PREFACE TO SU—SZ.

This the concluding portion of the letter S comprises 4935 Main words, 960 Combinations explained for these, and 2417 Subordinate entries; in all 8312. The Obvious Combinations, illustrated by quotations more making a total of 9406. Of the Main words, 1133 are under these, and 2417 Subordinate entries; in all 8312. The Obvious Combinations, illustrated by quotations but not requiring specific definition, number 1094 more, making a total of 9406. Of the Main words, 1133 are marked † as obsolete, and 208 are marked | as alien or not fully naturalized.*

The Germanic element in this portion of the English vocabulary amounts to somewhat less than a quarter. It includes such, suck, summer (the season) sun, sunder, sundry, sup (to sip), together with all but a few of the words with initial sw, which occupy about two-thirds of the whole space covered by the Germanic element. Among the more important szw-words belonging to the ordinary written and spoken language are swaddle, swain, swallow, swamp, swarm, swarthy, swath, swathe, sway, swear, sweet, sweet, swell, swelter, swerve, swift, swift, swim, swindle, swine, swing, swinge, swirl, switch, swoon, swoop, sword; but there are many now obsolete, dialectal, technical, or otherwise restricted in use, which equal or surpass these in lexicographical interest or difficulty: such are the six words swab, the seven nouns swad, the three nouns swale, swalper, swanimote, the five words swarf, the seven words swarth, swarve, the seven words swash. the three nouns swash and swatch, swats, sweal, sweek, swig, swilk, swimble, swime, swingle, swipe, swiper, swire. swith, swithe, swithen, swither, swive, swote. sreound, sreore.

In the Latin and Greek element of the vocabulary the most striking feature is the number and importance of the prefixes that have required more or less lengthy treatment; these are sub- (with its variants su-, suc-, suf-, sum-, sup-, sur-, sus-), super-, supra-, sur-, syn- (with its variants sy-, syl-, sym-, sys-). The great majority of the words from Latin, Greek, and French are compounds of one or other of these prefixes, and the list of them includes many of common literary and colloquial currency, and many of considerable rank in the terminology of the arts and the sciences.

India has supplied an unusually large proportion of words: subah, subahdar, subashi. subjee, sudder, Sudra, sundri, sungar, sunn, sunnud, sunnyasee, supari, surnai, surpeach, surwan, susu, sutra. suttee, suttoo, swadeshi, swami, swastika.

A few articles may be singled out as being especially conspicuous for their etymological interest: subdue, sugar and sugar-candy, surd (in mathematics), surly, sway, swerve, swindle, sycophant, syllabus, syphilis, and the Paracelsian sylph and synovia. Special interest attaches to the facts of the history of syllabus.

The original collection of material for Su-Sz was subedited by Mr. P. W. Jacob in 1883; since then a large body of additional quotations had been amassed before the regular staff started work upon it at the beginning of 1914. The proofs have been read by the Misses Edith and E. P. Thompson, Lansdown, Bath, Mr. G. F. Friedrichsen, M A. (a former member of the late Sir James Murray's staff), and the Rev. Canon J. T. Fowler; their annotations have contributed in many instances to the accuracy or completeness of the treatment. Constant assistance in verification at the British Museum has been given by Mr. W. W. Jenkinson, and on several occasions Mr. E. J. Thomas, of the University Library, Cambridge, a former member of the Dictionary staff, has rendered similar service.

On many technical points recourse has been had to experts, who have generously placed their knowledge and their time at the service of the Dictionary. Among these the following have furnished special information: the late Prof. A. S. Napier, Mr. W. H. Stevenson, and Mr. K. Sisam, on the early history of some native words; Prof. D. S. Margoliouth and Dr. A. E. Cowley on questions of Semitic etymology; Dr. James Morison on the languages and lore of India; Mr. C. C. J. Webb on several philosophical terms; the

The progress of this portion of the Dictionary has been retarded by the withdrawal in succession of several members of the staff, and, in the second half of the year 1918, of the editor, for war service of different kinds. The assistants to whom has fallen the chief share in the preparation of Su-Sz are Mr. A. T. Maling, M.A., and Mr. F. J. Sweatman, M.A., and the Misses Elsie M. R. and Rosfrith N. R. Murray, all members of the late Sir James Murray's staff. Others who were engaged upon it for longer or shorter periods are Mr. J. W. Birt, Mr. P. T. J. Dadley, Mr. W. J. Fortune, Mr. H. R. Simpson, Mr. F. A. Yockney, and the late Mr. James Dallas.

15. snb voce, under the word (so-and-so); abbre-

Sub- (svb, sah) prefix, repr. L. sub- = the prep. sub under, close to, up to, towards, used in composi-tion (cf. UNDER-) with the various meanings detailed below. (The related Skr. upa-, Gr. υπο- have

a similar range of meaning.)

The b of L. sub-remained unchanged when it preceded a radical beginning with s, t, or v; before m and r it was frequently assimilated (see e.g. Summon, Surrogate), and before c, f, g, and p it was almost invariably assimilated (see e.g. Succeed, SUFFER, SUGGEST, SUPPOSE). Variation is illustrated by L. subfuscus Subfuso beside L. suffuscus, subrogātus Subrogate beside surrogātus Surro-GATE. A hy-form subs- (cf. ABS-) was normally reduced to sus- in certain compounds with words having initial e, p, t, e.g. suscipére, suspendère, sustinère (see Susception, Suspend, Sustain); and before sp- the prefix becomes su-, as in suspicere, suspīcio, suspirāre (see Suspect, Suspicion, SUSPIRE).

The original force of the prefix is either entirely lost sight of or to a great extent obscured in many words derived immediately or ultimately from old Latin compounds, such as subject, suborn, sub-scription, subserve, subsist, substance. (Where the prefix occurs in an assimilated form and is consequently disguised, as in succeed, suffer, suppose, an analysis of the compound does not readily suggest itself.) As a living prefix in English it bears a full meaning of its own and is freely employed in the majority of the senses defined below. Appropriate majority of the senses defined below. Appropriate originally to composition with words of Latin origin it has become capable of being prefixed to words of native English or any other origin. This extension took place as early as the 15th c., but the beginnings of the wide use of which it is now capable date from the latter half of the 18th c., to which a large number of the earliest examples of scientific terms belong.

The more important and permanent compounds, whether general or technical, are entered in this Dictionary as main words; in the present article are treated such compounds of a general character as have not a permanent status in the language and scientific terms the meaning of which may (for the most part) be gathered from the meaning of the prefix and that of the radical element.

prefix and that of the radical element.

In Romanic, sub- was replaced by subtus- as a living prefix; e.g. sublevare was ousted by "subtuslevare, whence OF. souz-, sonstever, mod.F. soutever. (Cf. South- 1). But sub- appears in OF. (r) from the 12th cent. in learned adoptions of old Latin compounds, e.g. suborner to Subner, substance, subversion, (2) from the 14th cent. (with variant soub-) in forms substituted for older compounds with souz-, sous-; e.g. submayeur (cf. soustmaire) sub-mayor, sub-prieur (cf. soustprieur) Subrrior, (AF.) subtaxour subtaxer, subvicaire sub-vicar (see 6 below); soubmetre for sousmetre to Submit.

Pronunciation. The prefix bears the main stress

(1) in the following words derived from compounds of the old Latin stock, viz. su bject (sh.), su bscript, su bstance, su burb; su ballern, su bdolous, su bjugate, su blimate, su bsequent, su bsidize, su bsidy, substantive, substitute, subtrahend; also in submarine; (2) in words in which there is an implicit contrast with the simple word, e. g. swbarch, swb-class, swbflavour, swbgenus, swb-office, swbsection, swbsoil. (As with other prefixes that express contrast, the principal stress is always on sub- when the contrast is explicit, as deacon and subdeacon, to let or sublet, epithelial and subepithelial tissue.) The prefix is stressless and the quality of its vowel is consequently reduced in subduce, subdue, subje ctive, subjoin, subjunctive, sublime, submerge, submit, subordinate, subreption, subscribe, sub-serve, subside, subsidiary, subsist, substantial, substratum, subsume, subtend, subtract, suburban, subverne, subvert, and their derivatives. In other cases the prefix bears a stress varying from a light secondary to a stress even with that of the second element of the compound (the vowel being consequently unobscured), as in su ba cid, su bela vian, su bdean, su bope reular, su bterra nean. In compounds belonging to branch II, even stress tends to prevail.

I. Under, underneath, below, at the bottom (of). 1. Forming adis, in which sub- is in prepositional relation to the sb. implied in the second element, as in L. subaquancus = that is sub aqua under water, Subaquaneous, subdiālis = that is sub diō, Subdial, subterraneus = that is sub terra, Sub-TERRANEAN, -EOUS.

respect to the day in the state of the preparation of the compounds of this class may coincide in form with compounds having a different analysis. Thus, subablominal = under the abdomen, f. subablomine + AL, coincides with subablominal not quite abdominal, f. Sub-20 d + Audominal, so Suberaphila, form as Suberaphila Suberaphila, or (2) f. subumbrella (see f below) + AR = pertaining to the subumbrella; so Suberaphila, In the same whichever analysis is taken.)

In some of these compounds the implied regimen of the prep. is not a simple sb. but a group consisting of an adj. and a sb., the adj. being the element represented in the compound; e.g. subdured.

In the following list explanations of the radical element have been occasionally added in brackets; in most instances the meaning of the compound is readily inferred from that of the prefix and of the second element. Many more words of this class are to be found in the medical dicts. of Hillings, Dorland, and others, Sydenham Society's Lex., Allbutt's Syst. Med., Buck's Handble, Med. Sci., etc.

2. Eng. Hist. A pecuniary aid granted by parliament to the sovereign to meet special needs. In the 14th and 15th centuries the term (occurring, in the AF. form subside, in 1340 Rolls Parlt. II. 112/2, 117/1, 1353 ap Edw. III stat. ic. 4, 1325 ap Rich. II stat. ii. c. 3) was applied mainly to the taxes on cloth, wool, leather, and skins, and the duties of tonnage and poundage. In Todor times it was applied pre-eminently to a tax of 4s. in the pound on lands and 2s. 8d. in the pound on movables. Its application to tonnage and poundage was continued in acts of parliament until 1707 Act 6 Anne. c. 43. In 1698 an increased percentage of duty charged upon certain articles was known as the New Subsidy.

The term has been extended by legal and historical writers to the aids derived from the tenth, the fifteenth, and other sources. The old lawyers, e. g. Coke, term the duties on wool, skins, and leather, 'perpetual' subsidies, the others being classed as 'temporary'.

The OE. swelc and swilc represent primitive *swalfko- and *swiltko- respectively, the latter being an analogical formation on *hwiltko- WHIGH; cf. OE. hwile beside hwele (:—*hwalfko-), and Goth. hwileiks. Evidence for the rounding of swile to swyle appears late in the 9th c., and a sporadic spelling swulc is found from c 1000. Swylc and swulc became in ME. swülch, swulch, which, by the absorption of w and loss of l, gave such (in ME. written also soch), the modern standard form. The dropping of w was carried through into the other types swe(l)ch and swi(l)ch, whence the widespread dial. forms sech and sich. Thus, and by similar cross-influences, a large variety of forms arose, which can be grouped according to (1) the quality of the vowel, (2) the retention or loss of w, (3) the retention or loss of l, as well as (4) the palatalization or non-palatalization of c. The palatalization or non-palatalization of c. The unpalatalized forms SWILK and SIC (swelk, swik, silk, etc.) are treated separately in their alphabetical

The vocalism of the continental forms is in many points obscure. Some of them indicate the possibility of there having been new formations distinct from the original types, and there has no doubt heen interaction of the forms of Which, the development of which, presumably on account of the difference of the initial sound, has not been entirely parallel.]

B. Signification.

Such is a demonstrative word used to indicate the quality or quantity of a thing by reference to that of another or with respect to the effect that it produces or is capable of producing. Thus, syntactically, such may have backward or forward reference; in the uses of branch I it has the former, in those of branch II mainly the latter.

The use of such and such a in the attributive position is illustrated in detail only in sense 1, but the same rules apply to the adj. generally; for special uses see branch IV.

I.1. Of the character, degree, or extent described, referred to, or implied in what has been said.
