it Gresham's law of the currency.

The most likely view is that favoured by M. Gaston Paris, that the word is of Teut. origin, an adoption of some form of the word represented by OHG., MHG. leich, play, melody, song. The ON. lag (see Law sb.¹), used in the sense of 'tune', would also be phonetically a possible source. Connexion with Teut. *lenpo· (OE. lbo², Ger. lica) is out of the question, as are the Celtic words commonly cited: the Irish laoidh is believed to represent an OCeltic type *lūdi-; the Welsh llais voice, sound, is too remote in meaning, and the assumed Breton equivalent is non-existent.]

1. A short lyric or narrative poem intended to be sung.
Originally applied spec. to the poems, usually dealing with matter of history or romantic adventure, which were sung by minstrels. From the 16th to the 18th e, the word was a mere poetical synonym for 'song'. This use still continues, but lay is now often employed (partly after G. lied, with which it is often erroneously supposed to be etymologically connected) as the appropriate term for a popular historical ballad such as those on which the Homeric poems are by some believed to be founded. Some writers have misapplied it to long poems of epic character like the Nibelaugenlied or Beowulf.

VII. 43. In intransitive uses, coinciding with or resembling those of LIE v.!

In the earliest examples the verb appears to be intransitive for reflexive or passive. Now (exc. in Nautical lang, see b) it is only dialectal or an illierate substitute for lie, its identity of form with the past tense of the latter no doubt accounting largely for the confusion. In the 17th and 18th centuries, it was not app. regarded as a solecism. (For lay in wait see Wait 3b.)

Le, obs. form of LAY, LEA, LEE, LIE.

-le, suffix, pronounced ('1), of various function

and origin.

1. The usual mod.Eng. form of ME. -el(e, -le, repr. OE. -el, -ela, -(e) le in sbs. and -ol, -ul, -el in adjs. (The form -el is retained where phonetic law or orthographical convention does not permit the change into -le, as after ch, g soft, n, r, sh, th, and v. After m the suffix becomes -ble.)

and v. After m the suffix becomes -ble.)

The OE, sls. and adjs, with l suffixes are prob. in most cases of pre-Eng. formation. The sls. formed on nounstems have sometimes an originally diminutive sense, as in bramble; sometimes they express the notion of 'an appliance or tool', as in thimble, handle. In those formed on vb. stems the function of the soffix is either agential as in beadle, instrumental as in bridle, girdle, or expressive of some less definable relation, as in bindle. The adjs, which are formed on vb. stems, have the sense 'apt or linble' (to do what the vb. expresses), as in brittle, fickle, gripple, numble, tstudkel.

b. In riddle the suffix represents OE, -ELS, the s having been confused with the plural ending.

2. An occasional representative of ME, -el(l, -elle, in the educated from Er. This has several different

in sbs. adopted from Fr. This has several different sources: in eastle, mantle, it is OF, -el:-L. -ellum dim. suffix (see -EL); in cattle it is OF. -el:-L. -āle, the nent. sing., and in battle it is OF. -aille the neut. pl., of the adjective suffix -ālis (see -AL); in bottle it is OF. -eille:—]. -icula dim. suffix.

3. A verbal formative, repr. ME. -(e)len, OE. -lian:—O'Teut. type -ilōjan, with a frequentative or sometimes a diminutive sense. Among the few examples that go back to OE. are nestle, twinkle, In ME. and early mod. E. the suffix was extensively used (like the equivalent forms in MHG, and mod.Ger, and in Du.) to form vbs. expressing repeated action or movement, as in brasile, crackle, crumple, dazzle, hobble, niggle, paddle, sparkle, topple, wriggle, etc. Many of these formations are from echoic roots, as babble, cackle,

gabble, giggle, guggle, mumble, etc. Lea (lī), sb.1 Forms: 1 léah, léa, léaz léz, 4 le3, 5-6 (9) lee, 5-7 leye, 5 lie, legh, 5-6 le, 6

LIGHT sh., etc.; for the sense cf. clearing); others have suggested *leu- to loosen (Gr. λύειν, L. so-lv-čre). The sense has been influenced by confusion with Lease sb. 1. An expanded organ of a plant, produced laterally from a stem or branch, or springing from its root; one of the parts of a plant which collectively constitute its foliage.

It is usually green, and in its most complete form consists of a blade, footstalk, and stipules; in popular lang, the word leaf denotes the blade alone. Some mod. botanists use the word in an extended sense, including all those structures which are regarded as 'modified leaves', such as stamens, carples, foral envelopes, bracts, etc.

IV. Phraseological combinations.

IV. Phraseological combinations.

13. In various idiomatic phrases. a. To leave ... alone (earlier + to leave one): to abstain from interfering with; = 'to let alone' (see ALONE 4 and LET v.1). In the same sense, To leave ... be (colloq.) where leave has been substituted for let without modification of the form of the phrase. b. To leave go (of), to leave hold (of), to leave loose (of) collog : to cease holding to let zo.

(of) collecte go (of), to leave hold (of), to leave loose (of) collecte to cease holding, to let go. In to leave go, to leave loose, the vb. was orig, transitive, go being inf., and loose a complementary adj.; but the combinations being used absol, or with ellipsis of the obj. became virtually intransitive vbs., and were construed with of. (Cf. let go, under Let v.) The frequency in use of the three expressions leave go, leave hold, leave loose, varies in different parts of the country, but perhaps none of them can be regarded as merely dial.

The notion expressed in some Dicts., that leave in some of

these phrases represents ME. Leve (OE. lefan, lyfan), to permit, is quite erroneous.

The relation between the Tent. words is uncertain, but the Slavo-Lettic cognates suggest that the OTent. type was a collective sing. 'leudi-s mase, people, the plural of which had naturally much the same sense (cf. folk, folks). The OE, mase, sing., with the sense 'man', seems to have been evolved from the plural meaning 'people'. The fem gender of the OE. lead people, and the form leada (lloda) in the pl. instead of liode, seem to be due to the influence of the synonymous plod fem.

d. Comm. The principal book of the 'set of books' ordinarily employed for recording mercantile transactions.

Its distinctive feature is that its contents consist of 'debtor-and-creditor accounts'. Usually each person (or frm) with whom the trader has business relations has an account in the ledger, headed with his name, and showing the sums charged to his debit on the left page or half-page, and on the right those credited to him. In the system of 'double entry' the ledger includes other accounts of similar form to these, but headed with the designations of certain branches or subdivisions of the trader's own business.

-lent, suffix, occurring in adjs. from Latin. The L. ending -lentus (which in some words has an alternative form -lens) has approximately the sense of the Eng. FUL. It is believed to have been orig. a compound, formed by the addition of the suffix -ento-, -ent- (cf. cruentus gory) to derivative stems in ·lo- or ·li-; these stems, however, have not been preserved (exc. in the case of gracilis slender, whence gracilentus † gracilent), and in classical times -lentus was a productive suffix. Normally it is preceded by u, as in turbulentus turbulent, pulverulentus pulverulent (see -ULENT); but there are a few cases in which the stem-vowel of the primary sb. appears, as pestilentus (-lens) pestilent, f. pestis plague, and some which have an unexplained o. as violentus (-lens) violent, f. vi-s force (cf. violare to violate), sanguinolentus bloody, f. sanguin-, sanguis blood.

-less (lès), suffix, forming adjs. The OE. léas, like its equivalents in the other Teut. langs. (see Lease a., Loose a.), was used in the sense 'devoid (of)', 'free (from)', bothas a separate adj., governing the genitive as in freque least free from crimes, and the genitive, as in firena leas free from crimes, and (more frequently) as the second element of compounds, the first element being a sb., as in fáculeas guileless, wisleas without a wife. The adj., as a separate word in the relevant sense, did not survive into ME., and the ending -léas became a mere suffix, which was, and still is, very freely attached to sbs. to form adjs. with privative sense.

In many instances the sb. to which the suffix was attached was a noun of action, coincident in form

with the stem of a related vb., and some of the Vol. VI.

adjs, so formed had the sense 'not to be -ed', 'un-—able', as in countless, numberless. On the supposed analogy of these words, the suffix has been appended to many verbs, as in abashless, dauntless, describeless, expressless, quenchless, resist-less, tireless, +topless (= not overtopped), weariless.

Of the very common recent use of the suffix in the formation of nonce-wds. a few examples are

-let, suffix, appended to sbs. The oldest words in Eng. with this ending are adoptions of OF. words formed by adding the dim. suffix -et, -ete words formed by adding the dim. suffix -el, -ele (see -ET) to shs, with the ending -el, in some cases repr. the L. dim, suffix -ellum, -ellam, and in others the L. ending -āle of neuter adjs. (see -nL). Examples are bracelet, chaplet, crosslet, forcelet, frontlet, gauntlet, hamlet, mantelet. It is somewhat difficult to see how these words gave rise to the Eng. use of -let as a diminutive suffix, as none of them, exc. the heraldic crosslet, have the appearance

them, exc. the heraldic crosslet, have the appearance of being diminutives of Eng. words; possibly Fr. diminutives like enfantelet, femmelette, osselet, tartelette, were directly imitated by some Eng. writers. An early diminutive in -let is armlet (sense 2, 'little arm of the sea', recorded 1538); others are ringlet (Shaks.), kinglet (Florio 1603, after F. roitelet). The formation did not become common until the 18th c.; from the first half of the century we have streamlet (Thomson), from near the end of it cloudlet, leaflet. In the 10th c. the the end of it, cloudlet, leaflet. In the 19th c. the number of derivatives formed with the suffix is very great; among those recorded in this Dictionary are booklet, brooklet, courtlet, crownlet, dukelet, hooklet, jokelet, keylet; and in the formation of nonce-wds. -let is now perh. the most frequent of dim. endings.

In addition to its diminutive force, the suffix is in a few words (anklet, armlet, leglet, necklet, wristlet) appended to sbs. denoting parts of the body, forming names for articles of ornament or attire. The oldest word of this type, armlet, was perli. suggested by a false analysis of frontlet (cf., however, OF. armillet); in the formation, or at least the use, of the later words the analogy of bracelet has proh. been chiefly operative.
