MAURETA'NIA, the NW. coast of Africa, now known as the Empire of Murocco, Fez, and part of Algeria, or the Mogh'rib-al-akza (furthest west) of the natives.

## I. Name, Limits, and Inhubitants.

This district, which was separated on the E. from Numidia, by the river Ampsaga, and on the S. from Gactulia, by the snowy range of the Atlas, was washed upon the N. cosst by the Mediterranean, and on the W. by the Atlantic. From the earliest times it was occupied by a prople whom the ancients distinguished by the name Matrusil (Mavpouvio, Strab. i. p. 5, iii. pp. 131, 137, xvii. pp. 825, 827: Liv. xxiv. 49 ; Virg. Aen. iv. 206; Mavofivato،. Ptol. iv. 1. § 11) or Mauri (Maupoi, "Blacks," in the Alexandrian dialect, Paus. i. 33 § 5, viii. 43.
§ 3; Sall. Jug. 19 ; Pomp. Mela, i. 4. § 3; Liv. xxi. 22, $x$ xviii. 17; Horat. Curm. i. 22. 2, ii. 6. 3. iii. 10. 18; Tac. Ann. ii. 52, iv. 523, xiv. 28, IIist. i. 78 , ii. 58, iv. 50 ; Lucan, iv. 678 ; Juv. v. 53, vi. 337 ; Flor. iii. 1, iv. 2); hence the name Mauretania (the proper form as it appears in inscriptions, Orelli, Inscr. 485, 3570, 3672; and on coins, Eckhel, vol. vi. p. 48; comp. Tzchucke, ad Pomp. Mela, i. 5. § 1) or Mauritania (Maupitavia, Piol. iv. 1. § 2; Caes. B. C. i. 6, 39; Hirt. B. Afr. 22; Pomp. Mela, i. 5; Plin. v. 1; Eutrop. iv. 27, viii. 5 ; Flor. iv. (the MSS. and printed editions vary between this form and that of Mauretania): in Mavpoúatcev rin, Strab. p. 827). These Monrs, who mast not be considered as a different race from the Numidians, but as a tribe belonging to the same stock, were represented by Sallust ( $J u g .21$ ) as a remnant of the army of Hercules, and by Procopius (B. V. ii. 10) as the posterity of the Canamapans who fled from the robber ( $\lambda \eta \sigma \tau t / s$ ) Joshina; be quates two columns with a Phoenician inscription. Procopius has been supposed to be the only, or at beast the most ancient, author who mentions this inscription, and the invention of it has been attributed to himself; it occurs, however, in the history of Moses of Chorene (i. 18), who wrote more than a century befure Procopius. The same inscription is mentioned by Suidas (s.v. Xavdav), who probably quates from Procopius. According to mosit of the Arabian writers, who adopted a nearly similar tradition, the indigenous inhabitants of N. Africa were the people of Palestine, expelled by Darid, who passed into Africa under the guidance of Goliah, whom they call Djalout. (St. Martin, Le Beau, Bas Empire, vol. xi. p. 328 ; comp. Gibbon, c. xli.) These traditions, though so palpably fabulous, open a field to conjecture. Without entering into this, it seems certain that the Berbers or Bereibers, from whom it has been conjectured that N . Africa received the name of Barbary or Barbaria, and whose language has been preserved in remote mountainous tracts, as well as in the distant regions of the desert, are the representatives of the ancient inhabitants of Mauretania. (Comp. Prichard, Physical Hist. of Mankind, vol. ii. pp. 15-43.) The gentile name of the Berbers-A mazigh, "the noble language"is found, according to an obserration of Castiglione, even in Herodotus (iv. 191, ed. Baihr). - where the correct form is Mazyes (Ma̧úes, Hecataeus, ap. Steph. B. s. v.), which occurs in the MSS., while the printed editions erroneously give Ma̧úes (Niebuhr, Lect. on Anc. Ethnog. and Geog. vol. ii. p. 334), - as well as in the later Mazices of Ammiamos Marcellinus (xxix. 5; Le Beau, Bas Empire, vol. iii. p. 471 ; comp. Gibbon, c. $x$ xp.).

## II. Physical Geography.

From the extraordinary capabilities of the soil one vast corn plain extending from the foot of Atlas to the shores of the Atlantic - Mauretania was fonnerly the granary of the world. (I'lin. xviii. 20.) Under a bigoted and fanatical government, the land that might give food to millions, is now covered with weeds. Throughont the plains, which rise by three great steps to the mountains, there is great want of wood ; even on the skirts of the Atlas, the timber does not reach any great size - nothing to justify the expression of Pliny (" opacum nemorosumque" จ. 1 ; comp. Journ. Geog. Soc. vol. i. pp. 123-155; Barth, Wanderunyen).

Strabu (xvii. I'Y. 826-832) has given an account
of the productions of Manretania, marvellous enongh, in some particulars, as where he describes weasels as large as cats, and leeches 10 ft . long; and amıng other animals the crucodile, which there can scarcely be any river of Marocco capable of nourishing, even if the clinate were to permit it. (In Aegypt, where the average heat is equal to that of Senegambia, the crocodile is seldom seen so low as Siout.) Pliny (viii. 1) agrees with Strabo (p. 827) in asserting that Mauretania produced elephants. As the whole of Barbary is more European than African, it may be doubted whether the elephant, which is no longer found there, was ever indigenous, though it may have been naturalised by the Carthaginians, to whom elephants were of importance, as part of their military establishment. Appian (B. P. 9) snys that when preparing for their last war with the Romans, they sent Hasdrubal. son of Gisco, to hunt elephants; he could have hardly gone into Aethiopia for this purpose. Shaw (Trav. p. 258 ; Jackson, Marocco, p. 55) confirms, in great measure, the statements of Strabo (p. 830) and of Aelian (H.A. iii. 136, vi. 20) about the scorpion and the "phalancium," a species of the "arachnidue." The "solitanus," of which Varro (de Re Rustica, iv. 14. §4; Plin. ix. 82) gives so wonderful an account, has not been identified. Copper is still worked as in the days of Strabo (p. 830), and the natives continue to preserve the grain, legames, and other produce of their husbandry in " matmoures," or conical excavations in the ground, as recorded by Pliny (xviii. 73 ; Shaw, p. 221).

Mauretania, which may be described generally as the highlands of N. Africa, elevates itself like an island between the Mediterranean, the Atlantic, and the great crean of sand which cuts it off towards the $S$. and E. This "plateau" separates itself from the rest of Africa, and approximates, in the form and structure, the height, and arrangement of its elevated masses, to the system of mountains in the Spanish peninsula, of which, if the straits of the Mediterranean were dried up, it would form a part. A description of these Atlantic highlands is given in the article Atias.
Many rivers flow from this great range, and fall into the Mediterranean, and the Atlantic. Of these, the most important on the $N$. coast were, in a direction from E. to W., the Ampsaga, Usah, Chinalapr, and Mulucha; on the W. coast, in a direction from NE.to SW., the Subur,Saia, Phuti, and Lixus.

The ceast-line, after passing the Ampsaga ( Wad-el-Kibir) and Sinus Numidicus, has the harbours Iglleilis (Jijeli), Saldae Ps. (Bujeigah), and Rusucurrium (Tedlez). Weighing frum Alyiers, and passing Iomxium (Ras-al-Kanatir), to stand towards the W., there is a rocky and precipitous coast, mostly bold, in which in succession were tho ports and creeks Iol (Zershell), Cartenna (Tenez), Merestaga (Mostaghamm), Arsenaria (Arzún), Qfiza (Wahran or Oran); Portus Magnus (Marsa Kibir), within Metagoniem Peom. (Ras-al Harsbah); and Acra (Ishgun). The Mulucha falls into the Gulf of Melilah of the charts. About 10 miles to the NW. of this river lay the Tres Insulank (Zaphran or Jajercii groap) ; about 30 miles distant from theso rocks, on a NW. by W. rhumb, was Rusaine Prom. (Cap Tres Forcas of the Spanish piluts, or Ras-ud-Dehur of the natives), and in the bight formed between it and the Dlulucha stuod Rusadile
（Melileh．）W．of Cap Tres Forcas，which is a termination of an offsho th of the secondary chain of the Atlias，was the district of the Metagonitae， extending to Abyla（Jebel－el－Mina）．From here to Tingis（Tangier）the coast is broken by alternate cliffs and coves；and，still standing to the W．，a bold shore presents itself as far as the fine headland of Ampridusia（Cape Spartel；Ras－el－Shukkir of the natives）．From Cape Spartel to the SSW．as far as Zilis（ Arzila），the coast－line is a flat，sandy， and shingly beach，after which it becomes more bold as it reaches Lixus（Al－Harátch or Laráiche）． （Smyth，The Mediterranean，pp．94－9y．）A dessription of the SW．const is given in the article Labya．（Comp．C．Müller，Tab．ad Geog．Graec． Minores，ed．Didot，Paris， 1855 ；West Coast of Africa surveyed，by Arlett，Vidal，and Boteler，1832； Cöte occulentule de lAfrique au Dépot de la Ma－ rine，Paris， 1852 ；Carte de l＇Empire de Maroc， pur E．Renou， 1844 ；Barth，Karte vom Nord Afrikanischen Gestadeland，Berlin，1849．）

## III．History and Political Geography．

The Romans first became acquainted with this country when the war with Hannibal was transferred to Africa；Mauretania was the unknown land to the W．of the Mulucha．In the Jugurthine War，Boc－ chus，who is called king of Mauretanis，played the traitor＇s part so skilfully that he was enabled to hand over his kingdon to his two sons Borydes and Boc－ choris，who were associated upon the throne．These princes，from their hostility to the Pompeian party， were confirmed as joint kings of Mauretania by J．Capsar in b．c．49．During the civil war between M．Antonius and Octavius，Bocchus sided with the latter，while Bogudes was allied with Antonins． When Bogudes crossed into Spain，Bucchus seized upon his brother＇s dominions；a usurpation which wis ratified by Octavius．In B．C．25，Octavius gave to Juba II．，who was married to the daughter of Cleopatra and Antonins，the two provinces of Mau－ retania（afterwards called Tingitana and Caesarien－ sis）which had formed the kingdom of Bogudes and Bucchus，in exchange for Numidia，now made a Roman province．Juba was succeeded by his son Ptolemy，whom Selene，Cleopatra＇s daughter，bore to him．（Strab．xvii．pp．828．831，840．）Ti－ berius loaled Ptoleny with favours on arcount of the assistance he gave the Romans in the war with Tacfarinas（Tac．Ann．iv．2：3－26）；but in A．D． 41 he was put to death by Caligula．（Dion Cass． lix．25；Suet．Cal． 26 ；Seneca，de Tranq．11．） For coins of these native princes，see Eckhel，vol．iv． pp．154－161．
In A．D．42，Claudius divided the kingdom into two provinces，scparated from each other by the river Mu－ lucha，the ancient frontier between the territories of Bocehus and Jugurtha；that to the W．was called Maubetania Tingitana，and that to the E．Mau－ ketania Calesariensis．（Dion Cass．Ix．9；Plin． v．1．）Both were imperial provinces（Tac．Iist．i．11， ii．58：Spart．IIadr．6，＂Mauretaniae praefectura＂）， and were strencthened by numerous Roman＂co－ lomiae．＂M．Tingitana contained in the time of l＇liny（l．c．）five，three of which，Zilis，Barba， and Banasa，as they were founded by Augustus when Mauretania was independent of Rome，were reckoned as belonging to Baetica．（Plin．l．c．；Pomp． Mela，iii．10．§ 5．）Tingi and Lixus were colo－ nies of Clandius（Ilin．l．c．）；to which were added in later times Ibusadin and Volubilis（Itin．Anl．）．

MaURETANIA．
M．Caesariensis contained pight colonies founderd by Augustus，Cartenna，Gunugi，Igilgili，Rus－ coniae，Rusazcs，Salde，Succabar，Tubesut－ tus；two by Claudius，Caesareia．fonnerly lot， the capital of Juba，who gave it this name in honour of his patron Augustus，and Oppidem Novem； one by Nerva，Sitifis；and in later times，Arse－ varia，Bida，Siga，Aquar Calidae，Quiza， Rusucurriim，Aizia，Gilya，Icosium，and Ti－ pass，in all 21 well－known colonies，besides several ＂municipia＂and＂oppida Latina．＂The Notitia enumerates no less than 170 episcopal towns in the two provinces．（Comp．Morcelli，Africa Christiana， vol．i．pp．40－43．）About A．v．400，Mauretania Tingitana was under a＂Praeses，＂in the diocese of Spain；while Mauretania Caesariensis，which still re－ mained in the hands of the diocese of Africa，was divided into Mauletania I．or Sitifensis，and Mauretania II．or Caesamensis．The emperor Otho had assigned the cities of Mauretania to Baetica （Tac．Hist．i．78）；but this probably applied only to single places，since we find the two Mauretaniae re－ mained unchanged down to the time of Constantire Marquardt，in Becker＇s Ilandbuch der Këm．Ath． pp．230－232；Morcelli，A fricana Christiana，vol．i． p． 25.$)$

In A．d．429，the Vandal king Genseric，at the invitation of Count Boniface，crossed the straits of Gales，atid Mauretania，with the other African pro－ vinces，fell into the hands of the barbarian con－ querors．Belisarius，＂the Africanus of New Rome，＂ destroyed the kingdom of the Vandals，and Maure－ taria again becaine a Roman province under an Eastern exarch．One of his ablest generals，John the Patrician，fur a time repressed the inroads of the Moors upon Roman civilisation；and under his successor，the eunuch Solomon，the long－lost pro－ vince of Mauretania Sitifensis was restured to the empire；while the Second Mauretania，with the ex－ ception of Caesareia itself，was in the hands of Mas－ tigas and the Moors．（Comp．Gibbon，cc．xli．xliii．； Le Beau，Bres Empire，vol．viii．）At length，in A．D．698－709，when the Arabs made the final conquest of Africa，－desolated for 300 years since the first fury of the Vandals，－the Moons or Berbers adopted the roligion，the name，and the origin of their conquerns，and sunk back into their more congenial state of Mahometan savages．

Pliny（l．c．）makes out the breadth of the two Mauretaniae ss 467 M．P．；but this will be too much even for Tingitania，where Mount Atlas lies more to the S．，and mire than 300 M．P．beyond the utmost extent of any part of Caesariensis．The same author gives $170 \mathrm{M} . \mathrm{P}$ ．，which are too few for Tingitania， and $879 \mathrm{M} . \mathrm{P}$ ．，which are too many for Caesariensis． （Shaw，Trav．p．9．）
The following tribes are enumerated by Pto－ lemy（iv．2．§§ 17－22）in I．Mauretania Cabshmensis：－Toducas（Toduикau），on the left bank of the Ampsaga；to the N．of these， Coedamisil（Kotōauovaiot），and still more to the N．，towards the coast，and to the E．on the Ampsafa，Muceni（Moukoinor）and Chitriar （Xitoial）；to the W．of the latter，Tclensii（Tou． $\lambda \eta \boldsymbol{\eta} \boldsymbol{t o l}$ ）and Bavicui（Bavioupol）；S．of thest， Machtres（Mayoípes）．Salassit（ $\sum a \lambda d \sigma \sigma t o i$ ）， and Maicinubir（Ma入⿲oúbiol）；NW．of the Ti－－ lessit，and to the E．of Zalacts M．，and on the coast，Macchurebi（Maкхoup $\overline{6}$ or）：W．of these， and N．of Zalacus，on the mouth of the Chinalaph， Machicsil（Ma又ovotor）；below theus on the other
side of Zalacus，Mazices（Másikes）；and S，up to the Garaphi M．，Banturabit（Baytoupdpiot）； still further to the S．，between Garaphi M．and Cinnaba M．，Aquensil（＇Akoutivgiot），Myceni （Muкท̄yoi），and Maccurae（Maккoûpal）；and below them，in the S ．，on the N．spurs of Cimnaba， Evabasi（＇Evábajol）；W．of these，between Ga－ raphi M．and Durdus M．，Nacmisil（Naкцпúvior），
 of these and Durdus M．，Dryitae（ $\Delta \rho \dot{\text { ütaitar }}$ ）；then Sornes（ $\Sigma \omega \bar{p} a_{1}$ ）；and on the W．of the Machusii， Taladesil（TaNadoúgiol）．The Heipeditani （＇Epteòitayoi）extended into II．Mauretania Tingitana（Ptol．iv．1．§§ 10－12）；to the S．of them，the Maurensil（Mavpyivotor）；toward the SW．，Vacuatae（Ouanouâtai），Baniubars（Ba－ noûbar）；then，advancing to the N．，Zegressin （Zeqpìjoio），Nectiberes（Neкtlèpes），Jan－ gaccani（＇Iayyauayoi），Volubiliani（Oubbidi－ ajui），Verves（Oúepoveis），and Socossil（ （wko－ oivi），upon the crest；；to the W．，the Metago－ nitak（Metaravitas）；and to the S ．of them， Masices（Máaikes），and Verbicae or Verbices （Oícptıкаи al．Oípbices）；to the S．and to the W．of the Volubillani，Salinsae（Ea入ipoai） and Cauni（Kaùvor）；still further to the S．，to the Little Atlay，Bacuatae（Bakovâtal）and Maca－ nithe（Макауitar）．

MaUKI，MAUKUSII．［Mauretania．］
MAURIA＇NA．［Marinlana．］
maumita＇nia．［Mavretania．］
MAXE＇RA（Ma乡ク̆pa，Ptol．vi．9．§ 2：Amm． Marc．xxiii．6），a river of Hyrcania，which flowed into the Caspian sea．Pliny calls it the Maxeras（vi． 16．s．18）．It is not certain with which modern river it is to be identified，and geographers have variously given it to the Tedjin，the Bubul，or the Gurgan．If Ammianus，who speaks of it in con－ nection with the Oxus，could be depended on，it would appear most probable that it was either the Atrek or the Gurgan．The people dwelling along this river were called Maxerae．（Ptol．vi．9．§ 5．）
［V．］
MAXILU＇A（Ma̧ı入ov̂a，Ptol．ii．4．§ 13），a town in Hispania Bartica，which，like Calentum，was celebrated for its mamufacture of a sort of bricks light enough to swim on water．（Plin．xxxv．14．s． 49 ； comp．Strab．xiii．p． 615 ；Vitruv．ii．3；Schneider， ad Eicl．Phys．p．88．）It was probably situated in the Sierra Mlurena．（Florez，Esp．Sayr．xii．p． 259．）

MAXIMIANO＇POLIS（Ma§ıMıavoúтo入ıs），a town of Thrace，furnerly called Imipara or Piresoatis （1t．Ant．p．331），not far from Rhodoye（Amm． Marc．xxvii．4），and the lake Bistonis（Melet．p．439， 2：It．Uieros．p．603；Hierocl．p．634；Const． Porph．de Them．ii． 1 ；Procop．de Aed．iv． 11 ； Conce Chal．p．96．）

MAXIMIANO＇POLIS．［Constintia．］
MAXIMIANO＇POLIS（Ma乡！utavozonts），the classical appellation of the Scriptural Hadadrimmon （Kecharich，xii．11）in the plain of Megiddo， 17 M．P．from Caesareia（of Palestiue），and 10 MI P． from Jeareel，according to the Jerusalem Itinerary ； consistently with which notice St．Jerome writes：－ ＂Adadremmom，pro quo LXX．transtulerunt Pow－ yos，urbs est justa Jesratelen，quae hoc olim vocabulo nuncupata est，et hodie vocatur Maximianopolis in Campo Mageddon＂（Comm．in Zachar．l．c．）；and again．－＂diximus Jesraelem，quase nunc juxta Maxi－ mianopulin est＂（in Hos．1）．It is placed in the civil
and ecclesiastical division of Palaestina Secunda，and its bishop assisted at the Council of Nicaea．（Reland， Paliestinu，pp．891，892．）
［G．W．］
MAXU＇LA（Makoû̃a，Ptol．iv．3．§ 7 ），a Kuman ＂colonia＂（Maxulla，Plin．v．3），about the exact distance of which from Carthage there is a consi－ derable discrepancy in the Itineraries（Anton．Itin．； Peut．Tab．）．From an expression of Victor Vitensis （de Persecut．Vanclal．i．5．§ 6），who calls it＂Li－ gula，＂＂a tongue of land，＂its position was prohably on the coast，between $R^{\prime} \dot{a} d e s$ and Hammim－el－E＇uf， where there are the remains of a Roman road．

The Cuast－describer（Stadiasm．）speaks of the harbour and town of Maxyla as 20 stadia from Crapis，or the modern Garbos：this was probably diftierent from the forner，and is the modern Mrisa， where there are the remains of a town and harbour （Shaw，Trav．p．157；Barth，Wanderungen，p．128．） As connected with the gentile epithet Mlaxyes or Mazyes，it is likely that there were several places of this name．Ptolemy（iv．3．§ 34）has Maxuia Vetus（Mágou入a Mà入aia），and the Antonine Itinerary a station which it describes as Maxula Prates， 20 M．P．from Carthage．It is found in the Notitia，and was famous in the annals of Mar－ tyrology（Aurustin，Serm．c．Ixxxiii；Morcelli， Africa Christiana，vol．i．p．220．）［E．B．J．］

MAXYES（Mákues，Herod．iv．191，where the name should be Másues ；see Mauretania，p．297， a．），a Libyan tribe，and a branch of the nomad Au－ senses．Herudotus（l．c．）places them on the＂other side，＂i．e．the W．bank，of the river Triton：reclaimed from nomad life，they were＂tillers of the earth，and accustomed to live in houses．＂They still，however， retained some relics of their furmer customs，as ＂they sufler the hair on the right side of their heads to grow，but shave the left ；they paint their budies with red－lead ：＂remains of this custom of wearing the hair are still preserved among the Tuaryks，their mokern descendants．（Hornemamn， Trav．p．109．）They were probably the same people as thuse mentioned by Justin（xviii．7），and called Maxytani，whose king is said to have been Hiarbas（Virc．Aen．iv．36，196，326），and to have desired Dido for his wite．（Heeren，African Nations， vol．i．p．34，trans．；Remnell，Gecm．of Herod．vol．ii． p．303．）
［E．B．J．］
MazaCA．［Cafgarela，Vol．I．p．469，b．］
MAZAEl（Masaĩo），a Pannonian tribe，nccu－ pying the southernmest part of P＇annonia，on the frontiers of Dalmatia，whence Dion Cassius（Iv． 32）calls them a Dalmatian people．They were coninuered and severely treated by Germanicus． （Strab．vii．p． 314 ；Plin．iii．26；Ptol．ii． 16. § 8．）
［L．S．］
 Muzzura），a town on the SW．coast of Sicily，situ－ ated at the mouth of a river of the same name，be－ tween Selinus and Lilybaeum．It was in early times an inconsiderable place，and is first noticed by Diodorus in B．c．409，as an emprorium at the mouth of the river Mazarus．（Diod．s：ii．54．）It was evidently at this time a dependency of Sclinus， and was taken by the Carthaginian general Han－ nibal，during his advance upon that city．（Divd． L．c．）Stephanus of Byzantium calls it＂a fort of the selinuntines＂（ $\phi$ poupion $\Sigma_{i \in \lambda t v o u v t i \omega v, ~ S t u p h . ~}^{\text {a }}$ B．s． $\boldsymbol{r}$ ．），and it is mentioned again in the First l＇unic Wiar as a furtress which was wrested by the Romans from the Carthafr：ians．（Divd．xxiii． 9. p．503．）

It does not reem to have ever risen in ancient times to the rank of a city. Pliny mentions the river Mazara, as does Ptolemy also, but neither of them notice the town. (Plin. iii. 8. s. 14 ; Ptol. iii. 4. § 5.) The existence of this last is, however, attested by the Itinerary, which correctly places it 12 miles from Lilybaeum (Itin. Ant. p. 89); but it was first raised to an important position by the Saracens in the 9th century, under whom it became the capital of the whole surrounding district, as it continued under the Norman rule. The western province of Sicily still bears the name of Val di Mazara, but the town itself has greatly declinel, though it still retains the rank of a city, and has about 10,000 inhabitants. (Fazell. de Reb. Sic. vi. 5. p. 284; Smyth's Sicily, p. 224.) A few sarcophagi and inscriptions are the only remains of antiquity extant there.

The river Mazara, or Mazaris, as it is called by Diodorus (Májapos, Diod. xiii. 54), is still called the Fiume di Mazzara. [E.H. B.]

MAZICES (MáSıces, Ptol. iv. 2. § 19: Mazax, Lucan, iv. 681; (laudian, Stil. i. 356 ), a perple of Mauretania Caesariensis, who joined in the revolt of Firmus, but submitted to Theodosius, A. D. 373. (.Amm. Mare. xxix. 5. § 17 ; Le Beau, Bas Empire, vol. iii. p. 471 : comp. Gibbon, c. xxv.) [E. B. J.]

ME'ARUS' (Méapos, Ptol. ii. 6. § 4; Mela, iii. 1. §9), a small river on the N. coast of Hispania Tarratonensis, flowing into the gulf of the Artabri, still called the Mero.

MECIRIS, a town of Marmarica, which the Peutinger Table places at 33 M . P. to the E. of Paliurus ; the Antonine Itinerary has a town Michera (one MS. reads Mecira), 20 M. P. to the E. of the same place; its position must be sought in the Waly-er-Réma (Barth, Wanderungen, pp. 509, 549.)
[E. B. J.]
 vaios, Steph. B.; Sryl. p. 26 ; Scymn. 640), a town which stoxd at the head of the Toronaic gulf, which was also ralled Sinus Mecybernakces. (Plin. iv. 10 ; Pomp. Mela, ii. 3. § 1.) Mecyberna was the port of Olynthus (Strab. vii. p. 330), and lay between that town and Sermyle. (Herod. vii. 122.) It was taken from the Athenians by the Chalcidic Thracians (Thuc. v. 39), and surrendered to Philip before the siege of Olynthus. (Dind. x xi. 54.) 'The site must be soucht at Molitópyryo, where some remains of antiquity are said to be preserved. (Le.ke. Nurth. Greece, vol. iii. p. 155.) [E. B. J.]
 plami by Ptolemy in long. $68^{\circ} 30^{\prime}$, lat. $30^{\circ} 45^{\prime}$, doubtless identical with Medeba or Madeba [Mnder.s], the letters av and ab being identical in soun:d, and, con-equently, used interchangeably, especially in proper names. (P'tol. v. 17.§ 6.)
[G. W.]
AlEIDALLA (Ad Medera, Itin. Anton. ; Peut. Tıb.; Hygin. de Lim. p. 163; 'A $\mu \mu a i \delta a p a ~ a l . ~$ 'А $\mu \mu \epsilon \delta \epsilon \rho a$, l'tol. iv. 3. § 30 : Eth. Medaurensis), a town of Numidia, which had originally belonged to the kingiom of Syphax, but was annesed to that of Massinissa at the close of the Second P'unie War, and afterwards was colonised by a detachment of Roman veterans, when it attained considerable splendour. Appuleius was born at this place, where his father had been "duumvir," and calls himself" Seminumida" and "Semigaetnlus." (Apolog. Pr. 44:3, 444.) It lay on the road from Lares to Theveste, 48 M. P. from the former and 25 M. P. from the latter. At a river Abdatio, which Howed
between this place and Theveste, Mazcecel defeated the Moorish chieftain Gildo. (Oros. vii. 36; St. Martin, Le Beau, Bas Empire, vol. v. p. 161 ; comp. Giblon, c. xxix.) Justinian fortified and placed a garrison in this town, which Procopius (de Aed. vi. 6) calls A $\dot{\mu} \mu \dot{\epsilon} \tau \in \rho a$. It is perhaps a different place from Madaura, to which Augustine was sent to be educated (Confess. ii. 3).
[E. B. J.]
MEDEBA. [Madeba.]
MEDEN (Mydiv, Procop. B. V. ii. 4), a town on the spurs of Mount Papua, in the inland country of Numidia. Geliner, king of the Vandals retired to this fastness in A. D. 534, but was compelled to surrender to Pharas, chief of the Heruli. (Ie Beau, Bas Empire, vol. viii. p. 248; comp. Gibbon, c. x x i.)
[E.B. J.]
 Medion (Medíwv: Katúna), a town in the interior of Acarnania, on the road from Stratus and Phytia (or Phoeteiae) to Limnaca on the Ainbraciot gulf. It was one of the few towns in the interior of the country which maintained its independence against the Aetolians after the death of Alexander the Great. At length, in B. C. 231, the Aetolians laid siege to Medeon with a large fore, and had reduced it to great distress, when they were attacked by a body of Illyrian mercenaries, who had been sent by sea by Demetrius, king of Macedonia, in order to relieve the place. The Aetolians were defeated, and obliged to retreat with the loss of their camp, arms, and baggage. Medeon is again mentioned in B. c. 191, as one of the Acarnanian towns, of which Antiochus, king of Syria, obtained posivession in that year. (Thuc. iii. 106 ; Polyb. ii. 2, 3; Liv. $x \times x v i .11,12 ;$ Leake, Northern Circece, vol. iii. p. 575.)
2. A town of Phocis, destmyed along with the other Phocian towns at the termination of the Sacreti War, and never again restored. (Paus. x. 3. § 2.) Strabo places it on the Crissiean gulf, at the distance of 160 stadia from Bueotia (ix. pp. 410 , 423); and Pausanias says that it was near Antiçra (x. 36. § 6; comp. Steph. B. s. v.). Leake places it at Dhesfinde (Northern Grecce, vol. ii. p. 548.)
3. An ancient town of Buentia, mentioned by Homer (Il. ii. 501), is described by Strato as a dependency of Haliartus, and situated near Onchestus, at the foot of Mt. Phomicium, from which position it was afterwards called Phoenicis (ix. pp. 410. 423; comp. Steph. B. 8. v.; Plin. ir. 7. s. 12). It appears to have stond near the lake, in the bay on the north-western side of Mount Faga, between the site of Haliartus and Kardhitza. (Leake, Northern Grecce, vol. ii. p. 215.)
4. A town of the Labeates, in Dalmatia in Illyricum. (Liv. xliv. 23, 32.)

DEDERIACUM, in Gallia Belgica, is placed by the Antonine Itin. on a ruad from Colonia Trajana (Kelln) through Juliacum (Juliers) to Colonia Agrippina (Coliapme). It lies between Sablones and Teudurum (Tiuller), and is supposed by some grographers to be Merum-Ruremonule.
[G. L.]
 cós), a country of considerable extent and importance, in the western part of Asia, between the Claspian Sea on the N. and the great rivers of Mesopotamia on the W. It is by no means eavy to determine what were its precise boundaries, or how much was comprehended under the name of Media. Thus Herviutus, who sjeaks repeatedly of the Dledes,

Rives little or no description of the country they inhatited, and yerhaps all that could be inferred from his language is, that it must have been a mountainous district between the Halys in Asia Minor and Persia, fit for raising a warlike and independent race of men (i. 72). Again, during the wars of Alexander, Media had to a considerable extent taken the place of Persia, and was the great country E. of Mesopotamia, and extending indetinitely along the Caspian sea eastwards to Ariana and Bactrians. Still later, at the close of the Roman Republic and under the earlier emperors, Media was restricted by the encroachments of the Parthian empire to its most mountamous parts, and to the Caspian coust westwands, - the province of Atropatene fornning, in fact, all that could be strictly called Media. Indeed, its limits were constantly changing at different periods. General consent, however, allows that Media was divisible into three leading divisions, each of which from time to time was apparently held to be Media Proper. These were:-1. A northern territory along the shores of the Caspian, extending more or less from Armenia on the W. to Hyrcania on the E, comprehending much of the country now known by the names of Aazanderin and Gilin; 2. Media Atropatene, a very mountainous district, to the west and south of the preceding [Athopatene] ; and 3. Media Marna, the most southern, extensive, and, histurically, the most important, of the three divisions, with its capital licbatana (the present Humadin).

Of the ancient geographers, Ptolemy gives this country the widest boundaries. Media, says he, is bounded on the $N$. by the Hyrcanian (i. e. the Caspian) sea, on the W. by Armenia and Assyria, on the S. by Persis and a line drawn from As:yria to Susiana, and on the E. by Hyrcania and Parthia (vi. 2. §§1,3). It is clear from this, and still more so from the mention he makes of the tribes and towns in it, that he is speaking of Media in its most extended sense: while, at the same time, he does not recosuise the triple division noticel above, and speaks of Atropatene (or, as he calls it, Trupatene, vi. 2,5) as one only of many tribes.

Strabo, in the tolerably full account which he gives of ancient Media, is content with a twofold division, into Media Atropatene and Merlia Magna; to these he gives nearly the same limits as Ptolemy, comprehemding, however, under the former, the mountain tract near the Caspian (xi. pp. 522 526). Pliny, in stating that what was formerly Che kingdorn of the Persians, is now (in his time) under the Parthians, aplears only to recornise Media Magna as Media Proper (vi. 14. s. 17). Atrofatene, though subject to Fcbatana, the capital of Media Magra, he dues not seem to consider has any thing to do with it (vi. 13. s. 16).

We proceed now to describe Media Magna, the first or most northern part of what was popularly called Media having been fully noticed under Athopatene and kcbatana. It is very difficult to distinguish the classical accounts of the different divisions to which we have alluded, the name Media being used very indetinitely. It may, however, be stated generally, that Media Magna comprehended the whole of the rich and fertile plain-country which was shut in between the great chain of the Carduchian mountains and of Mit. Zagros in the W. and by Mt. Coronus on the N. It appears to have extended as far south as Elymais and Susiana, and to have burderad on the eastern side on Caramania and Arialla, or ou what, in later times, was better known
by the name of Parthia Some have attempted to prove that it derived its name from its lying in the middle part of Asia (Gesenius, Thes. ii. p. 768 ; cf. also Polyb. v. 44, who states, 'H Mndia
 however, admits of doubt. On the Cuneiform Inscriptions the name is read Mada (Rawlinson, Belistun Insc. As. Journ. vol. x.). Much of this land was of a high elevation above the sea, but it abounded in fertile valleys, famons for their richness, and in meadow land in which a celebrated breed of horses, called the Nisaean horses, were raised. (Herud. vii. 40, iii. 106; Diod. xvii. 100 ; Strab. xi. p. 525 ; Aelian, Hist. A nim. iii. 2 ; Ammian. xxiii. 6.; cf. also the modern travellers, Ker Porter, vol. i. p. 216, Chardin, and Morier.) It is comprehended for the most part in the modern province of Irúk Ajem.

The principal town of Media Magna was Fcbatana (doubtless the present Hanadain), which, during the time of the wars of Alexander, as for many years before, was the capital of the whole country. [Ecbatana.] Besides Ecbatana, were other towns of importance, most of them situated in the NF. part of the country, on the edge of, if not within, Atropatene, as Khagae and HEhacleita.

It is equally difficult to determine with accuracy what states or tribes belong to Media Mugna. It is probable, however, that the following may be best comprehended in this division:-The Sagartii, who occupied the passes of Mt. Zagros ; Choromithrene, in the champaign country to the south of Ecbatana ; Elymais, to the north of Choromithrene - if indeed this name has not been erroneously introduced here by Poleiny and Polybius [Elymais] ; the Tapyri or Tapyrrhi, S. of Mt. Coronus as far as Parthia and the Caspian Gates; Rhagiana, with its capital Rhagae: Sigriane, Daritis, and, along the southern end of the Parachoatras, what was called Syrumedia. (Sce these places under their respective names.)

The Medi, or inhabitants of Media, are the same people as the Madai of the Bible, from which Semitic word the Greek name is most likely derived. Madai is mentioned in Genesis, as one of the sons of Japhet (x. 2), in the first repeopling of tho earth sfter the Flood; and the same name occurs in more than one place, subsequently, indicating, as it would seem, an independent people, subject to the king of Ninereh (2 Kings, xvii. 6), or in connection with, if not subject to, the l'ersians, as in Lan. v. 28, vi. 15 ; Fisth. i. 3, 14. The first Greek author who gives any description of them is Herodotus. According to him, they wero originally called Anir, but changed their name to that of Medi on the coming of Medeia from Atheus(vii. 6:2). They were divided into six tribes, the Busae (Steph. Byz.), Paraetaceni (Strah. xi. p. 522, xvi. p. 739, dec. ; Arrian, iii. 19), Struchates, Arizanti, Budii (Steph. Byz.), and the Magi. Von Hammer Lias attemped to show that most, if not all, of these names occur under their l'ersian form in the Zendavesta and Shah-námeh (Wiener. Jahrb. ix. pp. 11, 12), but it may be questioned whether the identification can be considered as satisfactory. Some, however, of these names indicate the Eastern origin of the inhabitants of Media, as Arii and Arizanti [Aminna: Arizanti] ; though it may be doubted whether others of them, as the Magi, ought to be colsidered as separate tribes. The gencral evidence
is, that the Magi were a priest-class among the Median people; not, like the Achaemenidae in Persia, a distinct or dominant tribe. (Cf. Strab. xvi. p. 962 ; Cic. Itivin. $\mathbf{i} .41$; Porphyr. Abstinent. 4. 16, \&c.) In other authors we find the following penples counted among the irhabitants of Media, though it may be doubted whether some of them do not more properly belong to one or more of the adjacent nations: the Sagartii, Tapyri or Tapyrrhi, Matiani Caspii, Cadusii, Gelae, and the Mardi or Arnardi. (See these under their respective names.) Herodotus proceeds to state that originally the Medes were a free people, who lived in separate villages, but that at length they chose for themselves a king in the person of Deioces, who built the celebrated city of Ecbatana [Ecbatana], and was succeeded by Phraortes and Cyaxares (i. 95-103). The reign of the former was, he adds, terminated by a defeat which he sustained (at Rhages, Judith, i. 15) ; while, during the commencement of that of the latter, all We.tern Asia was overrun by a horde of Scythians (i. 103). There can be no doubt that for awhile they were subject to, and formed a satrapy of, the Assyrian empire. as stated by Diodorus (ii. 2); that then they threw off the Assyrian yoke, as stated by Herudutus (i. 106), and were ruled over by a series of kings of their own for a long period. (Cf. Strab. xi. p. 524.) The order and the names of these rulers are differently stated; and it would be out of place here to discuss at length one of the most difficult and disputed points of ancient chronology. (Cf., however, Diod. ii. 24, 32 ; Herod. i. 95; and Euseb. Chron. Armen. i. 101 ; Clinton, Fast. Hellen. vol. i. p. 257, app.) It may be remarked, that in the Bible the first notice we find of the Medes, exhibits them as the subjects of the Assyrian king Salmaneser (2 Kings, xvii. 6), who was contemporary with the Jewish king Hoshea; while in the later times of Nebuchaduezzar, they appear as a warlike nation, governed by their own rulers. (Isaiah, xiii. 17; Jerem. xxv. 25, li. 11, 28.) It is equally clear that the Medians were united to the Persians by Cyrus, and formed one empire with them (Herod. i. 129 ; Dind. ii. 34 ; Justin, i. 6), and hence are spoken of in the later books of the Bible as a people subject to the same ruler as the 1’ersians. (Dan. v. 28, viii. 20; Esth. i. 3, \&c.) From this time forward their fate was the same as that of the Persian monarchy; and they became in succession sulject to the Greeks, under Alexander the Great, to the Syro-Macedonian rulers after his death, and lastly to the Parthian kings. (Cf. 1 Macc. vi. 56, xiv. 2 ; Strab. xvi. p. 745 ; Joseph. Antiq. xx. 3. § 3.)
The consent of history shows that in early times the Medes were held to be a very warlike race, who had a peculiar skill in the use of the bow. (Isaidh, xiii. 18; Herod. vii.62; Xen. Anab. ii. J.§ 7 ; Strab. xi. p. 525.) They had also great knowledge and practice in horsemanship, and were considered in this, as in many other acquirements, to have been the masters of the Persians. (Strab. xv. pp. 525, 526, 531.) Hence, in the armament of Xerxes, the Medes are described as equipped similarly with the Persians, and Herodotus expressly states that their dress and weapons were of Dedian, not Persian origin (l.c.). In later ages they appear to have degenerated very much, and to have adopted a luxurious fashion of life and dress (cf. Xen. Cyrop. i. 3. § 2 ; Strab. L.c.; Ammian. xxiii. 6), which passed from them to their Persian conquerors.

The religing of the Medes was a system of Starworship; their priests bearing, as we have remarked, the name of Magi, which was common to them with the Persians, indeed was probably adopted by the latter from the former. (Xen. Cyr. iv. 5 ; Strab. xv. pp. 727, 735 ; Cic. Div. i. 33.) The principal object of their adoration was the Sun, and then the Moon and the five planets, Jupiter, Venux, Saturn, Mercury, and Mars.
[V.]
MEDIAE MURUS, mentioned only by name by Xenophon, who calls it тो Midias ка入ov́revov teíxos. (Anab. ii. 4. § 12.) He states that it was 20 parasangs in length, 100 feet high, and 20 broad; and it may be inferred from his narrative that it was from 30 to 40 miles to the $N$. of Baghdád. There can be little doubt that it was the same work as that called by Strabo in two places $\tau \delta \Sigma \in \mu \iota \rho \alpha \mu i \delta o s ~ \delta \iota a \tau e i \chi ı \sigma \mu a$ (ii. p. 80, xi. p. 529), and that it had been built across the strip of land where the Tigris and Euphrates approach most nearly, as a defence to the province of Babylonia, which lay to the $\mathbf{S}$. of it. There has been much question, whether this great work can be identified with any of the numerous mounds still remaining in this part of Mesopotamia; but the question has, we think, been set at rest by the careful survey of Lient. Lynch, in 1837. (Roy. Geogr. Journ. vol. ix. pp. 472, 473.) Mr. Lynch places the end adjoining the Tigris in N. lat. $34^{\circ}$ $3^{\prime} 30^{\prime \prime}$, and long. $21^{\prime} 50^{\prime \prime} \mathrm{W}$. of Baghdid. He describes the existing ruins as an embankment or wall of lime and pebbles, having towers or buttresses on the northern or NW. face, and a wide and deep fosse ; and states, that, putting his horse at its full speed, he galloped along it for more than an hour without finding any appearance of termination. The natives, too, assured him that it extended to the Euphrates.
[V.]
MEDIAM, AD. [Dacia, Vol. I. p. 744, b.]
MEDIA'NA, an inperial villa, 3 miles from Naissus, in Upper Moesia. (Amm. Marc. xxvi. 5.) A town of this name is mentioned, in the Peating. Table, on the road leading through Rlaetia along the Danube, opposite to Donauwerth, and seems to be the same as the modern Medingen. [L. S.]

MEDIOLA'NUM, a Gallic name of towns which occurs in Gallia, North Italy, and Britain.

1. Mediolanum is placed in the Table between Forum Segustavarum (Feurs) and Rodumne (Romanne). As to D'Anville's remarks on the position of Mediolanum, see Forum Segusianorum. This Mediolanum is supposed to have been a town of the Transalpine Insubres, and so it is generally marked in our maps; but the existence of these Transalpine Insubres is hardly established. [Gallia Cisalpina, Vol. I. p. 936.]
2. The Table places Mediolanum between Argentomagus (Argenton) and Aquae Nerae (N'ćris). The figures which have been generally considered to belong to this road, belong to another, and so we have no distances in the Table for this place. Mediolanum seems to be Cháteau Meillan, south of Avaricum (Botrges). A milestone found at Alichamp between Bourges and Cháteau Mcillan, makes the distance from Avaricum to Mcdiolanum to be 39 M . P., which is not far from the truth. (Walckenaer, Géog. gcc. vol. i. p. 67.)
3. The Antonine lin. places a Mediolanum on a road from Colonia Trajana (Kelln) to Colonia Agrippina (Cologue), and 12 M. P. from Colonin Trajana If Colunia Trajana is rightly placed, it is
difficult to see where Mediolanum should be. The next proition to Mediolanum on the road to Cologne is Sablones; which is also uncertain.
4. Mediolanum was the chief town of the Anlerci Eburovices (Itol. ii. 8. § 11), or Mediolanium, as it is in Pulemy's text. The name occurs in the Antonine Itin. and in the Table. In the Notitia of the Gallic provinces it is named Civitas Ebroicorum; and in the middle ages it was called Ebroas, whence the modern name Eicreux, a town in the French department of Eiure.

Ammianus Marcellinus (xv. 11) mentions Mediolanum as one of the chief cities of Secunda Lugdunensis. There was a Roman town a few miles sonth-east of Evreux, at a place called Vieil Etrcux. There are the remains of a large theatre here, the foundations of a building which is supposed to have been a temple, and remains of baths. A great number of amphorae, honsehold ntensils, articles of luxury, and imperial medals have been dug up here, and deprsited in the Museum of Eercux. This Iixil Evreux may be the site of Mediolanum.
5. Mediolanuin was the chief town of the Santones or Santoni, now Suintes, in the French department of Charente Inferieure. Strato (iv. p. 190) writes the name Mediolanium, and also I'tolemy (ii. 7. § 7 ). Marcellinus (xv. 11) speaks of this place under the name of Santones, from which it appears that in his time the name of the people had, as in many instances, been transferred to the town. There is no donlt alout the site of this Mediolanum, which is Suintes on the Charente. It was once a considerable homan town. There is an arch in honour of Germanicus Caesar, which appears to be built on the middle of the bridge over the Charente, which joins the town to the faubourg, but the arch rests on the bed of the river, and the bridge has been built to it from each bank. The most probable explanation of this singular circunstance is that the arch stowd originally on one bank of the river, and that the river changed its course. The bridge, of course, must have been built after this supposed change. The amphitheatre is outside of the town, at the bottom of a valley. It is an ellipse, about 436 feet long and about 354 feet wide. Water was brought to the town from a source several miles to the north by an aqueduct, of which there are still some remains. In one of the valleys which it crossed there are traces of 25 arches, of which three are standing. One of them is nearly 50 feet high. [G.L.]

MEDIOLA'NUM (M $\epsilon \delta i o ́ \lambda a v o v, ~ P o l . ; ~ M \epsilon \delta i o \lambda a ́ v i o v, ~$ Strab., Ptol. : Eth. Mediolanensis: Milano. Milan), the chief city of the Insubres in Cisalpine Gnul, and fur a long period the capital of Cisalpine Ganl itself. It was situated about midway between the rivers Ticinus and Addua, in a broad and fertile plain, about 28 miles from the foot of the Alps at Comum, and the same distance from the Padus near Ticinum (Paria). All ancient writers concur in ascribing its foundation to the Gauls, at the time when that people first established themselves in the plains of Northern Italy. Livy, who has given the most detailed account of the settlement of the Cisalpine (iauls, tells us it was founded by the Insubres, who called it after a village of the same name in their native settlements in Transalpine Gaul (Liv. v. 34; Strab. v. p. 213 ; Plin. iii. 17. s. 21 ; Ju.tin. xx. 5.) There can be little doubt that Strabo is correct in saying that, previous to the Kuman conquest, it was rather a village than a town, as were indeed all tire other Gaulish settlements. It was nevertheless
the chief place of the Insubres, and is mentioned as such several times in the history of the wars of that people with the komans. Thus, in the campaign of B. C. 222 , after the battle of Clastidium, it was attacked and taken by the Roman consuls Claudins Marcellus and Cn. Scipio. (Pol. ii. 34; Eutrop. iii. 6 ; Oros. iv. 13.) On this occasion it was taken by assault with apparently but little difficulty, and this confirms the statement of Strabo that it was an open town. Again, in B. c. 194, a battle was fought near it, between the Roman proconsul L. Valerius Flaccus and the combined forces of the Insubrians and Boians, under a chief named Dorylacus, in which the Gauls are said to have lost 10,000 men. (Liv. xxxiv. 46.)

No other mention of Mediolanum occurs previous to the Roman conquest, nor have we any precise account of the time at which it passed under the Roman yoke, or that at which it was admitted to the Loman "civitas." We can only infer that it mast have submitted, together with the rest of the Insubres, about 190 в. с.: its citizens doubtless received the Latin franchise, toget her with the other Transpadane Gauls, in B. c. 89, and the full Roman franchise in B. c. 49. [Gabila Cisalifina, Vol. I. p. 945.] Mediolanum thus passed into the condition of a Roman municipium, but it did not as yet enjoy that degree of importance which it subsequently attained. Strabo
 dooos, v. p. 213), and Tacitus reckons it among the "firmissima Transpadanae regionis municipia;" but neither he nor Pliny give any indication of its possessing any marked superiority over the other inunicipal towns with which they associate its name. (Plin. iii 17. s. 21; Ptol. iii. 1. § 33; Tac. Hist. i. 7().) It is evident, however, that under the Koman Empire it increased rapidly in prosperity, and became not only the chief town of the Insubres, but the most important city in Northern ltaly. We learn from the younger Pliny that it was a place where literature flourished, and young men from the neighbouring towns were sent for their education. (Plin Ep. iv. 13.) It was the native place of the emperor Didius Julianus, as well as of Septimius Geta. (Dion Cass. 1xxiii. 11 ; Spartian. Itid. Jul. 1, Get. 3.) At a later period, A. D. 268 , it was there that the usurper Aureolus took refuge after his defeat by Gallienus on the Addua, and was for some time besicged by the emperor, till a sedition in his own camp ended in the death of Gallienus, and his brother Valerianus. (Eutrop. ix. 11 ; Treb. Poll. Gall. 14 ; Vict. Caes. 33, E'pit. 33.) Shortly after Aureolus was compelled to sorrender the city to Claudius, who had been elected to sacceed Gallienus, and was put to death by order of the new emperor. (Treb. Poll. Claud. 5.)

But it was the extablishment of the imperial residence at Mediolanum that raised that city to the hichest pitch of prosperity. Its central position, which rendered it a peculiarly suitable head-quarters from which to watch the movements of the barbarians, and the progress of the wars with them, whether in Ganl, Germany, or Pannonia, was undoubtedly the canse of its selection for this purpose. Augustus himself is said to have sometimes repaired to Mediolanum with the same view (Suet. Aug. 20); and the constantly increasing dangers from theso quarters led subsequent emperors from time to time to follow his example; but Maximian appears to have been the first of the Roman emperors who permanently fixed his residence there (about A. 1. 30:i)
and thus at once raised it to the dignity of the capital of Northern Italy. From this period tho emperors of the West made it their habitual abode (Eutrop. ix. 27 ; Zosim. ii. 10, 17, \&cc.), until the increasing fear of the barbarians induced Honorius, in A. D. 404, to take refuge in the inaccessible marshes of Ravenna. Maximian is said to have adorned the city with many splendid public buildings (Vict. Caes. 39); and it was doubtless at this period that it rose to the splendour and magniticence which, about the middle of the fourth century, excited the admiration of the poet Ausonius, who assigns it the sixth place among the cities of the empire. The houses are described by him as numerous and elegantly built, corresponding to the cultivated manners and cheerful character of the inhabitants. It was surrounded with a double range of walls, enclosing an ample space for the buildings of the city. Among these were conspicuous a circus, a theatre, many temples, the palace or residence of the emperor, a mint ; and baths, which bore the name of Herculean, in honour of their founder Maximianus, and were so important as to give name to a whole quarter of the city. The numerous porticoes which were attached to these and other public huildings were adorned with marble statues; and the whole aspect of the city, if we may believe the puet, did not suffer by comparison with Rome. (Auson. Clar. Urb. 5.)

The transference of the imperial court and residence to Ravenna must have given a considerable shock to the prosperity of Mediolanum, though it continued to be still regarded as the capital of Li guria (as Gallia Transpadana was now called), and was the residence of the Consularis or Vicarius Italiae, to whose jurisdiction the whole of Northern Italy was subject. (Libell. Provinc. p. 62; Bücking, aul Not. Dign. ii. p. 442.) But a much more severe blow was inflicted on the city in A. D. 452, when it was taken and plundered by Attila, who after the fall of Aquileia carried his arms, almost without opposition, through the whole region N. of the Po. (Jornand. Get. 42 ; Hist. Miscell. xv. p. 549.) Notwithstanding this disaster, Mediolanum seems to have retained much of its former importance. It was still regarded as the metropolis of Northern Italy, and after the fall of the Western Empire, in A. D. 476, became the royal residence of the Gothic kings Odoacer and Theodoric. Procopius indeed speaks of it in the sixth centory as surpassing all the other cities of the West in size and population, and inferior to Rome alune. (Procop. B. G. ii. 8.) It was recovered with little difficulty by Belisarius, but immediately besieged by the Guths under Uraia, the brother of Vitiges, who, after a long siege, made himself again master of the city (A. D. 539), which he is said to have utterly destroyed, putting all the male inhabitants, to the number of 300,000 , to the sword, and reducing the women to slavery. (Id. il. 21.) It is evident, however, that the expressions of Procopius on this occasion must be greatly exaggerated, for, at the time of the invasion of the Lombards under Alboin (A. D. 568), Mediolanum already reappears in little less than its former importance. It was still the acknowledged capital of Liguria (P. Diac. Hist. Lang. ii. 1.5, 25); and, as the metrupolitan see, appears to have retained this dignity under the Lombard kings, though those monarchs transferred their royal residence to Ticinum or I'aviut. In the middle ages it rapidly rose again to prosperity; and, though a second time destroyed by the
emperor Frederic Barbarossa in 1162, quickly recovered, and has continued down to the present day to be one of the most important and flourishing cities of Italy.

The pusition of Milan, almost in the centre of the great plain of Northern Italy, just about midway between the Alps and the Padus, appears to have marked it in all ages as the natural capital of that extensive and fertile region. Its ready communications with the Ticinus on the one side, and the Addus on the other, in great measure supply the want which would otherwise have arisen from its not being situated on a navigable river; and the fertile plain between these two rivers is watered by the minor but still considerable streams of the Lambro and Olona The latter, which is not noticed by any ancient writer, flows under the walls of Milan. The modern city contains few vestiges of its ancient splendour. Of all the public buildings which excited the admiration of Ausonius (see above), the only remains are the columns of a portico, 16 in number, and of the Corinthian order, now attached to the church of S. Lorenzo, and suppused, with some probability, to have been originally comected with the Thermae or baths erected by tho emperor Maximian. A single antique column, now standing in front of the ancient basilica of Sant' Ambrogio, has been removed from some other site, and does not indicate the existence of an ancient building on the spot. Numerous inscriptions have, however, been discovered, and are still preserved in the museum at Milan. These fully confirm the municipal importance of Mediolanum under the early Roman Empire; while from one of them we learn the fact that the city, notwithstanding its flourishing condition, received a colony under Hadrian, and assumed, in honour of that emperor, the tities of Colonia Aelia Augusta. (Orell. Inscr. 1702, 1909, 3942, 4000, 4060, Sc.; Zumpt, de Colon. p. 409.)

Mediolanum was the central point from which all the highroads of Italy N . of the Padus may be considered as radiating. The first and principal of these was that which led by Laus Pompeia to Placentia, where it joined the Via Aemilia, and thus became the direct line of route from Milan to Ravenna and Rome. Another main line was that by Nocaria and Vercellae to Eporedia and Augusta Praetoria, which must have been the principal line of communication between Milan and Transalpine Gaul. A third road led in a southerly direction to Ticinum (Patia), from which there were two lines; the one proceeding by Laumellum to Augusta Taurinorum, and thence over the Cottian Alps into the southern provinces of Ganl; the other crossing the Padus to Dertona, and thence across the Apennines to Genoa. A fourth line was that to Comum, from whence there was a much frequented pass by the Lacus Larius, and across the Rhaetian Alps into the valley of the $I n m$, thus opening a direct and speedy communication with the Danube. Lastly, a great line of highway led from Dilan to Aquileia, passing through Bergomum, Brixia, Verona, Vicentia, Patavium, Altinum, and Concordia. The details of all these routes are given in the Antonine Itinerary and the Tabula Peutingeriana.
[E. H. B.]
MEDIOLA'NUM (Itin. Ant.; Me $\delta$ ionávwy, Ptol. ii. 3. § 18), a town of the Ordorices in Britain. It occurs in the Itin. Ant., between Dera (Chester), and Uriconiuin (Wroxeter), two towns, the sites of which are well authenticated; and in the
tenth Itin．it forms the terminus of a route from Glanoventa
［C．R．S．］
MEDIOLA＇NUM（Medio入dyor，Ptol．ii． 11. § 28）， a town in the north－west of Germany，mentioned only by Ptolemy；its site must in all probability be identified with the modern Metelm，on the river Vecht As the name Mediolanum is found only in countries inhabited by Celts，it has been supposed that Ptolemy is wrong，and that be by mistake placed this town on the right bank of the Rhine； bas there is no good resson for doabting that the country about the Veche was at one time occupied by a Celtic people．
［L．S．］
MEDIOMA＇TRICI（Medıo ${ }^{\prime}$ árpukes，Ptol．ii． 9. § 12），a people of Gallix，who belong to the division of Belgica．Cacsar（B．G．iv．10）shows their posi－ tion in a general way when he says that the Rhine flows along the territories of the Sequani，Medio－ matrici，Triboci or Tribocci，and Treviri．Ptolemy places the Mediomatrici south of the Treviri．Di－ vodurum（Mete）was their capital．［Divodurum．］ The diocese of Mets represents their territory，which was accordingly west of the Vosges．But Caesar makes the Maliomatrici extend to the Rhine，and consequently they had in his time the country between the Voages and the Rhine．And this agrees with Strabo（ $p$ ．193），who says that the Sequani and Mediomatrici inhabit the Rhine，among whom are settled the Tribocci，a German nation which had crossed over from their own country．It appears then that part of the territory of the Mediomatrici had been occupied by Germans before Caesar＇s tirne； and as we know that after Caesar＇s time the German tribes，Nemetes，Vangiones，and Caracates occupied the Gallic side of the Rhine，north of the Triboci as far as Maine，and that north of Maing was the territory of the Treviri，we may infer that all these tribes were intruders on the original territory of the Mediomatrici．

## MEDION．［Metron．］

MEDITERRA＇NEUM MARE．［Internum

## Mare．］

 Strah．，Scymn．Ch．；but Mígma on coins，and so Apollodorus，cited by Steph．B．；Scylax has Méou， evidently a corruption for Méб位：Eth．Meঠんaios， Mequaios），a Greek city of Southern Italy，on the W．coast of the Brattian peninsula，between Hip－ ponium and the mouth of the Metanrus．（Strab．vi． p． 256 ；Scyl．p．4．§ 12．）It was a colony founded by the Epizephyrian Locrians，and is said to have derived its name from an adjoining fountain．（Strab． l．c．；Scymn．Ch． 308 ；Steph．B．a．v．）But though it is repeatedly noticed among the Greek cities in this part of Italy，it does not appear ever to have attained to any great power or importance，and its name never figures in history．It is probable，how－ ever，that the Medimnaeans（Meठıuvaiot），who are noticed by Diudorus as contributing a body of co－ lonists to the repeopling of Messana by Dionysins in B．c．396，are no other than the Medmaeans，and that we should read Me $\delta \mu$ cioc in the pasage in question． （Diod．xiv．78．）Though never a very conspicuons place，Medma seems to have survived the fall of many other more important cities of Magna Graecia， and it is noticed as a still existing town both by Strabo and Pliny．（Strab．L．c．；Plin．iii．5．s．10．） But the name is not found in Ptolemy，and all sub－ sequent trace of it disappears．It appears from Strabo that the town itself was situated a little inland，and that it had a port or emporium on the vole 11.
sea－shore．The exact site has not been determined， but as the name of Mesima is still borne by a river which flows into the sea a little below Nicotera， there can be no doubt that Medma was situated somewtere in the neighbourhood of that town，and probably its port was at the mouth of the river which still bears its name．Nicotera，the name of which is already found in the Antonine Itinerary （pp．106，111），probably arose after the decline of Mesma．
［E．H．B．］

COLN OF MEDMA．
MEDMASA（Mè $\overline{\mu a \sigma a}$ or Mé $\bar{\mu} a \sigma o s$ ），a town of Caria，situated somewhere in the peninsula between the Ceramian and Iasian gulf，not far from Myndus．（Plin．v．29；Steph．B．0． $0 . ;$ Hecat．Fragm．230．）It is probably the same town as the one which Stephanus elsewhere calls $\Delta \delta 8-$ $\mu a \sigma a$ ：its site is unknown．
［L．S．］
MEDOACUS or MEDUACUS（Meठठठakos： Brenta），a river of Northern Italy，in the prorince of Venetia，falling into the extensive lagunes which border the coast of the Adriatic，in the neighbour－ hood of the modern Venice．According to Pliny （iii．16．s．20），there were two rivers of the name， bat no other author mentions more than one，and Livy，a native of the region，mentions the＂Me－ duacus amnis ${ }^{n}$ without any distinctive epithet． （Liv．x．2．）There can be no doabt that this is the river now known as the Brenta，which is a very considerable stream，rising in the mountains of the Val Sugana，and flowing near Padma（Patavium）． A short distance from that city it receives the waters of the Bacchiglione，which may probably be the other branch of the Medoacus meant by Pliny． Strabo speaks of a port of the same name at its mouth（Meठ6akos $\lambda \mu h y, v$. p．213），which served as the port of Patavium．This mast evidently be the same to which Pliny gives the name of Portus Edro，and which was formed by the＂Medoaci duo ac Fossa Clodia ：＂it is in all probability the one now called Porto di Lido，close to Venice．The changes which have taken place in the configuration of the lagunes and the channels of the rivers，which are now wholly artificial，render the identification of the ports along this coast very obscure，but Strabo＇s statement that the Medoacus was naviguted for a distance of 250 stadia，from the port at its mouth to Pataviam，seems conclusive in favoar of the Porto di Lido，rather than the more distant one of Chiozzas．At the present day the Brenta flows，as it were，round the lagunes，and enters the sea at Bromdolo，evidently the Portus Brundalus of Pliny （l．c．）；while a canal called the Camale di Brenta， quitting the river of that name at Dolo，holds a more direct course to the lagunes at Fusina．This canal may perhaps be the Fossa Clodia of Pliny．

Livy tells us that，in 8．c．301，Cleonymus the Lacedaemonian arrived at the mouth of the Mo－ doacus，and having ascended the river with some of his lighter vessels，began to ravage the territory of the Patavini，but that people ropulsed his af－

## MEDULLLA.

tacks, and destroyed a considerable part of his fleet. (Liv. x. 2.)
[E. II. B.]
MEDOBRIGA, a town in Lusitania (Hirt. B. Alex. 48), the inhabitants of which are called by Pliny (iv. 22. s. 35) Medubricenses Plumbarii, is the same place as Mundobriga, or Montobriga, which is placed in the Antonine Itinerary (p. 420) on the road from Scalabis to Emerita. There are rains of the ancient town at Marrao, on the frontiers of Portugal. (Resendi, Ant. Lus. p. 58 ; Florez, Esp. Sagr. xiii. p. 66.)

MEDOSLANIUM (Meঠoo $\lambda \alpha{ }^{2}(o v)$, a town in the southernmost part of Germany (Ptol. ii. 11. § 30), which must have been situated a few miles to the north of Vienna. Its exact site is only matter of conjecture.
[L. S.]

## MEDUACUS [Mfioncus.]

MEDUANA (Mayenne), a branch of the Liger, in Gallia. The name may be ancient, but the verse of Lucan in which it occurs is spurious. [Ligkr.]

MEDUANTUM, in Gallia, is placed in the Table on a road from Durocortorum (Keims) through Noviomagus, Mose or Mosa (Mouson), to Meduantam, an unknown site.
[G. L.]
ME'DULI, a Gallic people on the coast south of the Garumna (Garonne). Ausonius (Ep. 4) says to Theon:-
"Quum tamen exerces Medulorum in litore vitam."
He says in another Epistle to Theon (Ep.5): -
"Unus Domnotoni te litore perferet aestus
Condatem ad portum, si modo deproperes."
[As to this Condatis Portus, see Condate, No. 6.] Ausonius ( $E p .7$ ) thanks Theon for sending him some of the oysters, equal to those of Baiac. which were fattened in the "stagna Medulorum." The country of the Meduli corresponds to Méche in the French department of the Gironde. [G. L.]

MEDULLI (Meסovadaot, Strabo), an Alpine penple, whose name occurs in the inscription on the arch of Susa and on the Troply of the Alps (Plin. iii. 20), where they are placed between the Acitavones and Uceni. Ptoleny (ii. 10. § 11) places the Allobroges "under the Meduli," as the mame is there written, by which he means that the Meduli occupy the country nearer to the Alps. Strabo's description of the pusition of this people is clear (iv. p. 203) :-" After the Vocontii are the Siconii (Iconii), and Tricorii, and then the Medualli, who occupy the highest summits (of the Alps) ; now they say that the highest part of their country has an ascent of one hundred stadia, and thence to the borders of Italy the descent is as much : and above, in certain hollows, there is a great lake, and two springs not far from one another, and from one of these flows the Druentias (Durance), a torrent stream which flows down to the Rhodanus, and the Durias (Doria) runs in the opposite direction, for it joins the Padus (Po), flowing down through the conntry of the Salassi into Ceitice south of the Alps." When Strabo says further (iv. p. 204) that the Medulli " 'ie as near as may be ( $\mu \mathrm{d} \lambda \iota \sigma \tau a$ ) above the confluence of the Isara and the Phone," he is not speaking of distance, but, of direction or position; for he adds " and the other side of the mountain country above described, the part that slopes towands Italy, is occupied by the Taurini, a Ligurian people, and other Ligures." The conclusion is ensy that the Medulli were in the Maurienne, north and south of the town
of S. Jean de Mamrienne, and enclosed between the Tarentaise and Dauphiné. The lake is supposed by l'Anville and by Walckenaer (Geiog. vol. ii. p. 31) to be that on Mont Cenis; and Walckenaer adds "that it is exactly 200 Olympic stadia from Scez to the termination of the descent, 7 miles west of Aosta." But this is a false conclusion, derived probably from Strabo's remark alout the Duriss flowing through the country of the Salassi; the stream which flows through the country of the Salasi is the Doria Baltea, but the strean which rises near the Inerance is the Doria Riparia.

D'Anville supposed that Strabo made the Alps in the conntry of the Medulli 100 stadia in perpendicular height, which absurd mistake has been followed by the French translators of Strabo. Walckenaer has corrected it ; but he has erroneously mude Ptolemy place the Medulli immediately north of the Allobroges, instead of to the south-east Vitruvius (viii. 3) speaks of the goitres of the Medulli, a disease supposed to arise from the water which they drank.
[G. L.]
MEDU'LLIA (Meঠu入入ía: Eth. Meঠvanivos, Medullinus), an ancient city of Latium, which is repeatedly mentioned in the early history of Rome; but, like many others, had disappenred at a comparatively early perind. According to Dionysius it was one of the colonies of Alba; and Diodorus also includes it among the cities of which he ascribes the foundation to Latinus Silvius. (Dionys. iii. 1 ; Diod. vii., ap. Euseb. Arm. p. 185.) We are told that it fell into the power of Komulus by the voluntary submission of the inhabitants after the fall of Cruitumerium, and many of its citizens migrated to Rome, among whom was the father of Tullus Hostilius. (Dionys. ii. 36, iii. 1.) But in the reign of Ancus Marcius it was again conquered by the Latins, who held it for above three years, when the Roman king a second time reduced it. (Id. iii. 38.) Livy, however, says nothing of this reconquest, but treats it throughout as a Latin city, and enumerates it among those of the Prisci Latini which were taken by Tarquinius Priscus (i. 33, 38). At a somewhat later period it is mentioned for the last time, in B.C. 492, as abandoning the Roman alliance, and joining the Sabines. (I)ionys. ri. 34.) We have no account of the period of its destruction, but it is not noticed by any of the gengraphers, and Pling tells us that it wus no longer in existence in his time (iii. 5. s. 9).

The name of Medullia is found in Livy associated with those of Cornicuhum, Ficulea, Crustumerium, and Nomentum, of which the site is approximately known, as well as with Ameriola and Cameria, of which the position is as uncertain as that of Medullia itself. All three were probably situated in the neichbourhood of the cities just mentioned; but this is all that can be asserted with any confidence. Gell and Nibby have described the remains of an ancient city, at a spot called Marcellina, alout 4 miles from Palombara, at the foot of the lofiy Monte Gennatro, which the former writer sapposes to be Medullia. The remains in question, consisting of considerable portions of walls of polygonal construction, enclosing a triangular area, are onquestionably those of an ancient city: but its identification is wholly uncertain; the situation would suit equally well for Cameria or Ameriola, as for Meduliia. Nibby and Abeken would place the latter at $S$ Angclo di Capoccia, on the highest summit of the Corniculan hills; where there also remain ancient walls, supposed by Gell to be those of Corniculum
itsolf. (Gell, Top. of Rume, pp. 312, 319; Nitbr, Jinterni, vol. ii. pp. 293, 327 ; Alveken, M. I. p. ${ }^{78 .}$ )
[E. H. B.]
MEDULLUS (Flor. iv. 12 ; Medullium, Oros. vi. 21), a mountain in Hispania Tarraconeusis, rising above the river Minius ; perhaps the Sierra de Mameda, upon the river Sil, a tributary of the Mliño.

MEDDUS ( $\delta$ M $\bar{j} \delta o s$, Strab. xv. p. 729), a river of ancient Peris, which, according to Strabo. after taking its source in Media, flowed into the Araxes, which waters the plain of Persepolis. Curtius, however, in speaking of these rivers, makes the Araxes, which was the greater stream, flow into the Medus, which was the less ( $\mathrm{r} .4 . \S 7$ ). There can be no doubt, however, that Strabo is more correct than Curtins. The Medus is the small stream (now called the Pulcoin) which flows past the remains of Pasargadae, Istakr. and Persepolis, and falls into the Araxes (Kur or Bend-amir) a few miles below the last ruins. The united stream of the two rivers terninates in lake Bakhtegan, abont 40) miles from Persepolis. (Fergusson, Ninen. and l'creep. p. 90.)
[v.]
MEGABARI (Meyd6apot, Strab. xvii. pp. 786, 819 ; Méá6apJon, Ptol. iv. 7. § 30 ; Meggabarri, Plin. vi. 30. s. 35), a people of Aethiopia, near Merre, also called Adibari according to some authorities (Plin. l. c.), and possessing a town of Apollo. Their name appears to survive in the tribe of the Mekaberab near Schendy. (Kitter, ErdKunde, vol. i. p. 663; Forbiger, vol. ii. p. 811.)
mega'lia. [Megaris.]
 modis: Eth. Meүalomo入(inns: Sininu), the "Great City," one of the most recent of the Grecian cities, and the later capital of Arcadia, was founded in b. c. 370, a fer months after the hattle of Leuctra, and was finished in the course of three years. (Paus. viii. 27. § 1; Dicol. xv. 52, 62, 72.) Arcadia had been previcusly divided into a number of independent political communities; and it had always been the object of Sparta to maintain them in their isolated condition, that she might the more easily exercise supremacy over them. But after the fatal blow, which the Spartans had received at the buttle of Leuctra, several of the leading Arcadians, supported by Eppminondas, who was the soul of the undertaking, resolvel to found a new city, which should become the capital of an Arcadian confeleration. Ten oecists were appointed to carry this resolution into effect, of whom two were from Tegea, two from Mantineia. two from Cleitor, two from the district of Menalus. and two from that of Yarrhasia. The site, which they chose, was an extensive plain upon the northwest frontier of Laconia; and the city was built upon the river Helisson, a tributary of the Alpheius. Forty distinct Arcadian townships were either persuaided or compelled to contribute their inhabitants to forn the new state. (Piaus. viii. 27; Diod. xv. 94.) The inhabitants were furnished from seven states: 10 from Maenalus, 8 from the Parrhasii, 3 from Orchomenus, 4 from Cynuria, 6 from Eutresis, 3 from Tripolis, and probably 6 (thnugh Pausanias mentions the names of only 5) from Aegytis. The city was 50 etadia (more than 5 miles and a half) in circumference (Polyb. ix. 21); while the territory assigned to it was more extensive than that of any other Arcadian state, extending northwards about 23 English miles from the city, being bonnded on the east by the territories of Tegea, Mantincia. Orciomenus. and Caphyae, and
on the west lyy those of Messene, Phigalia, and Heracel. (On the foundation of Megnlopolis, see Clinton, Fast. Hell. vol. ii. p. 418; Thirlwall, Hist. of Greece, vol. v. p. 85, seq.; Grote, Hist. of Cireecs vol. x. p. 306, seq.)
Megalopolis was the place of meeting of the Arcadian confederation which was now formed. The council of the confederation was called the Ten Thousand (oi Mípiot), and consisted of representatives of all the Arcadian states, except Orchomenus and Heraea. The number must be regarded as an indefinite one ; and it is probable that all the citizens of the separate states had the right of attending the meetings. (Xen. Hell. vi. 5. § 6 , vii. $1 . \S 38$; Diod. xv. 59; Paus. viii. 32. § 1; Dem. de Fals. Leg. p. 344.) A body of troops, called Epariti ('Exdpitot), was raised for the service of the confederation; their number was 5000 (Xen. Hell. vii. 4. § 34, vii. 5. § 3; Diod. xi. 62, 67.) The new confederation succealed for a time in giving a certain degree of unity of sentiment and action tw the Arcadians; but its influence gradually declined; and the city of Megulopolis never attained that importance which its founders had anticipated, and which had caused it to be laid out on a scale too large for the the population cullected within its walls. (Polyb ii. 55.)

Upon the decline of the Theban power, the Spartans directed their attacks against Megalopolis; but these were easily rupelled; and upon the rise of the Dacedonian power the Megalopolitans iormed a clase alliance with Philip, and subsequently with Alexander, as their best security against their formidable neighbour. After the death of Alexander they coninued faithful to the Macedonian alliance, and refused to join the other Greeks agniust Antipater. In the contest between Polysperchon and Cassander, Megalopolis espoused the side of the latter; in consequence of which Polysperchon laid siege to the city in B. c. 318. It was, however, bravely defended by its inhatitants, under an officer named Damis; and though Poly perchon succeeded in making a breach in its walls, he mas finally repulsed with loss. (Diod. xviii. 70, 71.) We learn from Diodorus (l. c.) that the territory of Megalopolis possessed at this time 15,000 men capable of bearing arns, which innplies a pupulation of about 65,000 sonls. After this time Megalopolis was governed by tyrants, of whom the tirst was Aristodemus, a Phigalian by birth, who, on account of his good qualities, was called Xonatós. During his reign the Spartans, under their king Acrotatus, the son of Areus, and grandson of Cleonymus II., attacked Megaloporis, but were defeated, and Acrotatus was slain. (Paus. viii. 27. § 11, who erroneously calls Acrotatus the son of Ciennymus.) Two generations later L.ydiades, a native of Megallopolis, became tyrant of the city, but he voluntarily resigned his power in B.c. 232, and united Megalopotis to the Achatan League. (Piaus. viii. 27. § 12, seq.; Polyb. ii. 44.) In B c. 222. Cleomenes III. surprised Megalopolis ; the greater part of the inhabitants succeeded in making their escape to Messene; but, after plundering the city, he haid the greater part of it in ruins. (Paus. viii. 27. § 15, seq.; Polyb. ii. 55; Plut. Philop. 5, Cleom. 25.) Soon after the defeat of Cleomenes at the battle of Sellasia (B. c. 221), the Megalopolitans began to rebuild their city; but a dispute arose among them respecting its size. One party wished the cumpass of the walls to be contracted, that they might be the more eacily defended; and the other
insisted apon preserving the former dimensions of the city. The former party, through the mediation of Aratus, appear to have prevailed, and the city was unfortunately rebuilt in its original magnitude. (Polyb. v. 93.) The fortifications were sufficiently strong to resist the attack of the tyrant Nabis (Plut. Philop. 13); bat they were again suffered to fall into decay; and even as soon as b.c. 175, we find that Antiochus IV. Epiphanes promised the Megalopolitans to surround their city with a wall, and gave them the greater part of the necessary money. (Liv. xli. 20.) Polybius remarks (ix. 21) that the population of Megalopolis in his time was only the half of that of Sparta, although it was two stadia greater in circumference. So much was it reduced, that a comic poet, quoted by Strabo, described "the Great City as a great desert" ( $\langle p \eta \mu i a$
 customed as Pausanias was to the sight of fallen cities, the ruined condition of Megalopolis appears to have particularly impressed him, and gave rise to the reflections which he has inserted after his description of the city (viii. 33). Megalopolis was the birthplace of Philopoemen, and of the historian Polybius.

Megalopolis was situated in the middle of a plain, and, unlike the generality of Grecian cities, posesessed no height, which might be converted into an acropolis. Mantineia, which was also rebuilt about the same time, was placed in a level situation, instead of its old position upon a hill. A level situation appears to have been choeen as more convenient for a large population than the rocky heights upon which the old Greek cities were built; while the improvements which had been made in the art of fortifying cities enabled their inhabitants to dispense with uatural defences. The city lay upon either bank of the Helisson, which flowed through it from east to west, and divided it into nearly two equal parts.

RULTS OF MEGAIAPOLIS.
A A. Oreatia
B B. The Helisson.
C. Theatre.
D. Stadlum.
E. Thersilium.
F. Agora.
G. Temple of Athena Polias.
H. Temple of Hera Teleia.
I. The Bathyllus.

The Helisson flows into the Alpheius about $2 \frac{1}{2}$ English miles from the city. The southern half of the city was called Orestia ('Opeotia), from an ancient settlement of the Maenalians upon this spot.

galopolis are near the modern village of Sindinx; but almost all trace of the walls has disappeared, because they were probably built, like those of Mantineia (Xen. Hell. v. 2. § 5 ; Paus. viii. 8. §5), of unburnt bricks. Pansanias has given a particular description of the pablic buildings (viii. 30-32), the site of some of which may still be fixed by the existing remains. The two most important buildings were the theatre, on the left or southern side of the river, and the Agora on the right. The colossal remains of the theatre are conspicuous in the whole plain. Several of the seats remain, and a part of the wall of the cavea. It is described by Pansanias (viii. 32. § 1) as the greatest theatre in Greece, and was 480 feet in diameter. Pausanias says that in the theatre there was a perennial fountain, which Leake coald not find, bat which Ross noticed in the Orchestrap it is now covered with rubbish, so that it is not visible, but in dry seasons it makes the ground quite moist and slippery. On the eastern side of the theatre was the stadium, the position of which is indicated in the shape of the ground near the river. Here is a fountain of water, which Pausanias says was in the stadium, and was sacred to Dionysus. On the eastern side of the stadium was a temple of Dionysus; and below the stadium, towards the river, were a canctuary of Aphrodite, and an altar of Ares. Ross supposes a circular foundation close to the bank of the river to be the altar of Ares, and a quadrangular foundation between this and the theatre to be the temple of Aphrodite. East of the temple of Dionysns there is another source of water, also mentioned by Pansanias, by which we can fix the position of the temple of Asclepius the Boy; above which, on a gently sloping hill, was a temple of Artemis Agrotera. West of the theatre was the Thersilinm, named from the person who built it, in which the Ten Thousand were accustomed to meet; and near it was a house, built originally by the Megalopolitans for Alexander, the son of Philip. In this same locality there were a fow foundations of a temple sacred to Apollo, Hermes, and the Muses.

Opposite the western end of the theatre there are, on both sides of the river, but more especially on the northem bank, large masses of aquare stones. These are probably the remains of the principal bridge over the Helisson, which led from the theatre to the Agora on the northern side of the river. The Agors was built on a magnificent scale, and extended along the river close to the western walls of the city; since Pausanias, who entered Megalopolis upon this side, immediately came upon the Agora As Pausanias has given a fuller description of the Agore of Megalopolis than of any other in Greece, the following restoration of it (taken from Curtius) may be found useful in understanding the general form and arrangement of such buildings.

In the centre of the Agura was an inclosure sacred to Zeus Lycaeus, who was the tutelary deits of all Arcadia. It had no entrance ; but the objects it contained were exposed to public view; here were seen two altars of the god, two tables, two eagles, and a statue in stone of Pan. Before the sacred inclosure of Zens there was a statue of Apollo in brass, 12 feet high, which was brought from Bassae by the Phigalians, to adorn the new capital; it survived the destruction of the city, and is represented on coins of Septimius Severus. This colossal statue probably stood on the west side of the sanctuary of Zous. To the right of the coloseal statue was the temple of the Mother of the Gods, of which
only the columns remained in the time of Pausanias.

AGORA OF MEGALOPOLIS.
A. Sanctuary of Zeus.
B. Statue of A pollo.
C. Temple of the Mother of the Gods.
D. Stoa of Philip.

F. Stoa of the Archives.
G. Stoa of Myropolis.
H. Statue of Polyhius.
I. Stoa of Aristander.
L. Temple of Zeus Soter.
M. Sacred Inclosure of the Great Goddesses.
N. Gymnasium.

On the northern side of the Agora lay the Stoa of Philip, the son of Amyntas, which was named in honour of this king, on account of the services he had rendered to Megalopolis. Near it were the remains of the temple of Hermes Acacesins. Alongside of the Stoa of Philip, was another smaller Stoa, containing the Archives ( $\tau \alpha \dot{d} \rho \chi \chi^{\in i a}$ ), and consisting of six compartments. Behind the Stoa of the Archives was a temple of Tyche (Fortune).

The Stoa called Myropolis, where the shops of the perfumers stood, was probably on the eastern side of the Agora. It was built from the spoils of the Lacedaemonians under Acrotatus, when they were defeated by Aristodemus. Between it and the sanctuary of Zeus was the statue of Polybius. To the left of this statue was the Bouleuterium, or Senate House. In the south of the Agora may be placed the Stoa of Aristander, named after its founder. At the eastern end of this Stoa, was a Peripteral Temple of Zeus Soter, containing a statue of the god seated between the goddesses Megalopolis and Artemis Soteira. At the other, or western end of the same Stoa, was the sacred inclosure of the Great Goddesses Demeter and Core (Persephone), containing several temples. The Gymnasium stood on the western side of the Agora.

To the north of the Agora, behind the Stoa of Philip, there were two small heights, on one of which stood the ruins of the temple of Athena Polias, and on the other those of Hera Teleia. The foundations of these temples are still visible. At the foot of the temple of Hera Teleia was the stream Bathyllus, flowing into the Helisson. Parallel to the Bathyllus is another stream; and the hill between these two streams is, perhaps, the Scoleitas mentioned by Pausanias (viii. 31. § 7), who says that it lies within the walls, and that a stream descends from it to the Helisson.

Some excavations were made on the site of Megalopolis by Ross in 1834, but nothing of importance was found.

Pausanias also gires a minute account of the principal roads leading from Megalopolis. Of these he mentions eight, leading respectively to Messene, Car-
nasium, Sparta, Methydrium, Maenalus, Phigaleia, Tegea and Heraea.

1. The road to Messene passed, at the distance of 7 stadia from the city, a temple of the goddesses called Maniae, a name of the Eumenides, because Orestes here becaine insane on account of the murder of his mother. A little further was a small heap of earth, called the Monument of the Finger, because Orestes, in his madness, here bit off one of his fingers; still further was a place called Acé, because Orestes was here healed of his disorder, containing another temple of the Eumenides; and lastly a sanctuary named Cureium, because Orestes here cut off his hair. These stations lay between the villages Sinaino and $S t$. Bei, in the district where there are four tumuli. From the Maniae there was a distance of 15 stadia to the Alpheius, near the place where it receives the Gatheatas, joined by the Carnion. This united stream is the Xeriló Potamó. From the Alpheius the road led to Cromi, a distance of 40 stadia, and from Cromi to Nymphas, a distance of 20 stadia. Nymphas was a place abounding in water and trees, from which there were 30 stadia to the Hermaeum, which marked the boundaries of Megalopolis and Messenia. (Paus. viii. 34.)
2. The road to Carnasium, in Messenia, ran north of the former road, but parallel to it. It crossed the Alpheius, where it is joined to the united waters of the Malūs (Ma入oûs) and Scyrus (Ekîpos). The Malus is probably the river of Neokhori, which, a little westward of Dedébey, receives a small stream answering to the Scyrus. After proceeding from thence 30 stadia on the right bank of the Malus, you crossed the river and ascended, by a steep path, to a village called Phaedrias (\$aiopias), which appears to have stood on the height above Neokhóri. Fifteen stadia further was the Hermaedm, named Despoena, another boundary between the territories of Megalopolis and Messenia. (Paus. viii. 35. §§ 1, 2.)
3. The road toSparta was for the most part the same as the modern road from Leondari to Mistra. At the distance of 30 stadia the road crossed the Alpheius, where it is joined by the Theiūs (Oeioûs), now called Kutufarina. From thence the road followed the left bank of the Theius for 40 stadia to Phalksiak (Фa入aıбíai), which was 20 stadia distant from the Hermaeum towards Belemina. About 20 stadia beyond is the division of the waters flowing southward to the Eurotas, and northward to the Alpheius. (Paus. viii. 35, seq.)
4. The road to Methydrium was 170 stadia in length. It ran northwards from Megalopolis through that portion of central Arcadia which was surrounded by the rivers Gortynius, Alpheius, and Helisson. Thirteen stadia from the city was a place called Scias ( इkids), with a temple of Artemis Sciatis, founded by the tyrant Aristodemus. Ten stadia further lay Chabisiae (Xapigiai), and from thence, $\mathbf{a}^{t}$ the distance of another 10 stadia, was Tricoloni ( T рик $\delta \lambda \omega \nu 0 t$ ). These two cities were in ruins in the time of Pausanias. Tricoloni, which was founded by the sons of Lycaon, still possessed a temple of Poseidon, standing upon a hill in a grove of trees. We may place Tricoloni near the modern Karatúla, on the edge of the plain of Megalopolis. At Methydrium two side roads branched off from the main road. The road to the left went by Zoetia ( 10 stadia), Paroreia (10 stadia), and Thyraeum ( 15 stadia), to Hypsus. Zortia (Zoitía, Paus.; Zoíteiov, Zolteia, Steph. B. s. v.) and Paroreia (Ilapópeia) were founded by Tricolonus. They were in ruins
in the time of Pausanias, but in Zuetia there still remained a temple of Demeter and Artemis. Paroreia probably occupied the site of Paliomiri. Thyrakum ( Oupaiov) was founded by a son of Lycaon, and may be placed at Palamiri, at the foot of the mountain. The other side road branched off from Methydrium to the right, ascending to the fountain Cruni (Kpouyoi), and from thence descending 30 stadia to the tomb of Callisto, a lofty mound of earth, upon which was a temple of Artemis Calliste. Here Pausanias turned to the left, and at the distance of 25 stadia from this tomb he reached Anemosa (A $\nu \in \mu \hat{\omega} \sigma a$ ), on the direct road from Megalopolis to Methydrinm. As Anemosa was 100 stadia from Tricoloni and 57 from Methydrium, it may be placed at Zibovisi Beyond Anemoss the mad passed over the mountain Phalanthum, upon which were the ruins of the town Phalanthus (\$álayOos). On the other side of this mountain was the plain of Yolus, and near it Schoenve ( $\sum_{\text {xolvoús), which }}$ was called from a Boeotian of this name : near Schoenus were the race-grounds of Atalanta. Methydrium was the next place. [Methydrium.] (Paus. viii. 35. §5. seq.)
5. The road to Maenalus, led along the Helisson to the foot of Mt. Maenalus. In leaving the city it first ran through a marshy district, which was here called Helos; it then entered a narrow valley, in which was a place called Paliscics ( Mariokios), where a mountain torrent, named Elaphus, Howed into the Helisson on the left: this is the torrent which flows from Valtitzi Here a side road ran along the left bank of the Elaphus, for 20 stadia, to Perartheis (חepoutis), where was a temple of Pan; it must have stood near Rakhamýtes. But the direct road crossed the Elaphus, and entered the Maenalian plain, at the distance of 15 stadia from the Elaphns. This number, however, is much too sunall, as it is 5 geographical uniles from the junction of the Elaphus with the Helisson into the Maenalian plain. (Leake, Peloponnesiaca, p. 242; Paus. viii. 36. § 5, seq.)
6. The road to Phigaleia crossed the Alpheius at the distance of 20 stadia from Megalopolis. Two stadia from the Alpheius were the ruins of Macakeae, 7 stadia further those of Daseae, and again 7 stadia the hill Acacesius, upon which stood the city Acacesium. At the distance of 4 stadia from Acacesium, was the temple of Despoena, one of the most celebrated sanctuaries in the Peloponnesus, and of which Pausanias has given a particular description. Adjoining, was the temple of Pan, above which stood the ancient city of Iycosura. Between Lycosura and the river Plataniston, which was 30 stadia from Phigaleia, Pausanias mentions no object, though the direct distance between Lycosura and this river is 9 geographical miles. (Psus. viii. 36. §§ 9-39.)
7. The road to Pallantium and Teges, passed first through Ladoceia, a suburb of Megalopolis, next by the ruins of Haemoniaf [see Vol. I. p. 192, b.]; beyond which, to the right of the road, were the ruins of Orestiusium; while upon the direct road were the villages of Aphimonisium and Atifenafum; and 20 stadia beyond the latter the ruins of Asea, near which were the sources of the Alpheius and the Eurotas. From Asea there was an ascent to the mountain called Boreium, upon which was the Choma, marking the boundaries of Megalopolis, Pallantium, and Tegea. (Paus. viii. 44.)
8. The raad to Heraea was the one by which Pausanias travelled to Megalopolis, and consequently is described by him in an inverse direction to that of the others. This was the great Roman road through the Pelopounesus, which occurs in the Peutinger Table. After leaving Heraea, the first place was Melaeneae, which in the time of Pausanias was deserted and covered with water. Forty stadia above Melaeneae was Buphagium, at the sources of the river Buphagus, near which were the boundaries of Heraea and Megalopolis. Next to Buphagium came the village Maratha, and then Gortys. Further on was the sepulchre of those slain in battle against Cleomenes, and called Paraebasium (Пapal6afiov), because Cleomenes violated his covenant with them. On the right of the road were the ruins of Brentine, and on the other side of the Alpheius the rains of Trapezus. Descending from thence towards the Alpheius was a place called Bathos. Ten stadia further was Basilis; beyond which, after crossing the Alpheius, the traveller came to Thocnla, a deserted city standing upon a height above the Aminius, a tributary of the Helisson. (Paus. viii. 26. § 8, viii. 2-8.)
(Leake, Morea, vol. ii. p. 29, seq. p. 288, seq., Peloponnesiaca, p. 231, seq.; Boblaye, Recherches, \&c. p. 167, seq.; Ross, Reisen im Peloponnes, p. 74, seq.; Curtius, Peloponmesos, vol. i. p. 281, seq.)

## Cons of megalopolis.

## MEGALÓPOLIS. 1. In Caria. [Aphrodisins]

 2. In Pontus. [Sebistia.]ME'GARA, sometimes called, for distinction's sdke, ME'GARA HYBLAEA (rd Mérapa: Eth. Meraptús or Merapeìs 'r6גaios, Megarensis), a city of Sicily, situated on the E. coast of the island, between Syracuse and Catana, in the deep bay formed by the Xiphonian promontory. It was unquestionably a Greek colony, deriving its origin from the Megara in Greece Proper; and the circumstances attending its foundation are related in detail by Thucydides. He tells ns that a colony from Megara, under the command of a leader named Lamis, arrived in Sicily about the time that Leontini was founded by the Chalcidic colonists, and settled themselves first near the mouth of the river Pantagias, at a place called Trotilus. From thence they removed to Leontini itself, where they dwelt for a time together with the Chalcidians; but were soon afterwards expelled by them, and next established themselves on the promontory or peninsula of Thapsus, near Syracuse. Hence they again removed after the death of Lamis, and, at the suggestion of Hyblon, a Sicilian chief of the surrounding country, finally settled at a place afterwards called the Hy blacan Megara. (Thuc. vi. 4.) Scymnus Chius follows a different tradition, as he describes the establishment of the Chalcidians at Naxos and that of the Megarians at Hybla as contemporary, and both preceding the foundation of Syracuse, B. c. 734. Strabo also aulopts the same view of the subject, as he represents Megara as founded about the same
time with Naxos (b. C. 735), and before Syracuse. (Scymn. Ch. 271-276; Strab. vi. p. 269.) It is impussible to reconcile the two accounts, but that of Thucydides is probably the most trustworthy. According to this the foundation of Megara may probably be placed about 726 в. c. Of its earlier history wo have scarcely any information, but it would appear to have attained to a flourishing condition, as 100 years after its foundation it sent out, in its turn, a colony to the other end of Sicily, where it founded the city of Selinus, which was destined to rise to far greater power than its parent city. (Thuc. vi. 4 ; Scymn. Ch. 291 ; Strab. vi. p. 272.)

Nothing more is known of Megara till the period of its destruction by Gelon of Syracuse, who, after a long siege, made himself master of the city by a capitulation; but, notwithstanding this, caused the bulk of the inhabitants to be sold into slavery, while he established the more wealthy and nuble citizens at Syracuse. (Herod. vii. 156; Thuc. vi. 4.) Ainong the persons thus removed was the celebrated comic poet Epicharmus, who had received his education at Megara, though not a native of that city. (Suid. a. v. 'Exi(хapuos; Diog. Laert. viii. 3.) According to Thucydides, this event took place 245 years after the foundation of Megara, and may therefore be placed about 481 b. c. It is certain that Megara never recovered its power and independence. Thucydides distinctly alludes to it as not existing in his time as a city, but repearedly mentions the locality, on the sea-coast, which was at that time occupied by the Syracusans, but which the Athenian general Lamachus proposed to make the head-quarters of their fleet. (Thuc. vi. 49, 96.) From this time we meet with repeated mention of a place named Megara or Megaris (Scyl. p. 4. § 6), which it seems impossible to separate from Hybla, and it is probable that the two were, in fact, identical. [These notices are discussed under Hybla, No. 2.] The site of this later Megara or Hybla may be fixed, with little doubt, at the mouth of the river Alabus (Cantaro); but there seems much reason to suppose that the ancient city, the original Greek colony, was situated almost close to the remarkable promontory now occupied by the city of Agosta or Augusta.* It is difficult to believe that this position, the port of which is at least equal to that of Syracuse, while the peninsula itself has the same advantages as that of Ortygia, should have been wholly neglected in ancient times; and such a station would hare admirably served the purposes for which Lamachus urged upon his brother generals the occupation of the vacant site of Megara. (Thuc. vi. 49.) [E.H.B.]

ME'GARA (Tג̀ Mérapa, Megara -ōrum, sometimes Megara -ae: the territory मे Mevapis, sometimes i) Meүapıкt, sc. भì: Eth. Mevapels, Megarensis: $\Delta d j$. Mcrapicós), a city in Greece Proper.

## I. Situation.

The city of Megara is situated rather more than a mile frum the Saronic gulf, in a plain about 6 or 7 miles in length, and the same in breadth, bounded to the westward by the range of the Geraneian mountains, to the castward by the range which terminates in the mountains called Kerata or the Horns, and to the south by the sea; while on the north

[^15]the plain loses itself in a gradual ascent. The city stond on a low hill with a double summit, on each of which there was an acropolis, one named Caria (Kapia), and the other Alcathoz ('AnkaOón), the former probably being on the eastern, and the latter on the western height, upon which the modern village is chiefly situated. Immediately below the city was a port-town named Nisaea (Nifaia and Nigaia), the port being formed by an island called Minon (Mıráa). The city was connected with its port-town by Long Walls

## II. History.

There were two traditions respecting the early history of Megara. According to the Megarians, the town owed its origin to Car, the son of Phoroneus, who built the citadel called Caria and the temples of Demeter called Megara, from which the place derived its nane. (Paus. i. 39. § 5, i. 40. § 6.) Twelve generations afterwards Lelex came from Egypt and gave the inhabitants the name of Leleges, whence we read in Ovid (Slet. vii. 443): -

> "Tutus ad Alcathoen, Lelegeia moenia, limes Composito Scirone patet."

Lelex was succeeded by his son Cleson, the latter by his son Pylas, whose son Sciron married the daughter of Pandion, king of Athens. But Nisus, the son of Pandion, disputing with Scirun the possession of Megara, Aeacus, who had been called in as arbiter, assigned the kingdom to Nisus and his posterity, and to Sciron the command in war. Nisus was succeeded by Megareus, the son of Poseidon, who had married Iphinö̈, the daughtar of Nisus; and Megarens was followed by his son Alcathous, who built the other citadel named after him. Such was the account of the Megarians, who purposely suppressed the story of the capture of their city by Dlinas during the reign of Nisus. (Paus. i. 39. §§ 5, 6, i. 41. § 5.)

The other tradition, which was preserved by the Boeotians and adopted by the rest of Greece, differs widely from the preceding one. In the reign of Pylas, Pandion being expelled from Athens by the Metionidae, fled to Megara, married the daughter of Pylas, and succeeded his father-in-law in the kingdom. (Paus. i. 39. § 4 ; Apollod. iii. 16.) The Metionidae were in their turn driven out of Athens; and when the dominions of Pandion were divided among his four sons, Nisus, the youngest, obtained Megaris. The city was called after him Nisa (N/Ja), and the same name was given to the port-town which he built. When Minos attacked Nisus, Megareus, son of Poseidon, came from Onchestus in Boeotia to assist the latter, and was haried in the city, which was called after him Megara. The name of Nisa, subsequently Nissea, was henceforth confined to the port-town. (Paus. i. 39. §§4, 6.) But even the inhabitants of Megara were sometimes called Nisaei, to distinguish them from the Megarians of Sicily, their colonists (Theocr. Id xii. 27.) Through the treachery of his daughtor Scylla, Nisus perished, and Minos obtained possession of the city, and demolished its walle. They were subsequently restored by Alcathous, son of Pelops, who came from Elis. In this work he was assisted by Apolio. (Pans. i. 41. §6; Theogn. $771 ; 0 \mathrm{v}$. Met. viii. 14.) It was further related, that Hy perion, the son of Agamemnon, was the last king of Megara, and that after his death a democra-
tical form of government was estiblished. (Paus. i. 43. § 3.)

Into the value of those traditions it would be nseless to inquire. It may, however, be regarded as cortain, that Megara and its territory were in early times regarded as part of Attica; and hence Strabo accounts for the omission of their names in the Iliad, because they were comprehended along with the Athenians under the general name of Ionians. (Strab. ix. p. 392.) The most certain event in the history of Megara is its conquest by the Dorians. This event is connected in tradition with the expedition of the Peloponnesians against Athens. The Dorian invaders were defeated by the voluntary sacrifice of Codrus; but Megaris was notwithstanding permanently conquered, and a Corinthian and Messenian colony founded at Megara. The pillar at the isthmus of Corinth, which had hitherto marked the boundaries of Ionia and Peloponnesus, was now removed; and Megara was henceforth a Dorian state, and its territory included in Peloponnesus. (Strab. ix. p. 393; Scymn. Ch. 502.) Megara, however, continued for some time to be subject to Corinth, and it was not without frequent struggles and wars that it at length established its independence. (For authorities, see Müller, Dorians, i. 5. § 10.) Megara appears not to have become the ruling city in the district till it was independent of Corinth, since in earlier times it had been only one of the five hamlets ( $\kappa \hat{\omega} \mu \mathrm{\mu u})$, into which the country was divided, namely, the Heracans, Piracans, Megarians, Cynosurians and Tripodiscaeans. (Plut. Quaest. Graeo. c. 17, p. 387.)

After Megara had become an independent city, its prosperity rapidly increased, and in the seventh century before the Christian era it was one of the most flourishing commercial cities of Greece. For this it was chiefly indebted to its admirable situation, which gave its inhabitants great facilities for the prosecution of conmerce both by land and sea. All the roads from Northern Greece to Peloponnesus passed through their conntry, while their shores boing washed by the Corinthian and Saronic gulfs, enabled them to trade both with the West and East.

Megara founded some of the earlier Grecian oolonies, both in Sicily and Thrace. In b.c. 728 it established Megara Hyblaea in Sicily, in 712 Astacus in Bithynia, in 675 Cyzicus in the Propontis, in the following year Chalredon at the month of the Bosporus, and in 657 Byzant:am opposite Chalcedon. About this time, or rather later, Comedy is said to have been invented by the Megarians. According to the common account, Susarion, a native of Tripodiscus in Megaris, introduced comedy into Attica. (Dict. of Biogr. art. Susarion.) But, with the increase of wealth, the lower orders attempted to obtain 2 shave in the government, which had hitherto been exclusively in the hands of the Dorian conquerors ; and Theagenes, the father-in-lew of Cylon, became tyrant or despot of Megara, by attacking the rich landed proprietors and advocating the claims of the poor. (Aristot. Rhet. i. 2, Polit. v. 4.) He embellished the city by the construction of a beautiful aqueduct, which continued to exist down to the time of Pausanias (i. 40. § 1). Theagenes ruled about в. c. 630600; but he was subsequently driven from power, and Megara was for some time torn asunder by struggles between the aristooracy and democracy. The elegiac poet Thengnis, who belonged to the aristocracy, deplores the sufferings of his party, and
complains that the poor no longer paid the interest of their debts, and that they plundered the houses of the rich and even the temples.

About the same time the Megarians were engaged in frequent contests with their neighbours in Attica. The chief straggle between them was for the island of Salamis, which was at length gained by the Athenians in consequence of the well-known etratagem of Solon. (Pans. i. 40.§5; Strab. ix. p 394.) The Megarians took their share in the Persian wars. They fought with 20 ships at the battles of Artemisiom and Salamis. (Herod. viii. 1, 45.) They repulsed a body of Perrians whom Mardonius sent to ravage their territory (Paus. i 40. § 2), and finally 3000 of their troops fought at the battle of Plataen. (Herod. ix. 28.)

After the Persian War the Megarians were involved in hostilities with the Corinthians respecting the boundaries of their territorice. This led tho Megarians to desert the Peloponnesian alliance, and anite themselves with the Athenians, 8. c 455. In order to secure their communication with Megara, the Athenians built two Long Walls connecting the city with Nissea; and they garrisoned at the same time the town of Pegae, on the Corinthian gulf. (Thuc. i. 103.) But ten years afterwards the Megarians revolted from Athens, and having obtained the assistance of some Peloponnesian troops, they slew the Athenian garrison, with the exception of those who escaped into Nisaem. They continued to hold Nissea and Pegae, but they also surrendered these towns in the thirty years' truce made in the same year (445) with Sparta and her allies. (Thuc. i. 114, 115.) The Athenians thus lost all authority over Megaris; but they were so exasperated with the Megarians, that they passed a decree excluding them from their markets and ports. This decree pressed very hard upon the Megarians, whose unproductive soil was not sufficient to support the population, and who obtained most of their supplies from Attica: it was one of the reasons urged by the Peloponnesians for declaring war against Athens. (Thuc. i. 67, 139; Aristoph. Achars. 533.)

In the Peloponnesian War the Megarians suffered greatly. In the first year of the war the Athenians invaded Megaris with a very large force, and haid waste the whole territory up to the city walls. At the same time the Athenian fleet blockaded the harbour of Nisaea, so that Megara was in the situstion of a besioged city cut off from all its supplies. This invasion was repeated by the Athenians once in every year, and sometimes even twice; and the sufferings which the people then endured were remembered by them many centuries afterwards, and were assigned to Pansanias as the reason why one of their works of art had not boen finished. (Thuc. ii. 31 ; Plut. Per. 30 ; Paus. i. 40. § 4.) In the fifth year of the Peloponnesian War (в. c. 427), the Athenians under Nicias took possession of the island of Minoa, which lay in front of Nisaea, and left a garrison there, by whioh means the port of Nisaea was still more effectively blockaded. (Thuc. iii. 51.) Of the position of this island, and of the causeway connecting it with the mainland, we shall speak presently. In the eighth year of the Peloponnesian War (b.c. 424), the democratical party in Megara fearing the return of the aristocratical exiles, who were at Pegae, entered into regotiations with the Athenians to snrrender their city to them. The Athenians still held Minos; and the Long Walls and Nissee were occupied by an Athenian garrison. The Athenians
were admitted within the Long Walls by their friends in Megara, and after a siege of two days they took Nismea.* Megara was saved by Brasidas, who advanced to the relief of the city with a large Peloponnesian force, and, after offering battle to the Athenians, which they declined, was admitted within the city. The aristocratical exiles were now recalled, and a strict and exclosive oligarchy established, which lasted for some time. (Thuc. iv. 66 -74.) A fow months afterwards the Megarians captured the Long Walls from the Athenians and levelled them to the ground; bat the Athenians still continued to hold Nisaen and Minoa. (Thuc. iv. 109.) In the truce concluded between the Athenians and Peloponnesians in the following ytar, it was settled that the line of demarcation between the Athenians in Nisaea and Minoa, on one side, and the Megarians and their allies in Megara, on the other, should be the road leading from the gate of Nisaea dear the monument of Nisus to the Poseidonium or temple of Puseidon, and from the latter in a atraight line to the causeway leading to Minom. (Thuc. iv. 117.)

From this time Megara is seldom mentioned in Grecian history. Its prosperoas condition at a later period is cxtolled by Isocrates, who says that it possessed the largest houses of any city in Greece, and that it remained at peace, though placed between the Peloponnesians, Thebans, and Athenians. (Isocr. de Pac. p. 183, ed. Steph.) Megara surrendered to Philip after the battle of Chaeroneia. (Aelian, V. H. vi. 1.) After the death of Alexander it was for some time in the power of Cassander; bat his garrison was expelled by Demetrius Poliorcetes, who proclaimed the freedom of the city n.c. 307. (Diod. xx. 46; Plut. Demetr. 9.) Subsequently it again passed into the hands of the Macedonian kings, but it was united by Aratus to the Achaean League. (Polyb. ii. 43.) In the war between the Achaean League and the Romans, Megara surrendered to Metellus without a contest. (Paus. vii. 15. § 11.) It is mentioned by Sulpicius, in his well-known letter to Cicero (ad Fam. iv. 5), as one of the rained cities of Greece. It still existed in the time of Strabo (ix. p. 393), and it was sabsequently made a Boman colony. (Plin. iv. 7. s. 11.) Pausanias relates that it was the only city of Greece which Hadrian refused to assist, on account of the marder by its inhabitants of Anthemocritus, the Athenian herald (Paus. i. 36. § 3); bat we learn from inscriptions that a new tribe at Megara was called Adrianis, in honour of the emperor, and that Sabina, the emperor's wife, was worshipped here under the title of véa $\Delta \eta \mu \eta \tau \eta \rho$ (Böckh, Inscr. vol. i. p. 566); and even Pausanias himself describes a temple of Apollo of white marble, built by Hadrian (i. 42. § 5). It continued to coin money under the Antonines and subsequent emperors; and it appears in the Tabula Peuting, as a considerable place. In the fifth century its fortifications were repaired by Dingenes, an officer of the emperor Anastasius (Chandler, Inscr. Ant. 130); but from this time it appears to have rapidly sunk, and was frequently ylundered by the pirates of the Mediterranean.

Megara was celebrated on account of its philosophical school, which was founded there by En-

[^16]cleides, a disciple of Socrates, and which distinguished itself chiefly by the cultivation of dialectics. The philosophers of this school were called the Megarici (ol Merapucol, Strab. ix. 393). It was also less creditably distinguished for its courtezans, who were called Megarian Sphinxes. (Meqapixal X申ipres, Suid. 8. v. ; comp. Plaut. Pers. i. 3. 57.) The Megarians were addicted to the pleasures of the table. (Tertnll. Apolog. 39.) They had a bad character throughout Greece, and were regarded as fraudulent, perfidious, and ignorant; but they may have owed much of this bad character to the representations of their enemies, the Athenians. (Aelian, V. H. xii. 56; Schol. ad Aristoph. Pac.
 temptible people.) Of the Megarian games and festivals we have three kinds mentioned; the Dioclean, celebrated in honour of the hero Diocles (Schol. ad Theocr. xii. 28 ; Schol. ad Pind. 01. xiii. 155; Schol. ad Aristoph. Acharm 774), the Alcathoan, celebrated in honour of Alcathous, and the Smaller Pythian, in honour of the Pythim Apollo, whose worship was very ancient in Megrara. (Philostr. Vit. Soph. i. 8; Schol. ad Pind Nem. v. 84, OL xiii. 155; Kranse, Dic Pythien, Nemeem und Isthmien, p. 66.)

Dion Chrysostum (Orat vi.) says that Megara is one day's journey from Athens, and Procopins (Bell. Vand. i. 1) makes it 210 stadia. According to modern travellers the journey takes 8 hours. (Dodwell, Classicad Towr, rol. ii. p. 177.)

## III. Topography of the City atid its Port-town.

Pansanias has given a particular description of the pablic buildings of Megara (Pans. i. 40, seq.). He begins his account with the aqueduct of Theagenes, which was supplied with water from the fountain of the nymphs called Sithnides. The aqueduct was remarkable for its magnitude and numerons columns. Near it was an ancient temple, containing a statue of Artemis Soteira, statues of the twelve gods said to be by Praxiteles, and imaces of the Roman emperors. Beyond, in the Olympieium, or inclosure of Zens Olympins, was a magnificent temple, containing a statue of the god, which was never finished, owing to the distress occasioned by the Athenians in the Peloponnesian War. From thence Pausanias ascended to the citadel, named Caria, passing by a temple of Dionysus Nyctelius, a sanctuary of Aphrodite Apostrophia, an oracle of Night, and a roofless temple of Zeus Cronius. Here, also, was the Megarum, or temple of Demeter, said to have been founded by Car during his reign.

Below the northern side of the Acropolis Caria was the tomb of Alcmena near the Olympieium. Hence Pausanins was conducted by his Megarian guide to a place called Rhus ('Poús; comp. Plut. Thes. 27), because the waters from the neighbouring mountains were collected here, until they wero turned off by Theagenes, who erected on the spot an altar to Achelous. It was probably this water which supplied the fountain of the Sithnides. Near this place was the monument of Hyllas; and not far from the latter were temples of Isis, Apollo Agraeus, and Artemis Agrotera, which was said to have lieen dedicated by Alcathons after he bad slain the Cithaeronian lion. Below these were the heroum of Pandion, and the monuments of Hippolyte, queen of the Amazons, and Tereus, whe married Procne.

On the ascent to the citadel Alcathoë, Pausanias saw, on the right hand, the sepulchre of Megareus, and near it the hearth of the gods called Prodomeis, to whom Alcathous sacrificed when he was going to build the walls. Here was the stone upon which Apollo laid his lyre, when he was assisting Alcathous, and which, on being struck, returned a sound like that of a harp. (Comp. Theogn. 771; Ov. Met. viii. 14.) Bcyond was the council-house (Bouncuthpiov) of the Megarians, formerly the sepulchre of Timalcus; and on the summit of the Acropolis was a temple of Athena, containing a statue of the goddess, entirely gilded, with the exception of the face, hands, and feet, which were of ivory. Here, also, were temples of Athena Nice, or Victory, and Aeantis. The temple of Apollo was originally of brick, but had been rebuilt of white marble by Hadrian. Here, also, was a temple of Demeter Thesmophorus, in descending from which occurred the tomb of Callipolis, daughter of Alcathous.
On the road leading to the Prytaneium the traveller passed the heroum of Ino, the heroum of Iphigeneia, and a temple of Artemis said to have been erected by Agamemnon. In the Prytaneium were tombs of Menippus, son of Megareus, and Echepolis, son of Alcathous ; near which was a stone called Anaclethra, because here Demeter sat down and called her daughter. Pausanias next mentions the sepulchres of those Megarians who had fallen in battle against the Persians, and the Aesymnium, so named from its founder, which contained a monument of the heroes of Megara. There were several sepulchral monuments on the way from the Aesymnium to the heroum of Alcathous, in which the public records were preserved in the time of Pausanias. Beyond was the Dionysium or temple of Dionysus; close to which was the temple of Aphrodite, containing several statues by Praxiteles. Near the latter was a temple of Fortune, with an image of the goddess by Praxiteles. A neighbouring temple contained statues of the Muses, and a Jupiter in brass, by Lysippus.

In the Agora stood the tombs of Coroehus and of the athlete Orsippus, the former of which was ornamented by some of the most ancient specimens of sculpture which Pausanias had seen in Greece. On descending from the Agora by the street called Straight, there stood, a little to the right, the temple of Apollo Prostaterius, with a statue of the god of great merit, as well as other statues by Praxiteles. In the ancient gymnasium, near the gates called Nymphades, was a pyramidal stone, called by the natives Apollo Carinus, and a temple of the Eileithyiae.

On the road to the port of Nissea was a temple of Demeter Malophorus. The Acropolis of Nisaea still remained ; on descending from the Acropolis there was the tomb of Lelex on the sea-side. Near Nissea was a small island, called Minoa, where the fleet of the Cretans was moored during the war against Nisus.

Megara still retains its ancient name, but it is a miserable place. It occupies only the western of the two ancient citadels, and as this was probably Alcathoie, the town on the summit is on the site of the temple of Athena. There are hardly any remains of antiquity at Megara. On the eastern acropolis there are a few remains of the ancient walls. Nione of the numerous temples mentioned by Pausanias can be identified; and ouly one of them is marked by the frusta of some Ionic columns. The magnificent a pueduct of Theagenes has disappeared; and some imperfect foundations aud a large fountain on the
northern side of the town are the only remains of the celebrated fountain of the Sithnide nymphs.

Of the Long Walls, uniting Megara with Nisaea, we have alrcady spoken. They are noticed by Aristophanes under the name of tà Méapixà $\sigma x \in ́ \lambda \eta$ (Lysistr. 1172). They were destroyed by the Megarians themselves, as we have already seen, in the eighth year of the Peloponnesian War, but they were sabsequently restored by Phocion. Strabo speaks of them as if they still existed in his time (ix. p. 391), but they would seem to have fallen to ruin before that of Pausanias, as he makes no mention of them. According to Thucydides (iv. 66) they were 8 stadia in length, but according to Strabo (l. c.) 18 stadia.

The position of Nisaea and Minoa has given rise to much dispute, as the localities described by Thucydides do not agree with the present featnres of the coast. The subject has been briefly discussed by Colonel Leake (Northern Greece, vol. ii. p. 401), and more fully by Dr. Arnold (Thucyd vol. ii. p. 393) and Lient. Spratt. (London Geographical Journal, vol. viii. p. 205.) Thucydides represents Minoa as an island close to Nisaea, and united to the latter by a bridge over a morass. On Minoa the Megarians had built a fortress (Thuc. iii. 51). Strabo (ix. p. 39) calls Minoa a promontory (axpa). He says that, "after the Scironian rocks, we come to the promontory Minoa, forming the harbour of Nisaea." Pausanias (i. 44. § 3), however, ayrees with Thucydides in calling it an island; but it may be observed that the ex pression of Strabo (axpa) is not inconsistent with its being an island, as stated by Thucydides and Pausanias. The difficulty in determining the site of Minoa and Nisaes arises from the fact, that there is at present no island off the coast which can be identified with Minoa. At the distance of nearly a mile and a half from Megara there is a small rocky peninsula, and further off two islands, the inner one of which affurds shelter to a few of the small class of coasters. Hence it has been supposed that the inner island was Minoa, as it forms the port of the Megarians of the present day. But this island is distant from the promontory about 200 yards, with 7 fathoms of water between them ; consequently they could never have been connected by a bridge. It might, indeed, be argued, that the peninsula was once an island; but this is disproved by the fact that its isthmus is of equal height with its extremity. Morenver: there are no ancient remains, either on this island or the peninsula.

Other writers, among whom are Colonel Leake and Dr. Arnold, suppose the promontory of Tikho (see map, No. 6), further to the east, at the entrance of the strait of Salumis, to have been Minoa. since it may at one time have been an island. Accordingly, the statement of Strabo respecting the length of the Long Walls, is preferred to that of Thucydides. But this promontory is nearly 3 miles in length, which is larger than is implied in the description of Thucydides (iii. 51), who speaks of it as fortified only by a single fort. Moreover, Pausanias calls Minoa a small island. Lieutenant Spratt bas offered a more probable solution of the difficulty. He supposes Minoa to be a rocky hill, surmounted by a ruined fortress, and standing on the margin of the sea south of Megara, at the distance of little more than a gengraphic mile, thus agreeing with the 8 stadia of Thucydides. "That this hill was once a peninsula, appears evident from the dry heds of two rivers, which pass cluse to its base; one on exch side. The eastern
bed winds round the back of the hill, leaving only a narrow neck of elevated ground between it and that on the west side : and it is, therefore, clear, that when these two rivers had communication with the sea, the intermediate neck of land, with this hill, would have been a peninsula, or promontory. These two river beds were once the only outlets of the mountain streams which issue from the valleys on the north side of Mont Geraneia ; for the ancient course of the eastern bed, although now ploughed over and cultivated, can be traced through the plain to the northward, as far as its junction with that river, whose torrent at present flows in an easterly direction towards the shallow bay of Tikho, crossing the site of the Long Walls which connected Megara with Nisaea and Minoa, and losing themselves in the swamps bordering that bay. Although vestiges of the walls are not found in the bed of the

MEGARA.
river, yet, on examining the ground near it, the evidence is convincing that its present course does cross their site, as, at a short distance from it, on the Megarian side, their foundations may be traced in a direction transverse to the course of the river, and towards the castellated hill before mentioned. The dry watercourse on the western side of this isolated hill can be traced to within two or three hundred yards of the eastern one; and having no communication with any other mountain stream, it may not be unreasonable to suppose that formeriy the river split there into two branches or months. This hill would then have been an island, as Thucydides calls Minoa." The subsequent deposit of earth brought down by the above mentioned stream, would have joined the hill to the mainland.

The accompanying map and drawing are taken from Lieut. Spratt's.

MINOA. NISAEA.
MEGARA.

PLAN OF THE NEIGHBOURHOOD OF MEGARA.

A Megara.
B. Nisaea.
C. Minoa.

1. Island formerly supposed to be Megara.
2. Rocky peninsula.
3. Ancient mole.
4. Agios Nikolaos.
5. Agios Georgios.
6. Promontory of Tikho.
7. Salamis.

If this hill is the site of Minoa, the town of Nisaea must have been near it ; and Lient. Spratt discovered many vestiges of an ancient site on the eastern side of the hill, between the sea and a low rock. which stands in the plain a short distance to the northward. "Among these remains are four small heaps of ruins, with massive foundations, in one of which there are three broken shafts of small
columns erect, and wanting apparently only the fourth to complete the original number. Probably they were monuments or temples; and two Greek churches, which are now in ruins, but standing on two ancient foundations, will not be unfavourable to the supposition. Another church, Agios Nikolaos, which is perfect, also occupies the site of an ancient building, but it stands nearer to the sea." Lieut.

Spratt further supposes that he has discovered remains of the ancient causeway. "Between the bese of the hill on its north side, and the opposite bank of the dry bed of a former river, there are three platforms of heavy buildings, one of which lies immediately at the foot of the hill, another on the edge of the opposite bank, and the third nearly central ; and as the course of that former river-bed clearly and indisputably passes between them, it is more than probable that the bridge of communication may be recognised in these ruins." He also says, "that distinct remains of an ancient mole are to be seen extending from the south-eastern end of the hill, and curving to the eastward, so as to have formed a harbour between the hill and those rains," which is in accordance with the statement of Strabo, that the port of Nisaea was formed by the promontory of Minoa.

## IV. Terkitory of Megara.

Megaris occupied the greater part of the large Isthmus, which extends from the foot of Mt . Cithaeron to the Acrocorinthus, and which connects Northern Greece with the Peloponnesus. The southern part of this Isthmus, including the Isthmus properly so called, belonged to Corinth; but the boundaries of Megaris and Corinth differed at an earlier and a later period. Originally Megaris extended as far as Crommyon on the Suronic, and Thermae on the Corinthian, gulfs, and a pillar was set up near the Isthmus proper, marking the boundaries between Peloponnesus ard Ionia; but subsequently this pillar was removed, and the territory of Corinth reached as far as the Scironian rocks and the other passes of the Geraneian mountains. (Strab. ix. pp. 392, 393.) Towards the N., Megaris was separated from Boeotia by Mt. Cithaeron, and towards the E. and NE. from Attics by sonne high land, which terminates on the west side of the bay of Eleusis in two summits, formerly called Kerata or The Horns (id Kipara), and now Kanđ̌ili. (Strab. ix. p. 395; Diod. xiii. 65; Plut. Them. 13.) Here there is an immense deposit of conchiferous limestone, which Pausanias also noticed (i. 44. § 6). The river Iapis, Which flowed into the sea a little to the W. of the Horns, was the boundary of Megaris and Attica. [Attica, p. 323, a.] The extreme breadth of Megaris from Pagae to Nisaea is estimated by Strabo (viii. p. 334) at 120 stadia; and, according to the calculation of Clinton, the area of the country is 143 square miles.

Megaris is a rugged and mountainous country, and contains no plain, except the one in which its capital, Megara, was situated. This plain was called the "White Plain" (td $\Lambda \in u k \dot{\nu} \boldsymbol{\pi} \pi \in \delta / o v$, Schol. ad Hom. Od. v. 333, ed. Mai; Etymol. M. 8. v. Aev$\kappa \delta \theta \in a$ ), and is the same as Cimolia (Kı $\mu$ coila, Diod. xi. 79), which produced the Creta Cinnolia or fullers' earth, and which Leake erroneously regards as a place (Northern Greece, vol. ii. p. 413). The main range of Mt. Cithaeron runs from W. to E., forming the boundary between Boeotia and Attica; but it is also prolonged southwards along the shores of the Corinthian gulf, and gradually rises into a new chain, which stretches across Megaris from W. to E., parallel to Mt. Cithaeron. This chain is highest on the western side, where it attains the height of 4217 feet (Paris), and gradually sinks down on the enstern side towards the Saronic gulf. On its western side it runs out into the promontory Aeghelanctus (Aifindayktos, Aesch. Agam.

303, with Schol.), and also into those of Olmiate and Herarum in the Corinthian territory. [Corinthus, p. 685.] On its eastern side the island of Salamis and the surrounding rocks are only a continuation of this chain. The mountains were called Geraneta in antiquity ( (epdecta,'Thac. $i$. 105 ; Paus. i. 40.§7), and are said to have received this name because, in the deluge of Deucalion, Megarus, the son of Zens and a Sithonian nymph, was led by the cries of cranes ( $\boldsymbol{\gamma}^{\prime}$ payot) to take refuge upon their summit. (Paus. l. c.) Towards the south the Geraneian mountains sink down into the plain of the Isthmus, while to the soath of the Isthmus there rises another chain of mountains called the Oneian. Strabo (viii. p. 380) confounds the Geraneia with the Oneia; and erroneously represents the latter extending as far as Boeotia and Cithaeron. His error has misled many modern writers, who, in consequence, speak of the Geraneia as a portion of the Oneia. (Curtins, Peloponnesos, vol. i. p. 25.)

The Geraneian mountains are almost, if not entirely, calcareous. They form the true boundary of Northern Greece, and rise above the Isthmus of Corinth like a vast wall from sea to sea. Thres roads lead across these mountains into Peloponnesus. One runs from the western coast of Megaris, across the rocky peninsula of Perakhora, the ancient Peiraeum of Corinth, down to the Corinthian galf. It was the road by which armies frequently marched from Peloponnesus into Northern Greece, bat in ordinary intercourse was not much used on account of its length. The second road passes through the centre of the Geraneia, and is called the road of the great Dervenia from the narrow pass (Turk. Derveni), which leads between two masses of rock, and where guards were stationed in Turkish times. According to Gell the top of this pass was anciently fortified with a wall. The same writer says that, from the top of this pass to Corinth the distance is 8 hours 37 minutes, and to Megara 2 hours 33 minutes. This road is now little used. The third road, which leads along the eastern coast of Megaris, is the shortest way between Megara and Corinth, and therefore has been the chief line of communication between Peloponnesus and Northern Greece from the earliest times to the present day. This road, soon after leaving Megara, runs for several miles along a narrow ledge or terrace, cut in the rock half-way up the sides of the cliffs. On his right hand the traveller has the precipitous rock, while on his left it descends perpendicularly to the sea, which is 600 or 700 feet beneath him. The road, which is now narrow and impracticable for carriages, was made wide enough by the emperor Hadrian for two carriages to pass abreast. From the higher level the road descends to the brink of the water by a most ragged and precipitous path cut between walls of rock. This pass is the celebrated Scironian rocks of antiquity, now called Kaké-skala, or bad ladder (ai Ekeipooviठes mérpat, Strab. ix. p. 391;
 Exelpavos dkctal, Eur. Hippol 1208; the road itself in Excpovis 886s, Herod. viii. 71 ; Scironia saxa, Plin. iv. 7. 8. 11). According to a Megarian tradition, these rocks derived their name from Sciron, a polemarch of the Megarians, who was the first to make a footpath along the rocks (Paus. i. 44. § 6); but, according to the more common tradition, they were so called from the robber Sciron. Neir the southern end of the pass, where the road
begins to descend，we must place the Molurian rock （ $\boldsymbol{\eta}$ Monoupls），from which Ino or Leucothea threw herself with her son Melicertes（Palaemon）into the sea：and close by were the execrable rocks（dyayeis）， from which Sciron used to throw strangers into the sea，and from which lie was himself hurled by The－ seus．（Paus．i．44．§ 7，serq．）The tortoise at the foot of the rock，which was said to devour the rob－ bers，was probably a rock called by this name from its shape，and which gave rise to the tale（kard riv
 mit of the mountain was a temple of Zeus Aphesias． On descending into the plain was the temple of Apollo Latous，near which were the boundaries of Megaris and the Corinthia．（Paus．i．44．§§ 9，10．）

Megaris contained only one town of importance， Megara，with its harbour Nisaea，which have been already described．The other towns in the country were Akgorthena and Pegar（Doric Pagak），on the Alcyonian or Corinthian gulf；Tri－ Podiscus and Rhus，in the interior；Phibalis，on the confines of Attica（Schol．ad Aristoph．Acharn． 802）；and Phalycon and Polichne，of which the site is uncertain．There was also a fortress， Geranein，situated on one of the mountains of this name，but its position is also uncertain（Scylax， p．15；Plin．iv．7．s．11）；it is apparently the same place as the Erenfia（＇Epéveia）of Pausanias（i． 44. § 5）．Scylax mentions a place Aris，bat instead of Mryai，reíxos 「epáveia，＂Apis，it has been conjec－ tured that we ought to read Mryal reixos．Гepá－ veca axpis or axpa．Whether there was a place of the name of Isus in Megaris seems doubtful． ［Isus．］（Reinganum，Das alte Megaris，Berlin， 1825 ；Dodwell，vol．ii．p．181，seq．；Leake，Northern Greoce，vol．ii．p．388，seq．）

COLS OF MEGARA．

## MEGARIS．［Megara．］

ME＇GARIS，a small island on the cosat of Cam－ pania，mentioned by Pliny（iii．6．s．12），who places it between Pausilypus and Neapolis；it can therefore be no other than the islet or rock now occupied by the Castel dell Oeo．［Neapoiss．］It is evidently the same which is called by Statius Megalia．（Stat． Silo．ii．2．80．）
［E．H．B．］
MEGIDDO．［Legio；Magdolum．］
MEGIDIO VALLIS，the western part of the vast plain of Exdraelon，at the northern foot of Mount Carmel，watered by the Kishon．［Es． drarlon Vallis v．Campus．］
［G．W．］
MEGISTE（Merlorn），an island off the coast of Lycia，opposite to Antiphellus．It cuntained a town which，if the rading in Strabo（xiv．p．666）be correct，was called Cisthene（Ki $\sigma \theta$ hvn），but had perished before the time of Pliny（v．35）．There was also an excellent harbour，which appears to have been capable of containing a whole fleet．（Liv． xxxvii． 22 ：comp．Steph．B．8．v．，who calls the town Megiste；Ptol．v．3．§9；Scylux，p．39．）The island， which derived its name from the fact that it is the largest of a group，is now called Kasteloryzo，or Casted Rosso．The ioland seems to have been colo－
nised by the Rhodians，or at least to have been in their possession，for inscriptions found there aro composed in the Doric dialect．There are hat few remains of ancient buildings．（Leake，Asia Minor， p．184；Fellows，Lycia，pp．187，\＆cc．）［L．S．］

MEGISTUS．［MACEsTUs．］
MEIACARIRE（Amm．Marc．xviii．6，10； Maiakappl，Theophyl Simoc．i．13，ed．Bonn），a small place in Mesopotamia，mentioned by Ammianus and Theophylact．It appears to have been at no great distance from Amida．Ammianus states that it derived its name frmm certain cold springs which were there．（Cf．Böcking，Notit Dignit．i．p． 418．）
［V．］
MEILICHUS．［Achaia，p．13，b．］
MELA or MELLA，a river of Gallia Transpa－ dans，stiil called the Mella，which rises in the Alps，flows through the Val Trompia，anciently the residence of the Triumpilini，enters the plain of Lombardy near Brixia，and falls into the Ollins （Oglio）more than 20 miles below that city．Ca－ tullus speaks of it as flowing through the city of Brixia，but this is an inaccuracy or a pretical license，as it passes，in fact，about a mile to the W．of it．［Brixin．］Both he and Virgil describe it as a placid and winding stream．（Catull．Lxvii． 33 ；Virg．G．iv． 278 ；Philargyr．ad loc．）［E．H．B．］

MELAE．1．A town of the Samnites，mentioned only by Livy（xxiv．20），among the towns of the Caudine Samnites which were taken by Fabins in B．C．214．The same author elsewhere（xxvii．1） mentions a town of the Samnites which he calls Melps，and which was not taken till b．c．210，by Marcellus．Nevertheless，it is probable that the same place is meant in both cases，but we have no clue to its position．

2．A town in the neighbourhood of Locri in Brat－ tium，mentioned by Thucydides（ V .5 ），but other－ wise wholly unknown．［Locre］［E．H．B．］

MELAENA（Mé入auva）．1．A promontory of Ionia，forming the north－western point of the penin－ sula which is traversed by Mount Mimas．It was celebrated in ancient times for its quarries of mill－ stones．（Strab．xiv． $\boldsymbol{p}$ ．645．）It is prossible that this promontory，which is now called Kara－Rurme （the Black Cape），may be the same as the one called by Pliny（v．31）Corynaeum Promontoriam，from the town of Coryne，situated at the southern ex－ tremity of Mount Mimas

2．A promontory of Bithynia，on the right hand on sailing through the Bosporus into the Eaxine， between the rivers Rhebe and Artane．（Apollon． Rhod．ii．651；Orph．Argon．716；Arrian，Periph p．13；Marcian，p．69．）In the anonymous Periplus of the Euxine（ p .2 ），it is called Ka入入ivaxpor，and Ptolemy（v．1．§ 5）calls it simply Bituvias dxpor． Its modern name is Tahili

3．The north－western promontory of the i．land of Chios（Strab．xiv．p．645），now called Cape $S$. Nicolo．
［L．S．］
melaenae．［Attica，p．329，b．］
MELAENEAE or MELAENAE（Me入auveal， Paus．；Me入auval，Rhian．ap．Steph．B．s．v．：Eth． Menauveús），a town of Arcadia，in the territory of Heraea，and on the road from Heraea to Megalopolis． It was distant 40 stadia from Buphagium．Pau－ sanias says that it was founded by Melaeneus，the son of Lycaon，but that it was deserted in his time and overflowed with water．The ruins of Melaeneas lie 4 or 5 miles eastward of Heraea，between the villages Kikora and Kukoreos，where are the ro－
mains of a Roman bath，which has also been a church，and is sometimes used as such，though it is said to be generally inundated，even in the dry season，which is in conformity with the account of Pausanias．The Peutinger Table specifies Melae－ neas as distant 12 miles from Olympia；but it does not mention Heraea，though a much more important place，and one which continued to exist long after Heraes：moreover，the distance of 12 miles applies to Heraea，and not to Melaenese．（Prus．viii． 26. § 8，comp．v．7．§ 1，viii．3．§ 3；Steph．B．s．v．； Plin．ir．6．s．10；Leake，Peloponnesiuca，p．231； Boblaye，Récherches，q．c．p．159；Curtius，Pelopon－ nesos，vol．i．p．356．）

MELA＇MBIUM（Me入á şıov），a place in Pelas－ giotis in Thessaly，near Scotussa，is mentioned in connection with the movements of the armies before the battle of Cynoscephalae．Leake places it near the sources of the Onchestus，at a place called Dederianf．（Polyb．xviii．3，6；Liv．xxxiii．6； Leake，Northern Greece．vol．iv．p．473．）

MELANCHLAENI（Me入arर入aivor），a nomad tribe，the name of which tirst appears in Hecitacus （ap．Steph．B．，Fr．154，ed．Klausen）．In the geo－ graphy of Herodotus（iv．20，100－103，107）they are found occupring the districts E．of the Androphagi， and $N$ ．of the Royal Scythians， 20 days＇journey from the Palus Macotis；over above them were lukes and lands unknown to man．It has been con－ jectured that Herodotus may refer，through some hearsay statement，to the lakes Ladoya and Onega． There has been considerable discussion among geo－ graphers as to the position which should be assigned to this tribe ：it is of course impossible to fix this with any accuracy；but there would seem to be reason to place them as far N ．as the sources of the Volga，or even further．（Schafarik，Slav．Alt． vol．i．p．295．）Herodotus expressly says that they did not belong to the Scythian－Scolotic stock，al－ though their customs were the same．The name，the ＂Black－cloaks，＂like that of their cannibal neigh－ bours，the Anthropophagi，was applied to them by the Greeks，and was $n n$ corrupted form of any indi－ genous appellation．A people bearing this name is mentioned by Scylax of Caryanda（ p ．32）as a tribe of Pontus．Ponponius Mela（i．19．§4）and Pliny （vi．5）coincide with Scylax，who speaks of two rivers flowing through their territory，the Meta－ soris（Metdowpis），probably the same as the Thes－ syers（ $\Theta$ é $\sigma \sigma u p ı s$, Ptol．v．9．§§ 10， $30:$ Kamisiliar）， and the Aegipius（Airixios：Kentichli）．Diony－ sius Periegetes（v．309）places this people on the Borysthenes，ard Ptolemy（v．9．§ 19）between the river Rha and the Hippici Montes，in Asiatic Sar－ matia；but it would be a great error to found any observation concerning these ancient northern tribes upon either the Roman writers or l＇tolemy，or to confuse the picture set before us by these geogra－ phers，and the more correct delineations of Hero－ dotus．For the Melanchlaeni of Ammianus（xxii． 8. § 31），see Alani．
［E．B．J．］
MELANI）＇TAE（Menavoitai），a people of Thrace， mentioned only by Xenophon（Anab．rii．2．§ 32）．

MELANGEIA．［Mantineia，p．264，b．］
MELA＇NIA（Meגavía），a place on the coast of Cilicia，a little to the west of Celenderis，perhaps on the site of the modern Kixlimun．（Strab．xiv． p．670．）From another passage of Strabo（xvi． p． 660 ），compared with Stephanus B．（s．v．Mć－入avar），it would seem that the place was also called Melacnae．
［L．S．］

## MELAS．

MELANIPPE or MELANIPPIUM（Me入avimn or Me入avixition），a small town on the coast of Lycia， on the western slope of Mount Phoenicus，about 30 stadia from Cape Hiemn，and 60 stadia south of Gagae，of which Leake（Asia Minor，p．185）believes it to have been the purt town．（Hecat．Fragm． 247 ； Steph．B．s．v．，who erroneously calls it a river；Quint． Smyrn．iii．232；Stadiusm，Mar．M．§§ 210，211．） Fellows（Discov．in Lycia，p．212）found a few tombs cut ont of the cliffs of the neighbourhood．［L．S．］

MELANOGAETULI．［Gaktulia．］
MELA＇NTHIUS（Me入ávelos），a small river on the north coast of Pontus，forming the boundary between Pontus Polemoniacus and Cappadocius，and flowing into the Euxine a little to the east of Cotyorn． （Plin．H．N．vi．4：Arrian，Peripl．p．17；Anonvm． Peripl．p．12；Tab．Peut．，where it is called Me－ lantus．）It is probably the same river as that now bearing the name of Melet Irmak．（Hamilton，Re－ searches，i．p．267．）
［L．S．］
MELANTIAS（Meגampias），a village of Thrace， on the river Athyras，and on the road from Heracleia to Byzantium， 18 miles from the latter．（ $I t$ ．Ant． pp．138，230，323， 332 ；Ammian．$\times x \times 1.11$ ； Agath．v．p．158．）
［A．L．］
MELA＇NTII SCO＇PULI（Mє入dértot $\sigma \kappa о \pi \in \lambda o i$ ）， some rocks in the Aegaean sea，where Apollo ap－ peared to the Argonauts，probably lay between Icaria and Myconis．（Strab．xiv．p．636；Apoll．Rhod． iv． 1707 ；Scyl．p． 55 ：Hesych．8．v．；Apollod．i． 9. § 26 ；Stadinsm．§§ 252，270．）

MELAS（Médas），the name of several rivers，so called from the dark colour of their water．

1．A small river of Arcadia or Achaia，described by Dionssius as flowing from Mount Erymanthus． （I）inys．Per．416；Callim．in Jov．23．）Strabo （viii．p．386）confounds it with the Peirus or Pierus in Achaia；but the reading is probably corrupt ［Acinain，p．14，a．］

2．A river of Benetia．［Boeotia，p．413，a．］
3．A river of Malis，which in the time of Hermio－ tus flowed into the Maliac gulf，at the distance of 5 stadia from Trachis．It is now called the Marra－ Neria，and falls into the Spercheius，after uniting its waters with the Giurgo（Dyras），which also nsed to flow in ancient times into the Maliac gulf．（Hermi． vii．198；Strab．ix．p．428；Liv．xxxvi．22；Leake， Northern Greece，vol．ii．p．26．）

4．A river of Phthiotis in Thessaly，and a tribu－ tary of the Apidanus．（Lucan，vi．374；Vib．Sequ． de Flum．s．v．Apidunos；Leake，Northern Grecce， vol．iv．p．515．）

5．A river of Thrace，now called Saldatti or Scheher－Su，falling into a deep bay of the same mame（Mìas кó入zos），which is bounded on the east by the shore of the Thracian Chersonenus．The moxlern name of the bay is the gulf of Saros． （Herod．vi．41，vii．58，198；Strab．vii．p．331； Liv．xxxiii．40；Ptolem．iii．11．§今 1，2；Mela，ii．2； Plin．iv．11．s．18．）

MELAS（Métas）．1．A small river of Cappa－ docia，which had its sources on Mount Argaens （Ptol．v．6．§8），and flowed in a north－western direction past the town of Mazaca，frequently over－ flowing its banks and forming marshes．（Strab．xii． p．538，\＆e．）It einptied itself into the river Halys， opposite the town of Siva．Strabo（l．c．）erroneously describes the Meias as a tributary of the Euphrates， as has been shown by Hamilton in the Journal of the Geogr．Society，vol．viii．If 149 （comp．his Re－ searcies，ii．p．259，\＆c．）．The river still bears a
name answering to the ancient Melas，Karco－Sr， that is，the Black River．

2．A navigable river in Pamphylia，flowing in a southern direction from Mount Thurus towards the sea，into which it emptied itself 50 stadia to the e：ust of Side．（Plin．v． 22 ；Strab．xiv．p． 667 ；Paus． viii．28．§ 2；Mela，i．14；Zosim．v．16，vi．3；Stu－ diasm．Mar．Magn．$\S \S$ 193，194．）Its modern name is Menargat－Su（Leake，Asia Minor，p．196．）

3．A small river in Pontus Polemoniacus，in the country of the Macrones．（Plin．vi．4．）［L．S．］

MELAS SINUS．［Melas，No．5．］
MELDI（Mìdat，Ptol．ii．8．§ 15），a penple of Gallia Celtica or Lugdunensis in Ptolemy＇s time， whose chief place was Iatinum ；but the position which Ptolemy avsigns to the Meldae and to Iatinum is very incorrect，if the Meldi are properly placed as neighbours of the Parisii and on the Matrona （Marne）．Strabo is not clearer．He says（iv．p． 194 ：－ ＂On both sides of the Sequana there are the Parisii， who possess an island in the river and a city Latecia，and Meldae，and Lexovi，along the Ocean these ；＂by which he perhaps means only the Lex－ ovii，but he might mean to say that the Meldae were on the Ocean．Pliny（iv．18）mentions in Lugdanensis Gallia «Meldi Liberi，Parisii，Tre－ cases．＂From ah this we may infer that the Meldi were near the Parisii ；but we only obtain a certain result as to their position from that of Iatinum ［Intinum］and other evidence．Gregory of Thurs speaks of the＂Comitatus Meldensis；＂the＂terri－ torium Meldicum＂is mentioned in the Ge．ta of Dagobert I．；and in the Capitularies of Charlemagne the＂Melcianus Pagus＂is placed between the＂l＇a－ risiacus＂and＂Miludensis，＂or the Pagus of Melodu－ num（Melun），and as the Melcianus occupies the space between the two other Pagi，it must comprise the diocese of Meaux．Thus we obtain with certainty the position of the Meldi．（D＇Anville，Notice，frc．）

Caesar（B．G．v．5）mentions the Meldi once； and the passage has caused great difficulty．The name Meldi in Caesar＇s text is not certain．The MSS．bave Medi，Melui，Hedui，Meldi，and Belgae． Caesar，intending to invade Britannia a second time， ordered the legati who were set over his legions to get s．Lips built in the winter of в．c．55－54．All his legions were in the country of the Belgae during this winter（B．G．iv．33）；and it seems a proper inference that all these ships were built in the country of the Belgae．When Caesar in the spring of B．c． 54 came to the Portus Itius，he found all the ships there except sixty which were built＂in Meldis．＂These slips being driven back by bad weather，had returned to the place from which they sailed．The wind which brought the other ships to the Portus Itius，which ships must have come from the south，would not suit ships that came from the north and east ；and hence D＇Anville justly concluded that these Meldi，whatever may be the true name，must have been north and cast of Itius． A resemblance of words led him to find the name of the Meldi in a place which he ralls Meleffelt near Bruges．The true name of the place is Maldeghern． There is a place on the Schelle about a league from Oinlenaerde，named Mellen，which under the Empire was a Roman station（Recuuil dAntiquites，fc．trous－ vees dans la Flanlre，par M．J．de Bast）．This is certainly not very conclusive evidence for fixing the site of the Meldi；if that is the right name． ＂Belgae＂cannot be the true reading，because all the ships were built in the territory of the Belgae；and

MELIBOFA．
Caesar＇s remark about the sixty would have no meaning，if he spoke of them as built＂in Belgis＂

If we cannot fix the site of these Meldi，we can see that they are not the people on the Marne． Caesar could have no reason for building vessels so far up the river．If he did build any on the Seine， he built them lower down．But it is clear that Caesar does not mean any vessels built on the Seine， for he says that these sixty were driven back to the place from which they came；a remark which，if applied to ships built on the Seine，is without ary meaning．Ukert（Gallien，p．325）has made some objection to D＇Anville＇s position of the Meldi，and his objections may have some weight；but his notion that Caesar＇s Meldi can be the Meldi on tho Marne shows that he did not understand Caesar＇s text．
［G．L．］
MELDIA（Me入ola），a town of Mresia Superior， on the raad from Naissus to Sardica．（It．Ant． p． 135 ；It．Hieros．p．566．）
［A．L．］
MELES（Mé入ns），a small river of Ionia，flowing close by the walls of Smyrna，and discharging its waters into the Hermaran gulf．（Strab．xii．p．554， xiv．p．646．）The little stream derives its cele－ brity from its connection with the legends about Homer，and from a report abont the healing powers of its waters．There was a tradition that near the sonrces of the river Meles there was a cave in which Homer had composed his epic poems，whence he is sometimes called Mє入ทбryevins．（Paus．vii．5．§6； Vit．Hom． 2 ；Stat．Silv．iii．3．60，7． 33 ；Tibull． iv．1．200．）The belief in the healing power of its waters is attested by an inscription quoted by Arundell（Asia Minor，vol．ii．p．406）and Ha－ milton（Kesearches，vol．ii．Append．No．48）．These circumstances are of some inuportance in identifying the river．It used to be supposed that a small， dirty，and muddy stream，flowing close by the modern town of Smyrna，was the same as the ancient Meles．But there is another stream，with bright and sparkling water，which rushes over its rocky bed near Bournoubat，and is still celebrated for its agreeable and wholesome qualities．Tra－ vellers are now justly inclined to identify this river with the ancient Meles．This supposition is con－ firmed by our more accurate knowledge of the site of ancient Smyma，which was on the north of the bily， while new Smyrna was on the south of it，at a distance of $\mathbf{2 0}$ stadia from the former；the site of the ancient place is still marked by a few ruins；and close by them flows the clear strean which we must assume to be the ancient Meles．（Comp．Hom．Hymm． viii．3：Ptol．v 2．§ 7 ；Steph．B．s．v．Me入tirou kóntos， according to whom the river was also called Meletus； Plin．v． 31 ；Hamilton，Researches，vol．i．p．51， foll．）
［L．S．］
MELESSES，a people in the $S$ ．of Spain．upn whose confines was situated the rich city of Oringis， alsis called Aurinx．（Liv．xxviii．3．）［Aurinx．］
 the interior of Germany，above the Semanus Silva． （Ptol．ii．11．§ 7．）There can be little doubt that Melibocus is the ancient name for the Harz mountain， or the Thüringer wald，or for both．
［L．S．］
MELIBOEA，an island at the mouth of the Orontes in Syria，the sole authority for the existence of which appears to be a puetical myth of Oppianus． （Cyneget．ii．115，\＆c．）
［G．W ］
MELIBOEA（Mexigota：Eth．Menifocús）．1．An ancient town of Magnesin in Thessaly，mentioned by Homer as one of the places subject to Philoctetes
（II．ii．717）．It was situated upon the sea－const （Herod．vii．188；Scylax，p．25；Apoll．Rhod．i． 592），andis described by Livy（xliv．13）as situated at the roots of Mt．Ossa，and by Strabo（ix．p．443） as lying in the gulf between Ossa and Pelium． Leake therefore places it near Aghiá（Northern Greecs，vol．iv．p．414）．Meliboea was taken and plundered by the Romans under Cn ．Octavius，b．C 168．（Liv．xliv 46：Meliboea is also mentioned by Strab．ix．p．436；Stepl．B．s．v．；Mela，ii．3； Plin．iv．9．8．16．）

The Meliboean purple is said by Lucretius（ii． 499；Virg．Aem．v．251）to have derived its name from this town．Many modern writers，however， suppose the name to have come from the small island Meliboea at the mouth of the Orontes in Syria；but there is no reason for this supposition，as the shellish from which the parple dye is obtained is found in the present day off the coast of Thessaly．

2．A town of Histiaeotis in Thessaly，is conjec－ tured by Leake to be represented by Voivóda．（Liv． xxxvi．13；Leake，Northern Greece，vol．iv．p．536．）

MELINO＇PHAGI（Me入ıyoфáyou），a people of Thrace upon the coast of the Euxine，near Salmy－ dessus．（Xen．Anab．vii．5．§ 12 ；Theopomp．ap． Steph．B．8．v．）They are，perhaps，the same people as the Asti（＇Aarol）whom Strabo places in the same neighbourhood（vii．pp．319，320）．

ME＇LITA（Me入itท：Eth．Meגıraíos，Melitensis： Malta），an island in the Mediterranean sea，to the S． of Sicily，from the nearest point of which it is dis－ tant 47 geogr．miles，but 55 from cape Pachynum． Strabo gives this last distance as 88 miles，which is greatly overstated；while Pliny calls it 84 miles distant from Camarina，which equally exceeds the truth．（Strab．vi．p．277；Plin．iii．8．s．14．）The island is about 17 miles long，and between 9 and 10 in breadth，and is separated only by a narrow channel from the adjoining island of Gaulos，now Goso． Notwithstanding its small extent，the opportune situ－ ation of Melita in the channel between Sicily and Africa，and the excellence of its harbours，must have early rendered it a place of importance as a commercial station，and it was occupied，probably at a very early period，by a Phoenician colony．（Diod． v．12．）The date of this is wholly uncertain，and it is called by later writers for the most part a Carthaginian settlement（Scyl．p．50．§ 110 ； Steph．B．a．v．），which it certainly became in after times；but there can be no doubt that Diodorus is right in describing it as originally a Phoenician one， established by that people as an emporium and har－ bour of refuge during their long voyages towards the west．The same author tells us that in con－ sequence of this commercial traffic，the colony rose rapidly to prosperity，which was increased by the industry of its inhabitants，who practised various kinds of manufactures with great success．（Diod． l．c．）But notwithstanding this account of its pros－ perity we have scarcely any knowledge of its his－ tory．The notice of it by Scylax as a Carthaginian colony，seems to prove that it had not in his day receivel a Greek settlement；and indeed there is no trace in history of its having ever fallen into the hands of the Greeks of Sicily，though its coins，as well as inscriptions，indicate that it received a strong tincture of Greek civilisation；and at a later period it appears to have been in a great measure Hellen－ ised．Some of these inscriptions point to a close connection with Syracuse in particular，but of the origin and nature of this we have no account．
（Boeckh，Corp．Inscr．Gr．5752，8cc）In the First Punic War we find Melita still in the hands of the Carthaginians；and though it was ravaged in B．c． 257 by a Roman fleet under Atilius Regulus， it does not appear that it fell permanently into the hands of the Romans．At the outbreak of the Second Punic War it was held by a Carthaginian garrison under Hamilcar，the son of Gisgo，who， however，surrendered the island to Tib．Sempronius， with a Ruman fleet，b．c． 218 （Liv．xxi．51）；and from this time it continued without intermission subject to the Roman rule．It was annesed to the province of Sicily，and subject to the government of the practor of that island．During the period that the Mediterranean was so severely infested by the Cilician pirates，Melita was a favourite resort of those consairs，who often made it their winter－quar－ ters．（Cic．Verr．iv．46，47．）Notwithstanding this it appears to have been in the days of Cicero in a flourishing condition，and the great orator more than once during periods of civil disturbances en－ tertained the project of retiring thither into a kind of voluntary exile．（Cic．ad Att．iii．4，工．7，8，9， \＆c．）

The inhabitants of Melita were at this penod famous for their skill in manufacturing a kind of fine linen，or rather cotton，stuffs，which appear to have been in great request at Rome，and were gene－ ratly known under the name of＂vestis Melitensis．＂ （Cic．Verr．ii．72，iv．46；Diod．v．12．）There is no doubt that these were manufactured from the cotton， which still forins the staple production of the island．
Melita is celebrated in sacred history as the scene of the shipwreck of St．Paul on his royage to Rome，A．D．60．（Act．Apost．xxviii．）The error of several earlier writers，who have transferred this to the Melita on the E．coast of the Adriatic（now Meleda），has evidently arisen from the vague use of the name of the Adriatic，which is employed in the Acts of the Apostles（xxvii．27），in the manner that was customary under the Roman Empire，as corresponding to the Ionian and Sicilian seas of geographers．［Adriaticuic Mare．］The whole course and circuinstances of the voyage leave no doubt that the Melita in question was no other than the modern Malta，where a bay called St．Paul＇s Bay is still pointed out by tradition as the landing－place of the Apostle．（The question is fully examined and discussed by Mr．J．Smith，in his Voyage and Ship－ ureck of St．Paul，8vo．Lond． 1848 ；also in Conybeare and Howson＇s Life of St．Paul，vol．ii．p．353，\＆c．）

No other mention is found of Melita daring the period of the Roman Empire，except in the geo－ graphers and the Maritime Itinerary，in which last the name already appears corrupted into its modern form of Malta．（Strab．vi．p． 277 ；Plin．iii．8．s． 13；Mel．ii．7．§ 18；Ptol．iv．3．§ 37；Itin．Ma－ rit．p．518；Sil．Ital．xiv．251．）After the fall of the Roman Empire it fell for a time into the hands of the Vandals；but was recovered from them by Belisarius in A．D． 533 （Procop．B．V．i．14），and appears to have continued from this time subject to the Byzantine empire，until it was conquered by the Arabs in A．D． 870.
The present population is principally derived from an Arabic stock；but it is probable that the Arab conquerors here，as well as in Africa， have been to a great extent amalgamated with the previously existing Punic popalation．The inscriptions discovered at Malta sufficiently prove that the Greek language was at one time in ha－

MELITENE．
bitual use there，as well as in the neighbouring island of Sicily；and one of these，which is bi－ lingual，shows that Greek and Punic must have Deen both preralent at the same period．（Boeckh， Corpus Inecr．Gr．5752－5754．）The former was probably the language of the more cultivated classes， in the same manner as Italian is at the present day．

Diodorus justly extols the excellence of the ports of Melita，to which that island has always been in－ debted for its importance．（Diod．v．12．）The an－ cient geographers all mention a city of the same name with the island，but its precise site is nowhere indicated；there is，however，good reason to beliere that it was the same with that of the old capital of the island，now called Medina（i．e．＂the city＂），or Cicila Vecchia，situated almost in the centre of the island；the modern town of La Valletta，which is the present capital，was not founded till 1566. Cicero speaks of a celebrated temple of Jono＂on a prommatory not far from the town＂（Cic．Verr． iv．46）；bat the expression is too vague to prove that the latter was situated close to the see，like the modern Valletta Ptolemy also notices the same temple，as well as one of Hercules，evidently the Phoenician deity Melkart．（Ptol．iv．3．§ 37．） The ruins of both these templesare described by Quin－ tino，who wrote in 1536，as existing in his time； bat the groands of identification are not given．The ouly considerable ruins now existing in the island are those on the S．coast，near a place called Casal Creadi，which are described in detail by Barth． （Arch．Zeitung，1848，Nne．22，23．）These are evidently of Phoenician origin，and constructed of massive stones，in a rery rude style of architecture， bearing much resemblance to the remains called the Torre dei Giganti，in the neighbouring island of Gozo．［Gaulos．］Some slight vestiges of build－ ings near the port called M／arsa Scirocco may per－ haps be those of the temple of Hercules；while，ac－ cording to Fazallo and Quintino，those of the temple of Juno were situated in the neighbourhood of the Castle of S．Angelo，opposite to the modern city of Valletta．（Quintini Descript．Ins．Melitae．p．110， in Burmann＇s Thes．vol．xv．；Fazell．de Reb．Sic． i．1．p．16．）

COLS OF MELTTA．
Ovid terms Melita a fertile island（Fast．iii．567）； an expression which is certainly ill applied，for though it was，in ancient as well as modern times， populous and flourishing，and probably，therefore， always well cultivated，the soil is naturally stuny and barren，and the great want of water precludes all natural fertility．Cotton，which at the present day is extensively cultivated there，was doubtless the material of the fine stuffs manufactured in the island；and the excellence of its soft stone as a bailding material accounts for the splendour of the houses，extolled by Divdorus（v．12）．Another pe－ culiar production of the island was a breed of small dogs，noticed by Strabo and other authors，though vol． $\mathrm{II}_{\text {．}}$
some writers derived these from the Melita in the Adriatic．The breed still exists in Malta．（Strab． vi．p． 277 ；Athen．xii．p． 518 ；Plin．iii．26．a．30．） The freedom from venomous reptiles which Malla enjoys，in common with many other secluded islands，is ascribed by the inhabitants to the mira－ culous intervention of St．Paul．（Quintino，L c．p． 117．）
［E．H．B．］
ME＇LITA（Meגltry，Scyl．p．8；Steph．B．：Agathem． i． 5 ；Plin．iii． 30 ；Itim．Anton．；Peut．Tab．；M\＆ 1 －
 de Adm．Imp． 36 ；Malata，Geogr．Rav．），one of the Liburnian group of islands．It was so callal like its namesake Melita or Malta，from the excel－ lence of its honey；and some erruneously have claimed for it the honour of being the island on which St．Paul was wrecked．（See preceding article．） It is the same as the long narrow and hilly island of Meleda，lying about half－way between Curzols and Ragusa，remarkable in modern times for the singular phenomenon of subterranean noises called ＂Detonazioni di Meleda，＂the cause of which has been attributed to the region of volcanic activity which is supposed to underlie the whole of this coast．（Comp．Daubeny，On Volcanoes，p．333．） The site of a palace which was built by Agesilaus of Cilicis，the father of Oppianus，the anthor of the＂Halieutica＂＂when banished to the island in the time of Septimius Severus，is still shown． （Wilkinson，Dalmatia and Momte－Negro，vol．i． p．265．）
［E．B．J．］
MELITAEA，or MELITEIA（Me入itala，Strab， Plin．，Steph．B．；Me入iteia，Polyb．；Meditla，Thuc．： Eth．Meגıraceús，Me入ıteús），an ancient town of Phthiotis in Thessaly，situated near the river Eni－ peus，at the distance of 10 stadia from the town Hellas．（Strab．ix．p．432．）The inhabitants of Melitaea affirmed that their town was anciently called Pyrrha，and they showed in the market－place the tomb of Hellen，the son of Deacalion and Pyrrba， （Strab．L c．）When Brasidas was marching through Thessaly to Macedonia，his Thessalian friends met him at Melitaea in order to escort him（Thuc．iv． 78）；and we learn from this narrative that the town was one day＇s march from Pharsalus，whither Brasidas proceeded on leaving the former place．In the Lamiac war the allies left their baggage at Me－ litaca，when they proceeded to attack Leonnatus． （Diod．xviii．15．）Subsequently Melitaea was in the hands of the Aetolians．Philip attempted to take it，but he did not succeed，in consequence of his scaling－ladders being too short．（Polyb．v．97， ix．18．）Melitaes is also mentioned by Scylux， p．24；Ephor．ap Steph．B．8．v．；Dicaearch．p． 21 ： Plin．iv．9．2． 16 ；Ptol．iii．13．§ 46，who erro－ neously calls it Me入liapa Leake identifies it with the ruins of an ancient fortress situated upon a lofty hill on the left bank of the Enjpens，at the foot of which stands the small village of Keuzlár．（Northern Greece，vol．iv．p．469，seq．）

ME＇LITE（Meגity）．1．A lake of Acarnania． ［Acariania，p．9，b．］
2．A demus in the city of Athens．［Athenae， p．301，b．］

MELITE＇NE（ $\dot{\eta}$ Meतet $\eta$ or，Ptol．vi．3．§ 3），the name given by Ptolemy to that purt of Susiuna which lay along the banks of the Tigris．［V．］
 city in the easterumost part of Cappadocia，and the capital of the district called Melitene．It appears that in the time of Strabo（xii．［．53i）neither

## MELOS

this nor any other town existed in that district． Pliny（vi．3），on the other hand，speaks of Melitene as a town built by the fabulous queen Semiramis of Assyria；both accounts may be reconciled by the supposition that the site of the town was formerly occupied by some castle or fort，such as we know to have existed in that country from early times． （Strab．xii．p．537．）The town was situated on the banks of a small tributary of the Euphrates，which was not far distant from Melitene，and in a very salubrious district．During the first century of the Christian era，the town was not of much importance （Tac．Ann．xv．26）；but Trajan raised it to the rank of a great city（Procop．de Aedif．iii．4），and thence－ forth it became a central point to which several roads converged．（It．Ant．pp．157，209，211， 215．）The emperors Anastasius and Justinian also embellished the place and surrounded it with new walls．Ever since the reign of Titus，Melitene had been the station of the famnous Christian Legio xii．fulninata；and after the division of Armenia into two provinces，it became the capital of Armenia Secunda．（Hierocl．p．703；comp．Ptol．v．7．§ 5， viii．17．§ 39 ；Dion Cass．Iv．23；Steph．B．s．v．； Plin．v．20；Procop．de Bell．Pers．i．17；Euseb． Hist．Eccles．จ．5．）In A．D．577，the Romans gained a great victory over the Persian Chosroes I． near Melitene；and the place is frequently mentioned by the Byzantine writers．But at present it is in ruins，though it still bears its ancient name in the form of Malatia．
［L．S．］
MELITONUS，a station on the Egnatian Way， which the Jerusalem Itinerary places between He－ racleia and Grande，at 13 M. P．from the former． Its position must be sought for not fur from Filu－ rina．Tafel（de Viae Egnat．Part．Occ．p．40） thinks that the name should be written Me入ir－ $\tau \omega \boldsymbol{\nu}$ ．
［E．B．J．］
melitta（Mé̀ıtta，Mé入ı $\quad$ Hea，Hecat．Fr． 327，ed．Klausen），one of the five factorics which Hanno（p．2，ed．Hudson）planted between Prom． Soloeis and the river Lixus，on the W．coast of Africa；probably near the Wad Messa．（Comp．Mém． de IAcad．des Inscr．vol．xxvi．p．41．）［E．B．J．］

MELIZIGARA（Me入ısєıqápa，Arrian，Peripl． p．30），a commercial entrepôt on the southern coast of Hindostan，apparently nearly opposite to Ceylon． It is no doubt the same place which P＇tolemy re． cords as an island under the name of Melizegyris or
 § 95．）

## mella．［Mera．］

MElla＇RIA．1．（Medतapía，Plut．Sertor．12； Mellaria，Mcla，ii．6．§ 9；Plin．iii．1．s．3；It．Anton． p．407；Gengr．Rav．iv． 12 ；Meviapía，Strab．iii．p． 140，in Kramer＇s ed．，the old edd．have Mediapia； aleo Mevдapla，Marcian，p．39；Mevparía，Ptol．ii． 4．§ 6 ；Minapía，Steph．B．s．v．Bŷגos），a town of the Bastuli（Ptol．l．c．），on the road between Calpe and Belon（It．Anton．l．c．），possessing establishments for sulting fish（Strab．Lc．）．It probably stood be－ $t$ ween Tarifa and Val de Vacca，or was on the site of Val de Vacca itself．（Mém．de l＇Acaul．des Inser． $2 \times x$ p． 107 ；Philos．Transactions，xxx．p．920．）

2．A town in the interior of Hispania Baetica， belonging to the conventus Cordubensis，and on the road from Cordubs to Einerita，probably the modern Fuente de la Ovejuna．（Plin．iii．1．s．3；It．Anton． p．415，with Wesseling＇s note；Gruter，Inscr． p． 321.10 ；Morales，Ant．p．19；Florez，Esp．Sagr． ix．p．20．）

MELLLISURGIS．a place in the road from Thes． salonica to Apollonia of Mygdonia，which occurs in two of the Itincraries（Itin．Anton．；Peut．Tub．），at a distance of $20 \mathrm{M} . \mathrm{P}$ ．from Thessalonica．It still preserves its ancient name in the usual Romaic form of Melissurgus，and is inhabited by honey－ makers，as the word implies．（Leake，North．Grecce， vol．iii．p． 461 ；Tafel，de Viae Eynat．Part．Orient． p．5．）
［E．B．J．］
MELLOSEDUM or MELLOSECTUM，as it is alwo read，in Gallia Narbonensis，is placed in the Table on a route from Alpis Cottia（Mont Genéres）to Vienna （Vienne）．It is the next place before Catorissiun ［Catorissiom］，which lies between it and Cularo （Grenoble）．Mellosodum may be at or near the Bourg d＇Oysans．
［G．L．］
MELOBOTEIRA（M $\eta \lambda o \delta \delta \tau \epsilon!\rho a$ ），a name which was applied to Edessa in Macedonia．（Steph．B．s．v． Airaí．）
［E．B．J．］
MELODU＇NUM（Melun），a town of the Senones in Gallia（B．G．vii．58），on an island in the Se－ quana（Seine）．Though the termination dun seems originally to have signified a hill or height，it be－ came a part of the name of some towns，which like Melodunum were not situated on any clevation． In the Antonine Itinerary Melodunum appears under the name Mecletum，and in the Table in the form Meteglum．The distance from Lutetia in the Itins． is 17 or 18 Gallic leagues．From Melodunum to Condate（Montereau－sur．Yonne）is 15 Gallic leagues ［Condate，No．2］．The old Celtic town on the island was replaced by a castle，of which there are some remains．The present town of Melun is on the right bank of the Seine，about 28 miles from Paris by the road．

In the text of Caesar（B．G．vii．58）there is a reading＂qui Metiosedo，＂where the common reading is＂qui a Meloduno．＂The same variation occurs in c． 60 ；and in c． 61 ＂Metiosedum versus＂appears to be the received reading．A careful study of Caesar will satisfy any person that Melun is meant in all these passiges，whether the true reading in Caesar＇s text is Melolunum，Metiosedum，or some－ thing else．Melodunum comes nearest to the modern form．Walckenaer places Metiosedum at the con－ fluence of the Seine and Marne．The variety in the reading of this name appears also in the Itins．， as shown above．The stratagem of Labienus on the Scine（B．G．vii． $58, \& \mathrm{cc}$ ．）is explained in the article Lutetia．
［G．L．］
MELOS（Mŷ入os ：Eth．M $\ddagger$ dios ：Milo），an islind in the Aegean sea，and the most south－westerly of the Cyclades，whence it was called Zephyria by Aristotle（ap．Plin．iv．12．s．23；comp．Steph．B． s．v．），and was even phaced by Strabo in the Cretan sea（x．p．484）．The latter writer says（l．c．）that Meios was 700 stadia from the promontory Dictyn－ nacum in Crete，and the same distance from the promontory Scyllaeun in Argolis．The island is ir： reality 70 miles north of the coast of Crete，and 65 miles east of the coast of Peloponnesus．It is about 14 miles in length and 8 in breadth．Pliny and others describe it as perfectly round in shape（＂in－ sularum rotundissima，＂Plin．l．c．；Solin．c． 11 ； Isidor．Orig．xiv．6）；but it more resembles the form of a bow．On the northern side there is a deep bay，which forms an excellent harbour．The island is said to have borne several names in more ancient times．Besides that of Zephyria given to it by Aristotle，it was also called Memblis by Aristides， Mimallis liy Callimachus，Siplis and Acyton by

H-meleides (Plin. i.c.), and also Byblis by Stephanus B. (s. ©. M $\hat{\eta} \lambda o s)$; the latter name is said to lase been derived from its recciving a colony from the town of Byblus in Phoenicia. Other writers mention this Phoenician colony, and Festus derives the name of Delos from the founder of the colony. (Fest. s. v. Melos.) Some connect the name with $\mu \bar{\eta} \lambda o v$, an apple, on account of the round shape of the island. The Phoerician settlement is probable ; but we know that it was colonised at an early period by the Lacedaemonians, and that it continued to be inhabited by Dorisns down to the time of the Jelopnnevian War. According to the Melians themselves, the Lacedremonians settled in the island 700 years befire this war. (Herod. viii. 48 ; Thuc. ${ }^{2} .84$, 112.) In the Peluponnesian War, the Melians remained faithful to their mother city. In B. c. 426, the Athenians made an unsuccessful attempt upon the island; but in 416 they captured the principal tuwn, put all the adult males to desth, sold the women and children into slavery, and colonised the island afresh by 500 Athenians. (Thuc. v. 84116 : Disd. xii. 80 ; Strab. Lc.)
Melos is now called $M i l o$. It is mountainous and of volcanic origin. Its warm springs, which are now used for bathing, are inentioned in ancient times. ( 1 'lin. xxxi. 6. a. 23 ; Athen. ii. p. 43.) Pliny says that the best sulphur was found in Melos (xxxv. 15. s. 50); and among other pruducts of the island he enumerates alum (xxxp. 15. s. 52), pummice-stone (xxxvi.21.s.42), and a bright colour, called MeLiroum piymentun (xxxv. 6. s. 19 ; comp. Vitruv. vii. 7 ; Diosc. v. 180 ; Plaut. Sfost. i. 3. 107). The mines of alum are on the eastern side of the island, near a height which emits smoke, and has every appearance of having been a volcano. In the south-western half of the island, the mountains are more rugged and lofty; the highest summit bears the name of St. Elias. The island produces good wine and olives, but there is not much care taken in the cultivation of the vine. In antiquity Melos was celebrated for its kids. (Athen. i. p. 4.) One of its greatest deficiencies is want of water. The inhabitants of Kastron depend almost exclusively upon cisterns; and the only spring in the vicinity is to the westward of the ancient city, on the sea-side, where is a chapel of St. Nicolas.

In ancient times the chief town in the island was called Melus. It stood upon the great harbour. It is celebrated as the birtliplace of Diagoras, surnamed the Atheist. [Lict. of Biogr. art. Diagonas.] The town appears to have been small, since it is called by Tlucydides a $\chi \omega$ piov, not $\pi \delta \lambda t s$; and of the 3000 men whin originally comprsed the Athenian expedition, the smaller half was sufficient to besiege the place. (Thuc. v. 84, 114.) The present capital of Melos is named Kustron. and is situated upon a steep hill above the harbour. The former capital was in the interior. and was deserted on account of its anhealthy situation. Between Kustron and the northern shore of the harbour are the ruins of the ancient town, extending down to the water-side. "On the highest part, which is immediately overlooked by the village, are some remains of polygonal walls, and others of rezular masonry with round towers. The western wall of the city is traceable all the way down the hill from the summit to the sea : on the east it followed the ridge of some cliffs. but sone foundations remain only in a few places" (Leake). Within the enclosure there is a small hill, on which stand a church of St. Elias and a small
monastery, and which perhaps served in antiquity as a kind of acropolis. Here several architectural fraginents have been found. On the south-eastern side of the hill are some seats cut out of the rock in a semi-circular form, of which only four remained uncovered when hass visited the island in $\mathbf{1 8 4 3}$. They appear to have been the upper seats of a small theatre or odeum, which was perhaps more ancient than the large theatre mentioned below. In front of these seats is a quadrangular foundation of regular masonry, of which in one part four or five courses remain. About 40 steps eastward of this foundation are the remains of a temple or some other public building, consisting of fragments of a Corinthian capital and part of a cornice. About a hundred steps SW. is the larger theatre, which was cleared from its rubbish in 1836 by the king of Bavaria, then Crown Prince. The nine lowest rows of seats, of white marble, are for the most part still remaining, but the theatre, when entire, extended far up the hill. From the character of its architecture, it may safely be ascribed to the Roman period. There are no other remains of the ancient town worthy of notice.

Eastward of the ancient city is a village named Tpuxirt, from the tombs with which the hill is pierced in every part. Eastward of Tpunyrh is a narrow valley sloping to the sea, which also contains several sepulchral excavations. Some of them consist of two chambers, and contain niches for several bodies. There are, also, tombs in other parts of the island. In these tombs many works of art and other objects have been discovered; painted rases, gold ornaments, arms, and utensils of various kinds. Some very interesting Christian catacombs have also been discovered at Melos, of which Ross has given a description. (Tournefort, Voyage, vol. i. p. 114, Engl. tr.; Tavernier, Voyage, vol. i. p. 435; Olivier, Voyage, vol. ii. p. 217; Leake, Northern Greece, vol. iii. p. 77; Prokesch, Denkroürdigke iten, vol. i. p. 531, vol. ii. p. 200; Fiedler, Reise, vol. ii. p. 369; Ross, Reisen auf den Griechischen Inseln, vol. iii. pp. 3, 145.)

## COIN OF MELOS.

MELOS (M $\hat{\eta} \lambda o s: E t h . ~ M \hat{\eta} \lambda c o s)$, a village of Acarnania, mentioned only by Stephanas B. (s.v.)

MELO'TIS, a district of Triphylia in Epirus. (Liv. xxxii. 13.) The names of Triphylia and Melotis, in connection with Epirus, occur only in Livy. Leake supposes that Melotis, which name indicates a sheep-feeding district, was probably the pastural highlands around Ostanitia, on the borders of Molossis and Atintania. (Northern Greece, vol. iv. pp. 101, 119.)

MELPEIA (Mé入xeia). a village in Arcadia, situated upon Mt. Nomia, which is a portion of Mount Lycaeus, so called because Pan was said to have here discovered the melody ( $\mu$ '́nos) of the syrina. (Paus. viii. 38. § 11.)

MELPESS, a small river of Lucania, flowing into the Tyrrhenian sea, near the promontory of I'z
linurus (Plin. iii. 5. 8. 10). It is now called the Molpa.
E. H. B.]

MELPIS or MELFIS ( $\delta$ Mé $\lambda \pi เ s: M e l f a$ ), a small river of Latium, falling into the Liris (Garigliano), about 4 miles below its junction with the Trerus (Sacco). It crossed the Via Latina about 4 miles from Aquinum, though Strabo erroneously speaks of it as flowing by that city. It is a still greater mistake that he calls it a great river (тотаuds $\mu$ '́ras, Strab. v. p. 237), for it is in reality a very inconsiderable stream : but the text of Strabo is, in this passage, very currupt, and perhaps the error is not that of the author. The name appears in the Tabula, under the corrupt form Melfel, for which we should probably read Ad Melpern. (Tab. Peut.)
[E. H. B.]
MELPUM, a city of Cisalpine Ganl, of which the only record preserved to us is that of its capture and destruction by the combined forces of the Insubrians, Buians, and Senones, which took place according to Cornelins Nepos on the same day with the taking of Veii by Camillus, b. c 396 (Corn. Nep, ap. Plin. iii. 17. s. 21). He calls it a very wealthy city (" opulentia praecipuum"), and it therefore seems to have been one of the principal of the Etruscan settlements in this part of Italy. All trace of it subsequently disappears, and its site is a matter of mere conjecture.
[E. H. B.]
MELSIAGUM, a lake or marsh in Germany (Mela, iii. 3. § 3), the site of which is unknown ; it is perhaps one of the lakes of Mecklenburg. [L.S.]

MELSUS (Míतos), a small river of Hispania Tarraconenis, flowing into the sea through the territory of the Astures, not far from the city Noega (Noíra). Perhaps the modern Narcea. (Strab, iii. p. 167 ; Florez, Esp. Sagr. xv. p. 47.)

## MEMBLIARUS. [Anaphe.]

MEMBRF'SA (Mé $\epsilon^{\prime} \rho \eta \sigma a$ ), a town of the proconsular province, the position of which is fixed by Procopins (B. V. ii. 15) at 350 stadia from Carthage. Membressa (Membrissa, Peut. Tab.), as it is called in the Antonine Itinerary, was a station between Musti, and Silicibba, and a place of some importance in ecclesiastical history. (Morcelli, Africa Christiana, vol. i. p. 223.)
[E. B. J.]
MEMINI. [CARPENTORACTE.]
MEMNONENSES (M\& $\mu \nu 0 \nu \in i s)$, a tribe of Aethiopians, who dwelt between the Nile and the Astapus, north of the peninsular region of Meroe. (Ptul. iv. 8. § 114.) The name was not an indigenous one, but given by the Greek geographers to one of the Nubian tribes, amony whom they placed their legend of Memnon, son of Aurora. [W.B.D.]

MEMPHIS (Mé $\mu ф ı s$, Herod.ii.99, 114, 136, 154 ; Polyb. v. 61 ; Diod. i. 50, seq.; Steph. B. 8. v. : Eth. M $\epsilon \mu \phi i \tau \eta s)$, the Noph of the Old Testament (Isaiah, xix. 13; Jerem. ii. 16, xliv. 1), was the first capital of the entire kingdom of Aegypt, after the Deltaic monarchy at Heliopolis was united to the Thebsid capital at This or Abydos. It stood on the western bank of the Nile, 15 miles S . of Cercasorus, in lat. $30^{\circ} 6^{\prime} \mathrm{N}$.

The foundation of Memphis belongs to the very earliest age of Aegyptian history. It is ascribed (1) to Menes, the first mortal king ; (2) to Uchoreus, a monarch of a later dynasty; and (3) to Apis or Epaphus. (Hygin. Fab. 149.) But the two latter may be dismissed as resting on very doubtful authority. (Diod.i. 51.) The only certaintry is that Memphis was of remote antiquity, as indeed is implied in the ascription of its origin to Menes, and that it was
the first capital of the united kingdom of Upper and Lower Aegypt. The motives which induced its founder to select such a site for his capital are obvious. Not far removed from the bifurcation of the Nile at Cercasorus, it commanded the S. entrance to the Delta, while it was nearer to the Thebaid than any of the Deltaic provincial cities of importance, Heliopolis, Bubastis, and Sais. It is also clear why he placed it on the western bank of the Nile. His kingdom had little to apprehend from the tribes of the Libyan desert; whereas the eastern frontier of Aegypt was always exposed to attack from Arabia, Assyria, and Persia, nor indeed was it beyond the reach of the Scythians. (Herod i. 105.) It was important, therefore, to make the Nile a barrier of the city; and this was effected by placing Memphis W. of it. Before, however, Menes conld lay the foundations of his capital, an artificial area was to be provided for them. The Nile, at that remote period, seems to have had a double bifurcation; one at the head of the Delta, the other above the site of Memphis, and paraliel with the Arsinoite Nome. Of the branches of its southern fork, the western and the wider of the two ran at the foot of the Libyan hills; the eastern and lower was the present main stream. Between them the plain, though resting on a limestone basis, was covered with marshes, caused by their periodical overflow. This plain Menes chose for the area of Memphis. He began by constructing an embankment about 100 stadia S. of its site, that diverted the main body of the water into the eastern arm; and the marshes be drained off into two principal lakes, one to N., the other to W. of Meinphis, which thus, on every side but S., was defended by water.

The area of Memphis, according to Diodorus(i.50), occupied a circuit of $\mathbf{1 5 0}$ stadia, or at least 15 miles. This space, doubtless, included much open ground, laid out in gardens, as well as the courts required for the barracks of the garrison, in the quarter denominated "the White Castle," and which was successively occupied, under the Pharaohs, by the native militia; in the reign of Psammetichus (b. C. 658-614), by Phoenician and Greek mercenaries; by the Persians, after the invasion of Cambyses (B. c. 524); and finally by the Macedonian and Ruman troops. For although Memphis was not always a royal residence, it retained always two features of a metropolis: (1) it was the seat of the central garrison, at least until Alexandreia was founded; and (2) its necropolis - the pyramids was the tomb of the kings of every native dynasty.
The mound which curbed the inundations of the Nile was so essential to the very existence of Memphis, that even the Persians, who ravaged or neglected all other great works of the country, annually repaired it. (Herod. ii. 99.) The climate was of remarkable salubrity; the soil extremely productive: and the prospect from its walls attracted the notice of the Greeks and Romans, who seldom cared much for the picturesque. Diodorus (i. 96) mentions its bright green meadows, intersected by canals, paren with the lotus-flower. Pliny (xiii. 10, xvi. 21 ) speaks of trees of such girth that three men with extended arms could not span them. Martial (vi. 80) says that the "navita Memphiticus" brought roses in winter to Rome (comp. Lucan, Pharsal. iv. 135) ; and Athenaeus (i. 20. p. 11) celebrates its teeming soil and its wine. (Comp. Joseph. Antiq. ii. 14. §4; Horace, Od. iii. 26. 10.) And these natural advantages were seconded by its
position in the "narrows" of Aegypt, at a point where the Arabian and Libyan hills converge for the last time as they approach the Delta, and whence Memphis commanded the whole inland trade, whether ascending or descending the Nile. On the coins of Hadrian the wealth and fertility of Memphis are expressed by a figure of the Nile on their reverse, holding in his left hand a cornucopia. (Mionnet, Suppl. ix. No. 42.)

The position of Memphis, again, as regarded the civilisation which Aegypt imparted or received, was most farourable. A capital in the Thebaid would have been too remote for communication with the East or Greece: a capital in the Delta would hare been too remote from the Upper Kingdom, which would then have pertained rather to Aethiopia than to Aegypt; while the Delta itself, unsupported by the Thebaid, must in all probability have become an Assyrian province. But the intermediate situation of Memphis connected it both with the southern portions of the Nile valley, as far as its keys at Philae and Elephantina, and also through the isthmus of Suez and the coast, with the most civilised races of Asia and Europe. After the foundation of Alexandreis, indeed, Memphis sunk into a provincial city. But the Saracen invaders in the seventh century confirmed the wisdom of Menes's choice, for they built both Old and New Cairo in the neighbourhood of Memphis, only changing the site from the western to the eastern bank of the river, because their untural alliances, unlike those of the Pharaols, were with the Arabians and the Syrian Khalifates.

The history of Memphis is in some measure that of Aegypt also. The great works of Menes were probably accomplished by successive monarchs, if not indeed by several dynasties. In the lst period of the monarchy we find that the $3 \mathrm{rd}, 4 \mathrm{th}, 6 \mathrm{th}, 7 \mathrm{th}$, and 8th dynasties consisted of Memphite kings. Athotis, who is styled a son of Menes, is said to have built the palace, and thus stamped the new city as a royal residence. In the reign of Kaiechos, in the 2nd dynasty, the worship of Apis was established si Memphis, which was equivalent to rendering it a cathedral city. In the 7th dynasty we have a record of seventy Memphite kings, each reigning for one day: this probably denotes an interregnum, and perhaps a foregone revolution; for, as Herodotus remarks (ii. 147), the Aegyptians could not exist without a monarchy. After the 8th dynasty no series of Memphite kings occurs; and the royal farnilies pass to Heracleopolis, in the first place; next, after the expulsion of the Shepherds, to Thebes; afterwards to the Deltaic cities of Tanis, Bubustis, and Sais.
The shepherd kings, though they formed their great camp at Abaris, retuined Memphis as the seat of civil government (Manetho, ap. Joseph. cont. Apion, i. 14); and although, after they withdrew into Syria, Thebes became the capital, yet we have a proof that the 18th dynasty-the house of Ramesesbeld their northern metropolis in high esteen. For Sesostris, or Rameses IIl. (Herod. ii. 108), on his return from his Asiatic wars, set up in front of the temple of Ptah at Memphis a colossal statue of himself 45 feet high; and this is probably the colossal figure still lying among the mounds of ruin at Mitranich. Under the 25th dynasty, while the Aethiopians occupied Aegypt, Memphis was again the seat of a native government,- apparently the result of a revolution, which set Sethos, a priest, $u_{i}$ wn the throne. A victory obtained by this mon-
arch over the Assyrians was commemorated by a statue in the temple of Ptah-Sethos holding in his hand a mouse, the symbol of destruction. (Horapol. Hieroglyph. i. 50; comp. Aelian, H. Anim. vi. 41; Strab. xiii. p. 604 : Herod. ii. 141.) Under Psammetichus (b.c. 670) the Phoenician soldiers, who had aided him in gaining the crown, were established by him in "the Tyrian camp,"-at least this seems to be the meaning of Herodotus (ii. 112),- but were removed by his successor Amasis into the capital itself, and into that quarter of it called the "White Castle."

Of all the Aegyptian cities, Memphis suffered the most severely from the cruelty and fanaticism of the Persians. Its populace, excited by the defeat of the Aegyptian army at Pelusium, put to death the Persian herald who summoned the Memphians to surrender. The vengeance of the conqueror is related by Herodotus. Memphis became the headquarters of a Persian garrison; and Cambysea, on his return from his unfortunate expedition against Aethiopia, was more than ever incensed against the vanquished. Psammetitus, the last of the Pharaohs, was compelled to put himself to death (Herod. iii. 15); Cambyses slew the god Apis with his own hand, and massacred his priests; he profaned the Temple of Ptah and burned the images of the Caheiri (id. ib. 32). Under Darius Aegypt was mildly governed, and his moderation was shown by his acquiescence in the high-priest's refusal to permit the erection of a statue to him at Memphis. (Herod. ii. 110; Diodor. i. 58.) The next important notice of this city is in the reign of Artaxerxes I. Inaros, son of Psammetichus, had revolted from Persia, and called in the aid of the Athenians. (Diod. xi. 71.) The Persians were defeated at Papremis in the Delta (ib. 74 ; comp. Mannert, Geogr. x. p. 591), fled to Memphis, and were besieged in the "White Castle." (Thucyd. i. 108-109.) The siege lasted for more than a year (Diodor. ii. 75), and was at length raised (Ctesias, c. 33), and the authority of the king of Persia restored. Under Nectanebus I., the first monarch of the Sebennytic dynasty, Memphis expelled its Persian garrison, nor did it return to its allegiance, until Nectanebus 1I., the last representative of thirty dynasties, was driven into Aethiopia. (Athenaeus, iv. p. 150.) From this period Memphis loses its metropolitan importance, and sinks to the level of the chief proviucial city of Aegypt.

If, as Diodorns remarks (i. 51), Thebes surpassed Memphis in the grandeur of its temples, the latter city was more remarkable for the number of its deities and sacred buildings, and for its cecular and commercial edifices. It might, indeed, as regards its shrines, be not improperly termed the Puntheon of the land of Misraim. The following were its principal religious structures, and they seem to include nearly all the capital objects of Aegyptian worship except the goat and the crocodile:-

1. The temple of Isis, was connmenced at a very early period, but only completed by Amasis, в. c. 564. It is described as spacions and beautiful (Herod. ii. 176 ; Heliodor. Aethiop. vii. 2, 8, 11), but inferior to the Iseium at Busiris (Herod. ii. 59, 61).
2. The temple of Proteus, founded probably by Phoenicians, who had a commercial establishment at Memphis. It was of so early date as to be ascribed to the era of the Trojan War. (Platarch, de Gen. Socrat. c. 7.)
3. The temple of Apis, completed in the reign of Y 3

Psammetichus (Herod. ii. 153; Aelian, Hist. An. xi. 10 ; Clemens Alexand. Paedag. iii. 2; Strab. xvii. p. 807), stood opposite the southern portal of the great temple of Ptah or Hephaestos, and was celebrated for its colonnades, through which the processions of Apis were conducted. Here was also an oracle of Apis, in connection with one of Osiris and Isis (Plin. viii. 46; Pausan. vii. 22.) This temple was the cathedral of Aegypt, and not only established there a numerous, opulent, and learned college of priests, but also attracted thither innumerable worshippers, who combined commercial with religious purposes.
4. The temple of Serapis, in the western quarter of Memphis. This Serapis was of earlier date than the Alexandrian deity of similar name. To the Memphian Serapeium was attached a Nilo-meter, for gauging and recording the periodical overflows of the river. It was removed by Constantine as a relic of paganism, but replaced by his successor Julian. (Socrat. Hist. Eccles. i. 18 ; Sozomen, v. 2 ; comp. Diodor. i. 50, 57 ; Senec. Quaest. Nat. iv. 2 ; Plin. viii. 46.)
5. A temple of Phre, or the Sun, mentioned only in the Rosetta inscription (Letronue, Recueil des Inscr. Grecques et Lat. de I' Egypte; Brugsch, Inscript. Rosettun.)
6. The temple of the Cabeiri (Herod. iii. 37), into which none but the high-priest might lawfully enter. The statues of the pigmy gods were burned by Cambyses, and the temple inutilated.
7. The temple of Ptah or Hephaestos, the elemental principle of fire, worshipped under the form of a Pygmy. This was the most ancient shrine in Memphis, being coeval with its foundation. (Diudor. i. 45 ; Herod. ii. 99, iii. 37 ; Strab. xvii. 807 ; Ammian. xvii. 4.) It was enlarged and beautified by several successive monarchs, apparently through a spirit of rivalry with the great buildings at Thebes. (1.) Moeris erected the great northern court (Herod. ii. 101 ; Diod. i. 51). (2.) Rameses the Great raised in this court six colossal figures of stone, -portrait-statues of himself, his queen, and their four sons. (Herod. ii. 108-110; Strab. xvii. p. 807.) (3.) Rhampsinitus built the western court, and erected two colossal figures of summer and winter. (Herod. ii. 121 ; Diodor. i. 62 ; Wilkinson, M. and C. i. p. 121.) (4.) Asychis added the eastern court. (Herod. ii. 136.) It was, in the opinion of Herolotus, by far the noblest and most beautiful of the four quadrangles. (5.) Psaminetichus, the Saite king, added the south court, in commemoration of his victory over the Dodecarchy (Polyaen. Stratag. vii. 3; Herod. ii. 153; Diodor. i. 67); and Amasis (Herud. ii. 176) erected or restored to its basis the colossal statue of Ptah, in front of the sonthern portico. From the priests of the Memphian temples, the Greeks derived their knowleage of Aegyptian annals, and the rudiments also of their philosophical systems. It was at Memphis that Herodotus made his longest sojourn, and gained most of his information respecting Lower Aegypt. Democritus also resided five years at Memphis, and won the favour of the priests by his addiction to astrological and hieroglyphical studies. (Diog. Laert. Democrit. ix. 34.) Memphis reckoned anong its illustrious visitors, in early times, the legislator Solon, the historian Hecataeus, the philosophers Thales and Cleobulus of Lindus; and in a later age, Strabo the geographer, and Diodorus the Sicilian.

The village of Mitra-nieh, half concealed in a
grove of palm-trees, about 10 miles S. of Gizeh, marks the site of the ancient Memphis. The successive conquerors of the land, indeed, have used its ruins as a stone-quarry, so that its exact situation has been a subject of dispate. Major Rennell (Geography of Herodotus, vol. ii. p. 121, seq.), however, brings incontestable evidence of the correspondence of Mitranieh with Memphis. Its remains extend over many hundred acres of ground, which are covered with blocks of granite, broken obelisks, columns and colissal statues. The principal mound corresponds probably with the area of the great temple of Ptah.

There are several accounts of the appearance of Menphis at different eras. Strabo sam the Hephaesteiun entire, althugh much of the city was then in ruins. In the twelfth century A. D. it was risited by the Arabian traveller Ab-dallatif, who was deeply impressed with the spectacle of giandeur and desolation. "Its ruins offer," he says, " to the spectator a union of things which confound him, and which the most eloquent man in the world would in vain attempt to describe." He seems to have seen at least one of the colussal statues of the group of Rameses in the northern court of the Hephaesteium. Among innumerable "idols," as he terms them, he "measured one which, without its pedestal, was more than 30 cubits long. This statue was formed of a single piece of red granite, and was covered with a red varnish." (Ab-dallatif, De Sacy's Translution, 4ta p. 184.) Sir William Hamilton (Aegyptiaca, 4to. p. 303) visited the spot, and says, that "high mounds enclose a square of 1800 yards from N. to $\mathrm{S}_{\text {, }}$ and 400 from E. to W. The entrance in the centre of each side is still visible. The two principal entrances faced the desert and the river ${ }^{n}$ (that is W. and E.). He entered by the latter, and found immediately " thirty or forty large blocks of very fine red granite, lying on the ground, evidently forming parts of some colossal statues, the chief ornaments of the temple."

The district in which these remains are found is still termed Memf by the Coptic population, and thus helps to confirm the identity of the village of Mitranieh with the ancient capital of Aegypt. [W.B.D.]

MENAENUM or MENAE (Meval, Ptol., Steph. B. ; Mévaıvoy, Diod. : Eth. Mevaios, Steph.; but coins have Mévauvos; Menaenus, Cic.; Menseninus, Plin. : Minéo), an inland city of Sicily, about 18 miles W. of Leontini. It was a city of the Siculi, and not a Greek colony, but, according to Diodorus, was not an ancient settlement of that people, but first founded by their king Ducetius, in B. c. 459. (Diod. xi. 78.) It was situated at a distance of about 2 miles from the celebrated lake and sanctuary of the Palici [Paliconum Lacus] (Steph. B. s.v.) ; and Ducetius appears, a few years afterwards, to have removed the inhabitants again from his newly built city, and to have founded another, in the immediate neighbourhood of the sacred lake, to which he gave the name of Palica (Diod. xi. 88, where the reading Mévas for Néas, suggested by Cluver, and adopted by Wesseling, is at least very probable, though it is difficult to understand how Diodorus could call it the native city of Ducetius, if it had, in fact, been only founded by him.) This new city, however, was destroyed soon after the death of Ducetius (Diod. xi. 90), and it is probable that the inhabitants settled again at Menaenum. The latter city, though it never attained to any great importance, continued to sulsist down to a
late period．There is little doubt that it is the city meant by Diodorus（xiv．78，where the editions have ミ⿰亻⿱㇒日勺儿eny，a nane certainly corrupt），which was re－ duced by Dionysius in b．c．396，together with Morgantia and other cities of the Siculi．It is men－ tioned more than once by Cicero among the muni－ cipal towns of Sicily．and seems to have bren a tolerably floorishing place，the inhabitants of which carried on agriculture to a considerable extent． （Cic．Verr．iii．22，43．）It is enumerated also by Silius Italicus among the cities of Sicily，and by Pliny among the stipendiary towns of that island． and its name is found also in Ptolemp．（Sil．Ital． xiv．266；Plin．iii．8．s． 14 ；Ptol．iii．4．§ 13．）This is the last notice of it that occurs ：but there is no doubt that the modern town of Mineo retains the name，and probably the site，of Menaenum．It is situated on a lofty hill，forming part of a range which sweeps round from Palagonia to Caltagirone， and forms the boundary of a decp basin，in the centre of which is a small plain，with the volcanic lake now called Iago di Niffia，which is unques－ tionably the ancient Lacus Palicorum．No ruins are now extant at Minco；but the coins of Me－ naenum，which are numerous，though only of copper， attest the consideration which it anciently en－ joyed．
［E．H．B．］

COIN OF MENAENUM．
MENA＇PIA（Mevaxia，Ptol．vi．11．§ 8），a small place in Bactriana in the immediate neigh－ bourhoud of Eucratidia．It is probably the same as that called Menapila by Ammianus（exiii． 6）．
［V．］．
MENA＇PII，a people of North Gallia．In Caesar＇s time（B．G．iv．4）the Menapii were on both sides of the lower Rhine，where they had arable farms， buildings，and s：mall towns．The lipipetes and and Tenctheri，who were Germans，being hard pressed by the Suevi，came to the Rhine，surprised and mas－ sacreal the Menapii on the east bank，and then cross－ ing over spent the winter on the west side，and lived at free cost among the Menapii．The listory of these marauders is told elorwhere．［Usiretes．］ On the west side of the Khine the Eburones were the immediate neighbours of the Menapii（B．G． vi．5）．and they were between the Menapii and the Treviri．The Menapii were protected by continuous swamps and forests．On the south and on the coast the Menapii bordered on the Morini．Caesar dnes not state this distinctly；but he mentions the Me－ napii（B．G．ii．4）among the Belgian confederates next to the Morini ；and the Menapii were said to be able to raise 7000 fighting men．As the Veneti gought the aid of the Morini and Menapii in their war with Caesar，we must conclude that they had ships， or their aid would have been useless（B．G．iii．9）． Caesar describes all Gallia as reduced to obedience at the cluse of the summer of в．c． 56 ，except the Morini and Menapii（B．G．iii．28），who were pro－ tected against the Roman general for this season by their forests and the bad weather．The next year （в．c．55），immediately before sailing for Britamia，

Cuesar ment two of his legati to invade the country of the Menapii and those Pagi of the Morini whict． had not made their submission（B．G．iv．22）． After his return from Britannia Caesar sent La－ bienus against the Morini with the legions which had been brought back from Britannia．The summer had heen dry，and as the marshes did not protect the Morini，as in the year before，most of them were compelled to yield．The troops which had been sent against the Menapii onder the two legati ra－ vaged the lands，destroyed the corn，and burnt the houses；but the people fled to the thickets of their forests，and savad themselves from their cruel enemy． （B．G．iv．38．）

In b．c． 53 Caesar himself entered the country of the Menapii with five legions unincumbered with baggage．The Menapii were the only Galli who had never sent ambassadors to Caesar about peace，and they were allies of Ambiorix，king of the Eburones， Caesar＇s enemy．Trusting to the natural protection of their country，the Menapii did not combine their forces，bnt fled to the forests and marshes，carrying their property with them．Caesar entered their country with his army in three divisions，after having with great rapidity made his bridges over the rivers，but he does not mention any names．The buildings and villages were burnt，and a great number of cattle and men were captured．The Me－ napii prayed for peace，gave hostages，and were told that their hostages would be put to death，if they allowed Ambiorix to come withir their burders． With this threat Caesar quitted the country that he had ravaced，leaving Comm the Atrebut，one of his slavish Gallic tools，with a body of caralry to keep watch over the Menapii．（B．G．vi．5，6．）

It appears from Caesar＇s narrative that this people had furins，arable land，and cattle；and probably ships． They were not savages，but a people with some civility．Caesar＇s narrative also leads us to infer that the Menapii on the coast bordered on the Morini， as Strabo（iv．pp．194，199）says．Pliny（iv．17）also makes the Menapii and Morini conterminous on the coast，but he makes the Scaldis（Schelde）the northern limit of the Menapii；and he places the Toxandri north of the Schelde．D＇Anville（Notice， $\mathrm{s}^{\circ} \mathrm{c}$ ．，Nervii）attempts to show，against the authority of the ancient writers，that the Nervii extended to the coast，and consequently were between the Morini and the Menapii．But it is bere assumed as proved that the Morini on the coast bordered on the Menapii， who in Caesar＇s time at least extended along the coast from the northern boundary of the Morini to the territory of the Batayi．［Batayorum Insula．］

Wialckenaer proves，as he supposes，that the river Aas，from its source to its outlet，was the boundary between the Morini and the Menapii．The Aas is the dull stream which flows by St．Omer，and is made navigable to Grarelines．Accordingly he makes the hill of Cassel，which is east of the Aas， to be the Castellum Menapiorum of the Table．This question is examined under Castellum Mori－ norum．The boundary on the const between the Morini and Menapii is unknown，but it may，per－ haps，have been as far north as Dunkeryue．As the Eburones about Tongern and Spa were the neigh－ brours of the Menapii of Caesar on the east，we obtain a limit of the Menapii in that direction．On the north their boundary was the Rhine；and on the south the Nervii．Under Augustus some German peoples，Lbii，Sicambri［Gucesisi］，and others
were removed to the west side of the Rhine. The Toxandri, who were settled in North Brabant, occupied the place of those Menapii who bordered on the Ebumones. But the Menapii still maintained themselves on the west. Tacitus (Hist. iv. 28), in his description of the rebellion of Civilis, still speaks of the "Menapios et Morinos et extrema Galliarum." Part of the former territory of the Menapii was finally included in Germania Inferior, and the rest in Belgica. The name Menapii subsisted for a long time. Aurelius Victor (de Caesaribus, 39) calls Carausius "Menapiae civis;" and it appears in the middle ages. D'Anville observes that though the Notitia of the Empire mentions a body of soldiers named Menapii, we see no trace of this nation in any city which represents it; but Walckenaer (Geog. fic. vol. i. p. 460) contends that Turnacum (Tournai) was their chief place, to which place probably belong the Belgic silver medals with the legend nvrnacvs (Bast, Recueil, fec.) "In an act of Charles the Bald, A. D. 847, in favour of the abbey of St. Amand, which is south of Tournai, this abbey is said to be "in territorio Menapiorum quod nunc Mempiscum appellant.'" We thus obtain, as it seems, a fixed point for part of the territory of the Menapii, which under the later Empire may have been limited to the country west of the Schelde.

It is observed that "thongh it is very probable that Caesar never advanced into the interior of Flanders, it is, however, certain that the Romans afterwards, if they did not absolutely make themselves masters of it, at least were there for some time at different epochs. Their idols, their Dei Penates, sepulchral urns, lamps, Roman utensils, and especially the medals of almost all the emperons, discovered in great numbers, are irrefragable evidence of this." (Bast, Recueil d Antiquites Romaines et Gauloises, frc., Introduction.)
"Ancient earthen vessels have been found in great numbers all along the coast from Dunkerque to Bruges, which shows that the sea has not gained here, and refutes the notion that in the time of Caesar and Pliny this coast was neither inhabited nor habitable." (Walckenaer, Géog. $\ddagger c$ c. vol. i. p. 469.) An inscription found at Rimini, of the aqe of Vespasian, mentions the "Salinatores Menapiorum," or saltmakers of the Menapii.

If the position of the Meldi of Cacsar has been rightly determined [MELDI], they were a Menapian people. There is nothing to show whether the Menapii were Galli or Germani.
[G. L.]
MENAPILA [Menapia.]
MENDE (M\&vסף, Herod. vii. 123; Scyl. p. 26 ; Thac. iv. 123; Steph. B.), or MENDAE (Mévסaı, Paus. v. 10. § 27 ; Plin. iv. 10 ; Mévסa, Polgaen. ii. 1. § 21 ; Suid. 8. v.; Mendis, Liv. xxxi. 45 : Eth. Meroaios), a town of Pallene, situated on the SW. side the cape. It was a colony of Eretria in Euboea, which became subject to Athens with the other cities of Pallene and Chalcidice. On the arrival of Brasidas, Mende revolted from the Athenians (Thnc. l.c.), but was afterwards retaken by Nicias and Nicostratus (Thuc. iv. 130; Diod. xii. 72). It appears, from the account which Livy (l.c.) gives of the expedition of Attalus and the Romans ( $\mathrm{B} . \mathrm{C}$. 200), to have been a small maritime place under the dominion of Cassandria. Together with Scione, Mende occupied the broadest part of the peninsula (Pomp. Mela, ii. 3. § 11), and is probably represented by some Hellenic remains which have been observed on the shore near Kúco-

Posichi, to the E., as well as on the heights above it. (Leake, North. Greece, vol. iii. p. 156.) The types on its autonomons coins-Silenus riding upon an ass, and a "Diota" in a square (Eckhel, vol. ii. p. 72)-refer to the famous Mendaean wine, of which the ancients make honourable mention. (Athen. i. pp. 23, 29, iv. p. 129, viii. p. 364, xi. p. 784 ; Hippocrat. vol. ii. p. 472, ed. Kühn; Jul. Poll. Onomast. vi. segm. 15.)
[E. B. J.]

CON OF MESDE.
MENDES (Mévờs, Herod. ii. 42, 46: 166 ; Diod. i. 84 ; Strab. xvii. p. 802 ; Mela, i. 9 § 9 ; Plin. v. 10. 8. 12 ; Ptol. iv. 5. § 51 ; Steph. B. a. v.: Eth. Merotrotos), the capital of the Meadesian nome in the Delta of Egypt. It was situated at the point where the Mendesian arm of the Nile (Mev $\delta \dot{\eta} \sigma$ tov $\sigma \tau \delta \mu a$, Scylax, p. 43 ; Ptol. iv. 5. § 10 ; Mendesium ostium, Pliny, Mela, ll. ce.) flows into the lake of Tanis. Mendes was, under the Pharaonic kings, a considerable town : the nome was the chief seat of the worship of Mendes or Pan, the all-producing-principle of life, and one of the eight greater deities of Aegypt, and represented under the form of a goat. It was also one of the nomes assigned to that division of the native army which was called the Calasirii, and the city was celebrated for the manufacture of a perfume desigrated as the Mendesiam unguentum. (P'lin. xiii. 1. s. 2.) Mendes, however, declined early, and disappears in the first century A. D.; since both Ptolemy (l.c.) and Aristides (iii. p. 160) mention Thmuis as the only town of note in the Mendesian nome. From its position at the junction of the river and the lake, it was probably encrouched upon by their waters, after the canals fell into neglect under the Macedonian kings, and when they were repaired by Augustus (Sneton. Aug. 18, 63) Thmuis had attracted its trade and population. Ruins, however, supposed to be those of Mendes, have been found near the hamlet of Achman-Tamak (Champollion, l'Eyrypte, vol. ii. p. 122.) [W.B.D.]

MENDICULEIA. 1. A town of the Ilergetes, probably Monzon. [Vol. II. p. 32, a.]
2. A town in the interior of Lusitania, on the bank of the Tagus. (Ptol. ii. 5. §8, where some

MENEDE'MIUM (Meve $\bar{\eta} \mu \boldsymbol{\mu}$ ), a town in the western part of Pisidia, two miles west of Pogia. (Ptol. v. 5. § 6; Steph. \&. v., who calls it a town of Lycia.)
[L. S.]
IENELAI PORTUS (Meverdios $\lambda \mu \mu$ ry, Hemd. iv. 169), a harbour of Marmarica, situated to the W. of Paraetonium (Strab. i. p. 40, xvii. p. 838), and a day's voyage from Petras. (Scylax, 107, d.) Here, according to legend, the hero Menelans landed (Herod. ii. 119); and it was the place where Agesilaus died in his march from the Nile to Cyrene, R. C. 361. (Corn. Nep. Ages. 8.) Its position must be sought on the coast of the Wedy Daphnéh, near the Ris-al-Milhr. (Pacho, Voynge dass la Marmarique, p. 47.)
[E. B. J.]
MENELAIUM. [Sparta.]
MENELA'US (Mevéacos, Strab. xviii. p. 803 : Stoph. B. s. v.: Eth. Menelaites), was a town of the

MENESTHEI.

Delta, situated to SE. of the highroad between Alexandreia and Hermopolis, near the Canopic arm of the Nile. It derived its name from Menelans, a brother of Ptolemy Lagus, and attained such importance as to confer the title of Menelaites upon the Canopic branch of the river. (Plol. iv. 5. § 9; Strab. ib. p. 801.)
[W. B. D.]
MENESTHEI PORTUS ( $\delta$ Meve $\theta$ écos $\lambda(\mu \hbar \nu)$, a harbour of Hispania Baetica, between Gades and Asta. (Strab. iii. p. 140; Ptol. ii. 4. § 5; Marcian. p. 40.) In its neighbourhood was the oracle of Menestheus (Strab. l.c.), to whom, also, the inhabitants of Gades offered sacrifices. (Philostr. Vit. Apoll. v. 1.) The Scholiast on Thucydides (i. 12) relates that Menestheus, being expelled by the Theseidae, went to lberia. The harbour is probably the modern Puerto de S. Maria.

MIENINX (Mipvir\}, al. Mî̀ir $\xi$ ), an island off the N. cosst of Africa, to the SE. of the Lesser Syrtis. It is first described by Scylax (p. 48), who calls it Brachion (Bpaxeloy), and states that its length was 300 stadia, while its breadth was something less. Pliny (v. 7) makes the leugth 25 M. P. and the breadth 22 M. P. Its distance from the mainland was about 3 stadia ( 8 stadia, Stactiasm. p. 455), and one day's sail from Taricheae. It was the abode of the "dreamy Lotos-eaters" [Lotorhagi], for which reason it was called Lotorhagitis ( $\Lambda$ cotoфayitıs, Ptol. iv. 3. § 35 ; Acroфdyov v $\hat{\pi} \sigma o s$, Polyb. i. 39 ; comp. Strab. i. p. 25, ii. p. 123, iii. p. 157, xvii. p. 834 ; Pomp. Mela. ii. 7. § 7 ; Plin. Lc. ix. 60 ; Dionys. v. 180). The Kumans first became acquainted with it, by the disastrous expedition of C. Sempronins Blaesus, B. c. 253. (Polyb. l.c.; comp. Zonar. viii. 14 ; Orcs.iv. 9.) It contained two towns, Meninx and Thoar, and was the birthplace of the emperors Gallus Trebonianus, and his son, Volusianus (Aurel. Victor, Epit. 31), when it was already known by the name of Girba. Jerbah, as the island is now called, produces the " lotus Zizyphus," a tree-fruit like heans. (Shaw, Trav. p. 197 ; Rennell, Geog. of Herod. vol. ii. p. 287 ; Barth, Wanderungen, pp. 263, 287.)
[E. B. J.]
MENNIS (Curt. v. 1. § 16), a small town of Mesopotamia, at which Alexander halted in bis march from Arbela to Babylon. Curtius stated that it was celebrated for its naphtha pits,-which indeed abound in that part of Asia.

MENOBA (Plin. iii. 1. 8. 3) or MENUBA (Inscr. ap. Florez, Esp. Sagr. ix. p. 47), a tributary of the river Baetis, on its right side, now the Guadurmar.
menosca (Mŋขó $\kappa \kappa a$, Ptol. ii. 6. § 9; Plin. iv. 20. s. 34), a town of the Varduli, on the N. coast of Hispania Tarraconensis. Its site is uncertain. Some place it at St. Sebastian ; others at St. Andre ; and others, again, at Sumaya.

MFNOSGADA (Myvoord $\delta \alpha$ ), a place in central Germany, not far from the sources of the Main (Mcenus), from which it, no donbt, derived its name. (Ptol. ii. 11. § 29.) Its site is generally believed to have been that of the modern Mainroth, near Culmbach.
[L. S.]
ME'NTESA. 1. Surnamed Bastia (It. Anton. p. 402; Mentissa, Liv. xxvi. 17; Mévтıбa, Ptol. ii. 6. §59), a town of the Oretani in Hispania Tarraconensis, on the ruad from Carthago Nova to Castulo, and 22 Roman miles from Castulo. Pliny (iii. 3. s. 4) calls the inhabitants "Mentesani, qui et Oretani," to distinguish them from the following.

MENUTHIAS.
2. A small state of the Bastuli, in Hispania Baetica. ("Mentesani, qui et Bastuli," Plin. l. c.; Inscr. Gruter, p. 384, 2 ; Florez, Esp. Sagr. $v$. p. 24.)

MENTONOMON, an aestuary or bay of the Northern Ocean, mentioned by Pytheas, upon which the Guttones dwelt, and at a day's sail from which was an island named Abalus, where amber was gathered. (Plin. xxxvii. 7. s. 11.) The same island is mentioned in another passage of Pliny (iv. 13. so 27), as situated a day's sail from the Scythian coast. In Sillig's edition of Pliny this part of Scythia is called Kaunonia ; but some of the MSS. and older editions have Bannonianna or Bantomannia, which is apparently only another form of Mentonomon. The bay was no donbt on the Prussian coast in the Baltic. (Zeuss, Die Deutschen, fc. p. 269.)

MENTORES (Mévtopes), a Liburnian tribe (Hecatao. Fr. 62, ed. Klausen ; Plin. iii. 21. s. 25), off whose coast were the three islands called Mentorides, probably the same as the rocky islands of Pago, Osero, and Arbe.
[E. B. J.]
MENU'THIAS (Mevou*ids, Steph. B.), an island off the E. coast of Africa. Ptolemy (iv. 8. § 2, comp. vii. 2. § 1) describes it as being adjacent (таракеттal) to the Prom. Prasum; at the same time he removes it $5^{\circ}$ from the continent, and places it at $85^{\circ}$ long., $12^{\circ} 30^{\prime}$ lat., to the NE. ( $\alpha \pi \delta$ دిe$p i \nu \omega \hat{\nu}$ dyato $\bar{\omega} \nu$ ) of Prasum. The graduation of Ptolemy's map is here so erroneous, that it is impossible to make out the position of his island Menuthias, which some have identified with one of the islands of Zanzibar, or even with Madagascar. (Vincent, Navigation of the Ancients, vol. ii. pp. 174-185: Gusselin, Géographie des A nciens, vol. i. pp. 191, 195.) The simple narrative of the Periplus gives a very faithful picture of this coast, - harmonising with the statements of Ptolemy and Marinus of Tyre, - as far as the Rhaptus of the former (Gorind, or the river of Jubah). Afterwards it thus proceeds (p. 9, ed. Hudson):-
"Thence" (from the Nora Fossa, "New Cat," or "Channel," or the opening of the coral reefs by Govind), "at the distance of two natural days' sail, on a course a little above Libs (SW.), Menuthias island occurs on the W. (the important words "Due
 in Blancard's edition to the opposite serse, with a view to force the author into agreement with Ptolemy; comp. Annot ad Hudson. p. 68), about 300 stadia from the mainland, low, and covered with woud, with streams, plenty of birds of various kinds, and land-tartle. Bat, excepting crocodiles, which are harmless, it has no other animals. At this island there are boats, both sewed together, and hollowed out of single trunks, which are used for fishing, and catching turtle. Here, they take fish in wicker baskets, which are let down in front of the hollows of the rocks." It appears, therefore, that Menuthias was distant about two days' sail from Nova Fossa, or $\mathbf{6 0}$ or $\mathbf{8 0}$ miles from the river Gevind, just where an opening in the coral reefs is now found. The coasting royager, steering SW., reached the island on the E. side, - a proof that it was clase to the main; a contiguity which perhaps is further shown by the presence of the crocodiles ; though mach stress cannot be laid upon this point, as they may have been only lizards. It is true, the navigator says that it was 300 stadia from the mainland; but as there is no reason to suppose that be surveyed the island, this distance must be taken
to signify the estimated width of the northern inlet separating the island from the main ; and this estimate is probably much exaggerated. The mode of fishing with baskets is still practised in the Jubah islands, and along the coast. The formation of the coast of E. Africa in these latitudes-where the hills or downs upon the coast are all formed of a coral conglomerate, comprising fragments of madrepore, shell, and sand-renders it likely that the island which was close to the main sixteen or seventeen centuries ago, should now be united to it. Granting this theory of gradual transformation of the corst-line, the Menuthias of the "Periplus" may be supprosed to have stood in what is now the rich garden-land of Shamba, where the rivers, carrying down mud to mingle with the marine deposit of coral drift, corered the choked-np estuary with a rich soil. (Cooley, Ptolemy, and the Nile, London, 1854, pp. 5668.)
[E. B. J.]
MERCU'RII PROM. ('Eppaía 九ккрa, Ptol. iv. 3. § 7 ; Pomp. Mela, i. 7. § 2 : Plin. r. 3). the mast northerly point of the coast of Africa, to the E. of the gulf of Carthage, now Cape Bun, or the Râs Addlar of the natives.
[E. B. J.]
MERGABLUM, a town of Hispania Baetica, on the road from Gades to Malacs, now Beger de la Miel. (Mém. de l'Acad. des Inscr. xxx. p. 111.) MERINUM. [Garganus.]
MERMESSUS (Mєp $\mu \eta \sigma \sigma o ́ s$ or Mupuı $\sigma \sigma \delta s^{\text {) , a }}$ town in Tross or Mysia, belonging to the territory of Lamp:acus, was celebrated in antiquity as the native place of a sibyl (Steph. B. s. v.; P'aus. x. 12. § 2; Lactant. i. 6, 12, where it is called Marmessus: Suid. s. v.); but its exact site is unknown. [L. S.]

MEROBRICA. [Mirobriga.]
ME'ROE (ME $\delta \delta \eta$, Herod. ii. 29; Diod. i. 23, seq.: Strab. xviii. p. 821 ; Plin. ii. 73. s. 78, v. 9. s. 10: Steph. B. s. v.: Eth. Mepoaios. Mepov́gios). The kingdom of Meroe lay between the modern hamlet of Khartoum, where the Astapus joins the true Nile and the influx of the Astaboras into their united streams, lat. $17^{\circ} 40^{\prime} \mathrm{N}$., long. $34^{\circ} \mathrm{E}$. Although described as an island by the ancient geographers, it was properly an irregular space, like Mesopotamia, included between two or more confluent rivers. According to Diodorus (i. 23) the region of Meroe was 375 miles in length, und 125 in brealth; but Strabo (xviii. p. 821) regards these numbers as referring to its circumference and diameter respectively. On its eastern side it was bounded by the Abyssinian highlands; on the western by the Libyan sands - the desert of Bahiouda. Its extreme southern extremity was, according to a survey made in the reign of Nero, 873 miles distant from Syene. (Plin. vi. 29. 8. 33.) Eratosthenes and Artemidorns, indeed, reduced this distance to 625 and 600 miles. (Mannert, Geog. d. Alten, x. p. 183.) Within these limits Meroe was a region of singular opulence, both as respects its mineral wealth and its cereal and leguminous productions. It possessed, on its eastern frontier, mines of gold, irnn, copper, and salt: its woods of date-palm, almond-trees, and ilex yielded abundant supplies of both fruit and timber for export and home consumption; its meadows supported large herds of cattle, or produced double harvests of millet (dhourra); and its forests and swamps abounded with wild beasts and game, which the natives caught and salted for food. The b:uks of the Nile are so high in this region, that Mrroe derives no benefit from the inundation, and, as rain falls scantily in the north, even in the wet
season (Strab. xv. p. 690), the lands remote from the rivers must always have been nearly desert. But the waste bore little pruportion to the fertile lands in a tract so intersected with streams; the art of irrigation was extensively practised; and in the south, where the hills rise towards Abyssinia, the rains are sufficient to maintain a considerable degree of fertility. The valley of the Astaboras (Tacazze) is lower and warmer than the rest of Meroe.

Partly from its natural richness, and partly frem its situation between Aethiopia and the Red Sea, -the regions which produced spice, and those which yielded gold-dust, ivory, and precivus stones, - Meroe was from very early times the seat of an active and diver. sified commerce. It was one of the capital centres of the caravan tride from Libya Interior, from the havens on the Red Sea, and from Aegypt and Aethiopia. It was, in fact, the receptacle and terminus of the Libyan traffic from Carthage, on the one side; and from Adule and Berenice on the other. The ruins of its cities, so far as they have been explored, attest its commercial prosperity.
The site of the city of Meroe was placed by Eratosthenes (ap. Strab. xvii. p. 786) 700 stadia, or nearly 90 miles, south of the junction of the Nile with the Astaboras, lat. $16^{\circ} \mathbf{4 4}$; and such a position agrees with Philo's statement (ii. p. 77) that the sun was vertical there 45 days before the summer solstice. (Comp. Plin. vi. 30.) The pyramids scattered over the plains of this mesopotamian region indicate the existence of numerous citics besides the capital. The ruins which have been discovered are, however, those of either temples or public monuments, for the cities themselves, being built of palm-branches and bricks dried in the sun, speedily crumbled away in a latitude to which the tropical rains partially extend. (Ritter, Africa, p. 542.) The remains of Merve itself all lie between $16^{\circ}$ and $17^{\circ}$ lat. N., and are not far from the Nilp. The most southerly of them-are found at Naga-gebel-ardan. Here have been discovered the ruins of four temples, built in the Aegyptian style, but of late date. The largest of them was dedicated to the ram-headed deity Ammon. The principal portico of this temple is detached from the main building, - an unusual practice in Aegyptian architecture, - and is approached through an avenue of sphinxes, 7 feet high, and also bearing the ram's head. The sculptures, like those of Aegypt, ropresent historical events,-Ammon receiving the homage of a queen, or a king holding his captives by the hair, and preparing to strike off their heads with an axe. At Woad Naja, about a mile from the Astapus, are the remains of a sandstone temple, 89 feet in length, bearing on the capital of its columns the figures and emblems of Ptah, Athor, and Typhon. These ruins are amidst mounds of brick, which betoken the former presence of an extensive city. Again, 16 or 17 miles west of the Astapus, and among the hollows of the sandstore hills, surrounded by the desert, are the ruins of ElMesaourat Eight temples, connected with one another by galleries or colonnades, and divided into courts and cloisters, are here found. The style of architecture is that of the era of the Ptolemies.

On the eastern bank, however, and about 2 miles from the river, are found groups of pyramids, which mark the site of a necropolis and the neighbourhnod of a city: they are 80 in number, and of rarious dimensions; the base of the largest being 63 feet square, of the smallest less than 12 feet. The
loftiest of these pyramids is abont 160 feet in height. Some of these have evidently been royal tombs. None of the buildings of Neroe, indeed, can claim a remote antiquity. The seulptures as well as the pyramids bear the impress of the decline of Aegyptian art, and even traces of Greek architecture; and this circumstance is one of many indications that Meroe derived its civilisation from Aegypt, and did not, as has heen suppned, transmit an earlier civilisation to the Nile valley. And yet it is nut probable that Meroe received either its arts or its peculiar forms of civil pulity from Aegypt, either entirely, or at any very remote epoch of time. Their points of resemblance, as well as of difference, forbid the supposition of direct transmission: for, on the one hand, the architecture and sculptures of Meroe betray the inferiority of a later age, and its civil government is not modelled upon that of the Pharaohs. One remarkable feature in the latter is that the sceptre was so often held by female sovereigns; wherens in Aegypt we find a queen reg. nant only once mentioned - Nitocris, in the 3rd dynasty. Again, the polity of Merve appears to have been in great measure sacerdotal long after Aegypt had ceased to be governed by a pure theo cracy. Yet, that the civilisation of Meroe was indigenous, the general barbarism of the native tribes of this portion of Libya in all ages renders highly improbable. From whatever quarter the ruling caste of this ancient kingdom may have come, it bears all the tokens, both in what we know of its laws, and in what is visible of its arts, of the preserice of a conquering race presiding over a subject prople.

The most probable theory appears to be the following, since it will account for the inferiority of the arts and for the resemblance of the polity of Merve to that of Acgypt :-

Strabo, quoting Eratosthenes (xrii. p. 786), says that the Sembritae were sulject to Meroe; and arain be relates, from Artemidorus, that the Sembritae ruled Meroe. The name of Sembritae, he adds, signifies immigrants, and they are governed by a quern. Pliny (vi. 30. 8. 31) mentions four islands of the Sembritae, each containing one or more towns, and which, from that circumstance, are evidently not inere river-islanis. but tracts between the streams which intersect that part of Libya - the maxiern kingdom of Sennour. Herodotus, in whom is the earliest allusion to these Sembritae (ii. 30), calls them Automoli, that is voluntary exiles or immigrants, and adds that they dwelt as far above Merve, as the latter is from Syene, i.e., a two months' vovare up the river. Now, we know that, in the reign of $P$ sammetichus (в. c. 658-614), the military caste withdrew from Aegypt in anger, because their privileges had been invaded by that monarch; and tradition uniformly assigns Aethiopia, a vague name, as their place of refuge. The number of these exiles was very considerable, enough even if we reduce the nuinbers of Herodotus (ii. 31), 240.000 , to a tenth - to enable warriors, well armed and disciplined, to bring under subjection the scattered and barharous tribes of Sennaar. The islands of the Sembritie, surrounded by rivers, were easy of defence: the soil and productions of Meroe proper would attract exiles acccustoned to the rich Nile valley; while, at the distance of two month's journey, they were secure against invasion from Aegypt. Having revolted from a king rendered powerful by his army, they would naturally establish a form of
government in which the royal anthority was limited; and, recurring to the era when the monarch was elected by or from the sacerdotal caste, they apparently reorganised a theocracy, in which the royal power was so restricted as to admit of its being held by male or female sovereigns indifferently, - for there were kings as well as queens of Meroe.

Again, the condition of the arts in this southern kingdom points to a similar conclusion. The pyramids scattered over the plains of Meroe, though copied from the monuments of the Nile valley, and burrowing names from early Egyptian dynasties, are all of a comparatively recent date; long. indeed, posterior to the age when the arts of Aegypt were likely either to be derived from the south, or to be conveyed up the river by conquest or commercial intercourse. The structures of Meroe, indeed, so far as they have been explored hitherto, indicate less a regular than an interrupted intercourse between the kingdoms above and below Syene. And when it is remembered that these monuments bear also many vestiges even of later Greek and Roman times, we may infer that the original Sembritae were, during many generations, recruited by exiles from Aegypt, to whom the government of their Macedonian or Roman conquerurs may have been irksome or oppressise. Finally, the native tribes of Sennaar live principally on the produce of the chase; whereas the population of Meroe was agricultural. New emigrants from Acrypt would naturally revert to tillage, and avail themselves of the natural productiveness of its alluvial plains. The whole subject, indeed, is involved in much ohscurity, since the ancient Meroe is in many parts inaccessible; partly from its immense tracts of jungle, tenanted by wild beasts, and partly from the fevers which prevail in a climate where a brief season of tropical rain is succeeded by many months of drought. From the little that has been discovered, however, we seem warranted in at least sumising that Meroe was indirectly a colony of Aesypt, and repeated in a rude form its peculiar civilisation. (See Heeren, African Nations, vol. i. Meroe; Cooley's I'tulemy and the Nile; Cailliaud, [/sle de Merve, \&r.)

MESE＇MBRIA（Meonubpia，Dor．Me $\sigma a \mu b p i a$ ： Eth．Meonufplayós）．1．An important Greek city in Thrace，situated on the cosst of the Euxine and at the foot of Mt．Haemus（Scymn．Ch．738）； consequently upon the contines of Moesia，in which it is placed by Ptolemy（iii．10．§8）．Strabo（vii． p．319）relates that it was a colony of the Me－ garians，and that it was originally called Menebria （Meyebpla）after its founder Menas ；Stephanus B． （s．v．）says that its original name was Melsembria （Me入onu8pia），from its founder Melsas；and both writers state that the termination－bria was the Thracian word for town．According to the Ano－ nymous Periplus of the Euxine（p．14）Mesembria was founded by Chalcedonians at the time of the expedition of Darius against Scythia；but according to Herodotus（vi．33）it was founded a little later， after the suppression of the lonic revolt，by Byzantine and Chalcedonian fugitives．These statements may， however，be reconciled by supposing that the Thra－ cian town was originally colonized by Megarians，and afterwards received additional colonists from By － zantium and Chalcedon．Mesembria was one of the cities，forming the Greek Pentapolis on the Euxine， the other four being Odessus，Tomi，Istriani and Apol－ loniatae．（See Bückh，Inscr．vol．ii．p．996．）Me－ sembria is rarely mentioned in history，but it con－ tinued to exist till a late period．（Mela，ii． 2 ； 1＇lin．iv． 11. s． 18 ；Ptol．l．c．；Tab．Peut．）
2．A Greek city of Thrace，on the Aegaean Sea，

COIN OF MESEMBRIA．
and not far from the mouth of the Lissus．（H od． vii． 108 ；Steph．B．s．v．）

MESE＇NE（Meonvウ，Strab．ii．p．84），a small tract of land in ancient Mesopotamia，about the exact position of which there has been much dis－ cussion，owing to the indistinct and confused ac－ counts of it which have been preserved in ancient authors．The real cause of this would seem to be that there were two districts at no great distance one from the other，both of which，from similar reasons，bore the name of Mesene，or Middle－Land． One of these was near the mouths of the Tigris， where that river is divided into two branches，cor－ responding to the modern tract called Shat－al－Arab （Steph．B．s．v．Mєб $\quad$ 访．）To this Mesene must be referred the passage in Philostorgius（ $\boldsymbol{H} . \boldsymbol{E}$ ． iii．7），in which he states that the Tigris，before it reaches the sea，is divided into two great branches， forming an extensive island，which is inhabited by the Meseni．To this also belongs the Mesene，men－ tioned in the history of Trajan by Dion Cassius， who calls it an island in the Tigris，over which Athambilus was the ruler（Ixviii．28）．The other was much higher up on the same river，and has derived its chief importance from its capital Apameia． Stephanus speaks of this tract in two places；first （s．v．＇Aná $\mu \mathrm{fia}$ ），where he states that that city is surrounded by the Tigris，where that river is di－ vided into two streams，of which that on the right hand is called Delas，and that on the left bears the name of Tigris；and secondly（s．v．＂O ${ }^{\circ}$ a日a），where he asserts that Oratha is a town of Mesene，which is near the Tigris，according to Arrian，in the 16th book of his Parthica．

Pliny evidently refers to this Mesene，when he is speaking of Apameia，which town he states to have been 125 miles on this side（i．e．to the N．）of Seleuceia；the Tigris being divided into two chan－ nels，by one of which it flows to the $S$ ．and to Seleuceia，washing all along Mesene（vi．27．s．31）． There might have been some doubt to which Mesene Ammianus refers；but as he mentions Teredon， which was near the month of the Tigris，it is probable that he is speaking of the former one（xxiv．3）． The district in the neighbourhood of the Apameian Mesene has been surveyed with great care by Lieut． Lynch；and，from his observations，it seems almost certain that the more northern Mesene was the territory now comprehended between the Dijeib and the Tigris．（Roy．Geogr．Jowrn．vol．ix．p－ 473．）
［V．］
MESMA．［Menma．］
ME＇SOA or ME＇SSOA．［Srarta．］
MESOBOA．［Arcadia，p．193，No．15．］
NESOGAEA．［ATTICA，p．322．］
MESO＇GIS or MESSO＇GIS（Meбoris，Megow－ r（s），the chief mountain of Lydin，belonging to the trunk of Mount Taurus，and extending on the north of the Maeander，into which it sends numerous small strearns，from Celaenae to Mycale，which forms its western termination．Its slopes were known in antiquity to produce an excellent kind of wine． （Strab．xiv．Pp．629，636，637，648，650；Steph． B．s．v．；Ptol．r．2．§ 13，where Mıб⿱⺈тis is，no doubt，only a corrupt form of Mecoris．）Mounts Pactyes and Thorax，near its wostern extremity， are only branches of Mesogis，and even the large range of Mount Tmolus is，in reality，only an off－ shoot of it．Its modern Turkish name is Kestaneh Dagh，that is，chestnut mountain．
［L．S．］
MESOPOTA＇MLA（ $\dot{\eta}$ Meбototauía），an extensive
district of Western Asia，deriving its name from its position between the two great rivers Euphrates and Tigris．It was bounded on the N．by Armenia and the S．branch of M．Taurus，on the E．by the Tigris，on the W．by the Euphrates，and on the S．by the Median Wall，which separated it from Babylonia．（Strab．xvi．p． 746 ；Ptol．v． 18. § 1．）Pliny apparently extends it on the southern side as far as the Persian Gulf（v．24．s．21）；but， like many other ancient provinces，its limits varied much at different periods，－it being sometimes ex－ tended so as to comprehend Babylonia，at other times 80 as to take in parts of Syria．

Mesopotamia is noticed among the earliest re－ cords of the human race which we have in the Bible．It is commonly known by three titles in Holy Scripture：either Aram Naharaim（or ＂Syria of the Two Waters＂），as in Gen．xxiv．10； or Padait Aram（＂Syria of the Plain＂），as in Gen．xxxi．18，xxxiii．18，xxxv． 9 ；or Sedeh－ Afam，＂the field of Aram＂（Hos．xii．12），corre－ sponding with the＂Campi Mesopotamiae＂of Curtins（iii．2．§ 3，iv．9．§ 6）．There are indeed places where Aram Maharaim appears to be used in a more limited sense for the more northern por－ tion of it（Deut．xxiii．4）；while it is equally cer－ tain that it was not supposed to comprehend only the flat country of the plain；for Balaam，who is said to have been a native of Aram Maharaim（Deut． xxiii．4），is also in another place stated to have been＂brought from Aram out of the mountains of the East．＂（Numb．xxiii．7．）It is not certain how soon in history this country acquired its Greek title，which is，after all，only a modification of the meaning of the original Hebrew word，－probably， however，not till after Alexander＇s invasion of the Fast．（Cf．Arrian，vii． 7 ；Tacit．Ann．vi．37．） The translators of the LXX．render the Hebrew sometimes Meбowotauia Euplas，and sometimes simply Méototapia．In the Bible we have men－ tion of one ruler who is called a king of Menopotamia， Cushan－Riahathaim，to whom the children of Israpl were subject for eight years．（Judg．iii．8，10．） The modern Arabic name Al－Jezireh（the island） describes its locality accurately；bat the modern province is much less extensive than the ancient．

The whole country（as known at least to the later writers）appears to have borne much the same cha－ racter as Babylonia，and to have been rich in the same products．It was throughont well wooded， especially in the neighbourhoud of the principal streams；and some of the timber must have been of a large size，as Trajan built a fleet in the neigh－ boarhood of Nisibis during the Parthian War （Dion Cass．lxviii．26），and Severus one in sub－ sequent times from the woods along the banks of the Euphrates．（Dinn Cuss．lixv．9．）Its ex－ tensive plains afforded abundant pasturage for cattle （Curt．v．1．§ 12 ；Amm．Marc．xxv．8），and its wilder and less frequented districts were the haunts of the lion，the wild ass，and the gazelle．（Strab． $x$ vi．747；Ammian．xviii．7．）The same character it possesses now ；though，from the scantiness of the population，and the careless rule of its Turkish governors，much that was formerly under culti－ vation has become a deserted wilderness．Among its natural prosiucts Strabo mentions expecially naphtha，amomum，and a stone called gangitis or gacatis（perhaps a kind of anthracite coal）．（Cf． Sebol．ad Nicandr．Ther． 37 ；Plin．x．3．s． 4 ； Diascorid．v．146．）

Though Mesopotamia is for the most part a flat country，the ancients reckoned some mountains which were along its northern boundary，as be－ longing to this division of Asia．．These were Mons Masius（now Karja Baghlar），one of the sonthern outlying spurs of the great range of the Taurus； and M．Singaras（now Sinjar），which may be considered us an extension to the S ．of the M． Masius．The latter is nearly isolated from the main ranges on the N．，and extends on the NE．to the neighbourhood of the Tigris．The two most important rivers of Mesopotamia are，as we have stated，those which formed its W．and E．boundaries， the Euphrates and Tigris；but besides these，there are a number of smaller，but not wholly unimportant streams，which traverse it as affluents of the former rivers．These were the Chaboras（Khabir）；the Saccoras，perhaps the same as that which Xeno－ phon calls Mascas（Anab．i．5．§ 4）；the Belias or Bilecha ；and the Mygdonius（Hermes．）Under the Roman Empire，Mesopotamia was divided into two parts，of which the western was called Osrho⿺辶⿻二⿰丿丨 while the eastern continued to bear its ancient name．It was conquered by Trajan in A．D．115， who took Singara and Nisibis，and formed the three Roman provinces of Armenia，Mesopolamia， and Assyria，of which Mesopotania reached as far as the Persian Gulf．（Dion Cass．Ixviii．22，23； Eutrop．viii． 3 ；Euseb．p．165，ed．Scalig．；Malalas， p．274，ed．Bonn．）But even Trajan conld not retain his conquests（Dion Cass．lxviii．29），and they were given up by Hadrian of his own accord． （Spartian，Hadr．5；Eutrop．viii．6．）Under M．Aure－ lius，Mesopotamia was again conquered by L．Verus， as far as the Median Wall（S．Rufus，Brev．14）； and the conquest was further secured by the foand－ ation of the culonies of Carrhae on the Chaboras and Singara，to which Septimius Severus added those of Nisibis and Rhevaena．But this province was a constant cause of war between the Persian and Roman empires ；and at length the greater part of it was surrendered to the Persians by Jovian in A．D．363．After this time Mesopotamia contained two 2 rapxiau：Osrhoeine，bounded on the south by the Chaboras，with the capital Edessa；and Meso－ potamia，extending as far south as Dara，and having Amida as its capital．The province was governed by a Praeses．（Marquardt，in Becker＇s Rümiech． Alterth．vol．iii．pt．i．pp．204，seq．）

The most important cities of this province were Battar or Bathnae；Carrhar；Circesium； Nisibis or Antiocheia Mygdoniae；and Sin－ gara．

ME＇SPILA（Ḿ́бォua，Xen．Anab．iii．4．§ 10）， an ancient deserted city of Assyria，noticed by Xenophon on his retreat northwards from Babylonia． He describes it as about 6 parasangs from Larissa， on the same（or left）bank of the Tigris．He men－ tions that the town had been inhabited by the Medes，and that its walls were of immense size，the foundations being of polished shelly limestone， 50 feet in breadth and height；and the part above， made of brick，being 100 feet high and 50 broad． The circumference of the whole work he states to have been 6 parasangs．He mentions，as a report， that on the Medians being conquered by the Persians， the queen，who was a Median，fled to this place； and that．when subsequently the place was besieged by the Persians，they would have been unable to take it，had not Zeus aided them with his lightning． There can be little doubt that Mespila is represented
by the present Mosul. - the name of which is probably a corruption of the old name, -and that the ruins of Koynujik, in its immediate neighbourhomel (now certainly ascertained, by Colonel Rawlinson's decipherment of the inscriptions found there, to have been a vast palace erected by Sennacherib), are those which Xenophon beheld in a state much less injured by time and violence than they are at present. (Layard, Nineveh and Babylon, p. 6.58.)
[V.]
MESSA (M'́ $\sigma \sigma \eta$ ), one of the nine cities of Laconia enumerated by Homer, who gives it the epithet
 Strabo says that the position of Messa was unknown (viii. p. 364); but Pausanias mentions a town and harbour, named Messa (iii. 25. § 9). which is identified by most modern scholars with the Homeric town. This Messa, now Mesapo, is situsted on the western coast of Mani, between Hippola and Oetylus; and the cliffs in the neighbourhmod are said to abound in wild pigcons. (Leake, Morea, vol. i. p. 286 ; Bublaye, liécherches, qc. p. 91 ; Curtius, Peloponnesos, vol. ii. p. 282.) Lenke, however, has subsequently conjectured that Messa curresponds to Mistrá in the Spartan plain, partly on account of its site, and partly vecause the Messa of Pausanias could never, from its situation, have been a place of much importance. ( $\Gamma$ eloponnesiuca, p. 357.) But there does not appear any sutficient reason for rejecting the identity of the Messa of lausanias with the Messe of Homer.

MESSABATE'NE (Plin. vi. 27. s. 31 ; Méoo6atıкй. Strab. xi. p. 524 : Eth. Mérabáral, Ptol. vi. 4. § 3), 2 narrow district in the mid-land of Susiana (as indeed its name implies), situated according to Pliny under Mt. Cambalidus (one of the southern spurs of Mt. Zagros), to the N. of the tribe of the Cossiaci. Strabo states that it lies under Zagrus, and is either a part of Media, or, as others hold, of Elymaea (xi. p. 524) : in another place he calls Massabatice an epurchate of Elymaea, and adds that the best pass into Assyria lay through it (xvi. p. 744). Ptolemy (l.c.), who does not mention the district by its name, makes the Messabatue the inhabitants of Paractacene, itself a subdivision of Persis, adjoining Media.
[V.]
MESSA'NA or MESSE'NE (Me $\sigma \sigma \eta \neq \eta$ in almost all Greek authors, but the Doric form Meofada, which is found in Pindar, was universally in use among the citizens themselves, and was from them adopted by the Romans, who always write the name Messana: Eth. Meббinvos and Meбoávios, Messanensis: Messina), an important city of Sicily, situated on the strait which divided that island from Italy, nearly opposite to Rhegium, and only a few miles from Cape Pelorus, the NE. extremity of the island. It was originally called Zancle (Zájкえ $\eta$ : Eth. Zarkגaios), a name said to be of Siculian origin, derived from Zá $\gamma \kappa \lambda o \nu$, which in the language of that people meant a sickle, and was obviously applied to the spot from the peculiar configuration of the curred spit or point of sand which encloses its port. (Thuc. vi. 4; Steph. Byz. s. v. Z $\alpha$ र $\gamma \kappa \eta$; Strab. vi. p. 268; Diod. iv. 85.) From this derivation of the name it would appear probable that there was a Siculian settlement on the spot, before it was occupied by the Greeks; but no mention of this is found in history, and all ancient writers describe Zancle as a Chalcidic colony. According to Thucydides it was at first founded by a band of pirates from the Italian Cumae, itself a colony of Chalcis; but the advantageous
situation of the place soon led to the establishment there of a more regular colony, consinting of settlers fron Chalcis and the other cities of Eubrea, at the head of whom were Perieres of Chalcis and Crataemenes of Cumae, who became the joint founders or Orkists of the new colony (Thuc. vi. 4). This statement of Thucydides is confirmed in its leading points by Pausanias; while Scymnus Chius, as well as Strabo, though agreeing in its Chalcidic origin, represent it as founded immediately from the Chalcidic colony of Naxos in Sicily. (Paus. iv. 23. § 7 ; Scymn. Ch. 284-286; Strab. vi. p. 268.) From this last version we may infer that it was looked upon as of more recent origin than Naxos, and therefure not founded till after $735 \mathrm{~B} . \mathrm{C}$; but we have no clue to the precise, or even approximate date, of its establishment. Of its early history we know scarcely anything; but we may probably infer that it mose early to a flomishing condition, from the circumstance that the Zanclacans were able before the close of the seventh century b. c. to establish two colonies on the N. coast of the island: Mylae, about 30 miles W. of Cape Pelorus, and Himera, much further to the W. (Thuc. vi. 5; Scymn. Ch. 288; Strab. vi. p. 272.) The latter grew up into a great and powerful city, but Mylae appears to have continued for the most part a mere dependency of Zancle. (Strab. Le.)

The Zanclaeans apprar to have been still desirous of extending their colonial system in this direction, and were endeavouring to induce fresh settlers from the Ionian cities of Asia to co-operate with them in this enterprise, when the, fall of Miletus in B. c. 494 gave a fresh impulse to emigration from that quarter. A large body of Samians, together with some of the surviving Milesians, were in consequence induced to accept the invitation of the Zanclaeans, and set out for Sicily, with the purpose of establishing themselves on the N. coast between Mylae and Hinera, which was commonly known as "the Fair Shore" ( $\boldsymbol{\eta}$ KaAh 'Aкcท'.) But having arrived, on their way, at Locri Epizephyrii, they were here persuaded by Anaxilas, tyrant of Rhegium, to take a treacherous advantage of the absence of the Zanclaean troops, who were engaged in military operations elsewhere, and surprise the city of Zancle itself. That city was at this time under the government of a despot named Scythes. to whom Herodotus gives the title of king. On finding themselves thus betrayed, the Zanclaeans invoked the assistance of the powerful Hippocrates, despot of Gela; but that monarch in his turn betrayed them. and instead of aiding them to recover possession of Zancle. made common cause with the Samians, whom he confirmed in the possession of the city, while he threw Scythes into prison, and reduced the greater part of the Zanclacans into captivity. (Herod. vi. 22 -24: Thuc. vi. 4: Scymn. Ch. 293: Arist. Pol. v. 3.) By this sudden revolution, the Samians found themselves in undi. puted possession of Zancle, but they did not long enjoy their new acquisition. Not many years afterwards they were in their turn reduced to subjection by Amaxilus himelf, who is said to have expelled them from the city, which he perpled with a mixed body of colonists, while he gave to it the name of Messene, in remembrance of the land of that name in Greece, from which his own ancestors derived their descent. (Thuc. vi. 4 ; Herod. vii. 164; Strab. vi. p. 268.)

The exact period of this revolution cannot be determined with certainty; but the first settlement of the Samians at Zancle cannot be carried back further than B C. 493, while their subsequent expulsion or
subjection by Anaxilas mast have nccurmed some yeans priur to his death in b.c. 476. It is certain that at that period be had been for sume time ruler both of Rhegium and Zancle, the latter of which, according to one account. he had placed under the nominal government of his son Cleophiron or Leophrin. (Diud. xi. 48; Schol. all Pind. Pyth. ii. 34.) It is certisin, aloo, that befure the clinse of his reign \%ancle had assumed the name of Messiene or Messanna, by which it has ever since been known. The error of Pausanias, who carries back the whole settlement, and with it the reign of Anaxilas to the clove of the Second Messenian War, B. c. 668, has been sufficiently refuted lyy Bentley (Diss. on Phalaris, pp. 204-224.) It is probable that he confounded the Second Messenian War with the Third, which was revlly contemporaneous with the reign of Anaxilas (Clinton, F.H. vol. i. p. 257); and it is not unlikely that some fugitives from the latter were among the fresh settlers established by Anaxilas at the time of the colonisation of Messana. It is probable also that the Sumians were by no means altsolutely expelled, as stated by Thucydides, but continued to inhabit the city together with the new colonists, thongh deprived of their exclusive ascendancy. (Herod. vii. 164; Siefert, Zancle-Messana, p. 16.)

The Messanians for some time followed the fortunes of their neighbours of Khegium: thes passed. after the death of Anaxilas, under the government of Micythus, and subsequently of the two sons of Anaxilas: but, after the death of Hieron, and the expulsion of his brother Thras bulus from Syracuse, they took the opportanity, in conjunction with the ot her cities of Sicily, to drive out their despots and assert their freedorn and independence, B. c. 461. (Diod. xi. 59, 66, 76.) A larye boxly of the foreign settlers, who had been introduced into Sicily by the tyrants, were upon this occasion established in the territory of Messans, a proof that it was at this period still thinly penpled: but the city seems tu have participated largely in the prosperity which the Sicilian republics in general enjoyed during the perind that followed, B.c. 460-410. The great fertility of its territory, and the excellence of its port, were natural advantages which qualified it to becone one of the first cities of Sicily: and this aprears to have been the case throughunt the period in quastion. In в. c. 426 . their tranquillity was, howevor, interrupted by the arrival of the Athenian fleet under Laches, which established itself at Khegium, on the "ppyxite side of the straits; and from thence made an attack on Mylae, a fortress and dependency of the Messanians, which, though occupied by a atrong garrison, was compelled to surrender. Laches, with his allics, hereupon marched against Messana it wlf, which was unable to resist so large a force. and was compelled to arcede to the Athenian alliance. (Thuc. iii. 86. 90; Dioxl. xii. 54.) But the next year (в. c. 425) the Messanians laastened to desert their new alliance. and join that of the Syracusans; and from thencefiorth their port hecame the chief naral station of the combined Syracusan and Iocrian fleets. (Thuc. iv. 1, 24, 25.) They themselves, also, on one occasion, toxk courage to make a vigoruus attack on their Chalcidic neichbours of Naxns, and were able to defeat the N:xians themselves, and shut them up within their walls; bat were in their turn defeated by the Siculians and Leontines, who had hastened to the relief of Nasos, and who for a shoort time laid siege, but
withnut effect, to Messana itself. (Thuc. iv. 25.) The Messanians were included in the general pacification of Sicily, b.c. 424; but were themselves still divided by factions, and appear at one time to have for a short period passed under the actual dominion of the Locrians. (Id. v. 5.) At the time of the Athenian expedition to Sicily (b. c. 415) they were again independent. and on that occasion they persisted in maintainiug a neutral position, though in vain solicited by the Athenians on one side, and the Syracusans on the other. An attempt of the former to nake themselves masters of the city by treaclery proved wholly inefiectual. (Divd. xiii. 4; Thuc. vi. 48, 74.) A few years later, the Messanians afforded a hospitable refuge to the fugitives from Himera, when that city was taken by the Carthacinians, b. c. 409 (Diod. xiii. 61), and sent an auxiliary furce to assist in the defence of Agrigentum acainst the saine people. (Id. 86.)

It appears certain that Messana was at this prrind, one of the most flourishing and considerable cities in Sicily. Diodorus tells us, that the Messanians and Rlegisns together could equip a fleet of not less than 80 triremes (xiv. 8); and their combined forces were viewed with respect, if not with apprehension, even by the powerful Dionysius of Syracuse. (1d. 44.) But though anfavourably disposed towards that despot, the Messanians did not share in the strong symputhies of the Khegians with the Chalcidic cities of Nasns and Catana [Riregium], and pursued an uncertain and vacillating policy. (Diod. xiv. 8, 40, 44.) But while they thus sought to evade the hostility of the Syracuran despot, they were visited by a more severe calamity. Himilonn, the Carthaginian general, who had lauded in Sicily in в. c. 396, having compelled Dionysius to fall back upon Syracuse, himself advanced with a large army from Panornus, along the N. coast of the island. Messana was the in mediate object of the campaign, on account of the importance of its port ; and it was so ill prepared for defence, that notwithstariding the spirited resistance of its citizens, it was taken by Himilcon with little difficulty. Great part of the inhabitants made their escape to the surrounding country ; but the rest were put to the sword, and not only the walls of the city levelled to the ground, but all its buildings so studiously destroved as. according to the expression of Diodorus, to leave scarcely a trace of where it had formerlo stood. (Diod. xiv. 56-58.)

After the defeat and expulsion of the Carthaginans, Diunysius endeavoured to repeople Messana with the fugitive citizens who survived, to whom he added fresh colonists from Locri and Medma, together with a small body of Messanian exiles, but the latter were soon after transferred to the newly founded city of Tyudaris. (Diod. xiv. 78.) Meanwhile, the Rhegians, who viewed with dissatisfaction the footing thus established by Dionysius on the Sicilian straits, endeavoured to obtain in their tum an advanced post against the Messanians by fortifying Mylae, where they established the exiles from Naxis, Catana, and other cities, who had been driven from their homes by Dionysius. (Id. xir. 87.) The attempt, howerer, proved abortive : the Messanians recovered possessicul of Mylae, and continued to support Dimysius in lis enterprises agains: Hhegium. (Id. 87, 103.) Atter the death of that despot, we hear but little of Messana, which appears to have gralually, but slowly. risen again to a fluurishing condition. In B. c. 357 the Dlessa-
nians are mentinned as sending assistance to Dinn against the sounger Dionysius; and after the death of Dion, they repulsed an attempt of Callippus to make himself master of their city. (Diod. xvi. 9; Plut. Dion, 58.) At a somewhat later period, however, they fell under the yoke of a tyrant named Hippon, from whom they were freed by Timoleon, (B. c. 339), and at the same time detached from the alliance of Carthage, to which they had been for a time compelled to adhere. (Diod. xvi. 69; Plut. Timol 20, 34.)

But Messana did not long enjoy her newly recovered freedom. Soon after the establishment of Agathocles at Syracuse, that monarch turned his arms against Messana, and, though his first attempts, in B. C. 315, were ansuccessful, and he was even compelled to restore the fortress of Mylae, of which he had for a time made hinself master, a few years later, B. C. 312, he succeaded in establishing his power at Messana itself. (Diod. xix. 65, 102.) But the severities which he exercised against the party which had opposed him completely alienated the minds of the Messanians, and they readily embraced the opportunity of the defeat of the tyrant at Ecnomus in the following year, b. c. 311, to throw off his yoke and declare in favour of the Carthaginian alliance. (Id. xix. 110.) The death of Agathocles, soon after, brought upon the Messenians even heavier calamities than his enmity had done. The numeroas bands of mercenary troops, chiefly of Campanian, or at least Oscan, extraction, which the despot had assembled in Sicily, were, after his death, compelled by the Syracusans, with the support of the Carthaginians, to quit the island. But, having arrived with that object at Messana, where they were hospitably received by the citizens, and quartered in their houses, they suddenly turned against them, massacred the male inhabitants, made themselves masters of their wives, houses, and property, and thus established themselves in undisputed pmosession of the city. (Pol. i. 7; Diod. xxi. 18, Kixc. H. p. 493; Strab. vi. p. 268.) They now assumed the name of Mamertini (Maufptivol), or "the children of Mars," from Mamers, an Oscan name of that deity, which is found also in old Latin. (Diod. L.c.; Varr. L. L. v. 73.) The city, however, continued to be called Messana, though they attempted to change its name to Mamertina: Cicero, indeed, in several instances calls it "Mamertina civitas" (Cic. Verr. ii. 5, 46, iii. 6, iv. 10, \&c.), but much more frequently Messana, though the inhabitants were in his time universally called Mamertini. The precise period of the orcupation of Messana by thie Mamertines is nowhere stated. Polybius tells us that it occurred not long before that of Rhegium by the Campanians under Decius, which may be referred to the year 280 в. C., while it must have taken place some time after the death of Agathocles in B. C. 289: the year 282 is that commonly assigned, but within the above limits this is metely conjectural.

The Dlamertines now rapidly extended their power over the whole NE. angle of Sicily, and made themselves masters of several fortresses and towns. The occupation of Rhegium by the Campanians, under very similar circumstances, contributed to strengthen their pusition and they became one of the mosit formidable powers in Sicily. The arrival of Pyrrhus in the island (в. c. 278) for a time gave a check to their aggrandisement: they in vain combined with the Carthaginians to prevent his landing; but,
though be defeated their furces in a battle and took several of their fortresses, he did not attack Messana itself; and on his return to Italy the Mamertines sent a large force across the straits which attacked the army of the king on its march, and inflicted on him severe losses. (Plut. Pyrrh. 23, 24 ; Diod. xxi. 7. p. 495.) The Mamertines, however, soon found a more formidable enemy in Hieron of Syracuse, who, shortly after the departure of Pyrrhus from Sicily, established himself in the possession of the chief power in that city. His efforts were early directed against the Mamertines; and after the fall of Rhegium, which was taken by the Romans in B. C. 271, he invaded their territory with a great army, reduced the fortress of Mylae, and defeated the Manertines in a battle on the banks of the river Longanus, with such slaughter that they were on the point of surrendering Messana itself without a blow; and the city was saved only by the intervention of a Carthaginian force under Hannibal. (Pol. i. 8, 9; Diod. xxii. 13. pp. 499, 500.) The events which followed are obscurely known to as, and their chronology is very uncertain; but the Mamertines seem to have found that they were no longer able to stand alone against the power of Hieron; and, while one party was disposed to throw themselves into the arms of the Carthaginians, another sought protection from the power of Rome. The latter ultimately prevailed, and an embassy sent by the Mamertines, to invoke the alliance of the Romans, first gave occasion to the intervention of that people in the affairs of Sicily, and became the origin of the First Punic War, b. c. 264. (Pol. i. 10; Diod. xaiii. 1 ; Zonar. viii. 8; Orus. iv. 7 ; Liv. Epit. xvi.)

Before the arrival of the promised aid from Rome the Carthaginian party had again prevailed, and the citadel was occupied by a Carthaginian garrison; but this was expelled by the Mamertines themselves on the arrival of C. Clyudius; and soon after the consul Appius Claudius landed at Messana, and drove off in succession the Carthuginians and Hieron, who had just befure concluded an alliance against the Mamertines, and laid siege to the city with their combined forces. (Pol. i. 11, 12; Diod. xxiii. 1, 3 p. 501 ; Zonar. viii. 8, 9 ; Dion Cass. Exc. Vat. 5860.) Messana was now protected by a Roman garrison, and, during the whole course of the war which followed, continued to be one of their chief strongholds and the principal station of their fleets. The importance of its harbour, as well as its ready communication with Italy, rendered it a point of vital importance to the Komans; and the Mamertines eithet continued steadily faithful or were kept under by the constant presence of a Roman force. (Pol. i. 21, 25, 38, 52; Diod. xxiii. 18. p. 505, xxiv. 1. p. 508; Zonar, viii. 10, 12.) At the close of the war the Mamertines obtained a renewal of their treaty, and continued to enjoy henceforth the nominal privileges of an allied city (foederata civitus), while they in reality passed under the dominion of Rume. (Cic. Verr. iii. 6.) Even in the time of Cicero we find them still retaining this privileged condition; and though this alone would not have sufficed to protect them against the exactions of Verres, the Mamertines appear to have adopted the safer policy of supporting the praetor in all his oppressions and conciliating him by bribes, so that they are represented by the orator as the accomplices, as well as defenders, of all his iniquities. (Cic. Ib. ii. 5, 46, iv. 8, 67, \&c.)
Messana was certainly at this time one of the most populous and flourishing places in Sicily. Cicero
calls it a very great and very rich city ("civitas maxima et locupletissima," Verr. v. 17), and extols the advantages of its situation, its port, and its buildings. (Ib. iv. 2.) Like all other allied cities, it had its own senate and magistrates, and was legally subject to no other contributions than the furnishing ships and naval supplies in case of war, and the contributing a certain proportion of the corn furnished by Sicily to Rome at a given rate of remuneration. (Ib. v. 17-22.) Nor does Messana appear to have suffered severely from any of the wars that caused such ravages in Sicily, though it narrowly escaped being taken and plundered by Athenion during the Servile War, B.c. 101. (Dion Cass. Fr. Val. p. 534.) In the Civil War, b. c. 48, it was the station of a part of the fleet of Caesar, which was attacked there by that of Pompey under Cassius, and the whole of the ships, thirty-five in number, burnt; but the city itself was protected by the presence of a Roman legiop. (Caes. B. C. iii. 101.) At a somewhat later period it was the head-quarters and chief stronghold of Sextus Pompeius during his war with Octavian, B. c. 36 ; and its capacious harboar became the station of the fleet with which he commanded the coasts of Sicily, as far as Tauromenium on the one side and Tyndaris on the other. It was from thence also that Pompeius, after the total defeat of his fleet by Agrippa, made his escape with a squadron of only seventeen ships. (Appian, B. C. v. 97, 103, 109, 122; Dion Cass. xlix. 1-12; Strab. vi. p. 268.)

It was in all probability in consequence of this war that Messana lost the privileged condition it had so long enjoyed; but its inhabitants received in exchange the Roman franchise, and it was placed in the ordinary position of a Roman municipium. It still continued to be a flonrishing place. Strabo speaks of it as one of the few cities in Sicily that were in his day well peopled; and though no subsequent mention of it is found in history under the Roman Empire, it reappears during the Gothic wars as one of the chief cities and most important fortresses in the island, - a rank it had undoubtedly beld throughout the intervening period. (Strab. vi. p. 268 ; Plin. iii. 8. s. 14 ; Ptol. iii. 4. § 9 ; Mel. ii. 7. § 16 ; Procop. B. G. i. 8, iii. 39.) The wine of the neighbourhood of Messana, known as Vinum Manertinum, enjoyed a great reputation in the days of Pliny; it was first brought into vogue by the dictator Caesar. (Plin. xiv. 6. s. 8.)

Throughout the vicissitudes of the middle ages Messina continued to be one of the most important cities of Sicily; and still ranks as the second city in the island. It has, however, but few remains of antiquity. The only vestiges are some baths and tesselated pavements, and a small old church, supposed to have formed part of a Roman basilica. (Smyth's Sicily, p. 118.) Another church, called S. Giovanni de' Fiorentini is believed, but wholly without authority, to occupy the site of the Sacrarium or family chapel of Heius, from which Verres purloined a bronze statue of Hercules, attributed to Myron, and one of Cupid, which was believed to be the work of Praxiteles. (Cic. Verr. iv. 2, 3.)

The celebrated port of Messana, to which the city owed its chief importance in ancient as well as modern times, is formed by a projecting spit or tongue of sand, which curves round in the form of a crescent or sickle (whence the name of Zancle was supposed to be derived), and constitutes a natural
mole, rendering the harbour within perfectly secure. This singular bulwark is called by Diodorus the Actè ('A $\kappa \tau \eta$ ), and its construction was attributed by fable to the giant Orion (Diod. iv. 85), though there can be no doubt of its being of perfectly natural formation. The harbour within is said by Diodorus to be capable of containing a fleet of 600 ships (xiv. 56), and has abundant depth of water, even for the largest ships of modern days. The celebrated whirlpool of the Charybdis is situated just outside the Actè, nearly opposite the modern lighthouse, but out of the track of vessels entering the harbour of Messina. (Smyth's Sicily, p. 123.)

Though the city itself is built close to the harbour on level ground, immediately at the back of it rise steep hills, forming the underfalls of a range of mountains which extends from the neighbourhood of Cape Pelorus to that of Tauromenium. This ridge, or at least the part of it next to Cape Pelorus, was known in ancient times as the Mons Neptunius; but a part of the same range forming one of the underfalls near Messana is called, both by Diodorus and Polybius, the Chalcidic mount ( $\tau \dot{\mathrm{d}} \mathrm{X} \alpha \lambda \kappa \iota-$
 $\kappa \iota \delta \iota \kappa o ́ s$, Diod. xxiii. 1), and was the position occupied by Hieron of Syracuse when he laid siege to Messana, в. c. 264. But neither this, nor the position taken up by the Carthaginians at the same time at a place called Sunes or Eunes (Zúveis, Pol.; Eivveis, Diod.), can be identified with any degree of certainty.

The coins of Messana are numerons and interesting, as illustrating the historical vicissitudes of the city. There exist :-l. Coins of Zancle, before the time of Anaxilas, with the name written in old characters $\triangle$ ANKAE, a dialectic form of the name. 2. Coins of Messana, with the Ionic legend MEzienion, and types taken from the coins of Samos. These must be referred to the period of Anaxilas immediately after his conquest of the city, while the Samian colonists still inhabited it. 3, Coins of Messana, with the type of a hare, which seems to have been adopted as the ordinary symbol of the city, because that animal is said to have been first introduced into Sicily by Anaxilas. (Pollux, Onom. v. 75.) These coins, which are numerous, and range over a considerable period of time, show the gradual preponderance of the Doric element in the city ; the ruder and earlier ones having the legend in the Ionic form MEZEENION, the latter ones in the Doric

form MEEEANION or MEEEANI 2 . 4. Coins struck by the Mamertines, with the name of MAMEPTINSN. These are very numerous, but in copper unly. (Millingen, Trans. of Roy. Soc. of Lit. vol. i. pt. ii. pp. 93-98; Eckhel, vol. i. pp. 219224.)
[E. H. B.]
MISSSA'PIA (Meoraxia), was the name commonly given by the Greeks to the peninsula forming the SE. extremity of Italy, called by the Romans Calabria. But the usage of the term was very fluctuating; Iapygia and Messapia being used sometimes as synonymous, sometimes the latter considered as a part only of the former more general designation. (Pol. iii. 88; Strab. vi. pp. 277, 282.) [This question is more fully discussed under Calabria, Vol. I. p. 472.] The same uncertainty prevails, though to a less degree, in the ase of the name of the peoplo, the Messapil (Me $\sigma \sigma d \pi t 0 t$ ), who are described by Herodutus (vii. 170) as a tribe of the Iapygians, and appear to bo certainly identical with the Calabri of the Romans, though we have no explanation of the origin of two such different appellations. The ethnical affinities of the Messapians have already been discussed, as well as their history related, under the article Calabria.

Italian topographers in general admit the existence of a torm of the name of Nessapia, the site of which is supposed to be marked by the village now called Mesagne, between Oria and Brindisi; but the passage of Pliny, in which alone the name is found, appears to be corrnpt; and we should probably read, with Claverius and Mommsen, "Varia (Uria) cui cognomen ad discrimen Apulae Messapia." (Plin. iii. 11. s. 16. § 100 ; Claver, Ital. p. 1248; Mommsen, Die Unter. Ital. Dialekte, P. 61.)

MESSA'PIUM, mountain of Boeotia [Vol. I. p. 414, a. $]$

MESSE'IS (Meनonts). 1. A fountain of Pherae in Thessaly. [Pherak.]
2. A fuuntain of Therapne in Laconia. (Paus. iii. 20. § 1.)

MESSE'NE (Meo天tion: Eth. and Adj. Meootrios: Adj. Meoनnviaxós), the later capital of Messenia, built under the direction of Epaminundas in в. c. 369. (Diod. xv. 66; Paus. iv. 27.) The name of Messene had been applied in ancient times to the country inhabited by the Messenians; but there was no city of this name till the one founded by Epaminondas. The Thebans and their allies assisted the Messenians in building it; and the best architects and masons were invited from all Greece to lay ont the city with regularity, and to arrange and construct properly the temples and other public buildings. Epaminondas also took especial pains with the fortifications, which were regarded by Pausanias as the most perfect in Greece. The walls, as well as the towers and bulwarks, were built entirely of stone; and the excelleuce and solidity of the masonry are still apparent in the existing remains. (Paus. iv. 31. §5.) The foundation of the city was attended with great pomp and the celebration of solemn sacrifices. First, sacrifices were offered by Epaminondas, who was reconnised as Oekist or Founder, to Dionysus and Apollo Ismenius,-by the Argives to the Argive Hera and Zeus Nemeius,- by the Messenians to Zeus Ithomatas and the Dioscuri. Next, prayer was offered to the ancient Heroes and Heroines of the Messenian nation, especially to the warrior Aristornenes, that they would come back and take up their abude in
the new city. After this, the ground was marked out and the bailding begun, ander the sound of Argive and Boeotian flutes, playing the strains of Pronomas and Sacadas. (Paus. iv. 28. § 6; Grote's Greece, vol. ix. p. 309.) The history of this town is related under Messenia, so that it is only necessary in this place to give an account of its topography.

Messene is situated upon a rugged mountain, which rises between the two great Messenian plains, and which thus commands the whole country. This mountain, about half-way up, divides into two summits, of which the northern was called Ithome and the soothern Eva. The sharp ridgo connecting them is about half a mile in length. Mt. Ithome is one of the most striking objects in all Peloponnesus. It rises to the height of 2631 feet, or more than 700 feet higher than the Acrocorinthus; but it looks much loftier than it really is, in consequence of its precipitons sides and isolated position. Upon this summit the Acropolis of Messene was built; but the city itself was situated in a hollow somewhat in the form of a shell, extending on the west side of the sharp ridge which connects Ithome and Era. The city was connected by a continuous wall with its acropolis. There are considerable remains of the ancient city, and the walls may still be traced in the greater part of their extent. They are most perfect on the northern side, with the Arcadian or Megalopolitan gate in the centre. They may be fullowed up to the summit of lthome, and then along the ridge connecting lthome and Eva; but here towards the south-east traces of them are sometimes lost. In this part, however, the fuundations of the eastern or Laconian gate, as it has been called, are clearly seen. The summit of Mt. Eva was evidently not included within the city walls. The direction of the southern wall is most uncertain. From the eastern gate to the ruins, which are supposed to be those of the southern gate, and near which the present road runs to the southern Messenian plain, no line of walls can be traced; but on the western side the walls may again be clearly followed. The circumference of the walls is about 47 stadia, or nearly 6 English miles; but it includes a large space altogether unfit for the site of buildings; and the great extent was doubtless intended to receive a part of the surrounding population in time of war.

The space included within the city-walls now consists of corn-fields and pastures amidst woods of wild olive and oak. Nearly in the centre of the ancient town is the modern village of Mavromáti ; and near the southern gate, at the foot of Mount Eva, are two poor villages, named Simisea. On the eastern slopo of Mount Eva is the monastery of Verkáno, embossed in cypress and orange groves, and one of the most

mLAN OF ARCADLAN OR MEGALOPOLITAK GATE
elegant and picturesque structures of this class in Greece.

The northern gate, leading to Megalopolis in Arcadia (Paus. iv. 33. §3), is one of the finest speci-

PIAN OF THE RUINS OF MESSENE,
A. Arcadian or Megalopolitan Gate.
mens of Greek military architecture in existence. Its form is seen in the preceding plan. It is a small fortress, containing double gates opposite to one another, and connected by a circular court of 62 feet in diameter. In front of the outer gate on either side is a strong rectangular tower. Upon entering the court through the outer gate, there is a niche on each side for a statue, with an inscription over it. The one on the left hand is still legible, and mentions Quintus Plotius Euphemion as the restorer (Böckh, Inscr. No. 1460). Pausanias (iv. 33. §3) notices in this gate a Hermes in the Attic style, which may possibly have stood in one of these niches. Leake observes that the interior masonry of the circular court is the most exact and beautiful he ever saw. The lower course is a row of stones, each about $5 \frac{1}{2}$ in length and half as much in height; upon this is placed another course of stones of equal length and of half the height, the joints of which are precisely oves the centre of each stone in the lower course. The upper part of the walls has fallen: nine conrses are the most that remain. Neither gateway retains its covering, but the flat architrave of the inner one lies in an oblique position upon the ruins of the wall by which it was formerly supported; it measures 18 feet 8 inches in length by 4 feet 2 inches in breadth, and 2 feet 10 inches in thickness.

The road still leads through this gate into the circnit of the ancient city. The ruins of the towers, with the interjacent curtains, close to the gate on the slope of Mount Ithome, show this part of the fortifications to have resembled a chain of strong redoubts, each tower constituting a fortress of itself. "A flight of steps behind the curtain led to a door in the flank of the tower at half its height. The upper apartment, which was entered by the door, had a range of loopholes, or embrasures, on a line with the door, looking along the parapet of the curtain, and was lighted by two windows above. The embrasures, of which there are some in each face of the towers, have an opening of 7 inches within, and of 3 feet 9 inches without, so that, with a small opening, their scope is very great. The windows appear to be too high for any purpose but to give light. Both the curtains and towers in this part of the walls are constructed entirely of large squared blocks, without rubble or cement. The curtains are 9 feet thick. The inner face of the towers has neither door nor window. The tower next to the gate of Megalopolis has had all the stones disjointed, like those of the Propylaea at Athens, probably by an earthquake." The towers are in general about 25 feet square, projecting about 14 feet from a curtain varying in length according to the nature of the ground, and 8 or 10 feet in thickness.

The masonry was not in general sach as has been described at the towers near the gate of Megalopolis, but, as in most Greek works of defence, consisted of an exterior and interior facing of that kind of masonry filled up with rabble.

In describing Messene, Pausanias first mentions the Agora, which contained a fountain called Arsinoe, supplied by a sabterraneous canal from the source named Clepsydra. In the Agora, probably in the centre, was a statue of Zeus Soter. The various temples, which he then proceeds to enumerate, either surrounded the Agora, or were in its immediate neighbourhood. These were temples of Poseidon and Aphrodite; a marble statue of the mother of the gods, the work of Damophon, who also made the statue of Artemis Laphris; a temple of Eileithyia, a sacred building of the Curetes, and a sanctuary of Demeter, containing statues of the Dioscuri. But the temple of Asclepius contained the greatest num: ber of statues, all of which were made by Damophon. The temple of Messene contained her statue in gold and Parian marble, while the back part was adorned with pictures representing the Messenian heroes and kings. A building, callel Hierosythium, contained statues of all the gods worshipped by the Greeks. Pausanias next mentions the gymnasinm, with statues made by Aegyptian artists, a pillar bearing a figure of Aethidas in relief, and the monument of Aristomenes, - the stadium containing a brazen statue of Aristomenes ; and lastly, the theatre, with the adjoining temple of Serapis and Isis. The fountain called Clepsydra occurs in ascending to the summit of Ithome. On the summit was a temple of Zeus Ithomatas ; and an annual festival, called Ithomaea, was celebrated in honour of the god. (Paus. iv. 31. § 6-iv. 33. § 2.)

The Agora must have stood near the modern village of Mavromati, in the neighbourhond of which most of the foundations of the ancient buildings are found. The rivulet, which now runs unconfined through the village, was in ancient times conducted through a subterraneous canal, and formed the fountain Arsinoe mentioned abrive. The modern village has derived its name from the spring, Maeromáti meaning Black Spring or Black Eye. South of the site of the Agora are the ruins of the stadium, of which the upper or circular end and more than half of one of the sides still remain. The rivulet of Mavromáti now runs through the length of the stadium. "The stadium was surrounded by a colonnade, which was double at the npper end : here the lower parts of the columns are in their original places; there were about twenty in each row, 1 foot 10 inches in diameter, with Doric flutings. Part of the colonnade, on the right side of the stadium, is likewise in its place, and on the left side is the foundation of a public edifice, where are many pieces of columns of the same description as the colonnade round the stadium. Perhaps this was the Hierothysium. The stone seats of the stadium did not extend its whole length, but aboat twothirds only; at the circular end, they are most perfect." (Leake.) Immediately south of the stadium is a wall, which appears to have been part of the walls of the city. In this wall a small temple is built. like a kind of tower. Between the stadium and the village of Mavromiti, to the west of the rivulet, are the remains of a small theatre, about 60 feet in diameter. Narth of the stadium the slope is divided into terraces, of which the supporting walls still remain. Here scme of the temples mentioned by Pausanias prubably stood.

In ascending Mount Ithome, there is about half way up a terrace of eonsiderable size, which commands a fine view of the Messenian gulf. Here the French Commission discovered some ruins overgrown with shrubs, which appear to have been an Ionic temple facing the east, containing a porch with two columns and a cella. This was probably a temple of Artemis, as an inscription here found contains the names of Messenians, who had held the priesthood of Artemis Limnatis, and the remains of the statue discovered in the cella appear to be those of this goddess. Below the temple are two smaller terraces ; and 60 feet further sideways, WSW. of the temple, is a kind of grotto cat out of the rock, with a portico, of which there are remains of five pillars. This was, perhaps, intended to receive the water of the fountain Clepsydra, which Pausamias mentions in his ascent to the summit of the mountain. The summit itself is a small flat surface, extending from SE. to NW. On the northern and eastern sides the wall runs along the edge of the perpendicular cliffs, and some remains of a more ancient masonry may be perceived, which probably belonged to the earlier fortifications of Messene. At the northern and broader end of the summit are the deserted buildings of the monastery of Vurkano; this was undoabtedly the site of the temple of Zeus Ithomatas. There is a magnificent view from the summit. Along the northern boundary of the horizon the Lycaean range extends; to the east are seen the mountains now named Makryplai, which unite with the range of Taygetum ; to the north-west the sea-coast between the rivers Cyparisseeis and Neda is visible; while to the south the mouth of the Pamisus and the Messenian gulf are spread open to view.

The similarity of Ithome to Acrocorinthus is noticed by Strabo (viii. p. 361). He observes, that both are lofty and precipitous mountains, overhanging their respective cities, but connected with them by a common line of fortifications. Messene continued to exist in the later times of the Roman empire, as we learn from inseriptions; but in the middle ages it had ceased to be a place of any importance; and hence the ancient remains have been less disturbed by the hands of man than in most other parts of Greece. (Leake, Morea, vol. i. p. 366, seq.; Mure, Tour in Greece, vol. ii. p. 264 ; Boblaye, Récherches, fc., p. 107, seq.; Curtius, Peloponnesas, vol. ii. p. 138 , seq.)

MESSE'NIA (Me $\sigma \sigma \eta \nu i a$, Herod., Thuc. ; in older
 Pind. Pyth. ir. 126 ; shortened Mé $\sigma \sigma \eta$, Mé $\boldsymbol{\eta} \eta$, Steph. B. s. v. Me $\epsilon \sigma \eta \nu i a ;$ Me $\sigma \sigma \eta \nu$ ls $\gamma \hat{\eta}$, Thuc. iv.
 the south-westerly district of Peloponnesus, bounded on the east by Laconia, on the north by Elis and Arcadia, and on the south and west by the sea. It was separated from Laconia by Mt. Taygetus, but part of the western slope of this monntain belonged th Laconin, and the exact boundary between the two states, which varied at different times, will be mentioned presently. Its southern frontier was the knot of mountains, which form the watershed of the rivers Neda, Pamisus and Alpheius. On the south it was wasbed by the Messenian gulf ( $\delta$ M $\epsilon \sigma \sigma \eta$ viacos ко́лтоs, Strab. viii. p. 335), called also the Coronaean or Asidaean gulf, from the towns of Cornne or Asine, on its western shore, now the Gulf of Koroni. On the east it was bounded by the Sicilian or Ionian sea. The area of Messenia, as calculated by Clinton, from Arrowsmith's map is 1162 square ruiles.
I. Geveral Description of the Country.

Messenia, in its general features, resembles Laconia. The Pamisus in Messenia, like the Eurotas in Laconia, flows through the entire length of the country, from north to south, and forms its most cultivated and fertile plains. But these plains are much larger than those in Laconia, and constitute a considerable portion of the whole country; while the mountains on the western cosst of Messenia are much less rugged than on the eastern coast of Laconia, and contain a larger proportion of fertile land. Hence the rich plains of Messenia are often contrasted with the sterile and rugged soil of Laconia; and the climate of the former country is praised by the ancients, as temperate and soft, in comparison with that of the latter. The basin of the Pamisus is divided into two distinct parts, which are separated from each other on the east by a ridge of mountains extending from Mt. Tajgetus to the Pamisus, and on the west by Mt. Ithome. The upper part, called the plain of Stenyclerus or Stenyclarus ( $\tau \boldsymbol{\delta}$
 moderate fertility, and is entirely shut in by mountuins. The lower plain, which opens to the Messenian gulf, is much more extensive, and was sometimes called Macaria (Maxapia), or the "Blessed," on account of its surprising fertility. (Strab. viii. p. 361.) It was, doubtless, to this district that Euripides referred, when he described the excellence of the Messenian soil as too great for words to explain, and the land as watered by innumerable streams, abounding in fruits and flocks; neither too hot in summer, nor too cold in winter. (Eurip. ap. Strab. viii. p. 366.) Even in the present day, although a part of the plain has become marshy by neglecting the anbankments of the Pamisus, it is described by travellers as the most fertile district in the Peloponnesus. It now produces oil, silk, figs, wheat, maize, cotton, wine, and honey, and presents as rich a cultivation as can well be imagined. (Leake, Morea, vol. i. pp. 347, 352.) Besides the Pamisus, numerous other streams and copious perennial springs gush in all directions from the base of the mountains. The most remarkable feature on the western coast is the deep bay of Pylos, now called Navarino, which is the best, and indeed the only really good harbour in the Peloponnesus.

## 1I. Mountanss, Promostorire, Rivers, and Islands.

1. Mountains.- The upper plain, in which are the sources of the Pumisus, was the original abode of the Messenians, and the stronghold of the nation. Here was Andania, the capital of the most ancient Messenian kings. Thither the Messenians retreated, moften as they were overpowered by their enemies in the lower plains, for here were their two great patural fortresses, Ithome and Eira, the former commanding the entrance to the lower plain, and the latter situated in the mountains, which rise in the northern part of the upper plain. These mountains, now called Tetrizi, form, as has been already said, the watershed of the rivers Neda, Pamisus, and Alpheius. From this central ridge, which is 4554 feet high, a cinain extends towards the west, along the banks of the Neda, and is also prolonged towards the south, forming the mountains of the western peninsula, and terminating at the promontory Acritas. From the same central ridge of Tetrazi, another chain extends towards the east, dividing the Messenian plain from the upper basin of the Alpheius,
and then aniting with Mount Tayggetus, and forming the barrier between the basins of the lower Pamisus and the Eurotas. These two moantain chains, which, issuing from the same poiut, almost meet about half-way between Mount Tatrazi and the sea, leave only a narrow defile through which the waters of the Pamisus force their way from the apper to the lower plain. South of this defile the mountains again retire to the east and west, leaving a wide opening for the lower plain, which has been already described.

Scarcely in any part of Greece have the names of the ancient mountains been so little preserved as in Messenia. Tetrázi was perhaps the mountains of Eira. The eastern continuation of Tetrázi, now named Makryplii, formed part of the ancient Mt. Nomia. (Noula 8pm, Paus. viii. 38. § 11.) The western prolongation of Tetrázi along the banks of the Neda was called Elaeum ('Endion), now Kucela, and was partly in the territories of Phigalia. (Paus. viii. 41. § 7.) The mountains Ithome and Evar are so closely connected with the city of Messene that they are described under that head. [Messene.] In the southern chain extending down the western peninsula, the names only of Aegaleam, Buphras, Tomeus or Mathia, and Temathia have been preserved. Aegaleux (Alyatiov) appears to have been the name of the long and lofty ridge, running parallel to the western shore between Cyparissia and Coryphasium (Pylos); since Strabo places the Messenian Pylos at the foot of Mt. Aegaleum (viii. p. 359; Leake, Morea, vol. i. pp. 426, 427). Buphras ( $\eta$ Bou $\phi p d s$ ) and Toxsus ( $\delta$ Toucús) are mentioned by Thucydides (iv. 118) as points near Coryphasium (Pylos), beyond which the Lacedaemonian garrison in the latter place were not to pass. That they were mountains we may conclude from the statement of Stephanus B., who speaks of the Tomaion bpos near Coryphasium. (Steph. B. s. y. Toueús.) Tmmathia (Tyma0ia), or Mathia (MaBia, the reading is doubtful), was situated, according to Pausanias (iv. 34. § 4), at the foot of Corone, and must therefore correspond to Lyliodimo, which rises to the height of 3140 feet, and is prolonged sonthward in a gradually falling ridge till it terminates in the proinontory Acritas.
2. Promontorica - Of these only four are mentioned by name, - Acritas ('Axpitas), now C. Gallo, the most southerly point of Messenia [Ackitas] ; and on the west coast Coryphasium, forming the entrance to the bay of Pylus [Pylus]; Platamodes (Плataucions, Strab. viii. p. 348), called by Pliny (iv. 5. 8. 6) Platanodes, distant, accurding to Strabo (b.c.), 120 stadia N. of Coryphasium, and therefore not far from Aia Kyriutie (Leako, vol i. p. 427); and lastly Cyparissium [Cyparissia], a little further north, so called from the town Crparissia.
3. Rivers.-The Panasus (Haunabs) is described by Strabo as the greatest of the rivers within the Isthmus (viii. p. 961); but this name is only given by the ancient writers to the river in the lower plain, though the moderns, to facilitate the description of the geography of the country, apply this name to the whole course of the waters from their sources in the upper plain till they fall into the Measenian gulf. The principal river in the upper plain was called Balyra (Balipa). It rises near the village of Sulima, and flows along the western side of the plain: two of the streans composing it
were the Electra ('Hiéntpa) and the Cosus (K,ios). Near Ithome the Balyra receives the united waters of the Levcasin (Aeukaola) and the Anpiritus ("Auqitos), of which the former flows from the valloy of Bogasi, in a direction from N . to E., while the latter rises in Mt. Makryplaii, and flows through the plain from E. to W. This river (the Amphitus), which may be regarded us the principal one, is formed out of two streams, of which the northern is the Charadrus (Kdpadpos). (On the Balyra and its tributaries, see Paus. iv. 33. §§ 3-6.) The Balyra above the junction of the Amphitus and Lencasia is called Vasiliko, and below it Mavrozimeno, though the latter name is sometimes given to the river in its upper course also. At the junction of the Balyra and the Amphitus is a celebrated triangular bridge, known by the name of the bridge of Mavroaimeno. It consists of three branches ot arms meeting in a common centre, and corresponding to the three principal roads through the plain of Stenyclerus. The arm, running from north to south passes over no river, but only over the low swampy ground between the two streams. At the sonthern end of this arm, the two others branch off, one to the SW. over the Balyra, and the other to the SE. over the Amphitus, the former leading to Messene and the other to Thuria. The foundations of this bridge and the upper parts of the piers are ancient; and from the resemblance of their masonry to that of the neighbouring Messene, they may be presumed to belong to the same period. The arches are entirely modern. The distance of this bridge from the Megalopolitan gate of Messene agrees with the 30 stadia which Pausanias (iv. 33. § 3) assigns as the interval between that gate and the Balyra; and as he says immediately afterwards that the Leucasia and Amphitus there fall into the Balyra, there can be little doubt that the bridge is the point to which Pausanias proceeded from the gate. (Leake, Morea, vol. i. pp. 480, 481.)

PLAY OF THE BRIDGE OF MAVROZUMERO.
The Mavrozimeno, shortly after entering the lower plain, received on its left or westarn side a considerable stream, which the ancients regarded as the genaine Pamisus. The sources of this river are at a north-eastern corner of the plain near the chapel of St. Floro, and at the foot of the ridge of skala. The position of these sources agrees sufficiently with the distances of Pausanias (iv. 81. §4) and Strabo (viii. p. 361), of whom the former writer describes them as 40 stadia from Messene, while the latter assigns to the Pamisus a course of only 100 stadia. Between two and three miles south of the sources of the Pamisus there rises another river called Pidhima, which flows SW. and falls into the Mamosimeno, lower down in the
plain below Nist, and at no great distance from the sen. Aris ("Apus) was the ancient name of the Pidhima. (Paus. iv. 31. § 2.) The Mavrozimeno, after the junction of the Pidhima, assumes the name of Dhipotamo, or the double river, and is navigable by small boats. Pansanias describes it as navigable 10 stadia from the sea. He farther says that seafish ascend it, especially in the spring, and that the mouth of the river is $\mathbf{8 0}$ stadia from Messene (iv. 34. § 1).

The other rivers of Messenia, with the exception of the Neda, which belongs to Arcadia also [NrDA], are little more than moontain torrents. Of these the most important is the NeDON (Nédov), not to be confounded with the above-mentioned Neda, flowing intothe Measenian gulf, east of the Pamisus, at Pherme. It rises in the mountains on the frontiers of Laconia and Messenia, and is now called the river of Kalemita: on it there was a town of the same name, and also a tomple of Athena Nedusia (Strab, viii. pp. 353, 360 ; Leake, Morea, vol. i. pp. 344, 345 ; Ross, Reisen im Peloponnes, p. 1.) The other mountain torrents mentioned by name are the Bus (Bias), flowing into the western side of the Messenian gulf, a little above Corone (Pans, iv. 34. § 4); and on the coast of the Sicilian or Ionian see, the Selans ( Kí $\lambda$ as, $^{2}$ Ptol. iii. 16. § 7), now the Longovairdho, a little S. of the island Prote, and the Crparissus (Kumdpiocos), or river of Arkhadhia. [See Vol. I. p. 728.]
4. Islamds.-Thegasuessa (Empanoû́ra), now Venetiko, distant 3700 feet from the southern point of the promontory Acritas, is called by Pausanias a deeert island ; but it appears to have been inhabited at some period, as graves have been found there, and ruins near a fountain. (Paus. iv. 34. § 12; Өทvarov̂́a or Өıvayoû́a, Ptol. iii. 16. § 23 ; Plin. iv. 12. s. 19. § 56; Curtius, Pelopomeseas, vol ii. p. 172.) West of Thegannssa is a group of islands called Oassussar (Olnoûarac), of which the two largest are now called Cabrera (by the Greeks $\Sigma x(\rho a)$ and Sapiensa. They are valuable for the pasture which they afford to cattle and horses in the spring. On the eastarn side of Sapienza there is a well protected harbour; and here are found cisterns and other remains of an ancient settlement. (Pans. iv. 34. § 12 ; Plin. iv. 12. s. 19. § 55 ; Leake, rol. i. p. 433 ; Curtius, vol. ii. p. 178.) On the westarn coast was the island of Sphacteria, opposite the harbour of Pylus; and further north the small island of Prote (חporth), which still retains its ancient name. (Thuc. iv. 13; Plin. iv. 12. s. 19. § 55 ; Mela, ii. 7 ; Steph. B. s. v.)

## III. History.

The earliest inhabitants of Messenia are said to have been Leleges. Polycaon, the younger son of Lelex, the king of Laconia, married the Argive Messene, and took possession of the country, which he named after his wife. He built several towns, and amoug others Andania, where he took up his residence. (Paus. i. 1.) At the and of fire generations Aeolians came into the country under Perieres, a son of Aeolus. He was succeeded by his son Apharens, who founded Arene, and received the Acolian Nelens, a fugitive from Thesesaly. Nelens founded Pylus, and his descandants reigned here over the westarn coast. (Paus. i. 2.) On the extinction of the family of Aphareus, the eastern half of Messenia was united with Laconia, and came onder the sore. reignty of the Atridse; while the western half con-

## MESSENIA.

MESSENIA.
tinued to belong to the kings of Pylus. (Pans. iv. 3. § 1.) Hence Euripides, in referring to the mythic times, makes tho Pamisus the boundary of Laconia and Messenia ; for which he is reproved by Strabo, becanse this was not the case in the time of the geographer. (Strab. viii. p. 366.) Of the seven cities which Agamemnon in the Iliad (ix. 149) offers to Achillee, some were undoubtedly in Meesenia ; but as only two, Pherae and Cardamyle, rotained their Hameric names in tho historical age, it is difficult to identify the other five. (Strab. viii. p. 359; Diod. xv. 66.)

With the conquest of Peloponnesus by the Dorians a new epoch commences in the history of Messenia. This country fell to the lot of Cresphontes, who is represented as driving the Neleidae out of Pylus and making himself master of the whole country. According to the statement of Ephoras (ap. Strab. viii. p-361), Cresphontes divided Meseenia into five parts, of which he made Stenyclerus the royal residence.: In the other four towns he appointed viceroys, and bestowed upon the former inhabitants the same rights and privileges as the Dorian conquerors. But this gave offence to the Dorians ; and he was obliged to collect them all in Stenyclerus, and to declare this the

[^17]only city of Messemia. Notwithstanding these conressions, the Dorians pat Cresphontes and all his children to death, with the exception of Aepytus, who was then very young, and was living with his grandfather Cypselus in Arcadia. When this youth had grown up, he was restored to his kingdom by the help of the Arcadians, Spartans, and Argives. From Aepytus the Messenian kings were called Aepytidae, in preference to Heracleidae, and continued to reign in Stenyclerus till the sixth generation,- their names being Aopytus, Glancus, Isthmius, Dotadas, Sybotas, Phintas,-when the first Meesenian war with Sparta began. (Paus. iv. 3.) According to the common legend, which represents the Dorian invaders as conquering Peloponnesus at ane stroke, Cresphontes immediatoly became master of the whule of Messenin. But, as in the case of Laconia [Lacosia], there is good reason for believing this to be the invention of a later age, and that the Dorians in Messenia were at first confined to the plain of Stenyclerus. They appear to have penetrated into this plain from Arcadia, and their whole legendary history points to their close connection with the latter country. Cresphontes himself married the daughtor of the Arcadian king Cypeolus ; and the name of his son Aepytus, frons whom the line of the Messenian kings was called, was that of an ancient Arcadian hero. (Hom. Il ii. 604, Schol. ad loc. ; comp. Grote, Hish of Greece, vol. ii. p. 437, seq.)

The Messenian wars with Sparta are related in every history of Greece, and need not be repeated here. According to the common chronology, the first war lasted from s.c. 743 to 784, and the second from B.c. 685 to 668 ; but both of these dates are probably too early. It is neceseary, however, to glance at the origin of the first war, because it is connected with a disputed topographical question, which has only recently reccived a satisfactory solution. Mt. Taygetus rises abruptly and almost precipitously above the valley of the Earotis, bat descends more gradually, and in many terraces, on the other side. The Spartans had at a very early period taken pos-

MAP OF THE AGER DEATHETMTES.
session of the western slopes, but how far their territory extended on this side has been a matter of dispute. The confines of the two countries was marked by a temple of Artemis Limnatis, at a place called Limnae, where the Messenians and Laconians offered sacrifices in common; and it was the murder of the Spartan king Teleclus at this place which gave occasion to the First Messenian War. (Paus. iii. 2. §6, iv. 4. §2, iv. 31. §3; comp. Strab. vi. p. 257, viii. p. 362.) The exact site of Limnae is not indicated by Pausanias : and accordingly Leake, led chiefly by the name, supposes it to have been situated in the plain upon the left bank of the Pamisus, at the marshes near the confluence of the Aris and Pamisus, and not far from the site of the modern town of Nisi ( $N \eta \sigma l$, island), which derires that appellation from the similar circumstance of its position. (Leake, Morea, vol. i. p. 361.) But Ross has discovered the ruins of the temple of Artemis Limnatis on the western slope of Mt. Taygetus, on a part of the mountains called Vólimnos (Bónıupos), and amidst the rains of the church of Panaghia Volimniátissa (INavarla Ben入ıulditıन $\sigma a$ ). Vólimnos is the name of a hollow in the mountains near a mountain torrent flowing into the Nedon, and situated between the villages of Sitzova and Poliani, of which the latter is about 7 miles NE. of Kalamdta, the ancient Pherae. The fact of the similarity of the names, Bob-
 tioga and "Aptemis Aupditis, as well as the ruins of a temple in this secluded spot, would alone make it probable that these are the remains of the celebrated temple of Artemis Limnatis; bat this is rendered certain by the inscriptions found by Ronss upon the spot, in which this goddess is mentioned by name. It is also confirmed by the discovery of two boundary stones to the eastward of the ruins, apon the highest ridge of Taygetus, upon which are in-
 pillars, therefore, show that the boundaries of Messenia and Laconia must at one period have been at no great distance from this temple, which is always represented as standing near the confines of the two countries. This district was a frequent subject of dispate between the Messenians and Lacedaemonians even in the times of the Roman Empire, as we shall see presently. Tacitus calls it the "Dentheliates Ager" (Hist. iv. 43); and that this name, or something similar, was the proper appellation of the district, appears from other authorities. Stephanus B. speaks of a town "Denthalii" ( $\Delta \in \nu \theta d \lambda c o$, e. v.: others read $\Delta \in \lambda \theta d y(0 i)$, which was a subject of contention between the Messenians and Lacedaemonians. Alcman also (ap. Ather. i. p. 31), in enumerating the different kinds of Laconian wine, mentions also a Denthian wine ( $\Delta$ éveis olvos), which came from a fortress Denthiades (èк $\Delta \in \nu \theta i \alpha ́ \delta o \nu \nu$ épúmatós fivos), as particularly good. Ross conjectures that this fortress may have stood upon the mountain of St. George, a little S. of Sitzova, where a few ancient remains are said to exist. The wine of this mountain is still celebrated. The position of the above-mentioned places will be best shown by the accompanying map.

Bat to return to the history of Messenia. In each of the two wars with Sparta, the Messenians, after being defeated in the open plain, took refuge in a strong fortress, in Ithome in the first war, and in Eira or Ira in the second, where they maintained themselves for several years. At the conclusion of the Second Messenian War, many of the Messenians
lef their country, and settled in various parts of Greece, where their descondants continued to dwell as exiles, hoping for their restoration to their native land. A large number of them, uader the two sons of Aristomenes, sailed to Rhegiam in Italy, and afterwards crossed over to the opposite coast of Sicily, where they obtained possession of Zancle, to which they gave their own name, which the city has retained down to the present day. [Mresana.] Those who remained were reduced to the condition of Helots, and the whole of Messenia was incorporated with Sparta. From this time (B. C. 668) to the battle of Leuctra (B. C. 371), a period of nearly 300 years, the name of Messenia was blotted out of history, and their country bore the name of Laconia, a fact which it is important to recollect in reading the history of that period. Once only the Messenisns attempted to recover their independence. The great earthquake of B. C. 464, which reduced Sparta to a heap of ruins, encouraged the Messenians and other Helots to rise against their oppressors. They took refuge in their ancient stronghold of Ithome; and the Spartans, after besieging the place in vain for ten years, at length obtained possession of it, by allowing the Messenians to retire unmolested from Peloponnesus. The Athenians settled the exiles at Naupactus, which they had lately taken from the Locri Ozolue; and in the Peloponnesian War they were among the most active of the allies of Athens (Thuc. i. 101-103; Paus. iv. 24. § 5, seq.) The capture of Athens by the Lacedaemonians compelled the Messenians to quit Naupactus. Many of them took refuge in Sicily and Rhegium, where some of their countrymen were settled; but the greater part sailed to Africa, and obtained settlements among the Euesperitae, a Libyan people. (Paus. iv. 26. § 2.) After the power of Sparta had been broken by the battle of Leuctra (b. c. 371 ), Epaminondas, in order to prevent her from regaining her former influence in the Peloponnesus, resolved upon forming an Ar. cadian confederation, of which Megalopotis was to be the capital, and at the same time of restoring the Messenian state. To accomplish the latter object, he not only converted the Helots into free Messenians, but he despatched messengers to Italy, Sicily, and Africa, where the exiled Messenians had settled, inviting them to return to their native hand. His summons was gladly responded to, and in m. c. 369 the new town of Messene was boilt. Its cikadel or acropolis was placed upon the summit of Mt. Ithome, while the town itself was situated lower down on the slope, though connected with its acropolis by a continuous wall. (Diod. xv. 66; Pans. iv. 27.) [Messenc.] During the 300 years of exile, the Messenians retained their ancient castoms and Doric dialect; and even in the time of Pansanias they spoke the purest Doric in Peloponnesus. (Pans. iv. 27. § 11 ; comp. Míller, Dor. vol. ii. p. 421, transl.) Other towns were also rebailt, but a great part of the land still continued uncultivated and deserted. (Strab. viii. p. 362.) Under the protection of Thebes, and in close alliance with the Arcedians (comp. Polyb. iv. 32), Messene maintained its independence, and the Lacedaemonians lost Messenia for ever. On the downfall of the Theban supremacy, the Messenians courted the alliance of Philip of Macedon, and consequently took no part with the other Greeks at the battle of Chaeroneia, B. c. 388. (Paus. iv. 28. § 2.) Philip rewarded them by compelling the Lacedaemonians to cede to them Limnae and certain districts. (Polyb. ix. 28; Tac. Ans
iv. 43.) That these districts were those of Alagonia, Gerenia, Cardamyle, and Leuctra, situated northward of the smaller Pamisus, which flows into the Messenian gulf just below Leuctra, we may conclade from the statement of Strabo (viii. p. 361) that this river had been the subject of dispute between the Messenians and Lacedsemonians before Philip. The Messenians appear to have maintained that their territory extended even further south in the most ancient times, since they alleged that the island of Pephnus had once belonged to them. (Pans. iv. 26. §3.) [Pephnos.] At a later time the Messenians joined the Achaean Leagne, and fought along with the Achacans and Antigonus Doson at the battle of Sellasia, B. c. 222. (Paus. iv. 29. § 9.) Long before this the Lacedaemonians appear to have recovered the districts assigned to the Messenians by Philip; for after the battle of Sellasia the boundaries of the two people were again settled by Antigonus. (Tac. Ann. l. c.) Shortly afterwards Philip V. sent Demetrius of Pharus, who was then living at his court, on an expedition to surprise Messene; but the attempt was unsuccessful, and Demetrins himself was slain. (Pulyb. iii. 19 ; Paus. iv. 29. §§ 1-5, where this attempt is erroneously ascribed to Demetrius II., king of Macedonia.) Demetrius of Pharus had observed to Philip that Mt. Ithome and the Acrocorinthus were the two horns of Peloponnesus, and that whoever held these horns was master of the bull. (Strab. riii. p. 361.) Afterwards Nabis, tyrant of Lacedaemon, also made an attempt upon Messene, and had even entered within the walls, when he was driven back by Philopoemen, who came with succours from Megalopolis. (Paus. iv. 29. § 10.) In the treaty made between Nabis and the Romans in b.c. 195, T. Quintius Flamininus compelled him to restore all the property he had taken from the Messenians. (Liv. xxxiv. 35 ; Plut. Flamin. 13.) A quarrel afterwards arose between the Messenians and the Achaean League, which ended in open war. At first the Achaeans were unsuccessful. Their general Philopuemen was taken prisoner and pat to death by the Messenians, b. o. 183; but Lycortas, who succeeded to the command, not only defeated the Messenians in battle, but captured their city, and executed all who had taken part in the death of Yhilopoemen. Messene again joined the Achaean League, but Abia, Thuria, and Pharae now separated themselves from Messene, and became each a distinct member of the league. (Paus. iv. 30. $\S \S 11,12$; Liv. xxxix. 49 ; Polyb. xxiv. 9, seq., xxv. 1.) By the loss of these states the territory of Messene did not extend further eastwarl than the Pamisus; but on the settlement of the affairs of Greece by Mammias, they not only recovered their cities, but also the Dentheliates Ager, which the Lacedaemonians had taken possession of. (Tac. Ann. iv. 43.) This district continued to be a subject of dispute between the two states. It was again assigned to the Messenians by the Milesians, to whose arbitration the question had been submitted, and also by Atidius Geminus, praetor of Achaia. (Tac. L.c.) But after the battle of Actium, Augustas, in order to punish the Messenians for having espoused the side of Antony, assigned Thuria and I'harae to the Lacedaemonians, and consequently the Dentheliates Ager, which lay east of these states. (Paus. iv. 31. § 2, comp. iv. 30. § 2.) Tacitus agrees with Pausanias, that the Dentheliates Ager belonged to the Lacedaemouians
in the reign of Tiberius; but he differs from the latter writer in assigning the possession of the Lacedaemonians to a decision of C. Caesar and M. Antonius (" post C. Caesaris et Marci Antonii sententia relditum"). In such a matter, however, the authority of Pausanias deserves the preference. Wo learn, however, from Tacitus (1.c.), that Tiberins reversed the decision of Augustus, and restored the disputed district to the Messenians, who continued to keep possession of it in the time of Pausanias; for this writer mentions the woody hollow called Choerins, 20 stadia south of Abia, as the boundary between the two states in his time (iv. 1. § 1, iv. 30. § 1). It is a curious faot that the district, which had been such a frequent subject of dispute in antiquity, was in the year 1835 taken from the government of Misthra (Sparta), to which it bad always belonged in modern times, and given to that of Kalamáta (Ross, Reisen im Peloponnmes, p. 2.)

## IV. Towss.

1. In the plain of Stenyclerus. - Andania, the capital of the Messenian kings before the Dorians. Orchalia, at the distance of 8 stadia from Andania, the reputed residence of Eurytus, occupied, according to Pausanias, the grove of cypresses callod Carnasium. Amphein, in the mountains on the borders of Arcadia Two roads led into Arcadia: the more northerly ran along the river Charadrus past Carnasium (Pans. viii. 35. § 1); the more southerly started from Messene, and was a military road made by Epaminondas, to connect more clowely the two newly founded cities of Messene and Megalopolis. (Paus. viii. 34 ; comp. Leake, Morea., vol. ii. p. 296.) Stexyclarus, the capital of the Dorian conquerors, and which gave its name to the plain, was also on the borders of Arcadia. Ira or Eira, where the citizens maintained themselves during the Second Messenian War, was situated upon the mountain of this name, to the north of the plain above the river Neda. At the extreme south of this plain, commanding also the entrance of the plain Macaria, was Messenk, with its citadel Ithome. To the west part of the plain, on the road from Andania to Cyparissia, were Pohchne and Dorium.
2. In the plain of Macaria. - Pherare, the modern Kalamáta, situated about a mile from the sea, on the left bank of the river Nedun, was in antiquity, as it is at present, the chief town in the plain. Three roads lead from Pherae: one southwards along the coast to ABLA, said to be the Homeric Ira; a second up the valley of the Nedon, across Mt. Taygetus to Sparta, one of whose gates was hence called the gate towards Pharae (" porta quae Pharas ducit," Liv. $x$ xxv. 30); while the third road ran across the Nedon in a north-easterly direction to Calamaf, the modern Kalami, where it divided into two, the one to the west going across the Pamisus, and the other to the north leading to Thuria, of which there were two towns so called. and from thence to the sources of the Pamisus. To the east of Pherae was the monntainous district called the Ager Dentheliates, and containing Lnaxaz, which has been already described.
3. In the woestern peninsula and on the wcesterns const.-Corone and Asins were on the Messenian gulf, and consequently on the east coast of this peninsula. The situation of Colonides is uncertain, some placing it ou the Messenian gulf, and others near the barbour Phoenicus, NW. of the promontory Acritas. At the extreme southern point
of the western coast stood Methone, supposed to be the Homeric Pedasus. North of Methone, on the W. coast, was Prlus, on the promontory Coryphasium, opposite to which was the island Sphacteria. Further north, was the small town Erana, and than the more important Cyparissia ; beyond which was a place Aulon, at the entrance of the defile of this name, through which flowed the river Cy parissus.
(On the geography of Messenia, see Leake, Morea, vol. i. pp. 324, seq.; Boblaye, Récherches, p. 103, seq; Curtius, Peloponnesos, vol ii. p. 121, seq.)

COIN OF MRESBENLA.

## MESSENIACUS SINUS. [Messenia.]

MESUA, in Gallia Narbonensis, is described by Mela (ii. 5) "as a hill surrounded by the sea almost on all sides, and it would be an island if it were not joined to the mainland by a narrow agger." The place is supposed to be Mese or Mese, on the border of the E'tang de Tau, between Agde and Montpellier.
[G. L.]
METAGONI'TAE (Meraymiitan, Ptol. iv. 2. § 10), a people of Mauretania, between the Mulucha and the Pillars of Hercules. Their namo rocalls the Urbes Metagoniticar (Metayouvicion $\pi \delta \lambda \epsilon 15$, Polyb. iii. 33), or settlements founded by the Carthaginians on the NW. coast, and which seem to have formed a regular chain from their frontier to the Pillars of Hercules (Scyl p. 81). These marts enabled the republic to carry on inland trade with the nomad tribes, as well as to keep open a commnnication by land with Spain. (Heeren, African Nations, vol, i. p. 52, transl.)
[E.B. J.]
METAGONITES PROM. (Merayavitys Gxpoy, Ptol. iv. 1. § 7), a headland of Mauretania Tingitane, W. of the Muluche, now Cape Tres Forcas or Ras-ud-Dehir of the natives.
[E. B. J.]
METAGO'NIUM (Meтaүóntoy, Strab. xvii. pp. 827-829 ; Pomp. Mela, i. 7. § 1), a headland of N. Africa, which Strabo (l.c.) places over against Carthago Nova, at a distance of 3000 stadia. He describes the district about it as being, dry and barren, and bearing the same name ; the headland is now called Rds-el-Harsbah (Comp. Shaw, Trow. p. 94.)

## METALLI'NUM. [Metellinus.]

METALLUM. [Matalia.]
METAPA (ì M sef́s), a town in Aetolia, situatedon the northern shore of the lake Trichonis, at the entrance of a narrow defile, and 60 stadia from Thermum. It was burnt by Philip, on his invasion of Aetalia, B. c. 218, as he returned from the capture of Thermum. Its site cannot be fixed with certainty, notwithstanding the description of Polybius. Leake places it immediately below Vrakhori, near the eastern extremity of the lake Hyris, or the smaller of the two lakes; supposing that as these two lakes are connected with one another, the larger division may often have given name to the whole (Pol. v. 7, 13; Steph. B. s. v.;

Leake, Northern Gresce, vol. i. p. 150, seq.; comp. Thermum.)

## METAPINUM OSTIUM. [Rhodanve.]

METAPONTUM or METAPONTIUM (Mera$\pi$ obycov: Thuc., Strab., and all Greek writers have this form; the Latins almost universally Metapontum: Eth. Metaroytivos, Pans, Steph. B, and on coins; but Herod. has Merambertios; in Latin, Metapontinus: Rn. near Torre di Mare), an important city of Magna Graecia, situated on the gulf of Tarentum, between the river Bradanus and the Casuentus. It was distant about 14 miles from Heraclea and 24 from Tarentum. Historically speaking, there is no doubt that Metapontum was a Greak city founded by an Achaean colony; but rarious traditions assigned to it a much earlier origin. Strabo ascribes its foundation to a body of Pylians, a part of those who had followed Nestor to Troy (Strab. v. p. 222, vi. p. 264); while Justin tells us it was founded by Epeius, the hero who constructed the wooden horse at Troy; in proof of which the inhabitants showed, in a temple of Minerra, the tools used by him on that occasion. (Justin, xx. 2.) Another tradition, reported by Ephorus (ap. Strab. p. 264), assigned to it a Phocian origin, and called Daulius, the tyrant of Crisa near Delphi, its founder. Other legends carried back its origin to a still more remote period. Antiochus of Syracuse ssid that it was originally called Metabus, from a hero of that name, who appears to have been identified with the Metapontus who figured in the Greek mythical story as the husband of Melanippe and father of Aeolus and Boeotus. (Antioch. ap. Strab. l. c.; Hygin. Fab. 186; Eustath. ad Dionys. Per. 368; Diod. iv. 67.)

Whether there may have really been a settlement on the spot more ancient than the Achaean colony, we have no means of determining; but we are told that at the time of the foundation of this city the site was unoccupied; for which reason the Achmean settlers at Crotona and Sybaris were desirous to colonise it, in order to prevent the Tarentines from taking poesession of it. With this view a colony was sent from the mother-country, under the command of a leader named Leucippus, who, according to one account, was compelled to obtain the territory by a fraudulent treaty. Another and a more plansible statement is that the new colonists were at first engaged in a contest with the Tarentines, as well as the neighbouring tribes of the Oenotrians, which was at length terminated by a treaty, leaving them in the peaceable posseasion of the territory they had iequired. (Strab. vi. pp. 264, 265.) The date of the colonisation of Metapontum cannot be determined with certainty; but it was evidently, from the circumstances just related, subsequent to that of Tarentum, as well as of Sybaris and Crotons: hence the date assigned by Eusebius, who would carry it back as far as B.c. 774, is wholly untenable; nor is it easy to see how such an error can have arisen. (Euseb. Arm. Chron. p. 99.) It may probably be refarred to about 700-690 B. C.

We hear vary little of Metapontum during the first ages of its existence; but it seems certain that it rose rapidly to a considerable amount of prosperity, for which it was indebted to the extreme fertility of its territory. The same policy which had led to its foundation would naturally unite it in the bonds of a close alliance with the other Achaean cities, Sybaris and Crotona; and the first occasion on which we meet with its name in history is as joining with
these two cities in a league against Siris, with the view of expelling the Ionian colonists of that city. (Justin, cx. 2.) The war seems to have ended in the captare and destraction of Siris, but our account of it is very obscure, and the period at which it took place very ancertain. [Siris.] It does not appear that Metapontum took any part in the war between Crotona and Sybaris, which ended in the destruction of the latter city; but its name is frequently mentioned in connection with the changes intruduced by Pythagoras, and the troables consequent upon them. Metapontum, indeed, appears to have been one of the cities where the doctrines and sect of that philosopher obtained the firmest footing. Even when the Pythayoreans were expelled from Crotona, they maintained themselves at Metapontum, whither the philosopher himself retired, and where he ended his days. The Metapontines paid the greatest respect to his memory; they consecrated the house in which he had lived as a temple to Ceres, and gave to the street in which it was situated the name of the Musenm. His tomb was still shown there in the days of Cicero. (Iambl. Vit. Pyth. 170, 249, 266 ; Porphyr. Vit. Pyth. 56, 57 ; Plut. de Gen. Socr. 13 ; Diog. Laiert. viii. 1. § 40 ; Liv. i. 18 ; Cic. de Fin. v. 2.) The Metapontines were afterwards called in as mediators to appease the troables which had arisen at Crotona; and appear, therefore, to have suffered comparatively little themselves from civil dissensions arising from this source. (Iambl. 262.)

At the time of the Athenian expedition to Sicily, B. C. 415, the Metapontines at first, like the other atates of Magna Graecia, endeavoured to maintain a strict neutrality; but in the following year were indaced to enter into an alliance with Athens, and furnish a small auxiliary force to the armament under Dernosthenes and Eurymedon. (Diod. xiii. 4; Thuc. vi. 44, vii. 33, 57.) It seems clear that Metapontum was at this time a flourishing and opulent city; nor have we any reason to suppose that its decline began until long after. From its position it was secured from the attacks of Dionysius of Syracase; and though it must have been endangered in common with the other Greek cities by the advancing power of the Lucanians, it does not appear to have taken any prominent part in the wars with that people, and probably suffered but little from their attacks. Its name is again mentioned in B. c. 345, when Timoleon touched there on his expedition to Sicily, but it does not appear to have taken any part in his favour. (Diod. xvi. 66.) In B. c. 332, when Alexander, king of Epirus, crossed over into Italy at the invitation of the Tarentines, the Metapontines were among the first to conclude an alliance with that monarch, and support him in his wars agaiust the Lucanians and Bruttians. Hence, after his defeat and death at Pandosia, b. C. 326, it was to Metapontum that his remains were sent for interment. (Justin, xii. 2; Liv. viii. 24.) But some years later, B. c. 303, when Cleonymus of Sparta was in his turn invited by the Tarentines, the Metapontines, for what reason we know not, pursued a different policy, anc incurred the resentment of that leader, who, in consequence, turned his own arms, as well as those of the Lucanians, against them. He was then admitted into the city on friendly terms, but nevertheless exacted from them a large sum of money, and committed various other excesses. (Diod. xx. 104.) It is evident that Moeapontun was at this period still weallhy; but its
citizens had apparently, like their neighbours the Tarentines, fallen into a state of sluthfulness and luxury, so that they were become almost proverbial for their effeminacy. (Plut. Apophth. Lac. p. 233.)

It seems certain that the Metapontines, as well as the Tarentines, lent an active support to Pyrrhus, when that monarch came over to ltaly; but we do not find them mentioned during his wars there; nor have we any account of the precise period at which they passed under the yoke of Rome. Their name is, however, again mentioned repeatedly in the Second Punic War. We are told that they were among the first to declare in favour of Hannibal after the battle of Cannee (Liv. xxii. 61); but notwithstanding this, we find their city occupied by a Koman garrison some years later, and it was not till after the capture of Tarentum, in B. c. 212 , that they were able to rid themselves of this force and openly espouse the Carthaginian cause. (Id. xxv. 11, 15; Pol. viii. 36 ; Appian, Annib. 33, 35.) Hannibal now occupied Metapontum with a Carthaginian gartison, and seems to have made it one of his principal places of deposit, until the fatal battle of the Metaurus having compelled him to give up the possession of this part of Italy, B. C. 207, he withdrew his forces from Metapontum, and, at the same time, removed from thence all the inhabitants in order to save them from the vengeance of Rome. (Id. $\mathbf{x x v i i}$. $1,16,42,51$.

From this time the name of Metapontum does not again appear in history ; and it seems certain that it never recovered from the blow thus inflicted on it. But it did not altogether cease to exist ; for its name is found in Mela (ii. 4. § 8), who dues not notice any extinct places ; and Cicero speaks of visiting it in terms that show it was still a town. (Cic. de Fin. จ. 2 ; see also Appian, B. C. v. 93.) That orator, however, elsewhere alludes to the cities of Magna Graecia as being in his day sunk into almost complete decay ; Strabo says the same thing, and Pausanias tells us that Metapontum in particular was in his time completely in ruins, and nothing remained of it but the theatre and the circuit of its walls. (Cic. do Amic. 4 ; Strab. vi. p. 262 ; Paus. vi. 19. § 11.) Hence, though the name is still found in Ptolemy, and the " ager Metapontinus" is noticed in the Liber Coloniarum (p. 262), all trace of the city subsequently disappears, and it is not even noticed in the Itineraries where they give the line of route along the coust from Tarentum to Thurii. The site was probably already subject to malaria, and from the same cause has remained desolate ever since.

Though we hear much less of Metapontum than of Sybaris, Crotona, and Tarentum, yet all accounts agree in representing it as, in the days of its prosperity, one of the most opulent and flourishing of the cities of Magna Graecia. The fertility of its territory, especially in the growth of corn, vied with the neighbouring district of the Siritis. Hence we are told that the Metapontines sent to the temple at Delphi an offering of "a golden harvest" (À́pos xpuaouv, Strab. vi. p. 264), by which we must probably understand a sheaf or bundle of curn wrought in gold. For the same reason an ear of corn became the characteristic symbol on their coins, the nuuber and variety of which in itself sufficiently attests the wealth of the city. (Millingen, Numismatique de IItalie, p. 22.) We learn also that they had a treasury of their own at Olympia still existing in the days of Pausanias (Paus. vi. $19 . \$ 11$; Athen. xi. p. 479). Herodotus tells us that they paid par-
ticular honours to Aristeas, who was said to have appeared in their city 340 vears after he had disappeared from Cyzicus. They erected to him a statue in the middle of the forum, with an altar to Apollo surrounded by a grove of laurels. (Herod. iv. 15 ; Athen. xiii. p. 605, c.) From their coins they would appear also to have paid heroic honours to Leucippas, as the founder of their city. (Millingen, l.c. p. 24.) Strabo tells us, as a proof of their Pylian origin, that they continued to perform secrifices to the Neleidse. (Strab. vi. p. 264.)

The site and remains of Metapontum have been carefully examined by the Duc de Luynes, who has illustrated them in a special work (Métaponte, fol. Paris, 1833). It is remarkable that no trace exists of the ancient walls or the theatre of which Pausanias speaks. The most important of the still esisting monuments is a temple, the remains of which occupy a slight elevation near the right bank of the Bradanns, about 2 miles from its mouth. They are now known as the Tavola dei Paladini. Fifteen columns are still standing, ten on one side and five on the other ; but the two ends, as well as the whole of the entablature above the architrave and the walls of the cella, have wholly disappeared. The architecture is of the Doric order, but its proportions are lighter and more slender than those of the celebrated temples of Paestum: and it is in all probability of later date. Some remains of another temple, but prostrate, and a mere heap of rains, are visible nearly 2 miles to the S . of the preceding, and a short distance from the month of the Bradanus. This spot, called the Chiesa di Sansone, appears to mark the site of the city itself, numerous foundations of buildings having been discovered all around it. It may be doubted whether the more distant temple was ever included within the walls; but it is impossible now to trace the extent of the ancient city. The Torre di Mare, now the only inhabited spot on the plain, derives its name from a castellated edifice of the middle ages; it is situated above $1 \frac{1}{2}$ mile from the sea, and the same distance from the river Basiento, the ancient Casnentus. Immediately opposite to it, on the sea-shore, is a small salt-water basin or lagoon, now called the Lago di Sta. Pelagina, which, though neither deep nor spacious, in all probability formod the ancient port of Metapontum.

Metapontum was thus situated between the two rivers Bradanus and Casuentus, and occupied (with its port and appurtenances) a considerable part of the intermediate space. Appian speaks of "a river hetween Metapontum and Tarentum of the same name," by which he probably means the Bradanus, which may have been commonly known as the river of Metupontum. This is certainly the only river large enough to answer to the description which he gives of the meeting of Octavian and Antony which took place on its banks. (Appian, B. C. v. 93, 94.)

The coins of Metapontum, as already observed,

COD OF METAPOATTUK.
are very numerous; and many of the later ones of very beuutiful workmanship. Those of more ancient date are of the style called incuse, like the early coins of Crotona and Sybaris. The one in the annexed figure has on the obverse the head of the hero Leucippus, the founder of the city. But the more common type on the obverse is the head of Ceres.
[E. H. B.]
METARIS (Merapis, Ptol. ii. 3. § 6), an estuary in Britain; the Wach between Norfolt and Lincolnshire. [C.R.S.]
METAURUM (Mdravpos, Steph. B.), a city on the W. coast of Bruttium, at the month of the river of the same name. According to Stephanus of Byzantium, it was a colony of the Locrians, but seems never to have risen to any importance; amit its name is chiefly known because, according to some accounts, it was the birthplace of the poet Stesichorus, who was more generally regarded as a native of Himera. (Steph. B. e. v.; Suid. s. v. Ervaixopos.) Stephanus erroneously calls it a city of Sicily: but Saidas, who writes the name Matauria, correctly places it in Italy; and there can be no doubt that both mean the town at the month of the Metaurus, which is called by Latin writers Metaurum. Solinus ascribes its foundation to the Zanclaeans. Mela mentions it as if it were a still existing town; bat Strabo speaks only of the river Metanrus, with an anchorage or roadstead of the same name: and Pliny also notices the river ("Metaurus amnis ${ }^{n}$ ) without any mention of a town of the name. (Strab. vi. p. 256; Plin. iii. 5. s. 10, Mel. ii. 4. § 8; Solin. 2. § 11.)
[E. H. B.]
METAURUS (Méravpos). 1. A river of Umbria, flowing intw the Adriatic sea, near Fano, and one of the most considerable of the numerous streams whish in this part of Italy descend from the eastern declivity of the Apennines into the Adriatic. It is still called the Metauro or Metro; and has its sources in the high group of Apennines called the Monte Nerome, from whence it has a course of between 40 and 50 miles to the sea. It flows by Fossombrone (Forum Sempronii), and throughout the latter part of its course was followed by the great highroad of the Flaminian Way, which descended the valley of the Cantiano, one of the principal tributaries of the Metarrus, and emerged into the main valley of the latter river a few miles below the pass of Intercisa or Il Furlo. Its mouth is about 2 miles S. of Funo (Fanum Fortunae), but has no port; and the river iteelf is justly described by Silius Italicus as a violent and torrent-like stream. (Strab. v. p. 227; Plin. iii. 14. s. 19; Mel. ii. 4. § 5; Sil. Ital. viii. 449; Lucan, ii. 405.)

The Metaurus is celebrated in history for the great battle which was fought on its banks in B. C. 207, between Hasdrubal, the brother of Hannibal, and the Roman consuls C. Clandius Nero and M. Livius, in which the farmer was totally defeated and slain, battle that may be considered as the real turningpoint of the Second Punic War, and therefore one of the most important in history. (Liv. xxvii. 4651 ; Oros. iv. 18; Eutrop. iii. 18; Vict. de Vir. In 48; Hor. Carm. iv. 4. 38; Sil. ltal. vii. 486.) Unfortunately our knowledge of the topography and details of the battle is extremely imperfect. But we learn from Livy, the only author who has left us a connected narrative of the operations, that M. Livius was encamped with his army under the walls of Sena (i. e. Sena Gallica, now Sinigaglia), and Haedrubal at a short distunce from him. But as

METELI.INUM.
METHANA.
349
soon as the Carthaginian general discorered the arrival of Claudins, with an auxiliary furce of 6000 foot and 1000 horse, he broke up his camp and retreated in the night to the Metaurus, which was about 14 miles from Sena. He had intended to cross the river, bat missed the ford, and ascended the right bank of the stream for some distance in search of one, till, finding the banks steeper and higher the further he receded from the sea, he was compelled to halt and encamp on a bill. With the break of day the Roman arries overtook him, and compelled him to a general engagement, without leaving him time to cross the river. From this account it is clear that the battle was fought on the right bank of the Metaurus, and at no great distance from its mouth, as the troops of Hasdrubal could not, after their night march from Sena, have proceeded many miles up the course of the river. The ground. which is well described by Arsold from personal isspection, agrees in general character with the description of Livy; but the exact scene of the battle canoot be determined. It is, however, certainly an error to place it as high up the river as Foseombrone (Forum Seinpronii), 16 miles from the sea, or even, as Cramer has done, between that town and the puss of the Furlo. Both be and Vaudoncourt place the battle on the left bank of the Metaurus, which is distinctly opposed to the narrative of Livy. Appian and Zonaras, though they do not mention the name of the Betaurus, both fix the site of the Roman camp at Sena; but the former has confounded this with Sena in Etruria, and has thence transferred the whole theatre of operations to that country. (Appian, Aserib. 52; Conar. ix. 9; Arnold's Rome, vol. iii. pp. 364-374; Vaudoncourt, Campagnes d Annibal, vol. iii. pp. 59-64; Cramer's Italy, vol. i. p. 260.)
2. (Métavpos), a river of Bruttium, flowing into the Tyrrhenian sea, between Medma and the Scylluean promontory. It is mentioned both by Pliny and Strabo; and there can be no doubt that it is the river now called the Marro, one of the most considerable streans in this part of Bruttium, which flows into the sea about 7 miles S. of the Mesima, and 18 from the rock of Scilla. (Strab. vi. p. 256; Plin. iii. 5. s. 10; Romanelli, rol. i. p. 66.) There was a town of the same name at its mouth. [MetauRUM.]
[E. H. B.]
METELLI'NUM (It. Anton p. 416; Metelion, Geogr. Rav. iv. 44), or METALLI'NUM (Colonia Metallinensis, Plin. iv. 21. s. 35), a Roman colony of Lusitanis on the Anas, 24 Roman miles from Augasta Emerita, now Medellin. The modern town lies on the southern side of the river, so that the ancient town ought to have been included in Baetica. Hence some moderi writers have conjectured that the Anas may here have changed ite bed. The form of the name would lend to the supposition that the colouy was founded by Metellus, in which case Metellinum would be a more correct form than Metallinum.

METEON, a town of the Labeate, to which Gentias removed his wife and family. (Liv. xliv. 32 ; Medion, Geogr. Rav.) It may perhaps be represented by the village of Meterees in the Ricka district of Monte-Negro, to the N. of Lake Scutari. (Wilkinson, Dalmatiu, vol. i. p. 552.) [E. B. J.]

METHA'NA ( $\tau$ M Métava, Paus., Strab., et nlii ; Me日ívn*, Thuc. iv. 45 ; Diod. xii. 65 ; Me日hun,

[^18]Ptol. iii. 16. § 12 : Méthana), a striking rocky penincula, connected by a narrow isthmus with the territory of Troezen in Argolis, and containing a city of the same name. Pausanias describes Methana as an isthmus running far into the sea (ii. 34. § 1) ; Thacydides more correctly distinguishes between the isthmus and chersonesus (iv. 45); and Ptolemy also speaks of the chersonesus (iii. 16. § 12). The isthmus is only about 1000 feet broad, but it immediately spreads out equally on both sides. The outline of the peninsula is grand and picturesque. The highest mountain, called Chelona, which is 2281 (French) feet above the level of the sea, is of a conical form, and was thrown up by a volcano. The whole peninsula bears marks of volcanic agency. The rocks are compmed chiefly of that variety of lava called trachyte; and there are hot sulphureous springs, which were ased in antiquity for medicinal purposes. Pausanias speaks of hot baths at the distance of 30 stadia from the city of Methana, which were said to have first burst out of the ground in the time of Antigonus, son of Demetrius, king of Macedon, after a violent volcanic eruption. Pauxanias adds that there was no cold water for the use of the bather after the warm bath, and that he could not plunge in the sea in consequence of the sea-dogs and other monsters. (Paus. bc.) Strabo, in describing the same volcanic eruption to which Pausanias alludes, says that a hill 7 stadia high, and fragments of rocks as high as towers, were thrown up; that in the day-time the plain could not be approached in consequence of the heat and sulphureous smell, while at night there was no unpleasant smell, but that the heat thrown out was so great that the sea builed at the distance of 5 stadia from land, and its waters were troubled for 20 stadia (i. p. 59). Ovid describes, apparently, the same eruption in the lines beginning

## "Est prope Pittheam tumulus Troezena"

(Met. xv. 296), and says that a plain was upheaved into a hill by the confined air seeking vent. (Comp. Lyell's Principles of Geulogy, pp. 10, 11, 9th ed.) The French Commission point ont the site of two hot sulphareous springs; one called Vroma, in the middle of the north coast, and the other near a rillage Vromolimni, a little above the eastern shore. There are traces of ancient baths at both places; but the northern must be those alluded to by Pausanias.
The peninsula Methana was part of the territory of Troezen; but the Athenians took possession of the peninsula in the seventh year of the Peloponnesian War, B.C. 425, and fortified the isthmus. (Thuc. iv. 45.) There are still traces of an ancient fortification, renewed in the middle ages, and united by means of two forts. In the pemnsula there are Hellenic remains of three different mountain fortresses; but the capital lay on tho west coast, and the ruins are near the sinall village of the same name. Part of the walls of the acropolis and an ancient town on the north side still remain. Within the citadel stands a chapel, containing stones belonging to an ancient building, and two inscriptions on marble, one of which reters
so called in Macedonia." This form is now found in all the existing MSS. of Thucydides. But there can be no doubt that M\& $\theta$ ava, which has prevailed down to the present day, is the genuine Doric form of the name.
to Isis．This，accordingly，was the site of the tem－ ple of Isis，mentioned by Pausanias，who also speaks of statues of Hermes and Hercules，in the Agora （Leake，Morea vol．ii．p．453，seq．，Peloponnesiaca， p． 278 ；Boblaye，Kécherches，fc．p．59；Curtius， Peloponnesos，vol．ii．p．438，seq．）
METHO＇NE（Me日ف́rn，Steph．B．），a town of Pieria in Macedonia，on the Thermaic gulf，mentioned in the Periplus of Scylax（p．26），and therefore one of the Greek colonies established in early times on this coast．According to Plutarch（Quaest．Graec． p．293），a party of Eretrians settled there，who were called by the natives $\dot{a} \pi 0 \sigma \phi \in \nu \delta \delta o \eta^{2} \tau 0$, and who appear to have come there nearly at the same time as the occupation of Corcgra by the Corinthians B．C．730－720．

The town was occupied by the Athenians with a view of annoying Perdiccas，by ravaging his ter－ ritory，and affording a refuge to his discontented subjects．（Thuc．vi．7．）It appears to have been in 354－353 в．c．that Philip attacked Methone，the last remaining possession of Athens on the Mace－ donian coast．The position was a convenient station for Athenian privateers to intercept trading vessels， not merely to and from Macedonian ports，but also from Olynthus and Potidaca．The siege was vigo－ rously pressed by Philip；and the Methonaeans，who gallantly held out until all their means were ex－ hausted，were at length compelled to surrender． The inhabitants were allowed to depart with one garment；but the．walls were razed to the ground， and the land apportioned among Macedonian co－ lonists．Philip lost the sight of one eye in this siege． （Diod．xvi．31－34；Dem．Olynth．i．p．12，Philip． i．p．41，iii．p． 117 ；Plut．Pur． 8 ；Luc．de Scrib． Hist．38；Strab．vii．p．330；Justin．vii．6．）Mr． Grote（Hist．of Greece，vol．xi．pp．363，foll．，comp． p．488）is of opinion that this happened afterwards （в．c．348），at another place called Methone，situated in the Chalcidic peninsula，near Olynthus and Apol－ lonia．The epitomiser of Strabo（vii．p．330）places Methone at a distance of 40 stadia from Pydna． This statement does not agree with the position assigned by Leake（North．G＇reece，vol．iii．p．435） to Methone at Elefthero－khóri， 2 miles from the sea；but the Epitome is not much to be depended on in this passage．
［E．B．J．］
METHO＇NE．1．（Me日awn，Strab．；Mo日ćv ${ }^{\text {，Paus．，}}$ Scylax，p．17：Eth．Moempaios，Paus，iv．18．§ 1，and Coins；Me日wvactús，Steph．B．s．v．：Mothóni，Mo－ don），an ancient town in the SW．corner of Messenia， has always been an important place，both in ancient and in modern times，on account of its excellent harbour and salubrious situation．It is situated at the extreme point of a rocky ridge，which runs into the sea，opposite the island Sapienza，one of the group called in ancient times Oenussae．＂Off the outer end of the town，is the little insulated rock which Pausanias（iv．35．§ 1）calls Mothon，and which he describes as forming at once a narrow entrance and a shelter to the harbour of his time：it is now occupied by a tower and lantern，which is connected by a bridge with the fortification of Motkóni．A mole branches from it，which runs parallel to the eastern wall of the town，and forms a harbour for small vessels．It seems to be exactly in the position of the ancient port，the entrance into which was probably where the bridge now stands．＂ （Leake．）According to the unanimous testimony of the ancient writers（Strab．viii．p． 359 ；Paus．iv． 35．§ 1），Methone was the Homeric Pedasus，one
of the seven cities which Agamemnon offered to Achilles．（Hom．Il．ix．294．）Homer gives to Pedasus the epithet $\alpha \mu \pi \in \lambda$ be $\sigma \sigma a$ ，and Methone seems to have been celebrated in antiquity for the cnltivation of the vine．The eponymous heroine Me－ thone，is called the daughter of Oeneus，the＂wine－ man＂（Paus．L c．）；and the same name occurs in the islands Oenussae，lying opposite the city．The name of Methone first occurs in the Messenian warx Methone and Pylus were the only two places which the Messenians continned to hold in the second war， after they had retired to the mountain fortress of Ira．（Paus．iv．18．§ 1，iv．23．§ 1．）At the end of the Second Messenian War，the Lacedaemonians gave Methone to the inhabitants of Nauplia，who had lately been expelled from their own city by the Argives．（Paus．iv．24．§ 4，iv．35．§ 2．）The de－ scendants of the Nauplians continued to inhabit Methone，and were allowed to remain there even after the restoration of the Messenian state by Epaminondas．（Paus．iv．27．§ 8．）In the first year of the Peloponnesian War，B．c．431，the Athe－ nians attempted to obtain possession of Methone，but were repulsed by Brasidas．（Thuc．ii．25．）Methone suffered greatly from an attack of some Illyrian privateers，who，under the pretext of purchasing wine，entered into intercourse with the inhabitants and carried off a great number of them．（Pans．iv． 35．$\S \S 6,7$ ．）Shortly before the battle of Actiam， Methone，which had been strongly fortified by Antony，was besieged and taken by Agrippa，who found there Bognd，king of Mauretania，whom he put to death．（Dion Cass．1．11；Strab．viii．p．359； Oros．vi．19．）Methone was favoured by Trajan， who made it a free city．（Paus．iv．35．§ 3．）It is also mentioned by Mela（ii．3），Pliny（iv．5．s．7）， Ptolemy（iii．15．§ 7），and Hierocles（p．647）．

Pausanias found at Methone a temple of Athena Anemotis，the＂storm－stiller，＂and one of Artemis He also mentions a well of bituminons water，similar both in smell and colour to the ointment of Cyzicus， but of which no trace is now found．In 1124 Modon was conquered by Venice，but did not become a permanent possession of the republic till 1204. In the middle of the old Venetian piazza there still stands the shaft of an ancient granite column，about 3 feet in diameter and 12 feet high，with a bar－ barous base and capital，which appear to have been added by the Venetians，when they fixed upon the top of it，in 1493，a figure of the Lion of St．Mark． Five years afterwards it was taken by the Turks， and remained in their hands till it was recaptured by Morosini．In 1715 the Turks again took pos－ session of it，and retained it till the last Greek ro－ volution，when it was wrested from them by the French in 1828．Like other places in Greece， which have been continuously inhabited，Modom contains few ancient remains．Some Hellenic foun－ dations may be traced in the city－walls，and ancient sepulchres may be seen above the suburb．（Leake， Morea，vol．i．p．429．seq．；Boblaye，Récherches， fc．p． 113 ；Curtius，Peloponnesos，vol．ii．p．169， seq．）

2．A town of Thessaly，mentioned by Homer（IL． ii．716）as belonging to Pliloctetes．Later writers describe it as a town of Magnesia，but we have no further particulars respecting it．（Scylax，p．25； Strab．ix．p． 436 ；Plin．iv．9．8． 16 ；Solin．c． 14 ； Steph．B．e．v．）

3．More properly called Methana，a town and pen－ insula of Troezenia［Mifthana．］

METHORA (Méfopa, Artian, Indic. 8), a small state in the centre of India, which was sabject to the great tribe of the Prasii. It was situated near, if not upon, the Jomanes or Jumna (Plin. vi. 19. s. 22), and has, with much probability, been as. sumed to be on the site of the present Allahabad

METHURIADES (Mefovpidées), a groap of small islands, lying between Nissea, the port of Megara, and Salamis. (Plin.iv. 12. \& 19.) Strabo describes them, without mentioning their names, as five small islands, lying before Nissea to 2 person sailing into Attica (ix. p. 393). Stephanus B. (a. v.) loosely speaks of them as lying between Aegina and Attica.
METH Y'DRIUM (Medifopoy: Eth Meovópicis), a town in central Arcadiz, situate 170 stadia north of Megalopolis (Paus viii. 35. §5), obtained its name, like Interamna, from being situated upon a lotty height between the two rivers Maloetas and Mylion. (Paus. viii. 36. §§ 1.) It was founded by Orchomenus; bat its inhabitants were removed to Magalopolis, upon the establishment of that city. It dever recovered its former population, and is mentioned by Strabo (viii. p. 388) among the places of Arcedia which bad almost entirely disappeared. It continued, however, to exist as a village in the time of Pausanias, who saw there a temple of Posedion Hippius upon the river Mylaon. He also mentions, above the river Maloetas, a mountain called Thaumasium, in which was a cave where Rhee took refage when pregnant with Zens. At the distance of 30 stadia from Methydrium was a fountrin named Nymphasia (Paras. viii. 36. §§1-3, comp. viii. 12. § $2,27 . \S \S 4,7$.) Methydrium is also mentioned in the following passages: Thuc. r. 58; Polyb. v, 10, 11, 13; Plin. iv. 6. 8. 10; Steph. B. s. v.

There is some difficulty in determining the exact site of Methydrium. Some writers identify it with the Hellenic remnins called Palatia; but these are not on a lofy hill between two rivers, but in a low situation above the junction of the rivers on the right bank of one of them. Methydrium should rather be placed 45 minates further, at the distance of 10 miles SE. of the village of Nimnitza, where there are some ancient ruins, one between two streams, on a height below Pyrgo, otherwise called Pyrgiko. It is true that this also is not a lofty

 which means only a slight elevation. (Leake, Morea, vol. ii. P 57, Pelopmnesiaca, p. 201; Boblaye, Recherches, fc. p. 151 ; Ross, Reisen im Peloponnce, p. 116; Cartius, Peloponneeas, vol. i. p. 309.)

METHYMNA (Mhevuva, and on coins Méevuva, MA日vuva: Eth. M M $\theta$ vuvaios), $a$ town in Lesbos, the most important next after Mrtilingz It was situated on the northern shore of the island, where a channel of 60 stadia (Strab. xiii. p. 618) intervened between it and the const of the mainland near Assos.

One of the earliest notices of the Methymnaeans is the mention of their conquest of Arisba, another town of Lesbos, and their enslaving of its citizens. (Herod i. 151.) The territory of Methymna seems to have been contiguous to that of Mytilene, and this may have been one cuuse of the jealousy between the two cities. The power and fame of Mytilene was on the whole far greater; but in one period of the history of Lesbos, Methymna enjoyed greater prosperity. She did not join the revolt of
the other Lesbians from Athens in the Peloponnesian War (Thac.iii. 2, 18), and she was therefore exempted from the severe punishment which fell on Mytilene. (Thuc. iii. 50.) Hence she retained the old privilege of furnishing a naval contingent instead of a tribute in money. (Thuc. vi. 85, vii. 57.) Shortly before the battle of Arginnsae, Methymna fell into the power of the Lacedsemonians, and it was on this occasion that the magnanimons conduct of Callicratidas presented so remarkable a contrast to that of the Athenians in reference to Mytilene. (Xen. Hellem i. 6 . § 14.) After this time Methymna seems to havo become less and less important. It comes into notice, however, in every subsequent period of history. It is mentioned in the treaty forced by the Romans (B.c. 154) botween Attalus IL. and Prusias II. (Polyb. xxxiii. 11.) It is stated by Livy (xlv. 31) and by Pliny (V. 31) to have incorporated the inhabitants of Avrisen with its own. Its coins, both antooornous and imperial, are numerous. It was honourably distinguished [ 500 Lzsbos] for its resistance to the Mahowedans, both in the 12th and 15th centaries; and it exists on the same spot at the prosent day, under the name of solivo.
We have no information concerning the buildings and appearance of ancient Methymna. It eridently posesessed a good harbour. Its chief fame was connectod with the excellent wine producod in its neighboarhood. (Virg. Georg. ii. 90; Orid, Ath $A \mathrm{~m} . \mathrm{i}$ 57; Hor. Sat. ii. 8. 50.) Horace ( $O$ di. i. 17. 21) calls Lesbian wine "innocens;" and Athenaeus (ii. p. 45) applies the epithet cjocto 1 axos to 2 sweet Lesbian wine. In another place (i. p. 32) he describes the medicinal effect of the wine of this island. (Soe also i. pp. 28, 29; and Aul. Gell. xiii. 5.) Pliny says (xiv. 9) that it had a salt taste, and apparently mentions this as a merit. Pausanias, in his account of Delphi ( x .19 ), tellis a story of some fishermen of Methymna dragging in their nets oat of the sea a rude image of Bacchus, which was afterwards worshipped.

Methymna was the birthplace of the poet and musician Arion. Myrrilus also, who is said to have written a history of Lesbos, is sapposed to have been born here.
[J. S. H.]

## COIS of methymena.

METHYMNA ( $M \eta \theta\langle\mu \nu \eta$ ), a city in Crete, near Rhocca, which Aelian (N. A. xiv. 20) mentions in connection with a carious ators respecting a remedy fir hydrophobia discovered by a Cretan fisherman. Mr. Pashley (Trav. vol. ii. p. 40) considers that the remains near the chapel of Highios Gebrghios, by
Nopta, on the extreme eater Nopfa, on the extreme eastern edge of the plain of Kisomo. kastefli, represent Methymna. [E. B. J.]
METINA INSULA. [RHodANUs.]
METIOSEDUM. [MELODUNUM.]
ME'TORES (Méropess, Ptol. vi. 4. § 3), a branch of the great robber tribe of the Mardi, who rere Maituopes. Maícopes.

METROPOLIS (M MTpómodıs: Eth. Mntpor
$\lambda(\tau \eta$ s.) 1. A town in the Caystrian plain in

Lydia, on the road from Smyrna to Ephesus, at a distance of 120 stadia from Ephesus, and 180 from Smyrna. The district of Metropolis produced excellent wine. (Strab. xiv. pp. 632, 637; Ptol. v. 2. § 17 ; Steph. B. s. v.; Plin. v. 31; Hierocl. p. 600.) Near the modern village of Tourbuli, no doubt a corruption of the ancient name Metropolis, some ruins are still seen; and as their distance from Smyrna and Ephesus agrees with that mentioned by Strabo, there can be no hesitation in identifying the place. (Comp. Arundell, Seven Churches, p. 22, \&ec.; Hamilton, Researclies, i. p. 642; Rasche, Lexic. Num. iii. 1, p. 633, \&cc.)
2. A town in the north of Phrygia, and, as the name seems to indicate, the capital of the ancient kings of Phrygia, though Stephanus Byz. (s. v.) derives the name from the mother of the gods. It was situated to the north of Synnada (Athen. xiii. p. 574.), and must not be confounded with another town of the same name in the south of Phrygia. Its site is, in all probability, indicated by the ruins of Pismesk Kalasi, north of Doganlu, which show a very antique style of architecture, and mainly consist of tombs cut into the rocks; one of these tombs is that of king Midas. Leake (Asia Minor, p. 24) is inclined to think that these ruins mark the site of Nicoleia; but other travellers, apparently with more justice, identify them with Metropolis. (Franz, Fünf Inschriften, p. 42.) From the extent of the ruins, it would seem that in the time of the Roman emperors Metropolis was an important town ; bat afterwards it declined, though it is still mentioned by Hierocles (p.677.)
3. A town in the southern part of Phrygia, belonging to the conventus of Apamea. (Plin. v. 29.) That this town is different from No. 2, is quite evident, even independently of the fact that Stephanus B. mentions two towns of the name of Metropolis in Phrygia, and that Hierocles and the Notitiae speak of a town of this name in two different provinces of Phrygia. (Hierocl. p. 673; Strab. xii. p. 576, xiv. p. 663; Liv. $\operatorname{xxx}$ viii. 15.)
[L. S.]
METRO'POLIS (MŋTpoкo入ıs, Ptol. iii. 5. § 28), a town of European Sarmatia, on the Borysthenes, near Olbia.
[E. B. J.]
METRO'POLIS (Mitробтолıs : Eth. Мұтрожоdín!s). 1. A town of Histiaeotis in Thessaly, described by Stephanus B. (s. v.) as a town in Upper Thessaly. Strabo says (ix. p. 438), that Metropolis was founded by three insignificant towns, but that a larger number was afterwards added, among which was Ithome. He further says, that Ithome was within a quadrangle, fcrmed by the four cities Tricca, Metropolis, Pelinnaeum, and Gomphi. The position of Metropolis is also determined by its being on Caesar's march from Gomphi to Pharsalus. (Caes. B C. iii. 81 ; Appian, B. C. ii. 64 ; Dion Cass. xli. 51.) It was taken by Flamininus on his descending into this part of Thessaly, after the battle of the Aous, B. C. 198. (Liv. xxxii. 15.) We learn from an inscription that the territory of Metropolis adjoined that of Cierium (the ancient Arne), and that the adjustment of their boundaries was a frequent subject of discussion between the two peoples. [Cikrium.] Metropolis is mentioned in the sixth century by Hierocles (p. 642), and continued to exist in the middle ages under the name of Neo-Patrae (Néal Md́pal, Constant. de Them. ii. p. 50, ed. Bonn). The remains of Metropolis are placed by Leake at the amall village of Paleóhastro, about 5 miles SW. of Kardlitza. The city was of
a rircular form, and in the centre of the circle are the vestiges of a circular citadel, part of the wall of which still exists in the yard of the village charch of Paleoikastro, where is a collection of the sculptured or inscribed remains found upon the spot within late years. Among other sculptures Leake noticed one in low relief, representing a figure seated upon a rock, in long drapery, and a mountain rising in face of the figure, at the foot of which there is a man in a posture of adoration, while on the top of the mountain there are other men, one of whom holds a hog in his hands. Leake conjectured with great probability that the seated figure represents the Aphrodite of Metropolis, to whom Strabo says (L. c.) that hogs were offered in sacrifice. (Leake, Northern Greece, vol. iv. p. 506.)
2. Another town in Thessaly, which Stephanus B. calls simply a town in Thessaly. This appears to be the Metropolis mentioned by Livy in his account of the campaign of Antiochus, in B. c. 191, where it is related that the Syrian king having landed at Demetrias, first took Pherae, then Crannon, then Cypaera, Metropolis, and all the neighboaring fortresses, except Atrax and Gyrton, and afterwards proceeded to Larissa (Liv. xxxvi. 10.) From this account it would appear that this Metropolis was in Perrhaebia; and its site has been discovered by Leake, near that of Atrax, at a place called Kastri, where the name of Mirporo八irns occurs in an inscription. (Leake, Northern Groece, vol. iii. p. 371 .)
3. (Lygovitzi), a town in the interior of Acarnania, S. of Stratus, and on the road from the latter place to Conope in Aetolia. At a later time it fell into the hands of the Aetolians, but was taken and burned by Philip in his expedition against the Aetolians, B. C. 219. It is mentioned as one of the towns of Acarnania, in a Greek inscription found at Actium, the date of which is probably prior to the time of Augustus. (Polyb. iv. 64; Steph. B. s. v.; Böckh, Corpus Inscript. No. 1793 ; Leake, Northern Greece, vol. iii. p. 5if.)
4. A town in Amphilochia, near Olpae. (Thuc. iii. 107.) As to its site, see Argos Ayrhilochicum.
5. A town of Doris. (Steph. B. 8. v.)
6. A town of Euboea. (Steph. B. s. v.)

METULUM. [IAPodes, Vol. II. p. 3, b.]
MEVA'NIA (Mnovavia, Strab., Ptol.: Eth. Mevanas, ātis: Bevagna), a considerable city of Unibria, on the Flaminian Way, between Carsulae and Fulginium. It was situated on the river Tinia, in a broad and fertile valley, which extends from the neighbourhood of Spoletium to the Tiber, separating the main chain of the Apennines from a lateral mass or offshoot of the same range, which extends from Mevanis and Spoletium to Tuder and Ameria. It is this valley, about 8 or 10 miles in breadth, watered by the Clitumnus and Tinia, with several tributary streams, the pastures of which were celebrated for their breed of white oxen, the only ones thought worthy to be sacrificed as victims on triumpbal and other solemn occasions. Hence their praises are not less frequently associated with the name of Meranis than with that of the Clitumnus. (Colum. iii. 8. Sil. Ital. vi. 647, viii. 458; Lucan, i. 473.) Mevania appears to have been an important place before the Roman conquest of this part of Italy. In B. C. 308 it was chosen by the Umbrians as the headquarters of their assembled furces, where they were defeuted by Q. Fabius. (Lir. ix. 41.) At a much
later period it was occupied by the emperor Vitellius, with the intention of defending the passes of the Apennines against the generals of Vespasian, but he quickly abandoned it again, and retired to Rome. (Tac. Hise. iii. 55, 59.) As it was situated in the plain, it could scarcely be a very strong fortress; but Pliny notices it as one of the few cities of Italy that had walls of brick (xxxv. 14. 8.49). Strabo speaks of it as in his time one of the most considerable towns in the interior of Umbria: it was only of municipal rank, but seems to have continued a flourishing place throughout the period of the Empire. (Strab. v. p. 227; Plin. iii. 14. s. 19; Ptol. iii. 1. § 54; Itin. Ant. p. 311 ; Orell. Inscr. 98.) The modern Beoagna is a very poor and decayed place, with little more than 2000 inhabitants, though retaining its episconpal see, and the title of a city. It contains some remains of an amphitheatre, and mossic pavements which belonged to the ancient Thermue. (Calindri, Slat. del Pontif. Stato, p. 104.)

Mevania appearn to be indicated by the poet Propertius himself as the place of his birth (iv. 1. 123), though others understand this passage differently, and regard Hispellum as having the better claim. (Barth. Vit. Propert. ; Kuinoel, ad L.c.) It was noted for the fogs to which it was subject. (Propert. l.c.; Sil. Ital. vi. 646.) Pliny speaks of its territory (Mevanas ager, xiv. 3. § 37) as producing a particular kind of vine, which he calls Irtiola; probably the saine now called "Pizzotello," for which the district is still celebrated. (Harduin, ad loc.; Kampoldi, Cirografia, vol. i. p. 233.) [E.H.B.]

MEVANIOLA. [Umbria.]
miacokus or Mil.CORUS (Miaxcopos, Minncopos; The 1 pomp. ap. Steph. B. s. v.), a place which may be assigned to the interior of Chalcidice. (Leake, North. Greece, vol. iii. p. 456.) [E. B. J.]

MBA, in Britain, sapposed inore correctly Mida, is placed in the Ravennax's Chorography among the towns in the south of Britain. It has been conjectured that Milhurst, in Sussex, is its modern representatire; but this supposition is not warranted by existing remains.
[C. R. S.]
MICHMAS (Maxuds, LXX. ; Maxud, Joseph., Euseb.), a city of the tribe of Benjamin, eastward from Bethel or Bethaven (1 Sam. xiii. 5), held by the Philistines, while Saul and the Israelites were in Gibeah. It was on the line of march of an invading army from the north, and the Assyrians are represented as depositing their baggage there when advancing against Jerusalem. (Isaiah, x. 28.) It is placed by Eusebius and St. Jerome in the borders of Aclia, and was then a considerable village, retaining its ancient name, 9 miles from Aelis, near Rama. (Onomast. e.v.) The same description exactly applies to it at the present day. It is 3 hours distant from Jerusalem, nearly due north. Mülhmas stands on a low ridge between two sinall Wailys running south into the much larger valley named Wudy es-Swinit. It bears marks of having been a much larger and stronger place than any in the vicinity. There are many foundations of hewn stones, and some columns among them. The Wady es-Swinit is "the Passage of Michmash" spoken of in 1 Samuel (xiii. 23), and Isaiah (x.29). It is an extremely steep and rugged valley, which commences in the neighbourhood of Bethel, and a little below (E.) Mükhinás contracts between perpendicular precipices.

The rocks Bozez and Seneh, mentioned in connection with Jonathan's exploit (1 Sam. xiv. 4), vole IL.
may still be recognised in two conical rocky knolls prujecting into the valley between Jeba' (ancient Gibeah) and Mükhmás. (Rnbinson, Bibl. Res. vol. ii. pp. 116, 117.) In the Talmud the soil of Michmatsh is celebrated for its fertility. (Reland, Palaestina, s. v. p. 897.)
[G. W.]
MIDAEIUM or MIDAIUM (Miסáeiov). a town in the NE. of Phrygia, on the little river Bathys, on the road from Dorylaeum to Pessinus, and belonging to the conventus of Synnada. (Steph. B. e.v.; Plin. v. 32. s. 41 ; Ptol. v. 2. § 22 ; Strub. xii. p. 576 ; Hierocl. p. 678, where it is wrongly called Me ס́aiov.) The town, as its name indicates, must have been built by one of the ancient kings of Phrygia, and has become celebrated in history from the fact that Sextus Pompeius, the son of Pompey the Great, was there taken prisoner by the generils of M. Antony, and afterwards put to death. (Dion Cass. xlix. 18.) It has been supposed, with some probability, that the town of Mygdum, mentioned by Ammianus Marcellinus (xxri. 7), is the same as Midaeium.
[L. S.]
MIDEIA or MIDEA. 1. (Mícia, Paus.; Mióéa, Strab.: Eth. Miठfátทs), an ancient city of the Argeia, was originally called Persepolis (Mepotwo $\pi \delta \lambda i s$, Steph. B. s. v. Mídeta), and is mentioned by Apollodoras (ii. 4. §4) in connection with this hero. It was said to have derived its name from the wife of Electryon, and was celebrated as the residence of Electryon and the birthplace of his daughter Alcmena. (Paus. ii. 25. § 9; Schol. ad Pind. Ol vii. 49.) But it is mentioned in the parliest division of the country, along with the Heraeum and Tiryns, as belonging to Proetus. (Paus. ii. 16. § 2.) It was the residence of Hippodameia in her banishment. (Paus. vi. 20. § 7.) It was destroyed by Argos, probably at the same time as Tiryns, soon after the Persian wars. (Paus. viii. 27. § 1; Strab. viii. p. 373.)

Strabo describes Midea as near Tiryns; and froin its mention by Pausanias, in connection with the Heraeum and Tiryns, it must be placed on the eastern edge of the Argeian plain; but the only clue to its exact position is the statement of Pausaniks, who says that, returning from Tiryns into the ruad leading from Argos to Epidaurus, "you will reach Mideia on the left" (ii. 25. § 9 ).

Two different sites have been assigned to Mideia. The French Commission place it at the Hellenic remains at Dendrá, 5h gengraphical miles direct E. by N. from the citadel of Argos, as this place lies to the left of the road from Argos to Epidauras. Bat Leake objects, that the distance of Dendra from this road - more than 3 geogra. phical miles - is greater than is implied by the words of Pausaniss. He therefore places Mideia at the Hellenic remains near Katzingri, 2 geographical miles due E. of Tiryns. The objection to the latter site is that it lies to the right of the road from Argos to Epidaarus, from which it is separated by a deep ravine. The ruins at Dendra stand upon a hill almost inaccessible on three sides, enclosed by four different walls, one above another, In one of them is a gateway formed of three pieces of stone, resembling the smaller gateway of the citadel of Mycenae. The ruins descend from the summit to a fountain, which springs out of a grotto near a chapel of the Panaghia. The surrounding meadows afford good pasture for horses, and thus illustrate the epithet of Statius (Theb. iv. 44)
＂aptior armentis Midea，＂and the selection of this place as the residence of the horse－loving Hippo－ dameia in her banishment．（Boblaye，Récherches， Gc．p．52；Leake，Peloponnesiaca，p．268；Curtius， Peloponnesos，vol．ii．p．395．）

2．A city of Boeotio．［Lebadeia．］
MIDIANl＇TAE（Maסiavital），the descendants of Midian，one of the sons of Abraham by Keturah， whom the patriarch is said to have sent away during his lifetime．＂eastward，unto the east country＂ （Gen．xxv．2，6），and whom we subsequently find reckoned among＂the children of the east．＂（Judg． vi．3．）In the third generation after Abraham they were a distinct people，trading between Gilead and Egypt；but are associated with，or confounded with，another Arab family，the Ishmaelites．（Gien． Ixxviii．25，28．36．）

The Midianites were probably a Bedawi tribe， and their situation may be pretty accurately de－ termined，by the following notices，to the territory afterwards occupied by the Nabatiei，to the south and east of Palaestine．Mases fed the sheep of Jethro，a priest of Midian．in the peninsula of Mount Sinai，and about Mount Horeb（Exod．iii．1）；sub－ sequently Jethro came to his son－in－law from the land of Midian，while Israel was encamped in the vicinity of Horeb（xviii．2，\＆c．）；and Moses was glad to avail himself of his local knowledge while traversing the desert to the north of the peninsula． （Numb．x．29－32）．The close alliance between the Midianites and the Moabites，to oppose the pro－ gress of Israel，indicates the proximity of the two peoples：and the hostility of the former proves that the alliance of Moses with one of their family did not conciliate the national feeling．（Numb．xxii．4，7， xxv．xxxi．8－12 ；Josh．xiii．21．）

The Midianites continued the bitter enemies of the Israelites throughout the period of the Judges， when，in concert with＂the Amalekitex and the children of the east，＂they invaded simultaneously， and in countless numbers，the southern frontier towards Gaza and the trans－Jordanic tribes in Gilead and Bashan（ $J u d g$ ．vi．vii．），from whence they extended their ravages to the west，and north as far as the contines of Naphthali and Asher．After their signal defeat by Gideon，they disappear from the records of history，but their slaughter became proverbial．（Psalm lxxxiii．9； Isaiuh，ix．4，x．26．）

The country of the Midianites，however，had still a traditionary recollection：and subsequent no－ tices，consistently with the firegoing，place them between Edom and Paran，which bordered on Egypt （ 1 Kings，xi．17，18），in the country afterwards comprehended under the name of Idumaea，and still later assigned to the Saraceni．Indeed Josephus （Ant．iv．7．§ 1）asserts that Petra，the capital of Arabia（i．e．Idumaea）．was called by the natives Arecemé（＇Apeke $\mu \dot{\eta}$ ），from the Midianitish king Rekem，one of the five slain by Moses．（Numb． xxxi．8．）Eusebius and St．Jerome mention a city Madian，so named after one of the sons of Abraham by Keturah，situated beyond Arabia（i．e．Idumaea） to the south，in the desert of the Saracens，by the Red Sea，from which the district was called；and another city of the same name near the Arnon and Arenpolis；the ruins of which only existed in their days．（Onomast．s．v．；comp．Hieron．Comm．ad Jes． 1x．and Ezech．xxv．）

The situation of these two cities would define the limits of the territory of the Midianites in
their most palmy days．The funner of these two cities is doubtless that mentioned by Josephus （Ant．ii．11．§ 1）under the name of Madiene （Maסın访），situated at the Red Sea，and is properly identified by Reland as the modern Mi－ dyan（the Madian of Abulfeda），identical with the Mudiana of Ptuleng．（Reland，Paluestina，pp． 98 －100．）It is situated about half－way down the eastern coast of the Elanitic gulf．（Forster， Geog．of Arabia，vol．ii．p． 116 ；and see the refe－ rences in his index under Midian．）［G．W．］

MIEZA（Mítja：Eth．Mie（aios，MieSeús），a Macedonian city，the position of which it is most difti－ult to ascertain．Stephanus of Byzantium（s．v．）， on the authority of Theagenes，assigns to an epony－ mous founder，Mieza，a sister of Beroea，and grand－ daughter of Macedon：this legend implies that it was an important city．From the name it would seem most natural to liok for it in the neighbourhood of Beroea，which agrees with Ptolemy（iii．13．§ 39）， who classes it among the cities of Emathia．Ste－ phanus，on the other hand，still deriving his in－ formation apparently from Theagenes，alludes to it as a $\tau \delta \pi o s \sum \tau \rho v u d r o s$, and adds that it was some－ times called Strymoninm．Alexander the Great established an Aristotelian school at Mieza（Plut． Alex．M．7）；ard it was famed for a stalactitic cavern．（Plin．xxxi．2．s． 20 ；Leake，North．Greece， vol．iv．p．583．）
［E．B．J．］
MIGDOL，a Hebrew word signifying＂a tower，＂ and used as a complement of several proper names of places in Holy Scripture．

1．Migdol－Eider，translated in Geen．xxxp． 21 （ $\mathbf{v} .16$ in LXX．），tov̀ miphou 「a $\delta \dot{\epsilon} \rho$ ，Auth．Ver． ＂the tower of Eder；＂and in Micah，iv．8．，múpyos поцдעiou，Auth．Ver．＂tower of the flock＂（marg． ＂Edar＂）．From the first cited passage，it would appear to have been near Bethlehem ；and St．Jerome mentions a shepherd＇s tower a mile from Bethlehem， so called，as he suggests，in prophetic anticipation of the angelic announcement of the Nativity．（Ono－ mast．s．v．；Reland，Palaestina，s．v．p．898．）

2．Migdol－El，a town in the tribe of Naphthali （Josh．xix．38），where the LXX，running two names together，read M $\epsilon$ 子a入aapi $\mu$ for＂Mirdal－el， Horem．＂Eusebius and St．Jerome mention it as a large village named Magdiel，ix．M．P．（St．Jerome writes $\begin{gathered}\text { M．P．P．）from Dura on the road to Ptolemais，}\end{gathered}$ pribably identical with the modern EL－Mejidel，in the plain of Esdraclon，a little to the SW．of Shefo ＇Amar，which is，however，more remote than even Fusebius states from Dora，i．e．the inodern Tantura． Neither could this have any connection with the Migral－el of Naphthali，as Reland，in acreement with his two authors，srems to imacine，seeing it was situated in the tribe of Asher or Issachar． （Reland，Pralaestina．p．898．）The Magdala of Galilee（now $E: /-\mathrm{M} f \mathrm{j} d \mathrm{ll} \mathrm{l}$ ）is much more probably the Migdal－el of Naphthali．［Magdala．］

3．Miginit－gad（Mayada入 rad．LXX．），a city of the trithe of Judah．（Josh．xv．37．）

4．Meddal－senva，comtupted to Meqá入ך Vevpd in Eusebius（Onomest．s．v．Senna），which，how－ cver．St．Jerome＇s translation enables us to correct to
 There is yet another corruption of the Greek cor－ rected in the Latin；the former having $\delta$ poov $\boldsymbol{\tau} \boldsymbol{\eta} s$ ＇I $\delta o v u a i a s$, the latter，correctly，＂terminus Judae．＂ A village of this name existed in their days 7 miles north of Jericho．
［G．W．］
MIGONLLM．［Grthicm．］

MIGRON，a town in the tribe of Benjamin，men－ ticned in 1 Samuel，xiv． 2 （where the I．NX．reads Marobay）as in the extreme borter of Gibeah， celebrated for its pomegranate tree；and connected with Aiath（probably Ai）in Isauch，x． 28 （where the LXX．rads Maryejó）．Its site has not been recovered in modern times．Dr．Robinson remarks， ＂Migron must have been situated between Leir Jiicen and Michmash；＂and so the line of the Assyrian march in Isaiah would seem to require． But the passace in Samuel implies that it was S．of Michmash，which was then occupied by the Philistine garrison，watched by the Israelites in Gibeah，which lay to the S ．of＂the passage of Michmash，＂and with which Migron is connected． （Robinson，Bibl．Res．vol．ii．p．149．）［G．W．］

MILETO＇POLIS（Mı入ךтóno入is），a town in the north of Mysia，at the confluence of the rivers Ma－ cestus and Rhyndacus，and on the west of the lake which derives its name from it．（Strab．xii．p．575， xiv．p．681；Steph．B．s．v．；Plin．v．32，40．） Some modern gengraphers，as D＇Anville and Man－ nert have identified Miletopolis with the modern Beli Kessr or Balikesri，but this place is situsted too far S．Leake，too，seems to place Miletopolis too far SW．of the lake，and identifies it with Mi－ nins，which others regard as the site of the ancient Poemanenum．The must probable view is，that the site of Miletopolis is marked by the modern Moalitsh or Muhalitsch，or by the place Hamandi，near which many ruins of an ancient town are found． （Hamilton，Researches，fc．，vol．i．p．81．\＆ec．，vol．ii． p．91．）
［L．S．］
MLLETOPOLI＇TIS LACUS（Mı入ŋтoumo入ítis $\lambda_{i}(\mu \nu \eta)$ ，a lake in the north－west of Mysia，deriving its name from the town of Diletopolis，near its western shore．（Strab．xii．pp．575，576．）Ac－ cording to Pliny（v．40）the lake also bore the name Artynia，and probably confounding the river Tar－ sius with the Khyndacus，be erroneously describes the latter river as having its origin in the lake， whereas，in fact，the Rhyndacus enters the lake in the south，and issues from it in the north．It now bears the name of the lake of Maniyas（Hamilton， Researches，fic．，vol．ii．p．105，Rec．）
［L．S．］
 once the most flourishing city of Ionia，was situated on the northern extrenity of the peninsula formed， in the south－west of the Latmicus Sinus，by Mount Grion．The city stood opposite the mouth of the Maeander，from which its distance amounted to 80 stadia．

At the time when the Imian colonies were planted on the coast of Asia Minor，Miletus already existed as a town，and was inhabited，according to Herodotus（i．146），by Carians，winile E． F i．orus（ap． Strab．xiv．p．634）related that the original inhabitants had been Leieges，and that afterwards Sarpedon in－ troduced Cretan settlers．The tatimony of Hero－ dotus is bom out by the Homeric poems，in which （Il．ii．867）Miletus is spoken of as a place of the Carians．That the place was successively in the hands of different tribes，is intimated also by the fact mentioned by Pliny（v．30），that the carlier names of Miletus were Lelegeis，Pityusa，and Anac－ toria．（Comp．Pans．vii．2．§ 3；Steph．B．s．v．） On the artival of the Ionians，Neleus，their leader， with a band of his followers，took forcible possension of the town，massacred all the men，and tork the wornen for their wives，－an event to which certain social custums，regulating the intercourse between
the sexes，mere traced by subsequent generations． It appears，however，that Neleus did not uccupy the ancient town itself，but built a new one on a site somewhat nearer the sea．（Strab．l．c．）Tombs，forti－ fications，and other remains，attributed to the ancient Leleres，were shown at Miletus as late as the time of Strabo（xiv．p．611；comp．Herod．ix．97）．As in most other colonies the Ionians had amalgamated with the ancient inhabitants of the country，the Milesians were believed to be the purest representa－ tives of the Ionians in Asia．Owing to its excellent situation，and the convenience of four harboars，one of which was capacious enough to contain a fleet， Miletus soon rose to a great preponderance among the Ionian cities．It became the most powerful maritime and commercial place；its ships sailed to every part of the Mediterranean，and even into the Atlantic；but the Milesians turned their attention principally to the Euxine，on the coasts of which，as well as elsewhere，they founded upwards of 75 colonies．（Plin．v． 31 ；Senec．Cons．ad Helv．6； Strab．xiv．p．635；Athen．xii．p．523．）The most remarkable of these colonies were Abydos，Lamp－ sacus，and Parium，on the Hellespont；Proconnesus and Cyzicus on the Propontis；Sinope and Amisus on the Euxine；while others were founded in Thrace， the Crimea，and on the Borysthenes．The period during which Miletus acquired this extraordinary power and prosperity，was that between its occu－ pation by the Ionians and its conquest by the Per－ sians，в．c． 494.

The history of Miletus，especially the earlier por－ tion of it，is very obscure．A tyrannis appears to have been established there at an early time；after the overthrow of this tyrannis，we are told，the city was split into two factions，one of which seems to have been an oligarchical and the other a demo－ cratic party．（Plut．Quaest．Gr．32．）The former gained the ascendant，but was obliged to take ex－ traordinary precautions to preserve it．On another occasion we hear of a struggle between the wealthy citizens and the commonalty，accompanied with horrible excesses of cruelty on both sides．（Athen． xii．p．524．）Herodotus（v．28）also speaks of a civil war at Miletus，which lasted for two genera－ tions，and reduced the people to great distress．It was at lencth terminated by the mediation of the Persiuns，who seem to have committed the govern－ ment to those landowners who had shown the greatest moderation，or had kept aloof from the contest of the parties．All these convulsions took place within the period in which Miletus rose to the summit of her greatness as a maritime state．When the kingdom of Lydia began its career of conquest， its rulers were naturally attracted by the wealth and prosperity of Miletus．The first attempts to con－ quer it were made by Ardys，and then by Sadyattes， who conquered the Milexians in two engagements． After the death of Sadyattes，the war was continued by Alyattes，who，however，concluded a peace，he－ cause he was taken ill in consequence，it was be－ lieved，of his trows having burnt a temple of Athena in the territory of Miletus．（Herod i．17，\＆c．）At this time the city was governed by the tyrant Thra－ sybulus，a friend of Periander of Corinth（Herod．v． 92），and a crafty politician．Subsequently Mietus seems to have concluded a treaty with Crossus， whose sovereignty was recognised，and to whom tribute was paid．

After the conquest of Lydia by the Persians， Miletus entered into a simular relation to Cyron
as that in which it had stood to Croesus, and was thereby saved from the calamities inflicted upon other Ionian cities. (Herod. i. 141, \&cc.) In the reign of Darius, the Ionians allowed themselves to be prevailed upon by Histiseus and his unscrupulous kinsman and successor openly to revolt against Persia, b. c. 500. Miletus having, in the person of its tyrant, headed the expedition, had to pay a severe penalty for its rashness. After repeated defeats in the field, the city was besieged by land and by sea, and finally taken by storm b.c. 494. The city was plundered and its inhabitants massacred, and the survivors were transplanted, by order of Darius, to a place called Ampe, near the month of the Tigris. The town itself was given up to the Carians. (Herod. vi. 6, \&c. ; Strab. xiv. p. 635.)

The battle of Mrcale, in B. c. 479, restored the freedom of Miletus, which soon after joi ed the Athenian confederacy. But the days of its greatness and glory were gone (Thuc. i. 15, 115, \&c.) ; its ancient spirit cf liberty, however, was not, yet extinct, for, towards the end of the Peloponnesian War, Miletus threw off the yoke imposed upon her by Athens. In a battle fought under the very walls of their city, the Milesians defeated their opponents, and Phrynichus, the Athenian admiral, abandoned the enterprise. (Thuc. viii. 25, \&cc.) Not long after this, the Milesiars demolished a fort which the Persian Tissaphernes was erecting in their territory, for the purpose of bringing them to subjection. (Thuc. viii. 85.) In в.c. 334, when Alexander, on his Eastern expedition, appeared before Miletus, the inhabitants, encouraged by the presence of a Persian army and fleet stationed at Mycale, refused to submit to him. Upon this, Alexander immediately commenced a vigorous attack apon the walls, and finally took the city by assanlt. A part of it was destroyed on that occasion ; but Alexander pardoned the surviving inhabitants, and granted them their liberty. (Arrimn, Anab. i. 18, \&cc.; Strab. l.e.) After this time Miletus continued, indeed, to flourish as a commercial place, but was only a second-rate town. In the war between the Rumans and Antiochus. Miletus sided with the former. (Liv. xxxvii. 16, xliii. 6.) The city continued to enjoy some degree of prosperity at the time when Strabo wrote, and even as late as the time of Pliny and Pausanias. (Comp. Tac. Ann. iv. 63, 55.) From the Acts ( $x x .17$ ), it appears that St. Paul stayed a few days there, on his return from Macedunia and Troas. In the Christian times, Ephesus was the gee of a bishop, who occupied the first rank among the bishops of Caria; and in this condition the town remained for several centuries (llieroct. p. 687; Mich. Duc. p. 14), until it was destroyed by the Turks and other barbarians.

Miletus, in its best days, consisted of an inner and an outer city, each of which had its own fortitications (Arrian L.c.), while its harhours were proteeted by the group of the Tragusaean islands in front of which Lade was the largest. Great and beautiful as the city may have been, we have now no means of forming any idea of its topography, since its site and its whole territory have been changed by the deposits of the Maeander into a pestitential swamp, covering the remains of the ancient city with water and mod. Chandler, and other travellers not being aware of this change, mistook the muins of Myus for thowe of Miletus, and describe thein as such. (Leake, Asia Minor, p. 239.)

Great an Miletus was as a commercial city, it is no less great in the history of Greek literature, being the birthplace of the philosiophers Thales, Anaximander, and Anaximenes, and of the historians Cadmus and Hecataeus.

The Milesians, like the rest of the Ionians, were notorions for their voluptuousness and effeminacy, though, at one time, they must have been brave and warlike. Their manufactures of couches and other furniture were very celebrated, and their woollen cloths and carpets were particularly esteemed. (Athen. 1. p. 28, xi. p. 428, xii. 540, 553, xv. 691 ; Virg. Georg. iii. :306, iv. 335 ; comp. Ranbach, De Mileto ejuspue coloniis, Halse, 1790 , $4^{\circ}$; Schroeder, Comment. de Rebus Milesiorum, part i. Stralsund, 1817, $4^{\circ}$; Soldan, Rerum Milesiarum Comment. i. Darmstadt, 1829, $4^{\circ}$.) [L.S.]

COIN OF MILETCB.
MILE'TUS, a town of Mysia, in the territory of Scepsis, on the river Evenus, which was destroyed as early as the time of Pliny (v. 32.). Anothar town of the same name in Paphlagronia, on the road between Amastris and Sinope, is mentioned only in the Peuting. Table.
[L. S.]
MILLITUS (Mi^ntos), a town of Crete, mentioned in the Homeric catalogue. (Il. ii. 647.) This town, which no longer existed in the time of Strabo, was looked upon by some writers as the mother-city of the Ionian colony of the same name. (Ephorus, ap. Strab. xii. p. 573, xiv. p. 634 ; Schol. Apoll. Rhued. i. 186; Apolloci. iii. 1, 2, 3; Plin. iv. 12.)

Mr. Pashley (Trav. vol. i. p. 269) explored the site of this Homeric city not far from Episkopiano, at which, considerable remains of walls of polygonal masonry, both of the acropulis and city are still to be seen. (Höck, Kreta, vol. i. pp. 15, 418.) [E.B.J.]

MILEUM, a Roman "colnia" ("Mileu colonia" Peut. Tab.) in Numidia, which the Antonine Itinerary places at $25 \mathrm{M} . \mathrm{P}$. from Cirta. There can be little doubt that this place, which, from the circumstance of two councils having been held there, was of some importance ( Dorcelli, Africa Christicana, vol. i. p. 228), was the same as Mireum (Mipeov al. Múpauov. Ptol. iv. 3. § 28). [E. B. J.]

MILICHUS. [Achaia, p. 13, b.]
MILOLITUM (It. Ant. p. 322 ; Melalicum, It. Hicros. p. 602 ; Mytoliton, Geugr. Rav. iv. 6), a town in the interior of Thrace, on the rad from Maximisnopolis to Trajanopolis.
[A. L.]
millo'Nia. [Marsi.]
MILYAS (Mı $\lambda u d{ }^{\prime}$ ) is said to have been the ancient and original name of the country afterwards called Lycia (Hernd. i. 173) ; but during the period of the Persian dominion, it was the name given to the whole mountainous country in the north of Lycia, the snuth of Pisidia, and a portion of eavtern l'hrygia. (Strab. xii. p. 573 .) The boundaries of this country, however, were never properly fixed, and the whole of it is sometimes described as a part of Lycia. (Arrian, Anab. i. 25.) After the accension of the dynasty of the Seleucidae in Syria, the name Milyas was limited to the southrwestern part of

Pisidia, bordering upon Lycia, that is, the territory extending from Termessus northward to the foot of mount Cadmus. (Pulyb. v. 72; Strab. xii. p. 570, xiii. p. 631, xiv. p.666.) This district, the western part of which bore the name of Cabalia, is afterwards described, sometimes as a part of Lycia (Ptol. v. 3. § 7, 5. § 6), and sometimes as part of Pamphylia or Pisidia. (Ptol. v. 2. § 12 ; Plin. v. 42.) After the conquest of Antiochus the Great, the Roinans gave the country to Eumenes (Pulyb. Exc. de Leg. 36), though Pisidian princes still continue to be meritioned as its rulers.

The greater part of Milyas was rugged and mountainous, but it also contained a few fertile plains. (Strab. xii. p. 570.) The inhabitants were called Milyae. (Mı入úą, Herod. vii. 77 ; Strab. xiv. p. 667 ; Plin. v. 25, 42.) This name, which does not occur in the Homeric poems, probably belonged to the remnants of the ancient Solymi, the original inhabitants of Lycia, who had been driven into the mountains by the immigrating Cretans. The most important towns in Milyas were Cibyra, Oenoanda, Balbura, and Bubon, which formed the Cibyratian tetrapolis. Some authors also mention a town of Milyas (Polyb. v. 72; Ptol. v. 2. § 12 ; Steph. B. s. v. Mı入úal), which must have been situated N. of Tennessus in Pisidia. [L. S.]

MIMACES (Mínaxcs), a people in Byzacium (Ptol. iv. 3. § 26), and also in Libya Interior. (Ptol. iv. 6. § 20.)
[E. B. J.]
MIMAS ( $\delta$ Mías), a mountain range in lonia, traversing the peninsula of Erythrae from south to north. It still bears its ancient name, under which it is mentioned in the Odisssey (iii. 172.) It is, properly speaking, only a branch of Mount Tmolus, and was celebrated in ancient times for its abundance of wood and game (Strab. xiv. pp. 613, 645.) The neck at the south-western extremity of the peninsula formed by Mount Mimas, a little to the north of Tens, is only about 7 Roman miles broad, and Alexander the Great intended to cut a canal through the isthmus, 80 as to connect the Caystrian and Hermaean bays; but it was one of the few undertakings in which he did not succeed. (Plin. v. 31 ; Paus. ii. 1. §5; comp. vii. 4. § 1 ; Thucyd. viii. 34 ; Ov . Met. ii. 222 ; Amm. Marc. xxxi. 42; Callim. Lymn. in Lel. 157; Sil. Ital ii. 494.)
Mount Minas forms three promuntories in the peninsula; in the south Coryceum (Korakia or Kurko), in the west Argennum (Cape Blanco), and in the north Melaena (Kara Burnu). Chandler (Travels, p. 213) describes the shores of Mount Dimas as covered with pines and shrubs, and garnished with flowers. He passed many small pleaxant spots, well watered, and green with corn or with myrtles and shrubs. The suinmit of the mountain commands a magnificent view, extending over the bays of Snyrna, Clazomenae, and Erythrae, the islands of Sumcs, Chins, and several others. [L. S.]

MINAEI (Melvaiot), a celebrated people of Yemon, in the SW. of Arabia. Strabo names them first of four great nations situated in this extremity of the peninsula, and bordering on the Red Sea: their principal town was Carna or Carana; next to these were the Sabaei, whose capital was Mariaba. The Catabanes were the third, extending to the straits and the passage of the Arabian Gulf - the Straits of Bab-el Mandeb. Their royal city was Tamns. To the east were the Chatramotitae, whose capitul was named Cabstanum. From Elana to the country of the Minaei was 70
days' journey. Thus far Strabo (xvi. pp. 768, 776); consistently with whose account, Ptolemy (vi. 7. § 23) mention, the Minaei as a mighty people (Muvaiot, $\mu$ eja etyos), burdering ou the inner frankincense country, not far from the Sabaei, and places Carna Metropolis in long. $73^{\circ} 30^{\prime}$, lat. $23^{\circ} 15^{\prime}$, which would be on the coast of the Gulf of Arabia, distinct from the Carnus or Carna above named, and identical with the Cornon of Pliny, a town of the Charmaei, who were contiguous to the Minaci. Pliny represents the Minaci as contiguous to the Atramitae in the interior; which Atramitae-identical no doubt with the Chatramotitue of Strabo-he represents as a branch of the Sabaci, which last tribe extended along both scas, i. e. the Indian Ocean and the Arabian Gulf; and as the Carnus, which he names as a city of the Sabaei, is doubtless the Carna which Strabo makes the capital of the Sinaei, he would seem to imply that these last were also another division of the same principal tribe of the Sabaei. Their conntry was reported by Aelius Gallus to be exceedingly rich. "Minaeis fertiles agros palmetis arbustisque, in pecore divitias." (Plin. vi. 32.) They are mentioned by Diodorus (as Mıvyalot), in connection with the Gerrhaei, as transporting frankincense and other
 $\mu e ́ \eta s^{\prime}$ 'Apabias), i.e. the interior (iii. 42). All these notices would serve to fix the seat of this tribe at the SW. part of the peninsula, in the modern Yemen. Pliny says that they were supposed to derive their origin from Minos, the king of Crete, as their neighbours, the Rhadamaei, were from his brother Rhadamanthus (vi. 32), in which Mr. Furster thinks we may " easily recognise, under the thin veil of classical fiction, the important historical fact of the existence of an open trade between the Greeks and Arabs from very remote times, and of all the facilities implied by commercial intercommunity." (Arabia, vol. i. p. xxxvii., ii. pp. 74, 75.) In his account of the myrrh and frunkincense, Pliny relates that this plant, which grew in the country of the Atramitae, one canton (pagus) of the Sabaei, was conveyed by one narrow path through the neighbouring canton of the Minaei, who were the first to carry on the trade, and always the most active in it; from which fact the frankincense came to be called Minnaeum (xii. 30). And in speaking of the various qualities of myrrh, he mentions second, "Minaea, in qua Atramitica," as most esteemed next to the Troglodytica (xii. 35).

With regard to the position of this important tribe in the modern map of Arabia, there is a wide difference of opinion among geographers. D'Anville finds their capital Carans in the modern Almukarana, which is, he says, a strong place. (Gengraph. Anc. tome ii. p. 221 ; comp. Forster, Arabia, vol. i. p. liii.) Gosselin cuntends that Almakarana is too far south for the Carna of the Minaei, and is disposed to find this capital in Carn-al-Manazil, as Bochart had suggested (Phaleg, lib. ii. cap. 22. p. 121); which Edrisi places two days' journey from Mekka, on the road to Sama. (Gosselin, Récherches sur la Géographie des Anciens, tome ii. p. 116.) Dean Vincent thus attempts to fix their position:-"The site of the Minaeans is not easy to fix; but by a comparison of different accounts, they were S. of Hedjaz, N. of Hadramaut, and to the eastward of Sabeia; and they were the carriers to all these provinces: their caravans passed in 70 days from Hadramaut to Aila, as we learn from Strabo; and Aila is but 10 miles (?) from Petra." He re-

MiNAEI.
marks, in direct opposition to Gosselin, that Bochart, in placing them at Carno-'l-Manazoli (1. Karn-el-Maghsal), only 3 stations S. of Mecca, which he supposes to be the Carna or Carana of Pliny, brings them too far to the N., for that "Ptolemy places them much farther S." (Periplus, cap. xxvii. p. 363, and note 254.) But M. Jomard holds that Wady Mina, to the S. (?) of Mecca, corresponds with the ancient Minaei: the distance to Aila he computes as $10 \frac{1}{2}$ degrees, or 294 hours (ap. Mengin. Histoire de l'Egypte, grc. p. 377). Mr. Forster assigns them a wide extent of territory in the modern provinces of Heljaz, Nedjd, and Yemen, even to the borders of Hadramaut. "The seat of this great commercial people, who divided with the Gerraei the commerce of the peninsula (transported by D'Anville to the heart of Yemen, and by Vincent to the country of the Asyr Arabs), assuredly lay, if any reliance whatever may be placed in the position of Ptolemy, in an inland direction ESE. of Mecca. For the Minaei, according to him, lay immediately $S$. of the "regio interior myrrifera;" and this. again, was situated due S. of the Manitae. The Manitas being the same with the Dezeyne, this description would identify the "interior inyrrifera" with the fruitful mountain region E. of Tayf, and the Minaei, consequently, with the great Ateybe tribe described by Burckhardt, as the most numerous of the tribes of Medjaz, and inhabiting the rich inland country stretching eastward, under those mountains, from Lye and Kolikh to Taraba." (Arabia, vol. ii. pp. 251, 252.) He adds, in a note (*), " Its site (viz. that of the ' interior myrrifera '), with that of its inhabitants,' the Minaei, may be determined independently, by the concurrent testimonies of Ptolemy and Pliny: the former places his Chargatha [Xapidoa, Yal. Xap ${ }^{2} \dot{d} \theta a$ ], and the latter his Karriata, in conjunction with the Minati. The town thus denominated is clearly that of Kariatain; but Kariatain is seated beneath, or rather upon, the mountains of Tayf." Having thus determined their northern border " S . of Kariatain, or in the plains below the mountain chain running ENE. from Tayf," be thas defines their southern limits. "On the S., according to Ptolemy, the Minaei were bounded by the Doreni and the Mokeretae. It is impossible to mistake, in the Doreni, the inhabitants of Zokran, or in the Mokeretac, those of Mekhra, two adjoining provinces, lying S. of Mecca and Tayf, and crossing the entire space between the sea and the uninhabited desert. This decisive verification shuts in the ancient Minaei between the mountains of Zohran and Melihra, and those N. of Tayf" (p. 255). "The chief towns, the territory, and the national habits of the Minaei, as described by the ancient geographers, bear a remarkable correspondence to those of the Ataybe Arabs, the present inhabitants of this district ; and the coincidence of the palm-groves, and other fruit-trees of the Minaei, and their wealth in cattle, noticed by Pliny, with the excellent pasture-grounds, the great abundance of camels and sheep. possessed by the powerful tribe of Ateybe, and with the plantations for which Taraba is remarkable, that fumish all the surrounding country with dates, environed, as Burckhardt describes both it and Tayf to be, 'with palm-groves and gardens, watered by numerous rivulets,' must be allowed to corroborate, in a very remarkable manner, this verification of the ancient seats of the Minaei." (Forster, Arabia, vol. ii. pp. 254-257.)

## MINAEI

Mr. Forster further identifies the principal town of the Minaei (the Carman Regia of Ptolemy) with Karn-al-Manzil, a consideraule town still in being between Taif and Mekkia; . . . and Carnon with Karn-al-Magsal, upon the mountains S. of Tauf; which former Bochart had already identified with the Carna or Carana of Pliny. "The site of their capital, within a few miles of Wady Mina [immediately to the E. of Mckka], suggests the not improbable derivation of their name from that famous seat of the idolatry of ancient Arabia" (p. 254, note $\dagger$ ); an hypothesis in which, it has been seen, Jomard coincides. But, though fixing the original and principal seat of the Minati in the S. of the Medjaz, he thinks "it still is certain, from Pliny's statement, that this peoplo possessed a key to the commerce of the incense country, by having obtained the command of one of the two passes into the Djebal-al-Kamir" (which is in the heart of Hadramaut); and he hence infers that they possessed one of the two emporiums of the trade in incense and myrrh, mentioned by Pliny, on the southern coast; "an inference which at once conducts us to Thauane or Doàn [NE. of Ras Fartak], and to the mountain pass immediately behind it" (p. 258, comp. vol. i. p. 135, 136). The arguments in proof of this position, and of the connection of the Minaei with the Joktanite patriarch Jerah, which cannot be considered as convincing, are fully stated and enforced by Mr Forster with his usual ingenuity (vol. i. pp. 128-136); but it is an unfortunate circumstance that he has removed the central seat of this tribe,-descended, according to this hypothesis, from "the father of Yemen," into the territory of Hedjaz and for Nedjd; he maintains that, "from E. to W. the Minaei stretched the entire breadth of the peninsula, their eastern frontier touching the Gerrheans, on the Persian Gulf; while Carman Regia, now Karn-al-Manzil, their metropolis, is seated only 21 leagues ESE. of Mekka, in the great province of Al-Kardje or Iemama" vol. i. p. Ixriii.)

The question of the position of the Minaeans has been investigated by M. Fresnel with a widely different result. (Journal Asiatique, 3me Sériè, tome x. pp. 90-96, 176-200.) He confines them to the central part of Yemen, and denies their connection either with Wady Mina, near Mekka, or with Manah, an idol of the Houdhaylides and the Khouzầdes, between Mekla and Medina. He regards the name as a possible corruption of Yemenaei, the first syllable being converted into the Greek article, in its transmutation from one language to another; but suggests also another derivation of the name from the patriarch Ayman, found in the native genealogies third in descent from Saba. In confinnation of the former etymology, he maintains that the name Yemen, which now comprehends the eastern quarter of Southern Arabia, was formerly proper to the central portion of that province. He thinks that the capital of the Minaei -the Carna or Carana of Strabo, the Carion of Pliny, identical, also, with the Carman Regia of Ptolemy (to which that geographer assigns too high a latitude, as he does also the Minaei)-is to be found in the Al-Karn of Wady Doam, five or six days N., or, according to another authority, WNW., of Mukallah. Their other town, Mariaba Baramalacum, he places in the same valley. [Marlaba, 2.7 The position thus assigned to Carna in the Wudy Doün, enables us to fix the extent of the territory of the Minaei between the Sabueans and

Hadramaut. Their country must have comprehended the eastern half of the territory of $Y a f a$, and the western half of the modern Hadranuut. So that Shiticm and Ferim, and the tomb of Hüd, and the wells of Barkit (Ptolemy's source of the Styx), which now form part of Hadranaut, pertained to the Minaei. (Ritter, Erdhunde von Arabien, i. pp. 278-284.)
[G. W.]
MINARIACUM, in Belgica, is placed on a road from Castellum (Cassel) to Turnacum (Tournai); and a road also ran from Castellum through Minariacum to Nemetacum (Arras). The distance is xi. (leagues) from Cassel, a well-known position, to Minariacum. D'Anville contends that the geographers are mistaken in placing Minariacum at Merghem, or, as the French call it, Merville, on the river Lys, instead of placing it at Esterre, also on the Lya. The distances as usual cause a difficulty, and there is nothing else that decides the question. An old Roman road leads from Cassel to Esterre, and Roman coins have been found at Esterre. [G. L.]
MINAS SABBATTHA (Meivas Za6ar日á, Zosim. iii. 23), a small fortified work in Babylonia, which Zosimus describes as, in his day, occupying the site of the celebrated Parthian capital Ctesiphon. Abúlfela (p. 253) speaks of a place in the neighbourhood called Sabath.

MINA'TICUM, in Belgica, is placed by the Antonine Itin. and the Table on a ruad from Bagacum (Barai) to Durocortorum (Reims). It is placed in the Itin. between Catusiacum (Chcours) and Auxenns or Axuenna. [Axienna.] Catusiacum is omitted in the Table, and Micaticum appears under the form Ninittaci, or Nintecasi, as D'Anville writes it. Here, as in some other cases, the name in the Table appears to be more exact, for Ninittaci is Nizy le Comte, which stands on an old Roman road that leads from Chaours to Reims. [G. L.]

MI'NCIUS (Míरкıos: Mincio), a considerable river of Gallia Cisalpina, and one of the most important of the northern tributaries of the Padus. (Plin. iii. 16. s. 20, 19. s. 23 ; Strab. iv. p. 209.) It has its sonrces in the Rhaetian Alps, at the foot of the Monte Tonale, from which it flows to the lake Benacus, or Lago di Garda, which is formed by the accumulation of its waters; from thence it issues again at Peschiera (the ancient Ardelica), and has from thence a course of about 40 miles, till it falls into the Po near Giovernolo, about 10 miles above Hostilia. In the upper part of its course it is a mere mountain torrent; but after it leaves the lake Benacus it is a deep and clear stream, which holds a slow and winding course through the low and marshy plains of this part of Cisalpine Gaul. It is characteristically described by Virgil, who dwelt on its banks. (Virg. Ecl. vii. 13, Georg. iii. 15, Aen. x. 206.) In the immediate neighbourhood of Mantua the waters of the Mincius stagnate, so as to form shallow lakes of considerable extent, which surround that city on three sides. the fourth being also protected by artificial inandations.

A battle was fought on the banks of the Mincius in B.c. 197, between the consul Cortelius and the combined forces of the Insubres and Cenomani, in Which the latter were entirely defeated, and their leader, the Carthaginian Hamilcar, taken prisoner. (liv. axxii. 30.) At a much later period it was on the banks of the Mincius, near its confluence with the Padus, at a place called by Jornandes Acrorentus, Mamboleins, that the celebrated interview took place between Pupe Leo I. and Attila,
which led the king of the Huns to withdraw his forces from Italy. (Jornand. Get. 42 ; P. Diac. List. Miscoll. xv. p. 549.) [E. H. B.]

MINERVAE PROMONTO'RICM ( $\tau \boldsymbol{i}$ 'A ${ }^{\prime} \eta$ vaion aкрати́piov, Strab.: Punta della Campanella), a promontory on the coast of Campania, opposite to the island of Capreae, forming the southern boundary of the celebrated Crater or Bay of Naples. It is a bold and rocky headland, constituting the extremity of a mountain ridge, which branches off from the main mass of the Apennines near Nuceria, and forms a great mountain promontory, about 25 miles in length, which separates the Bay of Naples from that of Paestum or Salerno. The actual headland derived its name from a temple of Minerva, situated on its summit, which was said to have been founded by Ulysses (Strab. v. p. 247) : it was separated by a channel of only 3 miles in width from the island of Capreae (Capri). On the S. side of the promontory, but about 5 miles from the extreme headland, are some small rocky islets now called Li Galli, very bold and picturesque in xppearance, which were selected by tradition as the abode of the Sirens, and hence named the Sirenusae Insulae (Eeipquoúg$\sigma a t \nu \eta \begin{aligned} & \text { oot, Ptol. iii. } 1 . \S 79 \text {; Strab. v. p. } 247 \text {; Psend. }\end{aligned}$ Arist. Mirab. 110). From the proximity of these according to Strabo, the headland itself was sometimes called the Promontory of the Sirens (Eicip pyovg $\sigma \hat{\omega} \nu \dot{\alpha} \kappa \rho \omega \tau \eta \rho(o \nu)$, but all other writers give it the more usual appellation of Promontory of Minerva though Pliny adds that it had once been the abode of the Sirens; and there was an ancient temple on the side towards Surrentum in bonour of those mythical beings, which had at one time been an object of great veneration to the surrounding population. (Strab. v. pp. 242, 247 ; Plin. iii. 5. s. 9; Pseud. Arist. L. c.; Ovid. Met. xv. 709; Mel. ii. 4. § 9 ; Liv. xlii. 20.) Tacitus in one passage calls the headland Surrentinum Promontorium, from its proximity to the town of Surrentum, from which it was only 5 miles distant; and Statius also speaks of the temple of Minerva as situated "in vertice Surrentino." (Tac. Ann. iv. 67; Stat. Silv. r. 3. 165.)
The Promontory of Minerva is a point of considerable importance in the coast-line of Italy: hence we find it selected in B.c. 181 as the point of demarcation for the two squadrons which were appointed to clear the sea of pirates; the one protecting the coasts from thence to Massilia, the other those on the S. as far as the entrance of the Adriatic. (Liv. zl. 18.) In b.c. 36 a part of the fleet of Augustus, under Appius Claudius, on its voyage from Misenum to Sicily, encountered a tempest in passing this cap $\theta_{\text {, }}$ from which it suffered heavy loss. (Appian, B. C. v. 98.) It is mentioned also by Lucilius as a point of importance in his voyage along the coast of Italy. (Lucil. Sat. iii. Fr. 10.)
[E. H. B.]
MI'N1O (Mignone), a small river of Etruria, flowing into the Tyrrhenian sea, between Centumcellae (Civita Vecchia) and Grariscae, and about 3 miles S . of the mouth of the Marta. It is a tritling stream, though noticed by Virgil, as well as by Rutilius in his voyage along this coast; but Mela and the Geographer of Ravenna are the only geographical writers who deem it worthy of mention. (Virg. Aem x. 183 ; Serr. ad loc. ; Rutil. Jtis. i. 279 ; Mel. ii. 4. § 9 ; Geogr. Rav. iv. 32.)
[E. H. B.]
MI'NIUS (Mivios: Minho), a river of Spain, rising in the north of Gallaecia, in the Cantabrian mountains, and falling into the Ocean. (Strab. iii. p. 153.) Strabo erroncously says that it is the
largest river of Lusitania. and is navigable for $\mathbf{8 0 0}$ stadia. According to Aethicus Ister (p.17), it has a course of 310 miles; but its real course is about 120 miles. The river was said to have derived its name from the minium, or vermilion, carried down by its waters. (Justin, xliv. 3.) According to Strabo (l.c.) it was originally called Baenis (Baivis); but as this name does not occur elsewhere, it has been conjectured that Baivis is a false reading for Naîbis, or N $\hat{\eta}$ bis, mentioned by Ptolemy (ii. 6. § 1) and Mela (iii. 1). The Naebis is a river falling into the Ocean between the Minins and the Durius; and it is supposed that Poseidonius, whom Strabo followed, confounded this river with the Minius. (Groskurd's Strabo, vol. i. p. 260.) Nlusos, in Appian (Hisp. 72), is clearly only a false reading for Mivios. The Minius is also mentioned by Ptol. ii. 6. § 1: Mela, iii. 1; Plin. iv. 21. s. 35.

MiNizUS. [Mnizus.]
MINNAGARA (Mıyddapa, Arrian, Peripl. p. 24; Mıvardpa, Ptol. vii. 1. §63), the chief town of the district lying between the Namadus and Indus, which towards the sea was known generically by the name of Indo-Scythia. Its exact position cannot now be determined; hence, some have supposed that it is represented by Tatta, near the mouths of the Indus, which is said to be culled by the native Rajpúts. Sa-Minagur. (Ritter, Erdkunde. vol. v. p. 475.) There is little doubt that the name expresses the "city of Min," nagara being a common Sanscrit word for city, and Isidore of Charax mentioning a town called Min in this exact locality. (Parth. p. 9 ; Lassen, Pentap. Inclic. p. 56.) [V.]

MINNITH, a town on the E. of Jordan, in the country of the Ammonites (Judges, xi. 33), celebrated for its corn, which was sold for export in the markets of Tyre. (Ezech. xxvii. 17.) The proper name does not occur in the LXX. in either of these passages, reading in the former Arnon (Alex. $\mathrm{\Sigma}_{\mathrm{f}}$ $\mu$ oce( $\theta$ ), and translating a corrupt reading in the latter by $\mu$ upary, after oitov, as in the same passage they represent the proper name Pannag by caalas. Its situation, as Reland has remarked (Palaestina, 6. v. p. 899), depends on the two questions, (1) of the line of march followed by Jephtha, and (2) of the existence of two Aroers. There is no proof of the latter hypothesis; and the course of the narrative seems to demand that the former question shonld be resolved in favour of a course from N . to S.; which would oblige us to look for Minnith some distance south of Aroer, which was situated, we know, on the river Arcon. [Arnon; Aroer.] Josephus names it Maniathe (Mavid́ $\eta$ ), but gives no clue to its position, further than that it was in Ammanitis. Eusebius places it at Maanith (Maavit), iv. M. P. from Esbus (Heshbon), on the road to Philadelphia (Onomast. s. v. Mevat $\theta$; St. Jerome, Mennith); but this does not accord with the above notifications of its site.
[G. W.]
MINNODUNUM, is in the country of the Helvetii, on a road from Viviscus ( Vevai), on the lake of Genera, to Aventicum (Avenches). The place is Moudon, or as the Germans call it Milden, in the Canton of Vauch, on the road from Bern to Lausanne.
[G. L.]
MINO'A (Mıvéa, Ptol. iii. $17 . \S 7$; Mivo,Stadiarm.; Minoum, Plin. iv. 12.) 1. A place in Crete, which Ptolemy (l.c.) fixes to the W. of the headland of Itrepanon. Mr. Pashley (Trav. vol. i. p. 44) thinks that it was situated at Sternes, on the Akroteri of the bay of Sudhu.

## MINTURNAE.

2. A city of Crete, which belonged to the district of Lyctus, and stood on the narrowest part of the island, at a distance of 60 stadia from Hierapytna (Strab. x. p. 475; Ptol. iii. 17. § 5.)

Its position has been fixed at Castel Mirabello, near Istrónes. (Höck, Kreta, vol.i. p. 421.) [E.B.J.] MINO'A (Mıvéra). 1. A small island in front of Nisaea, the port of Megara. [For details, see Megaba.]
2. A promontory of Laconia, S. of Epidaaras Limera. [Epidaturus Limera.]
3. Another name of the island of Paros. [Paros.]
4. A city of Sicily, usually called Heracieia Minoa [Heracleia Minoa.]
5. A town in the island of Amorgos. [Amorgos.] 6. A town in the island of Siphnos. [Sipheos.] MINTHE. [Elis, p. 817, b.]
MINTURNAE (MıvToüpval, Ptol.; Mutoípen, Strab. : Eth. Muroupphoios, Plut. ; Mintarnensis), a city of Latium, in the more extended sense of that term; but originally a city of the Ausonians, situated on the right bank of the Liris (Garigliano), about 3 miles from the sea. It was on the line of the Appian Way, which here crossed the Liris. (Strab. v. p. 233.) The name of Minturnae is first mentioned in history during the great Latin War, B. c. 340-338, when it afforded a refuge to the Latin forces after their defeat in Campania (Liv. viii. 10.) It was not, however, at that time a Latin city, but belonged to the Ausonians, who appear to have been then in alliance with the Latins and Campanians. For, in b. c. 315, Livy tells us that there were three cities of the Ausonians, Ausona, Minturnae, and Vescia, which had declared themselves hostile to Rome after the battle of Lautulae, but were again betrayed into the hands of the Romans by some of the young nobles in each, and the inhabitants unsparingly put to the sword. (Liv. ix. 25.) Not many years later, in B. c. 296, a Roman colony was established at Minturnae, at the same time with one at Sinuessa, a little further down the coast: they were both of them of the class called "Coloniae Maritimae," with the rights of Roman citizens (Liv. x. 21; Vell. Pat. i. 14); and were obviously designed to maintain and secure the communications of the Romans with Campania. During the Second Punic War both Mintumae and Sinuessa were among the colonies which endeavoured, but without success, to establish their exemption from the obligation to furnish military levies (Liv. xxvii. 38); and again, during the war with Antiochus (B. c. 191), they attempted, with equal ill success, to procure a similar exemption from providing recruits and supplies for the naval service. (Id xxxvi. 3.) Minturnae was situated on the borders of an extensive marsh, which rendered the city unhealthy, but its situation on the Appian Way must have contributed to maintain its prosperity; and it seems to have been already under the Republic, what it certainly became under the Empire, a flourishing and populuas town. In b.c. 88 Minturnae was the scene of a celebrated adventure of C. Marius, who, while flying from Rome by sea, to escape from the lands of Sulla, was compelled to put intw the mouth of the Liris. He at first endeavoured to conceal himself in the marshes near the sea-coast; but being discovered and dragged from thence, he was cast into prison by order of the magistrates of Minturnse, who sent a slave to put him to death. But the man is said to have been so struck with the majestic ; appearance of the aged general that he was unable
to execute his task; and hereupon the magistrates determined to send Marius away, and put him on board a ship which conveyed him to Africa. (I'lut. Mar. 36-39; Appian, B. C. i. 61. 62; Vell. Pat. ii. 19; Val. Max. i. 5. § 5. ii. 10. §6; Liv. Epit. Ixxvii.; Juv. x. 276; Cic. pro Planc. 10, pro Sext. 22.)

We hear little more of Minturnae under the Republic, though from its pasition on the Appian Way it is repeatedly noticed incidentally by Cicero (ad Att. v. 1, 3, vii. 13, xvi. 10.) It still retained in his time the title of a colony; but received a material accession from a fresh body of colonists established there by Augustus; and again at a later period under Caligula. (Lib. Colon. p. 235; Hygin. de Limit. p. 178; Zumpt, de Colon. p. 355.) We find it in consequence distinguished both by Pliny and Ptolemy by the title of a colony, as well as in inscriptions (Plin. iii. 5. s. 9; Ptol. iii. 1. § 63 ; Orell. Inscr. 3762 ; Mommsen, I. R. N. 4058 -4061): and notwithstanding its unhealthy situation, which is alluded to by Ovid, who calls it "Minturnae graves" (Met. xv. 716), it appears to have continued throughout the Roman Eimpire to have been a flourishing and important town. Its prosperity is attested by numerous inscriptions, as well as by the ruins still existing on the site. These comprise the extensive remains of an amphitheatre, of an aqueduct which serred to bring water from the neighbouring hills, and the substructions of a temple, as well as portions of the ancient walls and towers. (Romanelli, vol. iii. p. 430; Eustace, Classical Tiner, vol. ii. p. 318.) All these remains are on the right bank of the Liris, but according to Pliny the city extended itself on both sides of the river; and it is certain that its territory comprised a considerable extent on both banks of the Liris. (Hygin. de Limit. p. 178.) The period of its destruction is anknown: we find it still mentioned in Procopias (B. G. iii. 26) as a city, and apparently a place of some strength; but at the commencement of the middle ages all trace of it is lost, and it was probably destroyed either by the Lombards or Saracens. The inhabitants seem to have withdrawn to the site of the modern Trajetto, a village on a hill about $1 \frac{1}{2}$ mile distant, the name of which is obviously derived from the passage of the Liris (Ad Trajectum), though wholly inapplicable to its precent more elevated position.

Between Minturnae and the sea-coast, at the mouth of the Liris, was the celebrated grove of Marica [Lucus Maricae], with a temple or shrine of the goddess of that name, which seems to have enjoyed a great reputation for sanctity. (Plut. Har. 39; Strab. v. p. 233.) She appears to have been properly a local divinity; at least we do not meet with her worship under that name any where else in Italy; though many writers called her the mother of Latinus, and others, perhaps on that very arcount, identified her with Circe. (Virg. Aen. vii. 47 ; Serv. ad loc.; Lactant. Inst. Div. i. 21.) We may probably conclude that she was connected with the old Latin religion; and this will explain the veneration with which her gruve and temple were regaried, not only by the inhabitants of Minturnae, but by the Romans themselres. Frequent allusions to them are found in the Latin poets, but always in cime connection with Minturnae and the Liris. (Hor. Carm. iii. 17. 7; Lucan. ii. 424; Martial, xiii. 83; Claudian, Prob. et OL Cons. 259).

Stralon calls Minturnae about 80 stadia from Formiae, and the same distarce frum Sinuessa: the

Itineraries give the distance in each case as 9 miles. (Strab. v. p. 233 ; Itin. Ant. pp. 108, 121.) After crossing the Liris a branch road quitted the Appian Way on the left, and led by Sucssa to Teanurn, where it joined the Via Latina.
[E. H. B.]
MI'NYA (Mıvóa), a city of Thessaly, said by Stephanus B. (s. v.) to have been formerly called Halmonia ('A $\lambda \mu \omega \nu i a)$ and to have derived its name from Minyas. It is mentioned by Pliny (iv. 8. s.15) under the name of Almon, and in conjunction with Orchomenus Minyeus in Thessaly. (See Müller, Orchomenos und die Minyer, p. 244, 2nd ed.)

MI'NYAE (Mivíau), an ancient race in Greece, said to have been descended frum Minyas, the son of Orchomenus, who originally dwelt in Thessaly, and afterwards migrated into Bueotia, and founded Orchomenus. [For details see Orchomencrs.] Most of the Argonautic heroes were Dinyae; and some of them having settled in the island of Lemnos, continued to be called Minyae. These Lemnian Мinyse were driven out of the island by the Tyrrhenian Pelangians, and took refuge in Lacedaemon, from whence some of them migrated to Thera, and others to Triphylia in Elis, where they frunded the six Triphylian cities. (Herud. iv. 145-148.) [Elis, p. 818.]

MINYEIUS (Murunios), the ancient name of the river Anigrus in Elis. (Hom. Il. xi. 721.) [Anıgrus.]

MIKOBRIGA (Mipobpira). 1. Also called Merobica (Plin. iv. 12. s. 35; Coins), a town of the Celtici in Lusitania, upon the Ocean (Ptol. ii. 5. § 6), identified by some with Odemira, by others with Sines. (Mentelle, Esp. Anc. p. 260 ; Ukert, ii. 1. p. 390.)
2. A Roman municipium, in the territory of the Turduli, in Hispania Bactica, on the road from Emerita to Caesaraugusta, now Capilla, N. of Fuente Orejuna. (Ptol. ii. 4. § 13; Plin. iii. 1. 8. 3; It. Anton. p. 444 ; Inscr. Gruter, pp. 76, 257.)
3. A town of the Oretani, in Hispania Tarraconensis, mentioned only by Ptolemy (ii. 6. § 59).

MISE'NUM (MLoŋvóv), was the name of a remarkable promontory on the coast of Campania (MIsenum Рromontohium, Tac. Ann. xiv. 4 ; sometimes also Misent Promontorium, Liv. xxiv. 13; тd Mıoŋvd̀ Laxpov, Strab.: Capo di Miseno), together with the adjacent port (Portus Misenves, Flor. i. 16), and a town which grew up adjoining it, after the harbour had become the station of the Roman fleet. The promontory of Misenum furms the northern limit of the celebrated gulf called the Crater or Sinus Cumanus (the Bay of Naples). It is an almost inolated headland, forming a hill of considerable elevation, and of a somewhat pyramidal fornn, joined to the mainland opposite to Procida only by a narrow strip of low land, between which and the continuation of the coast by Bauli and Baiae is a deep inlet forming the harbour or port of Misenum (Strah. v. p. 243). A large stugnant pool or basin, still deeper in, now called the Mare Morto, commanicated with this outer port by a very narrow entrance, which could be closed ly a bridge or causeway. It is probable that the headland of Misenum itself at one time formed part of the encireling heights of the crater of a long extinct volcano, of which the Mare Morto occupies the centre, and the Monte di Procida (as the headland opposite to the island of that naıne is now called) constituted the opposite margin. (Daubeny On Volcanoes, p. 202, 2nd edit.)

The name of the promontory of Misenum was derived, according to a tradition very generally adopted by the Roman writers, from the trumpeter of Aeneas, who was supposed to be buried there (Virg. Aen. vi. 163,212-235; Propert. iv. 18. 3: Sil. Ital. xii. 155; Stat. Silv. iii. 1. 150; Mel. ii. 4. §9; Solin. 2. § 13). Another legend, however, seems to have represented Misenus as one of the companions of Ulysses (Strab. v. p. 245). There is no trace of the existence of a town on the spot at an early period, though it is almost certain that its secure and land-locked port (already alluded to by Lycophron, Alex. 737) must bave been turned to account by the Cumaeans during the period of their naval and commercial power. Before the close of the Roman Republic the actual promontory of Misenum, as well as the neighbouring shores of Bauli and Baiae, was become a favourite site for the villas of wealthy Romans; but it was not till the reign of Augastus that any considerable population was collected there. That emperor tirst introduced the custom of maintaining a fleet for the defence of the Tyrrhenian or Lower Sea, of which Misenum was made the permanent station (Suet. Aug. 49; Tac. Ann. iv. 5), as it continued throughout the period of the Empire. Thus we find the "classis Misenensis" continually alluded to by Tacitus (Ann. xiv. 3, 62, xv. 51, Hist. ii. 100, iii. $56,8 \mathrm{c}$.) ; and the elder Pliny was stationed at Misenum in command of the flect, when the memorable eruption of Vesuvius broke out, in which he perished, A.D. 79, and of which his nephew has left us so interesting an account ( $E p$. vi. 16, 20). At a much later period we find the establishment of a fleet at Misenum, with a legion specially organised for its service, referred to as a permanent institution, both by Vegetius and the Notitia. (Veget. v. 1, 2; Notit. Dign. ii. p. 118.) There can be no doubt that in consequence of this important establishment a considerable town grew up around the port of Misenum; and we learn from several inscriptions that it possessed municipal privileges, and even bore the title of a colony. (Orell. Inscr. 3772 ; Mommsen, I. R. N. 2575-2577.) But the "Misera:es," whose name frequently occurs in inseriptions, are in general the soidiers of the fleet (Milites classis praetoriae Misenutium, Mommsen, l.c. $2725, \& c$.), not the inhabitants of the town.

Before it became thus memorable as the station of the Roman flect, Misenum was remarkable in history for the interview between Octavian and Antony and Sextus Pompeius, in which the two former were received by Sextus on board his ship, and a treaty was concluded for the division of the Roman Empire between the three contracting parties. It was on this occ:asion that his admiral Menas proposed to Pompey to cut the cables and carry the two triumvirs off to sea. (Plut. Ant. 32; Dion Cass. xlviii. 36: Vell. Yat. ii. 77.) At a somewhat earlier period Cicero notices it as having been infested by the Cilician pirates, who carried off from thence the daughters of M. Antonius, who had himself carried on the war against them. (Cic. pro Leg. Manil. 12.) We learn from Plutarch that C. Marius had a villa there, which he describes as more splendid and luxurious than was suited to the character of the man (Plot. Mar. 34) ; nevertheless it was then far inferior to what it became in the hands of L. Lucullus, who subsequently purchased it for a sum of $2,500,000$ denarii, and adorned it with his usual magnificence. It subsequently passed into the hands of the emperor Tiberius, who appears to have not unfreguently
made it his residence; and who ultimately died there, on the 16 th of March, A. D. 37. The villa itself is described as situated on the summit of the hill, commanding an extensive view over the sea; but it is evident, from the account of its vast substructions and subterranean galleries, \&cc., that it must have comprised within its grounds the greater part of the promontory. (Plut. L. c., Luceill. 39 ; Seneca, Ep. 51 ; Tac. Ans. vi. 50; Suet. Tib. 72, 73 ; Dion Cass. Iviii. 28 ; Phaedr. Fab. ii. 36.) Besides this celebrated villa of Lacullas, we learn from Cicero that M. Antomius the orator had a villa at Misenum, and that the triumvir, his grandson, 1 made it a frequent place of residence. (Cic. de Or. ii. 14, ad Att. x. 8, siv. 20, Phil. ii. 19.) At a much later period Misenum became the place of exile or confinement of the unhappy Romulus Augustulus, the last emperor of the West, to whom the villa of Lucullus was assigned as a place of residence by Odoacer after his deposition, A. D. 476. (Jornand. Get.46: Marcellin. Chron. p.44.) Horace notices the sea off Cape Misenum as celebrated for its echini or sea-urchins. (Hor. Sat. ii. 4. 33.)

Some ruins, still extant near the summit of the hill, are in all probability those of the villa of Lacullus. Of the town of Misenum the remains are but inconsiderable; they are situated on the S. side of the Porto di $M$ iseno, at a place now called Casaluce; while those of a theatre are situated at a spot called Il Furno, a little further to the $\mathbf{W}$., just where the inner basin or Mare Morto opens into the outer port. The two were separated in ancient times by a bridge of three arches, which has recently been replaced by a closed causeway, the effect of which has been to cause both the inner basin and outer harbour to fill up with great rapidity, and the latter has in conseqnence become almost useless. In the sides of the hill at the bead of the port, and on the N. of the Mare Morto are excavated numeruus sepulchres, which, as we learn from the inscriptions discovered there, are those of officers and soldiers of the fleet stationed at Misenum. Many of these inscriptions are of considerable interest, as throwing light upon the military and naval institutions of the Roman Empire. They are all collected by Mommsen (Inscr. Regra. Neap. pp. 145-154).
[E. H. B.]
 a town of Macedonia, the position of which is untdetermined.
[E. B. J.]
MI'STHIUM (Míotiov), a town of the mountain tribe of the Orondici in the north of Pisidia (Ptol. v. 4. § 12), and probably the same as the town of Mistheia, which Hierocles (p.625) places in Lycaonia The latter name occurs also in other late writers, as Theophanes (Chrom p. 320) and Nicephorus (c. 20).

MISUA. [Carthago, Vol. I. p. 551, u.]
misulani. [Musulani]
MITHRIDA'TIS RE'GIO ( $\dot{\eta}$ Mı $\theta \rho ı \delta \alpha ́ t o v ~ \chi \propto \rho a, ~$ Ptol. v. 9. § 19). a district of Asiatic Sarmatio, E. of the Hippici Montes. It derived its name from Mithridates, king of the Bosporus, whom Vaillant (Achacmenilarum Imper. vol.ii. p. 246) calls eight $h$ of that name, and who fled to this country for refuge in the reign of the emperor Clandius. (Plin. vi. 5 : Tac. Ann. xii. 15 ; Dion Cass.lx. 8.) [E.B.J.] MITHRIDA'TIUM (Mı $\rho \stackrel{\delta}{\text { dátiov) , a fortress of }}$ the Trocmi, situated on the frontiers of Galatia and Pontus. After the subjuration of Pontus by the Romans, Pompey took Dithridatium from Pontuss,
and gave it to a Galatian prince Bogodiatarns, or Brogitarus, as he is called on coins. (Strab. xii. p. 567 ; Sestini, p. 129.)

Mityle'NE. [Mytilene.]
MITYS, a river of Pieria in Macedonia, which the Roman army, in the third campaign against Perseus, under Q. Marcius, reached on the first day after their occupation of Dium. (Liv. xliv. 7.) The Mitys was perhaps the river of Katerina. (Leake, North. Greece, vol. iii. p. 424.) [E. B. J.]

MIZAGUS. [Mnizcs.]
MIZPAH v. MIZPEH (Mu $\sigma$ á). This Hebrew appellative (r. r ) height," "a beacon," "watchtower," and the like

 proper name of several sites or towns in Palestine, doubtless from their positions.

1. The most important was Mizpah (once written Mizpeh, Josh. xviii. 26), in the tribe of Benjamin, where a convocation of the tribes of Israel was held on important occasions, during the times of the Judges, and was one of the stations in Sannel's annual circuit. (Judges, xx. 1, 3, xxi. 1; 1 Sam. vii. 5-17, x. 17, \&c.) It was strengthened by Asa, king of Judah, as a frontier garrison against Israel, and he used for his works the materials brought from the neighbouring Ramah, which Bausha, king of Israel, had built on his southern frontier, "that he might not suffer any to go out or to come in to Asa, king of Judah." (1 Kings, xv. 17-22; comp. 2 Chron. xvi. 6.) After the destruction of Jerusalem by Nebuchadnezzar it became, for a short time, the seat of the government, and there it was that Gedaliah and his officers were barbarously murdered by Ishmael and his company. (2 Kingr, $\mathbf{x x v}$. 22-25; Jeremiah, xl. xli.) It is clear from this narrative that it was situated on the highroad between Samaria and Jerusalem (xli. 5,6 ): and it is evident from the narrative in Judges that it could not be far distant from Gibeah of Benjamin, as the head-quarters of the Israelites were at Mizpah while they were besieging Gibeah. It was rentored and inhabited soon after the captivity (Nehem. ii. 7, 15), and is mentioned in the buok of Maccabees as situated over against Jeru-
 having been formerly an oratory of Israel; and there it was that Judas Maccabaeus and his brothers inaugurated their great work with fasting and prayer. (1 Maccab. iii. 46.) It is frequently mentioned by Josephus in his narrative of the Scripture history, but his orthography is far from uniform. Ma $\sigma \dot{\alpha} \alpha_{\eta}$ (vi. 2. §1), Ma $\bar{\phi} \alpha \theta \dot{a}$ (vi. 4. § 4, x. 9. §今 2, 4, 5), Marфd (viii. 13. § 4). In the last cited passage he informs us that Mizpah was in the sume place as Ranathon (or Ramah), which he places 40 stadia from Jerusalem (§ 3). Eusebius and ist. Jerome most unaccountably confound this Mizpah with the Mizpah of Gilead (infra, No. 3). They place it near Kirjathjearim. (Onomast. s. v. Maran日á.) Its site hay not been satisfactorily identified. Dr. Robinson thinks that either Tell-elFül (Bean-hill), lying about an hour south of ErRúm (Ramah) twwards Jerusalem, or Neby Samwil, somewhat further distant from Er-Ram, to the west of the former site, would correspond to the site of Mizpah. He inclines strongly to the latter site ( Liib. Res. vol. ii. p. 144); which, however, seems to be too far removed from the highroad between Jerusalem and Sam:uria on which Mizpah was cer-
tainly sitnated. Possibly the modern village of Shuphat, identical in meaning with Mizpah, situated on that road, near to Tell-el Ful, may mark this ancient site; or another site, between this and ErRim, on the east of the road, still called 'Ain Nuspeh, may mark the spot. It is worthy of remark that the high ground to the north of Jerusalem is calied by a name of kindred signification with Mizpah, and doubtless derived its name Exomús from that town. It is on this ridge that Shaphat lies.
2. Mizpeh (LXX., Ma $\sigma \phi d$ ) is mentioned among the cities of Judah (Josh. xv. 38); and this must be either the one which Eusebius mentions as still existing under the same name, in the borders of Eleutheropolis to the north, or the other in the tribe of Judah, on the way to Aelia. The former of these is probably Tell-es-Safieh, the Alba Specula of the middle ages; the latter may be Beit-Safa, a little to the south of Jerusalem, between that city and Bethlehem.
3. Mizpah, in Mount Gilead, probably identical with Kamath-Mizpeh in Gad (Josh. xiii. 26), derived its name from the incident mentioned in Genesis, $\mathbf{x x x} .44-55$, and was apparently the site of the rough monument of unhewn stones called by Laban in Chaldee, "Yegar-sahadutha," and by Jacob in Hebrew, "Galeed," buth signifying " the heap of witness." The site was called "Hizpal; for, he said, The Lord watch between me and thee, when we are absent one from the other." This is doubtless the Mizpah of Jephtha the Gileadite, which seems to have had somewhat of a sacred character, and to have served for the national conventions of the trans-Jordanic tribes, as its namesake in Benjamin did in Palestine Proper. (Judges, x. 17, xi. 11, 34.) Eusebius notices it as a Levitical city in the tribe of Gad. (Onomast. s. v. Marфd.)
4. A fourth Mizpeh is named in Josh. xi. 3, more to the north of Peraea, where we read of "t the Hivite under Hermon, in the land of Mizpeh;" and presently afterwards of "the valley of Mizpeh eastward" (ver. 8), which cannot be identical with the Gileadite Mizpeh, but must have been at the southern base of Mount Hermon.
5. Mizpeh of Moab is mentioned (in 1 Sam. axii. 3) in a manner which seems to intimate that it was the capital of that country in the time of David, as it was certainly the residence of its king. (Euseb. Onom. s. v. Ma $\quad$ [G. W.]

MNIZUS, or MINIZUS, a small town in Galatia, between Lagania and Ancyra, where the Einperor Anatasius must have resided for some time, as several of his constitutions are dated from that place, both in the Codex Theodosianus and the Codex Justiniaucus. (Itin. Hieros. p. 575 ; It. Ant. p. 142; Notit. Episc., where it is called Mथņos; Hierocl. p. 697, where it bears the name 'Pefé ${ }^{\prime}$. Peut. calls it Mizagus; Cod. Theod. de his qui ad Eccles. i. 3; de Epist. i. 33; de Poen. i. 16.) Mnizus was the see of a bishop, as we know from several councils at which its bishops are mentioned. Kiepert identifies the place with the modern Ajas.
[L. S.]
MOAB (Mad́6), vallis, regio, campestria, \&c [Moabitae.] The notice of Eusebius may be here intriduced (Onomast. s. v. Mad́):-"A cits of Arabia, now called Areopolis. The country also is called Moab, but the city Rabbath Moab." [Areorous.]
[G. W.]
MOABITAE (Mwa6ital: the country Moafitis), the people descended from Moab, the son of

Lot, the frait of his incestuous connection with his eldest daughter. (Gen. xix. 37.) Moses has preserved the very early history of their conntry in Deaternomy (ii. 9-11):-"The Lord said unto me, Distress not the Moabites, neither contend with them in battle, for 1 will not give thee of their land for a possession; because I have given Ar unto the children of Lot for a possession. The Emims dwelt there in times past, a people great, and many, and tall, as the Anakims." The Moabites, having dispossessed these gigantic aborigines, held possession of their country, which was bounded on the north by the river Arnon, which separated them from the Amorites. At an earlier period, indeed, they had extended their conquests far to the north of the Arnon, but had been forced to retire befure the Amorites, to whom they had ceded their northern conquests, even before the children of Israel came into their coasts; and several fragments of the ancient war-songs relating to these times are preserved by Moses. (Numb. xxi. 13-15, 26-30.) The boundary question was revived subsequently, in the days of Jephthah, when the Amorites demanded the restoration of the conquests that Israel had made between the Arnon and the Jabbok south and north, and to the Jordan westward, as of right belonging to them, their title not haring been invalidated by 300 years' occupation by the Israelites. It appears from Jephthah's historical review of the facts, that the Israelites had neither invaded nor occupied any part of the territories of which Moab and Ammon were in actual possession at the period referred to; but only so much of their ancient possessions as Sihon king of the Amorites had already forced them to abandon (Julges, xi. 12-28) ; and it is remarkable that the memorial of the occupation of the territory north of Arnon by the Moabites has been preserved, through the Mosaic records, even to this day, in the name that is popularly assigned to that remarkable mountain district east of the Dead Sea, which forms so conspicuous and remarkable a feature in the distant view from Jerusalem towards the east, still called " the mountains of Moab," as in Deuteronomy that high table land is described as the "plains of Moab" (De:t. xxix. 1, xxxii. 49); and Josephus occasionally uses the name with the same latitude, of the country north of the Arnon, describing the Moabites as still a mighty nation of Coelesyria (Ant. i. 11. § 5); and reckoning among the Moabite cities occupied by the Jews under Alexander Jannaeus, Chesbon (Heshbon), Medaba, Pellas, and others that lay considerably north of the Arnon (Ant. xiii. 15. §4), although in other passages he makes that river divide the Moabites from the Amorites (Ant. ir. 5. § 1), and describes the country of Moab as the southern limit of Peraea (Bell. Jul. iii. 3. § 3), consistently with which notices he compares the country of the Amorites to an island, bounded by the Arnon on the S., the Jabbok on the N., and the Jordan on the E. (Ant. iv. 5. § 2.) It is then justly remarked by Reland (Palaestina, p. 102), that by "the plains of Moab," where the Israelites were encamped before they crossed the Jordan (Numb. axxiii. 48, 49, 50), which is described as being over against Jericho, and by the "land of Moab," in which mount Nebo is said to be situated (Deut. xxxii. 49, comp. xxxiv. 1.5.6.8), it is not to be understood as thongh that district was actually in possession of the Moabites at that time; but is so called because they formerly held it under their dominion. (Numb.
xxi. 26.) It may be added, that after it had been occupied by the tribes of Gad and Reuben, to whom Moses assigned it (Numb. xxxii.3.33-33), the Moabites again conquered it for a time, as it is clear that Eglon must have subjugated that district east of the Joridan, before be could have possessed himself of Jericho, on the west of that river. (Judges, iii. 1230.) Their long and undisturbed tenure of their own proper country is forcibly described by the prophet Jeremiah. "Moab hath been at ease from his youth, and he hath settled on his lees, and hath not been emptied from vessel to ressel, neither ha:h he gone into captivity: therefore his taste remained in him, and his scent is not changed " (xlviii. 11); and the enumeration of its prosperous cities, in his denunciation, indicates the populousness and richness of the country, to which the Israelites resorted when suffering from famine in their own most fruitful districts (Ruth, i. 1), and which supplied the market of Tyre with grain. (Ezek. xxvii. 17.) [Minniti.] The country is described by Josephus as fertile, and capable of supporting a number of men on its produce. (Ant. iv. 5. § 1.) This account both of its populousness and fertility is remarkably confirmed by modern travellers, and the existing monuments of its numerous cities. Thus Irby and Mangles, proceeding south from Kerek, "ascended into a country of downs, with verdure so close as to appear almost like turf, and with cornfields at intervals." They passed many ruined sites, the names of several of which they obtained: "in short," they add, "the whole of the fine plains in this quarter are covered with sites of towns, on every eminence or spot convenient for the construction of one; and as all the land is capable of rich cultivation, there can be little doubt that this country, now so deserted, once presented a continued picture of plenty and fertility" (Travels, p. 371 . compare under June 5, p. 456); and it is to this quarter that the Arabs referred, when they reported to Volney "that there are to the SE. of the lake Asphaltes, within three days' journey, upwards of three hundred ruined towns absolutely deserted; several have large edifices with columns." (Ib. p 310.) He indeed assigns the country to "the Nabathacans, the most potent of the Arabs and of the Idumaeans;" but the ruins are more probably to be referred to the earlier inhubitants of the country, who, we know, lived in settled habitations, while the Nabathae: were a Bedowi tribe, living for the most part in tents. In any cave the present aspect of the country furnishes a striking commentary on Jeremiah xlviii., e. g. "Joy and gladness is taken from the plentiful field, and from the land of Moab; and I have caused wine to fail from the wine-presses: none shall tread with shouting: their shonting shall be no shouting." [G.W.]
 a fort in the north western part of Cappadocia, which the Emperor Justinian, at the time when he divided the country into three provinces, raised to the rank of the capital of Cappadocia III. On that occasion the place was considerably enlarged, and its name was changed into Justinianopolis. (Procop. de Aed. v. 4 ; Hicrocl. p. 701, where it is miswritten 'Pçєкпuкouad́s, for 'Peyєpoukıad's; Const. Porph. de Them. i. 2; Steph. B. s. v. Moúkırбos; Conc. Const. ii. p. 96.) It modern name is Kir Shehr. [L. S.] DIODI'CIA (Monza), a city of Cisalpine Gaul, situated on the river Lainbrus, about 12 miles N. of Milan, the name of which is not found during the period of the Roman Empire, and it was prububly in
those days a mere village, or at least a dependency of Mediolanam; but the Gothic king Theodoric constructed a palace there, and made it his summer residence. It continued to be a favourite abode of the Lombard kings, and Queen Theodolinda founded a Basilica there, which has ever since been one of the most celebrated churches in the N. of Italy, and still contains many interesting relics of the celebrated Lombard queen. (P. Diac. Hist. Lang. iv. 22. 49.)
[E. H. B.]
 Joseph.; M $\eta \delta \epsilon \in i \mu$, Euseb.), the residence of Mattathias, the gieat grandson of Asamonueus, and the father of Judas Maccabaeus and his four valiant brothers, who was however only a sojourner at Molin, being a native of Jerusalem, and a priest of the course of Joarib. It was probably the native place of the sons, as it was also their burying-place. Here it was that the first opposition to the impious edict of Antiochus Epiphanes was made, when Mattathias slew with his own hand the renegade Jew who had offered idolatrous sacrifice, and demolished the altar. (Jos. Ant. xii. 8. §§ 1, 2.) Judas was buried there in the sepulchre of his father (Ib. 11. § 27); and subsequently on the death of Jonathan, Simon erected a monument of white polished marble over their graves, which he raised to a great height, so as to be conspicuous from afar, and surrounded with a monolithic colonnade. In addition to this, he raised seven pyramids, one fur each of the family, remarkable both for their size and beauty, which remained until the age of the historian (xiii. 6.§ 5 , comp. 1 Mave. xiii. 27-30), as inujeed Eusebius and S. Jerome affirm that the sepulchres of the Maccabees were shown there at their day. (Onomast. s. v.) Josephus (xii. 6. § 1) simply calls it a village of Judaea; but the last-cited authors speak of it as a villase near to Diosiolis (Lydda). The author of the lst Book of Maccabees writes that upon the pillars which were set about the pyramids, Simon " made all their armour for a perpetual memory, and by the armour ships carved, that they might be seen of all that sail on the sea." (xiii. 28, 29.) This would imply that these pyramids were not very far distant from the sea, and so far confirm the report of Eusebius and S. Jerome, who place the sepulchres in the vicinity of Lydda, and perhaps affords some countenance to the idea that the name "Maccabee" was derived from the root מקב the final ralicals of the names of the three patriarchs Abruham, Isaac, and Jacob, which the tribe of Dan, on whose borders Modin was situated, are said to have carried on their banner. (Reland, s. v. p. 901.) A comparatively modern tradition has placed Modin on a remarkabie conical hill, named Síba, $2 \frac{1}{2}$ hours from Jerusalem, on the left of the Jaffia road; but this is, as Dr. Rubinson has remarked "several hours distant from the plain, upon the mountains, and wholly shut out from any view of the sea." (Bib. Res. vol. ii. p. 329.) He suggests that it may have been at Latron, which is also on the Jaffa road, on the very verge of the plain (lbid. note 4, and vol. iii. p. 30, r. 4.) But this is too far from Lydda, and so near to Nicopolis [Emmaus, 2.] that Eusetius would doubtless have described it by its vicinity to that city, rather than to Dinspolis. Its site has yet to be songht.
[G. W.]
MODOGALINGA (Plin. vi. 19. s. 22), one of the larce islands in the Delta of the Ganges. Calinga is of frequent occurreace in the ancient notices of India. [Calimaa.]
[V.]

MODOGULLA (Mosó ${ }^{\circ} o v \lambda \lambda a$, Ptol. vii. 1. § 83), a town mentioned by Ptolemy, on the western side of Hindostin. It is probably the present Modgull, at no great distance from Calliany.

MODOMA'STICE (Moঠoцаのтıки́, Ptol. vi. 6. § 2), one of the four divisions into which Ptolemy divides the province of Carmania Deserta (now Kirnuin).
[V.]
MODRA ( $\tau \mathrm{d}$ M $\delta \delta \rho \alpha$ ), a small town, which, according to Strabo (xii. p. 543), was situated in Phrygia Epictetus, at the sources of the river Gallus; but as this river flows down from the northern slope of mount Olympus, which there forms the boundary between Phrygia and Bithynia, Strabo must be mistaken, and Modra probably belonged to the south-west of Bithynia, and was situated at or near the modern Aine Geul. (Paul. Lucas, Sec. Voy. i. 14.) As Strabo's expression is $\delta x$ Mó $\delta \rho \omega v$, some have supposed that Modra was no town at all, but only a name of a district ; but it is known from Constantine Porphyrogenitus (de Them. vi.) that the district about Modra was called Modrene. [LS.]

MODUBAE (Plin. vi. 19. s. 22), one of sereral unknown triles or nations placed by Pliny beyond the Ganges, in that part of India which was anciently called India extra Gangem.

MODU'RA (M6סoupa, Ptol. vii. 1. § 89.) There are two places of this name mentioned in the accounts of ancient India : one described by Ptolemy (l.c.) as Bacineiov Havoiovos, the Palace of King Pandion ; and the other as Móסoupa $\dot{\eta} \tau \bar{\omega} \nu$ Nิ $\epsilon \bar{\omega} \nu$, the Sucred Modoura (vii. 1. §50). The former of these towns was in the southern part of Hindostin, and is most probably the present ruined city, Madura; the second was in the land of the Caspeiraei in the NW. part of India, either on the frontier or in the Panjab. Its exact position cannot now be determined.

MODUTTI (Moסoúrtov $\langle\mu \pi \delta p t o v$, Ptol. vii. 4. § 7), a port in the island of Taprobane or Ceylon, mentioned by Ptolemy. The strong resemblance of the name makes it extremely probable that it is the same with the present Mantotte, where there are still the remains of a great city, and where a great number of Roman coins of the times of the Antonines have been dug up. It appears to have been situated at the northern point of the island. The inhabitants were called Moठoútroi.
[V.]
MOENUS (the Main), a navigable river of Germany, which has its sources in the Sudeti Montes, near the town of Menosgada, and after flowing in a western direction through the country of the Hermunduri and the Agri Decumates, empties itself into the Rhine, a little above Mugantiacum (Plin. ix. 17; Mela, iii. 3. § 3; Amm. Marc. xvii. 1; Tac. Germ. 28; Eumen. Pareg. Constant. 13.) [L. S.]

MOERIS LACUS ( $\boldsymbol{\eta}$ Moípios $\lambda$ i $\mu \nu \eta$, Herod. ii. 13, 148, seq.; Diod. i. 52; Molpi $\delta$ os $\lambda$ l $\mu \nu \eta$, Strab. xpiii. p. 810; Ptol. iv. 5. §§ 20, 36 ; Mieris Lacus, Mela, i. 9. § 5; Moeridis. Plin. v. 9. s. 9), was the most extensive and remarkable of all the Aegyptian lakes. It formed the western boundary of the Arsinoite nome [Arsinor] in Middle Aegypt, and was connected with the Nile by the canal of Joseph (BahrJusuf). A portion of its ancient bed is represented by the modern Birket-el-Kerun. Of all the remarkable ohjects in a land so replete with wonders, natural and artificial, as Angypt, the lake of Moeris was the most enigmatical to the ancients. Herodotus (ii. 149), who is followed by Pliny (v. 9. s. 9), regarded it as the work of man, and ascribes it to $\#$

## MOERIS LACUS.

king of the same name. This supposition is in. credible, and runs counter both to local tradition and actual observation. "Nothing," says a modern traveller (Browne, Travels in Egypt, p. 169), "can present an appearance so anlike the works of men. On the NE. and S. is a rocky ridge, in every appearance primeval;" and St:abo (xvii. p. 112) observes upon the marine confurmation of its shores and the billowy colour and motion of its waters. So far as it has been bitherto surveyed, indeed, Moeris is known to have been inclosed by elevated lands; and, in early times, the bed of the Nile was too low to admit of its waters flowing into the basin of the lake, even if there had been a natural communication between the river and Moeris. Strabo believed it to be altorether a natural reservoir, and that the canal which connected it with the Nile was alone the work of human art. His opinion is doubtless the correct one, but admits perhaps of some imexlification. The whole of the Arsinoite nome was indebted to human enterprise for much of its extent and fertility. Geologically speaking, it was, in remote periods, a vast limestone valley, the resprvoir of waters descending from the encompassing hills, and prubably, if connected with the Nile at all, the communiestion was sabterraneous. As the accumulated waters gradually subsided, the summits and sides of the higher ground were cultivated. The richness of the suila deposit of clay and muriate of lime, like that of the Oases-would induce its occupiers in every age to rescue the land from the luke, and to run dams and embankments into the water. In the dry reason, therefore, Moeris would exhibit the spectacle of a body of water intersected by peninsulas, and broken by islands, while, at the period of inundation, it would wear the aspect of a vast basin. Accordingly, the accounts of eye-witnesies, such as were Strabo and Herodotus, would vary according to the season of the year in which they inspected it. Moreover, there are grounds for supposing that uncient travellers did not always distinguish between the connecting canal, the Bukr-Jusuf, and Moeris itself. The canal was unquestionably constructed by man's labour, nor would it present any insuperable difficulties to a people so laborious as the Aegyptians. There was also a further motive for redeeming the Moeriote district generally, for the Jands opposite to it, on the eastern bank of the Nile, were generally barren, being either a sandy level or stone quarries, while the soil of the Arsinuite nome was singularly fertile, and suited to various crops, corn, vegetables, and fruit. If then we dis. tinguish, as Strabo did, the canal ( $\delta .06 \rho v \xi$ ) from the lake ( $\lambda(\mu \nu \eta)$, the ancient narratives may be easily reconciled with one another and with modern surveys.
 éatt кal dpuктh) may apply to the canal, which was of considerable extent, beginning at Hermopolis (Ashmuncen), and running 4 leagues W., and then turuing from N . to S . for 3 leagues more, until it reaches the lake. Mudern writers frequently reproach the ancients with assi;ning an incredible extent to the lake; and some of then surmise that Herodutus and Strabo do not speak of the same waters. But the moderns have mositly restricted themselves to the canal, and have either not exphored Moeris itself, the NW shores of which are scarcely known, or have not made allowance for its diminution by the encroaching sands and the detritus of fallen embankments.

We infer, therefore, that the lake Mneris is a natural lake, about the size of that of Genera, and was originally a depression of the limestone platean, which intersects in this latitude the valley of the Nile. Even in its diminished extent it is still at least 30 miles long, and 7 broad. Its direction is from SW. to NE., with a considerable curre or elbow to the $E$. The present level of its surface is nearly the same with that of the Mediterranean, with which indeed, according to a tradition mentioned by Herodotus, it was connected by a subterranean outlet into the Syrtes. If the lake, indeed, ever discharged any portion of its waters into the sea, it must have been in pre-historic times.

The waters of Moeris are impregnated with the alkaline salts of the neighbouring desert, and with the depositions - muriate of lime - of the surrounding hills. But, although brackish, they are nit so saline as to be noxious to fish or to the crocodile, which in ancient times were kept in preserves, and taned by the priests of the Arsinoite nome. (Strab. x vii. p. 112 ; Aelian, IIist. A. x. 24.) The fisheries of the lake, especially at the point where the sluices regulated the influx of the Bahr-Jusuf, were very productive. The revenue derived from them was, in the Pharaonic era, applied to the purchase of the queen's wardrobe and perfumes. Under the Persian kings they gielded, during the season of inundation, when the canal fed the lake, a talent of silver daily to the royal treasury (150l.). Daring the rest of the year, when the waters ebbed towards the Nile, the rent was 30 minae, or $60 l$., daily. In modern times the right of fishing in the Birket-elKerún has been farmed for 13 purses, or about $84 l$, yearly. (Laborde, Révue Fraņ̧aise, 1829, p. 67.) It is probable, indeed, that a copions infusion of Nile water is required to render that of Moeris palatable to man, or salutary for fish.

To Thoutnosis III. the Aegyptians were probably indebted for the canal which connected the lake of Moeris with the Nile. It may have been, in part, a natural channel, but its dykes and embankments were constructed and kept in repair by man. There is, indeed, some difficulty respecting the influx and reflux of the water, since the level of the Bahr-Jusuf is much bigher than that of the Arsinoite nome and the lake; and Herodotus seems to say (ii. 149) that the waters returned by the same channel by which they entered Mueris. As mention is made, however, of sluices at their point of junction, it is possible that a series of floodgates retained or impelled the water. The main dyke ran between the Memphite and Arsinoite nomes.

Belzoni found remains of ancient cities on the western side of Moeris, and is disposed to place the Great Labyrinth in that quarter. But if we may trust the accounts of the best ancient writers, it certainly was not on that side of the lake. Its shores and islands were, however, onvered with buildings. Of the ruins of Arsinoe mention has been made already. But Herodotus tells an extraordinary story of prramids seated in the lake itself (l. c.):-" About the middle of it are two pyramids, each rising 300 feet above the water; the part that is under the water is just the same height. On the top of each is a colossus of stune seated in a chair." This account is singular, as implying that pyramidal buildings were sometimes emploged as the bases of statues. But it is impossible to reconcile this statement with the ascortained depth of the Birket-el-Kerûn, which on an average does
not exceed 12 feet, and even where it is decpest is only 28. We may indeed admit, that, so long as the fisheries were a royal monopoly, a larger body of water was almitted from the Nile, and the ordinary depth of the lake may thus have been greater than at present. It is also possible that much of the surrounding country, now covered with sand, may formerly, during the inundation, have been entirely submerged, and therefore that the pyramids which Herodotus saw, the sides of which even now bear traces of submersion (Vyse, On the Pyramids, vol. iii. p. 84). may have been the truncated pyramids of Biahmu, now beyond the reach of the Birket-el-Kerun, but within the range of the ancient Moeris. Herodotus, if, as is probable, he visited the Arsinoite nome in the wet season, may have been struck with the elevation of these monuments above the lake, and exaggerated their proportions as well above as below its surface. Pococke (Travels, vol. i. p. 65) tells us that he saw on its western extremity, "a head of land setting ont intr the lake, in a semicircular figure, with white cliffs and a height above," which he thought might be the lower part of the two pyramids described by Herodotus. And Pére Lucas (Voyages en Egypte, vol. ii. p. 48) observed an island in the middle of the lake, a good league in circumference. He was assured by his guides that it contained the ruins of several temples and tombs, two of which were loftier and broader than the rest.

The region of Moeris awaits more accurate survey. The best accounts of it, as examined by modern travellers, will be found in Belzoni, Travels; Champollion, ${ }^{\prime}$ Egypte, vol. i. p. 329; Jomard, Descript de [Egyple, vol. i. p. 79; Ritter, Erdkunde, vol. i. p. 803.
[W.B.D.]
MOE'SIA, a Roman province in Europe, was bounded on the S. by M. Haemus, which separated it from Thrace, and by M. Orbelus and Scordus, which separated it from Macedonia. on the W. by M. Scordus and the rivers Drinus and Savus, which separated it from Illyricum and Pannonia, on the N. by the Danube, which separated it from Dacia, and on the E. by the Pontus Enxinus, thus corresponding to the present Servia and Bulgaria. The Greeks called it Mysia (Muria), and the inhabitants Mysians (Mugoi), and sometimes Europran Mysia (Muría ì év Eúpútry, Dion Cass. xlix. 36: Appian, Ill. 6), to distinguish it from Mysia in Asia.

The original inhabitants of Moesia were, according to Strabo, a tribe of Thracians, and were the ancestors of the Mysians of Asia (vii. p. 295). Of the early history of the country, little or nothing is known. In b. c. 277, a large body of Gaulish inraders entered Moesia, after the defeat and death of their leader Brennus, and settled there under the zame of the Scordisci. The Romans first entered Moesia in b. c. 75, when C. Scribonius Curio, proconsul of Macedonia, penetrated as far as the Danube, and gained a victory over the Mresians. (S. Kuf. Brev. 7; Jornand. de Regn. Succ. 50 : f:atrop. vi. 2.) But the permanent subjugation of Moexia was prubably effected by M.Licinius Crassus, the grandson of the triumvir, who was proconsul of Macedonia in B. c. 29. (Liv. Ep. 134, 135; Dion Cass. li. 25-27; Flor. iv. 12, 15.) This may be inferred from the statement of Dion Cassius (liii. 7), who represents Augustus two years afterwards (в. c. 27) speaking of the subjugation of Gallia, IIssia, and Aegypt. Further, in A. d. 6, Dion Cas-
sius mentions the governor of Mysia (lv. 29), and in A. D. 14 Tacitus speaks of the legatus Moesiae (Ann. i. 79); so that there can be no doubt that it was reduced into the form of a province in the reign of Augustas, and that the statement of Appian is incorrect, that it did not become a Roman province till the reign of Tiberius. (Ill. 30.) In the reign of Tiberius, Moesia was laid waste by the Dacians and Sarmatians, being then without a garrison, contrary to the usual Roman practice, for a legion was generally stationed there. (Suet. Tib. 41, Vesp. 6; Tacit. Ann. xvi. 6.) As a frontier province of the empire, it was strengthened by a line of stations and fortresses along the south bank of the Danube. A Roman wall was built from Axiopolis to Tomi, as a defence against the Sarmatians aud Scythians, who inhabited the delta of the Danube. Muesia nas originally only one province, but was divided into two provinces, called Moesia Superior and Inferior, probably at the commencement of Trajan's reign. (Marquardt, in Becker's Romisch. Alterth. vol. iii. pt. i. p. 106.) Each province was governed by a consular legatus, and was divided into smaller districts (regiunes et vici). Moesia Superior was the western, and Moesia Inferior the eastern half of the country; they were separated from each other by the river Cebrus or Ciabrus, a tributary of the Danube. (Ptol. iii. 9, 10.) Thes contained several Roman colonies, of which two, Ratiaria and Oescus, were made colonies by Trajan, and Viminacium by Gordian III. (Marquardt, L. c.) The conquest of Dacia, by Trajan, removed the frontiers of the empire farther north, beyond the Danube. The emperor Hadrian visited Mnesia, as we are informed by his medals, in his general progress through the empire, and games in his honour were celebrated at Pincum. In A. d. 250 the Gotiss invaded Mresia. Decius, who was then emperor, marched against them, but was defeated and killed in a battle with them in 251. What the valoar of Decius could not effect, his successor, Trebonianus Gallus, obtained by bribery; and the Goths withdrew to the Duicster. When Aurelian gave up Dacia to the Goths, and withdrew his troops and part of the inhabitants to the south side of the river, he formed a settlement in the heart of Moesia, which was named from him Dacia dureliani. [Dacta. Vol. I. p. 745.] In 395 the Ostrogoths, being hard pressed by the Huns, requested permission of the Romans to pass the Danube, and settle in Moesia. The request was acceded to by Valens, who was then emperor, and a large number took advantage of the privilege. They soon, however, quarrelled with the Roman authorities, and killed Valens, who marched to oppose them. The Goths, who settled in Moesia, are sometimes called Mueso-Goths, and it was for their use that Ulphilas translated the Scriptures into Gothic about the middle of the fourth century. In the seventh century the Sclavonians entered Moesia, and the Bulgarians about the same time, and founded the kingdoms of Bulgaria and Servia.

Moesia was occupied by various populations; the following are enumerated by Ptolemy and Pliny (P'ol. iii. 9; Plin. iii. 26): the Dardani, Celegeri, Tribulli, Timachi, Moesi, Thraces, Scythae, Tricornesii, Pincensii, Troglodytes, and Peucini, to which may be added the Scordisci. (Liv. xl. 57.) The relative situations of these people were somewhat as follows: the Dardani, said to be a colony from Dardania in Asia. dwelt on the borders of Macedonia. The Triballi dwelt near the river Ciabrus; the

Timachi by the river Timachus．The Triconesii， who derived their name from Tricornam，were on the confines of Dalinatia The Peucini inhabited the island of Peuce，at the mouth of the Danubc． The Thraces were near their own country；the Scordisci，between the Dardani and Dalmatia．The Moesi，or Mysi，proper，inhabited the heart of the country to which they gave their name，on the bauks of the river Ciabrus．
［A．L．］
MOGETIANA or MOGENTIANA，a place in Lower Pannonia，on the road from Sopianae to Sabaria．（IL．Ant．pp．263，233．）Its exact site is uncertain．
MOGONTIACUM or MAGONTIACUM（Mainz）， a city of Gallia，on the Rhine．On this spot was built a monument in honour of Drusus the father of Gernanicus．（Entrop．vii．13．）Magontiacum，as it is written in the text of Tacitus，is often men－ tioned in the history of the war of Civilis．（Tacit． Hist．iv．15，24，\＆ce．）Ptolemy（ii．9．§ 14）writes the name Mokortakor，and places the town in Germania Inferior．In Eutropius the form of the word is Mogontiacum（ed．Verheyk）；but the MSS． have also the forms Maguntia and Moguntia，whence is easily derived the French form Mayence，and the German Maine．The position of Mogontiacum at Mainz on the Rhine is determined by the Itins． which place it 18 M．P．from Bingium（Bingen）， also on the Rhine．It was an important position under the Roman empire，hat no great events are connected with the name．Armianus Marcellinus （xv．11）calls it a Municipium，which means a town that had a Roman form of administration．［G．L．］

MOGRUS（Môypos），a navigable river in Colchis， flowing into the Euxine between the Phasis in the north，and the Isis in the sonth；its mouth is just midway between the two，being 90 stadia distant from each．（Arrian，Peripl．Pont．Eux．p． 7 ；Plin． vi．4．）As an ancient reading in Pliny is Nogrus，and the Table has Nigrus，it is possible that the real name of the river may bave been No－ grus，and that in Arrian also we must read No－ rpos．
［L．S．］
MOLADA（Ma入aסâ），a town of Palestine， reckoned among the uttermost cities of the tribe of Judah toward the coast of Edom southward （Joshua，xv．21．26），and indeed in that part which fell to the tribe of Simeon，＂whose inheritance was within the inheritance of the children of Judah．＂ （Ib．xix．1，2； 1 Chron．iv．24．28．）Reland re－ uarks，＂Videtar esse eadem ac Malatha＂（Palaest． e．v．p．901．），which Malatha is mentioned by Jo－ sephus as a castle of Idumaea，to which Agrippo，the son of Aristobulus and son－in－law of Herod the Great， retired in his distress after his return from Rome，and where he meditated suicide．（Ant．xviii．7．§ 2．）It is mentioned also by Eusebius and S．Jerome as iv．M．P．distant from Arad（＇Apauá），which they describe as an ancient city of the Amorites，situated in the wilderness of Kadesh（Kd $\delta \delta \eta s$ ），xx．M．P．from Hebron，on the road to Aila．（Onomast．s．vo．
 Malatha，pp．885，886．）The site of Arad is still marked by a ruin of the same name，at the required distance S．of Hebron；near to which are wells and rains named El Milh，which Dr．Robinson＂was disposed to regard as marking the site of the an－ cient Moladah of the Old Testament，the Malatha of the Greeks and Romans．＂（Bib．Res．vol．ii． p．621．）

MOLINDAE（Plin．vi．19．s．22），a people men－
tioned by Pliny，who lived in the eastern part of India extra Gangem．It seems probable that they are the same as those noticed by Ptolemy with the name Marundae（Mapoûrठัa，vii．2．§ 14）．［V．］ MOLOCATH．［Mulucha．］ Moloeis．［Platagae．］ MOLOSSI，MOLO＇SSIA．［EPEIRU8．］ Molu＇RIS．［Megara，Vol II．p．317，a．］ MOLYCREIUM，MOLYCREIA，or MOLY＇CRIA （Modúкреєov，Thuc．ii． 84 ；Modúxpeta，Strab．$x$. p．451，et alii ；Moduxpía，Polyb．v． 94 ；Pans．ix． 31．§ 6：Eth．Mo入úкpios，more rarely Mo入uкpiev́s，
 of Aetolia，situated near the sea－coast，and at a short distance from the promontory Antirrhium，which was hence called＇Pioy to Mo入uкpucov（Thuc．ii．86）， or Modúxpiov＇Piov．（Strab．viii．p．336．）Some writers call it a Locrian town．It is said by Strabo to have been built after the return of the Heracleidae into Peloponnesus．It was colonised by the Corinth－ ians，but was subject to the Athenians in the early purt of the Peloponnesian War．It was taken by the Spartan commander Eurylochus，with the assistance of the Aetolians，B．c．426．It was considered sacred to Poseidon．（Strab．x．pp．451，460；Scyl．p． 14 ； Thuc．ii．84，iii． 102 ；Diod．xii． 60 ；Polyb．，Paus．， u．cc．；Plin．iv．2．s． 3 ；Ptol．iii．15．§ 3；Steph． Byz．s．v．）

MOMEMPHIS（M＠$\mu \neq \mu \phi 1 s$, Strab．xvii．p．803： Diodor．i．66， 97 ；Steph．B．s．v．），the capital of the nome Mo－Memphitis，in the Delta．It was seated in lat． $31^{\circ} 5^{\prime} \mathrm{N}$. ，on the eastern shore of the lake Mareotis， N．of the Natron Lakes．Both its ancient and its modern appellation－Manoufelsefly－indicate its position as the Lower Memphis，or Memphis in the marshes．During the troubles which led to the Dodecarchy，Momemphis was a place of some strength，owing to the difficulties of its approaches． It was chiefly remarkable for its exportation of mineral alkalies from the neighbouring Natron Lakes．Athôr or Aphrodite，under the form of a cow，was worshipped at Momemphis．［W．B．D．］

MONA（Móva，Ptol．iii．2．§ 12 ；Móvra，Dion Cass．Ixii．7），an island in Britain，of the coast of the Ordovices，the Isle of Anglesey．

Caesar describes Mona as situated in the middle of the passage from Britain to Ireland（B．G．v．13）， bat by Mona in this passage he must mean the Isle of Man，which Pliny calls Monapia（iv． 16. s．30）；and Ptolemy that of Monarina or Mo－ naoeda（Movapiva，Movdoróa）．

The Isle of Anglesey was first invaded by Sue－ tonius Paullinus，governor of Britain under Nera， A．D．61．Previous to the appointment of Sueto－ nius Panllinus，the Romans had met with some re－ verses in the west of Britain．From the vigorous measures adopted by Paullinus on entering upon the government of Britain，it may be inferred that the Druids of Mona had excited the Ordovices and the Silures to rise in rebellion；or had assisted them ； probably both．Tacitus states that Mons was a re－ ceptacie for fugitives．The island was well populated， and there the priests of the Druidical religion had established themselves in great strength．Paullinus was recalled from the conquest of Anglesey by the revolt of the Britons under Boadicea，and its suhju－ gation was not completed till A．D． 78 by Agricola． （Tac．Agric．pp．15，18，Ann．xiv．29．）［C．R．S．］ MONAPIA．［MONA．］
MONDA．［Munda．］
MONESI，one of the many peoples of Aquitania
enumerated by Pliny, who places them below the Saltus Pyrenaens (iv. 19). The name seems to be preserved in that of Moneins, which is between Pons and Navarreins, where it is said that there are traces of Roman camps. Moneins is in the department of Basses Pyrinies.
[G. L.]
MONE'TIUM (Morpriov), a town of the Lapodes in Illyria (Strab. iv. p. 207, vii. p. 314.)

MONOECI PORTUS (Moyoikov $\lambda_{i \mu h y, ~ S t r a b . ~}^{\text {St }}$ Ptol.), or more correctly PORTUS HERCULIS MONOECI (Plin. iii. 5. § 7 ; Tac. Hist. iii. 42), sometimes also PORTUS HERCULIS alone (Val. Max. i. 6. § 7: Monaco), a port and town on the coast of Liguria, at the foot of the Maritime Alps, distant rather more than 200 stadia from Antipolis. (Strab.iv. p. 202.) Its name was obviously derived from the existence there of a temple of Hercules ; and the Greek form of the epithet by which it was characterised, at once shows that it must have owed its foundation to the Greeks of Massilia. But Strabo, who derives the same inference from the name, had evidently no account of its origin or foundation, which were naturally connected by later writers with the fables concerning the passage of Hercules, so that Ammianus ascribes the foundation of "the citadel and port" of Monoecus to Hercules himself. (Amm. Marc. xv. 10. §9.) The port is well described by Strabo (l.c.) as of small size, so as not to admit many vessels, but well sheltered. Lucan, however, who gives a somewhat detailed notice of it, says it was exposed to the wind called by the Gauls Circius (the Vent de Bise) which rendered it at times an unsafe station for ships (Lucan. i. 405-408) ; and Silius Italicus dwells strongly on the manner in which the whole of this part of the coast of Liguris was swept by the same wind, which be designates under the more general name of Boreas. (Sil. Ital. i. 586-593.) The port was formed by a projecting rocky point or beadland, on which stands the modern town of Monaco, and which was doubtless accupied in like manner in ancient times, at first by the temple of Hercules, afterwards by the town or castle of Monoecus (arx Monoeci, Ammian. l.c.) The town, however, does not seem to have ever been a place of much importance; the advantage of its port for commercial purposes being greatly neutralised by the want of communication with the interior. It was, however, frequently resorted to by the Roman fleets and ships, on their way along the coast of Liguria into Spain; and hence was a point of importance in a naval point of view. (Val. Max. i. 6. § 7 ; Tac. Hist. iii. 42.) The headland of Monaco itself is of comparatively small height, and lies immediately under a great mountain promontory, formed by one of the spars or projecting ridges of the Maritime Alps ; and which was regarded by many writers as the matural termination of the great chain of the Alps. [Alpes, p. 107.]* The passage of this mountain must always have been one of the principal difficulties in the way of constructing a high road along the cosest of Liguria; this was achieved for the first time by Augustus, and on the highest point of the passage (called in the Itineraries "in Alpe summa" and "in Alpe maritima," Itin. Ant. p. 296 ; Tab. Peut.), he erected a trophy or monument to commemorate the complete subjugation of the different

[^19]nations inhabiting the Alps. The inscription of this monument has been preserved to us by Pliny (iii. 20. s. 24), and is one of our chief anthorities for the geography of the Alpine tribes. The ruins of the monument itself, which was of a very massive character, still remain, and rise like a great tower above the village of Turbia, the name of which is evidently a mere corruption of Tropara Augusti (T $\overline{6}$ zaia Eebaotov̂, Ptol. iii. 1. § 2), or Tropaea Alpium, as it is termed by Pling (l.c.).

The line of the Roman road, cut in the face of the mountain, may be traced for some distance on each side of Turbia, and several ancient milestones have been found, which commemorate the construction of the road by Augustus, and its reparation by Hadrian. (Millin. Voy. en Piémont, vol. ii. pp. 135, 138; Durante, Chorographie du Comté de Nice, pp. 23 -30 .)

The port of Monoecus seems to have been the extreme limit towards the E. of the settlements of Massilia, and hence both Pliny and Ptolemy regard it as the point from whence the Ligurian coast, in the more strict sense of the term, began. (Plin. iii. 5. s. 7 ; Ptol. iii. 1. §§ 2, 3.) Ptolemy has made a strange mistake in separating the Portus Herculis and Portus Monoeci, as if they were two distinct places.
[E. H. B.]
MONS AUREUS (Xpúgouy bpos). 1. A mountain in Mocsia Superior, which the emperor Probus planted with vines. (Eutrop. ix. 17, 20 ; It. Ant. p. 132; It. H. p. 564.)
2. A town on the Danube, at the foot of the mountain, 23 miles from Singidunum. (Tab. Peut.)
[A. L.]
MONS BALBUS, a mountain fastness of $N$. Africa, to which Masinissa retired. (Liv. xxix. 31.) Shaw (Trav. p. 184) places the range in the district of Dakhul, E. of Tunis ; perhaps Sabalet-esSahit.
[E.B. J.]
MONS BRISIACUS. This is one of the positions in the Roman Itins. along the Rhine. They place it between Helvetum or Helcebus [Hxicebus] and Urunci. There is no doubt that is VieurBrisach or Altbreisach, as the Germans call it. All the positions of the Itins. on the Rhine are on the west or Gallic side of the river, but Vieux-Brisach is on the east side. The Rhine has changed its bed in several parts, and this is one of the places where there has been a change. Breisach is described by Luitprand of Pavia (quoted by D'Anville), as being in the tenth century sarrounded by the Rhine "in modum insulae." It may have been on an island in the Roman period. The hill (mons) of Altbreisach is a well marked position, and was once crowned by a citadel. Altbreisach is now in the duchy of Baden, and opposite to Neubreisach on the French side of the Rhine.
[G. L.]
MONS MARIO'RUM, a town in Hispania Baetica, on the Mons Marianus, and on the road leading from the mouth of the Anas to Emerita, now Marines, in the Sierra Morena. (It. Ant. p. 442; Inscr. ap. Caro, Ant. i. 20; Spon. Miscell. p. 191 ; Florez, Esp. Sagr. ix. p. 23.)

MUNS SACER ( $\tau \delta$ iepol ${ }^{2} \rho \rho o s$, Ptol. iii. 17. § 4), a mountain range on the SE. coast of Crete, near Hierapytna, identified with the Pytwa (Húrya) of Strabo (x. p. 472; comp. Groskurd, ad loc.; Höck, Kreta, vol. i. p. 16.)
[E. B. J.]
MONS SELEUCUS, in Gallia Narbonensis, is placed in the Antonine Itin. next to Vapincum (Gap), on a road from Vapincum to Yienna (l'ienne)

It is 24 M．P．from Vapincum to Mons Seleucus， and 26 M．P．from Mons Seleucus to Lucus（Luc）． The Jerusalem Itin．has two Mutationes（Ad Fines， and Davianum）between Vapincum and the Mansio Mons Seleucus，and the whole distance is 31 M．P． The distances would not settle the position of Mons Seleacus，but the name is preserved in Salion．The Batic Mont－Saléon is only an abbreviation of the Bastida Montis Seleuci，a name that appears in some of the old documents of Dauphiné．Many remains exist or did exist at Mons Seleucus；certain evidence that there was a Roman town here．
Magnentius was defeated A．D． 353 by Constantius at Mons Seleucus．（Tillemont，Histoire des Em－ pereurs，vol．iv．p． 383 ）The memory of the battle is preserved in several local names，as Le Chump CImpeiris，and Le Champ Batailles．（Ukert，Gal－ lien．p． 448.$)$
［G．L．］
MO＇PSIUM（Móqıov：Eth．Mótos，Steph．B．， Mo廿eteús，a dialectic form of Mo廿！eús），a town of Pelasgiotis in Thessaly，situated upon a hill of the same name，which，according to Livy，was situated midway between Larissa and Tempe．Its ruins are still conspicuous in the situation mentioned by Livy， near the northern end of the lake Karatjair or Nessonis．（Steph．B．s．v．：Strab．ix．pp．441，443； Liv．xlii．61， 67 ；Leake，Northern Greece，vol．iii． p．377．）

MOPSO＇PIA．［PAmpiylia．］
MOPSO＇PIA（Mo廿oтia），an ancient name of Attica，derived from the hero Mopsopus or Mopsops． （Strab．iv．p．397；Lycophr．1339；Steph．B．s．v．）

MOPSUCRE＇NE（Móqov кpעinv ），a town in the eastern part of Cilicia，on the river Cydnus，and not far from the frontier of Cataonia to which Ptolemy （v．7．§ 7），in fact，assigns it．Its site was on the southern slope of Mount Taurus，and in the neigh－ bourhood of the mountain pass leading from Cilicia into Cappadocia，twelve miles north of Tarsus．It is celebrated in history as the place where the em－ peror Constantius died，A．D．361．（Sozom．v．1； Philostorg．vi． 5 ；Entrop．x． 7 ；Amm．Marc．xxi． 29 ； Itin．Ant．p．145，where it is called Namsucrone； It．Hierns．p．579，where its name is mutilated into Mansverine．）
 Eth．Mo廿cát $\boldsymbol{\eta}$ s），a considerable town in the extreme east of Cilicia，on the river Pyramus，and on the rond from Tarsus to Issus．In the earlier writers the town is not mentioned，though it traced its origin to the ancient soothsayer Mopsus；but Pliny （ $\mathrm{\nabla}$ ．22），who calls it Mopsos，states that in his time it was a free town．（Comp．Strab．xiv． p． 676 ；Cic．ad Fam．iii．8；Steph．B．s．v．； Procop．de Aed． $\mathbf{v . ~} 5$ ；Amm．Marc．xiv． 8 ；Phot． Cod．176；Ptol．v．8．§ 7；It．Ant．p．705；Hierocl． p． 705 ；It．Hieros．p．680，where it is called Man－ sista．）A splendid bridge across the Pyramus was built at Mopsuestia by the emperor Constantius． （Malala，Chron．xiii．）It was situated only 12 miles from the coast，in a fertile plain，called＇A $\lambda$ fıo reठiov．（Arrian，Anab．ii． 5 ；Eustath．ad Irionys．

COIN OF mopsuestia．

Per．872．）In the middle ages the name of the place was corrupted into Mamista ；its present narne is Messis or Mensis．Ancient remains are not men－ tioned，and travellers describe Mensis as a dirty and uninteresting place．（Leake，Asia Minor，p．217； Otter＇s Reisen，i．c．8．）
［L．S．］
MORBIUM，in Britain，is mentioned in the Notitia as the quarters of a body of horse Cataphractani （＂praefectus equitum Cataphractariorum Morbio＂）． We are justified by an inscription in placing Mor－ bium at Moresby near Whitchaven，where the re－ mains of a Roman camp are yet to be traced．The inscription，preserved in a MS．of Dr．Stukeley，but not read by him，is upon a monument to the me－ mory of a soldier of the Cataphractarii，which was found within the precincts of the Camp．［C．R．S．］
MORDULAMNE（Mop $\delta o u \lambda d \mu \nu \eta$, Ptol．vii．4．§5）， a port on the eastern coast of Taprobane（Ceylon）． The name is probably a corruption of the MSS．，and ought to be M $\delta \rho \delta o v \lambda_{1} \mu \nmid \nu$ or $M \delta \rho \delta o u \lambda a \quad \lambda_{1} \mu \nmid \nu$ ．It is，perhaps，represented by the present Kaltregam， where there are still extensive ruins．（Ritter，Erd－ kunde，vi．p．22；Davy，Account of Ceylon，p． 420．） ［ V ．］
MORGA＇NTIA，MURGA＇NTIA，or MOKGA＇N－ TIUM（Mopydutiov，Strab．；Mopraytivn，Diod．： Eth．Mopyavtivos．The name is variously written by Latin writers Murgantia，Murgentia，and Mor－ gentia；the inhabitants are called by Cicero and Pliny，Murgentini），a city of Sicily，in the interior of the island，to the SW．of Catana．It was a city of the Siculi，though Strabo assigns its foundation to the Morgetes，whom he supposes to bave crosed over from the southern part of Italy．（Strab．vi． pp．257，270．）But this was probably a mere inference from the resemblance of name；Stephamas of Byzantium（s．v．），who is evidently alluding to the same tradition，calls Morgentium，or Morgentia （as he writes the name），a city of Italy，but no such place is known．［Morgetes．］Strabo is the only author who notices the existence of the Morgetes in Sicily；and it is certain that when Morgantium first appears in history it is as a Siculian town．It is first mentioned by Diodorus in B．c．459，when he calls
 78）：it was at this time taken by Ducetius，who is said to have added greatly to his power and fame by the conquest；but after the fall of that leader， it became again independent．We next hear of it in B．c．424，when，according to Thucydides，it was stipulated，at the peace concluded by Hermocrates， that Morgantia（or Morgantina，as he writes the naine）should belong to the Camarinaeans，they paying for it a fixed sum to the Syracasans．（Thuc． iv．65．）It is impossible to understand this arrange－ ment between two cities at such a distance from one another，and there is probably some mistake in the names．＊It is certain that in b．c．396，Mor－ gantia again appears as an independent city of the Siculi，and was one of those which fell under the arms of Dionysius of Syracuse，at the same time with Agyrium，Menaenum，and other places．（Diod． xiv．78．）At a later period it afforded a refuge to Agathocles，when driven into exile from Syracuse，

[^20]and it was in great part by the assistance of a body of mercenary troops from Morgantia and other towns of the interior, that that tyrant succeeded in establishing his despotic power at Syracuse, b.c. 317. (Justin. xxii. 2; Diod. xix. 6.) Morgantia is repeatedly mentioned during the Second Punic War. During the siege of Syracuse by Marcellus it was occupied by a Roman garrison, and great magazines of corn collected there; but the place was betrayed by the inhabitants to the Carthaginian general Himilco, and was for some time occupied by the Syracusan leader Hippocrates, who from thence watched the proceedings of the siege. (Liv. xxiv. 36, 39.) It was ultimately recovered by the Roman general, but revolted again after the departure of Marcellus from Sicily, B. c. 211 ; and being retaken by the praetor M. Cornelius, both the town and its territory were assigned to a body of Spanish mercenaries, who had deserted to the Romans under Mericus. (Id. xxvi. 21.)

Morgantia appears to have still continued to be a considerable town under the Roman dominion. In the great Servile insurrection of B. C. 102 it was besieged by the leaders of the insurgents, Tryphon and Athenion; but being a strong place and well fortified, offered a vigorous resistance; and it is not clear whether it ultimately fell into their hands or not. (Diod. xxxvi. 4, 7. Exc. Phot. pp. 533, 534.) Cicero repeatedly mentions its territory as one fertile in corn and well cultivated, though it suffered severely from the exactions of Verres. (Cic. Verr. iii. 18. 43.) It was therefore in his time still a municipal town, and we find it again mentioned as such by Pliny (iii. 8. s. 14); so that it must be an error on the part of Strabo, that he speaks of Morgantium as a city that no longer existed. (Strab. vi. p. 270.) It may, however, very probably have been in a state of great decay, as the notice of Pliny is the only subsequent mention of its name, and from this time all trace of it is lost.

The position of Morgantia is a subject of great uncertainty, and it is impossible to reconcile the conflicting statements of ancient writers. Most authorities, however, concur in associating it with the Siculian towns of the interior, that border on the valleys of the Symaethus and its tributaries, Menaenum, Agyrium, Assorus, \&c. (Diod. xi. 78, xiv. 78; Cic. Verr. l. c.; Sil. Ital. xiv. 265); and a more precise testimony to the same effect is found in the statement that the Carthaginian general Mago encamped in the territory of Agyrium, by the river Chrysas, on the road leading to Morgantia. (Diod. xiv. 95.) The account of its siege during the Servile War also indicates it as a place of natural strength, built on a lofty hill. (Diod. xxxvi. l. c.) Hence it is very strange that Livy in one passage speaks of the Roman fleet as lying at Morgantia, as if it were a place on the sea-coast; a statement wholly at variance with all other accounts

COIN OF MORGANTIA.
of its position, and in which there must probably be some mistake. (Liv. xxiv. 27.) On the whoie we may safely place Morgantia somewhere on the borders of the fertile tract of plain that extends from Catania inland along the Simeto and its tributaries; and probably on the hills between the Dittaino and the Gurna Longa, two of the principal of those tributaries; but any attempt at a nearer determination must be purely conjectural.

There exist coins of Morgantia, which bave the name of the city at full, MOPCANTIN $\Omega N$ : this is unfortunately effaced on the one figured in the preceding column.
[E. H. B.]
MORGE'TES (Móprøт ${ }^{\prime}$ ), an ancient people of southern Italy, who had disappeared before the period of authentic history, but are noticed by several ancient writers among the earliest inhabitants of that part of the peninsula, in connection with the Oenotrians, Itali, and Siculi. Antiochus of Syracuse (ap. Dionys. i. 12) represented the Siculi, Morgetes and Italietes as all three of Oenotrian race; and derived their names, according to the favourite Greek custom, from three successive rulers of the Oenotrians, of whom Italus was the first, Morges the second, and Siculus the third. This last monarch broke up the nation into two, separating the Siculi from their parent stock; and it would seem that the Morgetes followed the fortunes of the younger branch; for Strabo, who also cites Antiochus as his anthority, tells us that the Siculi and Morgetes at first inhabited the extreme southern peninsula of Italy, until they were expelled from thence by the Oenotrians, when they crossed orer into Sicily. (Strab. vi. p. 257.) The geographer also regards the name of Morgantium in Sicily as an evidence of the existence of the Morgetes in that island (Ibid. pp. 257. 270); but no other writer notices them there, and it is certain that in the time of Thucydides their name must have been effectually merged in that of the Siculi. In the Etymologicon Magnum, indeed, Morges is termed a king of Sicily: but it seems clear that a king of the Siculi is intended; for the fable there related, which calls Siris a daughter of Morges, evidently refers to Italy alone. (Etym. M. v. Eifis.) All that we can attempt to deduce as historical from the legends above cited, is that there appears to have existed in the S. of Italy, at the time when the Greek colonists first became acquainted with it, a people or tribe bearing the name of Morgetes, whom they regarded as of kindred race with the Chones and other tribes, whom they included under the more general appellation of the Oenotrians. [Oenotria.] Their particular place of abode cannot be fixed with certainty; but Strabo seems to place them in the southern peninsula of Bruttium, adjoining Rhegium and Locri. (Strab. vi. p. 257.) [E.H. B.]

MORGINNUM, in Gallia Narbonensis, is placed by the Table on the road from Vienna (Vienne) to Alpis Cottia, and 14 M. P. short of Cularo (Grenoble). The place is Moirans. [G. L.]

MORI'AH. [Jerusalem.]
MORICAMBA (Mорıка́ $\mu 6 \eta$, Ptol. ii. 3. § 3), an estuary of Britain, Morecambe Bay, on the coast of Lancashire.
[C.R.S.]
MORIDU'NUM, in Britain, placed both by the Antonine Itin. and Geogr. Rav. near Isca of the Dumnonii (Exeter) : it was one of the stations termed mansiones and mutationes, probably the latter : its site has by no means been agreed upon by
topographers, and three or four localities have been proposed. Of these, Seaton and Hembury, near Ifoniton, appear to have the best claims for consideration ; but as the stations next to large towns were often merely establishments for relays of horses and other purposes connected with posting, they were the least likely to he constracted on a large or substantial scale; and thus we have often great difficulty in detecting even a vestige of them. [C. R. S.]

MORIMARUSA. [Oceanus Sfptentrionalis.]
MORI'MENE (Mopıцеvi), a district in the northwest of Cappadocia, comprising both banks of the river Halys, is said to have been fit only for pasture land, to have bad scarcely any fruit-trees, and to have abounded in wild asses. (Strab. xii. pp. 534, 537, 539, 540 ; Plin. H. N. vi. 3.) The Romans regarded it as a part of Galatia, whence Ptolemy ( $\mathbf{\nabla} .6$ ) does not mention it among the districts of Cappadocia.
[L. S.]
MO'RINI, a nation of Belgica. Virgil is the authority for the quantity: -
"Extremique hominum Morini." (Aen. viii. 727.)
It has been shown in the article Mensipir that on the north the Morini were bounded by the Menapii. On the west the ocean was the boundary, and on the south the Ambiani and the Atrebates. The eastern boundary cannot be so easily determined. The element of Morini scems to be the word mor, the sea, which is a common Flemish word still, and also found in the Latin, the German, and the English languages.

Caesar, who generally speaks of the Morini with the Menapii, has fixed their position in general terms. When he first invaded Britannia he went into the country of the Morini, because the passage from there to Britain was the shortest (B. G. iv. 21). In the next expedition, b.c. 54, he sailed from Portus Itius, having ascertained that the passage from this port to Britain was the most commodious. Portus Itius is in the conutry of the Morini [ITius Portus]. Ptolemy (ii. 9. § 8) mentions two cities of the Morini, Gesoriacum or Bononia (Boulogne), and Taruenna (Thérouenne), east of it, in the interior. If we add Castellum Morinorum (Cassel), in the interior, south of Dunkerque, "we see that, besides the diocese of Boulogne, the territory of the Morini comprises the new dioceses of SL Oner and Ypern, which succeeded to that of Tournai." (D'Anville.) But if Cassel is not within the limits of the Morini, their territory will not be so extensive as D'Anville makes it. [MenapiI.]

Caesar's wars with the Morini were more successful than with the Menapii. A large part of the territory of the Morini did not offer such natural obstacles as the land of the Menapii. The marshes of the Morini would be between Calais and Lunkerque. The force which the Morini were supposed to be able to send to the Belgic confederation in B.c. 57 was estimated at 25,000 men. Though most of the Morini were subdued by Caesar, they rose again in the time of Augustus, and were put down by C. Carinas (Dion Cassius, li. 21). When Bononia was made a Roman port, and Taruenna a Roman town, the country of the Morini would become Komanised, and Roman usages and the Roman language would prevail. There were Roman roads which terminated at Bononia and Castellum.

An inscription mentions the Decemviri of the Colonia Morinorum, but it is unknown what place it is.
[G. L.]

## MOSCHA PORTUS.

MO'RIUS. [Boeotia, Vol. I. p. 412. b.]
MORON (Mopous), a town of Lusitania apon the Tagus, which Brutus Callaĭcns made his headquarters in his campaign against the Lusitanians. (Strab. iii. p. 152.) Its exact site is unknown.

MORONTABARA ( $\tau$ à Mopovtdbapa, Arrian, Indic. c. 22), a place on the coast of Gedrosia, at no great distunce W. of the mouths of the Indus, noticed by Arrian in his account of Nearchus's expedition with the fleet of Alexander the Great. It does not appear to have been satisfactorily identified with any modern place.
[V.]
MOROSGI, a town of the Varduli in Hispania Tarraconensis, identified by Ukert with St. Sebastian, which, however, more probably represents Menusca. (Plin. iv. 20. s. 34; Ukert, ii. 1. p. 446; Forbiger, iii. p. 80.)

MortuUM Mare. [Palafgtina.]
MORTUUM MARE.
[SEptentrionalis Oceanus.]

MORYLLUS. [Mygdonia.]
MOSA in Gallia is placed by the Antonine Itin. between Andomatunum (Langres) and Tullum (Toul). It is 18 M. P. from Andomatonum to Mosa, which is supposed to be Mevere, situated at a passage over the Maas, and in the line of an old Roman road.
[G. L.]
MOSA (Mans), a river of Gallia, which Caesar supposed to rise in the Vusegus (Vosges) within the limits of the Lingones. (B. G. iv. 10.) This passage of Caesar, in which he speaks of the Moss in the lower part of its course receiving a part of the Rhine, called Vahalis (Waal), is very obscure. This matter is discussed in the article Batavi. Dion Cassius writes the word in the form Móoas (xliv. 42); and Ptolemy (ii. 9. § 3) has the form M6́бa in the genitive.

Caesar (B. G. vi. 33) says that the Scaldis (Schelde) flows into the Moss; a mistake that might easily be made with such knowledge of the coast of Belgium and Holland as he possessed. The only branch of the Mosa which Caesar mentions is the Sabis (Sambre), which joins the Maas on the left bank at Charleroi in Belgium.

The Mars, called Meuse by the French, rises about $48^{\circ} \mathrm{N}$. lat. in the Faucilles, which unite the Cöte $d O r$ and the Vosges. The general course of the Maas is north, but it makes several great bends before it reaches Liege in Belgiam, from which its course is north as far as Grare, where it turns to the west, and for 80 miles flows nearly parallel to the Waal. The Maas joins the Waal at Gorcum, and, retaining its name, flows past Rotterdam into the North Sea. The whole length of the Maas is above 500 miles.
[G. L.]
MOSAEUS (Mćvalos, Ptol. vi. 3. § 2), a small stream, placed by Ptolemy between the Eulaeus and the Tigris. It is probably the same as that called by Marcian (p. 17) the Maraios. It was, no doabt, one of the streams which together form the mouths of the Ticris, and may nut impossibly be the same which Pliny nanes the Aduna (vi. 27, 31), and which he appears to have considered as a feeder of the Eulacus.

MOSCHA PORTUS (Mor $\chi a$ $\left.\lambda_{\mu} \mu \boldsymbol{\eta} \nu\right)$. 1. A harbour on the S . cosst of Arabia, near the extrene east of the Adramitas, or more properly of the Ascitae, since the next named place is "Syagros ex trema" ( iúaypos $a^{\prime}$ apa), and the Ascitae extended from Syagros mons to the sea. (Ptol. vi. 7. p. 153, comp. p. 154). Mr. Forster thinks there is no diffi-

MOSCHI.
MOSFLLA.
culty in identifying it with Kesem, the last seaport westward of Cape Fartask, his "Syagros extrema." (Geogr. of Arabia, vol. ii. pp. 164. 178.) The position assigned it by D'Anville at the modern Muscat is certainly untenable. (lb. pp. 167, 168, 224, 233, 234.)
2. A second harbour of this name is mentioned by the author of the Periplus, on the east of the Syagros Promontorium, in the large bay named by
 east of the smaller one, named Omana ('OMava), by the author of the Periplus, who places this Moscha Portus 1100 stadia east of Syagros. He calls it a port appointed for the lading of the Sachalite in-
 you $\pi \rho d s$ d $\mu 80 \lambda h \nu$ ), frequented by ships from Cane, and a wintering-place for late vessels from Limyrice and Barygaza, where they bartered fine linen, and corn, and oil for the native produce of this coast. Mr. Forster furnishes an ingenious etymological explanation of the recurrence of this name on the coast of the Sachalites Sinus. "The Arabic Moscha, like the Greek dokós, signifies a hide, or skin, or a bag of skin or leather blown up like a bladeler. Now, Ptolemy informs us that the pearl dirers who frequented bis Sinus Sachalites (unquestionably the site of Arrian's Moscha Portus), were noted for the practice of swimming, or floating about the bay, supported by inflated hides or skins. What more natural than that the parts frequented by these divers should be named from this practice ? . . . And hence, too, the name of the Ascitae of Ptolemy (' floaters on skins'), the actual inhabitants of his Moscha Portus immediately west of his Suágros." It is a remarkable fact mentioned by modern travellers, that this practice still prevails among the fishermen on this coast; for "as the natives have but few canoes, they generally substitute a single inflated skin, or two of these having a flat board across them. On this frail contrivance the fisherman seats himself, and either casts his small hand-net or plays his hook and line." (Lieut. Wellsted, Travels in Arubia, vol. i. pp. 79, 80, cited by Forster, Arabia, vol. ii. p. 175, note*.) The identification of Arrian's Moscha with the modern Ausera, is complete. Arrian reckons 600 stadia from Syagros across the bay which he names Omana. This measurement tallies exactly with that of the Bay of Seger, in Commodore Owen's chart of this cosst; and from the eastern extremity of this bay to Moscha Portus, Arrian assigns a distance of 500 stadia, which measures with nearly equal exactness the distance to Ras-al-Sair (the Ausara of Ptolemy), situated about 60 Roman miles to the east of the preceding headland. The identity of the Moscha Portas of Arrian with the Ausara of Ptolemy is thus further corroborated. "Arrian states his Moecha Portus to have been the emporium of the incense trade; and Pliny proves Ausara to have been a chief emporium of this trade, by his notice of the fact that one particular kind of incense bore the name of Ausaritis." (Plin. xii. 35; Forster, l. c. pp. 176, 177.)
[G. W.]
MOSCHI (M6oxoi, Hecat. Fr. 188, ap. Sleph. B. ع. 0.), Colchian tribe, who have been identified with the Meshech of the prophet Ezekiel (xxvii. 13 ; Rosenmiller, Bibl. Alterthumsk, vol. i. pt. i. p 248). Along with the Tibareni, Mosynaeii, Macrones, and Mardae, they formed the 19th satrapy of the Persian empire, extending along the SE. of the Eaxine, and bounded on the S. by the lofty chain of the Armenian mountains. (Herod iii.

94, vii. 78.) In the time of Strabo (xi. pp. 497 -499) Moschice (Moб $\chi$ ıкй) - in which was a temple of Leucothea, once famons for its wealth, but plundered by Pharnaces and Mithridates - was divided between the Colchians, Albanians, and Iberians (comp. Mela, iii. 5. § 4 ; Plin. vi. 4). Procopins (B. G. iv. 2), who calls them Mé $\quad$ Øot, zays that they were subject to the Iberians, and had embraced Christianity, the religion of their masters. Afterwards their district became the appanage of Liparites, the Abasgian prince. (Cedren. vol. ii. p. 770; Le Bean, Bus Empire, rol. xiv. p. 355 ; St. Martin, Mémoires sur [Armenie, vol. ii. p. 222.)
[E. B. J.]
 i. p. 61, xi. pp. 492, 497, 521, 527, xii. p. 548, Plut. Pomp. 34 ; Mela, i. 19. § 13 ; Ptol. v. 6. § 13; Moschicus M., Plin. v. 27), the name applied, with that of Paryadres, and others, to the mountain chain which connects the range of Anti-Taurus with the Caucasus. Although it is obviously impossible to fix the precise alevation to which the ancients assigned this name, it may be generally described as the chain of limestone mountains, with volcanic rocks, and some granite, which, branching from the Caucasus, skirts the E. side of Imiretia, and afterwards, under the name of the Perengah Tagh, runs nearly SW. along the deep valley of Ajirah in the district of Tchildir; from whence it turns towards the S., and again to the W. along the valley of the Acampsis, to the W . of which, bearing the name of tee Kop Taigh, it enters Lesser Asia. (Ritter, Erdkunde, rol. x. p. 816 ; Chesney, Exped. Euphrat. vol. i. p. 235.)
[E. B. J.]
MOSE in Gallia appears in the Table on a road from Durocortorum (Reims) to Meduantum. [Meduantum.] The place appears to be Mouzon on the Maas. D'Anville says that the place is called Mosomagus in the oldest middle age records. [G.L.]

MOSELLA (Mosel, Moselle), a river of Gallia, which joins the Rhine at Coblenz [Confluentes]. In the narrative of his war with the Usipetes and Tenctheri Caesar (B. G. iv. 15) speaks of driving them into the water "ad confluentem Mosae et Rheni." One of the latest and best editors of Caesar, who however is singularly ignorant of geography, supposes this confluence of the Mosa and the Khenus to be the junction of the Moss and a part of the Rhenus which is mentioned by Caesar in another place (B. G. iv. 10; Mosa.) But this is impossible, as D'Anville had shown, who observes that the Usipetes [Menapir] had crossed the Rhine in the lower part of its course, and landed on the territory of the Menapii. Having eaten them up the invaders entered the country of the Ebarones, which we know to be between the Rbine and the Mosa, and higher up than the country of the Menapii. From the Eburones the Germans advanced into the Condrusi in the latitude of Lïge; and they were here before Caesar set out after them. (B. G. iv. 6.) Caesar's narrative shows that the German invaders were not thinking of a retreat: their design was to penetrato further into Gallia, where they had heen invited by some of the Gallic states, who hoped to throw off the Roman yoke. After the defeat of the Germans on the river, Caesar built bis wooden bridge over the Rhine, the position of which was certuinly somewhere between Coblenz and Andernach. The conclusion is certain that this confluence of the Rhenus and the Moia is the confluence of the Rhenus and the Mosella at Coblenz ; and we must explain Caessu's
mistake as well as we can. It is possible that both rivers were called Mosa; and Mosella or Mosula, as Florus has it, seems to be a diminutive of Mosa, bat that reading is somewhat doublful. (Florus, iii. 10. ed. Duk.) There is no rariation in Caesar's text in the passage where he speaks of the confluence of the Rhenus and the Mosa. (Caesar, ed. Schneider.) Several of the affluents of the Mosel are mentioned in the ancient writers, and chiefly by Ausonius: the Sura (Sour), Pronaea (Prum), Nernesa (Nims), Gclbis (Kill), Erubrus (Ruver), Lesura (Leser), Drahonus (Drone), Saravus (Sicar), and Salmona (Salm).

The Mosella is celebrated in one of the longer poems of Ausonius, who wrote in the 4th century A. D. The vine at that time clothed the slopes of the hills and the cliffs which bound this deep and picturesque river valley in its course below Trier:
"Qua sublimis apex longo super ardua tractu,
Et rupes et aprica jugi, flexusque sinusque
Vitibus adsurgunt naturalique theatro." (v. 154.)
There is a German metrical translation of this poem by Böcking with notes.

The Mosel rises on the western face of the Vosges, and its upper course is in the hill country, formed by the offsets of the mountains. It then enters the plain of Lorraine, and after passing Tullum (Toul), it is joined by the Meurthe on the right bank. From the junction of the Meurthe it is navigable, and has a general north course past Divodurum (Metz), and Thionville, to Augusta Trevirorum (Trier or Trèves). From Trier its general course is about NNE. with many great bends, and in a bed deep sunk below the adjacent country, to its junction with the Rhine at Coblenz. The whole course of the river is somewhat less than 300 miles. It is navigable for steamboats in some seasons as far as Metz.

A Roman governor in Gallia proposed to unite the Mosella and the Arar (Saîne) by a canal, and thus to effect a navigation from the Mediterrancan to the North Sea [Galla Transalpina, Vol. I. p. 967.]
[G. L.]
MOSTE'NI (Moбтnyol), a town of Lydia in the Hyrcanian plain, south-east of Thratira, and on the road between this latter town and Sardis. In A. D. 17, Mosteni and many other towns of that country were visited by a fearful earthquake. (Ptol. v. 2. § 16; Tac. Ann. ii. 17 ; Hierocl. p. 671 , where it is erroneously called Muativo or Mórtiva; Concil. Chalc. p. 240. where it bears the name MougThuŋ.) Its exact site is unknown. (Comp. Rasche, Lex. Num. iii. 1. p. 869, \&cc.)
[L. S.]

## MOSYCHLUS. [Lemnos.]

MOSYNOECI, MOSSYNOECI, MOSYNI, MOSSYNI (Mođúvoikot, Moббúvoikot, Moбvvol, Moбovvoi), a tribe on the coast of Pontus, occupying the district between the Tibareni and Macrones, and containing the towns of Cerrasus and Pharnacia. The Mosynoeci were a brave and warlike people, but are at the same time said to have been the rudest and most uncivilised among all the tribes of Asia Minor. Many of their peculiar customs are noticed by the Greeks, who planted colonies in their districts. They are said to have lived on trees and in towers. (Strab. xii. p. 549.) Their kings, it is said, were elected by the people, and dwelt in an isolated tower rising somewhat above the houses of his subjects, who watched his proceedings closely, and provided him with all that was necessary ; but when he did
anything that displeased them, they stopped their supplies, and left him to die of starvation. (Xen. Anab. v. 4. § 26 ; Apollon. Rhod. ii. 1027 ; Diod. xiv. 30 ; Scymnus, Fragm. 166.) They used to cut off the heads of the enemies they had slain, and carry them about amid dancer; and songs. (Xen Anab. iv. 4. § 17 ; v. 4. § 15.) It is also related that they knew nothing of marriage (Xen. Anab. v. 4. § 33 ; Diod. L. c.), and that they generally tattooed their bodies. Eating and drinking was their greatest happiness, whince the children of the wealthy among them were regularly fattened with salt dolphins and chestnuts, uutil they were as thick as they were tall (Xen. Anab. v. 4. § 32). Their arms consisted of heavy spears, six cubits in length, with round or globular handles; large shields of wicker-work covered with ox-hides ; and leather or wooden helmets, the top of which was adorned with a crest of hair. (Xen. l.c., v. 4. § 12 ; Herod. vii. 78.) The fourth chapter of the fifth book of Xenophon's Anabasis is full of curious information abont this singular people. (Comp. also Strab. xi. p. 528 ; Hecat. Fraym. 193; Steph. B. a. v. ; Herod. iii. 94 ; Scylax, p. 33.; Amm. Marc. xxii. 8; Orph. Argom. 740 ; Mela, i. 19 ; Tibull. iv. 1. 146; Curtius, vi. 4, 17 ; Plin. vi. 4 ; Val. Flacc. v. 152; Dionys. Per. 766.)
[L. S.]
MOTE'NE. [OTEne.]
MO'TYA (Motún: Eth. Morvaĩos: S. Pantaleo), a city on the W. coast of Sicily, between Drepanum and Lilybaeum. It was situated on a small island, about three quarters of a mile (six stadia) from the mainland, to which it was joined by an artificial causeway. (Dind. xiv. 48.) It was originally a colony of the Phoenicians, who were fond of chousing similar sites, and probably in the first instance merely a commercial station or emporium, but gradually rose to be a flourishing and important town. The Greeks, however, according to their custom, assigned it a legendary origin, and derived its name from a woman named Motya, whom they connected with the fables concerning Hercules. (Steph. B. s. v.) It passed, in common with the other Phoenician settlements in Sicily, at a later period under the government or dependency of Carthage, whence Diodorus calls it a Carthaginian colony; but it is probable that this is not strictly correct. (Thuc. vi. 2; Diod. xiv. 47.) As the Greek colonies in Sicily increased in numbers and importance the Phoenicians gradually abandoned their settlements in the immediate neighbourhood of the new comers, and concentrated themselves in the three principal colonies of Solus, Panormus, and Motya. (Thuc. l. a.) The last of these, from its proximity to Carthage and its opportune situation for communication with Africa, as well as the natural strength of its position, became one of the chief strongholds of the Carthaginians, as well as one of the most important of their coinmercial cities in the island. (Diod. xiv. 47.) It appears to have held, in both these respects, the same position which was attained at a later period by Lilybaeum. [Lilfbaeum.] Notwithstanding these accounts of its early importance and flourishing condition, the name of Motya is rarely mentioned in history until just before the period of its memorable siege. It is first mentioned by Hecataeus (ap.Steph. B. s. v.), and Thucydides notices it among the chief colunies of the Phoenicians in Sicily, which still subsisted at the period of the Athenian expedition, s.c. 415. (Thuc. vi. 2.) A few years later (B. c. 4 (9) when the Carthaginian amy unuer

Hannibal landed at the pmmontory of Lilybaeum, that general laid up his fleet for security in the gulf around Motya, while he advanced with his land forces along the coast to attack Selinus. (Diod. xiii. 54. 61.) After the fall of the latter city, we are told that Hermocrates, the Syracusan exile, who had established himself on its ruins with a numerons band of followers, laid waste the territories of Motya and Panormus (Id. xiii. 63); and again during the second expedition of the Carthaginians under Hamilcar (b.c. 40\%), these two cities became the permanent station of the Carthaginian fleet. (Id. xiii. 88.)

It was the important position to which Motys had thus attained that led Dionysius of Syracuse to direct his principal effirts to its reduction, when in B. c. 397 he in his turn invaded the Carthaginian territory in Sicily. The citizens on the other hand, relying on succour from Carthage, made preparations for a vigorous resistance; and by cutting off the causeway which united them to the msinland, compelled Dionysius to have recourse to the tedious and laborious process of constructing a mound or mole of earth across the intervening space. Even when this was accomplished, and the military engines of Dionysius (among which the formidable catapult on this occasion made its appearance for the first time) were brought up to the walls, the Motyans continued a desperate resistance ; and after the walls and towers were carried by the overwhelning forces of the enemy, still maintained the defence from strect to street and from house to honse. This obstinate struggle only increased the previous exasperation of the Sicilian Greeks against the Carthaginians; and when at length the troops of Dionysius made themselves masters of the city, they put the whole surviving population, men, women, and children, to the sirord. (Diod. xiv. 47-53.) After this the Syracusan despot placed it in charge of a garrison under an officer named Biton; while his brother Leptines made it the station of his fleet. But the next spring (b. c. 396) Himilcon, the Carthaginian general, having landed at Panormus with a very large force, recovered possession of Motya with comparatively little difficulty. (Id. ib. 55.) That city, however, was not destined to recover its former importance ; for Himilcon, being apparently struck with the saperior advantages of Lilybaeum, founded 2 new city on the promontory of that name, to which lie transferred the few remaining inhabitants of Motya (Diod. xxii. 10. p. 498.) From this period the latter altogether disappears from history : and the little islet on which it was built, has probably ever since been inhabited only by a few fishermen.

The site of Motya, on which eariier gengraphers were in much doubt, has been clearly identified and described by Captain Smyth. Between the promontory of Lilybaeum (Capo Boéo) and that of Aegithallus ( $S$. Teodoro), the coast forms a deep bight, in front of which lies a long group of low rocky islets, called the Stagnone. Within these, and considerably nearer to the mainland, lies the small island called S. Pantaleo, on which the remains of an ancient city may still be distinctly traced. Fragments of the walls, with those of two galeways, still exist, and coins as well as picces of ancient brick and pottery - the never failing indications of an ancient site - are fonnd scattered throughout the island. The circuit of the latter does not exceed a mile and a half, and it is inhabited ouly by a few fishermen; but is nut devoid of
fertility. (Smyth's Sicily, pp. 235, 236.) The confined space on which the city was built agrees with the description of Diodorus that the houses were lofty and of solid construction, with narrow streets ( $\sigma \tau \epsilon \nu \omega \pi o l$ ) between them, which facilitated the desperate defence of the inhabitants. (Diod. xiv. 48,51 .)

It is a singular fact that, though we have no account of Motya having received any Greek population, or fallen into the hands of the Greeks before its conquest by Dionysius, there exist coins of the city with the Greek legend MOTTAION. They are, however, of great rarity, and are apparently imitated from those of the neighbouring city of Segesta. (Eckhel, vol. i. p.225.) [E. H. B.]

COLN OF MOTYA.
MO'TYCA, or MU'TYCA (Mb́rouka, Ptol. : Eth. Mutycensis, Cic. et Plin.: Jforlica), an inland town in the SE. of Sicily, between Syracuse and Camarina. It was probably from an early period a dependency of Syracuse; and hence we meet with no mention of its name until after the Roman conquest of Sicily, when it became an independent municipium, and apparently a place of some consequence. Cicero tells us that previons to the exactions of Verres, its territory (the "ager Mutycensis") supported 187 farmers, whence it would appear to have been at once extensive and fertile. (Cic. Verr. iii. 43,51.) Motyca is also mentioned among the inland towns of the island both by Pliny and Ptolemy; and though its name is not found in the Itineraries, it is again mentioned by the Geographer of Ravenna. (Plin. iii. 8. § 14 ; Ptol. iii. 4. § 14 ; Geogr. Kav. v. 23.) Silius Italicus also includes it in his list of Sicilian cities, and immediately associates it with Netum, with which it was clearly in the same neighbourhood. (Sil. Ital. xiv. 268.) There can be no doubt that it is represented by the modern city of Modica, one of the largest and most populous places in the Val di Noto. It is situated in a deep valley, surrounded by bare limestone mountains, about 10 miles from the sea.
Ptolemy notices also a river to which he gives the name of Motychanus (Motíxayos notaubs), which he places on the $S$. coast, and must evidently derive its name from the city. It is either the trifling stream now known as the Fiume di Scicli, which rises very near Modica; or perhaps the more considerable one, now known as Fiume di Ragusa, which flows within a few miles of the same city. [E. H. B.]

MO'TYUM (Mbruov), a small town or fortress of Sicily, in the territory of Agrigentum. It was besieged in B. $\mathbf{c} .451$ by the Siculian chief Ducetius, and fell into his hands after a battle in which he defeated the Agrigentines and their allies; but was recovered by the Agrigentines in the course of the following summer. (Diod. xi. 91.) No other mention of it is found, and its site is wholly unknown. [E. H. B.]

MOXOE'NE, one of the five provinces beyond the Tigris, ceded by Narses to Galerios and the lomans, and which Sapor afterwards recovered
from Jovian. (Amm. Marc. xxv. 7. § 9, comp. xxiii. 3. § 5 ; Le Beau, Bas Empire, vol. i. p. 380, vol. iii. p. 161 ; Gibbon, cc. xiii. xxiv.). Its exact pasition cannot be made out, though it must have been near Kurdistán. (Kitter, Erdkinde, vol. x. p. 816.)
[E. B. J.]
MUCHIRE'SIS (Mouxelpŋots al. Mouxelpiats, Procop. B. G. iv. 2, 15, 16), a canton of Lazica, populous and fertile: the vine, which does not grow in the rest of Colchis, was found here. It was watered by the river Rheon ('P'́cov). Archaeopolis, its chief town, was the capital of Colchis, and a place of considerable importance in the Lazic war. (Le Beau, Bas Empire, vol. ix. p. 217 ; Gibbon, c. xlii.)
[F. B. J.]
MUCRAE or NUCRAE (the reading is uncertain), a town of Samnium, mentioned only by Silius Italicus (viii. 566), the situation of which is wholly unknown.
[E. H. B.]

## MUCUNI. [Mauretania.] <br> MUDUTTI. [MoDUTTI.]

MUGILLA, an ancient city of Latium, mentioned only by Dionysius (viii. 36), who enumerates the Mugillani (Moyuaivous) among the places conquered by Coriolanus, at the head of the Volscian army. He there mentions them (as well as the Albietes, who are equally unknown) between the citizens of Pollusca and Corioli, and it is therefore probable that Mugilla lay in the neighbourhood of those cities; but we have no further clue to its site. The name does not again appear, even in Pliny's list of the extinct cities of Latiom; and we should be apt to suspect some mistake, but that the cognomen of Mugillanus, borne by one family of the Papirian Gens, seems to confirn the correctness of the name. [E. H. B.]

MUICU'RUM (Moutcoûpor), a place on the coast of llyricum, near Salona, which was taken for Totila, king of the Goths, by llauf. (Procop. B. G. iii. 35; Le Bean, Bas Empire, vol. ix. p. 82.) [E. B. J.]

MULELACHA, a town upon a promontory of the same name on the W. coast of Africa (Polyb. ap. Plin. v. 1), now Muley Bu Selham, the old Mamora of the charts. (Comp. Iondon Geog. Journ. vol. vi. p. 302.)
[E. B. J.]
MULUCHA, a river of Mauretania, which Sallust (Jug. 92, 110), Mela (i. 5. §§ 1, 5), and Pliny (v. 2) assign as the boundary between the Mauri and Massaesyli, or the subjects of Bocchus and Jugurtha. As Strabo (xvii. pp. 827, 829) makes the Molofath (Modozd $\theta$, Monaxd 0 , Ptol. iv. 1. § 7) serve the same purpose, there can be no doubt that they are one and the same river. The Malva (Majoúa, Ptol. l.c.) of Pliny (l. c.), or the Mulicici, which forms the frontier between Marocco and Algeria, is the same as the river which bounded the Moors from the Numidians. This river, rising at or near the S. extremity of the lower chain of Atlas, and flowing through a diversified country, as yet almost untrodden by Europeans, falls into the sea nearly in the middle of the Gulf of Meliluch of our charts. (Shaw, Trav. pp. 10-16.)
[E. B. J.]
MUNDA (Moúvסa). 1. An important town of Hispania Baetica, and a Roman colony belonging to the conventus of Astigi. (Strab. iii. p. 141 ; Plin. iii. 1. s. 3.) Strabo (l.c.) says that it is 1400 stadia from Carteia. It was celebrated on account of two battles fought in its vicinity, the first in b.c. 216. when Cn. Scipio defeated the Carthaginians (Liv. xxiv. 42 ; Sil. Ital. iii. 400), and the second in b. c. 45, when Julius Caesar gained a victory over the sons of Pompey (Dion Cass.
xliii. 39; Auct. Bell. Hisp. 30, seq. ; Strab. iii. pp. 141, 160 ; Flor. iv. 2 ; Val. Max. vii. 6.) It was taken by one of Caesar's generals, and, according to Pliny, from that time it ceased to exist. ("Fuit Munda cum Pompei filio rapta," Plin. iii. 1. 8. 3.) But this cannot be correct, as Strabo (b.c.) describes it as an important place in his time. It is asually identified with the village of Monda, SW. of Malaga; but it has been pointed out that in the vicinity of the modern Monda, there is no plain adapted fur a field of battle, and that the ancient city should probably be placed near Cordova. It has been suppnsed that the site of Munda is indicated by the remains of ancient walls and towers lying between Martos, Alcaudete, Espejo, and Bana. At all events this site agrees better with the statement of Strabo, that Munda is $\mathbf{1 4 0 0}$ stadia from Carteia, for the distance from the modern Monda to the latter place is only 400 stadia; and it is also more in accordance with Pliny, who places Munda between Attabi and Urso. (Forbiger, vol. iii. p. 51.)
2. A town of the Celtiberi in Hispania Tarraconensis, probably near the frontiers of the Carpetani. (Liv. xl. 47.)
3. A river on the W. coast of Lusitania, falling into the sea between the Tagus and Durius, now the Mondego. (Plin. iv. 21. s. 35 ; Moúrbas, Strab. iii. p. 153; Mb̌o ${ }^{2}$, Ptol. ii. 5. § 4 ; Marc. p. 43.) MUNDOBRIGA. [Medobriga.]
MUNIMENTUM CORBULONIS. [Corbulonis Munimentum.]

MUNIMENTUM TRAJANI, a fort in the country of the Mattiaci. (Amm. Marc. xvii. 1.) Its site is not certain, though it is generally believed that the Roman remains near Höchst are the ruins of this fort. (Wilhelm, Germanien, p. 148.) [L.S.] MUNY'CHIA. [AThenae, p. 306.]
MURA'NUM (Morano), a town of the interior of Lucania, the name of which is not found in any ancient author; but its existence is proved by the Itinerary of Antoninus, which places a station Summurano, evidently a corruption of Sub Murano, on the road from Nerulum to Consentia; and this is confirmed by the inscription found at La Polla [Forum Porilit], which gives the distance from that place to Muranum at 74 M. P. It is, therefore, evident that Muranum must have occupied the same site as the modern town of Morano, on a considerable hill, at the foot of which still runs the high road from Naples to Regyio, and where was situated the station noticed in the Itinerary. Near it are the sources of the river Corcile, the ancient Sybaris. (Itin. Ant. pp. 105, 110; Orell. Inscr. 3308 : Romanelli, vol. i. p. 387.) [E. H. B.]

MU'RBOGI (Moúp6oyol, Ptol. ii. 6. § 52), a people in Hispania Tarraconensis, the southern neighbours of the Caritabri, are the same as the people called Turmodial by Pliny (iii. 3. s. 4) and Orosius (vi. 21). This may be inferred from the fact that Pliny calls Segisamo a town of the Turmodigi, and Ptolemy calls Deobrigula a town of the Murbogi; while in the Antonine Itinerary (p. 449) these two towns are only 15 miles apart. (Forbiger, vol. iii. p. 102.)

MURGA'NTIA, 1. A city of Samnium, mentioned only by Livy, who calls it "a strong city" (validam urbem, x .17 ), notwithstanding which it was taken by assault, by the Koman consul P. Decins, in a single day, в.c. 296. Its position is fixed by Romanelli at Buselice, a considerable town near the sources of the Fortore (Frento), in the territory of
the Hirpini, about 20 miles W. of Luceria. An inscription found here would seem to attest that Murgantis existed as a municipal town as late as the reign of Severus; but considerable doubts have been raised of its authenticity. (Romanelli, vol. ii. p. 481 ; Mornmsen, Topografia degli Irpini, pp. 4, 5 ; in Bull. dell' Inst Arch. 1848.) The coins, with an Oscan legend, which have been generally attributed to Murgantia, in reality belong to Teate. (Friedländer, Oskische Münzen, p. 49.)
2. A city of Sicily, the name of which is variously written Murgantia, Murgentia, and Morgantia. [Mosgantia.]
[E. H. B.]
MURGIS (Moupris), a town of Hispania Baetica, near the frontiers of Tarraconensis, and on the road from Castulo to Malaca, probably near Puenta de la Guardia vieja. (Ptol. ii. 4. § 11 ; Plin. iii. 3. s. 4 ; Itin. Ant. p. 405 ; Ukert, ii. 1. p. 352 ; Forbiger, iii. p. 56.)

MURIANE (MoupLavy'), one of the four districts of Cataonia in Cappadocia, on the west of Lavianesine, and south-west of Melitene. It is mentioned only by Ptolemy (v. 7.§8), and must not be confounded with Morimene.
[L. S.]
MURIUS (. Muhr), a tributary of the Drave (Dravas), wbich is mentioned only in the Peating. Table, though the antiquity of the name is undonbted, and attested by the station "in Murio," which was situated on the road leading from Augusta Vindelicorum through Noricum. (Muchar, Noricam. i. p. 280.)
[L. S.]
MUROCINCTA, an imperial villa in Pannonia, where Valentinian II. was residing with his mother Justina, when he was proclaimed emperor. (Amm. Marc. XXI. 10.)

MURSA or MU'RSIA (Moùpoa, Moupoia), also called Mursa Major, to distinguish it from Mursella (Mersella) or Mursa Minor, was an important Roman colony, founded by Hadrian in Lower Pannonia, and had the surname Aelia. It was the residence of the governor of the country, on the Drarus, and there the roads met leading from Aquincum, Celeia, and Poetovio. In its neighbourhood, Gallienus gained a victory over Ingebus; and Constantine the Great made the town the seat of a bishop, A.D. 338 . Its modern name is Essek, the capital of Slavonia. (Ptol. ii. 16. § 8, viii. 7. § 6 ; Aurel. Vict. de Caes. 33 ; Zosim. ii. 43 ; Steph. B. s. v. Moúpfa; Geogr. Rav. iv. 19 : It. Ant. pp. 243, 265, 267, 331; It. Hieros. p. 562 ; Orelli, Inscript. Nos. 3066, 3281.)

The Lesser Mursa (Mursa Minor or Marsella) was likewise situated in Lower Pannonia, ten miles to the west of Mursa Major, on the road from this latter place to Poetovio, near the modern village of Petrovica, on the right bank of the Danube. (Ptol. ii. 16. § 7 ; Geogr. Rav. iv. 19 ; It. Hieros. p. 562; Tab. Peut.)

MURSELLA. [Mursa.]
MURUS CA'ESARIS. [Helveti, vol. i. p. 1042.]

MUSAGORES (Mouadyopot, Pomp. Mela, ii. 7. § 13), three islands lying off the E. coast of Crete, the position of which is described by Pliny (iv. 12. s. 20): "Circamvectis Criumetopon, tres Musagores appellatae." In Mr. Pashley's map they are represented by Elaphonesia. (Comp. Hück. Kreta, vol. i. p. 378.)
[E. B. J.]
MUSARNA (Mouodpva, Ptol. vi. $21 . \S 5$, vi. 8. §9; Marcian. Peripl. 29-32, ap. Geogr.Graec. Min. ed. Müller, 1855), a spot on the shore of Gedrosia, as may be inferred from the comparison of the an-
thorities. Ptolemy mentions two places of the name, one in Gedrosia, and the other in Caramania; but there can be no doubt that the same place is intended. Arrian speaks of a place which he calls $\tau d$ Mórapva, on the coast of Gedrosia, which was occu. pied by the Ichthyophagi (Indic. 26). Vincent, who has examined this geographical question with much care, thinks that this port must have been situated a little west of the modern cape Passence or Pasmee. (Voyage of Nearchus, vol.i. p. 242.) The differeuce of position in the ancient geographers may be accounted for by the fact that Musarna must have been on the boundary between Gedrosia and Caramania. Ptolemy speaks of a tribe, whom he calls Musarnaei (Movaapvaiol, vi. 21. §4). There can be little doubt that they were the people who lived around Musarna.
[V.]
MUSO'NES (Amm. Marc. בxix. 5. § 27 ; Moúбouvor, Ptol. iv. 3. § 24 ; Mussini, Plin. v. 4. 8. 4 ; Musunii, Peut. Tab.), a Moorish tribe, who joined in the revolt of Firmas. (Ainm. Marc. l.c.; comp. St. Martin, Le Beau, Bas Empire, vol. iii. p. 475. )
[E. B. J.]
MUSTI (MouaTh, Ptol. iv. 3. § 33), a town of Numidia, which the Antonine Itinerary places at 34 M. P. ( 32 M. P. Peut. Tab.) from Sicce Veneria, 92 M. P. from Sufetula, 86 M. P. from Carthage, 119 M. P. (by Tipasa) to Cirta; all which distances (considering that the roads are indirect) agree with the position assigned to it by Shaw (Trav. p. 179) and Barth (Wanderungen, p. 221) at 'Abd-erRabbi, so called from the tomb of a "Marabout." According to Vibius Sequester (de Flum. p. 7), it was near the river Bagradas; but Shaw (l.c.), who first discovered the site, by the remains of a triumphal arch, and a stone with an inscription bearing the ethnic name "Musticensium," speaks of it as being at some distance from the present course of the Mejerdah.
[E. B. J.]
MUSULA'MII (Tac. Ann. ii. 52, iv. 24 ; Mıoot-入auor, Ptol. iv. 3. § 24 ; Misulanii, Peut. Tab.), a Moorish tribe, whom Ptolemy (b.c.) places to the S. of Cirta, at the fuot of Audum. Tacitus (l.c.) gives them a more westerly pusition, and desnibes the defeat of this powerful tribe under Tacfarinas, their leader.
[E.B. J.]
MUTE'NUM, a place in Upper Pannonia, on the road from Vindobona to Celeia, and probably ocecrpying the same site as the modern Muzon. (lt. Ant. pp. 233, 266 ; Cluver, Vindel. 5.) [L. S.]

MUTHUL, a river of Numidia, which, from its being in the division belonging to Adherbal, must be looked for towards the E. of that country. (Sall. Jug. 48.)
[E. B. J.]
MU'TINA (Mourinn, Strab.; Morivn, Pol. ; Moltuva, Ptol. : Eth. Matinensis: Modena), an important city of Gallia Cispadana, situated on the Via Aemilia, between Parma and Bononia It was 35 miles distant from the former, and 25 from the latter city. (Strab. v. p. 216; Itin. Ant. p. 127; Itin. Hier. p. 616.) It appears to have certainly existed previous to the conquest of this part of Italy by the Romans, and was not improbably of Etruscan origin. Livy tells us, that the district or territory in which it was situated, was taken from the Boians, and had previously belonged to the Etruscans (Liv. -xxix. 55); but he does not mention the cits. Nor do we know at what period the latter fell into the hands of the Romans, though it was probably during the Gaulish War (B. C. 225-222), as we find it in their undisturbed
possession shortly after, at the commencement of the Second Punic War, B.c. 218. At that period Mutina must have already been a considerable place and well fortified; as we are told that, when the sudden outbreak of the Gauls interrupted the proceedings of the triumvirs who were appointed to found the new colony of Placentia, and compelled them to fly for safety, they took refuge within the walls of Mutina, which afforded them an effectual protection agaiust the arms of the barbarians. (Liv. xxi. 25, 26, xxvii. 21 ; Pul. iii. 40.) Polybius calls it at this period a Roman colony; but it seems probable that this is a mistake; fur we have no account of its foundation as such, nor does Livy ever allude to Mutina as a colony, where he expressly nutices those of Cremona and Placentia (xxvii. 10). But whether it had been fortified by the Romans, or was a regular walled city previously existing (in which case it must have been, like its neighbour Bononia, of Etruscan origin), we have no means of determining, though the latter supposition is perhaps the more probable. In any case it continued to be held by the Romans not only during the Second Punic War, but throughout the long wars which followed with the Cisslpine Gauls and Ligurians. (liv. xxxv. 4, 6.) It was not till after the firal defe:at of the Buians in B.c. 191, on which occasion they were deprived of a large portion of their lands, that the Romans determined to secure the newly ucquired territory, by planting there the two colonies of Parma and Mutina, which were accordingly established in B.c. 183. (Liv. xxxix. 55.) They were both of them "colonise civium ;" so that their inhabitants from the first enjoyed the full rights of Roman citizens : 2000 settlers were planted in each, and these received 5 jugera each for their portion. (Liv. l.c.) The construction of the great military high road of the Via Aemilia a few years before, B.c. 187 (Liv. xxxix. 2), must have greatly facilitated the foundation of these new colonies, and became the chief source of their prosperity.

But shortly after its foundation Mutina sustained a severe disaster. The Ligurians, who still occupied the heichts and valleys of the Apennines bordering on the Boian territory, in B.C. 177 made a sudden descent upon the new colony, and not only ravaged its territory, but actually made themselves masters of the town itself. This was, howser, recovered with little difficulty by the consul C. Claudius, 8000 of the Ligurians were put to the sword, and the colonists re-established in the possession of Mutina. (Liv. xli. 14. 16.) For a considerable period after this, we do not again meet with its name in history ; but it appears that it must have risen rapidly to prosperity, and become one of the most flourishing of the towns along the line of the Via Aemilia. Hence it bears a conspicuous part in the Civil Wars. When Lepidus, after the death of Sulla, b.c. 78, raised an insurrection in Cisalpine Gaul against the senate, Mutina was almost the only place which was able to offer any resistance to the arms of Pompeius, and was held against him by Brutus for a considerable period. (Plut. Pomp. 16.) But it was the siege which it sustained, and the battles fought in its neighbourhood after the death of Caesar, B.c. 44, that have rendered the name of Mutina chiefly celebrated in history, and are referred to by Suetonios under the name of "Bellum Mutinense." (Suet. Aug. 9.) On that occasion D. Brutus, to whom the province of Cisalpine Gaul had been decreed by the senate, threw
himself into Mutina with three legions and a large body of auxiliary troops. Here he was besieged by M. Antonius with a numerous army ; but the senate laring declared against the latter, the two consuls, Hirtius and Pansa, as well as the young Octavian, were despatched to the relief and succour of Brutus. (Jan. B.c. 43.) Antonios at this time occupied Bononia, as well as Parina and Regium, with his garrisons, while he himself, with the bulk of his forces, maintained the siege, or rather blockade, of Mutina. Hirtius on his arrival seized on Claterna, while Octavian occupied Forun Cornelii (Imola). From thence they advanced after considerable delays, took possession of Bononia, and approached Mutina itself, but were unable to open cominunications with Brutus. Meanwhile the other consul, C. Pansa, was advancing with a force of 4 newly raised legions to their support, when he was attacked by Antonius, at a place called Forum Gilloruin, about 8 miles from Mutina on the road to Bononia. [Forvm Gallorum.] A severe contest ensued, in which Pansa was inoitally wounded; but the other consul, Hirtius, having fallen on Antony's army in the rear, completely defeated it, and compelled him to retire to his camp before Mutina. A second battle took place some days afterwards (April 27, B.c.43), under the walls of that city, in which Hirtius was slain; but the forces of Antonius were again worsted, and that general found himself compelled to abandon the siege (which had now lasted for above four months), and retire westward, with a view of crossing the Alps. (Appian, B. C. iii. 49-51, 61, 65-72; Dion Cass. xlvi. 35-38; Cic. ad F'um. x. 11, 14, 30, 33, Ihil v.—viii.; Vell. Pat. ii. 61 : Suet. Aug. 10.)

Mutina was evidently at this period a flourishing and important town, as well as strongly fortified. Cicern calls it "firmissima et splendidissima popali Romani colonia" (Phil. v. 9); and these praises are confirmed by Appian (B. C. iii. 49), who calls it "a wealthy city," as well as by the fact, that it was capable of supporting so large an army as that of Brutus for so long a time. Mela, also, singles out Mutina, together with Bononia and Patavium, as the most opulent cities in this part of Italy. (Mela, ii. 4. § 2.) The same inference may fuirly be drawn from the circunstance, that it was at Mutina the numerous body of senators who had accompanied the emperor Otho from Home, in A. D. 69, remained, while Otho himself advanced to meet the generals of Vitellius, and where they very nearly fell victims to the animosity of the soldiery, on the first news of his defeat and death. (Tac. Hist. ii. 52-54.) But with this exception, we meet with scarcely any mention of Mutina under the Roman empire until a late period, though the still extant inscriptions attest the fact of its continued prosperity. Sume of these give to the city the title of Colonia, as do also Mela and Pliny. (Mela, L c. ; Plin. iii. 15. s. 20; Cavedoni, Marmi Modenesi, pp. 120, 165.) We learn also from Pliny and Strabo, that it was famous for the excellence of the wool produced in its territory, as well as for its wine, and the city itself possessed considerable manufactures of earthenware, as well as woollen goods. (Strab. v. p. 218 ; Plin. xiv. 3. s. 4, xxxv. 12. s. 46; Colu:n. vii. 2. § 3.)

In A. D. 312, Matina was taken by Constantine during his war with Maxentius, but appears to hare sufficed but little on this occasion. (Nazar. Paneg. 27.) Before the close of the century, however, both
the city and its territory had begun to feel severely the calamities that wero pressing upon the whole of this fertile and once flourishing tract of country. In A. D. 377 , the remains of the conquered tribe of the Taifali were settled, by order of the emperor Gratianus, in the country around Mutina, Regium, and Parina (Amm. Marc. xxxi. 9. § 4) - a plain indication that the population was already deticient; and St. Ambrose, writing not long after the same date, describes Mutina, Kegium, and the other cities along the Aemilian Way, as in a state of ruin and decay, while their territories were uncultivated and desulate. (Ambros. Ep. 39.) The same district again suffered severely in a.D. 452, from the ravages of Attila, who laid waste all the cities of Aemilia with fire and sword. (IIist. Miscell. xv. p. 549.) They, however, survived all these calamities, from which, nevertheless, Mutina appears to have suffered more severely than its neighbours. Under the Lombard kings, it became the frontier city of their dominions towards the Exarchate; and though taker by the Greek emperor Mauricius in 590, it was agrain annexed by Agilulphus to the Lombard kingdom of Italy. (Muratori, Antiq. Ital. vol. i. p. 63.) At this period it fell into a state of great decay. P. Diaconas, who mentions Bononia, Parna, and Kegiun as wealthy and flourishing cities, does not even notice the name of Mutina (IIist. Lang. ii. 18); and a writer of the 10 th century draws a lamentable picture of the condition to which it was reduced. The numerous streams which irrigated its territory having been then neglected, inundated the whole surrounding tracts; and the site of the city had become in great part a mere morass, in which the ruins that attested its ancient grandeur, were half buried in the mud and water. (Murat. Ant. vol. ii. pp. 154, 155.)

At a later period of the middle ages, Modena again rose to prosperity, and became, as it has ever since continued, a flourishing and opulent city. But the truth of the description above cited is confirmed by the fact, that the remains of the ancient city are wholly buried under the accumulations of alluvial soil on which the buildings of the modern city are founded, and are only brought to light from time to time by excavations. (Murat. l.c.) Large portions of the ruins were also employed at various periods, in the construction of the cathedral and other churches; and no remains of ancient buildings are now extant. But a valuable collection of sarcophagi and inscriptions, discovered at various periols on the site of the modern city, is preserved in the museum. These have been fully illustrated by Cavedoni in his Antichi Marmi Modenesi (8vo. Modena, 1828), in which work the facts known concerning the ancient history of the city are well brought together.

Modena is situated between the river Secchia, which flows about 3 miles to the $W$. of the city, and the Panaro, about the same distance on the E. The latter is unquestionably the ancient Scultenna, a name which it still retains in the upper part of its course. The Secchia is probably the Gabellus of Pliny; but seems to have been also known in ancient times as the Secia; for the Jerusalem Itinerary marks a station called Pons Secies, 5 miles from Mutina, where the Aemilian Way crossed this river. (Itin. Hier. p. 616.) The Apennines begin to rise about 10 miles to the S . of the city; and the ancient territory of Mutina seems to have included a considerable extent of these mountains, as Pliny notices
a prodigy which occurred " in agro Mutinensi," when two mountains were dashed against one another with great violence, so that they appeared to recoil again from the shock. (Plin. ii. 83. s. 85.) This phenomenon, which occurred in B. c. 91, was doubtless the result of an earthquake, and not, as has been sometimes supposed, of a volcanic outbreak.
[E. H. B.]
MUTUSCAE. [Trebula Mutusca.]
MUTYCA. [Motyca.]
 plov, Ptol.), an important mercantile town on the Arabian coist of the Red Sea, not far north of the Straits of Bab-el-Mandeb, in the country of Elisari: placed by Ptolemy in long. $74^{\circ} 30^{\prime}$, lat. $14^{\circ}$; or $30^{\prime}$ west, and $2^{\circ}$ north of Ocelis ("Oкך入cs $\dot{\epsilon} \mu \pi о$ оíon) close to the straits. (P'tol. vii. 15. p. 152.) He states that its longest day is $12 \frac{1}{2}$ hours, that it is $l^{\prime}$ east of Alexandria.and within the tropics (viii. Tab. vi. Asiae, p. 241); Pliny (vi. 23) names Musa as the third port of Arabia Felix "quem Indica navigatio non petit, nee nisi turis odorumque Arabicorum mercatores." The author of the Periplus frequently alludes to it, and gives a full account of it and its trade. He describes it as situated in the southernmost gulf of this const, a regular mart; inhabited altogether by Arab mariners and merchants, distant about 12.000 stadia from Berenice to the south, and 300 north of the straits. (Vincent, Periplus, p. 296. n. 100; Gosselin, Récherches, g'c. tome ii. pp. 265, 266.) It was not only an emporium of Indian merchandise - a manifest contradiction of I'liny's statement already cited - but had an export trade of its own. It was distant three days' journey from the city of Save ( Vaún $^{\prime}$ ), which was situated inland, in the country of Maphoritis. It had no proper harbour, but a good roadstead, and a sandy anchorage. Its principal import trade was in fine and common purple cloth; Arab dresses with sleeves - probably the kemis - some plain and common, others embroidered with needlework and in gold; saffron; an aromatic plant, named cyperus (кúxfoos); fine linen; long robes - the abis; quilts; striped girdles ; perfumes of a middling quality; specie in abundance; and small quantities of wine and grain, for the country grew but little wheat, and more wine. To the king and tyrant were given horses, pack-mules, vessels of silver and brass, and costly raiment. Besides the above named articles of merchandise, which were chiefly supplied to its markets from Adule, on the opposite coast, the great emporium of African produce [Adule], Musa exported a precious myrrh cf native growth, an aromatic gum, which the author names $\sigma \tau a x \tau ो$ dibecpmivala, and a white marble or alabaster ( $\lambda$ ú ${ }^{\prime} \delta \mathbf{o s}$ ). (Arrian, Peripl. ap. Hiulson. Geogr. Min. vol. i. pp. 13, 14.) Vessels from this port risited all the principal mercantile towns of the south coast of Arabia. Bochart's identification of this Musa with the Mesha mentioned by Moses, as one extreme point of the Jok!anite Arabs,-Sephar being the other (Gen. x. 30), -is thought by Mr. Forster to be untenable, on account of the narrow limits to which it would confine this large and important race; for the site of Sephar is clearly ascertained. [Maphoritae; Saphoritae.] (Geogr. of Arabia, vol. i. pp. 93, 94.) M. Gosselin (Kécherches, fc. tome ii. p. 89) asserts that this once most celebrated and frequented port of Yemen is now more than six leagues from the sea, and is replaced as a port by Mokha, the foundation of which dates back no more than 400 years (Niebulir, Voyage en Arabic
tome i. p. 349); as indeed he maintains, that some of the maritime towns of the coast of Hedjuz and Yemen date more than 400 or 500 years from their foundation, and that the towns whose walls were once washed by the waters of the gulf, and which owed their existence to their vicinity to the sea, have disappeared since its retirement, with the exception of those whose soil was sufficiently fertile to maintain their inhabitants. In a sandy and arid country these were necessarily few, so that there are not more than six or seven that can be clearly identified with ancient sites. Among these Musa still exists under its ancient name unchanged (Ib. pp. 238, 239, 284) at the required distance from the Straits of Bab-elMardeb, viz. 300 stadia, reckoning 500 stadia to a degree. (Ib. pp. 269, 270.) Vincent makes it short of 40 miles. (Periplus, p. 319.) In the middle ages when the sea had already retired from Musa, another town named Mosek or Mausidj was built as a seaport in its stead, which seems to have usurped the name of the more ancient town, and to have been mistaken for it by some geographers. This Mosek still exists, in its turn abandoned by the sea; but about 25 ' north of the true position of Musa. (lb. p. 270.) "The mart of Yemen at the present day is Mokha. . . . Twenty miles inland from Mokha Niebuhr discovered a Moosa still existing, which he with great probability supposes to be the ancient mart, now carried inland to this distance by the recession of the coast." (Vincent, l.c. p. 315.) There is a circumstance mentioned by Bruce of the roadstead of Mokha, which coincides with a statement cited from Arrian with regard to Muza. Bruce says that " the cables do not rub, because the bottom is sand, while it is coral in almost every other port." (Ib. p. 313. n. 142.) Moosa itself Niebuhr found to be $6 \frac{1}{2}$ hours $=4 \frac{1}{2}$ German miles, due east of Mokha, at the commencement of the mountain country, the intervening space being extremely dry and thinly peopled. It is an ordinary village, badly built, only recommended by its water, which is drunk by the wealthier inhabitants of Mokha. (Voyage en Arabie, tome i. pp. 296, 297; Description de [Arabie, pp. 194, 195.)
[G. W.]
MUZIRIS (Movsipis, Peripl. M. Erythr. c. 54, p. 297, ap. Geogr. Graec. Min. ed. Müller, 1855), a port on the west coast of Bindostain, situated between Tyndis and Nelcynda, and at the distance of 500 stadia from either, where, according to the author of the Periplus, ships came from Ariaca and Greece (that is, Alexandria). Ptoleny calls it an emporium (vii. 1. §8), and places it in Limyrica. There can be little doubt that it is the place which is now called Mangalore, and which is still a considerable port.
[V.]
MY'CALE (Muxd $\lambda \eta$ ), the westernmost branch of Mt. Mesogis in Lydia; it forms a high ridge and terminates in a promontory called Trogylium, now cape $S$. Maria. It runs out into the sea just opposite the island of Samos, from which it is separated only by a narrow channel seven stadia in breadth. It was in this channel, and on the mainland at the foot of Mount Mycale, that the Persians were defeated, in B. C. 479. It is probable that at the foot of Mount Mycale there was a town called Mycale or Mycallessus, for Stephanus Byz. (s. v.) and Scylax (p. 37) speak of a town of Mycale in Caria or Lydia. The whole range of Mount Mycale now bears the name of Samsum. (Hom. Il. ii. 869 ; Herod. i. 148, vii. 80, ix. 96 ; Thuc. i. 14, 89 ; viii. 79 ; Diod. ix. 34 ; Paus. v. 7.§ 3, vii. 4. § 1 ;

Strab. xiii. pp. 621, 629; Ptol. v. 2. § 13; Agathem. p. 3.)
[L. S.]
 $\sigma$ os), an ancient town of Boeotia, mentioned by Homer. (Il. ii. 498, Hymn. Apoll. 224.) It was said to have been so called, because the cow, which was guiding Cadmus and his comrales to Thebes, lowed ( $\left.{ }^{2} \mu \nu \kappa \eta \sigma a t o\right)$ in this place. (Pans. ix. 19. § 4.) In в.c. 413, some Thracians, whom the Athenians were sending home to their own country, were landed on the Euripas, and surprised Mycalessus. They not only sacked the town, but put all the inhabitants to the sword, not sparing even the women and children. Thacydides says that this was one of the greatest calamities that had ever befallen any city. (Thuc. vii. 29 ; Paus. i. 23. § 3.) Strabo (ix. p. 404) calls Mycalessus a village in the territory of Tanagra, and places it upon the road from Thebes to Chalcis. In the time of Pausanias it had ceased to exist; and this writer saw the ruins of Harma and Mycalessus on his road to Chalcis. (Pans. ir. 19. §4.) Pausanias mentions a temple of Demeter Mycalessia, standing in the territory of the city upon the sea-coast, and situated to the right of the Euripus, by which he evidently meant south of the strait. The only other indication of the position of Mycalessus is the statement of Thucydides (l.c.), that it was 16 stadia distant from the Hermaeum, which was on the sea-shore near the Euripus. It is evident from these accounts, that Mycalessus stood near the Euripus; and Leake places it, with great probability, upon the height immediately above the southern bay of E'gripo, where the ruined walls of an ancient city still remain. (Northern Greece, vol. ii. pp. 249, seq., 264.) It is true, as Leake remarks, that this position does not agree with the statement of Strabo, that Mycalessus was on the road from Thebes to Chalcis, since the abore-mentioned ruins are nearly two miles to the right of that road; but Strabo writes loosely of places which he had never seen. Mycalessus is also mentioned in Strab. ix. pp. 405, 410 ; Pans. iv. 7. s. 12.

MYCE'NAE, a town in Crete, the foundation of which was attributed by an historian of the Augustan age (Vell. Paterc. i. 1) to Agamemnon.

Harduin (ad Plin. iv. 12) proposed to read Mycenae for Mrrisa, which is mentioned as a city of Crete in the text of Pliny (l.c.). Sieber (Reire, vol. ii. p. 280) believed that he had discovered the remains of this city at a place called Baca or Masis, on the river Armyró. (Hück, Kreta, vol. i. p. 435.)
[E. B. J.]
MYCE'NAE, sometimes MYCE'NE (Muкテ̄ขal;
 Mycenensis: Kharráti), one of the most ancient towns in Greece, and celebrated as the residence of Agamemnon. It is situated at the north-eastern extremity of the plain of Argos apon a rugged height, which is shat in by two commanding summits of the range of mountains which border this side of the Argeian plain. From its retired position it is described by Homer ( $O d$. iii. 263) as situated in a recess $(\mu \nu \chi \hat{\varphi})$ of the Argeian land, which is sapposed by some modern writers to be the origin of the name. The ancients, however, derived the name from an eponymous heroine Mycene, daughter of Inachus, or froni the word $\mu \dot{v} k n s$, for which various reasons were assigned. (Paus. ii. 17. § 3; Steph. B. s. v.) The position was one of great importance. In the first place it commanded the upper part of the great Ar-
geian plain, which spread out under its walls towards the west and south; and secondly the most important roads from the Corinthian gulf, the roads from Phlius, Nemea, Cleonae, and Corinth, unite in the mountains above Mycenae, and pass under the height upon which the city stands. It was said to have been built by Perseus (Strab. viii. p. 377 ; Paus. ii. 15. §4, ii. 16. §3), and its massive wails were believed to have been the work of the Cyclopes. Hence Euripides calls Mycenae $\pi \delta \lambda \iota \sigma \mu \alpha$ Пє $\rho \sigma \epsilon ́ \omega s$, Kuк $\lambda \omega$ -
 the favourite residence of the Pelopidae, and under Agamemnon was regarded as the first city in Greece. Hence it is called no入v́Xpuaos by Homer (1l. vii. 180, xi. 46), who also gives it the epithets of єùpudiरuia (Il.iv. 52) and єن́ктi íevov $\pi \tau o \lambda i \epsilon \theta \rho o \nu$ (Il. ii. 569). Its greatness belongs only to the heroic age, and it ceased to be a place of importance after the return of the Heracleidae and the settlement of the Dorians in Argos, which then became the first city in the plain. Mycenae, however, maintained its independence, and sent some of its citizens to the assistance of the Greeks against the host of Xerxes, although the Argives kept aloof from the common cause. Eighty Mycenaeans were present at Thermopylae (Herod. vii. 202), and 400 of their citizens and of the Tirynthians fought at Plataeae (Herod. ix. 28). In B.c. 468, the Dorians of Argos, resolving to bring the whole district under their sway, laid siege to Mycenae ; but the massive walls resisted all their attacks, and they were obliged to have recourse to a blockade. Famine at length compelled the inhabitants to abandon the city; more than half of them
took refuge in Macedonia, and the remainder in Cleonae and Ceryneia. (Diod. xi. 65; Strab. viii. pp. 372,377 ; Paus. ii. 16. §5, v. 23. § 3, vii. 25. § 3, viii. 27. § 1.) From this time Mycenae remained uninhabited, for the Argives took care that this strong fortress should remain desolate. Strabn, however, committed a gross exaggeration in saying that there was not a vestige of Mycenae extant in his time (viii. p. 372). The ruins were visited by Pausanias, who gives the following account of them (ii. 15, 16):-" Returning to the pass of the Tretus, and following the road to Argos, you have the ruins of Mycenae on the left hand. Several parts of the enclosure remain, and among them is the gate upon which the lions stand. These also are said to be the work of the Cyclopes, who built the walls of Tiryns for Proetus. Among the ruins of the city there is a fountain named Perseia, and subterraneous build-
 sons, in which their treasures were deposited. There are likewise the tombs of Atreus, of his charioteer Eurymedon, of Electra, and a sepulchre in common of Teledamus and Pelops, who are said to have been twin sons of Cassandra. But Clytaemnestra and Aegisthus were buried at a little distance from the walls, being thought unworthy of burial where Agamemnon lay."

The ruins of Mycenae are still very extensive, and, with the exception of those of Tiryns, are more ancient than those of any other city in Greece. They belong to a period long antecedent to all historical records, and may be regarded as the genuine relics of the heroic age.

PLAN OF THE RUINS OF MYCENAE.
A. Acropolis. $\quad$ B. Gate of Lions.
C. Subterraneous building, usually called the Treasury of Atreus.
D. Subterraneous building.
E. Village of Kharváti.
of which the base fronts the south-west, and the apex the east. On the southern side the cliffs are almost precipitous, overhanging a deep gorge; but on the northern side the descent is less steep and rugged. The summit of the hill is rather more than 1000 feet in length, and around the edge the ruined walls of the Acropolis still exist in their entire cir-

Mycenae consisted of an Acropolis and a lower town, each defended by a wall. The Acropolis was situated on the summit of a steep hill, projecting from a higher mountain behind it. The lower town lay on the sonth-western slope of the hill, on either side of which runs a torrent from east to west. The Acropolis is in form of an irregular triangle,

cuit, with the exception of a small open space above the precipitous cliff on the southern side, which perhaps was never defended by a wall. The walls are more perfect than those of any other fortress in Greece; in some places they are 15 or 20 feet high. They are built of the dark-coloured limestone of the surrounding mountains. Some parts of the walls are built, like those of Tiryns, of hage blocks of stone of irregular shape, no attempt being made to fit them into one another, and the gaps being filled up with smaller stones. But the greater part of the walls consists of polygonal stones, skilfully hewn and fitted to one another, and their faces cut so as to give the masonry a smooth appearance. The walls also present, in a few parts, a third species of masonry, in which the stones are constructed of blocks of nearly quadrangular shape; this is the case in the approach to the Gate of Lions. This difference in the masonry of the walls has been held to prove that they were constructed at different ages; but more recent investigations amidst the ruins of Greece and Italy has shown that this difference in the style of masonry cannot be regarded as a decisive test of the comparative antiquity of walls; and Col. Mure has justly remarked that, as there can be no reasonable doubt that the approach to the Gate of Lions is of the same remote antiquity as the remainder of the fabric, it would appear to have been the custom with these primitive builders to pay a little more attention to symmetry and regularity in the more ornamental portions of their work.

The chief gate of the Acropolis is at the NW. angle of the wall. It stands at right angles to the adjoining wall of the fortress, and is approached by a passage 50 feet long and 30 wide, formed by that wall and by another wall exterior to it. The opening of the gateway widens from the top downwards; but
at least two-thirds of its height are now buried in ruins. The width at the top of the door is 91 feet. This door was formed of two massive uprights, covered with a third block, 15 feet long, 4 feet wide, and 6 feet 7 inches high in the middle, but diminishing at the two ends. Above this block is a triangular gap in the masonry of the wall, formed by an oblique approximation of the side courses of stone, continued from each extremity of the lintel to an apex above its centre. The vacant space is occupied by a block of stone, 10 feet high, 12 broad, and 2 thick, upon the face of which are sculptured two lions in low relief, standing on their hind-legs, upon either side of a covered pillar, upon which they rest their fore-feet. The column becomes broader towards the top, and is surmounted with a capital, formed of a row of four circles, enclosed between two parallel fillets. The heads of the animals are gone, together with the apex of the cone that surmounted the column. The block of stone, from which the lions are sculptured, is said by Leake and other accurate observers to be a kind of green basalt; but this appears to be a mistake. We learn from Mure (Tour in Greece, vol. ii. p. 324) that the block is of the same palombino, or dove-coloured limestone, of which the native rock mainly consists, and that the erroneous impression has been derived from the colour of the polished surface, which has received from time and the weather a blueish green hue. The column between the lions is the customary symbol of Apollo Agyieus, the protector of doors and gates. (Müller, Dor. ii. 6. § 5.) This is also proved by the invocation of Apollo in the Agamemnon of Aeschylus (1078, 1083, 1271), and the Electra of Sophocles (1374), in both of which tragedies the scene is laid in front of this gate.

gate of the lions at mycenae.

It has been well observed that this pair of lions stands to the art of Greece somewhat in the same relation as the Iliad and the Odyssey to her literature; the one, the only extant specimens of the plastic skill of her mythical era, the other, the only genuine memorials of its chivalry and its song. The best observers remark that the animals are in a style of art peculiar to themselves, and that they have littie or nothing of that dry linear stifiness which characterises the earlier stages of the art of sculpture in almost every country, and present consequently as
little resemblance to the Archaic style of the Hellenic works of a later period as to those of Egypt itself. "The special peculiarities of their execution are a certain solidity and rotundity amounting to clumsiness in the limbs, as compared with the bodies. The hind-legs, indeed, are more like those of elephants than lions; the thighs, especially, are of immense bulk and thickness. This unfavourable feature, however, is compensated by much natural ease and dignity of attitude. The turning of the body and shoulders is admirable, combining
strength with elegance in the happiest proportions. The bellies of buth are slender in cumparison with the rest of the figure, especially of the one on the right of the beholder. The muscles, sinews, and joints, though little detailed, are indicated with much spirit. The finish, both in a mechanical and artistical point of view, is excellent; and in passing the hand over the surface, one is struck with the smonth and easy blending of the masses in every portion of the figure." (Mure, vol. ii. p. 171.)

Besides the great Gate of Lions, there was a smaller gate or pastern on the northern side of the Acropolis, the approach to which was fortified in the same manner as that leading to the great gate. It is constructed of three great stones, and is 5 feet 4 inches wide at the top.
Near the Gate of Lions the wall of the lower city may be traced, extending from N. to S. In the lower town are four subterraneous buildings, which are evidently the same as those described by Pausaniss, in which the Atreidae deposited their treasures. Of these the largest, called by the learned the "Treasury of Atreus," and by the Greek ciceroni the "Grave of Agamemnon," is situated under the aqueduct which now convers the water from the strain on the northern side of the Acropolis to the village of Kharriti. (Sie Plan, C.) This building is in nearly a perfect state of preservation. It is approached by a passage now in ruins, and contains two chambers. The passage leads into a large chamber of a conical forin, about 50 feet in width and 40 in height; and in this chamber there is a dourway leading into a small interior apartment. The ground-plan and a section of the building are figured in the Jict. of Antip. p. 1127. The doorway terminating the passage, which leads into the larye chamber, is $\mathbf{8}$ feet $\mathbf{6}$ inches wide at the top, widening a little from thence to the bottom. "On the ontside before each door-post stoxd a semi-column, having a base and capital not unlike the Tuscan order in profile, but enriched with a very elegant sculptared ornament, chiefly in a zigzag form, which was continued in vertical compartments over the whole shaft. Those ornaments have not the smallest resemblance to anything else found in Grecce, but they have some similitude to the Persepolitan style of sculpture." (Leake, Morea, vol. ii. p. 374.) There are remains of a second subterraneous building near the Gate of Lions (1'lan, D); and those of the two ot hers are lower down the hill towards the west.
There has been considierable discussion amnong modern scholars respecting the purpasie of those subterraneous buildings. The statement of Pausanias, that they were the treasuries of the Atreidae, was generally accepted, till Mure published an essay in the Rheinisches Museum for 1839 (vol. vi. p. 240), in which be endeavoured to establish that all such buildings were the fanily vaults of the ancient heroes by whom they were constructed. In the great edifice at Mycenae he supposes the inner apartment to have been the burial-place, and the cuter rault the heroum or sanctuary of the deceased. This opinion has been adopted by most modern scholars. but has been contated by Leake, who adheres to the ancient doctrine. ( Peloponnesiuca, p. 256.) The two opinions may, however, be to some patent reconciled by supposing that the inner chamber was the burial-place, and that the outer contained the arms, jewels, and other ornaments most prized by the deceased. It was the practice among the Greeks in all ages fur the dead to carry with them to their tombs
a partion of their property; and in the hemic aces the burial-places of the powerful rulers of Mycenae may have been adorned with such splendour that the name of Treasuries was given to their tombs. There is, indeed, good reason for believing, from the remains of brazen nails found in the large chamber of the "Treasury of Atreus," that the interior surface of the chamber was covered with brazen plates.

At the foot of the lower town stands the mondern village of Kharrúti. (Leake, Moren, vol. ii. p. 365, seq.; Mure, Tour in Greece, vol. ii. p. 163, sel.; Curtius. Peloponnesos, vol. ii. p. 400, seq.)

MYCE'NI. [MaURETANIA.]
MYCHUS. [BuLis.]
MY'CONUS (Múкonos: Eth. Muróvios: Mýlo${ }^{n o}$ ), a small island in the Aegaean sea, lying E. of Delos, and N. of Naxos. Pliny says (iv. 12. 8. 22) that it is 15 miles from Delos, which is much greater than the real distance; but Scylax (p. 55) more correctly describes it as 40 stadia from Rheneia, the island W. of Delos. Myconus is about 10 miles in length, and 6 in its greatest breadth. It is in most parts a barren rock, whence Ovid gives it the epithet of humilis (Met. vii. 463); and the inhabitants had in antiquity a bad reputation on account of their avarice and meanness (Athen. i. p. 7 ; hence the proverb Mukúvios yeír $\omega v$, Zenob. Prov. v. 21 ; Suidas, Hesch., Phot.). The rocks of Myconus are granite, and the summits of the hills are strewn with immense blocks of this stone. This circumstance probably gave rise to the fable that the giants subdued by Hercules lay under Myconus; whence came the prorerb, "to put all things under Myconus," applied to those who ranged under one class things naturally separate. (Strab. x. p. 487 ; Steph. B. s. v.) The tomb of the Locrian Ajax was also shown at Myconus. (Tzetz. ad Lycophr. 401.) Of the history of the island we have no account, except the statement that it was colonised from Athens, by the Nelide Hippocles. (7enob. v. 17; Schol. ad Dionys. Per. ap. Geogr. Min. vol. iv. p. 37, Hudson.) Myconus is mentioned incidentally by Herodotus (vi. 118) and Thucydides (iii. 29). Ancient writers relate, as one of the peculiarities of Myconus, that the inhabitants lost their hair at an early age. (Strab. l. c.; Plin. xi. 37. s. 47; "Myconi calva omnis juventus," Donat. ad Ter. Hecyr. iii. 4. 19.) The highest monntain, which is in the northern part of the island, has a summit with two peaks, whence it is called Dimastus by Pliny (iv. 12. s. 2.2). The promontory of Phorinia (\$opbia, Ptol. iii. 15. $\S 29)$ was probably on the eastern side of the island. Scylax mentions two cities (Múcovos, aü̃ סímo八is, p. 22). Of these one called Myconus occupied the site of the modern town, which presents, however, scarcely any ancient remains. The name and position of the other town are unknown. The coins of Myconus are rare; and in general very few remains of antiquity are found in any part of the island. (Rows, Reisen auf den Griechischen Inseln, vol. ii. p. 28 , seq.)

MY'GDONLS (Múróoves), a tribe dwelling in Bithrnia, abutut the river Odrysses and the coast of the Propontis, but extending into Mysia, where they occupied the district about Mount Olympus and lake Dascylitis. They had immigrated into Asia Minor from Thrace, but were afterwanis subdued or expelled by the Bithynians. (Strab. vii. p. 295 xii. pp. 564, 575.) The district inhabited by them was called Mygdonia. (Strab. xii. pp. 550, 558, 576 l'lin. v. 41 ; Sulin. 40, 42.)
[L.S.]

MYGDO＇NIA（Myróovía：Eth．Mú ${ }^{\prime}$ סoves，Steph． B．），a district of Macedonia，which comprehended the plains round Thessalonica，together with the valleys of Klisali and Besikia，extending towards the E．as far as the Axius（Herod．vii．123），and including the Lake Bolbe to the E．（Thuc．i．58．） To the N．it was joined by Crestonia，for the Echi－ dorus，which flowed into the gulf near the marshes of the Axius，had its sources in Crestonia（Herod． vii．124），while the pass of Aulon or Arethusa was probably the boundary of Mygdonia towards Bisaltia．The maritime part of Mygdonia formed a district called Amphaxitis，a distinction which first occurs in Polybius（ $\mathbf{v} .98$ ），who divides all the great plain at the head of the Thermaic gulf into Amphaxitis and Bottiaea，and which is found three centuries later in Ptolemy（iii．13．§ 36）．The latter introduces Amphaxitis twice under the sub－ divisions of Macedonia，－in one instance placing under that name the mouths of the Echidorus and Axius，with Thessalonica as the only town，which agrees with Polybius，and particularly with Strabo （vii．p．330）．In the other place，Ptoleny includes Stagara and Arethusa in Ainphaxitis，which，if it be correct，would indicate that a portion of Am－ phaxitis，very distant from the Axius，was separated from the remainder by a part of Mygdonia；but as this is improbable，the word is perhaps an error in the text．The original inhabitants，the Mygdonians， were a tribe belonging to the great Thracian race， and were powerful enough to bequeath their name to it，even after the Macedonian conquest．（Thuc． ii．99．）The cities of this district were Thessa－ lonica，Sindis，Chalastra，Altus，Strkpsa， Cissus，Mellisurgis，Heracleuetrs．Besides these，the following obscure towns occur in Ptolemy （l．c．）：－Chaetae，Moryllus，Antigoneia，Calindaea， Boerus，Physca，Trepillus，Carabia，Xylopolis，Assorus， Lete，Phileros．As to the towns which occupied the fertile plain between Mt．Cissus and the Axius，their population was no doubt absorbed by Thessalonica，on its foundation by Cassander，and remains of them are not likely to be found；nor are the ancient references sufficient to indicate their sites．One of these would seem，from ancient inscriptions which were found at Khaivat，to have stood in that position，and others probably occupied similar positions on the last falls of the heights which extend nearly from Khaivat to the Axius．One in particular is indicated by some large＂tumuli＂or barrows，situated at two－ thirds of that distance．（Leake，North．Greece， vol．iii．p．448．）
［E．B．J．］
MYGDO＇NIA（Murठovia，Plat．Lucull．c．32； Polyb．v．31），a district in the NE．part of Mesopo－ tamia，adjoining the country now calied the Sinjar． According to Strabo，the people who were named Mygdones came originally from Macedonia，and oc－ cupied the district extending from Zeugma to Tha－ psacus（xvi．p．747）：as，however，he states in the same place that Nisibis was called by the Mace－ doniaus＂Antiocheia in Mygdonia，＂and places it in the immediate neighbourhood of M．Masius，he would appear to have thought that it was on the eastern side of Mesiopotamia．Plutarch relates the sa：ne story of the Greek name of Nisibis（Lucull． c．32）．In Stephanus Byz．the name is written Mux ${ }^{0}$ ovia，which is probably an error．In many of the earlier editions of Xenophon，a people are spoken of who are called Muyóoviot；the later and better editions read，however，Maposviot，which is more probable（Anab．iv．3．§4）．

MYGDO＇NIUS（Murobvios，Julian．Orat．p．27）， the river which flows by the town of Nisibis（now Nisibin）．It takes its rise，together with the Kha－ buir and one or two other streams，in the M．Masius （now Karja Baghlar）．Its present name is the Hermes or Nahr－al－Huali．
［V．］
MYLAE（Mu入al：Eth．Mu入attys，Steph．B．；Mu－入aios，Diod．：Milazzo）a city on the N．coast of Sicily， about 30 miles from Cape Pelorus，and 20 from Tyn－ daris，though Strabo calls it 25 miles from each of these points．（Strab．vi．p．266．）It was situated on the narrow neck or isthmas of a projecting pe－ ninsular headland，about 5 miles in length，the furthest point of which is only about 15 miles from the island of Hiera or Vulcano，the nearest to Sicily of the Lipari islands．Mylae was undoubtedly a Greek colony founded by the Zanclaeans，and appears to have long continued subject to，or dependent on its parent city of Zancle．（Strab．vi．p．272；Scym． Ch．288．）Hence Thucydides speaks of Himera as in his time the only Greek city on the N．coast of the island，omitting Mylae，because it was not an inde－ pendent city or state．（Thac．vi．62．）The period of its foundation is wholly nucertain．Siefert would identify it with the city called Chersonesus by Euse－ bius，the foundation of which that author assigns to a period as early as b．c．716，but the identification is very questionable．（Euseb．Chron．ad 01．161；Siefert， Zankle－Messann，p．4．）It is certain，however， that it was founded before Himera，B．c．648，as， according to Strabo，the Zanclacans at Mylne took part in the colonisation of the latter city．（Strab．vi． p．272．）Mylae itself does not appear to have ever risen to any great importance；and after the revolu－ tion which changed the name of Zancle to that of Messana，still continued in the same dependent re－ lation to it as before．It was，however，a strong fortress，with a good port；and these advantages which it derived from its natural situation，rendered it a place of importance to the Messanians as secur－ ing their communications with the N．coast of the island．Scylax speaks of it as a Greek city and port（Scyl．p．4．§ 13），and its castle or fortress is mentioned by several ancient writers．The earliest bistorical notice of the city is found in s．c．427， when the Athenian fleet under Laches which was stationed at Rhegium，made an attack upon Mylac． The place was defended by the Messanians with a strong garrison，bat was compelled to surrender to the Athenians and their allies，who therenpon marched against Messana itself．（Thac．iii．90；Dind． xii．54．）After the destruction of Messana by the Carthaginian general Himilcon，Mylae appears to have for a time shaken off its dependence；and in B． 0.394 ，the Rhegians，becoming alarmed at the restoration of Messana by Dionysius，which they regarded as directed against themselves，pro－ ceeded to establish at Mylae the exiles from Niuns and Catana，with a view to create a countercheck to the rising power of Messana．The scheme，how－ ever，failed of effect；the Rhegians were defeated and the Messanians recovered possession of Mylae． （Diod．xiv．87．）That city is again noticed during the war of Timoleon in Sicily；and in B．C． 315 it was wrested by Agathocles，from the Messanians， though he was soon after compelled to restore it to them．（Id．xix．65；Plut．Timol．37．）It was in the immediate neighbourhood of Mylae also（ $\boldsymbol{t v}^{2}$ T $\hat{\varphi}$ Munal $\boldsymbol{\varphi} \pi \in \delta i \varphi)$ that the forces of the Mamertines were defeated in a great battle，by Hieron of Syra－ cuse，B．c． 270 （Pol．i．9；Diod．xxii．13）；though
the river Longanus, on the banks of which the action was fought, cannot be identified with certainty. [Longanus.]

It is probable that, even after the Roman conquest of Sicily, Mylae continued to be a dependency of Messana, as long as that city enjoyed its privileged condition as a "foederata civitas:" hence no mention is found of its name in the Verrine orations of Cicero; but in the time of Pliny it had acquired the ordinary municipal privileges of the Sicilian towns. (Plin. iii. 8. s. 14 : P'tol. iii. 4. § 2.) It never, however, seems to have been a place of importance, and was at this period wholly eclipsed by the neighbouring colony of Tyudaris. But the strength of its position as a fortress caused it in the middle ages to be an object of attention to the Norman kings of Sicily, as well as to the emperor Frederic II.; and though now much neglected, it is still a military position of importtance. The modern city of Milazzo is a tolerably flourishing place, with about 8000 inhabitants; it is built for the most part on a low sandy neek of land, connecting the peninsula. which is bold and rocky, with the mainland. But the old town, which probably occupied the same site with the ancient city, stund on a rocky hill, forming the first rise of the rocky ridge that constitutes the peninsula or headland of Capo di Milazzo. The modern castle on a hill of greater elevation, commanding both the upper and lower town, is probably the site of the ancient Acropolis. (Thuc. iii. 90; Smyth's Sicily, pp. 103, 104: Huare's Classical Tour, vol. ii. p. 215.)

The promontory of Mylae, stretching out abruptly into the sea, forms the western boundary of a bay of considerable extent, affording excellent anchorage. This bay was memorable in ancient history as the scene of two great naval actions. The first of these was the victory obtained by the Roman fleet under C. Duillius, over that of the Carthaginians in the First Punic War, B. c. 260, in which the Roman consul, by means of the engines called Corvi (then nsed for the first time), totally defeated the enemp's fleet, and took fifty of their ships. (Pol. i. 23.) More than two centuries later, it was in the same bay that Agrippa, who commanded the fleet of Octavian, drfeated that of Sextus Pompeius, b. c. 36. Agrippa advanced from the island of Hiera, where his fleet had been before stationed, while the ships of Pompey lined the shores of the bay of Mylae. After their defeat they took refuge at the mouths of the numerous small rivers, or rather mountain torrents, which here descend into the sea. After this battle, Agrippa nuade himself master of Mylae as well as Tyndaris: and some time afterwards again defeated the fleet of Pompeius in a second and more decisive action, between Mylae and a place called Naulochus. The latter name is otherwise unknown, but it seems to have been situated somewhere in the neighbourhood of Cape Rasoculno, the Phalacrian promontory of Ptolemy. (Appian, B. C. v. 195-109, 115-122; Dion Cass. xlix. 2-11; Vell. Pat. ii. 79; Suet. Aug. 16.)

In the account of this campaign Appian speaks of a small town named Artemisica, which is noticed also by Dion Cassius, and must have been situated a little to the E. of Mylae, but is not mentioned by any of the geographers. (Appian, B.C. v. 116 ; Dion Cass. xlix. 8.) It is, however, obvionsly the saine place alluded to by Silius Italicus as the "sedes Facelina Dianae" (Sil. Ital. xiv. 260), and called by Lacilius, in a fragment of his satires, "Facelitis templa Dianae." (Lucil. Sat. iii. 13.) VOL. IL.

Vibius Sequester also mentions a river which he calls Phacelinus, and describes as "juxia Peloridem, confinis templo Dianae." (Vib. Seq. p. 16.) It is, however, obvious, from Appian, that the temple was not situated in the neighburhood of Pelorus, but at a short distance from Mylae, though the precise site cannot be determined. It was designated by popular tradition as the spot where the sacred cattle of the Sun had been kcpt, and were slaughtered by the companions of Clysses. (Appian, l.c.; Plin. ii. 98. s. 101.) The Mons Thorax, mentioned by Diodorus in his account of the battle of the Longanus (Diod. xxii. 13), must have been one of the underfalls of the Neptunian Mountains, which throughout this part of Sicily descend cluse to the sea-shore; but the particular mountain meant is wholly uncertain.
[E.H.B.]
MYLAE. Pliny (iv. 12) speaks of two islands of this name, lying off the const of Crete. They belonged to the group of three islands off Phalasarna (Kutri), called by the Anonymous Cuast-describer Jusagora, Mrese, Myle (Stadiasm). Petalidha is the name of the northernmost of the three littlo islands; the second, opposite to which is Kavisi, is called Mcgalonesi, in spite of its very moderate size; and the third Prasonesi. (Pashley, Trav. vol. ii. p. 61)
[E. B. J.]
MYLAE (Muגai: Fth. Muaaios), a town of Perrhaebia in Thessaly, taken by Perseus in B. c. 171. (Liv. xlii. 54; Steph. B. s. v.) As Livy describes it as a strong place near Cyretiae, it is placed by Leake at Dhamaisi, "which is not only strong in itself, but very important, as commanding the pass of the Titaresius, leading into Perrhaebia from the Pelasgiotis." (Northern Greece, vol. iv. p. 311.)

MYLAS, or MYLE (Múdas), a promontory on the coast of Cilicia, between cape Aphrodisias in the west and cape Sarpedon in the east. On or close to it was a small town of the same name (Plin. v. 22; Stadiasm. Mar. Mag. §§ 165, 166.) As the Stadiasmus calls Mylas a cape and chersonese, Leake (Asia Minor, p. 205) is inclined to identify it with cape Cavaliere, which answers exactly to that description.
[L. S.]
MYLASSA or MYLASA ( $\tau \alpha$ Mú入a $\sigma \sigma a$, or Múлaбa: Eth. Mu入areús), the most important town of Caria, was situated in a fertile plain, in the west of the country. at the foot of a mountain, abounding in beautiful white marble, of which its buildings and temples were coustructed. Hence the city was exceedingly beautiful on account of its white marble temples and porticues, and many wondered that so fine a city was built at the fout of a steep overhanging mountain. The two most splendid temples in the city were those of Zeus Osogos and Zeus Labrandenus, the latter of which stood in the neighbouring village of Labranda, on a hill, and was connected with the city by a road called the sacred, 60 stadia in length, along which the processions used to go to the temple. The principal citizens of Mylassa were invested with the office of priests of leus for life. The city was very ancient, and is said to have been the birthplace and residence of the Carian kings before Halicarnassus was raised to the rank of a capital. Its nearest point on the coast was Physcus, at a distance of 80 stadia, which was the port of Mylassa; though Stephanus B. calls Passala its port-tuwn. (Strab. xir. p. 658, \&c.; Aeschyl. Fragm. 48, where it is called Mylas; Steph. B. s. v. ; Herod. i. 171. Ptol. v. 2. § 20; Plin. v. 29; Paus. viii. 10. § 3.) The splendour of Mylassa is attested by an
anecdote preserved in Athenseus (viii. p. 348) of the witty musician Stratonicus, who, on coming to Mylassa, and observing its many temples, but few inhabitants, placed himself in the middle of the market-place, and exclaimed, "Hear me, oh ye temples" As to the history of this city, we know that Philip of Macedonia, the son of Demetrius, endeavoured in vain to obtain possession of it; and it wes probably to reward the place for its opposition to him that the Romans, after the war with Antiochus, declared its citizens free (Polyb. xvi. 24, xxii. 27 ; Liv. xxxvii. 39). In a petty war with the neighbouring Euromians, the Mylassans were victorious, and took some of their towns; bat were afterwards compelled to submit to the Rhodians (Polyb. $\mathbf{x x x} .5$; Liv. xlv. 25.) In the time of Strabo, the town appears to have been still flourishing, and two eminent orators, Euthydemus and Hybreas, exercised considerable influence over their fellowcitizens. Hybreas, however, incurred the enmity of Labienus, his political adversary, whose pretensions he tried to resist. But he was obliged to take refuge in Rhodes; whereupon Labienus marched with an army against Mylassa, and did great damage to the town. (Strab. xiv. p. 660.) It is mentioned, however, as late as the time of Hierocles (p. 688). It is generally admitted that the site of the ancient Mylassa is marked by the modern Melasso or Melasea, where considerable ancient remains have been obeerved by travellers. A temple, erected by the people of Mylassa in honour of Augustus and Roma, considerable rains of which had existed until modern times, was destroyed about the middle of last century by the Turks, who built a new moeque with the materials (Pococke, Travels, tom. ii. p. 2. c. 6.) Chandler (Asia Minor, p. 234) sam beneath the hill, on the east side of the town, an arch or gateway of marble, of the Corinthian order; a broad marble pavement, with veatiges of a theatre; and round the town ranges of columns, the remains of porticoes. (Comp. Leake, Asia Mimor, p. 230; Fellows, Jownal of an Exc. p. 260, Discoverics in Lycia, p. 67, who saw many ancient remains scattered about the place; Rasche, Lex. Num. iii. 1. p. 999, \&c.)
[L. S.]

COIN OF MYLASSA.
MYNDUS (Múvס̄os: Eth. Múvòos), a Dorian colony of Troezen, on the coast of Caria, situated on the northernmost of the three Dorian peninsulas, a few miles to the northwest of Halicarnassus. It was protected by strong walls, and had a gond harbour. (Paus, ii. 30. §8; Strab. xiv. p. 658; Arrian, Anab. i. 20, ii. 5.) But otherwise the place is not of much importance in ancient history. Both Pliny (v. 29) and Stephanus Byz. (a. v.) mention Palaemyndus as a place close by Myndus; and this Palaemyndus seems to have been the ancient place of the Carians which became deserted after the establishment of the Dorian Myndus. (Comp. Strab. xiii. p. 611.) Mela (i. 16) and Pliny (L.c.) also speak of a place called Neapolis in the same peninsula; and as no other anthors mention such a place in that part of the country, it has been supposed that Myndus (the Dorian colony) and Neapolis were the
same place. But it ought to be remembered that Pliny mentions both Myndus and Neapolis as two different towns. Myndian ships are mentioned in the expedition of Anaxagoras against Naxos. (Herod. v. 33.) At a later time, when Alexander besieged Halicarnassus, he was anxions first to make himself master of Myndus; bat when he attempted to take it by surprise, the Myndians, with the aid of reinforcements from Halicarnassus repuised him with some loss. (Arrian, l.c.; comp. Hecat. Fragm. 229; Polyb. xvi. 15, 21; Scylax, p. 38; Ptol. v. 2. § 9; Liv. xxxvi. 15; Hierocl. p. 687.) Athenseus (i. 32) states that the wine grown in the district of Myndus was good for digestion. It is generally believed that Mentesha or Muatesha marks the site of Myndns; but Col. Leake (Asia Minor, p. 228) identifies Myndus with the small sheltered port of Gumishlw, where Captain Beaufort remarked the remains of an ancient pier at the entrance of the port, and some ruins at the head of the bay. (Comp. Rasche, Lex. Num. iii. 1. p. 1002, Suc.; Eckhel, Doctr. Niam. vol. ii. pt. i. p. 585.)

Ptolemy (v. 2. § 30) mentions a small island called Myndus in the Icarian Sea.
[L. S.]

COIN OF MYNDUS.
MYONIA or MYON (Muovia, Paus. ; Múm, Steph. B.: Eth. Muovév, Pans, Thac.), a town of the Locri Ozolae, situated on the most difficalt of the passes leading from Aetolia into Locris. (Thuc. iii. 101.) Pausanias describes it as a small town ( $\quad \delta \lambda \wedge \sigma \mu a$ ), situated upon a hill 30 stadia from Amphissa inland, containing a grove and an ultar of the gods called Meilichii, and above the town a temple of Poseidon. (Paus. x. 38. § 8, comp. vi. 19. § 4.) Leake (Northern Greece, vol. ii. p. 592) and other authorities place Myonia at Aghia Thymia, or Athymia, a small village, containing Hellenic remsins, distant $1 \frac{1}{\frac{1}{2}}$ hour from Salona (Amphissa) on the road to Galaxidhi on the coast; but this cannot be correct, as, according to the passage in Pausanias, Myonia lay further inland than Amphissa. (Aveo piv

 $\pi \eta s, ~ 2 \pi l$ ปaadáa Kiepert places Myonia in his map N. of Amphissa, on the road from the latter place to Cytinium in Doris-

MYONNE'SUS (Muduvnбos or Mubuncos), a promontory on the south-west of Lebedus, on the comst of Ionia, at the northern extremity of the bay of Ephesus. It is celebrated in history for the naral victory there gained by the Romans under L. Aemilius over Antiochos the Great, in B.c. 190. (Steph. B. s. v.; Strab. xiv. p. 643 ; Thacyd. iii. 42 ; Liv. xxxvii. 27.) Livy describes the promontory as situated between Samos and Teos, and as rising from a broad basis to a puinted summit. There was an approach to it on the land side by a narrow path; while on the sea side it was girt by rocks, so much worn by the waves, that in some parts the overhanging cliffs extended further into the sea than the shipm stationed under them. On this promontory there also was a small town of the name of Myounesus
(Steph. B., Strab. U. cc.), which belonged to Teos. The rocks of Myonnesus are now called Hypsilibonenos.

Pliny (II. N. v. 37) mentions a small island of the name of Myonnesus near Ephesus, which, together with two others, Anthinae and Diarrheusa, formed a group called Pisistrati Insulae.
[L.S.]
MYONNE'SUS (Mubvvnoos: Eth. Muovvíolos), a small island lying off the coast of Phthiotis in Thessaly, in the bay between Larissa Cremaste and Antron. (Strab. ix. p. 435; Steph. B. l.c.)

MYOS-HORMOS ( $\delta$ Muds 8 p $\mu$ os, Diodor. iii. 39 ; Strab. xvi. p. 760-781, xvii. p. 815 ; Ptol. iv. 5. § 14, viii. 15. § 18; Peripl. Mar. Erythr. pp. 1, 6, 9, 11;'Aфроठiтทs ठр $\rho \frac{1}{}$, Agatharch. p. 54 ; Veneris Portus, Plin. vi. 29. § 33) was founded by Ptolemy Philadelphus (в. с. 274) upon a headland of similar name. (Mela, iii. 8. § 7.) He selected it for the principal harbour and station of the trade of Aegypt with India, in proference to Arsinoë at the head of the Red Sea, on account of the tedious and difficult navigation down the Heroopolite gulf. The name Myos-Hormos, which indicates its Greek origin, may signify the "Harbour of the Mouse, but more probably means "the Harbour" of the Muscle" ( $\mu v e c y$, to close, e.g. the shell), since on the neighbouring coast the pearl-muscle or Pinna marina (comp. the Hebrew pininim, Job, xxxviii. 18; Prov. $\mathbf{x x x i} .10$ ) is collected in large quantities. (Bruce, Travels, vol. vii. p. 314, 8vo. ed.) The name was afterwards changed, according to Agatharchides and those writers who copied him, to that of Aphrodites-Hormos; but the elder appellation is more generally retained. Myos Hormos seems to have obtained the designation of Aphrodite (fram of the sea), from the abundance of sea-sponge found in its bay.

The latitude of Myos-Hormos is fixed by Brace, D'Anville, \&ec., at $27^{\circ} \mathrm{N}$. Its situation is determined by a claster of islands, called Jaffateen by modern navigators, of which the three largest lie opprosite to an indenture of the Aegyptian coast. Behind these islands and on the curve of the shore was the harbour. Its entrance was oblique (Strab. xvi. p. 769); bat it was spacious and sheltered, and the water, even to the land's edge was deep enough for vessels of considerable burden.

Myos-Hormos owed its prosperity, as well as its foundation, to the trade with Africa, Arabia, and India. The vescels bound for Africa or the S. coast of Arabia left this harbour in the month of September, and thus fell in with the wind, which at the equinox blows steadily from NW., and carried them down the African const, bringing them back in the following May. The furthest S. point of the African trude was the town of Rhaptum, in the Regio Barbarica, about $10^{\circ} \mathrm{S}$. of the equator. The vessels bound for India (the coast of Malabar or Caylmn) left Myos-Hormm in July; and if they cleared the mouth of the Red Sea before the lst of September, they had behird them the monsoon for nearly three months. The voyage out usnally accupied about 40 days. We are not informed of the extent of the Indian trade under the Ptolemies; but in the reign of Claudias, when the route throngh Aegypt to Malabar first became really known to the Romans, we have a detailed account of it in Pliny (vi. 23. s. 26). That writer calculated the wortf, of gold and silrer sent yearly from Rome to the Fast at 400,000 l. sterling, in exchange for which goods were received of at least four times the value
of that amount, when sold again in Rome or Constantinople. The caravans went up the Nile as far as Coptos, whence they travelled throngh the desert for 7 or 8 days to Berenice or Myos-Hormos, and exchanged their gold for silk, spices, porcelain, and perfumes. A pound of silk was considered equivalent to a pound of gold. Philadelphus first opened the road between Coptos and Myos-Hormos. At first the caravans carried their water with them across the desert, and employed camels for the transport of merchandise. But afterwards caravansaries ( $\sigma$ ra $\alpha \mu 0 i$ ) were built for the ase of travellers; and wells were sunk and cisterns dug for the collection of rain water; although the supply of the latter must have been scanty and precarious, since rain in that latitude seldom falls.

The prosperity of Myos-Hormos as an emporium, however, seems to have been fluctuating, and it was finally supplanted as a depôt at least by Berenice, which, being lower down the Red Sea, was yet more convenient for the southern trade. That it was fluctuating may be inferred from the mention of it by the geographers. Agatharchides, who composed his work in the reign of Philometer (в. с. 180-145), in his account of the Indian trade, makes no mention of Berenice. Diodorus who wrote in the age of Augustus, speaks of Myos-Hormos, but not of its rival. Strabo, who was nearly contemporary with Diodorus, says that Berenice was merely a roadstead, where the Indian vessels took in their cargo, but that they lay in port at Myos-Hormos. Pliny, on the other hand, in his description of the voyage to India does not notice Myos. Hormos at all, and speaks of it incidentally only in his account of the W. coast of the Red Sea. Accordingly, in the reigns of Vespasian and Trajan it must have been on the decline.

There is one difficulty in the relations between these harbours-their distance from each other, According to the Periplus, Berenice was 1800 stadia, or 2.25 miles, from Myos-Hormos, and even this is under the mark, if Cape Ras-el-anf be the Lepte Promontorium of Ptolemy. As the pretext for founding either city was the superior convenience of each, as compared with Arsinoe (Suez), for the Indian trade, it seems strange that the ships should have been kept at Myos-Hormos, but the ladings taken in at Berenice. It is more reasonable to suppose that the latter became the principal emporium of the Indian traffic; and as that increased in importance, the port where it was principally carried on became the more frequented and opulent place of the two.

It is uncertain whether the ruins at the village of Abuschaar represent the site of the ancient MyosHommos.
[W. B. D.]
MYRA ( $\tau \alpha$ Múpa or Múpoev : Eth. Mupeís), one of the most important towns of Lycia, situated on the river Andracus, partly on a hill and partly on the slope of it, at a distance of 20 stadia from the sea. (Strab. xir. p. 666; Steph. B. s. $\boldsymbol{v}$.; Plin. xxxii. 8; Ptol. v. 6. § 3, viii. 17.§ 23.) The small town of Andriaca formed its port. It is remarkable in history as the place where the apostle Paul landed (Acts, xxv. 5); and in later times the importance of the place was recognised in the fact that the emperor Theodosius II. raised it to the rank of the capital of all Lycia (Hierocl. p. 684.) The town still exists, and bears its ancient name Myra, thou h the Turks call it Dembre, and is remarkable for its fine remains of antiquity. Ieske (Asia M/inor, p . 18.3) mentions the ruius of a theatre 355 feet in dua-
meter, several public buildings, and namerous inscribed sepulchres, some of which have inscriptions in the Lycian characters. But the place and its splendid ruins have since been minutely described by Sir C.Fellows (Discoo. in Lycia, p. 196, \&c.), and in Texier's work (Description de $\overline{\text { I'A sie Mineure), }}$ where the ruins are figured in 22 plates. The theatre at Myra, says Sir Charies, is among the largest and the best built in Asia Minor: much of its fine corridor and corniced prosceniam remains. The number of tombs cut in the rock is not large, but they are generally very spacious, and consist of several chambers communicating with one another. Their external ornaments are enriched by sculptared statues in the rocks around ; but they are mostly without inscriptions (see the plate of one in Sir C. Fellows' Discov. facing p. 198, and namerous others in a plate facing p .200 ). On the whole, the ruins of Myra are among the most beautiful in Lycia. (Comp. Spratt and Forbes, Travels in Lycia, vol. i. p. 131, \&e..)
[L. S.]
MYRCINUS (Müpcıvos, Steph. B.; Múprıvyos, Tzetz. Chil. iii. 96: Eth. Muprivios), a place belonging to the Edoni, on the left bank of the Strymon, which was selected by Histizeus of Miletus for his settlement. It offered great advantages to settlers, as it contained an abundant supply of timber for shipbuilding, as well as silver mines. (Herod. vii. 23.) Aristagoras retired to this place, and, soon after landing, perished before some Thracian town which he was besieging. (Herod v. 126; Thuc. iv. 102.) Afterwards, it had fallen into the hands of the Edoni; but on the murder of Pittacus, chief of that people, it surrendered to Brasidas. (Thuc. iv. 107.) The position of Myrcinas was in the interior, to the N. of M. Pangaeus, not far from Amphipolis. (Leake, North. Greece, vol. iii. p. 181.)
[E. B. J.]

## MYRIANDRUS. [Issus.]

MYRICUS (Mupucoùs), a town on the coast of Troy, "opposite," as Steph. Byz. (8. v.) says, "to Tenedos and Lesbos," whence it is impossible to guess its situation. It is not mentioned by any other writer.
[L. S.]
MYRI'NA (Mupiva : Eth. Muptvaios), one of the Aeolian cities on the western coast of Mysia, about 40 stadia to the south-west of Gryneiam. (Herod. i. 149.) It is said to have been founded by one Myrinus before the other Aeolian cities (Mela, i. 18), or by the Amazon Myrina (Strab. xi. p. 505, xii. p. 573, xiii. p. 623; Diod. iii. 54). Artaxerxes gave Gryneium and Myrina to Gongylus, an Eretrian, who had been banished from his native city for favouring the interests of Persia. (Xenoph. Hellem. iii. 1. § 4.) Myrina was a very strong place (Liv. xxxiii. 30), though not very large, and had a good harbour. (Scylax, p. 36; Agath. Praef. p. 9, ed. Bonn.) Pliny (r.32) mentions that it bore the surname of Sebastopolis; while, according to Syncellus, it was also called Smyrna. For some time Myrina was occupied by Philip of Macedonia; but the Romans compelled him to evacuate it, and declared the place free. (Liv. Le.; Polyb. xviii. 27.) It was twice visited by severe earthquakes; first in the reign of Tiberius (Tac. Ann. ii. 47), on which occasion it received a remission of daties on account of the loss it had sustained; and a second time in the reign of Tiajan (Oros. vii. 12). The town was restored each time, and continued to exist antil a late period. (Steph. Byz. s. v.: Ptol. v. 2. § 6; Apollon. Rhod. i. 604; Hierocl. p. 661 ; Geogr. Rav. v. 9, where it is
called Myrenna, while in the Peut. Tab. it bears the name Marinna.) Its site is believed to be occupied by the modern Sandarlik.
[L.S.]

CON OF MYRINA.

## MYRI'NA. [Lemros.]

MYRINA. [Mycenae, No. 1.]
MYRLEA. [Apameia, No. 4.]
MYRME'CIUM (Mup $\mu \boldsymbol{\eta} \kappa$ cov, Strab. xi. p. 494 ;
Pomp. Mela, ii. $1 . \S 3$; Plin. iv. 26 ; Anon. Periph p. 4 ; Steph. B.; Jornand. Get. 5), a Milesian colony on the Cimmerian Bosporas, 20 stadia N. of Panticspaeum. (Strab. vii. p. 310.) Near the town was a promontory of the same name. (Ptol. iii. 6. § 4; Leo Diac. ix. 6.) It is the modern Yenibale or Jenikalé, where many ancient remains have been found. (Clarke, Trav. vol. ii. pp. 98, 102 : Dubois de Montpereux, Voyage au Caucase, vol. v. p. 231.)
[E. B. J.]
MYRMEX (Múp $\mu \eta \xi$, Ptol. iv. 4. § 15), an islund off the coast of Cyrenaica, which is identified with the Aubigda (A $\sigma \subset \gamma \delta \alpha$ ) of Hecataeus (Fr. 800), where the charts show an islet, between Ptolemais and Phycus.
[E. B. J.]

## MYRMI'DONES [AEgina.]

MYRRHI'NUS. [Attica, p. 332, No. 95.]
MYRSINUS. [Myrturtium.]
MY'RTILIS, surnamed Julia ('Iounla Muptinis, Ptol. ii. 5. § 5), a town of the Turdetani in Lasitania, oh the Anas, which had the Jus Latii; now Mertola. (Plin. iv. 21. s. 35 ; Mela, iii. 1; It. Ant. p. 431 ; Sestini, Med p. 11 ; Mionnet, Suppl i. p. 8 ; Florez, Esp. Sagr. xiv. pp. 208, 238 ; Forbiger, iii. p. 36.)

MY'RTIUM or MYRTE'NUM (Múptioy, Mupт $\quad$ VUSy), a place in Thrace mentioned by Demosthenes along with Serrhium, bat otherwise unknown (de Cor. p. 234).

## MYrtos. [Aegaeum Mare.]

MYRTO'UM MARE. [Aegafum Mare.]
MYRTU'NTIUM (Muptoúvtiov), called Myrsirnus (Múpaivos) by Homer, who mentions it among the towns of the Epeii. It was a town of Elis, and is described by Strabo as situated on the road from the city of Elis to Drme in Achaia, at the distance of $\overline{i 0}$ stadia from the former place and near the sea. Leake remarks that the last part of the description must be incorrect, since no part of the road from Elis to Dyme conld have passed by the sea; but Curtius observes that Myrtuntium would at one time have been near the sea-coast, sapposing that the lagoon of Kotiki was originally a gulf of the sea. The ruin near Kalótikos probably represents this place. (Hom. Пl. ii. 616 ; Strab. viii. p. 341 ; Steph. B. $\varepsilon$ v. Múpotvos; Leake, Morea, vol. ii. p. 169 ; Boblaye, Récherches, fe. p. 120 ; Curtius, Peloponnesos, vol. ii. p. 36.)

MYSARIS (Murrapis al. Miaapis, Ptol. iii. 5. §8), the W. promontory of the Achilleos Dormos.
[E. B. J.]
MY'SIA (Mugia : Eth. Muads, Mysus), the name
of a province in the north-west of Asia Minor, which according to Strabo (xii. p. 572) was derived from the many beech-trees which grew about Mount Olympus, and were called by the Lydians uutof. Others more plausibly connect the name with the Celtic moese, a marsh or swamp, according to which Mysia would signify a marshy country. This supprsition is supported by the notion prevalent among the ancients that the Mysians had immigrated into Avia Minor from the marshy countries abnut the Lower Danube, called Moesia, whence Dysia and Moesia would be only dialectic rarieties of the same name. Hence, also, the Mysians are sometimes mentioned with the distinctive attribute of the "Asiatic," to distinguish them from the European Mysians, or Muesians. (Eustath: ad Diom. Per. 809 ; Schol. ad Apollem. Rhod. i. 1115.)

The Asiatic province of Mysia was bounded in the north by the Propontis and the Hellespont, in the west by the Aegean, and in the south by Mount Temnus and Lydia. In the east the limits are not accurately defined by the ancients, though it was bounded by Bithynia and Phrygia, and we may assume the river Kihydacus and Mount Olympus to have. on the whole, formed the boundary line. (Strab. xii. pp. 564, \&c., 571.) The whule extent of country bearing the name of Mysia, was divided into five parts:-1. Mysin Minor (Mugia ì mukpd), that is, the northern coast-district on the Hellespont and Propontis, as far as Monnt Olympus; it also bore the name of Mysia Hellespontiaca, or simply Hellespontus, and its inhabitants were called Hellespontii (Ptol. v. 2. $\S \$ 2,3,14$; Xenoph. Ages. i. 14) ; or, from Mount Olympus. Mysia Olymperie (Muaia ウ̀ 'Oגur-
 braced the districts of Morene, Abrettene and the Apian plain ('Anlas reঠiov; Strab. xii. pp. 574, 576.) 2. Mysia Major (Mugia in $\mu \mathrm{e} \gamma \mathrm{d} \lambda \boldsymbol{\eta}$ ), forming the southern part of the interior of the country, including a tract of country extending between Troas and Aeolis as far as the bay of Adramyttiun. The principal city of this part was Pergamum, from which the country is also called Mysia Pergamene
 $\S \$ 5,14$.$) 3. Troas ( \dot{\eta}$ Tpoads), the territory of ancient Troy, that is, the northern part of the western coast, from Sigeium to the bay of Adramyttium. 4. Avolis, the southern part of the const, especially that between the rivers Caicus and Hermus. 5. Telthrania (ì Tevopavia), or the district on the soathern frontier, where in ancient times Tcuthras is said to have formed a Mysian kingdom. (Strab. zii. p. 551.)

These names and divisions, however, were not the same at all times. Under the Persian dominion, when Mysia formed a part of the second satrapy (Herod. iii. 90), the naine Mrsia was applied only to the north-eastern part of the country, that is, to Mysia Minor; while the western part of the const of the Hellespont bore the name of Lesser Phrygia, and the district to the south of the latter that of Troas. (Scylax, p. 35.) In the latest times of the Roman Empire, that is, under the Christian emperors, the greater purt of Mysia was contained in the province bearing the name of Helle pontus, while the southern districts as far as Troas belonged $\omega$ the province of Asia. (Hierocl. p. 658.)

The greater part of Mysia is a mountainous country, being traversed by the north-western branches of Mount Taurus, which gradually slope down wwards the Aegean, the main branches being

Mount Ida and Mount Temnis. The country is also rich in rivers, though mest of them are sn:all, and not navigable; but, notwithstanding its abundant supply of water in rivers and lakes, the country was in ancient times less productive than other provinces of Asia Minor, and many parts of it were covered with marshes and forests. Besides the ordinary products of Asia Minor, and the excellent wheat of Assus (Strab. xv. p. 725), Mysia was celebrated for a kind of stone called lapis assius (oapкoød $\gamma$ os), which had the power of quickly consuming the human body, whence it was used for coffins (sarcophagi), and partly powdered and strewed over dead bodies. (Dioscorid. v. 141 ; Plin. ii. 98,
 of the Hellespant there were excellent oyster beds. (Plin. xxxii. 21; Catull. xviii. 4; Virg. Georg. i. 207 ; Lucan, ix. 959 ; comp. Theoplrast. Hist. Plant. i. 6. 13.)

The country of Mysia was inhabited by several tribes, as Phrygians, Trojans, Aeolians, and Mysians; but we must here confine ourselves to the Mysians, from whom the country derived its name. Mysians are mentioned in the lliad (ii. 858, x. 430, xiii. 5), and seem to be conceived by the poet as dwelling on the Hellespont in that part afterwards called Mysia Minor. Thence they seem, during the period subsequent to the Trojian War, to have extended themselves both westward and southward. (Strab. xii. p. 665.) Herodotus (vii. 74) describes them as belonging to the same stock as the Lydians, with whom they were always stationed together in the Perian armies (Herod. i. 171), and who probably spoke a language akin to theirs. Strabo (vii. pp. 295, 303, xii. pp. 542, 564, 8cc.) regards them as a tribe that had immigrated into Asia from Europe. It is difficult to see how these two statements are to be reconciled, or to decide which of them is more entitled to belief. As no traces of the Mysian language have come down to us, we cannot pronounce a positive opinion, though the evidence, so far as it can be gathered, seems to be in favour of Strabo's view, especially if we bear in mind the alleged identity of Moesians and Mysians. It is, moreover, not quite certain as to whether the Mysians in Homer are to be conceived as Asiatics or as Europeans. If this view be correct, the Mysians must have crossed over into Asia either before, or soon after the Trojan War. Being afterwards pressed by other immigrants, they advanced farther into the country, extending in the south-west as far as Pergamum, and in the east as far as Catacecaumene. About the time of the Aeolian migration, they founded, under Teuthras, the kingdom of Teuthrania, which was soon destroyed, but gave the district in which it had existed its permanent name. The people which most pressed upon them in the north and east seem to have been the Bithynians.

In regard to their history, the Mysians shared the fate of all the nations in the west of Asia Minor. In b. c. 190, when Antioehus was driven from Western Asia, they became incorporated with the kingdom of Pergamus; and when this was mado over to Kome, they formed a part of the province of Asia. Respecting their mational character and institutions we possess scarcely any information; but if we may apply to them that which Posidonius (in Strab. vii. p. 296) states of the European Muesians, they were a pious and peaceable nomadic people, who lived in a very simple manner on the produce of their flocks, and had not made great advances in
civilisation．Their language was，according to Strabo（xii．p．572），a mixture of Lydian and Phrygian，that is，perhaps，a dialect akin to both of them．Their comparatively low state of civilisation seems also to be indicated by the armour attributed to them by Herodotus（vii．74），which consisted of a common helmet，a small shich，and a javelin，the point of which was hardened by fire．At a later time，the influence of the Greeks by whom they were surrounded seems to have done away with everything that was peculiar to them as a nation， and to have draxn them into the sphere of Greek civilisation．（Comp．Forbiger，Handluch der alten Geographie，vol．ii．p．110，\＆c．；Cramer，Asia Minor，i．p．30，Scc．；Niebuhr，Lect．on Anc．Hist． vol．i．p．83，\＆c．）
［L．S．］
MY＇SIUS（Múgos），a tributary of the Caicus，on the frontiers of Mysia，having its sources on Mount Temnus，and joining the Caicus in the neighbour－ hood of Pergamum．（Strab．xiii．p．616．）Ac－ cording to Ovid（Met．xv．277）Mysius was only another name for Caicus，whence some have inferred that the upper part of the Caicus was actually called Mysius．It is generally believed that the Mysius is the same as the modern Bergma．
［L．S．］
MYSOCARAS（Mugokopas，Ptol．iv．1．§ 3）， a harbur on the W．coast of Mauretania，near the Phuth，probably the same as the Caricus Murus （Kарікд̀ тeixos）of Hanno（p．2，ed．Hudson； comp．Ephor．ap．Steph．B．s．v．），now Aghous，near the Wad Tensift，where Renou＇s map of Marocco marks ruins．（Geog．Graec．Min．vol．i．p．4，ed． Müller，Paris，1855．）
［E．B．J．］
MYSOMACE＇DONES（Murouakéסoves），a tribe of the Mysians，probably occupying the district about the sources of the small river Mysics．（Ptol． v．2．§ 15 ；Plin．v．31．）In the time of the Romans this tribe belonged to the conventus of Ephesus；bat further particulars are not known of them．
［L．S］
MY＇STIA（Muatia：Eth．Muatiavós：Minuste－ race），a town of Bruttium，which seems to have been situated on the E．coast of that province，be－ tween Scylacium and the Zephyrian promontory， apparently not far from Cape Cocinthus（Capo di Stilo）．（Mela，ii．4．§ 8 ；Plin．iii．10．s．15．） Stephanus of Byzantium cites Philistus as calling it a city of the Samnites，by which he must evidently mean their Lucanian or Bruttian descendants．（Steph． B．s．v．）Its position cannot be more exactly deter－ mined，but it is placed conjecturally at Monasterare， near the Capo di Stilo．（Cluver．Ital．p．1305； Romanelli，vol．i．p． 175. ）
［E．H．B．］
MYTHE＇POLIS or MYTHO＇POLIS（Muө́ño入ıs， Muөбкол（s），a town of Bithynia，of uncertain site， though it was probably situated on the north－west side of the Lacus Ascaria．It is said that during the winter all the artificial wells of the place were completely drained of water，but that in summer they became filled again to the brim．（Aristwt．Mir．Ausc． 55；Antig．Caryst．188．）Stephanus Byz．（8．v． Huөb；o人ts）and Pliny（v．43）mention a town of the name of Pythopolis in Mysia，which may pos－ sibly be the same as Mythopolis．
［L．S．］

 most important city in the island of Lesbos．There is some uncertainty about the orthoyrapliy of the name．Coins are unanimous in favour of Mut $\boldsymbol{\lambda} \boldsymbol{\lambda} \boldsymbol{\eta} \eta$ ． Inscriptions vary．Greek manuscripts have gene－ rally，but not universally，Mıтט入ウ̈ขך．Latic manu－
scripts have generally Mitylene；but Velleius Pa－ terculus，Pomponius Mela，and sometimes Pliny， have Mytilene．－In some cases we find the Latin plural form Mitylenae．（Suet．Caes．2，Tib． 10 ； Liv．Epit．89．）Tacitus has the adjective Myti－ lenensis（ $A n n$. xiv．53）．It is generally agreed now that the word ought to be written Dytilene； but it does not seem necessary to alter those pas－ sages where the evidence of MSS．preponderates the other way．A full discussion of this sabject may be seen in Plehn（Lesbiacorum Liber）．The modern city is called Mitylen，and sometimes Castro．

The chief interest of the history of Lesbos is concentrated in Mytilene．Its eminence is evident from its long series of cuins，not only in the auto－ nomous period，when they often bore the legend ПP $\Omega$ TH AECBOT MYTIAHNH，but in the im－ perial period down to the reign of Gallienus．Lesbns， from the earliest to the latest times，has been the most distinguished city of the island，whether we consider the history of poetry or politics，or the annals of naval warfare and commercial enterprise．

One reason of the continued pre－eminence of Mytilene is to be found in its situation，which（in common with that of Methymen）was favourable to the coasting trade．Its harbours，too，appear to have been excellent．Originally it was built upon a small island；and thus（whether the small island were united to the main island by a causeway or not）two harbours were formed，one on the north and the other on the south．The former of these was the harbour for ships of war，and was capable of being closed，and of containing fifty triremes， the latter was the merrantile harbour，and was larger and deeper，and defended by a mole．（Strab． xiii．p． 617 ；Paus．viii．30．）The best elucidation of its situation in reference to the sea will be found in the narratives contained in the 3rd book of Thucy－ dides and the lst book of Xenophon＇s Hellenics． The northern harbour seems to have been called Ma入óeis［Malesa］．This harmonises with what we find in Thucydides，and with what Aristotle says concerning the action of the NE．wind（кaukias） on Mytilene．The statements of Xenophon are far from clear，unless，with Mr．Grote（Hist．of Greece， vol．viii．p．230），we suppose the Euripus of Mytilene to be that arm of the sea which we bave mentioned，in the article Lesbos，under the name of Portus Hieraeus，and which runs up into the interior of the island，to the very neighbour－ hood of Mytilene．A rude plan is given by Tourne－ fort；but for accurate information the English Ad－ miralty charts must be consulted．The beauty of the ancient city，and the strength of its forti－ fications，are celebrated both by Greek and Roman writers．（See especially Cic．c．Kull，ii．16．）Plutarch mentions a theatre（Pomp．42），and Athenseus a Prytaneium（x．p．425）．Vitruvius says（i．6） that the winds were very troublesome in the harbour and in the streets，and that the changes of weather were injurious to health．The products of the soil near Mytilene do not seem to have been distin－ guished by any very remarkable peculiarities． Theophra－tus and Pliny make mention of its mush－ rooms：Galen says that its wine was inferior to that of Methymns．In illustration of the appearance of Mytilene，as seen from the sea，we may refer to a view in Choiseul－Gouffier；and to another，which shows the fine forms of the mountains immediately behind，in Conybeare and Howson＇s Life and bipp of St．P＇aul．

The first passage in which the history of Mytilene comes prominently into view is in the struggle between the Aeolians and Athenians for Sigeum (b.c. 606), at the NW. corner of Asia Minor. The place and the time are both remarkable, as illustrating the early rigour with which Mytilene was exercising its maritime and political power. We see it already grasping considerable possessions on the mainland. It was in this conflict, too, that Pittacus, the sage and lawgiver of Mytilene, acted so noble a part, and that Alcacus, her great poet, lust his shield. The mention of these two names reminds us that this time of rivalry with Athens coincides with the famous internal contests of the nobles and commons in Mytilene. For the history and reaults of this struggle, see the lives of Alcaeve, Pittacus, and SAPPHO, in the Dict. of Biography.

It may be difficult to disentangle the history of the Mytileneeans from that of the Aeolians in general, during the period of the Persian ascendancy on these consts. But we have a proof of their mercantile enterprise in the fact that they alone of the Aeolians took part in the building of the Hellenium at Naucratis (Herod. ii. 178); and we find them taking a prominent part in the invasiou of Egypt by Cambyses. (Ib. iii. 13, 14.) They supplied a contingent to Darius in his Scythian expedition (Ib. iv. 97). They were closely connected with the affuirs of Histiseus (Ib. vi. 5); and doubtless, though they are not separately mentioned, they were the best portion of those Aeolians who supplied sixty ships to Xerzes in his invasion of Greece. (Ib. vii. 95.)

The period of the Athenian supremacy and the Peloponnesian War is full of the fame of Mytilene. The alliance of its citizens with those of Athens began soon after the final repulse of Persia. They held a very distinguished position among the allies which formed the Athenian confederacy; but their revolt from Athens in the fourth year of the Peloponnesian War brought upon them the must terrible ruin. Though the first dreadful decision of the Athenian assembly was overruled (Thucyd. iii. 36), the walls of Mytilene were pulled down, and her fleet given up; her territory was divided among Athenian shareholders, and she was deprived of her possessions and forts on the mainland. (Ib. iii. 50.)

Towards the close of the Peloponnesian War, Conon was defeated by Callicratidas off Mytilene, and blockaded in the harbour. (Xen. Hell. i. 6.) We pass now to the period of Alezander, with whose campaigns this city was conspicuously connected. The Lesbians made a treaty with Macedonia. Memnon reduced the other cities of the island; and his death, which inflicted the last blow on the Persian power in the Aegean, took place in the moment of victory against Mytilene. It was retaken by Hegesilochus, in the course of his general reduction of the islauds, and received a large accession of territory. Two Mytilenseans, Leomedon and Erigyius, the sons of Larichus, were distinguished members of Alexander's staff. The latter fell in action against the Bactrians; the former was governor of Syria even after Alexander's death.

The first experience of the Roman power in the Aegean was disastrous to Mytilene. Having espoused the cause of Mithridates, and having held out to the last, it was sacked by M. Thermus, on which occasion J. Caesar honourably distinguished himself. Pompey's triendship with Tbeophanes led to the recognition of Mytilene as a free city. (Plin. v. 31.) After the defeat of Pharsalia, Pompey touched there
for the last time to take Cornelia on board. His son Sextus met with a friendly reception there, after his defeat at sea, by Agripya. (Dion Cass. xlix. 17; App. B. C. v. 133.) Agrippa himself resided there for some time in retirement, ostensibly on account of his health, but really through mortification caused by the preference shown to M. Marcellus (Tac. Anm. xiv. 53 ; Suet. $A$ uy. 66, Tib. 10); and this residence is commemorated by an inscription still extant. (See Pococke.) The last event which we need mention in the imperial period is the crossing over of Germanicus with Agrippina from Euboea to Lesbos, and the birth of Julia. (Tac. Ann. ii. 54.) This event, also, was commemorated both by coins and inscriptions. (Seo Eckhel and Pococke.) It appears that the privilege of freedom was taken away by Vespasian, but restored by Hadrian. (Plehn, Lesbiac. p. 83.)

Mytilene is one of the few cities of the Aegean, which have continued without intermission to flourinh till the present day. In the course of the middle ages it gradually gave its name to the whole island. Thus, in the Synecdemus of Hierocles, Mirvation and Metipua are both mentiuned under the Province of the Islands; but in the later Byzantine division, Mytilene is spoken of as au island, like Lemnos and Chios, in the Theme of the Aegean Sea. (Const. Porphyrog. de Them. i. pp. 42, 43, ed. Bonn.) The fortunes of Mytilene during the first advances of the Mahomedans in the Lerant, and during the ascendancy of the Venetians at a later period, are noticed in Finlay's History of the Byzantine and Greek Empires, vol. ii. pp. 72, 171, 223. The island of Lesbos was not actualls part of the Mahomedan empire till nearly ten years after the fall of Constantinople.

With the exception of the early struggles of the time of Alcaens and Pittacus, there is little to be said of the internal constitutional history of Mytilene. It shared, with all Greek cities, the results of the struggles of the oligarchical and democratical parties. We find a commonalty ( $\delta \hat{\mu} \mu \mathrm{os}$ ) and a council (Bб́л $\lambda a$ ) mentioned on coins of the period of Alexander; and the title of magistrates, called orparyrbs (praetor), appears on coins of Lacins Verus. In connection with this part of the subject we may allude to two creditable laws; one which enacted (donbtless in consequence of the great quantity of wine in the island) that offences comnitted by the drank should be more severely punished than those committed by the sober (Arist. Pol ii. 9. 9); the other making a singular provision for the punishment of faithlessness in tributary allies, by depriving them of the privilege of educating thair children. (Aelian, Var. Hist vii. 15.)
[J. S. H.]

COIN OF MYTILERE.
MYTI'STRATUS (Mutiotparos, Steph. B., Diod.; Moutlotpatos, Zonar.; to Muttiotpatov, Pol.: Eth. Mutustratinus, Plin.), a town in the interior of Sicily, the position of which is wholly uncer-
tain．It was probably but a small town，though strongly fortified，whence Philistus（ap．Steph．B． 8．v．）called it＂a fortress of Sicily．＂It is con－ spicuously mentioned during the First Punic War． when it was in the hands of the Carthaginians，and was besieged by the Romans，but for some time with－ out success，on account of the great strength of its position；it was at length taken by the consul $A$ ． Atilius Calatinus in B．c．258．The inhabitants were either put to the sword or sold as slaves，and the town itself entirely destroyed．（Yol．i． 24 ； Diod．xxiii．9，Exc．Hoesch．p．503；Zonar．viii．） It was，however，again inhabited at a later period，as we find the Mutustratini mentioned by Pliny among the municipal towns of the interior of Sicily．（Plin．iii． 8．s．14．）But no notice of its name occars in the interval，and Cluverius（who has been followed by many modern geographers）would，therefore，identify Mytistratus with Amestratus ；an assumption for which there are certainly no sufficient grounds，both names being perfectly well attested．［Amestra－ tus．］（Cluver．Sicil．p．383．）［E．H．B．］

MYUS（Muoũs：Eth．Muoúrios），an Ionian town in Caria，on the southern bank of the Maeander，at a distance of 30 stadia from the mouth of that river． Its foundation was ascribed to Cydrelus，a natural son of Codrus．（Strab．xiv．p．633．）It was the smallest among the twelve Ionian cities，and in the days of Strabo（xiv．p．636）the population was so reduced that they did not form a political commu－ nity，but became incorporated with Miletus，whither in the end the Myusians transferred themselves， abandoning their own town altogether．This last event happened，according to Pausamias（vii．2．§ 7）， on account of the great number of flies which an－ noyed the inhabitants；but it was more probably on account of the frequent inundations to which the place was exposed．（Vitruv．iv．1．）Myus was one of the three towus given to Themistocles by the Persian king（Thucyd．i．138；Dicx．Sic．xi．57； Plat．Them．29；Athen．i．p．29；Nep．Them．10．） During the Peloponnesian War the Athenians ex－ perienced a check near this place from the Carians． （Thucyd．iii．19．）Philip of Macedonia，who had obtained possession of Myus，ceded it to the Mag－ nesians．Athen．iii．p．78．）The only edifice noticed by the ancients at Myus was a temple of Dionysus，built of white marble．（Paus．l．c．）The mmense quantity of deposits carried down by the Maeander have considerably removed the coast－line， so that even in Strabo＇s time the distance between Myus and the sea was increased to 40 stadia（xii． p．579），while originally the town had no doubt been built on the coast itself．There still are some ruins of Myus，which most travellers，forgetting the changes wrought by the Macander，have mistaken for those of Miletus，while those of Heracleia have been mistaken for those of Myus．（Comp．Leake， Asia Minor，p．239，\＆c．）The mistake is repeated by Sir C．Fellows（Journal of a Tour in As．Min． p．263），though it had been pointed out long before his time．

## N．

NAARDA（Nad́p8a，Ptol．v．18．§ 7；Steph．B． s．v．；Nєá $\delta \delta$ a，Joseph．Ant．xviii．12），a small place in Mesopotamia，near Sipphara．It is probably the same as that called in the l＇eutinger Table Naharra． Josephus speaks（l．c．）of Nearda as a place in

Babylonia．possessing an extensive range of territory and defended from hostile attack by the Euphratea which flows round it．When Tiberius overthrew the Jews in the East，the remnant of that people trok refuge in Naarda and Nisibis；and the former city long remained a place of refuge for the Jews． In the intermediate records of the Christian East we find occasional notices of this place，under the titles of Nahardeir and Beth－Nuhadra．Thns，in A．D．421，a bishop of Nahardeir is mentioned（As－ sem．Bibl．Orient．iii．p．264）；in A．D．755，Jonas is bishop of Beth－Nuhadra（Assem．ii．p．111）； and as late as A．D．1285，another person is reconded as＂Episcopus Nuhadrensis．＂（Assem．ii．p．249．） During all this period Nearda is included within the episcopal province of Mosul．Lastly，in the Travels of Benjamin of Tudela，which took place towards the end of the 12 th century，the traveller mentions going to＂Juba，which is Pumbeditha，in Nehardea， containing about two thousand Jews＂（p．92， Asher＇s edit．）；from which it appears that，at that period，Nuarda was considered to comprehend a dis－ trict with other towns in it．Pumbeditha and Sara were two celebrated Jewish towns situated near one another，at no great distance from Baghdúd．［V．］

NAARMALCHA．［Babyloria，Vol．I．p． 362，a．］

NABAEUS（Na8aios，Ptol．ii．3．§ 1），a river in the extreme north of Britannia Barbara or Caledunia， probably the Navern river，east of C．Wrath．

NABALIA，in the text of Tacitus（Hist．v．26）， is a river in or near the Batavorum Insula，over which there was a bridge．During the war between Civilis and the Romans，there was a conference between Civilis and Cerealis on this bridge，which had been cut asunder for safety＇s sake，each party at the conference keeping on his own side of the river．It is uncertain if the name Nabalia is right ； and if it is right，it is also uncertain what toe river is．It must，however，be some strean about the lower part of the Khine；and Walckenaer（Geog． foc．vol．i．p．296）conjectures that it is the Issel or eastern branch of the Rhine which flows into the Zuyder Zee．Ptolemy（ii．11．§ 28）has a place Navalia（Navá入ıa）in Great Germania，the position of which，if we can trust the numbers，is on or near Ptolemy＇s eastern branch of the Bhine，whatever that eastern branch may be．
［G．L．］
NABATAEI（Nabataío，＇Aтaraîo，Ptol．vi． 7. § 21 ；Nabdrau，Suid．8．v．；Navataioı，LXX．；Naba－ thae，Sen．Herc．Oet．160：the country，Na6araia， Strab．；Nabarท⿰亡t，Joseph．），a numerous and import－ ant people of Arabia Petraea，celebrated in the clas－ sical geographers．Josephus describes the country as comprehending all from the Euphrates to the Ked Sca，i．e．the whole of the northern part of the Arabian peninsula ；and inhabited by the descendants of the 12 sons of Ishmael，from the eldest of whom， Nebaioth，this territory is supposed to have derived its name．This is confirmed by the authority of S ． Jerome，three centuries later，who writes，＂Nebaioth omnis regio ab Euphrate usque ad Mare Rubrum Nabathena usque hodie dicitur，quae pars Arabise est．＂（Joseph．Ant．i．13．§ 4；Hieron．Conment． in Genes．xxp．13．）The only allusion to this people in the canionical Scriptures，supposing them identical，is by their patriarchal designation；and the mention of the＂rams of Nebaioth＂in conl－ nection with the＂flocks of Kedar＂（Isa．Ix．7）． intimates that they existed as a distinct pastoral tribe．But they occur frequently in history after

NABATAEI.
NABATAEI.
393
the captivity. They were the friends and allies of the Jews in their struggle for independence; for when Judas Maccabreus, with his brother Jonathan, found them 3 days S. of the Jordan (cir. B. c. 164), they received him amicably, and gave him information which led to the deliverance of the oppressed Jews in Gilead from the Ammonites, under Timotheus (Joseph. Ant. xii. 8. § 3; 1 Maccab. v. 24, \&c.): and when preparing for an engagement with Bacchides (cir. в. c. 161), the sume Jonathan proposed to place all their moveable pruperty in their custody. (Ib. xiii. 1. § 2 ; 1 Maccab. ix. 33.) But the earliest and fullest notice of this people and of their country occurs in Diodorus Siculus, who mentions them frequently. In B. c. 312, Antigonus, having recovered Syria and Palestine out of the hands of Ptolemy, resolved on an expedition against the Nabataei, and detached his general Athenaeus on this service, with 4000 light-armed troops and 600 light cavalry. The manners of these Arabs and their country is described by the historian in this connection. They inhabited tents in a vast desert tract, which offered neither streams nor fountains to an invading army. Their institutions, as described by him, bear a striking resemblance to those of the Rechabites in every particular, "to drink no wine, nor to build houses, nor to have vineyard, nor field, nor seed, but to dwell in tents." (Jer. xxxv. 6-11.) Diodorus mentions that the violation of any of these customs was a capital crime. Their occupations were chiefly pastoral; some prosessing camels and others sheep in much greater abundance than the other Arabs, although their number did not exceed 10,000 ; but they also acted as carriers of the aromatic drugs of Arsbia Felix, which were discharged at their great mart at Petra, and by them transported to the Mediterranean, at Rhinocorura. The love of liberty was a passion with them; and their custom, when attacked by a more powerful enemy, was to retire to the wilderness, whither the invaders could not follow them for want of water. They themselves had provided for such emergencies vast subterranean reservoirs of rain water, dug in the clayey soil, or excavated in the soft rock, and plastered, with very narrow months,-which could be easily stopped and concealed from sight, but which were marked by indications known only to themselves,-but gradually expanding until they attained the dimensions of 100 feet square. They lived on flesh and milk, and on the spontaneous produce of the country, such as pepper and wild honey, which they drank mixed with water. There was an annual fair held in their conntry, to which the bulk of the males used to resort for purposes of trafic, leaving their flocks with their most aged men, and the women and children at Petra, naturally a very strong place, though unwalled, two days distant from the inhabited country. Athenaeus took adrantage of the absence of the Nabataeans at the fair, to attack Petra; and making a forced march of 3 days and 3 nights from the eparchy of Idumaea, a distance of 2200 stadia, he assaulted the city about midnight, slanghtered and wounded many of its inhabitants, and carried off an immense booty in spicery and silver. [Petka] On his retreat, however, he was surprised by the Nabataei, and all his forces cut to pieces, with the exception of 50 horsemen. Shortly afterwards Antigonus sent another expedition against Petra, under the command of Demetrius; but the inhabitants were prepared, and Denctrius
was glad to withdraw his army on receiving such gifts as were most esteemed among them. (Diod. xix. 44-48, comp. ii. 48.) In the geographical section of his work the author places them on the Laianites Sinus, a bay of the Aelanitic gulf, and describes them as possessing many villages, buth on the coast and in the interior. Their country was most populous, and incredibly rich in cattle; but their national character had degenerated when he wrote (cir. B. c. 8). They had formerly lived honestly, content with the means of livelihond which their flocks supplied; but from the time that the kings of Alexandria had rendered the gulf navigable for merchant vessels, they not only practised violence as wreckers, but made piratical attacks from their coasts on the merchantmen in the passage through the gulf, imitating in ferocity and lawlessness the Tauri in Pontus. Slips of war were sent against them, and the pirates were captured and punished. (lb. iii. 42, comp. Strabo, xvi. p. 777.) The decrease of their transport trade and profits, by the new channel opened through Eeypt, way doubtless the real cause of this degeneracy. The trade, however, was not entirely diverted; later writers still mention Petra of the Nabataei as the great entrepôt of the Arabian commerce (Arrian, Periplus, p. 11, ap. Hudson, vol. i.), both of the Gerrhaei of the west, and of the Minaei of the south of that peninsula. (Strabo, xvi. p. 776.) The account given by Strabo agrees in its main features with the earlier record of Diodorus Siculus : and he records at length the deception practised on his friend Aelius Gallus by Syllaeus, the procurator ( $\in \pi$ iтропоs) of the $\mathrm{Na}-$ bataei, under the king Oboxlas; a false friend of the Romans, through whose territory he first led them on leaving Leuce Come, where they had landed. The policy of Syllaeus illustrates the remark of Strabo (xvi. p. 783), that the Nabataeans are prudent and acquisitive ; so much so, that those who wasted their property were punished, and those who increased it rewarded by the state. They had few slaves among them ; so they either waited on themselves, or practised mutual servitude in families, even in the royal family. They were much addicted to feasting, and their domestic manners marked considerable progress in luxury and refinement, from the rude simplicity of the primitive times described by the more ancient author (p. 783, seq.). He mentions that they were fire-worshippers, and sacrificed daily to the sun on their house-tops Their government may be styled a limited monarchy, as the king was subject to be publicly called to account, and to have to defend himself before the people. Their cities were unwalled, and their country fruitfol in everything but the olive. The limits of their country are not clearly defined; Strabo places them above the Syrians, with the Sabaei, in Arabia Felix (xvi. p. 779); but this must be a corrupt reading, and is inconsistent with his other nutices of them. Thus he speaks of the promontory near Seal Island - the peninsula of Mount Sinai - as extending to Petra of the Arabs called Nabataei (p. 776), which he describes as situated in a desert region, particularly towards Judaea, and only three or four days' journey from Jericho (p. 779). The appriach to Egypt from the east, towards Phoenice and Judaea, was difficult by way of Pelusium, but from Arabia Nabatiea it was easy. All these and similar notices serve to show that, from the age of Antigonus to this period, the Nabataci had in-

## NACOLFIA.

habited the land of Edom, commonly known as Idumaea, and intimate that there was no connection whatever between the Idumaeans of Petra in the Augustine period, and the children of Esau; they were, in fact, Nabataeans, and therefore, according to Josephus and other ancient authorities, Ishmaelite Arabs. How or when they had dispossessed the Edomites does not appear in history, nor what had become of the remnant of the Edomites. (Robinson, Bib. Res. vol. ii. pp. 558, 559.) But while Judas Maccabaeus was on terms of friendship with the Nabataei, he was carrying on a war of extermination against the Edomites. (Joseph. Ant. xii. 8. § 1 ; 1 Maccab. v. 3.) It is worthy of remark, however, that the Idumaeans with whom Hyrcanus was in alliance, over whon Aretas reigned, and from whom Herod was sprung, are expressly said to be Nabatacans (Ant. xiv. 2. § 3, 3. §§ 3,4), whose alliance was refused by Pompey, on account of their inaptitude for war. And this identity is further proved by Strabo, who writes that the Idumaeans and the lake (Asphaltides) occupy the extreme west (?) corner of Judaes: - "These Idumaeans are Nabataeans ; but being expelled thence in a sedition, they withdrew to the Jews and embraced their cus. toms." (xvi. p. 760.) This recognition of the Nabatacan origin of the later Idumaeans, proves that the name is to be regarded as a geographical, rather than as a genealogical designation. Pliny (vi. 32) throws little light upon the subject, merely making the Nabataei contiguous to the Scenite Arabs, with whom they were nore probably identical, and stating that the ancients had placed the Thimanaei next to them (i. e. on the E.); in the place of whom he names several other tribes, as the Taveni, Suelleni, Arraceni, \&c. (Ibid.) But the statement of Josephus that the Nabataei extended from the Euphrates to the Red Sea, is confirmed by the fact that the name is still to be found in both those regions. Thus the name Nabat is applied to a marshy district, described by Golius as part of the "palustria Chaldaeae," between Wasith and Busra, which was called "paludes Nabathaeorum," (Golius, cited by Forster, Geog. of Arabia, vol. i. p. 214 n.*), while at the other extremity the name Nabat is given to a town two days beyond (i. e. south) of El-Haura in the Medjaz, by an Arabian geographer (Söiouti, cited by Quatremere, Mémoire sur les Nabateens, p. 38), near where Jebel Näbit is marked in modern maps. The existence of this name in this locality is regarded by M. Quatremère as an additionalargument for the identity of EL-Haura with Leuce Come, proving that the country of the Nabataei did actually extend so far south. The fact of the origin of the Nabataeans from Nebaioth the son of Ishmael, resting as it does on the respectable authority of Josephus, followed as he is by S. Jerome (Quacst. Hebr. in Genes. tom. ii. p. 530), and all subsequent writers in the western world, has been called in question by $M$. Quatremère in the Mémoire above referred to; who maintains that they are in no sense Ishmaelites, nor connected by race with any of the Arab families, but were Aramaeans, and identical with the Chaldaeans. He cites a host of ancient and most respectable native Arabic authors in proof of this theory ; according to whose statements the name Nabats or Nabatacans designated the primitive and indigenous population of Chaldaea and the neightouring provinces, probably those whom Eusebius designates Babylonians in contradistinction from the Chaldaeans. They occupied the whole of
that country afterwards called Irak-Arab, in the most extended sense of that naine, even comprehending several provinces beyond the Tigris; and it is worthy of remark, that Miasoudi mentions a remnant of the Babylonians and Chaldaeans existing in his day in the very place which is designated the marshes of the Nabataeans, i. e. in the villages situated in the swampy ground between Wasith and Basra. (Ib. p. 66.) Other authors mention Nabatreans near Jathrib or Medina, which would account for the Jelel Nibut in that vicinity; and another section of them in Bahrein, on the eastern coast of the peninsula, who had become Arabs, as the Arab inhabitants of the prorince of Oman are said to have become Nabataeans. (lb. p. 80.) This settlement of Nabataeans in the Persian Gulf may be alluded to by Strabo, who relates that the Chaldaeans, banished from their country, settled themselves in the town of Gerrha, on the coast of Arabia (xvi. p. 766); which fact would account for the commercial intercourse between the merchants of Gerrba and those of Petra above referred to; the Nabataei of Petra being a branch of some family also from Babylon and perhaps driven from their country by the same political revolution that dispossessed the refugees of Gerrba. However this may have been, it must be admitted that the very ingenious and forcible arguments of M . Quatremère leave little doubt that this remarkable people, which appears so suddenly and comparatively late on the stage of Arabian history, to disappear as soddenly after a brief and brilliant career of mercantile activity and success, were not natives of the soil, but aliens of another race and family into which they were subsequently merged, again to reappear in the annals of their own original seats. (lb. pp. 88-90.) Reland gives a different account of the identity of the names in the two quarters. (Palaestina, p. 94.) [G. W.] NABATHRAE. [ARUALTES.]
NABIA'NI (Nasiavol), a tribe of the Cancasus, whom Strabo (xi. p. 506) couples with the Panxani (Hay(avol), about the Palus Maeotis. [E. B. J.]

NABLIS, a river of Germany, flowing into the Danube from the north, and probably identical with the Naab in Bavaria. (Venat. Fort. vi. 11; Geogr. Rav. iv. 26. who calls it Nabus or Narus.) [L. S.]

NABRISSA or NEBRISSA (Ná6pi $\sigma \sigma \alpha$, Strab. iii. pp. 140, 143 ; Ptol. ii. 4. § 12 ; Nebrissa, in old editt. of Plin. iii. 1. s. 3, but Sillig reads Nabrissa: Nebrissa, Sil. iii. 393), surnamed Veneria, a town of the Turdetani in Hispania Baetica, situated upon the aestuary of the river Baetis. According to Silius (l.c.) it was celebrated for the worship of Dionysus. Now Lebrija. (Florez, E'sp. Sagr. xii. p. 60.)

NABRUN/ a river of Gedrosia, mentioned by Pliny (vi. 23. s. 26). It must have been situated near the inouth of the Arabis, between this river and the Indus; but its exact position cannot be determined. It is not mentioned in the voyage of Nearchus. [V.]

NACMU'SIL [Mauretania.]
NACOLEIA, NACO'LIA (Nanódeia, Nako入la), a town in Phrygia Epictetus, between Dorylaeum and Cotyaeum, on the upper course of the river Thymbres. (Strab. xii. p. 576 ; Steph. B. s. v.; Ptol. v. 2. § 22.) In the earlier times, the town does not seem to have been a place of much consequence, but later writers often mention it. It has acquired some celebrity from the fact that the emperor Valens there defeated the usurper Procopius. (Amm. Marc. xxvii. 27; comp. Zosin. iv. 8; Sorrat. Hist. Eccl. iv. 5 ; Suzom. iv. 8.) In the reign of

Arcadius, Nacoleia was occupied by a Gothic garrison, which revolted against the emperor. (Philostorg. xi. 8 ; comp. Hierocl p. 678 ; Conc. Chalced. p. 578.) The Peuting. Table places it 20 miles south of Dorylaeum, and Col. Leake (Asia Minor, p. 24) is inclined to identify the place with Pismesh Kalesi, near Doganlu, where he saw some very remarkable, apparently sepulchral, monuments. But the monuments alluded to by Leake seem to have belonged to a more important place than Na coleia, and Texier (Descript. de l'Asie Min. vol. i.) asserts that it is proved by coins that Nacoleia was situated on the site of the modern Sidighasi, on the north-west of Doganlu.
[L. S.]
NACO'NA (Naкẃv $\eta$, Steph. B.: Eth. Naкwvaios), a town of Sicily mentioned only by Stephanus of Byzantium, who cites Philistus as his authority. The accuracy of the name is, however, confirmed by coins, the earliest of which bear the legend NAKONAION, while those of later date have NAK $\Omega$ NAIIN. From one of the latter we learn that the town had been occupied by the Campanians, apparently at the same period with Aetna and Entella. (Millingen, Ancient Coins, pp. 33-35; Sestini, Lett. Num. vol. vii. pl. 1.) There is no clue to its position.
[E. H. B.]
NA'CRASA (Náкра $\sigma a$ ), a town in the north of Lydia, on the road from Thyatira to Pergamum. (Ptol. v. 2. § 16; Hieroci. p. 670, where it is called *Anparos.) Chishull (Ant. Asiat. p. 146) has identified the place by means of coins with Bakhir, or Bakri, somewhat to the north-east of Somma. (Comp. Arundell, Seven Churches, p. 276. .) [L. S.]

COIN OF NACRASA.
NAEBIS or NEBIS. [Gallaecia, Vol. I. p. 933; Minius.]

NAELUS (Naî̀os, Ptol. ii. 6. § 5), a river on the north coast of Hispania Tarraconensis, in the territory of the Paesici, a tribe of the Astures. Now the Nalon.

NAGADIBA (Naydóı5a, Ptol. vii. 4. § 7: Eth. Nayd́ıbot, Ptol. vii. 4. §9), a town in the NE. corner of the island of Taprobane or Ceylon, at no great distance from the capital Anurogrammum. Ptolemy gives the same name to one of a group of islands which, he states, surrounded Ceylon. (vii. 4. § 13). The name may be a corruption of the Sanscrit Nagadwipa, which would mean Island of Snakes.

NAGARA (N $\alpha$ ' $\gamma a \rho a$ ), a city in the NW. part of India intra Gangem, distinguished in Ptolemy by
 is no doubt the present Nagar, between the Kábul river and the Indus. From the second name which Ptolemy has preserved, we are led to believe that this is the same place as Nysa or Nyssa, which was spared from plander and destruction by Alexander because the inhabitants asserted that it had been founded by Bacchus or Dionysus, when he conquered the Indians. (Arrian, Anab. v. 1; Curt. viii. 10. § 7.) A mountain called Meron was said to overhang the city, which was also connected with the
legend of Bacchus baving been reared in the thigh of Zeus.

NaGARA. [Marsyabae.]
NAGEIRI (Ń́ $\gamma \in \iota \rho o \iota$ or Navíctipot, Ptol. vii. 4. § 9), one of the two most southern tribes of Taprobane (Ceylon). They appear to have lived in the immediate neighbourhood of what Ptolemy calls, and what are still, "the Elephant Pastures," and to have had a town called the city of Dionysus (Diovíaov sódis or ák $\kappa \circ \nu$ ), which is probably represented now by the ruins of Kattregam (Davy, Account of Ceylon, p. 420; Ritter, Erdkunde, vi. p. 22); if these are not, as some have supposed, the remains of Mordulamne.
[V.]
NA'GIDUS (Ndyıסos: Eth. Nayıס̄eús), a town of Cilicia on the coast, said to have been colonised by the Samians. Stephanus B. mentions an island named Nagidusa, which corresponds to a little rock about 200 feet long, close to the castle of Anamour. (Strab. xiv. p. 670; Mela, i. 13. §5; Scylax, p. 40; Steph. B. s. v.; Beaufort, Karamania, p. 206; Cramer, Asia Minor, vol. ii. p. 326.

COIN OF NAGIDUS.
NAGNA'TA (Nd ${ }^{2} \gamma a \tau a$, Ptol. ii. 2. §4, in the old
 anuos) on the west coast of Ireland, in the territory of the Nagnatar (Nayâtal, Ptol. ii. 2. § 5), probably situated upon Sligo Bay.

NAHALAL (Nabad́入, LXX.), a city of the tribe of Zabulon, mentioned only in Joshua (xix. 15). Eusebius identifies it with a village named Nila ( $N \epsilon i \lambda \alpha ́$ ), in Batanaea ; but Reland justly remarks, that this is without the territory of the tribe of Zabulon. (Palaestina, s. v. p. 904.) [G. W.]

NAHARVALI, one of the most powerful tribes of the Lygii, in the north-east of Germany. Tacitus (Germ. 43) relates that the country inhabited by them (probably about the Vistula) contained an ancient and much revered grove, presided over by a priest in female attire. It was sacred to twin gods called Alcis, whom Tacitus identifies with Castor and Pollux. (Latham on Tac. Germ. l. c.; Sprengel, Erlaïter. zu Tac. Germ. p. 140.) [L. S.]

NAIN (Naiv), a village of Palestine, mentioned by St. Luke as the scene of the raising of the widow's son (vii. 11). Eusebius places it two miles S. of Mount Tabor, near Endor, in the district of Scythopolis (Onomast. s. vv. 'H $\nu \delta \delta^{\prime} \rho$ and $N a i ́ \mu$ ), where a poor village of the same name is found at the present day, on the northern slope of Little Hermon, and a short distance to the W. of 'Ain-dor. (Robinson, Bib. Res. vol. iii. p. 226.)
[G. W.]
NAIOTH (Navà év' 'Papâ, LXX. in 1 Sam. xix. 18, 19. 22, 23). [RAMA.] [G. W.]

NAISSUS (Naï $\sigma \sigma$ ós, Steph. B. s. v.; Naî $\sigma \sigma o s$, Ptol. iii. 9. § 6; Ná̈̃oos, Zosim. iii. 11 ; Naïaós, Hierocl. p. 654), an important town in Upper Moesia, situated in the district Dardania, upon an eastern tributary of the river Margus, and upon the military road running through this country. It was in the neighbourhood of Naissus that Clandius II. gained
his victory over the Goths in A.d. 269 (7osim. i. 45); but the town is chiefly memorable as the birthplace of Constantine the Great. (Steph. B s. v. ; Const. Porph. de Them. ii. 9. p. 56, ed. Bonn.) It was destroyed by the Huns under Attila (Priscus, p. 171, ed. Bunn.), but was restored by Justinian (Procop. iv. 1, where it is called Naisopolis). It still exists under the name of Nissa, upon the river Nissava, an affluent of the Morava.

NALATA. [Dalmatia.]
 $\S \S 5,31,62,65)$, a great river of Western India, which, after rising in the M. Vindius (Vindhya Mountains), falls into the S. Barygazenus (Gulf of Cambay), not far from the town of Beroach. In the Peripl. M. Erythr. (Geogr. Graec. vol. i. p. 291 , ed. Müller) the river is called Namnadius (Napuadios). The present name is Nerbudda, which, like the Greck form, is duabtless derived from the Sanscrit Narmida, "pleasant." (Forbes, Oriental Mem. ii. pp. 8, 104-112.)
[V.]
NAMNE'TES, NANNE'TES (Na $\mu \nu \eta ̄ \tau a l$, Ptol. ii. 8. § 9), for there is authority for both forms, were a Gallic people on the north side of the Liger (Loire), and on the sea. The river separated then from the Pictones or Pictavi. (Strab. iv. p. 190.) Their chief town was Condivicnum (Nantes). When Caesar was carrying on his war with the Veneti, these maritime Galli called in to their aid the Osismi, Namnetes, and other neighbouring penple. (Cacs. B. G. iii. 9.) The Brivates Portus of Ptolemy is within the limits of the Namnetes. The former diocese of Nantes exceeded the limits of the territory of the Namnetes.
[G. L.]
NANAGU'NA (Navaroívas, Ptol. vii. 1. §§ 7, 32, 36), a considerable river of Western India, which rises, like the Nerbudda, in the Vindhya Mountains, and flows into the Indian Ocean to the S . of the former river, not far from Surat. Its present name is the Tapati or Tapti. (Lassen, Ind. Alterth. vol. i. p. 88.

NANIGEIRI. [Nageiri.]
NANTUA'TES, a people who bordered on the Allobroges, who in Caesar's time were included within the limits of the Provincia. Caesar (B. G. iii. 1) at the close of the camprign of B.c. 57 sent Servius Galba with some troops into the country of the "Nantuates, Veragri and Seduni, who extend from the borders of the Allobroges, the Lacus Lemannus and the river Rhone to the summits of the Alps." The position of the Seduni in the valley of the Khone about Sitten or Sion, and of the Veragri lower down at Martigny or Martinach, being ascertained, we must place the Nantuates in the Chablais, on the south side of the Leman lake, a position which is conformable to Caesar's text. Strabo (iv. p. 204) who probably got his information from Caesar's work, speaks " of the Veragri, Nantuatae, and the Leman lake;" from which we might infer that the Nantuates were near the lake. An inscription in honour of Augustus, which according to Guichenon's testimony was found at Maurice, which is in the Valais lower down than Martigny, contains the words "Nantuates patrono;" and if the inscription belongs to the spot where it is found, it is some evidence that the Nantuates were in the lower part of the Valais. But if the Nantuates were neighbours of the Allobroges, they must have extended westward along the south bank of the lake into the Chabluis. The Clablais is that part of Savoy which lies along the Leman lake
between the Arve and the Valais. It is not certain how far the Allobroges extended along the Leman lake east of Geneva, which town was in their territory. It has been observed that the word Nant in the Celtic language signifies "running water ;" and it is ssid that in the dialect of Savor, every little mountain stream is called Nant, and that there are many streams of this name. Nant is also a Welsh word for stream.

There is another passage in Caesar, where the name Nantuates occurs in the common texts ( $B . G$. iv. 10), which has caused great difficulty. He says that the Rhenus rises in the country of the Lepontii who occupy the Alps, and that it flows by a long distance (longo spatio) through the country of the Nantuates, Helvetii, and others. Walckenaer affinns ( Géog. gc. vol. i. p. 558) that the best and the greater part of the MSS. of Caesar have Vatuatiom; but this is not true. The readings in this passage are Nantuatium, Natuantium, Vatuantium, Mantuantium, and some other varieties. (Caesar, ed. Schneid.) Strabo (iv. p. 192) says that the Aetuatre (Aitoudiat) inhabit the first part of the course of the Rhine, and that the sources of the river are in their country near Mount Adulas. Cassubon changed Aetuatae into Nantuatae to make it agree with Caesar's text, and Cluver changed it into Helvetii. Both changes are opposed to sound criticism. The name in Caesar's text is not certuin, and in Strabo it may be wrong, but nothing is plainer than that these people, whatever is their name, are in the valley of the Rhine. Oberlin in his edition of Caesar has put the name "Sarunetium" in place of "Nantuatium;" but the Sarunetes of Pling were in the valley of Sargans. Groskurd (Transl. Strab. vol. i. p. 192) has adopted the alteration "Helvetii" in his translation; and very injudiciously, for the Helvetii were not in the high Alps. Ukert (Gallien, p. 349) would also alter Strabo's Aetuatue into Nantuatae to fit the common text of Caesar ; and he gives his explanation of the position of the Nantuatae, which is a very bad explanation. The Nantuates occur among the Alpine peoples who are mentioned in the Trophy of Augustus (Plin. iii. 20). and they are placed thus: "Lepontii, Uberi, Nantuates, Seduni, Veragri," from which, if we can conclude anything, we may conclude that these Nantuates are the Nantuates of the Lower Valais.
[G. L.]

## napael. [Taurica Chersonesus.]

NAPARIS (N $\alpha \pi a \rho i s$, Herod. iv. 48), an affluent of the Ister, identified by Schafarik (Slavische Alterthimer, vol. i. p. 506) with the Apus of the Peutinger Table. It is one of the rivers which take their source in the Transylvanian Alps, probably the Ardschich.
[E. B. J.]
NAPA'TA (Nárata, Strab. xvii. p. 820; Ptol. iv. 7. § 19, viii. 16. § 8; Namataí, Steplı. B. s. v.; Tava $\pi \eta$, Dion Cass. liv. 5.), was the capital of an Aethiopian kingdom, north of the insular region of Meroe, and in about lat. $19^{\circ} \mathrm{N}$. There is, however, great difficulty in determining the true position of Napata, as Strabo (l. c.) places it much farther $N$. than Pliny, and there is reason for sapposing that it is the designation of a royal residence, which might be moveable, rather than of a fixed locality. Litter (Erdhunde, vol. i. p. 591) brings Napata as far north as Primis (Ibrim), and the ruins at $I p$ sambil, while Mannert, Ukert, and other geographers belicve it to have been Merave, on the furthest northern point of the region of Merve. It is, how.
ever, generally placed at the E. extremity of that great bend of the Nile, which skirts the desert of Bahioruda [Nubar], and near Mount Birkel (Gebel-elBirkel), a site which answers nearly to the description of Napata, in Pliny (l.c.). Napata was the furthest point $S$. beyond Egypt, whither the arms of Kome penetrated, and it was taken and plandered by Petronius, the lieutenant of Augustus, in B.c. 22. (Dion Cass. liv. 5.) Nor does Napata seem ever to have recovered its earlier greatness; for Nero's surveyors found only an inconsiderable town there, and afterwards all traces of this city vanish. The government of Napata, like that of Merve, was often committed to the hands of women, who bore the title of Candace (Acts of Apost. viii. 27; Euseb. Hist. Eccles. ii. 1 ; Tzetzes, Chiliud. iii. v. 885); and in the kingdom of Schendy, Burckhardt found in the present century a similar regimen. Napata, if not a colony, was probably at one time among the dependencies of Meroe. The government and religion were the same in both; and from the monuments discovered in either, both seem to have been in a similar state of civilisation. If Merawe, indeed, represent the ancient Napata, it seems to follow that the latter city was the second capital of the Mesopotamian region of Meroe.

Napata owed much of its wealth and importance to its being the tenninus of two considerable caravan roates:- (1) One crossing the desert of Bahionda; (2) The other further to the N. running from the city to the island Gagaudes in the Nile (Plin. vi. 35), the modern Argo. (Kussegger, Karte von Nubien.) Although Napata was surrounded by Nomade hordes. its proper population was probably as civilized as that of Meroe, at least its wealth presupposes settlement and security. Its commerce consisted in an interchange of the products of Lioya and Arabia, and it was near enough to the marshes of the Nile to enjoy a share in the protitable trade in ivory and hides which were obtained from the chase of the hippopotamus and elephant. If the rains which are found near Mount Birkel represent Napata, the city can have been second only to the golden city of the Aethiopians, Meroe itself. (Diodor. liii. 6.) On the western bank of the Nile are found two temples and a considerable necropolis. The former were dedicated to Osiris and Ammon; and the sculptares respresenting the Ammonian and Osirian worship, are inferior in execution and design to none of the Nubian monuments. Avenues of sphinxes lead up to the Ammonium, which exhibits in its ruins the plan of the great temples of Aegypt. On the walls of the Osirian temple, which Calliand (L'Isle de Meroe) calls a Typhonium, are represented Ammon-Ra and his usual attendants. The intaglios exhibit Ammon or Osiris receiving gifts of fruit, cattle, and other articles, or offering sacrifice; strings of captives taken in war are kneeling before their conqueror. On the gateway leading to the court of the necmpolis, Osiris was carred in the act of receiving gifts as lord of the lower world. The pyramids themselves are of considerable magnitude; but having been built of the sandstone of Mount Birkel, have suffered greatly from the periodical rains, and have been still more injured by man.

Among the ruins, which probably cover the site of the arcient Napata are two lions of red granite, one bearing the name of Amuneph III. the other of Amuntuonch. They were brought to England by Lord Prudhoe, and now stand at the entrance to the

Gallery of Antiquities in the British Mnseum. The style and exectition of these figures belong to the most perfect period of Aegyptian art, the xviiith dynasty of the Pharawhs. Whether these lions once marked the southern limit of the dominions of Aegypt, or whether they were trophies brought from Aegypt, by its Aethiopian conquerors, cannot be determined. (Hoskins, Travels, pp. 161. 288; Calliaud, L'Isle de Meroe; Transact. of Royal Sicc. Lit. 2nd Ser. vol. i. p. 54.)
[W. B. D.]
NAPETI'NUS SINUS' ( $\delta$ Natךrivos kó入tus) was the name given by some writers to the gulf on the W. coast of Bruttium more commonly known as the Terinaeus Sinus, and now called the Gulf of St. Eufemia. We have no account of the origin of the name, which is cited from Antiochus of Syracuse buth by Strabo and Dionysius. (Strab. vi. p. 255; Dionys. i. 35.) Aristotle calls the same gulf the
 vii. 10), from a tuwn of the name of Lametium or Lametini; and in like manner it has been generally assumed that there was a town of the name of Napetium, situated on its shores. But we have no other evidence of this; an inscription, which has been frequently cited to show that there existed a town of the name as late as the time of Trajan, is almost certainly spurious. (Mommsen, Inscr. Regn. Neap. App. No. 936.)
[E. H. B.]
NaPhtali. [Palaestina.]
NAPOCA. [Dacia, Vol. I. p. 744, b.]
NAR ( $\delta$ N $\alpha \rho$, Strab.: Nera), a considerable river of Central Italy, and one of the principal tributaries of the Tiber. It rises in the lofty group of the Apennines known as the Monti della Sibilla (the Mons Fiscellus of Pliny), on the confines of Uinbria and Picenum, from whence it has a course of about 40 miles to its confluence with the Tiber, which it enters 5 miles above Ocriculum, after flowing under the walls of Interamna and Narnia. (Strab. v. pp. 227, 235; Plin. iii. 5. s. 9; Lucan. i. 475 ; Vib. Seq. p. 15.) Abnut 5 miles above the former city, it receives the tributary stream of the Velinus; a river as large as itielf, and which brings down the accumulated waters of the Lacus Velini, with those of the valleys that open out at Reate. The Nar and Velinus together thus drain the whole western declivity of the Central Apennines through a space of above 60 miles. The Nar is remarkable for its white and sulphureous waters, which are alluded to by Ennius and Virgil as well as Pliny. (Ennius, Ann. rii. Fr. 19 ; Virg. Aen. vii. 517; Plin. iii. 12. s. 17.) It is singular that the last writer has confounded the Nar with the Velinus, and speaks of the former as draining the Lacus Velini, into which it falls near Reate. Both Cicero and Tacitus, on the contrary, correctly rep resent the waters of the lake as carried off into the Nar, which is now effected by an artificial cut forming the celebrated Cascade of the Velino, or Falls of Terni. This channel was first opened by M'. Curius, about B. c. 272, but there must always have been some natural outlet for the waters of the Velino. (Plin. l. c.; Cic. ad Att. iv. 15; Tac. Ann. i. 79.) The Nar was reckoned in ancient times navigable for small vessels; and Tacitus speaks of Piso, the murderer of Germanicus, ns embarking at Narnia, and descending from then en by the Nar and the Titer to Rome. (Truc. Ann. iii. 9 ; Strab. v. p. 227.)
[E. H. B.]
NARA(iGERA, a town of Numidia, near which P. Cornelius Scipio pitched his camp, and had an
interview with Hannibal, before the great battle of the 19th of October, B. c. 202 (Lir. xxx. 29, the reading Mdpyapoy, Polyb. xv. 5, is false). Naraggera was 30 or 32 M. P. to the W. of Sicca ( 12 M . P. Peut. Tab.), and 20 M. P to the E. of Thagura (Anton. Itin.) Shaw (Trav. p. 130) found at Cassir Jebir, some fragments of an aqueduct with other footsteps of an ancient city, which, with the fountains close adjoining, and the absence of good water in the neighbourhood, induced him to believe that this ras the spot near which Scipio is said to have encamped for the benefit of the water.

These ruins at Kass'r Jebir are marked in the Carte de la province de Constantine, Paris, 1837. Comp. Barth, Karte Vom Nord Afrikanischen Gestadeland.
[E. B. J.]
Narbaso'rum fordm. [Gallaecia, Vol.I. p. 934, a.]

NARBO MARTIUS ( $\grave{\eta}$ Ndpbow : Eth. Napboo ヶhotos, Napbculirns, Napbaios, Narbonensis : Narbonne), a town of the Provincia or Gallia Narbonensis. Ptolemy (ii. 10. § 9) enumerates it among the inland towns of the Volcae Tectosages, under the name of Narbon Colonia. He places it five minutes south of the latitude of Massalia (Marseille), and in $43^{\circ} \mathrm{N}$. lat. It is, however, some minutes north of $43^{\circ} \mathrm{N}$. lat., and more than fire minutes south of Massilia. Hipparchus placed Narbo and Massilia nearly in the same latitude. (Strab. ii. p. 106.) Narbo was on the Atax (Aulc), and xii. M.P. from the sea. (Ptin. iii. 4.) Pliny seems to place Narbo in the territory of the Volcae Tectonages, but his text is obscure. Strabo (iv. p. 186) distinctly places Narbo in the territory of the Volcae Arecomici, but he adds that Nemausus wha their chief city. It seems, indeed, more probable that the Volcae Arecomici possessed the coast about Narbo, for the chief city of the Tectosages was Tolosa (Toulouse), in the basin of the Garonne. Mela (ii. 5) calls Narbo a colonia of the Atacini [Atax] and the Decumani. Ausonius (De Claris Urbibus, Narbo) does not say, as some have supposed, that Narbo was in the territory of the Tectosages, but that the Tectosages formed the western part of Narbonensis, which is true. The conclusion from Caesar (B. G. vii. 6) is that Narbo was not in the country of the Arecomici; but Caesar did not troable himself abont such matters.

The position of Narbo at Narbonne is easily determined by the name, by the river Atax, and by the measures along the road from Italy into Spain. The road from Arelate (Arles) through Nemausus (Nômes), Cessero (St. Tiberi), and Baeterrae (Béziers) to Narbo, is in the Antonine Itin. There is also a mute both in the Antonine Itin. and in the Table from Burdigala (Bordeaux), through Tolosa (Toulouse) and Carcaso (Carcassonne) to Narbo.

The name Narbon ( $\dot{\eta}$ N $\alpha \rho 6 \omega \nu$ ) was also one name of the river Atax, for Polybius calls the river Narbon. [Atax.] The form Narbona occurs in inscriptions; and there is authority for this form also in the MSS. of Caesar. (B. G. iii. 20, ed. Schn., and viii. 46.) According to Stephanus (s. v.), Marcianus calls it Narbonesia; but this is clearly an adjective form. Hecatacus, who is the authority for the Ethnic name Napbaiot, must have supposed a name Narba or Narbe. The origin of the name Martius is not certain. The Roman colony of Narbo was settled, в. c. 118, in the consulship of Q. Marcius Kex and M. Porcins Catn; but the founder of the colony was L. Licinius Crassus. (Cic. Brut.

NARBO.
c. 43.) It has been conjectured that the name Martius was given to the place because of the warlike natives of the country against whom the settlers had to protect themselves. But this is not probable. Others, again, have conjectured that its name is derived from the Legio Martia (Vell. Pater. ii. 8, ed. Burmann); and the orthography Martia is defended by an inscription, Narbo Mart. (Gruter, cexxix.), and a coin of Goltzius. To this it is objected, by a writer quoted by Ukert (Gallien, p. 410), that the Legio Martia was first fonned by Augustus, and that Cicero mentions the title Martius. (Ad Fam. x. 33.) Forbiger copies Ukert It appears that neither of them lonked at Cicero's letier, in which he speaks, not of Narbo Martius or Marcius, but of the Legio Martia, which existed before the time of Augustus. Cicero, however. does speak of Narbo Marcius, as it stands in Orelli's text. (Pro Font. c. 1.) The Latin MSS. write the word both Marcius and Martius; and the same variation occurs in many other words of the same termination. The most probable conclusion is, that the name Martius or Marcius is the name of the consul Marcius (b.c. 118), who was fighting in this year against a ligurian people, named Stoeni. The name may have been written Narbo Marcius in Cicero's time, and afterwards corrupted.

Narbo was an old town, placed in a good position on the road into Spain and into the basin of the Garonne; a commercial place, we may certainly assume, from the earliest time of its existence. There was a tradition that the conntry of Narbonne was once occupied by Bebryces. (Dion Cass Frug. Vales. vi. ed. Reim., and the reference to Zonaras.) The earliest writer who mentions Narbo is Hecataeus, quoted by Stephanus; and, accordingly, we conclude that Narbo was well known to the Greeks in the fifth century before the Christian aera. The first Roman settlement in South Gallia was Aquae Sextiae (Aix), on the east side of the Rhone. The second was Narbo Martius, by which the Romans secured the road into Spain. Cicero calls Narbo " a colony of Roman citizens, a watch tower of the Roman people, and a bulwark opposed and placed in front of the nations in those parts." During Caesar's wars in Gallia this Roman colony was an important position. When P. Crassus invaded Aquitania (b. c. 56) he got help from Tolosa, Carcaso, and Narbo, at all which places there was a muster-roll of the fighting men. (B. G. iii. 20.) In the great rising of the Galli (b. c. 52), Narbo was threatened by Lucterius, but Caesar came to its relief. (B.G. vii. 7.) A second colony was settled at Narbo, or the old one rather strengthened by a supplementum under the dictator Cassar (Sueton. Tiber. c. 4) by Tiberius Claudius Nem, the father of the emperor Tiberius. Some of the tenth legion, Cassar's favourite legion, were settled here, as we inay infer from the name Decumanorum Colonia. (Plin. iii. 4.) The name Julia Paterna, which appears on inscriptions and in Martial, is derived from the dictator Caesar. The extablishment of Narbo was the cause of the decline of Massilia. Strabo, who wrote in the time of Au gustus and Tiberius, says (iv. p. 186): "that Narbo is the port of the Volcae Arecomici, but it might more properly be called the port of the rest of Celtice; so much does it surpass other towns in trade." (The latter part of Strabo's text is corrupt here.) The tin of the north-west part of the Spanish peninsula and of Britain passed by way of Narbo, as
it did also to Massilia. (Diod. v. 38.) There was at Narbo a great variety of dress and of people, who were attracted by the commercial advantages of the city. It was adorned with public buildings, after the fashion of Roman towns. (Martial, vii. 72; Auson. Narbo; Sidon. Apollin. Carm 29.) A temple of Parian marble, probably some poetical exaggeration, is spoken of by Ausonius: and Sidonius cnumerates, in half a dozen miserable lines, the glories of ancient Narhonne, its gates, porticies, forum, theatre, and other things. He speaks of a mint, and a bridge over the Atax. The coast of Narbonne was and is famed for oysters.

Not a single Roman monument is standing at Narbonne, but the sites of many buildings are ascertained. Numerous architectural fragments, friezes, bas-reliefs, tombstones, and inscriptions, still remain. Some inscriptions are or were preserved in the courts and on the great staircase of the episcopal palace. There is a museum of antiquities at Narborne, which contains fragments of mosaic, busts, heads, cinerary urns, and a great number of inscriptions.
[G. L.]
NARDI'NIUM (Napoiviov, Ptol. ii. 6. § 34), a town of the Saelini, a tribe of the Astures, in Hispania Tarraconensis, probably near Villulpando on the Ezla. (Sestini, p. 172.)

NABISCI, a German tribe of the Suevi, occupying the country in the west of the Gabreta Silva, and east of the Hermunduri. They extended in the north as far as the Sudeti Montes, and in the south an far as the Danube. In the reign of M. Aurelius, 3000 of them emigrated south ward into the Roman province. (Dion Cass. lxxi. 21, where they are called Napıotai.) After the Marcomannian war, they completely disappear from history, and the country once occupied by them is inhabited, in the Peuting. Table, by a tribe called Armalausi. (Tac. Germ. 42; Jul. Capitol. M. Ant. 22.) Ptolemy (ii. 11. § 23) calls them Varisti (Oiapıorol), which is possibly the more genuine form of the name, since in the middle ages a portion of the country once inhabited by them bore the name of Provincia Variscoram.
[L. S.]
NA'RNIA(Napvla,Strab.,Ptol.: Eth.Narniensis: Narni), one of the most important cities of Umbria. situated on the left bank of the river Nar, about 8 miles above ite confluence with the Tiber. It was on the line of the Via Flaminia, by which it was distant 56 miles from Rome. (Itim. Ant. p. 125; Itin. Hier. p. 613; Westphal, Röm. Kamp. p. 145.) It appears to have been an ancient and important city of the Umbrians, and previous to the Roman conquest bore the name of Neguinum. (Plin. iii. 14. s. 19; Liv. x. 9 : Steph. Byz, writes the name N $\eta \kappa$ ovía.) In B. c. 300, it was besieged by the Roman consul Appuleius; but its natural atrength enabled it to defy his arms, and the siege was protracted till the next year, when it was at length surprised and taken by the consul M. Fulvius, b. c. 299. (Liv. x. 9, 10.) Fulvius was in consequence honoured with a triumph "deSamnitibusNequinatibnsque"( Fast.Capit.); and the Roman Senate determined to secure their new conquests bysending thither a colony, which assumed the name of Narnia from ite position on the banks of the Nar. (Liv. x. 10.) It is strange that all mention of this colony is omitted byVelleius Paterculus; hut its name again occurs in Livy, in the list of the thirty Latin colonies during the Second Punic War. On that occasion (b. c. 209), it was one of those which professed themselves exhausted and unable
any longer to bear the burdens of the war; for which it was subsequently punished by the imposition of a doublecontingent and increased contribution in money. (Liv. xxvii. 9; xxix. 15.) Yet the complaint seems, in the case of Narnia at least, to have been well founded; for a few years afterwards (B. c. 199), the colonists again represented their depressed condition to the senate, and obtained the appointment of triumvirs, who recruited their nambers with a fresh body of settlers. (Id. xxxii. 2.) During the Second Punic War, Narnia was the point at which, in b. c. 207, an army was posted to oppose the threatened advance of Hasdrubal upon Rome; and hence it was some Narnian horsemen who were the first to bring to the capital the tidings of the great victury at the Metaurus. (Liv. xxvii. 43. 50.) These are the only notices we find of Narnia under the repablic, but it seems to have risen into a flourishing municipal town, and was one of the chief places in this part of Umbria. (Strab. v. p. 227 ; Plin. iii. 14. 8. 19; Ptol. iii. 1. §54.) It probably owed its prosperity to its position on the great Flaminian highway, as well as to the great fertility of the subjacent plain. In the civil war between Vitellius and Vespasian, Narnia bore an important part, having been occupied by the generals of the former as a stronghold, where they hoped to check the advance of the army of Vespasian; bat the increasing disaffection towards Vitellius caused the troops at Narnia to lay down their arms without resistance. (Tac. Hist. iii. 58-63. 67, 78.) The natural strength of Narnia, and its position as commanding the Flaminian Way, also rendered it a fortress of the utmost importance during the Gothic wars of Belisarius and Narses. (Procop. B. G. i. 16, 17: ii. 11; iv. 33.) It became an episcopal see at an early period, and continued throughout the middle ages to be a considerable town.

The position of Namia on a lofty hill, precipitous on more than one side, and half encircled by the waters of the Nar, which wind through a deep and picturesque wooded valley immediately below the town, is alluded to by many ancient writers, and described with great trathfulness and accuracy by Claudian, as well as by the historian Procopius. (Claudian, de VI. Cons. Hon. 515-519; Sil. Ital. viii. 458 ; Martial. vii. 93 ; Procop. B. G. i. 17.) It was across this ravine, as well as the river Nar itself, that the Via Flaminia was carried by a bridge constracted by Augustus, and which was considered to surpass all other structures of the kind in boldness and elevation. Its ruins are still regarded with admiration by all travellers to Rome. It consisted originally of three arches, built of massive blocks of white marble; of these the one on the left bank is still entire, and has a height of above sixty feet ; the other two have fallen in, apparently from the foundations of the central pier giving way; but all the piers remain, and the imposing style of the whole structure jostifies the admiration which it appears to have excited in ancient as well as modern times. Martial ailudes to the bridge of Narnia as, even in his day, the great pride of the place. (Prorop. l. c. ; Martial. vii. 93. 8 ; Cluver. Ital. p. 636; Eustace's Italy, vol. i. p. 339.) The empernr Nerva was a native of Narnia, though his family would seem to have been of foreign extraction. (Vict. Eprit. 11 ; Caes. 12.) [E.H.B.]

NARO ( $\delta$ N $\alpha \rho \omega \nu$, Ptol. ii. 16. §5; Plin. iii. 26 : Nar, Pomp. Mela, ii. 3. § 13 ; Narenum, Georgr. Rav. iv. 16: Narenta), a river of Illyricum, which Scylax (pp. 8, 9) describes as navigable from its
mouth, for a distance of 80 stadia up to its "emporium" now Fort Opus, where there are some vestiges of Roman buildings. The Manir occupied this district. In the interior was a vast lake, extending to the Autariatae. A fertile island of 180 stadia in circuit was in the lake (Paludo Utovo, or Popowo). From this lake the river flowed, at a distance of one day's sail from the river Abron ('Apiwl, Scylax, l. c.: Orubla; comp. Pouqueville, Voynge dens la Grice, vol. i. p. 25.) This river formed the S. boundary of Dalmatia, and its banks were occupied by the Daorizi, Ardiaei and Paraei. (Strab. vii. pp. 315, 317.) These banks were famous in former times among the professors of pharmacy, who are advised by Nicander (Theriaca, v. 607) to gather the "Iris" there. (Plin. xiii. 2, xxi. 19; Theophr. ap. Athen.xv. p. 681.) Strabo (vii. p. 317) rejects the statement of Theopompus that the potters' clay of Chios and Thasos was found in the bed of the river. For the valley of the Narenta, see Wilkinson, Dalmatia and Montenegro, vol. ii. pp. 1-93.
[E. B. J.]
NARO'NA (Naptīva, a mistike fur Napùva, Ptol. ii. 17. § 12, viii. 7.§8), a town in Dalmatia, and a Roman "colonia." It appears from the letters of $P$. Vatinius to Cicero (ad Fam. v. 9, 10), dated Narona, that the Romans made it their head-quarters during their conquest of Dalinatia. (Comp. Pomp. Mela, ii. 3. § 13 ; Itin. Anton.; Peut. Tab.; Geog. Kav. iv. 16.) Narona was a "conventus," at which, according to M. Varro (ap Plin. iii. 26) 89 cities assembled; in the time of Pliny (l.c.) this number had diminished, but he speaks of as many as 540 "decuriae" submitting to its jurisdiction.

The ancient city stood upon a hill now occupied by the village of Viclo, and extended probably to the marsh below ; from the very numerous inscriptions that have been found there, it appears that there was a temple to Liber and Libera, as well as other buildings dedicated to Jupiter and Diana. (Lanza, sopra Tantica cittá di Narona, Bologna, 1842; Neigebaur, Die Sud-Slaven, pp. 116, 122.) A coin of Titus has been found with the epigraph Col. Narona. (Goltr, Thesaurus, p. 241 ; Rusche, vol. iii. pt. i. p. 1048.)

When the Serbs or W. Slaves occupied this country in the reign of Heraclius, Narenta, as it was called, was one of the four " banats " into which the Servians were divided. The Narentine pirates, who for three centuries had been the terior of Dalmatia and the Venetian traders, were in A. D. 997 entirely crushed by the fleet of Venice, commanded by the Doge in person. (Schafarik, Slav. Alt. vol. ii. p. 266.)
[E. B. J.]
NARTHA'CIUM (Napөdкtov: Eth. Napөakttüs), the name of a city and mountain of Phthiotis in Thessaly, in the neighbourhood of which Agesilaus, on his return from Asia in B. c. 394, gained a victory over the Thessalian cavalry. The Thessalians, after their defeat, tock refuge on Mount Narthacium, between which and a place named Pras, Agesilaus set up a trophy. On the following day he crossed the mountains of the Achaean Phthiotis. (Xen. Hell. iv. 3. §§ 3-9 ; Ages. 2. §§ 3-5; Plut. Apophth. p. 211 ; Diod. xiv. 82.) Narthaciam is accordingly placed by Leake and Kiepert sonth of Pharsalus in the valley of the Enipeus; and the mountain of this name is probably the one which rises immediately to the southward of Férsala. Leake suppeses the town of Narthacium to have been on the mountain not far from upper

## NASAMONES

Tjaterli, and Pras near lower Tjaterli. (Northern Grecce, vol. iv. p. 471 , seq.) The town Narthacium is mentioned by Ptoleny (iii. 13. § 46), and should probably be restored in a passage of Strabo (ix. p. 434), where in the MS. there is only the terinination . . . . . . tov. (See Groskurd and Kramer, ad loc.)

NARTHE'CIS (Nap日 $\quad$ кis), a small island in the east of Samos in the strait between Mount Mycale and the island of Samos. (Strab. xiv. p. 637; Steph. B. s. v.; Suid. s. v. N $d p \theta \eta \xi$.) [L. S.]

NA'RYCUS, NARYX or NARY'CIUM (Ndpuкos, Strab. ix. p. 425 ; Nápug, Steph. B. 8. v.; Narycium, Plin. iv. 7. s. 12 ; in Diod. xir. 82 and xvi. 38, 'Apukas and "Apúca are false readings fur Nápuca : Eth. Napúctos), a town of the Opuntian Locrians, the reputed birthplace of Ajax, son of Oilleus (Strab. Steph. B. ll. cc.), who is hence called by Ovid (Met. xiv. 468) Narycius heros. In b. c. 395, Ismenias, a Boeotian commander, undertook an expedition against Phocis, and defeated the Phocians near Naryx of Locris, whence we may conclude with Leake that Naryx was near the frontier of Phocis. (Diod. xiv. 82.) In 352 Naryx was taken by Phayillus, the Phocian commander. (Diod. xvi. 38.) It is placed by some at Tialanda, but by Leake at the small village of Kalapodhi, where there are a few ancient remains. (Northern Greece, vol. ii. p. 187.) As Locri in Benttium in Italy was, according to some of the ancients, a colony of Naryx (Virg. Aen. iii. 399), the epithet of Narycian is frequently given to the Bruttian pitch. (Virg. Georg. ii. 438 ; Colum. x. 386 ; Plin. xiv. 20. s. 25.$)$

NASAMO'NES (Nagaū̂ves, Herod. ii. 32, iv. 172 ; Ptol.iv. 5. §§ 21. 30; Plin. xxxvii. 10. s. 64 ; Dionys. Periegetes, v. 209; Scylax, p. 47; Steph. B. s. v.) were, according to Herodotus, the most powerful of the Nonadic tribes on the northern coast of Libya. There is some discrepancy in his account of their situation, as well as in those of other ancient writers. (Comp. ii. 32, iv. 172.) They appear, however, to have occupied at one time part of Cyrenaica and the Syrtes. Strabo (xvii. p. 85i) places them at the Greater Syrtis, and beyond them the Psylli, whoseterritory, according to both Herodotus and Strabo, they appropriated to themselves. Pliny (v. 5. s. 5) says that the Nasamones were originally named Mesamones by the Greeks, because they dwelt between two quicksands-the Syrtes. Ptolemy (iv. 5. § 21) and Diodorus (iii. 3) again remove them to the inland region of Augila : and all these descriptions may, at the time they were written, have been near the truth; since not only were the Nasamunes, as Nomades, a wandering race, but they were also pressed upon by the Greeks of Cyrene, on the one side, and by the Carthaginians, on the other. For when, at a later period, the boundaries of Carthage and the Regio Cyrenaica touched at the Philenian Altars, which were situated in the inmost recesses of the Syrtes, it is evident that the Nasamones must have been displaced from a tract which at one time belonged to them. When at its greatest extent, their territory. including the lands of the Psylli and the uasis of Augila, must have reached inland and along the shore of the Mediterranean about 400 geographical miles from E. to W.

So long as they had access to the sea the Nasamones had the evil reputation of wreckers, making up for the general barrenness of their lands by the plunder of vessels stranded on the Syrtes. (Lucan. Phursal. x. 443; Quint. Curt.
iv. 7.) Their modern representatives are equally inhospitable, as the traveller Bruce, who was shipwrecked on their coast, experienced. (Bruce, Travels, Introduction, vol. i. p. 131.) The Nassmones, however, were breeders of cattle, since Herodotus informs us (iv. 172) that in the summer season, "they leave their herds on the coast and go up to Augila to gather the date harvest"- the palms of that axsis being numerous, large, and fruitful. And here, again, in existing races we find correspondences with the habits of the Nasamones. For according to modern travellers, the people who dwell on the coast of Derna, gather the dates in the plain of Gegabib, five days' journey from Augila. (Proceedings of Afric. Association, 1790, ch. x.)

Herodotus describes the Nasamones as practising a kind of hero-worship, sacrificing at the graves of their ancestors, and swearing by their manes. They were polygamists on the widest scale, or rather held their women in common; and their principal diet, besides dates, was dried locusts reduced to powder and kneaded with milk intoa kind of cake-polenta. Their land priuduced also a precious stone called by Pliny (xxxvii. 10. s. 64) and Solinus (c. 27) Nasamonitis; it was of a blood red hue with black veins.

Herodotus introduces his description of this tribe, with a remarkable story relating to the knowledge possessed by the ancients of the sources of the Nile. He says (ii. 32) that certain Nasamones came from the neighbourhood of Cyrene, and made an expedition into the interior of Libya; and that they explored the continent as far as the kingdom of Timbuctoo, is rendered probable by his account of their adventures. For, after passing through the inhabited region, they came to that which was infested by wild beasts; next their coarse was westward through the desert (Sahaira), and finally they were taken prisoners by black men of diminutive stature, and carried to a city washed by a great river flowing from W. to E. and abounding in crocodiles. This river, which the historian believed to be the upper part of the Nile, was more probably the Niger. The origin of the story perhaps lies in the fact that the Nasamones, a wandering race, acted as guides to the caravans which annually crosed the Libyan continent from the territorics of Carthage to Aethiopia, Meroe, and the ports of the Red Sea.
[W. B. D.]
NASAVA (Nafaúa, al. Nafavao, Ptol. iv. 2. § 9), a river of Mauretania Cacsariensis, the mouth of which is to the E. of Saldae. This river of Borjeigah, is made by a number of rivulets which fall into it from different directions, and, as the banks are rocky and mountainous, occasion inundations in the winter. (Shaw, Trav. p. 90.)
[E. B. J.]

## nasCi. [Rhipaei Montes.]

NASCUS (Ndбкоs, al. Maóбкотоs $\mu \eta \tau \rho \sigma \pi о \lambda ı s$ ), an inland city of Arabia Felix, in long. $81^{\circ} 15$, lat. $20^{\circ} 40^{\prime}$ of Ptolemy. (Ptul. vi. 7. § 35.) Mr. Forster takes it to be Nessa of Pliny, the chief town of the Amathei, who occupied the present district of Yemdma. (Geography of Arabia, vol. ii. pp. 266, 267.)
[G. W.]
NASI. [Caphyae.]
NA'SIUM (Náotov), in Gallia. Ptolemy names two cities of the Leuci, Tullum (Toul) and Nasium, which he places 20 minutes further south than Tullum, and as many minutes east. Both these indications are false, as the Itins. show, for Nasium is on a road from Darocortorum (Reims) to Tullum; and consequently west of Toul, and it is not south. An old chronicie places Nasium on the Ormain or
vol. II.

Ornez, a branch of the Mass ; and its name exists in Naix or Nais, above Ligny. The Antonine Itin. makes it 16 leagues from Nasium to Tullum. The Table places Ad Fines between Nasium and Tullum, 14 leagues from Nasium and $5 \frac{1}{2}$ from Tullum. [As to Ad Fines, see Fines, No. 14.]
[G. L.]
NASUS. [Oenindae.]
NATISO (Nati $\sigma \omega \nu$, Strab.: Natisone), a river of Venetia, which flowed under the walls of Aquileia, on the E. side of the city, and is noticed in connection with that city by all the geographers as well as by several other ancient writers. (Plin. iii. 18. s. 22; Strab. v. p. 214 ; Mela, ii. 4. § 3; Ptol. iii. 1. § 26; Ammian. xxi. 12. § 8; Jornand. Get. 42.) Pliny speaks of the Natiso together with the Turrus (Natiso cum Turro), as flowing by the colony of Aquileia. At the present day the Natisone, a cunsiderable stream which descends from the Alps near Cirulale, falls into the Torre (evidently the Turrus of Pliny), and that again into the lsonzo; so that neither of them now flows by Aquileia; but it is probable that they have changed their course, which the low and marshy character of the country renders easy. A small stream, or rather canal, communicating from Aquileia with the sea, is still called Natisa; but it is clear that the Natissa of Jornandes, which he describes (l.c.) as flowing under the walls of Aquileia, must be the far more important stream, now called the Natisone, as be tells us it had its sources in the Mons l'icis, and it would be vain to look for any mountains nearer than the Alps. Strabo (l. c.) also speaks of the Natiso as navigable for ships of burden as far as Aquileia, 60 stadia from the sea; a statement which renders it certain that a considerable river must have flowed under the walls of that city.
[E. H. B.]
NAVA, the river Nava in Tacitus (Hist. iv. 70) and in Ausonius (Mosella, v. 1) is the Nahe, a small stream which flows into the Rhine, on the left bank just below Bingium (Bingen).
[G. L.]
NAVA'LIA or NABA'LIA (Navalla), a small river on the north-west coast of Germany (Tac. Hist. v. 26), either an eastern branch of the Rhine, at the mouth of which Ptolemy (ii. 11. § 28) places the fort Navalia, or some river in the country of the Frisians.
[L. S.]
NAVARI. [Neuri.]
NAVARUM. [Nkuri.]
NAUBARUM. [NeUri.]
NAU'CRATIS (Naúkpatis, Herod. ii. 179; Strab. xvii. p. 801 ; Ptol. iv. 5. § 9; Callimach. Epigr. 41 ; Plin. v. 10. s. 11 ; Steph. B. s. v.: Eth. Naukparitทs or Naukpatiótทs), was originally an emporium for trade, founded by colonists from Miletus, in the Saitic nome of the Delta. It stwod upon the eastern bank of the Canopic arm of the Nile, which, from the subsequent importance of Naucratis, was sometimes called the Ostium Naucraticum. (Plin.v.10.s.11.) There was, doubtless, on the same site an older Aegyptian town, the name of which has been lost in that of the Greek dockyard and baven. Naucratis first attained its civil and commercial eminence in the reign of Amasis (в. c. 550) who rendered it, as regarded the Groeks, the Canton of Aegypt. From the date of his reign until the Persian invasion, or perhaps even the founding of Alexandrcia, Naucratis possessed a monopoly of the Mediterranean commerce, for it was the only Deltaic harbour into which foreign vessels were permitted to enter; and if accident or stress of weather had driven thein

D $\quad$ b
into any other port or mouth of the Nile, they were compelled either to sail round to Naucratis, or to transmit their cargoes thither in the country boats. Besides these commercial privileges, the Greeks of Naucratis received from Amasis many civil and religious immunities. They appointed their own magistrates and officers for the regulation of their trade, customs, and harbour dues, and were permitted the free exercise of their religious worship. Besides its docks, wharves, and other features of an Hellenic city, Nancratis, contained four celebrated temples: - (1) That of Zeus, founded by colonists from Aegina; (2) of Hera, built by the Samians in honour of their tutelary goddess: (3) of Apollo, erected by the Milesians; and (4) the most ancient and sumptuous of them all, the federal temple entitled the Hellenium, which was the common property of the Ionians of Chios, Tens, Phocaea, and Clazomenae; of the Dorians of Rhodes, Cnidas, and Halicarnassus; and of the Aetolians of Mytilene. They also observed the Dionysiac festivals; and were, according to Athenaeus (xiii. p. 596, xv. p. 676), devout worshippers of Aphrodite.

The two principal manufactures of Naucratis were that of porcelain and wreathes of flowers. The former received from the silicious matter abounding in the earth of the neighbourhood a high glaze; and the potteries were important enough to give names to the Potter's Gate and the Potter's Street, where such wares were exposed for sale. (Id. xi. p. 480.)

The garlands were, according to Athenneus (xv. p. 671, seq.), made of myrtle, or, as way sometimes said, of flowers entwined with the filaments of the papyrus. Either these garlands must have been artificial, or the makers of them possessed some secret for preserving the natural flowers, since they were exported to Italy, and held in high esteem by the Roman ladies. (Boetticher, Sabint, vol. i. pp. 228, seq.) Athenaeus gives a particular account (is. pp. 150, seq.) of the Prytaneian dinners of the Naucratites, as wel! as of their general disposition to luxurious living. Some of their feasts appear to have been of the kind called " $\sigma \dot{v} \mu 60 \lambda a$," where the city provided a banqueting-room and wine, hut the guests brought their porvisions. At wedding entertainments it was forbidden to introduce either eggs or pastry sweetened with honey. Naucratis was the birthplace of Athenaens (iii. p. 73, vii. p. 301) ; of Julius Yollux, the antiquary and grammarian ; and of certain obscure historians, cited by Athenaeus, e. g. Lyceas, Phylarchus, Psycharmus, Herostratus, \&c. Heliodorus (Aethiop. vi. p. 2:29) absurdly says that Aristoplannes, the comic poet, was born there. Naucratis, however, was the native city of a person mnch more conspicuous in his day thim any of the above mentioned, viz, of Cleomenes, conmissioner-general of finances to Alexander the Great, after his conquest of Aegypt. But neither the city nor Aegypt in general had much reason to be proud of him; for he was equally oppressive and dishonest in his administration; and having excited in the Delta a general feeling of discontent against the Macedonians, he was put to death by Ptolemy Lagus. (Arrian, Exp. Alex. iii. 5, vii. 23; Diedor. xviii. 14 ; Pseud. Aristot. Oeconom. ii. 34. s. 40.)

Herodotus probably landed at Naucratis, on his entrance into Aegypt; but he did not remain there. It was, however, for some time the residence of the legislator Solon, who there exchanged his Attic oil and honey for Aegyptian millet; and is said to have
taken sundry hints for his code of laws from the statutes of the I'haraohs. (Plutarch, Sulon, 26.)

Naucratis, like so many others of the Deltaic cities, began to decline after the foundation of Alex. andreia. Situated nearly 30 miles from the sea, it could not compete with the most extensive and commodious haven then in the world; and with the Macedonian invasion its monopoly of the Mediterranean truffic ceased. Its exact site is unknown, but is supposed to correspond nearly with that of the modern hamlet of Salhudschar, where considerable heaps of ruin are extant. (Niebuhr, Travels in Arabia, p. 97.) The coins of Naucratis are of the age of Trajan, and represent on their obverse a laureated head of the emperor, and on their reverse the figure of Anubis, or a female holding a spear. (Rasche, Lexic. R. Numar. s. v.) [W. B. D.]

NAVILUBIO (Plin. iv. 20. s. 34 ; Naovid-
 river on the $N$. coast of Hispania Tarraconensis, now Navia.

NAU'LOCHUS, an island, or rather reef, off the Sammonian promontory, in Crete (Plin. iv. 12), the same as the Naumachos of Pomponius Mela (ii. 7. § 13; Höck, Kreta, vol. i. p. 439.) [E. B. J.]
NAU'LOCHUS or NAU'LOCHA (NaÚAoza, Appian), a place on the N. coast of Sicily, between Mylae and Cape Pelorus. It is known only from the great sea-fight in which Sextus Pompeius was defeated by Agrippa, e. c. 36, and which was fought between Mylae and Naulochus. (Suet. Aug. 16; Appian, B. C. v. 116-122.) [Mrlake.] Pompeius himself during the battle had been encamped with his land forces at Naulochus (Appian l.c.121), and after his victory, Octavian, in bis torn, took up his station there, while Agrippa and Lepidus advanced to attack Messana. (Ib. 122.) It is clear fron its name that Naulochus was a place where there was a good roadstead or anchorage for shipping; but it is probable that there was no town of the name, though Silius Italicus includes it in his list of Sicilian cities. (Sil. Ital. xiv. 264.) From the description in Appian it is clear that it was situated between Mylae and Cape Rasocalmo (the Phalacrian Promontory of Ptnlemy), and probably not very far from the latter point; but there is nothing to fix its site more definitely. [E. H. B.]

NAU'LOCHUS (Naúdoxos), a small port on the coast of Thrace, belonging to Mesembria, called by Pliny Tetranaulochus. (Strab. vii. p. 319, ix. p. 44(); Plin. is. 11. s. 18.)

## NAUMACHOS. [Navlochus, No. 1.]

NAUPACTUS (NaÚжактos: Eth. Naṽdктtos: E'pakto by the Greek peasants, Lepanto by the Italians), an important town of the Locri Ozolse, and the best harbour on the northern coast of the Corinthian gulf, was situated just within the entrance of this gulf, a little east of the promontory Antirrhium. It is said to have derived its name from the Heracleidae having here built the fleet with which they crossed over to Peloponnesus. (Strab. ix. p. 426 ; Paus. x. $38 . \S 10$; Apollod. ii. 8. § 2.) Though Naupactus was indebted for its historical importance to its harbour at the entrance of the Corinthian gulf, it was probably originally chosen as a site for a city on account of its strong hill, fertile plains, and copious supply of running water. (Leake, Northern Greece, vol. ii. p. 608.) After the Persian wars it fell into the power of the Athenians, who settled there the Messenians, who had been compelled to leave their country at the end of the

## NAUPLIA.

Third Messenian War, b. c. 455; and during the Peluponnesian War it was the heid-quarters of the Athenians in all their operations in Western Greece. (Paus. iv. 24. § 7 ; Thuc. i. 103, ii. 83, seq.) After the battle of Aegospotami the Messenians were expelled from Naupactus, and the Locrians regained possession of the town. (Paus. x. 38. § 10.) It afterwards passed into the hands of the Achaeans, from whom, however, it was wrested by Epaminondas. (Diod. xv. 75.) Philip gave it to the Aetolians (Strab. ix. p. 427 ; Dem. Phil. iii. p. 120), and hence it is frequently called a town of Aetolia. (Scylax, p. 14 ; Mela, ii. 3 ; Plin. iv. 2. s. 3.) The Aetolians vigorously defended Naupactus against the Romans for two months in B. C. 191. (Liv. xxxvi. 30, seq. ; Polyb. v. 103.) Ptolemy (iii. 15. § 3) calls it a town of the Locri Ozolae, to whom it must therefore have been assigned by the Romans after Pliny's time.

Pausanias saw at Naupactus a temple of Poseidon near the sea, a temple of Artemis, a cave sacred to Aphrodite, and the ruins of a temple of Asclepius ( x . 38. §§ 12, 13). Naupactus is mentioned by Hiurocles (p. 643); but it was destroyed by an earthquake in the reign of Justinian. (Procop. B. Goth. iv. 25.) The situation and present appearance of the town are thus described by Leake: - " The fortress and town occupy the south-e:stern and southern sides of a hill, which is one of the roots of Mount Kigini, and reaches down to the sea. The place is fortified in the manner which was common among the ancients in positions similar to that of $E^{\prime} p a k t o$, -: hat is to say, it occupies a triangular slope with a citadel at the apex, and one or more cross walls on the slope, dividing it into subordinate enchsures. At E"pakto there are no less than tive enclosures between the summit and the sea, with gates of communication from the one to the other, and a side gate on the west leading out of the furtress from the second enclosure on the descent. It is not improbable that the modern walls follow exactly the ancient plan of the fortress, for in many parts they stund upon Hellenic foundations, and even retain large pieces of the ancient masonry amidat the modern work. The present town occupies only the lowest enclosure; in the middle of which is the small harbour which made so great a figure in ancient history: it is now choked with rubbish, and is incapable of receiving even the lar,er sort of boats which navigate the gulf." (Nirthern Greece, vol. ii. p. 608.)

NAC'PLIA (Nauni(a), a rock above Delphi. [Dkiphi, p. 764, a.]
NAU'PLIA (ì Nav*入ia: Eth. Navmileús), the port of Argos, was situated upon a rocky peninsula, connected with the mainland by a narrow isthmus. It was a very ancient place, and is said to have derived its name from Nauplius, the son of Poseidon and Amymone, and the father of Pahanedes, though it more probably owed its name, as Strabo has observed, to its harbour (and tov raîs vaugl apo$\sigma \pi \lambda \epsilon i \sigma \theta a u$, Strab. viii. p. 368; Paus. ii. 38. § 2.) Pausanias tells us that the Nauplians were Egyptians belonging to the colony which Danaus broucht to Argos (iv. 35. § 2); and from the poxition of their city upon a promontory running out into the saa, which is quite different from the site of the earlier Grecian cities, it is not imprubable that it was originally a settlement made by strangers from the Fast. Nauplia was at first independent of Argos, and a member of the maritime confederacy which beld its mectings in the island of Calaureia. (Strab.

NAUPORTUS.
403
viii. p. 374.) About the time of the Second Messenian War, it was conquered by the Argives; and the Lacedaemonians gave to its expelled citizens the town of Methone in Messenia, where they continued to reside even after the restoration of the Messenian state by Epaminondas. (Paus. iv. 24. § 4, iv. 27. § 8, iv. 35. § 2.) Argos now took the piace of Nauplia in the Calaureian confederacy; and from this time Nauplia appears in history only as the seaport of Argos ( $\delta$ Naúa $\lambda \cos \lambda i(\mu \eta \nu$, Eurip. Orest. 767; $\lambda_{1} \mu$ éves Naún $\lambda_{1} 1$, Electr. 451). As such it is mentioned by Strabo (l.c.), but in the time of Pausanias the place was deserted. Pausanias noticed the ruins of the walls of a temple of Poseidon, certain forts, and a fountain named Canathus, by washing in which Hera was said to have renewed her virginity every year. (Paus. ii. 38. § 2.)

In the middle ages Nauplia was called id Naú-
 resumed its ancient name. It became a place of considerable importance in the middle ages, and has continued so down to the present day. In the time of the Crusades it first emerges from obscurity. In 1205 it was taken by the Franks, and became the capital of a small duchy, which commanded the plain of Argos. Towards the end of the 14th century it came into the hands of the Venctians, who regarded it as one of their most important places in the Levant, and who successfully defended it both against Mahomet II. and Soliman. They ceded it to the Turks in 1540, but wrested it from them again in 1686, when they constructed the strong fortifications on Mt. Palamidhi. This fortress, although reckoned impregnable, was stormed by the Turks in 1715, in whose hands it remained till the outbreak of the war of Grecian independence. It then became the seat of the Greek government, and continued such, till the king of Gireece removed his residence to Athens in 1834.

The modern town is described by a recent observer as having more the air of a real town than any place now existing in Greece under that title; having continuous lines of houses and streets, and offering, upon the whole, much the appearance of a second-rate Italian seaport. It is built on the peninsula; and some remains of the Hellenic fortifications may be seen in the site of the walls of Fort Itskale, which is the lower citadel of the town, and occupies the site of the ancient Acropslis. The upper citadel, called Palamidhi (Пa入a $\boldsymbol{\eta}^{\prime} \delta i o \nu$ ), is situated upon a steep and lofty mountain, and is one of the strongest fortresses in Europe. Although its name is not mentioned by any ancient writer, there can be little doubt, from the connection of Palamedes with the ancient town, that this was the appellation of the hill in ancient times. (Leake, Morca, vol. ii. p. 356, Peloponnesiaca, p. 252; Mure, Tour in Greece, vol. ii. p. 187 ; Boblaye, Récherches, g.c. p. 50; Curtius, Peloponnesos, vol. ii p. 389.)

NAUPORTUS (Naúropros). 1. (Laybach), a small but narigable river in the south-west of Pannonia, flowing by the town of Nauportus, and emptying itself into the Savus a little below Aemona. (Strah. iv. p. 207, comp vii. p. 314, where some read Naínovtos; Plin. iii. 23.)
2. A town in the south-west of Pannonia, on the small river of the same name, was an uncient and once flourishing commercial twwn of the Taurisci, which carried on considerable commerce with Aquileia. (Strab. vii. p. 314; Tac. Ann. i. 10; Plin iii. 22 ; Vell. Paterc. ii. 110.) But after the
foundation of Aemona，at a distance of only 15 miles from Nauportus，the latter place lost its for－ mer importance and decayed．During the insur－ rection of the Pannonian legions after the death of Augustus，the town was plundered and destroyed． （Tac．2．c．）The place is now called Ober－Lay－ bach；its Roman name Nauportus（from navis and porto）was connected with the story of the Argo－ nauts，who were believed on their return to hare sailed up the Ister to this place，and thence to hare carried their ships on their shoulders across the Alps to the Adriatic．
［L．S．］
NAUSTALO，a place on the south coast of Gallia， west of the Rhodanus，mentioned in the Ora Mari－ tima of Avienus（ $\mathbf{~} .613$ ）－
＂Tum Mansa vicus，oppidumque Naustalo Et urbs．＂
The name Naustalo looks like Greek，and if it is genuine，it may be the name of some Greek settle－ ment along this coast．Nothing can be determined as to the site of Naustalo further than what Ukert says（Gallien，p．412）：it is somewhere between Cette and the Rhone．
NAUSTATHMUS（Navota日رos），a port－town on the Euxine，in the western part of Pontus，on a salt lake connected with the sea，and 90 stadia to the east of the river Halys．（Arrian，Peripl．p．16； Marcian．Heracl．p． 74 ；Anonym．Peripl．p． 9 ； Tab．Peut．，where it is erroneonsly called Nautag－ mus．）The Periplus of the Anonymus places it only 40 stadia east of the mouth of the Halys． Comp．Hamilton（Researches，i．p．295），who has identified the salt lake with the modern Hamamli Ghieul；but no remains of Naustathmus have been found．
［L．S．］
NAUSTATHMUS（Naúбтa日mos），an anchorage on the coast of Cyrenaica， 100 stadia from Apollonia． （Scylax，p．45；Stadiasm．§ 56；Strab．xvii．p．838； Ptol iv．4．§ 5；Pomp．Mela，i．8．§ 2．）It is identified with ELHilal，which Beechey（Exped．to the $N$ ．Coast of Africa，p．479）describes as a point forming a bay in which large ships might find shel－ ter．The remains which have been found there indicate an ancient site．（Comp．Pacho，Voyage，p． 144：Barth，Wanderungen，pp．461， 495 ；Thrige， Res Cyrenens．p 103．）．
［E．B．J．］
NAUTACA（Naúraka，Arrian，Ancb．iii．28， iv．18），a town of Sogdiana，in the neighbourhood of the Oxus（Jihon），on its eastern bank．It has been conjectured by Professor Wilson that it may be the same as Naksheb．（Ariana，p．165．）
［V．］
NAXOS or NAXUS（Nákos：Eth．N\＆̧ıos：Capo di Schisó），an ancient city of Sicily，on the E．coast of the island between Catana and Messana．It was situated on a low point of land at the mouth of the river Acesines（Alcantara），and at the foot of the hill on which was afterwards built the city of Tau－ romenium．All ancient writers agres in represent－ ing Naxos as the most ancient of all the Greek colonies in Sicily；it was founded the year before Syracuse，or в．c．735，by a body of colonists from Chalcis in Euboea，with whom there was mingled， according to Ephorus，a certain number of Ionians． The same writer represented Theocles，or Thucles， the leader of the colony and founder of the city，as an Athenian by birth；but Thucydides takes no notice of this，and describes the city as a purely Chalcidic colony；and it seems certain that in later times it was generally so regarded．（Thuc．vi．3； Ephor．ap．Strab．vi．p．267；Scymn．Ch．270－277； Diod．xir．88．Concerning the date of its found－
ation see Clinton，F．H．vol．i．p．164；Euseb．Chron． ad O1．11．1．）The memory of Naxos as the ear－ liest of all the Greek settlements in Sicily was pre－ served by the dedication of an altar outside the town to Apollo Archegetes，the divine patron under whose authority the colony had sailed；and it was a custom（still retained long after the destruction of Naxos itself）that all Theori or envoys proceeding on sacred missions to Greece，or returning from thence to Sicily，should offer sacrifice on this altar． （Thuc．L c．；Appian，B．C．v．109．）It is singalar that none of the writers above cited allude to the origin of the name of Naxns；but there can be little doubt that this was derived，as stated by Hellanicus （ap．Steph．B．s．v．Xa入kis），from the presence among the original settlers of a body of colonists from the island of that name．

The new colony must have been speedily joined by fresh settlers from Greece，as within six years after its first establishment the Chalcidians at Naxos were able to send out a fresh colony，which foundel the city of Leontini，B．c．730；and this was speedily followed by that of Catana．Theocles himself be－ came the Oekist，or recognised founder，of the former， and Euarchus，probably a Chalcidic citizen，of the latter．（Thuc．l．c．；Scymn．Ch．283－286；Strab． vi．p．268．）Strabo and Scymnus Chius both repro－ sent 7ancle also as a colony from Naxos，but no allu－ sion to this is found in Thucydides．But，as it was certainly a Chalcidic colony，it is probable that some settlers from Naxos joined those from the parent country．（Strab．vi．p．268；Scymn．Ch．286；Thuc． vi．4．）Callipolis also，a city of uncertain site，and which ceased to exist at an early period，was a co－ lony of Naxos．（Strab．vi．p．272；Scymn．Ch．L c．） But notwithstanding these evidences of its early pro－ sperity，we have very little information as to the early history of Naxos；and the first fucts trans－ mitted to us concerning it relate to disasters that it sustained．Thus Herodotus tells us that it was one of the cities which was besieged and taken by Hippo－ crates，despot of Gela，about b．c．498－491（Herod． vii．154）；and his expressions would lead us to infer that it was reduced by him under permanent sub－ jection．It appears to have afterwards successively passed under the authority of Gelon of Syracuse， and his brother Hieron，as we find it subject to the latter in B．c．476．At that time Hieron，with a view to strengthen his own power，removed the inhabitants of Naxos at the same time with those of Catana，and settled them together at Leontini，while he repeopled the two cities with fresh colonists from other quar－ ters（Diod．xi．49）．The name of Naxos is not spe－ cifically mentioned during the revolutions that en－ sued in Sicily after the death of Hieron；but there seems no doubt that the city was restored to the old Chalcidic citizens at the same time as these were reinstated at Catana，B．c． 461 （Id．xi．76）；and hence we find，during the ensuing period，the three Chalcidic cities，Naxos，Lenntini，and Catana，gene－ rally united by the bonds of amity，and maintaining a close alliance，as opposed to Syracuse and the other Doric cities of Sicily．（Id．xiii．56，xiv．14；Thuc． iii．86，iv．25．）Thus，in r．c．427，when the Leon－ tini were hard pressed by their neighbours of Syra－ cuse，their Chalcidic brethren afforded them all the assistance in their power（Thuc．iii．86）；and when the first Athenian expedition arrived in Sicily under Laches and Charocades，the Naxians immediately joined their alliance．With them，as well as with ｜the Rhegians on the opposite side of the straits，it is

NAXOS.
probable that enmity to their neighbours at Messana was a strung motive in inducing them to join the Athenians; and during the hostilities that ensued, the Messanians having on one occasion, in B.c. 425, made a sudden attack upon Naxos both by land and sea, the Naxians vigorously repulsed them, and in their turn inflicted heary loss on the assailants. (Id. iv. 25.)

On occasion of the great Athenian expedition to Sicily (b.c. 415), the Naxians from the first espoused their alliance, even while their tindred cities of Rhegium and Catana held aloof; and not only furnished them with supplies, but received them freely into their city (Diod. xiii. 4; Thuc. vi. 50). Hence it was at Naxos that the Athenian fleet first touched after crossing the straits; and at a later period the Naxians and Catanaeans are onumerater by Thucydides as the only Greek cities in Sicily which sided with the Athenians. (Thuc. vii. 57.) After the failure of this expedition the Chalcidic cities were naturally involved for a time in hostilities with Syracuse; but these were suspended in B.c. 409, by the danger which seemed to threaten all the Greek cities alike from the Carthaginians. (Diod. xiii. 56.) Their position on this occasion preserved the Naximns from the fate which befell Agrigentum, Gela, and Camarina; but they did not long enjoy this immunity. In b.c. 403, Dionysius of Syracuse, deeming himself secure from the power of Carthage as well as from domestic sedition, determined to turn his arms against the Chalcidic cities of Sicily; and having made himself master of Naxos by the treachery of their general Procles, he sold all the inhabitants as slaves and destroyed both the walls and buildings of the city, while he bestowed its territory upon the neighbouring Siculi. (Diod. xiv. 14, 15, 66, 68.)

It is certain that Naxos never recovered this blow, nor rose again to be a place of any consideration: but it is not easy to trace precisely the events which followed. It appears, however, that the Siculi, to whom the Naxian territory was assigned, soon after formed a new settlement on the hill called Mount Taurus, which rises immediately above the site of Naxus, and that this gradually grew up into a considerable town, which assumed the name of Tauromenium. (Diod. xiv. 58,59.) This took place about B.c. 396; and we find the Siculi still in possession of this stronghold some years later. (Ib. 88.) Meanwhile the exiled and fugitive inhabitants of Naxos and Catana formed, as usual in such cases, a considerable body, who as far as possible kept together. An attempt was made in b. c. 394 by the Rhegians to settle them again in a body at Mylae, but without success; for they were speedily expelled by the Messanians, and from this time appear to have been dispersed in various parts of Sicily. (Diod. xiv. 87.) At length, in B. c. 358, Andromachus, the father of the historian Timaeus, is said to have collected together again the Naxian exiles from all parts of the island, and established them on the hill of Tauromenium, which thus rose to be a Greek city, and became the successor of the ancient Naxos. (Diod. xvi. 7.) Hence Pliny speaks of Tauromenium as having been formerly called Nuxos, an expression which is not strictly correct. (Plin. iii. 8. s. 14.) The fortunes of the new city, which quickly rose to be a place of importance, are related in the article Tauromenium. The site of Naxus itself seems to have been never again inhabited; but the altar and shrine of Apollo Archegetes continued to mark the spot whese it had stood, and are mentioned
in the war between Octavian and Sextus Pompey in Sicily, в. c. 36. (Appian, B. C. v. 109.)

There are no remains of the ancient city now extant, but the site is clearly marked. It occupied a low but rocky headland, now called the Capo di Schiso, formed by an ancient stream of lava, immediately to the N. of the Alcantara, one of the most considerable streams in this part of Sicily. A small bay to the N. affords good anchorage, and separates it from the foot of the bold and lofty hill, still occupied by the town of Taormina; bat the situation was not one which enjoyed any peculiar natural advantafes.
The coins of Naxos, which are of fine workmanship, may almost all be referred to the period from B. C. 460 to B.c. 403 , which was probably the most flourishing in the history of the city. [E.H.B.]

COLR OF INAXOS LN BICILT.
NAXOS or NAXUS (N\&झos, Suid. s. v.), a town of Crete, according to the Scholiast (ad Pind. Isth. vi. 107) celebrated for its whetstones. Höck (Kreta, vol, i. p. 417) considers the existence of this city very problematical. The islands Crete and Naxos were famed for their whetstones (Plin. xxxvi. 22; comp. xviii. 28), and hence the confusion. In Mr. Pashley's map the site of Naxos is marked near Spina Lónga.
[E. B. J.]
NAXOS or NAXUS(Nd\}os: Eth. Nd乡tos: Naxia), the largest and most fertile of the Cyclades, situated in the middle of the Aegean sea, about halfway between the coasts of Greece and those of Asia Minor. It lies east of Paros, from which it is separated by a channel about 6 miles ride. It is described by Pliny (iv. 12. s. 22) as 75 Roman miles in circumference. It is about 19 miles in length, and 15 in breadth in its widest part. It bore several other names in ancient tinies. It was called Strongyle (Zitpor from its round shape, Dionysias (Dıovvolas) from its excellent wire and its consequent connection with the worship of Dionysus, and the Smaller Sicily ( $\mu$ ккрd $\Sigma_{i к \in \lambda(a)}$ from the fertility of its soil (Flin. iv. 12. s. 22; Diod. v. 50-52); bat the poets frequently give it the name of Dia ( $\Delta$ ia; comp. Ov. Met. ii. 690, viii. 174.) It is said to have been originally inhalited by Thracians, and then by $\mathrm{C}_{a}$ rians, and to have derived its name from Naxus, the Carian chieftain. (Diod. v. 50, 51; Steph. B. s. v. Nd\{os.) In the historical ages it was colonised by Ionians from Attica (Herod. viii. 46), and in consequence of its position, size, and fertility, it became the most powerfal of the Cyclades. The government of Naxos was orignally an oligarchy, but was overthrown by Lygdamis, who made himself tyrant of the island. (Aristot. ap. Ath. viii. p. 348.) Lygdamis, however, appears not to have retained his power long, for we find him assisting Peisistratus in his third restoration to Athens, and the latter in return subduing Naxos and committing the tyranny to Lygdamis. (Herod. i. 61, 64; comp. Aristot. Pol v. 5.) But new revolutions followed. The D D 3
aristocratical party appear to have again got the upper hand; but they were after a short time expelled by the people, and applied for assistance to Aristagoras of Miletus. The Persians, at the persuasion of Aristagoras, sent a large force in B. C. 501 to subdue Naxos: the expedition pruved a failure; and Aristagoras, fearing the anger of the Persian court, persuaded the Ionians to revolt from the great king. (Herod. v. 30-34.) At this period the Naxians had 8000 hoplites, many ships of war, and numerous slaves. (Herod. v. 30, 31.) From the 8000 hoplites we may conclude that the free population amounted to 50,000 souls, to which number we may add at least as many slaves. In B. C. 490 the Pervians under Datis and Artaphernes landed upon the island, and in revenge for their former failure laid it waste with fire and sword. Most of the inhabitants took refuge in the mountains, but those who remained were reduced to slavery, and their city set on fire. (Herod. vi. 96.) Naxos became a dependency of Persia; but their four ships, which were sent to the Persian fleet, deserted the latter and fought on the side of Grecian independence at the battle of Salamis. (Herod. viii. 46.) They also took part in the battle of Platapae. (Diod. v. 52.) After the Persian wars Naxos became a member of the confederacy of Delus under the headship of Athens; but about B. c. 471 it revolted, and was subdued by the Athenians, who reduced the Naxians to the condition of subjects, and established 500 Athenian Cleruchs in the island. (Thuc. i. 98, 137 ; Plut. Pericl. 11; Pans. i. 27. § 6.) From this time Naxns is seldorn mentioned in ancient history. It was off Naxos that Chabrias gained a signal victory over the Lacedaemonian fleet in B. c. 376, which restored to Athens the empire of the sea. (Xen. Hell. v. 4. § 60, seq.; Diod. xv. 34.) During the civil wars of Rome Naxos was for a short time subject to the Rhodians. (Appian, B. C. v. 7.)

After the capture of Constantinople by the Latins in 1204, the Apgaean sea fell to the lot of the Venetians; and Marco Sanudo, in 1207, took possession of Niaxos, and founded there a powerful state under the title of the Duchy of the Aegaean Sea (Dux Aegaci Pelagi). He built the large castle above the town, now in ruins, and fortified it with 12 towers. His dynasty ruled over the greater part of the Cyclades for 360 years, and was at length overthrown by the Turks in 1566 . (Finlay, Medieval Greece, p. 320, seq.) Naxos now belongs to the new kingdom of Greece. Its population does not exceed 12,000 , and of these 300 or 400 are Latins, the descendants of the Venctian settlers, many of whom bear the names of the nublest families of Venice.

The ancient capital of the island, also called Naxos, was situated upon the NW. coast. Its site is occupied by the modern capital. On a small detached rock, called Puliti, about 50 yards in front of the harbour, are the ruins of a temple, which tradition calls a temple of Dionysus. The western portal still remains, consisting of three huge marble slabs, two perpendicular and one laid across, and is of elegant, though simple workmanship. A drawing of it is given by Tournefort. Stephanus B. mentions another town in Nixos called Tragia or Tragaea (s. v. Tparía), but which Puss believes to be the small island Mikares, between Naxos and $D_{0}$ nussa. Aristotle also (ap. Athen. viii. p. 348) mentimed a place, named Lestadae ( $\Lambda \eta \sigma \tau \alpha \delta a t$ ), of which nothing further is known.

In the centre of the island a mountain, now called

Zia. rises to the height of 3000 feet. From its summit 22 islands may be counted ; and in the distance may be seen the outline of the mountains of Asia Minor. This mountain appears to have been called Drius ( $\Delta$ pios) in antiquity (Diod. v. 51); its modern name is probably derived from the ancient name of the island (Dia). On it there is a curious Hellenic tower; and near the bottom, on the roul towards Philoti, an inscription, 8pos $\Delta i b s$ M $\eta \lambda \omega \sigma i o v$. Another mountain is called Kóronon ( $\tau \delta \mathrm{K} \delta \rho$ covov), which is evidently an ancient name, and reminds one of the Naxian nymph Coronis, who brought up the young Dionysus (Diod. v. 52). The mountains of Naxos consist partly of granite and partly of marble, the latter being scarcely inferior to that of Paros. Good whetstones were also obtained from Nasos. (Hesych. 8. v. Naگ́a $\lambda$ loos; Plin. xxxvi. 6. 8. 9.) There are several streams in the island, one of which in ancient times was called Biblus (Bighos, Steph. B. s. v. Big $\lambda_{i} \nu \eta$ ).

The fertility of Naxos has been equally celebrated in ancient and modern times. Herudotus says that it excelled all other islands in prosperity (v. 28). It produces in abundance corn, oil, wine, and fruit of the finest description. In consequence of the excellence of its wine Naxos was celebrated in the legends of Dionysus, particularly those relating to Ariadne. [See Dict of Biogr. art. Arladnes] Mureover, the priest of Dionysus gave his name to the year, like the Archon Eponymus at Athens. (Bïckh, Inscr. 2265.) The finest wine of Naxos is now produced at a place called Aperáthos. It is a superior white wine, and is celebrated in the islands of the Aegaean under the name of BacchusWine.

The plant which produces ladanum is found at Naxos; and in Thevenot's time it was collected from the beards of goats, in the manner described by Herodotus (iii. 112). Emery is also found there, particularly in the southern part of the island, and furms an article of export. The goats of Naxis were celebrated in antiquity. (Athen. xii. p. 540.)

One of the nost remarkable curiosities in the island is an unfinished colssal figure, still lying in an ancient marble quarry near the northern extrenity of the island. It is about 34 feet in length, and has always been called by the inhabitants a figure of Apollo. On the side of the hill, at the distance of five minutes from the statue, we still find the inscription, 8pos $\chi \omega \rho i ́ o v i \epsilon \rho o \hat{u}$ 'А jectures that the statue may have been intended as a dedicatory offering to Delos. (Thevenot, Travels, p. 103, Engl. transl. ; Tournefort, Voyage, vol. i. p. 163, Engl. transl. : Leake, Northern Greece, vol. iii. p. 93; Russ, Reisen anf den Griech. Inseln, vol. i. p. 22, seq.; Griter, Ie Naxo Insula, Hal. 1833-Curtius, Naxos, Berl. 1846.)

COIN OF THE ISLAND OF NAXOS.
NAXUA'NA (Nagováva, Ptol. v. 13. § 12), a city on the N. bank of the river Araxes, now Nnachdjèrcin, a city of some importance in Armenian his
tory, and ennnected, by tradition, with the first habitation of Nisah, and the descent of the patriarch from the ark. (Comp. Joseph. Antig. i. 35 ; St. Martin, Mém. sur C Armenie, vol. i. p. 131 : Ritter, Erdkunde, vol. x. p. 363 ; Cinesney, Erped. Euphrat. vol. i. p. 145.)
[E. B. J.]
NAZARETH (Na̧apét: Eth. Na Sapך้ós, Na(wpaios), a city of Galilee, celebrated in the New Testament as the residence of our Lord for thirty years, before He commenced His public ministry (S. Mark, i. 9 ; S. Luke, iv. 16, 29), from which circumstance he was called a Nazarene. (S. Mark, i. 24, xiv. 67 ; S. Matt. xxvi. 71.) It was apparently in bad repute, even among the despised Galileans themselvex. (S. John, i. 46.) It was visited by our Lord immediately on His entering on His ministry, when an attempt was made upon His life (S. Luke, iv. 16-30) ; and He apprars only to have visited it once subsequently, again to exemplify the proverb, that " no prophet is accepted in his country.' (S. Matt. xiii. 54-58; S. Mark, vi. 1-6.) Its site is well described by Eusebius as over against Legio, 15 miles distant from it towards the E., near to Mount Tabor. Its site has never been lost in Christian times, and in all ages travellers have male mention of it. (Reland, Palnestina, pp. 905907.) "The town of Nazareth, called in Arabic En-Nüsirah, lies upon the western side of a narrow oblong basin, extending about from SSW. to NNE., perhaps 20 minutes in length by 8 or 10 in breadth. The houses stand on the lower part of the slope of the western hill, which rises stcep and high above them. Towards the N . the hills are less high; on the $\mathbf{E}$. and S. they are low. In the SE. the basin contracts, and a valley runs out narrow and winding to the great plain." The precipitous rocky wall of this valley is called the Mount of Precip:tation. The elevation of the valley of Nazareth is given as 821 Paris feet above the sea, and that of the mountains above Nazareth 1500 or 1600 feet; but Dr. Robinson thinks this estimate too high. The houses of the town are well built of stone. The population amounts to about $\mathbf{7 8 0}$ taxable males. of whom 170 are Moslems; the remainder, Christians of various denominations. (Biblicul Res. vol. iii. pp. 183185.)
[G. W.]
NAZIANZUS (Na§iav(bss), a town in the southwest of Cappadocia, in the district called Garssuria, 24 miles to the south-east of Archelais. The place is not mentioned by the early writers. and owes its celebrity to the fact that it was the place where Gregory of Nazianzus was educated, and where he afterwards became bishop. (Hierocl. p. 700; Socrat. Hist. Eccles. iv. 11 ; Greg. Naz. IIta Carm. v. 25, Epist. 50; Conc. Const. ii. p. 97 ; It. Ant. p. 144; It. Hieros. p. 577, where it is miswritten Nathiangus; comp. Dincaesabeia.) Hamilton (Researches, vol. ii. p. 228) is inclined to believe that the modern place called Euran Sheher, near Hacal Dere, marks the site of Naziamzus, though others identify the village of Mimisu with it.
[L. S.]
NFAE (Néas), a small island near Lemnos, in which I'hiloctetes, according to some authorities, was bitten by a water-snake. (Steph. B. s. v.; comp. Antig. Caryst. Mirab. c. 9.) Pliny places it between Lemnos and the Hellespont (ii. 87. s. 89). It is called in the charts Stratia, and by the modern Greeks "Ayios orparचyós, the holy warrior, that is, St. Michael. (Walpule, Trucelo, fc. p. 35.)

## NEAE PATRAE. [Hyiata.]

NEAETHUS (NéaıOos, Strab. ; NńaıOos, Theocr.; Nav́aitos, Lycophr.), a river on the E. coast of Bruttium, falling into the gulf of Tarentum about 10 miles N . of Crotona, still called the Nieto or Neto. Strabo derives its name from the circumstance that it was here that the Trojan women who were conducted as captives by a Greek fleet, set fire to the ships of the victors, and thus compelled them to settle in this part of Italy. (Strab. vi. p. 262; Plin. iii. 11.8.15.) It is well known that the same legend is transferred by other writers to many different localities, and appears to have been one of those which gradually travelled along the coast of Italy, in the same manner as the myths relating to Aeneas. The furm of the name Naviautos employed by Lycophron (Alex. 921) points evidently to the same fanciful derivation (from vais and $a y \theta \omega)$. Theocritus alludes to the rich and varied herbage which grew on its banks (Id. iv. 24), and for which, according to a modern traveller, it is still remarkable. (Swinburne, Travels, vol. i. p. 313.)
[E. H. B.]
NEANDREIA, NEA'NDRIUM, NEANDRUS
 or Neavסpieús), a town in Troas, probably founded ly Aeolians ; in the time of Strabo it had disappeared, its inhabitants, together with those of other neighbouring places, having removed to Alexandreia. (Strab. xiii. pp. 604, 606.) According to Scylax (p. 36) and Stephanus Byz. (8. v.), Neandreia was a maritime town on the Hellespont ; and Strabo might perhaps be suppesed to be mistaken in placing it in the interior above Hamaxitus; but he is so explicit in his description, marking its distance from New Ilium at 130 stadia, that it is scarcely possible to conceive him to be in the wrong. Hence Leake (Asia Minor, p. 274), adopting him as his guide, seeks the site of Neandreia in the lower valley of the Scamander, near the modern town of Ene.
[L. S.]

## NEANDRIA. [Nea.]

NEANISSUS (Neaviogbs or Naveards), a town in Armenia Minor, on the south east of Phreata, and between this latter tuwn and Diocaesareia. (Ptol. $\mathrm{\nabla}$. 6. § 14.) Nu further particulars are known about the place.
[L.S.]
NEA'POLIS, i. e. "the New City." I. In Ewrope. 1. (Nєа́тодıs: Eth Nєалодitทs, Strab. and Steph. B.; but coins bave Neomoditns, Neapolitanus: Napoli; in French and English Naples), one of the most considerable cities of Campania, situated on the northern shore of the gulf called the Crater or Sinus Cumanus, which now derives from it the name of Bay of Naples. All ancient writers agree in representing it as a Greek city, and a colony of the neighbouring Cumae; but the circumstances of its foundation are very obscurely related. Scymnos Chius tells us it was founded in pursuance of an oracle; and Strabo calls it a Cumaean colony. but adds that it subsequently received an additional body of Chalcidic and Athenian colonists, with some of the settlers from the neighbouring islands of the Pithecusae, and was on this account called Neapolis, or the New City. (Strab. v. p. 246; Scymn. Ch. 253; Vell. Pat. i. 4.) Its Chalcidic or Euloean origin is repeatedly alluded to hy Statius, who was himelf a native of the city (Silv. i. 2. 263, ii. 2. 94, iii. 5. 12); but these expressions probably refer to its being a colony from the Chalcidic city of Cumae. The name itwelf sufficiently points to the fact that it was
a more recent settlement than some one previonsly existing in the same neighbourhood; and that this did not refer merely to the parent city of Cumae, is proved by the fact that we find mention (though only at a comparatively late period) of a place called Palaepolis or "the Old City." (Liv. viii. 22.) But the relations between the two are very obscure. No Greek author mentions Palaepolis, of the existence of which we should be ignorant were it not for Livy, who tells us that it was not far from the site of Neapolis. From the passage of Strabo above cited, it seems clear that this was the original settlement of the Cumaean colonists; and that the name of Neapolis was given to the later colony of Chalcidians and others who established themselves on a site at no great distance from the former one. A different version of its history, but of much more dabious authority, is cited by Philargyrius from the historian Lutatius, according to which the Cumaeans abandoned their first colony from an apprehension lest it should eclipse the parent city, but were commanded by an oracle to restore it, and gave to the colony thus founded anew the name of Neapolis. (Philargyr. ad Georg. iv. 564.) The original name of Palaepolis (which obriously could not be so designated until after the foundation of the new city) appears to have been Parthenope (Plin. iii. 5. s. 9; Philargyr. l.c.), a name which is used by the Roman poets as a poetical appellation of Neapolis. (Virg. Georg. iv. 564 ; Ovid, Met. xv. 711, \&c.) Stephanus of Byzantium notices Parthenope as a city of Opicia (the ancient designation of Campania); but it is singular enough that both he and Strabo call it a colony of the Rhodians, without mentioning either the Chalcidians or Cumaeans. (Steph. B. s. v.; Strab. xiv. p. 654.) On the other hand, Lycophron alludes to the place where the Siren Parthenope was cast on shore, by the name of Falerum (\$a入hpou túpois, Lycophr. Alex. 71i); and Stephanus also says that Phalerum was a city of Opicia, the same which was afterwards called Neapolis. (Stepl. B. 8. v. Фa入nipov.) The name of Fulerum has a Tyrrhenian or Pelasgic aspect; and it is not improbable, as suggested by Abeken (Mittel Italien, p. 110), that there was originally a Tyrrhenian settlement on the spot. The legendary connection of the Siren Parthenope with the site or neighbourhood of Neapolis was well established, and unirersally received; hence Dionysius designates the city as the abode of Parthenope; and Strabo tells us that even in his time her tomb was still shown there, and games celebrated in her honour. (Strab. v. p. 246; Dionys. Per. 358; Eustath. ad loc.; Plin. iii. 5. s. 9.)

The site of the original settlement, or Old City (Palaepolis), is nowhere indicated, but it seems most probable that it stood on the hill of Pausilypus or Posilipo, a long ridge of moderate elevation, which separates the bay of Pozzuoli or Baiae from that of Naples itself. The new town, on the contrary, ad joined the river Sebethus, a small stream still called the Sebeto, and mast, therefore, have occupied the same site with the more easterly portion of the modern city of Naples. (Abeken, Mittel Italien, p. 111; Niebuhr, vol. iii. p. 179.) The latter city seems rapidly to have risen to great prosperity, and, in great measure, eclipsed the older settlement; but it is clear from Livy that Palaepolis continued to subsist by the side of the new colony, until they both fell under the dominion of the Sammites. It does not appear that cither the old or the new city was reduced
by force of arms by the Campanian conquerors; they seem rather to have entered into a compromise with them, and admitted a body of the Campanians to the rights of citizenship, as well as to a share of the government. (Strab. v. p. 246.) But notwithstanding this, the Greek element still greatly predominated; and both Palaepolis and Neapolis were, according to Livy, completely Greek cities at the time when they first came into contact with Rome, nearly a century after the conquest of Campania by the Samnites. (Liv. viii. 22.)

On that occasion the Palaepolitans, who had had the temerity to provoke the hostility of Rome by incursions upon the neighbouring Campanians, alarmed at the declaration of war which followed (в.c. 328), admitted within their walls a garrison of 2000 troops from Nola, and 4000 Samnites; and were thus enabled to withstand the arms of the consul Publilius Philo, who occupied a post between the two cities so as to prevent all communication between them, while he laid regular siege to Palaepolis. This was protracted into the following year; but as length the Palaepolitans became weary of their Samnite allies, and the city was betrayed into the hands of the Romans by Cliarilaus and Nymphius, two of the chief citizens. (Liv. viii. 22, 23, 25, 26.) The Neupolitans would appear to have followed their example without offering any resistance; and this circumstance may explain the fact that while Publilius celebrated a triumph over the Palaepolitans (Lir. viii. 26 ; Fast. Capit.), the Neapolitans were admitted to parace on favourable terms, and their liberties secured by a treaty (foedus Neapolitanum, Liv. L. c.) From this time all mention of Palaepolis disalpears from history. Livy tells us that the chief authority, which appears to have been previously enjoyed by the older city, was now transferred to Neapolis; and it is probable that the former town sank gradually into insignificance, while the community or "populus" was merged in that of Neapolis. So completely was this the case, that Dionysius, in relating the commencement of this very war, speaks only of the Neapolitans (Dionys. Exc. Leg. pp. 2314-2319); while Livy, evidently following the language of the older annalists, distinguishes them from the Palaepolitans, though he expressly tells us that they formed only one community ("duabus urbibus populus idem habitabat," Liv. viii. 22).

From this time Neapolis became, in fact, a mere dependency of Rome, though retaining the honourable title of an allied state (foederata civitas), and enjoying the protection of the powerful republic, with but a small share of the burdens usually thrown upon its dependent allies. So favourable, indeed, was the condition of the Neapolitans under their treaty that, at a later period, when all the cities of Italy obtained the Boman franchise, they, as well as the Heracleans, were long unwilling to accept the proffered boon. (Cic. pro Balb. 8, 24.) Hence it is no wonder that they continued throughout faithful to the Roman alliance, though more than once threatened by hostile armies. In B. c. 280, Pyrrhus approached the walls of Neapolis, with the view of making himself master of the city, but withdrew without accomplishing his purpose (Zonar. viii. 4) ; and in the Second Punic War, Hannibal, though he repeatedly ravaged its territory, was deterred by the strength of its fortifications from assailing the city itself. (Liv. xxiii. 1, 14, 15, xxiv. 13.) Like the other maritime allies of Rome, the Neapolitans continued to furnish ships and sailors for the Roman
fieets thronghout the long wars of the Republic. (Pol. i. 20; Liv. xxxv. 16.)

Though Neapolis thus passed gradually irto the condition of a mere provincial town of the Roman state, and, after the passing of the Lex Julia, became an ordinary municipal town (Cic. pro Balb. 8, ad Fam. xiii. 30), it continued to be a flourishing and populuus place, and retained, to a far greater extent than any other city in this part of laly, its Greek culture and institutions; while its population was still almost exclusively Greek. Thus Strabo tells us that, in his time, though they had become Roman citizens, they still had their gymnasia and quin. quennial games, with contests of masic and gymnastic exercises after the Greek fashion; and retained the division into Phratries, a circumstance attested also by inscriptions still extant. (Strab. v. p. 246; Varr. L. L. v. 85; Boeckh, C. I. vol. iii. p. 715.) Before the close of the Republic, the increasing love of Greek manners and literature led many of the upper classes among the Romans to resort to Neapolis for education, or cultivation of these pursuits; while many more were attracted by the delightful and luxurious climate or the surpassing beauty of the scenery. It possessed also hot springs, similar to those of Baiae, though inferior in number (Strab. l. c.); and all these causes combined to render it one of the favourite resorts of the Roman nobility. Its prosperity received a rude shock, in b. c. 82, during the Civil War of Marius and Sulla, when a bedy of the partisans of the latter, having been admitted by treachery into the city, made a general massacre of the inhabitants (Appian, B. C. i. 89); but it seems to have quickly recovered this blow, as it was certainly a flourishing city in the time of Cicero, and continued such throughout the period of the Roman Einpire. It is not improbable that it received a boly of fresh colonists under Sulla, but certainly did not then assume the title of a Colonia, as it is repeatedly alluded to by Cicero as a Municipium. (Cic. ad Fam. xiii. 30, ad Att. x. 13.) Under the Empire we find it in inscriptions bearing the title of a Colonia (Gruter, Inscr. p. 110. 8, p. 373. 2); but there is much doubt as to the period when it obtained that rank. It is, however, noticed as such by Petronins, and would seem to have first received a colony under Claudius, to which subsequent additions were made under Titus and the Antonines. (Lib. Colon. p. 235; Zumpt, de Colon. pp. 259, 384 ; Petron. Satyr. 44, 76; Boeckh, C. I. vol. iii. pp. 717, 718.)

Besides its immediate territory, Neapolis had formerly possessed the two important islands of Capreae and Aenaria (Ischia); but the latter had been wrested from it hy force of arms, probably at the perind of its first war with Rome. Capreae, on the other hand, continued subject to Neapolis without interruption till the time of Augustus, who, having taken a fancy to the island, annexed it to the imperial domain, giving up to the Neapolitans in exchange the richer and more important island of Aenaria. (Suet. Aug. 92; Dion Cass. lii. 43.)

The same uttractions which had rendered Neapolis a favourite residence of wealthy Romans under the Pepublic operated with still increased force under the Empire. Its gymnasia and public games continued to be still celebrated, and the emperors theinselves condescended to preside at them. (Suet. Aug. 98. Ner. 40; Vell. Pat. ii. 123 ; Dion Cass. Ixiii. 26.) Its strong tincture of Greek manners, which caused it to be frequently distinguished as "the Greek
city," attracted thither many grammarians and others; so that it came to acquire a reputation for learning, and is called by Martial and Columella "docta Parthenope" (Martial, v. 78. 14; Colum. x. 134); while its soft and luxurions climate rendered it the favourite resort of the indolent and effeminate. Hence Horace terms it " otiosa Neupolis;" and Ovid, still more strongly, "in otia natam Parthenopen." (Hor. Epod. 5. 43; Ovid, Met. xv. 711; Stat. Silv. iii. 78-88; Sil. Ital. xii. 31.) The coasts on both sides of it were lined with villas, among which the most celebrated was that of Vedius Pollio, on the ridge of hill between Neapolis and Puteoli, to which he had given the name of Pausilypus (חavolivutos); an appellation afterwards extended to the whole hill on which it stood, and which retains to the present day the name of Monte Posilipo. (Dion Cass. liv. 23; Plin. ix. 53. s. 78.) Neapolis was a favourite residence of the emperor Nero, as well as of his predecessor Claudius; and it was in the theatre there that the former made his first appearance on the stage, before he ventured to do so publicly at Rome (Tac. Ann. xiv. 10, xv. 33; Dion Cass. lx. 6.) It is well known also that it was for a considerable period the residence of Virgil, who composed, or at least finished, his Georgics there. (Virg. Georg. iv. 564.) Thither, also, his remains were transferred after his death; and bis tomb was still extant there in the time of the poets Statius and Silius Italicus, who paid to it an almost superstitious reverence. The last-named poet himself died at Neapolis, where he had a villa, which was his favourite place of ressidence, as it was also that of Statius, who, in several passages, appears to allude to it as the place of his birth. (Donat. Vit. Virg.; Plin. Ep. iii. 7; Martial, xi. 49; Stat. Silv. iii. 5. 13, iv. 4. 51-55.)

It is clear that Neapolis was at this period a provincial city of the first class; and though we meet with little historical mention of it during the later ages of the Empire, inscriptions sufficiently prove that it retained its consideration and importance. It appears to have escaped the ravages of the Goths and Vandals, which inflicted such severe blows upon the prosperity both of Capua and Nola (Hist. Miscell $x v$. p. 553); and under the Gothic king Theodoric, Cassiodorus speaks of it as still possessing a numerous population, and abounding in every kind of delight, both by sea and land. (Cassiod. r'ar. vi. 23.) In the Gothic wars which followed, it was taken by Belisarius, after a long siege, and a great part of the inhabitants put to the sword, A. D. 536. (Procop. B. G. i. 8-10.) It was retaken by Totila in A. D. 542 (Ib. iii. 6-8), but again recovered by Narses soon after, and continued from this time subject to the supremacy of the Byzantine Empire, as a dependency of the exarchate of Ravenna, but under the government of its own dukes. In the eighth century Paulus Diaconus still speaks of it as one of the "opulentissimae urbes" of Campania. (Hist. Lang. ii. 17.) It was about this period that it threw off the yoke of the Byzantine emperors, and continued to enjoy a state of virtual independence, until it was conquered in A. D. 1140 by the Normans, and became thencefurth the capital of the kingdom of Naples.

It is certain that the ancient city of Neapolis did not occupy nearly so great a space as the modern Naples, which is the largest and most populous city in Italy, and contains above 400,010 inhabitants. It appears to have extended on the E. as far as the river Sebethus, a small streaun still called the Sebeto,
though more commonly known as the Fiume della Maddulena, which still forms the extreme limit of the suburbs of Naples on the E. side; from thence it probatly extended as far as the noole and old castle, which bound the port on the W. Pliny speaks of the small island which he calls Megraris, and which can be no other than the rock now occupied by the Castel dell Uovo, as situated between Pausilypus and Neapolis (Plin. iii. 6. s. 12): it is therefore clear that the city did not extend so far as this point. Immediately above the ancient portion of the city rises a steep hill, now crowned by the Castle of St. Elmo; and from thence there runs a narrow volcanic ridge, of no great elevation, but sleep and abrupt, which continues without interruption in a SW. direction, till it ends in a headland immediately opposite to the island of Nesis or Nisida. It is the western portion of this ridge which was known in ancient times as the Mons Pausilypus, and is still called the Hill of Posilipo. It furmed a marked b:arrier between the immediate environs of Neapolis and those of Puteoli and Baiae, and must have been a great obstacle to the free communication between the two cities; hence a tunnel was opened through the hill for the passage of the high-road, which has served that purpose ever since. This passoge, called in ancient times the Crypta Neapolitana, and now known as the Grotta di Posilipo, is a remarkable work of its kind, and has been described by many modern travellers. It is 2244 feet long, and 21 feet broad: its height is unequal, but, twards the entrance, is not less than 70 feet. It is probable, however, that the work has been much eularged in later times. Seneca, in one of his letters, gives a greatly exaggerated view of its fancied horrors, arising from the darkness and dust. (Sen. Ep. 57.) Strabo assigns its construction to Cocceius, probably the M. Cocceius Nerva, who was superintendent of aqueducts under Tiberius, and who constructed a similar tunnel from the lake Avernus to Cumae (Strab. v. p. 245); and there is no reason to doubt this statement, though many Italian antiquarians have maintained that the work must be much more ancient. On the hill immediately above the E. entrance of the grotto is an ancient sepulchre designated by tradition as the tomb of Virgil ; and though popular tradition is a very unsafe guide in such cases, there seems in this instance no sufficient reason to reject its testimony. We know, from the precise statement of Donatus, that the poet was buried on the road to Puteoti, within less than two miles from Naples ("via Puteolana intra lapidem secundem," Donat. Vit. Virg. : Hieron. Chron. ad Ol. 190), which agrees well with the site in question, especially if (as is probable) the high-ruad at that time passed over the hill, and not through the grotto bereath. The argument of Cluverius, who inferred, from the description of Statius (Silv. iv. 4. 50-5.5), that the tomb of Virgil was situated at the foot of Mount Vesuvius, is certainly untenable. (Cluver. Ital. p. 1153; Eustace's Classical Tour. vol. ii. pp. 370-380; Jorio, Guida di Pozzuoli, pp. $118,8 \mathrm{sc}$.)

Nrar the Capo di Posilipo, as the headland opposite to Nisidu is now called, are the extensive ruins of a Koman villa, which are suppored to be thase of the celcbrated villa of Vedius Pollio, which gave name to the whole hill, and which be bequeathed by his will to Augnstus. (Dion Cass. liv. 23; llin. ix 53. 8. 78.) Immediately opposite to the heallard, between it and the isimen of Nisila (Nesis),
lie two small islets, or rather rocks, one of which now serves for the Lazzaretto,- the other, which is uniuhabited, is called La Gajola; these are supposed to be the islands called by Statius Limon and Fuploca. (Stat. Silv. ii. 2. 79, iii. 1. 149.) From their trifling size it is no wonder that they are not noticed by any other author. Recent excavations on the supposed site of the villa of Pollio have brought to light far more extensive remains than were previously known to exist, and which afford a strong illustration of the magnificent scale on which these edifices were constructed. Among the rains thus brought to light are those of a theatre, the seats of which are cut out of the tufo rock; an Odeon, or theatre for music; a Basilica; besides numerous porticoes and other edifices, and extensive reservoirs for water. But the most remarkable work connected with these remains is a tunnel or gallery pierced through the promontory, which is actually longer than the Grotta di Posilipo. This work appears from an inscription to have been restored by the emperor Honorius; the period of its construction is wholly uncertain. (Bullett.d. Inst. Arch. 1841, pp. 147-160; Avellino, Bullett. Archeol. Napol. 1843, Nos. 4-6.) Many writers have assigned the extensive ruins visible on the hill of Posilipo to a villa of Lucullus; and it is certain that that statesman had a Neapolitan villa distinct from that at Misenum (Cic. Acad. ii. 3), but its site is nowhere indicated; and the supposition that it was the same which afterwards passed into the hands of Vedius l'ollio is not warranted by any ancient authority.

Though the neighbourhood of Naples abounds on all sides in ancient remains, those which are still extant in the city itself are inconsiderable. Two arches of a Loman theatre in the street called Anticaglia, a frayment of an aqueduct known by the name of the Ponti Rossi, and the remains of a temple dedicated to Castor and Pollux, incorpornted intw the church of S. Paolo, are all the ancient ruins now visible. But the inscriptions which have been discovered on the site, and are for the most fart preserved in the museum, are numerous and interesting. They fully contirn the account given by ancient writers of the Greek character so long retained by the city, and notice its division into Phratries, which must have continued at least as late as the reign of Hadrian, since we find one of them named after his favourite Antinous. Others bore the names of Eumelidae, Eunostidae, \&cc., the origin of which may probably be traced back to the first foundation of the Cumaean colony. From some of these inscriptions we learn that the Greek language continued to be used there, even in public documents, as late as the second century after the Christian era. (Bueckh, C. I. vol. iii. pp. 714-750; Mommsen, Inscr. Regn. Neap. pp. 127-131.)

CON OF NEAPOLIS in campania.
2. (Nubui), a city of Sardinia, and apparently one of the most considerable places in that island, was situated on the W. coast, at the southern extremity of
the gulf of Oristano．The Itineraries place it 60 miles from Sulci，and 18 from Othoca（Oristam）． （Itin．Ant．p．84．）The name would clearly seem to point to a Greek origin，but we have no acconnt of its foundation or history．It is noticed by Pliny as one of the most important towns in Sardinia；and its name is found also in Ptolemy and the Itinera－ ries．（Plin．iii．7．s．13；Ptol．iii．3．§ 2；Itin． Ant．Lc．；Tab．Peut．；Geogr．Rav．v．26．）Its ruins are still visible at the mouth of the river Pa － bilhmis，where that stream furms a great estuary or lagson，called the Stayno di Marceduli，and present cunsiderable remains of ancient bnildings as well as the vestiges of a Roman road and aqueduct．The spot is marked by an ancient church called Sta Maria di Nabui（De la Marnora，Voy．en Sar－ daigne，vol．ii．p．357．）

The Aquae Neapolitasae，mentioned by Pto－ lemy as weil as in the Itinerary，which places them at a considerable distance inland，on the road from Othoca to Caralis，are certainly the mineral sources now known as the Bayni di Sardara，on the high－ roud from Cagliari to Oristano．（Itin．Ant．p．82； Piol．iii．3．§ 7；Geogr．Rav．v．26；De La Marmora， l．c．p． 405 ．）
3．A city of Apulia，not mentioned by any ancient writer，but the existence of which is attested by its coins．There seems gond reason to place it at I＇olifnnno，between Barium and Egnatia，where numerous relics of antiquity have been discovered （homanelli，vol．ii．p．148－152；Millingen，Numism． de IItalie，p．147．）
［E．H．B．］
4．A town on the isthmus of Pallene，on the $E$ ． cosist，between Aphytis and Aege．（Herod．vii．123．） In Leake＇s map it is represented by the modern Pulyilhrono．
5．A town of Macedonia，and the haven of Phi－ lippi，from which it was distant 10 M．P．（Strab．vii． p．330；Ptol．iii．13．§9；Scymn．685；Plin．iv． 11；Hierocl．；Procop．Aed．iv．4；Itin．Hierosol．） It probably was the same place as Datum（ $\Delta$ aitoy）， famous for its gold－mines（Herod．ix． 75 ；comp． Bixikh，Pub．Econ of A thens，pp．8，228，trans．）．and a seaport，as Strabo（vii．p．331）intimates：whence the proverb which celebrates Datum for its＂good things．＂ （Zenob．Prov．Graec．Cent．iii． 71 ；Harpocrat．s．v． ad́ros．）Scylax（ $p .27$ ）does，indeed，distinguish between Neapolis and Datum；but，as he adds that the latter was an Athenian colony，which could not have been true of his original Datum，his text is， perhaps，corrupt in this place，as in so many others， and his real meaning may have been that Neapolis was a colony which the Athenians had established at Datum．Zenobins（l．c．）and Eustathius（ad Ihimys．Perieg．517）both assert that Datum was a coluny of Thasos；which is highly probable，as the Thasians had several colonics on this coast．If Neapolis was a settlement of Athens，its foundation was，it may be inferred，later than that of Ainphi－ polis．At the great struggle at Philippi the galleys of Brutus and Cassius were moored off Ne：ipulis． （Appian，B．C．iv． 106 ；Dion Cass．xlvii．35．）

It was at Neapolis，now the small Turkish village of Kácallo（Leake，North．Greece，vol．iii．p．180， comp．pp．217，224），that Paul（Acts，xvi．11） lauded．The shore of the mainland in this part is low，but the monntains rise to a considerable height behind．To the W．of the channel which separates it from Thasos，the coast receles and forms a bay， within which，on a promontury with a port on each side，the town was situated．（Conybeare and Howson，

Life and Epist．of St．Paul，vol．i．p．308．）Traces of paved military roads are still found，as well as remains of a great aqueduct on two tiers of Roman arches，and Latin inscriptions．（Clarke，Trav． vol．viii．p．49．）For coins of Neapolis，see Eckhel， vol．ii．p． 72 ；lhasche，vol．iii．pt．i．p． 1149.

## COIN OF NEAPOLS IN MACEDONLA．

6．A town of the Tanric Chersonesus，and a fortress of Scilurus．（Strab．vii．p．312；Bückh Inscr．vol．ii．p．147．）Dubois de Montperreux （ Voyage Autour du Cavcase，vol．v．p．389，vol vi．pp． 220,378 ）has identified this place with the ruins found at Kermentchik near Simpheropol［E．B．J．］

NEA＇POLIS．II．In Asia．1．An important city of Palaestine，commonly supposed to be identical with the Stchem or Suechem of the Old Testament． Thus Epiphanius uses the names as synonymous
 IIatres．lib．iii．tom．i．p．1055，comp．1068）．Eusebius and St．Jerome，however，place Sichem（ $i 九 k i \mu a$, ミuк $\grave{\mu}, \mathbf{\Sigma} \mathbf{\nu u}^{\xi} \mu$ ）in the suburbs of Neapolis（Onomast． s．vo．Terebinthus，Sychem）：and Luz is placed near to，and，according to the former，viii．M．P．，according to the latter，iii．M．P．，from Neapolis（s．v．MoíSa）， which would imply a considerable interval between the ancient and the modern city．In order to re－ concile this discrepancy，Reland suggests that，while the ancient city gradually decayed，the new city was extended by giadual accretion in the opposite direc－ tion，so as to widen the interval ；and he cites in illustration the parallel case of Utrecht and Veehten． （Palaestina，pp．1004，1005．）Another ancient name of this city occurs only in one passage of St．John＇s Gospel（iv．5），where it is called Sichar （ $\Sigma(\chi \alpha ́ \rho)$ ；for although St．Jerome maintains this to be a corrapt reading for Sychem（Epitaph．Pauke， Ep．Ixxxvi．Op．tom．iv．p．676，Quaest．in Genes． c．xlviii．ver．22，tom ii．p．545），his correction of what he alluws was an ancient and common error， even in his age，has no authority in any known codex or version．Another of its ancient names which has exercised the ingenuity of the learned，occurs in Pliny，who reckons among the cities of Samaria， ＂Neapolis quod antea Mamortha dicebatur＂（ $\mathrm{\nabla} .13$ ）， evidently a mistake for Mabortha，which Jusephus gives for the native name of Neapolis（B．J．iv． 8. § 2）；unless，as Reland conjectures，both readings are to be corrected from coins，which he shrewdly re－ marks are less liable to corruption than MSS．，and which read Morthia（Mop日ía），which that learned writer takes to be the classical form of the Hebrew word Moreh，which was associated with Sichem，both in the Old Testament and the Rabbinical commen－ taries．（Gen．xii．6；Deut．xi．30；Reland，Disser－ tationes Miscell．pars i．pp．138－140．）The same writer explains the name Sichar，in St．John，as a name of reproach，contemptuously assigned to the city by the Jews as the seat of error（the Hebrew
 from the prophet Habakkuk，where the two words Mureh Shaker（מוֹרֶה ；שְּק）occur in convenient
proximity, translated in our version, " a teacher of lies" (ii. 18). The time when it assumed its new name, which it still retains almost uncorrupted in Nablis, is marked by the authors above cited and by the coins. Pliny died during the reign of Titus, under whom Josephus wrote, and the earliest coins bearing the inscription ФAAOTI. NEAMOA. EAMAP. are of the same reign.

Sichem is an exceedingly ancient town, and is frequently mentioned in the history of the earliest patriarchs. It was the first place of Abraham's sojourn on coming into the land of Canaan, and there he built an altar to the Lord. (Gen. xii. 6.) The connection of Jacob with the place is marked by the traditionary well still called by his name, and referred to as an undoubtedly authentic tradition, eighteen centuries ago, - that is, at the expiration of about half the period that has elapsed since the time of the patriarch (Gien. xxxiii. 18, xxxiv.; St. John, iv. 5, 6. 12); nor need the authority of the other local tradition of Joseph's tomb be questioned, as be was certainly deposited there on the coming in of the Israelites, and the reverence paid by them to their fathers' sepulchres forbids us to suppose that it could fall into oblivion. (Gen. 1. 25; josh. xxxiv. 32.) That tomb was probably situated in the "parcel of a field" where Jacob had spread his tent, which he had bought of the children of Hamor, Sliechems' father, for a hundred pieces of moner, but which the patriarch himself represents as taken (probably recovered) " from the Amorites with his sword and with his bow" (Gen. xlviii. 22), and which he retained as pasture-ground for his cattle atter his removal from that vicinity ( $x \times x$ vii. 12-14). In the division of the land, it fell to the tribe of Ephraim, and is described as situated in Mount Ephrain; it was a Levitical city, and one of the three cities of refuge on the west of Jordan. (Josh. xx. 7, xxi. 20, 21.) There it was that Joshua assembled the national convention shortly before his death (xxiv. 1, 25); at which time " he took a great stone and set it up there under an oak, that was by the sanctuary of the Lord " (ver. 26), proving that the tabernacle was then at Shechem, probably in the identical place, the memory of which the Samaritan tralition has perpetuated to this day. [Ebal; Gerizim.]. The pillar erected by Joshua continued to be held in veneration throughout the time of the Judges ; there the Shechemites " made Alvimelech king, by the plain (\| oak) of the pillar that was in Shechem," - his own birthplace, and the scene of his father Gideon's victory orer the Midianites (Julyes, vii. 1, viii. 31, ix. 6) ; and there it was that the Israelites assembled to inake lehoboam king. (l Kings, xii. 1; 2 Chron. x. 1.) The remainder of its history is so identified with that of its sacred Mount Gerizim that it has been anticipated under that article. There can be little doubt that this is the city of Samaria mentioned in the Acts of the Apostles, where Ihilip preached with such success, and which furnished to the Church one of its earliest and most dangerous adversaries, and its first and most distinguished apologist. Not that Simon Magus was a native of Neapolis, but of a village of Samaria named Gitton (Гırт $\omega \boldsymbol{\nu}$, Just. Mart. Apol i. 36 ; comp. Fuseb. H. E. ii. 13), but Neapolis was the principal theatre of his sorceries. Justin Martyr was a native of the city, according to Eusebius (amd
 Eccles. ii. 13). Sichem is placed by Ensebius and St. Jerome, x. M. P. from Shilo, which agrees well with
the interval between Silun and Nablus. (Onomast 8. v. ミŋлள́.) But it must be observed, that these authors distinguish between the Sychem of Ephraim, near the sepulchre of Joseph, - which, having been destmyed and sown with salt by Abimelech, was restored by Jeroboam (comp. Judges, ix. 45, with 1 Kings, xii. 25), who, Josephus says, built his palace there (Ant. viii. 8. §4), and the city of refuge in Mount Ephraim, which they assign to Manasseh, and, with strange inconsistency, immediately identify with the preceding by the fact that Josephis bones were buried there. (Onomast. s. v. इux'́. .) The author of the Jerusalem Itinerary places it xl. M. P. from Jerusalem.

The modern town of Nablis is situated in a valloy lying between Mount Ebal on the N., and Mount Gerizim on the S., giring to the valley a direction from E. to W. On the E., the Nablis valley opens into a much wider valler, about 2 miles from the town; this valley is called Erd-Mukinna Where the Nablus valley meets the Erd-Mükhna, at the NE. base of Mount Gerizin, is Jacob's well, and, hard by the well, is the traditionary site of Joseph's tomb, both of them close to the Moslem village of Askar. situated at the SE. base of Mount Ebal. Possibly this Askar may mark the site of ancient Sychar, the names present only an anagrammatical variation. This would satisfy the language of Eusehius and St. Jerome, cited at the commencement of the article, and remove the obvious difficulty of suppnsing the well so far distant from the city as is Nablus, particularly as Nablis abounds with running streams, and there are copious fountains between it and the well. One of these, not noticed by any traveller, situated about mid-way between the well and the town, in the middle of the valley, is called 'A in Daphné, so named, no doubt, at the time when Greeks inhabited Neapolis, from the infamous fountain and grove near Antioch. The modern Nablus is a large and well-built town, containing a population of from 12,000 to 14,000 souls, almost entirely Mohammedans; the Samaritans having been reduced to something under 200 of all ages an I both sexes. (Raumer, Palïstina, pp. 144-148, notes ; Robinson, Bib. Res. vol. iii. pp. 95-136.)

The coins of Neapolis are very frequent under the emperors from Titus to Volusianus. The common inscription is $\Phi \Lambda$. N $\in A C \cap O \Lambda \in \omega C$, more ravely \$AAO'T, as in the one below, in which is also added, as in many examples, the name of the region. The more usual emblem on the reverse is a temple situated on the summit of a mountain, to which is an ascent by many steps. The temple is doubtless that meritioned by Damasius as $\Delta i d s$ ' $\mathrm{r} \psi \boldsymbol{i} \sigma \tau=0$ áyıútatov iepoby (ap. Phot. Bibl. p. 1055), the steps thuse alluded to ty the Bordeaux Pilgrim in A. D. 333:"Ascenduntur usque ad summum montem gradus numero ccc." On the coins of Titus, however. before the Mount Gerizim was introduced. a palm, as in the example below, was the type; or a laurel, with

COLN OF REAPOLIS LE PALESTLNE
the name of the city written among its branches. (Eckhel, rol. iii. pp. 433-435: see Gerizim, Vol. I. p. 992. a.)
[G. W.]
2. A town of Colchis, south of Dioscurias, and north of Phasis, on the river Chobos or Chorsos. (Scyl. p. 27; Ptol. v. 10. § 2.)
3. A town on the coast of Ionia, south of Ephesus, on the road between Anaea and Marathesium. It wus a amall place which at first belonged to the Ephesians, and afterwards to the Samians, who received it in exchange for Marathesium. (Strab. xiv. p. 639.) Most writers identify its site with the modern Scala Nora, at a distance of about three hours' walk from the site of ancient Ephesus; but Col. Leake (Asia Minor, p. 261) believes that this place marks the site of the ancient Marathesium, and that the ancient remains found about halfway between Scala Nora and Tshangli, belong to the ancient town of Neapolis. (Comp. Tournefort, Letters, xx. p. 402; Fellows. Journal of an Exc. in As. Min. p. 271, who identifies Neapolis with Tshangli or Changli itself.)
4. A town in Caria, between Orthosia and Aphrodisias, at the foot of Mount Cadmus, in the neighbourhood of Harpasa. (Ptol. v. 2. § 19 : Hierocl. p. 688.) Richter (Wallfahrten, p. 539) identifics it with the modern Jenibula, near Arpas Kalessi, the ancient Harpacia. Another town of the same name is mentioned on the coast of Caria by Mela (i. 16) and Pliny (v. 29); and it is clear that this cannot be the same town as that near Harpas ; it is probably only another name for New Myndus [Myndus].
5. A town in Pisidia, a few miles sonth of Antioch. (Ptol. v. 4. § 11 ; Hierocl. p. 672.) Pliny (v. 42) mentions it as a town of the Roman province of Galatia, which embraced a portion of Pisidia. Franz (Fünf Inschriften, p. 35) identifies its site with Tutinek, where some ancient remains still exist.
[L. S.]
6. A small place situated on the Euphrates, at the distance of 14 schoeni (about 40 miles) below Besechana. Ritter has tried, but unsuccessfully (if the present numbers be correct) to identify it with Maida. (Isid. Mans. Parth. i. 12, ed. Müller, 185.5.)
[V.]
NHA'POLIS. III. In Africa 1. In Egypt. [Caenepolis.]
2. A town of Cyrenaica, which Ptolemy (iv. 4. § 11) places in $31^{\circ} 10^{\circ}$ lat. and $49^{\circ}$ long. The town of Mabny or Mably, with which it has been identified, and which appears to be a corruption of the old name, with no other change than what might be expected from the Arab pronunciation, does not quite agree with the position assigned by Ptolemy to Neupolis. (Beechey, Exped. to the N. Coast of Afriurt. p. 350; Barth, Wanderungen. pp. 391. 405.)
3. [Leptis Migna.]
4. A town of Zeugitana with a harbour (Scylax, p. 47; Stadiasm. § 107 ), the same as the Macomanes of Pliny (v. 3; Maxbuada, Ptol.iv. 3. § 11 ); a " municipium," as it appears from the Antonine Itinerary (" Macomades Minores," Peut. Tab.; Geog. Rav. iii. 5): this latter name indicates a Phoenician origin. (Müvers, Phoeniz. Alterth. vol. ii. p. 494.) It has been identified with Kass'r Oungu, on the N. of the Gulf of Hammamét.
5. A factory of the Carthaginians upon the Sinus Neapolitancs, from which it was the shoitest distance to Sicily - a voyage of two dayx and a night. (Thuc. vii. 50: Scylax, p 49: Stadiasm. § 107; Strah. xvii. p. 834.) It was taken by Agathocles in
his African campaign. (Diodor. 2x. 17.) Under the earlier emperors it was a " liberum oppidum" (Plin. v. 3 ), afterwards under Hadrian a "colonia." (Ptol. iv. 3. § 8; Itin. Anton.; Peut. Tab.; Geog. Rav. v. 5.) The old name is retained in the modern Nâbel, where Barth (Wanderungen, p. 141; comp. Shaw. Trav. p. 161) found some remains of antiquity. [E. B. J.] nebis. [Gallaecia, Vol. I. p. 933, a.]
NEBO. 1. (NaBaî, LXX.), the mountain from which the patriarch Moses was permitted to view the Promised Land. Its situation is thus described: -" Get thee up into this mountain Aharim, unto Mount Nebo, which is in the land of Moab, that is over against Jericho" (Deut. xxxii. 49); "and Moses went up from the plains of Moab unto the mountain of Nebo, to the top of Pisgah, that is over against Jericho." We have here three names of the mount, of which, however, Abarim may designate the range or mountain region rising from the high table-land of Maab (comp. Numbers, xxvii. 12, xxxiii. 47); while Pisgah is an appellative for a hill, -as it is rendered in our margin, wherever the name occurs in the text (Numb. xxi. 20; Deut. iii. 27, exxiv. 1), and in several oriental versions (Lex. s.v. one particular peak. This name is regarded by $\mathbf{M}$. Quatremère as of Aramaic origin, identical with that of the celebrated Chaidean divinity (Isaiah, xlvi. 1) so frequently compounded with the names of their most eminent kings, \&ec.; and he discovers other names of like origin in the same parts. (Mémoire sur les Nabatéens, p. 87.) It is placed by Eusebins and St. Jerome 6 miles west of Esbus (Heshbon), over against Jericho, on the road from Livias to Esbus, near to Mount Phogor [Peor]: it was still called by its ancient name (Onomast. s. vv. Nabau. Abarim). Dr. Robinson has truly remarked that over against Jericho "there is no peak or point perceptibly higher than the rest; but all is apparently oue level line of summit, without peaks or paps." . . . "Seetzen, Burckhardt, and also Irby and Mangles, have all found Mount Nebo in Jebel'Attairüs, a high mountain south of the Zürka Main" (Arnon). This, however, is far south of the latitude of Jericho. (Bib. Res. vol. iii. pp. 306, 307).
2. A town of the tribe of Reuben, mentioned with Heshbon, Elealeh, and others (Numb. xxxii. 38); doubtless the site now marked by Neba in the Belka, south of Es-Salt (Robinson, Bib. Res. vol. ii. p. 307, n. 1, vol. iii. appendix, p. 170), i. e. in the same district with Hesbin and EL'Al, the modern representatives of Heshbon and Elenleh. Whether this town was connected with the synonymous mountain is very uncertain.
3. A town in Judah. (Ezra, ii. 29; Nehem. vii. 33.)

NEBRISSA. [Nabrissa.]
NEBRODES LIONS (Tà Neupás $\eta{ }_{\eta}{ }_{\mathrm{p}}^{\mathrm{p}} \boldsymbol{\eta}$, Strab. :
Monti di Madonia), one of the most considerable rungey of mountains in Sicily. The name was evidently applied to a part of the range which commences near Cape Pelorus, and extends along the northern side of the island, the whole way to the neighbourhood of Panormus. Though broken into various mountain groups, there is no real interruption in the chain throughout this extent, and the names applied to different parts of it seem to have been employed (as usual in such cases) with much vagueness. The part of the chain nearest to Capo Pelorus, was called Mons Neptunius, and therefore the Mons Nebrodes must have been further to the

## NEMAUSUS.

west. Strabo speaks of it as rising opposite to Aetna, so that he would seen to apply the name to the mountains between that peak and the northern coast, which are still covered with the extensive forests of Caronia. Silius Italicus, on the other hand, tells us that it was in the Mons Nebrodes the two rivers of the name of Himera had their sources, which can refer only to the more westerly group of the Monti di Madonia, the most lofty range in Sicily after Aetna, and this indentification is generally adopted. But, as already observed, there is no real distinction between the two. Silius Italicus speaks of the Mons Nebrodes as covered with forests, and Solinus derives its name from the number of fawns that wandered through them; an etymology obviously fictitious. (Strab. vi. p. 274; Solin. 5. §§ 11, 12; Sil. Ital. xiv. 236; Cluver. Sicil. p. 364 ; Fazell. de Reb. Sic. x. 2. p. 414.) [E. H. B.]
nectiberes. [Mauretania.]
NEDA (Nє $\delta a$ ), now Buizi, a river of Peloponnesus, rises in Mt. Cerausium, a branch of Mt. Lycaens in Areadia, and flows with many windings in a westerly direction past Phigalia, first forming the boundary between Arcadia and Messenia, and afterwards between Elis and Messenia. It falls into the Ionian sea, and near its mouth is navigable for small boats. (Paus. iv. 20. §§ 1, 2, iv. 36. § 7, v. 6. § 3, viii. 38. § 3, viii. 41 . §§ 1, 2; Strab. viii. pp. 344, 348; Leake, Morea, vol. i. pp. 56, 485; Ross, Reisen im Peloponnes, p. 84; Curtius, Peloponnesos, vol. ii. pp. $152,185$.

NEDAD, a river of Pannonia, mentioned only by Jornandes (de Reb. Get. 50), as the river on the banks of which the Huns were defeated by the Gepidae. The name is in some MSS. Nedao, and the river is believed to be the modern Neytra. [L.S.]

NEDINUM (Nýסıvov, Ptol. ii. 16. § 10 ; Geog. Rav. iv. 16; Neditae, Orelli, Inscr. 3452), a town of the Liburni, on the road from Siscia to Ialera (Peut. Tab.), identified with the ruins near Nadin. Orelli (l.c.) refers the inscription to Novigrad. (Wilkinson, Dalmatia and Montenegro, vol. i. p. 93.) [E.B.J.]

NEDON. [Messenia, p. 342, b.]
NEGRA. [Marsyabae, pp. 284, 285.]
 ed. Müller, 1855), a port on the W. coast of India, in the province called Limyrica, without doubt the same as that now called Neliseram. It is in lat. $12^{\circ} 10^{\prime} \mathrm{N}$. It is mentioned in various authorities under names slightly modified one from the other: thus, it is the Melcynda of Ptolemy (vii. 1. §9), in the country of the Aii ; the "portus gentis Neacyndon" of Pliny (vi. 26. s. 104), which was also called Bacare or Barace; the Nincylda of the Peutingerian Table; and Nilcinna of the Gengr. Raven. (ii. 1). The name is certainly of Indian origin, and may be derived, as suggested by Ritter (r. p. 515) fron Nilakhandu, the blue county. Other derivations, however, have beell propnsed for it. (Vincent, Periplus, ii. p. 445; Reunell, Mem. Hindostan, p. 48; Gosselin, iii. p. 227.) [V.]

NELEUS. [Euboea, Vol. I. p. 872, a.]
NE'LIA ( $n \eta \lambda i a$ ), a town of Magnesia in Thessnly, between which and Iolcus Demetrias was situated. Leake identifies it with the remains of a small Hellenic town above Lekhumia. (Strab. ix. p. 436; Leake, Northern Greece, vol. iv. p. 379.)

NELO, a small river of Hispania Tarraconensis, in the territory of the Astures, and on the N. coast of Spain; probably the Rio de la Puente. (Plin. iv. 20. s. 34; Ukert, vol. ii. pt. 1. p. 299.) [T.H.D.]

NEMALONI, an Alpine people. In the Tropliy of the Alps the name of the Nemaloni occurs between the Brodiontii and Edenates. (Plin. iii. 20.) The site of this people is uncertain. It is a mere guess to place thenn, as some do, at Miolans, in the valley of Barcelonette.

NEMAUSUS (Né $\mu a v \sigma o s: ~ E t h . ~ N є \mu a v \sigma c o s, ~ N e-~$ mausensis: Nimes), a city of Gallia Narbonensis on the ruad from Arclate (Arles) through Narbo (Narbonne) into Spain. Ptolemy (ii. 10. § 10) calls it Nemausus Colonia, but he places it in the same latitude as Arausio (Orange), and more than a degree north of Arelate; which are great blunders. Nemansus was the chief place of the Volcae Arecomici: "with respect to number of foreigners and those engaged in trade (says Strab. iv. p. 186) much inferior to Narbo, but with respect to its population much superior; for it has subject to it twenty-four villages of people of the same stock, populous villages which are contributory to Nemausus, which has what is called the Latium (Jus Latii or Latinitas). By virtue of this right those who have obtained the honour of an aedileship and quaestorship in Nemausus become Roman citizens; and for this reason this people is not under the orders of the governors from Rome. Now the city is situated on the mad from Iberia into Italy, which road in the summer is easy travelling, but in the winter and spring is muddy and washed hy streams. Some of these streams are passed by boats, and others by bridges of wood or stone. The wintry torrents are the cause of the trouble from the water, for these torrents sometimes as late as the summer descend from the Alps after the melting of the snow."

Strabo fixes the site of Nemausus about 100 stadia from the Rhone, at a point opposite to Tarascon, and 720 stadia from Narbo. In another place (iv. p. 178) Strabo estimates the distance from Narbo to Nemausus at $88 \mathrm{M} . \mathrm{P}$. One of the Itin. routes makes it 91 M. P. from Narbo to Nemausus. Strabo's two distances do not agree, for 720 stadia are 90 M. P. The site of the place is certain. In the middle age documents the name is written Nemse (D'Anville). There seems to be no authority for writing the modern nane Nismes; and yet Nimes, as it is now properly written, supposes a prior form Nismes. Nimes is the present capital of the arrondissement of Gard, the richest in Roman remains of all the districts of France.

The twenty-four smaller places that were attached (attributa) to Nemausus are mentioned by Pliny (iii. 4). The territory of Nemausus proluced good cheese, which was carried to Rome (Plin. xi. 42). This cheese was made on the Cécennes, and Pliny appears to include Mons Lesura in the territory of Nemausus. Latera [Latera] on the Ledus ( $L_{\ell z}$ ) west of Nemausus was in the territory, which probably extended through Ugernum eastward to the Rlone. Nemsusus was an old Gallic town. The name is the same that Strabo gives with a slight variation (Nemossus) to Augustonemetum or Clermont in Auvergne. The element Nem appears in the name of several Gallic towns. Nemausus wias made a Colonia probably by the emperor Augustus. An inscription on one of the gates, called the gate of Augustus, records the eleventh or twelfth consulship of Augustus, and that he gave gates and walls to the coluny. There is a bronze medal of Nemausus in the Museum of Avignon, the so called Pied de Biche, on one side of which there is the legend col nem. with a crocodile chained to a palm-

NEMAUSUS.
NEMAUSUS.
415
tree, which may probably commemorate the conquest of Egypt ; on the other are two heads, supposed to be Augustus and Agrippa, with the inscription imp. P. P. DIVI. F. This medal has also been found in other places. It is figured below.

## COIN OF RemAUSUs.

Nimes contains many memorials of its Roman splendonr. The amphitheatre, which is in good preservation, is larger than that of Verona in Italy ; and it is estimated that it would contain 17,000 persons. It stands in an open space, cleared of all buildings and obstructions. It has not the massive and imposing appearance of the amphitheatre of Arles; but it is more complete. A man may make the circuit on the flat which rans round the upper story, except for about one-sixth of the circuit, where the cornice and the flat are broken down.

The greater diameter is about 437 English feet, which includes the thickness of the walls. The exterior height on the outside is nearly 70 English feet. The exterior face of the building consists of a ground story, and a story above, which is crowned by an attic. There are sixty well proportioned
arches in the ground story, all of the same size except four entrances, larger than the rest, which correspond to the four cardinal points. These arches open on a gallery, which runs all round the interior of the building. The story above has also sixty arches. All along the circumference of the attic there are consoles, placed at equal distances, two and two, and pierced in the middle by round holes. These holes received the poles which supported an awning to shelter the speciators from the sun and rain. When it was complete, there were thirty rows of seats in the interior. At present there are only seventeen. The stones of the upper seats are of enormous dimensions, some of them 12 feet long, and 2 feet in width.

The temple now called the Maison Carrée is a parallelogram on the plan, about 76 English feet long, and 40 wide. It is what is called pseudoperipteral, with thirty Corinthian fluted pillars, all of which are engaged in the walls, except six on the face and two on each side of the front portico, ten in all. The portico has, consequently, a considerable depth compared with the width. The columns are ten diameters and a quarter in height. The temple is highly enriched in a good style. Séguier (1758) attempted to prove that this temple was dedicated to C. and L. Caesar, the sons of Agrippa by Julia the daughter of Augustus. But M. Auguste Pélet has within the present cen. tury shown that it was dedicated to M. Aurelius and L. Verus. The excavations which have been made round the Maison Carrie since 1821 show that it was once surrounded by a colonnade, which seems to have been the buundary of a forum, within which the temple was placed. The Maison Carrée, after having passed through many hands, and been applied to many purposes, is now a museum of painting and antiquities. Arthur Young (Travels in France, 2nd ed. vol. i. p. 48) says "that the Maison Carrée is beyond comparison the most light, elegant, and pleasing building I ever beheld." Nobody will contradict this.

temple at nematbus, now called the maison carrfe.

The famous fountain of Nemansus, which Ausonius mentions (Ordo Nob. Urb., Burdigala)-
"Non Aponus potu, vitrea non luce Nemausus
Purior"-
still exists; and there are some traces of the ancient construction, though the whole is a modern restoration. But the great supply of water io Nemausus was by the aqueduct now called the Pont du Gard, aud it is said that this acqueduct terminated by a
subterraneors passage in the side of the rock of the fountain. A building called the Temple of Dinna, and a large edifice called Tour Magne (Turris Magna), which appears to have been a sepulchral monument, the gate of Augustus, and the gate called of France, are the chief remaining monuments of Nemansus.

The noblest Roman monument in France is the aqueduct called the Pont da Gard, which is between three and four leagues from Nimes. Over this aque-
duct the waters of the springs of the Eure and Aizan near Uzés, were brought to Nemausus. The river Gardon, the ancient Vardo, is deep just above the aqueduct. The channel is sunk between rugged rocks, on which scattered shrubs grow. The river rises in the Cévennes, and is subject to floods, which would have destroyed a less solid structure than this Roman bridge. The bridge is built where the ralley is contracted by the rocks, and in its ordinary state all the water passes under one arch. The best view of the bridge is from the side above it. The otker side is disfigured by a modern structure of the same dimensions as the lower range of arches; it is a bridge attached to the lower arches of the Roman bridge, and is used for the passage of carts and horses over the Gardon.

There are three tiers of arches. The lowest tier consists of six arches; that under which the water flows is the largest. The width of this arch is said to be about 50 English feet, and the height from the surface of the water is about 65 feet. The second tier contains eleven arches, six of which correspond to those below, but they appear to be wider, and the piers are not so thick as those of the lowest tier. The height of the second tier is said to be about 64 feet; but some of these dimensions may not be very accurate. The third tier has thirty-five
arches, or thereabouts, making a length, as it is said, of about 870 English feet. It is about 26 feet high to the top of the great slabs of stone which cover it. These slabs lie across the channel in which the water was conveyed over the river, and they project a little so as to form a cornice. The whole height of the three tiers, if the several dimensions are correctly given, is about 155 fect. It is generally said that the bridge is entirely built of stones, without mortar or cement. The stones of the two lower tiers are without cement; but the arches of the highest tier, which are built of much smaller stones, are cemented. At the north end of the aqueduct the highest tier of arches and the water channel are higher than the ground on which the aqueduct abuts, and there must have been a continuation of small arches along the top of this hill; but there are no traces of them, at least near the bridge. On the opposite or south side the aqueduct abuts against the hill, which is higher than the level of the channel. There is no trace of the hill having been pierced; and an intelligent man, who lives near the bridge, says that the aqueduct was carried round the hill, and that it pierced another hill further on, where the tunnel still exists.

Roman aqueduct near nemausus, now called the pont du gard.

The stone of this bridge is a yellowish colour. Seen under the sun from the west side, the bridge has a brightish yellow tint, with patches of dark colour, owing to the weather. The stone in the highest tier is a concretion of shells and sand, and that in the lower tiers appears to be the same. In the stones in the highest tier there are halves of a bivalve shell completely preserved. The stone also oontains bits of rough quartzose rock, and many small rounded pebbles. In the floods the Gardon rises 30 feet above its ordinary level, and the water will then pass under all the arches of the lowest tier. The piers of this tier show some marks of being worn by the water. But the bridge is still solid and strong, a magnificent monument of the grandeur of Roman conceptions, and of the boldness of their execution.

There are many works which treat of the antiquities of Nimes. Some are quoted and extracts from them are printed in the Guide du Voyageur, par Richard and E. Hocquart.

NE'MEA ( $\grave{\eta} \mathbf{N} \in \mu \dot{a} a$, Ion. $\mathbf{N} \epsilon \mu$ í $\eta$ : Adj. Né $\mu \in \iota o s$, $\mathrm{N} \epsilon \mu \in \operatorname{aios}$, Nemeaeus), the name of a valley in the territory of Cleonae, where Hercules slew the Nemean lion, and where the Nemean games were celebrated every other year. It is described by Strabo as situated between Cleonae and Phlius (viii. p. 377). The valley lies in a direction nearly north and south, and is about two or three miles long, and from half to three quarters of a mile in breadth. It is shat in on every side by moun-
tains, and is hence called by Pindar a deep vale (BaOút $\epsilon \delta \frac{1}{}, N e m$. iii. 18.) There is a remarkable mountain on the NE., called in ancient times Apesns ('A $\boldsymbol{\prime} \epsilon ́ \sigma a s$ ), now' Fuka, nearly 3000 feet high, with a flat summit, which is visible from Argos and Corinth. On this mountain Perseus is said to have first sacrificed to Zeus Apesantius. (Paus. ii. 15. § 3; Steph. B. s. v. 'A ${ }^{\prime} \in \boldsymbol{\epsilon} \sigma a s ;$ Stat. Theb. iii. 460, seq.) Theocritus gives Nemea the epithet of
 xxv. 182). Several rivulets descend from the surrounding mountains, which collect in the plain, and form a river, which flows northward through the ridges of Apesas, and falls into the Corinthian gulf, forming in the lower part of its source the boundary between the territories of Sicyon and Corinth. This river also bore the name of Nemea (Strab. viii. p. 382; Diod. xiv. 83; Liv. xxxiii. 15); but as it was dependent for its supply of water upon the season of the year, it was sometimes called the Nemean Charadra. (Aesch. de Fals. Leg. § 168, ed. Bekker; 方 Xapd $\delta \rho a$, Xen. Hell. iv. 2. § 15.) The mountains, which enclose the valley, have several natural caverns, one of which, at the distance of 15 stadia from the sacred grove of Nemea, and on the road named Tretus, from the latter place to Mycenae, was pointed out as the cave of the Nemean lion. (Paus. ii. 15. § 2.)

The name of Nemea was strictly applied to the sacred grove in which the games were celebrated. Like Olympia and the sanctuary at the Corinthiar

Isthmus, it was not a town. The sacred grove contained only the temple, theatre, stadium, and other monuments. There was a village in the neighbourhood called Bembina (Bé $\boldsymbol{\beta} \boldsymbol{\beta} \stackrel{\nu}{ }$ ), of which, however, the exact site is unknown. (Strab. viii. p. 377; Steph. B. 8. r.) The haunts of the Nemean lion are said to have been near Bembina (Theocr. xxv. 202.)

The chief building in the sacred grove was the temple of Zens Nemeius, the patron god of the place. When visited by Pausanias the roof had fallen, and the statue no longer remained (ii. 15. § 2). Three columns of the temple are still standing, amidst a vast heap of raius. "Two of these columns belonged to the pronaos, and were placed as usual between antae; they are 4 feet 7 inches in diameter at the base. and still support their architrave. The thind column, which belonged to the nuter range, is 5 feet 3 inches in dianeter at the base, and about 34 feet high. including a capital of 2 feet. Its distance from the corresponding column of the pronaos is 18 feet. The total height of the three members of the entablature was 8 feet 2 inches. The general intercolumination of the peristyle was 7 feet; at the angles, 5 feet 10 inches. From the front of the pronass to the extremity of the cell within, the length was 95 feet: the breadth of the cell within, 31 feet: the thickness of the walls, 3 feet. The temple was a hexastyle, of abnut 65 feet in breadth on the upper step of the stylobate, which consisted of three steps: the number of columns on the sides, and consequently the length of the temple, I could not ascertain." (Leake.) Though of the Doric order. the columns are as slender as some of the specimens of the Innic, and are so different from the older Doric examples, that we ought probably to a.cribe to the temple a date subsequent to the Persian wars.

Among the other monuments in the sacred grove were the tombs of Opheltes, and of his father Lycurcus. The former was surrounded with a stone enclosure, and contained certain altars; the latter was a mound of earth. (Paus. ii. 15. § 3.) Pausanias also mentions a fountain called Adrasteia. Th. latter is, doubtless, the source of water near the Turkish fountain, which is now without water. At the foot of the mountain, to the left of this spot, are the remains of the stadium. Between the stadium and the temple of Zeus, on the left of the path, are some Hellenic foundations, and two fragments of Doric columns. Near the temple are the ruins of a small church, which contains some Doric fragments. (L.pake. Morea, vol. iii. p. 327, seq.; Curtius, Peloprmnesos, vol. ii. p. 505, seq.)
For an account of the Niemean festival, see Dict. of Antiq. s. v.
NFMENTURI, one of the severai Alpine peoples enumerated by Pliny (iii. c. 20) among the names inscribed on the Trophy of the Alps. Their position is unknown.
[G. L.]
NE MESA, a river of Gallia mentioned by Ausonius (Mosella. V. 353), is the Nims, which joins the Pronaea (Prum). The united streams flow into the Sura (Sour), and the Sura into the Moselia.
[G. L.]
NEMETACUM or NEMETOCENNA (Arras), the chief town of the Atrebates, a Belgic people. Caesar (B. G.viii. 46) spent a winter at Nemetocenna at the close of his Gallic campaigns. In the inscriptivn of Tongern there is a route from Castellum (Cassel) to Nemetacum, which is the same place as voL 11.

Nemetocenna The distance from Cassel through
Bethune to Arras is 43 M Bethune to Arras is $43 \mathrm{M} . \mathrm{P}$. The distance according to the Antonine Itin. from Cassel through Minariacum [Minariacum] is 55 M . P. There is also a route from Taruenna (Therouenne) of 33 M. P. to Nemetacum. There is no place where these roads can meet except Arras. In the Greek texts of Ptolemy (ii. 9. §7) the capital of the Atrebates is Origiacum ('Opıriakov); but it is said that the Palatine DIS. has Metacon, and all the early editions of Ptolemy have Metacum. It seems possible, then, that Ptolemy's Metacum represents Nemetacum. But Ptolemy incorrectly places the Atrebates on the Seine; he also places part of their territory on the sea-coast, which may be true. Origiacum is supposed to be Orchies, between Tournai and Douai. The town Nemetacum afterwards took the name of the people Atrebates or Atrebatii, and the name was finally corrupted into Arras. [AtreBATES.]

The traces of the Roman roads from Arras to Therouenne and to Cambrai are said to exist. It is also said that some remains of a temple of Jupiter have been discovered at Arras, on the Place du Cloitre; and that there was a temple of Isis on the site of the Hôtel-Dieu. (D'Anville, Notice, fc. , Walckenaer, Géog. fcc. vol. i. p. 431.) [G. L ]

NEMETATAE. [Gallaecia, Vol. I. p. 933, a.]
NEME'TES (N $\in \mu \hat{\eta} T a 1)$. This name first appears
in Caesar (B.G.i. 51 ), who sjeaks of the Nemetes as one of the Germanic tribes in the army of Ariovistus. In another passage (B.G. vi. 2.5) he describes the Hercynia Silva as commencing on the west at the borders of the Helvetii, the Nemetes, and the Rauraci ; and as he does not mention the Nemetes as one of the nations on the left bank of the Rhine (B.G. iv. 10), we may probably infer that in his time they were on the east or German side of the Rhine. The Vangiones and Nemetes were afterwards transplanted to the west side of the Rhine. (Tac. Germ. c. 28.) Ptolemy makes Noviomacus (Speyer) the capital of the Nemetes, but he incorrectly places them north of the Vangiones, whose capital was Borbetnmagus (Worms). Pliny (iv. 17) mentions the Nemetes, Tribocci, and Vangiones in this order; but Tacitus mentions them just in the inverse order, Vangiones. Tribocci and Nemetes. From none of these writers could we determine the relative positions of these peoples; but the fact that Noviomagus (Noromayos) is mentioned by Ptolemy as the chief town of the Nemetes, and that Noviomagus is proved to be Speyer by the Itineraries along the west hank of the Rhine, determine the position of the Nemetes.

In Ammianus Marcellinus (xv. 11) and the Not. Imp., Noviomagus appears under the name of the people Nemetes or Nemetae. Ammianus calls it a municipium, by which he probably means a Roman town. In the Notitia of the Gallic provinces, Civitas Nemetum belongs to Germania Prima. In some later writings the expression occurs "civitas Nemetum id est Spira." The name of Speyer is from the Speyerbach, which flows into the Khine at Speyer. (D'Auville, Nutice, t'c. ; Walckenaer, Géog. ${ }^{\circ} c$. vol. ii. p. 277.)
[G. L.]
NEMETOBRI'GA (Neperdepiza), a town of the Tibnri in Asturia, on the rad from Bracara to Asturica, now Mendoya, in the district of Tribis. (Ptol. ii. 6. § 37; Itin. Ant. p. 428 ; Ukert, vol. ii. pt. 1. p. 442.)
NEMETOCENNA [Nemptscum.]

NEMUS DIANAE. [Aricia.]
NENTIDAVA. [Dacia, Vol. I. p. 774, b.]
NEOCAESAREIA (Nєoкaiod́peta: Eth. N foкatoapeús). 1. A town in Pontus Polemoniacus, which, on account of its late origin, is not mentioned by any writer before the time of Pliny, was situated on the eastern bank of the river Lycus, 63 miles to the east of Amaia. (Plin. vi. 3; Tab. Peuting.) It was the capital of the district, and celebrated for its size and beauty, and is of historical importance on account of the ecclesiastical council held there in A. D. 314. We possess no information about the date of its foundation; but the earliest coins we have of it bear the image of the emperor Tiberius; whence it is probable that Neocresareia was founded, or at least received that name, in the reign of Tiberius, when Strabo, who does not notice it, had already composed his work. It must have rapidly risen in extent and prosperity, as in the time of Gregorius Thaumaturgus, who was a native of the place, it was the most considerable town in Pontus. (Greg. Neocaes. Vit. p. 577 ; Amm. Marc. $x$ xvii. 12 ; Hierocl. p. 702 ; Basil, Epist. 210 ; Acta Eutych. c. 7 ; comp. Steph. B. s. v. ; Solin. 45 ; Ptol. v. 6. § 10.) According to Paulus Diaconus (Hist. Misc. ii. 18), the town was once destroved by an earthquake; and from Stephanus Byz. it seems that at one time it was called Adrianopolis. The town still exists under a corrupt form of its ancient name, Nicsar or Nicsara, at a distance of two days' journey north of Tokat. As to the supposed identity of Cabira and Neocaesareia, see Cabira.
2. A town of Bithynia, of uncertain site. (Steph. B. s. v. ; Hierocl. p. 693 ; Concil. Const. vol. iii. p. 668.)
[L. S.]
NEOCLAUDIOPOLIS. [Andrapa.]
NEOCOMUM. [Comum.]
NEON (N $\epsilon \omega \dot{\nu}$ : Eth. N $\epsilon$ cóvios), an ancient town of Phocis, said to have been built after the Trojan war (Strab. ix. p. 439), was situnted at the frot of Mt. Tithorea, one of the peaks of Mt. Parnassus. Herodotus relates that, when the Persian army invaded Phocis, many of the Phocians took refuge in Tithorea near Neon (viii. 32), and that the latter city was destroyed by the Persians (viii. 33). It was, however, afterwards rebuilt ; but was again destroyed, with the other Phocian towns, at the end of the Srcred War. (Paus. x. 3. § 2.) In its neighbourhood, Philomelus, the Phocian general, was defeated, and perished in the flight by throwing himself down from a lofty rock. (Paus. x. 2. § 4.) Neon now disappears from history, and in its place we read of a town Tithorea, which is described by Pauknias (x. 32. § 8, seq.). This writer regards Tithorea as situated on the same site as Neon ; and relates that Tithorea was the name anciently applied to the whole district, and that when the inhabitants of the neighbouring villages were collected in the city, the name of Tithorea was substituted for that of Neon. This, however, is not in accordance with the statement of Plutarch, according to whom Tithores, in the time of the Mithridatic war, was a fortress surrounded by precipitous rocks, where the Phocians took refuge from Xerses. He further states that it was not such a city as the one existing in his day. (Plut. Sull. 15.) If the view of Plutarch is correct, that the fortress, the site of which was afterwards occupied by the city Ti thorea, was the place where the Phocians took re-

## NEONTEICHOS.

fuge from Xerxes, we may conclude that Tithorea and Neon were two different places.

The city, which existed in the time of Plntarch and Pausanias, was a place of some importance, though it had begun to decline for a generation before the time of Paasanias. The latter writer mentions, however, a theatre, the enclosure of an ancient agora, a temple of Athena, and the tomb of Antiope and Phocus. A river flowed by Tithorea, called Cachales (Kaxd ${ }^{\prime} \eta$ ), to which the inhabitants had to descend in order to obtain water. In the territory of Tithorea, but at the distance of 70 stadia from the city, was a temple of Asclepius, and also, at the distance of 40 stadia, a shrinc of Isis. (Paus. x. 32. $\S \S 8-13$.$) The name is written Titopéa in Hero-$ dotus and Pansanias, TiOopaía in Stephanus B., Tioboa in Plutarch, but Ti日bppa in inscriptions. The Ethnic name in Pausanias is Titoopetús, in Stephanus Titopateís, but in inscriptions Titopeús.

The ruins of Tithorea are situated at Velitza, a village at the NE. foot of Mt. Parnassus. The site is fised by an inscription found at Velitan, in which the name of Tithorea occurs. Two-thirds of the modern village stand within the ruined walls of the ancient city. A considerable portion of the walls, and many of the towers, still remain. The town was carefully fortified towards the W. and NW.. and was sufficiently protected towards the NE. and F. by the precipitous banks of the Cachales, and towards the $\mathbf{S}$. by the steep sides of Mt. Parmassus. The walls are almost 9 feet broad. The Cachales, which now bears the name of Kakorreuma, or the evil torrent, flows in a ravine below the village, and thus illustrates the statement of Pausanias, that the inhabitants descended to it in order to obtain water. Behind Velitza, ascending the Cachales, there is a cavern on the steep side of the rock, which, during the last war of independence, received a great number of fugitives. It is very spacious, is supplied with excellent water, and is quite impregnable. This is probably the place where the inhabitants of Neon and the surrounding places took refuge in the Persian invasion, as the Delphians did in the Corycian cave [see Vol. I. p. 768], more especially as the height immediately above Velitza is not adapted for such a purpise. A difficult mule path leads at present through the ravine of the Cachales acmoss the lieights of Parnassus to Delphi. In the time of Pausanias there were two roads from Tithorea across the mountain to Delphi, one direct, the other longer, but practicable for carriages. Pausanias assigns 80 stadia as the length of the shorter road; but this number cannot be correct, as Leake observes, since the direct distance is hardly less than 12 geographical miles.

Most modern writers have followed Pausanias in identifying Tithorea and Neon ; but Ulrichs, for the reasons which have been already stated, supposes them to have been different cities, and places Neon at the Hellenic ruins on the Cephissus, called Paleá Fiva, distant 1 $\frac{1}{2}$ hour, or $3 \frac{1}{2}$ English miles, from Velitza. (Leake, Northern Greece, vol. ii. p. 77, seq.; Ulrichs, in Rheinisches Museum, 1843, p. 544, seq.)

NEONTEICHOS (Néoy teixos), an Aeolian town not far from the coast of Mysia, sitnated between the Hermus and the town of Larissa, from which its distance was only 30 stadia. It is ssid to have been founded by the Aeolians, as a temporary fort on their first arrival in Asia. According to Strabo (xiii. p. 621), the place was more ancient even than Cynuc; but according to a statement in the Vita

NEONTEICHOS.
NERIGOS.
419

Homeri (c. 10), it was built eight years later than Cyme, as a protection against the Yelasgians of Larissa. (Plin. v. 32 ; Herod. i. 149 ; Scyl. p. 28 ; Steph. B. 8. v.) Remains of this town, says Cramer, ought to be sought for on the right bank of the Hermas, and above Quisel-Hissar, on the road from Smyrna to Bergamah.
[L. S.]
NEONTEICHOS (Neov teìरos), a fortress on the coast of Thrace, mentioned by Scylax (p. 28) and by Xenophon (Anab. vii. 5. § 8), supposed to be the modern Ainoulijik.
[T. H. D.]
 Strab. vii. p. 306), a place on the NW. cosst of the Euxine, 120 stadia from the river Tyras, and the same distance from Cremnisci (Anon. Peripl. p. 9), now Akkerman.
[E. B. J.]
NE'PETE (Néxєтa Ptol.; Nexíta, Strab.: Eth. Nepesinus: Nepi), a city of Etruria, situated in the southern part of that province, at a distance of 30 miles from Rome and 8 miles E. of Sutrium. There is no doubt that it was an ancient Etruscan town, though certainly not a city of the first rank, and was probably a dependency of Veii. Hence we meet with no mention of the name, any more than of its neighbour Sutrium, until after the tall of Veii; but from that period these two cities became places of much importance as the frontier fortresses of the Roman dominion on the side of Etruria (Liv. vi. 9). The name of Nepete is first mentioned in B.c. 386, when it was in alliance with home, and being attacked by the Etruscans, sent to sue for assistance from the Romans. But before the military tribunes Valerius and Furius could arrive to their support, the city bad surrendered to the Etruscan arms, and was occupied with a strong garrison. It was, however, speedily retaken, and the leaders of the party who had been instrumental in bringing about the surrender were executed (Liv. vi. 9, 10). A few years later a more effectual step was taken to secure its possession by sending thither a Roman colony. The establishment of this is fixed by Livy in b.c. 383, while Velleius Paterculus would date it 10 years later, or 17 years after the capture of Rome by the Gauls (Liv. vi. 21 ; Vell. Pat. i. 14). It was a Latin colony like most of those established at this period. In b.c. 297, NeFte is again mentioned as one of the frontier towns on this side against the Etruscans (Liv. x. 14); but with this exception we hear no more of it during the wars of the Romans in Etruria. In the Second Punic War it was one of the twelve Latin colonies which declared themselves exhansted with the burdens of the war, and unable to furnish any further supplies : for which it was punished, before the end of the war, by the imposition of double contributions (Liv. xxvii. 9, xxix. 15). From this time Nepete seems to have sunk into the condition of a subordinate provincial town. Like the other Latin colonies, it obtained the Kornan franchise by the Lex Julia, in B. c. 90, and became from thenceforth a municipium; which rank it appears to have retained under the Empire, though it is said in the Liber Coloniarum to have received a colons at the same time with that sent to Falerii (Fest. s. v. Municipium, p. 127; Gruter, Inscr.p. 308. 2. p. 441.7 ;. Lib. Col. p. 217 ; Zumpt, de Culon. p 337 ). Its existence as a municipal town throughout the period of the Roman Empire is proved by inscriptions as well as by Pliny, P'tolemy, and the Tabula (Strab. v. p. 226; Plin. iii. 5. s. 8; Ptol. iii. 1. §50; Tab. Peut.; Orell. Inscr. 879, 3991); but no mention occurs of it in history till after the fall of the Western Empire, when it figures in the Gothic
wars as a place of some importance from its strength as a fortress, and was one of the last strongholds maintained by the Goths against Nurses (Procop. B. G. iv. 34). It early became an episcopal see, a dignity which it has retained without intermission till the present time, though now but an insignificant town with about 1500 inhabitants.

The only remains of antiquity now visible at $\boldsymbol{\lambda} \mathbf{e p i}$ are some ancient sepulchres hewn in the rock, and some portions of the ancient walls, much resembling in their construction those of Sutrium and Falerii. These are considered by Dennis as belonging to the ancient Etruscan city; but it is more probable that they date only from the Roman colony. (Dennis's Etruria, vol. i. p. 111 ; Nibby, Lintorni, vol. ii. p. 398.)
[E. H. B.]
NE'PHELIS (Neqe入(s), a small town on the coast of Cilicia, situated, according to Ptolemy (r. 8. § 1), between Antioch and Anemurium; but if, as
 mentioned in the Stadiasmus Maris Magni (\$§ 181, 182), it ought to be looked for between Selinus and Celenderis. Near the place was a promontory of the same name, where, according to Livy (xxxiii. 20), the fleet of Antiochus the Great was stationed, when, after reducing the towns of Cilicia as far as Selinus, he was engaged in the siege of Coracesium, and where he received the ambassadors of the Rhodians. (Comp. Leake, Asia Minor, p. 119.)

NE:PHERIS (Népepis), a natural fortress situated on a rock, 180 stadia from the town of Carthage. (Strab. xvii. p. 834.)

NEPTU'NIUS MONS. [PELORCS.]
NFQUI'NUM. [Narnia.]
NEREAE, a tribe, mentioned with several others, who are equally unknown, by Pliny, and placed by him in the neighbourhood of the Insula Pattalene, the modern Saurashtrin (vi. 20. s. 23).

NERE'TUM, or NERITUM (Níp ptov, Ptol.: Eth. Neretinus: Nardè), a city of the Sallentini, in the ancient Calabria, mentioned both by Ptolemy and Pliny among the inland towns of that people. Its name is also found in the Tabula, which fixes its position 29 M. P. from Manduria on the road to Uxentum (Ugento), and $20 \mathrm{M} . \mathrm{P}$. from the latter city. These data enable us to identify it with certainty with the modern town of Nardo, a considerable place about 9 miles N. of Gallipoli. It is clear from Pliny that it was a town of municipal rank, and the same thing is confirmed by inscriptions; but there are no ancient remains at Nardo. (Plin. iii. 11. s. 16; Ptol. iii. 1. § 76; Tab. Peut.; Orell. Inecr. 3108. Other inseriptions, with the name of munic., Nerit. pablished by Muratori, vol. ii. pp. 1113, 1120, and by Romanelli, vol. ii. pp. 49, 50, are probably spurious. See Orelli, 138.)
[E. H. B.]

## NE'RICUS [Leucas.]

NERIGOS. Pliny (iv. 16. s. 30), in speaking of the islands in the north of Britain, says that, according to some, Nerigos was the largest, and that from it people used to sail to Thule. As besides this passage we bave no other information, it is imposible, with absolute certainty, to say what island is meant: but as Norway is in Danish still called Norge, and in Swedish Norrige, it is now generally assumed that Nerigos is the modern Nornay; the southwestern headland of which, projecting into the sea, might easily lead the ancients to the belief that it was an island. In the same passage Pliny mentions the island of Bergi, which may pussibly be only the
north-western coast of Norway, the most important commercial town in that part still bearing the name of Bergen. The island of Dumna lastly, which is mentioned along with those spoken of above. has been identified with Dunoen, belonging to the abbey of Drontheim. But all this is very doubtful, as Pliny, besides being very vague, may have blundered here as in other parts of his work; for, according to some. Bergion seems to have been an ancient name of Hibernia or Ireland (P. Mel. ii. 5. § 4); and Dumna is distinctly called by Ptolemy (ii. 3. § 31, viii. 3. § 10), an island off the north of Britain. [Comp. Ohcades.]
[L.S.]
NERIS. [Cyncria.]
NE'RITUS. [Ithaca.]
NE'RIUM. [ARTABRI.]
NERO'NIA. [Artaxata.]
nertereanes (Neptepéayes), a small German tribe, which is mentioned at a late period in the country once occupied by the Chatti, on the east of Mons Abnoba (Ptol. ii. 11. § 22). [L.S.]

NERTOBRIGA (Nept $\delta \in \rho i \gamma a)$. 1. A town of Hispania Baetica (Ptol. ii. 4. § 13), also called by Pliny (iii. 1. s. 3) Concordia Julia, the modern T'alera la vieja. It is named 'Epoóbpıкa in the copies of Polybius (xxxv. 2), by an omission of the N. (Ukert, vol. ii. pt. 1. p. 381.)
2. A town of the Celtiberi in Hispania Tarraconensis, on the road from Emerita to Caesaraugusta. It is called by Appian Nepy $\delta 6 p$ ora (Hisp. 50), and by Suidas Nep $\begin{gathered}\text { depryes : now Almunia. (Ptol. ii. }\end{gathered}$ 6. § 58; Florus, ii. 17 ; Ant. Itin. 437 : Ukert, vol. ii. pt. l. p. 460 .)
[T. H. D.]
NERVA (Nepoźa. Ptol. ii. 6. § 7), a small river in the N . of Hispania Tarraconensis, in the territory of the Autrigones; according to Ukert (vol. ii. pt. 1. p. 300), the modern Ordunna, near Bilbao ; though by other writers it is variously identified with the Blanes and the Nervion.
[T. H. D. $]$
NERVICANUS TRACTUS, is mentioned in the Not. Imp. as a continuation of the Armoricanus Tractus. There is also a middle age authority for the expression "Nervici littoris tractus." A port on this const, named Portus Aepatiaci, was guarded by some Nervian troops according to the Notitia. D'Anville concludes that the Nervii extended from their inland position to the const, and haud part of it between the Morini and the mouth of the Schelde; a conclusion for which there is little evidence, and a good deal against it. [Menapir; Morini.] [G.L.]

NE'RVII (Nepoúrot, Nepfiot), a nation of Belgica, whose capital according to Ptolemy (ii.9. § 11) was Bagacum (Bavai). When Caesar was preparing (b.c.57) to march against the Belgian confederates, he was informed that the Nervii had promised to supply 50,000 men for the general defence, and that they were considered the most savage of all the confederates. (B. G.ii. 4.) The neighbours of the Nervii on the south were the Ambiani. (B. G. ii. 15.) In Caesar's time the Nervii had not allowed "mercatores" to come into their country; they would not let wine be imported and other things which encouraged luxury. When Caesar had marched for three days through their territory, he learned that he was not more than 10 Roman miles from the Sabis (Sambre), and the Nervii were waiting for him on the other side with the Atrebates and Veromandui, their border people. Thus we ascertain that the Atrebates, whose chief town is Arras, and the Veromandui, whose chief place was St. Quentin, were also neighbours of the Nervii.

The Nervii had no caralry, and their country was made alnnost impenetrable to any attack from the cavalry of their neighbours by quickset herges which a man could not get through, and indeed hardly see through them. (B. G. ii. 17.) On the banks of the Sambre Caesar had a desperate fight with the Nervii, commanded by Boduognatus. During this invasion the old men, the women, and children of the Nervii, were removed to the aestuaries and marshes, somewhere near the coast. The Nervii lost a great number of men in this battle : "the nation and the name were nearly destroyed." (B. G. ii. 27.) Their "senatores" as Caesar calls them, their chief men, were reluced from 600 to three, and out of the 60,000 who were in the battle there were said to be only 500 left capable of bearing arms. After this terrible slaughter the Nervii rose again in arms against Caesar (b. c. 54), when they joined the Eburones and others in the attack on Quintus Cicero's camp. (B.G. v. 38.) Some of the commentators have found a difficulty about the appearance of the Nervii again in B. c. 54 , after having been nearly destroyed in b.c. 57 . We must suppose that Caesar wrote of the events as they occorred, and that he did not alter what he had written. In в.c. 57 he supposed that he had destroyed most of the fighters of the Nervii. In b. c. 54 be found that he was mistaken. In B.c. 53 the Nervii were again preparing to give trouble to the Roman governor; but he entered their country in the winter season, and before they hal time to rally or to escape, he took many prisoners, drove off many head of cattle, and ravaged their land, and so compelled them to come to terms. (B.G. vi. 2.) When the meeting of the Gallic states in B. c. 52 was settling the forces that each nation should send to the relief of Alesia, the contingent of the Nerrii was 5000 men. (B. G. vii. 75.)

Some of the nations between the Seine, the sea, and the Rhine, were Germans in Caesar's time, but these Germans were invaders. The Nervii (Tac. Germ. c. 28) claimed a Germanic origin, and they may have been a German or a mixed German and Gallic race; but there is no evidence which can settle the question. Appian (de Bell. Gall. i. 4) speaks of the Nervii as descendants of the Teutones and Cimbri; but this is worth very little. Appian had probably no authority except Caesar, whom he used carelessly : and he may have applied to the Nervii what Caesar says of the origin of the Aduatuci. (B. G. ii 29.) Strabo (p. 194) also says that the Nervii were a Germanic nation, but he dues not even know the position of the Nervii, and hemisplaces them.

Caesar mentions some smaller tribes as dependent on the Nervii (B.G.v. 39) : these tribes were Grudii, Levaci, Pleumoxii, Geiduni, of all whom we know wothing.

Pliny (iv. 17) mentions in Belgica as inland people, the Castologi (apparently a corrupted name). Atrebates, Nervii liberi, Veromandui ; an onder of enumeration which corresponds with the position of the Nervii between the Atrebates and the Veromandui ; for the chief place of the Atrebates is Arras, of the Nervii Bavai, and of the Veromandai St. Quentin. [Augusta Veromanduorum.] As Pling calls the Nervii liberi, we must suppose that in his time they were exempt from the payment of taxes to the Romans, and retained their own internal government; probably in Pliny's time the Romans had not yet fully reduced their country.

The territory of the Nervii did nut extend beyond the limits of the old diocese of Cambrai, which was, however, very large. The capital of the Nervii was Bagacum (Barai), but Cambrai was also a town of the Nervii. [Camaracum.]

NERULUM, $\varepsilon$ town in the interior of Lucania, mentioned by Livy daring the wars of the Komans in that country, when it was taken by assault by the consul Aemilius Barbula, B. c. 317 (Liv. ix. 20). The only other notice of it is found in the Itineraries, from which we learn that it was situated on the highroad from Capua to Rhegiam, at the point of junction with another line of road which led from Venusia by Potentia and Grumentum towards the frontiers of Bruttium (Itin. Ant. pp. 105, 110 ; Tab. Peut). The names and distances in this part of the Tabula are too corrapt and confused to be of any service : the Itinerary of Antoninus places it 14 miles (or according to another passage 16 miles) N . of Muranum, the site of which is clearly ascertained. If the former distance be adopted as correct, it must have been situated at, or in the neighbourhood of, La Rotonda, near the sources of the river Lao (Holsten. Not. ad Cluv. p. 293 ; Romanelli, vol. i. p. 389).
[E. H. B.]
NERU'SII (Nepoboror). This name of a people occurs in the Trophy of the Alps (Plin. iii. 20. s. 24), between the Oratelli and Velauni. Ptolemy (iii. 1. § 41) places them within his Italy among the Maritime Alps. Their chief town was Vintium, which is Vence, on the west side of the Var, and not far from Nicaca ( $N i z z a$ ).
[G. L.]
NESACTIUM (Neбdкcov, Ptol.), a town of Istria, situated to the E. of Pola, on the Flanaticus Sinus, and not far from the river Arsia, which was the boundary of Istria on this side. Hence Ptolemy calls it the last city of Italy. It is mentioned by Livy as a city of the Istrians before their conquest by Rome, and a strong fortress, so that it stood a long siege, and was only taken by the Roman consul C. Claudius Pulcher, by cutting off its supply of water (Liv. sli. 11). It afterwards appears both in Pliny and Prolemy as a manicipal town of Istria under the Romans, and seems to have survived the fall of the Western Empire, but the period of its destraction is unknown (Plin. iii. 19. s. 23; Ptol. iii. 1. § 27 ; Tab. Peut, Anon. Kav. iv. 31). The fact of its proximity to the Arsia (Arsa), combined with Livy's mention of a river flowing by the calls, render it probable that it was situated immediately on the right bank of the Arsia; but its exact site has not been determined.
[E. H. B.]
NESAEA (N $\eta \sigma a l a$ ), a district mentioned in two places in Strabo, with slightly differing descriptions : 1. as a country belonging to Hyrcania, and watered by the Ochus, now Tedjen (xi. p. 509); 2. as a distinct and independent land (xi. p. 511). The geographer probably meant to imply a narrow strip of land, whose boundaries were Hyrcania, Arians, and Parthia respectively, and corresponding with the present Khorisan. It may be identified with the existing Nissa, a small town to the N. of the Alurrz chain of mountains, between Asterabadd and Meshed. (Wilson, Ariana, pp. 142148.)

There has been some doubt as to the orthography of the name, which, in some of the editions, is called Nirala; but, on the whole, the above is probably the beat. It is not anlikely that the place called by Isidorus Par thaymisa, "which the Greeks call Nisaen," must also be identified with the present

Nissa. The same district answers to the " regio Nisiaea Parthyenes nutilis " in Pling (vi. 25. s. 29).
[V.]
NESCANIA, a municipal town in Hispania Baetica, stood on the site of the modern village ElValle de Abdelaciz, 2 leagues W. from Antequera. It is still famed for its mineral springs, the existence of which in ancient tines is attested by inscriptions. (Ukert, vol. ii. pt. 1. p. 363.)
[T. H. D.]
NESIO'TIS (N $\eta \sigma$ tütıs $\chi \omega \dot{\omega} \mu a$, Ptol. v. 9. § 17), a district of Asiatic Sarmatia, formed by the windings of the river Rha, and occupied by the Asami, Materi, and Pitheiropinag.
[E. B. J.]
NESIS (Nisida), a small island on the coast of Campania, between Puteoli and Neupolis, and directly opposite to the extremity of the ridge called Mons Pausilypus (Seneca, Ep. 53). It may be considered as forming the eastern headland of the bay of Baiae or Puteoli, of which Cape Misenum is the western limit. The island is of small extent, but considerable elevation, and undoubtedly constituted at a remote period one side of the crater of a volcano. This must, however, have been extinct befure the period of historical memory; but it appears that even in the days of Statius and Lucan it emitted sulphureous and noxious vapours, which has long ceased to be the case (Stat. Silv. ii. 2. 78; Luc:an, vi. 90). It was nevertheless, like the adjoining hill of Pausilypus, a pleasant place of residence. Brutus had a villa there, where he was visited by Cicero shortly after the death of Caesar, and where they conferred, together with Cassius and Libo, upon their future plans (Cic. ad Att. xvi. 1-4). Pliny tells us that it was famous for its asparagus, a celebrity which it still retains (Plin. xix. 8. s. 42); but the wond which crowned it in the days of Statius (Silo. iii. 1. 148), has long since disappeared.
[E. H. B.]
NESIS (N $\eta=1 s$, Arrian Peripl. p. 18), a small river, 60 stadia from the Borgys, which discharges itself into the Eaxine by the Prom. Herculis, Cape Constantioushi (Cape Adler of Gauttier's map). where there is now a river called Mezioumta. [E.B. J.]

NESSON. [Nessonis Lacus.]
NESSO'NIS LACUS ( $\dot{\eta}$ N $\in \sigma \sigma \omega v / s$ $\lambda(\mu \nu \eta$ ), a lake of Pelasgiotis in Thessaly, lying east of Larisca, now called Karaljair or Mavpodiupn. In summer it is only a marsh, and contains very little water, but in winter it is filled by the overflowing of the Peneius. When the basin is filled, its superfluons waters are conducted by a channel into the lake Boebeis, now called Karla. (Strab. ix. p. 440 ; Leake, Northern Greece, vol. i. p. 445, vol. iv. p. 403.) Strabo regarded the lakes Nessonis and Boebeis as the remains of the great lake which covered Thessaly, before the waters found an outlet thmugh the vale of Tempe to the sea; but he is mistaken in saying that Nessonis is larger than Boebeis. (Strub. ix. p. 430.) Nessonis received its name from a town Nesson, which is mentioned only by Stephanus B. (s. v. Né $\sigma \sigma \omega \nu$ ).

NESTAEI. [Nestr.]
NESTANE. [Mantineia, Vol. II. p. 264, b.]
NESTI, NESTAEI (Néotol, Scylax, p. 8: Neotaion, Eratosthenes, ap. Schol. Apollum. Rhod. iv. 1296), a people of Illyricum, with a town of the same name, near the river Nistus (Néatos, Scylax, l.c.; Artemidorus, ap. Steph. B. s.v.), which has been identified with the Kerka. [E. B. J.]

NESTUS or NESSUS (Néctos, Scyl. pp. 8, 29; Scymn. 672; Pomp. Mela, ii. 2. §§ 2, 9; Plin.
iv. 11 , viii. 16; Né $\sigma \sigma o s$, Hesiod. Thcog. 341 ; Ptol. iii. 12. § 2, iii. 13. § 7; Mé $\sigma \tau o s$, Zonar. ix. 28: Nesto, Torkish Karasú), the river which constituted the boundary of Thrace and Macedonia in the time of Philip and Alexander, an arrangement which the Romans continued on their conquest of the latter country. (Strab. vii. p. 331 ; Liv. xlv. 29.) Thucydides (ii. 96) states that it took its rise in Mt. Scomins, whence the Hebrus descended; being, in fact, that cluster of great summits between Ghiustendil and Siffis, which sends tributaries to all the great rivers of the $N$. of European Turkey. It discharged itself into the sea near Abdera. (Herod. vii. 109; comp. Theophrast. H. P. iii. 2; Leake, Northern Greece, vol. iii. p. 215.) [E. B. J.]

NESU'LIUM (N $\eta \sigma o u ́ \lambda i o v)$, a harbour on the coast of Cilicia, between Celenderis and Seleucia, 60 stadia east of Mylae. (Stadiasmus Mar. Mag. §§ 166, 167.)
[L.S.]
NETO'PHAH (Netwød), a town of Judah, mentioned by Ezra (ii. 22) and Nehemiah (vii. 26), between Bethlehem and Anathoth, if anything can be concluded from the order in which the names occur, which is so questionable, that Beit-Nettif may be, perhaps, safely regarded as its modern representative. It is situated on the highest point of a lofty ridge, towards the NW. of the ancient tribe of Judah. (Robinson, Bib. Res. vol. ii. pp. 341347 ; Reland, Palaestina, pp. 650, 909.) [G. W.]

NETUM or NEE'TUM (Néntov, Ptol. iii. 4. § 13; Netum, Cic., Sil. Ital.: Eth. Netinus, Cic., Plin.: Noto Vecchio), a considerable town in the S. of Sicily, near the sources of the little river Asinarus (Falconara), and about 20 miles SW. of Syracuse. We find no mention of it in early times, but it was probably subject to Syracuse; and it is in accordance with this, that, by the treaty concluded in B. c. 263 between the Romans and Hieron king of Syracuse, Neetum was noticed as one of the cities left in subjection to that monarch. (Diod. xxiii. Exc. H. p. 502.) We have no account of the circumstances which subsequently earned for the Netini the peculiarly privileged position in which we afterwards find them: but in the days of Cicero Netum enjoyed the rights of a "foederata civitas" like Messana and Tauromenium; while, in Pliny's time, it still retained the rank of a Latin town (civitas Latinae conditionis), a favour then enjoyed by only three cities in the island. (Cic. Verr. iv. 26, v. 22, 51 ; Plin. iii. 8. s. 14 ; Ptol. l. c. ; Sil. Ital. xiv. 268.) Ptolemy is the last ancient writer that mentions the name; but there is no doubt that it continued to exist throughout the middle ages; and ander the Norman kings rose to be a place of great importance, and the capital of the southern province of Sicily, to which it gave the name of Val di Noto. But having suffered repeatedly from earthquakes, the inhabitants were induced to emigrate to a site nearer the sea, where they founded the modern city of Noto, in 1703. The old site, which is now known as Noto Vecchio, was on the summit of a lofty hill about 8 miles from the mindern town and 12 from the sea-coast: some remains of the ancient amphitheatre, and of a building called a gymnasium, are still visible, and a Greek inscription, which belongs to the time of Hieron II. (Fazell. de Reb. Sic. iv. 2; Castell. Inscr. Sícil. p. 101.)
[E. H. B.]
NEUDRUS ( $\mathrm{N} \epsilon \mathrm{i} \delta \mathrm{g}_{\rho o s,}$ Arrian, Indic. c. 4), a small stream of the Panjab, which flowed into the Hydraotes (Ravi or Iracati) from the country of the

Attaceni. It has not been identified with any modern river.
[V.]

## NEVIRNUM [Noviodunum.]

NEURI (Neupo!), a nomad people of the N. of Europe, whom Herodotus (iv. 17, 51, 100, 125) places in the centre of the region which now comprises Poland and Lithuania, about the river-basin of the Bug. They occupied the district (Tinv Nevp( $\delta a \gamma_{\dot{\eta}}{ }^{\nu}$ ) which lay to the NW. of the lake out of which the Tyras rises, and which still bears the name in Slavonic of Nurskazemija, with its chief town Nur, and a river Nureta. Some time before the expedition of Dareius, they had been obliged to quit their original seats, on account of a quantity of serpents with which it was infested, and had taken refuge with the Budini in the district about the Brg, which had till then belonged to that people. Though not of the same origin, in castoms they resembled the Scythians, and bore the reputation of being enchanters ( $\gamma \boldsymbol{\sigma} \boldsymbol{\eta} \boldsymbol{\sigma} \epsilon s$ ), like the "Schanas" among the Siberian nomads of the present day. Once a year-so the Scythians and the Greeks of Olbia told Herodotus-each of them became for a few days a wolf; a legend which still lingers among the people of Volhynia and White Russia. Pomponius Mela (ii. 1. §§ 7, 13) repeats this story from Herodotus. (Comp. Plin. viii. 34; Creuzer, Symbolik, vol. ii. p. 131.) The Sarmatian Navari of Ptolemy (Nav́apol, iii. 5. §25) are the same as the Neuri, the name appearing in a Grecized form; but there is some difficulty in harmonising his statements, as well as those of Euphorus (ap. Anon. Poet. (vulgo Scymn. Ch.), v. 843; Anon. Peripl. p. 2) and of Ammianus Marcellinus (xxxi. 2. § 14), with the more trustworthy accounts of Herodotus. Schafarik (Slav. Alt. vol. i. pp. 194-199) refers the Neuri to the Wendish or Servian stock. [E. B. J.]
NIA (Nia), a river of Interior Libya, discharging itself into the Hesperian bay, in $13^{\circ} 30^{\prime} \mathrm{E}$. long. and $90^{\circ}$ N. lat. (Ptol. iv. 6. § 7). Colonel Leake (Journ. Geog. Soc. vol. ii. p. 18) has identitied it with the Rio Gramule, which takes its rise on the border of the highland of Senegambia, according to Mollien's map (Trav. in the Interior of Africa, 1820), in $10^{\circ}$ $37^{\prime} \mathrm{N}$. lat. and $13^{\circ} 37^{\prime} \mathrm{W}$. long.
[E. B. J.]
NICAE, NICE (Niкn), or NICAEA (Niкaua), a town of Thrace, not far from Adrianople, the scene of the defeat and death of the emperur Valens by the Goths in A. D. 378. (Amm. Marcell. xxxi. 13; Cedren. ii. p. 183; Sozom. ir. 19; Theoph. p. 772.) It has been variously identified with Kuleli and Kuluter.
[T. H. D.]
NICAEA. I. In Asia 1. (Nikala; Eth. Nıkateis or Nıкaei's: Ishnik), one of the most important towns of Bithynia, of which Strabo (xii. p. 565) even calls it the metropolis, was situated on the eastern shore of lake Ascania or Ascanius, in a wide and fertile plain, which, however, was somewhat unhealthy in summer. The place is said to have been colonised by Bottiaeans, and to have originally borne the name of Ancore (Steph. B. a. 0.) or Helicore (Geogr. Min. p. 40, ed. Hudson); but it was subsequently destroyed by the Mysians. A few years after the death of Alexander the Great, Antigonus, probably after his victory over Eumenes, in B. c. 316, rebuilt the town, and called it, after himself, Antigoneia. (Steph. B. l. c.; Eustath. ad Hom. Ih ii. 863). Not long after Lysimachus, having made himself master of a great part of Asia Minor, changed the name of Antigoneis into Nicaea, in honour of his wife Nicaea, a daughter of Autipater. (Steph. B., Eustath., Strab., U. cc.'

According to another account (Memnon, ap. Phot. Cod. 224. p. 233, ed. Bekker), Nicaea was founded by men from Nicaea near Thermopylae, who had served in the army of Alexander the Great. The town was built with great regularity, in the form of a square, measuring 16 stadia in circumference; it had four gates, and all its streets intersected one another at right angles, so that from a monument in the centre all the four gates could be seen. (Strab. xii. pp. 565. \&c.) This monument stood in the gymnasium, which was destroyed by fire, but was restored with increased magnificence by the younger Pliny (Epist. x. 48), when he was governor of Bithynia.

Soon after the time of Lysimachus, Nicaea became a city of great importance, and the kings of Bithynia, whose era begins in B. C. 288 with Zipoetes, often resided at Nicaea. It has already been mentioned that in the time of Strabo it is called the metropolis of Bithynia; an honour which is also assigned to it on some coins, though in later times it was enjoyed by Nicomedeia. The two cities, in fact, kept up a long and vehement dispute about the procedence, and the 38th oration of Dion Chrysastomus was expressly composed to settle the dispute. From this oration, it appears that Nicomedeia alone had a right to the title of metropolis, but both were the first cities of the country. The younger Pliny makes frequent mention of Nicaea and its public buildings, which he undertook to restore when governor of Bithynia. (Epish x. 40, 48, \&c.) It was the birthplace of the astronomer Hipparchus and the historian Diun Cassius. (Suid. s. v. "IrтapXos.) The numerous coins of Nicaea which still exist attest the interest taken in the city by the emperors. as well as its attachment to the rulers; many of them commemorate great festivals celebrated there in honoar of gods and emperors, as Olympia, Isthmia, Dionysia, Pythia, Commodia, Severia, Philadelphia, \&cc. Thronghout the imperial period, Nicaea remained an important place; for its situation was particularly favourable, being only 25 miles distant from Prusa (Plin. v. 32), and 44 from Constantinople. (It. Ant. p. 141.) When the last mentionedcity became the capital of the Eastern Empire, Nicaea. did not lose in importance; for its present walls, which were erected daring the last period of the Empire, enclose a much greater space than that ascribed to the place in the time of Strabo. In the reign of Constantine, A. D. 325, the celebrated Conncil of Nicaea was held there against the Arian heresy, and the prolates there assembled drew up the creed called the Nicene. Some travellers have telieved that the council was held in a charch still existing; but it has been shown by Prokesch (Erinnerungen, iii. p. 234) that that church was built at a later period, and that the council was probably held in the now ruined mosque of Orchan. In the course of the same century, Nicaea suffered much from an earthquake; but it was restored in A. D. 368 by the emperor Valens. During the middle ages it was for a long time a strong bulwark of the Greek emperors against the Turks, who did not conquer it until the year 1078. During the first crasade, in 1097, it was recovered from them by the Christians, but in the peace which was afterwards concluded it was ceded to the Turks. In the 13th century, when Constantinople was the capital of the Latin empire, Theodore Lascaris made Nicaea the capital of Western Asia ; in the end, however, it was finally conquered and incorporated with the Ottoman empire by Orchan. Many of its pablic buildings were then
destroyed, and the materials used by the conquerors in erectiug their mosques and other edifices. The modern Isnik is a very poor place, of scarcely more than 100 houses, while in Pucocke's time, there still existed about 300. The ancient walls, with their towers and gates, are in tolerably good preservation; their circumference is 14,800 feet, being at the base from 15 to 20 feet in thickness, and from 30 to 40 feet in height; they contain four large and two small gates. In most places they are formed of alternate courses of Roman tiles and large square stones, joined by a cement of great thickness. In some places have been inserted columns and other architectural fragments, the ruins of more ancient edifices. These walls seem, like thnse of Constantinople, to have been built in the fourth century of our era. Some of the towers have Greek inscriptions. The ruins of mosques, baths, and houses, dispersed among the gardens and cornfields, which now occupy a great part of the space within the Greek fortifications, show that the Turkish town, though now so inconsiderable, was once a place of importance; but it never was so large as the Greek city and it seems to have been almost entirely constructed of the remains of the Greek Nicaes, the walls of the ruined mosques and baths being full of the fragments of Greek temples and churches. On the north-western parts of the town, two moles extend into the lake and form a harbour ; but the lake in this part has much retreated, and left a marshy plain. Outside the walls remnants of an ancient aqueduct are seen. (Comp. Leake, Asia Minor, pp. 10, foll.; Von Prokesch-Osten, Erinnerungen, iii. pp. 321,full.; Pococke, Journey in Asia Minor, iii. pp. 181,foll.; Walpole, Turkey, ii. p. 146; Eckhel, Doctr. Num. i. pp. 423, foll. ; Rasche, Lexic. Rei Num. iii. 1. pp. 1374, foll.)
[L. S.]

COIN OF NICARA DN BITHYNLA.
2. (Nícua, Arrian, v. 19 ; Strab. xv. p. 698; Curt. ix. 3. 23), a city in the Panjab, on the banks of the Hydaspes (or Jelum), built by Alexander the Great to commemorate his victory over Porus, who raled the flat country intermediate between that river and the Acesines. It was at Nicaea or Bucephalia, which appears to have been on the opposite bank, that Alexander (according to Strabo, l c.) built the fleet which Nearchus subsequently commanded, the country in the immediate neighbourhood having abundance of wood fit for ship-building. No town now exists which can with any probability be identified with it.
[V.]
NICAEA. II. In Europe. 1. (Nikala: Eth. Niкaueús: Nizea, in French Nice), a city on the const of Liguria, situated at the foot of the Maritime Alps, near the frontier of Gallia Narbonensis. On this account, and because it was a colony of Massilia, it was in early times commonly reckoned as belonging to Gaal (Steph. B. a. v.) ; and this attribation is still followed by Mela (ii. 5. § 3) : bat from the time that the Varus became fixed as the limit of Italy, Nicsea, which was situated about 4 miles
to the E. of that river, was naturally included in Italy, and is accordingly so described by Strabo Pliny, and Ptolemy. (Strab. iv. p. 184 ; Plin. iii. 5. s. 7 : Ptol. iii. 1. § 2.) We have no account of its early history, beyond the fact that it was a colony of Massilia, and appears to have continued always in a state of dependency upon that city. (Strab. iv. pp. 180, 184 ; Plin. l. c.; Steph. B. 8. v.) It was situated on the borders of the Ligurian tribes of the Oxybii and Deciates; and, as well as its neighbour Antipolis, was continually harassed by the incursions of these barbarians. In B. C. 154 both cities were actually besieged by the Ligurians, and the Massilians, finding themselves unable to repulse the assailants, applied to Rome for assistance; the consul Q. Opimius, who was despatcled with an army to their succour, quickly compelled the Ligurians to lay down their arms, and deprived them of a considerable part of their territory. which was annexed to the dependency of Massilia. (Pol. xxxiii. 4, 7; Lir. Epit. xlvii.) Fron this time, nothing more is heard in history of Nicaea, which continued to belong to the jurisdiction of Massilia. and, even after it came to be subject to the Romans, and included gengraphically in Italy, was still for municipal parposes dependent upon its parent city. (Strab. iv. p. 184.) At a later period, the new division of the provinces agnin transferred to Gaul the towns of Nicaea and Cemenelium, together with the whole district of the Maritime Alps, westward of the Troprea Augusti. Hence, we find Nicaes described by Ainmianus (xv. 11. § 15) as belonging to Gaul: and during the decline of the Empire, after it had become an episcopal see, the names of its bishops are found among the Gaulish prelates. It dues not appear to have ever been a town of much importance under the Roman Empire; and was apparently eclipsed by the city of Cemenelium (Cimiez), in its immediate neighbourhood. But it had a good port, which must always hare secured it some share of prosperity, and after the fall of Cemenelium, it rose to be the n:ost important city in this part of Gaul, and became the capital of an independent district called the Contado di Nizzu (County of Nice). This eventually fell into the hands of the House of Savoy, and now forms part of the dominions of the king of Sardinia. Nice itself is a flourishing place, with about 30,000 inhabitants, but has no remains of antiquity. The ancient city probably occupied the height, now the site of the castle, and the immediate neighbnurhood of the port, which though small, is secure. Nice is situated at the mouth of the river P'aglione, a considerable mountain torrent, evidently the stream called Pauto by Pliny and Mela. (Plin. l. c.; Mel. ii. 4. § 9.)

About 2 miles E. of Nice is a deep bay or inlet between two rocky promontories, forming a spacious natural, harbour now known as the Gulf of Villafranca, from a town of that name, which has however existed only since the 13th century. This is probably the Portis Olivula of the Maritime Itinerary (p. 504). The Anao Portus of the same Itinerary is probahly a small cove, forming a well-sheltered harbour for small vessels on the E. side of the headland, called Capo di S. Ospizio, which forms the eastern boundary of the Gulf of Villafranca. A similar cove a few miles further $\mathbf{E}$. just below the modern village of Ezn, is probably the Avisio Portus of the same anthority; but the distances given between these points are greatly overstated.
[E. H. B.]

NICER
2. (Nícaua: Eth. Nukauevs), a fortress of the Locri Epicnemidii, situated upon the sea, and close to the pass of Thermopylae. It is described by Aeschines as one of the places which commanded the pass. (De Fals. Leg. p. 45, ed. Steph.) It was the first Locrian town after Alpenos, the latter being at the very entrance of the pass. The surrender of Nicaea by Phalaecus to Philip, in B. c. 346. made the Macedonian king master of Thermopylae, and brought the Sacred War to an end. (Diod. xvi. 59.) Philip kept possession of it for some time, but subsequently gave it to the Thessalians along with Magnesia. (Dem. Phil. ii. p. 153. ed. Keiske: Aesch. c. Ctesiph. p. 73, ed. Steph.) But in B. C. 340 we again find Nicaea in the possession of Philip. (Dem. in Phil. Ep. p. 153.) According to Memnon (ap. Phot. p. 234, a., ed. Bekker ; c. 41 ; ed. Orelli) Nicsea was destroyed by the Phocians, and its inhabitants founded the Bithynian Nicaea But even if this is true, the town must have been rebuilt sown afterwands, since we find it in the hands of the Aetolians during the Roman wars in Greece. (Polyb. x. 42, xvii. 1; Lir. xxviii. 5, xxxii. 32.) Subsequently the town is only mentioned by Stmbo (ix. p. 426). Leake identifies Nicaea with the castle of Pundonitza, where there are Hellenic remains. (Northern Greece, vol. ii. p. 5. seq.)
3. In Illyria. [Castra, Vol. 1. p. 562, a.]
4. In Thrace. [Nicae.]

NICAMA (Niкацa), a place on the SW. const of India, called a metmpolis by Ptolemy (vii. 1. § 12). It was in the district of the Bati, within the territory of king Pandion. It was very probably on the site of the present Cottopatam.

NICA'SIA (Nikaría), a small island near Naxos. (Steph. B. s. v.)

NICEPHO'RIUM (Nıкnфбpıov, Strab. xvi. p. 747 ; Piol. v. 18. § 6; Steph. B. s. v.), a place of considerable importance in Mesopotamia, on the river Euphrates. According to Isidorus (Mans. Parth. i. ed. Müller) and Pliny (v. 24. s. 21, vi. 26. s. 30), it owed its foundation to Alexander the Great: according, however, to Appian, to Seleucus I., which is much more likely (Syriac. c. 57). It is mentioned by Dion Cassius (xl. 13) and by Tacitus (Ann. vi. 40), but simply as one of many towns founded by the Macedonians. Strabo calls it a town of the Mygdonians in Mesopotamia (xvi. p. 747). Nothing is known of its interinediate history; but Justinian erected a fortress here (Procop. de Aedif. ii. 7); and the emperor Leo, who probably added several new works to it, is said to have changed its name to Leontopolis. (Cf. Hierocl. p. 715; and Chron. Edess. ap. Assemani, i. p. 405.)
[V.]
NICEPHO'RIUS, an affluent of the Tigris, which washed the walis of Tigrancerta (Tac. Ann. xv. 4), now the Bitlis-chä, which rises at Bash Khin, on the S. of Jebel Nimrúd, and W. of Lake Vin. (Chesney, Exped. Euphrat. vol. i. p. 18; Ritter, Erdkunde, vol. x. p. 88.) Kiepert's map identifies it with the Jesedchane Sú.
[F.B.J.]
NICER (the Neckar), a tributary of the Rhine, having its sources not far from those of the Danule, and discharging itself into the Rhine in the neighbourhood of Manheim. Its course forms a sort of semicircle, as it first flows in a north-eastern and afterwards in a north-western direction. The Nicer is not mentioned until a late period of the Roman Einpire. In A. D. 319, the emperor Valentinian had to make great efforts in turuing some part of the
river into a new channel for the purpose of protecting the walls of a fort erected on its banks from heing undermined and washed away by its waters. (Amm. Marc. xxviii. a; Vopisc. Prob. 13, where it is called Niger ; Auson. Mosell. 423 ; Sidon. Apollin. Paneg. ad Arit. 324: Eumen. Paneg. Const. 13; Symmach. Lauch in Valent. ii. 9, 10.) The remains of Roman antiquities on the hanks of the Nicer are very numerous, and a few of its trihntaries, such as the Armisia (Erms) and Murra (Murr), are mentioned in inscriptions found in the country. [L. S.]

Ni'CiA. [Castra, Vol. I. p. 562, 2.]
NICIUM or NICIU (Naklou $\mu \eta \tau \rho \delta \pi 0 \lambda a s$, Ptol. iv. 5. §9), a principal town in the Nomos Prosopites of Lower Aegypt, lay just above Momemphis and nearly midway between Memphis and Alexandicia. It was one of the military stations on the main road between those cities which ran nearly parallel with the Canopic arm of the Nile. [ProsoPITIS.]
[W. B. D.]
 Isaiknid or Ismid), the capital of Bithynia, situated on the north-eastern coast of the Sinus Astacenus, a part of the Propontis. The town of Astacus, a little to the south-east of Nicomedeia, was destroyed, or greatly damaged, by Lysimachus; and some time after, b.c. 264, Nicomedes I. built the town of Nicomedeia: to which the inhabitants of Astacus were transferred (Steph. B. 8. v.; Strab. xii. p. 563; Paus. v. 12. §5; Euseb. Chron. Ol. 129. 1). The founder of the new city made it the capital of his kingdom, and in a short time it became one of the largest and most flourishing cities, and continued to prosper for more than six centuries. Pliny, in his letters to the emperor Trajan, mentions several public buildings of the city, such as a senate-house, an aqueduct, a forum, a te:nple of Cybele, \&cc., and speaks of a great fire, during which the place suffered much (Epist. x. 42, 46). Respecting its rivalry with Nicaea, see Nicaka. According to Pliny (v. 43), Nicomedeia was 62 $\frac{1}{2}$ miles to the south-east of Chalcedon, while according to others it was only 60 or 61 miles distant (It. Ant. pp. 124, 140; It Hieros. p. 572; Tab. Peut.) Under the Roman Empire Nicomedeia was often the residence of the emperurs, such as Diociletian and Constantine, especially when they were engaged in war against the Parthians or Persians. (Aurel. Vict. de Caes. 39 ; Nicephor. vii. in fin.) The city often suffered from earthquakes, but owing to the munificence of the emperors it was always restored (Amm. Marc. xvii. 7; Philostorg. iv. p. 506). It also suffered much from an invasion. of the Scythians (Amm. Marc. xxii. 9, 12, 13). The orator Libanius (Orat. 62, tom. iii. p. 337, ed. Reiske) mourns the loss of its thermae, basilicae, temples, gymnasia, schools, pablic gardens, \&c., some of which were afterwards restored by Justinian (Procop. de Aed. r. 1 ; comp. Ptol. v. 1. §3, viii. 17 . §4; Hierocl. p. 691). From inscriptions we learn that in the later

COIM OF MCOMEDKHA.
period of the empire Nicomedeia enjoyed the honour of a Roman colony (Orelli, Inecript. No. 1060). The city is also remarkable as being the native place of Arrian, the historian of Alexander the Great, and as the place where Hannibal put an end to his chequered life. Constantine breathed his last at his villa Ancyron, near Nioomedeia (Cassiod. Chron. Const; Philostorg. ii. p. 484). The modern Ismid still contains many interesting remains of antiquity, respecting which see Pococke, vol. iii. p. 143, \&cc; Description de [' Asic Mineure, tom. i.; comp. Rusche, Lexic. Rei Num. iii. 1. p. 1435, scc. [L. S.]

NICO'NIS DROMUS (Niscovos $8 p \delta \mu 0 \mathrm{~s}$, Peripl. Mar. Erythr. p. 9, ed. Hudson; Tovixy, Ptol. iv. 7. § 11 ; Nixc, Ptol. i. 17. § 12), one of the "Runs" of Azania, on the E. coast of Africa, seven (days' stations) in all. Passing the Noti Cornn of Ptolemy (EL-Khail), the voyager arrived at the "Strands" (aircaiol), the Little and the Great, extending six days according to the Periplus, eight according to Ptolemy's anthorities, though he would reduce the distance to four natural days. The Little Strand, which occurs first, is doubtless the Seif Tawil, or "Long Sword," of the Arab pilots, so called from its curvature. The Great Strand is probably the district now called Meruit, "Dry Desert." These have an extent of $\mathbf{3 0 0}$ miles. Next comes the peopled shore where Ptolemy (i. 17. § 11) places 3 towns, Essina ("Efoiva), the Sarapionis Portus (Eapaitionos $8 \rho \mu o s$ ), and Towice or Nici, the Nicon of the Periplus. These towns must be placed in the Bara Somauli, or the land of the Somauli, or Shúmali, a mild people of pestoral habits, confined to the coast. whicb they occupy from the Red Sea to the river Juba. The "Yort of Sarapion" corresponds with Markah, while the "Run of Nicon" agrees with the point called Torre in Owen's map. (Narrative of Voyages to explore the Shores of Africa, Arabia, and Madagascar, perforned in H. M. ships Leven and Barracouta, London, 1833 ; comp. Cooles, Clawdius Prolemy and the Nile, p. 64.)
[E. B. J.]
NICO'NIUM (Nuxáyioy, Scylax, p. 29), a city of Earopean Sarmatia, which Strabo (vii. p. 306) places at 180 stadia from the mouth of the Tyras, while the anonymons Coast-describer (p. 9) fixes it at 300 stadia from the Isiacorum Portus, and 30 stadia from the Tyras on the coast. Stephanus of Byzantium (s. v.) states that it was at the month of the Ister, bat for "Iotpov, Tupou should probably be read. Ptolemy (iii. 10. § 16) has removed it from the coast, and placed it too far to the N. Its poosition must be looked for near Ovidiopol. [E.B.J.]

NICO'POLIS (Nuxdmodis : Eth. Nuкотu入itvs), i. e. the "City of Victory." I. In Asia 1. A town of Bithynia, on the coast of the Bosporus, a few miles north of Chalcedon. (Plin. v. 43; Steph. B. s. ข.)
2. A tcwn in Cappadocia or Armenia Minor, founded by Pompey on the spot where he had gained his first decisive victory orer Mithridates. (Strab. xii. p. 555; Appian, Mithrid. 101, 105; Dion Cass. xxxv. 33 ; Cass. Bell. Alex. 36: Plin. vi. 10.) It was situated in a valley of the river Lycus, a tributary of the Iris (Acta Martyr. tom. iii. Jul. p. 46), at a distance of 100 miles to the north-west of Satala, ard 98 to the north-east of Sebastia. It was a populous town as early as the time of Strabo; but during the last period of the Empire it appears to have suffered much, and its decayed walls were restored by Justinian. (Procop. de Aed. iii. 4; comp. Ptol. v. 7.

## NICOPOLIS.

§ 3; Itin. Ant. pp. 183, 207, 215; Hierocl p. 703 ; Steph. B. s. v.). Must travellers and antiquaries are agreed, that Nicopolis is represented by the modern Turkish town of Deoriki; but as this place is situated on a tributary of the Euphrates, the opinion is opposed to the statements of our authorities, especially the "Acta Martyrum." Others are inclined to regard Kara-hissar, on the Lycus, as marking the site of Nicopolis; but still the routes indicated in the Itineraries are in favour of Devriki; whence D'Anville too identifies this place with Nicopolis, assuming that the error lies with the author of the "Acta Martyrum," who expressly places Nicopolis on the river Lycus.
3. An episcopal see of uncertain site, in Lydia or Ionia, mentioned by Hierocles (p. 660). [L. S.]
4. A town in Cilicia. [Issus.]
5. A town in Palestine. [Emmaus, No. 2.]

NICO'POLIS. II. In Africa. A town in Aegypt, founded by Augustus Caesar, in B. c. 24, on the field where he defeated, for the last time, M. Antonius, and in commemoration of the surrender of Alexandreia. (Strab. xvii. p. 795 ; Joseph. B. Jud. iv. 11 ; Dion Cass. li. 18; Steph. B. s. v.) The conqueror wis at the moment highly incensed with the Alexandrians; and, by the foundation of a Roman town in their immediate neighbourhood, sought to inflict a permanent blow on their political and commercial supremacy. Nicopolis was built a little W. of the Delta proper, on the banks of the canal which connected Canopus with the capital, and about three and a half miles from its eastern gate. That it was intended for a city of the first rank appears from its ground plan, which, however, was never executed. Its founder built an amphitheatre and a diaulos, and established there Ludi Quinquemnales, in honour of his victory ('A入e $\xi a \nu \delta \rho \in i a$, Spanheim, Epist. v. § 3, ed Morell.); and coins bear on their obverse the legend NIKOHOAIL. EEBAET. KTIET.
He also designed to erect several temples, and to transfer to them the principal sacrifices and priestcolleges of the Macedonian capital. But the whole scheme was a failure ; the natural advantages of Alexandreia were incontestable; and the Roman "City of Victory" was never more than than a suburb of its rival. Within less than a century atter its foundation, the name of Nicopolis disappears from history. A town called Juliopolis, mentioned by Pliny alone (vi. 23. s. 26), as seated on the same canal, and about the same distance ( $20-30$ stades) from Alexandreia, is apparently Nicopolis (see Mannert, vol. x. p. 626).
NICO'PULIS. III. In Europe. 1. A city of Epeirus, erected by Augustus, in commemoration of the victory of Actimn, b.c. 31. It was situated near the entrance of the Ambraciot gulf, on the promontory of Epeirus, which is immediately opposite that of Actium in Acarnania. The extremity of the Epeirot promontory is now occupied by the town of Prevesa; and Nicopolis lay 3 miles to the N . of this town, on a low isthmus separating the Ionian sea from the Ambraciot gulf. It was upon this isthmus that Augustus was encamped befure the battle of Actium. His own tent was pitched upon a height immediately above the isthmus, from whence he could see both the outer sea towards Paxi, and the Ambraciot gulf, as well as the parts towards Nicopolis. He fortified the camp, and connected it by walls with the outer port, called Comarus. (Dion Cass. 1. 12.) After the battle he surrounded with stones the place where his own tent had been pitched, adorned it with naral
trophies, and built within the enclosure a sanctuary of Neptune open to the sky. (Dion Cass. li. 12.) But, aecording to Suetonius (Ary. 18), he dedicated this place to Neptune and Mars. The city was peopled by inhabitants taken from Ambracia, Anactorium, Thyrium, Argos Amphilochicum, and Calydon. (Dion Cass. li. 1 ; Suet. Aug. 12 ; Strab. vii. pp. 324, 325 ; Paus. v. 23. § 3, vii. 18. § 8, x. 38. § 4.) Augustus instituted at Nicopolis a quinquennial festival. called Actia, in commemoration of his victory. This festival was sacred to Apollo, and was celebrated with music and gymnastic games, horse-racing and sea-fights. It was probably the revival of an old festival, since there was an ancient temple of Apollo on the promontory of Actium, which is mentioned by Thucydides (i. 29), and was enlarged by Augustus. The festival was declared by Augustus to be a sacred contest, by which it was made equal to the four great Grecian games; it was placed under the superintendence of the Lacedremonians. (Dion Cass., Suet., Strab., ll. cc.) Augustus caused Nicopolis to be admitted into the Amphictyonic council (Paus. x. 38. § 3), and made it a Roman colony. (Plin. iv. 1. s. 2; Tac. Ann. v. 10.) A Cluristian church appears to hare been founded at Nicopolis by the Apostle Paul, since he dates his letter to Titus from Nicopolis of Macedouia, which was most probably the colony of Augustus, and not the town in Thrace, as some have supposed. Nicopolis continued to be the chief city in Western Greece for a long time, but it had already fallen into decay in the reign of Julian, since we find that this emperor restored both the city and the games. (Mamertin. Julian. 9.) At the beginning of the fifth century it was plundered by the Goths. (Procop. B. Goth. iv. 22.) It was again restored by Justinian (de Aedif. iv. 2), and was still in the sixth century the capital of Epeirus. (Hierocl. p. 651, ed. Wessel.) In the middle ages Nicopolis sunk into insignificance, and the town of Prévesa, built at the extremity of the promontory, at length absorbed all its inhabitants, and was doubtless, as in similar cases, chiefly constructed out of the ruins of the ancient city.

The ruins of Nicopolis are still very considerable. They stretch across the narrowest part of the isthmus alremly described. Strabo (vii. p. 324) erroneously describes the isthmus as 60 stadia in breadth; but the broadest part, from the southeastern extremity of the lagoon called Maizoma to Mytika, is only three miles; while the narrowest part is less than half that distance, since the eastern half of the isthmus is occupied by the lagonn of Mazoma. This lagoon is separated from the Ambraciot gulf only by a narrow thread of land, which is a mile long, and has openings, where the fish are caught in great numbers, as they enter the lagoon in the winter and quit it in the summer. This illustrates the statement of an ancient geographer, that fish was so plentiful at Nicopolis as to be almost disgusting. (Geogr. Graec. Min. vol. iii. p. 13, ed. Hudson.) Nicopolis had two harbours, of which Strabo (vii. p. 324) says that the nearer and smaller was called Comarus (K $\delta \mu a p o s$ ), while the further, and larger, and better one, was near the mouth of the gulf, distant about 12 stadia from Nicopolis. It would appear, that Strabo conceived both the ports to have been on the western coast outside the gulf; but it is evident from the nature of the western coast that this cannot have been the case. Murcover, Dion Cassius (1. 12) calls Comarus
the outer port; and there can be little doubt that the second harbour, intended by Strabo, was the port of Vathy within the gulf, the distance of which from Nicopolis corresponds to the 12 stadia of Strabo, and where there are some Roman ruins a little within and on the eastern shore of the creek. The port of Comarus was doubtless at Mýtika, but the name of Gómaro is now given to the wide bay north of Mýtika

The ruins of Nicopolis are now called Paleoprévesa. On approaching them from Prevesa, the traveller first comes to some small arched buildings of brick, which were probably sepulchres, beyond which are the remains of a strong wall, probably the southern enclosure of the city. Near the southwestern extremity of the lagoon Mazoma, is the Paleókastron or castle. It is an irregular pentagonal enclosure, surrounded with walls and with square towers at intervals, about 25 feet in height. On the western side, the walls are most perfect, and here too is the principal gate. The extent of the enclosure is about a quarter of a mile. The variety of marble fragments and even the remains of inscriptions of the time of the Roman Empire, inserted in the masonry, prove the whole to have been a repair, though perhaps upon the site of the original acropolis, and restored so as to have been sufficiently large to receive the diminished population of the place. It may have been, as Leake conjectures, the work of Justinian, who restored Nicopolis.

Three hundred yards westward of the Paleókastron are the remains of a small theatre but little dilapidated. Col. Leake says that it appears to be about 200 feet in diameter; but Lient. Wolfe describes it as only 60 feet in diameter. Being built upon level ground, the back or highest part is entirely supported upon an arched corridor. Between this

theatre and the shore, are the ruins of a quadrangular building of brick, which was perhaps a palace, as it has numerous apartments, with many niches in the walls for statues, and some remains of a stone pavement. It stands just within an aqueduct, supported upon arches, which entered Nicopolis on the north, and was 30 miles in length. Considerable remains of it are met with in different parts of Epeirus.

Farther north, at the foot of a range of hills, are the remains of the great theatre, which is the most conspicuous object among the ruins. It is one of the best preserved Roman theatres in existence. The total diameter is about 300 feet. The scene is 120 feet long, and 30 in depth. There are 27 rows of seats in three divisions. From the back of the theatre rises the hill of Mikhalitzi, which was undoubtedly the site of the tent of Augustus before the battle of Actium. Close to the theatre are the ruins of the stadium, which was circular at both ends, unlike all the other stadia of Greece, but similar to several in Asia Minor, which have been constructed or repaired by the Romans. Below the stadium are some ruins, which are perbaps those of the gymnasium, since we know from Strabo (vii. p. 325) that the gymnasium was near the stadium. The accompanying map is taken from Lieut. Wolfe's survey. (Leake, Northern Greece, vol. i. p. 185, seq.; Wolfe, in Journal of Geogr. Soc. vol. iii. p. 92, seq.)

COIN OF NICOPOLIS IN EPEIRUS.
2. A town of Thrace, not far from the mouth of the Nessus, and therefore called by Ptolemy (iii. 11.
 to have been founded by Trajan, as it is surnamed Ulpia upon coins. The Scholiast upon Ptolemy says that it was subsequently named Christopolis ; but it is still called Nicopolis by Socrates ( $\boldsymbol{H}$. $\boldsymbol{E}$. vii. 36) and Hierocles (p.635).
3. A town of Thrace at the foot of Mt. Haemus. (Ptol. iii. 11. § 11.)
4. A town of Thrace, situated at the place where the Iatrus flows into the Danube, and erected by Trajan in memory of his victory over the Dacians. (Amm. Marc. xxxi. 5 ; Jornand. de Reb. Get. c. 18; Hierocl. p. 636.)

NICO'TERA (Nicotera), a town of Bruttium, known only from the Antonine Itinerary (pp. 106, 111), which places it 18 M. P. south of Vibo Valentia, on the road to Rhegium. It is repeatedly mentioned in the middle ages, and still exists under its ancient name as a considerable town and an episcopal see.
[E. H. B.]
NIDUM or NIDUS, a town of Britain, situated according to the Itinerary (p. 484), on the road from Isca Dumnuniorum to Isca Silurum, and consequently in the territory of the Belgae. This site, however, is in all probability false; and it appears rather to have been a town of the Silures, the modern Neath, on the river of that name in Glamorganshire. (Cainden, p. 735.)
[T.H.D.]

NIE (Nit, Isidor. Parth. 16, ed. Müller), a small place in Ariana, probably the present Neh, in Kohistán.

NIGEIR or NIGIR (Ní $\epsilon \varphi$, Ptol. iv. 6. § 14; Nifıp, Agathem. ii. 10; Niger, gen. Nigris, Plin. v. 4, 8, viii. 32), a great river of interior Libya, Howing from W. to E. It has long been a moot point among geographers whether the Nigeir of the ancients should be identified with the river now known as the Djolibi or Quorra, which, after taking its course through the vast plains or lowlands of Central Africa, turns southwards towards the Bight of Benin, where it enters the sea. For instance, Gnsselin (Géographie des Anciens, vol. i. pp. 125-135) came to the conclusion that the ancients possessed no knowledge of NW. Africa to the S. of the river Nun. Walckenaer (Récherches Géographiques sur IInterieur de l'Afrique Septentrionale, Paris. 1821) also, who has carefully discussed this point, sums up the result of his inquiries by asserting that none of Ptolemy's rivers can be the same as the Djolibic or any other stream of the Biledu-l-Suddan, as that region was quite unknown to antiquity, and was, in reality, discovered by the Arabs. Following in the same track, Mr. Cooley (Chrudius Ptolemy and the Nile, London, 1854) regards the Nigeir as a hypothetical river, representing collectively the waters of the Biledu-l-Jerid. On the other hand, Colonel Leake (Journ. Geog. Sicc. vol. ii. pp. 1-28), whose views are adopted in the present article, considers that Ptolemy's information on the Djulibá or Quorra, although extremely imperfect, was real. There seems, indeed, to be reison for believing that its discovery may be placed at a much earlier period, and that its banks were reached by the young Nasamones. [Nasamones.] Ptolemy's statements (l.c.) are annexed, from which it will be seen that the arguments in favour of the identity of his Nigeir with the Quorra are very strong. He believed that the earth was spherical; he divided the great circle into $360^{\circ}$; of these degrees he placed the same number in the breadth of N. Africa, that modern observations confirm; in the length of the same country he erred only one-tenth in excess. While in the interior, proceeding from a point of the W. coost, where his positions approsimate to modern geography, he placed a great river, flowing from W. to E., exactly in the latitude where the Quorra flows in that direction.*

In considering the exact meaning of this passage,

it should be remembered that the word lexposth, translated "divergent," simply indicates the point of junction of two streams, without any reference to the course of their waters. At present, our acquaintance with the Quorra is too limited to identify any of its divergents; and even were there data, by which to institute a comparison, the imperfection of Ptolemy's information will probably leave these particulars in obscurity. After having stated that the Geir and Nigeir are the two principal rivers of the interior, he describes the one, as yoking together
 Usargala; and the latter, as uniting in the same way Mt. Mandrus with Mt. Thala It is plain that he considers them to be rivers beginning and ending in the interior, without any connection with the sea. If two opposite branches of a river, rising in two very distant mountains, flow to a common receptacle, the whole may be described as joining the two mountains. Of the general direction of the current of the Nigeir there can be no doubt, as the latitudes and longitudes of the towns on its banks ( $\$ \S 24-$ 28) prove a general bearing of E. and W.; and from its not being named among the rivers of the $W$. coast (\$7), it must have been supposed to flow from W. to E. The lake Libye, to which there was an E. divergent, though its position falls 300 geog. miles to the NW. of Lake Tschad, may be presumed to represent this, the principal lake of the interior; it was natural that Ptolemy, like many of the moderns, should have been misinformed as to its position, and communication of the river with the lake. It is now, indeed, known that the river does not communicate with Lake Techad, and that it is not a river of the interior in Ptolemy's sense; that its sources are in a very different latitude from that which he has given; and its course varies considerably from the enormous extent of direction to the E., which results from his position of the towns on its banks. But recent investigations have shown that the difference of longitude between his source of the river and the W. coast is the same as that given by modern observations,-that Thamondacana ( Өauovסáxava, § 28), one of his towns on the Nigeir, coincides with Timbuktú, as laid down by M. Jomard from Caillie, - that the length of the course of the river is nearly equal to that of the Quorra, as far as the mountain of Kong, with the addition of the Shadda or Shary of Funda, - while Mt.Thala is very near that in which it may be supposed that the Shadda has its origin. In the imperfect state of our information upon the countries between Borní and Darfúr, it would be hazardous to identify the lakes Chelonides and Nuba. In comparing Ptolemy's description of the central country between the Nile and Nigeir, there are reasons for concluding that he had acquired an obscure knowledge of it, similar to that which had reached Europe before the discoveries of Denham, Clapperton, and Lander. The other great river, the Geir or Gir ( Cel p, § 13), is the same as the river called Misselad by Browne, and Om Teymain, in Arabic, by Burckhardt; while the indigenous name Djyr recalls that of Ptolemy, and which takes a general course from SE. to NW. Burckhardt adds, that this country produces ebony, which agrees with what is stated by Claudian (Idyll. in Nilum, 19), who, as an African, ought to be an authority, though, like an African, he confounds all the rivers of his country with the Nile; but, in another passage (I.Consul. Stilich. i. 252), he represents the Gir as a separate river, rivalling
the Nile in size．Claudian could not have intended by this river，the Ger of Pliny（v．1），at the foot of Mit．Atlas，and a desert of black ssnd and burnt rocks（Nun ？），at which Paullinus arrived in a few days＇journey from the maritime part of Mauretania； though it is probable that he may have intended， not the Geir of Ptolemy，but the Nigeir．The ter－ mination Ger was probably a generic word，applied to all rivers and waters in N．Africa，as well as the prefix Ni ；both were probably derived from the Semitic，and came through the Phoenicians to the Greeks．By a not unnatural error，the word became connected with the epithet＂Niger，＂and thus the name Nigritae or Nigretes was synonymous with Sudan（the Blacks）；the real etymology of the name tends to explain the common belief of the Africans， that all the waters of their country flow to the Nile．It is from this notion of the identity of all the waters of N．Africa that Pliny received the absurd account of the Nile and Niger，from the second Juba of Numidia．He reported that the Nile had its origin in a mountain of Lower Maure－ tania，not far from the Ocean，in a stagnant lake called Nilis；that it flowed from thence through sandy deserts，in which it was concealed for several days；that it reappeared in a great lake in Maure－ tania Caesariensis；that it was again hidden for twenty days in deserts；and that it rose again in the sources of the Nigris，which river，after having sepa－ rated Africa from Aethiopia，and then flowed through the middle of Aethiopia，at length became the branch of the Nile called Astapus．The same fable， though without the Nigeir being mentioned，is alluded to by Strabo（xvii p．826；comp．Vitrur． riii．2．§ 16）；while Mela（iii．9．§8）adds that the river at its source was also called Dara，so that the river which now bears the name El－Dhara would seem to be the stream which was the reputed commencement of the Nile．The Niger of Pliny was obviously a different river，both in its nature and po－ sition，from the Ger of the same author．It was situ－ ated to the $S$ ．of the great desert on the line separating Africa from Aethiopia；and its magnitude and pro－ ductions，such as the hippopotamus and crocodile， cannot be made to correspond to any of the small rivers of the Atlas．Neither do these swell at the same season as the Nile，being fed，not by tropical rain，falling in greatest quantity near the summer solstice，but by the waters of the maritime ridges， which are most abandant in winter．The Niger is not mentioned by the Geographer of Ravenna，nor the Arabs，until the work of Joannes Leo Africanus －a Spanish Moor－which was written at Rome，and pablished in Latin，A．D．1556．Though his work is most valuable，in being the only account extant of the foundation of the Negro empires of Suddin，yet he is in error upon this point，as though he had sailed on the river near Timbutitú；lie declares that the stream does not flow to the E．，as it is known to do，but to the W．to Genia or Jenné．This mistake led Europeans to look for its estuary in the Senegal， Gambia，and Rio Grande．The true course of the river，which has now been traced to its mouth，con－ firms the statements of the ancients as to the great river which they uniformly describe as flowing from W．to E．

## NIGRINIA＇NA．［Candidiana．］ <br> NIGRI＇TIS LACUS．［Nigritae．］ <br> NIGRUS．［Mogrus．］

NILI PALUUDES（ail tồ Neínov $\lambda i \not \mu v a i$, Ptol． iv．9．§ 3 ；Strab．xvii．p．786）were described by the ancient geographers as two immense lagoons， which received the first floods of the periodical rains that from May to September fall upon the Abys－ sinian highlands，and swell all the rivers flowing northward from that table－land．From these lagoons the Astapus（Bahr－el－Azrek，Blue Kiver）and the Bahr－eh－Abiad，or White Rirer，respectively derived their waters；and since they were the principal tributaries of the Nile，the lakes which fed them were termed the Nilotic Marshes．The ancients placed the Nili Paludes vaguely at the foot of the Lunae Montes；and the exploring party，sent by the emperor Nero，described them to Seneca the philo－ sopher as of boundless extent，covered with floating weeds，and containing black and slimy water，im－ passable either by boats or by wading．There is， however，some probability that this exploring party saw only the series of lagoons produced by the level and sluggish stream of the White River，since the descriptiuns of modern travellers in that region ac－ cord closely with Seneca＇s narrative（Nat．Quaest． vi．8）．The White River itself，indeed，resembles an immense lagoon．It is often from five to seven miles in width，and its banks are so low as to be covered at times with slime to a distance of two or three miles from the real channel．This river，as less remote than the Ahyssinian highlands from the ordinary road between Syene and the S．of Meroe （Sennaar），is more likely to have fallen under the notice of Nero＇s explorers ；and the extent of slimy water overspread with aquatic plants，corresponds
with Seneca's description of the Nili Paludes as " immensas quaram exitus nec incolae noverant nec sperare quisquam potest." [Nilus.] [W. B. D.]

NILU'POLIS (Neiлоúzo入ıs, Ptol. v. 5. § 57 ; Steph. B. s.v. : Nedotoditns), was a city of Middle Aegypt, built upon an island of the Nile, in the Heracleopolite nome, and about eight miles NE. of Heracleopolis Magna. Nilupolis is sometimes called simply Nilus, and appears to be the town mentioned under the latter name by Hecataeus (Fragment. 277). It was existing as late as the 5 th century A. D., since it is mentioned in the Acts of the Conncil of Ephesus, A. D. 430.
[W. B. D.]
NILUS ( $\delta$ N $\in$ inos), the river Nile in Egypt. Of all the more important rivers of the globe known to the Greek and Roman writers, the Nile was that which from the remotest periods arrested their liveliest curiosity and attention. It ranked with them as next in magnitude to the Ganges and the Indus, and as sarpassing the Danube in the length of its course and the volume of its waters. (Strab. xv. p. 702.) Its physical phenomena and the peculiar civilisation of the races inhabiting its banks attracted alike the historian, the mathematician, the satirist, and the romance-writer: Herodotus and Diodorus, Eratosthenes and Strabo, Lacian and Heliodorus, expatiate on its marvels; and as Aegypt was the resort of the scientific men of Greece in general, the Nile was more accurately surveyed and described than any other river of the earth.

The word Nilus, if it were not indigenous, was of Semitic origin, and probably transmitted to the Greeks by the Phoenicians. Its epithets in various languages-e. g. the Hebrew Sihhor (Isaiah, xxiii. 3; Jerem. ii. 18), the Aegyptian Chemi, and the Greek $\mu$ é̀as (Servius, ad Virgil. Georg. iv. 291)point to the same peculiarity of its waters, the hue imparted by their dark slime. The Hebrews entitled the Nile Nahal-Misraim, or river of Aegypt; but the natives called it simply p-iero (whence probably the Nubian kier) or the river (i. e. of rivers). Lydus (de Mensibus, c. 8) says that it was sometimes termed llas or dark; and Pliny (v. 9. s. 9 ; comp. Dionys. Perieg. v. 213) observes, somewhat vaguely, that in Aethiopia the river was called Siris, and did not acquire the appellation of Nilus before it reached Syene. With few exceptions, however, the Greeks recognised the name of Nilus as far south as Meroe; and above that mesopotamian region they merely doubted to which of its tributaries they should assign the principal name. Homer, indeed ( $O d$, iii. 300, iv. 477, \&cc.), calls the river Aegyptus, from the appellation of the land which it intersects. But Hesiod (Theog. 338) and Hecataeus (Fragm. 279280), and succeeding poets and historians uniformly designate the river of Aegypt as the Nile.

It is unnecessary to dwell on a theory at one time received, but generally discredited by the ablest of the ancient geographers-that the Nile rose in Lower Mauretania, not far from the Western Ocean (Juba, ap. Plin. v. 9. 8. 10; Dion Cass. lxxv. 13; Solin. c. 35); that it flowed in an easterly direction; was engulphed by the sands of the Sähăra; reappeared as the Nigir; again suuk in the earth, and came to light once more near the Great Lake of Debaya as the proper Nile.

Historically, the Nile derives its principal importance from the civilisation, to which it contributed so materially, of the races inhabiting its shores, from the S . of Merve northwards to the Mediterranean. But for geographical purposes it is necessary to ex-
amine its course, in the first instance, through less known regions, and to ascertain, if possible, which of its feeders above Meroc was regarded by the ancients as the true Nile. The course of the stream may be divided into three heads:-(1) the river S. of Meroe; (2) between Meroe and Syene; and (3) between Syene, or Philae, and the Mediterranean.
(1.) The Nile above Meroe.-The ancients briefly described the Nile as springing from manhes (Nili Paludes) at the foot of the Mountains of the Moon. But as all the rivers which flow northward from the Abyssinian highlands rise from lagoons, and generally expand themselves into broad marshes, this description is too vague. Neither is it clear whether they regarded the White River, or the Blue, or the Astaboras (Tacazze), as the channel of the true Nile. The names of rivers are often given capriciously: it by no means follows that they are imposed apon the principal arm or tributary; and hence we can assign neither to the Astapus nor to the White River, usually considered as the main stream, the distinction of being absolutely the "true Nile."

The Nile, as Strabo sagaciously remarks (xi. p. 493), was well known because it was the channel of active commerce; and his observation, if applied to its southern portions, may lead us to the channel which was really regarded as the principal river even in remotest ages. The stream most frequented and accessible to navigation, and whose banks were the most thickly peopled, was doubtless the one which earliest attracted attention, and this we believe to have been the Astapus (Bahr-al-Azrek, or Blue River).

As the sources both of the Blue River and of the Bahr-el-Abiad or the White River are uncertain, it will be proper to examine these streams above their point of junction near the modern military station at Khartúm, lat. $15^{\circ} 37^{\prime}$ N., long. $33^{\circ}$ E. The Astaboras (Tacazzi) may for the present be dismissed, both as an inferior tributary, and as below the meeting of the two main streams.

The White River, which has been often designated as "the true Nile," has at no period been either a road for traffic nor favourable to the settlement of man on its banks. It is rather an immense lagoon than a river, is often from 5 to 7 miles in breadth, and its sides are in general so low as to be covered at times with alluvial depasit to a distance of from 2 to 3 miles beyond the stream. On its shores there is neither any town, nor any tradition of there having ever been one; nor indeed, for many leagues up the stream, do there occur any spots suited either to the habitation of men, to pasture, or to tillage. On the contrary, it is represented by travellers much in the same terms in which Seneca (Natur. Quaest. vi. 8) speaks of the Nili Paludes, as seen by Nero's surveyors. The latter are described by the Roman philosopher as "immensas paludes, quarum exitus nec incolse noverant, nec sperare quisquam potest, ita implicitae aquis herbae sunt," \&c.: the former by recent explorers as "an interminable sea of grass," "a fetid stagnant marsh," \&cc. As the White River indeed approaches the higher table-land of the S., its banks become less depressed, and are inhabited; but the weedy lagoons extend nearly 100 miles SW. of Khartüm.

But if we trace upwards the channel of the Blue River, a totally different spectucle presents itself.

## NILUS.

NILUS.

The river nearly resembles in its natural features and the cultivation of its banks the acknowledged Nile below the junction lower down. The current is swift and regular: the banks are firm and well defined : populous villages stand in the midst of clumps of date-trees or fields of millet (dhowrra), and both the land and the water attest the activity of haman enterprise.

A difference corresponding to these fentures is observable also in the respective currents of these rivers. The White River moves sluggishly along, without rapids or cataracts: the Blue River runs strongly at all seasons, and after the periodical rains with the force and speed of a torrent. The diversity is seen also on the arrival of their waters at the point of junction. Although the White River is fed by early rains near the equator, its floods ordinarily reach Khartum three weeks later than those of the Blue River. And at their place of meeting the superior strength of the latter is apparent. For while the stronger flood discharges itself through a broad channel, free from bars and shoals, the White River is contracted at its mouth, and the inore rapid current of its rival has thrown up a line of sand across its influx. Actual measurement, too, has proved the breadth of the Blue kiver at the point of junction to be 768 yards, while that of the White is only 483, and the body of water poured down by the former is double of that discharged by the latter. From all these circumstances it is probable that to the Bahr-el-Azrek rather than to the Bahrel-Abiad belongs the name of the " true Nile;" and this supposition accords with an ancient tradition among the people of Sennaar who hold the Blue River in peculiar veneration as the "Father of the Waters that run into the Great Sea."

The knowledge possessed by the ancients of the opper portions and tributaries of the Nile was not altugether in a direct proportion to the date of their intercourse with those regions. Indeed, the earlier track of commerce was more farourable to acquaintance with the interior than were its later chamels. The overlard route declined after the Ptolemies transferred the trade from the rivers and the roads across the desert to Axume, Adulis, Berenice, and the ports of the Red Sea. Eratosthenes and other geographers, who wrote while Aethiopia still flourished, had thus better means of information than their successors in Roman times, Strabo, Ptolemy, \&c. Diodorus (i. 30), for example, says that a voyage up the Nile to Meroe was a costly and hazardous undertaking ; and Nero's explorers (Plin. v. 9. s. 10; Senec. N. Q. vi. 8) seem to bare found in that once populous and fertile kingdom only solitude and decay. At the close of the third century A. D. the Romans abandoned every station on the Nile above Philae, as not worth the cost and care of defence, - a proof that the river-trafic, beyond Aegypt, must have dwindled away. As the trade with Arabia and Taprobane (Ceylon) by sea developed itself, that with Libya would become of less inportance; and in proportion as the Red Sea was better known, the branches and sources of the Nile were obscured.
(2.) The Nile below the point of junction.-The two streams flow in a common bed for several miles N. of Khartium, without, however, blending their waters. The Bahr-Abiad retains its white soapy hue, both in the dry season aud during the inundations, while the Bahr-Azrek is distngyuished by its dark colour. For 12 or 15 miles below the point of junction the Nile traverses a narrow and gloomy
defile, until it emerges among the inmense plains of herbage in the mesopotamian district of Meroe. Beyond Meroe, already described [Meroe], the Nile receives its last considerable affluent, the Astaboras or Tacazze; the only other accessions to its stream in its course northward being the torrents or wadys that, in the rainy season, descend from the Arabian hills. From the N. of Meroe to Syene, a distance of about 700 miles, the river enters upon the region of Cataracts, concerning which the ancients invented or credited so many warvels. (Cic. Somn. Scip. 5; Senec. N. Q iv. 2.)

These rapids are seven in number, and are simply dams or weirs of granite or porphyry rising through the sandstone, and, being little affected by the attrition of the water, resist its action, divide its stream, and render its fall per mile double of the average fall below Philae. So far, however, from the river descending lofty precipices with a deafening noise, even the steepest of the rapids may be shot, though not without some danger, at bigh water; and at the great Cataract the entire descent in a spuce of 5 miles is only 80 feet. [Philar.] Increased by the stream of the Astaboras, the Nile, from lat. $17^{\circ} 45^{\prime}$ N., flows in a northerly direction for 120 miles, through the land of the Berbers. Then comes its great SW. elbow or bend, commencing at the rocky island of Mogreb (lat. $19^{\circ} \mathrm{N}$. ), and continuing nearly to the most northern point of Meroe. During this lateral deflection the Nile is bounded W. by the desert of Bahiouda, the region of the ancient Nubae, and E. by the Arabian Desert, inhabited, or rather traversed, by the nomade Blemmyes and Megabari. [Macrobir.] Throughout this portion of its course the navigation of the river is greatly impeded by rapids, so that the caravans leave its banks, and regain them by a road crossing the eastern desert at Derr or Syene, between the first and second Cataracts. No monuments connect this region with either Meroe or Aeg.gpt. It must always, indeed, have been thinly peopled, since the only cultivable soil consists of strips or patches of land extending about 2 miles at furthest beyond either bank of the Nile.

While skirting or intersecting the kingdom of Meroe, the river flowed by city and necropolis, which, according to some writers, inparted their forms and civilisation to Aegypt, according to others derived both art and polity from it. The desert of Bahiouda severs the chain of monuments, which, however, is resumed below the fourth Cataract at Nouri, Gebel-el-Birkel, and Merawn. (Lat. $20^{\circ} \mathrm{N}$.) Of thirty-five pyramids at Nouri, on the left bank of the river, about half are in good preservation; but the purpose which they served is uncertain, since no ruins of any cities point to them as a necropolis, and they are without sculptures or hieroglyphics. On the western side of Gebel-el-Birkel, about 8 miles lower down, and on the right bank, are found not only pyramids, but also the remains of several temples and the vestiges of a city, probably Napata, the capital of Candace, the Aethiopian queen. [Napata.] (Cailliaud, l' Isle de Meroe, vol. iii. p. 197; Howkins, Travels, p. 136-141.) About the 18th degree of $N$. latitude the Nile resumes its northerly direction, which it observes generally until it approaches the second Cataract. In resuming its direct course to N., it enters the kingdom of Dongola, and most of the features which marked its channel through tine
desert now disappear. The rocky banks sink down; the inundation fertilises the borders to a considerable distance ; and for patches of arable soil fine pastures abound, whence both Arabia and Aegypt imported a hreed of excellent horses. (Russegrer, Karte von Nubien.) But after quitting Napata (?) no remains of antiquity are found before we arrive at the Gagaudes Insula of Pliny (vi. 29. s. 35), lat. $19^{\circ} 35^{\prime}$, the modern Argo, a little above the third Cataract. The quarries of this island, which is about 12 miles in length, and causes a considerable eddy in the river, were worked both by Aethiopians and Aegyptians. A little to $N$. of this island, and below the third Cataract, the Nile makes a considerable bend to the E., passing on its right bank the ruins of Seghi, or Sesche. On its left bank are found the remains of the temple of Soleb, equally remarkable for the beauty of its architecture, and fur its picturesque site upon the verge of the rich land, "the river's gift," and an illimitable plain of sand stretching to the horizon. (Cailliaud, $l$ Isle de Meroe, vol. i. p. 375 ; Hoskins, Travels, p. 245.) The Nile is once again divided by an island called Sais, and a little lower down is contracted by a wall of granite on either side, so that it is hardly a stone'sthrow across. At this point, and for a space of several miles, navigation is practicable only at the season of the highest floods.

Below Sais are found the ruins of the small temple of Amara, and at Semzeh those of two temples which, from their opposite eminences on the right and left banks of the river, probably served as fortresses also at this narrow pass of the Nile. That a city of great strength once existed here is the more probable, because at or near Semneh was the frontier between Aethiopia and Aegypt. We have now arrived at the termination of the porphyry and granite rocks: henceforward, from about lat. $21^{\circ}$ N., the river-lanks are composed of sandstone, and acquire \& less rugged aspect. The next remarkable feature is the Cataract of Warli-Halfa, the Great Cataract of the ancient geographers. (Strab. xvii. p. 786.)

In remote ante-historic periods a bar of primitive rock, piercing the sandstone, probably spanned the Nile at this point (lat. $22^{\circ}$ N.) from shore to shore. But the original barrier has been broken by some natural agency, and a series of islands now divides the stream which rushes and chafes between them. It is indeed less a single fall or shoot of water than a succession of rapids, and may be ascended, as Belzoni did, during the inundation. (Travels in Nubia, p. 85.) The roar of the waters may be heard at the distance of half a league, and the depth of the fall is greater than that of the first Cataract at Syene. On the left bank of the river a city once stoud in the immediate neighbourhood of the rapids ; and three temples, exhibiting on their walls the names of Sesortasen, Thothmes III., and Amenophis II., have been partially surveyed here. Indeed, with the second $\mathrm{Ca}_{\mathrm{a}}$ taract, we may be said to enter the propyiaea of Aegypt itself. For thenceforward to Syene - a distance of 220 miles - either bank of the Nile presents a succession of temples, either excavated in the sandstone or separate structures, of various eras and styles of architecture. Of these the most remarkable sud the most thoroughly explored is that of Aboosimbel or Ipsambul, the ancient Ibsciah, on the left bank, and two days' journey below the Cataract. This temple was first cleared of the in-
cumbent sand by Belzoni (Researches, vol. i. p. 316), and afterwards more completely explored, and identified with the reign of Rameses III., by Champollion and Rosellini. Primis (Ibrim) is one day's journey down the stream; and below it the sandstone hills compress the river for about 2 miles within a mural escarpinent, so that the current seems to force itself rather than to flow through this barrier.
(3.) The Nile below Syene. - At Syene (As. souan), $24^{\circ} 5^{\prime} 23^{\prime \prime}$ N. lat., the Nile enters Aegypt Proper; and from this point, with occasional curvatures to the E. or NW., preserves generally a due northerly direction as far as its bifurcation at the apex of the Delta. Its bed presents but a slight declivity, the fall being only from 500 to 600 feet from Syene to the Mediterranean. The width of the valley, however, through which it flows varies considerably, and the geological character of its banks undergoes several changes. At a short distance below Syene begins a range of sandstone rocks, which pass into limestone below Latopolis, lat. $25^{\circ} 30^{\prime} \mathrm{N}$. ; and this formation continues without any resumption of the sandstone, until both the Libyan and the Arabian hills diverge finally at Cercasorum. The river thus flows beneath the principal quarries out of which the great structures of the Nile valley were built, and was the high-road by which the blocks were conveyed to Thebes and Apollinopolis, to Sais and Bubastis, to the Great Labyrinth in the Arsinoite nome, to the Pyramids and Memphis, and, finally, to the Greck and Roman architects of Alexandreia and Antinoopolis. Again, from Syene to Latopolis, the shores of the river are sterile and dreary, since the inundution is checked by the rock-walls $E$. and W. of the stream. But at Apollinopolis Magna, lat. $25^{\circ}$, and at Latopolis, $25^{\circ} 30^{\prime}$, the rocks leave a broader verge for the fertilising deposit, and the Nile flows through richly cultivated tracts. At Thebes, for the first time, the banks expand into a broad plain, which is again closed in at the N . end by the hills at Gourmah. Here the river is divided by small islands, and is a mile and a quarter in breadth. It has hitherto followed a northerly direction ; but at Coptos, where a road connected the streain with the ports of the Red Sea [Berenice], it bends to the NW., and follows this inclination for some distance. At Panopolis, however, it resumes its general N. bearing, and rotains it to the fork of the Delta.

Near Diospolis Parva (How), on the left bank, and opposite Chenoboscium, on the right, begins the canal, or, perhaps, an ancient branch of the Nile, called the Canal of Joseph (Bahr-Jusuf). This lateral stream flows in a direction nearly parallel to the main one, through the Arsinoite nome (ElFyoum). From this point the Nile itself presents no remarkable feature until it reaches Speos-Artemidns, cr the grottos of Benihassan, where the eastern hills, appruaching close to the river, limit its inundation, and consequently also the cultivable land. In lat. $29^{\circ} \mathrm{N}$. the Libyan hills, for a space, recede, and curving at first $N \dot{W}$., but soon resuining a SF. direction, embrace the Arsinoite nome. Losily, a little below Memphis, and after passing the hills of Gebel-el-Mokattam, both the eastern and western chains of rocks finally diverge, and the river expands upon the great alluvial plain of the Delta.

At Cercasorum, where the bifurcation of the river begins, or, perhaps, at a remoter period, still nearer Memphis, the Nile probably met the Mediterranean, or at least an estuary, which its annual deposits of

## NII.US.

433
slime have, in the conrse of ages, converted into L.wer Aegypt. In all historical periods, however, the river has discharged itself into the sea by two main arms, forming the sides of an isosceles triangle, the boundaries of the Delta proper, and by a number of branches, some of which ran down to the sea, while others discharged their waters into the principal arms of the main stream. The Delta is, indeed, a net-work of rivers, primary and secondary; and is further intersected by numerous canals. The primary channels were usually accounted by the ancients seven in number (Herod. ii. 17; Scylax, p. 43 ; Strab. xvii. p. 801, seq.; Diodor. i. 33; Ptol. iv. 5. § 10; Plin. v. 10. 8. 11 ; Mela, i. 9. § 9 : Ammianas, xxii. 15, 16; Wilkinson, M. q̛ C., B/od. Eyypt and Thebes. \&c.), and may be taken in the order following. They are denominated from some principal city seated on their banks, and are enumerated from E. to W.

1. Beginning from the E . was the Pelusian arm (тो Пє入ovataudy $\sigma \tau \delta \mu a$, Strab. xvii. p. 801 ; Ostium Pelusiacum, Plin. v. 9. s. 9). This has now become dry; and even when Strabo wrote a hittle before the first century A. D., Pelusium, which strod on its banks, and from which it derived its name, was nearly $2 \frac{1}{2}$ miles from the sea (xvii. p. 806). The remains of the city are now more than four times that distance. Upon the banks of the Pelusian arm stood, on the eastern side, and near the apex of the Delta, Heliopolis, the On of Scripture; and 20 miles lower down, Bubastus (Tel Liasta).
2. The Tanitic arm ( $\tau \delta$ Tayıтıк $\boldsymbol{\sigma} \boldsymbol{\sigma} \delta \delta \mu \alpha$, or $\tau \delta$ Zartıкלу, Herod. ii. 17; comp. Strab. svii. p. 802; Mela, i. 9. § 9. Catapystum). The present canal of Moucys probably coincides nearly with the Tanitic branch; which, however, together with the Ostium Bucolicum, has been absorbed in the lower portion of its conrse by the lake Mencaleh. It derived its name frmm Tanis, the Zoan of Scripture, the modern Sun, in lat. $31^{\circ}$, one of the oldest cities of the Delta.
 Strab., \&c.) was a channel running from the Sebennytic Nile-arm. It is now lost in the lake Menzaleh.
3. The Phatnitic or Pathmetic arm ( $\tau \delta$ Фatصıтıкду ато́ла, Strab. ; фаттuкду, Diod. i. 33 ; Пa0رптгкдv, Ptol. iv. 5. §§ 10, 40 ; Pathmeticum, Mela, i. 9. § 9.) This was the Boukodıкठу $\sigma \tau o ́ \mu \alpha$ of Herodotus (ii. 17); but it seems doubtful whether it were an original channel, and not rather a canal. It corresponds with the lower portion of the present Damietta branch of the Nile.
4. The Sebennytic arm ( $\tau \delta$ Zebelvutıкду $\sigma \tau \delta \mu a$ ) derived its name from the city of Sebennytus, the present Semenhoud. As far as this city the Damietta branch represents the ancient Sebennytic; but Dorthward of this point, lat. $31^{\circ}$, the earlier channel is lost in the marsbes or sands, which separate the present Delta from the Mediterranean; and its mouth, which was nearly due N. of Memphis, is now covered by the lake of Bourlos. The Sebennytic arm, continuing in the direction of the Nile before its division, i. e. running nearly in a straight course from N., has some claims to be regarded not so much as one of the diverging branches as the main stream itself. This channel, together with the most easterly, the Pelusian, and the most westerly, the Canopic, were the three main arms of the Nile, and carried down to the sea by far the greater rolumes of water.
vole 11.

 Herod. ii. 17; Diodor. i. 33: Boncitivov, Ptol. iv. 5. §§ 10, 43; Bolbiticum, Mela, i. 9. § 9; Ammian. xxii. 15), was, like the Phatnitic, originally an artificial canal, and seems in the time of Herodotus to have been a branch connecting the Sebennytic with the Canopic channels (ii. 17), having, however, an outlet of its own, probally as a backwater during the inundation, to the Mediterranean. The Bolbitic arm is now represented by 80 much of the Rosetta branch of the Nile as runs between the sea and the ancient course of the Ostium Canopicam.
5. The Canopic arm ( $\tau \delta$ Kavwbıк $\delta \nu \tau \delta \mu a$, Strab. l. c.; comp. Aristot. Meteorol. i. 14; Ostium Canopicum, Mela, i. 9. § 9; Plin. v. 10. s. 11) was also termed the Naucratic arm of the Nile, Ostium Naucraticum (Plin. L.c.), from the city of Naucratis, which was seated on its left bank. This was the most westerly, and one of the three great branches of the Nile (see Pelusian, Scbennytic). In the first portion of its descent from the point of the Delta the Canopic arm skirted the Libyan desert. At the city of Terenuthis (Teranich), a road, about 38 miles in length, through the calcareous ridge of hills, connected it with the Natron Lakes. On its right bank, below this point, stood the ancient city of Sais, and a few miles lower down, Naucratis. From its vicinity, at first, to this city, the Canton of Aegypt, and afterwards, by means of the canal which connected it with the lake Mareotis on the one hand, and Alexandreia on the other, the Canopic branch retained its importance; and its embankments were the care of the government of Aegypt long after its rival branches, the Sebennytic and Pelusian, were deserted or had been suffered to flow uselessly into the marshes. It is now represented in the upper portion of its channel by the Rosetta branch of the Nile. But they diverge from each other at lat. $31^{\circ}$, where the elder arm turned off to the W., and discharged itself into the Mediterranean near the present bay and foreland of Aboukir. Its mouth is now covered by a shallow lagoon, intersected by strips of sand and alluvial deposit, called the lake of Madieh. The Canopic arm of the Nile, although not actually the western boundary of Aegypt, was, at least, in the Pharaonic era, the limit of its commerce on the NW. base of the Delta, since beyond it, until the bailding of Alexandreia, there was no town of any importance.

The canals which were derived from the Nile for the convenience of local intercourse and irrigation, were very numerous; and the prosperity of Aegypt, especially on the Arabian side of the river, depended in great measure apon their being kept in gond repair, and conveying to the arid waste a sufficient supply of water. Hence the condition of the canals was almost synonymous with the good or bad administration of Aegypt; and we find that among the first cares of Augustus, after adding this kingdom to his provinces, in b. c. 24, was to repair and rehabilitate the canals, which had fallen into decay under the misrule of the later Ptolemies. (Suet. Aug. 18; Dinn. li. 68; Aurel. Vict. Epit. i. 5.) For national commerce, however, there were only two of these artificial channels upon a large scale between Syene and the sea. (1.) The canal called, in different ages, the river of Ptolemy (Птодєцаios потацús, Diodor. i. 33; Plin. v. 29. s. 23), and the river of Tra-
 been commenced by Pharaoh Necho II. (B. c.480), was

## NILLS.

continued by Dareius Hystaspis (b. c. 520-527), but nly completed by Ptolemy Philadelphus (в. c. 274). It began in the Pelusiac branch of the Nile, a little above the city of Bubastus (Tel-Basta), and passing by the city of Thoum or Patumus, was carried by the Persians as far as the Bitter Lakes, NE. of the Delta. Here, however, it was suspended by the troubles of both Aegypt and Persia, under the successors of Dareius, and was, in a great measure, choked up with sand. (Herod. ii. 158.) At length Philadelphus, after cleansing and repairing the channel, carried it onward to Arsinoe, at the head of the Sinus Heroopolites. (Plin. vi. 29. s. 33.) The Ptolemaic canal, however, suffered the fate of its predecessor, and even before the reign of Cleopatra had become useless for navigation. The connection by water between Arsinue and the Nile was renewed by Trajan, A. D. 106: but his engineers altered the direction of the cutting. They brought the stream from a higher part of the river, in order that the current might run into, instead of from, the Red Sea, and that the intervening sands tracts might be irrigated by fresh instead of partially salt water. The canal of Trajan accordingly hegan at Bubylon, on the eastern bank of the Nile, opposite Memphis, and, passing by Heliopolis, Scenae Veteranorum, Hemopolis, and Serapion, entered the Red Sea about 20 miles S. of Arsinoe, at a town called Klysmon, from the locks in its neighbourbood. The work of Trajan was either more carefully preserved than that of the Macelonian and Persian kings of Aegypt had been, or, if like them, it fell into decay, it was repaired and reopened by the Mahommedan conquerors of the country. For, seven centuries after Trajan's decuase, we read of Christian pilgrims sailing along his canal on their route from England to Palestine. (Dicueil, de Mensur. Orbis, vi. ed Letronne.)
 xvii. p. 800: Steph. B. s. v.) connected the city of Canopus with Alexandreia and the lake Mareotis. Its banks were covered with the country houses and gardens of the wealthy Alexandrians, and formed a kind of water suburb to both the Aegyptian and Macedonian cities. [Canopus.]

## Physical Character of the Nile.

The civilisation of all countries is directly influenced by their rivers, and in none more so than in Aegypt, which has been truly called the gift of the Nile. (Herod. ii. 5 ; Strab. xi. p. 493.) To its stream the land owed not only its peculiar cultivation, bat its existence also. Without it the Libyan waste would have extended to the shores of the Red Sea. The limestone which lies under the soil of Aegypt, the sands which bound it to E. and W., were rendered by the deposits of the river fit for the habitation of man. The Delta, indeed. was absolutely created by the Nile. Its periodical floods at first narrowed a bay of the Mediterranean into an estuary, and next filled up the estuary with a plain of teeming alluvial soil. The religion, and many of the peculiar institations of Aegypt, are derived from its river; and its physical characteristics have, in all ages, attracted the attention of historians and gengraphers.

Its characteristics may be considered under the heads of (1) its deposits; (2) the quality of its waters; and (3) its periodical inundations.
(1.) Its deposits.-Borings made in the Delta to the depth of 45 feet, have shown that the soil consists of vegetable matter and an earthy depusit, such
as the Nile now brings down. The ingredients of this deposit are clay, lime, and siliceous sand; but their proportion is affected by the soil over which the river flows. Calcareons and argillaceons matter abound in the neighbourhood of Cairo and the Delta; silex preponderates in the granitic and sandstone districts of Upper Aegypt. The amount of this deposit corresponds generally to the slope of the banks and the distance from the river. In Lower Nubia and Upper Aegypt alluvial cliffs are formed to the height of 40 feet; in Middle Aegypt they sink to 30; at the point of the Delta to about eighteen. The earthy matter is deposited in a convex form; the larger quantity lying close to the stream, the smaller at the verge of the inundation. As a consequence of this fall from the banks towards the desert, the limit to which the inundation reaches is slowlyexextending itself; but as the Nile raises its own bed as well as its banks, their relative proportion is preserved. The deposit of the Nile is found to consist of (1) clay, constituting 48 in 100 parts; (2) carbon, 9 parts; (3) carbonate of lime 18 parts, and 4 parts of carbonate of magnesia, besides portions of silicia and oxide of iron. These form a compost so rich, that the land on which they are perennially deposited requires no other manure, and produces without further renoration successive harvests of corn. (Athen. ii. 41, 42; Plin. xviii. 19. 8. 21.)
(2.) The quality of its waters. - The water itself is not less important to Aegypt than the ingredients which it precipitates or holds in solution. Except some short streams in the Arabian hills, torrents at one season and dry at another, the Nile is the only river in Aegypt. Natural springs do not exist in the upper country; and the wells of the Delta afford only a turbid and brackish fluid. The river is accordingly the single resource of the inhabitants: and the frequent ablutions enjoined by their religion rendered a copious supply of water more than ordinarily important to them. Between its highest and lowest periods, the water of the Nile is clear. When lowest, it is feculent (Athen. ii. 42); and at the beginning of the inundation is covered with a greenish vegetable matter, that is said to cause eruptive disease. But even when most turbid, it is not unwholesome, and is always capable of filtration. The water in its medium state was pure and delicious to the taste. The Persian kings, after the conquest of Aegypt. imported it for their own drinking to Susa and Ecbatana (Athen. ii. 54, 67); and the emperor Pescennius Niger replied to his soldiers' demand for wine, "Have you not the water of the Nile." (Spartian. ap. August. Hist. Script. l'escenn. Niger. c. 7.) These changes in the hue and quality of the water were ascribed to the overflowing of the Nubian lakes, or to the passage of the streain over various strata. But until the channels of the White and Blue Rivers have been explored to their sources, we must be content to remain ignorant of the real causes of these phenomena
(3.) Its periodical inundations. - The causes of the inundation early attracted the curiosity of ancient observers; and various theories were devised to account for them. It was believed to arise from the melting of the snow on the Abysinian mnuntains (Schol. in Apoll. Rhod. iv. 269: Eurip. Helen. init.) ; and Herodotus rejects this suppasition, because, as he conceived, although erroneously, that snow was nnknown in Aethiopia (ii. 22). It was ascribed to the Etesian winds, which, blowing from the N. in summer, force back the waters

## NIIUS.

NILUS.
from the mouth of the river upon the plain of the Delta (Diodor. i. 38-40.) This, however, though partially true, will not account for the inundation of Upper Aegypt, or for the periodical rising of the rivers $N$. of Aethiopia. It was attributed to the connection of the Nile with the great Southern Ocean, whose waters, from long exposure to the sun, were deprived, it was thought, of their saline ingredients in their conrse through the Nile-valley. (Diodor. i. 40.) By Ephorus (ed. Marx, p. 23) it was derived from exudation through the sands; while Herudotas suggested that the vertical position of the sun in winter reduced the waters of Southern Libya to the lowest ebb. But this hypothesis kept out of sight their overfow in summer. Agatharchides of Cnidus, who wrote in the second century b. c., was the first to divine the true cause of the inundation. The rains which fall in May upon Aethiopia occasion the rise of the rivers that flow northward frum it. As the sun in his progress from the equator to the tropic of Cancer becomes successively vertical over points N. of the equator, the air is heated and rarified, and the cold currents set in from the Mediterranean to restore the equilibrium. They pass over the heated plains of Aegypt; but as soon as they reach the lofty mosutains of Abyssinia, they descend in torrents of rain. Sheets of water fall impetuously from their northern slope upon the grand tablean, from the grand tablean upon the plains which contain the sources of the White and Blue Rivers, and through their channels and confluents pass into the Nile. In the last days of June, or at the beginning of July, the rise is visible in Aegypt: abnut the middle of August the dykes are cut, and the flood drawn off E. and W. by innumerable canals ; and between the 20th and 30th of September the maximum height is attained. For a fortnight the flood remains stationary : about the 10th of November, it has perceptibly diminished, and continues to decrease slowly nntil it attains its minimum; at this time its depth at Cairo is not more than 6 feet, and in the Delta its waters are nearly stagnant. In the time of Herodotus (ii. 13) the height of a good Nile was 15 or 16 cubits; and around the statue of the Nile, which Vespasian brought from Aegypt and set up in the Temple of Peace, were gronped sixteen diminative figures emblematic of these measures. (Plin. xxxvi. 9. s. 14.) The rise of the Nile was carefully noted on the Nilometers at Primis (Ibrim), Elephantine, and Memphis; and the progress or decline of the inundation was reported by letters to different parts of Aegypt, in order that the farmers might calculate on the time when sowing might commence. A flood of the height of 30 feet is rainous,-undermining houses, sweeping away cattle, and destroying the produce of the fields. The land, also, is rendered too spongy for the ensuing seed-time; the labours of tillage are delayed; and epidemic diseases arise from the lingering and stagnant waters. On the other hand, if the waters do not rise 24 feet, the harvest is scanty; and if they are below 18, terrible famines are the consequence, such as that of which Diodorus speaks (i. 84), and which are not unknown in more recent times (Volney, Voyage en Syrie et en Egypte, vol. i. ch. 11; Abdallatiph's Hist. of Egypt, p. 197, White's edit.), during which the starving popalation have been driven to feed on human flesh.

Upper and Diddle Egypt during the inundation present the appearance of a rast inland lake, bounded by mountains. But the usual means of intercourse are not interrupted, since the immediate banks of the
river are seldom uxder water, which is discharged through the frequent apertures of the dykes, at first upon the verge of the desert, and afterwards upon the land nearer the flood. The Delta, however, being devoid of hills, is,during an extraordinary rise, laid entirely under water, and the only means of communication between the towns and villages are boats and rafts Herodotus (ii. 97) compares the appearance of Lower Aegypt at this season to the Aegean sea, studded by the Sporades and Cyclades.

As the direct highway between the Mediterranean and Meroe, the Nile, in all periods, at least during the prosperous ages of Aegypt, presented a busy and animated spectacle. The Aegyptians, who shunned the sea as the element of the destroying Typhon, regarded their river with affection and reverence, as the gift and emblem of the creating and preserving Osiris. Its broad and capacious bosom was in all seasons of the year studded with river-craft, from the raft of reeds to the stately Baris or Nile barges. Up the Nile to the markets of Diospolis passed the grain and fruits of the Delta; and down the stream came the quarried limestone of the Thebaid to the quays of Sais and Canopus. No bridge spanned the river during its course of 1500 miles; and the ferrying over from bank to bank was an incessant cause of life and movement. The fishers and fowlers of the Nile diversified the scene. Respecting the qualities of the fish there is considerable discrepancy among ancient writers - some describing it as coarse or insipid, others as highly nutritive and delicate in its flavour. (Athen. vii. p. 312.) Fifty-two species of fish are said to be found in the Nile. (Russegger, Reisen, vol. i. p. 300.) Of these the genus Silurus was the most abundant. Fish diet is well suited to the langnid appetites of a hot climate; and the Israelites, when wandering in the desert, regretted the fish as weil as the vegetables of Aegypt. (Numbers, xi. 5.) They were canght in greatest abundance in the pools and lakes during the season of inundation. In the marshy districts of the Delta, where grain, owing to the spongy and bibulvus character of the soil, could not be raised, the inhabitants lived principally upon fish dried in the sun ; and, in later times at least, they were salted, and exported in great quantities to the markets of Greece and Syria. The modes of catching them are represented in the paintings, and were the line, the net, and the prong. (See Abdallatiph, ap. Rosellini, M. C. vol. i. p. 230.) The great extent of marsh land in Aegypt, and the long continuance of the inundation, caused it beyond all other countries to abound in waterfowl. The fowlers are represented in the paintings as spreading nets, or as rowing in their boats among the aquatic plants, in which the birds nestled, and knocking them down with sticks. The use of decoy-birds was not unknown; and smoked or salted wild-fowl were an article of export. The edible water-fowl are mostly of the goose and duck (anas) tribe; the quail also is mentioned by Herudotus (ii. 77) as among the species that were dried in the sun and slightly salted for home consumption and export.

The Fauna of the Nile were the hippopotamus and the crocodile, with many lesser species of the saurian genus. In the more remote ages both were found through the whole course of the river (Diodor. i. 35), although at present the hippopotamus rarely descends below the second Cataract, or the crocodile below $27^{\circ} \mathrm{N}$. lat. The chase of the

## NILUS.

hippopntamus is represented on the monuments of the Thebaid, but not on those of Midale or Lower Aegypt. The crocodile was caught with a hook baited with the chine of a pig (Herod. ii. 68), or with nets. (Diodor. i. 35.) It was an object of worship in some nomes [Arsinoe; Onbos], of abhorrence in others [Tentyra.]

The boats of the Nile, as represented on the monuments, exhibit a great variety of size and form. There was the canue, made of a single trunk; the shallop of papyrus, rendered water-tight by bitumen; and there were even vessels constructed of light earthenwure. (Juven. Sat. xv. 129.) The most usial species of craft, however, is a boat whose bow and stern are high out of the water, square rigged, with sails either of canvass or papyrus, a single mast that could be lowered in high winds, and a sladlow keel, in order to allow of easy extrication of the vessel should it run aground. But the most atriking and capacious bost employed on the Nile was the large Baris, used for the transportation of goxis. (Herod. ii. 96.) It was built of the hard wood of the Sont (Acanthe); the sails were made of papyrus, and the seams caulked with an oakuon composed from the fibres of that plant. These barges were propelled by as many as forty rowers ranged on the same level, and their tonnage amounted to three, four, and even five hundred tons. These Baris were towed up the streain, if the wind were not strong enough to impel them against it, or floated down it, with combined action of sail and oars, and steered by one or more large paddles at the stern. Parties of pleasure, visits of ceremony, and marriage processions, alike added to the floating population of the river; but perhaps the most inpressive spectacles which it presented were the pornp and circumstance of funerals. On the tombs of Speos Artenidos (Benihassan) is depictured the barge of Ameneinhe conveying the females of his house. It has an awning like a gondola, and is one of the half-decked boats ( $\sigma \kappa \alpha$, as Da入aur7roi) of which Strabo speaks (xvii. p. 800). In such a vessel Caesar intended, but for the indignant murmurs of his legions, to have ascended the Nile with Cleopatra from Alexandreia to the first Cataract. (Sueton. Jul. 58.) The tomb of Ra:meses 1V. at Thebes exhibits a royal barge. The hall, the cabin ( $\lambda d \lambda a \mu o s$ ), the rudder, and the masts are painted of a gold colour; the sails are diapered and fringed with various brilliant hues; the phoenix and the vulture are embroidered upon them. The eye of Osiris is painted on the rudder, and its handles represent the royal emblems-the uraeus and the pschent, or head of a divinity. The splendour of the Baris on the monuments recalls that of the vessel which carried Cleapatra up the Cydnus to meet M. Antonius at Tarsus. (Plut. Anton. c. 26.) It was a favourite amusement of the Aegyptians, in later times especially, to row rapidly in boats, and hurl and thrast at one another as they passed blunt javelins or jerids. Such a scene is represented on the tomb of Imai at Gizeh, one of the oldest monuments of Aegypt. They delightad also in sailing up and down the river-arms and lakes of the Delta, and feasting under the shas:0w of the tall reeds, and Aegyptian bean, which anere attains a beight of many feet. (Strab. xvii. p. 823, and generally Rosellini, Monumenti Civili.)

The Nile was also frequently the stage on which the great religious feativals or panegyries' were celebrated. On such solemnities the population of
entire nomes poured themselves forth. On the day of the feast of Artemis at Bubastis, the inhabitants of the Delta thronged the canals and main streams, while thousands descended froun the middle country and the Thebaid to be present at the ceremonies. The decks of the Baris were crowded with devotees of either sex, and the loud music of the pipe and cymbal was accompanied by songs and lyymns, and clapping of hands As they neared any town the passengers ran the barges along shore and recruited their numbers with fresh votaries. As many as $\mathbf{7 0 0 , 0 0 0}$ persions, exclusire of children, were sometimes ansembled at Bubastis, or at the equally popular festival of Isis at Busiris. Numerous sacrifices were offered in the temples of the goddesses, and, whether in libations or in revelry, more wine was consumed on these occavions than in all the rest of the year. (Comp. Herod. ii. 61, 62, with Clemens Alesand. Cohort. vol. i. p. 17.)

That the Nile should have been an object of norship with the Aegyptians, and that its image and phenomena should have entered deeply into their whole religious system, was unavoidable. As regarded its external aspect, it flowed between sand and rock, the sole giver and sustainer of life in that valley of death: it was, buth in its increment and its decrease, in its course through vast solitudes, and thronged populations alternately, the most suggestive and expressive of emblems for a religion which represented in such marked contrast, the realms of creation and destruction, of Osiris and Typhom. The Nile - as Oceanus, or the watery element was a member of the first Ogdoad of the Aegyptian theology (Diodor. i. 6-26), the opponent of Phtah, the elemental fire, and the companion of the earth (Demeter), the air (Neith), Zeus or Aman, the quickening spirit, Osiris and Isis, the Sun and Moon. It was thus one of the primitive essences, higher than any member of the second Ogdoad, or the visible objects of adoration. (Heliod. Aethiop. ix. 9: Schol. in Pinu. Pyth. iv. 99.) It had its own hieratic emblem on the monuments, sometimes as the ocean embracing the earth, sometimes, as in the temple of Osiris at Philae, as the assistant of Phtah in the creation of 0 siris. The wild crocodile was an emblem of Typhon (Plutarch, Is. et Osir. p. 371); but the tamed crocodile was the symbol of the gently swelling, beneficent Nile. (Euseb. Praep. Erangel. iii. 11.) Osiris is sometimes, but incorrectly, said (Tibull. Elig. i. 7, 27) to be the Nile itself (Plat. /s. et Osir. c. 33): there is no doubt, however, that it was personified and received divine honours. A festival called Nilas was celebrated at the time of the first rise of the waters, i. e. about the summer solstice. at which the priests were accustumed to drop pieces of ciin, and the Koman prefect of the Thebaid golden ornaments, into the river near Plalae (Shec. Nat. Quacst. iv. 2, 7) ; indeed there must have been a priesthood specially dedicated to the great river, since, according to Herodotus (ii. 101), none but a priest of the Nile could bury the corpse of a person drowned in its waters. Temples ware rarely appropriated to the Nile alone; yet Hecataeus (ap. Steph. s. v. Neĩos) speaks of one. in the town of Neilus, which stood in the Heracleopolite nome, near the entrance of the Fyoum. In the quarries at Silsilis several stelae are inscribed with acts of adoration to the river, who is joined with Ihre and P'htah. Its symbol in hieroglyphics is read Moon, and the last in the group of the characters composing it, is a symbol of $\begin{array}{r}\text { ater. According }\end{array}$

NINGUM.
NINUS.
437
to Lucian, indeed (Jupiter Tragaed. § 42), the Aeguptians sacrificed to the element of water, not locally, but universally. Pictorially, the Nile was represented ander a round and plamp figure, of a blue colour, and sometimes with female breasts, indicative of its productive and nutritive powers. On the base of the throne of Amenophis-Memnon, at Thebes, two figures represent the Nile, similar in all other respects, except that one is crowned with lotus to denote the upper courses of the river, the other with papyrus to designate the lower. [See Aggyptus, p. 37.] (Rosellini, Mon. del. Cult.; Kenrick's Ancient Aegypt, vol. i. pp. 349 -463.) [W.B.D.]

NINGUM. [Istria.]
NINIVE. [Niles.]

## NinNitaci. [Minaticum.]

NINUS ( $\grave{\eta}$ Nivos or Nivos, Herod i. 193, ii. 150; Ptol. vi. 1. § 3; Nivos ท̀ kal Nıvevt, Ptol. viii. 21. § 3; Nıveứn, Joseph. Ant. Jud. ix. 10. § 2; Ninus, Tacit. Ann. xii. 13; Ninive, Amm. Marc. xviii. 7, xxiii. 6: Eth. Nivios, Steph. B. s. v.), a great city, and for many centuries the capital of ancient Assyris. It will be convenient to notice here such accounts as we have from the Bible and ancient historians, and then to state succinctly the curious results of the recent discoveries of Mr. Layard, Culonel Rawlinson, and other modern travellers.
I. Nineveh is first mentioned in the Bible among the eight primeval cities in Genesis (x.11), and is there stated to have been founded either by Nimrod himself, or, according to another reading, by his lieutenant, Assur, the 'A $\sigma \sigma o$ úpas of Joseph. Ant. Jud. i. 6. § 4, and the Eponymus of Assyria. The latter view is the most agreeable to the construction of the Hebrew text. From this period we have no mention of it in Holy Scripture for more than a thousand years; and when it is noticed again, on Jonah being sent thither to preach repentance, it is described as a " city of three days' journey" (Jonah, iii. 3), and as "that great city wherein are six score thousand persons, that cannot discern between their right hand and their left hand." (Jonah, iv. 11.) Subsequently to this time, it is not referred to by name, except in 2 Kings, xix. 37, and Isaiah, xxxvi. 37, as the residence of Sennacherib, after his return from the invasion of Judacs; in the prophets Nahum and Zephaniah, who predict its speedy downfal; and in the apucryphal books of Tobit and Judith, the former of whom long lived in the great city.
II. The earliest classical mention of Nineveh is by Herodotus, who places it on the Tigris (i. 193, ii. 150), but does nut state on which bank it stood; in this he is confirmed by Arrian (Hist. Ind. c. 42) and Strabo, who in one place calls it the metropolis of Syria, i.e. Assyria (ii. p. 84), in another states it to have been a city more vast than even Babylon, lying in the plain of Aturia (a dialectical change of name for Assyria), beyond the Lycus (or Great Zab) with reference to Arbela (xvi. p. 737). Pliny places it ont the eart bank of the Tigris "ad solis occasum spectans" (vi. 13. s. 16); Ptolemy, alung the Tigris, but without accarate definition of its position (vi.l. § 3). The same may be said of the notice in Tacitus (Annal xii. 13), and in Ammianus, who calls it a vast city of Adiabene. On the other hand, Diodorus, professing to copy Ctesias, places it on the Eupbrates (ii. 3, 7), which is the more remarkable, as a frapment of Nicolaus Damascenus, who has preserved a portion of Ctesias, is still extant, in which Nineveh occupies its correct position on the Tigris. (Frag. Hist. Graec. vol. iii. p. 858, ed.

Miller.) It may be remarked that in much later times the name appears to have been applied to more than one town. Thus Ammianus in one passage seems to think that Hierapolis was the "vetus Ninus" (xiv. 8). Philostratus (Vit. Apoll. Tyan. i. 19) speaks of a Ninus on this side of the Euphrates; and Eusebius, in his Chronicon, asserts, that in his time it was called Nisibis. No doubt much of the obscarity in the minds of ancient writers, both as to its position and the real-history of the empire of which it was the capital, arose from the circuinstance that its entire overthrow preceded the earliest of the Greek historians by nearly 200 years, and that it does not appear to have been rebuilt at any period of the classical ages. So complete was its destruction, that, though Xenophon marched within a few miles of it, he was not aware of its existence, though, in his allusion to the " Median city of Mespila," he doubtless is describing one of the great outworks of the Assyrian capital (Anab. iii. 4. § 10); while, with the exception of Arrian, none of the historians of the campaigns of Alexander, who, like Xenophon, must have passed it on his way to fight the battle of Arbela, allude to it. That the ancients generally believed in its entire destruction, is clear from Pausanias, who classes it with Mycenae, Thebae, and other rained cities (viii. 33. § 2); from Lucian (Charom. c. 23), and from Strabo (xvi. p. 737). The last. indeed, has an argument that Homer, who mentions Thebes in Egypt, and the wealth of Phoenicia, could not have omitted Babylon, Nineveh, and Ecbatana, had he ever heard of them (xv. p. 735). But though so early a ruin, the ancients generslly had a correct idea of the wonderful greatness of Nineveh, and many passages are scattered through the classical writers, giving a manifest proof of this belief of the people. Thus Strabo himself, as we have seen, considered Nineveh greater than Babylon (xvi. p. 737); while Divdorus has a long and exaggerated narrative of the vast extent of Ninus's capital (which, as we stated before, he places incorrectly on the Euphrates, ii. p. 7). Sone cnrious incidental facts are preserved. Thus, the vast mound Semiramis erected as a tomb for her husband Ninus, by the river-side, is almost certainly the Pyramid at Nimrid, though the results of Mr. Layard's last excavations have not proved that this structure was a tomb. (Diod. ii. 7; comp. with Layard, Nineveh and Babylon, p. 128). Again, Amyntas (as quoted by Athenaeus) states, that at the town of Ninus was a high mound, which was thrown down by Cyrus when he attacked the city, that this was traditionally the tomb of Sarda. napalus, and had a stêle on it inscribed with Chaldaic (i. e. Assyrian) letters. (Amynt. Fragm. p. 136, ed. Müller; cf. also Polyaen. vii. 25.) Nor must we omit the presence of what has been held by ull numismatists to be a traditional representation of this celebrated tomb on the Tetradrachms of Antiochus VIII., king of Syria, which were struck at Tarsus, and on the imperial coins of Anchialus (both places connected with the name of Sardanapalus). Again we have the legend of Diodorus, that the Assyrians sent assistance to the Trojans against the Greeks (ii. 22; cf. Plat. Leg. p. 296, ed. Bekker), - the "busta Nini" of Ovid (Motain. iv. 88), though referred by him wrongly to Babylon, - and the occurrence, in several of the poets, of the name of Assaracus (now known through Colonel Rawlinson's interpretations to be a Graecized form of the genuine Assyrian Assarac, the 'AødpaX
or 'E $\sigma$ ofax of the LXX., Rawlinson, As. Journ. 1850), as in Iliad, xx. 232; Post. Homeric, vi. 145 ; Virg. Aen. v. 127; Juven. Sat. x. 259, \&cc. It is therefore, perhaps, less remarkable, that though Nineveh had so early in history ceased to be a city of any importance, the tradition of its former existence should remain in its own country till a comparatively recent period. Thus, as we have seen, Tucitus and Ammianus allude to it, while coins exist (of the class termed by numismatists Greek Imperial) struck under the Roman emperors Claudius, Trajan, Maximinus, and Gordianus Pius, proving that, during that period, there was a Roman colony established in Assyria, bearing the name of Niniva Claudiopolis, and, in all probability, occupying its site. (Sestini, Mus. de Chaudoir, tab. ii. fig. 12, Clas. General, p. 159.) In later times the name is still extant. Thus, Ibn Athir (quoting from Beladheri, in the annals of those years) speaks of the forts of Ninawi to the east, and of Mosul to the west, of the Tigris, in the campaigns of Abd-allah Ibn Mo'etemer, A. н. 16 (A. D. 637), and of Otbeh Ibn Farkad, 4. н. 20 (4. d. 641). (Rawlinson, As. Journ. 1850.) Again, Benjamin of Tudela, in the twelfth century, speaks of it as opposite to Mosul (Travels, p. 91, ed. Asher, 1840) ; and Abulfaraj notices it in his Hist. Dynnst. (pp. 404-441) under the name of Ninue (cf. also his Chronicon, p. 464). Lastly, Assemani, in his account of the mission of Salukah, the patriarch of the Chaldueans, to Rome, in A. D. 1552 , when describing Mosul, says of it, "a qua ex altera ripae parte abest Ninive bis mille passibus" (Bibl. Orient. i. p. 524). In the same work of Assemani are many notices of Nineveh, as a Christian bishoprick, first under the metropolitan of Mosul, and subsequently under the bishop of Assyria and Adiabene (Bibl. Orient. vol. ii. p. 459, vol. iii. pp. 104, 269, 344, \&c.).

We have already noticed under Assyria the chief points recorded in the Bible and in the classical fistorians relative to the history of Nineveh, and have stated that it is impossible entirely to reconcile the various conflicting statements of ancient anthors. It only remains to mention here, as briefly as possible, the general results of the remarkable discoveries which, within the last few years, have thrown a flood of light upon this most obscure part of ancient history, and have, at the same time, afforded the most complete and satisfuctory confirmation of those notices of Assyrian history which have been preserved in the Bible. The names of all the Assyrian kings mentioned in the Bible, with the exception, perhaps, of Shalmaneser, who, bowever, occurs under his name in Isaiah, Sargon, are now clearly read upon the Assyrian records, besides a great many others whose titles have not as yet been identified with those in the lists preserved by the Greek and Roman chronologists.
III. It is well known that in the neighbourhood of Mosul travellers had long observed some remarkable mounds, resembling small hills; and that Mr. Rich had, thirty years ago, called attention to one called Koyunjik, in which fragments of sculpture and pottery had been frequently discovered. In the year 1843, M. Botta, the French consul at Mosul, at the suggestion of Mr. Layard, commenced his excavations, -first, with little success, at Koyunjik, and then, with much greater good fortune, in a mound called Khorsabid, a few miles NE. of Mosul. To M. Botta's success at Khorsobid the French owe all the Assyrian monuments in the collection of the

Louvre. In 1845, Mr. Layard began to dig into the still greater mound of Nimriud, about 17 miles S. of Mosul; and was soon rewarded by the extensive and valuable collection now in the British Museum. These researches were continued by Mr. Layard during 1846 and part of 1847, and again during 1850 and 1851 ; together with a far more satisfactory examination of the remains at Koyunjik than had been made by M. Botta. Some other sites, too, in the neighbourhood were partially explored; but, though of undoubted Assyrian origin, they yielded little compared with the greater mounds at Nimrid, Khorsabád, and Koyunjik. It would be foreign to the object of this work to enter into any details of the sculptured monuments which have been brought to light. A vast collection, bowever, of inscriptions have been disinterred during the same excavations; and from these we have been enabled by the labours of Colonel Rawlinson and Dr. Hincks to give names to many of the localities which have been explored, and to reconstruct the history of Assyria and Babylonia on a foundation more secure than the fragments of Ctesias or the history of Herodotus. It is also necessary to state that very extensive researches have been made during 1854 in Southern Babylonia by Messrs. Loftus and Taylor in mounds now called Warka and Muqueyer; and that from these and other excavations Colonel Rawlinson has received a great number of ingcribed tablets, which have aided him materially in drawing upa précis of the earliest Babylonian and Assyrian history. Muqueyer he identifies as the site of the celebrated "Ur of the Chaldees." From these various sources, Colonel Rawlinson has concluded that the true Nineveh is represented by the mounds opposite to Mosul, and probably by that one which bears the local name of the Nabi Yunas; that this city was built about the middle of the thirteenth century b. C.; and that, from it, the name of Nineveh was in after times transferred to several other sites in the neighbourhood. The grest work of Nimrud (the seat of Mr. Layard's chief labours), which it was natural, on the first extensive discoveries, to suppose was the real Nineveh, is proved beyond question by both Col. Kawlinson and Dr. Hincks to have been called by the Assyrians Caluh, or Calach. We cannut doubt but that this is the Calah of Genesis (x. 12), and the origin of the Calachene of Strabo (xi. p. 529, xvi. p. 735), and of the Calacine of Ptolemy (vi. 1. § 2). From the inscriptions, it may be gathered that it was founded about the middle of the twelfth century b. c. The great ruin of Khorsabud (the scene of the French excarations), which has also been thought by some to have formed part of Nineveh, Colonel Rawlinson has ascertained to have been built by the Sargon of Isaiah ( $5 x .1$ ), the Shalmaneser of 2 Kings, xvii. 3,-abont the year b. c. 720; and he has shown from Yacut that it retained the name of Sarghun down to the time of the Muhaminedan conquest. Koyunjik, the principal ruin opposite to Mosul, and adjoining the Nabi Yunas, we know from the inscriptions to hare been constructed by Sennacherib, the son of Shalnameser, about B. c. 700. The whole of this district has been surveyed with great care and minuteness by Capt. Jones, within the last few years; and his account, with three elaborate maps, has been published in the Journal of the Asiatic Society for 1855. Fron this we learn that the whole enclosure of Koyunjik aud the Nabi Yunas (which we may
fair! y presume to have been, in an especial sense, the city of Nineveh) comprehends about 1800 English acres, and is in form an irregular trapezium, about $7 \frac{1}{3}$ miles round. The two mounds occupy respectively 100 , and 40 acres of this space, and were doubtless the palaces and citadels of the place. Capt. Jones calculates that, allowing 50 square yards to each inhabitant, the population may have amounted to about 174,000 souls.

From an elaborate examination of the inscriptions preserved on slabs, on cylinders, and on tablets, Colonel Rawlinson has arrived at the following general conclusions and identifications in the history of the Babylonian and Assyrinn empires.

He considers that the historical dates preserved by Berosus, and substantiated by Callisthenes (who sent to Aristotle the astronomical observations he had found at Babylon, extending as far back as 1903 years before the time of Alcxander, i. . . to B. C. 2233), are, in the main, correct; and hence that anthentic Babylonian chronology ascends to the twenty-third centary b. c. The Clialdaean monarchy which followed was established in B. c. 1976, and continued to B. C. 1518; and to this interval of 458 years we must assign the building of all the great cities of Babylonia, in the rains of which we now find bricks stamped with the names of the Chaldaean founders. At the present time, the names of about tw-nty monarchs bave been recovered from the bricks found at Sippara. Niffer, Warka, Senkereh, and Muqucyer (Uir), belonging to the one genuine Chaldaean dynasty of Berosus, which reigned from B. c. 1976-1518. Among the Scriptural or historical names in this series, may be noticed those of Amraphel and Arioch, Belus and Horus, and possibly the Thilgamus of Aelian. An Arab family succeeded from B. c. 1518 to в. c. 1273, of whom, at present, no certain remains have been found. The independence of Assyria, or what is usually called the Ninus dynasty, commenced, Colonel Rawlinson believes, in B. c. 1273,245 years after the extinction of the first Chaldaean line, and 526 years before the aera of Nabonassar in B. c. 747. Of the kings of this series, we have now nearly a complete list; and, though there is some difference in the reading of parts of some of the names, we may state that the identitications of Dr. Hincks and Colonel Kawlinson agree in all important particulars. To the kings of this race is attributable the foundation of the principal palaces at Nimrid. The series comprohends the names of Avhurbanipal. probably the warlike Sardanapalus of the Greeks, the founder of Tarnus and Anchiale (Schol. ad Aristoph. Aves, 1021), and the contemporary of Ahab, about b.c. 9.30 ; and Phal-akha, the $\Phi$ á $100 \chi$ of the LXX., and the Pul of 2 Kings (xv. 19), who received a tribute from Menahem, king of Israel; and Semiramis, the wife of Phal-ukha, whose name with her husband's has been lately found on a statue of the god Nebo, excavated from the SE. palace at Nimrid.

Colonel Kawlinson considers the line of the family of Ninus to have terminated with Phal-ukha or Pul in B. c. 747, and that the celebrated aera of Nabonassar, which dates from this year, was established by Semiramis, either as a refugee or as a conqueror, in that year, at Babylon. The last or Scriptural dynasty, according to this system, commences with Tiglath Pileser in B. c. 747. It is probable that he represents the Baletar of Polyhistor and Ptolemy's Canon, and possibly the Belesis of Ctesias, who is said (Diod. ii. 27) to have
been the actual taker of Ninevel. From this period the names on the Assyrian inscriptions are coincident with those in the Bible, though, naturally, many additional particulars are noticed on them, which aro not recorded in Sacred History. Some of the individual facts the inscriptions describe are worthy of notice: thus, the campaigns with the king of Samaria (Hoshea) and with a son of Rezin, king of Syria, are mentioned in those published by the British Museum (pp. 66-72); the names of Jehu and of Hazael have been read (independently) by Colonel Rawlinson and Dr. Hincks on the black obelisk from Nimrid, the date of which, therefore, must be early in the ninth century b.c.; and the latter scholar has detected on other monuments the names of Menahem and Manasseh, kings respectively of Israel and Judah. Lastly, the same students have discovered in the Annals of Sennacherib (which are preserved partly on slabs and partly on cylinders) an account of the celebrated campaign against Hezekiah (deacribed in 2 Kings xviii. 14), in which Sennacherib states that he took from the Jewish king " $\mathbf{3 0}$ talents of gold," the precise amount mentioned in Scripture, besides much other treasure and spoil.

There is still considerable doubt as to the exact year of the final destruction of Nineveh, and as to the name of the monarch then on the throne. From the narratives in Tobit and Judith (if indeed these can be allowed to have any historical value), compared with a prophecy in Jeremiah written in the first year of the Jewish captivity, B. c. 605 (Jerem. xxv. 18 -26), it might be inferred that Nineveh was still standing in B. C. 609, but had fallen in B.c. 605. Colonel Rawlinson, however, now thinks (and his view is confirmed by the opinion of many of the elder chronologists) that it was overthrown B. C. 625, the Assyrian sovereignty being from that time merged in the empire of Babylon, and the Canon of Ptolemy giving the exact dates of the various succeeding Babylonian kings down to its capture by Cyrus in B. C. 536, in conformity with what we now know from the inscriptions. We may add, in conclusion, that among the latest of the discoveries of Colonel Rawlinson is the undoubted identification of the name of Belshazzar as the son of Nabonidus, the last king of Babylon; and the finding the names of the Greek kings Seleucus and Antiochus written in the cuneiform character on tablets procared by Mr. Loftus from Warka. (Rawlinson, As. Journ. 1850, 1852, 1855; Athenaeum, Nos. 1377, 1381, 1383, 1388; Hincks, Roy.Soc. of Liter. vol. iv.; Trans. Roy. Irish Acad. 1850, 1852, 1855 ; Layard, Nineveh and Babylon ; and, for an entirely new view of the Assyrian chronology, Busanquet, Sacred and Profane Chronology, Lond. 8vo. 1853.)

NINUS river. [Daedara.]
 523, 527, 529; Ptol. v. 13. § 4, vi. 1. § 1; Mela, i. 15. § 2; Plin. v. 27 ; Amm. Marc. xxiii. 6. § 13; Virg. Geog. iii. 30; Horat. Carm. ii. 9. 20: the later Roman poets, by a curious mistake, made Niphates a river; comp. Lucan, iii. 245; Sil. Ital. xiii. 775; Juven. vi. 409), the "snowy range" of Armenia, called by the native writers Nebad or Nbadagas (St. Martin, Mém. sur CArmenie, vol. i. p. 49). Tauras, stretching E. of Commagene (Ain Tab) separates Sophene (Kharput Dawassi), which is contained between Taurus and Anti-Taurus (Strab. xi. p. 521), from Osroene ( Urfah), and then divides itself into three portions. The most northerly, and highest, are the Niphates (Aad Kúr) in Aciliseno.

The structure of this elevated chain, consisting of the lofty groups of Sir Serah, the peaked glacier of Mut Khán, the Ali Tágh, Sapain, Nimrud, and Darkish, Täghs, which are probably the highest range of Taurus, rising abore the line of perpetual snow ( 10,000 feet?), remains yet undetermined. Limestone and gypsum prevail, with basalt and other volcanic rocks. Deep valleys separate the parallel ridges, and also break their continuity by occasional passes from the N . to the S. sides (Ainsworth, Assyria, Babylonia, and Chaldaea, p. 18; Chesney, Exped. Euphrat. vol. i. p. 69; Ritter, Erdhunde, vol. x. p. 911.)
[E. B. J.]
NISA. [Isus.]
NISA. [Nrsa.]
Nisaea. [Nesara.]
NISAEA. [Megara.]
NISAEI CAMPI, plains of considerable extent in the mountain district of Media, which were famous fur the production of a celebrated breed of horses. According to Strabo, they were on the road of those who travelled from Persis and Babylon in the direction of the Caspian Gates (xi. p. 529), and fed 50,000 brood mares for the royal stables. In another place, the same geographer states that the Nisaean horse were reared in the plains of Armenia (xi. p. 530), from which we infer that the plains themselves extended from Armenia southward through Media. Again, in the Epitome of Strabo (iii. p. 536, ed. Krainer), the Nisacan plain is stated to be near the Caspian Gates, which lead into Parthia. The fact is, the district was not accurately defined. Herodutus states that the place, from which the best white horses (which were reserved for the use of the king) came, was a great plain in Media (vii. 40). And the same view is taken by Eustathius in his Commentary on Dionysius (v. 1017), and confirmed by the notice in Arrian's account of Alexander's march (vii. 13). Ammianus, on the other hand, states that the Nisuean horses were reared in the plains S. of M. Coronus (now Demaucend). It appears to have been the custom on the most solemn occasions to sacrifice these horses to the sun (Philostr. Vit. Apoll. i. 20); and it may be inferred from Herodotus that they were also used to draw the chariot of the Sun (vii. 40.) (Cf. also Steph. B. 8. v.; Synes. Epist. 40; Themist. Orat v. p. 72; Heliodor. Aethiop. ix. p. 437 ; Suid. a. v. Nígasov.) Colonel Rawlinson has examined the whole of this geographical question, which is much perplexed by the ignorance of the ancient writers, with his usual ability; and has concluded that the statements of Strabo are, on the whole, the most trustworthy, while they are, in a great degree, borne out by the existing character of the country. He states that in the rich and extensive plains of Alishtar and Khdoah he recognises the Nisaean plains, which were visited by Alexander on his way from Baghistane to Susa and Ecbatana; and he thinks that the Nisuean horse came originally from the Nissea of Khorásan, which is still famous for its Turkoman hores. Colonel Rawlinson further believes that Herodotus, who was imperfectly acquainted with Median geography, transferied the name Nisaea from Khoriaan to Media, and hence was the cause of much of the confusion which has arisen. Strabo, on the other hand, describes correctly the great horse pastures as extending along the whole line of Media, from the road wibich led from Babylon to the Caspian Gates to that conducting from Babylon into Persia The
whole of this long district, under the names of Khdwah, Alishtar, Hurú, Silìkhúr, Buw birúd, Jápalák, and Feridus, is still famous for its excellent grazing and abundance of horses. Colonel Rawlinson, indeed, thinks that Strabo's epithet, ixжoforos, is a translation of Silikhúr, which means "a fall manger." It was from this plain that Python brought his supply of heasts of barthen to the camp of Antigonus (Diod. xix. 2) after the perilous march of the Greeks acmss the mountains of the Cossaeans. (Rawlinson, Reyal Geogr. Journ vol. ix. pt. i. p100.)

NISIBIS (Nıctets). 1. A small place in Ariana, mentioned by Ptolemy (v. 18. § 11) and Ammianns (xxiii. 6). It would appear to have been at the foot of the chain of the Paropamisus. There are some grounds for supposing it the same place as the Nii of Isidorus [NII], and that the latter has andergone a contraction similar to that of Bitaxa into Bis.
2. The chief city of Mygdonia, a small district in the NE. end of Desopotamia, about 200 miles S. of Tigranocerta; it was situated in a very rich and fruitful country, and was long the centre of a very extensive trade, and the great northern emporium for the merchandise of the E. and W. It wns situated on the small stream Mygdonius (Julian, Orat. i. p. 27 ; Justin. Excerpt. e. Legat. p. 173), and was distant about two days' journey from the Tigris. (Procop. Bell. Pers. i. 11.) It was a town of such great antiquity as to have been thought by some to have been one of the primeval cities of Genesis, Accad. (Hieron. Quaest. in Genes. cap. x. v. 10; and cf. Michael. Spicileg. i. 226.) It is probable, therefore, that it existed long before the Greeks came into Mesopotamia; and that the tradition that it was founded by the Macedonians, who called it Antiocheia Mygdoniae, ought rather to refer to its rebuilding, or to some of the great works erected there by some of the Seleucid princes. (Strab. xvi. p. 747; Plut. Lucull. c. 32 ; Plin. vi. 13. s. 16.) It is first mentioned in history (under its name of Antiocheia) in the march of Antiochus against the satrap Molon (Polyb. v. 51); in the later wars between the Romans and Parthians it was constantly taken and retaken. Thus it was taken by Lucullus from the brother of Tigranes, after a long siege, which lasted the whole summer (Dion Cass. $x \times x v$. 6, 7), but, according to Plutarcin, towards the close of the autumn, withont much rosistance from the enemy. (Plut. l. o.) Again it was taken by the Romans under Trajan, and was the cause of the title of "Parthicus," which the senate decreed to that emperor. (Dion Cass. Ixviii. 23.) Subsequently to this it appears to have been besieged by the Oaroeni and other tribes who had revolted, but who were sabdued by the arms of Sept. Severus. Nisibis became on this occasion the head-quarters of Severus. (Dion Cais. lxxv. 2, 3.) From this period it appears to have remained the advanced outpost of the Romans against the East, till it was surrendered by the Persians on the treaty which was made with that people by Jovian, after the death of Julian. (Zosim. iii. 33; Amm. Marc. xxv. 9.) Its present name is Nisitin, in the neighbourhood of which are still extensive rains of the ancient city. (Niebuhr, vol. ii. p. 379.)
[V.]
NI'SYRUS (Nirupos), a rocky island opposite to Cnidus, between Cos in the north and Telos in the south, about 121 Roman miles distant from Cape Triopion in Caria. (Plin. v. 36; Strab. xiv. p. 636,

工. p. 488 : Steph. B. s. v.) It also bore the name of Porphyris, on account of its rocks of porphyry. The island is almost circular, and is only 80 stadia in circumference; it is said to have been formed by Poseidon, with his trident, knocking off a portion of Cos, and throwing it upon the giant Polybotes. (Strab. x. p. 489; Apollod. i. 6. § 2; Paus. i. 2. § 4; Eustath. ad Dion. Perieg. 530, ad Hom.IL. ii. 676.) The island is evidently of rolcanic origin, and was gradually formed by volcanic eruptions of lava from a central crater, which in the end collapsed, leaving at its top a lake strongly impregnated with sulphur. The highest mountain in the north-western part is 2271 feet in height; another, a little to the northeast, is 1800 , and a third in the south is 1700 feet high. The hot springs of Nisyrus were known to the ancients, as well as its quarries of millstones and its excellent wine. The island has no good harbnur: bat near its north-western extremity it had, and still has, a tolerable roadstead, and there, on a small bay, was situated the town of Nisyrus. The same spot is still occupied by a little town, at a distance of about 10 minutes' walk from which there are very considerable remnants of the ancient acropolis, consisting of mighty walls of black trachyte, with square towers and gates. From the acropolis two walls run down towards the sea, so as to embrace the lower town, which was built in terraces on the slope of the hill. Of the town itself, which possessed a temple of Poseidon, very little now remains. On the east of the town is a plain, which anciently was a lake, and was separated from the sea by a dike, of which considerable remains are still seen. The hot springs (İephd) still exist at a distance of about half an hour's walk east of the town. Stephanus B. (8. v.) mentions another small town in the south-west of Nisyrus, called Argos, which still exists under its ancient name, and in the neighbourhood of which hot vapours are constantly issuing from a chasm in the rock.

As regards the history of Nisyrus, it is said originally to have been inhabited by Carians, until Thessalus, a son of Heracles, occupied the island with his Dorians, who were governed by the kings of Cos. (Diod. v. 54; Hom. Il. ii. 676.) It is possible that, after Agamemnon's return from Troy, Argives settled in the island, as they did in Calymnus, which would account for the name of Argos occurring in both islands; Herodotus (vii. 99), moreover, calls the inhabitants of Nisyras Epidaurians. Subsequently the island lost most of its inhabitants durint repeated earthquakes, but the population was restored by inhabitants from Cos and Rhodes settling in it. During the Persisn War, Nisyrus, together with Cos and Calymnus, was governed by queen Artemisia (Herod. Lc.). In the time of the Peloponnesian War it belonged to the tributary allies of Athens, to which it had to pay 100 drachmae every month: subsequently it joined the rictorious Lacedaemonians; but after the victory of Cnidos, b. c. 394, Conon induced it to revolt from Sparta. (Diod. xir. 84.) At a later period it was for a time probably governed by the Ptolemies of Egypt. Throughout the historical period the inhabitants of Nisyrus were Dorians; a fact which is attested by the inscriptions found in the island, all of which are composed in the Doric dialect. An excellent account of Nisyrus, which still bears its ancient name Nígupos or Nioupa, is found in L. Russ, Reisen auf den Griech. Inseln, vol. ii. pp. 67-81.
[L. S.]
NLSIRUS, a town in the island of Carpathus.

NITAZI (It. Ant. p. 144), Nitazo (Geogr. Rav. ii. 17 ; Tab. Peut.), or Nitalis (It. Hieros. p. 576), a town in Cappadocia, on the road between Mocissus and Archelais, but its site is uncertain. [L. S.]

NITIOBRIGES (Nıtluepıres), a people of Aquitania. In Pliny (iv. 19) the name Antobroges occurs: "rursus Narbonensi provinciae contermini Ruteni, Cadurci, Antobroges, Tarneque amne discreti a Tolosanis Petrocori." There is no doubt that Antobroges is an error, and that the true reading is Nitiohroges or Nitiobriges. The termination briges appears to be the same as that of the word Allo. broges. The chief town of the Nitiobriges, Aginnum (Agen), is mentioned by Ptolemy (ii. 7. §4), who places them next to the Petrocorii on one side, and to the Vasatii on the other. Strabo enumerates them between the Cadurci and the Petrocorii (Strab. iv. p. 190): " the Petrocorii, and next to them the Nitiobriges, and Cadurci, and the Bituriges, who are named Cubi." The position of the Nitiobriges is determined by these facts and by the site of Aginnum, to be on the Garonne, west of the Cadurci and south of the Petrocorii. D'Anville makes their territory extend beyond the then limits of the diocese of Agen, and into the diocese of Condom.

When Caesar (B. G. vii. 46) surprised the Gulli in their encamprient on the hill which is connected with the plateau of Gergovia, Teutomatus king of the Nitiobriges narrowly escaped being made prisoner. The element Teut in this king's name is the name of a Gallic deity, whom some authorities suppose to be the Gallic Mercurius (I.actant. De falsa Kelig. i. 21; and the Schol. on Lucan, i. 445, ed. Oudendorp). Others have observed that it is the same element as Teut in the Teutonic language, and as Dis, from whom the Galli pretended to spring (Pelloutier, Hist. des Celtes. Liv. i. c. 14). The Nitiobriges sent 5000 men to the relief of Alesia when it was blockaded by Caesar (B. G. vii. 75). [G. L.]

NITRA (Nitpa), a place which Ptolemy calls an $\langle\mu \pi \dot{o} \rho i o v$, on the W. coast of Hindostín, in the province of Limyrica. There can be no doubt that it is the same as that called by Pliny Nitrias (vi. 23. 8. 26), which he states was held by a colony of pirates. The author of the Periplus speaks of a place, in this immediate neighbourhood, named Naura, and which is, in all probability, the same as Nitrae. (Peripl. Mar. Erythr. § 58, ed. Müller.) It is most likely the present Honaver.
[V.]
NI'THIAE (NıTplas, Strab. xvii. p. 803; Sozomen, H. E. vi. 31 ; Socrat. H.E. iv. 23 ; Steph. B. s. v.; Nıтpıиิтaı, Ptol. iv. 5. § 25; Nitrariae, Plin. xxxi. 10. s. 16: Eth. Nitpitns and Nıтpiór $\eta s)$, the Natron Lakes (Birket-el-Duarah), were six in number, lying in a valley SW. of the Aegyptian: Delta. The valley, which is bounded by the limestone terrace which skirts the edge of the Delta, rans in a NW. direction for about 12 miles. The sands which stretch around these lakes were formerly the bed of the sea, and were strongly impregnated with saline matter, e. g. muriate, sulphate, and carbonate of soda. Rein, though rare in Aegypt, falls in this region during the months of December, January, and Febroary; and, consequently, when the Nile is lowest, the lakes are at high water. The salt with which the sands are encrusted as with a thin cuat of ice (Vitruv. viii. 3), is carried by the rains into the lakes, and held there in solution during the wet season. But in the summer months a strong evaporation takes place, and a glaze or crust is depasited upon the surface and edges of the water, which, when collected, is employed by
the bleachers and glassmakers of Aegypt. Parallel with the Natron Lakes, and separated from them by a narrow ridge, is the Bahr-be-la-Ma, or Waterless River, a name given by the Arabs to this and other hollows which have the appearance of haring once been channels for water. It has been surmised that the lake Moeris (Birket-el-Keroum) may have been connected with the Mediterranean at some remote period by this outlet. The Bahr-be-la-Ma contains agatised wood. (Wilkinson, Mod. Egypt and Thebes, vol. i. p. 300.)

The valley in which the Natron Lakes are contained, was denominated the Nitriote nome
 Steph. B. 8. v. Nitpiai). It was, according to Strabo, a principal seat of the worship of Serapis, and the only nome of Aegypt in which sheep were sacrificed. (Comp. Macrob. Saturn. i. 7.) The Serapeian worship, indeed, seems to have prevailed on the western side of the Nile long before the Si nopic deity of that name (Zeus Sinopites) was introduced from Pontus by Ptolemy Soter, since there was a very ancient temple dedicated to him at Rhacotis, the site of Alexandreia (Tac. Hist. iv. 83), and another still more celebrated outside the walls of Memphis. The monasteries of the Nitriote nome were notorions for their rigorous asceticism. They were many of them strong-built and well-guarded fortresses, and offered a successful resistance to the recruiting sergeants of Valens, when they attempted to enforce the imperial rescript (Cod. Theodos. xii. tit. 1. lex. 63), which decreed that monastic vows should not exempt men from serving as soldiers. (Photius, p. 81, ed. Bekker; Dionys. Perieg. v. 255; Enstath. ad loc; Pausan. i. 18; Strab. xvii. p. 807; Clem. Alex. Strom. i. p. 43.)
[W. B. D.]
NIVARIA, a city of the Vaccaei in Hispania Tarraconensis, lying N. of Cauca. (Itin. Ant. p. 435; Ukert, vol. ii. pt. 1. p. 432.) [T. H. D.]
nivaria ins. [Fortunatar Ins, Vol. I. p. 906, b.]

NOAE (Noal, Steph. B.: Eth. Noaîos, Noaeus: Noara), a city of Sicily, the name of which is not mentioned in history, but is found in Stephanus of Byzantium (s. v.), who cites it from Apolludorus, and in Pliny, who enumerates the Noaei among the communities of the interior of Sicily (Plin. iii. 8. s. 14.) We have no clue to its position, but the resemblance of name renders it probable that it is represented by the modern village of Noara, on the N . slope of the Neptunian mountains, about 10 miles from the sea and 13 from Tyndaris. (Cluver. Sicil. p. 335.)
[E. H. B.]
NUARUS (Nóapos), a river of Pannonia, into which, according to Strabo (vii. p. 314), the Dravus emptied it:elf in the district of Segestice, and which thence flowed into the Danube, after having received the waters of another tributary called the Colapis. This river is not mentioned by any other writer; and as it is well known that the Dravus flows directly into the Danube, and is not a tributary to any other river, it has been supposed that there is some mistake in the text of Strabo. (See Groskurd, Strabo, vol. i. pp. 357, 552.) [L. S.]

NOEGA (Noi $\gamma \alpha$ ), a small city of the Astures, in Hispania Tarraconensis. It was seated on the coast, not far from the river Melsus, and from an estuary which formed the boundary between the Astures and Cantabri, in the neighbourhood of the present Gijon. Hence Ptoleny (ii. 6. § 6), who gives it the additional name of Ucesia (Nor $\boldsymbol{a}$ ouk $\in \sigma(\alpha)$, places it
in the territory of the Cantabri. (Strab. iii. p. 167; Mela, iii. 1; Plin. iv, 20. s. 34.) [T. H. D.]

NOELA, a town of the Capon in Hispania Tarraconensis, now Noya on the Tambre. (Plin. iv. 20. 8. 34: Ukert, vol. ii. pt. 1. p. 438.) [T. H. D.]

NOEODU'NUM (Noidoouvov), was the chief city of the Diablintes [Diablintes], or of the Aulircii Dianlitae, as the name appears in the Greek texts of Ptolemy (ii. 8. § 7). There is no doubt that the old Gallic name of the town was exchanged for that of the people, Diablintes; which name in a middle age document, referred to by D'Anville, is written Jublent, and hence comes the corrapted name $J u-$ oleins, a small place a few leagues from Mayennc. There are said to be some Roman remains at Jubleins.

A name Nudionnum occurs in the Theodosian Table between Araegenus and Subdinnum (Mans), and it is marked as a capital town. It appears to be the Noeodunum of the Diablintes. [G. L.]

NOEOMAGUS (Notbuayos), a town of Gallia Lugdunensis, and the capital of the Vadicassii (Ptol. ii. 8. § 16). The site is uncertain. D'Anville supposes that it may be Vex, a name apparently derived from the Viducasses. Others suppose it to be Neuville, apparently because Neurille means the same as Noeomagus.
[G. L.]
NOES (Nóns, Herod. iv. 49) or NOAS (Valer. Flacc. vi. 100), a river which takes its source in Mount Haemus, in the territory of the Corbyzi, and flows into the Danube. It has not been satisfactorily identified.
[T. H. D.]
NOIODENOLEX, a place in the country of the Helvetii, which is shown by inscriptions to be Vieux Châtel, near Neufchâtel. Foundations of old baildings, pillars and coins have been found there. One of the inscriptions cited by Ukert (Gallien, p. 494) is: "Publ. Martins Miles Veteranus Leg. $x \times 1$. Civium Noiodenolicis curator."
[G. L.]
NOIODU'NUM. [Colonia Equestris Nolodunum.]

NOLA (Nஸ̂入a: Eth. Nò入aios, Nolanus: Nola), an ancient and important city of Campinia, situated in the interior of that province, in the plain between Mt. Vesuvius and the foot of the Apennines. It was distant 21 miles from Capua and 16 from Nu ceria (Itin Ant. p. 109.) Its early history is very obscure; and the accounts of its origin are contradictory, though they may be in some degree reconciled by a due regard to the successive populations that occupied this part of Italy. Hecataeus, the earliest author by whom it is mentioned, appears to have called it a city of the Ausones, whom he regarded as the earliest inhabitants of this part of Italy. (Hecat. ap. Steph. Byz. s. v.) On the other hand, it must have received a Greek colony from Cumae, if we can trust to the authority of Justin, who calls both Nola and the neighbouring Abella Chalcidic colonies (Justin, 1x. 1); and this is confirmed by Silius Italicus (Chalcidicam Nolam, xii. 161.) Other authors assigned it a Tyrrhenian or Etruscan origin, though they differed widely in regard to the date of its foundation; some writers referring it, together with that of Capua, to a date as early as B. c. 800, while Cato brought them both down to a period as late as b. c. 471. (Vell. Pat. i. 7. This question is more fully discussed under the article Capua.) But whatever be the date assigned to the establishment of the Etruscans in Campania, there scems no doubt that Nola was one of the cities which they then occupied, in the same manner as the
neighbouring Capua (Pol. ii. 17); though it is most probable that the city already existed from an earlier period. The statement of Solinus that it was founded by the Tyrians is clearly erroneous: perhaps, as suggested by Niebuhr, we should read "a Tyrrhenis" for "a Tyriis." (Solin. 2. § 16; Niebuhr, vol. i. p. 74, note 235.) We have no account of the manner in which Nola afterwards passed into the bands of the Samnites; but there can be little doubt that it speedily followed in this respect the fate of Capua [CAPUA]; and it is certain that it was, at the time of the first wars of the Romans in this part of Italy, a Campanian city, occupied by an Oscan people, in close alliance with the Samnites. (Liv. viii. 23.) Dionysius also intimates clearly that the inhabitants were not at this period, like the Neapolitans, a Greek people, though he tells us that they were much attached to the Greeks and their institutions. (Dionys. Fr. xv. 5. p. 2315. R.)

We may probably infer from the above statements, that Nola was originally an Ausonian or Oscan town, and subsequently occupied by the Etruscans, in whose hands it appears to have remained, like Capua, until it was conquered by the Samnites, who subsequently assumed the name of Campanians, about B. c. 440 . The evidence in favour of its having ever received a Greek colony is very slight, and is certainly outweighed by the contrary textimony of Hecataeus, as well as by the silence of all other Greek writers. The circumstance that its coins (none of which are of early date) have uniformly Greek inscriptions (as in the one figured below), may be sufficiently accounted for by that attachinent to the Greeks, which is mentioned by Dionysius as characterising the inhabitants. (Dionys. l. c.)

The first mention of Nola in history occurs in B. c. 328, just before the beginning of the Second Samnite War, when the Greek cities of Palaepolis and Neapolis having rashly pr voked the hostility of Rome, the Nolans sent to their assistance a body of 2000 troops, at the same time that the Samnites furnished an auxiliary force of twice that amount. (Liv. viii. 23.) But their efforts were frustrated by disaffection among the Palaepolitans; and the Nolars retired from the city on finding it betrayed into the hands of the Romans. ( 1 . 25, 26.) Notwithstanding the provocation thus given, it was long before the Romans were at leisure to arenge themselves on Nola; and it was not till b.c. 313 that they laid siese to that city, which fell into their hands after but a short resistance. (Id. ix. 28.) It appears certain that it continued from this period virtually subject to Rome, though enjoying, it would seem, the privilegel condition of an allied city (Liv. xxiii. 44; Festus, s.v. Muricipium, p. 127); but we do not meet with any subsequent notice of it in history till the Second Punic War, when it was distinguished for its fidelity to the Roman cause, and for its successful resistance to the arms of Hannibal. That general, after making himself master of Capua in в. c. 216, boped to reduce Nola in like manner by the cooperation of a party within the walls. But though the lower people in the city were ready to invite the Carthaginian general, the senate and nobles were faithful to the alliance of Rume, and sent in all baste to the pruetor Marcellus, who threw himself into the city with a considerable force. Hannibal in consequence withdrew from before the walls; but shortly after, having taken Nuceria, he renewed the attempt upon Nola, and continued to threaten the city for come time, until Marcellus, by a sudden sally, in-
flicted upon him considerable loss, and led him to abandon the enterprise (Liv. xxiii. 14-17; Plat. Marc. 10, 11 ; Eutrop. iii. 12; Flor. ii. 6. § 29.) The advantage thas obtained, though inconsiderable in itself, was of importance in restoring the spirits of the Romans, which had been almost crushed by repeated defeats, and was in consequence magnified into a great victory. (Liv. L. c.; Sil. Ital. xii. 270280.) The next year (в. c. 215) Hannibal again attempted to make himself master of Nola, to which he was encouraged by fresh overtures from the democratic party within the city; but he was again anticipated by the vigilance of Marcellus, and, having encamped in the neighbourhood of the tuwn, with a view to a more regular siege, was attacked and dofeated by the Roman general (Liv. xxiii. 39, 4246 : Plut. Marc. 12.) A third attempt, in the following year, was not more successful; and by these successive defences the city earned the praise bestowed on it by Silius Italicus, who calls it "Poeno non pervia Nola." (Sil. Ital. viii. 534.)

Nola again bears a conspicuous part in the Social War. At the outbreak of that contest (r.c.90) it was protected, as a place of importance from its proximity to the Samnite frontier, by a Roman garrison of 2000 men, under the command of the practor L. Postumius, but was betrayed into the hands of the Samnite leader C. Papius, and became from thenceforth one of the chief strongholds of the Samnites and their allies in this part of Italy. (Liv. Epit. Ixsiii.; Appian, B. C. i. 42.) Thus we find it in the following year (b. c. 89) affording shelter to the shattered remains of the army of L. Cluentius, after its defeat by Sulla (Appian, l.c. 50); and even after the greater part of the allied nations had made peace with Rome, Nola still held out; and a Roman army was still occupied in the siege of the city, when the civil war first broke out between Marius and Sulla. (Vell. Pat. ii. 17, 18; Diod. xxxvii. Exc. Phot. p. 540.) The new turn thus given to affairs for a while retarded its fall: the Samnites who were defending Nula joined the party of Marius and Cinua; and it was not till after the final triumph of Sulla, and the total destruction of the Samnite power, that the dictator was able to make himself master of the refractory city. (Liv. Epit. lxxxix.) We cannot doubt that it was severely punished: we learn that its fertile territory was divided by Sulla among his victorious soldiers (Lib. Colon. p. 236), and the old inhabitants probably altogether expelled. It is remarkable that it is termed a Colonia before the outbreak of this war (Liv. Epit. Lxxiii.); but this is probably a mistake. No other author mentions it as such, and its existence as a municipium, retaining its own institutions and the use of the Oscan language, is distinctly attested at a period long subsequent to the Second Punic War, by a remarkable inscription still extant. (DIommsen, Unter Ital. Dial. p. 125.) It afterwards received a second colony under Augustus, and a third under Vespasian; hence Pliny enumerates it among the Coloniae of Campania, and we find it in inscriptions as late as the time of Diocletian, bearing the titles of "Colonia Felix Augusta Nolana." (Lib. Colon. l. c.; Plin. iii. 5. s. 9; Zumpt, de Colmn. pp. 254, 350; Gruter, Inscr. p. 473. 9, p. 1085.14.)

It was at Nola that Augustus died, on his return from Beneventum, whither he had accompanied Tiberius, A. D. 14; and from thence to Bovillae his funeral procession was attended by the senators of the cities through which it passed. (Suet. Aug. 98; Dion Cass. Ivi. 29, 31; Tac. Ann. i. 5 ; Vell. Paw. ii.
123.) The house in which he died was afterwards consecrated as a temple to his memory (Dion Cass. Ivi. 46). From this time we find no historical mention of Nola till near the close of the Roman Empire; but there is no doubt that it continued throughout this period to be one of the most flourishing and considerable cities of Campania, (Strab. v. pp. 247, 249 ; Ptol. iii. 1. § 69 ; Itin. Ant. p. 109 ; Orell. Inscr. 2420, 3855, \&c.; Mommsen, Inscr. R. N. pp. 101 -107.) Its territory was ravaged by Alaric in A. D. 410 (Augustin, Civ. Dei, 1. 10); but the city itself would seem to have escaped, and is said to have been still very wealthy (" urbs ditissima ") as late as A. D. 455, when it was taken by Genseric, king of the Vandals, who totally destroyed the city, and sold all the inhabitants into captivity. (Hist. Miscell. xv. pp. 552, 553.) It is probable that Nola never recorered this blow, and sank into comparative insignificance in the middle ages; but it never ceased to exist, and is still an episcopal city, with a population of about $\mathbf{1 0 , 0 0 0}$ souls.

There is no doubt that the ancient city was situated on the same site with the modern one. It is described both by Livy and Silins Italicus as standing in a level plain, with no natural defences, and owing its strength as a fortress solely to its walls and towers (Liv. xxiii. 44; Sil. Ital. xii. 163); a circumstance which renders it the more remarkable that it should have held out so long against the Roman arms in the Social War. Scarcely any remains of the ancient city are now visible; but Ainbrosius Leo, a local writer of the early part of the 16 th century, describes the remains of two amphitheatres as still existing in his time, as well as the foundations of several ancient buildings, which he considered as temples, beautiful inosaic pavements, Scc. (Ambrosii Leonis de Urbe Nola, i. 8, ed. Venet. 1514.) All these have now disappeared; but numerous inscriptions, which have been discovered on the spot, are still preserved there, together with the interesting inscription in the Oscan languare, actually discovered at Abella, and thence commonly known as the Cippus Abellanus [Abella]. From this curiuns monument, which records the terms of a treaty between the two cities of Nola and Abella, we learn that the name of the former city was written in the Oscan language "Nuvla." (Mommsen, Unter. Ita! Dialekte, pp. 119-127.) But the name of Nola is most celebrated among antiquarians as the place from whence a countless multitude of the painted Greek vases (commonly known as Etruscan) have been supplied to almost all the museums of Europe. These vases, which are uniformly found in the ancient sepuichres of the neighbourhood, are in all probability of Greek origin: it has been a subject of much controversy whether they are to be regarded as productions of native art, manufactured on the spot, or as imported from some other quarter; but the latter supposition is perhaps on the whole the most probable. The great love of these objects of Greek art which appears to have prevailed at Nola may be sufficiently accounted for by the strong Greek predilections of the inhabitants, noticed by Dionysius (Exc. Leg. p. 2315), without admitting the existence of a Greek colony, for which (as already stated) there exists no sufficient authority. (Kramer, über den Styl. u. die Herkunft Griechischen Thongefässe, pp. 145-159; Abeken, Mittel Italien, pp. 332-339.)

Nola is celebrated in ecclesiastical bistory as the see of St. Paulinus in the 5th century; and also as the place where, according to tradition, the use of
bells was first intruduced in churches; whence were derived the names of " nola " and " campana," usaally applied to such bells in the middle ages. (Du Cange, Glossar. s. v.)

The territory of Nola, in common with all the Campanian plain, was one of great natural fertility. According to a well-known anecdote related by Aulus Gellius (vii. 20), it was originally mentioned with great praise by Virgil in the Georgics (ii. 225); but the people of Nola having given offence to the pret, he afterwards struck out the name of their city, and left the line as it nuw stands.
[E. H. B]

Coin of rola.
NOLIBA or NOBILI, a town of the Oretani in Hispania Tarraconensis, probably situated between the Anas and Tagus; but its site cannot be satisfactorily determined. It is inentioned only by Livy (xxxp. 22).
[T. H. D.]
NOMADES. [Numidia.]
NOMAE (N $\delta \mu a 1$ ), a town of Sicily, mentioned only by Diodorus (xi. 91) as the place where Ducetius was defeated by the Syracusans in B. c. 451 . Its site is wholly uncertain. Some authors identify it with Noae [NoAE]; bat there is no authority for this.
[E. H. B.]
NOMENTUM (Náucutov: Eth. N $\omega \mu$ evtivos, Steph. B.; Nomentanus: Mentana), an ancient city of Latium, situated on the Sabine frontier, about 4 miles distant from the Tiber, and 141 from Rome, by the mad which derived from it the name of Via Nomentana. It was included in the territory of the Sabines, according to the extension given to that district in later times, and hence it is frequently reckoned a Sabine town: but the authorities for its Latin origin are decisive. Virgil enumerates it among the colunies of Allia (Aen. vi. 773); and Dionysius also calls it a colony of that city, founded at the same time with Crustumerium and Fidenae, both of which are frequently, but erroneously, called Sabine citics. (Dionys. ii. 53.) Still more decisive is the circumstance that its name occurs among the cities of the Prisci Latini which were reduced by the elder Taryain (Liv. i. 38; Dionys. iii. 50), and is found in the list given by Dionysius (v. 61) of the cities which concluded the league against Rome in в. c. 493. There is, therefore, no doubt that Nomentum was, at this period, one of the 30 cities of the Latin Leaque (Niebuhr, vol. ii. p. 17, note); nor does it appear to have ever fallen into the hands of the Sabines. It is again mentioned more than once during the wars of the Romans with the Fidenates and their Etruscan allies; and a victory was gained under its walls by the dictator Servilius Priscus, b. c. 435 (Liv. iv. 22, 30, 32) ; but the Nomentani themselves are not noticed as taking any part. They, however, joined with the other cities of Latium in the great Latin War of b. c. 338; and by the peace which followed it obtained the full rights of Roman citizens. (Liv. viii. 14.) From this time we hear no more of Nomentum in history; but it seems to have continucd a tulerably flourishing town; and we
find it retaining its municipal privileges down to a late period. Its territory was fertile, and produced excellent wine; which is celebrated by several writers for its quality as well as its abundance. (Plin. xiv. 4. s. 5 ; Colum. R. R. iii. 3; Athen. i. p. 27, b; Martial, x. 48. 19.) Seneca had a country house and farm there, as well as Martial, and his friends Q. Ovidius and Nepos, so that it seems to have been a place of some resort as a country retirement for people of quiet habits. Martial contrasts it in this respect with the splendour and luxury of Baias and other fashionable watering-places ; and Cornelius Nepos, in like manner, terms the villa of Atticus, at Nomentum, "rusticum praedium." (Sen. Ep. 104 ; Martial, vi. 27, 43, 工. 44, xii. 57 ; Nep. Att 14.)

Even under the Roman Empire there is much discrepancy between our authorities as to whether Nomentum was to be reckoned a Latin or a Sabine town. Strabo ascribes it to the latter people, whose territory he describes as extending from the Tiber and Xumentum to the confines of the Vestini (v. p. 223). Pliny, who appears to have considered the Sabines as bounded by the Anio, naturally includes the Nomentani aud Fidenates among them (iii. 12. s. 17); though he elsewhere enumerates the former among the still existing towns of Latium, and the latter among those that were extinct. In like manner Virgil, in enumerating the Sabine followers of Clausus (Aen. vii. 712), includes "the city of Nomentum," though he had elsewhere expressly assigned its foundation to a colony from Alba. Ptulemy (iii. 1. §62) distinctly assigns Nomentum as well as Fidenae to Latium. Architectural fragments and other existing remains prove the continued prosperity of Nomentum under the Roman Empire: its name is found in the Tabula; and we learn that it became a bishop's see in the third centuiy, and retain.d this dignity down to the tenth. The site is now occupied by a village, which bears the name of La Blentana or Lamentana, a corruption of Civitas Nomentana, the appellation by which it was known in the middle ages. This stands on a small hill, somewhat steep and difficult of access, a little to the right of the Via Nomentana, and probably occupies the same situation as the ancient Subine town: the Roman one appears to have extended itself at the foot of the hill, along the high rad, which seems to have passed through the midst of it.

The road leading from Rome to Nomentum was known in ancient times as the Via Nomentana. (Urell. Inser. 208; Tab. Peut.) It issued from the Porta Collina, where it separated from the Via Salaria, crossed the Anio by a bridge (known as the Pons Nomentanus, and still called Ponte Lamicntana) immediately below the celebrated Mons Sacer, and from thence led almost in a direct line to Nomentum, passing on the way the site of Ficulea, from whence it had previously derived the name of Via Ficulensis. (Strab. v. p. 228; Liv. iii. 52.) The remains of the ancient pavement, or other unquestionable marks, trace its course with accuracy throughout this distance. From Nomentum it continued in a straight line to Ereturn, where it rejoined the Via Suiaria. (Strab. b.c.) The Tabula gives the distance of Nomentum from Rome at xiv. M. P.; the real dintance, according to Nibby, is half a mile more. (Nibby, Dinturni, vol. ii. p. 409, vol. iii. p. 635.)
[E. H. B.]
No'Jila. [Lycarus.]
NOMISTE'EIUM (Nomiotipiov), a town in the
country of the Marcomanni (Buhemia), not far from the banks of the Albis; but its site cannot be determined. (Ptol. ii. 11. § 29 ; Wilhelm, Germanien, p. 229.)
[L. S.]
NONA'CRIS (Núvakpıs: Eth. Narraxplat $\quad$ s, Nosvakpieús). 1. A town of Arcadia. in the district of Pheneatis, and NW. of Pheneus, which is said to have derived its name from Nonacris, the wife of L.gcaon. From a lofty rock above the town descended the waters of the river Styx. [Styx ] Pliny speaks of a mountain of the same name. The place was in ruins in the time of Pausanias, and there is no trace of it at the present day. Leake conjectures that it may have occupied the site of Mesorighi. (Herod. vi. 74 ; Paus. viii. 17. § 6 ; Steph. B. s. v.; Plin. iv. 6. s. 10 ; Sen. Q N. iii. 25 ; Leake, Moren, vol. iii. pp. 165, 169.) From this place Hermes is called Nonacriates (Nuvakpiárys, Steph. B. s. v.), Evander Nonacrius (Ov. Fast. v. 97), Atalanta Nonacria (Ov. Met. riii. 426), and Callisto Nonacrina virgo ( 0 v. Met. ii. 409) in the general sense of Arcadian.
2. A town of Areadia in the territory of Orchomenus, which formed, together with Callia and Dipoena, a Tripolix, (Paus. viii. 27. § 4.)

NOORDA. [Nearda.]
NORA (N $\omega$ oa: Eth. N $\omega \rho$ avds, Steph. B. ; Norensis: Capo di Pula), a city of Sardinia, situated on the $S$. coast of the island, on a promontory now called the Capo di Pula, about 20 miles $\mathbf{S}$. of Ca gkari. According to Pausanias (x. 17. §5) it was the most ancient city in the island, having been founded by an lberian colony under a leader named Norax, who was a grandson of Geryones. Without attaching much value to this statement, it seems clear that Nora was, according to the traditions of the natives, a very ancient city, as well as one of the most considerable in later times. Pliny notices the Norenses among the most important towns of the island; and their name occurs repeatedly in the fraginents of Cicern's oration in defence of M. Aemilius Scaurus. (Cic. pro Scaur. 1, 2. ed. Orell.; Plin. iii. 7. 8. 13; P'tol. iii. 3. § 3.) The pasition of Nors is correctly given by Ptolenny, though his authority had been discarded, without any reason, by several indern writers: but the site has been clearly established by the recent researches of the Comte de la Marmora: its ruins are still extant on a small peninsular promontory near the village of Pula, marked by an ancient church of St. Ftjisio, which, as we learn from ecclesiastical records, was erected on the ruins of Nora. The remains of a theatre, an aqueduct, and the ancient quaps on the port, are still visible, and confirm the notion that it was a place of importance under the Roman government. Several Latin inscriptions with the name of the city and people have also been found; and others in the Phocnician or Punic character, which must belong to the period of the Carthaginian occupation of Sardinia. (le la Marmora, Voyage en Sarduigne, vol. ii. p. 355.)

The Antonine Itinerary (pp. 84. 84), in which the name is written Nura, gives the distance from Caralis as $32 \mathrm{M} . \mathrm{P}$., for which we should certainly read 22: in like manner the distance from Sulci should be 59 (instead of 69) miles, which agrees with the true distance, if we allow for the windings of the coast. (De la Marmora, ib. p. 441.) [E. H. B.]

NORA ( $\tau$ à N $\omega$ pa), a mountain fortress of Cappadocia, on the frontiers of Lycannia, at the foot of Mount Tanrus, in which Eumenes was for a whole
winter besieged by Antigonus. (Dind. xviii. 41; Plut. Eum. 10; Corn. Nep. Eum. 5; Strab. xii. p. 537.) In Strabo's time it was called Neroassus (Nnpoarobs), and served as a treasury to Sicinus, who was striving to obtain the sovereignty of Cappadocia.
[L. S.]
NORBA (Nôp6a: Eth. Napfayds, Norbanus: Norma), an ancient city of Latium, situated on the border of the Volscian mountains, overlooking the Pontine Marshes, and about midway between Cora and Setia. There seems no doubt that Norba was an ancient Latin city; its name is found in the list given by Dionysius of the thirty cities of the League; and again, in another passage, he expressly calls it a city of the Latin nation. (Dionys. v. 61, vii. 13; Niebuhr, rol. ii. note 21.) It appears, indeed, certain that all the three cities, Cora, Norba, and Setia, were originally Latin, before they fell into the hands of the Volscians. The statement that Norba received 2 fresh colony in B. c. 492, immediately after the conclusion of the league of Rome with the Latins, points to the necessity, already felt, of strengthening 2 position of much importance, which was well calculated, as it is expressed by Livy, to be the citadel of the surrounding country ("quae arx in Pomptino esset," Liv. ii. 34; Dionys. vii. 13). But it seems probable that Norba, as well as the adjoining cities of Cora and Setia, fell into the hands of the Volscians during the height of their power, and received a fresh colony on the breaking up of the latter. (Niebuhr, vol. ii. p. 108.) For it is impossible to believe that these strong fortresses had continued in the hands of the Romans and Latins throughout their wars with the Volscians so much nearer home; while, on the other hand, when their names reappear in history, it is as ordinary "coloniae Latinae," and not as independent cities. Hence none of the three are mentioned in the great Latin War of b. c. 340, or the settlement of affairs by the treaty that followed it. But, just before the breaking out of that war, and again in B. c. 327, we find the territories of Cors, Norbs, and Setia ravaged by their neighbours the Privernates, whose incursions drew upon them the rengeance of Rome. (Lir. vii. 42, viii. 1, 19.) No further mention occurs of Norba till the period of the Second Punic War, when it was one of the eighteen Latin colonies which, in B. C. 209, expressed their readiness to bear the continued burthens of the war, and to whose fidelity on this occasion Livy ascribes the preservation of the Roman state. (Liv. xxvii. 10.) It seems to have been chosen, from its strong and secluded position, as one of the places where the Carthaginian hostages were kept, and, in consequence, was involved in the servile conspiracy of the year B. C. 198 , of which the neighbouring town of Setia was the centre. (Liv. xxxii. 2, 26.) [Setin.]

Norba played a more important part during the civil wars of Marius and Sulla; having been occupied by the partisans of the former, it was the last city of Italy that held out, even after the fall of Praeneste and the death of the younger Marius, B. C. 82. It was at last betrayed into the bands of Aemilius Lepidus, the general of Sulla; but the garrison put themselves and the other inhabitants to the sword, and set fire to the town, which was so entirel.y destroyed that the conquerors could carry off no booty. (Appian, B. C. i. 94.) It seems certain that it was never rebuilt: Strabo omits all notice of it, where he mentions all the other towns that burdered the Pontine Marshes (v. p. 237); and,
though Pliny mentions the Norbani among the existing "populi" of Latiom, in another passage he reckons Norba among the cities that in his time had altngether disappeared (iii. 5. s. 9. §§ 64, 68). The absence of all subsequent notice of it is confirmed by the evidence of the existing remains, which belong exclusively to a very early are, without any traces of buildings that can be referred to the period of the Roman Empire.

The existing ruins of Norba are celebrated as one of the most perfect specimens remaining in Italy of the style of construction commonly known as Cyclopean. Great part of the circuit of the walls is still entire, composed of very massive polygonal or radely squared blocks of solid limestone, without regular towers, though the principal gate is flanked by a rude projecting mass which serves the purpose of one; and on the E. side there is a great square tower or bastion projecting considerably in advance of the general line of the walls. The position is one of great natural strength, and the defences have been skilfully adapted to the natural outlines of the hill, so as to take the fullest advantage of the ground. On the side towards the Pontine Marshes the fall is very great, and as abrupt as that of a cliff on the sea-coast: on the other sides the escarpment is less considerable, but still enoagh to render the hill in great measure detached from the adjoining Volscian mountains. The only remains within the circuit of the ancient walls are some foundations and substructions, in the same massive style of construction as the walls themselves: these probably served to support temples and other public buildings; but all traces of the structures themselves have disappeared. The site of the ancient city is wholly uninhabited, the modern village of Norma (a very poor place) being situated about half a mile to the $S$. on a detached hill. In the middle ages there ar se, in the plain at the foot of the hill, a small town which took the name of Ninfa, from the sources of the river of the same name (the Nymphaens of Pliny), close to which it was situated; but this was destroyed in the 13th century, and is now wholly in ruins. The remains of Norbe are described and illustrated in detail in the first volume of the Annali dell Instituto di Corrispondenza Archeologica (Rome, 1829); and views of the walls, gates, \&sc. will be found aliso in Dodwell's Pelasgic Remains (fol. Lond. 1834, pL 72-80).
[E. H. B.]
NORBA CAESARIA'NA or CAESARE'A (N $\omega$. ${ }^{\circ}$ Ba Kaıodpєta, Ptol. ii. 5. § 8, viii. 4. § 3), a Roman colony in Lusitania, on the left bank of the Tagus, lying NW. of Emerita Augusta, and mentioned by Pliny (iv. 20. s. 35) as the Colonia Norbensis Caesariana. It is the modern Alcantara, and still exhibits some Roman remains, especially a bridge of six arches over the Tagus, built by Trajan. This structure is $\mathbf{6 0 0}$ feet long by 28 broad, and 245 feet above the usual level of the river. One of the arches was blown up in 1809 by Col. Mayne, to prevent the French from passing; but it was repaired in 1812 by Col. Sturgeon. It is still a strizing monument of Roman magnificence. The architect, Caius Julius Lacer, was buried near the bridge; and at its entrance a chapel still exists containing an inscription to his memory. (Ford, Handbook of Spain, p. 272; Gruter, Inecr. p. 162; Muratori, Nov. Thes. Inscr. 1064. 6 ; Ukert, vol. ii. pt. 1. p. 396; Sestini, Moneta Vetus, p. 14; Florez, Esp. S. xiii. p. 128.)
[T. H. D.]
NOREIA (Nepthela or Nappia), the ancient
capital of the Taurisci in Noricum, which province seems to have derived its name from it. The town was situated a little to the south of the river Murius, on the road from Virunum to Ovilaba, and formed the central point of the traffic in gold and iron in Noricum; for in its neighbourhood a considerable quantity of gold and iron was obtained. (Strab. v. p. 214; Tab. Peut.) The place is celebrated in history on account of the defeat there sustained, in B. C. 113, by Cn. Carbo against the Cimbri, and on account of its siege by the Boii ahout B. c. 59. (S rab. L. c.; Liv. Epit. lib. 1xiii.; Caes. B. G. i. 5.) Pliny (iii. 23) mentions Noreia among the towns which had perished in his time; but this must be a mistake, for Noreia is still mentioned in the Peutingerian Table, or else Piiny confounds this place with another of the same name. The site of the ancient Noreia is now occupied by the town of Neumark in Styria. (Muchar, Noricum, i. p. 271.) [L. S.]

NO'RICL'M (Noricus ager, Nopikóy), a country on the south of the Danube, bordering in the west on Rinetia and Vindelicia, from which it was separated by the river Aenus; in the north the Danube separated it from Germania Magna ; in the east it bordered on Pannonia; the Mons Cestius forming the boundary, and in the south on Pannonia and Italy, from which it was divided by the river Savus, the Alpes Carnicae, and mount Ocra. It accordingly comprised the modern Upper and Lower Austria, between the Inm and the Danube, the greater part of Styria, Carinthic, and portions of Carniola, Bavaria, Tyrol, and the territory of Salzourg. (Ptol. ii. 13.)

The name Noricum, is traced by some to Norix, a son of Hercules, but was in all probability derived from Noreia, the capital of the country. Nearly the whole of Noricam is a mountainous country, being surrounded in most parts by mountains, sending their ranifications into Noricum; while an Alpine range, called the Alpes Noricae, traverse the whole of the country in the direction from west to east. With the exception of the north and south, Noricum has scarcely any plains, but numerons valleys and rivers, the latter of which are all tributaries of the Danube. The climate was on the whole rough and culd, and the fertility of the soil was not very great; but in the plains, at a distance from the Alps, the character of the country was different and its fertility greater. (Isid. Orig. xiv. 4.) It is probable that the Romans, by draining marshes and rooting out forests, did much to increase the productiveness of the country. (Comp. Claudian, Bell. Get. 365.) But the great wealth of Noricum consisted in its metals, as gold and iron. (Strab.iv. pp. 208, 214 ; Ov. Met. xiv. 711, \&cc. ; Plin. $1 \times x i v .41$ : Sidon. Apoll v. 51.) The Alpes Noricae still contain numerous traces of the mining activity displayed by the Romans in those parts. Norican iron and steel were celebrated in ancient times as they still are. (Clem. Alex. Strom. i. p. 307 ; Horat. Carm. i. 16. 9, Eperl. xvii. 71; Martial, iv. 55. 12; Rutil. Itin. i. 351, \&c.) The produce of the Norican iron mines seems to have been sufficient to supply the material for the manufactories of arms in Pannonia, Moesia, and Northern Italy, which owed their origin to the vicinity of the mines of Noricum. There are also indications to show that the Romans were not unacquainted with the salt in which the country abounds; and the plant called Saliuncs, which grows abundantly in the Alpes Nuricae, was well known to the Romans, and used by them as a yerfume. (Plin. xxi. 20.)

The inhabitants of Noricum, called by the general name Norici (Napukol, Plin. iii. 23; Polyb. xxxiv. 10; Strab. iv. pp. 206, 208), were a Celtic race (Strab. vii. pp. 293, 296), whose ancient name was Taurisci (Plin. iii. 24.) The Celtic character of the people is sufficiently attested also by the names of several Norican tribes and towns. About the year в. c. 58, the Boii, a kindred race, emigrated from Boiohemum and settled in the northern part of Noricum (Caes. B. G.i. 5). Strabo (v. p. 213) describes these Boii as having come from the north of Italy. They had resisted the Cimbri and Teutones, but were afterwards completely annihilated by the Getae, and their country became a devert. ltolemy does not mention either the Norici or the Boii, but enumerates several smaller tribes, such as the Sevaces (Zeoúakes) in the west, the Alanni or Halauni ('A入avvol) in the south, and the Ambisontii ('A $\mu 6 \iota \sigma \delta(v r \iota o$ ), the inhabitants of the banks of the Isonta. In the east the same authority mentions the Norici ( $\mathrm{N} \omega \mathrm{p}$ iкoi) together with two other small tribes, the Ambidravi ('A $\boldsymbol{6}$ 6iסpavol, i. e. dwellers about the Drarus) and the Ambilici ('A $\boldsymbol{A}$ inısoi, or dwellers abont the Licus or Lichias, or Lech). It must be observed that, in this enumeration of Ptolemy, the Norici, instead of forming the great body of the population, were only one of the six smaller tribes.

As to the history of Noricum and its inhabitants, we know that at first, and for a long time, they were governed by kings (Caes. B. C. i. 18; Strab. vii. pp. 304. 313): and some writers speak of a regnum Noricum even after the country had been incorporated with the Roman Empire. (Vell. Pat. ii. 39, 109 ; Suet. Tib. 16.) From early times, the Noricans had carried on considerable commerce with Aquileia (Strab. iv. p. 207, vii. p. 314); but when the Komans, under the command of Tiberins and Drusus, made themselres masters of the adjoining countries south of the Danube, especially after the conquest of Rhaetia, Noricum also was subdued; and about b. C. 13, the country, after desperate struggles of its inhabitants with the Romans, was conquered by Tiberius, Drusus, and P. Silius, in the course of one summer. (Strab. iv. p. 206 ; Dion Cass. liv. 20.) The country was then changed into a Roman province, probably an imperial one, and was accordingly governed by a procurator. (Tac. Hist. i. 11, Ann. ii. 63.) Partly to keep Noricum in subjection, and partly to protect it against foreign invasions, a strong body of troops (the legio il. Italica) was stationed at Lanreacum, and three fleets were kept on the Danube, viz. the classis Comaginensis, the cl. Arlapensis, and the cl. Laureacensis. Roads were nade through the country, several Roman colonies were founded, as at Laureacum and Ovilaba, and fortresses were built. In the time of Ptolemy, the province of Noricum was not yet divided; but in the subsequent division of the whole empire into smaller provinces Noricum was cut into two parts, Noricum Ripense (the northern part, along the Darube),and Noricum Mediterraneum (embracing the southern and more mountainous part), each of which was governed by a praeses, the whole forming part of the diocese of Illyricum. (Not. Imp. Occid. p. 5, and Orient. p. 5.) The more important rivers of Nuricun, the Savus, Dravus, Murcs, Arlape, Ises, Jovaves or Isonta, are described under their respective heads. The ancient capital of the country was Noreia; but, besides this, the country under the Roman

Empire, contained a great many towns of more or less importance, as Boloduhum, Joviacum, Ovilaba, lentia, laureacum, Arelate or Arlaie, Namare, Cetium, Bedaium, Juvayum, Virunum, Celeia, Aguntum. Loncium, and Trurnia.

An excellent work on Noricum in the time of the Romans is Muchar, Dan Rümische Noricum, in two vols. Graetz, 1825; compare also Zeuss, Die Deutschen, p. 240, \&c.
[L. S.]
NOROSBES. [Nonossus.]
NOROSSI. [.Norossus.]
 11), a mountain of Scythia intra Imaum, near which were the tribes of Norosbes (Nopoobeis) Norossi (Nóporfol) and Cachagae (Kaydyal). It must be referred to the $S$. portion of the great meridian claain of the Ural.
[E. B. J.]
NOSALE'NE (No $\sigma a \lambda \neq \eta \eta$ ), a town of Armenia Minor, on the northern slope of Mount Ainanus, in the district called Lavianesine. (Ptol. v. 7. § 10.)
[L. S.]
NOTI-CORNU (Nótou кépas, Strab. xvi. p. 774; P'tol. iv. 7. § 11), or South Horn, was a promontory on the eatern coast of Africa. Ptoleny was the tirst to name this headland Aromata. [W. B. D.]

NOTI-CORNU (Nótov кє́pas, Hanno, ap. Geogr. Grsec. Min. p. 13, ed. Müller; Pwl. iv. 7. § 6), a promuntory on the W. crast of Libya. The Greek version of the voyage of Hanno gives the following statement:-"On the third day after our departure from the Chariot of the Gods ( $\Theta \epsilon \omega \bar{\omega}$ $\left.{ }^{\gamma} \chi \eta \mu a\right)$, having sailed by those streams of fire (previously described), we arrived at a bay called the Southern Horm, at the button of which lay s.n island $\vdots$ :ke the former, having a lake, and in this lake another island, full of suvage people, the greater part of whom were women, whose bodies were hairy, and whom our interpreters called Gorillae. Though we pursued the insn, we could not seize any of them; but all fled from us, escaping over the precipices, and defenuing themselves with stones. Three women were, however, taken; but they attacked their conducturs with their teeth and hands, and could not be prevailed upon to accompany us. Having killed them, we flayed them, and brought their skins with us to Carthage. We did not sail further on, our provisions failing us." A similar story is told by Eudoxus of Cyzicus, as quoted by Mela (iii. 9; comp. Plin. v. 1.) These fires do not prove volcanic action, as it must be recollected that the common custom in those countries -as, for instance, amung the Mandingos, as reportod by Mungo Park - of setting fire at certain seasons to the furests and dry grasis, might have given rise to the statements of the Carthaginian navigator. In our own times, the island of Amsterdan was set down as volcanic from the same mistake. (Daubeny, Volcanoes, p. 440.) The "Chariot of the Gods" Las been identitied with Sagres; the distance of three days' sail agrees rery well with Sherboro, to the S. of Sierra Leone, while Hanno's island coincides with that called Macauley in the charts, the preculiarity of which is, that it has on its S. shore, or sea face, a lake of pure fresh water of considerable extent, just within high-water mark; and inside of, and close to it, another still larger, salt. (Jutrn. Geog. Soc. vol. ii. p. 89.) The Gurillae, no doubt, belonged to the family of the anthropo:d apes; the Mamlingos still call the "Orang-Uutan" by the namie " Toorilla," which, as Kluge (ap. Mülker, L.c.), the latest editur of 山amo, observes, might
ensily assume the furm it bears in the Greek text.
[E. B. J.]
NOTIUM (Nótiov axpov, Ptol. ii. 2. § 5), the SW. cape of Ireland, now Missen Head. (Camden, p. 1336 .)
[T. H. D.]

## notiud. [Calyman]. <br> NOTIUM. [Colophon.]

NOVA AUGUSTA (Noouסauyoúota, or Nooūa Aíyoúrтa, Ptol. ii. 6. § 56), a town of the Areraci in Hispania Tarraconensis, the site of which cannot be identified. (Plin. iii. 3. s. 4.) [T. H. D.]

NOVAE (Noovas, I'tol. iii. 10. § 10 ; called Nobal by I'rocop. de Aedif. iv. 11. p. 308, and Hierocl. p. 636; and Novensis Civ. by Marcellin. Chron. ad an. 487), a town of Lower Moesia on the Danule, and according to the Itin. Ant. (p. 221) and the Not. Imp. (c. 29), the station of the legio $\mathbf{L}$ Italica. It is identified either with Notograd or Gourabeli. At a later period it obtained the name of Eustesium. (Jornand. Get. 18.) [T. H. D.]

NOVANA, a town of Picenum, mentioned orly by Pliny (iii. 13. s. 18), who appears to place it in the neighbourhood of Asculum and Cupre. It is probably , represented by Monte di Nove, about 8 miles N. of Ascoli. (Cluver, Ital. p. 741.) [E.H.B.]
NOVANTAE (Noovávta, Ptol. ii. 3. § 7). a tribe in the SW. of Britannia Barhara, or Caledonia, occupsing Wigtonshire. Their chief towns were Leficopibia and Rerigonium. [T. H. D.]

NOVANTARUM PROMONTURIUM (Noovaytû̀ Kkpov, Ptol. ii. 3. § 1), the inost N. point of the peninsula of the Novantae in Britannia Barbara, now Corsill Point, in Wigtonshire. (Marcian, p. 59. Hudson.)
[T. H. D.]
NOVANUS, a small river of the Vestini, mentioned only by Pliny (ii. 103. s. 106), who places it in the territory of Pitinum, and nitices it for the peculiarity that it was dry in winter and full of water in summer. This circumstance (evidently arising fron. its being fed by the snows of the highest Apennines) seems to identify it with the strean flowing from a source called the Laghetw di Vetojo. (Rmanelli, vol. iii. p. 281.) [E. H. B.]
NOVA'RIA (Novapia, Ptol.: Novara), a considerable city of Cisalpine Gaul, situated on the highroad from Mediolanum to Vercellae, at the distance of 33 miles from the former city. (Itin. Ant. pp. 344, 350.) It was in the territory of the Insubres (Ptol.iii. 1. § 33); but its foundation is ascribed by Pliny to a people whom he calls Vertacomacori, who were of the tribe of the Vocontii, a Gaulish race, according to Pliny, and not, as asserted by Cato, a Ligurian one. (Plin. iii. 17. s. 21.) No mention is found in history of Novaria previous to the Roman conquest; but it seems to have been in the days of the Eimpire a considerable municipal town. It is reckoned by Tacitus (IIist. i. 70) among the "firmissina Transpadanae regionis municipia" which declared in favour of Vitellius, A. D. 69; and was the native place of the rhetorician C. Albucius Silus, who exercised municipal functions there. (Suet. Rhet. 6.) Its municipal rank is confirmed also by inscriptions (Gruter, Inscr. p. 393. 8, \&cc.); and we learn from Pliny that its territory was fertile in vines (xvii. 23. s. 35). After the fall of the Western Empire Novaria is again mentioned as a fortified town of some importance; and it seems to have retained its consideration under the Lombard rule. (Procop. B.G. ii. 12; P. Diac. Hist. Lang. vi. 18.) The modern city of Nocara is a flourishing place, with about 16,000 inhabitants, but has no ancieut rentains. [E. H. B.]

NOVAS, AD, a tortress of Upper Mnesia, situated on the Danube, and on the road from Viminacium to Nicomedia (Itin. Ant. p. 218.) It lay about 48 miles E . of the former of those towns. It is identified with Kolumbatz, where there are still traces of ancient fortifications. [T. H. D.]

NOVAS, AD, a station in Illyricum (Anton. Itin.), which has been identified with Runorich in the Imasche, where several Latin inscriptions have been found, principally dedications to Jupiter, from soldiers of the lst and 13 th legions, who were quartered there. (Wilkinson, Dalmatia and Montemegro, vol. ii. p. 149.)
[E. B. J.]
NOVEM CRARIS, in South Gallia, is placed by the Jerusalem Itin. between Lectoce [Lectock] and Acunum, supposed to be Anconne on the Bhone.
[G. L.]
NOVEM PAGI is the name given by Pliny (iii. 5. s. 8) to a "populus" or community of Etruria, the site of which is very uncertain. They are generally placed, but without any real authority, in the neighbourhood of Forum Clodii. (Dennis's Etruria, vol. i. p. 273.)
[E. H. B.]
NOVE'SIUM, a fortified place on the Gallic side of tne Rhine, which is often mentioned by Tacitus (Hist. iv. 26, 33, 35, \&c., v. 22). It is also mentioned in the Antonine Itin. and in the Table. There is no difficulty about the position of Novesium, which is Neuss, between Colonia Agrippina (Coln) and Gelduba (Gelb or Gellep). [Gelduba.] Novesinm fell into ruirs, and was repaired by Julian, A. d. 359. (Amm. Marc. xviii. 2.)
[G. L.]
NOVIMAGUS, in Gallia, is placed in the Table after Mosa (Meuvi). Mosa is placed by the Antonine Itin. on the road between Andomatunum (Langres) and Tallum (Toul). Novimagus is Neufchiteau, on the same side of the river Moss as Meuvi, but the distance in the Table is not correct.
[G. L.]
NOVIODU'NUM (Nooutudouvor). 1. A town of the Bituriges, in Gallia. Caesar, after the capture of Genabum (Orléans), B. c. 52 , crossed the Loire, to relieve the Boii, who were attacked by Vercingetorix. The position of the Boii is not certain [Boir]. On his march Caesar came to Noviodunum of the Bituriges (B. G. vii. 12), which surrendered. But on the approach of the cavalry of Vercingetorix, the townsmen shut their gates, and manned the walls. There was a cavalry fight between the Romans and Vercingetorix before the town, and Caesar got a victory by the help of the German horse. Upon this the town again surrendered, and Caesar marched on to Avaricuin (Bourges).

There is nothing in this narrative which will determine the site of Noviodunum. D'Anville thinks that Caesar must have passed Avaricum, leaving it on his right; and so he supposes that Nouam, a name something like Noviodunum, may be the place. De Valotis places Noviodunum at Neury sur-Berenjon, where it is said there are remains; but this proves nothing.
2. A town of the Aedui on the Loire. The place wis afterwards called Nevirnum, as the name appears in the Antonine Itin. In the Table it is corrupted into Ebrinum. There is no doubt that Nerimum is Nevers, which has its name from the little river Nierre, which flows into the Loire.

In B. c. 52 Caesar had made Noviodunum, which he describes as in a convenient position on the banks of the Loire, a depôt (B. G. vii. 55). He had his hostages there, corn, his military chest, with the money in it allowed hin from home for the war, his vol II.
own and his army's haggage, and a great number of horses which had been bought for hiin in Spain and Italy. After his failure before Gergovia, the Aedui at Noviodunum massacred those who were there to look after stores, the negotiatures. and the travellers who were in the place. They divided the money among them and the horses, carried off in boats all the corn that they could, and burnt the rest or threw it into the river. Thinking they could not hold the town, they barnt it. It was a regular Gallic outbreak, performed in its true national style. This was a great loss to Caesar ; and it may seem that he was imprudent in leaving such great stores in the power of treacherous allies. But he was in straits during this year, and probably he could not do otherwise than he did.

Dion Cassius (xl. 38) tells the story out of Caesar of the affair of Noviodunum. He states incorrectly what Caesar did on the occasion, and he shows that he neither understood his original, nor knew what he was writing about.
3. A town of the Suessiones, mentioned by Caesar (B. G. ii. 12). Caesar (b. c. 57), after leaving the Axona (Aisne), entered the territory of the Suessinnes, and making one day's long march, reached Noviodunum, which was surrounded by a high wall and a broad ditch. The place surrendered to Caesar. It has been conjectured that Noviodunum Suessionum was the place afterwards called Augusta [Augusta Suessionum], but it is by no means certain.
[G. L.]
NOVIODU'NUM (Nooutoסouvov). 1. A place in Pannonia Superior, on the great road leading from Aemona to Siscia, on the southern bank of the Savus. (Ptol. ii. 15. § 4; Itin. Ant. p. 259; Geogr. Rav. iv. 19, where it is called Novindum.) Its modern name is Novigrad.
2. A town and fortress in Lower Moesia, a little above the point where the Danube divides itself into several arms. (Ptol. iii. 10. § 11.) Near this town the emperor Valens constructed a bridge over the Danube for his expedition against the Greathungi. (Amm. Marc. xxvii. 1.) Some writers have supposed, without any $g$ ond reason, that Noviodunam is the point at which Darius ordered a bridge to be built when he set out on his expedition against the Scrthians. The town, as its name indicates, was of Celtic origin. According to the Antonime Itinerary (p.226) Noriodunum was the station of the legio II. Herculea, while according to the "Notitia Imperii" it had the legio I. Joria for its garrison. During the later period of the Western Einpire, the fortifications of the place had been destroyed, but they were restored by Justinian (Procop. de Aed. iv. 11 ; comp. Hierocl. p. 637 ; and Constant. Porph. de Them. ii. 1, where the place is called Nabióouvos and Nabióסouvov). The Civitas Nova in Jornandes (Get. 5) is probably the same as Noviodunum; and it is generally believed that its site is occupied by the modern Isaczi.
[L. S.]
NOVIOMAGUS (Notoracos). 1. A town in Gsilia, which afterwards had the name Lexovii [LexoviI], which was that of a people of Celtica. In the Greek text of Ptolemy (ii. 8. § 2), as it is at present printed, the word Limen ( $\left.\lambda_{1} \mu \nmid \nu\right)$ is put after the name Noeomagus. But this is not true, for Noriomagus is Lisieux, which is not on the sea, though the territory of the Lexorii extended to the sea.
2. Afterwards Nemetrs, in Gallia, the capital of the Nemetae or Nemetes [Nissetres.] The name 0 o
is Noeomagus in Ptolemy (ii. 9. § 17). In Ammianus Marcellinus (xv. 11, xvi. 2) and the Notitia Imp. it occurs under the name of the people, Nemetes or Nemetae. It is now Speier, near the small stream called Speierbach, which flows into the Rhine. In some of the late Notitiae we read "ciritas Nemetam, id est, Spira." (D'Anville, Notice, ${ }^{\circ} c$.)
3. A town of the Batavi, is the Dutch town of Nymegen, on the Vahalis (Waal). It is marked in the Table as a chief town. D'Anville observes that the station Ad Duodecimum [Duodecimum, Ad] is placed by the Table on a Roman road, and next to Noviomagus ; and that this shows that Noviomagus had a territory, for capital places used to reckon the distances from their city to the limits of their territory.
4. A town of the Bitariges Vivisci. (Ptol. ii. 7. § 8.) [Bituriges Viviscr.]
5. A town of the Remi, is placed by the Table on a mad which, leading from Durocortorum (Reims) to a position named Mosa, must cross the Maas at Mouson [Mosomagus.] Noviomagus is xii. from Durocortorum, and it is supposed by I'Anville to be Neuville.
6. A town of the Treviri, is placed in the Antonine Itin. siii. from Trier, on the Mosel. In the Table it is viii., but as viii. is far from the truth, D'Anville supposes that the $v$. in the Table should be x. The river bends a good deal below Trier, and in one of the elbows which it forms is Neumagen, the representative of Noviomagus. It is mentioned in Ausonius's poem (Mosella, v. 11):-
"Novimagum divi castra inclita Constantini."
It is said that many Roman remains have been found at Neumagen.
7. A town of the Veromandui. In the Antonine Itin. this place is fixed at 27 M. P. from Soissons, and 34 M P . from Amiens. But their distances, as D'Anville says, are not exact. for Noviodunum is Noyon, which is further from Amiens and nearer to Soissons than the Itin. fixes it. The alteration of the name Noviomagus to Noyon is made clearer when we know that in a middle are document the name is Noviomum, from which to Noyon the change is easy.
[G. L.]
NOVIOMAGUS (No九ðuaros, Ptol. ii. 3. § 28), capital of the Regni in Britannia Prima, marked in the Itin. Ant. (p. 472) as the first station on the road from London to Durovernum, and ns 10 miles distant from the former town. It has been variously placed at Woodcote in Surrey, and Holvood Hill in Kent. Camden, who adopts the former site in his description of Surrey (p. 192), seems in his description of Kent (p. 219) to prefer the latter; where on the little river Ravensbourn, there still remain traces of ramparts and ditches of a vast extent. This site would also agree better with the distances in the Itinerary.
[T. H. D.]
NOVIOREGUM, in Gallia, is placed by the Antonine Itin. on a road from Burdigala (Bordeaux) to Mediolanum Santonum (Saintes): and between Tamnum (Talnon or Tallemont) and Mediolanum. D'Anville supposes Noviorezum to be Royan on the north side of the Gironde; but this place is quite out of the direct road to Saintes, as D'Anville admits. He has to correct the distance also in the Itin. between Tamnum and Novioregum to make it agree with the distance between Talmon and Royan.
[G. L.]
NOVIUM (Noot̃tuv, Ptol. ii 6. § 22 ), a torn
of the Artabri in Hispania Tarracnnensis, iden. tified by some with Porto Mouro, by others with Nora.
[T. H. D.]
NOVIUS (Nooúaos, Ptol. ii. 3. § 2), a river on the W. cuast of Britannia Barbara, or Caledonia, flowing into the estuary Ituna (or Soluay Firth), now the Nith.
[T. H. D.]
NOVUM COMUM. [Comum.]
NUAESILM (Novaioiov), a town of Germany, mentioned only by Ptolemy (ii. 11. § 29). It was probably situated in the country of the Chatti, in the neighbourhood of Fritzlar, though others identify its site with that of castle Nienhus in Westphalia, near Neheim. (Wilhelm, Germanien, p. 188.) [L.S.]

NUBA LACUS. [Nigemi.]
NUBAE (Noûsaı, Strab. xxvii. pp. 786, 19 : Ptol. iv. 7. § 30 . Steph. B. s. v.; also Nousaiot and Noutáfes; Nubei, Plin. vi. 30. s. 34), were a negro race, situated S. of Meroe on the western side of the Nile, and when they first appear in history were composed of independent clans governed by their several chieftains. From the Nubae is derived the modern appellation of Nubia, a region which properly does not belong to ancient geography ; yet the ancient Nubse differed in many respects, both in the extent of their country and their national character, from the modern Nubians.

Their name is Aegyptian, and came from the Nile-valley to Europe. From remote periods Aegypt and Aethiopia imported from the regions S . of Meroe ivory, ebony, and gold; and gold, in the language of Aegypt, was Noub; and thus the goldproducing districts S. of Sennaar (Meroe), and in Kordofan, were designated by the merchants trading with them as the land of Noub. Even in the present day the Copts who live on the lower Nile call the inhabitants of the conntry above Assouas (Syene) Nubah,-a name indeed disowned by thnese to whom it is given, and of which the origin and import are unknown to those who give it. Korchofun, separated from Aegypt by a desert which can be easily crossed, and containing no obstructing population of settled and warlike tribes, lay almost within view of Aethiopia and the country N. of it; and the Nubae, though of a different race, were familiarly known by all who drank of the waters of the Lower Nile. The occupations of the Nubae brought them into immediate contact with the mercantile classes of their more civilised neighbours. They were the water-carriers and caravan-guides. They were employed also in the trade of Libya Interior, and, until the Arabian conquest of Eastern Africa, were generally known to the ancients as a nomade people, who roamed over the wastes between the S . of Merne and the shores of the Red Sen. Nor, indeed, were they without settled habitations : the country immediately N. of Kordofan is not entirely barren.but lies within the limit of the periodical rains, and the hamlets of the Nubae were scattered over the meadow tracts that divide the apper braiches of the Nile. The independence of the tribes was probably owing to their dispersed habitations. In the third century A.d. they secm to have become more compact and civilised; for when the lomans, in the reign of Diocletian, A. D. 285305, withdrew from the Nile-valley above Philae, they placed in it and in the stations up the river colonies of Nobatae (Nubae, Noubáסes) from the western desert. These settlements may be regarded as the germ of the present Nabia. Sapported by the homans who needed them as a barrier against
the Blemmyes, and reinforced by their kindred from SW., civilised also in some measure by the introduction of Christianity among them, these wandering negroes became an agricultural race, maintained themselves against the ruder tribes of the eastern deserts, and in the sixth century A. D. were firmly established as far S. perhaps as the Second Cataract. (Procop. Bell. Persic. i. c. 15.) In the following century the Nubse were for a time overwhelmed by the Arabs, and their growing civilisation was checked. Their employment as caravan-guides was diminished by the introduction of the camel, and their numbers were thinned by the increased activity of the slave-trade; since the Arabian invaders found these stardy and docile negroes a marketable commodity on the opposite shore of the Red Ser But within a century and a half the Nubae again appear as the predominant race on the Upper Nile and its tributaries. The entire valley of the Nile, from Iongola inclusive down to the frontier of Aegypt, is in their hands, and the name Nubia appears for the first time in geography.

The more ancient Nubae were settled in the hills of Kordofan, SW. of Meroe. (Rïppell, Reisen in Nubien, p. 32.) The language of the Nubians of the Nile at this day is radically the same with that of northern Kordofan; and their numbers were possibly underrated by the Greeks, who were acquainted with such tribes only as wandered northward in quest of service with the caravans from Coptos and Philae to the harbours of the Red Sea The ancient geographers, indeed, mention the Nubae as a scattered race. Pliny, Strabo, and Ptolemy each assign to them a different position. Ptolemy (iv. 6. § 16) dissevers them from the Nile, doubtless erroneously, and places them W. of the Abyssinian mountains, near the river Gir and in close contact with the Garamantes. Strabo (xvii. p. 819) speaks of them as a great nation of Lybia, dwelling in numerous independent communities between the latitude of Meroe and the great bends of the Nile,i. e. in Dongola Lastly, Pliny (vi. 30. 8. 34) sets them 8 days W. of the island of the Semberritae (Semaar). All these accounts, however, may be reconciled by assuming Kordofan to have been the original home of the Nubae, whence they stretched themselves N. and W. accordingly as they found room for tillage, caravan routes, or weaker tribes of nomades.

The Pharaohs made many settlements in Nubia, and a considerable Aegyptian population was introduced among the native Aethiopian tribes as far S. as the island of Gagaudes (Argo), or even Gebel-el-Birkeh. (Lat. $18^{\circ} 25^{\prime}$ N.) It is not certain whether any of the present races of Nubia can be regarded as descendants of these colonists. Their presence, however, is attested by a series of monuments embracing nearly the whole period of Aegyptian architecture. These monuments represent three eras in architectural history. (1) The first comprehends the temples cut in the sides of the mountains; (2) the second, the temples which are detached from the rocks, bat emulate in their massive proportions their original types; (3) the third embraces those smaller and more graceful edifices, such as are those of Gartaas and Dandour, in which the solid masses of the first style are wholly laid aside. Of these structures, howerer, though seated in their land, the Nubae were not the authors ; and they must be regarded either as the works of a race cognate with the Aegyptians, who spread their civi-
lisation northward through the Nile-valley, or of colonists from the Thebaid, who carved upon the walls of Ipsambul. Semneh, and Soleh the titles and victories of Bameses the Great. [W. B. D.]

NUCE'RIA (Noukepla: Eth. Noukepivos or Nouкpivos: Nucerinus). 1. Surnamed Alpaterna (Nocera dei Pagani), a considerable city of Campania, situated 16 miles SE. from Nola, on the banks of the river Sarnus, about 9 miles from its mouth. (Strab. v. p. 247 ; Plin. iii. 5. s. 9 ; Itin. Ant. p. 109.) The origin of its distinctive appellation is unknown; the analogous cases of Teanum Sidicinum and others would lead us to suppose that the Alfatemi were a tribe or people of which Nuceria was the chief town; but no mention is found of them as such. Pliny, however, notices the Alfaterni among the "populi" of Campania, apart from Nuceria (Plin. iii. 5. s. 9); and we learn from their coins that the inhabitants themselves, who were of Oscan race, used the designation of Nucerini Alfaterni (" Nufkrinum Alafaternum"), which we find applied to them both by Greek and Roman writers (Noukepla ì 'A入фat ${ }^{\prime} p \boldsymbol{\eta}$ калоuнévŋ, Diod. xix. 65; Nuceria Alfaterna, Liv. ix. 41; Friedlïnder, Oskische Münsen, p. 21). The first mention of Nuceria in history occurs in B.c. 315, during the Second Samnite War, when its citizens, who were at this time on friendly terms with the Romans, were induced to abandon their alliance, and make common cause with the Samnites (Diod. xix. 65). In s.c. 308 they were punished for their defection by the consul Fabins, who invaded their territory, and laid siege to their city, till he compelled them to an onqualified submission. (Liv. ix. 41.) No subsequent notice of it occurs till the Second Punic War, when, in B.c. 216, Hannibal, having been foiled in his attempt upon Nola, turned his arms against Nuceria, and with mach better success; for though the citizens at first offered a vigorous resistance, they were soon compelled by famine to surrender: the city was given up to plunder and totally destroyed, while the surviving inhabitarts took refuge in the other cities of Campania. (Liv. xxiii. 15; Appian, Pun. 63.) After Hannibal had been compelled to abandon his hold on Campania, the fugitive Nucerians were restored (B.c. 210); but, instead of being again established in their native city, they were, at their own request, settled at Atella, the inhabitants of that city being transferred to Calatia. (Liv. xxvii. 3; Appian. Annib. 49.) How Nuceria itself was repeopled we are not informed, but it is certain that it again became a flourishing municipal town, with a territory extending down to the sea-coast (Pol. iii. 91), and is mentioned by Cicero as in his day one of the iirportant towns of Campania. (Cic. de Leg. Agr. ii. 31.) Its territory was ravaged by C.Papius in the Social War, b.c. 90 (Appian, B.C.i. 42); and if we may trust the statement of Florus, the city itself was taken and plundered in the same war. (Flor. iii. 18. §11.) It again suffered a similar calamity in B. C. 73, at the hands of Spartacus (Id. iii. 20. §5); and, according to Appian, it was one of the towns which the Triumvirs assigned to their veterans for their occupation (Appian, B. C. iv. 3): bat from the Liber Coluniarum it would appear that the actual colony was not settled there until after the establishment of the Empire under Augustus. (Lib. Colon. p. 235.) It is thère termed Nuceris Constantia, an epithet found also in the Itinerary. (Itin. Ant. p. 129.) Ptolemy aiso attests its colonial rank (Ptol. iii. 1. §69); and we learn from Tacitus
that it received a fresh accession of veteran soldiers as colonists under Nero. (Tac. Ann. xiii. 31.) It was not long after this new settlement that a violent quarrel broke out between the colonists of Pompeii and Nuceria, which ended in a serious tumult, not without bloodshed (Id. xiv. 17). This is the last mention of Nuceria that we find in history under the Roman Einpire; but its name appears in the Itineraries, and is incidentally nentioned by Procopius. The decisive battle between Narses and Teïas, which put an end to the Gothic monarchy in Italy, A. D. 533, was fought in its neighbourhood, on the banks of the Sarnus, called by Procopius the Draco. (Procop. B. G.iv. 35.) We learn also that it was an episcopal see in the early ages of Christianity, a dipnity that it has retained without interruption down to the present day. Its modern appellation of Nocera dei Pagani is derived from the circumstance, that in the 13th century a body of Saracens were established there by the emperor Frederic II. There are no remains of antiquity at Nocera, except a very old church, which is supposed to have been originally an anc:ent temple. (Romanelli, vol. iii. p. 602.)

It was at Nuceria that the great line of high-road, which, quitting the Appian Way at Capua, proceeded directly S. to Rhegium, began to ascend the range of hills that separate the Bay of Naples from that of Salerno, or the Posidonian gulf, as it was called by the ancients. Strabo reckons the distance from Pomjeii, through Nuceria to Marcina, on the latter bay, at 120 stadia ( 15 Roman miles) (Strab. v. p. 251 ), which is less than the truth; Nuceria being, in fact, 7 gengraphical miles, or 70 stadia, from Pompeii, and the same distance from the sea near Salerno. The inscription at Polla (Forum Popillii) gives the distance from thence to Nuceria at 51 M . P.; while it reckons only 33 from thence to Capua. The Itinerary gives 16 from Nuceria to Nola, and 21 from Nola to Capaa. (Orell. Inscr. 3308; Mominsen, Inscr. R. N. 6276; Itin. Ant. p. 109).

2. (Nocera), a town of Umbria, situated on the Flaminian Way, between Forum Flaminii und the nctual pass of the Apennines. It is mentioned by Strabo as a town of considerable population, owing to its situation on so frequented a line of road, as well as to a manufacture of wooden vessels for household utensils. Pliny designates the inhabitants as "Nucerini cognomine Fisonienses et Camellani," but the origin of both appellations is quite unknown. Ptolemy terms it a Colonia, but it is not mentioned as such by any other writer. If this is not 2 mistake, it must have been one of thase settled by Trajan or Halrian. (Zumpt, de Colon. p. 401.) The modern city of Nocera, a small place, though an episcopal see of great antiquity, undoubtedly retains the ancent site. It was situatel 12 miles from Forum Flaminii and 15 from Fulginiam (Foligno). (Strab. v. p. 227 ; Plin. iii. 14. s. 19 ; Ptol. iii. 1. § 53 ; Itin. Ant. p. 311 ; Itin. Hier. p. 614.)
3. A town of Cispalane Gaul, mentioned only by Ptolemy (iii. 1. §46), from whom we learn that it was situated in the neighbourhood of Regium Le-
pidum and Mutina; but was not on the line of the Via Aemilia. It is probably represented by the village of Luzzara, near Guastalla, on the right bank of the Po. (Cluver. Ital. p. 281.)
4. A city of Brattium, in the neighbourhood of Terina, not mentioned by any ancient author, but the existence of which is clearly established by its coins, which have the Greek inscription NOTKPIN $\Omega$ N (those of Nuceria Alfaterna haring aniformly Oscan legends), and indicate a close connection with Terina and Rhegium. Its site is marked by the modern town of Nocera, situated on a hill about 4 miles from the Tyrrhenian sea and the mouth of the river Savuto. Considerable remains of an ancient city are still visible there, which bave been regarded by many writers as those of Terina (Milingen, Ancient Coins, p. 25, Numismatique de l'Anc. Italie, p. 58). It is not improbable that the Noukpia cited by Stephanus of Byzantium from Philistus is the city in question, though he terms it a city of Tyrrhenia, which must in any case be erroneous.
[E. H. B.]

COIN OF NUCERIA IN BRUTTIUS.
NUDIONNUM, in the Table, is probably the same place as Noeudunum of the Diablintes. [Noeodunum.]
[G. L.]
NU'DIUM (Noúfiov), a town founded by the Minyae, in Triphylia in Elis, but which was destroyed by the Eleians in the time of Herdotus (iv. 148).

NUITHONES, a German tribe, mentioned by Tacitus (Germ. 40) as iuhabiting the banks of the Albis (Elbe), to the SW. of the Longobardi. They in common with other neighbouring tribes worshipped Ertha, that is, the Earth. In some editions the name is written Nurtones; so that nothing definite can be said either in regard to the import of their name or to the exact locality they inhabited. [L.S.]

NUIUS (Noutou ${ }^{2} \times 60 \lambda a l$, Ptol. iv. 6. § 6 ; in the Latin translation, " Nunii ostia"), a river of Interior Libya, which discharged itself into the sea to the S. of Mauretania Tingitana. It has been identified with that which is called in the Ship-journal of Hanno, Lixus ( $\boldsymbol{\Lambda}$ (\%os, Geog. Graec. Min., p. 5, ed. Müller), and by Scylax of Caryanda (if the present text be correct), Xion ( $\Xi \bar{\omega} \nu$, p. 53), and by Polybius (ap. Plin. v. 1), Cosenvs. The Lybian river must not be confounded with the Mauretanian river, and town of the same name, mentioned by Scylax (l. c.: comp. Artemidorus, ap. Strab. xvii. p. 829; Steph. B. s. v. $\Lambda i \gamma \xi ; \Lambda i(\mathcal{C}$, Hecat. Fr. 328; $\Lambda(\xi$, Ptol. iv. 1. §§ 2, 13; Pomp. Mela, iii. 10. §6; Plin. $\nabla$. 1), and which is now represented by the river called by the Arabs Wady-el-Khos, falling into the sea at El-'A risch, where Baith (Wanderungen, pp. 23-25) found ruins of the ancient Lixus. The Lixus of Hanno, or Nuius of Ptolemy, is the QuadDra (Wady-Dra), which the S. declivity of the Allas of Marocco sends to the Sahara in lat. $32^{\circ}$;a river for the greater part of the year nearly dry, and which Renou (Explur. de l'Alg. Hist. et Geogr. vol. viii. pp. 65-78) considers to be a sixth longer than the Rhine. It flows at first from N. to S., until, in N. lat. $29^{\circ}$ and $W^{\prime}$. long. $5^{\circ}$, it turns almost at right
angles to its former course, rans to the $W$., and after passing through the great fresh-water lake of Debaid, enters the sea at Cape Nun. The name of this cape, so celebrated in the Portuguese discoveries of the 15 th century, appears to have a much older origin than has been supposed, and goes back to the time of Ptolemy. Edrisi speaks of a town, Nul or Wadi Nun, somewhat more to the S ., and three days' journey in the interior: Leo Africanus calls it Belad de Non. (Humboldt, Aspects of Nature, vol. i. pp. 118-120, trans.)
[E. B. J.]
NUMANA (Noúrava: Eth. Nuinanas: Umana), a town of Picenum, situated on the sea-coast of that province, 8 miles $S$. of Ancona, at the southern extremity of the mountain promontory called Mons Cumerus. (Plin. iii. 13. s. 18; Ptol. iii. 1. § 21 ; Mel. ii. 4. § 6 ; ltin. Ant. p. 312.) Its foundation is ascribed by Pliny to the Siculi; but it is doubtful whether this is not a mistake; and it seems probable that Numana as well as Ancona was colonised by Sicilian Greeks, as late as the time of Dionysius of Syracuse. No mention of it is found in history; but Silius Italicus enumerates it among the towns of Picenum in the Second Punic War; and we learn from inscriptions that it was a municipal town, and apparently one of some consideration, as its name is associated with the important cities of Aesis and Auximum. (Sil. Ital. viii. 431; Gruter, Inser. p. 446. 1. 2 ; Orell. Inscr. 3899, 3900.) The Itineraries place it 8 miles from Ancona and 10 from Potentia. (Itin. Ant. p. 312; Tab. Peut.) It was in early ages an episcopal see, but this was afterwards united with that of Ancona. The ancient city was destroyed by the Lounbards in the eighth century; and the modern Unana is a poor place.
[E. H. B.]
NUMANTIA (Noumaitia, Ptol. ii. 6. § 56 ; Nopavtía, Steph. B. s. v.), the capital of the Arevaci in Hispania Tarraconensis, and the most famous city in ail Celtiberia, according to Strabo (iii. p. 162) and Mela (ii. 6). Pliny however (iii. 3. 3. 4), places it in the territory of the Pelendones, which also agrees with the Itin. Ant. (p 442). It is represented as situated on an eminence of moderate height, but great steepress, and approachable only on one side, which was defended by ditches and intrenchments. (Flor. ii. 18; Oros. v. 7 ; Appian, B. Hisp. 76, 91.) The Durius flowed near it, and also another sinall river, whose name is not mentioned. (Appian, B. Hisp. 76 ; Dion Cass. Fr. 82. ed. Fabr. i. p. 35.) It was on the road from Astarica to Caesaraugusta (Itin. Ant. l. c.), and had a circumference of 24 stadia (Appian, B. Hisp. 90; Oros. l. c.) ; but was not surruunded with walls. (Florus, $l$ c.) Its memorable siege and destruction by Scipio Africanus, в. c. 134, are related by Appian (48-98), Eutropius (iv. 17), Cicero (de Off. i. 11), Strabo ( $L$ c.), Scc. The ruins at Puente de Don Guarray probably mark the site of this once famous city. (Aldrete, Ant. Hisp. i. 6; Florez, Esp. S. vii. p. 276; D'Anville, Mém. de l'Acad. des Inscr. vol. xl. p. 770, cited by Ukert, vol. ii. pt. 1. p. 455.)
[T. H. D.]
NUNE'NIUM (Nou ${ }^{2} \boldsymbol{\eta} i o v$, Stadiasm. 298), a small ixland with a spring of fresh water, 55 stadia from Paphos; perhaps the same as that described by Pliny ("contra Neampaphum Hierocepia," v. 35). Strabo (xiv. pp. 683, 684) has an inland town Hiesoceria
[E. B. J.]
NUMI'CIUS (Nomictos: Rio Turto), a small rive: of Latium, flowing into the sea between Laviniun
and Ardea. It is mentioned almust exclusively in reference to the legendary history of Aeneas, who, according to the poetical tradition, adopted also by the Roman historians, was buried on its banks, where he was worshipped under the name of Jupiter Indiges, and had a sacred grove and Heroum. (Liv. i. 2; Dionys. i. 64 ; Vict. Orig. Gent. Rom. 14 : Ovid. Met. xiv. 598-608; Tibull. ii. 5.39-44.) Immediately aljoining the grove of Jupiter Indiges was one of Auna Perenna, originally a Roman divinity, and probably the tutelary nymph of the river, but who was brought also into connection with Aeneas by the legends of later times, which represented her as the sister of Dido, queen of Carthage. The fables connected with her are related at full by Ovid (Fast. iii. 545-564), and by Silius Italicus (viii. 28201). Both of these poets speak of the Numicius as a small stream, with stagnant waters and reedy banks: but they afford no clue to its situation, beyond the general intimation that it was in the Laurentine territory, an appellation which is sometimes used, by the poets especially, with very vague latitude. But Pliny, in enumerating the places along the coast of Latium, mentions the river Numicius between Laurentum and Ardea; and from the narrative of Dionysius it would seem that he certainly conceived the battle in which Aeneas was slain to have been fought between Lavinium and Ardea, but nearer the former city. Hence the Rio Torto, a small river with a sluggish and winding stream, which forms a considerable marsh near its outlet, may fairly be regarded as the ancient Numicius. It would seem from Pliny that the Lacus Jovis Indigetis was situated on its right bank. (Plin. iii. 5. s. 9; Dionys. i. 64; Nibby, Dintormi, vol. ii. p. 418.)
[E. H. B.]
NUMIDIA, the central tract of country on the N. coast of Africa, which forms the largest portion of the conntry now occupied by the French, and called Algeria or Algéria.

## I. Name, Limits, and Inhabitants.

The continuous system of highlands, which extends along the coast of the Mediterranean, was in the earliest period occupied by a race of people consisting of many tribes, of whom, the Berbers of the Algerine territories, or the Kabyles or Quabaily, as they are called by the inhabitants of the cities, are the representatives. These peoples, speaking a language which was once spoken from the Fortunate Islands in the W. to the Cataracts of the Nile, and which still explains many names in ancient African topography, and embracing tribes of quite different characters, whites as well as blacks (though not negroes), were called by the Romans Numidae, not a proper name, but a common denomination from the Greek form voudö́s. (Strab. ii. p. 131, xvii. pp. 833, 837.) Afterwards Numida and Numidis (Noumbia and $\dot{\eta}$ Nouadia or Nouadiкt, Ptol. iv. 3; Pomp. Mela, i. 6; Plin. v. 2, vi. 39) became the name of the nation and the country. Sometimes they were called Maurusii Numidae (Maupoúloi Noudées, Appian, B.C. ii. 44), while the later writers always speak of them under the general name of Mauri (Amm. Marc. xxix. 5; Procop. B. V. ii. 4.) The most powerful among these tribes were the Massyu (Maroviniot, Polyb. iii. 44 ; Strab. ii. p. 131, xvii. p. 829 ; Dionys 187; Ma xvi. 170; Massyla gens, Liv. xxiv. 48), whose territories extended from the river Ampsaga to Tretum Prom. (Seba Rüs) ; and the Massafsyla (Mac-

бauбúdıoı, Polyb. iii. 33; Strab. ii. p. 131, xvii. pp. 827, 829, 833; Dionys. 187; ; Sall. Jug. 92; Plin. $\begin{gathered}\text {. } \\ \text {, }\end{gathered}$ 1; Masdesyli, Liv. xxviii. 17), occupying the country to the W. as far as the river Mulucha. Nomad life, under all the diffierences of time and space, presents one uniform type, the "armentarius Ater" of Virgil (Georg. iii. 344), and Sallust (Jug. 18), who, as governor of Numidia, had opportunity for observation, may be recognised in the moxlern Kabyle. These live in huts made of the branches of trees and corered with clay, which resemble the "magalia" of the old Numidians, spread in little groups over the side of the mountains, and store away their grain in holes in the ground. Numidia, a nation of horsemen, supplied the Carthaginians with the wild cavalry, who, without saddle and bridle, scoured the country, as if horse and rider were one creature. Masinissa, who, till the age of ninety, could spring upon his horse's back (Appian, Pun. 107), represents the true Numidian; faithless, merciless, unscrupulous, he is a man of barbaric race, acquiring the tastes and the polish of civilisation without any deeper reformation. Agriculture and the arts of life were introduced under Masinissa, and still more by Micipsa. After the fall of Carthage, the Romans presented the Numidian kings with its library; but Punic influence must have been very slight. Procopius (B.V. ii. 10), indeed, says, of the inhabitants of both Mauretania and Numidia, that they used the Phoenician langnage in his time; but it is extremely improbable that they ever used Punic, nor can it be supposed that Procopius possessed the information requisite for ascertaining the fact. They used a language among themselves, unintelligible to the Greeks and Romans, who imagined it to be Punic, while there can be little doubt that it was the idiom which they spoke before the arrival of the Phoenician colonists, and which continued to be their vernacular dialect long after the Carthaginians and Romans had ceased to be known among them, even by name. Latin would be the language of the cities, and must have been very generally intelligible, as the Christian texchers never appear to have used or to have thought it necossary to learn any other language.

## II. Physical Geography.

Recent investigation has showu that the distinction between what was called the "Greater and the Lesser Atlas" must be abandoned. There is only one Atlas, formerly called in the native language "Dyris;" and this name is to be applied to the foldings, or succession of crests, which form the division between the waters flowing to the Mediterranean and those which flow towards the Sahara lowland. The E. prolongation of the snow-covered W. summits of the Atlas, has a direction or strike from E. to W. Numerous projections from this chain run out into the sea, and form abrupt promontories: the first of these in a direction from $E$. to W., was Hippi Prom, ("Intov akpa, Ptol. iv. 3. §5:C. de Garde, or Râs-el-Hamrah); then Stoborrum (Z $\tau$ ó6oppoy, Ptol. Le c.: C. de Fer, Rais Hidiul); Resicada; Collops Magnes; at Tres Prom., or the cove at Seba Rus, the Sinus Numipicus (Noupiঠíкos кб́лтos, Ptol. iv. 3. § 3), into which the rivers Ampsaga, Audus, and Sisar discharged themselves, with the headland laimails (Dschidscheli) and Saldae (C. Carbon, Bougie, Bedschijich); after passing Resccurum and C. Matifi or Ras Temendfiuz, the bold shores of the Bay of A hiers, to which the ancients gave no name,
succeed. The chief rivers were the Tusca, the boundary between Numidia and the Roman propince, the Rubricatus or Ubus, and the Ampsaga. The $S$. boundaries, towards the widely extended low region of the Sahara, are still but little known. From the researches of MM. Fournel, Renou, and Carette, it appears that the Sahara is composed of several detached basins, and that the number and the population of the fertile oases is much greater than had been imagined. Of larger wild animals, only gazelles, wild asses, and ostriches are to be met with. The lion of the Numidian desert exists only in imagination, as that animal naturally seeks spots where food and water can be found. The camel, the "ship of the desert," was unknown to the ancient horsemen of Numidia; its diffusion mast be attributed to the period of the Ptolemies, who employed it for commercial operations in the valley of the Nile, whence it spread through Cyrene to the whole of the NW. of Africa, where it was first brought into military use in the train of armies in the times of the Caesars. The later introduction of this carrier of the desert, so important to the nomadic life of nations, and the patriarchal stage of development, belongs to the Mohammedan epich of the conquering Arabs. The maritime tract of this country displays nearly the same vegetable forms as the coasts of Andalusia and Valencia. The olive, the orange-tree, the arborescent ricinus, the Chamaerops humilis, and the date-tree flourish on both sides of the Mediterranean; and when the warmer sun of N. Africa produces different species, they aro generally belonging to the same families as the European tribes. The marble of Numidia, "giallo antico," golden yellow, with reddish veins, was the most highly prized at Rome for its colour. (Plin. xxxv. 1, xxxvi. 8.) The pavement of the Comitium at Rome consisted of slabs of this beautiful material. (Niebuhr, Lect. on Anc. Geog. vol. ii. p. 80.)

## III. History and Political Geography.

The Romans became acquainted with these tribes in the First Punic War, when they served as the Carthaginian cavalry. After the great victory of Regulus, the Numidians threw off the yoke of Carthage. (Polyb. i. 31; Diod. Fragm. Vat. xxiii. 4.) The wild array of their horsemen was the most formidable arm of Hannibal, and with the half-caste Mutines at their head, carried destruction throughout Si cily. In the great struggle of the Second Punic War the Romans made use of these faithless barbarians with great success. The services of Masinises prince of the E. Numidians, were not unrewarded, and, at the end of the war, he obtained the dominions of Syphax, his rival, and prince of the W. tribes, the Massaesyli, and a great part of the Carthaginian territory ; so that his kingdom extended from the Mulucha on the W., to the Cyrenaica on the E, completely surrounding the small strip allowed to Cartbage on the coast. (Appian, Pun. 106). When Masinissa died he left bis kingdom to his three sons, Gulussa, Micipsa, and Mastanabal. Gulussa and Mastanabal died; the latter left no legitimate children, but ooly Jugurtha and Gauda, sons by a concubine; and thus the vast dominions of Numidia fell into the hands of Micipsa, the Philhellene. He had two sons, Adherbal and Hiempsal, with whom he associated Jugurtha in the throne. The latter, sparning a divided empire, murdered Hiempsal, and compelled Adherbal to fly to Rome, where he appealed to the senute against the usurpation of his cousin. The
senators, many of whom were briled by Jucurtha, sent commissioners, who divided the kingdom in such a mamer that Jugurtha obtained the mosit warlike and most productive portion of it. New quarrels broke out between the rival princes, when Jugurtha besieged Adherbal in Cirta, and, after compelling him to surrender, put him to a cruel death. War was declared against Jugurtha by Rome, which, after being carried on with varying success, was finished by his capture and death in 8. c. 106. The kingdom was given to Hiempsal II., who was succeeded by his kon Juba I., who in the civil wars allied himself to the Pompeians. On the death of Juba I., B. c. 46, Numidia was made a Ruman prorince by Julius Caesar, who put it in the hands of Sallust, the historian. A. D. 39, Caligula changed the government of the province, giving apparently, co-ordinate powers to the proconsul and the legatus. [See the article Africa, Vol. I. p. 70, where the arrangements are fully de-cribed.] The "legatus Aug. pr.pr. Numidiae"(Orelli, Inscr. 3672) re-ided at Cirta, the capital of the old Numidian kings, which, since the time of Augustus, had acquired the "jus coloniae." Besides Cirta, there were many other "coloniae," of which the following names are known:-Sicca: Thamcicadis; Aphrodislum; Calcua; Tabraca; Tibiga; Tiridromum; Tuburnica; Theveste; Medadra; Ammedera; Simittu; Rusicade; Hippo Regius; Milevm; Lambaesa; Thelepte Lares. Bulla Regin was a " liberum oppidum." The number of towns must have been considerable, as, according to the "Notitia," Numidia had in the fif $h$ century 123 episcopal sees. (Marquardt, in Bekker's Hanlbuch der Röm. Alt. pt. iii. p. 229.) During the Roman occupation of the country, that people, according to their usual plan, drove several roads through it. Numerous remains of Roman posts and stations, which were of two kinds, those which secured the roads, and others which guarded the estates at some distance from them, are still remaining (I.ondon Geog. Journ. vol. viii. p. 53) ; and such was their excellent arrangement that, at first, one legion, "IIIa Aug.". to which afterwards a second was added, "Macriana liberatrix" (Tac. Hist. i. 1]), served to keep the African provinces secure from the incursions of the Moorish tribes. The long peace which Africa enjoyed, and the flourishing corn trade it carried on, had converted the wild Numidian tribes into peaceful peasants, and had opened a great field for Christian exertion. In the fourth century, Numidia was the chosen seat of the Donatist schism. The rarages of the Circumcellions contributed to that destruction, which was finally consummated by the Vandal invasion. Justinian sent forth his troops, with a view of putting down the Arians, more than of winning new provinces to the empire The work was a complete one; the Vandals were exterminated. Along with the temporary rule of Constantinople, the native population of Africa reappeared. The most signal victory of the cross, as it appeared to that generation, prepared the way fur the victory of the crescent a century afterwards. [E.B. J.] NUMIDIA NOVA. [AFrica, Vol. I. p. 71, a.] NUMIDICUS SINUS. [Numidia.]
NUMISTRO (Nouniotpw, Ptol.; Noulotpown Plut.: Eth. Numestranus), a town of Lucania, apparently near the frontiers of Apulia, near which a battle was fought between Hamibal and Marcellus, in B.c. 210, rithout any decisive result CLiv $x \times v i i$.

2; Plut. Marc. 24). From the narrative of Livy, which is copied by Plutarch, it is clear that Numistro was situated in the northern part of Lucania, as Marcellus marched out of Samnium thither, and Hannibal after the battle drew off his forces, and withdrew towards Apulia, but was overtaken by Marcellus near Venusia. Pliny also enumerates the Numestrani (evidently the same people) among the municipal towns of Lucania, and places them in the neighbourheod of the Volcentani. Hence it is certainly a mistake on the part of Ptolemy that he transfers Numistro to the interior of Bruttium, unless there were two towns of the name. which is scarcely probable. Cluverius, however, follows Ptolemy, and identifies Numistro with Nicustro in Calabria, but this is certainly erroneous (Plin. iii. 11. 8. 15 ; Ptol. iii. 1. § 74 ; Cluver. Ital p. 1319). The site conjecturally assigned to it by Romanelli, near the modern Muro, about 20 miles NW. from Potenea, is plausible enough, and agrees well with Pliny's statement that it was united for municipal purposes with Volceii (Buccino), which is about 12 miles distant from Muro (Romanelli, vol. i. p. 434). Some ancient remains and inscriptions have been found on the spot.
[E. H. B.]
NURA. [Baleares, p. 374, a.]
NU'RSIA (Noupola: Eth. Nursinus: Norcia), a city of the Sabines, situated in the upper part of the valley of the Nar, at the foot of the lofty group of the Apennines, now known as the Monti della Sibilla. The coldness of its climate, resulting from its position in the midst of high mocntains, is celebrated by Virgil and Silius Italicus. (Virg. Aen. vii. 716; Sil. Ital. viii. 417.) The first mention of it in history is in the Second Punic War (b. c. 205), when it was one of the cities which came forward with volunteers for the armaments of Scipio. (Liv. xxviii. 45.) As on this occasion the only three cities of the Sabines mentioned by name are Nursia, Reate, and Amiternam, it is probable that Nursia was, as well as the other two, one of the most considerable places among the Sabines. It was a municipal town under the Roman government (Orell. Inscr. 3966 ; Plin. iii. 12. s. 17 ; Ptol. iii. 1. § 55), ard we learn that its inhabitants were punished by Octavian for their zealous adherence to the republican party, and the support they afforded to L. Antonius in the Perusian War. (Suet. Aug. 12; Dion Cass. xlviii. 13.) It was the birthplace of Vespasia Polla, the mother of the emperor Vespasian; and the monuments of her family existed in the time of Suetonius at a place called Vespasise, 6 miles from Nursia on the road to Spoletium. (Suet. Vesp. 1.) The "ager Nursinus" is mentioned more than once in the Liber Coloniarum (pp. 227, 257), but it does not appear that it ever received a regular colony. We learn from Columella and Pliny that it was celebrated for its turnips, which are also alluded to by Martial (Colum. x. 421 ; Plin. xviii. 13. s. 34; Martial, xiii. 20.) From its secluded position Nursia is not mentioned in the Itineraries, but there is no doabt that it continued to exist throughout the period of the Roman Empire. It became an episcopal see at an early period, and is celebrated in ecclesiastical history as the birthplace of St. Benedict, the founder of the first great monastic order.

It is said that remains of the ancient walln still exist at Norcia, in the same inassive polygonal style as those near Reate and Amiternum (Petit-Radel, Ann.d. Inst Arch. 1829, p. 51), but they have never been described in detail.
[E. H. B.]
004

NYCBII. [SyRtica.]

## NYGBENI. [Syrtica.]

NYMPHAEA, NYMPHAEUM. 1. (Nu $\mu \phi$ ala, Scylax, p. 29; N $0 \mu$ фаноу, Strab. vii. p. 309 ; Appian, B. Mithr. 108; Ptol. iii. 6. § 3; Anon. Periph p. 5 ; Plin. iv. 26; Craterus, ap. Harpocrat. e. v.; Nymphare, Geog. Rav. r. 2), a Milesian colony of the Tauric Chersonese, with a good harbour. (Strab. l.c.) The ruins of this town are to be found on the S. point of the gulf now called the Lake of Tchowrbache. (Dubois de Montperreux, Voyage Autowr du Caucase, vol. v. pp. 246-251; Marigny Taitbout, Portulan de la Mer Noire, p. 74.) Pallas (Reise in d. Südl. Statchalt. Russland's, vol. ii. p. 341) fixes it between the Paulofka Battery and Kamyschburnu.
2. The harboar of Lissus in Illyricum, and 3 M. P. from that town (Caesar, B. C. iii. 26), on a promontory of the same name. (Plin. iii. 26.) [E.B.J.]

NYMPHAEA (Nu $\quad$ фaia), a small island off the coast of Ionia, is mentioned only by Pliny ( $\mathbf{v}$. 37). Respecting Nymphaes as a name of Cos, ree Cos.
[L. S.]
NYMPHAEUM (Nú $\mu \phi a \_o v$, Strab. vii. p. 330 ; Ptol. iii. 13. § 11), the promontory to the S. of the peninsula of Acte, from whence Mt. Athos rises abruptly to the very summit. It is now called Kára Hághio Ghiörghi (Leake, North. Greece, vol. iii. pp. 114, 149.)
[E. B. J.]
NYMPHAEUM (Nu $\mu$ 中aiov.) 1. A place on the eastern coast of Bithynia, at a distance of 30 stadia west of the mouth of the Oxines (Arrian, Peripl. Pont. Euv. p. 14), or, according to the Periplus of the Anonymus (p. 4), 45 stadia from Tyndaridae.
2. A place in Cilicia, between Celenderis and Soli, is mentioned only by Pliny (v. 22).
[L. S.]
NYMPHAEUS (Amm. Marc. xvii. 9. § 3; Núnфıos, Procop. B. P. i. 8, 21 ; Suidas, s. v.), an affluent of the Tigris, 240 stadia from Amida, and the boundary between the Roman and the Persian empires. Ritter (Erdlcunde, vol. x. p. 98) identifies it with the Zibeneh Sú. (London Geog. Journ. vol. x. p. 363 ; comp. St. Martin, Mém. sur IArmenie, vol. i. p. 166; Le Beau, Bas Empire, vol. v. p. 248.)
[E. B. J.]
NYMPHAEUS (Ninfa), a small river of Latium, mentioned only by Pliny (iii. 5. s. 9), who describes it as flowing into the sea between Astura and Circeii. There can be no doubt that the stream meant is the one still called the Ninfa, though this does not now flow into the sea at all, but within a few miles of its source (which is at the foot of the Volscian mountains, immediately below the site of Norba, forming a pool or small lake of beantifully clear water) stagnates, and loses itself in the Pontine Marshes. A town called Ninfa arose, in the middle ages, close to its source, but this is now in ruins. We have no account of any ancient town on the site. [E.H.B.]
NYMPHAS. [Megalopolis, p. 309, b.]
NYMPHA'SIA. [Methydrium.]
NYSA or NYSSA (Núбa or Núvoa), is said to bave been the name of the place in which the god Dionysus was born, whence it was transferred to a great many towns in all parts of the world which were distinguished for the cultivation of the vine.
I. In Asia. 1. A town in Caria, on the southern slope of mount Messogis, on the north of the Maeander, and about midway between Tralles and Antioch. The mountain torrent Eudon, a tributary of the Maeander, flowed through the middle of the town by a deep
ravine spanned by a bridge, connecting the two parts of the town. (Strab. xiv. p. 650; Hom. Hymm. iv. 17; Plin. v. 29 ; Ptol. v. 2. § 18; Hierocl. p. 659; Steph. Byz. s. v.) Tradition assigned the foundation of the place to three brothers, Athymbrus, Athymbradus, and Hfdrelus, who emigrated from Sparta, and founded three towns on the north of the Maeander; but in the course of time Nysa absorbed them all; the Nysaeans, however, recognise more especially Athymbrus as their founder. (Steph. B. s. E. ${ }^{\text {A A v u }}$ (pa; Strab. l. c.) The town derived its name of Nysa from Nysa, one of the wives of Antiochas, the son of Seleucus (Steph. B. s. v. 'Avridx $\quad$ cal), having previously been called Athymbra (Steph. B.
 тodis).

Nysa appears to have heen distinguished for its cultivation of literature, for Strabo mentions several eminent philosophers and rhetoricians; and the geographer himself, when a youth, attended the lectures of Aristodemus, a disciple of Panaetius; another Aristodemus of Nysa, a cousin of the former, had been the instructor of Pompey. (Strab. l.c.; Cic. ad Fam. xiii. 64.) Hierocles classes Nysa among the sees of Asia, and its bishops are mentioned in the Councils of Ephesus and Constantinople. The coins of Nysa are very numerous, and exhibit a series of Roman einperors from Augustus to Gallienns. The site of Nysa has been recognised by Chandler and other travellers at Sultan-hissar, above the plain of the Maeander, on a spot much resembling that described by Strabo; who also mentions a theatre, a forum, a gymnesinm for youths, and another for men. Remains of a theatre, with many rows of seats almost entire, as well as of an amphitheatre, gymnasium, \&c., were seen by Chandler. (Leake, Asia Minor, p. 248; Fellows, Discover. pp. 22, foll. ; Hamilton, Researches, i. p. 534.) The country round Nysa is described as bearing evidence of the existence of subterraneous fires, either by exhalations and vapours, or by its hot mineral springs.

CON OF NYSA IN CARIA.
2. A place in the district of Milyas in Pisidia, situated on the river Xanthus, on the south of Podalaca. (Ptol. v. 3. § 7; Hierocl. p. 684, where the name is misspelt Miбat.)
3. A town in Cappadocia, in the district called Mariane, not far from the river Halys, on the road from Ancyrs to Caesareia. (Ptol. v. 7. §8; It. Anl. pp. 505, 506; Hierocl. p. 699; Nicephor. xi. 44.) Its site is now occupied by a village bearing the name of Nirse or Nisea (Hamilton, Researches, ii. p. 265.)
[L. S.]
NYSA (Nīซa). IL. In Europe. 1. A village in Boeotia on Mt. Helicon. (Strab. ix p. 405 ; Steph. B. s. v. Nû̃al.)
2. A town in Thrace, in the district between the rivers Strymon and Nestus, which subsequently formed purt of Macedonia. It is called Nyssos by Pling. (Steph. B. s. v.; Plin. iv. 10. s. 17.)

NYSSOS.
OASES.
3. In Euboea, where the vine was said to put forth leares and bear fruit the same day. (Steph. B. l. c.)
4. In the island of Naxos. (Steph. B. s. v.)

NYSSOS. [Nysa, in Europe, No. 2.]

## 0.

OAENEUM, a town of the Penestae, situated on a road leading into the country of the Labeates, which overlmoked a narrow pass, formed by a mountain and the river Artatus. It was taken by Perseus in the campaign of в. c. 169. (Liv. xliii. 19.)
[E. B.J.]
OAEONES (Mela, iii. 6. § 8; Solin. 19. § 6) or OONAE (Plin. iv. 13. 8. 27), islands in the Baltic off the coast of Sarnatia, the inhabitants of which were said to live on the eggs of birds and wild oats.

OANLS ("Ravos, Pind. Ol. v. 25: Fruscolari), a small river on the S . coast of Sicily, flowing beneath the wails of Camarina. [Camarina.] [E. H. B.]

OARACTA. [Ogymis.]
OARCS. [Rha ]
OASES ('Óávets or Ajúgess, Strab. ii. p. 130, xvii. pp. 790-791; A B. s. v.: Eth. Aujagitns or Aidagitis), was the general appellation among ancient writers given to spots of liabitable and cultivable land lying in the midst of sandy deserts; but it was more especially applied to those verdant and well-watered tracts of the Libyan desert which connect like stepping-stones Eastern with Western and Southern Africa. The word Oasis is derived from the Coptic Ouah (mansio), a restingplace. (Peyron, Lexic. Ling. Copt. s. v.) Kant, it.deed (Phys. Geog. vol. ii. pt. 1. p. 349), traces it, with less probability, to the Arabic Hawa, a habitation, and $S i$ or $Z i$ a wilderness (comp. the Hebrew Ziph). Their physical circumstances, rather than their form, size, or position, constitutean Oasis; and the term is applied indifferently to kingdoms like Augila and Phazania (Fezzen) and to petty slips of pasture, such as the Oasis of El -Gerch, which is only four or five miles in circumference. The ancient writers described them as verdant islands, rising above the ocean of sand, and by their elevation escaping from being buried by it with the rest of the cultivable soil. Herodotus, for example (iv. 182), calls them ко入apol.

But, so far from rising above the level of the desert, the Oases are actually depressions of its surface, dints and hollows in the general bed of limestone which forms its basis. The bottom of the Onses is of sandstone, on which rests a stratum of clay or marble, and these retain the water, which either percolates to them through the surrounding sand, or descends from the edges of the limestone rim that encircles these isolated spots, like a battlement. Within these moist hollows springs a vegetation presenting the most striking contrast to the general barrenness of the encircling wikderness. Timber, of various kinds and considerable girth, wheat, millet, date and fruit trees, flourish in the Uases, and combined with their verdant pastures to gain for them the appellation of "the Islands of the Blext." (Herod. iii. 26.) Both com:nercially and politically, the Oases were of the greatest improtance to Aethiopia and Aegypt, which they connected with the gold and ivory regions of the south, and with the active traffic of Carthage in the west. Yet, although these kingdoms lost no opportunity of
pushing their emporia or colonies eastward towards the Red Sea and the Regio Aromatum, there is no positive monumental proof of their having occupied the Oases, at least while under their native rulers. Perhaps the difficulty of crossing the desert before the camel was introduced into Aegypt - and the camel never appears on the Pharaonic monu-ments-may have prevented them from appropriating these outposts. The Persians, after their conquest of Aegypt in B. C. 523, were the first permanent occupants of the Oaves. Cambyses, indeed, failed in his attempt to reach Ammonium (Siwah); but his successor Dareius Hystaspis established his authority securely in many of them. At the time when Herodotus visited Aegypt, the Oases were already military or commercial stations, permeating Libya from the Red Sea to the Atlantic Ocean. Under the Ptolemies and the Caesars, they were garrisoned by the Greeks and Romans, and were the seats of a numerous fixed population, as well as the halt-ing-places of the caravans; under the persecutions of the Pagan emperors, they afforded shelter to fugitives from the magistrate; and when the church became supreme, they shielded heretics from their orthodox opponents.

The natural productions of these desert-islands will be enumerated under their particular names. One article of commerce, indeed, was common to them. Their alum was imported by the Aegyptians, as essential to many of their manufactures. Amasis, arcording to Herodotus (ii. 180), contributed 1000 talents of alum towards the rebuilding of the temple at Delphi ; and the alum of El -Khargeh (Oasis Magna) still attracts and rewards modern speculators. Herodotus describes the Ouses as a chain extending from E. to W. through the Libyan Desert. He indeed comprehended under tnis term all the habitable spots of the Sähăra, and says that they were in general ten days' journey apart from one another (iv. 181). But it is more usual to consider the following only as Oases proper. They are, with reference to Aegypt, five in number; although, indeed, Strabo (xviii. p. 1168) speaks of only three, the Great, the Lesser, and that of Ammon.

1. Ammonicis (El-Sizah), is the most northerly and the most remote from the Nile. There seem to have been two roads to it from Lower Aegypt; for when Alexander the Great risited the oracle of Ammon, he followed the coast as far as Paratonium in Libya, and then proceeded inland almost in a direct northerly line. (Arrian. Anab. iii. 4 ; Quint. Curt. iv. 33.) He appears, however, to have returned to the neighbourhood of Nemphis by the more usual route, viz. a WSW. road, which passes the Natron Lakes [Nitmiae] and runs to Teranieh, on the Rosetta branch of the Nile. (Minutoli, Journey to the Temple of Jupiter Ammon.) There is some difficulty in understanding Herodotus's account of the distance between Thebes and Ammonium. He says that they are ten days' journey apart. (Rennell, Geogr. of IIerod. vol. i. p. 577.) But the actual distance between them is 400 geographical miles ; and as the day's journey of a caravan never exceeds twenty, and is seldom more than sisteen of these miles, double the time allowed by him not ten, but twenty days - is required for performing it. Either, therefore, a station within ten days' journey of Upper Aegypt has been dropt out of the text of Herudotus, or he must intend another Oasis, or EL-Sivah is not the ancient Ammonium. If ws bear in mind, however, that the Greater Ousis (El-

Khurgeh) and the Lesser (El-Dakkel) were both accounted nomes of Argypt, we may fairly infer that the ten days' journey to Ammonium is computed from one of them, i. e. from a point considered as proper Aegyptian ground. Now, not only does the road from Thebes to Anmonium lie through or beside the Greater and Lesser Oasis, but their respective distances from the extremities of the journey will give nearly the number of days required. For El-Khargeh, the Great Oasis, is seven days' journey from Thebes; and thirty hours, or $(15 \times 2)$ nearly two days more, are required for reaching the Lesser Oasis; from whence to Ammonium is a journey of eight days, which. allowing two days for passing through the Oases themselves, give just the twenty days requisite for pertorming the distance. There were two roads which led from Thebes to Oasis Magna. The shorter one bearing N. by Abydus, the other bearing S. by Latopolis. For the former forty-two hours, for the latter fifty-two, were required, to reach the Great Oasis. (Cailliaud, Voyage à COasis de Thébes, 1813.) The Oasis of Ammonium is about six miles in length, and three in breadth. The soil is strongly impregnated with salt of a fine quality, which was anciently in great request, both for religious purposes and the tables of the Persian kings. (Arrian, Anab.iii. 41.) But notwithstanding its saline ingredients, the ground is abundantly irrigated by water-springs, one of which. "the Fountain of the Sun," attracted the wonder of Herodotus, and ancient travellers generally (iv. 181; comp. Wilkinson, Mod. Eyypt and Thebes, vol. ii. p. 358). It rises in a grove of dates, $S$. of the Temple of Ammon, and was probably one of those tepid springs, found in other Oases also, the high temperature of which is not observed during the heat of the day, but which, by night, are perceptibly warmer than the surrounding atmosphere. A small brook running from this fuuntain flows soon into another spring, also arising in the date-grove; and their united waters run towards the temple, and, probably because their ancient outlets are blocked up, end in a swamp. The ricinity of these brooks confirms the statement of Herodotus, that in Ainmonium are many wells of fresh water (iv. 181).

The early and high cultiration of this Oasis is still attested by the abundance of its dates, pomegranates, and other fruits. The dates are obtained in vast quantities, and are of very fine flavour. In favourable seasons the whole area of Ammonium is cove:ed with this fruit, and the annual produce amounts to from 5000 to 9000 camel-loads of 300 pounds each. Oxen and sheep are bred in considerable numbers; but the camel does not thrive in Ammonium, probably because of the dampness of the soil. The inhabitants accordingly do not export their own harvests, but await the caravans which convey them to Aegypt and the Mediterranean ports. (Minutoli, pp. 89, 90, 91, 174, 175, \&c.) The present population of this Oasis is about 8000; but anciently, when it was at once the seat of an oracle, the centre of attraction to innumerable pilgrims, and one of the principal stations of the Libyan landtrade, the permanent as well as the casual population must have been much more considerable. The ruins of the Temple of Ammon are found at Ummebeda, sometimes called Birbé, - the Ummesogeir of Hornemann (Travels, vol. i. p. 106), about 2 miles from the principul village and castle. Its style and arrangement bespeak its Aegyptian origin and its appropriation to the worship of Amun, the raunheaded god of

Thebes; yet the bnildings (the oracle itself was mach older) are probably not earlier than the Persian era of Apgypt. The remains of the Ammonium consist of two parts - a pronaos and a sekos, or sanctuary proper. The walls are entirely composed of hewn stunes, obtained from quarries aboat 2 miles off. The surface of the temple, both within and without, was covered with hieroglyphics emblematic of the story and transfigurations of Zeus-Ammon. The plain surface of the walls was highly coloured : and though many of the sculptures are much defaced, the blue and green colours are still bright. The temple itself was of moderate size, and the curtilage or enclosure of the whole is not more than 70 paces in length and 66 in breadth.

The population of this Oasis was, in the time of Hemdotus (ii. 32), partly Aegyptian and partly Aethiopian,-both nations agreeing in their devotion to Zeus-Ammon. The Greeks, indeed, who must have become acquainted with Ammonium soon after their colonisation of Cyrene in the seventh century B. C. put in their claims to a share, at least, in its foundation. According to one tradition, Danaus led a colony thither (Diodor. xvii. 50); according to another, its oracle was established contemporaneously with that at Dodona, the most ancient oracle of Greece. (Herod. ii. 54.) The naine of the king, Etearchus, mentioned by Herodotus in his story of the Nasamones, if the form be correctly given, has also a Greek aspect. (Herod. ii. 32.) There can be no doubt, however, that Ammonium was peopled from the East, and not by colonists from Europe and the North.

At the present day El-Sivah contains four or fire towns, of which the principal is Kebir ; and about 2 miles from Kebir is an ancient fortress named Shargieh, old enough to have been occupied by a Roman garrison. (Minutoli, pp. 165-167). It is governed by its own chiefs or shieks, who pay a small annual tribute to the riceroy of Aegypt. This Oasis, though known to Arabian writers of the thirteenth century A. D., was first reopened to Europeans by the travels of Browne and Hornemanu in the last century.
2. Proceeding in a SW. direction, and approaching nearer to Aegypt, we come to the Oasis now called El-Farafreh, but of which the ancient name is not recorded. It lay nearly N. of Oasis Minor, at a distance of about 80 miles, and served as an intermediate station both to Ammonium and Oasis Magna.
3. Oasis Minor ('Oafas mikpd, Ptol. ir. 5. § 37 ; ỳ סevt ${ }^{\prime} \rho a$, Strab. xvii. p. 813; O. Minor, Not. Imap. Or. c. 143: the modern El-Dakkel), was situated SE. of Ammonium, and nearly due W. of the city of Oxyrynchus and the Arsinoite nome (El-Fyorm), lat. $29^{\circ} 10^{\prime} \mathrm{N}$. Like El-Siwah, the Lesser Oasis contains warm springs, and is well irrigated. Under the Romans it was celebrated for its wheat; but now its chief productions are dates, olives, pomegranates, and other fruits. It has a temple and tombs of the Ptolemaic era. The Lesser Oasis is separited from the Greater by a high calcareous ridge, and the station between them was probably at the little temple of Ain Anour. (Cailliaud, Minutoli, \&c.) Oasis Minor seems to be the same with that entitled by some Christian writers (e. g. Palladius, Vit. Chrysost. p. 195) ì yeícov töv Ma§incov, and "Oasa, ubi gens est Mazicorum" (Joann. in Vit. Patrum, c. 12), the Mazyci of the Regio Marmaricu being the people indicated.
4. Oasis Trinytueos, or the Oasis of El-Ba-
charieh，is the nearest of these desert－islands to the fruntiers of Aegypt，and nearly due N．from Oasis Magna．It lies in lat． $28^{\circ}$ ，a little below the parallel of the city Hermopolis in Middle Aegypt．Thefe is a road to it from Fyoum，and its principal village is named Zabou．The soil is favourable to fruit；but there are no traces of its permanent occupation either by the Aegyptians or the Persians；and its earliest monuments are a Roman triumphal arch，and the ruins of an aqueduct and hypogaea，containing sar－ cophagi．In this Oasis was made the discovery of some ancient artesian wells．

The description of the wonders of the Oases by an historian of the tifth century A．D．（Olympiodor．ap． Phot．Bib．p．61，ed．Bekker）leaves no doubt of the existence of such artificial springs；but as their con－ struction was anknown to the Greeks and Romans no less than to the Aegyptians，the secret of it was probably inported from the East，like the silkworm， at some periud anterior to A．D． 400 ．Several of these wells have recently been discovered and reopened （Russegger，Reisen，vol．ii．pp．284，399）；and the depth disclosed does not materially differ from that mentioned by Olympiodorus（supra），viz．，from 200 to 500 cubits．This far exceeds the bore of an ordinary well；and the spontaneous rise of the water in a rushing stream shows that no pump，siphon，or machinery was employed in raising it to the surface． In this Oaxis，also，alum abounds．（Kenrick，Anc． Egypt，vol．i．p．74．）
5．Oasis Dlagna（＇Odois 敒宏入 $\eta$ ，Ptol．iv．5．§ 27 ；ì $\pi$ рórrn，Strab．xvii．p．813；ท̀ Lvaw，Olympiod． ap．Phot．Bibl．p．212，ed．Bekker），the Great Oasis， sometimes denominated the Oasis of Thebes，as its centre lies nearly opposite to that city，is called EL－ Khargch by the Arabs，from the name of its prin－ cipal town．This，also，is the $\pi \delta$ dis $^{\prime}$＇Od $\sigma$ ts and vinoos $\mu$ axdpouv of Herodotus（iii．26），and is meant when the Oases are spoken of indiscriminately，as by Josephus（c．Apion．ii．3）．In the hieroglyphics its uame is Heb，and in the Notitia Imperii Orient． （c．143）its capital is termed Hibe．The Oasis Magna is distant about 6 days＇journey from Thebes，and 7 from Abydos，being about 90 miles from the western bank of the Nile．It is 80 miles in length，and from 8 to 10 broad，stretching from the lat．of Tentyra， $25^{\circ} \mathrm{N}$ ．，to the lat．of Abydos， $26^{\circ} 6^{\prime} \mathrm{N}$ ．Anciently，indeed，owing to more extensive and regular irrigation，the cultivable land reached further $N$ ．The high calcareous ridge， which separates it from the Lesser Oasis，here be－ comes precipitous，and girds the Oasis with a steep wall of rock，at the base of which the acacia of Eyypt and the dhoum palm form thick woods．The Great Oasis must have received a Greek colony at an early period，since Herodotus（iii．26）says that the＂city Oasis＂was occupied by Samians of the Aeschrionian tribe，who had probably settled there in consequence of their alliance with the Greek colonists of Cyrene（Id．iv．152）．Yet none of its numerous monuments reach back to the Pharaonic era It was garrisoned by the Persians；for the names of Dareius and Amyrtaeus are inscribed on its ruins（Wilkinson，Mod．E＇gypt and Thebes，vol． ii．p．367）；but the principal buildings which re－ main belong to the Macedonian，if not indeed to the Roman era．Its great temple， 468 feet in length， was dedicated to Aman－Ra．The style of its archi－ tecture resembles that of the temples at Hermonthis and Apollinopolis Magna．Like other similar spots in the Libyan Desert，the Great Oavis was a place of
banishment for political offenders（Dig．xlviii．tit． 22. 1．7．§4），and for Christian fugitives from the Pagan emperors．（Socrat．ii．28．）At a later period it abounded with monasteries and churches．The Greater and the Lesser Oasis were reckoned as forming together a single nome，but by the Ro－ man emperors were annexed to the prefecture of the Thebaid．（Plin．v．9．s．9，duo Oasitae；Ptol．iv． 5．§ 6，ois vбциіs тробүра́фонтаи ai סú́ Oaбîtal； see Hoskins，Visit to the Great Oasis ；Langles， Mém．sur les Oasis；Ritter，Erdhunde，vol．i．p． 964．）
［W．B．D］

## OAXES，OAXUS．［Axus．］

OBILA（＇O\＆i＾a，Ptol．ii．5．§ 9），a town of the Vettones in Hispania Tarracouensis，the site of which it is difficult to determine，but it is supposed to be the modern Avila．（Hieron．de Vir．IU．c．121， and Florez，Esp．S．xiv．3，ap．Ukert，vol．ii．pt．1． p．431．）Reichard，however，identifies it with Oliza．
obilate．［Marmarica．］
OBLIMUM，a place in Gallia Narbonensis，writ－ ten Obilonna in the Table，on a road which passes through the Tarentaise to the pass of the Alpis Graia，or Little St．Bernard．The site is uncertain， but the distance is marked iii．from Ad Publi－ canos．［Publicanos，Ad．］
［G．L．］
OBLIVIONIS FLUMEN，called also Limius， Limias，Limaea，\＆c．［Gailaecia，Vol．I．p．933．］ O＇BOCA（＇O8óкa，Ptol．ii．2．§8），a river on the W．coast of Irelard，now the Boyne．［T．H．D．］

OBRIDAS，a river of Phrygia，an eastern tribu－ tary of the Maeander，had its sources，according to Livy（xxxviii．15），on the eastern side of Mount Cadmus，near the town of Asporidos，and flowed in the neighbourhood of Apamea Cibotus（Plin．v．29．） This is all the direct information we possess about it；but from Livy＇s account of the expedition of Manlius，who had pitched his camp there，when he was visited by Seleucus from Apamea，we may gather some further particulars，which enable us to identify the Obrimas with the Sundukli Chas．Manlins had marched direct from Sagalassus，and must have led his army through the plains of Dombai，passing in the rear of Apamea．Thus Seleucus would easily hear of the consul being in his neighbourhood，and， in his desire to propitiate him，would have started after him and overtaken him the next day（postero die．）Manlius，moreover，at the sources of the Obrimas required guides，because he found himself hemmed in by mountains and unable to find his way to the plain of Metropolis．All this agrees perfectly well with the supposition that the ancient Obrimas is the modern Sandukli Chai（Hamilton，Researches， ii．p．172，\＆ec．）．Franz（Fünf Inschriften，p．37）， on the other hand，supposes the Kodsha Chai to correspond with the Obrimas．Arundell（Discov．is Asia Alin．i．p．231），aqain，believes that Livy has confounded the sources of the Marsyas and Maeander with those of the Obrimas．
［L．S．］
OBRINGA（＇OBpiqkas）．Ptolemy（ii．10．§ 17） makes the Obringas river the boundary between Lower and Upper Germania．The most southern place in Lower Germania according to his map is Moguntiacum（Moкovrtax $\delta y$ ），Mainz He places in the foilowing order the cities of Upper Germania， which are south of the Obringas：－Noeomagus （Speier），Borbetomagus（Worms），Argentoratum （Strassburg），and so on．But Worms is north of Speier；and the relative position of these tro placen is therefore wrong in Ptolemy．He has also placed

Mogontiacum in Lower Germanis，but it was the chief place of Upper Germania．Ptolemy has not men－ tioned the Mosella（Mosel），and some geographers have assumed that it is the Obringas；but if this is so，the position of Mainz is wrong in Ptolemy，for Mainz is south of the Mosel．D＇Anville observes that，according to the Notit．Imp．，the district of the general who resided at Maine comprehended Antunnacum or Andernach，on the Rhine，which is below the junction of the Mosel and the Rhine．If Andernach was always in the Upper Germania，and if the boundary between the Lower and the Upper Germania was a river－valley，there is none that seems so likely to have been selected as the rugged valley of the Ahr，which lies between Bonn and Andernach，and separates the netherlands or low－ lands on the north from the hilly country on the sonth．
［G．L．］
OBU＇CULA（＇OBoúro \a，Ptol．ii．4．§4），called by Pliny（iii．1．s．3）Obulcula，and by Appian（Hisp． 68）＇O8b入ко入a，a town of Hispania Bsetica，on the rosd from Hispalis to Emerita and Corduba（Itin． Ant．pp．413，414），now Monclova．Some ruins are still visible（Caro，Ant．Hisp．i．19；Florez，Esp．S． xii．p．382．）
［T．H．D．］
OBULCO（ $\grave{ }$＇Obov́Aкcov，Strab．iii．pp．141，160； ＂O6ou入nov，I＇tol．ii．4．§ 11 ；＇O6ठ ${ }^{\prime}$ кcov，Steph．B．s．v．）， called by Pliny（iii．1．8．3）Obulco Pontificense，a Ro－ man municipium of Hispania Baetica，in the juris－ diction of Corduba，from which it was distant about 300 stadia according to Strabo（p．160）．It had the privilege of a mint（Florez，Med．ii．p．496，iii．p． 101 ； Mionnet，Suppl．i．p． 11 ；Sestini，p． 71 ；Grater， Inscr．pp．105，458；Muratori，p．1052．4）．It is commonly identified with Porcuna．［T．H．D．］

CON OF OBULCO．
OBULENSII（＇O6ou入hvocol，Ptol．iii．10．§9），a people of Moesia Inferior，on the S ．side of the mouth of the Danube．
［T．H．D．］
 Eth．＇Ska入ev́s），an ancient city of Boeotia，men－ tioned by Homer，situated upon a small stream of the same name，at an equal distance from Haliartus and Alalcomenae．It lay in the middle of a long narrow plain，bounded on the east by the heights of Haliartus，on the west by the mountain Tilphossium， on the south by a range of low hills，and on the north by the lake Copais．This town was dependent upon Haliartus．The name is probably only a dia－ lectic form of Oechalia．Its site is indicated by several squared blockss on the right bank of the stream．（Hom．Il．ii．501，Hyms．Apoll． 242 ； Strab．ix．p． 410 ；Apollod．ii．4．§ 11 ；Plin．iv． 7. 8． 12 ；Steph．B．2．v．；Leake，Northorn Greece， vol．ii．p．205，seq．；Forchhammer，Hellenika，p． 184．）

## OCE＇ANUS．［Attanticum Mare．］

OCE＇ANUS SEPTENTRIONA＇LIS，the northern portion of the waters of the all－encircling Ocean．

## OCEANUS SEPTENTRIONALIS．

1．The name and divisions．－According to ： fragment of Phavorinus the word＇axeavos is not Greek，but one borrowed from the barbarians（Spohn， de Nicephor．Blemm．Geogr．Lips．1818，p．23）； but there seems reason for believing it to be con－ nected with the Sanscrit roots＂ogha＂and＂ogh．＂ （Humboldt，Cosmos，vol．ii．note 210，trans．）When the peoples living on the coasts of the Interior Sea passed，as Herodotus（iv．152）significantly adds，＂not without divine direction，＂through the gate into the Ocean，and first saw its primeval waters，the origin as they believed of all waters，the sea that washed the shores of the remote North was long regarded as a miry，shallow，misty sea of darkness，lying under ＂the Bear，＂who alone is never bathed in the Ocean； and hence the names Septentrionalis（ $\delta$ Bopectos concavós，Plut．Camill． 15 ；Agathem．ii．14；Tac． Germ． 1 ；Plin．iv． 27 ；$\delta$ dpkrukìs dok．，Agathem．
 Scythicus（Plin．vi．14）；though this，according to Agathemerus（l．c．）is the E．division of the North－ ern Ocean，while the Mare Germanicum and Mare Britannicum formed the W．This sea appears with the epithets＂Oceanus giacialis＂（Juv．iii．1）； ＂Mare congelatum＂（Varro，R．R．i．2．§ 4；Plin． iv．27．s．30）；＂concretum＂（Plin．l．c．；ทं тenproia
 32；$\pi(\lambda a y o s ~ \pi e \pi \eta \gamma \delta s$, Agathem l．c．）；＂pigram＂ （Tac．Agr．13，Germ．45）；＂mortnam＂（Plin．iv． 27 ；Agathem．L．c．；Dionys．Per．33）．Its divisions were：－Mare Germanicum（Plin．iv．30；Ptol．ii． 3. § 5），or M．Cimbricum（＂Cymbrica Tethys，＂ Claudian，de Bell．Get．335），or the Germas Ocean， united by the Fretum Gallicum（Straits of Dover， Pas de Calais）with the M．Britannicum（Plin．iv． 33：English Channel），and by the Codanus Sinus（Kattegattet．Ore Sund）and Lagnus Sinus （Store Belt，Lille Belt），with the M．Sarmaticum （Eapuarucis むкк．，Ptol．vii．5．§§ 2，6）or Suevicum （Tac．Germ．45：Öster Söen，or Baltic）．A division of this latter was the Sinus Venedicus（Ovevedueds $\kappa$ к $\lambda$ тоs，Ptol．iii．5．§ 19 ：Gulf of Damaig）．The M．Amalchium，according to Hecataeus（ap．Plin． iv．27），commences with the river Paropamisus；the Cimbri，according to Philemon（ap．Plin．L c．）， called it Morimarusa，which he interprets by M． mortuum；beyond was the sea called Cronium，or the sea into which the river Chronos（Niemen） flowed，or what is now called the Kwrisches Haff， off Memel（Schafarik，Slav．Alt．vol．i．p．496．）

2．Progress of discovery．－The enterprise of the Phoenician navigators brought them into contact with those countries，in the N．of Earope，from whence tin was brought；but it was the trade in amber which must have been most effectual in opening up a knowledge of these coasts．This amber was brought by sea，at first，only from the W．Cimbrian coast，and reached the Mediterranean chiefly by sea，being brought across the intervening countries by means of barter．The Massilians，who under Pytheas followed the Phoenicians，hardly went beyond the mouths of the Weser and the Elbe． The amber inlands（Glessaria or Austrania）are placed by Pliny（iv．27）decidedly W．of the Cim－ brian promontory in the German Ocean；and the connection with the expedition of Germanicus sufficiently shows that an island in the Baltic is not meant．Moreover the effects of the ebb and flood tides in the estuaries which throw up amber，where， according to the expression of Servios，＂Mare vicissim tum accedit tum recedit，＂suits the conut
between the Helder and the Cimbrian peninsula; but does not suit the Baltic, in which Timaeus places the island Baltia. (Plin. xxxvii. 11.) Abalus, a day's journey from an "aestuarium," cannot therefore be the Kurische Nehrung. Pytheas probably sailed to the W. shores of Jutland. Tacitus (Germ. 45), not Pliny, is the first writer acquainted with the "glensum" of the Baltic shores, in the land of the Aestyans and the Venedi. The more active, direct communication with the Samland coast of the Baltic, and with the Aestyans by means of the overland route through Pannonia by Carnuntum, which was opened by a Koman knight under Nero (Plin. l.c.), appears to have belonged to the later times of the Roman Caesars. The relation betwcen the Prussian coast, and the Milesian colonies on the Euxine, are shown by the evidence of fine coins, probably struck more than 400 years B. c., which have been found in the Netz district. (Humboldt, Cosmos, vol. ii. note 171, trans.) A corious story is related by Cornelius Nepos (Fragm. vii. 1, ed. Van Staveren ; comp. Mela, iii. 5. § 8; Plin. ii. 67) of a king of the Boii, others say of the Suevi, having given some shipwrecked dark-coloured men to Q. Metellus Celer when he was Proconsul of Gaul. These men, who are called Indians, were, if any credence is to be given to the story, most probably natives of Labrador or of Greenland, who had been driven on these consts by the effect of currents such as are known now in these seas, and violent NW. winds.
[E. B. J.]
OCELIS ('Or $\lambda \lambda t s \quad 2 \mu \pi \delta \rho i o \nu)$, port of Arabia Felix, placed by Ptolemy (i. 7. §4, i. 15. § 11, vi. 7. §7, viii. 22. §7) a little to the north of the straits of the Red Sea (Bab-el-Mandeb). Its geographical position, according to his system, was as tollows: Its longest day was $12 \frac{1}{2 t}$ hours. It was $1^{\prime}$ east of Alexandria, between the tropics, $52^{\circ} 30^{\prime}$ removed from the summer tropic. It is placed by the author of the Periplus 300 stadia from Musa, and is identical with the modern Ghella or Cella, which has a buy immediately within the straits, the entrance to which is two miles wide, and its depth little short of three. (Vincent, Periplus, p. 288; Forster, Arabia, vol. ii. p. 148.) Ocelis, according to the Periplus, was not so much a port as an anchorage and watering-place. It belonged to the Elisari, and was subject to Cholebus. (Hudson, Geog. Min. tom. i. p. 14; Ptol. vi. 7. § 7.) The sanie author places it 1200 stadia from Arabia Felix (Aden); but the distance is two short. (Gosselin. Recherches, tom. iii. p. 9.)
[G.W.]
OCELLODU'RUM, a town of the Vaccaei in Hispania Tarraconensis, on the road from Emerita to Caesaraugusta (Ant. Itin. pp. 434, 439) ; variously identified with Zamora, Toro, and Fermosel.
[T. H. D.]
O'CELUM ( $\Omega \kappa \in \lambda о \nu:$ Uxeau), a town of Cisalpine Gaul, mentioned by Caesar as the last place in that prnvince (" citerioris provinciae extremum," Caes.B.G. i. 10) from whence he had to fight his way through the independent tribes which held the passes of the Alps. In Strabo's time Ocelum was the frontier town of the kingdom of Cottius towards the province of Cisalpine Gaul (Strab. iv. p. 179); and it was from thence that a much frequented road led over the pass of the Mont Generre by Scingomagus (Sezunne), Brigantium (Briançon). and Ebrodunum (Embrun), to the territory of the Vocontii. D'Anville has clearly shown that Ocrlum was at Uxeau, a viliage in the valles of Fenestrelles, and not, as sup.
posed by previous writers, at $O u l x$ in the valley of the Dora. (D'Anville, Notice de la Gaule, p. 500.)
[E. H. B.]
O'CELUM ("Oкєлov, Ptol. ì. 5. § 9). 1. A town of the Vettones in Lusitania, whose inhabitants are called by Pliny (iv. 22. s. 35) Ocelenses and Lancienses. Identified by some with Caluibria, by others with Fermoselle or Ciudad Rodrigo. (Ukert, vol. ii. pt. 1. p. 431.)
2. A town of the Callaïci Lucenses in Gallaecia (Ptol. ii. 6. §23).
3. ('Oкiлol áкроу, Ptol. ii. 3. § 6), a promontory on the NE. coast of Britannia Rumana, and N. of the mouth of the river Abus or Humber; probably Spurn Head.
[T.H.D]
oche. [Euboes.]
OCHOSBANES ('Oxoobduns) or Ochthomanks, a small river of Paphlagonia, falling into the bay of Armene, a little to the north of Sinope. (Marcian. Heracl. p. 72 ; Anonym. Peripl. Pont. Eux. p. 7.) This is probably the same river which Scylax (p. 33) calls Ocheraenus.
[L. S.]
OCHRAS, a place in Cappadocia. (It. Ant. p. 202.) Ptolemy ( $\quad$. 6. § 12) mentions a place Odogra or Odoga, in the district of Chammanene in Cappadocia, between the river Halys and Mount Argaeus, which is possibly the same as the Ochras of the Antonine Itinerary.
[L. S.]
OCHUS ( $\delta^{\top} \Omega$ xos, Strab. xi. p. 509 ; Ptol. vi. 11. §§ 2, 4: Amm. Marc. xxiii. 6), a river of Central Asia, which has heen attributed to the provinces of Hyrcania and Bactriana by Strabo and Ptolemy respectively, as flowing through them both. It took its rise on the NW. side of the Paropamisus (or Hindu-Kush), and flowed in a NW. direction through part of Bactriana towards the Caspian Sea, and parallel with the Oxus. Pliny makes it a river of Bactriana, and states that it and the Oxus flow from oppowite sides of the same mountain (vi. 16. § 18). There can be no reason for doubting that it is represented by the present Tedjen. It is clear that in this part of Asia all Ptolemy's places are thrown too much to the east by an error in longitude. (Wilson, Ariana, p. 145.)

OCHUS MONS ( ${ }^{3} \Omega$ 又oc, Arrian, Indic. c. 38 ), a mountain in Persis, mentioned by Arrian, supposed by Forbiger to be that now called Nakhilu. [V.]

OCILE ('Oк ( $\lambda \eta$, Appian, B. Hisp. 75), a town of Hispania Baetica, probably near Ilipa or Ilipla, besieged by the Lusitanians, and relieved by Mummius (Ukert, vol. ii. pt. 1. p. 372). [T. H. D.]

OCILIS ("Oкı入ıs, Appian, B. Hisp. c. 47, sqq.), a town of the Celtiberi, which served the Romans as a magazine in the time of the Celtiberian war. It was probably in the SE. part of Celtiberia, and Reichard identifies it with Ocana. [T. H. D.]

OCINARUS ('Rxivapos), a river on the W. coast of Bruttium, mentioned only by Lycophron (Alex. 729, 1009), who tells us that i: Howed by the city of Terina. It is generally supposed to be the same with the Sabatus of the Itineraries (the modern Savuto): but its identification depends upon that of the site of Terina, which is very uncertain. [Terina].
[E. H. B.]
OCITIS ("Onitis, Ptol. ii. 3. §31), an island on the N. coast of Britain, and NE. from the Orkneys, probably Ronaldsa.
[T. H. D.]
OCRA MONS ( ${ }^{\circ}{ }^{\circ} \mathrm{Orpa}$ ), is the name given by Strabo to the lowest part of the Julian or Carnic Alpe, over which was the pass leading from Aquileia to Aemona (Laybach), and from thence into Pannonia
and the countries on the Danube. (Strab. iv. p. 207, vii. p. 314.) The mountain meant is evidently that between Adelsberg and Laybach, which must in all ages have been the principal line of communication from the Danube and the valley of the Save with Italy.
[E. H. B.]
OCRICULUM (oi"Oкрıклоt, Strab.; 'Окрікола, Steph. B. ; 'Oкрiколоу, Ptol.: Eth. Ocriculanus and Ocricolanus: Otricoli), a considerable town of Uimbria, situated on the Via Flaninis, near the left bank of the Tiber. It was the southernmost town of Umbria, and distant only 44 miles from Kome. (Itin. Hier. p. 613; Westphal, Köm. Kamp. p. 145.) We learn from Livy that Ocriculum was a native Umbrian city, and in B. c. 308 it appears to have separated from the other cities of the confederacy, and concluded an alliance with Rome. (Liv. ix. 41.) This is the only notice that we find of it prior to the conquest of Umbria by the Romans; but after that period it figures repeatedly in history as a municipal town of some importance. It was here that in b. c. 217 Fabius Maximus took the command of the army of Servilius, after the battle of the lake Trasimenus. (Id. xxii. 11.) In the Social War Ocriculum suffered severely ; and, according to Florus, was laid waste with fire and sword (Flor. iii. 18. § 11); but it seems to have quickly recovered, and in Strabo's time was a considerable and flourishing town. It is mentioned in Tacitus as the place where the army of Vespasian halted after the surrender of the Vitellian legions at Narnia (Tac. Hist. iii. 78). From its ponition on the Flaminian Way it is repeatedly mentioned incidentally under the Roman Eimpire (Plin. Ep. vi. 25; Amm. Marc. xvi. 10. §4, xxviii. 1. § 22); and it is evident that it was indebted to the same circumstance for its continued prosperity. The name is found in Pliny and Ptolemy, as well as in the Itineraries; and its municipal importance down to a late period is attested also by inscriptions, in some of which it bears the title of "splendidissima civitas Ocricolana." From these combined, with the still extant remains, it is evident that it was a more considerable town than we could have inferred from the accounts of ancient writers (Plin. iii. 5. s. 9, 14. s. 19; Ptol. iii. 1. § 54: Itin. Ant. pp. 125, 311 ; Gruter, Inser. p. 422. 8, 9; Orell. Inscr. 3852, 3857; Marini, Atti dei Fratelli Arrali, vol. ii. p. 582). The site of the ancient city is distant about 2 miles from the modern village of Otricoli, in the plain nearer the Tiber. The ruins of ancient edifices are, in their present state, of but little interest; hat excavations which were carried on upon the spot in 1780 brought to light the remains of several public buildings on a splendid scale, the plan and ariangement of which could be traced with little difficulty; among these were a Busilica, a theatre, an amphitheatre, Thernae, and several temples, besides other buildings, of which the purpose could not be determined. The beauty of many of the architectural decorations and works of art discovered on this occasion (especially the celebrated mosaic floor now in the Vatican, and the colossal head of Jupiter in the same museum) prove that Ocriculum must have been a municipal town of no ordinary splendour. (Westphal, Römische Kampagne, p. 144; Guattani, Monumenti Inediti, 1:84, where the results of the excavation are described in detail and accompanied with a plan of the ancient remains.) Its proximity to Rome probably caused it to be resorted to by wealthy nobles from the city; and as
early as the time of Cicero we learn that Milo had a villa there. (Cic. pro MiL. 24.) The period of the destraction of the ancient city is uncertain. In A. D. 413 it witnessed a great defeat of Heraclianus, Count of Africa, by the armies of Honorius (Idat. Chron. ad ann.), and it is mentioned as an episcopal see after the fall of the Western Empire. But the circumstances that led the inhabitants to migrate to the inodern viilage of Otricoli, on a hill overlooking the Tiber, are not recorded. The corruption of the name appears to have commenced at an early date, as it is written Utriculum in the Itineraries and in many MSS. of the classical authors. [E. H. B.]

OCRINUM. [DAmnonium.]
octapitarum ('Oктatitapon akpon, Ptol. ii. 3. § 3), a very prominent headland above the estuary of the Sabrina, or Severn, on the W. coast of Britain. now St. David's Head.
[T. H. D.]
OCTODU'RUS (Martinach, or Martigny, as the French call it), is in the Swiss canton of Wallis or Valais, on the left bank of the Rhone, near the bend where the river takes a northern course to the lake of Geneva. The Drance, one branch of which rises at the foot of the Greal St. Bernard, joins the left bank of the Rhone at Martigny. The road over the Alps from Martigny ascends the valley of the Urance, and the summit of the road is the Alpis Pennina, or Great SL. Bernard. This pasa has been used from a time older than any historical records. When Caesar was in Gallia (b. c. 57-56) he sent Servius Galba with the twelfth legiun and some cavalry into the country of the Nantuates, Veragri, and Seduni. His purpose in sending this force was to open the pass over the Alps, the pass of the Great St. Bernard, "by which road the mercatores bad been used to travel at great risk, and with the payment of great tolls." (B. G. iii. 1.) The penple of the Alps allowed the Italian merchants to pass, because if they plundered them the merchants would not come; but they got as much out of them as they could. Galba, after taking many strong places, and receiving the submission of the people, sent off two cohorts into the country of the Nantuates. and with the remaining cohorts determined to winter "in a town of the Veragri natned Octodurus, which town being situated in a valley with no great extent of level ground near it, is confined on all sides by very lufty mountains." There is some level ground at Martigny, and the valley of the Rhone at this part is not very narrow. Caesar says that the town of Octodurus was divided into parts by a river, but he does not mention the river's name. It is the Drance. Galba gave one part of the town to the Galli to winter in, and assigned the other to his troops. He furtified himself with a ditch and rampart, and thought he was safe. He was, however, suddenly attacked by the Galli before his defences were complete or all his supplies were brought into the camp. The Romans obstinately defended themselves in a six hours' fight; when, seeing that they could no longer keep the enemy out, they made a sortie, which was successful. The Romans estimated the Galli at more than 30.000 , and Caesar says that more than a third part were destroyed. The slaughter of the enemy was prodigious, which has been made an objection to Caesar's veracity, or to Galba's, who made his report to the commander. It has also been objected that the valley is not wide enough at Martigny to hold the 30,000 men. There may be error in the number that attacked, and also in the number who perished.

But it is not difficult to answer some of the objections made to Caesar's narrative of this fight. Roesch has answered the criticism of General Warnery, who, like many other of Caesar's critics, began his work by misunderstanding the author. (Roesch, Commentar über die Commentarien, gc. p. 220, Halle, 1783.) After this escape Galba prudently withdrew his troops, and marching through the country of the Nantuates reached the land of the Allobroges, where he wintered.

The position of Octodurus is determined by Caesar's narrative and by the Antonine Itin. and the Table. Pliny (iii. c. 20) says that the Octodurenses received the Latinitas (Latio donati). In the Notit. Prov. the place is called "Ciritas Vallensium Octodurus." The modern names Wallis and Valais are formed from the word Vallenses. At a later period it was called Forum Clandii Vallensium Octodurensium, as an inscription shows. One authority speaks of the remains of a Roman aqueduct at Martigny. Many coins, and other memorials of the Roman time, have been found about the place.

The name Octodur is manifestly Celtic. The second part of the name is Dur, "water." The first part, probably some corrupt form, is not explained. The distances on the Roman road from Augusta Praetoria (Aosta) in Italy to Octodurus are stated in Vol. I. p. 110.
[G. L.]
OCTOGESA, a town of the Ilergetes, in Hispania Tarraconensis, seated on the river Iberus (Caes. B. C. i. 61). It is identified by some with Mequinenza; but Ukert (vol. ii. pt. 1. p. 452) seeks it to the S . of the Sicoris (or Segre), in the neighbourhood of La Granja.
[T. H. D.]
OCTOLOPHUS. 1. A place belonging to the Lyncestae, in Macedonia, to which the consul Sulpicius moved his camp in the campaign of B. c. 200, against king Philip. (Liv. xxxi. 36; comp. Castra, Vol. I. p. 562, a.)
2. A place in Perrhaebia, from which Perseus had retired, and which was afterwards occupied by the consul Q. Marcius Philippus, in his daring march over the mountain ridge of Olympus, в. с. 169. (Liv. xliv. 3.) It was probably near the issue of the Titaresius or Elassonitiko, from Mt. Olympus into the valley of Elassóna. (Leake, Northern Greece, vol. iii. pp. 308, 310, 417.) [E. B. J.]

ODESSUS ('Oסŋךббós, Strab. vii. p. 319; Scymn. 748 ; Diod. xix. 73, xx. 112 ; Appian. Ill. 30; Arrian, Per. p. 24; Anon. Per. p. 13; Ptol. iii. 10. § 8, viii. 11. § 6; Steph. B. s. v.; Mela, ii. 2. § 5; Plin. iv. 18; Ovid, Trist. i. 9. 37: the reading 'Oäท $\sigma$ óno入ıs, Scyl. p. 29, is simply a corruption for '0 $\delta \eta \sigma \delta \delta_{s} \pi \delta \lambda_{1} s$, for the name was written both with the single and the double $\sigma$; the latter form occurs on the autonomous coins, the former on those of the Empire: 'O $\delta u \sigma \sigma$ ós, Hierocl.; Procop. de Aed. iv. 11: Odissos, Amm. Marc. xxii. 8. § 43), a town on the W. coast of the Euxine, at the mouth of the river Panysus, 24 M. P. (Anton. Itin.), or 34 M. P. (Peut. Tab.), from Dionysopolis, and 360 stadia from the E. termination of Haemus (Emineh Burnu). Odessus was founded by the Milesians (Strab. l. c.; Plin. l. c.), if credit may be given to the author of the poem which goes under the name of Scymnus (l. c.), as early as the reign of Astyages, or в. c. 594-560. (Clinton, F. H.; Raoul-Rochette, Col. Gr. vol. iii. p. 786.) From the inscriptions in Bückh (Inscr. Nos. 2056, a, b, c), it would seem to have been under a democratic form of government,
and to have presided over the union of five Greek cities on this coast, consisting of Odessus, Tomi, Callatis, Mesambria, and Apollonia. When the Bulgarians swept over the Danubian provinces in A. D. 679 they are found occupying Varna (Bápva, Theophan. p. 298; Niceph. p. 23; Cedren. vol. i. p. 440), which is described as being near Odessus. (St. Martin, ap. Le Beau, Bas Empire, vol. xi. p. 447; Schafarik, Slav. Alt. vol. ii. p. 217.) The autonomous coins of Odessus exhibit "types" referring to the worship of Serapis, the god imported by Ptolemy into Alexandreia, from the shores of Pontus. The series of imperial coins ranges from Trajan to Salonina, the wife of Gallienus. (Eckhel, vol. ii. p. 36; Rasche, vol. iii. pt. 2. p. 51 ; Mionnet, Descr. des Méd. vol. i. p. 395, Suppl. vol. ii. p. 350.) [E.B.J.]

coin of odessus.
ODOMANTI ('Oס $\delta \mu \mu \nu \tau o l$, Herod. vii. 112 ; Thuc. ii. 101, v. 6; Steph. B. s. v.; Odomantes, Plin. iv. 18), a Paeonian tribe, who occupied the district, called after them, Odomantice ('O $\delta \rho \mu a \nu$ $\tau \iota \kappa$ 亿, Ptol. iii. 13. § 31; Liv. xliv. 4 ; 'O§оцаขтis, Steph. B.) This tribe were settled upon the whole of the great mountain Orbelus, extending along the NE. of the lower Strymonic plain, from about Meleniko and Demirissir to Zikhna inclusive, where they bordered on Pangaeus, the gold and silver mines of which they worked with the Pieres and Satrae. (Herod. l. c.) Secure in their inaccessible position, they defied Megabazus. (Herod. v. 16.) The NW. portion of their territory lay to the right of Sitalces as he crossed Mt. Cercine; and their general situation agrees with the description of Thucydides (ii. 101), according to whom they dwelt beyond the Strymon to the N., that is to say, to the N . of the Lower Strymon, where, alone, the river takes such a course to the E. as to justify the expression. Cleon invited Polles, their chieftain, to join him with as many Thracian mercenaries as could be levied. (Thuc. v. 6; Aristoph. Acharn. 156, 164 ; Suid. s. v. алтотєӨріакєข; Leake, Northern Greece, vol. iii. pp. 210, 306, 465.)
[E. B. J.]
ODOMANTIS. [Sophrne.]
O'DRYSAE ('O $\delta \rho \dot{\sigma} \sigma a$.$) ), a people seated on both$ banks of the Artiscus, a river of Thrace, which discharges itself into the Hebrus. (Herod. iv. 92.) Their territory, however, must undoubtedly have extended considerably to the W. of the Artiscus : since Pliny (iv. 18) informs us that the Hebrus had its source in their country ; a fact that is corroborated by Ammianus Marcellinus (xxvii. 4, 10). They appear to have belonged to that northern swarm of barbarians which invaded Thrace after the Trojan War ; and their names are often found interwoven in the ancient myths. Thus the Thracian singer Thamyris is said to have been an Odrysian (Paus. iv. 33. § 4); and Orpheus is represented as their king. (Conon, ap. Phot. p. 140.)

A rude and barbarous people like the Odrysians
cannot be expected to have had many towns ; and in fact we find none mentioned either by Thucydides or Xenophon. The first of their towns recorded is Philippopolis, founded by Philip II. of Macedonia, as there will be occasion to relate in the sequel; and it may be presumed that all their towns of any importance were built after they had lost their independence.

The naine of the Odrysae first occurs in history in connection with the expedition of Dareius $\mathrm{Hy}-$ staspis against the Scythians. (Herod. L c.) Whilst the Persians oppressed the southern parts of Thrace, the Odrysians, protected by their mountains, retained their independence; and the strength which they thus acquired enabled Teres to incorporate many Thracian tribes with his subjects. He extended his kingdom to the Euxine in spite of a signal defeat which he sustained in that quarter from the Thyni (Xen. Anab. vii. 2. § 22); and the dominion of his son Sitalces embraoed the greater part of Thrace; having been bounded on the N. by the Danube, and extending from Abdera on the W. to the Euxine on the E. (Thucrd. ii. 96-98.) Indeed, so powerful was this monarch that his alliance was eagerly courted both by the Athenians and Lacedaemonians at the breaking out of the Peloponnesian War. (Thucyd. ii. 29; Herod. vii. 137 ; Aristoph. Acharn. 136-150.) The expedition whirh he undertook in в. $\mathbf{c} .429$, at the instance of the Athenians, and of Amyntas, pretender to the throne of Macedonia, against Perdiccas II., the reigning sovercign of that country, is also a striking proof of the power of the Odrysians at that period; as the army which Sitalces assembled on that occasion amounted, on the lowest estimate, to 150,000 men, of which one-third were cavalry. (Thuc. ii. 98; Diod. xii. 50.) For the latter force, indeed, the Odrysians were renowned, and the extensive plains of the Hebrus affirded pasture for an excellent breed of horses. (Thuc. l.c.; Polyb. xxiv. 6; Liv. xliv. 42.) With this amny Sitalces overran Chalcid:ce, Anthemus, Crestonia, and Mygdonia; but the non-appearance of the Athenian contingent, coupled with the approach of winter, obliged him hastily to retire after a month's cainpaign. In b. c. 424 Sitalces fell in an enyagement with the Triballi. and was succeeded by his nephew Seuthes I. Under his reign the Odrysians attained the bighest pitch of their power and prosperity. Their yearly revenue amounted to 400 talents, besides an equal sum in the shape of presents and contributions. (Thuc. ii. 97, iv. 101.) But from this period the power of the Odrysians tregan sensibly to wane. After the death of Seuthes we find his dominions divided among three sovereigus. Medocus, or Amadocus, who was most probably his son, ruled the ancient seat of the monarchy : Maesades, brother of Medocus, reigned over the Thyni, Melanditae, and Tranipsite; whilst the region above Byzantium called the Delta was governed by Teres. (Xen. Anab. vii. 2. § 32, vii. 5. § 1.) It was in the reign of Medocus that Xenophon and the Ten Thousand passed through Thrace on their return from the Persian expedition. and helped to restore Seuthes, son of the exiled Mresades, to his dominions. We gather from this writer that Seuthes exercised only a subordinate power under Medocus, with the title of Archon, or governor, of the Coast (vii. 3. § 16). Subsequently, however, he appears to have asserted his claim to an independent sovereignty, and to have waged open war with Medocus,
till they were reconciled and gained over to the Athenian alliance by Thrasybulus. (Xen. Hell. iv. 8. § 25 ; Diod. xiv. 94.) When we next hear of the Odrysians, we find them engaged in hostilities with the Athenians respecting the Thracian Chersonese. This was under their king Cotys I., who reigned from B. c. 382 to 353 . It was in the reign of the same monarch (в. c. 376) that the Triballi invaded their territories, and penetrated as far as Abdera. (Diod. xv. 36.) When Cemobleptes, the son and successor of Cotys, ascended the throne, the Odrysians appear to have still retained possession of the country as far as the coast of the Euxine. But a civil war soon broke out between that monarch and Berisades and Amadocus, who were probably his brothers, and to whom Cotys had left some portions of his kingdom. The Atbenians availed themselves of these dissensions to gain prosession of the Chersonese, which appears to have been finally ceded to them in b. c. 357. (Diod. xvi. 34.) But a much more fatal blow to the power of the Odrysians was struck by Philip II. of Macedon. After nine or ten years of warfare, Philip at last succeeded (в. с. 343) in conquering them, and reducing them to the condition of tributaries. (Diod. xvi. 71 ; Dem. de Chers. p. 105.) The exact nature of their relations with Philip cannot be ascertained : but that their subjugation must have been complete appears from the fact of his having founded colonies in their territory, especially Philippopolis, on the right bank of the Hebrus, and in the very heart of their ancient seat. Their subjection is further shown by the circumstance of their cavalry being mentioned as serving in the army of Alexander under Agathon, son of Tyrimmas. (Arrian, iii. 12. § 4.) But a still more decisive proof is, that after Alexanders lieutenant Zophyrio had been defeated by the Getae, the Odrysians were incited by their king, Seuthes III., to rebel against the Macedonians. (Curt. x.1.§45; Justin, xii. 1.) After the death of Alexander, Seuthes took the field against Lysimachus, to whom Thrace lad devolved, with an army of 20,000 foot and 8000 horse, - a sad fulling off from the forces formerly arrayed by Sitalces. (Divd. xviii. 14 ; Paus. i. 9. §6.) The strugule with Lysimachus was carried on with varied success. Under Philip V. of Macedon, the Odrysians were still in a state of revolt. In B. c. 211 that monarch assembled an army with the ostensible design of marching to the relief of By zantium, but in reality to overawe the malcontent chieftains of Thrace. (Liv. xxxix. 35.) In 183 we find Philip undertaking an expedition against the Odrysians, Dentheletae, and Bessi. He succeeded in taking Phiiippopolis, which the inhabitants deserted at his approach, and where he established a garrison, which was expelled shortly after his departure. (Liv. xxxix. 53: Polyb. Ex. Leg. x/viii.) It may be assumed from Livy that on this occasion the Odrysians were supported in their revolt by the Romans (xlii. 19, x|v. 42). After the fall of the Macedonian kingdom, the Odrysians appear to have been treated with consideration by the Romans, who employed them as useful allies against the newly-conquered districts, as well as against the other Thracian tribes; amongst whom the Bessi had now raised themselves to some importance. After this periol the history of the Odrysians is for some time involved in obscurity, though they were doubtless gradually falling more and more under the Roman dominion. In the jear

ODRTSAE.
OEANTHELA.
B. C. 42 their king Sadxles, who had no children, bequeathed his kingdom to the Romans, and possession was taken of it by Brutus. (Caes. B. C. iii. 4; Dion Cass. xlvii. 25; Lucan, v. 54.)

Angustus seems to have left the Odrysians the appearance of independence, In the year b.c. 29, in return for the friendly disposition which they had shown towards the Romans, they were presented by M. Crassus with a territory hallowed by the worship of Bacchus, which he had conquered from the Bessi (Dion Cass. li. 25). In the year в.c. 20, Rhoematalces, who was administering the kingdom as guardian of the three infant sons of the deceased monarch Cotys IV., succeeded, with the assistance of the Rumans ander M. Lollius, in reducing the Bessi (Id. liv. 20). A few years afterwards, the Bessi again rose under their leader Vologaeses, a priest of Bacchus, and drove Rhoematalces into the Chersonese: they were, however, soon reduced to submission by Lucins Piso; Rhoematalces was restored; and it would appear, from Tacitus, that under his reign the Odrysians acquired the dominion of all Thrace (Dion Cass. liv. 34; Tac. Ann. ii. 64). This apparent prosperity was, however, entirely dependent on the Romans, by whose influence they were governed. Thus, after the death of Rhoematalces, we find Augustus dividing his kingdom between his son Cotys and his brother Rhascuporis (Tac. Lc.; Vell. Pat. ii. 98). Again, after the murder of Cotys by Rhascuporis, Tiberius partitioned the kingdom between the children of Cotys and Rhoematalces, son of Rhascuporis, at the same time appointing a Roman, Trebellienus Rufus, as guardian of the former, who were not of age (Tac. Ann. ii. 67, iii. 38). But, in spite of their subjection, the spirit of the Odrysians was not subdued. Two sears after the event just recorded, they rose, in conjunction with the Coeletae, against the Romans, as well as against their own king Rhoematalces, whom they besieged in Philippopolis. This rebellion, which was undertaken by leaders of little distinction, and conducted without concert, was soon quelled by P. Velleins (Tac. Ann. iii. 39). A more formidable one twok place A.D. 26, which Tacitus ascribes to the unwillingness of the Thracian tribes to supply the Loman army with recruits, as well as to the native ferocity of the people. It occasioned the Romans some trouble, and Poppaeus Sabinus was rewarded with the triumphal insignia for his services in suppressing it (lb. iv. 46-5l). At length, under the reign of Vespasian, the Odrysians were finally deprived of their independence, and incorporated with the other provinces of the Roman empire (Suet. Verp. 8; Eutrop. vii. 19).

In the preceding sketch those circumstances only have been selected which illustrate the history of the Odrysians as a people, without entering into the personal history of their monarchs. The following is a list of the dynasty; an account of the different kings who compose it will be found in the Dict. of Biogr. and Mythol. under the respective heads. 1. Teres. 2. Sitalces. 3. Seuthes I. 4. Medocus (or Amaducus) with Maesades. 5. Seuthes II. 6. Cotys L. 7. Cersobleptes, with Amadocus and Berivades. 8. Seuthes III. 9. Cotys II. 10. Cotys III. 11. Sadales. 12. Cotys IV. 13. Rhoematalces I. 14. Cotys V. and Khascuporis. 15. Khoematalces II. 16. Cotys VI.

The manners of the Odrysians partook of that Fildness and ferocity which was common to all the Thracian tribes, and which made their name a by-
word among the Greeks and Romans; but the horrible picture drawn of them by Ammianus Marcellinus (xxvii. 4. §9) is probably overcharged. Like most other barbarous nations of the north, they were addicted to intoxication, and their long drinking bouts were enlivened by warlike dances performed to a wild and barbarous music. (Xen. Anab. vii. 3. § 32.) Hence it is characteristic that it was considered a mark of the highest distinction to be a table companion of the king's; but whoever enjoyed this honour was expected not only to drink to the king, but also to make him a present ( 16.16, seq.) Among such a people,we are not surprised to find that Dionysus seems to have been the deity most worshipped. They had a custom of buying their wives from their parents, which Herodotus (v.6) represents as prevailing among all the Thracian tribes.
[T. H. D.]
ODRYSUS. [Hadrianopolis.]
 'Oঠuv $\boldsymbol{\sigma}$ is, Steph. B. s. v.), a town of Hispania Baetica, lying N. of Abdera, and, according to tradition, built by Ulysses, together with a temple to Athene. By Solinus (c. 23) and others it has been absurdly identified with Olisipo (Lislon); but its site, and even its existence, are altogether uncertain. [T. H. D.]

OEA (Pomp. Mela, i. 7. § 5 ; Oeensis civitas, Plin. v. 4; Tac. Hist. iv. 50; Solin. 27; Amm. -Marc. xxviii. 6; 'Eẃa, Ptol. iv. 3. § 12), a town in the district of the Syrtes, which, with Leptis Magna, and Sabrata, formed the African Tripolis. Although there had probably beeu an old Phoenician factory here, yet, from the silence of Scylaz and Strabo, the foundation of the Roman colony ("Oeea colonia," Itin. Anton.) must be assipned to the middle of the first century after Christ. It flourished under the Romans until the fourth century, when it was greatly injured by the Libyan Ausuriani. (Amm. Marc. l.c.) At the Saracen invasion it would scem that a new town sprung up on the ruins of Oea, which assumed the Roman name of the district - the modern Tripoli; Tráblis, the Moorish name of the town, is merely the same word articulated through the medium of Arab pronunciation. At Tripoli there is a very perfect marble triumphal arch dedicated to M. Aurelius Antoninus and L. Aurelius Verus, which will be found beautifully figured in Captain Lyons Travels in N. Africa, p . 18. Many other Roman remains have been found here, especially glass arns, some of which have been sent to England.

For some time it was thought that a coin of Antoninus, with the "epigraph" col avo. oce., was to be referred to this town. (Eckhel, vol. iv. p. 131.) Its right to claim this is now contested. (Duchalais, Restitution à Obbasa de Pisidie, à Jérusalem et aux Contríes Occ. de la Haute Asic de trois Monnaies Coloniales attribućes à Océa, Revue Numismatique, 1849, pp. 97-103; Beechey, Exped. to the Coast of Africa, pp. 24-32; Barth, Wanderunyen, pp. 294, 295, 391.)
[E. B. J.]
OEA (Ơa, O! $\eta$ ). 1. A town in Aegina. [Vol I. p. 34, a.]
2. A town in Thera [Thers].

OEANTHEIA or OEANTHE (Olávdeıa, Hellanic. ap. Steph. B., Polyb., Paus.; Oiáv0 $\eta$, Hecatae. ap. Steph. B., Plin. iv. 3. s. 4; Eviav日ís, Scylax, p. 14; Euvalia, Ptol. iii. 15. § 3 : Eth. Oiav日eús: Galaxidhi), an important town of the Locri Ozolse, situated at the western entrance of the Crisssean gulf. Polybius says that it is opposite to Aegeira in Achaia (iv. 57, comp. v. 17), which agrees with

H H
the sitnation of Galarid ${ }^{\text {a }}$. The Oeanthians (Olav日eis) are mentioned among the Lacri Ozolate by Thucydides (iii. 101). Scylax calls the town Euanthis; and since Strabo says (vi. p. 259) that Locri Epizephyrii in Italy was founded by the Locri Ozolae, under a leader named Euanthes, it has been conjectured that Oeantheia or Euantheia was the place where the emigrants embarked. Oeantheia appears to have been the only maritime city in Locris remaining in the time of Pausanias, with the exception of Naupactus. The only objects at Oeantheia mentioned by Pausanias were a temple of Aphrodite, and one of Artemis, situated in a grove above the town ( $\mathrm{x} .38 . \S 9$ ). The town is mentioned in the Tab. Peut. as situated 20 miles from Naupactus and 15 from Anticyra. The remains of antiquity at Galaxidhi are very few. There are some ruins of Hellenic walls; and an inscription of no importance has been discovered there. (Bïckh, Inscr. No. 1764.) The modern town is inhabited by an active scafaring population, who possessed 180 ships when Ulrichs visited the place in 1837. (Leake, Northern Greece, vol. ii. p. 594 ; Ulrichs, Reisem, foc. p. 5.)

OE'ASO, OFASSO (Oiar $\dot{1} \nu$, Strab. iii. p. 161; Oia $\sigma \sigma \omega$, Ptol. ii. 6. § 10), erroneously written Olarso by Pliny (iii. 3. s. 4, iv. 20. s. 34), was a maritime town of the Vascones in Hispania Tarraconensis, near the promontory of the same name, and on the river Magrada (Mela, iii. 1), most probably Oyarço or Oyarzun, near Irun and Fuentearabia. In an Inscr. we find it written Oeasuna. (Grut. p. 718; Oienhart, Not. Vasc. ii. 8; Florez, Esp. S. xxiv. pp. 15, 62, and xxxii. p. 147.) ['T. H. D.]

OEASSO (Oia $\alpha \sigma \omega$, Ptol. ii. 6. § 10, ii. 7. § 2), a promontory of Hispania Tarraconensis, in the territory of the Vascones, formed by the N. extremity of the Pyrenees, now C. Higuera. [T. H. D.]

OECHA'LIA (Oixalía: Eth. Oixa入ıU'́s), the name of several ancient towns in Greece. 1. In Messenia, in the plain of Stenyclerus. It was in ruins in the time of Epaminondas (Pans. iv. 26. §6), and its position was a matter of dispute in later times. Stribo identified it with Andania, the ancient residence of the Messenian kings (viii. pp. 339, 350,360 , x. p. 448), and Pausanias with Carnasium, which was only 8 stadia distant from Andania, and apon the river Charadrus. (Paus. iv. 2. §2, iv. 33. §4.) Carnasium, in the time of Pausanias, was the name given to a grove of cypresses, in which were statues of Apollo Carneius, of Hermes Criophorus, and of Persephone. It was here that the mystic rites of the great goddesses were celebrated, and that the urn was preserved containing the bones of Eurytus, the son of Melanens. (Pans. iv. 33. §§ 4, 5.)
2. In Euboea, in the district of Eretria. (Hecat. ap. Puus. iv. 2. § 3 ; Soph. Trach. 74 ; Strab. ix. p. 438, x. p. 448; Steph. B. s. v.)
3. In Thessaly, on the Peneins, between Pelinna to the east and Tricca to the west, not far from Ithome. (Strab. viii. pp. 339, 350, ix. p. 438, x. p. 448; Paus. iv. 2. § 3; Steph. B. 8. v.)
4. In the territory of Trachis. (Strab. viii. p. 339, x. p. 448; Steph. B. s. v.)
5. In Aetolia. (Strab. x. p. 448.) Each of these cities was considered by the respective inhabitants as the residence of the celebrated Eurytus, who was conquered by Hercules, and the capture of whose city was the subject of an epic poem called Oixarias ancoris, which was ascribed to Honer or Cresphyius. Hence among the early poets there was a dif-
ference of statement upon the subject. The Messenian Oechalia was called the city of Eurytus in the Iliad (ii. 596) and the Odyssey (xxi. 13), and this statement was followed by Pherecydes ( $a p . S c h o l$. ad Soph. Trach. 354) and Pausanias (iv. 2. §3). The Euboean city was selected by the writer of the poem on the Capture of Oechalia (Schol. ap. Soph. l. c.), by Hecataeus (ap. Paus. l. c.), and by Strabo ( $x$. p. 448). The Thessalian city is mentioned as the residence of Eurytus in another passage of the Iliad (ii. 730); and K. O. Mïller supposes that this was the city of the original fable. (Dorians, vol. i. p. 426, seq., transl.)

OECHARDES (Oíxápōŋs, Ptol. vi. 16. §§ 3, 4), a river of Serica, the sources of which Ptolemy (l.c.) places in the Auxasii M., Asmiraei M., and Casii M., the latter of which mountain ranges we may safely identify with the chain of Kaschgar. The statement of Ptolemy, coming throngh Marinas, who derived his knowledge of the trading route of the Seres from Titianus of Macedonia, also called Mäs, the son of a merchant who had sent his commercial agents into that country (Ptol. i. 11. §7), indicates a certain amount of acquaintance with that sincular depression in Central Asia which lies to the E. of Pamir, the structure of which has been inferred from the direction of its water-courses. The 0echardes may be considered to represent the river formed by the union of the streams of Khotan, Yarkand, Kaschyar, and Ushi, and which flows close to the hills at the base of Thian-Schan. The Oechardae (Oíxdojal, Ptol. vi. 16. § 4) deriving their name from the river must be assigned to this district. [Serica.]
[ह. B. J.]

## OEDANES. [DYardanes.]

OENEANDA. [Oenoanda.]
OE'NEON (Oivé̀v), a town of the Locri Ozolae, east of Naupactus, possessing a port and a sacred enclosure of the Nemeian Zrus, where Hesiod was said to have been killed. It was from this plare that Demosthenes set out on his expedition into Aetolia, in B. c. 426, and to which he returned with the remnant of his forces. Leake sapposes that the territory of Oeneon was separated from that of Naupactus by the river Morno, and that Oeneon perhaps stood at Mugúla, or near the fountain Ambla (Thuc. iii. 95, seq.; Steph. B. s. v.; Leake, Northern Greece, vol. ii. p. 616.)

OENEUS (Oiveús), a river of Pannonia a tribntary of the Savus (Ptol. ii. 17.§ 2). In the Peuting. Table it is called Indenca, and now bears the name of Unna.
[L. S.]
OENI'ADAE 1. (Oivídoat, Thuc. et alii; Oivetdóal, Steph. B. 8. v.: Eth. Oiviádau: Trikardho), a town in Acarnania, situated on the W. bank of the Achelons, about 10 miles from its mouth. It was one of the most important of the Acarnanian towns, being strongly fortified both by nature and by art, and commanding the whole of the south of Acanmia. It was surrounded by marshes, many of them of great extent and depth, which rendered it quite inaccessible in the winter to an invading force. Its territory appears to have extended on both sides of the Achelous, and to have consisted of the district called Paracheloitis, which was very fertile. It secms to have derived its name from the mythical Oeneus, the great Aetolian hero. The town is first mentioned about B. c. 455 . The Messenians, who had been settled at Naupactus by the Athenians at the end of the Third Messenian War (455), shortly afterwards made an expedition against Oeniaiae,

## OENIADAE.

OENOANDA.
which they took; but after bolding it for a year, they were attacked by the Acarnanians and compelled to abandon the town. (Paus. iv. 25.) Oeniadae is represented at that time as an enemy of Athens, which is said to have been one of the reasons that anduced the Messenians to attack the place. Twenty-three years befure the Peloponnesian War (b. c. 454) Pericles laid siege to the town, but was unable to take it. (Thuc. i. 111 ; Diod. xi. 85.) In the Peloponnesian War, Oeniadae still continued opposed to the Athenians, and was the only Acarnanian town, with the exception of Astacus, which sided with the Lacedaemonians. In the third year of the war (429) Phormion made an expedition into Acarnania to secure the Athenian ascendancy; but though he took Astacus, he did not continue to march against Oeniadae, because it was the winter, at which season the marshes secured the town from all attack. In the following year (428) his son Asopius sailed up the Achelous, and raraged the territory of Oeniadae; but it was not till 424 that Demosthenes, assisted by all the other Acarnanians, compelled the town to join the Athenian alliance. (Thuc. ii. 102, iii. 7, iv. 77.) It continued to be a place of great importance during the Macedonian and Roman wars. In the time of Alexander the Great, the Aetolians, who had extended their dominions on the W. bank of the Achelons, succeeded in obtaining possession of Oeniadae, and expelled its inhabitants in so cruel a manner that they were threatened with the vengeance of Alexander. (Diod. xviii. 8.) Oeniadae remained in the hands of the Aetolians till 219, when it was taken by Philip, king of Macedonia. This monarch, aware of the importance of the place, strongly fortified the citadel, and commenced uniting the harbour and the arsenal with the citadel by means of walls. (Polyb. iv. 65.) In 211 Oeniadae, together with the adjacent Nesus (Nifos) or Nasus, was taken by the Romans, under M. Valerius Laevinus, and given to the Aetulians, who were then their allies; but in 189 it was restored to the Acarnanians by virtue of one of the conditions of the peace made between the Romans and Aetolians in that year. (Pol. ix. 39; Liv. xxvi. 24 ; Polyb. xxii. 15; Liv. xxxvii. 11.) From this period Oeniadse disappears from history; but it continued to exist in the time of Strabo (x. p. 459).

The exact site of Oeniadae was long a matter of cispute. Dodwell and Gell supposed the ruins on the eastern side of the Achelous to represent Oeniadae; but these ruins are those of Pleuron. [Plevron.] The true position of Oeniadae has now been fixed with certainty by Leake, and his account has been confirmed by Mure, who has since visited the spot. Its ruins are found at the modern Trikardho, on the W. bank of the Achelous, and are surrounded by morasses on every side. To the N. these swamps deepen into a reedy marsh or lake, now called Lesini or Katokhi, and by the ancients Melite. In this lake is a small island, probably the same as the Nasos mentioned above. Thucydides is not quite correct in his statement (ii. 102) that the marshes around the city were caused by the Achelous alone; he appears to take no notice of the lake of Melite, which affirded a much greater protection to the city than the Achelous, and which has no connection with this river. The city occupied an extensive insulated hill, from the southern extremity of which there stretches out a long slupe in the direction of the Achelous, connecting the hill with the plain. The entire circuit of the fortifications still
exists, and cannot be much less than three miles. The walls, which are chiefly of polygonal construction, are in an excellent state of preservation, often to a height of from 10 to 12 feet. Towards the N. of the city was the port, communicating with the sea by a deep river or creek running up through the contiguous marsh to Petala on the coast.

Leake discovered the ruins of a theatre, which stood near the middle of the city ; but the most interesting remains in the place are its arched posterns or sallyports, and a larger arched gateway leading from the port to the city. These arched gateways appear to be of great antiquity, and prove that the arch was known in Greece at a much earlier period than is usually supposed. Drawings of several of these gateways are given by Mure. (Leake. Northern Greece, vol. iii. p. 556, seq.; Mure, Journal of a Tour in Greece, vol. i. p. 106, seq.; see also, respecting the arches at Oeniadae, Leake, Peloponnesiaca, p. 121.)

Strabo (x. p. 4.50 ) speaks of a town called Old Oenia ( $\dot{\eta}$ raлaıà Oivaía*), which was deserted in his time, and which he describes as midway between Stratus and the sea. New Oenia (ì vuv Oivaia), which he places 70 stadia above the mouth of the Achelous, is the celebrated town of Oeniadae, spoken of above. The history of Old Oenia is unknown. Leake conjectures that it may possibly have been Erysiche ('Epvol $\chi \eta$ ), which Stephanus supposes to be the same as Oeniadae; but this is a mistake, as Strabo quotes the authority of the poet Apollodorus to prove that the Erysichaei were a people in the interior of Acarnania. Leake places Old Oenia at Palea Mani, where he found some Hellenic remains. (Steph. B. s. v. Oivetádal; Stral. x. p. 460; Leake, Northern Greece, vol. iii. p. 524, seq.)
2. A city of Thessaly, in the district Oetaca (Strab. ix. p. 434; Steph. B. s. v.)

COIN OF OENIADAE.
OENIUS (Ơyios), also called Oenoë (Oivón, Arrian, Peripl. Pont. Eux. p. 16), a small river of Pontus, emptying itself into the Euxine, 30 stadia east of the mouth of the Thoaris. (Anonym. Peripl. Pont. Eux. p. 11.)
[L. S.]
OENOANDA (Oivoávסa), a town in the extreme west of Pisidia, belonging to the territory of Cibyra, with which and Balbura and Bubon it formed a tetrapolis, a political confederacy in which each town had one vote, while Cibyra had two. (Stral. xiii. p. 631 ; Steph. B. 8. v.; Liv. xxxviii. 37 ; Plin. v. 28 ; comp. Cibyra.) The town is mentioned as late as the time of Hierocles, who, however (p.685), calls it by the corrupt name of Enoanda. [L.S.]

[^21]н н 2

OENOBARAS (Oivobdpas or Oivordpas), a river of the plain of Antioch, in Syria, at which, according to Strabo (xvi. p. 7.51), Ptolemy Philometer, having conquered Alexander Balas in battle, died of his wounds. It has been identified with the Uphrenus, modern Aphreen, which, rising in the roots of Amanus Mons (Almadaghy), runs southward through the plain of Cyrrhestica, until it falls into the sinall lake, which receives also the Labotas and the Arceuthus, from which their united waters run westward to join the Orontes coming from the south. The Oenoparas is the easternmost of the three streams. It is unquestionably the Afrin of Abulfeda. (Tabula Syr., Supplementa, p. 152, ed. Koehler; Chesney, Expedition, vol. i. pp. 407, 423.)
[G. W.]
OE'NOE (Oivón). 1. A small town on the northwest const of the island of Icaria. (Strab. xiv. p. 639 ; Steph. B. s. v. ; Athen. i. p. 30.) This town was probably situated in the fertile plain below the modern Messaria. The name of the town seems to be derived from the wine grown in its neighbourhood on the slopes of Mount Pramnus, though others believe that the Icarian Oenoei was a colony of the Attic town of the same name. (Comp. Ross, Reisen auf den Griech. Inseln, ii. pp. 159, 162.)
2. A port-town on the coast of Pontus, at the mouth of the river Oenius, which still bears its ancient name of Oenoë under the corrupt form Unich. (Arrian, Peripl. Pont. Eux. p. 16; Anonym. Peripl. p. 11 ; comp. Hamilton, Researches, i. p. 271.)
3. An ancient name of the island of Sicinus. [Sicinus.]
[L. S.]
OE'NOE (Olvón : Eth. Olvoaios, Oivaios). 1. An Attic demus near Marathon. [Marathon.]
2. An Attic demus near Eleutherae, upon the confines of Bocotia. [Vol. I. p. 329, No. 43.]
3. A fortress in the territory of Corinth. [Vol. I. p. 685, b.]
4. Or Oene (Otm, Steph. B. s. v.), a small town in the Argeia, west of Argos, on the left bank of the river Charadrus, and on the sonthern (the Prinus) of the two roads leading from Argos to Mantineia. Above the town was the mountain Artemisinm (Malevós), with a temple of Artemis on the summit, worshipped by the inhabitants of Oenoe under the name of Oenoatis (Oiveâtıs). The town was named by Diomedes after his grandfather Oeneus, who died here. In the neighbourhood of this town the Athenians and Argires gained a victory over the Lacedaemonians. (Paus. ii. 15. § 2, i. 15. § 1, x. 10. § 4 ; Apollod. i. 8. § 6; Steph. B. 8. v.) Leake originally placed Oenoe near the left bank of the Charadrus ; but in his later work he has changed his opinion, and supposes it to have stood near the right bank of the Inachus. His original supposition, however, seems to be the correct one; since there can be little doubt that Ross has rightly described the course of the two roads leading from Argos to Mantineia. (Leake, Morea, vol. ii. p. 413, Pelopon. p. 266; Ross, Reisen im Peloponnes, p. 133.)
5. Or Boeonoa, a town of Elis, near the Homeric Ephyra. (Strab. viii. p. 338.) [Vol. I. p. 839. h.]

OENOLADON (Oivo入d8 $\omega v$, Stadiasm. § 96). a river in the district of the African Syrtes, near the town of Amaraea ('A qapaía, Stadiasm. l.c.), where there was a tower and a cove. Barth (Wandernengen, $\mathrm{pp} .300,359$ ) refers it to the Wady Msid, where there is a valley with a stream of sweet water in
the sandy waste; and Müller, in his map to illustrate the Coast-describer (Tab. in Geog. Graec. Min. Par. 1855), places Amaraes at Ras-al-Hamrak, where Admiral Smyth (Mediterranean, p. 456) marks core ruins, and Admiral Beechey (Exped. to N.Coast of Africa, p. 72) the ruins of several baths with tesselated pavements, to the W. of which there is a stream flowing from the Wady Mata. [E. B. J.] OENO'NE or OENO'PIA. [AEGNa.]
OENO'PHYTA (Tג̀ Oivбфuta), a place in Boeotia, where the Athenians under Mymnides gained a signal victory over the Boeotians in B. C. 456. As this victory was followed by the destruction of Ta nagra, there can be little doutt that it was in the territory of the latter city, not far from the frontier of Attica. Its name, moreover, shows that it was the place where the wine was chiefly produced, for which the territory of Tanagra was celebrated. Leake therefore places it at l'uia (written Otva, perhaps a corruption of Oivóфuta), which stands in a commanding position near the left bank of the Asopus, between Tanagra and Oropus. (Thuc. i. 108, iv. 95 ; Leake, Northern Greece, vol. ii. p. 463.)

OENO'TRIA (Oivorpia), was the name given by the Greeks in very early times to the sonthernmost portion of Italy. That country was inhabited at the period when the Greeks first became acquainted with it, and began to colonise its shores, by a people whom they called Oenotri or Oenotril (Oinwtpol or Oivótpiot). Whether the appellation was a national one, or was even known to the people themselves, we have ro means of judging; but the Greek writers mention several other tribes in the same part of Italy, by the names of Chones, Morgetes, and Itali, all of whom they regarded as of the same race with the Oenotrians; the two former being expressly called Oenotrian tribes [Chones; Morgetes], while the name of Itali was, according to the account generally received, applied to the Oenotrians in general. Antiochus of Syracuse distinctly spoke of the Oenotri and Itali as the same people (ap. Strab. vi. p. 254), and defined the boundaries of Oenotria (under which name he included the countr 8 subsequently known as Lucania and Brattium exclusive of Iapygia) as identical with those of Italia (ap. Strab. l. c.). A well-known tradition, adopted by Virgil, represented the Oenotrians as taking the name of Italians, from a chief or king of the name of Italus (Dionys. i. 12, 35; Virg. Aen. i. 533; Arist. Pol vii. 10); but it seems probable that this is only one of the mythical tales so common among the Greeks: and whether the name of Itali was only the native appellation of the people whom the Greeks called Oenotrians, or was originally that of a particular tribe, like the Chones and Morgetes, which was gradually extended to the whole nation, it seems certain that, in the days of Antiochus, the names Oenotri and Itali, Oenotria and ltalia, were regarded as identical in significm tion. The former names, however, had not ret fallen into disuse; at least Herodotus employs the name of Oenotria, as one familiar to his readers, to designate the country in which the Phocaean colony of Velia was founded. (Herod. i. 167.) But the gradual extension of the name of Italia, as well as the conquest of the Oenotrian territory by the Sabellian races of the Lacanians and Brattians, naturally led to the disuse of their name; and thongh this is still pmployed by Aristotle (Pol. vii. 10), it is only in reference to the ancient customs and
habits of the people，and does not prove that the name was still in current use in his time．Scymnus Chius uses the name Oenotria in a different sense， as distinguished from Italia，and confines it to a part only of Lucania；but this seems to be certainly op－ posed to the common usage，and probably urises from some misconception．（Scymn．Ch．244，300．）

There seems no doubt that the Oenotrians were a Pelasgic race，akin to the population of Epirus and the adjoining tract on the E．of the Adriatic．This was evidently the opinion of those Greek writers who represented Oenotrus as one of the sons of Lycaon， the son of Pelasgus，who emigrated from Arcadia at a very early period．（Pherecydes，ap．Dionys．i． 13；Paus．viii．3．§ 5．）The statement of Pausa－ nias，that this was the most ancient migration of which he had any knowledge，shows that the Oeno－ trians were considered by the Greeks as the earliest inhabitants of the Italian peninsula．But a more conclusive testimony is the incidental notice in Ste－ phanus of Byzantium，that the Greeks in Southern Italy called the native population，whom they had reduced to a state of serfdom like the Penestas in Thessaly and the Helots in Laconia，by the name of Pelasgi．（Steph．Byz．s．v．Xiou．）These serfs could be no other than the Oenotrians．Other argu－ ments for their Pelasgic origin may be deduced from the recurrence of the same names in Southern Italy and in Epirus，as the Chones and Chaones，Pan－ dosia，and Acheron，\＆cc．Aristotle also notices the custom of ouroitial，or feasting at public tables，as subsisting from a very early period among the Oeno－ trimns as well as in Crete．（Arist．Pol．vii．10．）

The relation of the Oenotrians to the other tribes of Italy，and their subjection by the Lucanians，a Sabellian race from the north，have been already given in the article Italia． ［E．H．B．］
OENO＇TRIDES INSULAE（Oivarplס́es vฑ̄ 0 ）， were two small islands off the shore of Lucania， nearly opposite Velia．（Strab．vi．p． 252 ；Plin．iii． 7．3．13．）Their individual names，according to Pliny，were Pontia and Iscia．Cluverius（Ital．p． 1260）speaks of them as still existing under their ancient names；but they are mere rocks，too small to be inarked on ordinary modern maps．［E．H．B．］

OENUS（Oivoûs ：Eth．Oivouvtios），a small town in Laconia，celebrated for its wine，from which the river Oenus，a tributary of the Eurotas，appears to have derived its name．From its being described by Athenseas as near Pitane，one of the divisions of Sparta，it was probably situated near the junction of the Oenus and the Eurotas．（Steph．B．s．v．；Athen． i．p．31．）The river Oenus，now called Kelefina， rises in the watershed of M．Parnon，and，after flowing in a general south－westerly direction，falls into the Eurotas，at the distance of little more than a mile from Sparta．（Polyb．ii．65，66；Liv．xxxiv． 28．）The principal tributary of the Uenus was the Gorgylus（「ópyu入os，Polyb．ii．66），probably the river of Vrestend．（Leake，Peloponnesiaca，p．347．）

OENUSSAE（Oivov̄ $\sigma a \iota$, Olvoî̃aı）．1．A group of islands off the coast of Messenia［Vol． II．p．342，b．］

2．A group of islands between Chios and the Asiatic coast．（Herod．i． 165 ；Thuc．viii． 24 ；Steph． B．s．e．）They are five in number，now called Spal－ madores or Ergonisi Pliny（v．31．8．38）mentions onls one island．

OEROE［Platafae．］
OESCUS 1．（Olokos，Ptol．iii．10．§ 10，viii． 11．§6），a town of the Triballi in Luwer Moesia，
seated near the mouth of the river of the same naine， and on the road from Viminacium to Nicomedia， 12 miles E．from Valcriana，and 14 miles W．from Utuin．（ltin．Ant．p．220．）It was the station of the Legio V．Maced．Procopius，who calls the town ＇Ionds，says that it was fortified by Justinian（de Aed．iv．6）．Usually identitied with Oreszucilz， though some hold it to be Ghita．

2．A river of Lower Moesia，called by Thucydides （ii．96）＂Orklos，and by Herodotus（iv．49）Exios． Pliny（iii．26．s．29）places its source in Mount Rhodope；Thucydides（l．c．）in Mount Scomius， which adjoined Kbodope．Its true source，however， is on the W．side of Haemus，whence it pursues its course to the Danube．It is now called the Isker or Esker．

OESTRYMNIDES．［Britannicae Ingulak， Vol．I．p．433．］

OESYME（Oi $\sigma \mu \eta$, Thuc．iv． 107 ；Scyl．p． 27 （the MS．incorrectly $\mathcal{Z}$ Diod．Sic．xii． 68 （by an error of the MS．$\Sigma v^{\prime} \mu \eta$ ）； Ptol．iii．13．§ 9 ；Plin．iv． 18 ；Armenidas，ap． Athen．p． 31 ：Eth．Oioumaios，Steph．B．），a Tha－ sian colony in Pieris，which，with Galepsus，was taken by Brasidas，after the capture of Amphipolis． （Thnc．L c．）Its position must be sought at some point on the coast between Nefter and the mouth of the Strymon．（Leake，Northern Greece，vol．iii．p． 179 ；Cousinery，Voyage dans la Macedoine，vol．ii． p．69．）
［E．B．J．］
OETA（OITr：Eth．Oltaíos），a mountain in the south of Thessaly，which branches off from Mt． Pindus，runs in a south－easterly direction，and forms the northern barrier of Central Greece．The only entrance into Central Greece from the north is through the narrow opening left between Mt．Oeta and the sea，celebrated as the pass of Thermopylae． ［Thermopylae］．Mt．Oeta is now called Kataró－ thra，and its highest summit is 7071 feet．（Journal of Geogr．Soc．vol．vii．p．94．）The mountain im－ mediately above Thermopylae is called Callidromon both by Strabo and Livy．（Strab．ix．p．428；Liv． xxxvi．15．）The latter writer says that Callidro－ mon is the highest summit of Mt．Ueta ；and Strabo agrees with him in describing the summit nearest to Thermopylae as the highest part of the range；but in this opinion they were both mistaken，Mt．Patrio－ tiko，which lies more to the west，being considerably higher．Strabo describes the proper Oeta us 200 stadia in length．It is celebrated in mythology as the scene of the death of Hercules，whence the Roman poets give to this bero the epithet of Oetaeus．From this mountain the southern district of Thessaly was called Oetaea（Oícaía，Strab．ix．pp．430，432．434）， and its inhabitants Oetaei（Oiracut，Herod．vii． $21 \%^{\circ}$ ； Thuc．iii．92；Strab．ix．p．416）．There was also a city，Oeta，said to have been founded by Amphissus， son of Apollo and Dryope（Anton．Liberal．c．32）， which Stephanus B．（s．v．）describer as a city of the Malians．Leake places it at the foot of Mt．Patri－ otiko，and conjectures that it was the same us the sacred city mentioned by Callimachus．（Hymn．in Del．287．）［See Vol．II．p．255．］（Leake，Northern Greece，vol．ii．p．4，seq．）

OETENSII（Oirท́vo iot，Ptol．iii．IO．§ 9），a tribe in the eastern part of Moesia Inferior．［T．H．D．］

OETYLUS（Otru入os，Hom．，Yaus．，Steph．B．； Beítu入os，Böckh，Inscr．no．1323；Bltu入a，Ptol．iii．
 Strab．viii．p．360，corrected in accordance with the inscription），a town of Laconia on the castern side
of the Messenian gulf, represented by the modern town of Vitylo, which has borrowed its name from it. Pausanias says that it was 80 stadia from Thalamae and 150 from Messa; the latter distance is too great, but there is no dcubt of the identity of Oetylus and Vitylo; and it appears that Pausanias made a mistake in the names, as the distance between Oetylus and Caenepolis is $\mathbf{1 5 0}$ stadia. Oetylus is mentioned by Homer, and was at a later time one of the Eleuthero-Laconian tuwns. It was still governed by its ephors in the third century of the Christian era. Pausanias saw at Oetylus a temple of Sarapis, and a wooden statue of Apollo Carneius in the agora. Among the modern houses of Vitylo there are remains of Hellenic walls, and in the church a beautiful fluted Ionic column supporting a beam at one end of the aisle, and three or four Ionic capitals in the wall of the church, probably the remains of the temple of Sarapis. (Hom. Il. ii. 585 ; Strab. viii. p. 360 ; Paus. iii. 21. §7, 25. § 10, 26. § 1 ; Steph. B. s. v.; Ptol. l. c.; Böckh, l. c.: Morritt, in Walpole's Turkey, p. 54 ; Leake, Morea, vol. i. p. 313; Boblaye, Recherches, foc. p. 92 ; Curtius, Peloponnesos, vol. ii. p. 283.)

OEUM (Olov), a mountain fortress siturted in eastern Locris, above Opus, and destroyed by an earthquake. (Strab. i. p. 60.) According to Gell its ruins are to be seen on a steep hill, 25 minutes above Livanitis. (Itin. p. 232.)

OEUM or IUM (Oísv, Oiov, 'I $\delta v:$ Eth. Oid́rns, 'Id́rns), the chief town of the district Sciritis in Laconia, commanded the pass through which was the road from Tegea to Sparta. It probably stood in the Klisura, or narrow pass through the watershed of the mountains forming the natural boundary between Laconia and Arcadis. When the Theban army under Epaminondus first invaded Laconia in four divisions, by four different passes, the only division which encountered any resistance was the one which marched through the pass defended by Oeum. But the Spartan Ischolaus, who commanded a body of troops at this place, was overpowered by superior numbers; and the invading force thereupon proceeded to Sellasia, where they were joined by the other divisions of the army. (Xen. Hell. vi. 5. §§ 24-26.) In Xenophon the town is called 'Ióv and the inhabitants 'Iẫas; but the form Oióv or Otov is probably more correct. Such towns or villages, sitnated upon mountainous heights, are frequently called Oeum or Oea. (Comp. Harpocrat. s. v. Olov.) Probably the Oeum in Sciritis is referred to in Stephanus under Oios. modíxviov Tєýas. Aí $\chi$ údos Muбois ${ }^{*}$ oi полítuı Oiâtaı.

Oeum is not mentioned subsequently, unless we suppose it to be the same place as Insus ("laoos), which Pausanias describes as situated within the frontiers of Laconia, but belonging to the Achaeans. (l'aus. vii. 13. § $\boldsymbol{i}$; comp. Suid. s. v. "Iagos; Leake, Morea, vol.iii. p. 30; lins, Recien im Peloponnes, p. 179; Curtius, Pelopomnesos, vol. ii. p. 264.)

OELM CERAMEICLM. [ATTIC., p. 326, a.]
OEUM DECELEICUM. [ATrICA, p. 330, a.] OGDAEMI. [MARMABICA.]
OGLASA, a small island in the Tyrrhenian or Ligurian sea. between Corsica and the coast of Etruria. (Plin. iii. 6. s. 12.) It is now called Monte Cristo.
[E. H. B.]
O(i)'GIA (' $\Omega \gamma \gamma^{\prime}{ }^{\prime} \eta$ ) is the name given by Homer in the Odyssey to the island inhabited by the nymph Calypso. He describes it as the central point or navel of the sea (ö $\mu \phi a \lambda o s ~ N a \lambda a ́ \sigma \sigma \eta s)$, far trom all
other lands; and the only clue to its position that he gives us is that Ulysses reached it after being borne at sea for eight days and nights after he hid escaped from Charybdis; and that when he quitted it again he sailed for seventeen days and nights with a fair wind, having the Great Bear on his left hand (i.e. in an easterly direction), until he came in sight of the land of the Phaeacians. (Hom. Odyss. i. 50, 85, v. 55. 268-280, xii. 448.) It is hardly necessary to observe that the Homeric geography in regard to all these distant lands must be considered as altogether fabulous, and that it is impossible to attach any value to the distances above given. We are wholly at a loss to account for the localities assigned by the Greeks in later days to the scenes of the Odyssey : it is certain that nothing can less accord with the data (such as they are) supplied by Honer than the identifications they adopted. Thus the island of Calypso was by many fixed on the coast of Bruttium, near the Lacinian promontory, where there is nothing but a mere rock of very small size, and close to the shore. (Plin. iii. 10. s. 15 ; Swinburne's Travels, vol. i. p. 225.) Others, again, placed the abode of the goddess in the island of Gaulos (or Gozo), an opinion apparently first advanced by Callimachus (Strab. i. p. 44, vii. p. 299), and which has at least some semblance of probability. But the identification of Phaeacia with Corcyra, though more generally adopted in antiquity, has really no more foundation than that of Ogycia with Gaulos: so that the only thing approaching to a geographical statement fails on examination. It is indeed only the natural desire to give to the creations of pretic fancy a local habitation and tangible reality, that could ever have led to the associating the scenes in the Odyssey with particular spots in Sicily and Italy; and the view of Eratosthenes, that the geography of the voyage of Ulysses was wholly the creation of the poet's fancy, is certainly the only one tenable. At the same time it cannot be denied that some of the fables there related were founded on vague rumours brought by voyagers, probably Phoenicians, from these distant lands. Thus the account of Scylla and Charybdis, however exaggerated, was doubtless based on truth. But the very character of these marvels of the far west, and the tales concerning them, in itself excludes the idea that there was any accurate geographical knowledge of them. The ancients themselves were at variance as to whether the wanderings of Ulysses took place within the limits of the Mediterranean, or were extended to the ocean beyond. (Strab. i. pp. 22-26.) The fact, in all probability, is that Homer had no conception of the distinction between the two. It is at least very doubtful whether he was acquainted even with the existence of Italy; and the whole expanse of the sea beyond it was undoubtedly to him a region of mystery and fable.

The various opinions put forth by ancient and modern writers concerning the Homeric geography are well reviewed by Ukert (Geographie der Griechen u. Rümer, vol. i. part ii. pp. 310-319); and the inferences that may really be drawn from the language of the poet himself are clearly stated by him. (Ib. part i. jp. 19-31.)
[E. H. B.]
OGYRIS ( ${ }^{5} \Omega \gamma v \rho 15$, Strab. xvi. p. 766 ), an island, off the southern coast of Carmania about 2000 stadia, which was traditionally said to contain the tomb of king Firythras, from which the whole sea was suppesed to have derived its name. It was marked by a l:u; e inound planted with wild palms. Strabo
states that he obtained this story from Nearchus and Orthagoras（or Pythagoras），who learnt it from Mithropastes，the son of a Phrygian satrap，to whom he had given a passage in his fleet to Persia．The same name is given to the island in many other geograpbers（as in Mel．iii．8．§ 6 ：Dionys．P＇er．607； Ylin．vi．28．s．32；Priscian，Perieg．60j；Fest． Avien．794；Steph．B．s．v．；Suidas，s．v．）．The other editions of Strabo read Tujph $\quad \eta$ and Tuppl $\nu \eta$ ． －punsibly a corruption of＇$\Omega \gamma v p i v \eta$ or Гupivn，－the form which Vossius（in Mclam，Le．）has adopted． The accuunt，however，preserved in Arrian＇s Voyage of Nearchus（Inlic．37），differs much from the above．According to hiin，the fleet sailing westward passed a desert and rocky island called Organa； and， $\mathbf{3 0 0}$ stadia beyond it，came to anchor beside another island called Ooriacta；that there the tomb of Erythras was said to exist，and the fleet obtained the aid of Mazene，the chief of the island，who voluntered to accompany it，and pilot it to Susa． It seems geeerally adnitted，that the Organa of Arrian and Ptuleny（vi．7．§46，who，placing it along the Arabian coast，has evidently adopted the distances of Strabo）is the modern Hormuz，which bears also the name of Gerun．or Jerun．Vincent， however，thinks that it is the modern Arek，or L＇Arek．（Voy．Nearchus，i．p．348．）The distance in Strabo is，perhaps，confounded with the distance the fleet had sailed along the coast of Carmania． Again Nearchus places the tomb of Erythras，not in Orzana．but in Ooracta ；and Agatharchides mentions that the land this king reigned over was very fertile， which applies to the latter，and not to the former． （Agatharch．p．2，ed Hudson．）The same is true of what Pliny states of its size（l．c．）．Curtius， without mentioning its name，evidently alludes to Ogyris（Ormuz），which he places close to the con－ tinent（ x .2 ），while the Geographer of Ravenna has preserved a remembrance of all the places under the head of＂Colfo Persico，＂in which he places＂Ogi－ ris，Oraclia，Durcadena，Rachos，Orgira．＂Ooracta is called in Strabo（l．c．）$\Delta$ ©́pakta；in Pliny，Oracla （vi．28．s．98）：in P＇toleny，Oiop $0 x \theta a$（vi．8．§ 1 15）． The ancient name is said to be preserved in the molern Iroct，or Broct．It also derives the name of Kishmi from the quantity of grapes now found on it．Edrisi calls Jezireh－tuileh the long island （i．p． 364 ；cf．also Wellsted＇s Trarels，vol．i． p．62）．The whole of this complicated piece of gengraphy has been fully examined by Vincent， ＇oy．of Dicarchus，vol．i．p．348，\＆c．；Ritter，vol．xii． p． 435.
［ V.$]$
OI＇sPORIS（Oignopis．Ptol．iv．3．§ 14；Opirus， Peut．Tab．；＂Ernpos，Stadiasm．§86），a turn of the Greater Syrtis，which Barth（Wanderungen．pp．368， 378）identifies with Liman Aaim，where there is a sardy bay into which ships might send their boats， with alnost all winds，for water，at three wells， situated near the becch．（Beechey，Expell to $N$ ． Const of Africa，p．173．）The tower，of which the Cuast－describer speaks，must be the ruins at Rüs Eski，to the E．of Aaim．
［E．B．J．］
OLbASA（＂Ongara）．1．A town in Cilicia A－prra．at the foot of Mount Tanrns，on a tributary of the Calycadnus．（l＇tol．r．8．§ 6．）Col．Leake （ Asia Minor，p．320）identifies the town of Obbasa with the Oilse mentioned by Strabo（xiv．p．6i2）； while in another passage（p．117）he conjectures that Olhasa may at a later perixd have changed its name into Claudiupulis，with which accordingly he is inclined to identify it．The former supposition is
possible，lut not the latter，for Strabo places Olle in the interior of Cilicia，between the rivers Lamus and Cydnus，that is，in the mountainons districts of the Taurus．According to tradition，Olbe had been built by Ajax，the son of Teucer；it contained a temple of Zeus，whose priest once ruled over all Cilicia Aspera．（Strab．l．c．）In later times it was regarded as belonging to Isaurin，and was the seat of a bishop．（Hierucl．p． 709 ；Basil．Vit．Theclae，ii 8．）We still passess coins of two of those priestly princes，Polemon and Ajax．（Eckhel，Doctr．Num． vol．iii．p 26，\＆c．）It should be observed that Stephanns Byz．（a．v．＇Oג6ia）calls Olbasa or Olive Olbia．
2．A town in the Lycaonian district Antiochiana， in the south－west of Cybistra．（Ptol．v．6．§ 17 ； Hierocl．p．709．）

3．A town in the northern part of Pisidia，between Pednelissus and Selge．（Ptol．v．5．§ 8；Hierocl．p． 680．）
［L．S］

## olbe．［Olibasa，No．1．］

O＇LBIA（＇Oג6ía，Strab．iv．p．200，vii．p．206； Scymn．806；Ptol．iii．5．§ 28；Arrian，Per．p．20； Anon．Per．p．8；Mela，ii．1．§ 6；Jornand．B．Get． 5；with the affix Satia，Eabia，Anon．l．c．；on coins in the Ionic form always＇O入 ${ }^{\prime}$＇in）．Pliny（iv．26） says that it was anciently called Olbiopolis，and Miletopolis：the forner of these names does not occur elsewhere，and is derived probably from the ethnic name Olbiopolitae（＇OגBiomo八íta，Herod．
 coins as late as the date of Caracalla and Alexander Severus．（Kohler，Mém．de l＇Acad．de St．Petersb． vol．xiv．p．106；Blaramberg，Choix des Méd．An－ tiques dolbiopolis ou dOlbia，Paris，1822；Minn－ net，Descr．des Méd．vol．i．p．349．）Although the inhabitants always called their city Olbia，strangers were in the habit of calling it by the name of the chief river of Seythia，Borysthenes（Bopuotivns， Bopog日inis），and the people Borysthenitae（Bo－ puatevettal，Herod．l．c．；Dion Chrys．Orat．xxxvi． vol．ii．p． 74 ；Lucian，Toxar．61；Menand．ap． Schol．ad Dionys．Perieg．311；Steph．B．a．v．； Amm．Marc．xxii．8．§ 40；Macrob．Sat．i．10）．A Grecian colony in Scythia，on the right bank of the Hypanis， 240 stadia（Anon．l．c．： 200 stadia，Strab． p．200； 15 M．P．，Plin．L c．）from its mouth，the ruins of whicb are now found at a place on the W． bank of the Bug，called Stomogil，not far from the village Ilyinskije，about 12 Eng．miles below Nicholaev．This important settlement，which was situated among the Scythian tribes of the Cullipidae and Alazones，owed its origin to the Ionic Milictus in b．c．655．（Anon．Peripl．I．c．；Euseb．Chron．） At an early period it became a puint of the highest importance for the inland trade，which．issuing from thence，was carried on in an easterly and northern direction as far as Central Asia．It was visited by Herodotus（iv．17，18，53．78），who obtained his valuable information about Scythia from the Greek traders of Olbia．From the important series of in－ scriptions in Bückh＇s collection（Inecr．2058－ 2096），it appears that this city，althouch at times dependent upon the Scythian or Sarmatian princes， enjoyed the privileges of a free government，with institutions framed upon the Ionic model．Among its eminent names occur those of Poseidonius（Suidas， s．v．），a sophist and historian，and Sphaerus the stoic，a disciple of Zeno of Citium．（Plut．Cleom． 2．）There has been much controver：y as to the date of the fannous inscription（Böckh，No．2058）
which records the exploits of Protogenes, who, in the extreme distress of his native city, aided it both with his purse and person. This inscription, apparently belonging to the period b.c. 218-201, mentions the Galatians and Sciri (perhaps the same as those who are afterwards found nnited with the Heruli and Ragii) as the worst enemies of Olbia, a clear proof that in the third century B. c. Celtic tribes had penetrated as far to the E. as the Borysthenes. Dion Chrysostom (Orat. xxxvi. p. 76), who came to Olbia when he escaped from Domitian's edict, relates how it had been destroyed by the Getae aboat 150 years before the date of his arrival, or about B. c. 50, but had been restored by the old inlaabitants. From the inscriptions it appears that Augustus and Tiberius conferred favours on a certain Ababus of Olbia (No. 2060), who, in gratitude, erected a portico in their honour (No. 2087), while Antoninus Pius assisted them against the Tauro-Scythians. (Jul. Capit. Antom. 9.) The citizens erected statues to Caracalla and Geta (No. 2091). The city was in all prubability destroyed in the invasion of the Guths A. D. 250, as the name does not occar henceforth in history. For coins of Olbia, besides the works already quoted, see Eckhel, vol. ii. p. 3. (Pallus, Reise, vol. ii. p. 507; Clarke, Trav. vol. ii. p. 351 ; Murawien Aprstol's Reise, p. 27 ; Böckh, Inscr. vol. ii. pp. 86-89; Niebuhr, Kleine Schrift. p. 352; Schafarik, Slav. Alt, vol. i. p. 397; Creuzer, Heidelberg. Jührbuch, 1822, p. 1235; Bähr, Excursus ad Herod. iv. 18.) [E. B. J.]

coin of olbia.
O'LBIA ('Oג6ia: Eth. 'Oג\&iands, Olbiensis: Terranova), one of the most considerable cities of Sardinia, situated on the E. coast of the island not far from its NE. extremity, in the innermost recess or bight of a deep bay now called the Golfo di Terranova. According to Pausanias it was one of the most ancient cities in the island, having been founded by the colony of Thespiadae under Iolaus, the companion of Hercules, with whom were associated a body of Athenians, who founded a separate city, which they named Ogryle. (Paus. x. 17. § 5 ; Diod. iv. 29; Solin. 1. §61.) The name of Olbia certainly seems to indicate that the city was of Greek origin ; but, with the exception of this mythical legend, we have no accounts of its foundation. After the Roman conquest of the island it became one of the most important towns in Sardinia; and from its proximity to Italy and its opportnne port, became the ordinary point of communication with the island, and the place where the Roman governors and others who visited Sardinia usually landed. (Cic. ad Q. Fr. ii. 3. § 7, 6. § 7.) In the First Punic War it was the scene of a naval engagement between the consul Cornelius and a Carthaginian fleet, which had taken refuge in its spacions port; but was attacked and defeated there by Cornelins, who followed up his advantage by taking the city, в. c. 259. (7nnar. viii. 11; Flor. ii. 2. § 16; Val. Max. v. 1. § 2.) In the Second Punic War (b.c. 210) its territory was ravaged by a Curthaginian
fleet. (Lir. axvii. 6.) Under the reign of Ho norius, Olbia is still mentioned by Claudian as one of the principal sea-ports of Sardinia; and the Itineraries give more than one line of road proceeding from thence towards different parts of the island. (Claudian, B. Gild. 519; Itin. Ant. pp. 79, 80, 82.) The name is there written Ulbia: in the middle ages it came to be known as Civita, and obtained its modern appellation of Terranova from the Spaniards.

Ptolemy distinguishes the port of Olbia ('OAscavds $\lambda_{\iota \mu} \mu \eta$, iii. 3. § 4) from the city itself: he probably applies this name to the whole of the spacious bay or injet now known as the Gulf of Terramova, and the position given is that of the entrance.
[E. H. B.]
 scaybs). Stephanus (s. v. 'OABia) speaks of one city of this name as a Ligurian city, by which be means the Olbia on the Ligurian coast of Gallia; for the name Olbia appears to be Greek. Mela (ii. 5), who proceeds from east to west in enomerating the cities on the Mediterranean coast of Gallia, places Olbia between Forum Julii (Frejus) and Massilia (Marseille). The order of place is this: Forum Julii, Athenopolis, Olbia, Taurois, Citharistes, Massilia. Strabo (iv. p. 184), who proceeds from west to east in his enumeration of the cities of this coast, mentions Massilia, Tauroentium, Olbia, and Antipolis, and Nicaea. He adds that the port of Augustus, which they call Forum Julii, is between Olbia and Antipolis (Antibes). The Massaliots built Olbia, with the other places on this const, as a defence against the Salyes and the Ligures of the Alps. (Strab. p. 180.) Ptolemy (ii. 10. § 8) places Olbia between the promontory Citharistes (Cap Cicier) and the mouth of the river Argenteus (Argents), west of Fröus. There is nothing that fixes the site of Olbia with precision; and wo must accept D'Anville's conjecture that Olbia was at a place nor called Eoube, between Cap Combe and Bréganson. Forbiger accepts the conjecture that Olbia was at St. Tropez, which he supports by saying that Strabo places Olbia 600 stadia from Massilia; but Strabo places Forum Julii 600 stadia from Massilia. [G.L.]

O'LBIA ('OA6ia). 1. A town in Bithynia, on the bay called, after it, the Sinus Olbianus (commonly Sinus Astacenus), was in all probability only another name for Astacus [Astacus]. Pliny (v. 43) is probably mistaken in saying that Olbia was the ancient name for Nicaea in Bithynia; he seems to confound Nicaea with Astacus.
2. The westernmost town on the coast of Pamphylia. (Strab. xiv. pp. 666, foll.; Plin. v. 26.) Ptolemy ( $\mathbf{V} .5$. §2), consistently with this description, places it between Phaselis and Attaleia. Stephanus B. (e. v.) blames Philo for ascribing this town to Pamphylia, since, as he asserts, it was situated in the territory of the Sulymi, and its real name was Olbe ; but the critic is here himself at fault, confounding Olbia with the Pisidian Olbasa. Strabo describes our Ulbia as a strong fortress, and its inhabitunts colonised the Lycian town of Cydrema.
3. A town of Cilicia, mentioned only by Stephanns Byz. ( s. v.), who may possibly have been thinking of the Cilician Olbasa or Olbe.
[L.S.]
OLbia. [Oliba.]
OLBIA'NUS SINUS ('OAsLavds кdлtios), only another name for the Sinus Astacenus, the town of Olbia being also called Astacus. (Scylax. p. 35; comp. Astactis, and Olabla, No. 1.) [L.S.]

OLCADES．
OLLCADES（OAkdסes），a people of Hispania Baetica，dwelling N．of Carthago Nova，on the upper course of the Anas，and in the E．part of the territory occupied at a later date by the Oretani．They are mentioned only in the wars of the Carthaginians with the Iberisns，and after that period vanish en－ tirely from history．Hannibal during his wars in Italy transplanted a colony of them into Africa． Their chief town was Althaea．（P＇plyb．iii．14．23， and 13．5；Liv．xxi．5；Steph．B．s．v．：Suidas， s．ロ．）
［T．H．D．］
OLCI＇NIUM（Ob入kíviov，Ptol ii．17．§ 5；O1－ chinium，Plin．iii．26：Eth．Olcinistae），a town of some importance in Illyricum，which sorrendered to the Romans at the commencement of hostilities with Gentius，and which，in consequence，received the privilege of freedom and immunity from taxation． （Liv．xiv．26．）Dulcigno or Ulhin，as it is still called．is identified with this town．（Hahn，Alba－ sesische Stwdien，p．262．）

OLEARUS．［Olarus．］
OLEASTRUM（＇Oג＇áatpov，Ptol．ii．4．§ 14）． 1．A town in Hispania Baetica，in the jurisdiction of Gades，with a grove of the same name near it． （Mela，iii．1．§4；Plin．iii．1．s．3．）

2．A town of the Cosetani in Hispania Tarraco－ nensis，on the road from Dertosa to Tarraco（Itin． Ant．399）．Probably the same town mentioned by Strabo（iii．p．159），but erroneously placed by him near Saguntum．It seems also to have given name to the lead mentioned by Pliny（xxxiv．17．s．49）． Variously identified with Balaguer，Miramar，and S．Lucar de Barrameda（Marca，Hisp．ii．11．p． 142．）
［T．H．D．］
OLEASTRUM PROM．（＇Oג＇éa $\sigma t \rho o y$, Ptol．iv． 1. § 6），a promontory of Mauretania，between Russadir and Abyla，called in the Antonine Itinerary，Bar－ bari Prom．，now Punta di Mazari，in the bight of Titaicán，or Tetuán．
［E．B．J．］
OLE＇NACUM．a fortress in the N．of Britannia Romana，and the station of the Ala Prima Herculea （．Vot．Proc．）It lay close to the Picts＇wall，and Camden thinks（p．1022）that it occupied the site of Linstoc Castle in the barony of Crosby，not far from Carlisle．Horsley，bowever（p．112）takes it to be Old Carlisle．near Wiyton，where there are some conspicuous Koman remains．［T．H．D．］

OLENUS（＂Rneyos），a town in Galatia，in the west of Ancyra，and belonging to the territory of the Tectosages，is mentioned only by Ptolemy（r． 4. §8）．
［L．S．］
O＇LENUS（＂$\Omega \lambda \in \nu o s:$ Eth＇＇$\lambda$ evios）．1．An ancient town in the S．of Aetolia，between the Achelous and the Evenus，was named after a son of Zeus or Hephaestus，and is mentioned in the Homeric catalogue．It was situated near New Pleuron，at the foot of Mount Aracynthus；but its exact site is uncertain．It is said to have been destroyed by the Aeolians；and there were only a few traces of it in the time of Strabo．（Strab．x．pp．451，460；Hom．Il． ii．638；Apollod．i．8．§ 4 ；Hyg．Poët．Astron． 2. § 13；Stat．Theb．iv． 104 ；Steph．B．s．v．）The Roman poets use Olenius as equivalent to Aetolian： thus Tydens of Calydon in Aetolia is called Olenius Tydeus．（Stat．Theb．i．402．）

2．A town of Achaia，and originally one of the 12 Achaean cities，was situated on the coast，and on the left bank of the river Peirus， 40 stadia from Drme，and 80 stadia from Patrae．On the revival of the Achaean League in B．C．280，it appears that Ulenus was still in existence，as Strabo says that it
did not join the league；but the inhabitants subse－ quently abandoned the town，and retired to the neighbouring villages of I＇eirse（Пeipai），and Eury－ teiae（Eipurctal），and to Dyme．In the time of Polybius，however，Oienus was no longer inhabited； and in the time of Strabo it was in ruins，and its territory belonged to Dyme．There are some remains of the ancient city at Kato or Palea－Akhaia．（Herod． i． 145 ；Pol．ii． 41 ；Strab．viii．pp．384，386．388； Paus．vii．18．§ 1，vii．22．§ 1；Plin．iv．6，Olenum； Leake，Morea，vol．ii．p．157，Peloponnesiaca，p． 208；Thirlwall，Hist of Greece，vol．viii．p．82．）

O＇LERUS（＂Rגepos，Xenion，ap．Steph．B．s．v．： Eth．＇$\Omega \lambda$ ¢́ptos，Böckh，Inscr．vol．ii．No．2555；Eus－ tath．ad Il．ii．p．664），a town of Crete，situated on a hill，with a temple to Athene．In the struggle between Cnossus and Lyctus，the people of Olerus sided with the latter．（Polyb．iv．53，where the reading＂Optot appears to be a mistake．）In the Descrizione dell Isola di Candia，A．D． 1538 （ap． Mus．Class．Antiq．vol．ii．p．271），the site is occupied by a place called Castel Messelerius．（Ḧ̈ck， Ḱreta，vol．i．pp．17，424．）
［E．B．J．］
OI．GASSYS（＂Onyaббus），a lofty and inacces－ sible mountain on the frontiers of Paphlagonia and Galatia，extending from the Halys in a south－western direction towards the Sangarius，and containing the sources of the Parthenius．The surrounding country was filled with temples erected by the l＇aphlagonians． （Strab．xii．p．562．）The mountain mentioned by Ptolemy（v．4．§ 4）under the name of Ligas，Gigas， or Oligas，is pribably the same as the Olgassys of Strabo．It still bears its ancient name in the corrupt form of Clgaz，and modern travellers state that some parts of the mountain are covered with snow nearly all the year．
［L．S．］
OLI＇ARUS（＇תגlapos，Olearus，Plin．，Virg．：Eth． ＇$\Omega \lambda t \alpha \rho^{\prime}$ pos：Antiparo），an island in the Aegaean sea， one of the Cyclades，said by Heracleides to have been colonised by the Sidonians and to be 58 stadia from Paros．（Heracleid．ap．Steph．B．s．v．；Strab． x．p． 485 ；Plin．iv．12．8． 22 ；Virg．Aen．iii． 126．）It possesses a celebrated stalactitic cavern， which has been described by several modern travel－ lers．（Tournefort，Voyage，fe．vol．i．p．146，seq， Eng．transl．；Leake，Northern Greece，vol．iii．p． 87，seq．；Fiedler，Reise durch Griechenland，vol．ii． p．191，seq．）

OLIBA（＇O入i6a，Ptol．ii．6．§ 55），a town of the Berones in the N．of Hispania Tarraconensis．Ukert （vol．ii．pt．1．p．458）takes it to be the same town as Olbia in Iberia，mentioned by Steph．B．［T．H．D．］

OLI＇CANA（＇Oגikava，Ptol．ii．3．§ 16），a town of the Brigantes in the N．of Britannia Romana；ac－ curding to Camden（ p .867 ），Ilkley，on the river Wherf in Yorkshire．
［T．H．D．］
OLIGYRTUS（＇Oג（quptos，Polyb．iv．11，70； ＇Ovofupros，Plut．Cleom．26），a mountain and for－ tress situated in a pass between Stymphalus and Caphyae．Leake places it on a small advanced height of Mt．Shipézi，projecting into the Stympha－ lian plain，on the crest of which are the foundations of a Hellenic wall，formed of large quadrangular stones．（Leake，Morea，vol．iii．p．114；Boblaye， Récherches，${ }^{\circ}$ c．p． 154 ；Curtius，Peloponnesos，vol． i．p．217．）

Oliná．［Gallaecta，p．934，b．］
OLINAS（＇Oniva тотациî ex6o八ai）．Ptolemy （ii．8．c．2）places the mouth of the Olinas river on the coast of Celtogalatia Lugduneusis in the country of the Veneli or Unelli；and the next place which
he mentions north of the mouth of the Olinas is Noeonagus，or Noviomagus，of the Lexuvii or Lexovii．This is the Orne，which flows into the Atlantic below Caen in the department of Calvados． D＇Anville says that in the middle age writings the name of the river is Olna，which is easily changed into Orne．Gosselin supposes the Olinas to be the Savie，and there are other conjectures ；but the identity of name is the only evidence that we can trust in this case．
［G．L．］
OLINTIGI，a maritime town of Hispania Bae－ tica，lying E．of Onoba．（Mela，iii．1．§ 4．）Its real name seems to have been Olontigi，as many coins are found in the neighboarhood bearing the inscription olont．（Florez，Med．ii．pp．495，509， iii．p．103；Mionnet，Sup．i．p．111，ap．Ukert，vol． ii．pt．1．p．340．）Variously identified with Mo－ guer and Palos．
［T．H．D．］
OLISIPO（＇Oגıoбєincoy，Ptol．ii．5．§ 4），a city of Lusitania，on the right bank of the Tacus，and not far from its mouth．The name is varionsly written．Thus Pliny（iv．35）has Olisippo；so also the Itin．Ant．pp．416，418，seq．In Mela（iii． 1. §6），Solinus（c．23），\＆c．，we find Ulyssippo，on ac－ count probably of the legend mentioned in Strabo， which ascribed its foundation to Ulysses，but which is more correctly referred to Odysseia in Hispania Bactica．［Odrssela．］Under the Romans it was a municipium，with the additional name of Felicitas Julia．（Plin．l．c．）The neighbnurhood of Olisipo was celebrated fir a breed of horses of remarkable flietness，which gave rise to the fable that the mares were impregnated by the west wind．（Plin．viii．67； Varr．K．K．ii．1，19；Col．vi．27．）It is the modern Lisboa or Lisbon．
［T．H．D．］
 town of Magnesia in Thessaly，mentioned by Homer， who gives it the epithet of＂rugged．＂（Hom．Il．ii． 717．）It possessed a harbour（Scylax，p．25）；and as it was opposite Artemisium in Euboea（Plut． Them．8），it is placed by Leake on the isthmus connecting the peninsula of Triki／hiri with the rest of Magnesia．（Strab．ix．p．436；Plin．iv．9．s．16； Steph．B．s．v．；Leake，Northern Greece，vol．iv．p． 384．）

O＇LLIUS（Oglio），a river of Cisalpine Gaul，and one of the more considerable of the northern tribu－ taries of the Padus．It rises in the Alps，at the foot of the Monte Tonale，flows through the Vab Camomica（the district of the ancient Camuni），and forms the extensive lake called by Pliny the Lacus Sebinus，now the Lago d＇Iseo．From thence it has a course of about 80 miles to the Padus，receiving on its way the tributary streams of the Mela or Mella，and the Clusius or Chicse．Though one of the most important rivers of this part of Italy，its name is mentioned only by Pliny and the Geogra－ pher of Kavenna．（Plin．iii．16．s．20．19．s．23； Geogr．Rav．iv．36．）
［E．H．B．］
OLMEILS．［Boeotia，Vol．I．p．413．a．］
O＇LMAE．［Cominthus，Vol．I．p．683，a．］
 village in Borotia，situated 12 stadia to the left of Copae，and 7 stadia from Hyettus．It derived its name from Olmus，the son of Sisyphus，but con－ tained nothing worthy of notice in the time of l＇au－ s：mias．Forchhammer places Olmones in the small island in the lake Copais，SW．of Copoe，nuw called Trelo－Yani．［See the Map，Vol．I．p． 411 ，where the island lies SW．of No．10．］（Paus．ix．24．§ 3； Steph．B．s．v．；Forchhammer，Ifellinika，p．178．）

OLOCRUS（ $\tau \delta$＇Oגókpoy ypos，Plut．Aem．Paul． 20），a mountain near Pydna，in Macedonia，repre－ sented by the last falls of the heights between Ayjin and Elefthero－khóri．（Leake，Northern Grcece， vol．iii．p．433．）
［E．B．J．］
OLOOSSON（＇Oגoo $\sigma \sigma \omega \nu$ ：Eth．＇Oגoo $\sigma \sigma \delta \nu t o s)$ ，a town of Perrhaebia in Thessaly，mentioned by Homer， who gives to it the epithet of＂white，＂from its white argillaceous soil．In Procopius the name occurs in the corrupt furm of Lossonus．It is now called Elassona，and is a place of some im－ portance．It is situated on the edge of a plain near Tempe，and at the foot of a hill，on which there is a large ancient monastery，defended on either side by a deep ravine．The ancient town，or at least the citadel，stood upon this hill，and there are a few fragments of ancient walls，and some foundations behind and around the monastery．（Hom． 1 Li ii． 739 ；Strab．ix．p．440；Lycophr．905；Steph．B． s．v．：Procop．de Aedif．iv．14；Leake，Northern Greece，vol．iii．p．345．）

OLOPHYXUS（＇Oגסфv乡os，Herod．vii． 22 ； Thuc．iv．109；Scyl．p．27；Strab．vii．p．331； Steph．B．），a town on the peninsula of Acte，the site of which is probably represented by the Arsana of Khilandari，the tenth and last monastery of the E ． shore of the M／onte Sianto．It is reported that here there were Hellenic remains found，in particular those of a mole，part of which is now left．（Leake， Northern Greece，vol．iii．pp．141，151．）［E．B．J．］

OLPAE（＂O八лat：Eth．＇Oגтaios）．1．A for－ tress on the Ambracian gulf，in the territory of Argos Amphilochicum．［See Vol．I．pp．207，208．］

2．A fortress of the Locri Ozolae，the position of which is uncertain．（Thuc．iii．101．）

OLTIS．De Valois suggested，and D＇Anville adopts his opinion，that we ought to read Oltis in－ stead of Clitis in the verse of Sidonius Apollinaris （Propempt．）：－

＂Chitis，Elaris，Atax，Vacalis．＂

D＇Anville observes that the same river is named Olitis in a poem of Theodulf of Orleans．Accord－ ingly the river ought to be named Olt or L＇Olt； but usage has attached the article to the name，and we now speak of $L c L o t$ ，and so use the article twice． The Lot rises near Mont Luzere on the Civemates， and it has a general west course past Mende and Cahors．It joins the Garonne a few miles below Agen，which is on the Garonne．
［G．L．］

## OLU＇RIS．［Dorium．］

olu＇RuS．［Pellene．］
OLUS（＂Oגous，Scyl．p．19；Xenion，ap．Stıph． B．s．v．；Ptol．iii．17．§ 5；al．＂Oגou入ıs；Stadursm． 350：Eth．＇Oגoútiol，＇Oגoútı），a town of Crete，the citizens of which had entered into a treaty with those of Lato．（Bïckh，Inscr．vol．ii．No．2554．） There was a temple to Britomartis in this city，a worden statue of whom was erected by Daetalus， the mythical ancestor of the Daedalidae，and father of Cretan art．（Pausan．ix．40．§ 3．）Her eftizy is represented on the coins of Olus．（Eckhel，vol．ii． p．316：Mionnet，Descr．vol．ii．p．289：Combe， Mus．Hunter．）There is considerable difficulty in making out the position of this town；but the site may probably be represented by Aliédha near Spina Lónga．where thre are ruins．Mr．Pashley＇s map erroniously identifies these with Naxis．（Comp． Höck，Kreta，vol．i．p．417．）
［E．B．J．］
OLYMPE＇NE（＇OAv $\mu \pi \eta \nu \eta$ ），a district of Mysia． on the northern slope of Mount Olympus，from which
it derived its name．（Strab．xii．pp．571，576．） The inhabitants of the district were called Olympeni
 Olympieni（＇Oגvuжıทvoi，Herod．vii． 74 ；comp． Mysia）．

OLY＇MPIA（ $\dot{\eta}$＇Oג $v \mu \pi i a$ ），the temple and sacred grove of Zeus Olympius，situated at a small distance west of Pisa in Peloponnesus．It originally belonged to Pisa，and the plain，in which it stıoxd，was called in more ancient times the plain of Pisa；but after the destruction of this city by the Eleians in B．c．572， the name of Olympia was extended to the whole dis－ trict．Besides the temple of Zens Olympius，there were several other sacred edifices and public buildings in the sacred grove and its immediate neighbourhood； but there was no distinct town of Olympia．

The plain of Olympia is open towards the sea on the west，but is surrounded on every other side by hills of no great height，yet in many places abrupt and precipitous．Their surface presents a series of sandy cliffs of light yellow colour，covered with the pine，ilex．and other evergreens．On entering the valley from the west，the most conspicuons object is a bold and nearly insulated eminence rising on the north from the level plain in the form of an irregular cone．（Nure，vol．ii．p．281．）This is Mount Cronics，or the hill of Cronus，which is frequently， noticed by Pindar and other ancient writers．（ $\pi$ ap） eùdecé̇ol Kpóviov，Pind．Ol．i． 111 ；тáyos Kpóvov， Ol．xi． 49 ；íqך入oío тétpa à入ibatos Kpoviov，Ol．
 Kрóvetos，Xen．Hell．vii．4．§ 14 ；тd öpos $\tau \grave{\text { K }}$ Kob－ viov，Paus．v．21．§ 2，vi．19．§ 1，vi．20．§ 1 ； Ptol．iii．16．§ 14．）The range of hills to which it belongs is called by most modern writers the Olym－ pian，on the aathority of a passage of Xenophon． （Htll．vii．4．§ 14）．Leake，however．supposes that the Olympian hill alluded to in this passage was no other than Cronius itself；bat it would arpar，that the common opinion is correct，since Strabo（viii．p．356）describes Pisa as lying be－ $t$ ween the two mountains Olympus and Ossa．The hills，which bound the plain on the south，are higher than the Cronian ridge，and，like the latter，are covered with evergreens，with the exception of one bare sum－ mit，distant about half a mile from the Alpheius． This was the ancient Typaeus（Turaiov），from which women，who frequented the Olympic games， or crossed the river on forbidden days，were con－ demned to be hurled headlong．（Paus．v．6．§ 7．） Another range of hills closes the vale of Olympia to the east，at the foot of which runs the rivulet of Miraka．On the west the vale was bounded by the Cladeus（K入áס̇eos），which flowed from north to south along the side of the sacred grove，and fell into the Alpheius．（Paus．v．7．§ 1 ；K入ádaos，Xen．Hell． vii．4．§ 29．）This river rises at Lala in Mount Pholoi．The Alpheius，which flows along the south－ ern edge of the plain，comstantly changes its course， and bas buried bencath the new alluvial plain，or carried into the river，all the remains of buildings and monuments which stood in the southern part of the Sacred Grove．In winter the Alpheius is full，rapid． and turbid；in summer it is scanty，and divided into several torrents flowing between islands or sand－ banks over a wide gravelly bed．The vale of Olympia is now called Andilalo（i．e．opposite to Lalu），and is uninhabited．The soil is naturally rich，but swampy in part，owing to the inundations of the river．Of the numerous iuildings and count－ less staturs，which once covered this sacred spot，
the only remains are those of the temple of Zeus Olympius．Pausanias has devoted nearly two books， and one fifth of his whole work，to the description of Olympia；but he does not enumerate the buildings in their exact topographical order ：owing to this cir－ cumstance，to the absence of ancient remains，and to the changes in the surface of the soil by the fluc－ tuations in the course of the Alpheins，the topo－ graphy of the plain must be to a great extent con－ jectural．The latest and most able attempt to elucidate this subject，is that of Colonel Jeake in his Peloponnesiaca，whose description is here chietly followed．

Olympia lay partly within and partly outside of the Sacred Grove．This Sacred Grove bore from the most ancient times the name of Altis（ $\dot{\eta}$ ＂A $\lambda$ tis），which is the Peloponnesian Aeolic form of K $\lambda \sigma \sigma$ s．（Paus．v．10．§ 1．）It．was adorned with trees，and in its centre there was a grove of planes． （Paus．v．27．§ 11．）Pindar likewise describes it
 Ol．viii．12）．The space of the Altis was measured out by Hercules，and was surrounded by this hero with a wall．（Pind．Ol．xi．44．）On the west it ran along the Cladeus；on the south its direction may be traced by a terrace raised above the Al－ pheius；on the east it was bounded by the stadium． There were several gates in the wall，but the prin－ cipal one，through which all the processions passed， was situated in the middle of the western side，and was called the Pompic Entrance（ $\dot{\eta}$ Поитıкो єiбoסos， Paus．v．15．§ 2）．From this gate，a road，called the Pompic Way，ran across the Altis，and entered the stadium by a gateway on the eastern side．

1．The Olympieium，Olympium，or temple of Zcus Olympius．An oracle of the Olympian god existed on this spot from the most ancient times（Strab． viii．p．353），and here a temple was doubtless built， even before the Olympic games became a Pan－Hel－ lenic festival．But after the conquest of Pisa and the surrounding cities by the Eleians in B．c． 572 ， the latter deternined to devote the spoils of the conquered cities to the erection of a new and splen－ did temple of the Olympian god．（Pans．v． 10. §§ 2，3．）The architect was Libon of Elis．The temple was not，however，finished till nearly a century atterwards，at the period when the Attic school of art was supreme in Greece，and the P＇arthenon on the Athenian Acropolis had thrown into the shade all previons works of art．Shortly after the dedi－ cation of the Parthenon，the Eleians invited Phei－ dias and his school of artists to remove to Elis，and adorn the Olympian temple in a manner worthy of the king of the gods．Pheidias probably remained at Olympia for four or five years from about в．с． 437 to 434 or 433 ．The colossal statue of Zeus in the cella，and the figares in the pediments of the temple were executed by Pheidias and his asboci－ ates．The pictorial embellishments were the work of his relative Pauaenns．（Strab．viii．p．354） ［Coilip．Itict．of Biogr．Vol．III．p．248．］Pausanias has given a minute description of the temple（v．10）； and its site，plan，and dimensions have been well as－ certained by the excavations of the French Commis－ sion of the Morea．The foundations are now exposed to view ；and several fine fragments of the sculp－ tures，Iepresenting the labours of Hercules，are now in the museum of the Louvre．The temple stood in the sonth－western portion of the Altis，to the right hand of the Pompic entrance．It was built of the native limestone，which l＇ausanias called poros，and
which was covered in the more finished parts by a suiface of stucco, which gave it the appearance of marble. It was of the Doric order, and a peripteral hexastyle building. Accordingly it had six columns in the front and thirteen on the sides. The columns were fluted, and 7 ft . 4 in . in diameter, a size greater than that of any other existing columns of a Grecian temple. The length of the temple was 230 Greek feet, the breadth 95, the height to the summit of the pediment 68 . The roof was covered with slabs of Pentelic marble in the form of tiles. At each end of the pediment stood a gilded vase, and on the apex a gilded statue of Nike or Victory; below which was a golden shield with the head of Medusa in the middle, dedicated by the Lacedaemonians on account of their victory over the Athenians at Tanayra in s.c. 457. The two pediments were filled with figures. The eastern pediment had a statue of Zeus in the centre, with Oenomaus on his right and Pelops on his left. prepared to contend in the chariot-race; the figures on either side consisted of their attendants, and in the angles were the two rivers, Cladeus to the right of Zeus, and Alpheius
to his left. In the western pediment was the contest of the Centaurs and the Lapithae, Peirithous occupying the central place. On the metopes orer the doors at the eastern and western ends the labours of Hercules were represented. In its interior construction the temple resembled the Parthenon. The cella consisted of two chambers, of which the eastern contained the statue, and the western was called the Opisthodomns. The colossal statue of Zeus, the master-work of Pheidias, was made of ivory and gold. It stood at the end of the front chamber of the cella, directly facing the entrance, so that it at once showed itself in all its grandeur to a spectator entering the temple. The approach to it was between a double row of columns, supporting the roof. The god was seated on a magnificent throne adorned with sculptures, a full description of which, as well as of the statue, has been given in another place. [Dict. of Biogr. Vol. III. p. 252.] Behind the Opisthodomus of the temple was the Callistephanus or wild olive tree, which furnished the garlands of the Olympic victors. (Paus. v. 15. § 3.)

GROUND PLAN OF THE OLYMPIEIUM.
2. The Pelopium stood opposite the temple of Zeus, on the other side of the Pompic way. Its position is defined by Pausanias, who says that it stond to the right of the entrance into the temple of Zeus and to the north of that building. It was an enclosure, containing trees and statues, having an opening to the west. (Paus. v. 13. §1.)
3. The Heraeum was the most important temple in the Altis after that of Zeus It was also a Doric peripteral building. Its dimensions are unknown. Pausanias says (v. 16. § 1) that it wus 63 feet in length; but this is clearly a mistake, since no peripteral building was so small; and the numerous statues in the cella, described by Pausanias, clearly show that it must have been of considerable dimensions. The two most remarkable monuments in the Heraeum were the table, on which were placed the garlands prepared for the victors in the Olympic contests, and the celebrated chest of Cypselus, covered with figures in relief, of which Pausanias hay given an claborate description (v. 17-19). We learn from a passage of Dion Chrysostom (Orat. xi. p. 163), cited by Leake, that this chest stood in the opisthodomus of the Heraeum ; whence we may infer that the cella of the temple consisted of two apartments.
4. The Great Altar of Zeus is described by Pausanius as equidistant from the Pelopium and the Heraeum, and as being in front of them both.
(Paus. v. 13. § 8.) Leake places the Hetaeum near the Pompic entrance of the Stadium, and supposes that it faced eastward; accordingly he conjectures that the altar was opposite to the backfronts of the Pelopium and the Heraeum. The total height of the altar was 22 feet. It had two platforms, of which the upper was made of the cinders of the thighs sacrificed on this and other altars.
5. The Column of Oenomaus stood between the great altar and the temple of Zeus. It was said to have belonged to the house of Oenomana, and to have been the only part of the building which escaped when it was burnt by lightning. (Paus, v. 20. § 6.)
6. The Metroum, or temple of the Mother of the Gods, was a large Doric building, situated within the Altis (Paus. v. 20. § 9.) It is placed by Leake to the left of the Pompic Way nearly opposite the Heraeum.
7. The Prytancium is placed by Pausanias within the Altis, near the Gymnasium, which was outside the sacred enclosure (v. 15. §8.)
8. The Bouleateriwn, or Council-House, seems to have been near the Prytaneium. (Paus. v. 23. § 1, 24. § 1.)
9. The Philippeium, a circular building, erected by Philip after the battle of Chaeroneia, was to the left in proceeding from the entrance of the Altis to the Prytaneium. (Paus. v. 17. § 4, v. 20. § 10.)
10. The Theecoleon, a building belonging to the Aèฑкóлoc or superintendents of the sacrifices (Paus. v. 15. § 8). Its position is uncertain.
11. The Hippodamium, named from Hippodameia, who was buried here, was within the Altis near the Pompic Way. (Paus. vi. 20. § 7.)
12. The temple of the Olympian Eileithyia (Lucina) appears to have stood on the neck of Mount Cronius. (Paus. vi. 20. § 2.)
13. The Temple of the Olympian Aphrodite was near that of Eileithyia. (Paus. vi. 20. § 6.)
14. The Thesauri or Treasuries, ten in number, were, like those at Delphi, built by different cities, for the reception of their dedicatory offerings. They are described by Pausanias as standing to the north of the Heraeum at the foot of Mount Cronins, upon a platform made of the stone poros (Paus. vi. 19. § 1).
15. Zanes, statues of Zeus, erected from the produce of fines levied upon athletae, who had violated the regulations of the games. They stood upon a stone platform at the foot of Mount Cronius, to the left of a person going from the Metroum to the Stadium. (Paus. v. 21. § 2.)
16. The Studio of Pheidias, which was outside the Altis, and near the Pompic entrance. (Paus. v. 15. § 1.)
17. The Leonilaeum, built by Leonidas, a native, was near the Studio of Pheidias. Here the Roman magistrates were lodged in the time of Pausanias (v. 15. §§ 1, 2).
18. The Gymnasium, also outside the Altis, and near the northern entrance into it. (Paus. vi. 21. § 2.) Near the Gymnasium was (19) the Palaestra.

20 and 21. The Stadium and the Hippodrome were two of the most important sites at Olympia, as together they formed the place of exhibition for all the Olympic contests. Their position cannot be determined with certainty; but as they appear to have formed a continued area from the circular end of the Stadium to the further extremity of the Hippodrome, the position assigned to them by Leake is the most probable. He places the circular end of
the Stadium at the foot of the heights to the NE. of the summit of Mount Cronius, and the further end of the Hippodrome on the bank of the Alpheius.

The Stadium is described by Pausanias as a mound of earth, upon which there was a seat for the Hellanodicae, and over against it an altar of marble, on which sat the priestess of Demeter Chamyne to behold the games. There were two entrances into the Stadium, the Pompic and the Secret. The latter, through which the Hellanodicae and the agonistae entered, was near the Zanes; the former probably entered the area in front of the rectilinear extremity of the Stadium. (Paus. vi. 20. § 8, seq.) In proceeding towards the Hippodrome from that part of the Stadium where the Hellanodicae sat was the Hippaphësis or starting place of the horses ( $\dot{\eta}$ a $\phi \in \sigma t s \tau \hat{\omega} \nu$ \% $\pi \pi \omega \nu$ ). In form it resembled the prow of a ship, the embolus or beak being turned towards the racecourse. Its widest part adjoined the stoa of Agnaptus. At the end of the embolus was a brazen dolphin standing upon a pillar. Either side of the Hippaphesis was more than 400 feet in length, and contained apartments, which those who were going to contend in the horse-races obtained by lot. Before the horses a cord was extended as a barrier. An altar was erected in the middle of the prow, on which was an eagle with outstretched wings. The superintendent of the race elevated this eagle by means of machinery, so as to be seen by all the spectators, and at the same time the dolphin fell to the ground. Thereupon the first barriers on either side, near the stoa of Agnaptus, were removed, and then the other barriers were withdrawn in like manner in succession, until all the horses were in line at the embolus.

One side of the Hippodrome was longer than the other, and was formed by a mound of earth. There was a passage through this side leading out of the Hippodrome; and near the passage was a kind of circular altar, called Taraxippus (Tapákı $\pi \pi o s$ ), or the terrifier of horses, because the horses were frequently seized with terror in passing it, so that cha-

rints were broken. There was a similar object for frightening horses both at the Corinthian Isthmus and at Nemea, in consequence of which the difficulty of the race was increased. Beyond the Taraxippus were the terminal pillars, called עúのбab, round which the chariots turned. On one of them stood a brazen statue of Hippodameis about to bind the taenia on Pelops after his victory. The other side of the Hippodrome was a natural height of no great elevation. On its extremity stond the temple of Demeter Chamyne. (Paus. vi. 20. § 15-v. 21.§ 1.) The course of the Hippuxdrome appears to have been two

 indeed (vol. ii. p. 327), understands $\mu \bar{\eta} \kappa o s$ in this passage to refer to the length of the area; but Leake (Peloponncsicea, p. 94) maintains, with more probabilite, that it signifies the length of the circuit.
23. The Theatre is mentioned by Xenophon (If Il. vii. 4. § 31), but it does not occur in the description of Pausanias. A theatre existed also at the Isthnus and Ielphi, and would have been equally useful at Olympia for musical contests. Xenophon could hardly have been mistaken as to the existence of a theatre at Olympia, as he resided more than 20 years at Scillus, which was only three miles from the former spot. It would therefore appear that between the time of Xenophon and Pausanias the theatre had disappeared, probably in consequence of the musical contests having been discontinued.
Besides the buildings already mentioned, there was a very large number of statues in every part of the Sacred Grove, many of which were made by the greatest masters of Grecian art, and of which Pausanias has given a minute description. According to the vague computation of Pliny (xxxiv. 7. 8. 17) there were more than 3000 statues at Olympia. Most of these works were of brass, which accounts for their disappearance, as they were converted into objects of common utility upon the extinction of Paganism. The temples and other monaments at Olympia were, like many others in different parts of Greece, used as materials for modern buildings, more especially as quarries of stone are rare in the district of Elis. The chiefs of the powerful Albanian colony at Laln had in particular long employed the ruins of Olympia for this purpose.

The present article is confined to the topography of Olympia. An account of the games and of everything connected with their celebration is given in the Dictionary of Antiquities.
(Stanhope, Olympia, Iond. 1824; Krause, Olympia, 1838; Mure, Tour in Greece, vol. ii. p. 280, seq.: Leake, Peloponnesiaca, p. 4, seq.; Curtius, Peliponnesos, vol. ii. p. 5l, seq.)

OLYMPUS ("Oגข ${ }^{2} \pi \sigma$ ). 1. One of the loftiest mountains in Greece, of which the southern side forms the boundary of Thessaly, while its northern base encloses the plains of Macedonia. Hence it is sometimes called a mountain of Macedonia (Strab. vii. p. 329: Ptol. iii. 13. § 19), and sometimes a mountain of Thessaly. (Herod. vii. 128; Plin. iv. 8. s. 15.) It forms the eastern extremity of the Cambunian range, and extends to the sea as far as the mouth of the Peneius, being separated by the vale of Tempe from the heights of Ossa. Xenagoras, who measured the perpendicular height of Olympus from the town of Pythium, ascertained its elevation to be ten stadia and nearly one plethrum (Plut. Aemil. 15); which Holland, Dodwell, Leake, and
others regard as not far from the truth, since they estimate its height to be between six and seven thousand feet. But these writers have considerably undercalculated its elevation, which is now ascer. tained to be 9754 feet. Herodotus relates that Mt. Olympus was seen by Xerxes from Therma (vii. 128); and we know from modern travellers that in clear weather it is visible from Mt. Athos, which is 90 miles distant. (Journ. Geogr. Soc. vol. vii. p. 69.) All travellers, who have visited Dit. Olympus, dwell with admiration upon its imposing grandeur. One of the most striking destiptions of its appearance is given by Dr. Holland, who beheld it from litokhoro at its base :-" We had not before been aware of the extreme vicinity of the town to the base of Olympus; but when leaving it, and accidentally looking back, we saw through an opening in the fug, a faint outline of vast precipices, seeming almost to overlang the place; and so aeirial in their aspect, that for a few minutes we doubted whether it might not be a delusion to the cye. The fog, however. dispersed yet more on this side, and partial openings were made, through which, as through arches, we saw the sunbeams resting on the snowy summits of Olympus, which rose into a dark blue sky far above the belt of clouds and mist that hung upon the sides of the mountain. The transient view we had of the mountain from this point showed us a line of precipices of vast height, forming its castern front toward the sea; and broken at intervals by deep hollows or ravines, which were richly clothed with forest trees. The oak, chestnut, beech, planetree, \&c., are seen in great abundance along the base and skirts of the mountain ; ard towards the summit of the first ridge, large forests of pine spread themselves along the acclivitics. Behind this first ridge, others rise up and recede towards the loftier central heights of Olympus. Almost opposite the town of Litókhoro, a vast ravine penetrates into the interior of the mountain, through the opening of which we saw, though only for a few minutes, what 1 conceive to be the summit,-from this point of view, with a somewhat concave ascending line on each side." (Holland, Travels, vol. ii. p. 27.) Though the lower sides of Olympus are well wooded, the summit presents a wide extent of a bare lightcoloured rock. (Leake, Northern Greece, vol. i. p. 434.) The broal summit of Olympus is alluded to by Homer, who gives to it the epithet of $\mu$ aкро's more frequently than any other. Next to that, is d $\gamma d \nu \nu i \phi o s$ (Il. i. 420), fiom its being covered with snow during the greater part of the year. Hesiod (Theog. 118) also gives it the epithet of viфders. Below the snmmit its rugged outline is broken into many ridges and precipices, whence Homer describes it as roiviectpas. (Il. i. 499, v. 754.) The forests, which covered the lower sides of Olympus, are frequently alluded to by the ancient poets. ( $\pi 0 \lambda \dot{v} \delta \in \nu$ $\delta \rho o s$, E. Eurip. Bacch. 560 ; Ossae fronlosum involvere Olympum, Virg. Georg. 281 ; opacus Olympus, Hor. Carm. iii. 4. 52.) The mountain is now called $E^{\prime}$ lymbo, i. e. "E ${ }^{2} \nu \mu \pi \pi o s$, by the surrounding inhabitants, which name Leake observes is probably not a modern corruption, but the ancient dialectic form, for the Aeolic tribes of Greece often substituted the epsilon for the omicron, as in the instance of 'Opxo$\mu \in \nu \delta s$, which the Boeotians called 'Epxopevos. (Dotwell, Tour through Greece, rol. ii. p. 105:. Leake. Northern Greece, vol. iii. pp. 341, 407.) Olympus was believed to be the residence of Zeus and the other gols; and as its summit rose above the clouds into
the calm ether, it was believed that here was an opening into the vault of heaven, closed by a thick cloud. as a door. (II. v. 751.) [See Dict. of Biogr. Vol. III. p. 25; Liddell and Scott, Greek Lex. s. v.]
2. A mountain in Laconia, near Sellasia [Sellasia.]
3. A mountain above Olympia in Elis. [OlymPIA, p. 475, a.]

OLYMPUS ('Oגv ${ }^{\prime} \pi \sigma$ ). 1. A mountain range of Mysia, extending eastward as far as the river Sangarius, and dividing Phrygia from Bithynia. To distinguish it from other mountains of the same name, it often is called the Mysian Olympus. Its height rises towards the west, and that part which is of the greatest height, is the highest mountain in all Asia Minor. The country around this mountain was well peopled, but its heights were thickly clad with wood, and contained many safe retreats for robbers, bands of whom, under a regular leader, often rendered the country unsafe. (Strab. xii. p. 574, comp. x. p. 470, xii. p. 571 ; Herod. i. 36, vii. 74 ; Ptol. v. 1. § 10 ; Steph. B.s. v. ; Plin. v. 40, 43 ; Pomp. Mels, i. 19 ; Amm. Marc. $1 \times v i .19$; Schol. ad Apollom. Rhod. i. 598.) The lower regions of this great mountain are still covered with extensive forests; but the summit is rucky, devoid of vegetation, and during the greater part of the year covered with snow. The Turks generally call it Anadoli Dagh, though the wextern or highest parts also bear the name of Keshish Dugh, that is, the Monk's Mountain, and the eastern Toumandji or Domoun Dagh. The Byzantine historians mention several fortresses to defend the passes of Olympus, such as Pitheca (Nicet. Chon. p. 35 ; B. Cinnam. p 21), Acrunum, and Calogroea (B. Cinnam. L.c.; Cedren. p. 553; Anna Comn. p. 441 ; comp. Brown, in Walpole's Turkey, to:n, ii. pp. 109, foll. ; Pococke, Travels, iii. p. 178).
2. A mountain in the north of Galatis, which it separates from Bithynia. It is, properly speaking, only a continuation of the Mysian Olympus, and is remarkable in history for the defeat sustained on it by the Tolistoboii, in a battle against the Romans under Manlius. (Liv. xxxviii. 19, Scc. ; Polyb. xxii. 20, 21.) Its modern name is Ala Dagh.
3. A volcanic mountain in the east of Lycia, a little to the north-east of Corydalla. It also bore the name of Phoenicus, and near it was a large town, likewise bearing the name Olympus. (Strab. xiv. p. 666.) In another passage (xiv. p. 671) Strabo speaks of a mountain Olympus and a stronghold of the same name in Cilicia, from which the whole of Lycia, Pamphylia, and Pisidia could be surveyed, and which was in his time taken possession of by the Isaurian robber Zenicetas. It is, however, generally supposed that this Cilician Olympus is no other than the Lycian, and that the geugrapher was led into his mistake by the fact that a town of the name of Corycus existed both in Lycia and Cilicia. On the Lycian Olympus stood a temple of Hephaestus. (Comp. Stadiasm. Mar. Mag. § 205 ; Ptol. v. 3. § 3.) Scylax (39) does not mention Olympus, but his Siderus is evidently no other place. (Lrake, Asia Minor, p. 189; Kellows, Lycia, pp. 212, foll.; Sprati and Forbes, Travels in Lycia, i. p. 192.) Mount Olympus now bears the name Janar Dagh, and the town that of Deliktash ; in the latter place, which was first identified by Beaufort, some ancient remains still exist; but it does not appear ever to have been a large town, as Strabo calls it.
[L. S.]
OLYMPUS C'Oגu^лоs, Strab. xiv. pp. 682, 683;

Ptol. v. 14. §5), a mountain range in the lofty island of Cyprus. On one of its eminences-breastshaped ( $\mu$ actocists) - was a temple to Aphrodite " of the heights" (axpala), into which women were not permitted to enter. (Strab. Lc.) This probably implies that all but the "hierodulae" were excluded. (Comp. Claudian, Nupt. Hon. et Mar. 49-85; Achill. Tat. vii. 13.) According to Pococke (Trav. vol. ii. p. 212; comp. Mariti, Viagyi, vol. i. p. 206), this part of the chain is now called Haghios Stavros, or Sta. Croce, from a convent dedicated to the Cross. (Engel, Kypros, vol. i. pp. 33-37).
[E.B. J.]
OLYNTA INS. COAúvra, Scyl. p. 8; Solentii, It. Anton.; Peut. Tab.; Solenta, Geng. Rav.), a small island off the coast of Dalmatia, which now bears the name of Solta, and is famous for its honey. (Wilkinson, Dalmatia and Montenegro, vol. i. p. 187.)
[E. B. J.]
OLYNTHIACUS. [Olymthes.]
OLYNTHUS ("OAvvoos, Scyl. p. 26; Strab. rii. p. 330; Steph. B.; Pomp. Mela, ii. 2. §9; Plin. iv. 17: Eth. 'Oגúvelos), a town which stood at the head of the Toronaic gulf, between the peninsulas of Pallene and Sithonia, and was surrounded by a fertile plain. Originally a Bottiaean town, at the time of the Persian invasion it had passed into the hands of the Chalcidic Greeks (Herod. vii. 122; Strab. $x$. p. 447), to whom, under Critobulus of Torone, it was handed over, by the Persian Artabazns, after taking the town, and slaying all the inhabitants (Herod. viii. 127). Afterwards Perdiccas prevailed on many of the Chalcidian settlers to abandon the small towns on the sea-coast, and make Olynthus, which was several stadia from the sea, their central pusition (Thuc. i. 58). After this period the Bottiaei seem to have been the humble dependents of the Chalcidians, with whom they are found joined on two oc. casions (Thuc. i. 65, ii. 79). The expedition of Brasidas secured the independence of the Olynthians, which was distinctly recognised by treaty (Thuc. v. 19.) The town, from its maritime situation, became a place of great importance, b.c. 392. Owing to the weakness of Amyntas, the Macedonian king, they were enabled to take into their alliance the smaller towns of maritime Macedonia, and gradually advanced so far as to include the larger cities in this region, including even Pella. The military force of the Olynthian confederacy had now become so powerful from the just and generous principles upon which it was framed, including full liberty of intermarriage, of commercial dealings, and landed pmprietorship, that Acanthus and Apollonia, jealous of Olynthian supremacy, and menaced in their independence, applied to Sparta, then in the height of its power, b.c. 383, to solicit intervention. The Spartan Eudamidas was at once sent against Olynthas, with such force as conld be got ready, to check the new power. Telentias, the brother of Agesilaus, was afterwards sent there with a force of 10,000 men, which the Spartan assembly had previously voted, and was joined by Derdas, prince of Elimeia, with 400 Ma cedonian horse. But the conquest of Olynthus was no easy enterprise ; its cavalry was excellent, and enabled them to keep the Spartan infantry at bny. Teleutias, at first successful, becoming over confident, sustained a terrible defeat under the walls of the city. But the Spartans, not disheartened, thought only of repairing their dishonour by fresh exertions. Agesipolis, their king, was placed in command, and ordered to prosecute the war with rigour; the young
prince died of a fever, and was succeeded by Polybiades as general, who put an end to the war, b.c. 379. The Olynthians were reduced to such straits, that they were obliged to sue for peace, and, breaking up their own federation, enrolled themselves as sworn members of the Lacedaemonian confederacy under obligations of fealty to Sparta (Xen. Hell. v. 2. § 12, 3. § 18; Diodor. xv. 21-23; Dem. de Fals. Leg. c. 75. p. 425). The subjugation of Olynthus was disastrous to Greece, by remoring the strongest bulwark against Macedonian aggrandisement. Sparta was the first to crush the bright promise of the confederacy; but it was reserved for Athens to deal it the most deadly blow, by the seizure of Pydna. Methone, and Potidaea, with the region about the Thermaic gulf, between в.c. 368-363, at the expense of Olynthus. The Olynthians, though humbled, were not subdued ; alarmed at Philip's conquest of Amphipolis, B.c. 358, they sent to negotiate with Athens, where, through the intrigues of the Macedonians, they were repulsed. Irritated at their advances being rejected, they closed with Philip, and received at his hands the district of Anthemus, as well as the important Athenian possession of Potidxea. (Dem. Philipp. ii. p. 71. s. 22). Philip was too near and dangerous a neighbour; and, by a change of policy, Olynthus concluded a peace with Athens B. c. 352. After some time, during which there was a feeling of reciprocal mistrust between the Olynthians and Philip, war broke out in the middle of B. c. 350. Overtures for an alliance had been previously made by Atbens, with which the Olynthians felt it prudent to close. On the first recognition of Olynthus as an ally, Demosthenes delivered the earliest of his memorable harangues; two other Olynthiac speeches followed. For a period of 80 years Olynthus had been the enemy of Athens, but the eloquence and statesman-like sagacity of Demosthenes induced the people to send succours to their ancient foes: and yet he was not able to persuade them to assist Olynthus with sufficient vigour. Still the fate of the city was delaged; and the Olynthians, had they been on their guard against treachery within, might perhapo hare saved themselves. The detail of the capture is unknown, bat the struggling city fell, in B.c. 347, into the hands of Philip, "callidus emptor Olynthi" (Juv. xiv. 47), through the treachery of Lasthenes and Euthycrates; its doom was that of one taken by storm (Dem. Philipp. iii. pp. 125-128, Fals. Leg. p. 426; Diod. xvi. 53). All that survivedmen, women, and children-were sold as slaves; the town itself was destroyed. The fall of Olynthus completed the conquest of the Greek cities from the Thessalian frontier as far as Thrace - in all 30 Chalcidic cities. Demosthenes (Philipp. iii. p. 117; comp. Strab. ii. p. 121 ; Justin. viii. 3), speaking of them alout five years afterwards, says that they were so thoroughly destroyed, that it might be supposed that they had never been inhabited. The site of Olynthus at Aio Mamas is, however, known by its distance of 60 stadia from Potidaea, as well as by some vestiges of the city still existing, and by its lagoon, in which Artabarus slew the inhabitants. The name of this marsh was BoLyca (ì Bodukì $\lambda$ ( $\mu \nu \eta$. Hegisander, ap. Athen. p. 334). Two rivers, the Amitas ('Apitas) and Olynthlacus ('Onuy日iacós), flowed into this lagoon from Apollonia (Athen. l.c.). Mecyberna was its harbour; and there was a spot dear it, called Cantharolethron (Kavoaṕَ $\lambda \in \theta \rho o \nu$, Strab. vii. p. 330 ; Plut. de An. Tranq. 475.45 ; Arist. Miral. Ausc. 120; 1'lin. xi. 34), so vol. 11.
ca.cea because blacik beetles could not live there. Eckhel (vol. ii. p. 73) speaks of only one extant coin of Olynthus - the "type" a head of Heracles, with the lion's skin; but Mr. Millingen has engraved one of those beautiful Chalcidian coins on which the " legend" OATNO surrounds the head of Apollo on the one side, and the word XAMXIDE $\Omega$, bis lyre, on the reverse. (Cousinery, Voyage, vol. ii. p. 161 ; Leake, North. Greece, vol. iii. pp. 154, 457-459; Voemel, de Olynthi Situ, civitute, potentia, et eversione, Francof. ad M. 1829; Winiewski, Comm. ad Dem. de Cor. pp. 66, seq.)
[E. B. J.]
OMANA ("O 1 ava, Peripl. Mar. Erythr. c. 27, 36; Marcian, Peripl. c. 28, ed. Müller, 1855), a port of some importance on the coast of Carmania, which is noticed also by Pliny (vi. 28. s. 32). Its position was near the modern bay of Tshubar, perhapo where Mannert has suggested, at Cape Tanka (v. 2. p. 421). Vincent places it a little to the E. of Cape Iask. In Ptolemy, the name has been corrupted into Commana (vi. 8. § 7).
[V.]
 coast of Arabia east of Syagros, 600 stadia in diameter, according to the Periplus, bounded on the east by lofty and rugged mountains (ap. Hudson, Geog. Min. tom. i. p. 18), doubtless identical with the Omanum emporium, which Ptolemy places in long. $77^{\circ} 40^{\prime}$, lat. $19^{\circ} 45^{\prime}$, which must have belonged to the Omanitas mentioned by the same geographer (vi. 15), separated only by the Cattabani from the Montes Asaborum, doubtless the mountains mentioned in the Periplus. If Ras Fartak be correctly taken as the ancient Syagros, the ancient Omana must have been far to the west of the district of Arabia now called by that name, and within the territory of Hadramaut. The modern 'Omán is the south-eastern extremity of the peninsula, and gives its name to the sea outside the mouth of the Persian Gulf, which washes it on the east and south. (Gosselin, Récherches, tom. iii. pp. 32, 33; Vincent, iii. 16; Forster, Geogr. of Arabia, vol. ii. pp. 173. 180, note t.) [G.W.]

OMANI or OMANNI (Aov́rioc ol 'Ouavoi or 'Ouavyoi), a branch of the Lygii, in the NE. of Germany, between the Oder and the Vistula, to the S. of the Burgundiones, and to the N. of the Lygii Diduni (Ptol. ii. 11. § 18). Tacitus (Germ. 43) in enumerating the tribes of the Lygii does not mention the Omani. but a tribe occurs in his list bearing the name of Manimi, which from its resemblance is generally regarded as identical with the Omani. But nothing certain can be said
[L. S.]
OMBI ("O 0 6ot, Ptol. iv. 5. § 73 ; Steph. B. 8. ©.; It. Anton P. 165 ; Ombos, Juv. xv. 35 ; Ambo, Not. Imp. sect. 20: Eth. ' $\mathrm{O} \mu$ bitns; comp. Aelian, Hist. An. x.. 21), was a town in the Thebaid, the capital of the Nomos Ombites, about 30 miles N. of Syene, and situated upon the E. bank of the Nile; lat. $24^{\circ} 6^{\prime} \mathrm{N}$. Ombi was a garrison town under every dynasty of Aegypt, Pharaonic, Macedonian, and Roman; and was celebrated for the magnificence of its temples and its hereditary feud with the people of Tentyra.
Ombi was the first city below Syene at which any remarkable remains of antiquity oceur. The Nile, indeed, at this portion of its course, is ill-suited to a dense population. It runs between steep and narrow banks of sandstone, and deposits but little of its fertilising slime upon the dreary and barren shores. There are two temples at Oinbi, constructed of the stone obtained from the neighbouring quarries
of Hadjar-selscleh. The more marnificent of the two stands upon the top of a sandy hill, and appears to have been a species of Pantheon, since, according to extant inscriptions, it was dedicated to Arveres (Apollo) and the other deities of the Ombite nome by the soldiers quartered there. The smaller temple to the NW. was sacred to Isis. Both, indeed, are of an imposing architecture, and still retain the brilliant colours with which their builders adorned them. They are, however, of the Ptolemaic age, with the exception of a dnorway of sandstone, built into a wall of brick. This was part of a temple built by Thothmes III. in honour of the crocodileheaded god Sevak. The monarch is represented on the door-jambs, holding the measuring reed and chisel, the emblems of construction, and in the act of dedicating the temple. The Ptolemaic portions of the larger temple present an exception to an almost universal rule in Aegyptian architecture. It has no propylon or dromos in front of it, and the portico has an uneven number of columns, in all fifteen, arranged in a triple row. Of these columns thirteen are still erect. As there are two principal entrances, the temple would seem to be two united in one, strengthening the supprsition that it was the Pantheon of the Ombite nome. On a cornice above the doorway of one of the adyta is a Greek inscription, recording the erection, or perhaps the restoration of the sekne by Ptolemy Philometor and his sister-wife Cleopatra, в. c. 180-145. The hill on which the Ombite temples stand bas been considerably excavated at its base by the river, which here strongly inclines to the Arabian bank.

The crocodile was held in especial honour by the people of Onnbi; and in the adjacent catacombs are occasionally found mummies of the sacred animal. Javenal, in his 15 th satire, has given a lively description of a fight, of which he was an eye-witness, between the Ormbitae and the inhabitants of Tentyra, who were hunters of the crocodile. On this occasion the men of Ombi had the worst of it ; and one of their number, having stumbled in his flight, was caught and eaten by the Tentyrites. The satirist, however, has represented 0 mbi as nearer to Tentyra than it actually is, these towns, in fact, being nearly 100 miles from each other. The Roman coins of the Ombite nome exhibit the crocodile and the effigy of the crocodile-headed god Sevak.

The modern hamlet of Koum-Ombos, or the hill of Ombor, covers part of the site of the ancient Ombi. The ruins have excited the attention of many distinguished modern travellers. Descriptions of them will be found in the following works:Pococke, Travels, vol. iv. p. 186; Hamilton, Aegyptiaca, p. 34 ; Champollion, 6 Egypte, vol. i. p. 167 ; Denon, Description de l'Egypte, vol.i. ch. 4, p. 1, foll.; Burckhardt, Nubia, 4to. p. 106; Belzoni, Travels, vol. ii. p. 314. On the opposite side of the Nile was a suburb of Ombi, called Contra-Omhos. [W.B.D.]
ombrios ins. [Fortunatae Ins.]
OMBRO'NES ('O O 6 $\rho \omega \mathrm{yes}, \mathrm{Ptol}$. iii. 5. § 21), a people of European Sarmatio, whose seat appears to have been on the flanks of the Carpathians, about the soarces of the Vistula. Schafarik (Slav. Alt. vol. i. pp. 389-391, 407) considers them to be a Celtic people, grounding his arguments mainly upon the identity of their name with that of the Celtic - as he considers them to be - Umbrians, or the most ancient inhabitunts of the Italian peninsula. Recent inquiry has thrown considerable doubt upon the derivation of the Umbrians from a Gaulish
stock. [Itatia, Vol.II. p. 86, b.] This is one proof. among others, of the futility of the use of names of nations in historical investigations; but, as there can be no doubt that there were Gallic settlements beyond the Carpathians, names of these foreign hordes might still linger in the countries they had once occupied long after their return westward in consequence of the movement of nations from the East.
[E. B. J.]
OMENO'GARA (O $\mu \in \nu \delta \gamma a \rho a$ ), a town in the district of Ariaca, in the division of India intra Gangem. There is no reason to doubt that it is the present Ahmed-nagar, celebrated for its rock fortress. (Ptol. vii. 1. §82; comp. Pott. Etym. Forsch. p. 78.)

## OMIRAS. [EUPHRATRS.]

OMPHA'LIUM ('O $\mu \phi d \lambda \iota \nu$ ), a plain in Crete, so named from the legend of the birth of the babe Zeus from Rhea. The scene of the incident is laid near Thenae, Cnossus, and the river Triton. (Callim. Hymn. ad Jov. 45 ; Diod. v. 70 ; Schol. ad Nicand. Alexipharm. 7 ; Steph. B. s. v.; Höck, Kreta, rol. i. pp. 11; 404 ; Pashley, Trav. vol. i. p. 224.)
[E. B. J.]
OMPHA'LIUM (O $\mu \phi d \lambda \iota o v$ ), one of the inland cities of the Chaones in Epeirus. (Ptol. iii. 14. § 7.) Stephanus B. (s. v.) erroneously calls it a city of Thessaly. Leake places it at Premedi, in the valley of the Viósa (the Aous). (Northern Grecce, vol. iv. p. 120.)

## ON. [Heliopolis.]

ONCAE. [Thebar.]
ONCEIUM ("O ${ }^{2} \kappa \in i o v$ ), a place in Areadia npon the river Ladon, near Thelpusa, and containing a temple of Demeter Erinnys. (Paus. viii. 25. §4; Steph. B. s. r.) The Ladon, after leaving this temple, passed that of Apollo Oncaeates on the left, and that of the boy Asclepius on the right. (Pans. viii. 25. § 11.) The name is derived by Pausanias from Oncus, a son of Apollo, who reigned at this place. Leake supposes that Tumbiki, the only remarkable site on the right bank of the Ladon between Thelpusa and the Tuthoa, is the site of the temple of Asclepius. (Morea, vol. ii. p. 103.) Other writers mention a small town Oncae ( 'Oүкal) in Arcadia, which is probably the same as Onceium. (Tzetzes, ad Lycophr. 1225 ; Etym. M. p. 613; Phavorin. s. v.)

ONCHESMUS ("Oyкך $\sigma \mu 0$ ), a port-town of Chaonia in Epeirus, opposite the north-western point of Corcyra, and the next port upon the cosest to the south of Panormus. (Strab. vii. p. 324 ; Ptol. iii. 14. § 2.) It seems to have been a place of importance in the time of Cicero, and one of the ordinary points of departure from Epeirus to Italy, as Cicero calls the wind favourable for making that passage an Onchesmites. (Cic. ad Att. vii. 2.) According to Dionrsius of Halicarnassus (Ant. Rom. i. 51) the real name of the place was the Port of Anchisey
 of Aeneas; and it was probably owing to this tradition that the name Onchesmas assumed the form of Anchiasmus under the Byzantine emperons. Its site is that of the place now called the Forty Saints. (Leake, Northern Greece, vol. i. p. 11.)

ONCHESTUS. 1. ('OyXVarós: Eth. 'Orxhostios), an ancient town of Boeotia in the territory of Haliartus, said to have been founded by Onchestus. a son of Poseidon. (Paus. ix. 26. §5; Steph. B. e. v.) It possessed a celebrated temple and grove of l'oseidon, which is mentiuned by Homer ('Oy-

ONEIA.
OPHIODES.
ii. 506), and sabsequent poets. (Pind. Isthm. i. 44, iv. 32; Lycophr. 645.) Here an Amphictyonic council of the Boeotians used to assemble. (Strib. ix. p. 412.) Pausanias (L. c.) says that Onchestus was 15 stadia from the mountain of the Sphinx, the modern Faga; and its position is still more accarately defined by Strabo (b. c.). The latter writer, who censures Alcaeus for placing Onchestus at the foot of Mt. Helicon, says that it was in the Haliartia, on a naked hill near the Teneric plain and the Copaic lake. He further maintains that the grove of Poseidon existed only in the imagination of the poets ; but Pausanias, who visited the place, mentions the grove as still existing. The site of Onchestus is probably marked by the Hellenic remains situated upon the low ridge which separates the two great Boeotian basins, those of lake Copais and of Thebes, and which connects Mount Fagá with the roots of Helicon. (Leake, Northern Greece, vol. ii. p. 213, seq.; Gell, Itiner. p. 125.)
2. A river of Thessaly, flowing near Scotussa, through the battle-field of Cynoscephalae into the lake Boebeis. It was probably the river at the sources of which Dederians stands, but which bears no modern name. (Liv. xxxiii. 6; Polyb. xviii. 3; Steph. B. s. v.; Leake, Northern Greece, vol. iv. p. 473.) It is perhaps the sume river as the Ovochonus ('Opóxwlos, Herod. vii. 129; Plin. iv. 8. s. 15), whose waters were exhausted by the army of Xerxes. It is true that Herodotus describes this river as fluwing into the Peneius; but in this he was probably mistaken, as its course must have been into the lake Boebeis. (Leake, Northern Grecce, vol. iv. p. 514.$)$

ONEIA. [Corinthus, Vol. I. p. 674.]
ONEUM ('Ovaiov, Ptol. ii. 16. §4; Peut. Tab.; Geng. Rav.), a town of Dalmatia, which has been identified with Almissa, at the mouth of the Cettina. (Neigebaur, Dic Sud-Slaven, p. 25.)
oNINGIS. [AURINx.]
ONI'SIA, an island near Crete, on the E. side of the promontory Itanus. (Plin. iv. 12. s. 20.)

O'NOBA AESTUA'RIA ("Ovoba Aiotovdpia, Ptol. ii. 4. § 5), called also simply Onoba (Strab. iii. p. 143; Mela, iii. 1. § 5). 1. A maritime town of the Turdetani in Hispania Bactica, between the rivers Anas and Baetis. It was seated on the estuary of the river Luxia, and on the road from the moath of the Anas to Augusta Emerita. (Itin. Ant. p. 431.) It is commonly identified with Huelva, where there are still some Roman remains, especially of an aqueduct; the vestiges of which, however, are fast disappearing, owing to its being used as a quarry by the boorish agriculturists of the neighboarhood. (Murray's Mandbook of Spain, p. 170.) Near it lay Herculis Insula, mentioned by Strabo (iii. p. 170), called 'Hpde入tia by Steph. B. (s. v.), now Saltes. Onoba had a mint; and many coins have been found there bearing the name of the town, with a slight alteration in the spelling, Onabs. (Florez. Med. ii. pp. 510, 649; Mionnet, i. p. 23, Suppl. p. 39; Sestini, Med. Isp. p. 75, ap. Ukert, vol. ii. pt. 1. p. 340.)
2. Another town of Baetica, near Corduba. (Plin. iii. 1. s. 3.) In an inscription in Gruter (p. 1040. 5) it is called Conobs. Ukert (vol. ii. pt. 1. p. 366) places it near Villa del Carpio.

ONOBALAS [Acesinfs, No. 1.]
ONOBRISATES, a people of Aquitania, as the narne stands in the common texts of Pliny (iv. 19); who has "Onobrisates, Belendi, Sultus I'yrenaeus."

D'Anville (Notice, fec.) ingeniously supposes that Onobrisates ought to be Onobusates, which is the le:st possible currection; and he thinks that he discovers the old name in the modern Nebousan, the name of a canton on the left side of the Neste towards the lower part of its course. The Neste is one of the branches of the Garonne, and rises in the Pyrenees.
[G. L.]
ONOCHO'NUS. [Onchestus, No. 2.]
ONUGNATHUS (Ovou rudiOos), "the jaw of an ass," the name of a peninsula and promontory in the south of Laconia, distant 200 stadia south of Asopus. It is now entirely surrounded with water, and is called Elafonisi ; but it is in reality a peninsula, for the isthmus, by which it is connected with the mainland, is only barely covered with water. It contains a harbour, which Strabo mentions; and Pausanias saw a temple of Athena in ruins, and the sepulchre of Cinadus, the steersman of Menelaus. (l’aus. iii. 22. § 10, iii. 23. § 1 ; Strab. viii. pp. 363, 364; Curtius, Peloponnesos, vol. ii. p. 295.)

ONU'PHIS ("Ovouqıs, Herod. ii. 166; Steph. B. s. v.; Ptol. iv. $5 . \S 51$; Plin. v. 9. s. 9 : Eth. 'Ovoupín $\bar{s}$ ), was the chief town of the Nomos Onnphites, in the Aegrptian Delta. The exact prosition of this place is disputed by geographers. D'Anville believes it to have been on the site of the modern Bunoub, on the western bank of the Sebennytic arm of the Nile. Mannert (vol. x. pt. i, p. 573 ) places it south of the modern Mfansour. Belley (Mém. de l'Acad. des Inscript. tom. xxviii. p. 543) identifies it with the present rillage of Nouph, in the centre of the Delta, a little to the E. of Buto, about lat. $31^{\circ} \mathrm{N}$. Champollion, however, regards the site of this nome as altogether uncertain (l'Egypte sous les Pharaohs, vol. ii. p. 227). The Onuphite nome was one of those assigned to the Caiasirian division of the native Aegyptian army. Coins of Onuphis of the age of Hadrian - obverse a laureated head of that emperor, reverse a female figure, probably Isis, with extended right hand - are described in Rasche (Lex. R. Num. III. pars posterior, s. v.). This town is mentioned by ecclesiastical writers, e.g. by Athanasius. (Alhanas. Opera, tom. i. pt. ii. p. 776, ed. Paris, 1698; Le Quien, Oriens Christian. tom. ii. p. 526, Paris, 1740; comp. Pococke, Travels in the East, fol. vol. i. p. 423.) [W.B.D.]

OONAE. [OAEONES.]
OPIIARUS, a small river of Sarmatia Asiatica, mentioned by Pliny (ri. 7. s. 7) as a tributary of the Lagous, which flowed into the Palus Maeotis. Herodotus mentions two streams, which he calls the Lycus and Oaras, which had the same course and direction (iv. 123, 124). It is likely that the rivers in Pliny and Herodotus are the same. It is not possible now to identify them with accuracy.

OPHEL. [Jerdsalem, p. 20, b.]
 iii. 39 ; Agatharch, ap. Hudson, Geog Graec. Min. p. 54), or Serpent-isle, was an island in the Red Sea, in Foul Bay, nearly opposite the mouth of the harbour of Berenice; lat $24^{\circ} \mathrm{N}$. The topazes produced in this island were greatly prized lwoth in the Arabian and Aegyptian markets; and it seems from Pling (v. 29. 8. 34) to have been by some denominated Topaz-isle (Topazos). The cause of its more usnal name is doubtiul; but there hiss always been a tradition in the East that serpents and precious stones arc found near one another. The island of Agathon, i. e. the good genius ('A ádevvos

ขทิoos，Ptol．iv．5．§ 77）was probably the same with Ophiodes，and answers to the present $Z a$－ margat．The isle of Karnaka，opposite the head－ land of Ras－el－Anf，is，indeed，by some geographers supposed to be the true Ophiodes Insula．（Castro， Hist．Gen．des Voyages，vol．i．p．205．）［W．B．D．］

OPHIONENSES or OPHIENSES．［AETOLIA， p．65，a．］

 ＇Oпфєíp ；＇$\Omega \phi \epsilon i \rho$, LXX．；Joseph．Ant．viii．6．§4）， a district，the name of which first occars in the ethnographic table of Genesis，x．29．Solomon caused a fleet to be built in the Edomite ports of the Red Sea，and Hiram supplied him with Phoe－ nician mariners well acquainted with navigation， and also Tyrian vessels，＂ships of Tarshish．＂ （ 1 Kings，ix．28； 2 Chron．viii．18．）The articles of merchandise which were brought back once in three years from Ophir were gold，silver，red sandal－ wood（＂almuggim，＂ 1 Kinys，x．11；＂algummim，＂ 2 Chron．ix．10），precious stones，ivory，apes， （＂kophim＂），and peacocks（＂thŭkyim，＂ 1 Kings， $\mathbf{x}$ ． 22；＂thükyim，＂l Chron．ix．21）．The gold of Ophir was considered to be of the mist precious quality． （Job，xx．11，24，xxviii．16；Ps．xlv． 9 ；Isa．xiii． 12；Eccles．vii．18）．In Jer．x．9，＂the gold from Uphaz，＂and in Dan．x．5，＂the fine gold of Upliaz，＂is，by a slight change of pronunciation，the saine as that of Ophir．

Many elaborate treatises have been written upon the details of these vorages．The researches of Gesenias（Thesaur．Linguae Hebr．vol．i．p． 141；and in Ersch und Grüber＇s Encycl．art． Ophir），Benfey（Indien，pp．30－32）and Lassen （Ind．Alt．vol．i．pp．537－539）bave made it ex－ tremely probable that the W．shores of the Indian peninsula were visited by the Phoenicians，who，by their colonies in the Persian Gulf，and by their in－ tercourse with the Gerrhaei，were early acquainted with the periodically blowing monsoons．In favour of this Indian hypothesis is the remarkable circum－ stance that the names by which the articles of mer－ chandise are designated are not Hebrew but Sanscrit． The percock，too，is an exclusively Indian bird；al－ though from their gradual extension to the W．they were often called by the Greeks＂Median and Per－ sian birds；${ }^{n}$ the Samians even supposed them to have originally belonged to Samos，as the bird was reared at first in the sanctuary dedicated to Hera in that island．Silks，also，which are first mentioned in Prorerbs，xxxi．22，could alone have been brought from India．Quatremère（Mém．de lAcad des Inscr．vol．xp．pt．ii．1845，pp．349－402）agrees with Heeren（Researches，vol．ii．pp．73，74，trans．）， who places Ophir on the E．coast of Africa，and ex－ plains＂thukyim＂to mean not peacecks，but par－ rots or guinea－fowls．Ptolemy（vi．7．§ 41）speaks of a Saphara（Edтфapa）as a metropolis of Arabia，and again of a Soupara（Zoutdópa，vii． 1. § 6）in India，on the Barygazenus Sinus，or Gulf of Cambay，a name which in Sanscrit signifies ＂fair－shore．＂（Lassen，Dissert．de Taprobane Ins． p．18；comp．Ind．Alt．vol．i．p．537．）Sofala，on the E．coast of Africa，opposite to the island of Madagascar（London Geog．Journ．vol．iii．p．207）， is described by Edrisi（ed．Jaubert，vol．i．p．67）as a country rich in gold，and subsequently by the Por－ tuguese，after Gama＇s voyage of discovery．The let－ ters $r$ and $l$ so frequently interchanged make the name of the African Sofala equivalent for that of

Sophara，which is used in the Septuagint with several other forms for the Ophir of Solomon＇s and Hiram＇s fleet Ptolemy，it has been seen，has a Saphara in Arabia and a Soupara in India The significant Sanscrit names of the mother－country had been repeated or reflected on neighbouring or opposite coasts，as in the present day occurs in many instances in the English and Spanish Americas． The range of the trade to Ophir might thas be extended over a wide space，just as a Phoenician voyage to Tartessus might include touching at Cy － rene and Carthage，Gadeira and Cerne．（Humboldt， Cosmos，vol．ii．pp．132，133，notes 179－182， trans．）
［E．B J．］
OPHIS（＂Oф／s），a river of Pontus，the mouth of which was 90 stadia to the east of port Hyssus，and which separated Colchis from the country of the Thianni．（Arrian，Peripl．Pont．Eux．p． 6 ；Ano－ nym．Peripl．p．14，where it is called＇O甲ıös．） This river still bears the name of $O f$ ．
［L．S．］
OPHIS．［MANTINEIA．］
OPHIUSA INS．［PITYUSAE．］
OPHIUSA，OPHIUSSA．1．［TYRAS．］
2．An island off the coast of Crete（Plin．iv．20）， which is probably represented by Gavdapoulo or Anti－Gozzo，unless it be the same as the Oxein Ins． （＇O̧eia，Staliasm．321），which the anonymons Coast－describer places near Leben．［E．B．J．］

OPHIUSSA（＇Oф॰ô $\sigma \sigma a$ ），a small island in the Propontis，off the coast of Mysia，is mentioned only by I＇liny（iv．44）and Stephanus B．（s．v．Béの\＆̊ucos， where it is called＇Oфtóe $\sigma \sigma a$ ）；it still bears its ancient name under the corrupt form of Afzia （Pococke，Travels，iii．p．167．）
［L．S．］
OPHLIMUS（＂Oф入ı（mos），a branch of Mount Paryadres in the north－west of Pontus，enclosing with Mount Lithrus，the extensive and fertile dis－ trict called Phanaruea（Strab．xii．p．556．）Ac－ cording to Hamilton（Researches，i．p．439），it now bears the name of Kemer Dagh and Oktax Dagh．
［L．S．］
OPHRADUS，a river mentioned by Pliny（ri． 25. 8．23）as belonging to the province of Drangiana． Forbiger conjectures that it may be a tributary of the Erymandrus（Ilmend），now called the Khash Rúd．
［V．］
OPHRAH，a city of Benjamin，written＇Eфpa0d by the LXX．（Joshua，xviii．23）and 「oфepà （ 1 Sam．xiii．17）．It is placed by Eusebius and S．Jerome v．M．P．east of Bethel．（Onomast．s．v． Aphra．）Dr．Robinson says that this accords well with the position of Et－Taiyibeh，a village of Greek Christians，on a conical hill on a high ridge of land，which would probably not have been left un－ occupied in ancient times．（Bib．Res．vol．ii． pp．123－125．）
2．Ophrah of the Abiezrites（＇EфpaOd ratpos tov̂＇Eaঠ́pi，LXX；Julges，vi．11，24，viii．27；in ver．32．＇A6l＇E $\sigma \delta \rho!$ ），a town in the half－tribe of Manasseh，west of Jordan，the native place of Gi－ deon，where also he was buried．
［G．W．］
OPHRY＇NIUM（＇Oфpóveiov），a small town in the north of Troas，near lake Pteleos，and between Dar－ danus and Rhoeteum，with a grave sacred to Ajax． （Herod．vii． 43 ；Xenoph．Anab．vii．8．§5，where it is called＇Oфporvov ；Strab．xiii．p．595．）It is probably the modern Fren－Keoi．（Comp．Resche， Lexic．Rei Num．iii．2．p．136．）
［L．S．］

## OPICI．［Oscl．］

OPIS（＇Onis，Herod．i．189），a city of Babylonin， mentioned first by Herodotus，who simply stater that
the river Tigris flowed by it．Xemphon，in the Retreat of the Ten Thousand，speaks of it as a large city situated upon the Physcus（now Adhem），and ap－ parently at some distance from its junction with the Tigris．Arrian，describing the return of Alexander from the Eiast，states that he sailed up the Tigris to Opis，destroying on his way the dams which（it was said）the Persians had placed across the river to prevent any naval force ascending the stream．At Opis he is said to have beld a great assembly of all his troops，and to have sent home those who were no longer fit to serve．（Anab．vii．7．）Strabo speaks of it as in his time a small village，but places it，like Herodotns and Arrian，upon the Tigris（ii．p．80， xi．p．529，xvi．p．739）．Captain Lynch，in his account of the Tigris between Baghdád and Sámar－ rak，considers that some extensive ruins he met with near the angle formed by the Adhem and Tigris， and the remains of the Nahr－awoin canal，mark the site of Opis．But the change in the course of the Tigris there observable has led to the de－ struction of great part of the ancient city．（Lynch， Gengr．Journ．ix．p． 472 ；comp．Rawlinson，Geogr． Journ．x．p．95．）
［V．］
OPITE＇RGIUM（＇Oォirtpyiov：Eth．Opiterginus： Oderzo），a city of Venetia，situated about 24 miles from the sen，midway between the rivers Plavis （Piave）and Liquentia（Livenza），on a small stream （now called the Fratta）flowing into the latter． No mention of it is found before the Roman con－ quest of Venetia；but it appears to have under their rule become a considerable municipal town，and is mentioned by Strabo as a flourishing place，though not a city of the first class．（Strab．v．p．214．）In the Civil War between Caesar and Punpey a body of troops furnished by the Opitergini is mentioned as displaying the most heroic valour，and offering a memorable example of self－devotion，in a naval com－ bat between the fleets of the two parties．（Liv．Ep． cx．；Flor．iv．2．§ 33；Lucan，iv．462－571．） Tacitus also notices it as one of the more consider－ able towns in this part of Italy which were occupied by the generals of Vespasian，Primus，and Varus． （Tac．Hist．iii．6．）It is mentioned by all the geo－ graphers，as well as in the Itineraries ；and though Ammianas tells us it was taken and destroyed by an irruption of the Quadi and Marcomanni in A．D． 372，it certainly recovered this blow，and was still a considerable town under the Lombards．（Plin．iii． 19. 8． 23 ；Ptol．iii． $1 . \S 30$ ；Itin．Ant．p． 280 ；Tab． Pest；Ammian．xxix．6．§ 1 ；P．Diac．iv．40．） In an inscription of the reign of Alexander Severus， Opitergium bears the title of a Colonia；as it is not terined such either by Pliny or Tacitus，it probably obtained that rank under Trajan．（Orell．Inscr．72； Zumpt，de Colon．p．402．）It was destroyed by the Lombard king Rotharis in A．D．641，and again，in less than 30 years afterwards，by Grimoaldus（ P ． Diac．iv．47，v．28）；but seems to have risen again from its rains in the middle ages，and is still a con－ siderable town and an episcopal see．

Opitergium itself stood quite in the plain ；but its territory，which must have been extensive，com－ prised a considerable range of the adjoining Alps，as Pliny speaks of the river Liquentia as rising＂ex montibus Opiterginis＂（Plin．iii．18．s．22）．The Itinerary gives a line of cross－road which pro－ ceeded from Opitergium by Feltria（Feltre）and the Val Sugana to Tridentum（Trent）．（Itin．Ant． p．280．）
［E．H．B．］
of Pontus，probably on or near the mouth of the river Ophis．（Ptol．v．6．§ 6 ；Tab．Peuting．）It is placed 120 stadia west of the river Rhizius， although its name seems to indicate that it was situated further west，near the river Ophis．［L．S．］
 § 11；Peripl Mar．Erythr．p．9），the modern Ha－ foon or Afun，was a town situated upon the eastern coast of Africa，immediately $\mathbf{N}$ ．of the region called Azania（Khaziyin），lat． $9^{\circ} \mathrm{N}$. The author of the $^{\circ}$ Periplus，in his account of this coast，says that Opone stood at the commencement of the highland called by the ancients Mount Elephas．He further defines its position by adding that since there was only an open roadstead at the Aromatum Emporium－the cape Guardafui or Jerdaffoon of modern charts－ships in bad weather ran down to Tabae for shelter，－the promontory now known as Ras Bannah，where stood the town called by Ptolemy （i．17．§ 8，iv．7．§ 11）Паушิ к $\omega \mu \eta$ ，the Bannah of the Arabians．From thence a voyage of 400 stadia round a sharply projecting peninsula termi－ nated at the emporium of Opone．Here ended to S．the Regio Aromata of the ancients．

Opone was evidently a place of some commercial importance．The region in which it stood was from remotest ages the seat of the spice trade of Libya． Throughout the range of Mount Elephas the valleys that slope seawards produce frankincense，while inland the cassia or cinnamon of the ancients at－ tained perfection．But the Greeks，until a com－ paratively late period，were unacquainted with this coast，and derived from the Arabians its distinctive local appellations．Opone，which doubtless occu－ pied the site，probably，therefore，represents also the Arabic name of a town called Afun or Hafoon， i．e．Afaon，fragrant gums and spices；which，again， is nearly equivalent to the Greek designation of the spice－land of Eastern Libya－Aromata．And this derivation is rendered the more probable，when taken in connection with the neighbouring bluff or headland of Guardafui or Jerdiffoon，since Afün enters into the composition of both names，and Jerd or Guard resembles the Punic word Kartha，a headland．Thus Jerd－Affoon is the promontory of Opone．Ptoletny（iv．7．§ 11）places Opone too far S．of cape Jerdaffoon．The author of the Periplus more correctly sets it a degree further N．，six days＇ voyage from a river which runs at the sonthern base of Wady Halfa，or Mount Elephas．The character－ istics of the entire tract，of which Opone formed one extremity，are those of an elevated ridge lying be－ tween two seas，－the Red Sea and the ocean，－and which，from its elevation and exposure to the NE． monsoon，is hamid ana fertile，affording a marked con－ trast to the generally sterile and arid shore ahove and below the highland of Elephas．S．of Opone there is no trace of ancient commerce．The articles of export from this emporium were，according to the author of the Periplus，cinnamon，distinguished as ＂native，＂aroma，fragrant gums generally，motù， or cinnamon of inferior quality ；slaves of a superior
 Aegyptian market；and tortoise－shell of a superior quality and in great abundance．（See Vincent， Commerce and Natigation of the Ancients，vol．ii． p．152－157．）
［W．B．D．］
OPPIDUM NOVUM（＂Oォォィסoy Néov，Ptol．iv． 2．§25），a town of Mauretania，colonised in the reign of the emperor Claudius，by the veterans（Plin． v．1），which Ptolemy（l．c．）places $10^{\prime}$ to the E．of

Manliana, and the Antonine Itinerary 18 M. P. to the W.; Ptoleny's position agrees with the Sinaab of Shaw (Trav. p. 58), where that traveller found ruins on the W. bank of the Chinalaph. The town of the Itinerary corresponds with El Khidarah, the "Chadra" of Edrisi (Geog. Nub. p. 81), situated on a rising ground, on the brink of the same river, where there are also ruins.
[E. B. J.]
OPPIDUM NOVUM, of Aquitania in Gallia, is placed by the Antonine Itin. on the road from Aquae Tarbellicae (Dax) to Tolosa (Toulouse), and between Beneharmum and Aquae Convenarum. [Benhifarnum: Aquar Convenarum.] D'Anville has fixed Oppidum Norum at Naye, the chief reason for which is some resemblance of name. [G. L.]

OPSICELLA, a town mentioned only by Strabo (iii. p. 157), and said to have been founded by one of the companions of Antenor, in the territory of the Cantabri.

OPTATIANA. [Dacu, Vol. I. p. 744, b.]
OPU'NTIUS SINUS. [OpUs.]
OPUS ('OToûs, contr. of 'Oォ $\delta \in t s$, In. ii. 531 : Eth. 'Onoúvtios), the chief town of a tribe of the Locri, who were called from this place the Locri Opuntii. It stood at the hrad of the Opuntian gulf ( $\delta$ ' O ouv tios кблтоs, Strab. ix. p. 425; Opuntius Sinus, Plin. iv. 7. s. 12; Mela, ii. 3. § 6), a littlo inland, being 15 stadia from the shore according to Strabo (l. c.), or only a mile according to Livy (xxviii. 6). Opus was believed to be one of the most ancient towns in Greece. It was said to have been founded by Opus, a son of Locrus and Protogeneia; and in its neighbourhood Deucalion and Pyrrha were reported to have resided. (Pind. Ol. ix. 62, 87 ; Schol. ad loc.) It was the native city of Patroclus. (Hom. Il. xviii. 326), and it is mentioned in the Homeric catalogue as one of the Locrian towns subject to Ajax, son of Oileus (Il. ii. 531). During the flourishing period of Grecian history, it was regarded as the chief city of the eastern Locrians, for the distinction between the Opuntii and Epicnemidii is not made either by Herodotus, Thucydides, or Polybius. Eien Strabo, from whorn the distinction is chiefly derived, in one place describes Opus as the capital of the Epicnemidii (ix. p. 416); and the same is confirmed by Pliny (iv. 7. s. 12) and Stephanus (s. v. 'Onóets; from Leake, Northern Greece, vol. ii. p. 181.) The Opuntii joined Leonidas with all their forces at Thermopylae, and sent seven ships to the Grecian fleet at Artemisium. (Herod. vii. 203, viii 1.) Subsequently they belonged to the anti-Athenian party in Greece. Accordingly, after the conquest of Boeotia by the Athenians, which followed the battle of Oenophyta, b. c. 456, the Athenians carried off 100 of the richest Opuntians as hostages. (Thuc. i. 108.) In the Peloponnesian War the Opuntian privateers annoyed the Athenian trade, and it was in order to check them that the Athenians fortified the small island of Atalanta off the Opuntian coast. (Thuc. ii. 32.) In the war between Antigonus and Cassander, Opus espoused the cause of the latter, and was therefore besieged by Ptoleny, the general of Antigonus. (Diod. xix. 78.)

The position of Opus is a disputed puint. Meletius has fallen into the error of identifying it with Pundonitza, which is in the territory of the Epicnemidii. Many modern writers place Opus at Tilanda, where are several Hellenic remains: but Leake observes that the distance of Tilemes from the sea is much too great to correspond with the testimony of Strabo and Livy. Accordingly Leake places Opus
at Kardhenitza, a village situated an hour to the south-eastward of Tálanda, at a distance from the sea corresponding to the 15 stadia of Strabo, and where exist the remains of an ancient city. (Northern Grecce, vol. ii. p. 173, seq.)
2. A town in the mountainous district of Acroreis in Elis, taken by the Spartans, when they invaded Elis at the close of the Peloponnesian War. The Schuliast on Pindar mentions a river Opus in Elis. The site of the town is perhaps represented by the Hellenic ruins at Skiáda, and the river Opus may be the stream which there flows from a small lake into the Peneius. (Diod. xiv. 17; Steph. B. s. r.; Strab. ix. p. 425 ; Schol. ad Pind. OL ix. 64; Leake, Peloponnesiaca, p. 220; Curtius, Peloponnesos, vol. i. p. 41.)

ORA ("Opa), a place mentioned by Ptolemy (vi. 8. § 14) in Carmania, but apparently on the confines of Gedrosia. It seems not improbable that be has confounded it with Orae, or Oraea, which was certainly in the latter province. Strabo ( $\mathbf{x} \mathbf{\nabla} . \mathrm{p}$. 723) and Arrian (vi. 24) both apparently quoting from the same authority, speak of a place of this name in Gedrosia, - the capital, probably, of the Oritae.
[V.]
ORA ( $\tau \mathrm{d}$ " $\Omega \rho a$ ), a town in the NW. part of India, apparently at no great distance from the Kabul river, of which Arrian describes the capture by Alexander the Great, on his march towards the Panjáb (iv. c. 27). It does not appear to have beer identified with any existing ruins ; but it must have been situated, according to Arrian's notice, between the Guraei (Gauri) and the celebrated ruck Aornos. [V.]
ORAE ( $\Omega \rho a t$, Arrian, vi. 22, 28), the chief town, in all probability, of the people who are generaliy called Oritae, though their name is written in different ways. It was situated in Gedrosia, and is most likely the same as is called in the Periplus of the Erythraean Sea, the Emporium Oraea (c. 37, ed. Müller). The neighbouring country was rich in corn, wine, barley, and dates.
[V.]
ORATHA (Opa日a), a city described by Stephanus B. (s.v.), as in the district of Mesene, on the Tigris. As he does not state in which Mesene he supposes it to have been, it is impossible now to identify it. Some commentators have supposed that it is the same as " Ur of the Chaldees." It is, however, more likely that it is "Ur castellum Persarum" (Ainm. Marc. xxv. 8), now believed to be represented by the ruins of Al-Hathrr; or, perhaps, the Ura of Pliny (v. 24. s. 21).
[V.]
ORB'ELUS ('Opbŋnos, Herod. v. 16: Strab. vii. p. 329 ; Diodor. xx. 19 ; Arrian, Anab. i. 1. § 5; Ptol. iii. 9. § 1, iii. 11. § 1 ; Pomp. Mela, ii. 2. § 2 ; Plin iv. 17), the great mountain on the frontiers of Thrace and Macedonia, which, begiming at the Strymonic plain and lake, extends towards the sources of the Strymon, where it unites with the summit called Scomius, in which the river had its origin. The amphibious inhabitants of lake Prasias procured their planks and piles, on which they constructed their dwellings, from this mountain. (Herod. l. c.) Cassander, after having assisted Audoleon, king of Paconia, against the Illyrian Autariatae, and having conquered them, transported 20.000 men , women, and children to Mt. Othelus. (Diodor. l.c.) The epitomiser of Strabs, (l.c.), who lived not long before the commencement of the 11th century, applies this name to the ridge of Hacmus and Rhodope; Gatterer (Comment. Suc. Gut. vol. iv. p. 99, vol. vi.

ORCADES.
ORCIIOMENLS
p. 33; comp. Poppo, Prolegom. in Thuc. pars i. vol. ii. p. 321), in consequence, was inclined to believe that there were two mountains of this name. Kie$\mathrm{p} \cdot \mathrm{rt}$ (Karte der Europ. T'ürkei) identifies Orbelus with Perin Ingh. The district called Orbelia ('Op6nd:a. Ptol. iii. 13. § 25), with the town GaresCUs, derived its name from the mountain. (Leake, Northern Greece, vol. iii. pp. 211, 463.) [E.B.J.]

O'ticad es ('Opkdós ע $\bar{\eta} \sigma o l$, Ptol. ii. 3. § 31), a group of small islands lying off the northern extremity of Britannia Barbara. According to Ptolemy (l.c.) and Mela (iii. 6. § 7) they were 30 in number: Pliny (iv. 16. 8. 30) reckons them at 40; Orosius (i. 2) at 33, of which 20 were inhabited and 13 uninhabited. This last account agrees very nearly with that of Jornandes (B. Get. 1), who makes them 34 in number. See also Tacitus (Agric. 10) and the Itinerary (p. 508). The modern Orkmey and Shetland Islands. [T. H. D.]

ORCAORICI ('Oркаорікоi), a place in a rough district of Galatia, devoid of a sufficient supply of water, near Pessinus, on the borders of Phrygia, if not in Phrygia itself (Strab. xii. pp. 567, 568, 576).
[L.S.]
ORCAS ('Opxd́s, Ptol. ii. 3. § 1), a promontory on the N. coast of Britannia Barbara, now Dunnet Mead. It should be remarked, however, that Ptolemy ( $L$ c.) places it on the E. coast, and gives it the additiunal name of Tarvedum (Tapoutסov́ $\boldsymbol{\mu}$ ).
[T. H. D.]
O'RCELIS ('Opke入is, Ptol. ii. 6. § 61). 1. A town of the Bastitani in Hispania Tarraconensis, sometimes, but erroneously, identified with Oribuela. (Mentelle, Esp. an. p. 186; Ukert, vol. ii. pt. 1. p. 406.)
2. An inland town of Thrace (Ptol. iii. 2. § 11.)

ORCHE'NI ('OpXךvoi), a people of Arabia Deserta, placed by Ptolemy on the Persian Gulf, i. e. to the NE. of his Arabia Felix. (Ptol. v. 19. § 2.) They were perhaps the inhabitants of Orchoe mentioned below.
[G.W.]
ORCHISTE'NE ('Opxıornขヶ, Strab. xi. p. 528), a canton of Armenia, which Strabo (b.c.) describes as abounding in horses, but does not mention its position.
[E. B. J.]
O'RCHOE ( ${ }^{\prime} \rho \chi \delta \eta$ ), a city of southern Babylunia, placed by Ptolemy among the marshes in the direction of Arabia Deserta (vi. 20. § 7). There can he little doubt that it is to be identified with one of the great mounds lately excavatel in those parts, and that the one now called Warka represents its prosition. It was supposed that another mound in the immediate neighbourhood, Muqueyer, was the same as the "Ur of the Chaldees;" and there is now good reason for identifying it as the site of that celebrated place. The name of Warka reads on inscriptions lately discovered by Mr. Taylor, Hur or Hurik, which is nearly the same with the 'Opex of the LXX. and the 'O $\rho \chi{ }^{6} \boldsymbol{\eta}$ of Ptolemy (l.c.). Mureover, Hur and Warka are constantly connected in the inscriptions, just as Erech and Accad are in the Bible. It is most probable that the Orcheni ('OpXnvoi), described in Straino as an astronomical sect of Chaldacans, dwelling near Babyion (xxi. p. 739); in l'tolemy, as a peuple of Arabia, living near the Persian Gulf (v. 19. § 2) ; and in Pliny, as an agricultural pupulation, who banked up the waters of the Euphrates and compelied them to flow into the Tigris (vi. 27. s. 31), were really the inhabitants of Orclue and of
the district surrmunding it. We now know that this country was ruled in very early times by a Chalduean race, some of the kings of which Berosus has re corded. (lawlinson, in Athenaeum, 1854, No. 13i7; Euseb. Pruepar. Evang. ix. 17.) It is worthy of notice that Eusebius has preserved an ancient fragment from Eupolemus, who speaks of a city of Bahylonia, Camarina, " which some call Urie (Ójpin)." As the Assyrian name of Warka is written with a monogram which signifies "the Moon," and as the name Camarina would naturally be derivable from the Arabic Kamar, "the Moon," there is an additional connection between the two names. (Euseb. l.c.) It is also clear from the inscriptions that the names of the two cities were constantly interchanged.
[V.]
ORCHO'MENUS. 1. ('Opxouevos; in insc. and
 usually called the Minyean Orchomenus ('Opxo$\mu \in \nu$ d̀s Mıvúfios, Hom. Il. ii. 511 ; Thuc. iv. 76; Strab. ix. p. 414), a city in the north of Boeotia, and in ante-historical times the capital of the powerful kingdom of the Minyae. This people, according to tradition, seem to have come originally from Thessaly. We read of a town Minya in Thessaly (Steph. B. 8. v. Mivia), and also of a Thessalian Orchomenus Minyeus. (Plin. iv. 8. s. 15.) The first king of the Boeotian Orchomenus is said to have been Andreus, a son of the Thessalian river Peneius, from whom the country was called Andreis. (Paus. ix. 34. § 6;
 Apoll. Khod. ii. 1190.) Andreus assigned part of his territory to the Aetolian Athamas, who adopted two of the grandchildren of his brother Sisyphus: they gave their names to Haliartus and Coroneia. Andreus was succeeded in the other part of his territory by his son Eteocles, who was the first to worship the Charites (Graces) in Greece. Upon the death of Eteocles the sovereignty devolved upon the family of Halmus or Almus, a son of Sisyphus. (Paus. ix. 34. §7-ix.35.) Halmus had two daughters, Chryse and Chrysogeneia. Chryse by the god Ares became the mother of Phlegyas, who succeeded the childless Eteocles, and called the country Phlegyantis after himself. He also gave his name to the fierce and sacrilegious race of the Phiegyae, who separated themselves from the other Orchomenians, and attempted to plunder the temple of Delphi. They were however all destroyed by the god, with the exception of a few who fled into Phocis. Phlegyas died without children, and was succeeded by Chryses, the son of Chrysogeneia by the god Poseidon. Chryses was the father of the wealthy Minyas, who built the treasury, and who gave his name to the Minyan race. Minyas was succeeded by his son Orchomenus, atter whom the city was named. (Paus. ix. 36. §§ 1-6.) Some modern scholars have supposed that the Minyae were Aeolians (Thirlwall, Hist. of Greece, vol. i. p. 91); but as they disappeared before the historical period, it is impossible to predicate anything certain respecting them. There is, however, a concurrence of tradition to the fact, that Orchomenus was in the earliest times not only the chief city of Boeotia, but one of the most powerful and wealthy cities of Greece. It has been observed that the genealogy of Orchomenus glitters with names which express the traditional opinion of bis anbounded wealth (Chryses, Chrysogeneia). Homer even compares the treasures which flowed into the city to those of the Egyptian Thebes ( 16 . ix. 381 ; comp. Eustath. l.c.) It would seem that at an early period Orchomenus ruled over
the whole of Northern Boeotia; and that even Thebes was for a time compelled to pay tribute to Erginus, king of Orchomenus. From this tribute, however, the Thebans were delivered by Hercules, who made war upon Orchomenus, and greatly reduced its power. (Paus. ix. 37. § 2; Strab. ix. p. 414 ; Diod. iv. 18.) In the Homeric catalogue Orchomenus is mentioned along with Aspledon, bat distinct from the other Boootian towns, and as sending 30 ships to the Trojan War (IL. ii. 511). Sixty years after the Trojan War, according to the received chronology, the sovereignty of the Minyae seems to have been overthrown by the Boeotian immigrants from Thessaly; and Orchomenus became a member of the Boeotian confederacy. (Strab. ix. p. 401; comp. Thac. i. 12.) The city now ceased to be the Minyeian and became the Boeotian Orchomenus (Thuc. iv. 76); but it still remained a powerful state, and throughout the whole bistorical period was second only to Thebes in the Boeotian confederacy. The town of Chaeroneia appears to have been always one of its dependencies. (Thuc. iv. 76.) In the Persian War Orchomenus, together with the other Boeotian towns, with the exception of Thespise and Plataese, deserted the cause of Grecian independence. Orchomenus possessed an aristocraticnl government, and continued on friendly terms with Thebes, as long as the aristocratical party in the latter city bad the direction of public affairs. But when, after the close of the Peloponnesian War, a revolution placed the government of Thebes in the hands of the democracy, Orchomenus hecame opposed to Thebes. Accordingly, when war broke out between Sparta and Thebes, and Lysander inraded Boeotia in в. c. 395, Orchomenus revolted from Thebes, and sent troops to assist Lysander in his siege of Haliartus (Plut. Lys. 28; Xen. Hell. iii. 5. § 6, seq.; Diod. xiv. 81; Corn. Nepos, Lys. 3.) In the following year (в. с. 394), when all the other Boeotians joined the Thebans and Athenians at the battle of Coroneia, the Orchomenians fought in the army of Agesilaus, who arrayed them against the Thebans. (Xen. Hell. iv. 3. § 15, Ages. 2. § 9.) It was now the object of the Spartans to deprive Thebes of her supremacy over the Boentian cities. This they effected by the peace of Antalcidas, B. c. 387, by which Thebes was obliged to acknowledge the independence of Orchomenus and of the cities of Boeotia. (Xen. Hell v. 1. § 31.) The battle of Leuctra (в. с. 371) changed the position of affairs, and made Thebes the undisputed master of Boeotia. Orchomenus was now at the mercy of the Thebans, who were anxious to destroy the city, and reduce the inhabitants to slavery. Epaminondas, however, dissuaded them from carrying their wishes into effect, and induced them to pardon Orchoments, and readmit it as a member of the Boeotian confederation. (Diol. xv. 57.) The Thebans appear to have yielded with reluctance to the generous advice of Epaminondas; and they took advantage of his absence in Thessaly, in B. C. 368, to carry their original design into effect. The pretext was that the 300 knights at Orchomenus had entered into a conspiracy with some Theban exiles to overthrow the democratical constitution of Thebes. It is not improbable that the whole story was a fiction; but the Thebans eagerly listened to the accusation, condemned the 300 Orchomenians, and decreed that the city should be destroyed. A Theban army was immediately sent against it, which burnt it to the ground, put all the male inhabitants to the sword, and sold all the women and children into slavery. (Diod. xv. 79; Paus. ix.
15. § 3.) This atrocious act of vengeance remained as an indelible stigma upon the Theban character (Dem. c. Leptins. p. 490.)

Orchomenus remained a long time in ruins, though the Athenians were anxions for its restoration. for the purpose of humbling Thebes. (Dem. Megal. pp. 203, 208.) It appears to have been rebuilt during the Phocian War, when the Phocians endeavoured to expel the Thebans from the northern parts of Boeotia. In b.c. 353 we find the Phocian leader Onornarchus in possession of Orchomenus and Coroneia (liod. xvi. 33, 35); and in the following year Yhayllus was defeated in the neighbourhood of these towns. (Diod. xvi. 37.) Orchomenus, Coroneia, and Corsiae were the three fortified places in Boeotia, which the Phucians bad in their power (Diod. xvi. 58); and from which they made their devastating inroads into the other parts of Boectia On the conclusion of the Sacred War, B. C. 346, Orchomenus was given by Philip to its implacable enemy the Thebans, who, ander Philip's eves, destroyed the city a second time, and sold all its inhabitants as slaves. (Aesch. do Fals. Leg. p. 309; Dem. Phil ii. p. 69, de Pace, p. 62, de Fals. Leg. p. 375.) It did not, however, remain long in ruins; for after the defeat of the Thebans and Athenians at the battle of Chaeroneia, B. c. 338, it was rebuilt by Philip's order (Paus. iv. 27. § 10, ix. 37. § 8; according to Arrian, Anub. i. 9, it was rebuilt by Alexander the Great after the destruction of Thebes). From this time the name of Orchomenus is seldorn mentioned in history Under the Romans it shared the common fate of the Boeotian towns, all of which were, in Strabo's tine, only rains and names, with the exception of Thespiae and Tanagra.

Orchomenus was fannous for the worship of the Charites or Graces, and for the festival in their honour, celebrated with musical contests, in which poets and musicians frum all parts of Greece took part. Hence Pindar calls Orchomenus the city of the Charites (Pyth. xii. 45), and Theocritus describes them as the goddesses who love the Minyeian Orchomenus (xvi. 104). An ancient inscription records the names of the victors in this festival of the Charites. (Müller, Orchomenos, p. 172, seq.) Pindar's fourteenth Olympic ode, which was written to commemorate the victory of Asopichus, an Orchomenian, is in reality a hymn in honour of these goddesses, and was probably sung in their temple. It was in the marshes in the neighbourhoxd of Orchomenus that the auletic or flute-reeds grew, which exercised an important influence upon the development of Greek music. [See Vol. I. p. 414, b.]

The ruins of Orchomenus are to be seen ncar the village of Skripu. The city stood at the cuge of the marshes of the Copaic lake, and occupied the triangular fuce of a steep mountain. The Cephissus " winds like a serpent" round the southern base of the mountain
 ap. Serab. ix. p. 424). At its northern base are the sources of the river Melas. [See Vol. I. p. 413, a.] Leake observes that the "upper part of the hill, forming a very acute angle, was fortified differently from the customary modes. Instead of a considerable portion of it having been enclosed to form an acropolis, there is only a small castle on the summit, having a long narrow approach to it from the body of the town, between walls which, for the last 200 yards, are almost parallel, and not more than 20 or 30 yards asunder. Below this approarh to the citadel the breadth of the hill gradually
widens, and in the lowest part of the town the enclosed space is nearly square. It is defended on the lowest side by a wall, which crossed the slope of the hill along the crest of a ledge of rock, which there forms a division in the slope. In this wall, which is at three-fourths of the distance from the castle to the monastery, there are some foundations of the gate which formed the lower entrance into the city; and on the outside are many large masses of wronght stone, the remsins, apparently, of some temple or other pablic building. The southern wall of the city, which follows a line parallel to the Cephissus, is traceable, with scarcely any intermission, through a distance of three quarters of a mile; and in many places several courses of masonry are still extant. The wall derives its flank defence from square towers, placed for the most part at long intervals, with an intermediate short flank or break, in the line of wall. In a few places the masonry is of a very early age, but in general it is of the third kind, or almost regular." The former belongs to the earlier Orchomenus, the latter to the later city, and dates from the time of its restoration either by Pbilip or the Phocians. "Towards the middle of the northern side the hill of Orchomenus is most precipitous, and here the walls are not traceable. The circumference of the whole was about 2 miles. The citadel occupies a rock about 40 yards in diameter, and seems to have been an irregular hezagon; but three sides only remain, no foundations being visible on the eastern half of the rock. At the northern angle are the ruins of a tower, and parallel to the north-western side there is a ditch cut in the rock. beyond which are some traces of an outwork. The hill is commanded by the neighbouring part of Mount Acontium, but not at such a distance as to have been of importance in ancient warfare. The access to the castle from the city was first by an oblique flight of 44 steps, 6 feet wide, and cut out of the rock; and then by a direct flight of 50 steps of the same kind."

ORCHOMFNUS.
The monuments, which Pansanias noticed at Orchomenus, were temples of Dionysus and the Charites, - of which the latter was a very ancient building, -a fountain, to which there was a descent, the treasury of Minyas, tombs of Minyas and Hesiod, and a brazen figure bound by a chain of iron to a rock, which was said to be the ghost of Actaeon. Seven stadia from the town, at the sources of the river Melas, was a temple of Hercules. The Treasury of Atreus was a circular building rising to a summit not very pointed, but terminating in a stone, which was said to hold together the entire building. (Pans. ix. 38.) Pausanias expresses his admiration of this building, and eays there was nothing more wonderful either in Greece or in any other country. The remains of the treasury still exist at the eastern extremity of the bill towards the lake, in front of the monastery. It was a building similar to the Treasury of Atreus at Mycense. It was a circular vanit of massive masonry embedded in the hill, with an arched roof, surmounted probably by a tumulus. The whole of the stone-work of the vault has now disappeared, but its form is vouched for by the circular carity of the ground and by the description of Pausanias. It had a side-door of entrance, which is still entire, though completely embedded in earth up to the base of the architrave. There were probably two great slabs in the architrave, as at Mycenae, though one only is left, which is of white marble, and of which the size, according to Leake, is 16 feet in its greatest length, 8 in its greatest breadth, and 3 feet $2 \frac{1}{2}$ inches in thickness. The diameter of the vanalt seems to have been about 41 feet. Respecting the origin and destination of this, and other buildings of the same class, some remarks are made under Mycenae. [Vol. II. p. 383.] Strabo remarks (ix. p. 416) that the Orchomenus of his time was supposed to stand on a different site from the more ancient city, the inundations of the lake having forced the inhabitants to retire from the plain towards Mt. Acontium. And Leake observes, that this seems to accord with the position of the treasury on the outside of the existing walls, since it can hardly have been placed there originally. The acrupolis, however, must always have stood upon the hill; but it is probable, that the city in the height of its power axtended to the Cephissus.

COLS OF ORCHOMENUS.
The monastery of Skripui, which stands about midway between the treasury and the river, probably occupies the site of the temple of the Charites; for the pedestal of a tripod dedicated to the Chariter, which is now in the charch, was found in an excavation made apon the spot. Some very ancient inscriptions, of which two are now in the British Museam, were found in the charch of the monastery. They are in the Orchomenian-Aeolic dialect, in which the digamma was used. (K. O. Milller, Orchomenos und die Minyer, Breslan, 1844, 2nd ed.; Dodwell, Classical Towr, vol. i. p. 227, seq.; Leake, Northern Greece, vol. ii. p. 144, seq.; Mure, Tour
in Greese, vol. i. p. 223, seq.; Ulrichs, Reisen in Griechenland, p. 178, scq.)
2. An ancient city of Arcadia, called by Thucydides ( v .61 ) the Arcadian ( $\delta$ 'Apкaঠıoós), to distinguish it from the Boeotian town. It was situated in a plain surrounded on every side by mountains. This plain was bounded on the $S$. by a low range of hills, called Anchisia, which separited it from the territory of Mantincia; on the N. by a lofty chain, called Oligyrtus, through which lie the passes into the territories of Pheneus and StymphaIus; and on the E. and W. by two parallel chains running from $N$. to S ., which bore no specific name in antiquity : the eastern range is in one part 5400 feet high, and the western about 4000 feet. The plain is divided into two by hills projecting on either side from the eastern and western ranges, and which approach so close as to allow space for only a narrow ravine between them. The western hill, on account of its rough and rugged form, was called Trachy (T $\rho a \chi^{\prime}$ ) in antiquity; upon the summit of the western mountain stood the acropolis of Orchomenus. The northern plain is lower than the southern; the waters of the latter run through the ravine between Mount Trachy and that upon which Orchomenus stands into the northern plain, where, as there is no outlet for the waters, they form a considerable lake. (Paus. viii. 13. § 4.)

The acropolis of Orchomenus, stood upon a lofty, steep, and insulated hill, nearly 3000 feet high, resembling the strong fortress of the Messenian lthome, and, like the latter, commanding two plains. [See Vol. II. p. 338.] From its situation and its legendary history, we may conclude that it was one of the most powerful cities of Arcadia in early times. Pausanias relates that Orchomenus was founded by an eponymous hero, the son of Lycaon (viii. 3. § 3); but there was a tradition that, on the death of Arcas, his dominions were divided among his three sons, of whom Elatus obtained Orchomenus as his portion. (Sichol. ad. Lionys. Per. 415.) The kings of Orchomenus are said to have ruled over nearly all Arcadia. (Heraclid. Pont. ap. Diog. Laert. i. 94.) Pausanias also gives a list of the kings of Orchomenus, whom he represents at the same time as kings of Arcadia. One of these kings, Aristocrates, the son of Aechmis, was stoned to death by lis people for violating the virgin priestess of Artemis Hymnia. Aristocrates was succeeded by his son Hicetas, and Hicetas by his son Aristocrates II., who, having abandoned the Messenians at the battle of the Trench in the second war against Sparta, experienced the fate of his grandfather, being stoned to death by the Arcadians. He appears to have been the last king of Orchomenus, who reigned over Arcadia, but his family was not deprived of the kingdom of Orchomenus, as is stated in some authorities, since we find his son Aristodemus represented as king of the city. (Paus. riii. 5; Polyb. iv. 3; Heracl. Pont. l.c.) It would appear, indeed, that royalty continued to exist at Orchomenus long after its abulition in most other Grecian cities, since Theophilus related that Peisistratus, king of Orchomenus, was put to death by the aristocracy in the Ieloponnesian War. (1'hit. Parall. 32.)

Orchomenus is mentioned by Homer, who gives it the epithet of mo八úpŋ入os ( $I l$. ii. 605): and it is also called ferax by Ovid (Met. vi. 416), and à фváós by Apollonius Khodius (iii. 512). In the Persian wars Orchomenus sent 120 men to Thermopylae (Herod. viii. 102), and 600 to I'lataeac (ix. 28). In
the Peloponnesian War, the Lacedaemonians deposited in Orchomenus the hostages they had taken from the Arcadians; but the walls of the city were then in a dilapidated state; and accordingly, when the Athenians and their Peloponnesian allies adranced against the city in B. C. 418, the Orchomenians dared not offer resistance, and surrendered the hostages. (Thuc. v. 61.) At the time of the foundation of Megalopolis, we find the Orchomenians exercising suprerracy over Theisoa, Methydriam, and Teuthis; but the inhabitants of these cities were then transferred to Megalopolis, and their territories assigned to the latter. (Paus. viii. 27. §4.) The Orchome nians, through their enmity to the Mantineians, refused to join the Arcadian confederacy, and made war upon the Mantineians. (Xen. Hell. vi. 5. § 11 , seq.; Diod. xv. 62.) Henceforth Orchomenus lost its political importance; but, from its commanding situation, its possession was frequently an object of the belligerent powers in later times. In the war between Cassander and Polysperchon, it fell into the power of the former, B. C. 313. (Diod. xix. 63.) It snbsequently esponsed the side of the Aetolians, was taken by Cleomenes (Polyb. ii. 46), and was afterwards retaken by Antigonus Doson, who placed there a Macedonian garrison. (Polyb. ii. 54, ir. 6; Plut. Arat. 5.) It was given back by Philip to the Achaeans. (Liv. xxxii. 5.) Strabo mentions it among the Arcadian cities, which had either disappeared, or of which there were scarcely any traces left (viii. p. 338); but this appears from Pausanias to have been an exaggeration. Wheu this writer visited the place, the old city upon the summit of the mountain was in ruins, and there were only some vestiges of the agora and the town walls; but at the foot of the mountain there was still an inhabited town. The upper town was probably deserted at a very early period; for such is the natural strength of its position, that we can hardly suppose that the Orchomenians were dwelling there in the Peloponnesian War, when they were unable to resist an invading force. Pausanias mentions, as the most remarkable objects in the place, a source of water, and temples of Poseidon and Aphrodite, with statues of stone. Close to the city was a wooden statue of Artemis, enclosed in a great cedar tree, and hence called Cedreatis. Below the city were several heaps of stones, said to have been erected to some persons slain in battle. (Paus. viii. 13.)

The village of Kalpaki stands on the site of the lower Orchomenus. On approaching the place from the south the traveller sees, on his left, tumuli, chiefly composed of collections of stones, as described by Pausanias. Just above Kalpáki are several pieces of white marble columns, belonging to an ancient temple. There are also some remains of a temple at a mined church below the village, near which is a copious fountain, which is evidently the one described by Pausanias. On the summit of the hill are some remains of the walls of the more ancient Orchomenus.

In the territory of Orchomenus, but adjoining that of Mantineia, consequently on the northern slope of Mt. Anchisia, was' the temple of Artemis Hymnia, which was held in high veneration by all the Arcadians in the most ancient times. (Paus. viii. 5. § 11.) Its site is probably indirated by 8 chapel of the Virgin Mary, which stands east of Levilhi.

In the southern plain is an ancient canal, which conducts the waters from the surrounding mountains
through the ravine into the lower or northern plain, which is "the other Orchomenian plain" of Paucanias (viii. 13. § 4). After passing the ravine, at the distance of 3 stadia from Orchornenus, the roud divides into two. One turns to the left along the northern side of the Orchomenian acropolis to Caphyae, the other crosses the torrent, and passes under Mt. Trachy to the tomb of Aristocrates, beyond which are the fountains called Teneiae ('l'e veicu). Seven stadia further is a place called Amilus ("Auclos). Here, in ancient times, the road divided into two, one leading to Stymphalus and the other to Pheneus. (Paus. viii. 13. § 4, seq.) The above-mentioned fountains are visible just beyond Trachy, and a little further are some Hellenic ruins, which are those of Amilus. (Dodwell, Classical Towr, vol. ii. p. 425, seq.; Leake, Morea, vol. iii. p. 99, seq.; Boblaye, Récherches, foc. p. 149 ; Curtius, Peloponnesos, vol. i. p. 219, seq.)
3. A town in Thessaly. [See above, p. 487.]
4. A town in Euboea near Carystus. (Strab. ix. p. 416.)

ORCISTUS, a town in the north-east of Phrygia, near the borders of Galatin. It was the see of a bishop (Geogr. Sacr. p. 256; Concih Chalced; Tab. Peuting). It is placed by Col. Leake (Asia Minor, p. 71$)_{2}$ on the authority of an inscription found there by Pococke, at Alekiam, and, perhaps more correctly, by Hamilton (Researches, i. p. 446) about 3 or 4 miles to the sonth-enst of the village of Alekiam, where considerable remains of antiquity are found.
ordesus. [Ibiacorum Portus.]
ORDESUS [ODEssi's.]
ORDESSUS ("Opסeacos, Herod. iv. 48), an affluent of the Ister, which the commentators usually identify with the Sereth. (Schafarik, Slav. All. vol. i. p. 506.)
[E.B. J.]
ORDOVICES ('Opboữoes, Ptol. ii. 3. § 18), a people on the W. coast of Britannia Romana, opposite to the island of Mona. They occupied the NW. portion of Wales, or that lying between Cardigas Bay and the river Dee, viz., Montgomeryshire, Merionethshire, Caernarvonshire, Denbighshire, and Flintshire. (Camden, p. 777; Tac. Ann. xii. 33, Agric. 18.)
[T. H. D.]
ORESCII ('Oppウ́nбxıot), a penple of Macedonia or Thrace, known only from their coins. These have been by some writers referred to the Orestae; but it is more probable, as suggested by Leake, that they were one of the Thracian tribes who worked the silver mines of Pangaeum; a circumstance which will account for our finding silver coins of large size and in considerable numbers struck by a people so obscure that their name is not mentioned by any ancient author (Leake, Northern Greece, vol. iii. p. 213, Numismata Hellenica, p. 81.) The coins in question, one of which is annexed, clusely resemble in style and fabric those of the Bisaltae and Edoni in the same neighbourhood.
[E. H. B.]

OOD OF ORESCLI.

ORESTAE ('Opéqтat, Hecat. ap. Steph. B. s. v.; Thuc. ii. 80 : Polyb. xviii. 30 ; Strab. vi. p. 326, ix. p. 434 : Plin. iv. 17), a people who are shown by Thucydides ( $l$ c. .) to have bordered upon the Macedonian Paravaei, and who partly, perhape, as having been originally an Epirote tribe (Steph. B. 8. v. terms them a Molossian tribe), were united with the other Epirots, under their prince Antiochus, in support of the expedition of Cnemus and the Ambraciots against Acarnania. Afterwards they were incorporated in the Macedonian kingdom. In the peace finally granted to Philip, B c. 196, by the Romans, the Orestae were declared free, because they had been the first to revolt. (Liv. xxxiii. 34.)

Orkstis ('Opsotis, Ptol. iii. 13. §§ 5, 22 ; Steph. B. s. v.; Liv. xxvi. 33, xxxi. 40) or Orestins ('Opecrias, Strab. vii. p. 326), was the name given to the district which they occupied, which, though it is not named by Livy and Diodorus among the countries which entered into the composition of the Fourth Macedonia, was probably included in it, because the greater part, at least, of Orestis was situated to the E. of Pindus. This subdivision of Upper Macedonis is represented by the modern districts of Gramista, Anaselitea, and Kastoria (Leake, Northern Greece, vol. iii. p. 305, vol. iv. pp. 121124.)
[E.B. J.]
ORESTHA'SIUM ('Opeoddócov, Paus.; 'Opé$\sigma \theta \in i o v$, Thuc.; 'Opéotecoy, Her., Eur.), a town in the suath of Arcadia, in the district of Maenalia, a little to the right of the road, leading from Megalopolis to Pallantium and Tegea. Its inhabitants were removed to Megalopolis on the foandation of the latter sity. Its territory is called Oreschis by Thucydides (iv. 134), and in it was situated Ladoceia, which became a suburb of Megalopolis. [Ladoceia.] Leake places Oresthasinm at or near the ridge of Tzimbari, and conjectures that it may have occupied the site of the village of Marmara or Marmária, a name often attached in Greece to places where ancient wrought or sculptured stones have been found. (Paus. riii. 44. § 2, comp. viii. 3. § 1, 27. § 3, 39. § 4; Herod. ix. 11; Plut. Arist. 10; Thuc. v. 64; Eurip. Oresk. 1642, Electr. 1274 : Steph. B. \&. v.; Leake, Peloponnesiaca, p. 247.)

ORESTHIS. [Oresthasium.]
ORE'STIS. [Orestae.]
ORE'STIAS. [Hadhianopolis, No. 1.]
ORETA'NI ('Spmravol, Ptol. ii. 6. § 59), a powerful people in the S. of Hispania Tarraconensis, inhabiting the territory E. of Baetica, as far as Carthago Nova, and spreading to the N. beyond the river Anas. The Baetis flowed through their country in its earliest course. (Polyb. x. 38, xi. 30; Strab. iii. pp. 152, 156 ; Plin. iii. 3. s. 4; Liv. xxi. 11, xxxv. 7.) Thas they inhabited the E. part of Granada, the whole of Mancha, and the W. part of Murcia. Their chief city was Castulo, now Cazlona.
[T. H. D.]
 $\nu \bar{\omega} \nu$, Ptol. ii. 6. § 59). Germani was another name for the Oretani ("Oretani, qui et Germani nominantur," Plin. iii. 3. s. 4), and Oretum was one of their towns; probably the Orisia of Artemidorus, quoted by Steph. B. (e. v.), and the Oria of Strabo (iii. p. 152). It has been identified with Granatula, a village near Almagro, where there is a bermitage still called De Oreto, and close by several ruins, a Loman bridge, \&cc. (Morales, Ant. p. 8, b.. p. 76, a.; Florez, Esp. S. vii. p. 255; Ukert, vol. ii. pt. 1. p. 152.)
['T. H. D.]

O'REUS ('Rpeds: Eth. 'Rpelrns: the territory תpla, Strab. x. p. 445), formerly called HISTIAEA ('Iotiaua, also 'Eotiaua: Eth. 'Iotiatcús), a town in the north of Enboea, situated upon the river Callas, at the foot of Mt. Telethriam, and opposite Antron on the Thessalian coast. From this town the whole northern extremity of Euboea was named Histiaeotis ('Iotialôtıs, Ion. 'Iotıaıท̄tıs, Herod. vii. 23). According to some it was a colony from the Attic demus of Histiaea (Strab. x. p. 445); according to others it was founded by the Thessalian Perrhaebi. (Scymn. Ch. 578.) It was one of the most ancient and most important of the Euboean cities. It occurs in Homer, who gives it the epithet of moduordфuos (Il. ii. 537); and Scylax mentions it as one of the four cities of Euboea (p. 22). After the battle of Artemisium, when the Grecian fleet sailed southwards, Histiaea was occupied by the Persians. (Herod. vii. 23.) Upon the expulsion of the Persians from Greece, Histiaea, with the other Euboean towns, became subject to Attica. In the revolt of Euboea from Athens in B. c. 445, we may conclude that Histiaea took a prominent part, since Pericles, upon the reduction of the island, expelied the inhabitants from the city, and peopled it with 2000 Athenian colonists. The expelled Histiacans were said by Theopompus to have withdrawn to Macedonia. (Thuc. i. 114: Diod. xii. 7, 22; Plut. Per. 23: Theopomp. ap. Strab. x. p. 445.) From this time we find the name of the town changed to Oreus, which was originally a demus dependent upon Histiaea. (Strab. l. c.; Paus. vii. 26. § 4.) It is true that Thucydides upon one occasion subsequently calls the town by its ancient name (vii. 57); but he speaks of it as Oreus, in relating the second revolt of Euboea in s.c. 411, where he says that it was the only town in the island that remained faithful to Athens. (Thuc. viii. 95.) At the end of the Peloponnesian War, Oreus became subject to Sparta; the Athenian colonists were doubtless expelled, and a portion at least of its ancient inhabitants restored; and accordingly we read that this town remained faithful to Sparta and cherished a lasting hatred against Athens. (Diod. xv. 30.) Neogenes, supported by Jason of Pherae, made himself tyrant of Orens for a time: but he was expelled by Therippidas, the Lacedaemonian commander; and the Athenian Chabrias endeavoured in vain to obtain possession of the town. (Diod. l.c.) But shortly afterwards, before the battle of Leuctra, Oreus revolted from Sparta. (Xen. Hell. v. 4. § 56.) In the subsequent war between Philip and the Athenians, a party in Oreus was friendly to Philip; and by the aid of this monarch Philistides became tyrant of the city (Dem. PhiL iii. pp. 119, 127, de Cor. p. 248; Strab. l. c.); but the Athenians, at the instigation of Demosthenes, sent an expedition against Oreus, which expelled Philistides, and, according to Charax, put him to death. (Dem. de Cor. p. 252; Charax, ap. Steph. s. v. ' $\Omega$ péos.) In consequence of its geographical position and its fortifications, Oreus became an important place in the subsequent wars. In the contest between Antigonus and Cassander it was besieged by the latter, who was, however, obliged to retire apon the approach of Ptolemy, the general of Antigonus. (Diod. xix. 75, 77.). In the first war between the Romans and Philip, it was betrnyed to the former by the commander of the Macedonian garrison, B. C. 207. (Liv. xxviii. 6.) In the second war it was taken by the Romans by assault, B. c. 200. (Liv. $\mathbf{x x x i}$. 46.) Soon afterwards, in
B. C. 196, it was declared free by T. Quinctins Flamininus along with the other Grecian states. (Polyb. xviii. 28, 30; Liv. xxxiii. 31, 34.) Pliny mentions it among the cities of Euboea no longer existent in his time (Plin. iv. 21. 8. 21), but it still occars in the lists of Ptolemy, ander the corrupt form of Ecopebs (iii. 15. § 25).

Strabo says that Oreas was situated upon a lofty hill named Drymus (x. p. 445). Livy describes it as having two citadels, one overhanging the sea and the other in the middle of the city (xxviii. 6). There are still some remains of the ancient walls at the western end of the bay, which is still called the bay of Oreós. (Stephani, Reise, gr. pp. 33, seq.; Leake, Northern Greece, vol. iv. p. 352.)

ORGANA. [OGYRIs.]
ORGAS ('Op ${ }^{2} \hat{s}$ ), a little tributary of the Maeander in Phrygia, flowing into the main river on the south-east of Colaenae (Strab. xii. p. 578; Plin. v. 29, where it is called Orga). It is probably the stream crossed by Mr. Arundell (Discov. in As. Min. i. p. 185) between Dineir and the bridge of the Maeander near Digetzi ; but its modern name is unknown.
[L. S. $]$
ORGESSUS, ORGYSUS. [Dassaretae, Vol. I. p. 746, a.]

ORGIA. [Illergetes.]
orgocyni. [Taurica Chersonestis.]
ORIA, ORISIA. [Oretum Germanoru m.]
ORICUM, ORICUS ('Rpiobs, Hecat. Fr. 75 ap. Steph. B. s. v.; Herod. ix. 92 ; Scyl. p. 10; Polyb. vii. 19; Scymn. 440; Eust. ad Dion. 321 ; " $\Omega$ pukov, Ptol. iii. 14. § 2; Pomp. Mela, ii. 3. § 12; Plin. iii. 26), a town and harbour of Illyricum, not far from Apollonia and the mouth of the Aous. Legend ascribes its foundation to the Euboeans on their return from Troy (Scymn. l. c.); and Apollonias (Argon. iv. 1216) speaks of the arrival of a party of Colchians at this port; and thas Pliny (l.c.) calls it a Colchian colony. Oricum is known in history as a haven frequented by the Romans in their communications with Greece, from its being very conveniently situated for the passage from Brundusium and Hydruntum. B. c. 214, the town was taken by Philip V. of Macedonia; but it afterwards fell into the bands of the Romans and M. Valerius Laevinus, who commanded at Brundusium, with a single legion and a small fleet. (Lir. xxiv. 40.) After the campaign of B. c. 167, Aemilius Panlus embarked his victorious troops from Oricum for Italy. (Plut. Aemil. Paul. 29.) Caesar, nfter he lad disembarked his troops at Paiaestr (Lucan. iv. 460; comp. Caes. B. C. iii. 6, where the reading Pharsalus or Pharsalia, is a mistake or corruption of the MSS.), or the sheltered beach of Palasa, surrounded by the dangerous promontories of the Ceraunian mountains, within one day of his landing marched to Oricum, where a squadron of the Pompeian fleet was stationed. (Caes. B. C. iii. 11 ; Appian, B. C. ii. 54.) The Oricii declared their unwillingness to resist the Roman consul; and Torquatus, the governor, delivered up the keys of the fortress to Caesar. The small fleet in which he had brought his forces over was laid up at Oricum, where the harbour was blocked up by sinking a ressel at its mouth. Cnaeus, the son of Pompeius, made a spirited attack on this stronghold, and, cutting out four of the vessels, bunt the rest. (Caes. B. C. iii. 40.) It continued as an important haven on the Adriatic. (Hor. Carm. iii. 7. 5; Propert. Eleg. i. 8, 20; Lacan, iii. 187.) The
name of its harbour was Panormus (Mávophos, Strab. vii. p. 316), now Porto Raguséo ; while the Celtidids (Ké $\lambda u \not{ }^{2} n o s$, Ptol. iii. 13. §§ 2, 5) is identified with the river of Dulodidhes. It would seem from Virgil (Aen. x. 136) that Oricum was famous for its turpentine, while Nicander (Ther. 516) alludes to its boxwood. The town was restored by the munificence of Herodes Atticus. (Philootr. Her. Att. 5.) To the E. of the mouth of the river of Dukhdides is a succession of lagoons, in the midst of which lies Oricum, on the desert site now called Erikho, occupied (in 1818) only by two or three huts among the vestiges of an aqueduct. (Smyth, Medicerrameam, p. 46.) The present name ( $1 \in \rho \cdot \chi^{\omega}$, Anna Comn. xiii. p. 389) is accented on the last syllable, as in the ancient word, and E substituted for O by a common dialectic change. (Pouqueville, Voyage, vol. i. p. 264 ; Leake, North. Greece, vol. i. Pp. 36, 90.) A coin of Oricus has for type a head of Apollo (Eckhel, vol. ii. p. 16\%.) [E. B. J.]

ORIGENOMESCI. [ARGENOMESCI.]
ORIGIACLM ('Opryaxov). Ptolemy (ii. 9. § 7) makes this town the chief place of the Atribatii or Atrebates in Belgica. There is nothing that fixes the position of Origiacum except its resernblance to the name Orchies, which Cluver suggested. Orchies is between Douay and Tournay, and appears to be beyond the limits of the Atrebates, whose chief town in Caesar's time was Nemetacum (Arras).
[G. L.]
ORINGIS. [Aurinx.]
ORIPPO, a town of Hispania Baetica, on the road from Gades to Hispalis. (Plin. iii. 1. s. 3; Jtin. Ant. p 410.) Commonly identified with Villa de dos Hermanios, though some have mentioned Alcala de Guadaira and Torre de los Herberos. Ancient cuins of the place have a bunch of grapes, showing that the neighbourhood was rich in wines, a character which it still preserves. (Caro, Ant. iii. 20; Florez, Esp. Sagr. ix. p. 111, Med. ii. p. 512 ; Mionnet, i. p. 23, Suppl. i. p. 39 ; Sestini, Med. p. 77.)
[T. H. D.]

## COIS OF ORIPPO

ORITAE (几peital), a people inhabiting the seaconst of Gedrosia, with whom Alexander fell in on his march from the Indus to Persia. (Arrian, vi. 21, 22, 24, \&c.) Their territory appears to have been bounded on the east by the Arabis, and on the west by a mountain spur which reached the sea at Cape Moran. (Vincent, Voy. of Nearchus, i. p. 217.) There is considerable variation in the manner in which their names are written in different authorities: thus they appear as Oritae in Arrian (Indic. 23, Exped Alex. vi. 22); 'תpiтa, in Strabo (xv. p. 720), Dionysius Perieg. (v. 1096), Platarch (Alex. c. 66), and Stephanus B.; as Ori in Arrian (vi. 28) and Pling (vi. 23. § 26); and Horitae un Curtius (ix. 10.6); yet there can be po doabt that they are one and the same people. Arrian and Strabo have described them at some
length. According to the former, they were an Indian nation (vi. 21 ; cf. Diod. xvii. 105), who wore the same arms and dress as those people, but differed firm them in manners and institutions (Ind. c. 23). According to the latter they were a race living under their own laws (iv. p. 720), and armed with javelins hardened at the point by fire and puisoned (xr. p. 723). In another place Arrian appears to have given the true Indians to the river Arabis (or Purali), the eastern boundary of the Oritae (Indic. c. 22) ; and the same view is taken by Pliny (vii. 2). Pliny calls them "Ichthyophagi Oritae" (vi. 23. 8. 25); Curtius "Indi maritimi" (ix. 10. 8). It is probable that the true form of the name was Horitae, as the Nubian geographer places a town called Hair on the route to Firaboes in Mekran. (Comp. D'Anville, Eclair. cissements, Sc. p. 42; Edrisi, Geog. Nub. p. 58.)

ORIUNDUS. [Barbara.]
ORME'NIUM ('Opuéviov), a town of Thessaly, mentioned in the Catalogue of Ships along with Hypereia and Asterium as belonging to Earypylus (Hom. Il. ii. 734). It was said to have been founded by Ormenus, the grandson of Aeolus, and was the birthplace of Phoenix. (Demetr. Scepsius, ap. Strab. ix. p. 438, seq.) Strabo identifies this town with a place in Magnesia named Orminium, situated at the foot of Mt. Pelion, at the distance of $2{ }^{7}$ stadia from Demetrias, on the road passing through Iolcus, which was 7 stadia from Demetrias and 20 from Orminium. (Strab. l. c.) Leake, however, observes that the Ormenium of Homer can hardly have been the same as the Orminium of Strabo, since it appears from the situation of Asterium that Earypylus ruled over the plains of Thessaliotis, which are watered by the Apidanus and Enipens. (Leake, Northern Greece, vol. iv. p. 434, seq.)

ORMINIUM ('Opuivioy 8pos), a mountain in the north-enstern part of Bithynia, terminating in Capo Posidium (Piol. v. 1. §§10, 11). Ainsworth snpposes it to be the same as the mountain now called Derne Jailaf.
[L.S.]
O'RNEAE ('Opveas: Eth. 'Opvedrys), a town in the Argeia, mentioned in the lliad (ii 571), which is said to have derived its name from Orneus, the son of Erechtheus. Orneae retained its ancient Cynurian inhabitants, when Argos was conquered by the Dorians. It continued independent of Argos for a long time; but it was finally conquered by the Argires, who removed the Omeatae to their own city. (Paus. ii. 25. § 6, viii. 27. § 1.) Thucydides mentions (v. 67) the Orneatae and Cleonaei as allies ( $\sigma$ úpuayou) of the Argives in B. C. 41s; and the same historian relates (vi. 7) that Orneac was destroyed by the Argives in 8. c. 416. (Comp. Diod. xii. 81.) It might therefore be inferred that the destruction of Orneac by the Argives in B. c. 416 is the event referred to by Pausunias. But Miller concludes from a well-known passage of Herodotus (viii. 73) that Orneac had been conquered by Argos long before; that its inhabitants were reduced to the condition of Perioeci; and that all the Perineci in the Argeis were called Orneatae from this place. But the Orneatse mentioned by Thucydides could not have been Perioeci, since they are called allies; and the passage of Herodotus does not require, and in fact hardly admits of, Müller's interpretation. "The Cynurians," says Herudotus (l. c.), "have become Doricized by the Argives and by time, being Orneatae and Perioeci." These words would seem

ORNI.
clearly to mean that, while the other Crnurians became Perioeci, the Orneatae continued independent, -an interpretation which is in accordance with the account of Thucydides. (Muiller, Aeginetica, p. 48, seq., Dorians, iii. 4. § 2: Arnold, ad Thuc. v. 67.)

With respect to the site of Orneae we learn from Pausanias (v. 25. §5) that it was situated on the confines of Phliasia and Sicyonia, at the distance of 120 stadia from Argos, being 60 stadia from Lyrceia, which was also 60 stadia from Argos. Strabo (viii. p. 382) says that Orneae was situated on a river of the same name above the plain of the Sicyonians; for the other passage of Strabo (viii. p. 578), which states that Orneae lay between Corinth and Sicyon, and that it was not mentioned by Homer, is probably an interpolation. (See Kramer's Strabo, vol. ii. p. 186.) Orneae stood on the northern of the two roads, which led from Argos to Mantineia. This northern road was called Climax, and followed the course of the Inachus. [Argos, p. 201.] Ross supposes Orneae to have been situated on the river, which flows from the south by the village of Lionti and which helps to form the western arm of the Asopus. Leake places it too far to the east on the direct romd from Argos to Phlius. (Ross, Reisen im Peloponnes, p. 135; comp. Leake, Morea, voL. ii. p. 351, vol. iii. p. 414.)

ORNI ("Opvor), a town of Thrace mentioned only by Hierocles (p. 632).
[T. H. D.]
ORNIACI ('Opviakó, Ptol. ii. 6. § 32), a tribe of the Astares in Hispania Tarraconensis. Their chief town was Intercatia.
[T. H.D.]
ORNI'THON POLIS ('Opvi $\theta \omega \nu \pi \delta \lambda(s)$, a city of the Sidomians, according to Scylax (ap. Reland, Paluest. p. 431). It is placed more exactly by Strabo between Tyre and Sidon (p. 758). Pliny mentions together "Sarepta et Ornithon oppida et Sidon" (r. 19.) Reland suggests that it may be "Tarnegola saperior," which the Talnud places above Caesarea; Tarnegola in Hebrew being equivalent to the Gallus of Latin $=\check{\delta} \rho \nu i \theta \alpha$ in Greek. (Palaest. p. 916.) Dr. Lubinson, following Pococke, conjectures that it may be represented by an ancient site on the shore of the Phoenician plain, where he noticed "the traces of a former site called 'Adlin, consisting of confused heaps of stones, with several old wells." There are also "many sepulchral grottoes, hewn out of the hard limestone rock," in the precipitous base of the projecting mountain which here approaches the coast,-furnishing clear indications of an ancient city in the vicinity. ( Bib. Res. vol. iii. p. 411, and note 2; Pococke, Observations, vol. ii. p. 84.)
[G.W.]
OROANDA, a town in the mountains of Pisidia, near the south-western shore of lake Trogitis (Lir. Ixxviii. 37, 39; Plin. v. 24). From this town the whole district derired the name of Oroandicus tractus, the inhabitants of which, called Oroandenses or Oroandici ('Opoavסikol or 'Opoandeis), pussessed, besides the chief town Oroanda, also Misthia and Раppa (Liv. xxxviii. 18, 19; Polyb. xxii. 25; Ptol. v. 4. §12). Hamilton (Researches, i. p. 478) believes that the ruins he found on the slope of a hill near lake Egerdir, may mark the site of Oroanda: but it would seem that its remains must be looked for a little further east.
[L. S.]
OROATIS. [ARosis.]
ORO'BIAE ('Opf6at), a town on the western cuast of Eubrea, between Aedepsus and Aegre, which possessed an oracle of Apollo Selinuntius. (Strab. x. p. 445 comp. ix. p. 405.) The town
was partly destroyed by an earthquake and an inundation of the sea in b.c. 426. (Thuc. iii. 89.) This town seems to be the one mentioned by Stephanus under the name of Orope ('Opónt), who describes it as "a city of Euboea, having a very renowned temple of Apollo." (Steph. B. s. v. Kopónๆ.) There are some remains of the walls of Ornbiae at Roviés, which word is only a corraption of the ancient name. (Leake, Northern Greece vol. ii. p. 1;6.)

ORO'BII, a tribe of Cisalpine Ganls, mentioned only by Pliny (iii. 17. 8. 21), upon the authority of Cato, who said that Bergomum and Comum had been founded by them, as well as Forum Licinii, by which be must mean the Gaulish town that preceded the Roman settlement of that name. Their oricinal abode, according to Cato, was at a place called Barra, situated high up in the mountains; but he professed himself anable to point out their origin and descent. The statement that they were a Greek people, advanced by Cornelius Alexander (ap. Plin. l. c.), is evidently a merc inference from the name, which was probably corrupted or distorted with that very view. [E. H. B.]

OROBIS, or ORBIS ("Opobis), a river of Narbonensis in Gallia. Ptolemy (ii. 10. § 2) places the outlet of the Orobis between the mouth of the Atas (Aude) and the Arauris (Herault), which shows that it is the Orbe. In Strabo's text (iv. p. 182) it is written Obris, which Groskurd unnecessarily corrects, for Orbis and Obris were probably used indifferently, and it seems that Obris is the original reading in Mela (ii. 5, ed. J. Vossius, note). Mela says that the Orbis flows past Baeterrae (Beiziers), and Strabo also places Baeterrae on the Orbis. In the Ora Maritima (v. 590) the name is Orobis. The Orbe rises in the Cévennes in the north-west part of the department of Hérault, and has a very winding course in the upper part. It is above 60 miles long.
[G. L.]
OROLAUNUM, in the north part of Gallia, is placed by the Antonine Itin. on a road from I)urocortorum (Reims) to Trier. It is placed halfway between Epoissum (Iptsch) and Andethanna, which D'Anville supposes to be Epternach by which he means Echternach : others place Andethanua about Anwen. The name Arlon clearly represents Orolaunuin, where Roman remains, as it is said, have been found. Arlon is in the duchy of Luxemburg.
[G. L.]
OROMARSACI, a penple of North Gallia, whose position is thus described by Pliny (iv. c. 17), who is proceeding in his description from the Schelde southwards:-"Deinde Menapii, Morini, Oromansaci juncto pago qui Gessoriacus vocatar." In Harduin's text the name is written Oromansaci, and yet he says that the MSS. have Oromarsaci. The name is otherwise unknown. D'Anville supposes that the name Oro-marsaci is represented by the name of a tract of country between Calais and Gravelines which is Mark or Merk, and borders on the Birulonnois, in which the pagus Gersoriacus was. [Gessoriacum.] This is mere guess, but it is all that we can have.
[G.' L.]
OLONTES (Opoutns), the most renowned river of Syria, aseed by the poet Juvenal for the country, " in Tiberim defluxit Orontes." (Juv. iii.) It. original name, according to Strabo, was Typhon (Tupúv), and his account both of its earlier and later names, follows his description of Antioch. "The river Orontes Hluws near the city. This
river rising in Coele-Syria, then sinking beneath the earth, again issues forth, and, passing through the district of Apamea to Antiocheia, after approaching the city, runs off to the sea towards Seleuceia. It received its name from one Orontes, who built a bridge over it, having been formerly called Typhon, from a mythic dragon, who being struck with lightning, fled in quest of a hidingplace, and after marking out the course of the stream with its trail, plunged into the earth, from whence forthwith issued the fountain." He places its embouchure 40 stadia from Seleuceia (xvi. p. 750). He elsewhere places the source of the river more definitely near to Libanus and the Paradise, and the Egyptian wall, by the country of Apamea (p. 756). Its sources have been visited and described in later times by Mr. Barker in 1835. The river " is called by the people ELL'A'si, 'the rebel,'" from its refisal to water the fields without the compulsion of water-wheels, according to Abulfeds (Tab. Syr. p. 149), but according to Mr. Barker, " from its occasional violence and windings, daring a course of about 200 miles in a northerly direction, passing through Hems and Hamah, and finally discharging itself into the sea at Sunouidiah near Antioch." (Journal of the Geog. Soc. vol. vii. p. 99.) The most remote of these sources is only a few miles north of Baalbek, near a village called Labnceh, " at the foot of the range of Antilikanus on the top of a hillock, near which passes a small stream, which has its source in the adjoining mountains, and after flowing for several hours through the plain, falls into the basin from which springs the Orontes." These fountains are about 12 hours north of Labweh, near the village Kurnul, where is a remarkable monument, "square, and solid, terminating above in a pyramid from 60 to 70 feet high. On the four sides bunting scenes are sculptured in relief, of which the drawing borders on the grotesque." (Robinson, Journal of Geog. Soc. vol. xxiv. p. 32.) There can be no difficulty in connecting this monument with the Paradise or hunting park mentioned by Strabo near the source of the Orontes, similar, no doubt, in origin and character, to those with which the narrative of Xenophon abounds, within the territories of the Persian monarchs. The rise and course of this river and its various tributaries has been detailed by Col. Chesney (Expedition, vol. i. pp. 394-398), and the extreme beauty of its lower course between Antioch and the sea has been described in glowing terms by Captains Irby and Mangles. (Trarels, pp. 225, 226.)
[G. W.]
ORONTES (Opovtns, Ptol. vi. 2. § 4), a mountain chain of Media, which extended in a south-east direction, passing the Ecbatann of Greater Media (Hamadan). It must be considered as an ontlying portion of the still greater chain of the Zagros. It is now called the Erwend or Elwend. It is prohable that the name is preserved in the celebrated mountain of Kurdistán, now called Rorríndiz. In Armenian geography this mountain district is called Erocantuni; which is evidently connected with the ancient Orontes. (St. Martin, Armenia, vol. ii. pp. 363, 429.)
[V.]
ORONTES, a people of ancient Assyria, described by Pliny as being to the east of Gaugamela (vi. 26. s. 30). There can be no doubt that these are the present Rowindi, a tribe living, as in ancient times, almut the great mountain Rowcindiz, in Kurdistán, and doubtless comected with the Orontes of Ptoleny
(i. 2. § 4). They derive their name from Erocend, a pure old l'ersian root, which was usually Hellenized into Orodes or Orontes. (Rawlinson, Journ. of Geog. Soc. x. p. 73.)
[V.]
ORO'PUS ( $\delta$ ' $\Omega \rho \omega \pi \delta s$, rarely $\eta^{\prime}$ ' $\Omega \rho \omega \pi \delta \delta$, Paus. vii. $11 . \S 4$; comp. Steph. B. s.v.: Eth. 'Spántos, and according to Steph B. ' $\Omega$ poostés), a town on the borders of Attica and Boeotia, and the capital of a district, called after it Oropin ( $\dot{\eta}$ ' $\Omega \rho \omega \pi i a$. .) This district is a maritime plain, through which the Asopus flows into the sea, and extends for 5 miles along the shore. It is separated from the inland plain of Tanagra by some hills, which are a continuation of the principal Chain of the Diacrian mountains. Uropus was originally a town of Boeotia; and, from its prsition in the maritime plain of the Asopus, it naturally belonged to that country. (Paas. i. 34. § 1.) It was, however, a frequent subject of dispute between the Athenians and Boeotians; and the former people obtained possession of it long before the Peloponnesian War. It continued in their hands till b. c. 412, when the Boeotians recovered possession of it. (Thuc. viii. 60.) A few years afterwards (B. c. 402) the Boeotians, in consequence of a sedition of the Oropii, removed the town 7 stadia from the sea. (Diod. xiv. 17.) Daring the next 60 years the town was alternately in the hands of the Athenians and Boeotians (comp. Xen. Hell. vii. 4. § $1, \& \mathrm{c}$.), till at length Philip after the battle of Chaeroncia gave it to the Athenians. (Paus. i. 34. § 1.) In b. c. 318 the Oropians recovered their liberty. (Diod. xviii. 56.) In в. c. 312 Cassander obtained possession of the city; but Polemon, the general of Antigonus, soon afterwards expelled the Macedonian garrison, and handed over the city to the Boeotians (Diod. xix. 77.) It has been conclnded from a passage of Dicaearchus (p. 11, ed. Hudson) that Oropus continued to belong to Thebes in the next century; but the expression oikia Oŋbī̀ is corrupt, and no safe conclusion can therefore be drawn from the passage. Leake proposes to read
 Müller, the latest editor of Dicaearchus, reads av-
 Athenian Boeotians, an epithet which he also applies to the inhabitants of Plataeae. Strabo also describes Oropus as a Boeotian town (ix. p. 404); but Livy (x|v. 27), Pausanias (l. c.), and Pliny (iv. 7. e. 11) place it in Attica. How long the Oropii inhabited the inland city is uncertain. Pausanias expressly says that Oropus was upon the sea ( $\langle\pi l \mathfrak{N a \lambda \alpha} \sigma \sigma \eta s$, i. 34. § 1); and the inhabitants had probably retumed to their old town long befure his time.

Although Oropus was so frequently in the hands of the Atbenians, its name is never found annong the Athenian demi. Its territory, however, if not the town itself, appears to have been made an Attic demus under the name of Graea ( $\boldsymbol{\eta}$ Г $\Gamma$ aia). In Homer Oropus does not occur, but Graca is mentioned among the Boeotian towns (IL. ii. 498); and this ancient name appears to have been revived by the Athenians as the official title of Oropus. Aristotle said that Oropus was called Graea in his time (ap. Steph. B. s. v. $\mathrm{S}_{\text {. }}$ poonos); and accordingly we find in an inscription, belonging to this period, the 「 $\rho a n$ ys ( $\Gamma$ pacís) mentioned as a demus of the tribe Pandionis (Ross \& Meier, Iie Demen von Attika, p. 6, seq.) In the passage of Thucydides (ii. 2:3) rapiontes $\delta \boldsymbol{\xi}$

 the existing MSS. have Пtipaikip, but Stephants,

and other modern editors have received into the text. It is, however, right to observe that the district of Oropus was frequently designated as the border country or country over the burder ( $\tau \hat{\eta} s \pi \in \rho a y ~ \eta \hat{\eta} s$, Thuc. iii. 91).

According to Dicaearchus (l.c.) the Oropians were notorious for their grasping exactions, levied upon all imports into their country, and were for this reason eatirised by Xenon, a comic poet:-

##  <br> 

The position of Oropus is thus defined by Strabo. "The beginning [of Boeotia] is Oropas, and the sacred harbour, which they call Delphinium, opposite to which is old Eretria in Euboea, distant 60 stadia. After Delphinium is Oropus at the distance of 20 stadia, opposite to which is the present Eretria, distant 40 stadia. Then comes Delium." (Strab. ix. p. 403.) The modern village of Oropó stands at the distance of nearly two miles from the sea, on the right bank of the Vourieni, anciently the Asopus: it contains some fragments of ancient buildings and sepulchral stones. There are also Hellenic remsins at the $\Sigma x d \lambda a$ or wharf upon the bay, from which persons usually embark for Euboes: this place is also called ds toùs árious d dooftodous, from a ruined church dedicated to the "Holy Apostles." Leake originally placed Oropus at Oropó and Delphinium at Skiila; but in the second edition of his Demi he leaves the position of Oropus doubtful. It seems, however, most probable that Oropus originally stood upon the coast, and was removed inland only for a short time. In the Peloponnesian War Thucydides speaks of sailing to and anchoring at Oropus (iii. 91, viii. 95); and Pausanias, as we have already seen, expressly states that Oropus was upon the coast. Hence there can be little doubt that Skila is the site of Oropus, and that Oropo is the inland site which the Oropians occupied only for a time. It is true that the distance of Oropó from the sea is more than double the 7 stadia assigned by Diodorus, bat it is possible that he may have originally written 17 stadia. If Oropus stood at Skaila, Delphinium must have been more to the eastward nearer the confines of Attica.

In the territory of Oropus was the celebrated temple of the hero Amphiaraus. According to Pausanias (i. 34. §1) it was 12 stadia distant from Oropus. Strabo places it in the district of Psophis, which stood between Rhamnus and Oropus, and which was subsequently an Attic demus (ix. p. 399). Lisy calls it the temple of Amphilochus (x|v. 27), who, we know from Pausanias, was worshipped conjointly with Amphiaraus. Livy further describes it as a place rendered agreeable by fountains and rivers; which leads one to look for it at one of two torrents which join the sea between Skiala and Kálamo, which is probably the ancient Psophis. The mouth of one of these torrents is distant abont a mile and a half from Skila; at balf a mile from the mouth are some remains of antiquity. The other torrent is about three miles further to the eastward; on which, at a mile above the plain, are remains of ancient walls. This place, which is near Kálamo, is called Mavro-Dhilissi, the epithet Mavro (black) distinguishing it from Dhilissi, the site of Delium. The distance of tho Hellenic remains on the firstmentioned torrent agree with the 12 stadia of Pausanias ; but, on the other hand, inscriptions have been found at Marro-Dhilissi and Kálumo, in
which the name of Amphiaraus occars. Dicaearchus (L.c.) describes the road from Athens to Oropus
 the temple of Amphiaraus. Wordsworth very in-
 $\delta a \phi v i \delta \omega \nu$, observing that it is not probable that a topographer would have described a route of about 30 miles, which is the distance from Athens to Oropus, by telling his readers that it passed through "bay-trees and a temple." Although this reading has been rejected by Leake, it is admitted into the text of Dicaearchus by C. Muiller. (Leake, Northern Greece, vol. ii. p. 444, seq., Demi of Altica, p. 112, seq.; Finlay, Remarks on the Topography of Oropia and Diacria, in Transactions of the Royal Society of Literature, 1839, p. 396, seq. ; Wordsworth, Athens and Attica, p. 22, seq.)

OROSINES, a river of Thrace, flowing into the Euxine. (Plin. iv. 18.)
[T. H. D.]
ORO'SPEDA ( $\dot{\eta}$ 'Op $\sigma \sigma \pi \in \delta a$, Strab. iii. p. 161, seq.), called by Ptolemy Ortospeda ('Oprdoreda, ii. 6. § 21), a mountain chain in Hispania Tarraconensis, the direction of which is described under Hispania [Vol. I. p. 1086]. It is only necessary to add here the following particulars. It is the highest inland mountain of $\operatorname{Spsin}(11,000$ feet $)$, at first very rugged and bald, but becoming wooded as it approaches the sea at Calpe. It abounds in silver mines, whence we find part of it called Mons Argentarius. [Argentarius Mons.] It is the present chain of Sierra del Mundo, as far as Sierra de Alcarez and Sierra de Ronda.
[T. H. D.]
O'RREA. 1. (Opṕ̧́a, Ptol. ii. 3. § 14), a town of the Venicones, on the E. coast of Britannia Barbara. Horsley (Brit. Rom. p. 373) identifies it with Orrock, on the little river Orewater in Fifoshire.
2. A town in Moesia Superior (Ptol. iii. 9. § 5). [T. H.D.]

ORSA, a mountain with a bay, on the east const of Arabia, without the straits of the Persian Gulf. (Pliny, vi. 28. s. 32.) Mr. Forster explains the name to mean literally in Arabic "the transverse mountain." He adds: "Its position is effectually determined from the East India Company's Chart, where, about a third of a degree south of Dabs, a great mountain, at right angles with the mountains of Lima, runs right down to the sea, while at its base lies the port of Chorfakan." (Geog. of Arabia, vol. ii. p. 228.)
[G. W.]
ORSINUS, a tributary of the Maeander, flowing in a north-western direction, and discharging itwelf into the main river a few miles below Antioch (Plin. v. 29). As some MSS. of Pliny have Mossynus, and as Hierocles (p. 665) and other ecclesiastical writers (Notit. Episc. Phryg. Pac. p. 27) speak of a town Mosyna in those parts, the river was probably called Mosynus. Its modern name is said to be Hagisik, that is the river described by Col. Leake (Asia Minor, p. 249) as descending from Gheira and Karajasus.
[L. S.]
ORTACEA, a small stream of Elymais, which Pliny states flowed into the Persian Gulf; its mouths were blocked up and rendered unfit for narigation by the mud it brought down (vi. 27. 8. 31). [V.] ORTAGUREA. [MAronkia.]
ORTHAGO'RIA ('Opoaropla), a town of Macedonia, of which coins are extant. Pliny (iv. 11. s. 18) says that Ortagurea was the ancient name of Maroneia ; but we learn from an ancient geographer (Hudson, Geogr. Min. vol. iv. p. 42) that Ortha
goria was the ancient name of Stageira，to which accordingly the coins are assigned．（Eckbel，vol．ii． p．73．）

COIN OF ORTHAGORLA．
ORTHE（＇O $\rho \theta \eta$ ），a town of Perrhaebia in Thes－ saly，mentioned by Homer（Il．ii．739），was said by Strabo（ix．p．440）to have become the acropolis of Phalanna．［Phalanna．］It occurs，however，in the lists of Pliny（iv．9．s．16）as a distinct town from Phalanna．

ORTHO＇SIA（Ope⿴囗⿱一一 tioned by Strabo and Ptolemy，near the river Eleu－ therus，contigoons to Simyra，between it and Tri－ poli．（Strab．xvi．p．753；Ptol．v．15．§ 4．）The former makes it the northern extremity of Phoe－ nice，Pelusium being the southern（p．756），a distance，according to Artemidorus，of 3650 stadia （p．760）．It was 1130 stadia south of the Orontes． （Ib．）Ptolemy places both Simyra and Orthosia south of the Eleutherus；but Strabo to the north of it ：＂agreeable whereunto，＂writes Shaw，＂we still find，upon the north banks of this river（Nahr－el－ Berd），the ruins of a considerable city in a district named Ortosa．In Peutinger＇s table，also，Or－ thosia is placed 30 miles south of Antaradus and 12 miles north of Tripoli．The situation of it is like－ wise further illustrated by a medal of Antoninus Pius，struck at Orthosia，upon the reverse of which we have the goddess Astarte treading upon a river； for this city was built upon a rising ground，on the northern banks of the river，within half a furlong of the sea：and as the rugged eminences of Mount Libanus lie at a small distance，in a parallel with the shore，Orthosia must have been a place of the greatest importance，as it would have hereby the entire command of the road（the only one there is） betwixt Phoenice and the maritime parts of Syria．＂ （Travels，p．270，271．）The difficulties and dis－ crepancies of ancient authors are well stated by Pococke．（Observations，vol．ii．pp．204，205，notes d．e．）He assumes the Nahr Kibeer for the Eleutherns，and places Orthosia on the river Accar， between Nahr Kibeer and El－Berd．（Maundrell， Journey，March 8．）
［G．W．］
ORTHO＇SIA（＇Op $\theta \omega \sigma$ ia $)$ ，a town of Caria，not far from Alabanda，on the left bank of the Maeander， and apparently on or near a hill of the same name （Strab．xiv．p．650；Plin．xxxvii．25）．Near this town the Rhodians gained a victory over the Carians （Polyb．xxx．5；Liv．xlv．25；comp．Ptol．v．2．§19； Plin．v．29，xxxvii．9，25；Hierocl．688）．The an－ cient remains near Karpusli probably mark the site of Orthosia（Leake，Asia Minor，p．234）；though others，regarding them as belonging to Alabanda， identify it with Dsheni－sheer．
［L．S．］
ORTHU＇RA（＇OpOoupa，Ptol．vii．1．§ 91，viii． 27．§ 18），a town on the eastern side of the penin－ sula of Hindostán，described by Ptolemy as the Palace of Sornax．It was in the district of the Soretes， and has been identified，conjecturally，by Forbiger with the present Utatur or Utacour．

ORTO＇NA（＂O $\rho \tau \omega \nu$ ）．1．An ancient city of

Latium，situated on the confines of the Aequian territory．It is twice mentioned during the wars of the Romans with the latter people：first，in в．c．481， when we are distinctly told that it was a Latin city， which was besieged and taken by the Aequians （Liv．ii．43；Dionys．viii．91）；and again in в．c． 457，when the Aequians，by a sudden attack，took Corbio，and，after putting to the sword the Roman garrison there，made themselves masters of Ortona also；but the consul Horatius engaged and defeated them on Mount Algidus，and after driving them from that position，recovered possession both of Corbio and Ortona．（Liv．iii．30；Dionys．x．26．） From these accounts it seems clear that Ortona was situated somewhere in the neighbourhood of Corbio and Mount Algidus；but we have no more precise clue to its position．No mention of it is found in later times，and it probably ceased to exist．The name is much corrupted in both the passages of Dionysius；in the first of which it is written＇Opoús， but the Vatican MS．has＇Opôva for＇O $\rho \tau \bar{\omega} \nu a$ ：in the second it is written Bt $\rho \tau \hat{\omega} v a$ ．It is very pro－ bable that the Hortenses，a people mentioned by Pliny（iii．5．s．9）among the＂populi Albenses，＂are the inhabitants of Ortona；and it is possible，as suggested by Niebuhr，that the фортiveiol（a name otherwise wholly unknown），who are found in Diony－ sius＇s list of the thirty cities of the Latin League，may be also the same people．（Dionys．v． 61 ；Niebuhr， vol．ii．p．18，note．）The sites which have been assigned to Ortona are wholly conjectural．

2．（Ortona a Mare），at considerable town of the Frentani，situated on the coast of the Adriatic，about midway between the mouth of the Aternus（Pes－ cara）and that of the Sagrus（Sangro）．Strabo tells us that it was the principal port of the Fren－ $\operatorname{tani}$（v．p．242）．He erroneously places it S．of the Sagrus；but the passage is evidently corrupt，as is one in which he speaks of Ortona or Histonium（for the reading is uncertain）as a resort of pirates． （Strab．l．c．，and Kramer ad loc．）Ptolemy correctly places it between the Sagrus and the Aternus； though he erroneously assigns it to the Peligni． Pliny mentions it among the municipal towns of the Frentani；and there seems no doubt that it was one of the principal places possessed by that people． （Plin．iii．12．s． 17 ；Ptol．iii．1．§ 19．）Some in－ scriptions have been published in which it bears the title of a colony，but these are of dubious anthen－ ticity（see Zumpt，de Colon．p．358，note）：it is not mentioned as such in the Liber Coloniarum．The Itineraries place it on the road from the mouth of the Aternus to Anxanum（Lanciano）．The name is still retained by the modern town of Ortona ；and antiqui－ ties found on the spot leave no donbt that it occupies the same site with the ancient one．（Itin．Ant．p．313； Tab．Peut．；Romanelli，vol．iii．p．67．）［E．H．B．］

ORTOPLA（ ${ }^{\circ} \mathrm{O} \rho \tau о \pi \lambda a$, Ptol．ii．17．§ 3；Orto－ pula，Plin．iii．25），a town of the Liburni，identi－ fied with Carlopago or Carlobago，in the district of the Morlacca，where several Roman remains have been found．（Neigebaur，Die Sud－Slaven，pp．225， 228．）
［E．B．J．］
ORTOSPANA（＇O $\rho \boldsymbol{\sigma} \delta \sigma \pi a v a$, Strab．xi．p．514，
 § 5 ；Amm．Marc．xxiii．6），an ancient city of Bac－ triana，which there is good reason for supposing is identical with the modern town of Kábul．The name is written variously in ancient authors Orto－ spana or Ortospanum；the latter is the form adopted by Pliny（vi．17．s．21）．Three principal roads

K K

OSCI．
lending through Bactriana met at this place；hence the notice in Strabo（l．c．）of the $\hat{\eta}$ is Bdкcpow tpíodos．Groskurd has（as appears to us），on no sufficient ground，identified Ortospana with the pre－ sent Kandahar．If the reading of some of the Misi． of Ptolemy be correct，Kábul may be a corruption of Kdboupa．

It is worthy of note，that in the earlier editions of Ptolemy（vi．18．§ 3）mention is made of a people whom he calls Kabonitas；in the latest of Nobbe（Tauchnitz，1843）the name is changed to Booiical．It is not improbable that Ptoleny here is speaking of Kiibul，as Lassen has observed． （Ind．Alterthums．vol．i．p．29．）The three roads may be，the pass by Bamiin，that by the IIindi－ Küsh．and that from Anderáb to Khawar．［V．］

ORTOSPEDA．［Orospeda］．
ORTY＇GIA．［Delos．］
ORTY＇GIA．［Syraclse．］
ORL＇DII（ $\tau$ dे＇Opoúsia ŏ $\rho \eta$ ，Ptol．vii．1．§§ 25， 36），a chain of mountains in India intra Gangem， which were，according to Ptolemy，the source of the river Tynna（now Pennais）．It is difficult now to identify them with certainty，but Forbiger conjec－ tures that they may be represented by the present Nella－Mella．

ORYX．［Arcadia，Vol．I．p．193，a．］
OSCA．1．（＂Oбка，Ptol．ii．6．§ 68），a town of the Ilergetes in the N．of Hispania Tarraconensis， on the road from Tarraco and Ilerda to Caesar－ augusta（Itin．Ant．pp．391，451），and under the jurisdiction of the last－named city．Pliny alone（iii． 3．s．4）places the Oscenses in Vescitania，a dis－ trict mentioned nowhere else．It was a Roman colony，and had a mint．We learn from Plutarch （Sert．c．14）that it was a large town，and the place where Sertorius died．It is probably the town called Ileoscan（＇Lौeббка⿱亠䒑日）by Strabo，in an apparently corrupt passage（iii．p．161；v．Ukert，vol．ii．pt．l． p．451．）It seems to have possessed silver mines （Liv．zxxiv．10，46，xl．43），unless the＂argentum Oscense＂here mentioned merely refers to the minted silver of the town．Florez，however（Med．ii．520）， bas pointed out the impussibility of one place sup－ plying such vast quantities of minted silver as we find recorded in ancient writers under the terms ＂argentum Oscense，＂＂signatum Oscense；＂and is of opinion that Oscense in these phrases means Spanish，by a corruption from the national name， Eus－cara．（Cf．Caes．B．C．i．60；Vell．Pat．ii． 30．）It is the modern Huesca in Arragon．（Florez， Med．ii．p．513；Sestini，p．176；Mionnet，i．p．46， Suppl．i．p． 92 ；Murray＇s Handbook of Spain， p．448．）

2．A town of the Turdetani in Hispania Baetica， which some have identified with Huescar，but which Ukert（vol．ii．pt．1．p．370）thinks must be sought to the W．of that place．（Ptol．ii．4．§ 12； Plin．ii．1．s．3．）The pretended coins of this town are not genuine．（Florez，Med．l．c．；Sestini，p．78； Mionnet，i．p．43，Suppl．i．p．40；Sestini，p．78； Ukert，h．c．）
［T．H．D．］

COLN OF OSCA．

OSCELA．［Lepontil．］
OSCI or OPICI（in Groek always＂OTucos：the original form of the name was Opscces，which was still used by Ennius，ap．Fest．s．v．p．198），a nation of Central Italy，who at a very early period appear to have been spread over a considerable part of the peninsula．So far as we can ascertain they were the original occupants，at the earliest time of which we have anything like a definite account．of the central part of Italy，from Campania and the borders of Latium to the Adriatic；while on the S．they ad－ joined the Oenotrians，whom there is good reason to regard as a Pelasgic tribe．Throughout this extent they were subsequently conquered and reduced to subjection by tribes called Sabines or Sabellians，who issued from the lofty mountain tracts of the Apen－ nines N ．of the territory then occupied by the Oscans． The relation between the Sabellians and the Oscans is very obscure ；but it is probable that the former were comparatively few in number，and adopted the language of the conquered people，as we know that the language buth of the Campanians and Samnites in later times was Oscan．（Liv．x．20．）Whether it remained unmixed，or had been morlified in any degree by the language of the Sabellians，which was probably a cognate dialect，we have no means of determining，as all our existing monuments of the language are of a date long subsequent to the Sa－ bellian conquest．The ethnical affinities of the Oscans，and their relations to the Sabellian and other races of Central Italy，have been already considered under the article Italia；it only remains to add a few words concerning what is known of the Oscan language．

Niebuhr has justly remarked that＂the Oscan language is by no means an inexplicable mystery， like the Etruscan．Had a single book in it been preserved，we should be perfectly able to decipher it out of itself．＂（Nieb．vol．i．p．68．）Fren with the limited means actually at our command we are able in great part to translate the extant inscriptions in this language，few and mostly brief as they are； and though the meaning of many words remains uncertain or unknown，we are able to arrive at distinct conclusions concerning the general character and affinities of the language．The Oscan was closely connected with the Latin；not merely as the Latin was with the Greek and other branches of the great Indo－Teutonic family，as offshoots from the same original stock，but as cognate and nearly allied dialects．This aftinity may be traced through－ out the grammatical forms and inflections of the language not less than in the vocabulary of single words．The Latin was，however，in all probability a composite language，derived from a combination of this Oscan element with one more closely akin to the Greek，or of Pelasgic origin［Latium，p．137］： while the Oscan doubtless represents the langaage of Central Italy in its nore unmixed form．In many cases the older and ruder specimens of the Latin retain Oscan forms，which were laid aside in the more refined stages of the language ：such is the termination of the ablative in $d$ ，which is found in the Duilian and other old Latin inscriptions，and appears to have been universal in Oscan．

The few notices of Oscan words which have been preserved to us by Latin writers，as Varro，Festus， \＆c．，are of comparatively little importance．Our chief knowledge of the language is derived from extant inscriptions；of which the three most important are： 1．the Tabula Bantina，a bronze tablet found in the
neighbourhood of Bantia, on the borders of Apulia and Lucania, and which refers to the municipal affars of that town; 2. the Cippus Abellanus, so called from its having been found at Abella in Campania, and containing a treaty or agreement between the two neighbouring cities of Nola and Abella; and 3. a bronze tablet recently discovered in the neighbourhood of Agnone in northern Samnium, containing a dedication of various sacred offerings. It is remarkable that these three monuments have been found in nearly the most distant quarters of the Oscan territory. By the assistance of the numerous minor inscriptions, we may fix pretty clearly the linits within which the language was spoken. They include, besides Campania and Samnium Proper, the land of the Hirpini and Frentani, and the northern part of Apulia. No inscriptions in Oscan have been found in Lacania (except immediately on its borders) or Bruttinm, though it is probable that in buth of these countries the Sabellian conquerors introduced the Oscan language, or one closely connected with it; and we are distinctly told by Festus that the Bruttians spoke Greek and Oscan. (Fest. p. 35, M.) We learn also with certainty that not only the vernacular, bat even the official, use of the Oscan language continued in Central Italy long after the Roman conquest. Indeed few, if any, of the extant inscriptions date from an earlier period. The comic poet Titinius alludes to it as a dialect still in common use in his time, about B. c. 170. (Fest. 8. v. Opscum, p. 189.) The coins struck by the Samuites and their allies daring the Socinl War (b. c. 90-88) have Owcan inscriptions; but it is probable that, after the close of that contest and the general admission of the Italians to the Roman franchise, Latin became universal as the official language of Italy. Oscan, however, must have continued to be spoken, not only in the more secladed mountain districts, but even in the towns, in Campania at least, until a much later period; as we find at Pompeii inscriptions rudely scratched or painted on the walls, which from their hasty execution and temporary character cannot be supposed to have existed long before the destruction of the city in A. D. 79.
(Concerning the remains of the Oscan language see Mommsen, Unter-Italischen İialekte, 4to. Leipzig, 1850: Klenze, Philologische Abhandlungen, 8ro. Berlin, 1839 ; and Donaldson, Varronianus, pp. 104-138.)

We have no evidence of the Oscans having any literature, properly so called ; but it was certainly from them that the Romans derived the dramatic entertainments called Atellanae, a kind of rude farces, probably bearing considerable resemblance to the performances of Pulcinello, still so popular at Naples and in its neighbourhood. When these were transplanted to Roine they were naturally rendered into Latin; but though Strabo is probably mistaken in speaking of the Fabulae Atellanae of his day as still performed at Rome in Oscan, it is very natural to suppose that they were still so exhibited in Campania as long as the Oscan language continued in common use in that country. (Strab. v. p. 233 ; concerning the Fabulae Atellanae see Mommsen, l. c. p. 118 ; Bernhardy, Römische Literatur, p. 378, Scc.; Munk, de Fabulis Atellanis, Lips. 1840.)
[E. H. B.]
OSCINEIUM, a name which appears in the Jerasalem Itin. on the road from Vasatae (Bazas) to Elusa (Eause). [Cossio; Elusatris.] The order
of names is Vasatae, Tres Arbores, Oscineium, Sattinm or Sotium, and Elusa. Oscineium is marked at the distance viii. from the two places between which it lies. D'Anville finds on this mad a place named Esquies, which in name and position agrees pretty well with the Oscineium of the Itin.
[G. L.]
OSERIATES ('O $\sigma \epsilon \rho i a t \epsilon s$ ), a tribe of Pannonia Superior, dwelling on the banks of the river Dravus; but nothing is known about them but their name. (Ptol. ii. 15. § 2; Plin. iii. 28.)
[L.S.]
OSI, a German tribe mentioned only by Tacitus (Germ. 28, 43), as dwelling beyond the Quadi, in a woody and mountainnus country. But their national customs, as well as their language, were those of the Pannonians. They were, moreover, tributary to the Quadi and Sarmatae. The exact districts they inhabited cannot be determined, nor do we know whether they had migrated into Germany from Pannonia, or whether they were an ancient remnant of Pannonians in those districts.
[L.S.]
OSIANA, a town in the west of Cappadocia, between the river Halys and lake Tatta, on the road from Ancyra to Caesarea (It. Ant. p. 206). Its site must probably be looked for in the district of Jurkup or Urgub.
[L.S.]
OSISMI or OSISMII (O $\sigma$ ( $\sigma \mu t o t$ ), a Celtic people who joined the Veneti in the war against Caesar, B. C. 56. (B. G. iii. 9.) There is nothing in Caesar which shows their position further than this, that they were in the peninsula of Bretagne. Ptolemy (ii. 8. § 5) makes them extend as far south as the Gobaeum headland, and he names Vorganium as their chief city. [Gobaeum.] If we accept the authority of Mela, who says (iii. 6) that the island Sena (Sein) is opposite to the shores of the Osismii, this will help us to determine the sonthern limit of the Osismii, and will confirm the conjecture of Gobaenm being the headland called Rnz Pointe, which is opposite to the small island Sein, or as it is improperly called Isle des Saints; or being somewhere near that headland. In another passage (iii. 2) Mela makes the great bend of the west coast of Gallia commence where the limits of the Osismii end: "ab illis enim iterum ad septentriones frons littorum respicit, pertinetque ad ultimos Gallicaram gentium Morinos." Pliny (iv. 18) describes this great peninsula of Bretagne thus: "Gallia Lugdunensis contains a considerable peninsula, which rans out into the ocean with a circnit of 625 miles, beginning from the border of the Osismii, the neck being 125 miles in width: south of it are the Nannetes." It is plain then that Pliny placed the Osismii along the north coast of Bretagne, and there is Mela's suthority for placing them on the west coast of the peninsula. The neck of the peninsula which Pliny describes, may be determined by a line drawn from the bay of $S t$. Brieuc on the north to Lorient on the south, or rather to some of the bays east of it, or Morbihan. It seems a fair conclusion, that the Osismii occupied a large part of the peninsula of Bretagne; or as Strabo (iv. p. 195) says: "Next to the Veneti are the Osismii, whom Pytheas calls Timii, who dwell in a peninsula which rons out considerably into the ocean, but not so far as Pytheas says and those who believe him." He does nct tell us how far Pytheas said that the peninsula ran out into the sea, but if we had Pytheas' words, we might find that he knew something about it. The conclusion of D'Anville is justified by the ancient authorities. He says: "It seems that it has been agreed up to the present time to limit the territory
of the Osismii to the northern coast of Basse Bretugne, though there are the strongest reasons for thinking that they occupied the extremity of the same continent in all its breadth and that the diocese of Quimper was a part of the territory as well as the diocese of Léon." D'Anville observes that there is no part of ancient Gaul the geography of which is more obscure.
[G. L.]
O'SMIDA ('O $\sigma \mu$ i $\delta$ a, Scyl. p. 18), a district of Crete, which Mr. Pashley's map places at the sources of the Megalo-potamo. (Hück, Kreta, vol. i. p. 396.)
[E.B.J.]
O'SPHAGUS, a branch of the river Erigon, in Lyncestis, upon which the consul Sulpicius pitched his camp in the campaign of в. c. 200 (Liv. xxxi. 39) ; perhaps the same as the Schemnitza, an affluent of the Erigon, which falls into it to the N. of Bitolia.
[E.B.J.]
OSQUIDATES, one of the peoples of Aquitania mentioned by Pliny (iv. 19). He mentions Osquidates Montani and Osquidates Campestres, but he enumerates many names between the two, from which we may conclude that the Campestres did not border on the Montani, for if they had, it is probable that he would have enumerated the Campestres immediately after the Montani instead of placing between them the names of eleven peoples. Beside this, we must look for the Montani on the north side of the Pyrenees and in the vallegs of the Pyrenees, and the Campestres in the low country of Aquitania. There are no means for determining the position of either the Montani or the C:umpestres, except from the resemblance between the aucient and the modern names in this part of Gallia, which resemblance is often very great. Thus D'Anville supposes that the Osquidates Montani may have occupied the valley of Ossar, which extends from the foot of the Pyrences to Oleron, on a branch of the Adlour. This is probable enough, but his attempt to find a position for the Campestres is unsuccessful.
[G. L.]
OSRHOE'NE, a small district in the NW. corner of Mesopotamia (taken in its most extended sense), which there is some reason for supposing would be more correctly written Orrhoene. It does not appear in any writer earlier than the times of the Antonines, and is not therefore mentioned by either Strabo or Ptolemy. Procopius states that it derived its name from a certain Osroes, who ruled there in former times (Pers. i. 17); and Dion Cassius declares that the name of the man who betrayed the Romal army under Crassus was Abgarus the Osroenian (xl. 19; see for the same name, Ixviii. 18, and Ixxvii. 12.) Again, Herodian calls the people who dwelt in those parts Osmeni (iii. 9, iv. 7, vii. 1). Ammianas writes the name Osdruene (xiv. 3, 8, xxiv. 1). The name prevailed in the country as late as the serenth century. (Hierocl. p. 713.) In the Notitia Inperat. Osroene was placed under a "Praeses Provinciae," and appears to have been sometimes included in Mesopotamia, sometimes kept separate from it. (See Justinian, Notit. cit. § 11 ; Joan. Mulalas, xi. p. 274, ed. Bonn; Noi is. de Epoch. ii. p. 110.) It is most likely that the correct form of the name is Orrhoene; and that this is connected with the Mavvoioppa of Isidorus. (Stathm. Parth. 1.; and see Dion, lxriii. 2, for the name of Mannus, a chief of the Mesopotamian Arabs, who gave himself up to Trajun.) Not impossibly, the Oruros of Pliny may refer to the same district. (vi. 30, 119.) [EdessA.]

OSSA ("O $\sigma \sigma a$, Ptol. iii. 13. § 15), a town of the

Bisaltae, which, before the annexation of Bisaltis to the kingdom of Macedonia, must have been a place of some importance from the fact of its possessing an autonomous coinage. (Eckhel, vol. ii. p. 73.) It has been identified with Sokho, a large village on the S. side of the Nigrita mountain, where some Hellenic remains are found on the surrounding heights. Another ancient site at Lakhama, on the N. road from Serrés to Salonili, has also claims to be considered the representative of Ossa. (Leake, North. Greece, vol. iii. Pp. 213, 233.) [E. B. J.]

COIN OF OSSA.
OSSA ('O $\sigma \sigma a$ ), a lofty mountain in Thessaly on the coast of Magnesia, separated from Olympus only by the narrow vale of Tempe. Hence it was supposed by the ancients that these mountains were once united, and had been separated by an earthquake. (Herod. vii. 129; Strab. ix. pp. 430, 442; Lucan, vi. 347 ; Claudian, Rapt. Proserp. ii. 183.) Ossa is conical in form and has only one summit. Polybius mentions it as one of the highest mountains in Greece (xxxiv. 10); bat it is considerably lower than Olympus, and according to Ovid even lower than Pelion. (Ov. Fast. iii. 441.) According to Dodwell, who speaks, however, only from conjecture, Ossa is about 5000 feet high. To the south of Ossa rises Mt. Pelion, and the last falls of the two mountains are united by a low ridge. (Herod. vii. 129.) Olympas, Ossa, and Pelion differ greatly in character; and the conical peak, standing between the other two, is well contrasted with the broad majesty of Olympus, and the extended outline of Pelion. The length of Ossa along the coast is said by Strabo to be 80 stadia (ix. p. 443). It is hardly necessary to allude to the passages in the poets, in which Ossa is mentioned, along with Olympus and Pelion, in the war of the giants and the gods. (Hom. Od. xi. 312; Virg. Georg. i. 282, scc.) The modern name of Ossa is Kissaro. (Holland, Travels, \&c. vol. ii. pp. 3. 95; Dodwell, Classical Tour, vol. ii. p. 106; Leake, Northern Greece, vol. i. p. 434, vol. iv. pp. 411, 513; Mézières, Mémoire sur le Pélion et COssa, Paris, 1853.)
2. A mountain in Elis near Olympia. [Vol. I. p. 817, b.]

OSSADIAE ('O $\sigma \sigma d \delta, a \iota$ ), a people who dwelt in the Panjab along the banks of the Acesines (Chenib), and who surrendered themselves to Alexander the Great after the conquest of the Malli (Multin). (Arrian, vi. 15.)
[V.]
OSSARE'NE ('Oббapךut, Ptol. v. 13. § 9 ; Tom rapquh, Interp.), a canton of Armenia situated on the banks of the river Cyrus. St. Martin (Mém. sur $l^{\prime}$ Armenie, vol. i. p. 81) is of opinion that it may be the same as the Goonrene of Strabo.
[E. B. J.]
OSSET, alsn called Julia Constantia (Plin. iii. 3), a town of Baetica, on the right bank of the river Baetis, and opposite to Hispalis. It is probably the modern S. Juan de Alfarache, near Castello de la Cuesh, where there are some homan remains.
(Florez, Esp. S. ix. p. 106, Med. ii. p. 528; Mionnet, i. p. 25; Sestini, Med. Isp. p. 79.) [T. H. D.]

COIN OF OSSET.
OSSIGERDA or OSICERDA (O $\sigma \iota \kappa \epsilon ́ p \delta \alpha$, Ptol. ii. 6. §63), a town of the Edetani in Hispania Tarraconensis. It was a municipium in the jurisdiction of Caesaraugusta. (Plin. iii. 3. s. 4, who calls the inhabitants Ossigerdenses.) It had a mint. (Florez, Med. ii. p. 532, iii. p. 109 ; Mionnet, i. p. 47, Suppl. i. p. 95 ; Sestini, p. 177.) Ukert (vol. ii. pt. 1. p. 417) identifies it with Ossera, near Saragossa.
[T. H. D.]
OSSIGI LACO NICUM, a town on the borders of Hispauia Baetica, at the place where the Baetis enters that country (Plin. iii. 3); now Marquiz, where there are Roman ruins and inscriptions. (Florez, Esp. S. xii. 367, v. 24.)
[T. H. D.]
OSSO'NOBA ('Oafóvo6a, Ptol. ii. 5. §3), a town of the Turdetani in Lusitania, between the rivers Tagus and Anas, on the road from Esuris to Ebora and Pax Julia. (Itin. Ant. pp. 418, 426.) [Lusitania, p. 220, a.] It is the same town mentioned by Strabo in a corrupt passage (iii. p. 143), by Mela (iii. 1. §6), Pliny (iv. 21. s. 35), and others. Commonly identified with Estoy, lying a little N. of Faro, near the mouth of the Silves, where Roman ruins and inscriptions are still found. One of the latter has resp. osson. (Ukert, vol. ii. pt. 1. p. 387.)
[T. H. D.]
OSTEO'DES ('O $\sigma \tau \epsilon \sigma \delta \eta \eta$ ), a small island in the Tyrrhenian sea, lying off the N. coast of Sicily, and W. of the Aeolian Islands. Diodorus tells us that it derived its name (the Bone Island) from the circumstance of the Carthaginians having on one occasion got rid of a body of 6000 turbulent and disaffected mercenaries by landing them on this island, which was barren and uninhabited, and leaving them there to perish. (Diod. v. 11). He describes it as situated in the open sea, to the west of the Liparaean or Aeolian Islands; a description which applies only to the island now called Ustica. The difficulty is, that both Pliny and Ptolemy distinguish Ustica (Oju$\sigma$ тika) from Osteodes, as if they were two separate islands (Plin. iii. 8. s. 14; Ptol. iii. 4. § 17). The former writer says, "a Solunte lxxv. M. Osteodes, contraque Paropinos Ustica." But as there is in fact but one island in the open sea W. of the Lipari Islands (all of which are clearly identified), it seems certain that this must have been the Osteodes of the Greeks, which was afterwards known to the Romans as Ustica, and that the existence of the two names led the geographers to suppose they were two distinct islands. Mela does not mention Ustica, but notices Osteodes, which he reckons one of the Aeolian group; and its name is found also (corruptly written Ostodis) in the Tabula, but in a manner that affords no real clue to its position. (Mel. ii. 7. § 18; Tab. Peut.)

Ustica is an island of volcanic origin, about 10 miles in circumference, and is situated about

40 miles N. of the Capo di Gallo near Palermo, and 60 miles W. of Alicudi, the westernmost of the Lipari Islands. It is at this day well inhabited, and existing remains show that it must have been so in the time of the Romans also. (Smyth's Sicily, p. 279.)
[E. H. B.]

O'STIA (' $\Omega \sigma \tau i a:$ Eth. Ostiensis: Ostia), a city of Latium, situated at the mouth of the Tiber, from which position it derived its name. It was on the left bank of the river, at a distance of $\mathbf{1 6}$ miles from Rome, by the road which derived from it the name of Via Ostiensis. (Itin. Ant. p. 301.) All ancient writers agree in representing it as founded by the Roman king Ancus Marcius; and it seems certain that it always retained the position of a colony of Rome, and was at no period independent. From its position, indeed, it naturally became the port of Rome, and was essential to that city, not only for the purpose of maintaining that naval supremacy which it had established before the close of the regal period, but for securing its supplies of corn and other imported produce which was carried up the Tiber. Ancus Marcius at the same time established salt-works on the site, which for a long time continued to supply both Rome itself and the neighbouring country in the interior with that necessary article. (Liv. i. 33; Dionys. iii. 44; Cic. de Rep. ii. 3, 18; Strab. v. p. 232; Flor. i. 4; Eutrop. i 5; Fest. p. 197.) There can be no doubt that the importance of Ostia must have continued to increase with the growing prosperity and power of Rome; but it is remarkable that we meet with no mention of its name in history until the period of the Second Punic War. At that time it appears as a commercial and naval station of the utmost importance; and was not only the port to which the corn from Sicily and Sardinia was brought for the supply of Rome itself, as well as of the Roman legions in the field, but was the permanent station of a Roman fleet, for the protection both of the capital, and the neighbouring shores of Italy. (Liv. xxii. 11, 37, 57, xxiii. 38, xxv. 20, xxvii. 22.) It was at this time still reckoned one of the "coloniae maritimae;" but on account of its peculiar importance in relation to Rome, it enjoyed special privileges; so that in B. c. 207, when the other maritime colonies endeavoured to establish a claim to exemption from levies for military service, this was allowed only in the case of Ostia and Antium; the citizens of which were at the same time compelled to be constantly present as a garrison within their own walls. (Liv. xxvii. 38.) On a subsequent occasion (в. c. 191) they attempted to extend this exemption to the naval service also; but their claim was at once disallowed by the senate. (Id. $\mathbf{x x x v i}$. 3.) Even after the complete establishment of the naval power of the Roman Republic, Ostia seems to have continued to be the usual station of a Roman fleet: and in B. c. 67 it was there that a squadron, which had been assembled for the repression of the Cilician pirates, was attacked by the pirates themselves, and the ships either destroyed or taken. (Cic pro Leg. Manil. 12 ; Dion Cass. xxxvi. 5.) Ostia itself also suffered severely during the civil wars of Sulla and Marius, having been taken by the latter in B. c. 87, and given up to plunder and devastation by his soldiers. (Appian, B. C. i. 67; Liv. Epit. lxxix; Oros. v. 19; Flor. iii. 21. § 12.)

But its position at the mouth of the Tiber, as the port of Rome, secured it from decay : and so im-
portant was the trade of Ostia become, especially on account of the supplies of corn which it furnished to the capital, that it was made the place of residence of one of the four quaestors of Italy, and gave name to one of the "provinciae quaestoriae" into which that country was divided. (Cic. pro Muren. 8, pro Sest. 17 ; Suet. Claud. 24.) But the increasing commerce of Ostia rendered its natural disadvantages as a port only the more sensible; and there can be little doubt that those disadvantages were themselves continually increasing. It had been originally founded, as we are expressly told, close to the mouth of the Tiber, from which it is now distant above three miles; and the process of alluvial deposition, which has wrought this change, has been undoubtedly going on throughout the intervening period. Hence Strabo describes in strong terms the disadvantages of Ostia in his day, and calls it " a city without a port, on account of the alluvial deposits continually brought down by the Tiber, which compelled the larger class of vessels to ride at anchor in the open roadstead at great risk, while their cargoes were unloaded into boats or barges, by which they were carried up the river to Rome. Other ressels were themselves towed up the Tiber, after they had been lightened by discharging a part of their cargoes." (Strab. v. pp. 231, 232.) Dionysius gives a more favourable view, but which does not substantially differ from the preceding account. (Dionys. iii. 44.) These evils had already attracted the attention of the dictator Caesar, and among the projects ascribed to him, was one for forming an artificial port or basin at Ostia (Plut. Caes. 58): but this was neglected by his successors, until the
increasing difficulty of supplying Rome with corn compelled Claudius to undertake the work.

That emperor, instead of attempting to cleanse and restore the original port of Ostia at the mouth of the Tiber, determined on the construction of an entirely new basin, which was excavated in the seashore about two miles to the N. of Ostia, and which was made to communicate with the river by an artificial cut or canal. This port was protected and enlarged by two moles projecting out into the sea, so as to enclose an extensive space, while in the interval between them a breakwater or artificial island was thrown up, crowned by a lighthouse. (Dion Cass. lx. 11 ; Suet. Claud. 20; Plin. ix. 6, xvi. 40. s. 76; Juv. xii. 75-81.) This great work was called the Portus Augusti, on which account its construction, or at least commencement, is by some writers referred to the emperor Augustus; but there is no authority for this; and Dion Cassins distinctly assigns the commencement as well as completion of it to Claudius. Nero, however, appears to have put the finishing hand to the work, and in consequence struck coins on which he claims it for his own. (Eckhel, vol. vi. p. 276.) After this it was considerably augmented by Trajan, who added an inner basin or dock, of a hexagonal form, surrounded with quays and extensive ranges of buildings for magazines and storehouses. This port was called by him Portus Trajani; and hence we afterwards meet in inscriptions with the "Portus Augusti et Trajani," and sometimes "Portus uterque" in the same sense. (Juv. l.c., et Schol. ad loc.; Gruter, Inscr. p. 308. 10, p. 440.3.) At the same time he enlarged or repaired the artificial channel of communication with

PLAN OF OSTLA.

AA. Main channel of the Tiber.
B. Right arm of ditto, the Fossa Trajana, now called Fiumicino.
C. Fiumec Morw, dry bed of ancient course of the Tiber.

E. Ruins of ancient Ostia.
F. Portus Augusti.
G. Portus Trajani.
H. Insula Sacra.
the Tiber, which now assumed the rame of Fossa Trajana, and is andoubtedly the same which still exists ander the name of Fiumicino, and forms the right arm of the Tiber, from which it separates about a mile and a half above the site of Ostia.

The new port thus constructed soon gave rise to the growth of a new town around it, which was generally known by the name of Portus Ostiknsis, sometimes also Portus Urbis or Portus Romae, but more frequently, at least in later times, simply Portus. It seems to have been designed more particularly for the importation of corn for the supply of the capital, an object of which the importance became felt more and more, as the population of Rome continued to increase, while it became more absolutely dependent upon foreign produce. The adjoining district on the right bank of the Tiber was portioned out among a body of colonists before the time of Trajan (Lib.Colon. p. 222); and a new line of road was constructed along the right bank of the Tiber from Rome to the new port, which obtained the name of Via Portuensis. In the reign of Constantine the city of Portus was erected into an episcopal see (Anastas. Vit. Silvestr. 34); and the same emperor surrounded it with strong walls and towers, which are still in considerable part extant.

Meanwhile Ostia itself was far from sinking into decay. Repeated notices of it during the earlier periods of the Roman Empire show it to have been still a flourishing and populous city, and successive emperors concurred in inproving it and adorning it with public buildings. It was particularly indebted to the care of Hadrian (Gruter, Inscr. p. 249. 7) and Septimius Severus, numerous inscriptions in honour of whom have been discovered among its ruins. (Nibby, Dintorni, vol. ii. pp. 434, 468.) Aurelian, also, we are told, adorned it with a Forum, which bore his name, and which was decorated by his successor Tacitus with 100 columns of Numidic marble. (Vopisc. Aurel. 45 ; Tac. 10.) The existing remains confirm the inference which we should draw from these accounts, and show that Ostia must have continued to be a flourishing town till torards the close of the Roman Empire, and far superior in the number and splendour of its public buildings to the neighbouring town of Portus. But the security of the latter place, which was well fortified, while Ostia was wholly unprotected by walls (Procop. B. G. i. 26), must have contributed greatly to the advantage of Portus; and the artificial port seems to have obtained an increasing preference over the natural mouth of the Tiber. Rutilius says that in his time (about A.D. 414) the left arm, or main channel of the river, was so obstructed with sand as to be wholly deserted (Itin. i. 181); but this would appear to be an exaggerated statement, as Procopius more than a century later describes them as both navigable (Procop. l.c.). Ostia was, however, in his day already in a state of great decay, and the rued which led from thence to Rome (the Via Ositiensis) was neglected and abandoned, while the Via Portuensis on the other side of the Tiber was still the scene of considerable traffic. The importance of Portus became more developed when Rome itself became exposed to the attacks of hostile barbarians. In A. D. 409 Alaric, king of the Goths, made himself master of the poit, and with it of the stores of corn for the supply of the capital, which compelled the senate to capitulate on the terms that he chose to dictate (Zosim. vi. 6); and again during the wars of Belisarius and Vitiges (in 537) the Gothic king,
by making himself master of Portus, was able to reduce his adversary to severe distress (Procop. B. G. i. 26, \&ce.). The decline of Ostia continued throughout the earlier part of the middle ages: in 827 it is described as altogether in ruins, and the continued incursions of the Saracens throughout that century seem to have completed its desolation.

But meanwhile the artificial ports of Claudius and Trajan were beginning in their turn to suffer from the deposit of sand which is constantly going on along these shores ; and no attempt being made in these ages of confusion and disorder to arrest the progress of the evil, they were both gradually filled up so as to be rendered altogether useless. In the 10th century, the port of Trajan was already reduced to a mere lake or pool, altugether cut off from the sea, and only communicating by a ditch with the Tiber. (Ughelli, Italia Sacra, vol. i. p. 134.) The consequence was that for a time the trade was again forced to have recourse to the left arm of the river; and the modern Ostia, where a castle or fort had been founded by Pope Gregory IV., a little above the ruins of the ancient city, became again for a period of some centuries the landing-place of traveilers and the port of Rome. It was not till 1612 that Pope Paul V. once more caused the canal of Trajan to be restored and cleared out, and continued to the present line of sea-coast, where a small port called Fiumicino was constructed; and from this time the whole traffic carried on by the Tiber with Rome (which is however but inconsiderable) has been confined to this arm of the river. The main channel, on the other hand, having been completely neglected, has become so obstructed with sand near the mouth as to be wholly impracticable.

The modern village of Ostia is a very poor place, with the ruins of an old castle, bat retains little more than 50 permanent inhabitants, who are principally empluyed in the neighbouring salt-works. Its climate in summer is extremely unhealthy. The ruins of the ancient city begin about half a mile below it, and extend along the left bank of the Tiber for a space of near a mile and a half in length, and a mile in breadth. Though extensive, they are for the most part in a very dilapidated and imperfect state, so as to have little or no interest as architectural monuments; but among them may be distinctly traced the remains of a theatre, a temple of the Corinthian order, the forum, with several of the public buildings that surrounded it ; and near the Torre Boracciana, close to the Tiber, are the ruins of buildings that appear to indicate this as the site of the actual port or emporium of Ostia in the imperial period. The great number and beauty of the statues and other works of art, which have been brought to light by the excavations carried on at successive periods on the site of Ostia, are calculated to give a high notion of the opulence and prosperity of the ancient city.

The ruins of Portus, which are also very considerable, are of an entirely different character from those of Ostia. They are found on the right bank of the Tiber, about 2 miles from the present line of sea-coast at Fiumicino, and are still known as Porto; while the inner basin of Trajan, the hexagonal form of which may be distinctly traced, though it is in great part filled with sand, is still popularly known by the name of $I l$ Trajaso. The quays of solid masonry that surrounded it are still well preserved; while extensive, though shapeless, masses of ruins adjoining it appear to have been those of the magazines and storehouses attached to the port. The

## OTHRYS.

remains of the port of Claudius are less distinct; the line of the moles which bounded it may, however, be traced, though they are altogether buried in sand; the tower of the lighthouse or Pharos was still visible in the 15 th centary, when the rains were visited and described by Pope Pius II., but has now entirely disappeared. A considerable part of the ancient walls with which the city was fortified by Constantine is still visible; they were strengthened with towers, and closely resemble in their style of construction the older portions of those of Rome.

Between the site of Ostia and that of Portus is the island, formed by the two branches of the Tiber, which is about 3 miles in length by 2 in breadth. It is commonly known as the Insula Sacra, an appellation first given to it by Procopius, who describes it in detail (B. G. i. 26). The origin of the epithet is unknown, but it appears to have been in Cbristian times regarded as consecrated, having been, according to Anastasius, bestowed by Constantine upon the church. It is described in exaggerated terms by a writer of the 5 th century (Aethicus, Cosmogr. p. 716, ed. Gronov.) for its beanty and fertility, whence be says it was termed "Libanus Almae Veneris:" but in spring it is still covered with fine pastures abounding with beautiful flowers. The formation of this island obviously dates only from the construction of the right arm of the Tiber, now known as Il Fiumicino, which, as already shown, is probably wholly artificial. No writer before the time of the Roman Empire alludes to more than one mouth of the river.
The topography of Ostia and Portus, and the vicissitudes and changes which the two ports at the mouth of the Tiber bave undergone, are fully traced, and the existing ruins described in detail, by Nibby (Dintorni di Roma, vol. ii. p. 426-474,602-660); as well as by Preller, in the Berichte der Sächsischen Gesellschaft for the year 1849 (pp. 5-38). The preceding plan is copied from one given by the latter writer.
[E. H. B.]
OSTIAEI, OSTIDAMNII. Stephanas (s. v. ' $\Omega \sigma \tau i \infty v \epsilon s$ ) has preserved a notice of a Gallic people whom he descrbes "as a nution on the western Ocean, whom Artemidorus names Cossini, and Pytheas names Ostiaei." Strabo (p. 63) observes of Pytheas that what he says of the Ostiaei and the parts beyond the Rhine as far as Scythia, is all false. Whether false or true, we learn from Strabo that Pytheas spoke of the Ostiaei of Gailia; and we can safely infer that Pytheas placed them on the west coast of Gallia opposite to Britain. A passage of Strabo has been cited under Osismir, in which it is stated of the Osismii that Pytheas named them Timii. Ukert (Gallien, p. 336) purposes to change obs Trulous in this passage of Strabo into ofs ' $\Omega \sigma t a i o u s$. The proposal is reasonable. The text of Strabo is probably corrupt here. These Ostiaei of Pytheas can be no other than the Osismii.

Eratosthenes mentioned a people of Gallia named Ostidamnii on the west coast of Gallia. He also spoke (Strab. p. 64) of the promontory of the Ostidamnii which is called Calbium. It is clear that he is speaking of the peninsula of Bretagne. The Ostiaei, Ostidamnii, Osismii are evidently the same people.
[G. L.]
OSTIPPO, a free city of Hispania Baetica, in the jurisdiction of Astigi (Plin. iii. 1. s. 3), and on the road from Hispalis to Corduba. (Itin. Ant. p. 411.) It has not been satisfactorily identified, but, according to Ukert (vol. ii. pt. 1. p. 360), it
must probably be sought in the neighbourhood of the modern Ecija.
[T. H. D.]
OSTRA (O $\sigma \tau \rho a:$ Eth. Ostranus), a town of Umbria, in the district once occupied by the Senones mentioned both by Pliny and Ptolemy (Plin. iii. 14. s. 19; Ptol. iii. 1. § 51), bat of very uncertain site. [Umвнia].
[E. H. B.]
OSTRACI'NA ('Ootpaxivn, Ptol. iv. 5. § 12 ; Plin. v. 12. s. 14; Ostracena It. Antos. p. 152), was a military station in Lower Aegypt, east of the Delta proper, and situated on the road from Rhinocorura to Pelusium. From the route of Vespasian, on his return from Alexandreia to Palestine in A. D. 69, as described by Josephas (B. Jwd iv. 11. §5), Ostracina appears to have been one day's march from the temple of Jupiter Casius in the Arabian hills, and about the same distance from the lake Serbonis. It was destitute of wells, and supplied with water brought by a canal from the Delta. (Comp. Martian. Capella, c. 6. [W. B. D.]

OSTRACI'NA, a mountain on the road from Mantineia to Methydrium. [Mantineia, p. 262, b.] OSTUDIZUS (also written Ostidizus and Ostodizus, Itin. Ant. pp. 137, 230, 322; and in Hilar. viii. p. 1346, Ustudizam), a town in Thrace, on the road from Hadrianople to Constantinople. [T.H.D.]

OSTUR, a town of Spain, not mentioned in any ancient writer, but which appears upon coins. There is still a place called Ostur near Alcona in Valencia, which has some Roman ruins, and which abounds with acorns,-the figure of which also appears upon the coins. (Florez, Med. ii. p. 535, iii. p. 113; Sestini, p. 179; Mionnet, i. p. 47, Suppl. i. p. 95, ap. Ukert, vol. ii. pt. 1. p. 416.) [T.H.D.] OTADINI ('תтajךvoi, Ptol. ii. 3. § 10), a British tribe on the E. coust of Britannia Barbara, in the province of Valentia, lying $S$. of the Boderia estuary, or Firth of Forth, down to the river Tyme; and therefore inhabiting the counties of Hadlington, Berwick, Koxburgh, and the greater part of Northumberland. Their chief cities were Curia and Bremenium.
[T. H. D.]

 separated from Atropatene by the river Araxes, (Plin. vi. 16.) St. Martin (Mém. sur TArmenie. vol. i. p. 86) identifies it with the province known to the native geographers by the name of Oudi, or what is now called Kara-bágh, to the N. of the Araxes.
[E.B.J.]
OTESIA, a town of Cispadane Gaul, known only from the mention of the Otesini by Pliny (iii. 15. s. 20) among the municipal towns of the Eighth Region. But an inscription given by Cluverias makes mention of the "Respublica Otesinornm;" and it is probable that Aircooia and 'Opriola, which are found in Phlegon among the towns of the same part of Italy, are only corruptions of the same name. (Phlegon, Macrob. 1; Cluver. Ital. p. 282.) Its site is wholly uncertain.
[E. H. B.]
OTHRYS ( $\dot{\eta}$ "OApus), a lofty chain of mountains, which shuts in the plain of Thessaly from the south. It branches off from Mount Tymphrestus, a summit in the range of Pindus, and runs nearly due east through Phthiotis to the sea coast, thus separating the waters which flow into the Peneius from those of the Spercheius. (Strab. ix. pp. 432, 433; comp. Herod. vii. 129 ; Plin. iv. 8. 8. 15.) On its northern side, many offshoots extend into the plain of Pharsalus. It is lofty and covered with wood, whence the poets give it the epithet of "nivalis"
(Virg. Aen. vii. 675) and "nemerosus" (Lucan, vi. 337). It is now usually called Gura, from a large village of this name upon its sides; but its highest summit, which lies to the east of this village, is named Jeracovomi, and is 5669 feet above the Ievel of the sea. The subsoil of the whole range is a limestone of various and highly-inclined strata occasionally mixed with iron ore, anyanthe and asbestus. (Leake, Northern Greece, vol. ii. p. 17, vol. iv. p. 330, seq.; Journal of Geogr. Society, vol. vii. p. 92.)

OTIS, a town on the Euphrates below Babylon, just above the commencement of the Babylonian Marshes. (Plin. v. 26.)
[V.]
ottorocorras ('Octopoкóppas, Ptol. vi. 16. §§ 2, 3), the E. termination of the Emodi Montes. This is an example of a Sanscrit word which has been preserved in Ptolemy's geography, as it is merely the Greek form of the Uttarakuru of the "Mahábhárata," or the highland of the happy Indian Hyperboreans, who lived there sheltered from the cold blasts, about whom, under the name of Attacorri, as Pliny (vi. 20) relates, a certain Amometus wrote a book. Ammianus (xxiii. 6. § 65), copying Ptolemy, has Opurocarra, and Orosius (i. 2) Ottorogorras. The sacred race of men living in the desert of whom Ctesias (Ind. 8, ed. Bähr) speaks, belong to this imaginative geugraphy, which saw in the snow-capped summits of the Himalaya the chosen habitation of the Gods and of the Blessed. According to Ptolemy (vi. 16. § 5, viii. 24. § 7) there was a people of the Ottorocorrae, with a town of the same name, to the E . of the Casii Montes, or mountains of Kaschgar; as the city is one of Ptolemy's points of recorded astronomical observations, having almost 14 hrs .45 min . in its longest day, and being 7 hrs . E. of Alexandreia, there must have been some real locality bearing this name, which must be assigned to $E$. Thibet. (I.sssen, Ind. Alt. vol. i. pp. 511, 847.) [E. B. J.]

OVILABA (Wels on the river Traun), a town of Noricum, on the road from Laureacum to Augusta Vindelicorum. (Itin. Ant. pp. 235, 258, 277 ; Tab. Peuf., where it is called Ovilia.) It is said, according to an inscription, to have been a Roman colony under the name of Aurelia Antoniniana. (Muchar, Nioricum, i. pp. 217, 238, 266, \&cc., 285, \&c.) [L.S.]

OXEIAE. [Echinades.]
OXIA PALUS, a lake which was formed by two very large rivers, the Araxates (Jaxartes) and I)ymas (probably the Demus of Ptolemy, vi. 12. § 3), at the foot of the Sogdii Montes. (Amm. Marc. axiii. 6. §59.) This has been supposed to intimate, though very vaguely, the formation of the Sea of Aral; but there seems to be more reason for identifying it with the lake of Karakoul to the SSE. of Bokhara, formed by the Zar-afshan or "gold-scattering" river of Sanaarcand, called also the Kohik, or more correctly the river of the Kohak or "hillock." This river is the Polytimetus, which, arcording to Aristobulus (ap. Strab. xi. p. 518), traversed Sogdiara, and was lost in the sands; while Q. Curtius (vii. 37) describes it as entering a cavern and continuing its course ander ground, though it really discharges itself into this lake, which the Uzbeks call Denghiz, the Turkish word for "sea." The Greeks translated the indigenous name Soghd - the valley of which is one of the four Paradises of the Persian poets - into that of Polytimetus, "the very precious,"-an epithet which it well deserves from the benefits it showers apon this
region, the plain of Bokhara, famed for its gigantic melons. Ptolemy (vi. 12. § 3), if a correction be made in his latitudes, which are aniformly put too far forward to the N., gives the Oxiana Palus
 and Tribuctra (Balkh and Bykund). "From the mountains of the Sogdii," says that gengrapher, "descend several rivers with no name, but which are confluents ; one of these forms the Oxiana Palus." The Sogdii Montes of Ptolemy are the Asferah mountains, by which the volcanic chain of the Thian-Schan is prolonged to the W. beyond the N. and S. break of Bolor, and Kosuyrt. It is singular that Ptolemy does not connect the Polytimetus with his Oxian lake, but mentions it (vi. 14. § 2) as one of the rivers discharging itself into the Caspian between the Oxus and Jaxartes. Pliny knows nothing of the Polytimetus; and his Oxus Lacus (vi. 18, $x$ xxi. 39; Solin. 49) is either the crescent-shaped lake of Sirikol, on the Bami Drunya, or "terraced roof of the world," near the pass of Pamir, from which the infant $A m$ ú [Oxus] issues, or some other Alpine lake in the Bolor chain, from which this river derives most of its waters. The marshes of the Massagetae, into which the Araxes of Herodotus (i. 202) flows, with the exception of one of its 40 channels, indicate some rague notion of the Sea of Aral. Strabo (xi. p. 531), when he blames the opinion of Herodotus and Callisthenes, about the 40 channels of the Araxes, also (p. 512) asserts that some of the Massagetae live in marshes formed by rivers and in islands; adding (p. 573) that this district is flooded by the Araxes, which is divided into many channels, of which only one discharges itself into the sea of Hyrcania, while the others reach the Northern Ocean. It is surprising that Strabo does not give to this river of the country of the Massagetae (which is undoubtedly the same as that of which Herodotus speaks) the name of Jaxartes, which he mentions so often (pp. 507, 509, 511, 517, 518), and carefully distinguishes (pp. 527-529) from the Araxes of the Matieni, or Armenian river, which was known to Hecataeus (Fr. 170). Strabo (p. 513) as well as Herodotus (i. 202) allude to the seals, with the skins of which the natives clothe themselves; and it is well known that these animals are found in the Sea of Aral as well as in the Caspian, and the lakes Baikal and Oron; for these and other reasons it would seem that both Herodotus and Strabo were acquainted with that series of lagoons from which the Sea of Aral has been formed. This was the opinion of Bayer (Acta Petrop. vol. i. p. 398) and of D'Anville, who (Carte du Monde des Grecs et des Romains, 1763) designates the Aral by these words, "Paludes recipientes Araxen apud Herodotum." With Herodotus all this network of lagoons forms a basin of the interior, while Strabo connects it with the N. Ocean, directly, and not through the medium of the Hyrcanian sea, and the channel by which, according to the systematic cosmographers of Alexandreia, this sea was united to the Ocean. It must be observed that Strabo distinguishes clearly between the single mouth of the Araxes of the Massagetae (Jaxartes) and the numerous channels which go directly to the N. Ocean. This statement acquires great importance as implying traditions of a chanuel of communication between the waters of the Aral and the Icy Sea; a communication which probably took place along that ramarkable depression of $5^{\circ}$ of longitude in length,
in a direction from SW. to NE., from the Aral to the " embouchure" of the Obi. The characteristic feature of this depression is an immense number of chains of small lakes, communicating with each other, arranged in a circular form, or like a neckiace. These lakes are probably the traces of Strabo's channel. The first distinct statement of the Sea of Aral, described as a vast and broad lake, situated to the E. of the river Ural or Jaik, occurs in Menander of Constannople, surnamed the "Protector," who lived in the time of the emperor Maurice. (Menand. Hist. Legat. Barbarorum ad Romanos, pp. 300, 301, 619, 623, 628 , ed. Bonn, 1829). But it is only with the series of Arab gengraphers, at the head of whom must be placed El-Istachry, that any positive information upon the topography of these regions commences. (Humboldt, Asie Centrale, vol. ii. pp. 121-364.)
[E.B. J.]
O'XII MONTES ( $\tau \dot{d}$ " $\Omega \xi \in \iota a$ öpm, Ptol. vi. 12. $\S \S 1,4)$, a chain of mountaius between the rivers Oxus and Jaxartes, in a direction from SW. to NE., and which separated Scythia from Sogdiana They are identified with the metalliferous group of $A s-$ ferah and Aktagh - the Botom, Botm, or Botam ("Mont Blanc") of Edrisi (ed. Jaubert, vol. ii. pp. 198-200). The Oxi Rupes of Strabo ("ת§ov тeifo p. 517), which he also calls the bill-fort of Arimazes (Q. Curt. vii. 11), has been identified by Droysen, as quoted by Thirlwall (Hist. of Greece, vol. vi. p. 300), with the pass of Kolugha or Derbend, in the Kara-tagh, between Kish and Hissar; but as it is called the rock of the Oxus, it must be looked for on that river, and is probably Kürghan-Tippa on the $A m u ̈$. (Wilson, Ariana, p. 167 ; Ritter, Erdkunde, vol. vii. p. 734 ; Humboldt, Asic Centrale, vol. ii. pp. 18-20.) [E.B.J.]

OXINES ('O $\xi$ ivns), a small river on the coast of Bithynia, according to Arrian (Peripl. p. 14) between Heracleia and Phyllium, and according to Marcianus (p. 70) 90 stadia to the north-east of Cape Posidium. (Comp. Anonym. Peripl. p.4, where, as in Arrian, its name is Oxinas.) It is probably the modern Tsharuk.
[L.S ]
OXINGIS. [AURINx.]
 c. 58), a town of the Lasitani, and according to Appian the largest they had; but it is not mentioned by any other author.
[T. H. D.]
OXUS ( $\delta$ " $\Omega \xi 0$, Polyb. x. 48 ; Strab. i. p. 73, xi. pp. 507, 509, 510, 513, 514, 516-518; Ptol. vi. 9. §§ 1, 2. 10. §§ $1,2.11$. §§ 1-4, 7. 12. §§ 1,4.14. §Ş 1, 2, 14. 18. § 1 ; Agathem. ii. 10; Arrian, Anab. iii. 28, 29, 30, iv. 15, viii. 10, 16 ; Plut. Alex. 57; Dionys. 747; Pomp. Mela, iii. 5. § 6 ; Plin. vi. 18 ; Q. Curt. vii. 4, 5, 10 ; Amm. Marc. $\mathbf{x x x i i i . ~ 6 . ~ § ~ 5 2 ) , ~ a ~}$ river of Central Asia, on the course of which there appears a considerable discrepancy between the statements of ancient and modern geographers. Besides affirming that the Oxus flowed through Hyrcania to the Caspian or Hyrcanian sea, Strabo (iz. p. 509) adds, upon the authority of Aristobulus, that it was one of the largest rivers of Asia, that it was navigable, and that by it much valuable merchandise was conveyed to the Hyrcanian sea, and thence to Albunia, and by the river Cyrus to the Euxine. Pliny (vi. 19) also quotes M. Varro, who says that it was ascertained at the time when Pompeius was carrying on hostilities in the East against Mithridates, that a journey of seven days from the frontier of India brought the traveller to the Icarus, which flowed into the Oxus; the voyage continued along that

## OXUS

river into the Caspian, and across it to the Cyras, from whence a land journey of no more than five days carried Indian merchandise to Phasis in Pontus. It would appear (Strab. L c.) that Patrocles, the admiral of Seleucus and Antiochus, had navigated the Caspian, and that the results of his observations were in perfect accord with these statements. With such definite accounts mistake is almost impossible; yet the country between the Caspian and the Osus has been crossed in several directions, and not only has the Oxus been anseen, but its course has been ascertained to take a direction to the NW. instead of to the SW.; and it flows not into the Caspian, but the sea of Aral. Sir A. Barnes (Travels in Bokihara, vol. ii. p. 188) doubts whether the Oxus could indeed have had any other than its present course, for physical obstacles oppose its entrance into the Caspian S. of the bay of Balkan, and N. of that point its natural receptacle is the Aral; and that this has been the case for nine centuries at least there is the evidence of Ibn Haukil (Istachry). (Oriental Geography, p. 239, ed. Onsely, London, 1800.) Singularly enough, Pomponius Mela (l. c.) describes very concisely the course of the Oxus almost as it is known at present. "Jaxartes et Oxos per deserta Scythiae ex Sogdianorum regionibus in Sy thicum sinum exeunt, ille suo fonte grandis, hic incursu aliorum grandior; et aliquundiu ad occasum ab oriente currens. juxta Dahas primum inflectitur: cursuque ad Septentrionem converso inter Amardos et Presicas os aperit."

The course of the Oxus or Djihoun, as it is termed in the Turkish and Persian works which treat upon its basin, or Amü Derya, as the natives on its banks call it, whether we consider the Badakchan branch or Kokicha to be its source, or that which rises in the Alpine lake of Sir-i-kol, on the snowcovered heights of the Tartaric Cancasus of Pamir, has a direction from SE. to NW. The volume of its waters takes the same course from $37^{\circ}$ to $40^{\circ}$ lat. with great regularity from Khoondooz to Chadris. About the parallel of $40^{\circ}$ the Oxus tarns from SSE. to NNW., and its waters, diminished by the numerous channels of irrigation which from the days of Herodotus (iii. 117) have been the only means of fertilising the barren plains of Khworizm, reach the Aral at $43^{\circ} 40^{\prime}$. Mannert (vol. iv. p. 452) and others have seen in the text of Pomponius Mela a convincing proof that in his time the Oxas had no longer communication with the Caspian. But it can hardly be supposed that the commerce of India by the Caspian and the Oxus had ceased in the little interval of time which separates Mela from Strabo and M. Varro. Besides, the statement of the Roman geographer remains singularly isolated. Ptoleny (l. c.), less than a century after Mela, directs the Caspian again from E. to W. into the Caspian. The lower course of the river, far from following a direction from S. to $\mathbf{N}$., is represented, in the ancient maps, which are traced after Ptoleny's positions, as flowing from ENE.-WSW. But a more convincing proof has been brought forward by M. Jaubert (Mém. sur l'Ancien Cours de l'Oxus, Journ. Asiatique, Dec. 1833, p. 498), who opposes the authority of Hamdallah, a famous geographer of the 14th century, whom he calls the Persian Eratosthenes, who asserted that while one branch of the Oxus had its débouche into the sea Khorcarcam (Aral), there was a branch which pursued a W. course to the Caspian. It should be observed that Jenkinson (Purchas, vol. iii. p. 236; Hakluyt, vol.i. p. 368), who visited the Caspian in 1559, also says that
the Oxus formerly fell into the gulf of Ballan. He is the anthor of the story that the Turkomans, in the hope of preventing the diminution of its waters in the upper part of its course, dammed up the mouth of the river. Eridence still more positive of the "débouche" into the Caspian of a considerable river which is now dry, is affiorded by observations on the sea-coast, particularly in the Bay of Balkan. The earliest of these is the survey of that bay by Captain Woodrootfe, in 1743, by order of Nadir Shah, who lays down the "embouchure" of a river which he was told was the Oxus. (Hanway, Trav. vol.i. p. 130.) The accuracy of his survey has been confirmed by the more elaborate investigations of the Russian surveyors, the results of which are embodied in the Periplus of the Caspian compiled by Eichwald (Alle Geogr. d. Casp. Meeres, Berlin, 1838), and these leave no doubt that a river, which could have been no other than the Oxus, formerly entered the Caspian at the SE. of the Bay of Balkan by two branches ; in one of these there are still pools of water; the other is dry. How far they may be traceable inland is yet to be ascertained; but enough has been determined to justify the belief of the ancient world, that the Oxus was a channel of communication between India and W. Asia. The ancients describe Alexander as approaching the river from Bactra, which was distant from it 400 stadia; their estimate is correct, and there are no fables about the breadth of the river. Arrian, who follows Aristobulus, says that it was 6 stadia. The very topography of the river's bank may almost be traced in Cartius ; for tbere are low and peaked hillocks near that passage of the Oxus, while there are none below Kilef. He adds that the Oxus was a muddy river that bore much slime along with it ; and Burnes (vol.ii. p. 7) found that one-fortieth of the stream is clay suspended in water. Polybius' (l.c.) statement about the impetuous course of the river and of its falls is untrue, as its channel is remarkably free from rocks, rapids, and whirlpools. He has a strange story about the manner in which the Aspasii enter Hyrcania, either noder the vault formed by the fall of the waters (comp. Strab. p. 510), or over its submerged stream. It is still a popular belief that the waters of the Aral pass by a subterraneous channel to the Caspian. At Kara Goombuz, where the caravans halt, between the two seas, it is said by some that the water is heard rushing beneath. (Burnes, vol. ii. p. 188.) The conclusions to which Von Humboldt (Asie Centrale, vol. ii. pp. 162-197) arrived as to the physical canses which may have interrapted the connection between the Caspian and the Oxus are given in the article Jaxaktes. For all that concerns the modern geography of the basin of the Oxus the travels of our countrymen, to whom we owe most of our real knowledge of these countries, should be consulted -Elphinstone, Burnes, Wood, and Lord. Professor Wilson (Ariana, pp. 142 145) has treated this long-vexed question with great ability, and shown that there is every reason for believing the statements of the ancients that the Oxus was once the great highway of nations, and gave an easy access to the great Aralo-Caspian basin.
[E.B. J.]
OXYBII ('O૬úsiot), "a part of the Ligyes," as Stephanus says (8. v.), on the authority of Quadratus. Strabo (p. 185) terminates his description of the coast of Gallia Narbonensis, in which he proceeds from west to east, by mentioning the harbour Oxybius, so called from the Oxybii Ligyes. The

Oxybii were a Ligurian people on the south coast of Gallia Narbonensis; but it is not easy to fix their position precisely. They were west of the Var and not far from it, and they were near to or bordered on the Deciates. The Oxybii had a town Aegitna, but its position is unknown. A brief sketch of the history of this people is written under Deciates. Pliny (iii. c. 4) places the Oxybii east of the Argenteus river (Argents) and west of the Deciates. The Oxybii, therefore, occupied the coast east from Frejus as far as the border of the Deciates, who had the remainder of the coast to the Vur. Antipolis (Antibes) was in the country of the Deciates.
[G. L.]
OXYDRACAE ('O̧ $\cup \delta \rho \alpha \alpha_{k}$ ), a great nation of the Panjab, who, with the Malli, occupied the banks of the Hydaspes and Acesines, and strenuously resisted the advance of Alexander through their country. It was a common belief of the ancients, that it was in 2 battle with these people that Ptolemy saved the life of Alexander, and hence obtained the name of Soter. (Steph. B.) Arrian, however, transfers the story to the siege of the Malli (Multán), where Alexander was in imminent danger of his life and was severely wounded (vi. 11). The name is written in different ways by different writers. Thus Strabo writes it Sydracae (xv. p. 701), in which Pliny concurs (xii. 6), who makes their country the limit of Alexander's advance eastward; in Diodorus they appear under the form of Syracusae (xvii. 98); lastly, in Orosius as Sabagrae (iii. 19). The name is clearly of Indian origin ; hence it has been conjectured by Pott, that the titles commencing in this manner represent the Hellenized form of the Sanscrit Csathro (king) corresponding with the Zend Csathra. (Putt, Etym. Forsch. p. lxvii.)

OXYDRANCAE ('Oॄ̧uঠ̃pâyкai), a tribe of ancient Sogdiana, appear to have occupied the district to the N. of the Oxus, between that river and the Jaxartes. (Ptol. vi. 12. § 4.)
[V.]
OXYMAGIS ('Ó̧uncyis, Arrian, Indic. 4), a river which flowed into the Ganges, according to Arrian, in the territory of the Pazalac. The same people are mentioned by Pliny (vi. 19) and Ptolemy (vii. 2. § 15) under the name of Passalae; and may be identified with the Sanscrit Pankala, and as dwelling near Canjacubga, in the plain country between the Sumna and the Ganges. In the immediate neighbourhood is the river Ixumati, which has been doubtless Graecized into Oxumagis. The Sanscrit appellation means "abonnding in sugarcane," which applies perfectly to the land through which it flows. (Cf. Ritter, Asien, ii. p. 847; Schwanbeck, Fragm. Megasthenis, p. 28.) [V.]

OXYNEIA ('O̧̧ýveia), a town of Thessaly, sitnated on the Ion, a tributary of the Peneins, and perhaps the capital of the Talares, occupied probably the valley of Miriza. It is described by Strabo as distant 120 stadia from Azorus. (Strab. vii. p. 327 ; Leake, Northers Greece, vol. iv. p. 279.)

OXYRYNCHUS ('O̧̧úpuřoos, Strab. xvii. p. 812; Ptol. iv. 5. § 59 ; Steph. B. s. v.; Amm. Marc. xxii. 16; Oxyrinchum, It. Anton. p. 157. ed. Parthey: Eth. 'Okupurxitns), was the chief town of the Nomos Oxyrynchites, in Lower Aegypt. The appellation of the nome and its capital was derived from a fish of the sturgeon species (Accipenser Sturio, Linnacus; Athen. vii. p. 312), which was an object of religious worship, and had a temple dedi-

## PACTYE.

cated to it. (Aelian, Hist. An. x. 46; Plut. Is. et Osir. c. 7.) The town stood nearly opposite Cynopolis, between the western bank of the Nile and the Joseph-canal, lat. $28^{\circ} 6^{\prime}$ N. At the village of Belineseh, which stands on part of the site of Oxyrynchus, there are some remains - broken columns and cornices - of the ancient city (Jomard, Descript. de CEgypte, vol. ii. ch. 16. p. 55 ; Champollion, [Egypte, vol. i. p. 303, seq.); and a single Corinthian column (Dénon, TEgypte, pl. 31), without leaves or volutes, partly buried in the sand, indicates a structure of a later period, probably of the age of Diocletian. Oxyrynchas became the site of an episcopal see, and Apollonius dated from thence an epistle to the Council of Seleuceia (Epiphan. Haeres. lxxiii.) Roman coins were minted at Oxyrynchus in the age of Hadrian and Antoninus Pius. (1.) Hadrian, with the reverse of Pallas, holding in her right hand a statuette of Victory, in her left a spear; or, (2.) Serapis holding a stag in his right hand. (3.) Antoninus, with a reverse, Pallas holding in her right hand an axe, in her left a statuette of Victory. (Eckhel, vol. iv. p. 112.)
[W. B. D.]
OZE'NE ('O Śn $\eta \eta$, Peripl. M. Erythr. c. 48, ed. Muiller), the principal emporium of the interior of the district of W. India anciently called Limyrica. There can be no doubt that it is the Sanscrit $U_{j}$ jáini, the present Oujein. This place is held by all Indian authors to be one of great antiquity, and a royal capital,-as Ptolemy calls it,-the palace of a king Tiastanes (vii. 1. § 63). We know for certain that it was the capital of Vikramaditya, who in b. C. 56 expelled the Sacae or Scythians from his country, and founded the well known Indian aera, which has been called from this circumstance the Saca aera. (Lassen, de Pentap. p. 57; Bohlen, Alte Ind. i. p. 94; Ritter, v. p. 486.) The author of the Periplus states that great variety of commerce was sent down from Ozene to Barygaza (l. c.).
[V.]
O\%OGARDANA, a town in the middle of Mesopotannia, recorded by Ammianus, in his account of the advance of Julianus through that country (xxiv. c. 2). He states that the inhabitants preserve there a throne or seat of judgment which they say belonged to Trajan. The same story is told in almost the same words by Zosimus of a place he calls Zaragardia (iii. 15). The place cannot now with certainty be identified; but Mannert thinks it the same as shortly afterwards bore the name of Pa coria, from Pacorus (v. 2. p. 241); and Reichard holds it to be the same as Is or Izannesopolis (the present Hit).
[V.]

## P.

## PaCATIANA. [Phrygia.]

PACHNAMU'NIS (Maxpapovvis, or Maxvev$\mu o v v i s$, Ptol. iv. 5. § 50 ; Пaरvє $\mu \delta{ }^{\prime} \eta s$, Hierocles, p. 724), the principal town of the Sebennytic nome in the Aegyptian Delta, lat. $31^{\circ} 6^{\prime} \mathrm{N}$. It stood on the eastern shore of the Lake Butos, and very near the modern village of Handahur. (Champollion, lEgypte, vol. ii. p. 206.)
[W. B. D.]
PACHY'NUS (Háxuvos: Capo Passaro), a celebrated promontory of Sicily, forming the extreme SE. point of the whole island, and one of the three promontories which were supposed to have given to it the name of Trinacria. (Ovid, Fast. iv. 479, Met. xiii. 725; Dionys. Per. 467-472; Scyl. p. 4. § 13;

Pol. i. 42; Strab. vi. pp. 265, 272, \&cc; Plin. iii. 8. s. 14; Ptol. iii. 4. § 8; Mela, ii. 7. § 15.)

All the ancient geographers correctly describe it as extending out towards the S. and E. so as to be the point of Sicily that was the most nearly opposite to Crete and the Peloponnese. It is at the same time the southernmost point of the whole island. The headland itself is not lofty, but formed by bold projecting rocks (projecta saxa Puchyni, Virg. Aen. iii. 699), and immediately off it lies a small rocky island of considerable elevation, which appears to have been generally regarded as forming the actual promontory. This explains the expression of Nonnus, who speaks of " the island rock of the seagirt Pachynus." (Dionys. xiii. 322.) Lycophron also has a similar phrase. (Alex. 1181.)

We learn from Cicern (Verr. v. 34) that there was a port in the inmediate neighbourhood of the promontory to which he gives the name of Portus Pachyni: it was here that the fleet of Verres was stationed ander his officer Cleomenes, when the news that a squadron of pirates was in the neighbouring Port of Ulysses (Portus Odysseae) caused that commander to take to flight with precipitation. The Port of Ulysses is otherwise unknown; but Ptolemy gives the name of Promontory of Ulysses ('O反vareia akpa, Ptol. iii. 4. § 7) to a point on the S. coast of the island, a little to the W. of Cape Pachynus. It is therefore probable that the Portus Pachyni was the one now called Porto di Palo, immediately adjoining the promontory, while the Portus Odysseae may be identified with the small bay or harbour of $L$.a Marza about 6 miles distant. There are, however, several rocky coves to which the name of ports may be applied, and the determination must therefore be in great measure conjectural. (Smyth's Sicily, Pp. 181,185,186.) The convenience of this port at the extreme SE. point of the island caused it to be a frequent place of rendezvous and station for fleets approaching Sicily; and on one occasion, during the Second Punic War the Carthaginian commander Bomilcar appears to have taken up his post in the port to the W. of the promontory, while the Roman fleet lay immediately to the N . of it. (Liv. xxiv. 27, xxv. 27, xxxvi. 2.)
[E. H. B.]
PACTO'LUS (Пaкт $\omega \lambda$ bs), a small river of Lydia, which flows down from Mount Tmolus in a northern direction, and, after passing on the west of Sardis, empties itself into the Hermus. (Herod. v. 101; Xenoph. Cyrop. vi. 2. § 1, vii. 3. § 4, Ages. i. 30; Strab. xii. pp. 554, 521 , xiii. p. 625, foll.; Ptol. v. 2. § 6; Plin. v. 30.) In ancient times the Pactolus had carried in its mud, it is said, a great quantity of small particles of gold-dust, which were carefully collected, and were believed to have been the source of the immense wealth possessed by Croesus and his ancestors; but in Strabo's time gold-dust was no longer found in it. The gold of this river, which was hence called Chrysorrhoas, is often spoken of by the poets. (Soph. Phil. 392; Dionys. Perieg. 831; Hom. Jymn. in Del. 249 ; Virg. Aen. x. 142 ; Horat. Epod. xv. 20; Ov. Met. xi. 85, \&c.; Senec. Phoen. 604; Juven. xiv. 298; Silius It. i. 158.) The little stream, which is only 10 feet in breadth and scarcely 1 foot deep, still carries along with it a quantity of a reddish mud, and is now called Sarabat. [L. S.]

PACTYE (Пaктún, Herod. vi. 36 ; Strab. vii. p. 331), a town of the Thracian Chersonese, on the coast of the Propontis, 36 stadia from Cardia, whither Alcibiades retired after the Athenians had for the secoud time deprived him of the command.

## PACTYICE.

PADUS.
509
(Diod. xxii. 74 ; Nepos, Alc. 7 ; cf. Plin. iv. 18 ; Scyl. p. 28.) Perhaps St. George. [T. H. D.]

PACTYICE (Пактüıkt), a district of NorthWestern India, which, there is every reason to suppose, must have been nearly the same as the modern Kashmir, bat probably extended westward across the Indus. It is mentioned by Herodotus with that amount of uncertainty which attaches to almost all that he relates of the far East. Thus in the catalogue of the produce of the different satrapies of the Persian empire, Pactyice is reckoned after Bactriana, and is connected with the Armenians, which gives it an extent too far to the W. (iii. 93). Again, in his account of the army of Xerses, Herodotus mentions the Pactyes in connexion with the Sagartii, and places them under the command of a Persian (vii. 6i). And in the subsequent description of the former people, he states that their dress is the same as that of the Pactyes (vii. 85). Evidently, therefore, he bere imagines the country and the people to have occupied a district to the N. and NE. of Persia. Agsin, Herodotus states (iii. 102) that the bravest of the Indian tribes are those who are in the immediate neighbourhood of the city of Caspatyrus and Pactyice; and he connects the same two places together where he states (iv. c. 44) that the celebrated voyage of Scylax of Caryanda, which was promoted by Dareius, the son of Hystaspes, commenced from the same localities. Now we know that Hecataens (ap. Sleph. B. s. v.) placed Caspatyrus in the country of the Gandarii (Fragm. p. 94, ed. Klausen): hence the strong inference that Pactyice was part of Gandarica, if not, as Larcher has supposed, actually the same.
[V.]
PACYRIS. [Carcina]
PADAEI. [India, p. 50, b.]
PADARGUS (Hádapyos, Arrian, Indic. c. 39), a small stream of Persis, which appears to have flowed into the Persian Gulf near the present Abushir. It is not possible to identify this and some other names mentioned by Arrian from the Journals of Nearchus, owing to the physical changes which have taken place in the coast-line.
[V.]
PADINUM, a town of Gallia Cispadana, known only from Pliny, who mentions the Padinates among the municipia of that region (Plin. iii. 15. s. 20). But he affords us no clue to its position. Cluver would identify it with Bondino, between Ferrara and Mirandola, but this is a mere conjecture. (Unver. Ital. p. 282.)
[E. H. B.]
PADUS (Há 0 : : Po), the principal river of Northern Italy, and much the largest river in Italy altogether. Hence Virgil calls it "fluviorum rex" (Georg. i. 481), and Strabo even erroneously terms it the greatest river in Europe after the Danube. (Strab. iv. p. 204.) It has its sources in the Monte Viso, or Mons Vesulus, one of the highest summits of the Western Alps (Plin. iii. 16. s. 20; Mel. ii. 4. § 4), and from thence to the Adriatic has a course of above 400 miles. Pling estimates it at 300 Roman miles without including the windings, which add about 88 more. (Plin. iii. 16. s. 20.) Both statements are beneath the truth. According to modern authorities its course, including its windings, is calculated at 380 Italian. or 475 Roman miles. (Rampoldi, Die. Topogr. d' Italia, vol. iii. p. 284.) After a very short course through 2 mountain valley it descends into the plain a few miles from Saluzzo, and from thence flows without interruption through a plain or broad level valley all the way to the sea. Its course from Saluzzo, as far as Chi-
vasso (throngh the district of the ancient Vagienni and Taurini), is nearly NE ; but after rounding the hills of the Monferrat, it turns due E., and pursues this course with bat little variation the whole way to the Adriatic. The great plain or valley of the $P o$ is in fact one of the most important physical features of Italy. Bounded on the N. by the Alps, and on the S. by the Apennines, both of which ranges have in this part of their course a general direction from W. to $E$., it forms a gigantic trough-like basin, which receives the whole of the waters that flow from the sonthern slopes of the Alps and the northern ones of the Apennines. Hence, as Pliny justly observes (l. c.), there is hardly any other river which, within the same space, receives so many and such important tributaries. Those from the north, on its left bank, are the most considerable, being fed by the perpetual snows of the Alps; and many of these form extensive lakes at the points where they first reach the plain; after quitting which they are deep and navigable rivers, though in some cases still very rapid. Pliny states that the Padus receives in all thirty tributary rivers, but it is difficult to know which he reckons as such; he himself enumerates only seventeen; but this number can be increased almost indefinitely, if we include smaller streams. The principal tributaries will be here enumerated in order, beginning from the source, and proceeding along the left bank. They are: 1. the Clusius (Chiusone), not noticed by Pliny, int the name of which is found in the Tabula; 2. the Duria, commonly called Duria Minor, or Dora Riparia; 3. the Stura (Stura); 4. the Orgus (Orco); 5. the Duria Major, or Bantica (Dora Baltea), one of the greatest of all the tributaries of the Padus ; 6. the Sesites (Sesia) ; 7. the Ticinus (Ticino), flowing from the Lacus Verbanus (Lago Maggiore); 8. the Lamber or Lambrus (Lambro), a much less considerable stream, and which does not rise in the high Alps; 9. the Addua ( $A d d a$ ), flowing from the Lacus Larius or Lago di Como; 10. the Ollius (Oglio), which flows from the Lacus Sebinus (Lago $d$ Iseo), and brings with it the tributary waters of the Mela (Mella) and Clusius (Chiese); 11. the Mincius (Mincio), flowing from the Iago di Garda, or Lacus Benacus. Below this the Po cannot be said to receive any regular tributary; for though it communicates at more than one point with the Tartaro and Adige (Athesis), the channels are all artificial, and the bulk of the waters of the Adige are carried out to the sea by their own separate channel. [Athesis.]

On the southern or right bank of the Padus its principal tributaries are: 1. the Tanarus (Tanaro), a large river, which has itself received the important tributary streams of the Stura and Bormida, so that it brings with it almost all the waters of the Maritime Alps and adjoining tract of the Ligurian Apennines; 2. the Scrivia, a considerable stream, but the ancient name of which is anknown; 3. the Trebin (Trebbia), flowing by Placentia; 4. the Tarus (Taro); 5. the Nicia (Enza): 6. the Gabellus of Pliny, called also Secia (Secchia); 7. the Scultensa, now called the Panaro; 8. the Rilenus (Reno), flowing near Bulogna. To these may be added several smaller streams, viz.: the Idex (Idice), Silarus (Sillaro), Vatrenus (Plin., now Santerno), and Sinnus (Sinno), all of which discharge themselves into the soathern arm of the Po, now called the Po di Primaro, and anciently known as the Spineticum Ostium, below the puint
where it separates from the main stream. Several smaller tributaries of the river in the highest part of its course are noticed in the Tabula or by the Geographer of Ravenna, which are not mentioned by any ancient suthor; but their names are for the most part corrupt and uncertain.

Though flowing for the most part through a great plain, the Padus thus derives the great mass of its waters directly from two great mountain ranges, and the consequence is that it is always a strong, rapid, and turbid stream, and has been in all ages subject to violent inundations. (Virg. Georg. i. 481; Plin. l.c.) The whole soil of the lower valley of the Po is indeed a pure alluvial deposit, and may be considered, like the valley of the Mississippi or the Delta of the Nile, as formed by the gradual accumulation of mud, sand, and gravel, brought down by the river itself and its tributary streams. But this process was for the most part long anterior to the historical period; and there can be no doubt that this portion of Italy had already acquired very much its present character and configuration as early as the time of the first Etruscan settlements. The valley of the Padus, as well as the river itself, are well described by Polvbius (the earliest extant author in whom the Homan name of Padus is found), as well as at a later period by Strabo and Pliny. (Pol. ii. 16; Strab. iv. pp. 203, 204, v. p. 212; Plin. iii. 16. 8. 20.) Considerable changes have, however, taken place in the lower part of its course, near the Adriatic sea. Here the river forms a kind of great delta, analogous in many respects to that of the Nile; and the phenomenon is complicated, as in that case, by the existence of great lagunes bordering the coast of the Adriatic, which are bounded by narrow strips or bars of sand, separating them from the sea, though leaving open occasional channels of communication, so that the lagunes are always salt and affected by the tides, which are more sensible in this part of the Adriatic than in the Mediterranean. (Strab. v. p. 212.) These lagunes, which are well described by Strabo, extended in his time from Kavenna to Altinum, both of which cities stood in the lagunes or marshes, and were built on piles, in the same manner as the modern Venice. But the whole of these could not be fairly considered as belonging to the Delta of the Padas; the more northerly being formed at the mouths of other rivers, the Athesis, Meduacus, \&ce., which had no direct or natural communication with the great river. They all, however, communicated with the Padus, and with one another, by channels or canals more or less artificial; and as this was already the case in the time of Pliny, that author distinctly reckons the mouths of the Padus to extend from Ravenna to Altinum. (Plin. l.c.) From the earliest period that this tract was occupied by a settled people, the necessity must have been felt of embank. ing the various arms and channels of the river, for protection against inundation, as well as of constructing artificial cuts and channels, both for carrying off its superfluous waters and for purposes of communication. The earliest works of this kind are ascribed to the Etruscaus (Plin. l.c.), and from that time to the present day, they have been carried on with occasional interruptions. But in addition to these artificial changes, the river has from time to time burst its banks and forced for itself new channels, or diverted the mass of its waters into those which were previously unimportant. The most remarkable of these changes which is recorded with certainty, took place in 1152, when the main stream
of the $P_{0}$, which then flowed S. of Ferrara, suddenly changed its course, and has ever since flowed about 3 miles N . of that city. Hence it is probable that all the principal modern mouths of the Po, from the Po di Goro to the Po di Levante, were in ancient times comparatively inconsiderable.

Polybius (ii. 16) describes the Padus as having only two principal mouths, which separated at a place called Trigaboli (the site of which cannot be determined); the one of these is called by him Padea (Maסba), and the other, which was the principal channel, and the one commonly narigated, be calls Olana or Holana (OXava). This last is in all probability the channel still called Po di Volano, which until the great inundation of 1152 , above noticed, was still the principal mouth of the Po. The other is probably the southernmost branch of the river, which separates from the preceding at Ferrara, and is carried at the present day by a wholly artificial channel into the sea at Primaro, from whence it derives the name of Po di Primaro. Its present mouth is about 15 miles N. of Ravenna; but it seems that in the days of Pliny, and probably in those of Polybius also, it discharged itself into the lagunes which then surrounded Ravenna on all sides. Pliny terms it Padusa, but gives it also the name of Fossa Augusta, from its course having been artificially regulated, and perhaps altered, by that emperor. (Plin. iii. 16. 8. 20.) The same author gives us a detailed enumeration of the mouths of the Padus as they existed in his day, but from the causes of change already adverted to, it is very difficult, if not impossible, to identify them with certainty.
They were, according to him: 1. the Padusa, or Fossa Augusta, which (he adds) was previously called Messanicus : this has now wholly ceased to exist. 2. The Portus Vatreni, evidently deriving its name from being the mouth of the river Vatrenus, which flowed from Forum Cornelii, just as the Po di Primaro is at the present day called the mouth of the Reno. This was also known as the Spineticum Ostium, from the once celebrated city of Spina, which was situated on its banks [Spina]. It was probably the same with the modern Po di Primaro. 3. Ostium Caprasiae. 4. Sagis. 5. Volane, previously called Olane: this is evidently the Olana of Polybius, and the modern Po di Volano; the two preceding cannot be identified, but must have been openings communicating with the great lagunes of Comucchio. 6. The Carbonaria, perhaps the Po di Goro. 7. The Fossio Philistina, which seems to have been an artificial canal, conveying the waters of the Tartarus, still called Tartaro, to the sea This cannot be identified, the changes of the months of the river in this part being too considerable. The whole of the present delta, formed by the actual mouths of the Po (from the Po di Goro to the Po di Levante), must have been formed since the great change of 1152 ; its progress for some centuries back can be accurately traced; and we know that it has advanced not less than 9 miles in little more thatn two centuries and a half, and at least 15 miles since the 12th century. Beyond this the delta belongs rather to the Adige, and more northern streams than to the Po; the next mouth being that of the main stream of the Adige itself, and just beyond it the Porto di Brondolo (the Brundulus Portus of Pliny), which at the present day is the mouth of the Brenta.*

[^22]The changes which have taken place on this line of coast are due not only to the pushing forward of the coast-line at the actual mouths of the rivers, but to the filling up of the lagunes. These in ancient times extended beyond Ravenna on the S.; but that city is now suriounded on all sides by dry land, and the lagunes only begin to the N . of the Po di Primaro. Here the lagunes of Comacchio extend over a space of sbove 20 miles in length, as far as the mouth of the Po di Voline; but from that point to the fort of Brondolo, where the Venetian lagunes begin, though the whole country is very low and marshy, it is no longer covered with water, as it obviously was at no distant period. It is now, therefore, impossible to determine what were the particular lagunes designated by Pliny as the Septem Maria, and indeed the passage in which he alludes to them is not very clear; but as he calls them Atrianorum Paludes, they would seem to have been in the neighbourhood of Adria, and n.ay probably have been the extensive lagunes (now converted into marshes) S. of Ariano. At a later period the name seems to have been differently used. The Itinerary speaks of the navigation "per Septem Maria [a Ravenna] Altinum usque," so that the name seems here to be applied to the whole extent of the lagunes ; and it is employed in the same sense by He rodian (viii. 7); while the Tabula, on the contrary, gives the name to a particular point or station on the line of ronte from Ravenna to Altinum. This line, which is given in much detail, must have been by water, though not so specified, as there never could have been a road along the line in question; but it is impassible to identify with any certainty the stations or points named. (Itin. Ant. p. 126; Tab. Peut.) [Venetia.]

Polybius speaks of the Padus as navigable for a distance of 2000 stadia, or 250 Roman miles from the sea. (Pol. ii. 16.) Strabo notices it as navigable from Placentia downwards to Ravenna, without saying that it was not practicable higher up: and Pliny correctly describes it as beginning to be navigable from Augusta Taurinorum (Turin), more than 120 miles above Placentia (Strab. v. p. 217; Plin. iii. 17. s. 21.) Ancient writers already remarked that the stream of the Padus was fuller and more abundant in summer than in winter or spring, owing to its being fed in great part by the melting of the snows in the high Alps. (Pul. ii. 16 ; Plin. iii. 16. s. 20.) It is not till after it has received the waters of the Duria Major or Dora Baltea, a stream at least as considerable as itself, that the Po becomes a really great river. Hence. it is about this point (as Pliny observes) that it first attains to a considerable depth. But at the present day it is not practicable for vessels of any considerable burden above Casale, abont 25 miles lower down.

The origin of the name of Padus is uncertain. According to Metrodorus of Scepsis (cited by Pliny, l. c.), it was a Celtic name, derived from the number of pine-trees which grew around its sources. The etymology seems very doubtful; but the fact that the name was of Celtic origin is rendered probable by the circumstance that, according both to Polybius and Pliny, the name given it by the Ligarians (the most ancient inhabitants of its banks) was Bodincus
the Po, and the changes which this part of the coast has undergone will be found in a note appended to Cuvier's Discours sur les Révolutions de las Surface des Glube, p. 75, 4to. edit. Paris, 1825.
or Bexlencus (Bठठeqkos, Pol. ii. 16; Plin. iii. 16. s. 20), a name said to be derived from its great depth. It is well known that it was early identified by the Greeks with the mythical Emidanus, and was commonly called by them, as well as by the Latin poets, by that name, even at a late period. The origin and history of this name have been already given in the article Eridancs. It may be added, that the poplar trees which figure in the fable of Phaëton (in its later form) evidently refer to the tall and graceful trees, still commonly known as Lombardy poplars, from their growing in abundance on the banks of the Po.
[E. H. B.]
PADUSA. [Padus.]
PADYANDUS (חaduavסos), a town in Cataonia, or the southernmost part of Cappadocia, about 25 miles to the south-east of Faustinopolis, near the pass of Mount Taurus known by the name of the Cilician Gates. (Ptol. v. 7. § 7.) The town, which was extended by the emperor Valens, is mentioned in the Itineraries, but its name assumes different furms ; as, Paduandus (Tab. Peut.), Podandos (It. Ant. p. 145), Mansio Opodanda (It. Hieros. p. 578), and Rhegepodandos (Hierocl. p 699). The place is described by Basilius (Epist.74) as one of the most wretched holes on earth. It is said to have derived its name from a small stream in the neighbourhood. (Const. Porphyr. Vit. Basil. 36 ; comp. Cedren. p. 575 ; Jo. Scylitz. Hist. pp. 829, 844.) The place is still called Podend.
[L. S.]
PAEA'NIA. [Attica, p. 332, b.]
PAEA'NIUM (Madaviov), a town in Aetolia, near the Achelous, a little S. of Ithoria, and N. of Oeniadae, which was on the other side of the river. It was only 7 stadia in circumference, and was destroyed by Philip, B. c. 219. (Polyb. iv. 65.) Paeanium was perhaps rebuilt, and may be the same town as Phana ( $\Phi \alpha \downarrow a$ ), which was taken by the Achaeans, and which we learn from the narrative in Pausanias was near the sea. (Paus. x. 18.) Stephanus mentions Phana as a town of Italy ; but for Módis 'Itanias, we ought probably to read пódis Aitmoías. (Steph. B. s. v. Фdעau.)

PAELO'NTIUM (Пai入ovtıoy, Ptol. ii. 6. § 33), a town of the Lungones in Asturia, variously identified with Aplaus, Pole de Lena, and Concejo do Pilonna.
[T. H. D.]
PAEMANI, mentioned in Caesar (B. G. ii. 4) with the Condrusi, Eburones, and Caeroesi, and the four penples are included in the name of Germani. D'Anville conjectures that they were near the Condrusi, who probably held the country which is now called Condroz [Condrusi.] The Paemani may have occupied the country called Pays de Fammenne, of which Durburg, Laroche on the Ourthe, and Rochefort on the Homme are the chief towns.
[G. L.]
PAEON (Пacóv, Scyl. p. 28), a town of Thrace, mentioned only by Scylax.
[T. H. D.]
PAE'ONES (Maioves, Hom. П. 84.5, xvi. 287, xvii. $348, ~ x x i .139$; Herod. iv. 33, 49, v. 1, 13, 98, vii. 113, 185; Thuc. ii. 96; Strab. i. pp. 6, 28; vii. pp. 316, 318, 323, 329, 330.331 : Arrian, Ancb, ii. 9. § 2, iii. 12. §4; Plut. Alex. 39 ; Polyaen. Strat. iv. 12. § 3 ; Eustath. ad Hom. Il. xvi. 287 ; Liv, xlii. 51), a people divided into several tribes, who, before the Argolic colonisation of Emathia, appear to have occupied the entire country afterwards called Macedonia, with the exception of that portion of it which was considered a part of Thrace. As the Macedonian kingdom increased, the district called Paeonia
(Hauovia, Thuc. ii. 99 ; Polyb. r. 97, xxiv. 8; Strab. vii. pp. 313, 318, 329, 331; Ptol. iii. 13. § 28; Liv. xxxiii. 19, xxxvii. 17, xxxix. 54, xl. 3, xlv. 29; Plin. iv. 17, vi. 39) was curtailed of its dimensions, on every side, though the name still continued to be applied in a general sense to the grest belt of interior country which covered Upper and Lower Macedonia to the N. and NE., and a portion of which was a monarchy nominally independent of Macedonis until fifty years after the death of Alexander the Great. The banks of the " wide-flowing Axius" seem to have been the centre of the Paeonian power from the time when Pyraechmes and Asteropaeus led the Paeonians to the assistance of Priam (Hom. ll. cc.), down to the latest existence of the monarchy. They appear neither as Macedonians, Thracians, or Illyrians, but professed to be descended from the Teucri of Troy. When Megabazus crossed the river Strymon, he conquered the Paeonians, of whom two tribes, called the Siropaeones and Paeoplae, were deported into Asia by express order of Dareius, whose fancy had been struck at Sardis by seeing a beautiful and shapely Paeonian woman carrying a vessel on her head, leading a horse to water, and spinning flax, all at the same time. (Herod. v. 12-16.) These two tribes were the Paeonians of the lower districts, and their country was afterwards taken possession of by the Thracians. When the Temenidae had acquired Emathia, Almopia, Crestonia, and Mygdonia, the kings of Paeonia still continued to rule over the country beyond the straits of the Axius, until Philip, son of Amyntas, twice reduced them to terms, when weakened by the recent death of their king Agis; and they were at length subdued by Alexander (Diodor. xix. 2, 4, 22, xvii. 8); after which they were probably submissive to the Macedonian sovereigns. An inscribed marble which has been discovered in the acropolis of Athens records an interchange of good offices between the Athenians and Audoleon, king of Paeonia, in the archonship of Diotimus, B. c. 354, or a few years after the accession of Philip and Audoleon to their respective thrones. The coins of Audoleon, who reigned at that time, and adopted, after the the death of Alexander, the common types of that prince and his successors, - the head of Alexander in the character of young Heracles, and on the obverse the figure of Zeus Aëtophorus, - prove the civilisation of Paeonia under its kings. Afterwards kings of Paeonia are not heard of, so that their importance mast have been only transitory ; but it is certain that during the troublous times of Macedonia, that is, in the reign of Cassander, the principality of the Paeonians existed, and afterwards disappeared. At the Roman conquest the Paeonians on the W. of the Axius were included in Macedonia Secunda. Paeonia extended to the Dentheletae and Maedi of Thrace, and to the Dardani, Penestae, and Dassaretii of Illyria, comprehending the various tribes who occupied the upper valleys of the Erigon, Axius, Strymon and Augitas as far $S$. as the fertile plain of Siris. Its principal trithes to the E. were the Odornanti, Aestraei, and Agrianes, parts of whose country were known by the names of Parstrymonia and Parnreia, the former containing probably the valleys of the Upper Strymon, and of jts great tributary the river of Strimitza, the latter the adjacent mountains. On the W. frontier of Preonia its subdivisions bordering on the Penestae and Dassaretii were Denriopus and Pelagonia, which with Lyncestis comprehended the entire country watered by
the Erigon and its branches. (Leake, Northern Greece, vol. iii. pp. 212, 306, 462, 470.) [E. B. J.] PAEO'NIA. [PaEones.]

PAFSICI. [Astures, p. 249.]
PaEstanus sinus. [Paestum.]
PAESTUM (Haíatov, Ptol.; Пauatós, Strab.: Eth. Пauotavds, Paestanus: Ruins at Pesto), a city of Lucania, on the Tyrrhenian sea, about 5 miles S . of the mouth of the Silarns. It was originally a Greek coiony, named Posidonia (Пoбeióovia: Eth. Hoget $\delta \omega \nu$ did $\eta$ ), and was founded by a colony from Sybaris, on the opposite coast of Lucania. (Strab. .. p. 251 ; Scymn. Ch. 245; Scyl. p. 3. § 12.) The date of its foundation is uncertain, but it may probably be referred to the period of the chief prosperity of Sybaris, when that city ruled over the whole of Lucania, from one sea to the other, or from 650 to 510 b.c. [Sybaris.] It may be observed, also, that Solinus calls Posidonia a Doric colony; and though his authority is worth little in itself, it is confirmed by the occurrence of Doric forms on coins of the city: hence it seems probable that the Doric settlers from Troezen, who formed part of the original colony of Sybaris, but were subsequently expelled by the Achaeans (Arist. Pol v. 3), may have mainly contributed to the establishment of the new colony. According to Strabo it was originally founded close to the sea, but was subsequently remored further inland (Strab. l.c.); the change, however, was not considerable, as the still existing ruins of the ancient city are little more than half a mile from the coast.

We know scarcely anything of the early history of Posidonia. It is incidentally mentioned by Herodotus (i. 167) in a manner that proves it to have been already in existence, and apparently as a considerable town, at the period of the foundation of the neighbouring Velia, about B.c. 540. But this is the only notice of Posidonia until after the fall of its parent city of Sybaris, B. c. 510. It has been supposed by some modern writers that it received a great accession to its popalation at that period; but Herodotus, who notices the Sybarites as settling on that occasion at Laiis and Scidrus, does not allude to Posidonia. (Herod. vi. 21.) There are, indeed, few among the cities of Magna Graecia of which wo hear less in history; and the only evidence of the flourishing condition and prosperity of Posidonia, is to be found in the numbers of its coins and in the splendid architectural remains, so well known as the temples of Paestum. From its northerly position, it must have been one of the first cities that suffered from the adrancing power of the Lucanians, as it was certainly one of the first Greek colonies that fell into the hands of that people. (Strab. v. p. 251.) The date of this event is very uncertain; but it is probable that it must have taken place before B.c. 390, when the city of Laüs was besieged by the Lucanians, and had apparently become the bnlwark of Magna Graecia on that side. [Magna Graecia.] We learn from a curious passage of Aristoxenus (ap. Athen. xiv. p. 632) that the Greek inhabitants were not expelled, but compelled to subinit to the authority of the Lucanians, and receive a barbarian colony within their walls. Tbey still retained many of their customs, and for ages afterwards continued to assemble at a certain festival every year with the express purpose of bervailing their captivity, and reviving the traditions of their prosperity. It would appear

PAESTUM.
from Livy (viii. 17), though the passage is not quite distinct, that it was recorered by Alexander, king of Epirus, as late as B. c. 330; but if so, it certainly soon fell again into the hands of the barbarians.

Posidonia passed with the rest of Lucania into the hands of the Romans. We find no mention of it on this occasion; but in B. c. 273, immediately after the departare of Pyrrhus from Italy, the Romans established a colony there for the security of their newly acquired territory on this side. (Liv. Epit. xiv.; Vell. Pat. i. 14 ; Strab. r. p. 251.) It was probably at this period that the name was changed, or corrupted, into Paestum, though the change may have already taken place at the time when the city fell into the hands of the Lucanians. But, from the time that it became a Roman colony, the name of Paestum seems to have exclusively prevailed; and even its coins, which are inscribed with Greek characters, have the legend MAIL and MAIETANO. (Eckhel, vol. i. p. 158.) We hear but little of Paestum as a Roman colony: it was one of the Colonize Latinae, and distinguished itself by its unshaken fidelity throughout the Second Punic War. Thus the Paestani are mentioned as sending golden paterae as a present to the Roman senate just before the battle of Cannae (Liv. xxii. 36). Again in 8. C. 210 they furnished ships to the squadron with which D. Quintius repaired to the siege of Tarentum; and the following year they were among the eighteen colonies which still professed their readiness to farnish supplies and recruits to the Roman armies, notwithstanding the long-continued pressure of the war (Liv. xxvi. 39, xxrii.10.) Puestum was therefore at this period still a flourishing and considerable town, but we hear little more of it daring the Roman Republic. It is incidentally mentioned by Cicero in one of his letters ( Ep . ad Att. xi. 17); and is noticed by all the geographers as a still subsisting municipal town. Strabo, however, observes that it was rendered unbealthy by the stagnation of a small river which flowed beneath its walls (r. p. 251); and it was probably, therefore, already a declining place. But it was still one of the eight Praefecturae of Lucania at a considerably later period; and inscriptions attest its continued existence thronghont the Roman Empire. (Strab.l.c.; Plin. iii. 5. s. $10 ;$ Ptol. iii. 1. § 8; Lib. Colon. p. 209 ; Orell. Inscr. 135, 2492, 3078: Bull. d. Inst. Arch. 1836, p. 152.) In some of these it bears the title of a Colonia; but it is uncertain at what period it attained that rank : it certainly cannot refer to the original Latin colony, as that must have become merged in the manicipal condition by the effect of the Lex Julia. We learn from ecclesiastical authorities that it became a bishopric at least as early as the fifth century; and it is probable that its final decay and desolation was owing to the ravages of the Saracens in the tenth century. At that time the episcopal see was removed to the neighbouring town of Capaccio, in an elevated situation a few miles inland.

Psestum was chiefly celebrated in ancient times for its roses, which possessed the peculiarity of fowering twice a year, and were considered as surpessing all others in fragrance. (Virg. Georg. iv. 118; Ovid, Met. xv. 708; Propert. iv. 5. 59; Martial, iv. 41. 10, vi. 80. 6; Auson. Idyll. 14. 11.) The roees that still grow wild among the ruins are said to retain their ancient property, and flower regularly both in May and November.

PAESTUM.
The site of Paestum appears to have continued wholly uninhabited from the time when the episcopral see was removed till within a very recent periud. It was not till the middle of the last century that attention was drawn th the ruins which are now so celebrated. Though they can hardly be said to have been then first discovered, as they must always have been a conspicuous object from the Bay of Salerno, and could not but have been known in their immediate neighbourhood, they were certainly unknown to the rest of Europe. Even the diligent Claverius, writing in 1624, notices the fact that there were ruins which bore the name of Pesto, without any allusion to their character and inportance. (Cluver. Ital. p. 1255.) They seem to have been first visited by a certain Count Gazola, in the service of Charles VII., King of Naples, before the middle of the last century, and were described by Antonini, in his work on the topography of Lucania (Naples, 1745), and noticed by Mazzucchi, who has inserted a dissertation on the history of Paestum in his work on the Heraclean Tables (pp. 499-515) published in 1754. Before the end of the century they becaine the subject of the special works of Magnoni and Paoli, and were visited by travellers from all parts of Europe. Among these, Swinburne in $17 \% 9$, has left a very accurate description of the ruins; and their architectural details are given by Wilkins in his Magna Graecia (fol. Cambr. 1807).
The principal ruins consist of the walls, and three temples standing within the space enclosed by them. The whole circuit of the walls can be clearly made out, and they are in many places standing to a considerable height ; several of the towers also remain at the angles, and vestiges of the ancient gates, which were four in number; one of these, on the $\mathbf{E}$. side of the town, is nearly perfect, and surmounted by a regularly constructed arch. The whole circuit of the walls forms an irregular polygon, about 3 miles in circumference. The two principal temples stand not far from the southerngate of the city. The finest andmost ancient of these is commonly known as the teinple of Neptune; but there is no authority for the name, beyond the fact that Neptune, or Poseidon, was unquestionably the tutelary deity of the city which derived from him its ancient name of Posidonia. The temple was hypaethral, or had its cella open to the sky, and is 195 feet long by 79 wide: it is remarkably perfect ; not a single column is wanting, and the entablature and pediments are almost entire. The style of architecture is Doric, but its proportions are heavier, and the style altogether more massive and solid than any other extant edifice of the kind. On this account some of the earlier antiquarians disputed the fact of its Greek origin, and ascribed it to the Phoenicians or Etruscans : but there is not a shadow of foundation for this; we have no trace of any settlement on the spot befure the Greek colony; and the architecture is of pure Greek style, though probably one of the most ancient specimens of the Doric order now remaining. About 100 yards from the temple of Neptune, and nearer to the south gate, is the second edifice, which on account of some peculiarities in its plan has been called a Basilica, but is unquestionably also a temple. It is of the kind called pseado-dipteral; but differs from every other ancient building known in haring nine columns at each end, while the interior is divided into two parts by a single range of columns running along the centre of the building. It was probably a temple consecrated to two different divinities, or rather, in $L \mathbf{L}$
fact, two temples united in one. It has 18 columns in each side, and is 180 feet long by 80 in width. The third temple, which is at some distance from the other two, nearer to the N . gate of the town, and is commonly known as the Temple of Ceres or Vesta (though there is no reason for either name), is much smaller than the other two, being only 108 feet in length by 48 in breadth: it presents no remarkable architectural peculiarities, but is, as well as the so-called Basilica, of much later date than the great temple. Mr. Wilkins, indeed, would assign them both to the Roman period: but it is difficult to reconcile this with the history of the city, which never appears to have been a place of much importance under the Roman rule. (Swinburne's Travels, vol. ii. pp. 131-138; Wilkins's Magna Graecia, pp. 55-67.)

The other remains are of little importance. The vestiges of an amphitheatre exist near the centre of the city; and not far from them are the fallen ruins of a fourth temple, of small size and clearly of Roman date. Excavations have also laid bare the foundations of many houses and other buildings, and the traces of a portico, which appear to indicate the site of the ancient forum. The remains of an aqueduct are also visible outside the walls; and numerous tombs (some of which are said to be of much interest) have been recently brought to light.

## PLAN OF PAFSTUM.

## A. Temple of Neptune.

B. Temple, commonly called Basilica.
C. Smaller temple, of Vesta (?).
D. Amphitheatre.
E. Other ruins of Roman time.

FF. Gates of the city.
G. River Salso.

The small river which (as alrendy noticed by Strabo), by stagnating under the walls of Paestum, rendered its situation so unhealthy, is now called the Salso : its ancient name is not mentioned. It forms extensive deposits of a calcareons stone. resembling the Roman travertin, which forms an excellent building material, with which both the walls and edifices of the city have been constructed. The malaria, which caused the site to be wholly abandoned during the middle ages, has already sensibly diminished, since the resort of travellers has again attracted a small population to the spot, and given rise to some cultivation.

About five miles from Paestum, at the mouth of the Silarus or Sele, stood, in ancient times, a celebrated temple of Juno, which, according to the tradition adopted both by Strabo and Pliny, was founded by the Argonauts under Jason (Strab. vi. p. 252 ;

Plin. iii. 5. 8. 10 ). It is probable that the worship of the Argive Hera, or Juno, was brought hither by the Troezenian colonists of Pusidonia. Pliny places the temple on the N. bank of the Silarus; Strabo, probably more correctly, on the $S$.

The extensive gulf which extends from the promontory of Minerva (the Punta della Campanella) to the headland called Posidium (the Punta di Licosa), and is now known as the Gulf of Salerno, derived its ancient name from the city of Paestum, being called by the Romans Paestanus Sinus, and by the Greeks the gulf of Posidonia (Moनeiocuvia-
 Plin. iii. 5. s. 10 ; Mel. ii. 4. § 9; Cic. ad Att. xvi. 6.)
[E.H.B.]

COINS OF PAESTUM.
PAESU'LA (Maıбovida), a town of the Turdetani in Hispania Baetica (Ptol. ii. 4. § 13.) It is identified by Ukert with Salteras, but its site is uncertain.

PAESUS (Marabs), an ancient town on the const of Troas, at the entrance of the Propontis, between Lampsacus and Parium. (Hom. I. ii. 828, v. 612; Herod. v. 117.) At one period it received colonists from Miletus ; but in Strabo's time (xiii. p. 589) the town was destroyed, and its inhabitants had transferred themselves to Lampsacus, which was likewise a Milesian colony. The town derived its name from the small river Paesus, on which it was situated, and now bears the name Beiram-Dere. [L. S.]

PAGAE. [Pegae.]
PAGALA ( $\tau d$ חardi人a, Arrian, Indic. c. 23,) a place on the coast of Gedrosia, to which the fleet of Nearchus came after leaving the river Arabis. It seems probable that it is the same as a place called Segada or Pegala by Philostratus, and which was also in the country of the Oritae (Vit. Apoll. iii. 54). It cannot be identified with any existing spot.
[V.].
PAGASAE (пarafal: also Pagasa, gen. -2e, Plin. iv. 8. s. 15; Mela, ii. 3. § 6; Prop. i. 20. 17: Eth. Marafaios, Pagasaeus), a town of Marnesia in Thessaly, situated at the northern extremity of the bay named after it. (Пaүaनचтıкдs ко́入тos, Scylax, p. 24; Strab. ix. p. 438; Пayaflrns, Dem. Phil. Epist. 159; Pagasaeus Sinus, Mela, L.c.; Pagasicus, Plin. l.c.) Pagasae is celebrated in mythology as the port where Jason built the ship Argo, and from which he sailed upon his adventurous voyage: henc some of the ancients derived its name from the construction of that vessel (from $\pi h \gamma r u m$ ), but otbers from the numerous and abnadant springs which were found at this spot. (Strab. ix. p. 436.) Pagasae was conquered by Philip, after the defeat of Onomarchus. (Dem. Ol. i. pp. 11, 13; Diod. xvi. 31. where fur Mayal we ought probably to read Maraaai.)

PAGASAEUS SINUS．
PALAEPOLIS．

On the foundation of Demetrias in b．c．290，Pagasae was one of the towns，whose inhabitants were trans－ ferred to the new city；but after the Koman conquest Pagasae was restored，and again became an important place．In the time of Strabo it was the port of Pherae，which was the principal city in this part of Thessaly．Pagasae was 90 stadia from Pherae，and 20 from Iolcos．（Strab．L．c．）The ruins of the ancient city are to be seen near Volo，which has given the modern name to the bay．The acropolis occupied the summit of some rocky heights abive Cape Anghistri，and at the foot of the rocks are many copious sources of water，of which Strabo speaks．But as these springs are rather saline to the taste，the city was provided in the Roman times with water from a distance by means of an aqueduct， the ruined piers of which are still a conspicuous object．（Leake，Northern Greece，vol．iv．p．368， seq．）

## Pagasaed sinus．［Pagasar．］

PAGRAE（Hárpaı），a town of Syria，placed by Ptolemy in the district of Pieria，near the Syrian gates（v．15．§ 12），but more particularly de－ scribed by Strabo，as adjoining Gindarus，the acro－ polis of Cyrrhestice．Pagrae he places in the district of Antiochis，and describes as a strong place near the ascent of the Amanus，on the Syrian side of the pass called Amanider Pylar［Vol．I．p．113］，the Syrian gates of Ptolemy（b．c．）．The plain of Antioch，adds Strabo，lies under Pagrae，through which flows the Arceuthus，the Orontes，and the Labotas．In this plain is also the dyke of Melea－ ger and the river Oenoparas．Above it is the ridge of Trapezae，so called from its resemblance to a table，on which Ventidius engaged Phranicates，ge－ neral of the Parthians．（xri．p．751．）The place is easily identified in medieval and modern geo－ graphy by the aid of Abulfeds and Pococke． Baghras，writes the former，has a lofty citadel，with fountains，and valley，and gardens；it is said to be distant 12 miles from Antioch，and as many from Iskanderim．It is situated on a mountain over－ hanging the valley of Charem，which Charem is distant two stages to the＇east．Baghras is distant less than a stage from Darbasak，to the south． （Tabula Syriae，p．120．）Pococke is still more par－ ticular in his description．He passed within sight of it between Antioch and Baias．After passing Caramaut，he turned to the west between the hills． ＂We saw also，about 2 miles to the north，the strong castle of Pagras on the hills；this was the ancient name of it in the Itinerary［Antonini］，in which it is placed 16 miles from Alexandria and 25 from Antioch；which latter is a mistake，for the Jerusulem Journey（calling it Pangrius）puts it more justly 16 miles from Antioch．As I have been inforned，a river called Sowda rises in the mountain to the west，runs under this place，$\ldots$ and falls into the lake of Antioch，＂－also called from it Buhr－el－Souda，otherwise Buhr－Agoule，＂the White Lake，＂from the colour of its waters．This Sonda ＂seems to be the river Arceuthas mentioned by Strabo，immediately after Pagrae，as running through the plain of Antioch．＂（Observations on Syria， vol．ii．p．173．）It is numbered 17 on the map of the gulf of Issus．［Vol．I．p．114．］［G．W．］

PAGUS（ndyos），a hill of Ionia，a little to the north of Sinyma，with a chapel of Nemesis and a spring of excellent water．（Paus．v．12．§ 1．）Modern travellers describe the hill as between 500 and 600 fett high，and as presenting the form of a cone from
which the point is cut off．（Hamilton，Researches， i．p．53，foll．）
［L．S．］
PAGYRI＇TAE（Пarvpitaı，Ptol．iii．5．§ 22），z people of European Sarnatia，whose position cannot be made out．Schafarik（Slav．Alt．vol．i．p．211） connects the termination of their name with the word ＂gura，＂which the Poles and other Russo－Slavonian stocks use for＂gora，＂＂mountain．＂［E．B．J．］

PALA＇CIUM（Пa入dktov），a fortress in the Tauric Chersonese，built by Scilurus，king of the Tauro－ Scythians，to resist the attacks of Mithridates and his generals．（Strab．rii．p．312．）The name， which it seems to have taken from his son l＇alacus （Strab．pp．306，309），still survives in the modern Balakildra，which Dr．Clark（Travels，vol．ii．p．219） inaccurately supposes to be derived from the Genoese ＂Bella Clava，＂＂The Fair Harbour．＂Its harbour was the Symbolon Portus（Zum6ódoy $\lambda 1 \mu \eta \nu$ ， Strab．vii．pp．308，309；Arrian，Peripl．p．20；Ptol． iii．6．§ 2 ；Plin．iv．26），or the Cembaro or Cem－ balo of the middle ages，the narrow entrance to which has been described by Strabo（l．c．）with such fidelity to nature．According to him，the harbour； together with that of Ctenus（Sebastopol），consti－ tuted by their approach an isthmus of 40 stadia； this with a wall fenced the Lesser Peninsula，having within it the city of Chersonesus The Sinces Portuosus of Pomponius Mela（ii．1．§ 3），from the position he assigns to it between Criumetopon and the next point to the W．，can only agree with Bala－ kliva，which is truly＂кa入ds $\lambda t \mu h \nu$ et promontoriis duobus includitur．＂Dubxis de Montpereux（Voyage autour $d u$ Caucase，vol．vi．Pp．115，220），in ac－ cordance with his theory of transferring the wander－ ings of Odysseus to the waters of the Euxine， discovers in Balaklíva the harbour of the giant Laestrygones（Odyss．x．80－99）；and this opinion has been taken up by more thar one writer．It is almost needless to say that the poet＇s graphic pic－ ture of details freshly drawn from the visible world， is as true of other land－locked basins，edged in by cliffs，as when applied to the greyish－blue，or light red Jura rocks，which hem in the entrance to the straits of Balakláva．
［E．B．J．］
PALAE，a town of Thrace，according to Lapie near Moussaldja．（Itin．Ant．p．568．）［T．H．D．］

PALAEA．1．（חa入aía），a place in the Troad on the coast， 130 stadia from Andeira．（Strab．xiii． p．614．）

2．（Пa入aıì к $\dot{\prime} \mu \eta$ ），in Laconia．［Pleiake］
PALAEBYBLOS（Ma入aibubios，Strab．xv．p． 755；Пa入ató8u\＆入os，Ptol．v．15．§ 21），a town of Phoenicia，which Strabo places after the Climax or promontory called Ras－Watta－Salnn，forming the N．extremity of the Bay of Kesruan．The site， which is unknown，was therefore probably between the Climax，in the steep cliffs of which it was neces－ sary to cut stepe－whence the name－and the river Lycus，among the hills which closely border the shore，and rise to the height of 1000 feet．Ptolemy （l．c．）calls it a city of the interior，and the Peu－ tinger Table places it 7 M．P．from Berytus，but does not give its distance from Byblos．（Kenrick， Phoenicia，p．12．London，1855．）［E．B．J．］

PALAEMYNDUS．［Myndis．］
PalaEobyblus［Palaebyblus．］
PALAEPHARUS，or PALAEPHARSALUS， that is either old Pharae or Pherae or old Pharsalus， according to the difference of the readings in the text of Livy（xxxii．13）．

PALAEPOLIS．［Neapolis．］

PALAERUS（Ha入atpós：Eth．Ha入aupeís），a town on the W．coast of Acarnania，on the Ionian sea，which is placed by Strabo between Leucas and Alyzia．Its exact site is unknown．Leake places it in the valley of Liradhi．In the first year of the Peloponnesian War（b．c．431）Palaerus was in al－ liance with the Athenians；and when the latter people took the neighbouring town of Sollium， which was 2 Corinthian colony，ther gave both it and its territory to the inhabitants of Palaerus． （Thuc．ii．30；Strab．x．pp．450，459．）

PALAESCEPSIS．［Scersis．］
PALAESIMUNDUM（Plin．vi．22．s．24），a great town in the ancient Taprobane（Ceylon），an account of which was given to the Romans by Annius Plo－ camus，who spent six months there during the reign of the emperor Claudius．According to him，it was situated on a river of the saine name，which，flowing from a great internal lake，entered the sea by three mouths．It is probable that it is represented by the present Trincomalee，in the neighbourlood of which are the remains of enormous ancient works for the regulation of the course of the river－now called the Mahavella－Ganga．（Brooke，Geogr．Journ．vol． iii．$p$ 223．）The name occurs under the form Palaesimundu in the Periplus Mar．Erythr．，and in Marcian＇s Peripl．Maris Exteri as the name of the island itself．Thus the first speaks of $\boldsymbol{\nu} \boldsymbol{\eta} \sigma o s, \lambda \in-$ rouín Ma入aucipoídiov，bat anciently Taprobane （c．61，ed．Müller）；and the second states that the island of Taprobane was formerly called Palaesi－ mundu，but is now called Salice（c．35，ed．Müller）． Pwlemy，and Stephanus，who follows hiin，state that
 Za入uch（vii．4．§ 1）．It is very probable，however， that this is in both cases to be considered as an erroneous reading，and that the true name was Palaesimundum．Lassen considers that it is de－ rived from the Sanscrit words Pali－Simanta，the Heal of the Holy Law．（Dissert．de Insula Tapro－ bane，p．14．）
［V．］
PALAESTE，a town apon the coast of Chaonia in Epeirus，at the southern foot of the Acroceraunian peak，where Cuesar landed from Brundusium，in order to carry on the war against Pompey in Illyria． （Lacan，Phars．v．460．）In this vicinity there is a inodern village，called Palasa；and there can there－ fore be little doubt that Lucan has preserved the real name of the place where Caear landed，and that there is a mistake in the MSS．of Caesar．where the name is written Pharsalus．（Caes．B．C．iii．6； comp．Leake，Northern Greece，vol．i．p．5．）

PALAESTI＇NA（ Пa入aiनTiv ：Eth．Пa入at－ orivos），the most commonly received and classical naine for the country，otherwise called the Land of Canaan，Judaea，the Holy Land，\＆c．This name has the authority of the prophet Isaiah，among the sacred writers；and was received by the earliest secular historians．Herodotus calls the Hebrews Syrians of Palestine；and states that the sea－border of Syria，inhabited，according to him，by Phoenicians from the Red Sea，was called Palaestina，as far as Egypt（vii．89）．He elsewhere places Syria Palaes－ tina hetween Phoenice and Egypt；Tyre and Sidon in Phoenice：Ascalon．Cadytis，lenysus in Palaestina Syriae；elsewhere he places Cadytis and Azotus simply in Syria（iv．39，iii．5，ii．116，157，i．105， iii．5）．

The name，as derived from the old inhabitants of the land，originally described only the sea－burder south of Mount Carmel，occupied by the Philistines
from the very enrliest perind，and daring the time of the Israelite kingdom（Exod．siii．17）；although it would appear that this district was partially occu－ pied by the cognate branches of the Canaanites． （Gen．x．14，19．）It afterwards came to be ased of the inland parts likewise，and that not only on the west of the Jordan，but also to the east，as far as the limits of the children of Israel ；and in this wider acceptation it will be convenient here to adnpt it；although it deserves to be noted that even so late as Josephus the name Palacatina was occasionally ased in its more restricted and proper sense，viz． of that part of the coast inhabited of old by the Philistines．（See the passages referred to in Reland， p．41，who devotes the nine first chapters of his work to the naines of Palestine，pp．1－51．）

## I．General Bolindaries，Soll，Climate

The general boundaries of Palestine，in this wider acceptation of the name，are clearly defined by the Mediterranean on the west，and the great desert， now called the Huuran，on the east．［Hacran．］ The country，however，on the east of Jordan was not originally designed to form part of the land of Israel；which was to have been bounded by the Jordan and its inland lakes．（Numb．xxxiv．6， $10-12$ ；comp．xxxii．）The northern and south－ ern boundaries are not so clearly defined；bat it is probable that a more careful investigation and a more accurate survey of the country than has hitherto been attempted might lead to the recovery of many of the sites mentioned in the sacred books， and of natural divisions which might help to the elucidation of the geography of Palcstine．On the south，indeed，recent investigations have led to the discovery of a well－defined mountain barrier，forming a natural wall along the south of Palestine，from the southern bay of the Dead Sea to the Mediterranean， alnng the line of which，at intervals，may be found traces of the names mentioned in the borders in the bonks of Moses and Joshua，terminating on the west with the river of Egypt（Wady－el－A rish）at Rhinoco－ rura．（Numb．xxxiv．3－5；comp．Josh．xr．1－4； Williams，Holy City，vol．i．，appendix i．，note 1．p． 463 －468．）On the northern border the mention of Mount Hor is perplexing；the point on the coast of ＂the great sea＂is not fixed；nor are the sites of Hamath or Zedad determined．（Numb．xxxiv．7，8； comp．Ezek．xivii．15，16．）But whatever account may be given of the name Hor in the northern borders of Palestine，the mention of Hermon as the northern extremity of the Israelites＇conquests in Denteronomy（iii．9，v．48）would point to that rather than to Lebanon，which Reland conjectures， as the mountain in question：while the fact that Sidon is assigned to the tribe of Asher（Judges，i． 21）would prove that the point on the cosst must be fixed north of that border town of the Canaanites． （Gen．x．19；Josh．xix．28．）The present Hamah， near to Homs（Einess），is much two far north to fall in with the boundary of Palestine，and it must be conceded that we have not at present sufficient data to enable us to determine its northern limits． （Reland，lib．i．cap．25，pp．113－123．）To this it must be added that the limits of Palestine varied at different periods of its history，and according to the views of different writers（ib．cap．26，pp． 124 －127），and that the common error of confounding the limits of the possessions of the Israelites witl those assigned to their conquests has still further embarrassed the question．Assuming，however，
those boundaries, as do the sacred writers and Jonephus, we may now take a general view of its physical features which bave always so much to do with the formation of the character of the inhatitants. It is well described in its principal features, in the book of Deuteronomy, as "a land of brokss of water, of fountains and depths, that spring out of valleys and hills; a land of wheat, and barley, and vines, and fig-trees, and pomegranates: a land of oil-olive, and honey; a land wherein thou shalt eat bread without scarceness; thou shalt not lack anything in it: a land whose stones are iron, and out of whose hills thou mayest dig brass" (viii. 7-9; comp xi. 11, 12). The great variety of its natural productions must be ascribed to the diversified character of its surface and the natural richness of its soil, which was ubviously taxed to the utmost by the industry of its numerous inhabitants; for there is no part of the hill country, however at present desolate and depopulated, which does not bear evidences of ancient agricultural labour in its scarped rocks and ruined terrace-walls; while in the vicinity of its modern villages, the rude traditionary style of hasbandry, unimpruved and unvaried for 3000 years, enables the traveller to realise the ancient fertility of this highly favoured land, and the occupations of its inhabitants, as well as the genius of their poetry, all whose imaces are borrowed from agricultural and pastoral pursuits. As the peculiar characteristic feature in the gengraphy of Greece is the vast pruportion of its sea-border to its superficial area, so the peculiarity of the geography of Palestine may be said to be the undue proportion of mountain, or rather hill country, to its estent. In the districts of Tripoli, Alka, and Damascus, three descriptions of soil prevail. In general that of the mountainous parts of Palestine and central Syria is dry and stony, being formed in a great measure from the debris of rocks, of which a large portion of the surface of the districts of Lebanon, the Hauran, and Ledja, with the mountainous countries of Judaea, are composed; it is mixed, however, with the alluvium constantly brought down by the irrigating streams. The second and richest district are the plains of Esdraelon, Zabulon, Baalhek, part of the Decapolis, and Damascus, as well as the valleys of the Jordan and Orontes, which for the most part consist of a fat loany soil. Being almost without a pebble. it becomes, when dry, a tine brown earth, like garden mould, which, when saturated by the rains, is almost a quarmire, and in the early part of the suminer becomes a marsh: when cultivated, most abundant crops of tobacco, cotton, and grain are obrained. The remainder of the territory chiefly consists of the plains called Barr by the Arabs, and Midbar by the Hebrews, both words signifying simply a tract of land left entirely to nature, and being applied to the pasture tracts about almost every town in Syria, as well as to those spots where vegetation almost entirely fails. Such spots prevail in the tracts towards the eastern side of the country, where the soil is mostly an indurated clay, with irregolar ridges of limestone hills separating different parts of the surface. The better description of soil is occasionally diversified by hill and dale, and has very much the appearance of some of our downs, but is covered with the liquorice plant, mised with aromatic shrubs, and occasionally some dwarf trees, such as the tamarisk and acacia. Many of the tracts eastward of the Jordan (Peraea) are of this description, particularly those near the Huuran,

PALAESTINA.
which, under the name of Roman Arabia, had Bozra for its capital. The inferior tracts are frequently couted with pebbles and black flints, having little, and sometimes no vegetation. Such are the greater portions of the tracts southward of Gaza and Hebron, and that part of the pashalick which borders upon Arabia Deserta, where scarcity of water has produced a wilderness, which at best is only capable of nourishing a limited number of sheep, goats, and camels: its condition is the worst in suinmer, at which season little or no rain falls throughout the eastern parts of Syria.

Owing to the inequality of its surface, Palestine has a great variety of temperature and climate, which have heen distributed as follows.-(1) The cold; (2) warm and humid; (3) warm and dry. The first belongs principally to the Lehanon range and to Mount Hermon, in the extreme north of the country, but is shared in some measure by the mountain districts of Nablüs, Jerusalem, and Hebron, where the winters are often very severe, the springs mild, and a refreshing breeze tempers the summer heat. The second embraces the slopes adjoining the coast of the Mediterranean, together with the adjacent plains of Akka, Jaffa, and Gaza; also those in the interior, such as Esdravelon, the valley of the Jordan, and part of Peraea. The third prevails in the south-eastern parts of Syria, the contiguity of which to the arid deserts of burning sand, exposes them to the furnace-blasts of the sirneco untempered by the humid winds which pre. vail to the west of the central highlands, while the depression of the southern part of the Jordan valley and the Dead Sea gives to the plain of Jericho and the districts in the vicinity of that sea an Egyptian climate. (Col. Chesney, Expedition to the Euphrates, \&c. vol. i. pp. 533-537.)

## II. Geology, Natural Divibions, and Productions.

The general geographical position of Palestine is well described in the following extract: - "That great mountain chain known to the ancients under the various names of Imans, Caucasus, and Taurus, which extends due east and west from China to Asia Minor; this chain, at the point where it enters Asia Minor, throws off to the southward a subordinate ridge of hills, which forms the barrier between the Western Sea and the plains of Syria and Assyria. After pursuing a tortuous coure for some time, and breaking into the parallel ridges of Libanus and Antilibanus, it runs with many breaks and divergencies through Palestine and the Arabian peninsula to the Indian Ocean. One of the most remarkable of these breaks is the great plain of Esdraelon, the battle-field of the Fisst. From this point . . . the ridge or mountainous tract extends, without interruption, to the south end of the Dead Sea, or further. This whole tract rises gradually towards the soath, forming the hill country of Ephraim and Judah, until, in the vicinity of Hebron, it attains an altitude of 3250 feet above the level of the Mediterranean. At a point exactly opposite to the extreme north of the Dead Sea, i.e. due west from it, where the entire ridge has an elevation of about 2710 feet, and cluse to the saddle of the ridge, a very remarkable feature of this rocky process, so to call it, occurs. The appearance is as if a single, but vast wave of this ses of rock, rising and swelling gradually from north to sonth, had been suddenly checked in its advance, and, after a

## PALAESTINA.

The want of grass begins to show itself in Syria, and especially on the sides of the promontory, owing to the long continued droughts. The Syrian mountains along the coast north of Carmel, and especially the sides of Lebunon, are, with the exception of the garden-trees, and a few scattered pines, entirely devoid of wood.
(2.) The land immediately towards the east, which follows the line of coast from sonth to north, at a distance now greater now less, rises in the form of a lofty mountain chain, the summits of which are for the most part rounded, and rarely peaked; furming numerous plateaux, and including the whole space between the coast on the west, and the valley of the Jordan, with the Dead Sea and the lake of Tiberias, on the east, having an average breadth of from 8 to 10 German miles.

This mountain chain commences in the south with Jebel Khalil, which, towards the weat and south-west, stretches to the plain of Gaza and the sandy deserts of the isthmus, and towards the south and south-east joins the mountain country of Arabia Petraea, and towards the east sinks suddenly into the basin of the Dead Sea. Immediately joined to Jebel Khalil are Jebel-el-Kods and the monntains of Ephraim, sinking on the east into the valley of the Jordan, and on the west into the plain at Jaffa Further north follows Jebel Nablis, with the other mountains of Samaria, bounded on the east by the valley of the Jordan, on the west by the coast district; and towards the north-west extending to the sea, and forming the promontory of Carmel. North of Merj Ibn 'A mir are the mountains of Galilee, Hermon, Tabor, Jebel Safed, Saron, \&c. This group sinks into the basin of the lake of Tiberias and the upper valley of the Jordan, on the east, on the west into the coast district of Acre and Sur, extends into the sea in several promontories, and is united to the chain of Lebanon at Seida, by Jebel-ed-Drus, and by the mountains of the Upper Jordan and of Hasbeia to Jebel-es-Sheich, or Jebel-et-Telj, and thus to the chain of Antilibanus.

The whole mountain chain in the district just described belongs to the Jura and chalk formation. Crystalline and platonic rocks there are none, and volcanic formations are to be found only in the mountains surrounding the basin of the lake of Ti berias. The highest points are situated in the northern part of the range, in the neighbourhood of Jebel-es-Sheich, and in the eastern and southeastern part of Galilee. (Jebel-es-Sheich is 9500 feet above the sea.) Further south the mountains become perceptibly lower, and the highest of the mountains of Judiea are scarcely $\mathbf{4 0 0 0}$ feet above the sea.

The character of the southern part of this range is very different from that of the northern. The plateaux and slopes of the central chain of Judaea are wild, rocky, and devoid of vegetation; the valleys numerous, deep, and narrow. In the lowlands, wherever productive soil is collected, and there is a supply of water, there springs up a rich vegetation. All the plants of the temperate region of Europe flourish together with tropical fruits in perfection, especially the rine and olive.

In Samaria the character of the land is more genial; vegetation flourishes on all sides, and several of the mountains are clothed with wood to their summits. With still greater beauty and grandeur does nature exhibit berself in Galilee. The mountains become higher, their form bolder and shurper.

PALAESTINA.
The great Hermon (Jebel-es-Sheich) rises hign above the other mountains.

The valleys are no longer inhospitable ravines; they become long and broad, and partly form plains of large extent, as Esdraelon. A beautiful pasture land extends to the heights of the mountains. Considerable mountain streans water the valleys.
(3.) To the east of this mountain chain lies the valley of the Jordan, the most remarkable of all known depressions of the earth, as well on account of its great length as of its almost incredible depth. [See below, III. and IV.]
(4.) On the east of the Dead Sea and the Jordan valley, with the sea of Tiberias, rises like a wall a steep mountain range of Jura limestone. On the top of this lies a broad plateau inhabited by nomadic Arabs and stationary tribes. The southern part of these highlands is known by the name of Jebel Belka; further north, beyond the Zerka, in the neighbourhood of the lofty Ajlun, it meets the lighlands of Ez-Zoueit; and still further north begins the well known plateuu El-Hauran, which, inhabited chiefly by Arabs and Druses, is bounded by Antilibanus and the Syrian desert, joins the platean of Damascus, and there reaches a height of 2304 Paris feet above the sea.

## III. The Johdan.

The most celebrated river of Judaea, and the only stream of any considerable size in the country. Its etymology has not been successfully investigated by the ancients, who propose a compound of Yor and Dan, and imagine two fountains bearing these names, from which the river derived its origin and appellatiotu. S. Jerome (Onomast. s. v. Dan) derives it from Jor, which he says is equivalent to $\rho \in i \not \theta \rho o v$, flucius, and Dan the city, where one of its principal fountains was situated. But there are serious objections to both parts of this derivation. Fur in the first place 'is? is the Hebrew form of the equivalent for furius, while the proper name is always $\{7.7$,and never ${ }^{3} \mathrm{~T}^{\circ} \mathrm{x}^{4}$, as the proposed etymology would require; while the name Dan, as applied to the city Laish, is five centuries later than the first mention of the river in the book of Genesis; and the theory of anticipation in the numerous passages of the Pentateuch in which it occurs is scarcely admissible (See Judges, xviii.; Gen. xiii. 10, xxxii. 10; Job, xl. 23), although Pan is certainly so used in at least one passage. (Gen. xiv. 14.) Besides which, Reland has remarked that the vowel always written with the second syllable of the river is different from that of the monosyllabic city, 1.7, and not 17. He suggests another derivation from the root 7 7-1 , descendit, labitur, so denoting a river, as this, in common with other rivers which he instances, might be called кar' $\langle\xi o \chi \not \nu v:$ and as Josephus does call it Toy notauby, without any distinctive name (Ant. v. 1. § 22), in describing the borders of Issachar. This is also adopted by Gesenius, Lee, and other moderns. (Lee, Lexicon, s. v.)

The source of this river is a question involved in much obscurity in the ancient recoras; and there is a perplexing notice of Josephus, which has added considerably to the difficulty. The subject was fully investigated by the.writer in 1842, and the results are stated below.

The Jordan has three principal sources: (1) at Buniae, the ancient Caesarea Philippi; (?) at Tell. miles to the west of Banias; (3) at Hasbeia, some distance to the north of Tell-el-Kadi. These several sources require distinct notice.

1. The fountain at Banias is regarded by Josephus and others as the proper source of the Jordan, but not with sufficient reason. It is indeed a copious fountain, springing out from the earth in a wide and rapid but shallow stream, in front of a cave formerly dedicated to Pan; but not at all in the manner described by Josephus, who speaks of a yawning chasm in the cave itself, and an unfathomable depth of still water, of which there is neither appearance nor tradition at present, the cave itself being perfectly dry. (Bell. Jud. i. 21. § 3.) He states, however, that it is a popular error to consider this as the source of the Jordan. Its true source, he subsequently says (iii. 9. § 7), was ascertained to be at Pbiala, which he describes as a circular pool, 120 stadia distant from Cuesareia, not far from the road that led to Trachonitis, i. e. to the east. This pool, he says (named from its form), was always full to the brim, but never overflowed, and its connection with the fountain at Paneas was discovered by Herod Philip the tetrarch in the following manner: - He threw chaff into the lake Phiala, which made its appearance again at the fountain of Paneas. This circular, goblet-shaped pool, about a mile in diameter, is now called Birket-er-Ram. It is situated high in a bare mountain region, and strongly resembles the crater of an extinct volcano. It is a curious error of Irbr and Mangles to represent the surrounding hills as "richly wooded" (Travels, p. 287). The water is stagnant, nor is there any appearance or report among the natives of any stream issuing from the lake, or of any subterranean communication with the fountain of Paneas. The above-named travellers correctly represent it as having " no apparent supply or discharge." The experiment of Philip is therefore utterly unintelligible, as there is no stream to carry off the chaff. (For a view of Phiala, see Traill's Josephus, vol. ii. p. 46, and lxxx. \&c.)
2. The second fountain of the Jordan is at Tell-el-Kadi. [Dan.] This is almost equally copious with the first-named; and issues from the earth in a rapid stream on the western side of the woody hill, on which traces of the city may still be discovered. The stream bears the ancient name of the town, and is called Nahr Ledan, " the river Leduin," sometimes misunderstood by travellers as the ancient name of the river, which certainly no longer exists among the natives. This is plainly the Daphne of Josephus, "having fountains, which, feeding what is called the little Jordan, under the temple of the golden calf, discharge it into the great Jordan." (Bell. Jud. iv. 1. § 1, conf. Ant. viii. 8. § 4; and see Reland, Palaestina, p. 263.)
3. A mile to the west of Tell-el-Kadi, runs the Nakr Hasbiny, the Husbeia river, little inferior to either of the former. It rises 6 or 8 miles to the north, near the large village of Hasbeia, and being joined in its course by a stream from Mount Hermon, contributes considerably to the bulk of the Jordan. It is therefore somewhat remarkable that this tributary has been unnoticed until comparatively modern times. (Robinson, Bib. Res. vol. iii. p. 354, note 2.)

These three principal sources of the Jordan, as the natives affirm, do not intermingle their waters until they meet in the small lake now called Bahr-
el-IIuleh, "the waters of Merom" of Scripture (Josh. xi. 5, 7), the Sempchonitis Palus of Josephns (Ant. v. 5. § 1, Bell. Juul. iii. 12. § 7, iv. 1. § 1); but the plain between this lake and Paneas is hard to be explored, in consequence of numerous fountains and the rivulets into which the main streams are here divided. (Robinson, l. c. pp. 353, 354; Bibliwtheca Sacra, 1843, pp. 12, 13.)

This point was investigated by Dr. Robinson in 1852. and he found that both the Ledan and the Hasbiny unite their waters with the stream from Banias, some distance above the lake, to which they ran in one stream. (Journal R. Geog. Soc. vol. $x$ xiv. p. 25,1855 .)

This region, now called Merj-el-Huleh, might well be designated $\bar{\epsilon} \lambda$ os or $\overline{\text { é }} \boldsymbol{\eta} \eta$ toù 'lop $\delta a \dot{v} o v, "$ the marshes of Jordan," by which name, however, the anthor of the first book of Maccabees (1 Macc. ix. 42) and Josephus (Ant. xiii. 1. § 3) would seem to signify the marshy plain to the south of the Dead Sea. The waters from the three sources abovementioned being collected into the small lake, and further augmented by the numerous land springs in the Bahr and Ard-el-Huleh, run off towards the south in one current towards the sea of Tiberias [Tiberlas Mare], a distance, according to Josephns, of 120 stadia. They flow off at the southwestern extremity of this lake, and passing through a district well described by Josephius as a great desert ( $\pi 0 \lambda \lambda \lambda \nu \nu \quad$ d $\eta \mu$ lav, B. J. iii. 9. § 7), now called by the natives ELGhor, lose themselves in the Dead Sea.

Attention has been lately called to a peculiar phenomenon exhibited by this river, the problems relating to which have been solved twice within the last few years by the enterprise of English and American sailors. In the spring of the year 1838 a series of barometrical obserrations by M. Bertou gave to the Dead Sea a depression of 1374 feet below the level of the Mediterranean, and to the sea of Tiberias a depression of 755 feet, thus establishing a fall of 619 feet between the two lakes. At the close of the same year the observations were repeated by Russegger, with somewhat different results; the depression of the Dead Sea being given as 1429 feet, the sea of Tiberias 666 feet, and the consequent fall of the Jordan between the two, 763 feet. Herr von Wildenbruch repeated the observations by barometer in 1845, with the following results:-Depression of the Dead Sea 1446 feet, of the sea of Tiberias 845 feet, difference 600 feet. He carried his observations further north, even to the source at Tell-el-Kadi, with the following re-sults:-At Jacob's bridge, about $2 \ell$ miles from the southern extremity of Bahr Huleh, he found the Jordan 89.9 feet above the Mediterranean; at the Bahr Huleh 100 feet; and at the source at Tell-elKruli 537 feet; thus giving a fall of 1983 feet in a direct course of 117 miles:- the most rapid fall being between the brilge of Jacob and the sea of Tiberias, a distance of only 8 miles, in which the river falls 845 feet, or 116 feet per mile. Results so remarkable dil not find easy credence, although they were further tested by a trigonometrical survey, conducted by Lieut. Symonds of the Royal Eugineers, in 1841, which confirmed the bammetrical observations for the Dead Sea, but were remarkably at variance with the statement for the sea of Tiberias, giving to the former a depression of 1312 feet, and to the latter of 328 feef, and a difference of level between the two of 984 feet. The
whole subject is ably treated by Mr. Petermann, in a paper read before the Geographical Society, chiefly in answer to the strictures of Dr. Robinson, in a communication made to the same suciety, -both of which papers were subsequently published in the joarnal of the society (vol. xviii. part 2, 1848). In consequence of the observations of Dr. Robinson (Bib. Res. vol. ii. p. 595, n. 4, and vol. iii. p. 311, n. 3), the writer in 1842 followed the conrse of the Jordan from the sea of Tiberias to the sea of Hulek, and found it to be a continuous torrent, rushing down in a narrow rocky channel between almost precipitous mountains. It is well described by Herr von Wildenbruch, who explored it in 1845, as a "continuous waterfall" (cited by Petermann, Le. c. p. 103).

The lower Jordan, between the sea of Tiberias and the Dead Sea, was subsequently explored by Lieut. Molyneux in 1847, and by an American expeditian under Lieut. Lynch in the following year. The following extracts from the very graphic account of Lieut. Molyneux, also contained in the number of the Royal Geographical Society's Journal (pp. 104123) already referred to, will give the best idea of the character of this interesting river, hitherto so little known. Immediately on leaving the sea of Tiberias they found the river upwards of 100 feet broad and 4 or 5 deep; but on reaching the ruins of a bridge, about 2 miles down the stream, they found the passage obstructed by the ruins, and their difficulties commenced; for seven hours they scarcely ever had sufficient water to swim the boat for 100 yards together. In many places the river is split into a number of small streams, and consoquently without much water in any of them. Occasionally the bout had to be carried upwards of 100 yards over rocks and through thorny bushes; and in some places they had high, stoep, sandy cliffs all along the banks of the river. In other places the boat had to be carried on the backs of the camels, the stream being quite inpracticable. The Ghor, or great valley of the Jordan, is about 8 or 9 miles broad at its upper end; and this space is anything but flat-nothing but a continuation of bare hills, with yellow dried-up weeds, which look when distant like corn stubbles. These hills, however, sink into insignificance when compared to the ranges of the mountains which enclose the Ghor; and it is therefure only by comparison that this part of the Ghor is entitled to be called a valley. Within this broader valley is a smaller one on a lower level, through which the river runs; and its winding counse, which is marked by luxurious vegetation, resembles a gigantic serpent twisting down the valley. So tortuous is its course, that it would be quite in. possible to give any account of its various turnings in its way from the lake of Tiberias to the Dead Sea. A little above Beisan the stream is spanned by an old curiously formed bridge of three arches, still in use, and here the Ghor begins to wear a much better and more fertile aspect. It appears to be composed of two different platforms; the upper one on either side projects from the foot of the hiiin, which form the great valley, and is tolerably level, but barren and uncultivated. It then falls away in the form of rounded sand-hills, or whitish perpendicular cliffs, varying from 150 to 200 feet in height, to the lower plain, which should more properly be called the valley of the Jordan. The :iver here and there washes the foot of the cliffs winch enclose this smaller valley, but generally it winds in the must
tort uous manner between them. In many places these clifts are like walls. About this part of the Jordan the lower plain might be perhaps $1 \frac{1}{2}$ or 2 miles broad, and so full of the most rank and luxuriant vegetation, like a jungle, that in a few spots only can anything approach its banks. Below Beisan the higher terraces on either side begin to close in, and to narrow the fertile space below; the hills become irregulur and only partly cultivated; and by degrees the whole Ghor resumes its original form. The zigzag course of the river is still prettily marked by lines of green foliage on its banks, as it veers from the cliffs on one side to those on the other. This general character of the river and of the Ghor is continued to the Dead Sea, the mountains on either side of the upper valley approaching or receding, and the river winding in the lower valley between bare cliffs of soft limestone, in some places not less than 300 or 400 feet high, having many shallows and some large falls. The American expedition added little to the information contained in the paper of our enterprising countryman, who only survived his expluit one month. Lieut. Lynch's report, however, fully confirms all Lieut. Molyneux's observations: and he sums up the results of the survey in the following sentence:-" The great secret of the depression between lake Tiberias and the Dead Sea is solved by the tortuous course of the Jordan. In a space of 60 miles of latitude and 4 or 5 miles of longitude, the Jordan traverses at least 200 miles. ... We have plungeal down twenty-seven threatening rapids, besides a great many of lesser magnitude." (Lynch, Narrative of the United Stutes' Expedition to the Jordan, foc., p. 265.) It is satisfactory also to find that the trigonometrical surves of the officers attached to the American expedition confirms the results arrived at by Lieut. Symonds. (Dr. Robinson, Theological Review for 1848, pp. 764-768.)
It is obvious that these phaenomena have an important bearing on the historical notices of the river; and it is curious to observe (as Mr. Petermann has remarked), in examining the results of De Berton, Kussegger, and Von Wildenbruch, that the depression both of the Dead Sea and of the lake of Tiberias increases in a chronological order (with only one exception); which may perhaps indicate that a continual change is going on in the level of the entire Ghor, especially as it is well proved that the whole Jordan valley, with its lakes, not only has been but still is subject to volcanic action; as Russegger has remarked that the mountains between Jerusalem and the Jordan. in the valley of the Jordan itself, and those around the lead Sea, bear unequivocal evidence of volcanic agency, such as disruptions, upheaving, faults, \&cc. \&c., - proofs of which agency are still notorious in continual earthquakes, hutsprings, and formations of asphalt.

One of the earliest historical facts connected with this river is its periudical overflow during the season of barley-harvest (Josh. iii. 15; 1 Chron. xii. 15; Jeremiah, sii. 5; see Blunt's Undesigned Coincidences, pp. 113, 114); and allasion is made to this fact after the captivity. (Ecclus. xxiv. 26; Aristeus, Epist. ad Philocratem.) The river in the vicinity of Jericho was visited by the writer at all seasons of the year, but he never witnessed an overflow, nor were the Bedouins who inhabit its banks acquainted with the phaenomenon. The Aincrican expedition went down the river in the month of April, and were off Jericho at Easter, yet they wit-
nessed nothing of the kind, though Lieut. Lynch remarks, "the river is in the latter stage of a freshet; a few weeks earlier or later, and passage would have been impracticable." Considerably further north, however, not far below Beisan, Lieut. Molyneux remarked "a quantity of deposit in the plain of the Jordan, and the marks of water in various places at a distance from the river, from which it was evident that the Jordan widely overflows its banks; and the sheikh informed him that in winter it is occasionally half a mile across; which accounts for the luxuriant vegetation in this part of the Ghor" (l. c. p. 117). It would appear from this that the subsidence of the basin of the Dead Sea and the more rapid fall of the Jordan consequent upon it, which has also cut out for it a deeper channel, has prevented the overflow except in thuse parts where the fall is not so rapid.

Another change may also be accounted for in the same manner. "The fords of the Jordan" were once few and far between, as is evident from the historical notices. (Josh. ii. 7 ; Judges, iii. 28, vii. 24, xii. 5.) But Lieut. Mulyneux says of the upper part of its course, "I am within the mark when I say that there are many hundreds of places where we might have walked across, without wetting our feet, on the large rocks and stones" (p. 115).

The thick jungle on the banks of the river was formerly a covert for wild beasts, from which they were dislodged by the periodical overflow of the river; and "the lion coming up from the swelling of Jordan" is a familiar figure in the prophet Jereiniah (xlix. 19, l. 44). It was supposed until very recently that not only the lion but all other wild beasts were extinct in Palestine, or that the wild boar was the sole occupant of the jungle ; bat the seamen in company with Lient. Molyneux reported having seen "two tigers and a boar" in their passage down the stream (p. 118).

The principal tributaries of the Jordan join it from the east ; the most considerable are the Yarmuk [Gadara] and the Zerka [Jabrok].

This river is principally noted in sacred history for the miraculous pasisage of the children of Israel under Joshua (iii.), - the miracle was repeated twice afterwards in the passage of Elijah and Elisha ( 2 Kings, ii. 8, 14), 一and for the oaptism of our Lord (St. Matt. iii. \&cc.). It is honoured with scanty notice by the classical geographers. Strabo reckons it the largest river of Syria (xvi. p. 755). Pliny is somewhat more communicative. He speaks of Paneas as its source, consistently with Josephus. "Jordanis amnis oritur è fonte Paneade, qui nomen dedit Caesareae : amnis amoenus, et quatenus locorum situs patitur ambitiosus, accolisque se praebens, velat invitus. Asphaltiden lacum dirum natura petit, a quo postremo ebibitur, aquasque laudatas perdit pestilentibus mistas. Ergo ubi prima convallium fuit occasio in lacum se fundit, quem plures Genesaram vocant, etc." (Hist. Nat. v. 15.) Tacitus, though more brief, is still more accurate, as he notices the Bahr Huleh as well as the sea of Tiberias. "Nec Jordanes pelago accipitur: sed unum atque alterum lacum, integer perfluit : tertio retinetur." (Hist. v. 6.)

The ancient name for El-Ghor was Aulon, and the modern native name of the Jordan is Es. Shiriah.
(Karl von Raumer, Palistina, 2nd ed., 1850, pp. 48-54, 449-452; Ritter, Erdhunde, fic. West Asien, vol. 15, pp. 18I-556, A. D. 1850, Das

Jorden und die Beschiffung des Todten Meeres, ein Vortrag, 9 fc ., 1850 . The original documents, from which these are chiefly compiled, are:-Comte de Berton, in the Bulletin de la Soc. Geiog. de Paris, tom. xii. 1839, pp. 166, \&c., with chart; Russegger, Reisen in Europa, Asien, Afrika, \&cc., vol. iii. Stuttgart, 1847, pp. 102-109, 132-134; Herr von Wildenbruch, Monatsberichte de Gesellschaft für Eirdkunde zu Berlin, 1845, 1846.)

## IV. The Dead Sea.

Of all the natural phaenomena of Palestine, the Dead Sea is that which has most attracted the notice of geographers and naturalists. both in ancient and modern times, as exhibiting peculiarities and suggesting questions of great interest in a geological point of view.

Names.-The earliest allasion to this sea, which, according to the prevailing theory, refers to its original formation, is found in the book of Genesis (xiv. 3), where it is identified with the vale " of Siddim," and denominated "the Salt Sea" ( $\boldsymbol{\eta}$ Nd$\lambda a \sigma \sigma \alpha$ т $\hat{\nu} \nu \dot{a} \lambda \omega \bar{\omega}$, LXX.) ; comp. Numb. xxxiv. 3, 12); which Salt Sea is elsewhere identitied with "the sea of the plain" (Deut. iii. 17, iv. 49; Josh. iii. 16, xii. 3), गैá $\lambda \sigma \sigma \sigma$ a 'Apa6a, LXX. ; called by the prophets Joel (ii. 20), Zachariah (xiv. 8), and Ezekiel (xlvii. 18), the "former," or "eastern sea." Its common name among the classical authors, first found in Diodorus Siculus (inf. cit.), and adopted by Josephus, is "Asphaltitis Lacus" (à $\sigma \phi$ алтĩtıs $\lambda(\mu \nu \eta)$, or simply in 'A $\sigma \phi a \lambda \tau i \tau t s$. The name by which it is best known among Europeans has the authority of Justin (xxxvi. 3. § 6) and Pausanias (v.7.§4), who call it సdגa Mure." Its modern native name is Bahr Lút, "the Sea of Lot,"-therein perpetuating the memorial of the catastrophe to which it may owe its formation, or by which it is certain that its features were considerably altered and modified. The name assigned it by Strabo must be referred to a slip of the author; for it is too much to assume with Falconer that the geographer had written $\sum$ o $\delta \delta \mu \eta$ s $\lambda(\mu \nu \eta \text {, when all the copies read } \Sigma e p 6 \infty \nu)_{s} \lambda$.

So copious are the modern notices of this remarkable inland sea, that it would be vain to attempt even an abridgment of them; and the necessity for doing so is in great measure superseded by the late succesisful surveging expedition, conducted by Lieut. Lynch of the American navy, whose published narrative has set at rest man." questions connected with its physical formation. The principal ancient writers will be quoted in detail and in chronological order, that it may appear how far they have borrowed one from another, or may be regarded as independent witnesses. Their notices will then be substantiated or controverted by modern writers. The questions relating to the formation of the sea, its volcanic origin, and the other igneous phaenomena in the country, will be reserved for another chapter.

The earliest extant writer who has noticed at any length the marvels of the Dead Sea, is Diodorus Siculus (b. c. 45), who has twice described it ; first in his geographical survey of the country (ii. 48), and subsequently in his account of the expedition of Demetrius against the Nabataei (xix. 98), to which last account a few particulars are added, which were omitted in the earlier book.
"We ought not to pass over the character of this lake (Asphaltites) wnmentioned. It is situated in
the midst of the satrapy of Idumaea, in length extending about $\mathbf{5 0 0}$ stadia, and in breadth about $\mathbf{6 0}$. Its water is very salt, and of an extremely noxious smell, so that neither fish nor any of the other ordinary marine animals can live in it : and although great rivers remarkable for their sweetness flow into it, yet by its sinell it counteracts their effect. From the centre of it there rises every year a large mass of solid bitumen, sometimes more than 3 plethra in size, sometimes a little less than one plethrum.* For this reason the neighbouring barbarians usually call the greater, bull, and the lesser, calf. The bitumen flouting on the surface of the water appears at a distauce like an island. The time of the rising of the bitumen is known abont twenty days before it takes place; for around the lake to the distance of several stadia the smell of the bitumen spreads with a noxions air, and all the silver, gold, and brass in the neighbourhood loses its proper colour; which, however, returns again as soon as all the bitumen is ejected. The fire which burns beneath the ground and the stench render the inhabitants of the neighbouring country sickly and very short-lived. It is nevertheless well fitted for the cultivation of palms, wherever it is traversed by serviceable rivers or fountains available for the parposes of irrigation. In a neighbouring valley grows the plant called balsam, which yields an abuidant income, as the plant grows in no other part of the world, and it is mach used by physicians as a medicine.
"The bitumen which rises to the surface is carried off by the inhabitants of both sides of the lake, who are hostilely inclined towards each other. They carry away the bitumen in a singular manner without hoats: they construct large rafts of reeds, which they launch into the lake. Upon each of these not more than three can sit, two of whom row with cars attached to the raft, and the third, armed with a bow, drives off those who are sailing np from the opposite side, or who venture to use violence; but when they come near to the bitumen they leap on it with axes in their hands, and, cutting it like soft stone, they lade their raft, and then return. If the raft break and any one fall off, even though be may be unable to swim, he does not sink as in other water, but floats as well as one who could swim; for this water naturally supports any weight capable of expansion, or which contains air, but nat solid substances, which have a density like that of gold, silver, and lead, and the like: but even these sink much more slowly in this water than they would if they were thrown into any other lake. This source of wealth the barbarians possess, and they transport it into Egypt and there sell it for the purposes of embalming the dead; for nnless this bitumen is mixed with the other spices, the bodies will not long remain undecayed."

It has been mentioned that Strabo (cir. A. D. 14) describes it under the name of Sirbonis Lacus, a palpable confusion, as regards the name, with the salt lake on the eastern confines of Egypt [Sirbonis Lacus], as is evident from his statement that it stretched along the sea-coast, as well as from the length which he assigns it, corresponding as it does with the 200 stadia given by Diodorus Siculus as the length of the true Sirbonis Lacus, which that author properly places between Coelesyria and

[^23]PALAESTINA.
PALAESTINA.
523
Egypt (i. 30). The mistake is the more unaccuuntable, as he not only describes the Dead Sea in a manner which shows that he was thoroughly acquainted with its peculiarities, but also cites the opinions of more ancient authors, who had described and attempted to explain its phaenomena. His notice is peculiarly interesting from the accounts which he gives of the formation of the bitumen, and the other indications which he mentions in the vicinity of the operation of volcanic agency, of which more will be said in the following chapter. The native traditions of the catastrophe of the cities of the plain, and the still existing monuments of their overthrow, are facts not mentioned by the earlier historian.
"The lake Sirbonis is of great extent: some have stated its circumference at 1000 stadia; it stretches along near the sea-coast, in length a little more than 200 stadia, deep, and with exceedingly heavy water, so that it is not necessary to swim, but one who advances into it up to his waist is immediately borne up. It is full of asphalt. which it vomits up at uncertain seasons from the midst of the depth, together with bubbles like those of boiling water, and the surface, curving itself, assumes the appearance of a crest. Together with the asphalt there rises much soot, smoky, and invisible to the sight, by which brass, silver, and everything shining, even gold, is tarnished; and by the tarnishing of their vessels the inhabitants of the neighbourhood know the time when the asphalt begins to rise, and make preparations for collecting it by constructing rafts of reeds. Now the asphalt is the soil of the earth melted by heat, and bubbling up, and again changed into a solid mass by cold water, such as that of the lake, so that it requires to be cut; it then fluats on the surface by reason of the nature of the water, which, as I have said, is such that a person who goes into it need not $8 w i m$, and indeed cannot sink, but is supported by the water. The people then sail up on the rafts, and cat and carry off as much as they can of the asphalt: this is what takes place. But Posidonius states that they being sorcerers use certain incantations, and consolidate the asphalt by pouring over it urine and other foul liquids, and then pressing them out. After this they cut it; unless perhaps urine has the same properties as in the bladder of those who suffer from stone. For gold-solder ( $\chi$ pugoob $\delta \lambda \lambda a$, borax) is made with the urine of boys. In the midst of the lake the phaenomenon may reasonably take place, because the source of the fire, and that of the asphalt, as well as the principal quantities of it, are in the middle; and the eruption is uncertain, because the movements of fire have no order known to us, as is that of many other gases ( $\pi \nu \in \dot{v} \mu a \tau a$ ). This also takes place in Apollonia of Epeirus. There are many other evidences also of the existence of fire beneath the ground: for several rough burnt rocks are shown near Moasas [Masada], and caves in several places, and earth formed of ashes, and drops of pitch distilling from the rocks, and boiling streams, with an unpleasant odour perceptible from a distance, and bouses overthrown in every direction, so as to give probability to the legends of the natives, that formerly thirteen cities stood on this spot, of the principal of which, namely, Sodoma, rains still remain about 60 stadia in circumference; that the lake was formed by earthquakes and the ebullition of fire, and hot water impregnated with bitumen and sulphur; that the rocks took fire; and that some of the cities were swallowed up, and others were de-
serted by those of their inhabitants who could escape. Eratosthenes gives a different account, namely, that the country being marshy, the greater part of it was covered like the sea by the bursting out of the waters. Moreover, in the territory of Gadara, there is some pernicious lake-water, which when the cattle drink, they lose their hair, hoofs, and horns. At the place named Tarichiae the lake affurds excellent salt fish; it ulso produces fruit-trees, resembling apple-trees. The Egyptians use the asphalt for embalming the dead." (Lib. xvi. pp. 763, 764.)

Another confusion mast be remarked at the close of this passage, where Strabo evidently places Tarichise on the Dead Sea, whereas it is situated ou the shores of the sea of Tiberias.

The next writer is the Jewish historian, who adds indeed little to the accurate information conveyed by his predecessors; but his account is evidently independent of the former, and states a few facts which will be of service in the sequel. Josephus wrote about A. D. 71.
"It is worth while to describe the character of the lake Asphaltites, which is salt and unproductive, as I mentioned, and of such buoyancy that it sustains even the heaviest substances thrown into it, and that even one who endeavours to sink in it cannot easily do so. For Vespasian, having come to examine it, ordered some persons who could not swim to be bound with their hands behind their backs, and to be cast into the deep; and it happrened that all of them Hoated on the surface as if they were borne up by the force of a blast. The changes of its colour also are remarkable; for thrice every day it changes its appearance, and reflects different colours from the rays of the sun . It also emits in many places black masses of bitumen, which tloat on the surface, somewhat resembling headless bulls in appearance and size. The workmen who live by the lake row out, and, laying hold of the solid masses, drag them into their boats; but when they have filled them they do not find it easy to cut the bitumen, for, by reason of its tenacity, the boat adheres to the mass until it is detached by means of the menstruous blood of women or urine, to which alone it yields. It is used not only for shipbuilding but also for medicinal purposes : it is mixed with several drugs. The length of this lake is 580 stadia, as it extends as far as Zoara of Arabia: its breadth is $\mathbf{1 5 0}$ stadia. On the borders of the lake lied the territory of Sodom, formerly a flourishing country, both on account of the abundance of its produce and the number of its cities; now it is all an arid waste. It is said that it was destroyed by lightning, on account of the wickedness of its inhabitants. The traces of the heavenly fire and the ruins of five cities may still be seen; and ashes are found even in the fruits, which are of an appearance resembling the edible kinds, but which, when plucked, turn into smoke and ashes. Such confirmation do the legends concerning the land of Sodom receive from actual observation." (Joseph. B. J. iv. 8. § 4.)

The Dead Sea and its marvels was a subject suited to the inquiring spirit of the naturalist; and Pliny's account, though brief, is remarkably clear and accurate, except that, in common with all writers, he greatly overstates its size. He wrote probably too soon (A.d. 74) after Josephus to avail himself of his account and may, therefore, be rogarded as an independent authority.
"This lake produces nothing but bitamen, from
which circumstance its name is derived. It receives no animal body; bulls and camels float in it; and this is the origin of the report that nothing sinks in it. In length it exceeds 100 miles; its greatest breadth is 25 miles, its lenst 6 . On the east of it lies Arabia Nomadum, on the south Macherls, formerly the second fortress of Judaea after Jerusalen. On the same side there is situated a hot-spring, possessing medicinal properties, named Callirrhoë, indicating by its name the virtues of its waters." (Hist Nat lib. v. 16.)

The last author who will be here cited is Tacitus, whose account may be given in the original. He appears in this, as in other passages, to have drawn largely on Josephus, but had certainly consulted other writers. He wrote A. d. 97.
" Lacus immenso ambitu, specie maris, sapore corruptior, gravitate odoris accolis pestifer, neque vento impellitur, neque pisces aut suetas aquis volucres patitur. Incertae undae : superjacta, ut solido, ferunt: periti imperitique nandi perinde attolluntur. Certo anni, bitumen egerit: cujus legendi usum, ut ceteras artes, experientia docuit. Ater suapte naturâ liquor, et sparso aceto concretus, innatat : hunc manu captum, quibus ea cura, in summa navis trahunt. Inde, nullo juvante, influit, oneratque, donec abscindas: nec abscindere aere ferrove possis: fugit craorem vestemque infectam sanguine, quo feminae per menses exsolvuntur: sic veteres auctores. Sed gnari locorum tradunt, undantes bitumine moles pelli, manuque trahi ad littus: mox, ubi vapore terrae, solis inaruerint securibus cuneisque, ut trabes aut saxa, discindi. Haud procul inde campi, quos ferunt olim uberes, magnisque urbibus habitatos, fulminum jactu arsisse: et manere vestigia, terramque ipsam specie torridam, vim frugiferam perdidisse. Nam cuncta sponte edita, aut manu sata. sive herba tenus aut flore, seu solitam in speciem adolevere, atia et inania velut in cinerem vanescunt. Ego sicut inclytas quondam urbes igne coelesti flagrasse concesserim, ita halitu lacus infici terram, corrumpi superfusum spiritum, eoque foetus segetum et autumni putrescere reor, solo coeloque juxta gravi." (Hist. v. 6.)

This sea is subsequently noticed by Galen (A. D. 164) and Pausanias (cir. A. D. 174), but their accounts are evidently borrowed from some of those above cited from Greek, Jewish, and Latin writers; in illustration of whose statements reference will now be made to modern travellers, who have had better opportunities of testing the truth than were presented to them; and it will appear that those statements, even in their most marvellous particulars, are wonderfully trustworthy; and that the liypotheses by which they endeavoured to account for the phenomena of this extraordinary lake are confirmed by the investigations of modern science.

1. General Remarks.-It is deeply to be regretted that the results arrived at by the American exploring expedition, under Lieut. Lynch, have been given to the world only in the loose, ansystematic and thoroughly unsatisfactory notes scattered through the personal narrative published by that officer; and that his official report to his government has not been made available for scientific purposes. The few meagre facts worth chronicling have been extracted in a number of the Bibliotheca Sacra, from which they are here copied. (Vol. v. p. 767, and vol. vii. p. 396.) The distance in a straight line from the fountain 'Ain-el-Feshkhah, on the west, directly across to the eastern shore, was nearly 8 statute miles. The soundings gave 696 feet as the greatest
depth. Another line was run diagonally from the same point to the seath-east, to a chasm forming the outlet of the hot-springs of Callirrhö. The bottom of the northern half of the sea is almost an entire plain. Its meridional lines at a short distance from the shore scarce vary in depth. The deepert soundings thus far are 188 fathoms, or 1128 feet. Near the shore the bottom is generally an incrustation of salt; but the intermediate one is soft, with many rectangular crystals, mostly cubes, of pore salt. The southern half of the sea is as shallow as the northern one is deep, and for about one-fourth of its entire length the depth does not exceed 3 fathoms or 18 feet. Its southern bed presented no crystals, but the shores are lined with incrustations of salt. Thus, then, the bottom of the Dead Sea forms two submerged plains, an elevated and a depressed one. The first, its southern part, of slimy mud covered by a shallow bay: the last, its northern and largest portion, of mud with incrustations and rectanyular crystals of salt, at a great depth, with a narrow ravine running through it, corresponding with the bed of the river Jordan at one extremity and the Wady-el-Jeib at the other. The opposite shores of the peninsula and the west coast present evident marks of disruption.
2. Dimensions. - It will have been seen that the ancient authorities differ widely as to the size of the sea: Diodorus stating it at 500 stadia by 60 ; Pliny at 100 miles in length, by 25 miles in its widest, and 6 miles in its narrowest part; Josephus at 280 stadia by 150. Strabo's measure evidently belongs to the Sirbonis Lacus, with which be confounded the Dead Sea, and is copied from Diodorus's description of that lake. Of these measures the earliest, viz. that of Diodorus, comes nearest to modern measurement. We have seen that a straight line from 'A in-el-Feshkhah to the east shore memsured nearly 8 statute miles: from 'Ain Jidy directly across to the mouth of the Arnon the distance was about 9 statute miles. The length of the sea does not seem to have been measured by the Americans, but the near agreement of their actual measurement of the width with the compatation of Dr. Robinson may give credit to his extimate of the length also. His observations resulted in fixing the breadth of the sea at ' $A$ in Jidy at about 9 geographical miles, and the length about 39,-'A in Jidy being situated nearly at the middle point of the western coast. (Bib. Res. vol. ii. p. 217.)
3. Saltness and Specific Gravity. - Its excessive saltness, noticed by Josephus, is attested by all travellers; and is indicated by the presence of crystals of salt in profusion over the bed of the sea, -" at one time Stellwagen's lead brought ap nothing but crystals," - as well as by the district of rock-salt at the south-west quarter of the sen, where the American officers discovered "a lofty, round pillar, standing detached from the general mass, composed of solid salt, capped with carbonate of lime, cylindrical in front and pyramidal bebind, about 40 feet high, resting on a kind of oval pedestal from 40 to 60 feet above the level of the sea." (Lynch, Expectition, p. 307.) In the southen bay of the sea, where the water encroaches more or less according to the season, it dries off into shallows and small pools, which in the end deposit a salt as fine and as well bleached, in some instances, as that in regular salt-pans. In this part, where the salt water stagnates and evaporates, Irby and Mangles "found several persons engaged in

PALAESTINA.
PALAESTINA.
peeling of a solid surface of salt, several inches in thickness ; they were collecting it and loading it on asses." (Travels, p. 139.) It has been sometimes asserted that the water is so saturated with salt that salt cannot be dissolved in it. The experiment was tried by Lieut. Lynch with the following rexult:-" Tried the relative density of the water of this sea and of the Atlantic - distilled water being as 1 . The water of the Atlantic was 1.02, that of this sea $1 \cdot 13$; the last dissolved $\frac{1}{n}$, the water of the Atlantic $\frac{1}{6}$, and distilled water $\frac{5}{17}$, of its weight of salt. The boats were found to draw 1 inch less water when afloat upon this sea than in the river." (Lynch, p. 377.) The experiment tried by Vespasian has been repeated by nearly all travellens, of course with the same result. The density and buoyancy of the waters is such that it is impossible to sink in it. "A muscular man floated nearly breast high, without the least exertion." Several analyses of the waters have been made with varions results, to be accounted for, as Dr. Robinson supposes, by the various states of the sea at different seasons; for its body of water is increased to the height of 7 feet or more in the rainy season (Lynch, p. 289), or, according to Dr. Rubinson, 10 or 15 feet; for he found traces of its high-water mark, at the south end, in the month of May, mure than an hoar south of its limit at that time. The following are the results of the analyses, the standard of comparison for the specific gravity being distilled water at 1000: -

(Rubinson, Bib. Res. ii. pp. 224, 225.)
Russegger says:-"The excessive saltness of the Dead Sea is easily accounted for by the washing down of the numerous and extensive salt-beds, which are peculiar to the formation of the basin, in which also are found bituminous rocks in sufficient quantity to enable us, without doing violence to science, to explain scveral chemical and physical peculiarities of this lake-water by the continual contact of these rocks with water strongly impregnated with salt." (Reisen, p. 207.)
4. Evaporation - The enormous quantity of water brought down by the Jordan, particularly in the rainy season, and by the other streams around the Dead Sea, some of which are very considerable, - as e. g. the Arnon was found to be 82 feet wide and 4 feet deep at its mouth, - is all carried off by evaporation; and, when the small extent of the sea is considered, it is clear that the decomposition of its waters must be very rapid. The ancient writers speak of a noxious smell, of bubbles like those of boiling water, of much soot, and an invisible vapour, tarnishing all metals, and deleterious to the inhabitants; and its change of aspect thrice a day may also be ascribed to the same cause. Now it is remarkable that nearly all these phaenomena have been noticed by recent explorers, and the single one which is not confirmed is accounted for in a manner which must exempt the ancient geographers from
the charge of misrepresentation or exaggeration; and it may well be believed that the enormous chemical processes, perpetually going forward in the depths of the sea, may occasionally produce effects upon the surface which have not been chronicled by any modern traveller. Lieut. Lynch, while encamped near Engedi, remarked, "a strong smell of sulphuretted hydrogen," though there are no thermal springs in this vicinity; and again, "a fretid sulphureous odour in the night;"-" the north wind, quite fresh, and accompanied with a smell of sulphur." Lieut. Molyneux detected the same disagreeable smell the night be spent upon the sea, which he ascribed to the water (Journal of the R. Geog. Soc. vol. xiiii. p. 127, 1848.) But Lieat. Lynch states that, "although the water was greasy, acrid, and disagreeable, it was perfectly inodorous." He is therefore inclined to attribute the noxions smell to the foetid springs and marshes along the shores of the sea, increased, perhaps, by exhalations from stagnant pools in the flat plain which bnunds it to the north. (Expedition, pp. 292, 294, 296, 300.) The "pale-blue misty appearance over the sea," "the air over the sea, very misty," and "the two extremities of the sea misty, with constant evaporation" (p. 294), are other notes indicating the unnatural state of the atmosphere surcharged with the gases disengaged by the process. On a stormy night " the surface of the sea was one wide sheet of phosphorescent foam, so that a dark object could have been discerned at a great distance" (p. 281 ; comp. Molyneux, l. c. p. 129). A kind of mirage, noticed by many travellers, may be attributed to the same cause. "A thin haze-like vapour over the southern sea:- appearance of an island between the twa shores" (p. 288). This phaenomenon is more fully noticed by Irby and Mangles: "This evening, at sunset, we were deceived by a dark shade on the sea, which assumed so exactly the appearance of an island that we entertained no doubt regarding it, even after looking through a telescope. It is not the only time that such a phaenomenon has presented itself to us; in two instances, looking up the sea from its southern extremity, we saw it apparently closed by a low, dark line. like a bar of sand to the northward; and, on a third occasion, two small islands seemed to present themselves between a long sharp promontory and the western shore. We were unable to account for these appearances, but felt little doubt that they are the same that deceived Mr. Seetzen into the supposition that he had discovered an island of some extent, which we have had opportunity of ascertaining, beyond all doubt, does not exist. It is not absolutely impossible, however, that he may hare seen one of thuse temporary islands of bitumen, which Pliny describes as being several acres in extent." (Travels, p. 141.) Two effects of the heavy atmosphere of the sea remain to be noticed: one, the irresistible feeling of drowsiness which it induced in all who navigated it; the other, confirming, in a remarkable manner, the ancient teatimonies, above cited, that the water appeared to be destructive to everything it touched, particularly metals; viz. that "everything in the boat was covered with a nasty slimy substance, iron dreadfully corroded, and looked as if covered with coal-tar." (Molyneax, l. c. p. 128.) The " bubbles like those of boiling water," mentioned by Strabo, may be identified with the curious broad strip of foam, lying in a straight line nearly north and sonth throughout the whole length of the sea, which
seemed to be constantly bubbling and in motion. (Molyneux, p. 129; Lynch, pp. 288, 289.) And even the marrellous fact mentioned by Josephus, of the sea changing its colour three times a day, may derive some countenance from testimonies already cited, but more especially from the following notice of Lieut. Lynch: - "At one time, to-day, the sea assumed an aspect peculiarly sombre. . . . The great evaporation enveloped it in a thin, transparent vapour, its purple tinge contrasting strangely with the extraordinary colour of the sea beneath, and, where they blended in the distance, giving it the appearance of smoke from burning sulphar. It seemed a vast caldron of metal, fused but motionless" (p. 324): "in the forenoon it had looked like a sheet of form." In the afternoon, of the same day, it "verified the resemblance which it has been said to bear to molten lead;" "at night it had the exact hue of absinthe" (p. 276). The earlier testimony of Prince Radzivil may also be adduced, who, after citing Josephus, adds, that he had had ocular proof of the fact: "Nam mane hateliat aquam nigricantem; meridie, sole intenso (sunt enim calores hic maximi) instar panni fit caerulea: ante occasum, ubi vis caloris remittit, tanquam limo permixta, modice rubet, vel potius flavescit." (Ierosolymitana Peregrinatio, p. 96.) A familiarity acquired by three reeks' diligent examination did not remove the feeling of awe inspired by its marvels: "So sudden are the changes of the weather, and so different the aspects it presents, as at times to seem as if we were in a world of enchantments. We are alternately beside and upon the brink and the surface of a huge and sonetimes seething caldron." (Lieut. Lynch, Bib. Sacr. vol. v. p. 768.)
5. Bitwmen. - It is to be regretted that the American expedition has thrown no new light on the production of the aspbalt for which this sea was once so famous. Along almost the whole of the west coast numerous fragments of this substance are found among the pebbles, but there is no record of any considerable masses or fields of it being seen by any European travellers in modern times; unless, as is suggested by Irby and Mangles, the imaginary islands may be so regarded. But it is curious that the traditions of the natives still confirn the notice of Strabo that drops of pitch are distilled from rocks on the eastern shore;-a story repeated by various Arab sheikhs to Seetzen, Burckhardt, and Robinson, the last of whom also mentions the fact of their belief that the large masses of bitumen appear only after earthquakes. Thus, after the earthquake of 1834 , a large quantity was thrown upin the shore near the south-western part of the sea, of which one tribe brought about 60 kuntârs into market (each kuntâr $=98 \mathrm{lbs}$.); and that after the earthquake of Jan. 1st, 1837, a large mass of bitumen (one said like an island, another like a house) was discovered floating on the sea, and was driven aground on the west side, not far to the north of Usdum. The Arabs swam off to it, and cut it up with axes so as to bring it ashore; as Tacitus tells us was done in his times, though he mentions what he considered the less probable account of its flowing as a black liquid into the ships in a perpetual stream. (Robinson, Bib. Res. vol. ii. pp. 228-231.) That the water of this sea is destructive of all animal life, as all the ancients held, seems sufficiently proved; for although shells have been found on the shore, they have been evidently washed down by the Jordan or o:her fresh water streams, and their inmates de-
stroyed by the sea water; while the biras that have been occasionally seen on its surface may be regarded as denizens of those same streams: and no animal life has been discovered in its waters.

## V. Volcanio Phaenomena.

Something must now be said of the rarions theories by which it has been attempted to account for the wonderful phaenomena above recorded of the depression of the Ghor, or Valley of the Jordan ; and of the formation and physical constitution of the Dead Sea All theories suppose volcanic agency: and it is worthy of observation that, while the earliest historical and poetical records of the country bear witness to a familiarity with such phaenomens, the existing geological monuments confirm the testimony. Independently of the igneous agency by which the cities of the plain were destroyed, much of the descriptive imagery of the psalmists and prophets is borrowed from volcanos and earthquakes; while there are evidences of an earthquake of very gnoat and probably destructive riolence daring the reign of Uzziah, king of Judah, which formed a kind of era in the history of the country, being alluded to after an interval of 300 years. (Amos, i. 1 ; Zechariah, xiv. 5.) The existing phaenomena may be briefly mentioned, beginning with one recently discovered by the American explorers, of whom "Mr. Aulick reports a volcanic formation on the east shore, and brought specimens of lavan (p. 280). The mountain known as Jebel Musa, at the northeast of the Dead Sea, composed entirely of black bituminous limestone, which burns like coal, has not been investigated so fully as it deserves: but the basaitic columns in the vicinity of the sea of Ti beriss have been frequently noticed by travellers. The thermal fountains of Callirrhoë, Gadara, and Tiberias complete the chain of evidence, and render it high!y probable that the extinct volcano noticed by Dr. Rubinson at a short distance north-west of Safed, the Frank Mountain, and others, may have been active during the historical period, and furnished the prets and prophets with the sublime imagery of the Bible. Haring then discovered the agent of the geological changes that the country has passed through, it may be interesting to hear the opinion of two eminent and scientific writers on the great problem under consideration.

Russegger, who has himself carefully examined the phaenomena of the country and tested the observations of preceding travellers, thus sums up the results (Reisem, p. 205) :-
" From its exit from the lake of Tiberias to its entrance into the Dead sea the Jordan has a tall of 716 Patis feet and thus lies at the latter place 1341 Paris feet below the level of the Mediterranean sea. At the sonthern extremity of the Dead Sea lie the marshy lowlands of Wady-el-Ghor, the commencement of Wady-el-Araba, and apparently very little higher than the Dead Sea itself. These lowlands join Wady-el-Araba, the bed of which rises gently to the watershed which separates the water system of the Dead Sea from that of the Red Sea. As the watershed of Wady-el-Araba is spparently of no considerable height above the level of the sea, the length of this remarkable depression may be reckoned from the northern extremity of the plain El -Batiheh (to the north of the sea of Tiberias) to this watershed, a distance of full three degrees. All the rock of this region consists of nor mal formations, amongst which those of the Jura and

PALAESTINA.
chalk period prevail. It is in the northern part of this country alone that volcanic formations are found in considerable quantities. Nevertheless much of the land in which volcanic rocks are not found bears evident marks of frequent volcanic action, such as hot-springs; the crater-like depressions, such as the basin of Tiberias, and that of the Dead Sea, with its basaltic rocks ; the frequent and visible disturbances of the strata of the normal rocks, the numerous crevices, and especially the frequent and violent earthquakes. The line of earthquakes in Syria includes Hebron, Jerasalem, Nablis, Tiberias, Safed, Baalbek, Aleppo, from thence takes a direction from southwest to north-east, follows the direction of the central chain of Syria, runs parallel to that of the valley of the Jordan, and has its termination northwards, in the volcanic country on the slope of Taurus (Giuur Dagh), and southwards in the mountain land of Arabia Petraea At several places branches of this great rolcanic crevice appear to stretch as far as the sea, and to touch Jaffa, Acre, Beirüt, Antioch, - unless, indeed, there be a second crevice, parallel to the first, running along the coast, and connecting the above places. I am of opinion that such is the case, and that there exists also a third crevice, coinciding with the direction of the valley of the Jordan, and anited to the principal crevice above mentioned at its northern extremity. This supposition will account for the depression of the valley of the Jordan. At the time of the destruction of Sodon and Gomorrah the surface of the crevice opened, and the great depression of the ground from Jebel-es-Sheich to the watershed in Wady-el-Araba fullowed. The difference of the resistance arising from local circumstances, the volcanic eruptions connected with this phaenomenon, the local form of the land, and the different depths of the chasm then formed, cansed a more or less extensive depression, and created along the chasm crater-like hollows, some of extraordinary depth, as the basin of Tiberias and that of the Dead Sea. These hollows. as is usual in such cares, became filled with water, and furmed a system of lakes. Next the waters from the sides of Jebel-es-Sheich formed the principal stream of Jordan connecting these lakes, having overflowed them successively. This however was not the case with the Dead Sea. The watershed of Wady-el-Araba is probably much more ancient than the depression; and as the Red Sea. judging by the geognostic nature of Wady-elAraba, formerly seems to have extended so far inland, this barrier must have existed at the time of the depression, since otherwise the Red Sea would have burst into the hollow formed by the sinking of the land. If, however, there existed before the time of the depression a regular fall throughout the whole valley to the Red Sea, it is natural to suppose that at that time the Jordan flowed into the Red Sea, and that when the depression took place its course was interrupted. However this may have been, after the depression the filling of the bawin of the Dead Siea continued until it became of such superficies, that the evaporation of the water was equal to the influx. The appearance of its shores proves that, owing either to a greater influx of water during rainy seasons, or to a less copious evaporation caused by circumstances of temperature, the sea at one time was consideraby higher than at present."

Professor Daubeny introduces his theory with other notices of volcanic agency collected from modern broks of travel. (Dr. Daubeny, A Description of actico and extinct Volcanos, gco 2nd ed.pp. 350-363.)

PALAESTINA.
"If we proceed sonthwards, from the part of $\mathbf{A}$.ia Minor we have just been considering, in the direction of Palestine, we shali meet with abundant evidences of igneous action to corroborate the accounts that have been handed down to na by ancient writers, whether sacred or profane, from both which it might be inferred that volcancos were in activity even so late as to admit of their being included within the limits of authentic history. (Nahum, i. 5. 6: Micah, i. 3, 4; Isaiah, lxiv. 1-3; Jer. li. 25, 26.)
"The destruction of the five cities on the borders of the lake Asphaltitis or Dead Sea, can be attributed, I conceive, to nothing else than a volcanic eruption, judging both from the description given by Moses of the manner in which it took place (Gen. six. 24, 25, 28: Deut. xxix. 23), and from the present aspect of the country itself.
"Volney's description of the present state of this country fully coincides with this view. (Travels in Egypt and Syria, vol. i. pp. 281, 282.)
"' The south of Syria,' he remarks, ' that is, the hollow through which the Jordan flows, is a country of volcanos: the bituminous and sulphureous sources of the lake Asphaltitis, the lava, the pumice-stones thrown upon its banks, and the hot-baths of Tabaria, demonstrate that this valley has been the seat of a subterraneous fire, which is not yet extinguished. Clouds of smoke are often observed to issue from the lake, and new crevices to be formed upon its banks. If conjectures in such cases were not too liable to error we might snspect that the whole valley has been formed only by a violent sinking of a country which formerly poured the Jordan into the Mediterranean. It appears certain, at least, that the catastrophe of five cities destroyed by fire must have been occasioned by the eruption of a volcano then burning.
" ' The eruptions themselves have ceased long since, but the effects which usually succeed them still continue to be felt at intervals in this country. The coast in general is subject to earthquakes; and bistory notices several which have changed the face of Anticch, Laodicea, Tripoli, Berytas, Tyre, and Sidon. In our time, in the year 1759, there happened one which caused the greatest ravages. It is said to have destroyed in the valley of Barlbec upwards of 20,000 persons; a loss which has never been repaired. For three months the shock of it terrified the inhabitants of Lebanon so much as to make them abandon their houses and dwell under tents.'
" In addition to these remarks of Volney, a recent traveller, Mr. Legh (see his acconnt of Syria, attached to Macmichael's Journey from Moscow to Constantinople), states that, "on the sonth-east side of the Dead Sea, on the right of the road that leads to Kerak, red and brown hornstone, porphyry, in the latter of which the felspar is much decomposed, syenite, breccia, and a heavy black amygdaloid, containing white specks, apparently of zeolite, are the prevailing rocks. Not far from Shebec, where there were formerly copper mines, he observed portions of scoriae. Near the fortress of Shobec, on the left, are two volcanic craters; on the right, one. The Roman road on the same side is formed of pieces of lava. Masses of rolcanic rock also occur in the valley of Ellasar.
"The western side of the valley of the Jordian, according to Russegger, is composed of Jura limestone, intersected by numerous dykes and streams of basalt,
which, with its deep fissures, the earthquakes to which it is subject, and the saline sulphureous springs, which have a temperature of $46^{\circ}$ cent., attest the volcanic origin of this depression.
"The other substances met with in the neighbourhood are no less corroborative of the cause assigned. On the shore of the lake Mr. Maundrell found a kind of bituminous stone, which I infer from his description to be analogous to that of Radusa in Sicily.
"It would appear that, even antecedently to the eraption mentioned in Scripture, bitumen-pits abounded in the plain of Siddim. Thus, in the account of the battle between the kings of Sodom and Gomorrah and some of the neighbouring princes (Gen. xiv.), it is said, 'And the vale of Siddim was full of slime-pits,' which a learned friend assures me ought to be translated fountains of bitumen.
"But besides this volcanic eruption, which brought about the destruction of the cities, it would appear that the very plain itself in which they stood was obliterated, and that a lake was formed in its stead. This is collected. not only from the apparent nonexistence of the valley in which these cities were placed, but likewise from the express words of Scripture, where, in speaking of the wars which took place between the kings of Sodon and Gomorrah and certain adjoining tribes, it is added that the latter assembled in the vale of Siddim, which is the Salt (i. e. the Dead) Sea
"It is therefore supposed that the lake itself occupies the site of this once fertile ralley, and that it was produced by the waters of the Jordan, which, being without an outlet, would fill the hollow until the surface over which they spread themselves proved sufficiently large to cause the luss arising from evaporation to be equivalent to the accessions it received from the rains and snows of the mountains in which it took its rise.
"This hypothesis assumes that previously to the existence of the Dead Sea the Jordan must have had an outlet, either into the Mediterranean or into the Red Sea; and accordingly when it was discovered by Burckhardt, that there actually existed a longitudinal valley, parallel to the course which the Jordan took before it reached the Dead Sea, as well as to the larger axis of that expanse of waters, running from north to south, and extending from the southern termination of the Dead Sea to the extremity of the gulf of Akaba, it was immediately concluded that this valley was in fact the former bed of the Jordan, which river, consequently, prior to the catastrophe by which the Dead Sea was produced, had flowed into this arm of the Red Sea.
" Briefly, then, to recapitulate the train of phaenomena by which the destruction of the cities might have been brought about, I would suppose that the river Jordan, prior to that event, continued its course tranquilly through the great longitudinal valley called $E l$-Arabah, into the gulf of Akaba; that a shower of stones and sand from some neighbouring volcano first overwhelmed these places; and that its eruption was followed by a depression of the whole of the region, from some point apparently intermediate between the lake of Tiberias and the mountains of Lebanon, to the watershed in the parallel of $30^{\circ}$, which occurs in the valley of El-Arabah above mentioned. I would thence infer that the waters of the Jordan, pent up within the valley by a range of mountains to the east and west, and a barrier of clevated table-land to the south, coald find no outlet,
and consequently by degrees formed a lake in its most depressed portion; which, however, did not occur at once, and therefore is not recorded by Scripture as a part of the catastrophe (see the passage in Ezekiel, xlvii. 8, indicating, if it be interpreted literally, the gradual manner in which the Dead Sea way formed, and likewise perhaps the existence of a tradition that its waters once had their exit in the Red Sea), though reference is made in another passage to its existence in what was before the ralley of Siddim.
"If, as Robinson states, extensive beds of salt occur immediately round its margin, the solution of the contents of these by the waters of the lake would account for their present composition, its saltness increasing nearly to the point of saturation, owing to the gradual accession of waters from above, which, on evaporating, would leave their salt behind; whilst the bitumen might either have existed there previously as a consequence of antecedent volcanic eruptions, or have been produced by the very one to which reference is here made.
" I do not, however, see what is gained by attributing the destruction of these cities, as some have preferred to do, to the combustion of these beds if bitumen, as the latter conld have been inflamed by no natural agent with which we are acquainted except the volcano itself, which therefore must in any case be supposed instrumental, and, being invoked, will alone enable us to explain all the facts recorded.
"It must at the same time be confessed that much remains to be done before this or any other explanation can be received as established; and I am disappointed to find that amongst the crowds of traveliers who have resorted to the Holy Land within the last twenty years, 80 few have paid that attention to the physical structure of the country which alone could place the subject beyond the limits of doubt and controversy.
"The geologist, for instance, would still find it worth his while to search the rocks which bound the Dead Sea, in order to discover if possible whether there be any crater which might have been in a staie of eruption at the period alluded to; he should ascertain whether there are any proofs of a sinking of the ground, from the existence of rapids anywhere along the course of the river, and whether south of the Lake can be discovered traces of the ancient bed of the Jordan, as well as of a barrier of lara stretching across it, which latter hypothesis Von Buch, I perceive, is still inclined to support; nor should be omit to examine whether vestiges of these devoted cities can be found, as some have stated, submerged beneath the waters, and buried, like Pompeii, under heaps of the ejected materials."

## VI. Historical Geography.

1. Earliest period. - The first notice we have of the inhabitants of Palestine is in the days of Abrahan's immigration, when the Canaanite was in the land, from whom it received its earliest appellation, "the land of Canaan." (Gen. xii. 5, 6. xiii. $7,12,8 \mathrm{cc}$.) The limits of their country are plainly defined in the genealogy of Canaan; but its distribution among the various families of that patriarch is nowhere clearly stated. "Canaan begat Sidon his first-born, and Heth, and the Jebusite, and the Amorite, and the Girgasite, and the Hivite, and the Arkite, and the Sinite, and the Arvadite, and the Zomarite, and the Hamathite: and afterwards were the families of the Canaanites spread abroad. And
the border of the Canasnites was from Sidon, as thou comest to Gerar, unto Gaza; as thou goest unto Sodom, and Gomorrab, and Admah, and Zeboim, even unto Lasha" (x. 15-19). As several of these names occur no more in the history of Palestine, we must suppose either that the places reappear under other names, or that these tribes, having originally settled within the limits here assigned, afterwards migrated to the north, where we certainly find the Arvadites and Hamathites in later times. Of the eleven families above named, the first six are found in the subsequent history of the country: the descendants of Sidon on the coust to the north: the children of Heth in Hebron, on the south; the Jebusites to the north of these, in the highlands about Jerusalem; the Amorites to the east of the Hittites, on the west of the Dead Sea; the Girgashites, supposed to be a branch of the Hivites next named, who were situated north of the Jebusites in Shechem and its vicinity. (Gen. xxxiv. 2.) The coast to the south was wrested from the Canaanites in very early times, if they ever possessed it; for throughout the records of history the Philistines, descendants of Dizraim, not of Canaan, were masters of the great western plain (x.14). The distribation of the country ainong these tribes is involved in further confusion by the introduction of the Perizzites with the Canaanites as joint occupiers of the country (xiii. 7), and by the fact of the Canaanites appearing as a distinct tribe, where the Hittites, the Amorites, the Girgashites, and the Jebusites, who were all alike Canaanites, are severally enumerated (xv. 19-21). It would appear also that while the name Canaanites was used in a more restricted sense in the last cited passage, the names of the particular families were sometimes used in a wider acceptation; which may account for the Hittites, whose seats we have already fixed to the soath of Jerusalem, being found to the north of that city, in the neighbourhood of Bethel. (Judges, i. 26.) It may be, however, that the seats of the several tribes in those early tines were not fixed, but fluctuated with the tide of conquest or with the necessities of a pastoral people : an example of the former may be found in the victories of Chedorlaomer (Gen. xiv.), and of the latter in the many migrations of Abraham with his numerous dependents, and of his descendants, which finally transferred the whole of his pasterity into Egypt for a period of four centuries (xii. 6-10, xiii. 14, 18, $\times 1$ 1, xxvi. 1, \&c.). To attempt to trace these various migrations were a fruitless task with the very scanty notices which we possess ; but the number and general disposition of the Canaanitish tribes at the period of the Eisodus of the Israelites under Joshna may be approximately ascertained, and aid in the description of the distribution of the land annong the latter. The tribes then in occupation of the land are said to be seven (Deut. vii. 1), and are thus enumerated:-"Canaanites, Hittites, Amorites, Perizzites, Hivites, Jebusites," only six (Exod. iii. 8, 17, kxxiii. 2); but in Deuteronomy (l.c.) and Joshua (iii. 10) the Girgashites are added, which completes the number. Of these the Amorites occupied the southern border, or probably shared it with the Amalekites, as it was with the latter that the Israclites were first brought into collision. (Exced. xvii. 8, 9 ; Numb. xiv. 25, 43-45.) This was therefore called "the Mount of the Amorites" (Ileut. i. 19, 20); and their relative position with regard to the other tribes is thus clearly stated: -
"The Amalekites dwell in the land of the south, and the Hittites, and the Jelusites, and the Amorites (Joshua, xi. 3, adds the Perizzites), dwell in the mountains: and the Canaanites dwell by the sea, and by the coast of Jordan." (Numb. xiii. 28,29.) The limits of the Amorite territory are further defined by the confederacy of the five sheikhs of Jerusalem, Hebron, Jarmuth, Lachish, and Eiglon, all of whom were Amorites (Josh. x. 5) ; while the hill-country immediately to the north and west of Jerusalem, comprising Gibeon, Chephirah, Beeroth, and Kir-jath-jearim was held by the Hivites (ix. 3, 7, 17, xi. 19), who are also found, at the same period. far to the north, "under Hermon in the land of Mizpeh" (xi. 3; Judges, iii. 3), as two large and powerful kingdoms of the Amorites coexisted on the east of the Jordan [Amonites], the older inhabitants having been driven out. It is worthy of remark that during the occupation of Palestine by these Canaanites it is already called "the land of the Hebrews" or Heberites, which can only be accounted for by an actual residence in it of Heber himself and his race, which goes far to prove that the Canaanitish tribes were only intruders in the Land of Promise. (Gen xl. 15; see Christian Remembrancer, vol. xviii. p. 451.) For fuller details reference may be made to Reland (Palaestina, cap. xxvii. pp. 135-141) and Bochart (Phaleg. lib. iv. сарр. 34-37).
2. Second period. - We have now to consider the division of Palestine among the twelve tribes of Israel, on the settlement of the land by Joshua the son of Nun; and the Scripture statement compared with Josephus will furnish numerous landmarks, which a more careful survey of the country than has yet been made would probably bring to light at the present day. To begin with the cis-Jordanic tribes:-
Judah, Simeon, Dan.-The south border of Judah was bounded by the country of Edom and the wilderness of Zin; the frontier being plainls defined by a chain of hills, of considerable elevation, forming a natural barrier from the southern bay of the Dead Sea on the east to the Mediterranean on the west, in which line the following points are named, viz., the ascent or pass of Acrabbim, Zin, Kadesh-Barnea, Hezron, Adar, Karkaa, Azmon, the river of Egypt. The east border extended along the whole length of the Dead Sea to the mouth of the Jordan, from which the north horder was drawn to the Mediterranean along an irregular line, in which Jerusalem would be nearly the middle point. The road from Jerusalem to Jericho passes immediately within the line, and 'Ain-er-Ressulh, Wady Kelt, Kulaat-edDammim, and 'A in or Kusr Hajlah, are easily identified with Enshemesh, the river, Adummim, and Beth-hogla. It passed south of Jerusalem, from Enrogel up the ralley of Hinnom, by Nephtoah, Mount Ephron, Kirjath-jearim, Bethshemesh, Timnah, Ekron, Shichron, and Jabneel. Their cities were, as stated in the summary, 29 in number, in the south division of the tribe, on the borders of Edom; but the names, as recounted in the English version, are 39. The discrepancy is to be accounted for, as Reland remarks, by several of the words, regarded as proper, or separate names, being capable of translation as appellatives or as adjuncto to other uames. In the valley, including under that name the declivity of the western plain and the plain itself, there were $14+16+9=39$ towns, with their villages, besides the cities of the Philistines vol. 1.
between Ekron and Gaza, which the Ismelites did not occupy; in the mountains $11+9+10+6+2=$ 33 cities, with their villages; and in the wilderness, i. e. the western side of the Dead Sea, 6 towns and their villages; in all, according to the Hebrew version, no less than 112 towns, exclusive of their future capital, of which the Jebusite still held posseasion. But the Septuagint version inserts the names of 11 other cities in the mountain district, among which are the important towns Bethlehem and Tekoa, which would make the total 123 in the tribe of Judah alone, implying an enormous population, even if we admit that these towns were only large villages with scattered hamlets. It must be remarked, however, that the tribe of Simeon was comprehended within the limits above assigned to the tribe of Judah; and that 17 cities in the south of Judah are referred to Simeon, as is expressly stated: "Ont of the portion of the children of Judah was the inheritance of the children of Simeon: for the part of the children of Judah was too much for them: therefore the children of Simeon had their inheritance within the inheritance of them" (Josh. xix. 1-9.)

As Simeon possessed the southern part of the territory assigned to Judah, so did the tribe of Dan impinge upon its north-west border; and in the list of its seventeen cities are some before assigned to Judah (Josh xix. 41-46); a limited extent of territory on the confines of the plain of the Philistines, from which they carly sent out a colony to the extreme north of the Holy Land, where their city, synonymons with their tribe, situated at the southern base of Mount Hermon, became proverbial in Israel for the worship of the golden calf. (Judges, xviii.)

Benjamin.-The tribe of Benjamin was bounded by Judah on the south, by the Jordan on the east. The northern line was drawn from Jericho westward through the mountains, by Bethel and Ata-roth-adar, to a bill that lay to the south of the lower Beth-horon, from which point the boundary was drawn to Kirjath-jearim of the tribe of Judah. They possessed twenty-six cities, including Jerusalem. (Josh. xviii. 11-28.). It is evident that Josephus is mistaken in stating that they extended in leugth from Jordan to the sea; for it is clear that the tribe of Dan and the plain of Philistia lay between them and the Mediterranean. His remark that the width of their territory was least of all, is more accurate, though his explanation of the fact may be doubted, when he ascribes it to the fruitfulness of the land, which, he adds, comprehended Jericho and Jerusalem.

Ephrrim.-The tribe of Ephraim was conterminous on the sonth with the tribe of Benjamin, as far as the western extremity of the latter; from whence it passed by Tappuah and the river Kanah to the sea. On the east side are named Atarothaddar and Beth-horon the upper, and on the north, beginning at the sea and going east, Michmethah, Taanath-shiloh, Janohah, Ataroth, Naarath, Jericho, and the Jordan. The cities of Ephraim are not catalogued; but it is remarked that "the separate cities for the children of Ephraim were among the inheritance of the children of Manasseh, all the cities with their villages" (xvi. 5-9). According to Josephus it extended in width from Bethel even to the great plain of Esdraelon.

Manasseh.-The portion of Manasseh on the west of Jordan was contiguous to that of Ephraim, and appears to have been allotted to the two tribes
jointly, as the same boundaries are assigned to both (xvi. 1-4, comp. 5-8 with xvii. 7-10), but in general the southern part was Ephraim, and the north Manasseh, which latter also possessed towns in the borders of Asher and Issachar, as Bethshean and Endor, on the east, in Issachar, and Taanach, Megiddo, and Dor, on the west, in Asher (ver. 11). It will have been seen that these twin tribes did not extend as far as the Jordan eastward, but that their eastern boundary excluded the valley of the Jordan, and formed, with their northern boundary, a curved line from Jericho to the sea, south of Monat Carmel.

Issachar.-This tribe covered the whole of the north-east frontier of Manasseh and Ephraim, and so comprehended the valley of the Jordan northward from Jericho to Mount Tabor, and the eastern part of the plain of Esdraelon, in which Tabor is situated, containing sixteen cities, among which were Shunem and Jezreel of Scripture note, the latter for many years the capital of the kingdom of Israel.

Asher.-To the west of Issachar was Asher, occapying the remainder of the ralley. of Esdraelon, now the Plain of Acre, and extending along the coast of the Mediterranean, from Mount Carmel to Sidon. Our ignorance of the modern geography of Upper Galilee does not allow us to assign its limits to the east; but there is little doubt that careful inquiry would still recover the sites at least of some of their twenty-two cities, and so restore the eastern boundary of their territory, which extended along the western borders of Zebulun and Naphtali, which two tribes occupied the highlands of Galilee to the extremity of the Land of Promise.

Zebulun.- Of these two, Zebulun was to the south, contiguous to Issachar, haring the sea of Tiberias for its eastern boundary, as far perhaps as the mouth of the northern Jordan. None of its twelve cities can now be identified with certainty; but Japhia is probably represented by the modern village of Yapha, in the plain, not far to the south of Nazareth, which was certainly situated within the borders of this tribe; and Bethlehem may, with great probability, be placed at the modern village of Beitlahem, not far from the ruins of Sepphouri to the north-west. [Cabsnrea-Dio.]

Naphtali.-The northernmost of the trikes was Naphtali, bounded by the Upper Jordan on the east, from its source to its mouth, near which was sitnated the city of Capernaum, expressly declared by St. Matthew to have been in the borders of Zebulinn and Naphtali (iv. 13). On the south was Zebulan, on the west Asher, and on the north the roots of Libanus and the valley of Coelessria, now called the Belkaa'. Of their nineteen cities Kedesh is the most noted in Scripture history ; and its ruins, existing under the same name at this day, attest its ancient importance. Josephus absurily extends their territory to Damascus, if the reading be not corrupt, as Reland suspects.

Having completed this sarvey of the tribes, it may be remarked in anticipation of the following section, that the subsequent divisions of the coantiy followed very much the divisions of the tribes: thus the district of Judaes was formed by grouping together the tribes of Judab, Simeon, Dan, ami Benjamin; Samaria was cuestensive with Ephraim and the half of Manasseh; Issachar and Asher occupied Lower Galilee; Zebulun and Naphtali Upler Galilee.

Trano-Jordanic tribes, A few words must be
added concerning the two tribes and a half beyond Jordan, although their general disposition has been anticipated in the account of the nations whom they dispossessed. [Amorites.]

Reuben, Gad, and half Manasseh.-The southern part of the old Amorite conquests on the east of Jordan was assigned by Moses to the Reubenites, whose possessions seem to have been coextensive with the kingdom of Sihon, king of the Amorites, whase capital was at Heshbon. [Hesbon.] There is, however, some apparent confusion in the accounts; as while Reaben is said to have possessed "from Aroer by the river Arnon,... Heshbon,. . . and all the kingdom of Sihon king of the Amorites," Gad is also said to have had "the rest of the kingdom of Sihon;" and while Gad is said to have held "all the cities of Gilead," Manasseh is said to have had "half Gilead." (Josh. xiii. comp. rer. 21 with 27, and 25 with 31); while from Numbers (xxxii. 39 -42) it would appear that Manasseh possessed the whole of Gilead. As the Israelites were not permitted to occupy the country which they found still in possession of the Ammonites, but only so much of it as had been taken from thein by Sihon king of the Amorites, the limits of the Israelite possessions towands the Ammonites are not clearly defined [Ammonitar; Barhan]; and it may be doubted whether the distribution of the country among the two tribes and a half was not regulated rather by convenience or the accident of conquest than by any distinct territorial limits: certain it is that it would be extremely difficult to draw a line which should include all the cities belonging to any one tribe, and whose sites are fixed with any degree of certainty, and yet exclude all other cities mentioned as belonging to one of the other tribes. Generaily it may be said that the possessions of Gad and Reuben lay to the south and west of the trans-Jordanic provinces, while those of Manasseh lay in the mountains to the east of the Jordan valley and the lake of Gennesaret. It is plain only that the Jordan was the border of the two former, and that of these the tribe of Gad held the northern part of the valley, to "the sea of Chinnereth." (Josh. xiii. 23, 27.) When the Gadites are said to have built nine cities, the Reubenites six, it can only be understood to mean that they restored them after thuy had been dismantled by their old inhabitants, as in the case of Machir the sun of Manasseh it is expressly said that he occupied the cities of the dispossessed Amorites. (Numb. xxxii. 34-42.) It may, perhaps, be concluded from Deut. iii. $1-17$ that, while the kingdom of Sihon was divided between the tribes of Gad and Keuben, the whole kingdom of Og was allotted to the half-tribe of Manasseh; as, indeed, it is highly probable that the division of the land on the west of Jordan also followed its ancient distribution among its former inhabitants.

It is remarked by Reland, that the division of the land by Solomon has been too commonly overlooked, for, although it had regard only to the provision of the king's table, it is calculated to throw considerable light on sacred gengraphy. The country was divided into twelve districts, under superior officers, several of whom were allied to the king by marriage, each of which districts was made chargeable with victualling the palace during one month in the year. Whether these divisions had any further political significancy does not appear, but it is difficult to imagine that any merely sumptuary exigences woald have suggested such an elaborate arrange-
ment. The divisions agree for the most part with those of the tribes. (1 Kings, iv. 7-19.)
3. Third Period.-We have no distinct account of the civil division of the country on the return of the Jews from the captivity, and during its subsequent history, until it was reduced to a Roman province. Under the Persians, the title of "governor on this side the river," so frequent in the books of Nehemiah and Ezra, and the description of the strangers, colonists of Samaria, as " men on this side the river" (Euphrates), probably indicates the only designation by which Palestine was known, as a comparatively small and insignificant part of one of the satrapies of that enormous kingdom. (Ezra, iv. 10, 17, v. 20, vi. 6, \&c.; Neh. ii. 7, iii. 8, \&c.) Among the Jews, the ancient divisions were still recognised, but gradually the larger territorial divisions superseded the tribual, and the political geography assumed the more convenient form which we find in the New Testament and in the writings of Josephus, illustrated as they are by the classical geographers Pliny and Ptolemy.

The divisions most familiar to the readers of the New Testament are, Judaea, Galilee, Samaria, Decapolis, and Peraea, in which is comprehended the whole of Palestine, with the exception of the seaborder, the northern part of which is called "the coasts of Tyre and Sidon" by the evangelists, and comprehended under the name of Pheenice by Josephus and the classical geographers. The three first-named districts are very clearly described by Josephus; and his account is the more valuable as confirming the descriptions contained in the Bible of its extreme fertility and populousness, which will, however, present no difficulty to the traveller who has had the opportunity of observing the natural fertility of the soil in the parts still rudely cultivated, and the numerous traces of the agricultural industry of ancient times.

Galilee, Upper and Lower.-"There are two Galilees, one called Lower, the other Upper, which are surrounded by Phoenicia and Syria. On the side of the setting sun they are bounded by the frontiers of the territory of Ptolemais, and Carmel, a mountain formerly belonging to the Galileans, but at present to the Tyrians; which is joined by Gaba, called the 'city of knights,' because the knights disbanded by Herod dwell there; and on the south by Samaris and Scythopolis, as far as the river Jordan. On the east it is bounded by Hippene and Gadaris, and Gaulanitis and the frontiers of Agrippa's kingdom. The northern limit is Tyre and the Tyrian territory. That which is called Lover Galilee extends in length from Tiberias to Chabulon, near which on the sea-coast is situated Ptolemais. Its greatest breadth is from a village called Xaloth, situated in the great plain, to Berbase; from which place also the breadth of $\mathscr{C p p e r}$ Galilee commences, extending to a village named Baca, which separates the Tyrian territory from Galilee. In length, Upper Galilee reaches to Meroth from Thella, a village near the Jordan.
" Now the two Galilees, being of such extent, and surrounded by foreign nations, have always resisted every hostile invasion; for its inhabitants are trained to arms from their infancy, and are axceedingly numerous; and neither have the men ever been wanting in courage, nor the country suffered from pancity of inhabitants, since it is rich, and favourable for pasture, and planted with every variety of tree; so that by its fertility it invites even those
who are least given to the pursuit of agriculture. Every part of it, therefore, has been put under cultivation by the inhabitarts, and none of it lies idle; but it possesses numerous cities and multitudes of villages, all densely populated on account of its fertility, so that the smallest of them has more than 15,000 inhabitants.

Peraea.-"On the whole, then, although Galilee is inferior to Peraea in extent, yet it is superior to it in strength. For the former is all under cultivation, and productive in every part; but Peraea, although much more extensive, is for the most part rugged and barren, and too wild for the culture of tender produce. Nevertheless, wherever the roil is soft it is very productive; and the plains are covered with various trees (the greater part is planted with olives, vines, and palins), and watered by mountain torrents, and perennial wells sufficient to supply water whenever the mountain streams are dried up by the heat. Its greatest length is from Machaerls to Pella, and its breadth from Philadelphia to the Jordan. It is bounded on the north by Pella, whicn we have mentioned; on the west by the Jordan. Its southern boundary is Moabitis, and its eastern is Arabia and Silbonitis, and also Philadelphene and Gerasa.
Samaria. - "The country of Samaria lies between Judaea and Galike ; for beginning at the village called Ginaea, situated in the great plain, it ends at the toparchy of Acrabatta: its character is in no respect different from that of Judaea, for both abound in mountains and plains, and are suited for agriculture, and productive, wooded, and full of fraits both wild and cultivated. They are not abundantly watered; but much rain falls there. The springs are of an exceedingly sweet taste; and, on account of the quantity of good grass, the cattle there produce more milk than elsewhere. But the best proof of their richness and fertility is that both are thickly populated.

Judaea.-" On the confines of the two countries stands the village Annath, otherwise called Borceos, the boundary of Judaea on the north. The south of it, when measured by length, is bounded br a village, which stands on the contines of Arabia, called by the neighbouring Jews Jardan. In breadth it extends from the Jordan to Joppa, and in the centre of it lies the city Jerusalem; for which cause the city is called by some, not without reason, the navel of the earth. Judaea is not deprived of the advantages of the sea, as it extends along the sea-coast to Ptolemais. It is divided into eleven districts, of which Jerusalem, as the seat of government, rules, taking precedence over the surrounding country as the head over the body. The other districts, after it, are distributed by toparchies. Gophna is second; after that, Acrabatta, then Thamna, Lydda, Ammaus, Pella, Idumaca, Engaddae, Herodēum, Jerichus; then Jamnia and Joppa, which take precedence of the neighbouring country.
"Besides these districts, there are Gamalitica and Gaulanitis, Batanaea, and Trachonitis, parts of the kingdom of Agrippa. Beginning from Mount Libanus and the source of the Jordan, this country rearhes in breadth to the lake of Tiberias: its length is, from a village called Arpha to Julias. It is inhabited by Jews and Syrians mixed.
"Thus we have given an account, as short as was pussible, of Judaea and the neighbouring regions."

Bexides this general description of the country accurding to its divisions in the first century of the

## PALAESTINA.

Christian era, Josephus has inserted in his history special descriptions of several towns and districts, with details of great geographical interest and importance. These, however, will be found, for the most part, under their several names, in these volumes. [Aulon; Bashan; Esdraelon Vallis; Belus; Jericho; Jfridsalem; Tiberias Mare, \&c.]

As the division of Gabinius does not appear to have had a permanent influence, it may be sufficient to notice it, before dismissing Josephus, who is our sole authority for it. He informs us that the Roman general having defeated Alexander the son of Aristobulus, and pacified the country, constituted fire councils ( $\sigma v{ }^{\prime} \dot{\delta} \rho \cdot \alpha$ ) in various parts of the country, which he distributed into so many equal divisions ( $\mu \mathrm{l}$ ipas). These seats of judicature were Jernsalem, Gadara, Amathus, Jericho, and Sepphoris in Galilee. (Ant. xiv. 5. § 4.) In the division of the country among the sons of Herod the Great, Judaea, Idumara (i.e., in the language of Josephus, the southern part of Judaea), with Samaria, were assigned to Archelaus, with the title of ethnarch. Antipas had Galilee and Peraca, with the title of tetrarch, and Philip, with the same title, Trachonitis, Auranitis, Batanrea, and Paneas, mostly without the limits of Palestine [vid. s. vv.]. (Ant. xvii. 13. § 4.) On the disgrace and banishment of Archelaus, in the 10th year of his reign, his government was added to the province of Syria, and administered by a procuratur subordinate to the prefect of Syria; the same fate attended the tetrarchy of Philip on his death in the twentieth year of Tiberius, until it was committed to Herud Agrippa by Caius Caligula, with the title of king, to which was added the tetrarchy of Lysamias, and subsequently, on the banishment of Antipas, his tetrarchy also; to which Clandius added besides Judaea and Samaria, so that his kingdom equalled in extent that of his grandfather Herod the Great. On his death, his son, who was but seventeen years old, was thought too young to succeed him, and bis dominions reverted to the province of Syria Bat on the death of Herod king of Chalcis, that country was committed to the younger Agrippa, which was afterwards exchanged for the tetrarchies of Philip and Lysanias, to which Nero added the part of Galilee about the sea of Tiberias, and Julias in the Decapolis. After his death, in the third year of Trajan, there is no further mention of the tetrarchies (Reland, Pa laestina, lib. i. cap. 30, pp. 174, 175.)

The division into toparchies, mentioned by Josephus, is recognised also by Pliny, though their lists do not exactly coincide. Pliny reckons them as follows: -

1. Jericho.
2. Thamna
3. Einmaus.
4. Bethleptaphene.
5. Lydda.
6. Juppa.
7. Acrabata
8. Oreine (in which was Jerusalem.)
9. Herodium.
10. Gophna.

Of these 8 and 9 are not reckoned by Josephus; but Reland is probably correct in his conjecture that 8 is identical with his Pella, and 9 with his Idumses,
 mountainous. (Plin. Hist. Nat. च. 14.)

The other notices of Pliny are few and fragmentary, but agree in all essential particulars with the synchronous but independent account of Josephus above cited.

Its geography had undergone little variation when Ptolemy wrote in the following century, and the brief notices of that geographer are as accurate as
usual．He calls it Palaestina of Syria，otherwise called Judaea，and describes it as bounded by Syria on the north，by Arabia Petraea on the east and south．Independently of the coast of the Mediter－ ranean，he reckons the districts of Galilee，Samaria， Judaea，and Idumaea，but describes the Peraea，by a periphrasis，as the eastern side of Jordan，which may imply that the name was no longer in vogue．He names also the principal cities of these several divisions（v．16）．

The most valuable contributions to the ancient geography of Palestine are those of Eusebius and his commentator S．Jerome．in the Onomasticon， composed by the former，and translated，with im－ portant additions and corrections，by the latter，who has also interspersed in his commentaries and letters numerous geographical notices of extreme value． They are not，however，of such a character as to be available under this general article，but are fully cited under the names of the towns，\＆c．（See Reland，Palaest．lib．ii．cap．12，pp．479，\＆c．）

It remains only to add a few words concerning the partition of Palestine into First，Second，and Third，which is first found at the commencement of the fifth century of the Christian era，in the Code of Theodosius（A．D．409）；and this division is observed to this day in the ecclesiastical documents of the Eastern Church，by which it was adopted from the first；as it is recognised in the Notitiae，political and ecclesiastical，of the fifth and following centuries． （Quoted fully by Reland，l．c．capp．34，35，pp．204－ 234．）In this division Palaestina Prima compre－ hended the old divisions of Judaea and Samaria； Palaestina Secunda，the two Galilees and the western part of Peraea；Palaestina Tertia，otherwise called Salutaris，Idumaea and Arabia Petraea；while the greater part of the ancient Peraea was comprehended under the name of Arabia．

As the sources of geographical information for Palestine are far too numerous for citation，it may suffice to refer to the copious list of authors appended to Dr．Robinson＇s invaluable work（Bibl．Res．vol．iii． first appendix A．，pp．1－28），and to the still more copious catalogue of Carl Ritter（Erdkunde，Paläs－ tina， 2 tr．B．1te Abt．1850，pp．23－91），who in his four large volumes on the peninsula of Mount Sinai， Palestine，and Syria，has with his usual ability systematised and digested the voluminous records of centuries，and completely exhausted a subject which could scarcely be touched within the limits assigned to a general article in such a work as the present．
［G．W．］

## Palaetyrus．［Tyrus．］

PALAMNUS（ $\Pi \dot{\alpha} \lambda a \mu \nu o s$, Scyl．p．10），a river of Illyricum，which flowed into the sea near Epidam－ nus．This river has been identified with the PA－ nyasus（Пavvd（ $\sigma$ ）$\sigma$ ov éк6．，Ptol．iii．13．§ 3）；but this latter corresponds better with the Genusus （Tjerma or Skumbi）：the Palamnus is probably the same as the Dartsch or Spirnatza，to the S．of Du－ razzo．
［E．B．J．］
PALANDAS（ $\delta$ חa入áv $\delta a s$ ），a small stream mentioned by Ptolemy in the Chersonesus Aurea （vii．2．§ 5）．It is supposed by Forbiger that it is the same as that which flows into the gulf of Mar－ taban near Tavoy．Ptolemy notices also a town in the same neighbourhood which he calls Palanda（vii． 2．§ 25 ）．
［V．］
PALAS，a district in the south of Germany，on the borders between the Alemanni and Burgundii； it was also called Capellatium；but as it is men－
tioned only by Ammianus Marcellinus（xviii．2），it is impossible with any degree of certainty to iden－ tify it．
［L．S．］
PALATIUM，a place in the Rhaetian Alps，on the road from Tridentum to Verona，still bears its ancient name in the form of Palazzo．（It．Ant． p．275．）
［L．S．］
PALE（ $\Pi \dot{d} \lambda \eta$ ：Eth．Пa入єis，Пa入ท̂s，Thuc．；Pa－ lensea ：the city itself is usually called חa $\lambda$ eis ：
 Cephallenia on the eastern side of a bay in the north－western part of the island．It is first men－ tioned in the Persian wars，when two hundred of its citizens fought at the battle of Plataea，alongside of the Leacadians and Anactorians．（Herod．ix．28．） It also sent four ships to the assistance of the Corinthians against the Corcyraeans just before the commencement of the Peloponnesian War（Thuc．i． 27 ）；from which circumstance，together with its fighting along with the Corinthian Leucadians and Anactorians at the battle of Plataea，it has been conjectured that Pale was a Corinthian colony． But whether this was the case or not，it joined the Athenian alliance，together with the other towns of the island，in B．c．431．（Thuc．ii．30．）At a later period Pale espoused the side of the Aetolians against the Actaeans，and was accordingly besieged by Philip，who would have taken the city but for the treachery of one of his own officers．（Pol．v．3，4．） Polybius describes Pale as surrounded by the sea， and by precipitous heights on every side，except the one looking towards Zacynthus．He further states that it possessed a fertile territory，in which a con－ siderable quantity of corn was grown．Pale sur－ rendered to the Romans without resistance in E．с． 189 （Liv．xxxviii．28）；and after the capture of Same by the Romans in that year，it became the chief town in the island．It was in existence in the time of Hadrian，in whose reign it is called in an inscription è $\lambda \epsilon v \theta$ épa каì aùтóvouos．（Böckh，Inscr． No．340．）According to Pherecydes，Pale was the Homeric Dulichium ：this opinion was rejected by Strabo（x．p．456），but accepted by Pausanias（vi． 15．§ 7）．

The remains of Pale are seen on a small height， about a mile and a half to the north of the modern Lixuri．Scarcely anything is left of the ancient city ；but the name is still retained in that of Palio and of Paliki，the former being the name of the plain around the ruins of the city，and the latter that of the whole peninsula．（Leake，Northern Greece，vol．iii．p．64．）

COIN OF PALE．
PALFURIA＇NA，a town of Hispania Tarraco－ nensis，by Ukert（vol．ii．pt．i．p．420）and others placed in the territory of the Ilercaones；by For－ biger（vol．iii．p．73）in that of the Cosetani．It was on the road from Barcino to Tarraco，and is usually identified with Vendrell．（Marca，Hisp．ii． c． 11 ．p． 141 ；Florez，Esp．S．xxiv．43．）［T．H．D．］

PALICO＇RUM LACUS（ $\eta$ т $\boldsymbol{\omega} \nu \boldsymbol{\nu}$ Паікк $\omega \nu \lambda(\mu \nu \eta$ ： Lago di Naftia），a small volcanic lake in the inte－ terior of Sicily，near Palagonia，about 15 miles W．
of Leontini．It is a mere pool，being not more than 480 feet in circumference，but early attracted atten－ tion from the remarkable phenomena caused by two jets of volcanic gas，which rise under the water， causing a violent ebullition，and sometimes throwing up the water to a considerable height．On this account the spot was，from an early period，con－ sidered sacred，and consecrated to the indigenous deities called the Palici，who had a temple on the spot．This enjoyed the privileges of an asylum for fugitive slaves，and was much resorted to also for determining controversies by oaths；an oath taken by the holy springs，or craters as they are called， being considered to possess peculiar sanctity，and its violation to be punished on the spot by the death of the offender．The remarkable phenomena of the locality are described in detail by Diodorus，as well as by several other writers，and notwithstanding some slight discrepancies，leare no doubt that the spot was the same now called the Lago di Naftia，from the naphtha with which，as well as sulphur，the sources are strongly impregnated．It would，how－ ever，seem that in ancient times there were two separate pools or craters，sometimes termed foun－ tains（ $\kappa \rho \hat{\eta} \nu a i$ ），and that they did not，as at the present day，form one more considerable pool or lake． Hence they are alluded to by Ovid as＂Stagna Pali－ corum；＂while Virgil notices only the sanctuary or altar，＂pinguis et placabilis ara Palici．＂（Dibd．xi． 89；Steph．Byz．s．v．Ma入ıкh；Pseud．－Arist．Mirab． 58；Macrob．Sat．v．19；Strab．vi．p．275；Ovid， Met．v．406；Virg．Aen．ix．585；Sil．Ital．xiv． 219 ；Nonn．Dionys．xiii．311．）The sacred cha－ racter of the spot as an asylum for fugitive slaves caused it to be selected for the place where the great servile insurrection of Sicily in в．c． 102 was first discussed and arranged；and for the same reason Salvius，the leader of the insurgents，made splendid offerings at the shrine of the Palici．（Diod．xxxvi． $3,7$.

There was not in early times any other settlement besides the sanctuary and its appurtenances，adjoin－ ing the lake of the Palici；but in B．c．453，Duce－ tius，the celebrated chief of the Siculi，founded a city close to the lake，to which he gave the name of Palica（Ma入ıkn）．and to which be transferred the inhabitants of Menaenum and other neighbouring towns．This city rose for a short time to consider－ able prosperity；but was destroyed again shortly after the death of Ducetius，and never afterwards restored．（Diod．xi．88，90．）Hence the notices of it in Stephanus of Byzantium and other writers can only refer to this brief period of its existence． （Steph．B．l．c．；Polemon，ap．Macrob．l．c．）．The modern town of Palagonia is thought to retain the traces of the name of Palica，but certainly does not occupy the site of the city of Ducetius，being situ－ ated on a lofty hill，at some distance from the Lago di Naftia．Some remains of the temple and other buildings were still risible in the days of Fazello in the neighbourhood of the lake．The locality is fully described by him，and more recently by the Abate Ferrara．（Fazell．de Reb．Sic．iii．2；Ferrara， Campi Flegrei della Sicilia，pp．48．105．）［E．H．B．］

PALIMBOTHRA（Пa入ı $\mu 6 \dot{u}^{\theta} \rho a$, Ptol．vii．1．§ 73；Steph．B．s．v．），a celebrated city of ancient In－ dia，situated at the junction of the Ganges and Erannaboas（Hiránjacaha），at present known by the name of Patna．Strabo，who states（ii．p．70）that Megasthenes was sent to Palimbothra as an am－ bassador to the king Sandrocottus（C＇handragupta），
describes it as a vast town，in the form of a paral－ lelogram 80 stadia in length and 15 in breadth， surrounded by a stockade，in which open spaces wers cut to shoot through，and by a ditch．He adds that it was in the country of the Prasii（xv．p．702）． In another passage he places it，on the authority of Megasthenes，at 6000 stadia from the mouths of the Ganges；or on that of Patrocles，who was sent as an ambassador to Allitrochades，the son of San－ drocottus（ii．p．70），at 5000 stadia（xv．p．689）． Pliny approaches most nearly to the computation of the latter traveller，as he makes the distance from Palimbothra to the sea to be 638 M．P．，about 5100 stadia（vi．17．§ 21）．Arrian calls it the greatest of the cities of India，and apparently quotes the same description from Megasthenes which Strabo must have had before him．（Indic c．10．）Dio－ dorus attributes to Hercules the building of its walls （ii．39）．Where Pliny says＂Amnis Jomanes in Gangem per Palibothros decurrit，＂he is evidently speaking of the people，and not，as some have sup－ posed，of the town（vi．19）．There seems no reason to doubt that the ancient Sanscrit name of this town was Pataliputrn．（Lassen，Indisch．Alterthom． i．p． 137 ；Franklin，Inquiry into the ancient Pali－ bothra，Lond．1815，who，however，places it wrongly at Bhagalpuir．）

PALINDROMUS PROMONTORIUM（Haxiv－
 the Arabian peninsula，at the Straits of Bab－d． Mandeb，placed by Ptolemy between Ocelis Empo－ rium and Posidium Promontorium，in long． $74^{\circ} 30^{\circ}$ ， lat． $11^{\circ} 40^{\prime}$（vi．7．§ 7）．It now bears the samo name as the strait．（Moresby，Sailing Directions for the Red Sea，p．2．）
［G．W．］
PALINU＇RU＇S or PALINU＇RI PROMONTO＇－ RIUM（Ila入ívoupos axparthoıov，Strab．：Capo Pali－ uro），a promontory on the coast of Lacania，on the Tyrrhenian sea，between Velis and Buxentum．It had a port of the same name immediately adjoining it， which still bears the name of the Porto di Palimuro． Both headland and port received their name from the well－known tradition，recorded by Virgil，and alluded to by many other Latin writers，that it was here that Palinurus，the pilot of Aeneas，was cast on shore and buried．（Virg．Aen．v．833－871，vi． 337－381；Dionys．i．53；Lacan，ix．42；Mel．ii． 4．§ 9；Solin．2．§ 13．）We learn from Servius that heroic honours were paid him by the Lucanians （probably by the citizens of Velia），and that he had a cenotaph and sacred grove not far from that city． （Serv．ad Aen．vi．278．）It does not appear that there was ever a town adjoining the headland；and the port，which is small，though secure and well sheltered，is mentioned only by Dionysius；but the promontory is noticed by all the geographers except Ptolemy，and is described by Pliny as forming the northern boundary of a great bay which might be considered as extending to the Columna Rhegina，or the headland on the Sicilian straits．It is in fact the most salient point of the projecting mass of mountains which separate the gulf of Posidonia from that of Latis or Pulicastro，and form the chief natu－ ral feature of the coast of Lucania．（Plin．iii．5．s． 10；Mel．ii．4．§ 9；Strab．vi．p．252；Oros．iv．9．） some ruins of ancient buildings are still visible on the summit of the headland，which are populaty known as the tomb of Palinurus．The promontory still retains its ancient name，though vulgarly cor－ rupted into that of Palonulo．

Like most mountain promontories，that of Pali－
nurus was subject to sudden and violent storms，and turame，in consequence，on two occasions the scene of great disasters to the Roman fleets．The first wis in B．C．253，when a fleet under the consuls Servilius Caepio and Sempronius Blaesus，on its return from Africa，was shipwrecked on the coast about Cape Palinurus，and 150 vessels lost with all the booty on buard．（Oros．iv．9．）The second was in $B_{0}$ C．36，when a considerable part of the fleet of Augustus，on its way to Sicily，having been com－ pelled by a tempest to seek refuge in the bay or roudstead of Velia，was lost on the rocky coast be－ tween that city and the adjoining headland of Pali－ nurus．（Dion Cass．xlix． 1 ；Appian，B．C．v．98； Vell．Pat．ii．79．）
［E．H．B．］
PA＇LlO（Palo），a town of Apulis，mentioned only by Pliny，who enumerates the Palionenses among the＂populi＂of the interior of that region． （Plin．iii．11．8．16．）Its site is probably indicated by the modern village of $P$ calo，about 5 miles south of Bitonto（Butuntum）．
［E．H．B．］
PALISCIUS．［Megalopolis，p．310，a．］
PALIU＇RUS（Ma入ioupos，Strab．xvii．p．838； Stadicsm．§42；P＇sl．iv．5．§2；Paliuris，Peut．Tab．； Geor．Rav．iii．3；Paniuris，Itio．Anten．），a village of the Marmaridae，near which was a temple to Heracles （Strab．l．c．），a deity much worshipped in Cyrenaica． （comp．Thricl，Res Cyren．p．291．）Ptolemy（iv． 4．§ 8）adds that there was a marsh here with bi－ valve shells（ $\langle\nu$ ！$r o \gamma \chi u ́ \lambda ı o \nu)$ ．It is identified with the W＇ady Temanineh（Pacho，Voyage p．52；Barth， Wunkernengen，pp．506，548），where there is a brackish marsh，corresponding to that of Ptolemy （l．c．），and remains of ancient wells and buildings at Herúbet（Síli）Hadjar－el－Djemm．

It was off this coast that Cato（Lucan，ix．42， where the reading is Palinurus，with an allusion to the tale of Aeneas）met the flying vessels which bore Cornelia，together with Sextus，from the scene of her husband，Pompeius＇s，murder．

Palma. [Baleares.]
PALMAM, AD, a station on the coast-road of Syrtica, 12 M. P. from Leptis Magna, and 15 M. P. from Quintiliana (Peut. Tab.). This position agrees with that of the ruins found at Seba' Burdj. (Barth, Wanderungen, p. 304.)
[E. B. J.]
PALMA'RIA (Palmaruola), a small island in the Tyrrhenian sea, the most westerly of the group now known as the Ponza Islands, or Isole di Ponza. It is between 3 and 4 miles long, and not more than a quarter of a mile broad; and was doubtless in ancient, as well as modern times, a dependency of the neighbouring and more considerable island of Pontia (Ponza), from which it is only 5 miles distant. (Plin. iii. 6. s. 12 ; Mel. ii. 7. § 18 ; Varr. R. R. iii. 5. § 7.)
[E. H. B.]
PALMATIS (Md́лuatis, Procop. de Aed. iv. 7. p. 293), a town of Moesia Inferior, between Dorostorum and Marcianopolis (Tab. Peut.), perhaps Kutschuk-Kainardgjik. [T.H.D.]

PALMY'RA (Пaл $\mu \dot{v} \rho a$, Ptol. v. 15. §§ 19, 24, viii. 20. § 10 ; Арpian, B. C. v. 9 : Па入رlpa, Joseph. Ant. viii. 2; and Palmira, Plin. v. 25. s. 21 : Eth. Palmyrenus, or Palmirenus, Id. l.c.), a city of Syria, situated in $34^{\circ} 24^{\prime}$ N. lat., and $38^{\circ}$ $20^{\prime}$ E. long. Its Hebrew name, Tadmor, or Thadmor, denotes, like its Greek one, a city of palms; and this appellation is preserved by the Arabs, who still call it Tedmor. Tadmor was built, or more probably enlarged, by Solomon in the tenth century B. c. ( 1 Kinge, ix. 18; 2 Chron. viii. 4), and its identity with Palmyra is shown in the passage of Josephas before cited. It is seated in a pleasant and fruitful oasis of the great Syrian desert, and is well watered by several small streans; but the river mentioned by Ptolemy is nowhere to be found. Its situation is fine, under a ridge of hills towards the W., and a little above the level of an extensive plain, which it commands on the E. (Wood, Ruins of Palmyra, p. 5), at a distance of about 140 miles ENL. of Damascus. It is not mentioned by Xenophon, who must have passed near it, nor in the accounts of the conquests of Alexander the Great. The first historical notice that we find of it is in Appian, who tells us that M. Antony, under pretence of punishing its equivocal conduct, but in reality to enrich his troops with the plunder of a thriving commercial city, directed his march towards it, but was frustrated of his object by the inhabitants removing their goods to the other side of the Euphrates. (B. Civ. v. c. 9.) This account shows that it must have been a town of considerable wealth; and indeed its advantageous situation must have long rendered it an entrepót for the traffic between the east and Damascus and the Phoenician cities on the Mediterranean. Yet its name is not mentioned either by Strabo or Mela. Under the first Roman emperors it was an independent city; and its situation on the borders of the human and Parthian empires gave it a political inportance, which it seems to have preserved by a well-judged course of policy, though naturally exposed to much danger in the quarrels of two such formidable neighbours. ("Inter duo imperia summa, et prima in discordia semper utrinque cura," Plin. h.c.) It is called a colonia on
the coins of Caracalla, and Ulpian mentioned it in his first book de Censibus as having the Jus Italicum. It appears, from an inscription, to have assisted the emperor Alexander Severus in his wars ggainst the Persians. (Wood, Inscr. xix.) It is not, however, till the reign of Gallienus that we find Palmyra playing any important part in history: and at this period we have notices of it in the works of Zosimus, Vopiscus, and Trebellius Pollio. Odenathus, a noble of Palinyra, and according to Procopius (B. Pers. ii. c. 5) prince of the Saracens who inhabited the banks of the Euphrates, for his great and splendid services against the Persians, received from Gallienus the title of Augustus, and was acknowledged by him as his colleague in the empire. After the assassination of Odenathus by his nephew Maeonius, the celebrated Zenobia, the wife of the former, whose prudence and courage had been of great assistance to Odenathus in his former successes, ascended the vacant throne, and, assuming the magnificent title of Queen of the East, ruled with a manly vigour during a period of five years. Under this extruordinary woman, whose talents and accomplishments were equalled by her beauty, and whose love of literature is shown by her patronage of Longinus, Palmyra attained the highest pitch of its prosperity. She claimed to be descended from the Macedonian kings of Egypt, and her achievements would not have disgraced her ancestry; though, according to other accounts, she was a Jewess. (Milman, Hist. of the Jews, iii. p. 175.) Besides the sovereignty of Syria and Mesopotamia, she is said to have extended her sway over Egypt (Zosim. i. c. 44); but by some critics this fact has been questioned. Claudius, the successor of Gallienus, being engaged in the Gothic War, tacitly acknowledged her authority. But after the termination of the short reign of that emperor, the progress of Zenobia in Asia Minor was regarded by Aurelian with jealousy and alarm. Her arms and intrigues already menaced the security of Bithynia (Ib.c. 50), when Aurelian marched against her, and defeated her in two great battles near Antioch and Emesa, at both of which she commanded in person. Zenobia now retreated to Palmyra, and prepared to defend her capital with vigour. The difficulties of the siege are described by Aurelizn himself in an original letter preserved by Vopiscus. (Aurel. c. 26.) After defying for a long time the arms of the Roman emperor, Zenobia, being disappointed of the succour which she expected to receive from the Persians, was ultimately compelled to fly, but was overtaken on the banks of the Euphrates by the light horse of Aurelian, and brought back a prisoner. Shortly after this event her capital surrendered, and was treated with clemency by the conqueror, who, however, sullied his fame by the cruel execution of Longinus and some of the principal citizens, whom Zenobia had denounced to him. The personal adventures of Zenobia we need not pursue, as they will be found related in the Dictionary of Biography and Mythology. No sooner had Aurelian cros:ed the Hellespont than he was recalled by the intelligence that the Palmyrenians had risen against and massacred the small garrison which he had left in their city. The emperor immediately marched afain to Palmyra, which now paid the full penalty of its rebellion. In an original letter Aurelian has bimself recorded the unsparing execution, which extended even to old men, women, and children. (Vopisc. Aur. c. 31.) To the remnant of the Palingrenians,

PALMYRA．
indeed，be granted a pardon，with permission to repsir and inhabit their ruined city，and especially discovered much solicitude for the restoration of the Temple of the Sun．But the effects of the blow were too heary to be retrieved．From this period （A．D．273）Palmyra gradually dwindled into an insignificant town，and at length became only a place of refuge for a few families of wandering Arabs．It served indeed for some years as a Ruman military station；and Diocletian partially restored some of its buildings，as appears from an inscription preserved by Wood．About the year 400 the first Illyrian legion was quartered there（Not．Imp．）；and Procopius tells us that it was fortified by Justinian （de Aed．ii．2）．But this is the last that we hear of Palmyra under the Romans；and the sinking for－ tunes of their empire probsbly soon led them to abandon it．

The remains of the buildings of Palmyra are chiefly of the Corinthian order，which was the favourite style of architecture during the two or three centuries which preceded Diocletian；whence we may infer that the splendour which it once ex－ bibited was chiefly owing to Odenathus and Zenobia For many centuries even the site of Palmyra re－ mained totally unknown except to the roving Arabs of the desert，whose magnificent accounts of its ruins at length excited the curiosity of the English mer－ chants settled at Aleppo．Under the auspices of the Levant Company，an expedition started in 1678 for the purpose of exploring them；but the persons who compased it were robbed and ill－treated by the Arabs，and compelled to return without baving ac－ complished their object．In 1691 the expedition was renewed with better success，and an accuunt of the discoveries then made was published in the transactions of the Royal Suciety．（Sellers，Antiqui－ ties of Palmyra，Pref．）Subsequently Palmyra was visited in 1751 by Word and Dawkins，who pub－ lished the results of their journey in a large folio volume with magnificent engravings．The account in Volney（vol．ii．）is chiefly taken from this work． Among the more recent descriptions may be men－ tioned that of Irby and Mangles（Travels，ch．v．）， who visited Palmyra in 1816．According to these travellers the plates of Wood and Dawkins have done more than justice to the subject；and although the view of the ruins from a distance，with their line of dazzling white columns extending between one and two miles，and relieved by the contrast of the yellow sand of the desert，is very striking，yet， when examined in detail，they excite but little interest．Taken separately，not a single column or architectural member is worthy of admiration．None of the former exceed 40 feet in height and 4 feet in diameter，and in the boasted arenue they are little more than 30 feet high．The remains of the Tem－ ple of the Sun form the most magnificent object，and being of the Ionic order，relieve the monotony of the prevailing Corinthian style．These columns，which are 40 feet high and 4 feet in diameter，are fluted， and formed of only three or four pieces of stone；and in former times were surmounted by brazen Ionic capitals．The facade of the portico consists of 12 columns，like that of the temple of Baalbec，besides which there are other points of resemblance．On the whole，however，the ruins are far inferior to those at Baalbec．At the time of Messrs．lrby and Mangles＇visit the peristyle court of the Temple of the Sun was occupied by the Arabian village of Tadnor；but with this exception，and the Turkish

PAMPHIA．
burial ground，the space was unencumbered，and there was nothing to obstruct the researches of the antiqnary．In some places the lines of the strects and the foundations of the houses were distinctly visible．The sculptures are uniformly coarse and bad；the stone is of a perishable description，and scarcely deserves the name of marble．The sepul－ chres outside the walls formed perhaps the most interesting part of the remains．These consist of square towers，from three to five stories high，form－ ing sepulchral chambers，with recesses for the recep－ tion of the bodies．In these tombs mummies and mammy cloths are found，prepared very much after the Egyptian manner；but there are no paintings， and on the whole they are far from being so in－ teresting as the E．gyptian sepulchres．There was a sculptured tablet in bas－relief，with seven or eight figures standing and clothed in long robes，supposed to represent priests．Several Greek and Palmyrene inscriptions，and two or three in Latin and Hebrew， have been discovered at Palmyra．They will be found in Wood＇s Kuins of Palmyra，and the fol－ lowing works may also be consulted：Bernard and Smith，Inscriptiones Graecae Palmyrenorum， Utrecht，1698；Giorgi，De Inscriptionitus Palmy－ renis quae in Musaeo Capitolino adserrantur interpretandis Epistola，Rome，1782；Barthélemy， in Mém de l．Academie des Inser．tom．sxiv．；and Swinton，in the Philusophical Transactions，vol． xlviii．

2．A river in Laconia，forming the ancient boun－ dary between Messenia and Laconia．（Strab．viii． p．361．）Strabo speaks of this river as near Leuc－ trum，but it flows into the sea at Pephnus，about 3 miles S ．of Leuctrum．［Perhnts．］

3．A tributary of the Peneius in Thessaly，pro－ bably the modern Bliuri or Piliuri．（Herod．vii． 129 ；Plin．iv．8．s．15；Leake，Northern Greece， vol．iv．pp．512，514．）

PA＇MPHIA（Пацфía），a village of Artolia，on the road from Metapa to Thermum，and distant 30
stalia from each, was burnt by Philip in b. c. 218. (lolyb. v. 8, 13 ; for details see Thermum.)

PAMPHY'LIA (Пацфu入ía), a country on the south coast of Asia Minor, bordering in the west on Lycia, in the north on Pisidia, and in the east on Cilicia. The country, consisting of ouly a narrow strip of coast, forms an arch round the bay, which is called after it the Pamphylius Sinus or the Pamphylium Mare. According to Pliny (v. 26) the country was originally called Mopsopsia, from Mopsus, a leader of one of those bands of Greeks who after the Trojan War are said to have settled in Pamphylia, Cilicia, and Syria. (Strab. xiv. p. 668; comp. Scylax, p. 39 ; Ptol. v. 5 ; Dionys. Per. 850, \&c.; Pomp. Mela, i. 14 ; Stadiasm. Mar.Mag. § 194, \&c.; Hierocl. p. 679,\&c.) Pamphylia, according to Strabo, extended from Olbia to Ptolemais, a line measuring 640 stadia, or about 18 geographical miles : the breadth of the country, from the coast towards the interior, was nowhere above a few miles. In later times, however, the Romans applied the name Pamphylia in such a manner as to embrace Pisidia on both sides of Mount Taurus, which does not appear as a distinct province of the empire until the new division under Constantine was made. This accounts for the fact of Polybius (xxii. 27) doubting whether lamphylia (in the Koman sense) was one of the countries beyond or this side of Mount Taurus; for Pisidia, in its narrower sense, is unquestionably a country beyond Mount Taurus. (Comp. Strab. xii. p. 570, xiv. p. 632, xv. p 685.) In this latter rense Pamphylia was separated from Lycia by Mount Climax, and from Cilicia by the river Melas, and accordingly embraced the districts called in modern times Tekike and the coast district of Itshil. But these limits were not always strictly observed; for Olbia and Perge are described by some writers as belonging to Lycia (Scylax, p. 39); while Ptolemais, bevond the Melas, which is generally regarded as belonging to Pamphylia, is assigned by some to Ci licia. The country of Pamphylia is, on the whole, very mountainous ; for the ramifications of Mount Taurus rise in some parts on the coast itself, and in others at a distance of only a few miles from it. .There is only one great promontory on the coast, viz. Leucotheum, or Leucolla. The principal rivers, all of which discharge their waters into the Pamphylian bay, are the Catarrhactres, Cestrus, Eurymedon, and Melas, all of which are navigable. The coast district between the Cestrus and Eurymedon contains the lake Capria, which is of considerable extent.

The inhabitants of Pamphylia, Pamphyli, that is, a mixture of various races, consisted of aborigines mixed with Cilicians who had immigrated: to these were added bands of Greeks after the Trojan War, and later Greek colonies. (Strab. l.c.; Eustath. ad Jion. Per. 854 ; Herod. vii. 91, viii. 68; Paus. vii. 3. § 3; Appian, B. C. ii. 71, iv. 60; Liv. xliv. 14.) The Pamphylians (Pamphyli, Pamphylii, Iduфu入on, חa $\varnothing \dot{\text { údiot }), ~ a c c o r d i n g l y, ~ w e r e ~ i n ~ t h o s e ~ p a r t s ~ w h a t ~}$ the Alemanni were in Germany, though the current traditions related that they were all descended from Pamphyle, a daughter of Rhacius and Manto (Steph. B. s. v. Пauфилia), or from one Pamphylus (Eustath. ad Dim. Per. l. c.). Others again, though without grod reason, derive the name from $\pi$ âs and фúdतov, because the country was rich in wood. The Pamphylians never acyuired any great power or political importance; they shared the fate of all the natious of Asia Minor, and in the war of Xerses
against the Greeks their naval contingent comsisted of only 30 ships, while the Lycians furnished 50 , and the Cilicians 100. (Herod. vii. 92.) After the Persian empire was broken to pieces by Alexander, the Pamphylians first became subject to Macedonia, and then to Syria. After the defeat of Antiochus the Great, they were annexed by the Romans to the kingdom of Pergamus (Polyb. xxii. 27), and remained connected with it, until it was made orer to the Romans. The Greek colonies, however, such as Aspendus and Side, remained independent republics even under the Persian dominion (Arrian, Anab. i. 25, foll.); but we have no information at all about their political constitutions. In their manners and social habits, the Pamphylians strongly resembled the Cilicians (Strab. xii. p. 570, xiv. p. 670), and took part with them in their piratical proceedings; their maritime towns were in fact the great marts where the spoils of the Cilician pirates were disposed of. (Strab. xiv. p. 664.) Navigation seems to have been their principal occupation, as is evident from the coins of several of their towns. Their language was probably a mixture of Greek and some barbarous dialects, which could scarcely be recognised as a dialect of the Greek. (Arrian, Anab. i. 26.) But their coins bear evidence of an intimate acquaintance with the gymnastic and agonistic arts, and with the gods of the Hellenes, among whom Zcus, Artemis, and Dionysus are often represented. The more important towns of Pamphylia were Lyrnas or Lyrnessus, Tenedus, Olbia, Corycus, Aspendus, Perge, Syllium, Side, Cibyra, Ptolemais, \&ce. (Comp. Sestini, Descript. Num Vet. p. 388, foll.; Eckhel, Doctr. Num. i. 3, pp. 6, 14, \&c.) [L.S.]

PAMPHY'LIUM MARE, PAMPHY'LIUS SI-
 a large and deep bay formed by the curved form of the coasts of Lycia, Pamphylia, and Cilicia, beginning in the west at the Chelidonian promontory, and terminating in the east at Cape Anemurium. The distance from the Chelidonian cape to Olbia is stated by Strabo to be 367 stadia (Strab. ii. pp. 121, 12.5, xiv. p. 666 ; Agathem. i. 3, ii. 14 ; Strbaeus, i. p. 656; Plin. v. 26, 35; Flor. iii. 6.) This sea is now called the bay of Adalia. [L. S.]

PANACHAICUS MONS [Achaia, p. 13, z]
PANACTUM. [AtTICA, p. 329, a.]
PANAEI ( $\Pi$ avaiot), a people of Thrace, whom Thucydides describes as dwelling beyond the Strymon towards the north (ii. 101). According to Stephanus B. (s. v.) they were a tribe of the Edones near Ainphipolis.

PANAETO'LIUM. [AETOLIA, p. 63, b.]
PANAGRA (Ildvaypa), a town in the interior of Libya, on the lake Libya, and near the Nigir. (Ptol. iv. 6. § 27.)

PANDAE (Plin. vi. 20. s. 23), a tribe of Indians mentioned by Pliny, who, according to him, were alone in the habit of having female sovereigns, owing to a tradition prevailing among them that they were descended from a daughter of Hercules. They would seem from his account to have been a race of great power and wide dominion, and to have occupied some part at least of the Panjib. Arrian (Indic. 8) tells nearly the same story of a danghter of the Indian Hercules, whom he calls Pandaea. There can be no doubt that both are to be referred to the Indian dynasty of the Pandavas, traces of whose names are met in several ancient anthors. [Pandovi Regio.] [V.]
PANDATA'RIA (Havoatapia: Fusedotena), a

## PANDION.

PANDOVI REGIO.
539
small island in: the Tyrrhenian sea, lying off the Ciulf of Gaita, nearly opposite to the mouth of the Vultumus. (Plin. iii. 6. ..s. 12 ; Strab. ii. p. 123 ; Mela, ii. 7. § 18; Ptol. iii. 1. § 79.) Strabo says it was 250 stadia from the mainland, which is just about the truth (v. p. 233). He calls it a small island, but well peopled. It was not unfrequently made use of, as well as the neighbouring Pontia, as a place of confinement for state prisoners or political exiles. Among these may be mentioned Julia, the daughter of Augustus, Agrippina, the widow of Germanicns, and Octavia, the tirst wife of Nero, of whom the two last were put to death in the island. (Tac. Ann. i. 53, xiv. 63 ; Suet. Tib.53.) Pandataria is about midway between Pontia (Ponzn) and Aenaria (Ischin) ; it is of volcanic origin, like the group of the Ponza Islands, to which it is sometimes considered as belonging; and does not exceed 3 miles in length. Varro notices it as frequented, like the neighbouring islands of Pontia and Palmaria, by flocks of quails and turtle-doves in their annual migrations. (Varr. R. R. iii. 5. § 7.) [E. H. B.]

PANIION, a headland in the south-west of Caria, opposite the island of Syme. (Pomp. Mela, i. 16.) Pliny (v. 29) mentions on the same spot a small town Paridion, or according to another read. ing Parydon.
[L.S.]
PANDU'SIA (Havסoбia: Eth. Havסooivos). 1. A city of Brattiam, situated near the fmntiers of Lucania. Strabo describes it as a little above Consentia, the precise sense of which expression is far from clear (Strab. ri. p. 256); but Livy calls it " imminentem Lucanis ac Bruttiis finibus." (Lir. viii. 24.) According to Strabo it was originally an Oenotrian town, and was even, at one time, the capital of the Oenotrian kings (Strab. l. c.); but it scerns to have certainly received a Greek colony, as Scylax expressly enumerates it among the Greek cities of this part of Italy, and Scymnus Chius, though perhaps less distinctly, asserts the same thing. (Scyl. p. 4. § 12 ; Scymn. Cb. 326.) It was probably a colony of Crotona; though the statement of Eusebius, who represents it as founded in the sane year with Metapontum, would lead us to regard it as an independent and separate colony. (Euseb. Arm. Chron. p. 99.) But the date assigned by him of в.c. 774 seems certainly inadmissible. [Metapontum.] But whether originally an independent settlement or not, it must have been a dependency of Crotona during the period of greatness of that city, and hence we never find its name mentioned among the cities of Magna Graecia. Its only historical celebrity arises from its being the place near which Alexander, king of Epirus, was slain in battle with the Bruttians, B. c. 326. That monarch had been warned by an oracle to avoid Pandosia, but he understood this as referring to the town of that name in Thesprotia, on the banks of the Acheron, and was ignorant of the existence of both a town and river of the same names in Italy. (Strab. vi. p. 256 ; Liv. viii. 24 ; Justin, xii. 2; Plin. iii. 11. s. 15.) The name of Pandosia is acain inentioned by Livy (xxix. 38) in the Second Punic War, among the Bruttian towns retaken by the consul P. Sempronias, in B. C. 204; and it is there noticed, together with Consentia, as opposed to the "ignobiles aliae civitates." It was therefore at this time still a place of some consequence; and Strabo seems to imply that it still existed in his time (Strab. l. c.), but we find no subsequent trace of it. There is great difficulty in determining its
position. It is described as a strong fortress, situated on a hill, which had three peaks, whence it was
 L. c.). In addition to the vague statements of Strabo and Livy above cited, it is enumerated by Scymnus Chius between Crotona and Thurii. But it was clearly an inland town, and must probably have stond in the mountains between Consentia and Thurii, though its exact site cannot be determined, and those assigned by local topographers are purely conjectural. The proximity of the river Acheron affords us no assistance, as this was evidently an inconsiderable stream, the name of which is not mentioned on any other occasion, and which, therefore, cannot be identified.

Much confusion has arisen between the Bruttian Pardosia and a town of the same name in Lucania (No. 2.); and some writers have even considered this last as the place where Alexander perished. (Romanelli, vol. i. pp. 261-263). It is true that Theopompus (ap. Plin. iii. 11. s. 15), in speaking of that event, described Pandosia as a city of the Lucanians, but this is a very natural error, as it was, in fact, near the boundaries of the two nations (Liv. viii. 24), and the passages of Livy (xxix. 38) and Strabo can leave no doubt that it was really situated in the land of the Bruttians.
2. A town of Lucania, situated near Herarlea. It has often been confounded with the preceding; but the distinct existence of a Lucanian town of the name is clearly established by two authorities. Plutarch describes Pyrrhus as encamping in the plain between Pandosia and Heraclea, with the river Siris in front of hin (1'lut. I'yrrh. 16); and the celebrated Tabulae Heracleenes repeatedly refer to the existence of a town of the name in the immediate neighbourhood of Heraclea. (Mazocchi, Tab. Heracl. p. 104.) From these notices we may infer that it was situated at a very short distance from Heraclea, but apparently further inland; and its site has been fixed with some probability at a spot called Sta Maria $d^{d}$ Angloma, about 7 miles from the sea, and 4 fmm Heraclea. Anglona was an episcopal see down to a late period of the middle ages, but is now wholly deserted. (Mazocchi, L.c. pp. 104, 105; Bomanelli, vol. i. p. 265.)
[E. H. B.]
PANDO'SIA (Пavסoбia: Eth. Пavסoбteús), an ancient colony of Elis (Dem. Halonnes. p. 84, Reiske), and a town of the Cassopaei in the district of Thesprotia in Epirus, situated upon the river Acheron. It is probably represented by the rocky height of Kastri, on the summit of which are the walls of an acropolis, while those of the city descend the slopes on either side. (Strab. vii. p. 324; Liv. viii. 24 ; Justin, xii. 2 ; Plin. iv. 1 ; Steph. B. s. v. ; Leake, Northern Grecce, vol. iv. p. 55.)

## COIN OF PANDOSIA.

PANDOVI REGIO (Пavסお́ov $\chi$ ćpa, Ptol. vii. 1. § 11), a district at the southern extremity of the Peninsula of Hindostán. The name is in sone editions Mavס،bvos, but there is every probability that the above (which was suggested by Erasmus) is the true reading. There is another district of the same name which is placed by Itolemy in the Iun-
$j i b$ on the Bidaspes (Vipása) (vii. 1. §46). It is clear from a comparison of the two names that they refer to the same original Indian dynasty, who were known by the name of the Pundaras, and who appear to have been extended very widely over India. At the time of the invasion of Alexander, the district in the Panjab belonged to king Porus. (Strab. xv. p. 686: Lassen, Ind. Alterth. Geschichte der Pandava, p. 652.)
[V.]
PANEAS, PANIAS, or PANEIAS (חaveds, Mavias, Mavecds, Hierocl. p. 716), more usually called either Cafgareia Paneas (Kaıđápela Maveás or Maviás, Joseph. Ant. xviii. 2. § 3, B. Jud. ii. 9. § 1 ; Ptol. v. 15. § 21 ; Plin. v. 15. 8. 15 ;

 or Caesareia Philippi (K. $\dot{\eta} \boldsymbol{\phi}_{1} \lambda$ (intoo, Matth.xvi. 13; Mark, viii. 27; Joseph. Ant. xx. 8. § 4, B. J. iii. 8. § 7, 2. § 1 ; Euseb. H. E. vii. 17), a city in the north of Palestine, called by Ptolemy and Hierocles ( $l$. ce.) a city of Phoenicia, situated upon one of the sources of the Jordan, at the foot of Mt Panium, one of the branches of Lebanon. Mt Panium contained a cave sacred to Pan, whence it derived its name. (Philostorg. vii. 7.) At this spot Herod erected a temple in honour of Augustus. (Joseph. Ant. xy. 10.§ 3, B. J. i. 21. § 3.) Paneas was supposed by many to have been the town of Laish, afterwards called Dan; but Eusebius and Jerome state that they were separate cities, distant 4 miles from each other. (Reland, Palaestina, p. 918, seq.) Paneas was rebuilt by Philip the Tetrarch, who called it Caesareia in honour of the Roman emperor, and gave it the surname of Philippi to distinguish it from the other Caenareia in Palestine. (Joseph. Ant. xviii. 2. § 3, B. J. ii. 9. § 1.) It was subsequently called Neronias by Herod Agrippa in honour of the emperor Nero. (Joseph. Ant. xx. 8. §4; Coins.) According to ecclesiastical tradition it was the residence of the women diseasel with an issue of blood. (Mutth. ix. 20; Euseb. II. E. vii. 18; Sozon. v. 21 ; Theoph. Chronogr. 41 ; Phot. cod. 271.) Under the Christians Puneas became a bishopric. It is still called Binius, and contains now only 150 houses. On the NE. side of the village the river, supposed to be the principal mource of the Jordan, issues from a spacious cavern under a wall of rock. Around this source are many hewn stones. In the face of the perpendicular rock. directly over the cavern and in other parts, several niches have been cut, apparently to receive statues. Each of these niches had once an inscription: and one of them, copied by Burckharit, appears to have been a dedication by a priest of Pan. There can be no doubt that this cavern is the cave of Pan mentioned above; and the hewn stones around the spring may have belonged perhaps to the temple of Augustus. This spring was considered by Josephus to be the outlet of a small lake called Phiala, situated 120 stadia from Paneas towands Trachonitis or the NE. Respecting this lake see Vol. II. p. 519, b.
(K.land, Palacstina, p. 918, seq.; Eckhel, vol. iii. p. 339, seq.: Burckhardt, Syria, p. 37, seq.; Robinぃon, Bibl. Kes. vol. iii. p. 347, seq.)

PANE'PHISIS (Пav'́фvoıs, Ptol. iv. 5. § 52), a town of Egypt, mentioned by recent writers only, with the single exception of Ptoleny ( Пavequasos, Conc. Ephes. p. 478; Пavéфєoos, Cassian. Collat. xi. 3). It probably therefore bore anuther appelJation in mure ancient times. Mamert (vol. $x$.
pt. 2. p. 580) believes it th have been the city of Diospolis in the Delta; and he agrees with Champollion (CEgypte, vol. ii. p. 130) in identifying it with the modern Menzaleh. It stood between the Tanitic and Mendesian arms of the Nile, a little SE. of the Ostium Mendesium. Ptoleny (l.c) says that it was the capital of a nome, which he alone mentions and denominates Néout. Panephysiz may have been either the surviving suburb of a decayed Deltaic town, or one of the hamlets which sprang up among the ruins of a more ancient city.
[W. B D.]
PANGAEUM, PANGAEUS ( $\tau \delta$ חárrasov or
חarүaĩo ópos, ठ Hárүaios, Herod. v. 16. vii. 112 , 113; Thuc. ii. 99; Aesch. Pers. 494; Pind. Pyth. iv. 320; Eurip. Rhes. 922, 972 ; Dion Cass. xivii. 35; Appian, B. C. iv. 87, 106; Plin. iv. 18; Virg. Georg. iv. 462; Lucan, i. 679), the great mountain of Macedonia, which, under the modern name of Pirnari, stretching to the E. from the left bank of the Strymon at the pass of Amphipolis, bounds all the eastern portion of the great Strymonic hasin on the S., and near Právista meets the ridges which enclose the same basin on the E. Pangaeum produced gold as well as silver (Herod. vii. 112: Appian, B. C. iv. 106); and its slopes were covered in summer with the Rosa centifolia. (Plin. xxi. 10; Theoph. H. P. vi. 6; Athen. xr. p 682.) The mines were chiefly in the hands of the Thasians; the other peoples who, according to Herodotus (l. c.), worked Pangaeum, were the Pieres and Odomanti, but particularly the Satrae, who bordered on the mountain. None of their money has reachat us: but to the Pangaean silver mines may be traced a large coin of Geta, king of the Edones. [Enones] (Leake, Northern Greece, vol. iii. pp. 176, 190, 212.)
[E. B. J.]
PANHELLE'NES. [Graecta, Vol. I. p. 1010.]
PANIO'NIUM ( $\Pi$ avióviov). a place on the western slope of Mount Mycale, in the territory of Priene, containing the common national sanctuary of Po seidon, at which the Ionians held their regnlar meetings, from which circumstance the place derived its name. It was situated at a distance of 3 stadia from the ses-coast. (Strab. xiv. p. 639; Herod. i. 141, foll.; Mela, i. 17; Plin. v. 31; P’ans. vii. 5. § 1.) The Panioninm was properly speakin! only a grove, with such buildings as were necessary to accommodate strangers. Stephanas B. is the only writer who calls it a town, and even mentions the Ethnic designation of its citizens. The preparations for the meeting and the management of the games devolved upon the inhabitants of Priene. The earlier travellers and geographers looked for the site of the lanionium in some place near the molern village of Tshangi; but Col. Leake (Asia A/inor, p260) observes: "The nninhabitable aspect of the rocks and forests of Mycale, from Cape Trogilium to the modern Tshangli, is such as to make it impossible to fix upon any spot, either on the face or at the foot of that mountain, at which Panionium can well be supposed to have stoxd. Tshangli, on the other hand, situated in a delightful and well watered valley, was admirably suited to the Panionian festival: and here Sir William Gell found, in a church on the sea-shore, an inscription in which he distinguished the name of Panionium twice. I conceive, therefore, that there can be little doubt of Tshangli being on the site of Panionium." [L.S.]

PANISSA, a river on the E. coast of Thrace. (Plin. iv. 11. 8. 18.)
[T. H. D.]

PANIUM (IIdyıy, Hierocl. p. 632; Const. Porph. de Them. ii. 1. p. 47 ; Suidas, 8. v.), a town on the coast of Thrace, near Heracleia; perhaps the modern Bunados.
[T. H. D.]
PA'NNONA (Mávova), a town in the interior of Crete, S. of Cnossus, retaining the name of Panon. (Ptol. iii. 17. § 10.)

PANNO'NIA (Mavyovía, Ptol. ii. 1. § 12 ; or Hasovia, Zosim. ii. 43), one of the most important provinces of the Roman empire, on the south and west of the Danube, which forms its boundary in the north and east; in the south it bordered on Illyricam and Moesia, while in the west it was separated from Noricum by Mount Cetius, and from Italy by the Julian Alps. The country extended along the Danube from Vindobona (Vienna) to Singidunum, and accordingly comprised the eastem portions of Austrich Carinthia, Carriola, the part of Hungary between the Danube and Save, Sluvonia, and portions of Croatia and Bosmia. After its subjugation by the Romans, it was divided into Pamnonia Superior ( $\dot{\eta} \alpha_{\nu} \omega$ Mayvovia) and Pannonia Inferior
 Arabona in the north to Servitium in the south, so that the part west of this line constituted Upper Pannonia, and that on the east Lower Pannonia. (1'tol. ii. 15. § 16.) In consequence of this division the whole country is sometimes called by the plural name Pannoniae (Mavvoviat, Ptol. ii. 16. § 1 ; Zosim. ii. 43; Plin. $x \times x$ vii. 11. s. 2). In the fourth century, the emperor Galerius separated the district of Lower Pannonia between the Raab, Danube, and Drate, and constituted it as a separate province onder the name of Valeria, in honour of his wife who bore the same name. (Aur. Vict. de Caes. 40 ; Amm. Marc. xvi. 10, Exviii. 3.) But as Lower Pamonia scemed by this measure to be too much reduced, Constantine the Great added to it a part of Upper Pannonia, viz., the districts about the Upper Drave and Save; and Upper Pannonia was henceforth called Pannonia Prima, and Lower Pannonia, Pannonia Secunda. (Amm. Marc. xv. 3, xvii. 12.) All these three provinces belonged to the diocese of Illyricum. It should be observed, however, that Pannonia Secunda is sometimes also called Interamuia, Suria, or Ripensis. (Sext. Ruf. Brev. 11 ; Notit. Imp.) The three provinces into which Pannonia was thus divided were governed by three different officens, a praeses residing at Sabaria, a consular residing at Sirmium, and a praefect who had his seat at Siscia. The part bordering upon Germany, which stoxd most in need of protection, had always the strongest garrisons, though all Pannonia in general was protected by numerous armies. which were gradually increased to seven legions. Besides these troups the fleet stationed at Vindobona was the strongest of the three Heets maintained on the Danube.

Dion Cassius (xlix. 36) mentions an unfortunate etymology of the name of Pannonia from "pannus," "at ray or piece of cloth," referring to a peculiar article of dress of the inhabitants, though he also states at the same time that the natives called themselves Pannonians, whence it follows that the name carl have nothing to do with the Latin pannus. As to the jdentity of the name with that of Paeonians we shall bave occasion to speak presently.

In its physical configuration, Pannonia forms a vast plain enclosed only in the west and south by mountains of any considerable beight, and traversed only by hills of a moderate size, which form the terminations of the Alpine chains in the
west and south, and are for this reason called by Tacitus (Hist. ii. 28) and Tibullus (iv. 1. 109) the Pannonian Alps. The separate parts of these ramifcations of the Alps are mentioned under the names of Mount Carvancas, Cetius, Albil Montrs, Claudius, and Alma or Alaus. The mountains on the western and southern frontiers contain the sources of some important rivers, such as the Dravus and Savus, which flow almost paraliel and empty themselves into the Danube. Only one northern tributary of the Dravus is mentioned, viz., the Murius; while the Savus receives from the south the Nauportus, Carcorus, Colapis, Oeneus, Urpanus, Valdasus, and Drinus. The only other important river in the north-west is the Arrabo. The northern part of Pannonia cantained a great lake called the Peiso or Pkiso (the Plattensee), besides which we may notice some smaller lakes, the Ulcari Lacus, between the Save and the Drave, near their mouth. The climate and fertility of Pannonia are described by the ancients in a manner which little corresponds with what is now known of those countries. It is said to have been a rough, cold, rugzed, and not very productive country (Strab. vii. p. 317 ; Dion Cass. xlix. 37 ; Herodian, i. 6), though later writers acknowledge the fertility of the plains. (Solin. 21 ; comp. with Vell. Pat. ii. 110.) Both statements, howerer, may be reconciled, if we recollect how much the emperors Probus and Galerius did to promote the productiveness of the country by routing out the large forests and rendering the districts occupied by them fit for agriculture. (Plin. iii. 28; Appian, Illyr. 22; Hygin. de Limit. Const. p. 206; Aurel. de Caes. 40.) As the forests in those times were probably much more extensive than at present, timber was one of the principal articles of export from Pannonia, and great quantities of it were imported into Italy. (Solin. 22.) Agriculture was not carried on to any great extent, and was for the most part confined to the rearing of barley and oats, from which the Pannonians brewed a kind of beer, called Sabaia (Dion Cass. xlix. 36; Ainm. Marc. xxvi. 8), and which formed the chief articles of food for the natives. Olives and vines do not appear, at least in early times, to have grown at all in Pannonia, until the emperor Probus introduced the cultivation of the vine in the neighbourhood of Sirmium. (Vopisc. Prob. 1, 18 ; Eutrop. ix. 17; Aurel. Vict. de Caes. 37.) Anaong the valuable productions of the vegetable kingdom, the fragrant saliunca is mentioned (Plin. xxi. 20), and among the animals dogs excellent for the chase are spoken of by Nemesianus (Cyneg. 126), the cattae by Martial (xiii. 69), and the charax or black-cock by Athenaeus (ix. p. 398). The rivers must have provided the inhabitants with abundance of fish. The ancients do not speak of any metals found in Pannonia, either because the mines were not worked, or because the metals impurted from Pannonia were vaguely said to come from Noricum, where mining was carried on to $\mathbf{a}$ great extent.

The inhabitants of Pamonia (Pannonii, Mavvoviot, ndyvoves, or Haioves) were a very numerous race, which, in the war against the Romans, could send 100,000 armed men into the field. (Appian, Illyr. 22.) Appian (l. c. 14) states that the Romans regarded them as belonging to Illyricum. Some have inferred from this that the great body of the people were Illyrians; and some tribes, such as the P'yrustae, Mazani, and Daesitiatae, are actually described by some as Illyrian and by others as Pan-
nonian tribes. The fact that most Greek writers called them Paeonians, and that Tacitus (Germ. 43) speaks of the Pannonian language as different from that of the German tribes, seems to favour the supposition that they were a branch of the Thracian Paeonians, who had gradually spread to the banks of the Danube and the confines of Italy. It must however be observed that Dion Cassius (xlix. 36), who knew the people well, denies that they were Paeonians. There can, however, be no doubt that Celtic tribes also existed in the country, and in the early part of the Roman empire Roman civilisation and the Latin language bad made considerable progress. They are described as a brave and warlike people, which, at the time when the Romans became acquainted with them, lived in a very low state of civilisation, and were notorious for cruelty and love of bloodshed (Dion Cass. l.c.; Appian, Illyr. 14; Strab. vii. p. 318 ; Stat. Silv. iii. 13), as well as for faithlessness and cunning (Tibull. iv. 1. 8). Bat since their subjugation by the Romans, the civilisation of the conquerors produced considerable changes (Vell. Pat. ii. 110); and eren the religion of the Pannonians (some of their gods, such as Latobius, Laburus, Chartus, are mentioned in inscriptions) gave way to that of the Romans, and Pannonian divinities were identified with Roman ones (Spart. Sever. 15 ; Lamprid. Alex. 7). The Romanisation of the country was promuted and completed by the establishment of colonies and garrisons, so that at the tine of the migration of nations, the country was completely Romanised.

The following are the principal tribes noticed by the ancients in Pannonia; some of them, it must be ohserved, are decidedly Celtic. In Upper Pannonia we meet with the Azali, Crtwi, Boil, Coletiani, Oserlates, Serretes, Serrapilli, Sandrizetes, Latobict, and Varciani, and perhaps also the Iapodes or Iapydes, the Colapiani and Scordisci, though some of these latter may have extended into Illyricum. In Lower Pannonia, we have the Arabisci, Herctiniatae, Andiantes, Insif, Breuci, Amantini (Amantes), and Cornucates. Besides these, Pliny (iii. 26) mentions the Arivates, Belgites, and Catari, of whom it is not known what districts they inhabited. Towns and villages existed in the country in great numbers even before its conquest by the Romans (Dion Cass. 1v. 29; Jornand. Get. 50) ; and Appian's statement (Illyr. 22), that the Pannonians lived only in villages and isolated farms, probably applies only to some remote and more rugged parts of the country. The most important towns were Vindobona, Carnuntcis, Scarbantia, Sabaria, Ahrabo, Paetovis, Siscla, Aemona, Naupobtus; and in Lower Pannonia, Bregetio, Aquincum, Mursia, Cibalae, Acimincum, Taurunum, and Sirmium.

The history of Pannonia previous to its conquest by the Romans, is little known. We learn from Justin (xxiv. 4, xxxii. 3, 12) that some Celtic tribes, probably remnants of the hosts of Brennus, settled in the country. Most of the tribes seem to have been governed by their own chiefs or kings. (Vell. Pat. ii. 114; Sext. Ruf. Brev. 7; Jornand. de Reg. Suc. 50.). The obscurity which hangs over its history begins to be somewhat removed in the time of the triumvirate at Rome, B.c. 35, when Octavianus, for no other purpose but that of giving his troops occupation and maintaining them at tho expense of others, attacked the Pamnonians, and by conguering the town of Siscia broke the strength of
the nation. (Dion Cass. xlix. 36; Appian, Illyr. 13, 22. foll.) His general Vibius afterwards completed the conquest of the country. But not many years after this, when a war between Maruboduus, king of the Marcomanni, and the Romans was on the point of breaking out, the Pannonians, together with the Dalmatians and other Illyrian trikes, rose in a great insurrection against their oppressors, and it was not till after a blondy war of several years' doration that Tiberius succeeded in reducing them, and changing the country into a Roman province, A.d.8. (Dion Cass. Iv. 24, 28, 29; Suet. Tib. 15, 20; Vell. Pat. ii. 110, foll.) Henceforth a considerable army was kept in Pannonia to secure the submission of the people. When the soldiers received the news of the death of Augustus, they broke out in open rebellion, but were reduced by Drasus. (Tac. Ann. i. 15, foll. 30; Dion Cass. lvii. 4.) During the first centory Pannonia formed only one province, under the administration of a lieutenant of the emperor. Respecting its division in the second century, we have already spoken. Until the time of the migration of nations, Pannonia remained a part of the Koman empire; many colonies and municipia were established in the country, and fortresses were built for its protection; military roads also were constructed, especially one along the Iannbe, and a second through the central part of the country from Vindobona to Sirmium. The Romans did indeed much to civilise the Pannonians, but they at the same time derived great benefits from them; the military valour of the natives was of great service to them, and formed always a considerable purtion of the Roman legions. About the middle of the fifth century Pannonia was lost to the Romans in consequence of the conquests made by the Huns, to whom the emperor Theodosius II. was obliged formally to cede Pannonia. (Prisc. Exc. de Leg. p. 37, ed. Paris.) On the dissolution of the empire of the Huns by the death of Attila, the country fell into the hands of the Ostrogoths (Jornand. Get. 50). from whom it passed, about A.D. 500 , into those of the Longobardi, who in their turn had to give it up to the Avari in A. D. 568.

The ancient authorities for the geography of Pannonia are Ptoleny (ii. 15 and 16), Pliny (ii. 28), Strabo (iv. p. 206, foll., v. p. 213, foll., vii. p. 313, foll.), Dion Cassius (xlix. 34-38, lv. 23, 24), Velleius Paterculus (ii. 110 , foll.), Tacitus (Ann. i. 16, foll.), Appian, Jornandes (ll. cc.). Ainong modern writers the following deserve to be consulted: Schönleben, Carniola antiqua et noca, and Annales Corniolae antiquee et novac, Labacus, 1681, fol.; Katanesich, Comment. in C. Plinii Secundi Iannoniam. Buda, 1829 ; Niebuhr, Lect. on Ancient Hist. vol. i. p. 164, foll.
[L.S.]
PANOPEUS or PHANOTEUS (חavoteús. Hum. Strab. Paus.; Пavónๆ, Hes. ap. Strab. ix. p. 424 ; Steph. B. s. v. ; Ov. Met. iii. 19 ; Stat. Theb. vii. 344; Пауотéal, Herod. viii. 34 ; Фavotєús, said by Strab., ix p. 423, to be its name in his time, but the form also occurs in Thuc. iv. 89 ; фаขbitia, Steph. B. s. v.; Phanotea, Liv. xxxii. 18 : N'th. Пavoreús, фavotcús), an ancient town of Phocis, near the frontier of Boeutia, and on the road from Daulis to Chateroncia. Pausanias says that Panopeus was 20 stadia from Chaeroneia, and 7 from Daulis (ix. 4. $\$ \$ 1,7$ ): but the latter number is obviously a mistake. The ruins at the village of Aio Vlasi (äyıos Bגárıs), which are clearly those of l'anopeus, are distant about 20 stadia from Kć.
peorna (Chseroneia), but as much as 27 stadia from Dhaclía (Daulis). Panopens was a very ancient town, originally inhabited by the Phlegyae. Schedius, the king of Panopeus, and his brother, were the leaders of the Phocians in the Trojan War. (Paus. x. 4. § 1.) Panopeus was also celebrated for the grave of Tityns, who was slain by Apollo at this place, becanse he attempted to offier violence to Leto on her way to Delphi. (Hom. Od. x. 576 : Paus. x. 4. § 5.) Panopeus was destroyed by Xerres (Herod. viii. 34), and asain by Philip at the close of the Sacred War. (Paus. x. 3. § 1.) It was taken by the Romans in B.c.198, on the first attack (Liv. xaxii. 18; Polyb. v. 96); and was destroyed for the third time in the campaign between Sulla and Archelaus, the general of Dithridates. (Plut. Sull. 16.) Pausanias says that the ancient city was 7 stadia in circuit; but in his time the place consisted of only a few huts, situated on the side of a torrent. There are still considerable remains of the ancient walls upon the rocky heights above Aio Vlasi. The masonry is of different periods, as one might have expected from the twotold destruction of the city. There are no longer any remains of the tomb of Tityas, which, according to Pausanias, was the third of a stadium in circumference, and stood on the side of the turrent. Pausanias also mentions on the side of the Sacred Way a building of unbaked bricks, containing a statue of Pentelic marble, which was supposed to be intended either for Asclepius or Prometheus. It was believed by some that Prometheus made the buman race oat of the sandy-coloured rocks in the neighboarhood, and that they still smelt like human flesh. (Dodwell, Classical Tour, vol. i. p. 207 ; Leake, Northern Greece, vol. ii. p. 109 ; Ulrichs, Krisen, fc. p. 151.)

PANO'POLIS (Пayonoגıs, Dindor. i. 18; Ptol. iv. 5. § 72; Паעйע $\pi \delta$ 入ıs, Strab. xvii. p. 813; Mavds жठגıs, Steph. B. s. v.; sometimes simply Harbs, Hierocl. p. 731; It. Antom. p. 166: Eth. Пауотолírns), the Greek equivalent of the Acgyptian appellative Chemmis or Chemmo (Herod. ii. 91, 145, seq.; Diodor. $L$ c.), was a very ancient city of the Thebaid, lat. $26^{\circ} 40^{\prime} \mathrm{N}$. [Chemmis.] Panopolis was dedicated to Chem or Pan, one of the first Octad of the Aegyptian divinities, or, according to a later theory, to the Panes and Satyri generally of Upper Aegypt. (Plut. Is. et Osir. c. 14.) Stephanus of Byzantium describes the Chem or Pan of this city as an Ithyphallic god, the same whose representation occurs so frequently among the sculptores of Thebes. His face was human, like that of Ammon; his head-dress, like that of Ammon, consisted of long straight feathers, and over the fingers of his right hand, which is lifted up, is suspended a scource; the body, like that of Ammon also, inclading the left arm, is swathed in bandages. An inscription on the Kosseir road is the ground for supposing that Chem and Pan were the same deity; and that Chemmis and Panopolis were respectively the Aegyptian and Greek names for the sume city is inferr-d from Diodorns (l. c.) Panopolis stood on the right bank of the Nile, and was the capital of the Nomos Panopolites. According to Strabo (l.c.) it wus inhabited principally by stonemasons and linen-weavers; and Agathias (iv. p. 133) says that it was the birthplace of the poet Nomnns A. D. 410. Although a principal site of Panic worship, Panopolis was celebrated for its temple of Perseus. From Herudutus (vi. 53) we know that the Dorian chieftains
deduced their origin from Pencus through Aegypt. It is difficult to say which of the native Aegyptian gods was represented by Perseus. From the root of the word- $\Pi \dot{\epsilon} \rho \theta \omega$, to burn-it is probable, howerer, that he is the same with the fire-god Hephaistos or Phtah. The Panopolite temple of Perseus was rectangular, and surrounded by a wall around which was a plantation of palm-trees. At the entrance of the enclosure were two lofty gateways of stone, and upon these were placed colosial statues in human form. Within the adytum was a statue of Persens, and there also was laid up his sandal, two cubits long. The priests of Panopolis asserted that Perseus occasionally visited his temple, and that his epiphanies were always the omens of an abundant harvest to Aegypt. The sandals of Perseus are described by Hesiod (Scut. Herc. 220), and their deposition in the shrine implied that, having left his abode for a season, he was traversing the land to bless it with expecial fertility. The modern name of Panopolis is Akhmim, an evident corruption of Chemmis. The ruins, in respect of its ancient splendour, are inconsiderable. It is probable, indeed, that Panopolis, like Abydos and other of the older cities of Upper Aegypt, declined in prosperity as Thebes rose to metropolitan importance. (Champollion, l' Egypte, vol. i. p. 267; Yococke, Travels, p. 115; Minutoli, p. 243.)

PANORMUS (Пdуориos: Eth. Паעориітŋs, Panornitanus: Palermo), one of the most important cities of Sicily, situated on the N. coast of the island, about 50 miles from its NW. extremity, on an extensive bay, which is now known as the Gulf of Pa lermo. The name is evidently Greek, and derived from the excellence of its port, or, more strictly speaking, of the anchornge in its spacious bay. (Diod. xxii. 10.) But Panormus was not a Greek colony; it was undoubtedly of Phoenician origin, and appears to have been one of the earliest settlements of that people in Sicily. Hence, when the increasing power of the Greek colonies in the island compelled the Phoenicians to concentrate themselves in its more westerly portion, Panormus, together with Motya and Solus, became one of the chief seats of their power. (Thuc. vi. 2.) We find no mention of the Phoenician name of Panormus, though it may fairly be presumed that this Greek appellation was not that used by the colonists themselves. It would be natural enough to suppose that the Greck name was only a translation of the Phoenician one; but the I'unic form of the name, which is found on coins, is read " Machanath," which signifies " a camp," like the Roman Castra, and has no reference to the port. (Gesenius, Monum. Phoen. p. 288; Mover's Phönizier, vol. iii. p. 335.)

We have no account of the early history of any of these Phoenician colonies in Sicily, or of the process by which they were detached from the dependence of the mother country and became dependencies of Carthage; though it is probable that the change took place when Phoenicia itself became subject to the Persian monarchy. But it is certain that Carthage already held this kind of supremacy over the Sicilian culonies when we first meet with the nan:e of Panonnus in history. This is not till b. c. 480, when the great Carthaginian armament under Ha milcar landed there and made it their head-quartens hefore advancing against Himera. (Diod. xi. 20.) From this time it bore an important part in the wars of the Carthaginians in Sicily, and seems to have gradually become the acknowledged capital of their

## Panormus.

dominion in the island. (Polyb. i. 38.) Thus, it is mentioned in the war of B. c. 406 as one of their principal naral stations (Diod. ziii. 88); and again in B.c. 397 it was one of the few cities which remained faithful to the Carthaginians at the time of the siege of Motya. (Id. xiv. 48.) In B. c. 383 it is again noticed as the head-quarters of the Carthsginians in the island (Id. xv. 17); and it is certain that it was never taken, either by Dionysius or by the still more powerful Agathocles. But in B. c. 276, Pyrrhus, after having subdued all the other cities in Sicily held by the Carthaginians, except Lilybaeum and Panormus, attacked and made himself master of the latter city also. (Id. xxii. 10. p. 493.) It, however, soon fell again into the hands of the Carthaginians, who held it at the outbreak of the First Punic War, b. c. 264. It was at this time the most important city of their dominions in the island, and generally made the head-quarters both of their armies and fleets; but was nevertheless taken with hut little difficulty by the Roman consuls Atilius Calatinus and Cn. Cornelias Scipio in b. c. 254. (Puiyb. i. 21, 24, 38; Zonar. viii. 14; Diod. xxiii. 18 p. 505.) After this it became one of the principal naval stations of the Romans throughout the remainder of the war, and for the same reason became s point of the atmost importance for their strategic operations. (Diod. xxiii. 19, 21, xxiv. 1; Polyb. i. $39,55,8 \mathrm{cc}$.) It was immediately under the walls of Panormus that the Carthaginians under Hasdrubal were defeated by L. Caecilius Metellus in в. c. 250 , in one of the most decisive battles of the whole war. (Polyb. i. 40; Zonar. viii. 14; Oros. iv. 9.) It was here also that the Romans had to maintain a longcontinued struggle with Hamilcar Barca, who had seized on the remarkable isolated mountain called Ercta, forming a kind of natural fortress only about a mile and a half from Panormus [Ercta], and succeeded in maintaining himself there for the space of three years, notwithstanding all the efforts of the Romans to dislodge him. They were in consequence compelled to maintain an intrenched camp in front of l'anormus, at a distance of only five studia from the foot of the mountain, throughout this protracted contest. (Polyb. i. 56, 57.)

After the Roman conquest of Sicily, Panormus becrme a manicipal town, but enjoyed a privileged condition, retaining its nominal freedom, and immanity from the ordinary burdens imposed on other towns of the province. (Cic. Verr. iii. 6.) It was in consequence a flourishing and populous town, and the place where the courts of law were held for the whole surrounding district. (Id. ib. ii. 26, v. 7.) Cicero notices it at this time as one of the principal maritime and cornmercial cities of the island. (Ib. v. 27.) In the settlement of the affairs of Sicily which seums to have followed the war with Sextus Pompeius, Panormus lost its liberty, but received a Roman colony (Strab. vi. p. 272), whence we find it benring in inscriptions the title of "Colonia Augusta Panormitanorum." It would seem from Dion Cassius that it received this colony in B. C. 20; and coins, as well as the testimony of Strabo, prove incontestably that it became a colony under Augustus. It is strange, therefore, that Pliny, who notices all the other colonies founded by that emperor in Sicily, has omitted all mention of Panormus as such, and ranks it merely as an ordinary manicipal town. (Plin. iii. 8. s. 14; Dion Cass. Jiv. 7; Eckhel, vol. i. p. 232 ; Orell. Inscr. 948, 3760.) It subsequently received an accession of military colonists
under Vespasian, and again under Hadrian. (Lish Colon. p. 211 ; Zumpt, de Colom. p. 410.) Numerous inscriptions prove that it continued to be a flourishing provincial town throughout the period of the Koman empire ; and its name is repeatedly mentioned in the Itineraries (Itin. Ant pp. 91, 97; Tab. Peut.; Castell. Inscr. Sicil. pp. 26, 27, \&c.); but it is certain that it did not attain in ancient times to the predominant position which it now enjoys. It fell into the hands of the Goths, together with the rest of Sicily, and was the last city of the island that was wrested from them by Belisarius in A. D. 535. (Procop. B. G. i. 5, 8.) After this it continued subject to the Byzantine empire till 835, when it was taken by the Saracens, who selected it as the capital of their dominions in the island. It retained this position under the Norman kings, and is still the capital of Sicily, and by far the most populous city in the island, containing above 160,000 inhabitants.
The situation of Palermo almost vies in beanty with that of Naples. Its beautiful bay affords an excellent roadstead, from whence it doubtless dorived its name; and the inner or proper harbour, though not large, is well sheltered and secure. The ancient city probably occupied the site immediately around the port, but there are no means of tracing its topography, as the ground is perfectly level, without any natural feutures, and all ancient remains have disappeared, or are covered by modern buildings. We learn that it consisted of an outer and inner city; the former, as might be supposed, being the more recent of the two, and thence called the New City ( $\boldsymbol{\eta}$ véa đódis). Each had its separate enclosure of walls, so that when the outer city was taken by the Romans, the inner was still able for some time to withstand their efforts. (Polyb. i. 38; Diod. xxiii. 18.) The only ancient remains now visible at Palermo are some slight vestiges of an amphitheatre near the Royal Palace; but numerous inscriptions, as well as fragments of sculpture and other objects of antiquity, have been discovered on the site, and are preserved in the museum at Pa lermo.

The coins of Panormus are numerous: the more ancient ones have Punic inscriptions, and belong to the period when the city was subject to the Carthaginiaus, but the beauty of their workmanship shows the unequivocal influence of Greek art. The later ones (struck after the Roman conquest, but while the city still enjoyed nominal freedom) have the legend in Greek letters חANOPMITAN. Still later are those of the Roman colony, with Latin legends. On these, as well as in inscriptions, the name is frequently written Panhormitanorum; and this orthography, which is found also in the best MSS. of Cicero, seems to have been the usual one in Roman times. (Eckhel, vol. i. p. 232; Zumpt, ad Cic. Verr. ii. 26.)
[E. H. B.]

COIN OF PANORMUS.

PANORMUS (Пdyoppos: Eth. Пavopuitทs). 1. A harbour of Achaia, $\mathbf{1 5}$ stadia E. of the promontory of Rhium. The bay is now called Telich from a tekieh or tomb of a Turkish saint, which formerly stood upon it. (Paus. vii. 22. § 10 ; Thuc. ii 86 ; Polyb. v. 102 ; Plin. iv. 5 ; Leake, Morea, vol. iii. p. 195.)
2. A harbour on the east coast of Attica. [Vol. I. p. 331, b.]
3. A harbour in the district Cbaonia in Epeirus, situated nearly midway between Oricum and Onchesmus. (Ptol. iii. 14. § 2.) Strabo describes it as a great harbour in the midst of the Ceraunian mountains (vii. p. 324.) It is now called Palérimo. It must be distinguished from Panormus, the harbour of Oricum (Strab. vii. p. 316), now Porto Raguséo. (Leake, Northern Greece, vol. i. pp. 3, 79.)
4. A harbour in the island of Cephallenia. [Cephalienia.]

PANORMUS (חávopuos). 1. The port of Ephesus formed by the mouth of the Caystrus, near which stood the celebrated temple of the Ephesian Artemis. (Strab. xiv. p. 639 ; comp. Liv. xxxvii. 10, foll., especially 14. 15; Eliuescs.)
2. A port on the north coast of the peninsula of Halicarnassus, 80 stadia to the north-east of Myndus. (Stadiasm. Mar. Mag. §§ 272, 273, 276, foll.) It is no doubt the same port which Thucydides (viii.

[L. S.]
PANORMUS, a harbour at the extremity of the Thracian Chersonesus, opposite to the promontory of Sigeum. (Plin. iv. 11. s. 18.) [T. H. D.]

PANTA'GIAS (Пavtaкias, Thuc.; Пáytaxos, Ptol.: Porcári), a small river on the E. coast of Sicily, flowing into the sea between Catania and Syracuse, a few miles to the N . of the promontory of Sta Croce. It is alluded to both by Virgil and Ovid, who agree in distinctly placing it to the N. of Megara, between that city and the mouth of the Symaethus; thus contirming the authority of Ptolemy, while Pliny inaccurately enumerates it after Megara, as if it lay between that city and Syracuse. Its name is noticed both by Silius Italicus and Claudian, but without any clue to its position; but the characteristic expression of Virgil," vivo ostia saxo Yantagiae," leaves no doubt that the stream meant is the one now called the Porcari, which flows through a deep ravine between calcareous rocks at its mouth, affording a small but secure harbour for small ressels. (Virg. Aen. iii. 689; Ovid, Fast. iv. 471; Sil. Ital. xiv. 231; Claudian, Rapt. Pros. ii. 58; Plin. iii. 8. s. 14; Ptol. iii. 4. § 9; Cluver. Sicil. p. 131.) It is but a small streain and easily fordable, as described by Silius Italicus, but when swollen by winter rains becomes a formidable torrent; whence Claudian calls it " saxa motantem:" but the story told by Servius and Vibius Sequester of its deriving its name from the noise caused by its tumultuous waters, is a mere grammatical fiction. (Serv. ad Aen. l. c.; Vib. Seq. p. 16.)

Thucydides tells us that the Megarian colonists in Sicily, previons to the foundation of the Hyblaean Megara, established themselves for a short time at a place called Trotilus, above the river Pantagias, or (as he writes it) Pantacias (Thuc. vi. 4). The name is otherwise wholly unknown, but the site now occupied by the village and castle of La Bruca, on a tongue of rock commanding the entrance of the harbour and river, is probably the locality meant. (Eingth's Sicily, p. 159.)
[E. H. B.]
PaNTALIA. [Pautalia.]
vol. 11.

PANTICAPAEUM.
PANTIIIALAEI (nave،alaîul, Herod. i. 125), one of the tribes of ancient Persis mentioned by Herodotus. Nothing is known of them beyond what he states, that they pursued husbandry as their occupation.
[V.]
PANTI SINUS (Паעтl кб才лтоs, Ptol vii. 4. § 7 ), a bay on the NE. side of the island of Ceylon. It is probably that which leads up to Trincomalee. The name in some editions is written Pasi. [V.]

PANTICAPAEUM (Паутıка́каıоу, Паขтıкаraîov, Scylax, Strab. et alii; Пavtıкалaía, Ptol. iii.
 B. 8. v. for the latter we should probably read Паутıкатаítทs, as Паутєкатаital occurs on coins, Eckhel, vol. ii. p. 3; also Пayтıкanev́s, as if from a form Паvтıка́л $\boldsymbol{\eta}$, Steph. B.; Panticapenses, Plin. vi. 7: Kertch), an important Greek city, situated in the Tauric Chersonesus on the western side of the Cimmerian Bosporus, and not far from the entrance to the Lacus Maeotis. (Strab. vii. p. 309; Appian, Mithr. 107.) Scylax says (p. 30, Huds.) that Panticapaeum was 30 stadia from the Mueotis, which is two short a distance; but Arrian (Periph. § 29, p. 20, Huds.) more correctly makes the distance 60 stadia from Panticapaeum to the mouth of the Tanais, the Mreotis being regarded by this writer as a continuation of the Tanais, and the Bosporus as the mouth of the latter. According to Steph. B. (s. v.) Panticapaeum derived its name from a river Panticapes; but this is a mistake of the learned Byzantine, who appears to have recollected the river of this name mentioned by Herodotus, and therefore connected it with the city Panticapaeum, which, however, dues not stand upon any river. Ammianus also erroneously places it on thie Hypanis (xxii. 8. § 26). Accordirg to a tradition preserved by Stephanus (s. v.) it was founded by a son of Aec̈tes, who received the district as a present from the Scythian king Agaetes; but we know from history that it was a Milesian colon.y, and apparently one of the earliest on this coast. (Strab. vii. p. 309 ; Plin. iv. 12. s. 26.) Ammianus (l. c.) calls it the mother of all the Dilesian towns on the Bosporas; but the date of its foundation cannot be determined. Bückh (Inscr. vol. ii. p. 91) places it about Ol. 59. 4 (B. c. 541), and it must certainly have been earlier than Ol. 75.1 (в. c. 480), which is the date assigned to it by Niebuhr. (Kleine Schrift. vol. i. p. 373.) The Greeks connected the name Panticapaeum with the god Pan, whose figure, or that of a Satyr, frequently appears on the cuins of the city; but this naine, as well as that of the river Panticapes, probably belonged to the Scythian language, and was, as in similar cases, adopted by the Greeks with an Hellenic termination.

Panticapaeum was the capital of the kings of Bosporus (Strab. xi. p. 495; Diod. xx. 24), of whom a brief account is given elsewhere. [Vol. I. p. 42.2.] Accordingly Panticapaeum was frequently called Busporus, though the latter name was also given to the whole kingdom. Hence, when Demosthenes says that Theudosia was reckoned by many as good a harbour as Basporus, he evidently means by the latter the capital and not the kingdom (in Lept. p. 467); and accordingly Pliny expressly says (iv. 12. 8. 24) that Panticapaeum was called Boiporus by some. Futropius (vii. 9) erroncously makes Panticapaeum and Bosporus two different cities. Under the Byzantines Bosporus became the ordinary name of the city (Procop. de Aedif. iii. 7, B. Pers. i. 12. B. Goth. iv. 5); and among the inhabitants of :he

Crimea Kertch is still called Buspor. The old name, however, continued in use for a long time: for in the Italian charts of the middle ages we find the town called Pandico or Ponlico, as well as Bospro or Vospro.

The walls of the city were repaired by Justinian. (Procop. de Aedif. iii. 7.)

The site of Panticapaeum is well described by Strabo. "Panticapaeum," he says, " is a hill, 20 stadia in circumference, covered with buikdings on every side : towards the east it has a harbour and docks for 30 ships ; it has also a citadel" (vii. p. 390). The hill is now called the Arm-chair of Mithrilates. The modern town of Kertch stands at the foot of the hill, a great part of it upon alluvial soil, the site of which was probably covered by the sea in ancient times Hence the bay on the northern side of the city appears to have advanced originally much further into the land; and there was probably at one time a second port on the southern side, of which there now remains only a small lake, separated from the sea by a bar of sand. Foundations of ancient buildings and heaps of brick and pottery are still scattered over the hill of Mithridates; but the most remarkable ancient remains are the numerous tumuli round Kertch, in which many valuable works of art have been discovered, and of which a full account is given in the works mentioned below. The most extraordinary of these tumuli are those of the kings situated at the mountain called Alton-Obo, or the golden mountain, by the Tartars. One of the tumuli is in the form of a cone, 100 feet high and 4.50 feet in diameter, and cased on its exterior with large blocks of stone, cubes of 3 or 4 feet, placed without cement or mortar. This remarkable monument has been at all times the subject of mysterious legends, but the entrance to it was not discovered till 1832. This entrance led to a gallery, constructed of layers of worked stone without cement, 60 feet long and 10 feet high, at the end of which was a vaulted chamber, 35 feet high and 20 feet in diameter, the floor of which was 10 feet below the flow of the entrance. This chamber, however, was einpty, though on the ground was a large square stone, on which a sarcophagus might have rested. This tumulus stands at a spot where two branches of a long rampart meet, which extends N. to the Sea of Azof, and SE. to the Bosporus just above Nymphaum. It was probably the ancient boundary of the territory of Panticapaeum and of the kingdom of the Bosporus, before the conquest of Nymphaeum and Theudosia. Within the ranpart, 150 paces to the $E$., there is another monument of the same kind, but unfinished. It consists of a circular esplanade, 500 paces round and 166 in diameter, with an exterior covering of Cyclopean masonry, built of worked stones, 3 feet long and high, of which there are only five layers. But the greatest discovery has been at the hill, called by the Tartars Kul-Obo, or the hill of cinders, which is situated ontside of the ancient rampart, and 4 miles from Kertch. Here is a tumulns 165 feet in diameter; and as some soldiers were carrying away from it in 1830 the stones with which it was covered, they accidentally opened a passage into the interior. A vestibule, 6 fret square, led into a tomb 15 feet long and 14 brosed, which contained bunes of a king and queen, golden and silver rases, and other ornaments. Below this tomb was another, still richer; and from the two no less than 120 pounds' weight of gold ornaments are said to have been extracted. lirom the
forms of the letters found here, as well as from other circumstances, it is supposed that the tomb was erected not later than the fourth centary s. c. (Dubois, Voyage autour du Caucase, vol. v. p. 113, seq. : Seymour, Russia on the Black Sea, ic. p. 255, seq.; Neumann, Die Hellenen in Skyther. lande, vol. i. p. 478, seq.)

## COLN OF PANTICAPAEUM.

PANTICAPES (Паитıкámns), a river of European Sarmatia, between the Burysthenes and the Tanais, rises in a lake, according to Herodotus, in the N., separates the agricultural and nomad Scythians, flows through the district Hylaea, and falls into the Borysthenes. (Herod. iv. 18, 19, 47, 54; comp. Plin. iv. 12. s. 26; Mela, ii. 1. § 5.) Dionysius Per. (314) snys that it rises in the Rhipaean mountains. Many suppose it to be the Samara; but it cannot be identified with certainty with any modern river. For the various opinions held on the subject, see Bähr, ad Herod. iv. 54 ; L'kert, vol. iii. pt. ii. p. 191. Stephanus B. étoneously states that the town of Panticapaeum stood upon a river Panticapes. [Panticapaeum.]

PANTI'CHIUM (Havtixiov), a small coast-town of Bithynia, to the south-east of Chalcedon, on the coast of the Propontis. (It. Ant. p. 140; Hierocl. p. 571; Tab. Peut.) The place still bears the name of Pandik or Pandikhi.
[L. S.]
PANTOMATRIUM ( Пavtoudrpiov: Eth. Mavтоцátpios; Steph. B. s. v.), a town on the N. coast of Crete, placed by Ptolemy (iii. 17. § 7) between Rhithymna and the promontory of Dium, but by Pliny (iv. 20. s. 20) more to the W., between Apterum and Amphimalla: probably on the modern C. Ketino. (Hïck, Creta, i. pp. 18, 394.) [T.H.D.]

PANYASUS. [Palamives.]
PANYSUS ( $\operatorname{mavo\sigma }(\sigma) d s$, Ptol. iii. 10. §8; Plin. iv. 11. s. 18), a river of Moesia Inferior, flowing into the Enxine at Odessus (Varra). [T. H. D.]

PAPHLAGO'NIA (Пафлаүovia: Eth. Пафла$\left.\gamma^{\prime} \omega^{\nu}\right)$, a country in the north of Asia Minor, bordering in the west on Bithynia, in the east on Pontus, and in the south on Gialatia, while the north is washed by the Euxine. The river Parthenius in the west divided it from Bithynia, the Hallys in the east from Pontus, and Mount Olgassys in the south from Galatia. (Herat. Fraym. 140; Srylax, p. 34 ; Strah. xii. pp. 544, 563; Agathem. ii. 6.). But in the case of this, as of other countries of Asia Minor, the boundaries are somewhat fluctuating. Strals, for example, when saying that Paphlagonia :aloo bordered on Phrygia in the south, was mosit probahly thinking of those earlier times when the Galatians had not yet established themselves in Plirygia. Pliny (vi. 2) again includes Amisus beyond the Halys in Paphlagonia, while Mela (i. 19) regards Sinope, on the west of the Halys, as a city of Pontus. It is probable, however, that in early times the Paphlagonians occupied, besides Paphlagonia pmper, a considerable tract of country on the east of the Halys, perhaps as far as Themiscyra or even Cape Iasonium (Xeuoph. Anab. v. 6. § 1 ; Strab. xii.

PAPHLAGONIA.
PAPHUS.
p. 548), and that the Halys did not become the pramanent boundary until the consolidation of the kingdom of Pontus. The whole length of the country from west to east amounted to about 40 geographical miles, and its extent from north to south about 20. l'aphlagonia was on the whole a somewhat rough and mountainous country, Mount Olgassys sending firth its ramifications to the north, sometimes even as far as the coast of the Euxine; but the northern part nevertheless contains extensive and fertile plains. (Xenoph. Anab. v. 6. § 6, foll.; comp. Strab. xii. p. 543 ; Pococke, Travels, iii. p. 138.) The Olgassys is the chiet mountain of Paphlagonia. Its numerous branches are not distinguished by any special names, except the Scorobas and Cytorus. Its most remarkable promontories are Carambis and Syinas; its rivers, with the exception of the Halys, are but small and have short courses, as the Shsisics, Ochosbanfa, Evarches, Zalecus, and Amsias. The fertility was not the same in all parts of the country, for the northern plains were not inferior in this respect to other parts of Asia Minor, and were even rich in olive plantations (Strab. xii. p.546), but the southern, or more mountainous parts, were rough and unproductive, though distinguished fur their large forests. Paphlagonian hores were celebrated in the earliest times (Hom. Il. ii. 281, foll.); the mules and antelopes ( $\delta o \rho \kappa a ́ \delta s$ s) were likewise highly prized. In some parts sheepbreeding was carried on to a considerable extent, while the chase was one of the favourite pursuits of all the Paphlagonians. (Strab. xii. p. 547; Liv. xxxviii. 18.) Stories are related by the ancients according to which fish were dug out of the earth in Paphlagonia. (Strab. xii. p. 562 ; Athen. viii. p. 3:31.) The forests in the south furnished abundance of timber, and the boxus of Mount Cotyrus was celebrated. (Theophr. H. P. iii. 15; Plin. xvi. 16; Catull iv. 13; Val. Flacc. v. 16.) Of mineral products we hear little except that a kind of red chalk was found in abundance.

The name Paphlagonia is derived in the legends from Paphlagon, a son of Phineus. (Eustath. ad Hom. Il. ii. 851 , ad Lion. Per. 787 ; Steph. B. s. च.; Const. Porph. de Them. i. 7.) Some modern antiquaries have had recourse to the Semitic languages to find the etymology and meaning of the name; but no certain results can be obtained. An ancient name of the country is said to have been Pylsemenia (Plin. vi. 2 ; Justin, xxxvii. 4), because the Paphlagonian princes pretended to be descendants of Pylaemenes, the leader of the Paphlagonian Heneti (Hom. 1l. xi. 851) in the Trojan War, after whom they also called themselves Pylaemenes.

The Paphlagonians, who are spoken of even in the Homeric prems (Il. ii. 851, v. 577, xiii. 656, 661), appear, like the Leucosyri on that coast, to have been of Syrian origin, and therefore to have belonged to the same stock as the Cappadocians. (Herod. i. 72, ii. 104 ; Plut. Lucull. 23 ; Eustath. ad Itionys. Per. 72.) They widely differed in their language and manners from their Thracian and Celtic neighbours. Their language, of which Strabo (xii. p. 552) enumerates some proper names, had to some extent been adopted by the inhabitants of the eastern bank of the Halys. Their armour consisted of a peculiar kind of helmets made of wickerwork, small shields, long spears, javelins, and daggers. (Herod. vii. 72 ; Xen"ph. A nab. v. 2. § 28, 4. § 13.) Their cavalry was very celebrated on account of their excellent horses. (Xenoph. Anab. v. 6. §8.)

The Paphlagonians are described by the ancients as a superstitious, silly, and coarse people, though this seems to apply to the inhabitants of the interior more than to those of the coast. (Xenoph. Anab. v. 9. § 6 ; Aristoph. Eq. 2, 65, 102, 110; Lucian, Alex. 9. foll.) Besides the Paphlagonians proper and the Greek colonists on the coast, we hear of the Heneti and Macrones, concerning whose nationality nothing is known : they may accordingly have been subdivisions of the Paphlagonians themselves, or they may have been foreign immigrants.

Until the time of Croesus, the country was governed by native independent princes, but that king made Paphlagonia a part of his empire. (Herod. i. 28.) On the conquest of Lydia by Cyrus, the Paphlagonians were incorporated with the Persian empire, in which they formed a part of the third satrapy. (Herod. iii. 90.) But at that great distance from the seat of the government, the satraps found it easy to assert their independence; and independent Paphlagonian kings are accordingly mentioned as early as the time of Xenophon (Anab. v. 6. § 3, 9. § 2). In the time of Alexander the Great, whose expedition did not touch those northern parts, kings of Cappadocia and Paphlagonia are still mentioned. (Arrian, Anab. ii. 4. § 1 ; iii. 8. § 5 ; Diod. Sic. xviii. 16.) But this independence, though it may have been merely nominal, ceased soon after, and Paphlagonia and Cappadocia fell to the share of Eumenes. (Diod. Sic. xviii. 3 ; Justin, xiii. 4, 16.) After Eumenes' death, it was again governed by native princes, until in the end it was incorporated with the kingdom of Pontus by Mithridates. (Arrian, ap. Phot. p. 72, ed. Bekker ; Diod. Eclog. xxxi. 3 : Justin, xxxvii. 1; Strab. xii. p. 540 ; Appian, Mithrid. 11, 12.) Mithridates, however, soon afterwards divided Paphlagonia with his neighbour Nicumedes, who made his son, under the name of Palaemenes, king of Paphlagonia. (Justin, xxxvii. 3, 4.) After the conquest of Mithridates, the Romans united the coast districts of Paphlagonia with Bithynia, but the interior was again governed by native princes (Strab. l.c. ; Appian, B. C. ii. 71 ; Plut. Pomp. 73) ; and when their race became extinct, the homans incorporated the whole with their empire, and thenceforth Paphlagonia formed a part of the province of Galatia. (Strab. vi. p. 288, xii. pp. 541, 562.) In the new division of the empire in the fourth century, Paphlagonia became a separate province, only the easternmost part being cut off and added to Pontus. (Hierocl. pp. 695, 701.) The principal coast towns were Amastime, Erythini, Cromna, Crtorus, Aegialcs, Abonitichos, Cimolis, Stephane, Potami, Armene, Sinope, and Carusa. The whole of the interior of the country was divided, according to Strabo, into nine districts, viz. Blaene, Domanetis, Pimolisene, Cimiatene, Timonitis, Gezatorigus, Marmolitis, Sanisene, and Potainia. The interior contained only few towns, such as Pompeiopolis, Gangra, and some mountain fortresses.
[L.S.]
PAPHUS (Ptol. viii. 20. § 3, \&c.: Eth. and Adj. חáфıos, Paphins, and Paphiacus), the name of two towns seated on the SW. extremity of the coast of Cyprus, viz., Old Paphos (Máqos ma入aıá, l'tol. จ. 14. § 1; or, in one word, Палаíлафоs, Strab. xiv. p. 683 ; Palaepaphos, Plin. v. 31. s. 35) and New Paphos (חápos Néa, Ptol. l. c.; Nea I'aphos, Plin. l.c.). The name of Paphos, without any adjunct, is used by jwets and by writers of pruse to

PAPHUS.
denote both Old and New Paphos, but with this distinction, that in prose writers it commonly means New Paphos, whilst in the puets, on the contrary, for whom the name of Palarpaphos would have been unwieldy,-it generally signifies Old Paphos, the more pecaliar seat of the worship of Aphrodite. In inscriptions, also, both towns are called Md́os. This indiscriminate use is sometimes productive of ambiguity, especially in the Latin prose authors.

Old Paphos, now Kubla or Konuklia (Engel, Kypros, vol. i. p. 125), was said to have been founded by Cinyras, the father of Adonis (Apollod. iii. 14); though according to another legend preserved by Strabo (xi. p. 505),-whose text, however, varies, - it was founded by the Amazons. It was seated on an eminence ("celsa l'aphos," Virg. Aen. x. 51 ), at the distance of about 10 stadia, or $1 \frac{4}{}$ mile, from the sea, on which, however, it had a roadstead. it was not far distant from the promontory of Zephyrium (Strab. xiv. p. 683) and the mouth of the little river Bocarus. (Hesych. s. v. Bẃкароs.) The fable ran that Venus had landed there when she rose from out the sea. (Tac. Hist. ii. 3; Mela, ii. 7; Lucan, viii. 456.) According to Pausanias (i. 14), her worship was introduced at Paphos from Assyria; but it is much more probable that it was of Phoenician origin. [Phoenicla.] It had been very ancieutly established, and before the time of Homer, as the grove and altar of Aphrodite at Paphos are mentioned in the Odyssey (viii. 362). Here the worship of the goddess centred. not for Cyprus alone, but for the whole earth. The Cinyradae, or descendants of Cinyras,-Greek by name, but of Phoenician origin,-were the chief priests. Their power and authority were very great ; but it may be inferred from certain inscriptions that they were controiled by a senate and an assembly of the people. There was also an oracle here. (Engel, i. p. 483.) Few cities have ever been so much sung and glorified by the poets. (Cf. Aesch. Suppl. 525; Virg. Aen. i. 415 ; Hor. Od. i. 19, 30, iii. 26; Stat. Silv. i. 2. 101; Aristoph. Lysis. 833, \&c. \&c.) The remains of the vast temple of Aphrodite are still discernible, its circumference being marked by huge foundation walls. After its overthrow by an earthquake, it was rebuilt by Vespasian, on whose coins it is represented, as well as on earlier and later ones, and especially in the most perfect style on those of Septimius Severus. (Engel, vol. i. p. 130.) From these representations, and from the existing remains, Hetsch, an architect of Copenhagen, has attempted to restore the building. (Müller's Archäol. § 239, p. 261; Eckhel, vol. iii. p. 86.)

New Paphos, now Baffa, was seated on the sea, near the western extremity of the island, and possessed a gond harbour. It lay about 60 stadia, or between 7 and 8 miles NW. of the ancient city. (Strab. xiv. p. 683.) It was said to have been founded by Agapenor, chief of the Arcadians at the siege of Troy (Hum. IL. ii. 609), who, after the the capture of that town, was driven by the storm, which separated the Grecian fleet, on the coast of Cyprus. (Paus. viii. 5. § 3.) We find Agapenor mentioned as king of the Paphians in a Greek distich preservel in the Analecta (i. p. 181, Brunk); and Herodotus (vij. 9io) alludes to an Arcadian colony in Cyprus. Like its ancient namesake, Nea Paphos was also distinguished for the worslip of Venus, and contained several magnificent temples dedicated to that goddess. Yet in this respect the old city seems to have always retuined the pre-

## PAPREMIS.

eminence; and Strabo tells us, in the passage before cited, that the road leading to it from Nea Paphos was annuaily crowded with male and female votaries resorting to the more ancient shrine, and coming not only from the latter place itself, bat also from the other towns of Cyprus. When Senecs says ( $N . Q$ vi. 26, Ep. 91) that Paphos was nearly destroyed by an earthquake, it is difficult to say to which of the towns he refers. Dion Cassius (liv. 23) relates that it was restored by Aurustus, and called Augusta in his honour; but though this naine has been preserved in inscriptions, it never supplanted the ancient one in popular use. Paphos is mentioned in the Acts of the Apostles (xiii. 6) as having been visited by St. Paul, when it appears to have been the residence of the Roman governor. Tacitus (Hist. ii. 2, 3) reconds a visit of the youthful Titus to Paphos before he acceded to the empire, who inquired with much curionity ints its history and antiquities. (Cf. Suet. Tit. c. 5.) Under this name the historian doubtless included the ancient as well as the more modern city: and among other traits of the worship of the temple he records, with something like surprise, that the ondy image of the goddess was a pyramidal stone,-a relic, doubtless of Phoenician origin. There are still considerable ruins of New Paphos a mile or two from the sea; umong which are particularly remarkable the remains of three temples which had been erected on artificial eminences. (Engel, Kypros, 2 vols. Berlin, 1841.)
[T. H. D.]
PAPIRA or PAPYRA, a town in the west of Galatia, on the road between Ancyra and Pessinus. (It. Ant. p. 201.)
[L. S.]
PAPLISCA, a town of the Liburni (Geog. Rar. iv. 16), which has been identified with Jablanatz on the mainland facing the $S$. of the island of Arbe. (Neigebaur, Die Sul-Slaven, p. 225.) [E. B. J.]

PAPPA (IId $\pi \alpha$ ), a town in the northern pert of Pisidia (Ptol. v. 4. § 12; Hierocl. p. 672; Concil. Nic. pp. 358, 575.$)$

PAPPUA MONS (Пañov́a, Procop. B. V. ii. 4,7), the inaccessible mountain country in the interior of Numidia, where the conquest of Africa was completed by Belisarius, in the spring of A. D. 534, and where Gelimer, the last of the Vandal kings, was taken. (Le Beau, Bas Empire, vol. viii. p. 248; Gibbon, c. xii.)
[E. B. J.]
PAPRE'MIS (חd́rpquis, Herod. ii. 59, 71), is mentioned by Herodutus alone, and appears to have been seated in the western parts of Lower Aegypt. Mannert (x. pt. i. pp. 517-519), without very good grounds for his supposition, believes it to have been another name for Xois. (Comp. Champoll. 5 Eigypte, vol. ii. p. 2i3.) Paprenis was the capital of a nome called Papremites (Herod. ib. 165), one of the districts assigned to the Hermotybian division of the Aegyptian army. A deity corresponding in his attributes to the Greek Ares was worshipped in this nome; and the river-horse wrss sacred to him. His festivals were of a sanguinary character, in which opposite parties of priests contended with staves, and intlicted on one another sometimes death, and usually serious wounds. Now the river-horse was among the emblems of Typhon, the destroying principle: and the festivals of the Papremite deity savuured of violence and destruction. He inay accordingly have been one of the forms of Typhon, whose worship was widely spread over the Delta, There is indeed an Aemyptian god named Ranpo (Wilkiuson, 1H. $G C$. pl. 69, 70), whose attributes auswer to thuse of

PARACANDA.

Ares, and who may, accordingly, have been the object of Papremite worship. In the Papremite nome a battle was fought between the Persians and Aegyptians, in which the satrap Achaemenes was defeated by Inarus, king of Lower Aegypt, в. c. 460. (Herod. iii. 12, comp. vii. 7: Ctesias, Excerpt. Persic. c. 32; Thuc. i. 104, 109.) It is useless to speculate which of the rarious mounds of ruins in the Deita cover the site of a town whose exact situation cannot be discovered.
paracanda. [Maracanda.]
Paracheloi'tis. [Aetolia, p. 63, a.]
PARACHOATRAS ( $\delta$ Пapaұod $\theta p a s$, Ptol. vi. 2. $\S 3,4 . \S 1$ ), the great south-eastern chain of the Taurus, which under various names extended from the Caspian Sea to the province of Persis The portion so called appears to have been the central part between the mountains of Media Atropatene on the N. and those of Persis on the S. Of this portion M. Orontes (now Elicend) was the most considerable. Ancient geographers are not clear as to the extent to which the local names prevailed. Thus Strabo evidently places the Parachoathras far to the N., and seems to have considered it a prolongation of the Anti-Tauras in the direction of N. Media and Hyrcania (xi. pp. 511, 514, 522). Ptolemy seems to have considered it a coutinuation towards the S . of the portion of the Anti-Taurus which was called M. Jasonius.
[V.]
Parada, a town in Africa Propria, on the road from Thapsus to Utica. (Hirt. B. Afr. 87.) It may perhaps be identical with the town of \$apd, mentioned by Strabo (xvii. p. 831). Mannert (x. 2. p. 374) places it on Mount Zowan. [T. H. D.]

ParaEbA'SiUM. [Megalopolis, p. 310, b.]
PARAEPAPHI'TIS (Параıлафiтıs), a district of ancient Carmania Deserta (now Kirmán) mentioned by Ptolemy (vi. 8. § 12).

PARAETACE'NE (ПараıтакПน力), a district of ancient Persis which extended along the whole of its N. frontier in the direction of Media Magna, to which, indeed, it in part belonged. The name is first mentioned by Herodotus, who calls one of the tribes of the Medians Paractaceni (i. 101). The same district comprehended what are now called the Bakhtyari mountains and tribes. The whole country was ruzged and mountainous (Strab. ii. p. 80, xi. p. 522, xv. p. 723; Plin. vi. 27. s. 31), and appears to have been inhabited, like the adjacent province of Cossaca, by wild and robber tribes (xvi. p. 744). The inhabitants were called Paraetaceni (Herod. l. c.; Strab. l. c. xv. p. 732) or Paraetacae (Strab. xv. p. 736 ; Arrian, iii. 19). There has been considerable discussion with regard to the origin of this name. The best determination seems to be that it is derived from a Persian word, Paruta, signifying mountain; and this again from the Sanscrit Purrata. It will be observed that while Herodotus gives the Paraetaceni a Median origin (l. c.), and Stephanus B. calls Paraetaca a Median town, Strabo gives one portion of the district so named to the Assyrian province of Apolloniatis or Sittacene (xvi. p. 736). There were, however, other places of the same name at considerable distances from the Median or Persian province. Thus, one is mentioned between Bactriana and Sogdiana, between the Oxus aud Jasartes (Arrian, iv. 21; Curt. viii. 14. 17), and another between Drangiana and Arachosia. (Isid. Char. p. 8.) In India, too, we find the Paryeti Montes, one of the outlying spurs of the still greater chain of the Paropanisus (or Hinuli Kisk). (Las-
sen, in Ersch and Grüber, Encycl. s. v. Paraetacenc.)
[V.]
PARAETO'NIUM (Hapaitoviov, Scyl. p. 44 ; Strab. xvii. p. 799 ; Pomp. Mela. i. 8. § 2; Plin. v 5; Ptol. iv. 5. § 4; Steph. B.; Itin. Anton.: Hierocles), a town of Marmarica, which was also called Ammonia. ('A $\mu \mu \omega$ via, Strab l. c.) Its celebrity was owing to its spacious harbuur, extending to 40 stadia (Strab. l. c.; comp. Dich. i. 31 ), but which appears to have been difficult to make. (Lucian, Quomodo historia sit conscribenda, 62.) Paraetonium was 1300 stadia (Strab. l.c.; 1550 stadia, Stadiasm. § 19) from Alexandreia. From this point Alexander, B. C. 332, set out to visit the oracle of Ammon. (Arrian, Anab. iv. 3. § 3.) When the "world's debate" was decided at Actium, Antonius stopped at Paraetonium, where some Roman troops were stationed under Pinarius fir the defence of Aegypt. (Plat. Anton 70; Flor. iv. 11.) The name occurs in Latin poetry. (Ovid, Met. ix. 772, Amores, ii. 13. 7; Lucan. iii. 295.) Justinian fortified it as a frontier fortress to protect Aegypt from attacks on the W. (Procop.de Aed. vi. 2.) An imperial coin of the elder Faustina has been assigned to this place, but on insufficient grounds. (Eckhel, vol. iv. p. 116.) When the Aoulad Aly were sovereigns over this district, the site, where there were ancient remains, retained the name of Baretoun; but after their expulsion by the pasha of Aegypt, it was called Berek Marsah. (Pacho, Voyage dans la Marmarique, p. 28.)
[E.B. J.]
PARAGON SINUS (חapdroov кठ入лоз, Ptol. vi. 8. § 7; Marcian, c. 28. ed. Mïller), a gulf on the shore of Gedrosia, a little way beyond the Pron. Carpella (now Cape Bombareek), according to Ptolemy. Marcian states that it was of considerable size, and extended as far as the promontory called Alambater (now Ras Guadel) and the island of Liba or Ziba. It appears to have been in that part of Gedrosia which was inhabited by the Ichthyophagi: it is not, however, noticed in Nearchus's voyage. [V.]

PARALA'IS (Mapalais), a town of Lycaonia, and, as its name seems to indicate, situated near a lake. (Ptol. v. 6. § 16.) There are coins bearing the inscription "Jul. Aug. Col. Parlais" (Eckhel, vol. iii. p. 33. foll.), from which it appears that the place was made a Roman colony. But as the town and its elevation to the rank of a colony is not mentioned elsewhere, it has been supposed that the coins are either forged or hare been incorrectly read, [L.S.]

PARA'LIA, or PA'RALUS. [ATtica, p. 322.]
PARA'LIA, PARA'XIA [Chalcidice, Vol. I. p. 598, a.]

PARAMBOLE (Paramvole, Itin. Hieros. p. 568 ; Parembole, Acta S. Alex. Wessel. p. 568), a town of Thrace, on the river Hebrus, still called Parembolis, according to Palma.
[T. H. D.]
PARAPIO'TAE (Пapantढิтat), an Indian tribe mentioned by Ptolemy (vii. 1. §65), and placed by him on the slopes of the Vindius M. (Vindhya Ms.) along the banks of the Namadus (Nerbudda), Lassen, in his Map of Ancient India, places them along the upper sources of the same river. [V.]

PARAPOTA'MII (Паратотá $\mu t i$, Strab. Paus.;
 a town of Pbocis on the left bank of the Cephissus (whence its name), and near the frontier of Bueotia. Its position is described in a passage of Theopompus, preserved by Strabo, who says that it stood at a distance of 40 stadia from Chaeroneia, in the entrance from Boeutia into Phucis, on a height of
inxderate elevation, situated between Parmassus and Mount Hedylium; he adds that these two mountains were separated from each other by an interval of 5 stadia, through which the Cephissus flowed. (Strab. ix. p. 424.) Parapotamii was destroyed by Xerses (Herod. viii. 33), and again a second time by Philip at the conclusion of the Sacred War. (Paus. x. 3. § 1.) It was never rebuilt. Platarch in his life of Sulla (c. 16) speaks of the acropolis of the deserted city, which he describes as a stony height surrounded with a precipice and separated from Mt. Hedylium only by the river Assus. (Leake, Northern Greece, vol. ii. pp. 97, 195.)

PARASO'PIAS (Пapajwtias), a town of Thessaly in the district Oetaea (Strab. ix. p. 434.)

PARAVAEI (Mapaúalol, Thnc. ii. 80; Rhianus, ap. Steph. B. s. v.), an Epirot tribe, whose territories, conterminous with those of the Orestae, were situated on the banks of the Aons (Viósa), from which they took their name. In the third year of the Peloponnesian War, a body of them, under their chief Orvedus, joined Cnemus (Thuc. l.c.), the Lacedaemonian commander. Arrian (Anab.i. 7), describing the route of Alexander from Elimiotis (Grevená and Tjersembá) to Pelinnaeum in Thessaly, which stond a little to the E. of Trikkala, remarks that Alexander passed by the highlands of Paravaea, - Lizari and Smólika, with the adjacent mountains.

The seat of this tribe must be confined to the valleys of the main or E. branch of the Aous, and the mountains in which that river originates, extending from the Aoi Stena or Klisira, as far S. as the borders of Tymphaea and the Molossi, and including the central and fertile district of Kónitza, with the N. part of Zagori. (Leake, Northern Greece, vol. iv. pp. 115-120, 195.) [E. B. J.]

PARE'MBOLE (Пap $\mu 6 \delta \lambda \eta$, Melet. Brev. p. 188; Parambole, It. Ant. p. 161 ; It. Hieros. p. 568) was a port or castle (Castra, Plin. v. 9. s. 10) on the borders of Aegypt and Aethiopia, and alternately attached to either kingdom. Parenbole was situated between Syene and Taphis, on the left bank of the Nile, lat. $23^{\circ} 40^{\prime} \mathrm{N}$. In Roman times it was one of the principal fortresses of the southern extremity of the empire, and was usually occupied by a legion. On the recession of the Roman boundary in Diocletian's reign, Parembole was handed over to the Nubae, and was frequently assailed by the Blemmyes from the opposite bank of the river. (Irocop. B. Pers. i. 19.) The ruins of its temples may still be seen at the village of Debot or Debou. From the square enclosure of brick found there it would seem to have been a penal settlement for criminals as well as a regular station for soldiers. (Bosellin. Mon. del C'ulto, p. 189.) [W. B. D.]

PARE'NTICM (Пapéetıo: Parenzo), a city of Istria, on the W. coast of the peninsula, abont 30 miles N. of Pola. (Plin. iii. 19. 8. 23; Ptol. iii. 1. § 27 ; Itin. Ant. p. 271 ; Tab. Peut.; Anon. Rav. iv. 31.) From the mention of the name by Stephanus of Byzantium (s.v.) it is probable that it existed as an Istrian town previous to the Roman settlement there. Pliny calls it an "oppidum civium Romanorum," and it would seem that it was already one of the most considerable towns in the province, though it did not then enjoy the rank of a colony. But we learn from inscriptions that it subsequently attained this rank under Trajan, and bore the titles of Colonia Ulpia Parentiun (Orell. Inscr. 72, 3729; Zumpt, de Colon. p. 402.) In common with the other cities of Istria, its most flourishing
period belongs to the close of the Western Empire. The modern city of Parenzo is a small place, but retains its episcopal see, which dates from a very early period.
[E. H. B]
PARGYE'TAE (Пap cording to Ptolemy (vi. 18. § 3), occupied part of the chain of the Paropamisus (Hindú Kish). There can be little doubt that they lived along what are now called the Solimin Koh, a great chain of mountains which extends nearly SW. from Cibul parallel with the Panjab. There is some doubt as to the correct orthography of their name; and it seems most probable that the real form is Parsyetae or Paryetae, which is also given by Ptolemy as the name of another portion of the chain of the Paropamisus. Both probably derive their name from the Sanscrit Parrata, which means mountains. [V.]

PARI'DION. [Pandion.]
PARIENNA (IIapívva), a town of Germany, in the country of the Quadi, was probably situated on the river Waag, on the site of the modern Barin or Varin, (Ptol. ii. 11. § 29.)
[L. S.]
PARIETINUM, a town of the Celtiberinns in Hispania Tarraconensis, identified by some with $S$. Clemente. (Itin. Ant. p. 447).
[T. H. D.]
PARIN (Пápıv, Isidor. Mans. Parth. c. 17, ed. Mifler), a town mentioned by Isidorus of Charax in Drangiana, or, as he calls it, Zarangiana. It has been conjectured by Forbiger that it is represented by the Modern Para; Müller, however, thinks it is the same as Bakour.
[V.]
PARISI (Hapiaot, Ptol. ii. 3. § 17), a British tribe dwelling on the NE. const of Britannia Romana, and on the left bank of the Abus (Humber), consequently in the East Kiding of Yorkshire. Their chief toinn was Petuaria (Metovapia, Ptol. Lc.), which is thought to be the same with the Practoriun of the Itinerary (pp. 464, 466), and whence there was a road through Eboracum (York) to the Roman Wall. Respecting the site of Petuaria there have been many conjectures, and it has been rariously identified with Beverley, Burgh, Auldly, \&c.
[T. H. D.]
PARI'SII. [Lutetta.]
PA'RIUM (Пápiov: Eth. חapiavós), a coast-torn of Mysia, on the Hellespont, on the west of Priapus, in the district called Adrasteia, from an ancient town which once existed in it (Strab. xiii. p. 588). Plinp, ( v .40 ) is mistaken in stating that Homer applicil the name of Adrateia to Parium, and the only truth that seems to lie at the bottom of his assertion is that a town Adrasteia did at one time exist between Priapus and Parium, and that on the destruction of Adrasteia all the building materials were transferted to Parium. According to Strabo, Parium was 2 colony of Milesians, Erythraeans, and Parians ; while l'ausimias (ix. 27. § i) calls it simply a colony of Erythrae. According to the common traditions, it had received its name from Parins, a son of Jasun. (Eustath. ad Hom. Od v. 125, al Dion. Per. 517 ; Steph. B. s. v.)

The harbour of larium was larger and better than that of the neighbouring Prispus ; whence the latter place decayed, while the prasperity of the former increased. In the time of Augustus, Pariam became a Roman colony, as is attested by coins and inscriptions. It contained an altar constructed of the stones of an oracular temple at Adrasteia which had been removed to Parium; and this altar, the work of Hermocreon, is described as very remarkable on account of its size and beaty. Strabo and Pliny (vii.

2）mention，as a curiosity，that there existed at Pa － rium a family called the Ophiogenes（＇Oфюoyeveis）， the members of which，like the Libyar：Psylli，had it in their power to cure the bite of a snake by merely touching the person that had been bitten．I＇arium is also mentioned in Herod．v．117；Xenoph．Anab． vii．2．§ 7，3．§ 16 ；Ptol．v．2．§ 2 ；Appian，Mithrid． 76 ；Mela，i． 19 ；Polyaen．vi．24．The present town occupying the site of Parium bears the name of Kemer or Kamares，and contains a few ancient re－ mains．The walls fronting the sea still remain，and are built of large square blocks of marble，without mertar．There are also ruins of an aqueduct，reser－ voirs for water，and the fallen architraves of a por－ tico．The modern name Kamares seems to be de－ rived from some ancient subterraneous buildings （калd́pou）which still exist in the place．（Walpole， Turkey，p． 88 ；Sestini，Num．Vet．p．73．）［L．S．］

COIN OF PARIUM．
PARMA（İ́́p $\mu \alpha$ ：Eth．Parmensis：Parma），a city of Gallia Cispadana．situated on the Via Aemilia， at the distance of 19 M ．P．from Regium Lepidum， and 40 from Placentia．（Itin．Ant．p．286．）It was about 15 miles distant from the Padus，on the banks of a small stream called the Parma，from which it probably derived its name；and about 6 miles from the more considerable Tarus or Taro． We find no mention of the name before the establish－ ment of the Ruman colony，though it is very pro－ bable that there already existed a Gaulish town or village on the spot：but in B．c．183，after the complete subjugation of the Boii，and the construc－ tion of the Via Aemilia，the Romans proceeded to strengthen their footing in this part of Gaul by founding the colonies of Mutina and Parma，along the line of the newly opened highway，which，in connection with the two previously existing colonies of Bononia and Placentia，formed a continuous chain of Ruman towns，from one end to the other of the Via Aemilia Parma was a＂colonia civinm，＂its settlers retaining their privileges as Roman citizens； it received in the first instance 2000 colonists，each of whom obtained 8 jugera of land for his allotment． （Liv．xxxix．55．）We hear little of Parma for some time after this：it is mentioned incidentally in b．c． 176，as the head－quarters of the proconsul C．Clau－ dius（Id．xli．17）；but appears to have suffered little from the wars with the Gauls and Ligurians： and hence rose with rapidity to be a flourishing and prosperous town．But its name is scarcely men－ tioned in history till the period of the Civil Wars， when it sustained a severe blow，having in B．c． 43 taken a prominent part in favour of the senatorial party against M．Antony，in consequence of which it was taken by that general，and plundered in the most unsparing manuer by his troops．（Cic．ad． Frim．x．33，xi．13，a．，xii．5，Phil．xiv．3，4．）Cicere still calls it on this occasion a Colonia，and there can be no doubt that it still retained that rank；but under Augustus it received a fresh colony，from which it derived the title of Colonia Julia Augusta， which we find it bearing in inscriptions．（Gruter， Inscr．p．492． 5 ；\％umpt，de Culon．p．354．）Pliny also styles it a Colonia，and there seems no doubt
that it continued under the Roman Eimpire to be，as it was in the time of Strabo，one of the principal towns of this populous and flourishing part of Italy． （Plin．iii．15．s． 20 ；Strab．v．p． 216 ；Ptol．iii． 1. § 46；Phlegon，Macrob．1．）But its name is scarcely mentioned in history：a proof perhaps of the tranquillity that it enjoyed．lts territory was celebrated for the excellence of its wool，which according to Martial was inferior only to that of Apulia．（Martial，xiv．155；Colum．vii．2．§ 3．） In A．D．377，a colony of Goths was settled by order of Gratian in the territory of Parma，as well ass the adjoining districts（Ammian．xxxi．9．§4），－a proof that they were already suffering from a decay of the population ；and it is probable that it did not escape the general devastation of the province of Aemilia by Attila．But it survived these calamities： it still bears a part as an important town during the wars of Narses with the Goths and their allies，and is noticed by P．Diaconus，as one of the wealthy cities of Aemilia after the Lombard conquest． （A ${ }_{\text {gath．B．G．i．14－17；P．Diac．Hist．Lang．ii．18．）}}$ It retained its consideration throughout the middle ages，and is still a populous and flourishing place with above 30,000 inhabitants，but has no remains of antiquity，except a few inscriptions．

The Roman poet Cassius Parmensis would appear from his name to have been a native of Parma， but there is no distinct testimony to this effect．

The Itinerary（ p ．284）mentions a line of cross－ road which proceeded from Parma across the Apen－ nines to Luca：this must have ascended the valley of the Parma，or the adjoining one of the Tarus，as far as the main ridge，and and thence descended the valley of the Macra to Luna．This passage， though little frequented in modern times，is one of the main lines of natural communication across this part of the Apennines，and is in all probability that followed by Hannibal on his advance into Etruria．
［E．H．B．］
PARMAECAMPI（Пар $а и к \alpha ́ \mu \pi о t)$ ，a tribe of Southern Germany，on the east of Mount Abnobia and the Danube；they probably occupied the dis－ trict about the town of Cham in Bavaria（Ptol．ii． 11．§ 24．）
［L．S．］
PARNASSUS（Mapvarals）a town in the north－ ern part of Cappadocia，on the right bank of the Halys，and on or near a hill，to which it owed its name，on the road between Ancyra and Archelais， about 63 miles west of the latter town．（Polyb xxv． 4 ；It．Ant．pp．144， 206 ；It．Hieros．p． 576 Geogr．Sacr．p．255．）
［L．S．］
PARNASSUS MONS．［Delpht．］
PARNES．［Attica，p．321，seq．］
PARNON．［Laconia，p．109．］
PAROECO＇POLIS（Пароккбто入ıs，Ptol．iii． 13. § 30），a town of Sintice，in Macedonia，on the right of the river Strymon．Nigrita，on the road from Saloniki to Seres，was either Tristolus（Tpifio－入os，Ptol．L．c．）or Paruecopolis，for these are the only two towns besides Heracleia which Ptolemy assigns to Sintice．If Nigrita be assigned to Tri－ stolus，Paroecopolis will be represented by Skaftscha， which lies to the N．of the forner town．（Leake， Northern Greece，vol．iii．p．229．）［E．B．J．］

PAROLISSUM（Пapó入ı $\sigma \sigma o \nu$ ，or Порбגı Ptol．iii．8．§ 6；Parolissos，Tab．Peut．；cf．Orelli， Inscr．No．3433），a municipal town of Dacia．seated at the termination of the Roman road towards the N．Accordine to Marsili（ii．p．85），Micaza，ac－ cording to Mamnert（iv．p．216），on the Marosch，
above Weissenburg; acconling to Reichard, NayyBanja.

PAROPAMISADAE (Паротаиг
 Arrian, Anab. v. 3 ; Ptol. vi. 18 ; Paropamisii. Mela, i. 2. § 5), the collective name of a number of small tribes who lived along the spurs of the great chain of the Paropamisus (Hindú Kísh), and chiefly along its southern and eastern sides. The district they inhabited, which was called generally
 bounded on the W. by Ariana, on the N. by Bactriana, on the E. by the Indus and Panjub, and on the S. by Arachosia. It comprehended therefore the whole of Cabulistán, and a considerable portion of Afyhanistán. The two principal rivers of this district were the Dargamenes (now Gori) and Cophen (Cabul river). The population appears to have been a free independent mountain race, who never till the time of Alexander had been compelled to submit to a foreign ruler. During the Persian dominion of Asia, as the Paroparnisadae are not mentioned, it may be presumed that they remained unsubdued. Their chief tribes were the Bolitae (perhaps Cabolitae, the inhabitants of Cábul), the Ambautae, Parsii, and Paryetae or Pargyetae (Ptol. vi. 18. § 3). Their chief towns were Ortospanam (Cábul), Alexandreia (perhaps Bamián), Gauzaca, and Capisse or Caphusa. The valleys between the mountains, though exposed to great cold during the winter, were very fertile. (Strab. xvi. p. 725 ; Curt. vii. 3. § 15.)

PAROPAMISUS ( $\delta$ Пiapond́uıбos, Strab. xp. p. 689 ; Паротávıбos, Ptol. vi. $11 . \S 17$; Паратд́цıбos, Arrian, Anab. v. 4. § 5; Парожáцıббоs, Steph. B. 8. v.; Paropamisus, Mela, i. 15. § 2; Plin. vi. 17. s. 20), a great chain of mountains extending from about $67^{\circ}$ E. long. to $73^{\circ} \mathrm{E}$. long., and along $35^{\circ} \mathrm{N}$. lat., and forming the connecting link between the Western Caucasus and the still more eastern Imaus or IIimálaya. Their general modern name is Hinlú Kúsh, but several of the most remarkable groups have their own titles: thus the great mountains W. of Caibul are now called Koh-i-Baba, and those again N. of the Cabul river in the direction of Jellalabád bear the title of Nishadha.

The altitude of these mountains, though not so great as that of the Himalaya, varies from 15,000 to 18,000 feet. It is difficult to determine whence the Greeks obtained the name whereby they have recorded these mountains, or which is the best orthography to adopt. Yet it seems not unlikely that Ptolemy is the most correct, and that in the Greek Paropanisus we have some traces of the Sanscrit Nishadha.

The ancient writers are by no means clear in their accounts of these mountains, and there is a perpetual confusion between the Taurus and the Caucasus. The reason of this no doubt is, that, till the time of Alexander's invasion they were altogether unknown to the Greeks, and that then the officers who described different portions of this celebrated expedition sometines considered the Indian chain as a continuation of the Taurus, and sonetimes of the Caucasus. Thus Strabo, in one place, states that the Dacedonians called all the mountains beyond Ariana eastward, Caucasus, but that among the barbarons people they bore severally the names of Paropamisus, Emodus, and Imaus (xi. p. 511) ; in another, he appears to consider the range which bounded India on the north tw be the
extreme end of Taurus, which extended to the Eastern Sea (xv. p. 689). Arrian appears to have thought that Taurus ought to have been the true name of these, as he considers this great chain to extend across the whole of Asia from M. Mycale. which is opposite to Samos. (Anab. v. 5.) But he adds, that it was named Cancasus by the Macedonian soldiers to gratify Alexander, as though, in passing into Sogdiana through Bactriana, be had crossed the Caucasus. Under the double name of Taurus and Caucasus, he states his belief that this chain is the watershed of all the great rivers of Asia. (l.c.) Again, in another place, he coincides with the description in Strabo, and asserts that the Indian names of Paropamisus, Emodus, \&c., are local titles of the extended chain of the Taurus. (Ind. 2.) Other ancient authors agree more or less with these determinations: thus Mela gives the whole central chain from E. to W. the name of Taurus (i. 15, iii. 7); Curtius calls it Cancasus (vii. 3. § 19, viii. 9. § 3) ; Pliny, enumerating the several groups from E. to W., gives the name of Cancasus to that portion W. of the Hindí Küsh which connects the chain with the Caucasus and Taurus of Western Asia (vi. 17. s. 21) ; Ptolemy appears to bave considered the Paropamisus part of the Caucasus (vi. 18. § 1); lastly, Polybius, speaking of the Oxns, states that it derived its waters from the Caucasus (x. 46, xi. 32). It has been suggested that the present name of Hindú Kush is derived from Indicus Caucasus. [V.]

PARO'PUS (Пápwotos: Eth. Paropinus), a town of Sicily mentioned by Polybius (i. 24) during the First Punic War, in a manner that seems to indicate its site between Panormus and Thermae (Termini). It is not noticed by any of the geographers except Pliny, who mentions it in his list of the stipendiary towns of Sicily (Plin. iii. 8. s. 14): and in another passage (Ib. § 92) speaks of the island of Ustica as lying "contra Paropinos." This is all the clue we have to its position, and its exact site cannot therefore be determined. [E. H. B.]

## PAROREATAE. [Elis, p. 818, a.] <br> PAROREIA. [Megalopolis, p. 309, b.]

PAROREIA (Парळ́peia), a city of Thrace on the borders of Macedonin (Liv. xxxix. 27, xlii. 51), is called by Stephanus B. (s. v.) a city of Macedonia. Its inhabitants are mentioned by Pliny (iv. 10. s. 17) ander the name of Paroraei.

## PARORIOS. [Phrygia.]

PAROS or PARUS (Mápos: Eth. Mápos: Paro), an island in the Aegaean sea, and one of the largest of the Cyclades, lies west of Naxos, from which it is separated by a channel about 6 miles wide. It was said to have been originally inhabited by Cretans and Arcadians, and to have received its name from Parus, a son of the Arcadian Parrhasius. (Callimach. ap. Steph. B. 8. v.) It was also reported to have borne the names of Pactia, Demetrias, Zacynthus, Hyleësa, Minoa, and Cabarnis. (Nicanor, ap. Steph. B. s. v.) It was colonised by the Ionians, and became at an early period so prosperous as to send colonies to Thasus (Thuc. iv. 104; Strab. x. p. 487), to Pariam on the Propontis (Strab. l. c.), and to Pharus on the Illyrian coast. (Strab. vii. p. 315.) After the battle of Marathon, Miltiades in vain endeavoured to subjugate the island. (Herod. vii. 133, seq.; Ephorus, ap. Stepl. B. 8. $\boldsymbol{v}$.) The Parians did not take part in the battlo of Salamis, but kept alcof at Cythnus, watching the course of events. (Herod viii. 67.) They es-
caped，however，punishment，by giving large bribes to Themistocles．（Herod．viii．112．）Along with the other islands in the Aegaean，Paros shortly after－ wards became subject to Athens，and，according to an inscription，paid the imperial city the yearly tribute of 19,440 drachmas．（Franz，Elem．Epigr． Gr．No．49．）Paros subsequently shared the fate of the other Cyclades；and there is nothing further in its history to require special mention．The poet Archilochas was a native of Paros．

The island consists of a single round mountain， sloping evenly to a maritime plain which surrounds the mountain on every side．It was celebrated in antiquity for its white marble，which was exten－ sively employed in architecture and sculpture，and was reckoned only second to that of Mt．Pentelicus． The best kind was called $\lambda i \theta o s ~ \lambda v \chi \nu i \tau \eta s, \lambda v \chi \nu \in o ́ s$, or $\lambda$ í ${ }^{\circ} \delta \mathbf{o s}$ ．（Athen．v．p．205；Plin．xxxvi．5．s． 14 ； Diod．ii．52．）The quarries were chiefly in Mt． Marpessa．（Steph．B．s．v．Má $\boldsymbol{\pi} \eta \sigma \sigma \alpha$ ；Marpessia cautes，Virg．Aen．vi． 471 ．）The Parian figs were also celebrated．（Athen．iii．p．76．）According to Scylax（p．22）Paros possessed two harbours．Its chief city，which bore the same name as the island， was on the western coast．It is now called Pa － roikia，and contains several ancient remains．On a small hill SE．of the city Ross discovered in the walls of a house the inscription $\Delta \dot{\eta} \mu \eta \tau \rho o s$ Kapтофо́oov，and close by some ancient ruins． This was probably the site of the sanctuary of Demeter mentioned in the history of Miltiades，from which we learn that the temple was outside the city and stood upon a hill．（Herod．vi．134．） Paros had in 1835 only 5300 inhabitants．（Thiersch， Ueber Paros und Parische Inschriften，in the Ab－ handl．der Bayrischen Akad．of 1834，p．583，\＆c．； Ross，Reisen auf den Griech．Inseln，vol．i．p． 44 ； Leake，Northern Greece，vol．iii．p．85，\＆c．）

COIN OF PAROS．
PARRHA＇SIA，PARRHA＇SII．［Arcadia， p．192，b．］
PARSICI MONTES，a small chain of mountains in the western part of Gedrosia，beyond the river Arabres．Forbiger has conjectured that they are the same as the present Buskurd Mts．Connected doubtless with these mountains，and in the same district was the Parsis of Ptolemy（vi．21．§5）， which he calls a metropolis，an opinion in which Marcian assents（c．24，ed．Müller），and another tribe whom Ptolemy calls the Parsirae or Parsidae （vi．21．§4）．It seems not unlikely that these are the same people whom Arrian calls Pasirae（Ind． c．26）and Pliny Pasires（vi．23．s．26）．［V．］

PARTHALIS（Plin．vi．18．s．22），the name given by Pliny to the palace of the rulers of the Calingae，who lived at the mouths of the Ganges． The last edition of Pliny by Sillig reads Protalis for the older form，Parthalis．
［V．］
PARTHANUM，a town in Rhaetia，on the road from Laureacum to Veldidena，where，according to the Notitia Inperii（in which it is called Parro－
dunum），the first Rhaetian cohort was stationed． （Itin．Ant．pp．257，275．）Its site is generally identified with the modern Partenkirchen．［L．S．］

PARTHE＇NI PARTHI＇NI（Пapөضขoí，Пap日ıvoí， Пapeîvoı，Strab．vii．p． 326 ；Appian，Illyr． 1 ； Dion Cass．xli． 49 ；Cic．in Pis．40；Pomp．Mela， ii．3．§ 11 ；Plin．iii．26），a people of Grecian Illy－ ricum，who may be placed to the N ．in the neigh－ bourhood of Epidamnus，and，consequently，next to the Taulantii．They are often mentioned in the course of the war with Illyricum，в．с． 229 ，but as friends rather than foes of the Romans，having submitted at an early period to their arms．（Polyb． ii．11；Liv．xxix．12．）After the death of Philip， king of Macedon，they appear to have been added to the dominions of Pleuratus，an Illyrian prince allied to the Romans．（Polyb．xviii．30；Liv．xxx．34， xliv．30．）Their principal town was Parthus （ HápӨos，Steph．B．s．v．），which was taken by Caesar in the course of his campaign with Pom－ peius．（Caes．B．C．iii．41．）In Leake＇s map the site is marked at Ardhenitza（？）．The double－hilled Dimallum，the strongest among the Illyrian places， with two citadels on two heights，connected by a wall（Polyb．iii．18，vii．9），was within their terri－ tory．There is no indication，however，of its precise situation，which was probably between Lissus and Epidamnus．Of Eugenium and Bargulum，two other fortresses noticed by Livy（xxix．12），nothing further is known．
［E．B．J．］
PARTHE＇NIAS．［Harpina．］
PARTHE＇NIUM（ $\tau \delta$ Пap日éviov ópos），a moun－ tain on the frontiers of Arcadia and Argolis，across which there was an important pass leading from Argos to Tegea．［See Vol．I．pp．201，202．］ （Paus．viii．6．§ 4 ；Strab．viii．pp．376，389；Po－ lyb．iv．23；Liv．xxxiv．26；Plin．iv．6．s．10．）It was sacred to Pan；and it was upon this mountain that the courier Pheidippides said that he had had an interview with Pan on returning from Sparta， whither he had gone to ask assistance for the Athenians shortly before the battle of Marathon． （Herod．vi． 105 ；Paus．i．28．§ 4，viii．54．§ 6．） The pass is still called Parthéni，but the whole mountain bears the name of Róino．It is 3993 feet in height．（Leake，Morea，vol．ii．p．329，seq．； Peloponnesiaca，p．203．）

PARTHE＇NIUM（ Iapoéviov），a town in Mysia， in the south of Pergamum．（Xenoph．Anab．vii． 8. §§ 15,21 ；Plin．v．33．）Its exact site has not been ascertained．
［L．S．］
PARTHE＇NIUM MARE（ $\Pi a p \theta \epsilon \nu i \kappa \partial ̀ \nu \pi \epsilon ́ \lambda a \gamma o s$, Greg．Naz．Or．xix．），the eastern part of the Mare Internum，between Egypt and Cyprus．（Amm． Marc．xiv．8．§ 10：from which writer it also ap－ pears that it was sometimes called the Issiac Sea－ ＂a vespera（Aegyptus）Issiaco disjungitur mari， quod quidam nominavere Parthenium，＂xxii． 15. § 2．）
［ $\left.\begin{array}{ll}\mathrm{T} . \mathrm{H} & \mathrm{D} .\end{array}\right]$
PARTHE＇NIUS（חap日évios），the most important river in the west of Paphlagonia．It owes its Greek name probably to a similarity in the sound of its native appellation，which is still Bartan－Su or Bar－ tine；though Greek authors fabled that it derived its name from the fact that Artemis loved to bathe in its waters（Scymn．226，foll．）or to hunt on its banks，or from the purity of its waters．The river has its sources on mount Olgassys，and in its north－western course formed the boundary between Paphlagonia and Bithynia．It empties itself into the Euxine about 90 stadia west of Amastris．（Hom．

PARTHENOPE.
Il. ii. 854 ; Hes. Theog. 344 ; Herod. ii. 104; Xennph. Anab. v. 6. § 9, vi. 2. § 1 ; Strab. xii. p. 543; Ptol. v. 1. § 7 ; Arrian, Peripl. p. 14 ; Steph. B. s. v., who erroneously states that the river flowed through the middle of the town of Amastris; Ov. Ex Pont. iv. 10. 49; Amm. Marc. xxii. 9.)
[L. S.]
PARTHE'NORE. [Neafolis.]
PA'RTHIA ( $\dot{\eta}$ Пapөuala, Strab. xi. pp. 514.515,
 12: Пapөla, Ptol. vi. 5. § l; Parthia, Plin. vi. 15. s. 16), originally a small district of Western Asia, shut in on all sides by either mountains or deserts. It was bounded on the W. by Media Atropatene, on the N. by Hyrcania, on the E. by Ariana and M. Masdoranus, and on the S. by Carmania Deserta, M. Parachoathras, and Persis. It comprehended, therefore, the southern part of Khorasan, almost all Kohistan, and some portion of the great Salt Desert. It was for the most part a mountainous and rugged district. The principal mountains were the Labus or Labutas (probably part of the great range now known by the name of the Elburz M(s.), the Parachoathras (or Flicend), and the Masdoranus. The few rivers which it possessed were little more than mountain streams, liable to violent and sudden floods on the melting of the snow, but nearly dry during the summer: the only names which have been recorded of these streams are, the Zioberis or Stiboetes, the Rhidagus, and the Choatres. The principal divisions of the land were into Camisene, on the north; P'arthyene, to the SW. of Camisene, extending along the edge of the Caspian Sea, as far as the Caspian Gates, a district which some have supposed to have been the original seat of the population, and that from which the whole country derived its name; Choarene, the western portion of the land, and for the most part a fruitful valley along the frontiers of Media; Apavarctene, to the S.; and Tabiene, along the borders of Carmania Deserta There were no great towns in Parthia, properly so called. but history has preserved the names of a few which played an important part at different periods: of these, the best known were Hecatompolis, the chief town of the Parthians, and the royal residence of the dynasty of the Arsacidae, and Apameia Rhagiana.

Little is known of Parthian history at an early period; and it is probable that it was subject to the great empire of Persia, and subsequently to the first successors of Alexander, till the tirst Arsaces threw off the Syro-Macedonian rule, and established a native dyrasty on the throne of Parthia in b. c. 256. From this period it grew rapidly more powerful, till, on the final decay of the house of the Seleucidae, the Arsacidan dynasty possessed the rule of the greater part of Western Asia. Their long wars with the Romans are well known: no Eastern race was able to make so effectual a resistance to the advance of the Roman arms, or vindicated with more constancy and determination their natural freedom. The overthrow of Crassus, в. c. 53, showed what even the undisciplined Parthian troops could do when fighting for freedom. (Dion Cass. xl. 21.) Subsequent to this, the Romans were occasionally successful. Thus, in A. D. 34, Vonones was sent as a hostage to Rome (Tacit. Annal. ii. 1); and finally the greater part of the country was subdued, successively, by the arms of Trajan, by Antoninus, and Caracalla, till, at length, the rise of the new Sassanian, or native dynasty of Persia, ander the command of Artaxerses I. put an end to the bouse of Arsaces (A. D. 226). Subsequent to this

## PARYADRES

period there is a constant confusion in ancient authors between Persians and Parthians. The history of the Parthian kings is given at length in the Lict. of Bing. Vol. I. p. 355, seq.

The inhabitants of Parthia were called Parthyaei (Mapもuaioı, Polyb. x. 31 : Strab. xi. p. 509 ; Arrian, Anab. iii. 21 ; Ptol. iii. 13. § 41) or Parthi (IIdeton, Herod. iii. 93; Strab. xi. p. 524; Plin. vi. 25. 8. 28; Amm. Marc. xxiii. 6), and were, in all probability, one of the many branches of the great Indo-Germanic family of pations. Their own tradition (if, indeed, faithfully reported) was that they came out of Scythia - for they were wont to say that Parthian meant exile in the Scrthian tongue. (Justin, xli. 1.) Herodotus, too, classes them with the people of Chorasmia and Sogdiana (iii. 39, vii. 66); and Strabo admits that their manners resembled those of the Scythians (xi. p. 515). On the other hand, modern research has demonstrated their direct connection with the Iranian tribes; their name is found in the Zend to be Pardu, in the Sanscrit Párada. (Benfey, Review of Wilson's Ariana, Berl. Jahrb. 1842, Nu. 107.) According to Strabo, who quotes Posidonus as his authority, the Parthians were governed by a doubje council, composed of the nobles or relatives of the king (according as the reading eivendy or our$\gamma \in \nu \omega \bar{\nu}$ be adopted), and of the Magians (xi. p. 515). As a nation, they were famous for their skill in the management of the horse and for their use of the bow (Dion Cass. xl. 15, 22; Dionys. 1045; Plut. Crass. c. 24), and for the peculiar art which they practised in shooting with the bow from borseback when retreating. This peculiarity is repeatedily noticed by the homan poets. (Virg. Georg. iii. 31; Horat. Carm. i. 19. 11, ii. 13. 17; Ovid, Art. Am. i. 209.) In their treatment of their kings and nobles they were considered to carry their adulation even beyond the usual Oriental excess. (Virg. Georg. iv. 211; Martial, Epigr. x. 72, 1-5.) [V.] PARTHI'NI. [Partheni.]
PARTHUM ( Iápoov or Mápous, Appian, Pm. viii. 39). a town in the jurisdiction of Carthace, in the neighbourhood of Zama.
[T. H. D.]

## PALTHUS, in Illyricum <br> [Parthenl.]

PARUS. [Paros.]
PARU'TAE (Пapoûtal, Ptol. vi. 17. § 3), a tribe placed by Ptolemy on the outskirts of the Paropamisus in Ariana. It is probable that these people derive their name from the Sanscrit Parvata, mean ing mountain triles.

PARYADRES (Пapuádpqs, Пapuá日pıs, or Пapuá $\rho \delta \eta s)$, a range of lofty and rugged mountains in the north of Pontus, which is connected with Mount Taurus and Mount Caucasus (Strab. xi. p. 497, xii. p. 548; Plin. v. 27, vi. 9, 11). It commences at the western extremity of the Montes Moschici, proceeds in a south-western direction round Pontus, and there forms the fruntier between Armenia and Cappadocia. A more southern branch of the same mountain is the Scoedises. Ptolemy (v. 13. §§ 5,9) describes this mountain as containing the sources of the Euphrates and Arases, and accordingly inclades within its range Mount Abus, from which others make those rivers flow. The Paryadres contnins the sources of only small rivers, of which the largest is the Absarns. The mountain was in ancipnt times thickly covered with wood, and the population upon and about it consisted of robbers (Strab. xii. p. 548). Many parts of the mountain are extremely rugged, and alnost inaccessible, whence Mithridates of Pontus built many of his treasure-houses there, and

PARYETAE.
when pursued by Pompey, concealed himself in its fistnesses. In a climatic point of view the monntain disides l'ontus into two distinct regions; for while the north side is stern and cold, its southern side is delightfully warm. Hence the ancients called the point of transition in a pass between Trapezus and Satale, the Frividarium. The modern name of the mountain is generally Kuttag, but it is also called Kiara BeL (Tuurnefort, Voyage i. lettre 18. p. 107.)
[L. S.]

## PARYE'TAE. [Pargyetae.]

PASA'RGADAE ( $\Pi a \sigma a p \gamma \dot{\alpha} \delta a t$ ), according to Herodutus, one of the three chief tribes of the ancient I'ersians (i. 125); according to other writers, a Jeople of the adjcining province of Carmania (Ptol. vi. 8. § 12 ; Dionys. v. 1069). The probability is, that they were the inhabitants of Pasargadae in Persis.
[V.]
 2 great city of the early Persians, situated, according to the best authorities, on the small river Cyrus (now Kür), in a plain on all sides surrounded by inountains. It contained, according to Strabo, a palace, the treasures, and other mennorials of the Persian people, and though not so magnificent as Persepolis, was highly esteemed by that people for its antiquits (xv. 728). In another place the same fencrapher states that the most ancient palace was at Pasargadue ; and in its immediate neighbourhood the tomb of Cyrus, who had a regard for the spot, as that on which he finally overthrew Astyages the Male (xr. 730). It is by the notice of the tomb of Cyrus in Strabo (l. c.), and more fully in Arrian (vi. $\therefore 9$ ), that we are now enabled to identify the site of the ancient Pasargalae with the modern Murghab. At Murghrib a building has been noticed by many modern travellers, and especially by Morier and Ker Porter, which corresponds so well with the description in ancient authors that they have not hesitated to pronounce it the tomb of Cyrus ; and the whole adjoining plain is strewed with relics of the once grest capital. Among other monuments still remaining is a great monolith, on which is a bas-relief, and above the relief, in cuneiform characters, the words "I am Cyrus, the king, the Achacmenian." The same inscription is found repeated on other stones. (Morier, Travels, i. p. 30, pl. 29 ; Ker Porter, i. p. 500 ; Lassen, Zcitschrift, vi. p. 152 ; Burnouf, Menoire, p. 169 ; Ouseley, Travels, ii. pl. 49.) The name of the place is found in different authors differently written. Thus Pliny writes "Passagarda" (vi. 26. 8. 29), Ptolemy "Pasargada " (vi. 4. § 7). Sir W. Ouseley (l. c.) thinks that the original name was Parsagarda, the habitation of the Persians, on the analogy Dakil-gerd, Firuz-gerd, Sc.
[V.]
PASIDA (חd $\sigma \delta \delta a$ ), a small port on the coast of Caramania, mentioned by Marcian (Peripl. § 28). Forbiger thinks that it is the same as that called in some editions of Ptolemy DLagida, in others, Masin (vi. 8..§ 7 ).

Pasinudi, PaSINUS. [Liburni.]
PASIRA ( $\tau$ ले Macıpd, Arrian, Ind. c. 25), a place mentioned by Arrian in Gedrosia, as touched at by Nearchus in his voyage. It is doubtful whether it is to be considered as distinct from another place he has mentioned just before, Bagisara. Kempthorne has identified the latter with a locality now known by the name of Arabah or Hormarah bay, and thinks that a large fishing villare in the immediate neighbourhood unaty be that called by Nearchus,

PATARA.
Pasira The inhabitants were called Pasirne or Pasirees. Pliny places the Pasiras along the river Tomberon or Tomerus (vi. 25. s. 27). Nearchus, however, makes the Tomerus flow at a distance of 900 stadia from Pasira. It is probable that the Rhagirana of Ptolemy refers to Bagisaura or Pasira (vi. 21. § 2).
[V.]

## PASITIGRIS. [Tigris.]

PASSALAE (Пa tribe in India extra Gangem, placed by Ptulemy between the Imaus and the M. Bepyrrhus. They must therefure have occupied some of the mountainvalleys on the eastern side of Tibet. Pliny mentions them also (vi. 19. s. 22)
[V.]
PASSARON (na $\begin{gathered}\text { a } \alpha 0 \omega \nu \text { ), the ancient capital of }\end{gathered}$ the Molossi in Epeirus. where the kings and assembled people were accustomed to take mutual oaths, the one to govern according to the laws, the other to defend the kingdom. (Plat. Pyrrh. 5.) The town was taken by the Roman praetor L. Anicius Gallus in в. c. 167. (Liv. xlv. 26, 33, 34.) Its site is uncertain. but it was apparently on the sea-coast, as Anna Comnena mentions (vi. 5, p. 284, ed. Bonn) a harbour called Passara on the coast of Epeirus. If this place is the same as the older Passaron, the ruins at Dhramisiis, which lie inland in a SSW. direction from Ioannina, cannot be those of the ancient capital of the Molossi. Those ruins are very considerable, and contain among other things a theatre in a very fine state of preservation. (Leake, Northern Greece, vol. iv. p. 81.)

PATARA (Пá $\alpha \rho a$ : Eth. Matapé̀́s, Patarensis or Pataranus). 1. A small town in Cappadocia or Armenia Minor. (Tab. Peut.)
2. A flourishing maritime and commercial city on the south-west coast of Lycia. The place was large, possessed a good harbonr, and way said to have been founded by Patarus, a son of Apollo. (Strab. xiv. p. 666 ; Steph. B. s. v.) It was situated at a distance of 60 stadia to the south-east of the mouth of the river Xanthos. (Staduısm. Mar. Mag. § 219.) Patara was most celebrated in antiquity for its temple and oracle of Apollo, whose renown was inferior only to that of Delphi ; and the god is often mentioned with the sarname Patareus (Marafés, Strab. L.c.; Lycoph. 920; Hurat. Carm. iii. 4. 64; Stat. Theb. i. 696; Ov. Met. i. 515 ; Virg. Aen. iv. 143; Pomp. Dela, i. 15.) Herodotus (i. 182) says that the oracle of Apollo was delivered by a priestess only during a certain period of the year; and from Servius (ad Aen.l.c.) we learn that this period was the six winter months. It has been suppreed that the town was of Phoenician or Semitic origin; but whatever may be thought on this point, it seems certain that at a later period it received Dorian settlers from Crete; and the worship of Apollo was certainly Dorian. Strabo inforns us that Ptolemy Philadelphus of Egypt, who enlarged the city, gave it the name of Arsinue, but that it nevertheless continued to be called by its ancient name, Patara. The place is often noticed by ancient writers as one of the principal cities of Lycia, as by Livy, $\mathbf{x x x i i i} .41$, $x \times x$ vii. 15-17, $\mathbf{x x v i i i i . ~ 3 9 ; ~ P o l y b . ~ x x i i . ~ 2 6 ; ~ C i c . ~ p . ~ F l a c c . ~}$ 32: Appian, B. C. iv. 52, 81, Mithr. 27 ; Plin. ii.112, v. 28; Ptl. v. 3. § 3, viii. 17. § 24 : Dionys. Per. 129, 507. Patara is mertioned among the Lycian bishoprics in the Acts of Councils (Hierocl. p. 684), and the name Patera is still attached to its numerous ruins. These, according to the survey of C:apt. Beaufort, are situated on the sea-shore, a litte to
the eastward of the river Xanthus, and consist " of a theatre excavated in the northern side of a small hill, a ruined temple on the side of the same hill, and a deep circular pit, of singular appearance, which may have been the seat of the oracle. The town walls surrounded an area of considerable extent; they may easily be traced, as well as the situation of a castle which commanded the harbour, and of several towers which flanked the walls. On the cotside of the walls there is a multitude of stone sarcophagi, most of them hearing inscriptions, but ali open and empty; and within the walls, temples, altars. perestals, and frayments of sculpture appear in profusion, but ruined and mutilated. The situation of the harbour is still apparent, but at present it is a swamp, choked up with sand and bushes." (Beaufort, Karmania, pp. 2, 6.) The theatre, of which a plan is given in Leake's Asia Minor (p. 320), was built in the reign of Antoninus Pius; its diameter is 265 feet, and has about 30 rows of seats. There are also ruins of thermae, which, according to an inscription upon them, were built by Vespasian. (Comp. Sir C. Fellows, Tour in Asia Min. p. 222, foll.; Discov. in Lycia, p. 179, foll.; Texier, Descript. do l'Asie Min., which contains numerous representations of the ancient remains of Patara; Spratt and Forbes, Travels in Lycia, i. p. 31, foll.)
[L.S.]
PATAVISSA (Пarpouin $\sigma a$, Ptol. iii. 8. § 7, wrongly), a small town of Dacia, endowed by the emperor Severus with the jus coloniace. (Ulpian, Dig. i. 8. 9, where it is called Patavicensium vicus.) Variously identified with Mar-Ujear, or with Ptoris or Tovis, on the Marosch; also with Bogatz and St. Kiraly, on a tributary of the same river. [T.H.D.]

PATA'VIUM (חataoúton : Eth. Patavinus: Padova), one of the most ancient and important cities of Venetia, situated on the river Medoacus (Brenta), about 30 miles from its mouth. According to a tradition recorded by Virgil, and universally received in antiquity, it was founded by Antenor, who escaped thither after the fall of Troy; and Livy, himself a native of the city, confirms this tradition, though he dies not mention the name of Patavium, but describes the whole nation of the Veneti as having migrated to this part of Italy under the guidance of Antenor. He identifies them with the Heneti, who were mentioned by Homer as a Paphlagonian trite. (Lir. i. 1 ; Virg. Aen. i. 247 ; Strab. v. p. 212 ; Mel. ii. 4. § 2 ; Solin. 2. § 10.) The national affinities of the Veneti are considered elsewhere [Veneti]. The story of Antener may safcly be rejected as mythical; but we may infer from the general accordance of ancient writers that Patavium itself was a Venetian city, and apparently from an early period the capital or chief place of the nation. We have very little information as to its history, before it became subject to Kome, and we know only the general fact that it was at an early perind an opulent and flourishing city : Strabo even tells us that it could send into the field an army of 120,000 men, but this is evidently an exaggeration, and probably refers to the whole nation of the Veneti, of which it was the capital. (Strab. v. p. 213.) Whatever was the origin of the Veneti, there seems no doubt they were a people far more adranced in civilisation than the neighbouring Gauls, with whom they were on terms of almost continual hostility. The vigilance rendered necessary by the incursions of the Gauls stood them in stead on occasion of the unexpected attack of Cleonymus the

Lacedaemonian, who in b.c. 301 landed at the mouth of the Medoacus, but was attacked by the Patarians, and the greater part of his forces cut off. (Liv. x. 2.)

It was doubtless their continual hostility with the Gauls that led the Venetians to become the allies of Rome, as soon as that power began to extend its arms into Cisalpine Gaul. (Pol. ii. 23.) No special mention of Patavium occurs daring the wars that followed; and we are left to infer from analogy the steps by which this independent city passed gradually under the dependence and protection of Rome, till it altimately became an ordinary municipal town. In B. c. 174 it is clear that it still retained at least a semblance of independence, as we hear that it was distracted with domestic dissensions, which the citizens appealed to Rome to pacify, and the consul M. Aemilius was selected as deputy for the purpose. (Liv. xli. 27.) But the prosperity of Patavium continued unbroken: for this it was indebted as much to the manufacturing industry of its inhabitants as to the natural fertility of its territory. The neighbouring hills furnished abondance of wool of excellent quality; and this supplied the material for extensive woollen manufactures, which seem to have been the staple article of the trade of Patavium, that city supplying Rome in the time of Augustus with all the finer and more costly kinds of carpets, hangings, \&c. Besides these, however, it carried on many other branches of manufactures also; and so great was the wealth arising from these sources that, according to Strabo, Patavium was the only city of Italy, except Rome, that could return to the census not less than 500 persons of fortunes entitling them to equestrian rank. (Strab. iii. p. 169, v. pp. 213, 218.) We cannot wonder, therefore, that both he and Mela speak of it as unquestionably the first city in this part of Italy. (Id. $\nabla$. p. 213 ; Mela, ii. 4. § 2.)

The Patavians had been fortunate in escaping the ravages of war. During the Civil Wars their name is scarcely mentioned; but we learn from Cicero that in B. c. 43 they took part with the senate against M. Antonins, and refused to receive his emissarics. (Cic. Phil. xii. 4.) It was probably in consequence of this, that at a later period they were severely oppressed by the exactions of Asinius Pollio. (Macrob. Sat. i. 11. § 22.) In A. D. 69 Pataviom was occupied without opposition by the generals of Vespasian, Primus, and Varus, daring their advance into Italy. (Tac. Hist. iii. 6.) From its good fortune in this respect there can be no doubt that Patavium continued down to a late period of the Empire to be a flourishing and wealthy city, though it seems to have been gradually eclipsed by the increasing prosperity of Aquileia and Mediolanum. Hence Ausonius, writing in the fourth century, does not even assign it a place in his Ordo Nobilium Urbium. Bat its long period of prosperity was abruptly brought to a close. In A. D. 452 it felt the full fury of Attila, who, after the capture of Aquileia, which had long resisted his arms, laid waste almost without opposition the remaining cities of Venetia. He is said to have utterly destroyed and razed to the ground Patavium, as well as Concordia and Altinum (P. Diac. Hist. Miscell. xv. p. 549): and, according to a tradition, which, though not supported by contemporary evidence. is probably well founded, it was on this occasion that a large number of fugitives from the former city took refucie in the islands of the lagunes, and there founded the
celebrated city of Venice. (Gibbon, ch. 35, nota 5j.) But Patavium did not cease to exist, and must have partially at least recovered from this calamity, as it is mentioned as one of the chief towns of Venetia when that province was overrun by the Lombards under Alboin, in A.D. 568. (P. Diac. Hist. Lang. ii. 14.) It did not fall into the bands of that people till near 40 years afterwards, when it was taken by Agilulf, king of the Lomhards, and burnt to the ground. (Id. iv. 24.) But it once more rose from ite ashes, and in the middle ages again became, as it has continued ever since, one of the most considerable cities in this part of Italy, though no longer enjoying its ancient preeminence.

It is probahly owing to the calamities thns suffered by Patavium, as well as to the earthquakes by which it bas been repeatedly visited, that it has now ccarcely any relics of its ancient splendour, except a few inscriptions: and even these are much less numerous than might have been expected. One of them is pre-erved with great care in the town-hall as containing the name of 'T. Livius, which has been supposed to refer to the great historian of the name, who, as is well known, was a native of Patavium. But this is clea.ly a mistake; the inscription in question refers only to an obscure freedinan; nor is there the slightest foundation for regarding the sarcophagus preserved with it as the tomb of the celebrated historian. (Bingr. Dict. Vol. II. p. 790.) But at least the supposition was inore plausible than that which assigns another ancient sarcophagus (discovered in 1274, and still preserved in the charch of S. Lorenzo) as the sepulchre of Antenor! Besides these sarcophagi and inscriptions, the foundations of ancient buildings have been discuvered in various parts of the modern city, but nothing now remains above ground.

Patavium was the birthplace also of Thrasea Pactus, who way put to death by Nero in A. D. 66. One of the causes of offerice which he hal given was by assisting as a tragedian in certain games, which were celebrated at Patavium every 30 years in honour of Antenor, a custom said to be derived from the Troian founders of the city. (Tac. Ann. xvi. 21 ; Dion Cass. lxii. 26.) We learn also from Livy that in his time the memory of the defeat of the Spartan Cleonymus was preserved by an annual mock fight on the river which flowed through the midst of the town. (Liv. x. 2.) [E. H. B.]

PATA'VIUM (Пataoúiov), a town of Bithynia on the south of Lake Ascania, between the Sinus Astacenus and the Sinus Cianus. (Ptol. v. I. §13.)

PATERNUM, a town on the E. coast of the Brattian peninsula, mentioned only in the Itinerary of Antoninus (p. 114); from which we learn that it was situated 27 miles from Roscianum (Rossano), probably in the neighbourhood of the Capo dell' Alice, the ancient Cape Crimissa; but the supposition that it was the same place with the more ancient city of Crimissa is a mere conjecture; as is also its identification with the modern town of Ciro. The name of Paternum again occurs in early ecclesiastical records as the see of a bishop, but afterwards wholly disappears. (Holsten. Not. ad Clut. p. 207; Romanelli, vol. i. p. 213.) [E. H. B.]

PATHISCUS. ['Tibiscus.]
PATIGRAN (Ammian, xxiii. 6), one of the three principal towns mentioned by Ammianus Marcellinus in Sledia. This plare is nowhere else
noticed; but it is not impossible that the name is a barbarous corruption of the Tigrana of Ptolemy (vi. 2. §9).
[V.]
PATMOS (Пítuos: Patmo), one of the Sporades Insulae, in the south-east of the Aegean, to the west of Lepsia and south of Samos, is said to have been 30 Roman miles in circumference. (Pliny, iv. 23; Strab. x. p.488; Thucyd. iii. 23; Eustath. ad Lhon. Per.530.) On the north-eavtern side of the island there was a town with a harbour of the same name as the island, and the southermmost point formed the promontory Amazonium (Shudiasm. Mar. Mag. p. 488, ed. Hoffinann). This littie island is celebrated as the place to which St. John was banished towards the close of the reign of Domitian, and where he is said to have composed the Aprocalypse ( Revel. i. 9). A cave is still shown in Patmos where the apostle is believed to have received his revelations. (Comp. Iren. ii. 22; Euseb. Hist. Eccl. iii. 18; Dion Cass. lviii. 1.) The island contains several churches and convents, and a few remains of the ancient town and its castle. (Walpole, Turkey tom. ii. p. 43; Ross, Reisen auf den Gricch. Inseln, vol. ii. p. 123, foll.)
[L. S.]
PATRAE (Mdrpal; in Herod. i. 145, חatpées, properly the name of the inhabitants: Eth. Matpés, Thuc.; Marpatévs, Pol. iv. 6; Patrensis: Patrusso, Patras, Patra), a town of Achaia, and one of the twelve Achaean cities, was situated on the coast, W. of the promontory Rhium, near the opening of the Corinthian gulf. (Herod. i. 145; Pol. ii. 41 ; Strab. viii. p. 386.) It stood on one of the outlying spurs of Mount Panachaïcus (Voülhiá), which rises inmediately behind it to the height of 6322 feet. It is said to have been formed by an union of three small places, named Aroë ('Apón), Antheia ( $1 \nu \theta \in \iota a$ ), and Mesatis (Mecdris), which had been founded by the Ionians, when they were in the occupation of the country. After the expulsion of the Ionians, the Achaean hero Patreus withdrew the inhabitants from Antheia and Mesatis to Aroë, which he enlarged and called Patrae after himself. The acrupolis of the city probably continued to bear the name of Aroie, which was often used as synonymous with Patrae. Strabo says that Patrae was formed by a coalescence of seven demi; but this statement perhaps refers to the restoration of the town mentioned below. (Paus. vii. 18. § 2, seq.; Strab. viii. p. 337.) In the Peloponnesian War Patrae was the only one of the Achaean cities which espoused the Athenian cause; and in B.c. 419, the inhabitants were persuaded by Alcibiades to connect their city by means of long walls with its port. (Thuc. v. 52; Plnt. Alc. 15.) After the death of Alexander the city fell into the hands of Cassander, but his troops were driven out of it by Aristodemus, the genersl of Antigonns, b.c. 314. (Diod. xix. 66.) In b.c. 280 Patrae and Dyme were the first two Achaean cities which expelled the Macedonians, and their example being shortly afterwards followed by Tritaea and Pharae, the.Achaean Lengue was renewed by these four towns. [See Vol. I. p. 15.] In the following year (b.c. 279) Patrae was the only one of the Acbaean cities which sent assistance to the Aetolians, when their country was invaded by the Gauls. In the Social War Patrae is frequently mentioned as the port at which Philip landed in his expedition into Peloponnesus. In the war between the Achaeans and the Romans Patrae suffered so severely, that the greater part of the inhabitants abandoned the city and took up their aboles in the surrounding villages of Mesatis, An-
theia, Bolina, Argyra, and Arba (Pol. v. 2, 3, 28, \&ec.; Paus. vii. 18. §6; Pol. xl. 3.) Of these places we know only the position of Bolina and Argyra Bolina was a little S. of the promontory Drepanum, and gave its name to the river Bolinaeus. (Paus. vii. 24. § 4.) Argyra was a little S. of the promontory Rhium. (Paus. vii. 23. § 1.) Patrae continued an insignificant town down to the time of Augustus, although it is frequently mentioned as the place at which persons landed going from Italy to Greece. (Cic. ad Fam. vii. 28, xvi. 1, 5, 6, ad Att. v. 9, vii. 2.) After the battle of Pharsalia (b.c. 48) Patrae wais taken possession of by Cato, but shortly afterwards surrendered to Calenus, Caesar's lieutenant. It was here also that Antony passed the winter (32-31) when preparing for the war against Augustus; and it was taken by Agrippa shortly before the battle of Actium. (Dion Cass. xlii. 13, 14, 1. 9, 13.) It owed its restoration to Augustus, who resolved after the battle of Actium to establish two Roman colonies on the western coast of Greece, and for this purpose made choice of Nicopolis and I Patrae. Augustus colonised at Yatrae a considerable body of his soldiers, again collected its inhabitants from the surrounding villages, and added to them those of Rhypes. (Paus. vii. 18. § 7 ; Plin. iv. 5.) He not only gave Patrae dominion over the neighbouring towns, such as Pharae (laus. vii. 22. § 1), Dyme (Paus. vii. 17. §5), Tritaea (Paus. vii. 23. §6), but even over Locris. (Paus. x. 38. § 9.) On cuins it appears as a Roman colony with the name of Colonia Augusta Aroē Patrensis. Strabo describes it in his time as a populous place with a grod anchorage, and Pausanias has devoted four chapters to an account of its public buildings. (Strab. viii. p. 387 ; Paus. vii. 18-21.) Of these the most important appear to have been a temple of Artemis Laphria, on the acropolis, with an ancient statue of this goddess, removed from Calydon to Patrae by order of Augustus, and in whose honour an annual festival was celebrated; the Odeum, which was the most magnificent building of the kind in Greece, after the Odeum of $\mathrm{Ho}-$ rodes at Athens; the theatre; and on the seaside a temple of Demeter, which was remarkable on account of a well in front of it, which was supposed to furetell the fate of sick persons; a mirror was suspended on the water, and on this mirror there were certain appearances indicating whether the person would live or die. In the time of Pausanias Patrae was noted for its manufacture of byssus or flax, which was grown in Elis, and was woven at Patrae into headdresses (кекри́фалоı) and garments. Women were employed in this manufacture, and so large was their number that the female population was double that of the male; and as a natural consequence there was great immorality in the town. (Paus. vii. 21. § 14.)

Patrae has continued down to the present day to be one of the most important towns in the Morea, being admirably situated for communicating with Italy and the Adriatic, and with castern Greece by means of the gulf of Corinth. It is frequently mentioned in the Byzantine writers. In A.D. $\mathbf{3 4 7}$ there was an archbishop of Patrae at the council of Sardica. In the sixth century it was destroyed by an earthquake. (Procop. Goth. iv. 25.) It is subsequently mentioned as a dukedom of the Byzantine empire; it was sold to the Venetians in 1408; was taken by the Turks in 1446; was recovered by the Venetians is 1533; but was shortly afterwards taken again by the Turks, and remained in their hands till the Greek revolution.

The country around Patras is a fine and fertile plain, and produces at present a large quantity of currants, which form an article of export. The modern town occupies the same site as the ancient city. It stands upon a ridge about a mile long, the summit of which formed the acropolis, and is now occupied by the ruins of the Turkish citadel. From the town there is a beautiful sea-view. 'T The outline of the land on the opposite side of the gulf, extends from the snowy tops of Parnassus in the east, to the more distant mountains of Acarnania in the same direction, while full in front, in the centre of the prospect, are the colossal pyramids of Kakiscala (the ancient Taphiassus) and Varásova (the ancient Clalcis), rising in huge perpendicular masses from the brink of the water." (Mure, Tour in Grecee, vol. ii. p. 300.) There are very few remains of antiquity at Patras. The molern citadel contains some pieces of the walls of the ancient acropolis, and there are ruins of the Roman aqueduct of brick. The well mentioned by Pausanias is still to be seen about three quarters of a mile from the town under a vault belonging to the remains of a church of St. Andrew, the patron saint of Patras. Before the Greek revolution, in which Putras suffered greatly, its pmplation was about 10,000; but its present population is probably somewhat less. (Leak3, Morec, vol. ii. p. 123, seq.)

COIN OF PATRAE.
PATRAEUS (חatpacús), a place in the Cimmerian Bosporus, 130 stadia from Corocondame. and near the monument of Satyrus, the ruler of the Bosporus. Klaproth places Patracus at Akburnn, 5 versts S. of Kertch. (Strab. xi. p. 494 ; Böckh, Inscr. vol. ii. p. 163, n. 2127 ; Klaproth, Noue. Journal Aviatique, vol. i. pp. 67, 290 ; Ukert, vol. iii. pt. ii. p. 488.)

PATROCLI INSULA (Пarpobrגov $\boldsymbol{\eta} \boldsymbol{\eta} \sigma o s$, Paus i. 1. § 1, i. 35. § 1 ; Steph. B. в. v.; Пatpóкло⿱ $\chi \alpha \rho a \xi$, Strab. ix. p. 398), a small island off the sonthern ccast of Attica, west of the promontory Sunium, so called from Patroclus, one of the generals of Ptolemy Philadelphus, who was sent by this king to assist the Athenians against the Macedoniaus, and who built a fortress in the island. It is now called Gaidharonisi. (Leake, Demi of Attica, p. 62, 2nd ed.)

PATTALA ( $\tau \grave{\alpha}$ Martdлa, Arrian, v. 4, vi. 17; $\dot{\eta}$ Mácad $\eta$, Ptol. vii. 1. § 59), a town in Western India, situated at the point of land where the western stream of the Iudus is divided off into two chicf branches, which, flowing to the sea, enchace what has been popularly called the delta of that river. There can be no doubt that this place is represented by the present Tatta. Arrian states that it derives its name from an Indian word, which signifies delta (v. 4 ; Ind. c. 2.) Alexander the Great appears to have spent some time there, and to have built a castle and docks ; and it was from this place that he made his first unfortunate but altimately successful expedition in ships to the month of the Indus (Arrian, vi. 18). The real Indian meaning of Patala appears to be the West, in opposition wo
the East，or land of the Ganges；or，mythologically， the Lower liegions（Ritter，v．p．476）．［V．］

PATTALE＇NE（Пatra入ท市．Strab．xvi．pp．691， $\% 01$ ：Patalene，Пara入nング，Ptol．vii．1．§ 55 ； Patale，Piin．vi．20，21，23），the delta－shaped dis－ t－ict comprehended between the arms of the Indus， and extending from its capital Pattala（now Tatta） to the Indian Ocean．It was a very fertile，flat， marshy country，liable to be constantly overflowed by the waters of the great river．The ancients gave， on the whole，a tulerably accurate estimate of the size of this delta，Aristobulus stating that it was 1000 stadia from one arm of the river to another，and Nearchus considering the distance to be 800 stadia； they，however，greatly exaggerated the width of the river，at its point of separation，Onesicritus deeming this to have been as much as 200 stadia（Strab．xv． p．701）．We may presume this measure to have been made during a time of flood．By Marcian， Pattalene is comprehended in Gedrosia；but there seems reason to suspect that the present text of Marcian has been tampered with（c．34，ed．Müller， 1855）．Arrian does not distinguish between the town and the district of which it was the capital， but calls them both indiscriminately Patala（Anab． v．3）．The district probably extended along the coast from the present Kurachi on the W．to Cutch on the E ．
［V．］
PATU＇MUS（חd́aouros，Herod．ii．159），a town of Araoia，on the borders of Egypt，near which Necho constructed a canal from the Nile to the Arabian Gulf．It is probably the Pithom of Scripture （Exod．i．11），not far from Bubastis，and near the site of the present Belley．
［T．H．D．］
PAULU（Faglione），a river of Liguria，rising in the Maritime Alps，and flowing into the sea under the walls of Nicaea（Nice）．（Plin．iii．5．s．7； Mel．ii．4．§ 9．）It is now called the Paglione， and is a considerable mountain torrent in winter and spring．

PALS．［Clemtor］
PaUSilyipus MONS．［Nearolis，p．410．］
PAUSULAE（Eth．Pausulanus），a town of Pi－ cenum，mentioned only by Pliny（iii．13．s．18）．It is placed by Holstenius at Monte dell＇Olmo，about 5 miles S．of Macerata，on the right bank of the river Chienti，the ancient Flusor．（Holsten．Not． ad Cluver．p．137．）
［E．H．B．］
PAUTA＇LIA（ Пavta入ía al．Пavta入ía，Ptol． iii．11．§ 12，Peut．Tab．），a town in the district of Dentheletica．Its position in the Table accords with that of the modern Djustendil or Ghiustendil； and the situation of this town at the sources of the Strymon agrees remarkably with the figure of a river－god，accompanied by the＂legend＂$\Sigma \tau \rho u u^{\mu} \omega \nu$ ， on some of the autonomous coins of Pautalia，as well as with the letters EN．MAIR．，which，on other cains，show that the Pautalistae considered them－ selves to be Pae nians，like the other inhabitants of the banks of that river．On annther coin of Pau－ talia，the productions of its territory are alluded to， namely，gold，silver，wine，and corn（Eckhel，vol．ii． p．38），which accords with Ghiustendil．In the reign of Hadrian，the people both of Pautalia and Serdica added Ulpia to the name of their town，pro－ bably in consequence of some benefit received from that emperor．This title，in the case of Pautalia， would seem at first sight to warrant the supposition that it was the same place as Ulpiana，which，ac－ cording to Procopius（de Aed．iv．1），was rebuilt by Justinian，with the name of Justiniana Secunda；and
the molern name lends an appearance of confirma－ tion to this hypothesis by its resemblance to Justini－ ana．But the fact that Procopias and Hierocles no－ tice Ulpiana and Pautalia as distinct places，is an insurmountable objection to this hypothesis［Un．pi－ ana．］Stephanus of Byzantium has a district called Paftalia（Maitax（a），which he assigns to Thrace， probably a false reading．（Leake，Northern Greece， vol．iii．p．425．）
［E．B．J．］
PAX JULIA（Màk＇Iovaía，Ptol．ii．5．§ 5；called in the Geogr．Rav．，iv．43，Pacca Julia），a town of the Turdetani，in the S．of Lusitania，and on the road from Esuris to Ebora（Itin．Ant．pp．426，427）． But on the subject of this route see Lesitania， Vol．II．p．220．It was a Roman colony，and the seat of a Conventus juridicus（I＇lin．iv．35）；probably the same town as that called Pax Augusta by Strabo （iii．p．151），－as many towns bore double names in this manner，－notwithstanding that it is placed by him among the Celtici．（Ukert，vol．ii．pt．I．p． 388 ， and the authorities there cited．）It lay on a hill N．of Julia Myrtilis，and is commonly identified with Beja．
［T．H．D．］
PAXI（Пakot），the name of two sinall islands， now called Paxo and Antipaxo，situated between Corcyra and Leucas．（Polyb．ii． 10 ；Plin．iv． 12. s．19；Dion Cass．1．12．）

PEDAEUM or PEDAEUS（חŋ́סaiov），a place mentioned by Homer（Il．xiii．172），which is said by Eustathius to have been a town in Troas；but it is otherwise entirely unknown．
［L．S．］
PEDA＇LIE，a place on the coast of Cilicia，be－ tween Pinara and Ale，is mentioned only by Pling （v．22），and its cxact site is unknown．［L．S．］

PEDA＇LIUM（ $\Pi \eta \delta \dot{\alpha} \lambda^{\prime} \iota o \nu$ ），a promontory in the south－east of Caria，forming the southernmost puint of the western coast of the Sinus Glaucus．（l＇omp． Mela，i．16；Plin．v．29；Stadiasm．Mar．Magn． §§ 228，233，234．）Strabo（xiv．p．651）gives to the same promontory the name of Artemisium，from a temple of Artemis，which stood upon it ；its modern name is Bokomadhi．（Leake，Asia Minor， p．223，foll．）
［L．S．］
PE＇DASA（ $\Pi \eta \delta a \sigma a:$ Eth．$\Pi \eta \delta a \sigma \epsilon u ́ s)$ ，also called PEDASUM（Plin．v．29），an ancient city of Caria， in which the Persians suffered a defeat during the revolt of the Ionians．（Herod．v．121，vi．20．）It was once the chief seat of the Leleges．Alexander the Great deprived the place of its independence by giving it over to the Halicarnassians，together with five other neighbouring towns．（Plin．l．c．）In the time of Strabo（xiii．p．611）the town had ceased to exist，and the name of the district，I＇edasis（ $\Pi \eta \delta a$－ ois），was the only remaining memorial of the place． （Comp．Polyb．xviii． 27 ；Steph．B．s．v．）As He－ rodotus assigns to Pedasa a portion of the territory of Miletus，it is clear that the town must have been situated between Miletus，Halicarnassus，and Strato－ niceia；but its exact site is still only matter of con－ jecture，some placing it at the modern Melasso，and others at Arabi Hissar，neither of which surpmsi－ tions is free from inconsistencies．
［L．S．］
PEDASUS（Hhjaaos），a small town of Mysia， on the river Satnioeis，which is mentioned by Homer （Il．vi．35，xx．92，xxi．87），but was deserted in the time of Strabo（siii．p．605），who（p．584）mentions it among the towns of the Leleges，which were de－ stroved by Achilles．（Comp．Steph．B．s．v．חt $\delta a \sigma a$ ． Pliny（v．32）imagines that Pedasus was the same place as that which subsequently bore the name of Adranyttiuin；but as Homer distinctly places it on
the river Satniveis, the supposition is impossible

## PE'DASUS. [Methone.]

IEDIAEUS ( $\Pi \in \delta i a i o s)$, the largest river of Cy prus, rising from the eastern side of Olympus, and flowing near Salamis into the sea. (Ptol. v. 14. § 3; Eugel, Kypros, vol. i. p. 37.)

PEDIEIS (nedicis), the inhabitants of one of the Phocian towns destroyed by Xerzes. (Herod. viii. 33.) From the order in which it stands in the enumeration of Herodotus, it appears to have stood near the Cephissus, in some part of the plain between Tithorea and Elateia, and is perhaps represented by the ruins at Palé́ Fiva. (Leake, Northern Greece, vol. ii. p. 89.)

PEDNELISSUS ( $\Pi \in \delta \nu \eta \lambda, \sigma \sigma \sigma s$ ), a town in the interior of Pisidia, near the Eurymedon, above Aspendus (Strab. xii. p. 570 ; xiv. p. 667 ; Steph. B. s. v.; Ptol. v. 5. § 8.) Hierocles (p. 681), giving a greater extension to Pamphylia, assigns the town to this province. The town formed a small state by itself, but was always involved in war with the neighbouring Selge. (Polyb. v. 72, \&c.) It is also mentioned in the ecclesiastical annals and on coins. (Sestini, p. 96.) Fellows (Asia Minor, p. 196, \&c.) is inclined to identify the extensive ruins near the village of Bolcascooe with the ancient Pednelissus; these ruins, however, according to his description, bear scarcely any trace of Greek origin, but belong to the Roman period. [L. S.]
PEDO'NIA ( $\Pi \eta \delta \omega \nu i(a)$, a town on the coast of Marmarica, before which lay an island of the same name. (P'tol. iv. 5. §§ 32, 75.) This island is also inentioned by Strabo, but in some editions under the name of Sidonia (xvii. p. 799). We may, however, conclude from Ptolemy that Pedonia is the correct reading. (See Groskurd's Strabo, vol iii. p. 357.)

PEDUM (Пéסa, Steph. B.: Eth Me $\delta$ auds, Pedanus: Gallicano), an ancient city of Latium, which appears to have been at one period of considerable importance. It is mentioned by Dionysius as one of the cities which composed the league against Rome in B. c. 493; and there is no doubt that it was, in fact, one of the thirty cities of the Latin League. (Dionys. v. 61 ; Niebuhr, vol. ii. p. 17.) It is next mentioned among the cities which are said to have been taken by Coriolanus in the campaign of в. с. 488, where its name is associated with those of Labicum and Corbio. (Liv. ii. 39; Dionys. viii. 19; Plut. Coriol. 28.) Dionysius terms it at this time a small city (Ib.26); and it is remarkable that its name does not again occur during the wars of the Homans with the Aequians, notwithstanding its proximity to the frontier of the two nations. It is next mentioned in B. c. 358, when the Gauls, who had invaded Latium, encamped in its neighbourhood, where they sustained a severe defeat from the dictator C. Sulpicius. (Liv. vii. 12.) During the last great struggle of the Latins with Rome, the Pedani bear a more considerable part. Their name, indeed, is not mentioned at the first outbreak of the war, though there can be no doubt of their having taken part in it; but, in b. c. 339, Pedum became for a time the centre of hostilities, being besieged by the Ruman consul Aemilius, and defended by the allied forces assembled from Tibur, Praeneste, Velitrae, Lanuvium, and Antium. Aemilius on this occasion abandoned the enterprise; but the next year Camillus again advanced to l'edum, and, the forces of the Latins being now divided, the Tiburtines and Praenestincs alone arrived for its protection. They
were defeated in a great battle by Camillus, and the city of Pedum taken by assault immediately afterwards. (Liv. viii. 12, 13; Fast. Capit.) In the general pacification that followed the Pedani obtained the Roman franchise, but on the same terms as the Lanuvians, that is to say, without the right of the suffrage. (1b. 14.) From this time not only does the name of the people disappear from histury, but we find no subsequent mention of the town of Pedum, which appears to have rapidly fallen into decay. The "Pedanns ager," or "regio Pedana," is alluded to both by Cicero and Horace; but in Pliny's time even the "populus" had become utterly extinct, and we find no subsequent trace of the name. (Cic. ad Att. ix. 15; Hor. Ep. i. 4. 2; Plin. iii. 5. s. 9.) Hence the only clue to its position is derived from the passages already cited, and from the statement of the old scholiast on Horace (Schol. Cruq. ad l.c.) that it was situated between Tibur and Praeneste. Its proximity to those cities is distinctly attested by Livy (viii. 13), and there seems no reason to reject the opinion first advanced by Cluverius, and adopted by Gell, Nibby, and Abeken, which would place Pedum on the site of Gallicano, though we have certainly no conclusive evidence in its favour. The modern village of Gallicano, the name of which first occurs in the tenth century, in all probability eccupie; an ancient site; it stands on a narrow tongue of land projecting between two narrow ralleys or ravines with lufty and precipitons banks; but, from the peculiar nature of the country, this position almost exactly resembles that of Zagarolo and other neighbouring places. No ruins exist at Gallicano ; and from the early decay of Pedum we can hardly expect to meet with inscriptions, the only evidence that can really set the question at rest. Gallicano is $4 \frac{1}{2}$ miles from Palestrina (Praeneste), and about the same distance from La Colonna (Labicum); it is about a mile on the left of the Via Praenestina, and 19 miles from Rome. (Cluver, Ital. p. 966; Gell, Top. of Rome, p. 340 ; Nibby, lintorni, vol. ii. p. 552 ; Abeken, Mittel Jtalien. p. 77.)
[E. H. B.]
PEGAE or PAGAE (ח $\eta$ ral, Dor. Haral : Eth. nayaios), a town of Megaris, on the Alcyonian ar Coriuthian gulf. It was the harbour of Megaris on the western coast, and was the most important place in the country next to the capital. According to Strabo (viii. p. 334) it was situated on the narrowest part of the Megaric isthmus, the distance from Pagae to Nisaea being 120 stadia When the Megarians joined Athens in B. c. 455, the Athenians garrisoned l'egae, and its harbour was of service to them in sending out an expedition against the northern coast of Peloponnesus. (Thuc. i. 103, 111.) The Athenians retained possession of Pegae a short time after Megara revolted from them in b. C. 454; but, by the thirty years' truce made in the same year, they surrendered the place to the Megarians. (Thuc. i. 114, 115.) At one period of the Pelioponnesian War (b.c. 424) we tind Pegae held by the aristocratical exiles from Megara. (Thuc. iv. 66.) Pegae continued to exist till a late period, and under the Roman einperors was a place of sufticient importance to coin its own money. Strabo
 Pausanias saw there a chapel of the hero Aegialeus, who fell at Glisas in the second expedition of the Argives against Thebes, but who was buried at this place. He also saw near the ruad to Pegae, a rock covered with marks of arrows, which were suppesed to have been made by 2 body of the Persian cavairy
of Mardonius，who in the night had discharged their arrows at the rock under the impulse of Artemis， mistaking it for the enemy．In commemoration of this event，there was a brazen statue of Artemis Soteira at Pegrae．（Pans．i．44．§ 4．）Pegae is also mentioned in the following passages：－Strab．ix． pp．400，409；Pans．i．41．§8；Ptol．iii．15．§ 6； Steph．B．s．v．；Mela，iii．3．§ 10；Plin．iv．7．s．11； Hierocl．p．645；Tab．Peat．，where it is called Pache． Its site is now occapied by the port of Psatho，not far from the shore of which are found the remains of an ancient fortress．（Leake，Northern Greece，vol． ii．p．407．）

P＇EGASE＇UM STAGNUM，a small lake in the Caystrian plain near Ephesus，from which issues the little river Phyrites，a tributary of the Caystrus． （Plin．v．31．）The district surrounding the lake is at present an extensive morass．（Comp．Arundell， Seven Churches，p．23，\＆c．．）

PEIUM（ $n$ fiov），a fortress of the Tolistoboii，in Galatia，where Deiotarus kept his treasures．（Strab． xii．p．567．）

PELAGO＇NIA（He入acyovia，Strab．vii．pp．326， 327 ；Пŋ入arovia，Steph．B．），a district of Macedonia， bordering on Illyricum，occupied by the Pelagones （Heגaydyes，Strab．vii．pp．327，331，Fr．38－40， 434；Ptol．iii．13．§ 34；Plin．iv．17）．Although Livy employs the name of Pelagonia，corresponding with the fertile plains of Bioflic，in his narrative of the campaigns of Sulpicius，as that of a large district containing Stymbara，it is evident，from his account of the division of Macedonia after the Roman con－ quest，that Pelagonia became the appellation of the chief town of the Pelagones，and the capital of the Fourth Macedonia，which included all the primitive or Upper Macedonia E．of the range of Pindus and Scardus．（Liv．xlv 29．）It was perhaps not spe－ cifically employed as the name of a town until the other two cities of Pelagonia were ruined；for that Pelagonia，or a portion of it，once contained three， may be inferred from the adjunct Tripolitis， given to it by Strabo（vii．p．327）．The town，which， from the circumstance of its having been the capital of the Fourth Macedonia，must have been of some importance，existed till a late period，as it is noticed in the Synecdemus of Hierocles，and by the Byzan－ tine historian，Malchus of Philadelphia，who speaks of the strength of its citadel（ap．Const．Porph． Excerpt．de Legat p．81）．From its advantageous position it was occupied by Manuel Comnenus，in the war with Geïsa II．and the Hungarians．（Nicet． p． 67 ；Le Beau，Bas Empire，vol．xvi．p．141．）The name of Pelagonia still exists as the designation of the Greek metropolitan bishopric of Bitolia or Mo－ nastéri，now the chief place of the surrounding sountry，and the ordinary residence of the governor of Kumili．At or near the town are many ves－ tiges of ancient buildings of Roman times．The dis－ trict was exposed to invasions from the Dardani， who bordered on the N．，for which reasons the com－ munication（＂fauces Pelagoniae，＂Liv．xxxi．34） were carefully guarded by the kings of Macedonia， being of great importance，as one of the direct en－
trances from Illyricum into Macedonia by the conrse of the river Drilon．Between the NE．extremity， Mt．Ljubatrin，and the K／isura of Devol，there are in the mighty and continuous chain of Scardus （above 7000 feet high）only two passes fit for an army to cross，one near the N．extremity of the chain from Kalkandele to Prisrendi or Persserin， a very high＂col，＂not less than 5000 feet above the sea－level；the other considerably to the S ，and lower as well as easier，nearly in the latitude of $A^{\prime} k r i d h a$ ． Leake（Northern Greece，vol．iii．pp．318－322）is of opinion that the passes of Pelagonia，in which Per－ sens was stationed by his father Philip，were this latter depression in the chain over which the modern road from Scolra or Scutari runs，and the Via Egnatia travelled formerly．The Illyrian Antari－ atae and Dardani，to the N．of Pelagonia，no doubt threatened Macedonia from the former pass，to the NE．of the mountain－chain of Scardus．（Comp． Grote，Greece，c．xxv．and the references there to Pouqueville，Boué，Grisebach，and Müller．）Stym－ bara or Stubara，was situated apparently on the Erigon，as also were most of the p＇elagonian towns． Polybius（v．108）speaks of a Pelagonian town named Pissarim（ Hıббaiov）．Ptolemy（l．c．）as－ signs to the Pelagones the two towns of Andra－ ristus or Euristus（Peut．Tab．，the orthography is not quite certain），and Stobi．
［E．B．J．］
PELASGI（Me入aनүol），an ancient race，widely spread over Greece and the coasts and islands of the Aegean sea in prehistoric times．We also find traces of them in Asia Minor and Italy．

I．The Pclasgians in Greece．－The earliest men－ tion of the Pelavgi is in Homer（Il．ii．681），who enumerates several Thessalian tribes ay furnishing a contingent under the command of Achilles，and among them＂those who dwelt in Pelasgian Argos．＂ Homer also speaks of Epirus as a chief abode of the Yelasgi；for Achilles addresses Zeus as $\Delta a \quad \delta \omega v a i ̂ \epsilon$ ， Пe入açuké．（Il．xvi．233．）And this agrees with Hesiod＇s description of Dodona as the＂seat of the Pelasgi．＂（Fragm．xviii．）So in the Supplices of Aeschylus，the king declares himself to be ruler of the country through which the Algus and the Strymon flow，and also of the whole of the land of the Perrhaebi，near the Paeonians，aud the Dodonean mountains，as far as the sea．（Suppl 250，seq．）． Herodotus tells us be found traces of the Pelasgi at Dodona，where he says they worshipped all the gods， without giving a name to any（ii．52）．Compare his mythic account of the two priestesses at Dodona （ii．56）with Homer＇s description of the Selli．（Ih xvi．234，seq．）
Strabo（v．p．221，C．）says：＂Nearly all are agreed about the Pelasgi，that they were an ancient tribe （ $\varphi$ vinov）spread over the whole of Hellas，and espe－ cially by the side of the Aeolians in Thessaly．．．． And that part of Thessaly is called Pelasgian Argos， which extends from the cosst between the outlet of the Peneius and Thermopylae as far as the mountain range of Pindus，because the Pelasgians were masters of that region．＂${ }^{*}$
We also hear of the Pelasgi in Boeotia，where they dwelt for a time，after having，in conjunction with the Thracians，driven out the Aones，Temmices， Leleges and Hyantes．Afterwards they were，in their turn，driven out by the former inhabitants，and took refuge at Athens under Mt．Hymettus，part of

[^24]the city being called after their name. (Strab. ix. p. 401.) And Attic historians speak of their residence there, and say that on account of their migratory disposition they were called $\pi \in \lambda$ apyol (storks) by the Attic people. (Strab. v. p. 221.) This is the character generally giren to the Pelasgi, and it is curious to find Herodotus (i. 56) contrasting the stationary habits of the Pelasgians, with the love of wandering exhibited by the Hellenic Dorians. For even his own account of the Pelasgi disproves his general statement; since they could not have existed in so many different quarters as he assigns to them without several migrations, or-which he nowhere asserts-an almost universal extension over Greece and its dependencies. It is true that he says (ii. 56) that Hellas was formerly called Pelasgia, and Thucydides speaks (i. 3) of the name Hellas being of comparatively recent date, and of the Pelasgic name being the most prevalent among the tribes of Greece; but this does not account for the Pelasgi being found in Asia (Hom. Il. x. 429), and for their having introduced Egyptian rites into Greece. (Herod. ii. 51.) Their sojourn in Attica is related by Herodotus, who says (vi. 137) that they had a portion of ground under Mt. Hymettus assigned them as a reward for their services in building the wall of the Acropolis at Athens. From this Hecataeus said they were driven out by the Athenians from envy, because their land was the best cultivated. The Athenians, however, says Herodotus, ascribe their expulsion to their licentious conduct. Thucydides also (ii. 17) mentions the Pelasgic settlement beneath the Acropolis, and the oracle relating to it.
In the passages above quoted Herodotus speaks of the Pelasgi as of foreign extraction. In another passage (riii. 44) he tells us that the Athenians were formerly Pelasgians, and were so called, with the surname of Cranai. Thes were called successively Cecropidae, Erechtheidae and Iones.

Strabo (xiii. p. 621 ) m.entions a legend that the inhabitants of Mt. Phricion near Thermopylae made a descent upon the place where Cyme afterwards stood, and found it in the possession of Pelasgians, who had suffered from the Trojan War, but were nevertheless in possession of Larissa, which was about 70 stades from Cyme.
We find traces of the Pelasgi in several parts of the Peloponnese. Herodotus (i. 146) speaks of Arcadian Pelasgians, and (vii. 94) tells us that the Innians in Achaer were fonnerly called Pelasgian Aegialeans (or Pelasgians of the coast). After Danaus and Xuthus came to Peloponnesus, they were cailed Ionians, from Ion, son of Xuthus.
In the passage of Aeschylus before referred to (Supph. 250) Argos is called Pelasgian; the king of Argos is also called àak Пe入aन ${ }^{\omega}{ }^{\omega} \nu$ (v. 327), and throughout the play the words Argive and Pelasgian are used indiscriminately. So, too, in the Prometheus Vinctus (v. 860), Argolis is called "the Pelaspian land." In a fragment of Sophocles (Inachus) the king is addressed as lord of Argos and of the T'yrrheni Pelasgi.

Strabo (vii. p. 321) speaks of Pelasgians taking possession of part of the Peloponnese, along with other barbarous tribes, and (v. p. 221) says that Ephorus, on Hesiod's authority, traces the origin of the Pelasgi to Lycaon, son of Pelasgus, and that he declares his own opinion to be that they were originally Arcadians, who chose a military life, and, by inducing many others to join them, spread the name far and wide, both among the Greaks and wherever

PELASGI.
they happened to come. "The Arcadian divine or heroic pedigree," says Mr. Grote (Hist. Greece, vol. i. ch. ix.), "begins with Pelasgus, whom both Hesiod and Asius considered as an indigenous man, though Arcesilaus the Argeian represented him as brother of Argos and son of Zeus by Niobe, daughter of Phoroneus: this logographer wished to establish a community of origin between the Argeians and the Arcadians." For the legend concerning Lycaon, son of Pelasgus, and his fifty sons, see Grote's Greece, vol. i. p. 239, note.

According to Dionysius, Lycaon, son of Pelasgos, lived eighteen generations before the Trojan War (lib. i. p. 30, ed. Reiske); and the migration of the Oenotians under Oenotrus, son of Lycaon, in the next generation, is, in the words of Pausanias (viii. 3, quoted by Niebuhr), "the earliest colony, whether of Greeks or barbarians, whereof a recollection has been preserved."

Pausanias (viii. 2) gires the popular legend carrent among the Arcadians, that Pelasgus was the first man born there; on which he observes naïvely: "But it is likely that other men were also born with Pelasgus: for how could he have reigned without subjects? ${ }^{n}$ According to this legend Pelasgus is a regular mythic hero, surpassing all his contemporaries in stature and wisdom, and teaching them what to choose for food and what to abstain from. The use of beech-mast, which the Pythian oraclo (Herod. i. 66) ascribed to the Arcadians, was taught them by Pelasgus. His descendants became namerous after three generations, and gave their names to various districts and many towns in Greece. Pausanias also speaks of Pelasgians coming from Iolcos to Pylos, and driving out the eponymic founder (iv. 36. § 1).

Dionysius adopts the Achaean legend, viz. that the first abode of the Pelasgi was Achaic Argas There they were autochthons, and took their name from Pelasgus. Six generations afterwards they left Pelopounesus, and migrated to Haemonia, the leaders of the colony being Achaeus, and Phthius, and $\mathrm{Pe}-$ lasgus, sons of Larissa and Poseidon. These threo gave names to three districts, Achaea, Phthiotis, and Pelasgiotis. Here they abode for five generations, and in the sixth they were driven out of Thessaly by the Curetes and Leleges, who are now called Locrians and Aetolians, with whom were joined many others of the inhabitants of the district of Mt. Parnassus, led by Deucalion (i. 17. p. 46). They dispersed in different directions : some settled in Histiacotis, between Olympus and Osse; others in Boertia, Phocis, and Enboea; the unain body, however, took refuge with their kinsmen in Epirus, in the neighbourhood of Dodons (i. 18).

We now come to
II. The Pelusgians in the Islands of the Aegear. -Homer (Od. xix. 175-177) mentions the Pelasgi (called $\delta i o r$ ), as one of the five tribes in Crete, the remaining four being the Achaeans, Eteocretes, Cydones, and Dorians (called $\tau \rho \subset$ xáukes). See Strabòs comment on this passage (v. p. 221), and x. pp.475, 476), where two different explanations of the epithet т $\rho$ дхä̈кеs are given.

Herodotus (ii. 51) speaks of Pelasgi living in Samothrace, where they performed the mysteries called Samothracian orgies.

Lemnos and Imbros were also inhabited by them (v. 26). So also Strabo (v. p. 221), quoting Anticleides. Thacydides (iv. 109) speaks of the Tyrrheni Pelasgi, who occupied Lemnos; and Puusanias

PELASGI.
(vii. 2. § 2) says the Pelasgians drove out the Minyans and Lacedaemonians from Lemnos. The perpetrators of the Lemnian massacre were Pelasgians. (Herod. vi. 138-140 ; compare Pind. Pyth. Od. iv. 448 [252, Bkb.]; Orph. Arg. v. 470; Stanley, Comm. in Aesch. Choēph. 631.)

Herodotus also reckons the inhabitants of seventeen islands on the coast of Asia as belonging to the Pelasgian race (vii. 95). According to Strabo (xiii. p. 621) Menecrates declared the whole coast of Ionia, beginning at Mycale, to be peopled by Pelasgi, and the neighbouring islands likewise: "and the Lesbians say they were under the command of Pylaeus, who was called by the poet the leader of the Pelasgi, and from whom their muuntain was called Pylaeum. And the Chians say their founders were Pelasgi frem Thessaly."

Dionysius (i. 18) says that the first Pelasgian colony was led by Macar to Lesbos, after the Pelasgi had been driven out of Thessaly.

Diodorus Siculus (v. 81 ) gives a different account of this colong. He says that Xanthus, the son of Triopus, chief of the Pelasgi from Argos, settled first in Lycia, and afterwards crossed over with his followers into Lesbos, which he found unoccupied, and divided among them. This was seven generations before the flood of Deucalion. When this occurred Lesbos was desolated, and Macareus, grandson of Zeus (according to Hesiod), occupied it a second time, and the island received its name from his son-in-law. Scymnos of Chios (quoted by Kruse, Hellas) speaks of Pelasgians being in Sciathos and Scyros.

We next come to
III. The Pelasgians in Asia. - On this point we have Homer's authority that there were Pelasgians among the Trojan allies, ranked with Leleges, Caucōnes, and Lycians, and called סion. (Il. x. 429.) One of these was killed by Ajax, in the battle over the body of Patroclus,-Hippothous, son of Lethus. (IL. xvii. 288.)

Herodotus speaks (vii. 42) of Antandros as a Pelasgian city, and afterwards (vii. 95) says that the Aeolians were formerly called Pelasgians by the Hellenes, and that when they fought against the Greeks they wore Hellenic armour.

Strabo (v. p. 221) quotes Homer's statement that the neighbuurs of the Cilicians in the Troas were Pelasgians, and that they dwelt abont Larissa. (IL ii. 841.) This name probably signifies a fortress built on a precipice or overhanging rock, and is an indication, wherever it occurs, of the presence of Pelasgi. There were several places of the same name in Greece and two or three in Asia Minor, which are enumerated by Strabo (ix. p. 440, xiii. p. 620). According to this geographer most of the Carians were Leleges and Pelasgi. They first occupied the islands, then the sea-coast. He argues, from Homer's expression "the tribes of Peiascians" ( 14 ii. 840), that their number was considerable.

Diongsius (i. 18) says that the Pelasgi, on being driven out of Thessaly, crossed over intw Asia and acquired many cities on the sea-coast.

Two cities were in existence in the time of He rodotus, namely, Scylace and Placie, on the Propontis, which he believed to be Pelasgian cities, and which, be says (i. 57), spoke similar dialects, but unlike their neighbours. That dialect was, on Herodotus's tes'imony, not Greek, but resembling the dialect of the Crotoniatae, or rather Crestonians, a tribe among the Edones in Thrace.

Bishop Thirlwall, comparing this passage with
another, in which Herodotus is enumerating the dialects that prevailed among the Ionian Greeks, and uses the same terms, infers from the comparison that "the Pelasgian language which Herodotus heard on the Hell spont and elsewhere sounded to him a strange jargon; as did the dialect of Ephesus to a Milesian, and as the Bolognese does to a Florentine" (rol. i. p. 53). Mr. Grote differs from Bishop Thirlwall in his estimate of these expressions of Herodotas, who, he thinks, must have known better than any one whether a language which he heard was Greek or not, and concludes that "Herodotus pronounces the Pelasgians of his day to speak a substantive language differing from Greek; but whether differing from it in a greater or less degree (e.g. in the degree of Latin or of Phoenician), we have no means of deciding " (vol. i. pp. 351353).

Heeren (Ancient Greece, p. 38, note) has some remarks on Herodotus's opinion respecting the language spoken by the Pelasgians in his day, in which be seems to raise an imaginary difficulty that he may have the pleasure of overthrowing it.

Before quitting the coasts of the Aegean, it is necessary to quote Thucydides's observation (iv. 109), that "the Pelasgian race is said to be the most widely prevalent in the Chalcidic peninsula and in the adjoining islands;" and the legend preserved by Athenseus (xiv. p. 639), "that Thessaly was, in the time of Pelasgus, suddenly converted by an earthquake from a vast lake into a fertile plain, irrigated by the Peneius, the waters of which before had been shat in by mountains."

The latter is a poetical version of a geolngical truth, which, though not falling within the province of history, recomnends itself at once to the notice of the geographer.

## We now come to

IV. The Pelasgians in Italy.-Legendary history has connected the Pelasgic race with more than one portion: of the Italic peninsula. The name Oenotria, by which the southern part of Italy was formerly known (see Aristotle, Pol. vii. 10) suggests an affinity between the early inhabitants of that country and the Arcadian Pelasgians. The name Tyrrbeni or Tyrseni, which we have seen is used identically with that of Pelasgi, suggests another link. Innumerable legends, which furnished logographers with the sabject-matter of their discourse, connected the Umbrians, the Pencetians, and other tribes in the north of Italy and on the coast of the Adriatic with the Pelasgians from Epirus and Thessaly. Some of these are given by Strabo. He quotes Anticleides to the effect that some of the Lemnian Pelasgians crossed over into Italy with Tyrrhenus, son of Atys (v. p. 221). Again, he quotes Hieronymus's assertion, that the Thessalian Pelasgians were driven out from the neighbourhood of Larissa by the Lapithae, and took refuge in Italy (ix. p. 443).

Pausanias's account of the Pelasgian colony led by Oenotrus has already been given. Dionysius (i. 11. p. 30) confirms it, saying "Oenotrus son of Lycaon led a colony into Italy seventeen generations before the Trojan War." According to Dionysius, a colony of Pelasgians came over from Thessaly and settled among the Aborigines, with whom they waged war against the Sicels (i. 17. p. 45.)

Another body came from the neighbourhood of Dodona, whence, finding the territory unable to sup-
port them, they crossed over in ships to Italy, called Saturnia, in obedience to the oracle. The winds bore them to Spines, on one of the mouths of the Po, where they established themselves, and by the help of their floet acquired great power. They were, however, eventualiy driven out by an insurrection of the neighbouring barbarians, who were in turn overpowered by the Romans (i. 18). The Pelasgians thence migrated inland, crossed the Apennines, and entered the country of the Umbrians, who bordered on the Aborigines, and extended over a great part of Italy, being a numerons and powerful people. Here they established themselves for some time, and took some small towns from the Umbrians; but, being overpowered by them, they removed into the country of the Aborigines. When they came to Cotyle, they recognised the spot where the oracle had told them they were to offer up a sacrifice to Jupiter, Pluto, and Phoebus. On this they invited the Aborigines, who came to attack them, to join alliance with them; which invitation they, being hard pressed by the Siculi, accepted, and gave the Pelasgi Velia to dwell in. The latter then belped the Aborigines to conquer Crotona in Umbria, and to drive the Sicels out of their land. Together they founded several cities, Caere, Agylla, Pisa, Saturnium, and others, which were taken by the Tyrrhenians. Dionysius says that Phalerium and Fescennia retained in his time certain faint traces of the old Pelasgic population, especially in the weapons of war-viz. Argolic spears and shields-and the institution of fetials, and other religious rites. There was a temple of Hera at Falerium, exactly like that at Argos, where were similar sacrifices, and similar priestesses, canephori, and choruses of maidens.

The Pelasgi also occupied parts of Campania, driving out the Aurunci, and founded Larissa and other cities. Some of these remained, after undergoing many changes of inhabitants, in Dionysius's time. Of Larissa there was no memorial save the name, and this was not commonly known ; but its site was not far from Foram Popilii. (Plin. iii. 15.) They took many cities from the Sicels, ton, and established their power along the coast and inland.

The Pelasgi, having driven out the Sicels, increased in power and extent of territory. Eventually, however, they incurred the anger of the gods, and suffered various penalties at their hands. On consulting the oracle, they were told that they had neglected to perform their oaths, in not sacrificing their first-born as well as the fruits of the field. Myrsilus tells this story, adding that the Pelasgi were soon dispersed in different directions, some returning to Greece, and others remaining in Italy by the frierdly intervention of the Aborigines. They were a warlike race, and acquired great skill in naval matters from their residence with the Tyrrhenians. On this account they were often invited by other nations to serve as auxiliaries, and were called by the names Tyrrheni and Pelasgi indiscriminately (i. 18-23).

Respecting the former name he says that it was given them on account of the forts, $\tau \boldsymbol{j} \rho \sigma$ ets, which they built. Hellanicus of Lesbos says that the Tyrrheni, formerly called Pelasgi, received the name which they bear after their arrival in Italy. For the countertheory of Myrsilus see Dionys. i. 28.

Dionysius thinks all are mistaken who hold the Tyrrheni and the Pelasgi to he the same race. He thinks no argument can be drawn from the fact of their names being used indiscriminately, as that was very cummon, e.g., in the case of the Trojans and

## PELASGI.

Pbrygians. Moreover, the Greeks called ull ItaliansLatins, Umbrians, Ausones, \&ru--Tyrrhenians. Eveu Rome was helieved by many to be a Tyrrhene city. Dionysius quotes Herodotus (i. 57) in support of his opinion that the Pelasgians and Tyrrhenians are not of the same origin. It would be a wonderful thing, he says, if the Crotoniatae spoke the same dialect as the Placieni on the Hellespont, both being Pelasgians, but should not speak the same dialect as the Tyrrhenians, if they were also Pelasgi. For the contrary of the proposition-if $\delta \mu \sigma \gamma \lambda \omega \sigma \sigma o c$, then $\delta \mu o \in \theta \nu e i s-h o l d s ~ g o o d ; i . e . ~ i f ~ d \lambda \lambda o \gamma \lambda \omega \sigma \sigma \sigma o t$, then $\dot{d} \lambda \boldsymbol{\sigma} \in \theta \nu \hat{L}$ ts. If the case were reversed, there might be a show of reason for believing them of the same origin ; for it might be said that distance had obliterated early traces of resemblance : but when they are so near each other as the Crotoniatae and Tyrrheni this supposition is untenable (i. 29).

Hence Dionysius believes the Pelasgians and Tyrrhenians to be distinct. He sums up all by saying that those Pelasgians who survived the final dispersion and ruin of the race existed among the Aborigines, and their descendants helped them and other tribes to build Rome (i. 30).

It is unnecessary to remark the difference between Crotona in Umbria and Creston in Thrace, which Dionysius unsuspectingly passes over. The above somewhat lengthy extracts have been made from his Roman Antiquities, because they give ns a very fair specimen of the way in which scattered traditions were dressed up in a quasi-historical garb, and decked out with any stray evidence which local names or language might supply.

The common native tradition of the Latins only testifies to an immigration of 80 called Aborigines, not to any mixture of Pelasgi with them. On the other hand, another, which has received the testimony of Varro, and which agrees in other respects with the narration of Dionysius, speaks of an immigration of Pelasgians, but suys nothing of A borigines mixed with or allied with them. Certain Roman historians have combined these two traditions in a different way to that of Dinnysius, making the Aborigines, namely, declare themselves to be one and the same people with the Pelasgians. This, for instance is, without any doubt, the meaning of Cato's assertion that the Aborigines came over into Italy many generations before the Trojan War, out of Achaia; for so he named the old Pelasgic Greece by the common appellation of his time. (Schwegler, Römische Gesch. iii. 2.) We find the same tradition of a Pelasgic immigration into Latium confirmed by many other testimonies. Pliny declares that writing was brought into Latiom by the Pelasgi. It is a question, however, whether by these Pelasgi he means those who came out of Thessaly and Dodona, or the Arcadians of Evander.

Other traditions assert the name of Rome to be Pelasgian, and derive the Saturnalia from a feast originally instituted by the Pelasgians who settled on the Satumian hill.
" In other parts of Italy we stamble repeatedly," says Schwegler, "on the same wide-extended name. Thas, it is said that the Hernici were descended from the Pelasgi. Picenum also is said to have been occupied by the Pelasgi. Report also sars that the towns of Nuceria, Herculaneum, and Pompeii were founded by them, or that they dwelt there for a certain time. Other instances have been already given of towns and districts with which legendary history has associated the name of the Pelasgi."

In short, the whole of Italy was, if we are to believe the anthorities addured, inhabited in ancient times by the Pelasgians. In later times they appear as vassals of the Italiots; the common fute of original races that bave been subjugated.

Upon these and similar traditions Niebuhr has grounded a hypothesis, which at present is generally received, and against which conclusive objections can coly be raised from the side of comparative philolngy. According to Niebuhr, the Pelasgians were the original population, not only of Greece, but also of Italy. There was a time, be said, when the Pelasgians, formerly perhaps the most widely-spread people in Europe, inhabited all the countries from the Arnus and Padus to the Bosporas; not as wandering tribes, as the writers of history represent it, but as firmlyrooted, powerfu!, honourable people. This time lies, for the most part, before the beginning of our Grecian history. However, at the time that the genealogists and Hellanicus wrote, there were only insulated, dispersed, and scattered fragments of this immense nation, - as of the Celtic race in Spain like mountain summits, which stand out like islands when the lowlands have been changed by floods into a lake. These sporadic Pelasgic tribes did not seem to these logographers to be fragments and relics, but colonies that had been sent out and had migrated, like the equally scattered colonies of the Hellenes. Hence the numerous traditions ubout the expeditions and wanderings of the Pelasgi. All these traditions are without the slightest historical value. They are nothing but a hypothesis of the logographers, framed out of the supposition that those scattered colonies of the Pelasgi liad arisen and were proluced by a series of migrations. There is nothing historical about them, except, indeed, the fact which lies at the bottom of the hypothesis, namely, the existence in later times of scattered Pelasgic tribes,-a fact which, however, implies much more the original greatness and extension of the Pelasgic nation. If the Pelasgians vanish gradually as historical times begin, the cause of this is, that they were transformed into other nations. Thas, in Greece they became gradually Hellenised, as a nation which, in spite of all distinction, was actually related to the Hellenes; and even in Italy they form a considerable portion of the later tribes of the peninsula which owed their origin in the main to the misture of races.

The half-Greek element which the Latin language contains, is, according to this view of Niebuhr's, Pelasgic, and owes its origin to the Pelasgian portion of the Latin nation, which Niebuhr and K. O. Müller (Etrusker) agree in finding in the Siculians.

This hypothesis of Niebuhr's, generally received as it is, wants, nevertheless, a sound historical foundation. It has received at the hands of Schwegler (Röm. Gesch.) a careful examination, and is condemned on the following grounds: -

1. The absence of any indigenous name for the Pelasgians in Italy.
2. The evident traces of Roman writers on the subject having obtained their information from the Greek logographers.
3. The contradictory accounts given by different writers of the migrations of the Pelasgians, according as they follow Hellanicus and Pherecydes or Mrrsilus.
4. The absence of any historical monament of the Pelasgi in Italy, whether literary or of another kind.

PELASGI.
It only remains to make a few general observatinns on the evidence for the existence of the Pelasgi, and on the views taken by modern writers on tho subject.

1. The modern anthorities on the Pelasgi in Greece are: Larcher, Chronologie d Herodute, ch. viii. pp. 215-217; K. O. Mïller Etrusker, vol. i. Einleitung, ch. ii. pp. 75-100 ; Kruse, Hellas, vol. i. p. 398-425; Mannert. Geographie, part viii. introduction, p. 4; Thirlwall. Histiny of Greece, ch. ii.; Grote, vol. i. ch. ix., vol. ii. ch. ii. sub finem. The latter historian treats of the Pelasgi as belonging not to historical, but legendary Greece. He says, "Whoever has examined the many conflicting systems respecting the Pelasgi, - from the literal belief of Clavier, Larcher, and Raonl-Rochette, to the interpretative and half-incredulous processes applied by abler men, such as Niebuhr, or 0 . Müller, or Dr. Thirlwall, - will not be displeased with my resolution to decline so insoluble a problem. No attested facts are now present to us - none were present to Herodotus or Thucydides even in their age - on which to build trustworthy affirmations respecting the ante-Hellenic Pelasgians; and, when such is the case, we may without impropriety apply the remark of Herodotus respecting one of the theories which he had heard for explaining the inandation of the Nile by a supposed connection with the ocean - that the man who carries up his story into the invisible world, passes out of the range of criticism." (Vol. ii. p. 345.) Those who think Mr. Grote's way of disposing of the question too summary, will find it trested with great patience and a fair spirit of criticism by Bishop Thirlwall. The point on which he and Mr. Grute differ namely, the question whether the language of the Pelasgi was a rough dialect of the Hellenic, or nonHellenic - has been already referred to. As we possess no pusitive data for determining it, it is needless to do more than refer the reader to the passages quoted. Respecting the architectural remains of the Pelasgi in Greece, a very few words will suffice. The Gate of the Lions at Mycenae, mentioned by Pausanias (ii. 15-16), is the only monument of the plastic art of Greece in prehistoric times. The walls of Tiryns, of polygonal masonry, appear to be of equal antiquity, and are ascribed to the Cyclopes. [Mrcenae.] These bear a strong resemblance to the Tyrrheno-Pelasgic remains in Italy, specimens of which are given in Dempster's Etruria Regalis, v. g. the walls of Coba, Segnia (Segni) and Faesulae (Fiesole). And a small amount of eridence is thereby afforded in favour of Niebuhr's theory of an original Pelasgic population existing in the peninsulas of Greece and Italy. But this is much diminished by the fact, that similar remains are found in parts of Asia Minor where no traces exist of any Pelasgic traditions. And we are obliged therefore to fall back upon the view first adopted by A. W. Schlegel, that the peninsulas of Greece and Italy were successively peopled by branches of one original nation, dwelling once upon a time in the central part of Western Asia, and speaking one language, out of which, by successive modifications, sprang the different Greek and ltalian dialects.
2. The anthorities on the Pelasgians in Italy are Niebuhr (H. R. vol. i. p. 25, Tr.); Müller, Etrusker (quoted above) ; Lanzi, Saggio di Lingua Etrusca, ic., Flor. 1824 ; Lepsius, uiber die Tyrrhen. Pelasger in Etrwrien, Leipz. 1842; Stenb, über die

Urbewohner Rätiens，foc．，1843；Mommsen，Un－ teritalischen Dialecte， 1850 ；Prichard，Natural History of Man，vol．iii．4；Heffer，Geschichte der Latein Sprache，p．11；G．C．Lewis，Credibility of early Roman History，vol．i．p．282；and Schwe－ gler，as quoted above．

The last－mentioned historian，after a careful re－ view of all that ancient and modern authorities have said on the subject，agrees with Mr．Grote in concluding that there is no historical foundation for the commonly received traditions about the Pelasgi． He says：＂The traditional image of the Pelasgic race，everywhere driven out，nowhere settling them－ selves for good，－of the race which is everywhere and nowhere，always reappearing，and vanishing again without learing any trace，－the image of this gipsey nation is to me so strange，that we must entertain doubts as to its historic existence．＂

After they became a powerful nation in Italy，the tradition，which Dionysius follows，tells us that they suddenly dispersed．This is in itself strange；but， were any other conclusion of the Pelasgian migra－ tions invented，we should have to point out Pelas－ gians in Italy，which is impossible．Nothing re－ mains of them but a few names of places，which are manifestly Greek．Lepsius thought an inscription found at Agylla was Pelasgic，but Mommsen（Un－ terit．Dial．p．17）says it is nothing but old Etruscan．

It is not difficult to acconnt for the prevalence of traditions relating to Pelasgi in Italy．Schwegler has ably analysed the causes of this，and disproved on historical and linguistic grounds the riews of Niebuhr and O．Müller，which they set up in oppo－ sition to the Roman grammarians．

There is considerable doubt，as he remarks，in what light we are to regard the name Pelasgi，－ whether in that of an ethnographic distinction，or in that of an epithet $=$ autochthones or aborigines． We have both in Greek and Latin words resembling it sufficiently in form to warrant this supposition，－ v．g．Malaios，$\Pi a \lambda a i \chi \theta_{\infty} v$ ，and Priscus．The change from $\lambda$ to $r$ is so common as to need no illustration， and the termination－yos is nearly the same as－cus．

These remarks，though they apply with con－ siderable force to the indiscriminate use of the word Pelasgian as applied to Italian races，need not affect the statement of Herodotus concerning the townships of Scylace，Placie，and Creston，which were accounted in his time Pelasgic，and spoke a different language from their neighbours．

That the name Pelasgi once indicated an existing race we may fairly allow；but we cannot form any historical conception of a people whom Herodotus calls stationary and others migratory，and whoee ear－ liest abode was between the muuntains of Ossa and Olympus，and also in Arcadia and Argolis．On the whole we can partly appreciate Niebuhr＇s feelings when he wrote of the Pelasgi，－＂The name of this people is irksome to the historian，hating as be does that spurious philology which raises pretensions to knowledge concerning races so completely buried in silence．＂（Rom．Hist．i．p．26，Transl．）

If the Pelasgi have any claims on our attention above other extinct races，it is not because they have left more trustworthy memorials of their existence， but because they occupy so considerable a space in the mythic records of Greece and Italy．［G．B．］

PELASGIO＇TIS．［Thessalia．］
PELE（ $\Pi$ f $\lambda \eta$ ：Eth．П $\Pi \lambda a \hat{o} s$ ），a small island， forming one of a cluster，off the coast of lonia，oppo－
site to Clazomenae．（Thac．viii．31；Plin．v． 31 s．38，xxxii．2．8．9；Steph．B．8．v．；see Vol．L p． 632 ，a．）

PE＇LECAS（Пe入exâs），a mountain in Mysia， which lay between the Apian plain and the river Megistus．（Polyb．v．77．）It is probably the con－ tinuation of Mt．Temnus，separating the valley of the Aesepus from that of the Megistus．It has been remarked by Forbiger that there is a striking simi－ larity between this name and that of the woody mountain חतákos mentioned by Homer，at whose foot Thebe is said to have stood，but the position of which was subsequently unknown．（Hom．Il．vi． 397，vii．396．425，xxii．479；Strab．xiii．p．614．）

PELE＇CES．［ATTICA，p．326，a．］
PELE＇NDONES（Ie入évठoves，Ptol．ii．6．§ 54）， a Celtiberian people in Hispania Tarraconensis，be－ tween the sources of the Durius and Iberus，and situated to the E．of the Arevaci．Under the Bo－ mans they were in the jurisdiction of Clunia．They consisted of four tribes，and one of their towns was Numantia．We find also among their cities，Vison－ tium，Olibia，Varia，\＆c．（Plin．iii．3．s．4，iv． 20. s．34．）
［T．H．D．］
PELETHRONIUM（Ie入e $\theta \rho \delta v_{i o v}$ ），a part of Mt．Pelinm，whence Virgil gives the Lapithue the epithet of Pelethmnii．（Strab．vii．p． 299 ；Steph．B． e．v．：Virg．Georg．iii．115．）

PELIGNI（He入irvoi）a people of Central Italy， occupying an inland district in the heart of the Apennines．They bordered on the Marsi towards the W．，on the Samnites to the S．，the Frentani on the E．，and the Vestini to the N．Their territory was of very small extent，being confined to the valley of the Gizio，a tributary of the Aternus，of which the ancient name is nowhere recorded，and a small part of the valley of the Aternus itself along its right bank．The valley of the Gizio is one of those upland valleys at a considerable elevation above the sea，running parallel with the course of the Apen－ nines，which form 80 remarkable a feature in the configuration of the central chain of those mountains ［Apenninus］．It is separated from the Marsi and the basin of the lake Fucinus on the W．by a nar－ row and atrongly marked mountain ridge of no great elevation；while towards the S．it terminates in the lofty mountain group which connects the central ranges of the Apenvines with the great mass of the Majella．This last groap，one of the most elevated in the whole of the Apennines，attaining a height of 9100 feet above the sea，rises on the SE．frontier of the Peligni；while the Monte Morrone，a long ridge of scarcely inferior height，runs out from the point of its junction with the Majella in a NW．direction， forming a gigantic barrier，which completely shats in the Peligni on the NE．，separating them from the Frentani and Marrucini．This mountain ridge is almost continuous with that which descends from the Gran Sasso towards the SE．through the country of the Vestini，but the great mountain barrier thus formed is interrupted by a deep gorge，through which the Aternus forces its way to the sea，having turned abruptly to the NE．immediately after re－ ceiving the river Gizio［Aternus］．The secluded district of the Peligni was thus shat in on all sides by natural barriers，except towards the N．，where they met the Vestini in the valley of the Aternus．

A tradition recorded by Festus（s．v．Peligni， p．222），but on what authority we know not，repre－ sented the Peligni as of Illyrian origin；but this statement is far outweighed by the express testimony
of Ovid, that they were of Sabine descent. (Ovid, Fast. iii. 95.) The authority of the poet, himself a native of the district, is strongly contirmed by the internal probabilities of the case, there being little doubt that all these upland valleys of the Central Apennines were peopled by the Sabines, who, radiating from Amiternum as a centre, spread themselves towards the S. and E. in the same manner as they descended towards the valley of the Tiber on the W. and SW. Hence the Peligni were of kindred race with their neighbonrs, the Vestini, Marrucini, and Marsi, and this circumstance, coupled with their geographical proximity, sufficiently explains the close union which we find subsisting in historical times between the four nations. It is probable, indeed, that these four tribes formed a kind of league or confederacy among theinselves (Liv. viii. 29), though its bonds must have been somewhat lax, as we find them occasionally engaging in war or concluding peace singly, though more frequently all four would adopt the same policy.

The first mention of the Peligni in Roman history occurs in B. C. 343, when we are told that the Latins, who had been threatening war with Rome, turned their arms against the Peligni (Liv. vii. 38); but we have no account of the causes or result of the war. Soon after we find the Peligni, as well as their neighbours, the Marsi, on friendly terms with the Romans, so that they afforded a free passage to the Rornan army which was proceeding through Samnium into Campania (Liv. viii. 6); and even when their neighbours the Vestini declared themselves in favour of the Samnites, they seem to have refused to follow the example. (Id. viii. 29.) In B. c. 308, however, they joined the Marsi in their defection from Rome, and shared in their defeat by Fabius (Id. ix. 41); but a few years afterwards (B. C. 304) they were indaced to sue for peace, and obtained a treaty, apparently on favourable terms. (Ib. 45; Diod. xx. 101.) From this period they became the faithful and steadfast allies of Rome, and gave a striking proof of their zeal in в. c. 295, by attacking the Samnite army on its retreat from the great battle of Sentinum, and cutting to picces 1000 of the fugitives. (Id. x. 30.) After the subjection of Italy bs the Romans, the Peligni are seldom mentioned in history; but it is certain that they continued to furnish regularly their contingents to the Roman armies, and, notwithstanding their small numbers, occupied a distinguished position among the auxiliary troops, the Pelignian cohorts being on everal occasions mentioned with distinction. (Dionys. 1x. Fr. Didot; Ennius, Ann. viii. Fr. 6; Liv. xxv. 14, xlir. 40.) Their name is omitted by Polybius in his catalogue of the forces of the Italian allies in B. c. 225 (Yol. ii. 24), but this is probably by mere accident. During the Second Punic War they maintained unshaken their fidelity to Rome, though their territory was repcatedly ravaged by Hannibal; and besides farmishing their usual quota to the Roman armies, they were still able in B. C. 205 to raise volunteers for the armament of Scipio. (Liv. xxii. 9, xxvi. 11, xxviii. 45.) At the outbreak of the Social War, the Peligni, in conjunction with their neighbours and confederates the Marsi, were among the first to declare themselves against Rome; and the choice of their chief city, Corfinium, to be the capital of the confederates, and therefore the destined capital of Italy, had their plans proved successful, at once assigned them a prominent place among the nations arrajed against Rome. (Appian, B. C. i. 39 ; Liv.

Epit. Lxxii; Oros. v. 18; Vell. Pat. ii. 16; Diod. xxxvii. 2.) The choice of Corfinium was probably determined by its strength as a fortress, as well as by its central position in regard to the northern confederates; at a later period of the war it was abandoned by the allies, who transferred their senate and capital to Aesernia. (Diod. l.c.) The name of the Peligni is not often mentioned during the war, though it is certain that they continued to take an active part in it throughout, and it is probable that they were almost uniformly associated with the Marsi. But in b. c. 90 we are told that they sustained a severe defeat by Ser. Sulpicius Galba (Liv. Epit. lxxiii.); and before the close of the following year they were received to sulmission, together with the Marrucini and Vestini, by Cn. Pompeius Strabo, B. c. 88. (Liv. Epit. lxxvi.) It is certain that the Peligni, as well as their neighbours, were at this time, or very soon after, admitted to the Roman franchise, for the sake of which they had originally engaged in the war: they were enrolled in the Sergian tribe, together with the Marsi and Sabines. (Cic. in Vatin. 15; Schol. Bob. ad loc.) The Peligni again figure in the history of the Civil War between Caesar and Yompey, в. c. 49, when their chief town, Corfinium, was occupied by Domitius Ahenobarbus with twenty cohorts, which he had raised for the most part among the Marsi and Peligni, and with which he at first checked the advance of Caesar; but the rapid spread of disaffection among his own troops quickly compelled him to surrender. (Caes. B. C. i. 15-23.) Sulmo, which had been also garrisoned by Domitius, vielded without resistance to Caesar. (Ib. 17.) The Peligni, in common with the other mountain tribes, seem to have retained to a considerable extent their national character and feeling, long after they had become merged in the condition of Boman citizens, and as late as the civil war between Vespasian and Vitellius (A. D. 69) they are mentioned as declaring themselves, as a people, in favour of the former. (Tac. Hist. iii. 59.) This is the last notice of them which occurs in history; but they are described by all the geographers as a distinct people, retaining their separate nationality. (Strab. v. p. 241 ; Plin. iii. 12. s. 17; Ptol. iii. 1. § 64.) For administrative purposes they were included in the Fourth Region of Augustus (Plin. l.c.): and in the later division of this part of Italy, their territory was comprised, together with that of the Marsi, in the province called Valeria. (Lib. Colon. p. 228). It now forms a part of the province of Abruzzo Ulteriore.

The position of the Peligni, surrounded on all sides by the luftiest ranges of the Apennines, while the valley of the Gizio itself is at a considerable elevation above the sea, naturally rendered the climate one of the coldest in Italy. Horace uses the expression "Peligna frigora," as one almost proverbial for extreme cold; and Ovid, who was a native of Sulmo, repeatedly alludes to the cold and wintry climate of his native district. (Hor. Carm. iii. 19. 8; Ovid, Fast. iv. 81, 685, Trist. ir. 9.) On the other hand, it derived from the same cause the advantage of being watered by numerous and perennial streams, fed by the snows of the neighbouring mountains, where they are said to linger throughout the summer. (Ovid, Amor. ii. 16, Fast. iv. 685.) The broad valley of the Gizio was, however, sufficiently fertile; it produced considerable quantities of corn, and wine in abundance, though not of superior quality, and a fow sheltered spots would even admit
of the growth of olives．（Ovid，Amor．ii．16．6，7； Martial，i．27．5，siii．121．）Of the character of the Peligni，we know only that they were esteemed as rivalling in bravery their neighbours the Marsi （Plin．iii．12．s．17；Cic．in Vatin．15；Sil．Ital． viii．510），and that from their secluded position they always retained the primitive simplicity of their habits．From an expression of Horace it would appear also that they shared with the Marsi the reputation of skill in magical incantations．（Hor． Epod．17．60．）

The Peligni had only three principal towns，Cor－ finium，Sulmo，and Superafquum，of which the two first only are known historically，and were doubtless much the most important places．But Pliny notices all three in his list of towns；and the same names are found also in the Liber Coloniarum． （Plin．L．c．；Lib．Colon．pp．228，229．）Hence these are obviously the three alluded to by Ovid， when he calls his native town of Sulmo＂Peligni pars tertia ruris＂（Amor．ii．16）；and it thus ap－ pears there were no other places in the district which enjoyed municipal rank and had a territory of their own．Cuculum，mentioned only by Strabo （v．p．241）as situated to the right of the Via Valeria，is evidently the modern Cocullo，and must have been in the territory of the Peligni，but was pribably an insignificant place．Statular，known only from the Tabula as a station on the Via Valeria， 7 miles from Corfinium，on the E．of the Mons Imeus，must have been situated at or near the vil－ lage of Goriano．

The territory of the Peligni must always have been an important point in regard to the communi－ cations of the different nations of Central Italy．On the one side a natural pass，now known as the Forca Caruso，called in the Tabula the Mons Imeus， connected the basin of the Gizio and lower valley of the Aternus with the land of the Marsi and basin of the lake Fucinus；on the other the remarkable pass or gorge through which the Aternus forces its way just below Popoli，afforded a natural outlet， through which these upland valleys had a direct communication with the sea．These two passes，in conjunction with that which led from the basin of the Fucinus to Carseoli，formed a natural line of way from Rome and the Tyrrhenian sea to the Adriatic，which was undoubtedly frequented long before the Romans subdued the several nations through which it passed，and ages before the Via Valeria was laid down as an artificial road．That highway，indeed，was not continued through the land of the Peligni，and thence to the sea，until the reign of the emperor Claudius［Cerfennia］．In the other direction also the valley of the Gizio， opening into that of the Aternus，affurded direct means of communication with Reate，Interamna，and the valley of the Tiber，while at its southern ex－ tremity a practicable puss led through the beart of the Apennines into the valley of the Sagrus，and thus opened a direct line of communication with the interior of Samnium．The importance of this line of route，as well as the easly period at which it was frequented，is shown by the circumstance that it was followed by the luman armies in B．c．340， when the Samnites，as well as the Marsi and Peligni， were friendly，and the revolt of the Latins cut off their natural line of march into Campania（Liv． viii．6．）

This line of road，as given in the Tabula，led from Corfinium by Sulmo to Aufidena，and thence
to Aesernia and Venafrum．At the distance of 7 miles from Sulmo that itinerary places a station called＂Jovis Larene，＂evidently the site of a temple， on the lighest part of the pass．The spot is still called Campo di Giove，and it is probable that the true reading is＂Jovis Paleni，＂the adjoining moun－ tain being still called Monte di Palena，and a village or small town at the foot of it bearing the sane name．（Cluver，Ital．p．759；Holsten．Not．ad Cluver．p．145；Romanelli，vol．iii．p．165．）It thas appears that the ancient road followed a more cir－ cuitous but easier line than the modern highroad， and thus avoided the passage of the Piano di Cinque Miglia，an upland valley at the highest part of the pass，much dreaded in winter and spring on ac－ count of the terrific storms of wind and snow to which it is subject．（Craven＇s $\Delta b r u z x i$ ，vol．ii．pp 45－50．）
［E．H．B．］

## PELINAEUS．［Chios．］

PELINNA，more commonly PELINNAELM （Hé入ıva，Steph．B．s．v．；Plin．iv．8．s． 15 ；Me－ גıvaiov，Scylax，p． 25 ；Pind．Pyth．x． 4 ；Strab． ix．p．437；Arrian，Anab．i． 7 ；Liv．xxxvi．10； Пe入nvaior on coins，Eckhel，vol．ii．p． 146 ：Eth． Meגurvaios），a town of Thessaly，in the district Histiaeotis，a little above the left bank of the Peneins．（Strab．l．c．）It seems to have been a place of some importance even in the time of Pindar （l．c．）．Alexander the Great passed through the town in his rapid march from Illyria to Boeotia． （Arrian，Lc．）It did not revolt from the Mace－ donians together with the other Thessalians after the death of Alexander the Great．（Diod．xviii．11．） In the war between Antiochus and the Romans， B．c．191，Pelinnaeum was occupied by the Atha－ manians，but was soon afterwards recovered by the Romans．（Liv．xxxvi．10，14．）There are con－ siderable remains of Pelinnseum at Old Kardkiki or Gardhiki．＂The city occupied the face of a rocky height，together with a large quadrangular space at the foot of it on the soutb．The southern wall is more than half a mile in length，and the whole circumference near three miles．＂（Leake， Northern Greece，vol．iv．p．288．）

PE＇LIUM（né入入ıov，Arrian，Anab．i．5；Пń入ıov， Quadratus，ap．Steph．B．8．v．；Liv．xxxi．40），a town of the Dassaretii，on the Macedonian frontier， and commanding the pass which led into that country．From its situation it was a place of con－ siderable importance，and was attacked by Alex－ ander on his return from the expedition against the Getae，in the war against the two Illyrian kiugs Cleitus and Glancias．On the defeat of the Illyrians Cleitus set the town on fire．According to Arrian （l．c．），Pelium was situated at the foot of a woody mountain，and close to a narrow defile through which the Eordaicus flowed，leaving in one part space only for four shields abreast，a description which corresponds so exactly with the pass of Tzan－ gon，or Klisira of Deról，both as to the river，and breadth of one part of the pass，that the identity can hardly be questioned．Pelium will then be either Pliussa or Porjomi，but the former has the preference by its name，which seems to be a vulgar sounding of $\Pi_{\eta \lambda i a \sigma \sigma a . ~(L e a k e, ~ N o r t h e r n ~ G r e e c e, ~}^{\text {I }}$ vol．iii．p．323．）The consul Sulpicius，in his first campaign against Pbilip（Liv．L．c．），crossed from Eordaea，or Sarighioli，which he had ravaged over part of the plain of Grevená，and through Anaselitioa to Kastoria，whence he diverged to Pelium，which he occupied，leaving a strong garrison in it，as it
was an advantageous post for making excursions into the eneny＇s territory．［E．B．J．］

PE＇LIUM（ $\Pi$ ji入1ov），a lofty mountain in Thessaly， extending along the coast of Magnesia．It rises to the south of Osse，and the last falls of the two mountains are connected by a low ridge．（Herod． vii．129．）It forms a chain of some extent，stretch－ ing from Mt．Ossa to the extremity of Magnesia， where it terminates in the promontories of Sepias and Aeantium．It attains its greatest height above lolcos．According to Ovid it is lower than Ossa （Fast．iii．441），which Dodwell describes as about 5000 feet high．In form it has a broad and ex－ tended outline，and is well contrasted with the steeply conical shape of Ossa．On its eastern side Mt．Pelium rises almost precipitously from the sea；and its rocky and inhospitable shore （axrd̀ d入iucvos Пiniov，Eurip．Alc．595）proved fatal to the fleet of Xerxes．（Leake，Northern Greece， vol．iv．p．384．）Mt．Pelium is still covered with ve－ nerable forests，to which frequent allusion is made in the ancient poets．Homer constantly gives it the epithet of civoбiфu入入ov（II．ii．744，\＆c．）．Its northern summit is clothed with oaks，and its eastern side abounds with chestnuts；besides which there are forests of beeches，elms，and pines．（Dicaearch． lescript．Mont．Pel．in Geogr．Graec．Min．p．106， ed．Paris， 1855 ；Ov．Fast．v． 381 ；Valer．Flacc． ii．6．）

Mt．Pelium is celebrated in mythology．It plays an important part in the war of the giaits and the gods：since the giants are said to have piled Ossa upon Pelium，in order to scale Olympus．It has been observed that this part of the fable is well explained by the respective forms of Ossa and Pelium．As Pe － lium is viewed from the south，two summits are seen at a considerable distance from each other，－a con－ carity between them，bat so slight as almost to give the effect of a table－mountain，upon which fiction might readily suppose that another hill of the conical form of Ossa should recline．（Holland，Tra－ rels，vol．ii．p．96．）Mt．Pelium was said to be the residence of the Centaurs，and more especially of Cheiron，the instructor of Achilles，a legend to which the number of medicinal plants found on the mountain perhaps gave rise．（Dicaearch．l．c．；Hom． Il．ii．743，xvi． 143 ；Pind．Pyth．ii．83，iii． 7 ； Virg．Georg．iii．92．）

According to Dicaearchus（l．c．），the cave of Cheiron and a temple of Leus Actacus occupied the summit of the mountain．The same writer relates that it was the custom of the sons of the principal citizens of Demetrias，selected by the priest，to ascend every year to this temple，clothed with thick skins，on account of the cold．Between the two summits of Mit．Pelium there is a fine cavern，now conmonly known by the name of the cave of Achilies． and which accords with the position of the cave of Cheiron，mentioned by Dicaearchus．The same writer likewise speaks of two rivers of Mt．Pelium， called Crausindon and Brychon．One of them is now named Zervolhia，and falls into the gulf between Nekhơri and St．George．（Leake，Northern Greece，vol．iv．p．384，seq．）Lastly，Pelium was connected with the tale of the Argonauts， since the timber of which their ship was built was cut down in the forests of this mountain．The nurth－western summit of Mt．Pelium is now named Thessidhi；but the mountain is frequently called Zayorá，from the town of this name immediately below the summit on the eustern side．（Leake，l．c．；

Mézières，Mémoire sur le Pélion et l＇Ossa，Paris， 1853．）

PELLA（ $\Pi$ é $\lambda \lambda a$, Herod．vii． 123 ；Thuc．ii．99， 100；Strab．vii．pp．320，323，330，Fr．22， 23 ； Ptol．iii．13．§ 39，viii．12．§ 8；Plin．iv．17；Itin． Anton．；Itin．Hierosol．；Peut．Tab．；חf́ $\lambda \lambda \eta$ ， Hierocles），the capital of Macedonia．At the time when Xerxes passed through Macedon，Pella，which Herodotus（l．c．）calls a modixyiov，was in the hands of the Bottiaeans．Philip was the first to make Pella，which Amyntas had been obliged to evacuate（Xen．Hellen v．2．§ 13 ；comp．Diodor． xiv．92，xv．19），a place of importance（Dem．de Cor．p．247），and fixed the royal residence there： there was a navigation from the sea by the Lydias， though the marshes，which was 120 stadia in length， exclusive of the Lydias．（Scyl．p．26．）These marshes were called Borboros（Bop6opos），as ap－ pears from an epigram（Theocrit．Chius，ap．Phut． de Exil．vol．viii．p．380，ed．Reiske），in which Ari－ stotle is reproached for preferring a residence near thern to that of the Academy．Archestratus（ap． Athen．vii．p．328，a．）related that the lake pro－ duced a fish called＂chromis，＂of great size，and particularly fat in summer．From its position on a hill surrounded by waters，the metropolis of Philip， and the birthplace of Alexander（Juv．x．168； Lucan，x．20），soon grew into a considerable city． Had Alexander not been estranged from Macedonia， it would probably have attained greater importance． Antipater lived there as regent of Macedonia，but Cassander spent less of his time at Pella，than at Thessalonica and Cassandreis；from the time of Antigonus Gonatas till that of Perseus，a poriod of nearly a century，Pella remained the capital，and was a splendid town．（Liv．xxvi．25，xxxrii．7，xYi． 41，51，67，x liii．43，xliv．10．）Livy（xliv．46）has left the following description，derived undoubtedly from Polybius，of the construction of the city towards the lake．＂Pellu stands upon a height sloping to the SW．，and is bounded by marshes which are impassable both in winter and summer， and are caused by the overflowing of a lake．The citadel＂（the word＂arx＂is wanting in our copies of Livy，but seems absolutely necessary both to the sense and the grammar）＂rises like an island from the part of the marsh nearest to the city，being built upon an immense embankment，which defies all injury from the waters；though appearing at a distance to be united to the wall of the city，it is in reality separated from it by a wet ditch，over which there is a bridge，so that no access whatever is afforded to an enemy，nor can any prisoner whom the king may confine in the castle escape，but by the easily guarded bridge．In the fortress was the royal treasure．＂It was surrendered to Aemilius Paullus （Liv．xiv．45），and became，accurding to Strabo （p．323）and the Itineraries，a station on the Egnatian Way，and a coluny．（Plin．Lc．）Dion Cbrysostomus（Orat．Tars．Prior．vol．ii．p．12，ed． Reiske）says that Pella was a heap of ruins；but from the fact that there are coins of the colony of Pella，ranging from Hadrian to Philip，this must be an exaggeration．The name of the city is found as late as the sixth century of our era，as it occurs in Hierocles．It would seem indeed as if the name had survived the ruins of the city，and had reverted to the fountain，to which it was originally attached； as at a small distance from the village named Neokhóri or Yenikiuy，which has been identified with a portion of the ancient Pella，there is a spring
called by the Bulgarians Pel，and by the Greeks Пé $\lambda \lambda \eta$ ．Below the fountain，are some remains of buildings，said to have been baths，and still called Td Lourpd．These baths are alluded to by the comic poet Machon（ap．Athen．viii．p．348，e．）as producing biliary complaints．Although little re－ mains of Pella，a clear idea may be formed of its extent and general plan by means of the description in Livy，compared with the existing traces，con－ sisting mainly of＂tumuli．＂The circumference of the ancient city has been estimated at about 3 miles．The sources of the fountains，of which tbere are two，were probably about the centre of the site； and the modern road may possibly be in the exact line of a main street which traverses it from E．to W． The temple of Minerva Alcidemus is the only public building mentioned in history（Liv．xiii．51），but of its situation nothing at present is known．Felix Beau－ jour，who was consul－general at Saloniki（Tableau du Commerce de la Grece，vol．i．p．87），asserted that he saw the remains of a port，and of a canal communicating with the sea．Leake（Northern Greece，vol．iii．pp．261－266），who carefully went over the ground，could find no traces of a port，of which indeed there is no mention in ancient history： remains of a canal could be seen，as he was told，in suminer．

An antonomous coin of Pella has the type of an ox feeding，which explains what Steph．B．（s．©．； comp．Ulpian，ad．Dem．de Fals．Leg．）reports，that it was formerly called Bouvouos．（Eckhel，vol．ii．p．73； Sestini，Mon．I＇et p．37．）

## COIN OF PELLA IN MACEDONIA

PELLA（ $\bar{t} \neq \lambda \lambda a$ ：Eth．Пe入入aîos）．1．A city of Palestine，and one of the towns of Decapolis in the l＇eraea，being the most northerly place in the latter district．（Plin．v．18．s． 16 ；Joseph．B．J．iii． 3．§ 3．）Stephanus B．（s．v．）calls it a city of Cocle－Syria and Ptolemy（v．15．§ 23）aleo de－ scribes it as a city of Decapolis in Coele－Syria． Stephanus adds that it was also called Butis（ì Boüris），which appellation seems to be preserved in its modern name El－Bulsche．Its name Pella shows that it was either built or colonised by the Mace－ donians．Pliny describes it as abounding in springs （＂aquis divitem，＂Plin．l．c．）．It was taken by An－ tiochus the Great（Polyb．v．70），and was afterwards destroyed by Alexander Jannaeus，because its inha－ bitants would not accept the Jewish religion（Joseph． Ant．xiii． 15 （23）．§ 3，B．J．i．4．§ 8）；but it was afterwards restored by Pompey．（Joseph．Ant．xiv． 4 （7）．§4．）Pella was the place to which the Christians of Jerusalem fled before the destruction of the latter city．（Euseb．H．E．iii． 5 ；Epiphan． de Mens．et Ponder．p．171；Reland，Palaestina， p．924．）

2．A town of Syria，on the Orontes，better known under the name of Apameia．［Apameia，No．1．］

PELLA＇NA or l＇ELLE＇NE（ì חé入入ava，Paus． iii．20．§ 2；тd̀ Пéллаעа，Strab．viii．p．386；П€ $\lambda$－ גívn，Xen．IHell．vii．5．§ 9；Polyb．iv．81，xvi． 37 ； Plut．Agis，8），a tuwn of Laconia，on the Eurotas，
and on the road from Sparta to Arcadia It was said to have been the residence of Tyndareos，when he was expelled from Sparta，and was subsequently the frontier－fortress of Sparta on the Eurotas，as Sellasia was on the Oenus．Polybius describes it （iv．81）as one of the cities of the Laconian Tripolis， the other two being probably Carystus and Bele－ mina．It had ceased to be a town in the time of Pausanias，but he noticed there a temple of Asclepias， and two fountains，named Pellanis and Larceia Below Pellana，was the Charucoma（Xapdксرа），a fortification or wall in the narrow part of the vallev； and near the town was the ditch，which according to the law of Agis，was to separate the lots of the Spartans from those of the Perioci．（Plut．Lc．）

Paussnias says that Pellina was 100 stadia from Belemina；but he does not specify its distance from Sparta，nor on which bank of the river it stood．It was probably on the left bank of the river at Mt． Burlia，which is distant 55 stadia from Sparta，and 100 from Mt．Khelmus，the site of Belemina．Mt． Burlici has two peaked summits，on each of which stands a chapel；and the bank of the river，which is only separated from the mountain by a narrow meadow，is supported for the length of 200 yards by an Hellenic wall．Some copious sources issue from the foot of the rocks，and from a stream which joins the river at the southern end of the meadow， where the wall ends．There are still traces of an aqueduct，which appears to have carried the waters of these fountains to Sparta．The acropolis of Pellana may have occupied one of the summits of the mountain，but there are no traces of antiquity in either of the chapels．（Leake，Morea，vol．iii．p．13， seq．；Boblaye，Récherches，g＇c．p．76；Ross，Reisen im Peloponnes，p． 191 ；Curtius，Peloponnesos，vol． ii．p．255．）
PELLE＇NE．1．（Пe $\lambda \lambda h \nu \eta$ ，Dor．Пe $\lambda \lambda d \nu a, ~ \Pi e \lambda-$ $\lambda i \nu a$, Steph．B．s．v．：Eth．$\Pi \in \lambda \lambda \eta \nu \in u ́ s$, Pellenensis，Liv． xxxiv． 29 ；Pellenaeus，Plin．iv． 6 ：Tzerkori，nr．Zu－ grí），a town of Achaia，and the most easterly of the twelve Achaean cities，whose territory bordered upun that of Sicyon on the E．and upon that of Aegeira on the W．Pellene was situated 60 stadia from the sea， upon a strongly fortified hill，the summit of which mee into an inaccessible peak，dividing the city into two parts．Its name was derived by the inhabitants themselves from the giant Pallas，and by the Argives froun the Argive Pellen，a son of Phorbas．（Hermi． i． 145 ；Pol．ii． 41 ；Strab．viii．p． 386 ；Paus，vii． 26. §§ 12－14；Apoll．Rhod．i．176．）Pellene was a city of great antiquity．It is mentioned in the Homeric catalogue；and according to a tradition， preserved by Thucydides，the inhabitants of Scione in the peninsula of Pallene in Macedonia professed to be descended from the Achaean Pallenians，who were driven on the Macedonian coast．on their return from Tros．（Hom．IL ii．574；Thuc．iv．1\％0．）At the commencement of the Peloponnesian War，Pellene was the only one of the Achaean towns which espoused the Spartan cause，though the other states afterwards followed their example．（Thuc．ii．9．） In the time of Alexander the Great，Pellene fell under the dominion of one of its citizens of the name of Chaeron，a distinguished athlete，who raised him－ self to the tyranny by Alexander＇s assistance．（Paus， vii．27．§7．）In the wars which followed the re－esta－ blishment of the Achaean League，Pellene was several times taken and re－taken by the contending parties．（Pol．ii．52，iv．8， 13 ；Plut．Cleom．17， Arat．31，32．）The buildings of Pellene are de－

PELODES．
scribed by Pausanias（vii．27）．Of these，the nost important were a temple of Athena，with a statue of the goddess，said to have been one of the earlier works of Pheidias；a temple of Dionysus Lampter， in whose honour a festival，Lampteria，was cele－ brated；a temple of Apollo Theosenius，to whom a festival，Theoxenia，was celebrated；a gymnasium， \＆cc．Sixty stadia from the city was the Mysaeum （Mútasov），a temple of the Mysian Demeter；and near it a temple of Asclepius，called Cyrus（Kîpos）： at both of these places there were copious springs． The ruins of Pellene are situated at Zugra，and are now called Tzerkoti．The two temples of Mysaeum and Cyrus are placed by Leake at Trikkala，SE．of the ancient city．（Leake，Morea，vol．iii．p．215， Peliponnesiaca，p． 391. ）

Between Aegium and Pellene，there was a village also called Pellene，celebrated for the manufacture of a particular kind of cloaks，which were given as prizes in the agonistic contests in the city．（Strab． viii．p．386；Pind．Ol．ix．146，with Schol．；Aristoph． Av．1421，with Schol．；Hesych．and Phot．s．v． Пeגлприкаl $\chi^{\lambda a i ̀ v a u .) ~ K . ~ O . ~ M u ̈ l l e r ~(D o r . ~ v o l . ~ i i . ~}$ p．430），however，questions this second Pellene：he supposes that Strabo is describing Pellene as both citadel and village，and he corrects the text，кeitac be perakì Airiov kal Ku入入hinns，instead of Пe入－ $\lambda$ hons；but the context renders this conjecture im－ probable．

The harbour of Pellene was called Aristonautar （Apıotovaîtal），and was distant 60 stadia from Pellene，and 120 from Aegeira．It is said to bave been so called from the Argonants having landed there in the course of their voyage．（Paus．vii． 26. § 14，ii．12．§ 2．）It was probably on the site of the modern Kamári．（Leake，Morea，vol．iii．p．384．） A little to the E．，near the coast，was the fortress Olciracs（＇Oגoupos），dependent upon Pellene；Leake places it at Xylo－castro．It would thus have stood at the entrance of the gorge leading from the mari－ time plain into the territory of Pellene，and would have been a pasition of great importance to the safety of that district．（Xen．Hell．vii．14．§§ 17， 18 ；Plin．iv．6；Mel．iii． 3 ；Steph．B．s．v．；Leake， vol．iii．p．224．）Near Aristonautae was Gonussa or Gonoessa（Гovóe $\sigma \sigma \alpha$ ），to which Homer gires the epithet of lofty（aixetvh）．According to Pau－ sanias its proper name was Donussa（ $\Delta o \nu o v i \sigma \sigma a)$ ， which was changed by Peisistratus into Gonoeissa， when he collected the poems of Homer．Pausanias says that it was a fortress belonging to the Sicy－ onians，and lay between Aegeira and Pellene；but from its pasition we may infer that it was at one time dependent upon Pellene．Leake places it at Koryfi，the lofty mountain，at the fout of which is Kamari，the ancient Aristonautae．（Hom．Il．ii． 573 ；Paus．vii．26．§ 13 ；Leake，vol．iii．p．385．）
2．A town in Laconia．［Pellana．］

COIN OF PELLENE．

## PELODES PORTUS．［Buthrotum．］

PE＇LOPIS I＇NSULAE，nine small islands lying off Methana，on the Argolic coast．（Paus．ii． 34. § 3．）They must be the islands lying between Epidaurus and Aegina，of which Pityonnesus（An－

PELORUS．
571
ghistri）is the largest．（Plin．iv．12．s．20；Leake， Morea，vol．ii．p．455．）

PELOPONNE＇SUS．［Graecta．］
PELO＇RUS，PELO＇RIS，or PELO＇RIAS（חé $\lambda a p o s$
akpa，Ptol．；Пeגapls，Thuc．，Dion．Per．；Me入aplds， Pol．，Strab．：Capo di Faro），a celebrated promontory of Sicily，forming the NE．extremity of the whole island，and one of the three promontories which were considered to give to it the triangular form from which it derived the name of Trinacria（Pol．i．42； Strab．vi．pp．265，266；Diod．v．2；Plin．iii．8．s．14； Dion．Per．467－472；Ovid．Met．xiii．727．）It was at the same time the point which projected furthest towards the opposite coast of Italy；so that the narrowest part of the Sicilian straits was that which lay between Cape Pelorus and the coast ad－ joining the headland of Caenys（Punta del Pezzo）on the coast of Bruttium．［Caenys．］A strange story is told by some Ruman writers that it derived its name from the pilot of Hannibal，who was put to death by that general from a suspicion of treachery； thus overlooking the fact that it was known by that name to the Greeks for centuries before the time of Hannibal．（Mel．ii．7．§ 17 ；Val．Max．ix．8．§ 1 ； Sallust，ap．Serv．ad Aen．iii．411．）The actual headland of Pelorus，now called the Capo del Furo， is a low，sandy point；but about 2 miles from its ex－ tremity there begins a ridge of hills which quickly rises into a range of mountains，of no great elevation， but steep and strongly marked．These continue in an unbroken range at the back of Messina，near which they attain a height of about 3000 feet，and flank the east coast of the island as far as the neigh－ bourhood of Taormina，where they turn abruptly to the W．and stretch across in that direction without any real interruption，till they join the more lofty group of the Monte Madonia．It is to this range of mountains that the name of Mons Neptunius is applied by Solinus（ $5 . \S$ 12），and which that author describes as separating the Tyrrhenian and Adriatic（i．e．Sicilisn）seas．But there is no real geographical line of separation between these moun－ tains and those further W．，which were known to the ancients as the Mons Nebronss．

The headland of Pelorus may thus be looked upon as the extremity of a great mountain promontory， formed by the range of the Mons Neptunius，and extending from the neighbourhood of Messina to that of Milazzo（Mylae），or，in a still wider sense， from Tauromenium on the E．coast to Tyudaris on the N．Diodorus calls it 100 stadia from the pro－ montory to Messana，and the distance is still com－ monly reckoned 12 miles，though it does not really exceed 8．（Diod．xiv．56．）

From its proximity to Messana and its position commanding the passage of the straits，Pelorus was an important naval station，and as such its name is frequently mentioned in history．Thus，in r．c．425， when the Athenian fleet under Laches was established at Rhegium，the Syracusans and their allies took post with their fleet at Pelorus，where they were sup－ ported also by a land force．（Thuc．iv．25．）In B．c． 396 the Carthaginian general Himilco took post at Pelurus with his fleet and army，and，when the Messanians sallied out to attack him，by taking ad－ vantage of a north wind，sent his fleet down sudd $\cdot$ nly to Dlessana，which was surprised and taken before the troops could return to its defence．（Diod．siv． 56，57．）Again，during the siege of Messana by the Carthaginians at the commencement of the First Punic War，it was at Pelorus that their fleet was
stationed, with the view both of threatening the city and preventing the Romans from crossing the straits. (Pol. i. 11.) And at a later period, during the contest between Octavian and Sextus Pompey in the neighbourhood of Messana, the headland of Pelorus once more became an important post, being one of the points sedulously guarded by Pompey in order to prevent his adversary from effecting a landing. (Appian, B. C. v. 105, 116.)

The actual promontory of Pelorus, as already mentioned, is a low spit or point of sand, about 2 miles in length, which has evidently been thrown up by the currents, which flow with great rapidity through the straits. (Symth's Sicily, p. 109.) A tradition, reported by Diodorus, but as ancient as the time of Hesiod, represented it as an artificial work constructed by the giant Orion. (Diod. iv. 85.) Within this sandy point, between the beach and the hills, are enclosed two small lakes or pouls which are famous for pruducing the best eels and cockles in Sicily (Smyth, l. c. p. 106),-a reputation they already enjoyed in ancient times, as the "cockles of Pelorus" are repeatedly noticed by Athenaeus; and Solinus, who mentions the lakes in question, speaks of them as abounding in fish. There appear to have been three of them in his day, but the marvels which he relates of one of them are purely fabulous. (Athen. i. p. 4. c., iii. p. 92. f.; Solin. 5. §§ 2-4.) A temple of Neptune stoud in ancient times upon the promontory, as well as a lighthouse or Pharos, the memory of which is retained in the modern name of Punta del Faro, by which the cape is still known. This appellation seems to have indeed come into use before the close of the Roman Empire, as Servius, in describing the width of the Sicilian strait, measures it "a Columna usque ad Pharon." (Serv. ad Aen. iii. 411.) But no remains of either building are now visible.
[E. H. B.]
PELO'RUS ( $\Pi$ é $\mathrm{\lambda}$ apos), a small river of Iberia, in Asia, probably a tributary of the Cyrus. (Dion Cass. xxxvii. 2; comp. Groskurd's Strab. vol. ii. p. 375.)

PELSO (Aur. Vict. de Caes. 40) or PEISO (Plin. iii. 27), a considerable lake in the north of Pannonia. A large portion of it was drained by the emperor Galerius, who conducted its waters into the Danube, and thus reclaimed large tracts of land, which formed an important addition to the province. (Aur. Vict. l.c.) The modern name of this lake is Plattensee: during rainy seasons it still overflows its banks far and wide, and forms cxtensive marshes, which are probably the very districts that were drained by Galerius. Lake Pelso is mentioned under different modifications of this name, such as Lacas Pelsodis (Jornand. Get. 52, 53) and Pelsois (Geogr. Rav. iv. 19), while in the middle ages it was called Pelissa. Muchar (Noric. i. p. 3, \&c.) regards Peiso and Pelso as two lakes, placing the former, with Pliny, near the Deserta Boiorum, and identifying it with the Neusicallersee, while he admits the Pelso to be the Plattensee. This hypothesis, however, can hardly be sustained, as it is pretty certain that the Neusiedlersee did not exist in the times of the Romans, but was formed at a later period. (Comp. Scheonwisner, Antiquitates et Historia Sabariae, p. 17, \&cc.; Liechtenberg, Geogr. des Oester. Kaiserstaates, vol. iii. p. 1245, \&c.)
[L.S.]
 considerable town of Phrygia, was situated, according to Xenophon (Anab. i. 2. § 10), at a dis-
tance of 10 parasangs from Celaenae, at the head of the river Maeander. Xenophon describes it as a populous city, and states that the army of Cyrus remained there three days, during which games and sacrifices were performed. The Penting. Table, where the name is erroneously written Pella, places it, quite in accordance with Xenophon, 26 miles from Apamea Cibotus, to the conventus of which Peltae belonged. (Plin. v. 29; comp. Ptol. v. 2. § 25; Steph. B. s. v.) Strabo (xii. p. 576) mentions Peltae among the smaller towns of Phrygia, and the Notitiae name it among the episcopal cities of Phrygia Pacatiana. The district in which the town was situated derived from it the name of the
 xiii. p. 629). Kiepert (ap. Franz, Fünf. Inschriftem, p. 36) fixes the site of Peltae at the place where Mr. Hamilton found ruins of an ancient city, about 8 miles south of Sandakli (Journal of the Roy. Geogr. Society, viii. p. 144); while Hamilton himself (Researches, ii. p. 203) thinks that it must have been situated more to the south-west, near the modern Ishekli. But this latter hypothesis seems to place it too far west.
[L.S.]
PELTUI'NUM (Eth. Peltuinas, -ătis: Ansedonia), a considerable town of the Vestini, and one of the four ascribed to that people by Pliny (iii. 12. s. 17). Its name is not found in Ptolemy or the Itineraries, but its municipal importance is attested by various inscriptions. One of these confirms the fact mentioned by Pliny, that the Aufinates were closely connected with, or dependent on, Peltuinum, apparently the more important place of the two. We learn from the Liber Coloniarum (p. 229) that it attained the rank of a colony, probably under Augustus: but at a later period, as we learn from an inscription of the date of A. D. 242, it was ie duced to the condition of a Praefectura, though it seems to hare been still a flourishing town. (Orell. Inscr. no. 4036 ; Zumpt, de Coloniis, p. 359, not.) Its site was unknown to Cluverius, but can be fixed with certainty at a spot called Ansedonia, between the villages of Castel Nuovo and Prata, about 14 miles SE. of Aquila, on the road from thence to Popoli. The ancient name is retained by a neighbouring church, called in ecelesiastical documents S. Paolo a Peltuino. A considerable part if the circuit of the ancient walls is still visible, with remains of various public buildings, and the ruins of an amphitheatre of reticulated work. (Giovenazzi, Aveia, p. 119; Romanclli, vol. iii. pp. 264-268; Orelli, Inscr. 106, 3961, 3981). [E. H. B.]

PELVA, a town of Dalmatia, which the Antonine Itinerary places on the road from Sirmiam to Sislonae. Schafarik (Slav. AlL. vol. i. pp. 60, 247) identifies it with Plewa, a place in Bosnia, with a river of the same name, of which Pelva is the Latinised form.
[E. B. J.]
PELU'SIUM (П $\eta \lambda o b \sigma r o v, ~ P t o l . ~ i v . ~ 5 . ~ § ~ 11, ~ v i i i . ~$ 15. § 11 ; Steph. B. 8. v.; Strab. xvii. p. 802, seq.: Eth. П $\eta \lambda o v \sigma i \omega ́ \tau \eta s$, П $\eta \lambda o \sigma \sigma$ cos), was a city of Lower Aegypt, situated upon the easternmost bank of the Nile, the Ostium Pelusiacum, to which it gare its name. It was the Sin of the Hebrew Scriptures (Ezek. xxx. 15); and this word, as well as its Aegyptian appellation, Peremoun or Peromi, and its Greek ( $\pi \dagger$ inos) import the city of the ooze or mud (omi, Coptic, mud), Pelusium lying between the seaboard and the Deltaic marshes, about two and a half miles from the sea. The Ostium Pelusiacum was choaked bs sand as early as the first century b. C ,
and the coast-line has now advanced far beyond its ancient limits, so that the city, even in the third century A. D., was at least four miles from the Mediterranean. The principal produce of the neighbouring lands was flax, and the linum Pelusiacum (Plin. xix. 1. \& 3) was both abundant and of a very fine quality. It was, however, as a borderfortress on the frontier, as the key of Aegypt as regarded Syria and the sea, and as a place of great strength, that Pelusium was most remarkable. From its position it was directly exposed to attack by the invaders of Aegypt; several important battles were fonght under its walls, and it wns often besieged and taken. The following are the most memorable events in the history of Pelusium:

1. Sennacherib, king of Assyria, в. c. 720-715, in the reign of Setlins the Aethiopian (25th dynasty) adranced from Palestine by the way of Libna and Lachish upon Pelusium, but retired without fighting from before its walls (lsaiah, xxxi. 8; Herod. ii. 141 ; Strab. xiii. p. 604). His retreat was ascribed to the favour of Hephaestos towards Sethos, his priest. In the night, while the Assyrians slept, a howt of field-mice gnawed the bow-strings and shield-straps of the Assyriuns, who fled, and many of them were slain in their flight by the Aegyptians. Herodotus saw in the temple of Hephaestos at Memphis, a record of this victory of the Aegyptians, viz. a statue of Sethos holding a mouse in his hand. The story probably rests on the fact that in the symbolism of Aegypt the mouse implied destruction. (Comp. Horapoll. Hieroglyph. i. 50; Aelian, H. An. vi. 41.)
2. The decisive battle which transferred the thmone of the Pharaohs to Cambyses, king of the MedoPersians, was fought near Pelusium in b. c. 525. The fields around were strewed with the bones of the combatants when Herodotus visited Lower Aegypt; and the skulls of the Aegyptians were distinguishable from those of the Persians by their superior hardness, a fact confirmed by the mummies, and which the historian ascribes to the Aegyptians shaving their heads from infancy, and to the Persians covering them up with folds of cloth or linen. (Herod. ii. 10, seq.) As Cambyses advanced at once to Memphis, Pelusium probably surrendered itself immediately after the battle. (Polyaen. Stratag. vii. 9.)
3. In B. c. 373, Phamabazus, satrap of Phrygis, and Iphicrates, the commander of the Athenian armament, appeared before Pelusinm, but retired without attacking it, Nectanebus, king of Aegypt, baring added to its former defences by laying the neighbouring lands under water, and blocking up the navigable channels of the Nile by embankments. (Diodor. xv. 42 ; Nepos, Iphicr. c. 5.)
4. Pelusium was attacked and taken by the Persians, B. c. 309. The city contained at the time a garrison of 5000 Greek mercenaries under the command of Philophron. At first, owing to the rashness of the Thebans in the Pervian service, the defendants had the advantage. But the Aegyptian king Nectanebus hastily venturing on a pitched battle, his troops were cut to pieces, and Pelusium surrendered to the Theban general Lacrates on honourable conditions. (Diodor. xvi. 43.)
5. In b. c. 333, Pelusium opened its gates to Alexander the Great, who placed a garrison in it under the command of one of those officers entitled "Companions of the King." (Arrian, Exp. Alex. iii. 1, seq. ; Quint. Curt. iv. 33.)
6. In B. c. 173, Antiochus Epiphanes atterly
defeated the troops of Ptolemy Philometor under the walls of Pelusium, which he took and retained after he had retired from the rest of Aegypt. (Polyb. Legat. § 82 ; Hieronym. in Daniel. xi.; On the fall of the Syrian kingdom, however, if not carlier, Pelusium had been restored to its rightful owners, since
7. In B. c. 55, it belonged to Aegypt, and Marcus Antonius, as general of the horse to the Roman proconsul Gabinius, defeated the Aegyptian army, and made himself master of the city. Ptolemy Auletes, in whose bebalf the Romans invaded Aegypt at this time, wished to put the Pelusians to the sword; but his intention was thwarted by Antonius. (Plut. Anton. c. 3; Val. Max. ix. 1.)
8. In b. c. 31, immediately after his victory at Actium, Augustus appeared before Pelusium, and was admitted by its governor Seleucus within its walls.

Of the six military roads formed or adopted by the Romans in Aegypt, the following are mentioned in the Itinerarium of Antoninus as connected with Pelusium: -

1. From Memphis to Pelusium. This road joined the great road from Pselcis in Nubia at Babylon, nearly opposite Memphis, and coincided with it as far as Scenae Veterimorum. The two roads, viz. that from Pselcis to Scenae Veteranorum, which turned off to the east at Heliopolis, and that from Memplis to Pelusium, connected the latter city with the capital of Lower Aegypt, Trajan's canal, and Arsinue, or Suez, on the Sinus Heroopolites.
2. From Acca to Alexandreia, ran along the Mediterranean sea from Raphia to Pelusium.

Pelasium suffered greatly from the Persian invasion of Aegypt in A. D. 501 (Eutychii, Annal.), but it offered a protracted, though, in the end, an ineffectual resistance to the arms of Ainrou, the son of Asi, in A. D. 618. As on former occasions, the surrender of the key of the Delta, was nearly equivalent to the subjugation of Aegypt itself. The khalifs, however, neglected the harbours of their new conquest generally, and from this epoch Pelusium, which had been long on the decline, now almust disappears from history. Its ruins, which have no particular interest, are found at Tineh, near Dannietta. (Champollion, l'Eyypte, vol. ii. p. 82 : Dénon, Descript. de [Egypte, vol. i. p. 208, iii. p. 306.)
[W. B. D.]

cons of pelusium.
PEME (It. Ant. p. 156), probably the same as the Pempte (П'́ $\mu \pi \tau \eta$ ) of Stephanus B. (s. v.), a town of Aegypt, in the Heptanomis, 20 miles above Memphis, on the left bark of the Nile, now called Bembe. In the old editions of Pliny (v. 29. s. 35) we fird a place called Pemma, belonging to the Nomads dwelling on the borders of Aegypt and Aethiopia; but Sillig, instead of "Cysten, Pemmum, Gadagalen," reads "Cysten. Macadygalen."

PENEIUS. 1. The chief river of Thossaly. [Thessalia.]
2. The chief river of Elis. [Elis.]

PENESTAE, in Thessaly. See Lict.of Antiq. s. v.
PENESTAE, a people of Illyricum, who appeas
to have possessed a large tract of mountainous country to the N. of the Dassaretac, and extending to the E. as far as the frontier of Macedonia, while on the W. and NW. it almost reached to the Labeates and the dominions of Gentius. (Liv. xliii. 20, 21, 22. 23, 25, xliv. 11.) The principal city of this warlike tribe was Uscana ; besides which they had the two fortresses of Draudacum and Oarneum.
[E. B. J.]
PENIEL or PENUFL (i. a. "Face of God," Elzos $\Theta \in o i ̃, ~ L X X$.$) , a place beyond Jordan, where$ Jacob wrestled with the angel (Gen xxxii. 30), and where a town was afterwards founded by the tribe of Gad. (Judges, viii. 8.)

PE'NIUS, a small river of Colchis, falling into the Euxine, on which stood a town of the same name. (Plin. iv. 4; Ov. ex Punt. iv. 10. 47.)

PENNELOCUS, in the Antonine Itin., and PENNOLCCOS in the Peutinger Table, is a place in Gallia in the country of the Nantuates, between Viviscus (Vevay) and Tarnaju (St. Maurice). In the Itins. the distance of Pennelocus from Viviscus is marked viii.; but it is uncertain whether they are Roman miles or Gallic leagues. It is generally assumed that Villencure at the eastern end of the Lake of Geneva is the site of Pennelocus, but the distance from Vevay does not agree. D'Anville found in some old maps a place called Penne on the direction of the road, but the position of Penne does not agree with the distances in the Itins. Pennelocus was in the Vallis Pennina or the Valais.
[G.L.]
PENNI'NAE ALPES. [AlIES, p. 108, a.]
PENNOCRUCIUM, a town in the territory of the Cornavii, in Britannia Romana, sometimes identified with Penkridge in Staffordshive, but more probably Strettom. (Itim Ant. p. 470 ; Camden, p. 636.)
[T. H. D.]
PENTADEMI'TAE (Пеvтаঠŋлīтau), a tribe of Teuthrania in Mysia, which is mentioned only by Ptolemy (v. 2. § 15).
[L. S.]
PENTA'POLIS. [Cyrenaica.]
PENTEDA'CTYLOS (Plin. vi. 29. s. 34 ; Пevтaठdктилоу סpos, Ptol. iv. 5. § 25), a mountain in Egypt, on the Arabian Gulf, S. of Berenice.

PE'NTELE. [AtTics, p. 327, a.]
PENTELEIUM (ПєvTé $\boldsymbol{\epsilon} \epsilon \frac{10 \nu) \text {, a fortress near }}{}$ Pheneus, in the north of Arcadia, situated upon a mountain of the same name. For details see Pheneus.

PENTELICUS MONS. [ATTICA, pp. 322, a., 323, b.]

PENTRI (Hévtpoo), a tribe of the Samnites, and apparently one of the most important of the subdivisions of that nation. Their capital city was Bovianum (Liv. ix. 31), in the very heart of the Samnite territory, and it is therefore probable that they occupied the whole of that rugged and mountainous district which extends from the frontiers of Latium, in the valley of the Liris, to those of the Frentani, towards the Adriatic. But it is impossible to determine their exact limits, or to separate their history from that of the remaining Samnites. It is probable, indeed, that, throughout the long wars of the Romans with the Samnites, the Pentri were the leading tribe of the latter penple, and always took part in the war, whether specified or not. The only occasion when we hear of their separating themselves from the rest of their countrymen, is during the Second Punic War, when we are told that all the other Samnites, except the Pentri, declared in favour of Hannibal after the battle of Cannae, B.c. 216.
(Liv. xxii. 61.) This is the last sccasion on which we find their name in history; all trace of the distinction between them and the other Samnites seems to have been subsequently lost, and their name is not even mentioned by Strabo or Pliny. The geographical account of their country is given under the article Samnium.
[E. H. B.]
PEOR ( $\Phi o \gamma \omega \rho$, LXX.), a mountain in the land of Moab. (Numb. xxiii. 28.) It is placed by Eusebins (s. v. 'Apaßì $\theta$ Mad́b) between Livias and Esbus, over against Jericho.

## PEOS ARTE'IIDOS. [Spros Artemidor.]

PEPARE'THUS ( $\Pi \epsilon \pi \alpha \rho \eta \theta o s: ~ E t h . ~ \Pi \epsilon \pi a p h \theta i o s), ~$ an island in the Aegaean sea, lying off the coast of Thessaly, to the east of Halonnesus. Pliny dexcribes it as 9 miles in circuit, and says that it was formerly called Evoenus (iv. 12. 8. 23). It was said to have been colonised by some Cretans under the command of Staphylus. (Scymn. Ch. 579; Hom. Hymm. Apoll. 32.) Peparethus was an island of some importance, as appears from its frequent mention in history, and from its possessing three towns (tplaodes, Scylax, p. 23), one of which bore the same name as the island. (Strab. ix. p. 436.) The town suffered from an earthquake in the Peloponnesian War, B.c. 426. (Thuc. iii. 89.) It was attacked by Alexander of Pherae (Diod. xv. 95), and the island was laid waste by Philip, because the inhabitants, at the instigation of the Athenians, had taken possession of Halonnesus. (Dem. de Cor. p. 248, Epist. Phil. p. 162.) In B. c. 207, Philip sent a garrison to the city of Peparethus, to defend it against the Romans (Liv. xxviii. 5); but he destroyed it in B. C. 200, that it might not fall into the hands of the latter. (Liv. xxxi. 28.) Peparethus was celebrated in antiquity for its wine (Athen. i. p. 29; Heracl. Pont. Fragm. 13; Plin. xiv. 7. 8. 9) and oil. (Ov. Met. vii. 470.) Diocles, the earliest Greek historian who wrote upon the foundation of Rome, was a native of Peparethus. [See Dict. of Biogr. Vol. I. p. 1010.] Peparethus is now called Khilidhromia, and still produces wine, which finds a good market on the mainland. (Leake, Northern Greece, vol. iii. p. 112.)

PEPERINE (Hexepiv $\eta$ ), an island off the SW. coast of India, which undoubtedly derived its name from producing pepper. (Ptol. vii. 1. § 95.)

PEPHNUS ( $\Pi \epsilon \not \subset \nu o s$, Paus.; Пєфขóv, Steph. B.), a town of Laconia, on the eastern coast of the Messenian gulf, distant 20 stadia from Thalamae. In front of it was an island of the same name, which Pausanias describes as not larger than a great rock, in which stood, in the open air, brazen statues of the Dioscuri, a foot high. There was a tradition, that the Dioscuri were born in this island. The island is at the mouth of the river Milea. which is the minor Pamisus of Strabo (viii. p. 361). In the island, there are two ancient tombs, which are called those of the Dioscuri. The Messenians said that their territories originally extended as far as Pephnus. [Messkini, p. 345,a.] (Paus. iii. 26. §§ 2, 3; Gell, Itiner. of the Morea, p. 238; Lcake, Morea, vol. i. p. 330, Peloponnesiaca. p. 178 ; Boblaye, Récherches, fic. p. 93 ; Curtius, Peloponnesos, vol. ii. pp. 283, 284.)

PEPU'ZA (nénousa), a town in the western part of Phrygia, which is mentioned only by late writers. It gave its name to an obscure body of heretics noticed by Epiphanius (Haeres. xlviii. 14) : but they did not exist long, since their town was ruined and deserted when be wrote. (Comp. Philostorg.

PERAEA.
Hist. Ecel. iv. 8, where it is called Petusa; Aristaen. Comm in Can. 8, where its name is 1ezusa.) Kiepert (ap. Franz, Fünf. Inschriften, p. 33) believes that its site may possibly be marked by the ruins found by Arundell (Liscoveries in As. Min. i. pp 101, 127) near Besh-Shehr and Kalinkef. in the sonth of Ushak.

PERAEA (Hepala), the name of several districts lying beyond (mépav) a river or on the other side of a sea.

1. The district of Palestine lying beyond the Jordan, and more particularly the country between the Jurdan on the W., the city of Pella on the N., the city of Philadelphia and Arabia Petraea on the E., and the land of the Moabites on the S. [PALiestina, p. 532.]
2. ('H тヘ̂y 'Poठlan тepala, Strab. xiv. pp. 651, 652 ; Pulyb. xvii. 2, 6, 8 , xxxi. 25; Liv. xxxii. 33,
 Scylax, p. 38), a portion of the S. coast of Caria, opposite to Rhodes, and suhject to it. It commenced at Mt. Phoenix, and extended as far as the frontiers of Lycia (Strab. l.c.) The peninsula containing Mt. Phoenix was called the Rhodian Chersonesus. (Plin. xxxi. 2, 20; Diod. v. 60, 62.) For a description of this district, which is very beautiful and fertile, see Vol. I. pp. 519., b, 520, a.
3. (Пepaía Tevedion, Strab. xiii. p. 596), a small district on the coast of Mysia, opposite to Tenedus, and extending from the promontory Sigeium to Alexandria Troas.

PERAEA. [Cornnthus, p. 685, b.]
PERAETHEIS. [Megalopolis, p. 310, a.]
PERCELANA (Itin Ant. p. 432), a town of Hispania Baetica, lying S. of Merida For its coins see Sestini, p. 107. [T. H. D.]
 cient town of Mysia, on the Hellespont, between Abydis and Lampsacus, and probably on the little river Percotes. (Hom. Il. ii. 835, xi. 229 ; Xenoph. Hellen. v. 1. § 23.) Percote continued to exist long after the Trojan War, as it is spoken of by Herodotus (v. 117), Scylax ( p 35), Apollonius Rhodius (i. 932), Arrian (Anab. i. 13), Pliny (v. 32), and Stephanas Byz. (e.v.). Some writers mention it among the towns assigned to Themistocles by the king of Persia (Plut. Them. 30; Athen. i. p. 29.) According to Strabo (xiii. p. 590) its ancient name had been Percope. Blodern travellers are unanimous in identifying its site with Bergaz or Bergan, a small Turkish town on the left bank of a small river, situated on a sloping hill in a charming district. (Sibthorpe's Journal, in Walpole's Turkey, i p. 91 ; Richter, Wallfahrten, p. 434.) [L. S.]
PERCO'TES ( $\Pi$ epкcótทs), a small river of Mybia, flowing from Mount Ida into the Hellespont. (Hom. J ii. 835.) It is easily identified as the stream flowing in the valley of the modern town of Bergaz. [Comp. Percute.]

PERIICES, a town in Mauretania Caesariensis, 25 M. P. from Sitifis, perhaps Ras-el-Ouad. (It. Ant. pp. 29, 36; Coll. Episc. c. 121.)

PERGA. [Perge.]
PE'RGAMUM. [ILIUM.]
 Pergamenus), sometimes also called PERGAMUS (Ptol. v. 2. § 14, viii. 17. § 10 ; Steph. B. s. v.), an ancient city, in a most beautiful district of Teuthrania in Mysia, on the north of the river Cailcus. Near the point where Pergamum was situated, two oher rivers, the Selinus and Cetius, emptied them-

PERGAMUM.
selves into the Caicus; the Selinus flowed through the city itself, while the Cetius washed its walis. (Strab. xiii. p. 619; Plin. v. 33; Paus. vi. 16. § 1 ; Liv. xxxvii. 18.) Its distance from the sea was 120 stadia, but communication with the sea was effected by the navigable river Caicus. Pergamum, which is first mentioned by Xenophon ( $A n a b$. vii. 8 . § 8), was originally a fortress of considerable natural strength, being situated on the summit of a conical hill, round the foot of which there were at that time no houses. Subsequently, however, a city arose at the foot of the hill, and the latter then became the acropolis. We have no information as to the foundation of the original town on the hill, but the Pergamenians believed themselves to be the descendants of Arcadians, who had migrated to Asia under the leadership of the Heracleid Telephus (Paus. i. 4. § 5); they derived the name of their town from Pergamus, a son of Pyrrhus, who was believed to have arrived there with his mother Andromache, and, after a successful combat with Arius, the ruler of Teuthrania, to have established himself there. (Paus. i. 11. § 2.) Another tradition stated that Asclepius, with a colony from Epidaurus, proceeded to Pergamum; at all events, the place seems to bave been inhabited by many Grreks at the time when Xenophon visited it. Still, however, Pergamum remained a place of not much importance until the time of Lysimachus, one of the generals of Alexander the Great. This Lysimachus chose Pergamum as a place of security for the reception and preservation of his treasures, which amounted to 9000 talents. The care and superintendence of this treasure was intrusted to Philetaerus of Tium, an eunnch from his infancy, and a person in whom Lysimachus placed the greatest confidence. For a time l'hiletaerus answered the expectations of Lysimachus, but having been ill-treated by Arsinoï, the wife of his master, he withdrew his allegiance and declared himself independent, в. c. 283. As Lysimachus was prevented by domestic calamities from punishing the offender, Philetaerus remained in undisturbed possession of the town and treasures for twenty yenrs, contriving by dexterous management to maintain peace with his neighbours. He transmitted his principality to a nephew of the name of Eumenes, who increased the territory he had inherited, and even gained a victory over Antiochus, the son of Seleucus, in the neighbourhood of Sardes. After a reign of twenty-two years, from B.c. 263 to 241 , he was succeeded by his cousin Attalus, who, after a great victory over the Galatians, assumed the title of king, and distinguished himself by his talents and sound policy. (Strab. xiii. pp. 623, 624; Polyb. xviii. 24; Liv. xxxiii. 21.) He esponsed the interests of Rome against Philip of Macedonia, and in conjunction with the Rhodian fleet rendered important services to the Romans. It was mainly this Attalus that amassed the wealth for which his name became proverbial. He died at an advanced age, in B. c. 197, and was succeeded by his son Eumenes II., from B.C. 197 to 159. He continued his friendship with the Romans, and ussisted them aqainst Antiochus the Great and Perseus of Macedonia; after the defeat of Antiochus, the Romans rewarded his services by giving to him all the countries in Asia Minor west of Mount Taarus. Pergamum, the territory of which had hitherto not extended beyond the gulfs of Elaea and Adramyttium, now became a large and powerful kingdom. (Strab. l.c.; Liv. uxxviii. 39.) Eumenes III. was nearly killed at

## PERGE.

Delphi by assassins said to have been hired by Persens; yet at a later period he favoured the cause of the Macedonian king, and therehy incurred the ill-will of the Romans. Pergamum was mainly indebted to Eumenes II. for its ombellishment and extension. Ho was a liberal patron of the arts and sciences; he decorated the temple of Zeus Nicephorus, which had been built by Attalus ontside the city, with walks and plantations, and erected himself many other public buildings; but the greatest monument of his liberality was the great library which he founded, and which yielded only to that of Alexandria in extent and value. (Strab. Lc.; Athen. i. p. 3.) He was succeeded by his son Attalus II.; but the government was carried on by the late king's brother Attalus, surnamed Philadelphus, from R.c. 159 to 138. During this period the Pergamenians again assisted the Romans against the Psendo-Philip. Attalus also defeated Diegylis, king of the Thracian Caeni, and overthrew Prasias of Bithynia. On his death, his ward and nephew, Attalus III., surnamed Philometor, undertook the reins of gorernment, from B. C. 138 to 133, and on his death bequeathed his kingdom to the Romans. Soon after, Aristonicus, a natural son of Eumenes II., revolted and claimed the kingdom of Pergamum for himself; bat in B. O. 130 he was vanquished and taken prisoner, and the kingdom of Pergamam became a Roinan province under the name of Asia (Strab. L c., xiv. p. 646.) The city of Pergamam, however, continued to flourish and prosper under the Roman dominion, so that Pliny ( $k$ c.) could still call it "longe clarissimum Asiae Pergamam;" it remained the centre of jurisdiction for the district, and of commerce, as all the main-roads of Western Asia converged there. Pergamam was one of the Seven Churches mentioned in the book of Revelations. Under the Byzantine emperors the greatness and prosperity of the city declined; but it still exists under the name of Bergamah, and presents to the visitor numerous ruins and extensive remains of its ancient magnificence. A wall facing the south-east of the acropolis, of hewn granite, is at least 100 feet deep, and engrafted into the rock; above it a course of large sabstructions forms a spacious area, apon which once rose a temple unrivalled in sublimity of situation, being visible from the vast plain and the Aegean sea. The ruins of this temple show that it was built in the noblest style. Besides this there are ruins of an ancient temple of Aesculapius, which, like the Nicephorion, was outside the city (Tac. Ann. iii. 63; Paus. v. 13. § 2); of a royal palace, which was surrounded by a wall, and connected with the Caïcus by an aqueduct; of a prytaneum, a theatre, a gymnasium, a stadium, an amphitheatre, and other public buildings. All these remains attest the unusual splendour of the ancient city, and all travellers speat with admiration of their stupendous greatness. The numerous coins which we possess of Pergamum attest that Olympia were cclebrated there; a vase found there represents a torch-race on horseback; and Pliny (x. 25) relates that public cock-fights took place there every year. Pergamum was celebrated for its manufacture of ointments (Athen. xv. p. 689), pottery (Plin. xxxv. 46), and parchment, which derives its name (charta Pergamena) from the city. The library of Pergamum, which is said to have consisted of no less than 200,000 volumes, was given by Antony to Cleopatra. (Comp. Spon and Wheler, Voy. i. p. 260, \&c.; Choiseal-Gouffier, Voyage Pittoresque, ii. p. 25, \&cc.;

Arundell, Seven Churches, p. 281, \&cc. ; Dallaway. Constantinople Anc. and Modern, p. 303; Leake, Asia Minor, p. 266; Fellows, Asia Minor, p. 34, \&c. ; Richter, Wallfahrlem, p. 488,\&c.; Eckhel, Doctr. Num. vol. iv., p. 445; A. G. Capelle, Commentat. de Regibus et Antiquit. Pergamenis, Amstelodami, 1842, 8vo.)
[L. S.]

## COLN OF PERGAMUS LN MYSIA.

PE'RGAMUS (חéprapos, Herod. vii. 112), a fortress in the Pieric hollow, by which Xerzes passed in his march, leaving Mt. Pangaeum on his right. It is identified with Právista, where the lower maritime ridge forms a junction with Pangaeum, and separates the Pieric valley from the plain of Philippi. (Leake, Northern Greece, vol. iii. p.178.) [E. B.J.]

PE'RGAMUS (IIéprapos), a town of Crete, to which a mythical origin was ascribed. According to Virgil it was founded by Aeneas (Acn. iii. 133), according to Velleius Paterculus (i. 1) by Agamemnon, and according to Servius by the Trojan prisoners belonging to the fleet of Agamemnon (ad Virg. Aen. Lc.). Lycargus, the Spartan legislator, was said to have died at this place, and his tomb was shown there in the time of Aristoxenus. (Plut. Lyc. 32.) It is said by Servius ( $l$ c.) to have been near Cydonia, and is mentioned by Pliny (iv. 12. s. 20) in connection with Cydonia. Consequently it must have been situated in the western part of the island, and is placed by Pashley at Platania. (Travels in Crete, vol. ii. p. 23.) Scylax says (p. 18, Huds.) that the Dictynnaenm stood in the territory of Pergamus.

PERGA'NTIUM ( $\Pi$ ep ${ }^{\prime}$ deviov: Eth. Пepydurios, Steph. B. s. v.), a city of the Ligures. It is the small island named Breganeon, on the south coast of France. It is separated by a narrow channel from a point on the mainland which is turned towards Mese, one of the Stoechades or Isles d Hières. [G. L.]
PERGE or PERGA (חépp川: Eth. Mepraios), an ancient and important city of Pamphylia, between the rivers Catarrhactes and Cestrus, at a distance of 60 stadia from the mouth of the latter. (Strab. xiv. p. 667 ; Plin. v. 26; Pomp. Mel. i. 14 ; Ptol. v. 5. § 7.) It was renowned for the worship of Artemis, whose temple stood on a hill outside the town, and in whose honour annual festivals were celebrated. (Strab. l. c.; Callim. Hymm in Dian 187; Scylax, p. 39; Dionys. Per. 854.) The coins of Perge represent both the godders and her temple. Alexander the Great occupied Perge with a part of his army after quitting Phaselis, between which two towns the road is described as long and difficult (Arrian, Anab. i. 26; comp. Polyb. v. 72, xxii. 25;

COIN OF PERGR.

## PERIMULA.

Liv. xxxviii. 37.) We learn from the Acts of the Apostles (xiv. 24, 25) that Paul and Barnabas preached the gospel at Perge. (Comp. Acts, xiii. 13.) In the ecclesiastical notices and in Hierocles (p. 679) Perge appears as the metropolis of Pamphylia. (Comp. Steph. B. s. v.; Eckhel, Doctr. Nuar. i. 3, p. 12.) There are considerable ruins of Perge about 16 miles to the north-east of Adalia, at a place now called Eski-Kalesi. (Comp. Leake, Asia Minor, p. 132; Texier, Descript. de l'Asie Min., where the ruins are figured in 19 plates; Fellows, Asia Minor, p. 190, \&c.)
[L. S.]
PERIMU'LA (Пєрí оида, Ptol. vii. 2. § 5), the name of a town of some commercial importance on the W. side of the Sinus Magnus (or gulf of Siam), on a tongue of land anciently called the Aurea Chersonesus, and now known by the name of Ma. lacca. Lassen places it in lat. $7^{\circ} \mathrm{N}$. In its immediate neighbourhood was a small bay or indentation of the coast, which was called the Sinus Perimnlicus

PERIMU'LICUS SINUS. [PERimula.]
PERINTHUS ( $\grave{\eta}$ Hépı $\nu \theta o s$, Ptol. iii. 11. § 6, viii. 11. § 7 ; Xenoph. Anab. vii. 2. § 8 : Eth. Mepineios), a great and flourishing town of Thrace, situated on the Propontis. It lay 22 miles W. of Selymbria, on a small peninsula (Plin. iv. 18) of the bay which bears its name, and was built like an amphitheatre, on the declivity of a hill (Diod. xvi. 76.) It was originally a Samian colony (Marcian, p. 29 ; Plut. Qu. Gr. 56), and, according to Syncellus (p. 238), was founded about B. c. 599. Panofka, however (p. 22), makes it contemporary with Samothrace, that is about B. c. 1000 . It was particularly renowned for its obstinate defence against Philip of Macedon (Diod. xvi. 74-77; Plut. Phoc. 14). At that time it appears to have been a more important and flourishing town even than Byzantium; and being both a harbour and a point at which several main roads met, it was the seat of an extensive commerce (Procop. de Aed. iv. 9). This circumstance explains the reason why so many of its coins are still extant ; from which we learn that large and celebrated festivals were held here (Mionnet, i. p. 399415 ; Eckbel, Doctr. Num. vol. iv. p. 445 ; Morell. Spec. Rei Num, tab. xiii. 143). According to Tzetzes (Chil. iii. 812), it bore at an early period the name of Mygdonia; and at a later one, but not before the fourth century of our era, it assumed the name of Heracleia; which we find sometimes used alone. and sometimes with the additions H . Thraciae and H. Perinthus. (Procop. l.c. and B. Vand. i. 12; Zosim. i. 62 ; Justin, xvi. 3 ; Eutrop. ix. 15 ; Amm. Marc. xxii. 2; Itin. Ant. pp. 175, 176, 323 ; Jorn. de Regn. Succ. p. 51, \&cc. On the variations in its name, see Tzschucke, ad Melam, ii. 2, vol. iii. pt. ii. p. 102, seq.) Justinian restored the old imperial palace, and the aqueducts of the city. (Procop. l.c.) It is now called Eski Eregli, and still con-

COLS OF PERINTHUS.
tains some ancient ruins and inscriptions. (See Clarke's Trarels, viii. p. 122, sqq.) [T. H. D.]

PERISADYES (Пepıбaסvє́s, Пєрı $\alpha \dot{d} \iota \epsilon s$ ), an Illyrian people, near the silver mines of Danastium, whose name seems to be corrupt. (Strab. vii. p. 326 . Kramer and Groskurd, ad loc.)

PERITUR, a place in Lower Pannonia (Itin. Hieros. p. 562), probably the same as the one mentioned in the Peuting. Table under the name of Piretis, and in the Antonine Itinerary (p. 266) under that of Pyrri or Pyrrum, and situated on the road from Petovio to Siscia. (See Wesseling, ad It. Hieros. l. c.)
[L. S.]
PERIZZI'TES. [Palaestina, p. 529.]
PERMESSUS. [Boeotia, p. 413, a.]
PERNE (П'́ $\rho v \eta$ ), a small island off the coast of Ionia, which, during an earthquake, became united with the territory of Miletus. (Plin. ii. 91.) There was also a town in Thrace of this name, which is mentioned only by Steph. B. (s. v.)
[L. S.]
PERNICIACUM, or PERNACUM in the Table, in North Gallia, is placed on a road from Bagacum (Barai) to Aduatuca (Tongern). The road passed from Bagacum to Geminiacum (Gemblou). From Geminiacum to Perniciacum is xii. in the Anton. Itin., and xiiii. in the Table; and from Perniciacum to Aduatuca is xiv. in the Itin. and xvi. in the Table. The road is generally straight, but there is no place which we can identify as the site of Perniciacum; and the geographers do not agree on any position.
[G. L.]
PERORSI (חépopaot, חúpopaot, Ptol. iv. 6. §§ 16,17; Polyb.ap. Plin. v. 1. s.8, vi. 35), a people of Libya, subdued by Suetonius Paullinus, who inhabited a few fertile spots spread over the long extent of maritime country between the Canarii, who dwelt opposite to the Fortunate Islands, and the Pharusii, who occupied the banks of the Senegal. (Leake, London Geog. Journ. vol. ii. p. 17.)
[E. B. J.]
PERPERE'NA ( $\Pi \epsilon \rho \pi \epsilon \rho \eta \nu a)$, a place in Mysia, on the south-east of Adramyttium, in the neighbourhood of which there were copper mines and good vineyards. It was said by some to be the place in which Thucydides had died. (Strab. xiii. p. 607; Plin. v. 32 ; Steph. B. s. v. Пapтápav, from whom we learn that some called the place Perine; while Ptol. v. 2. § 16, calls it Perpere or Permere; Galen, Пєрl єن̇хvuias, p. 358 ; comp. Sestini, p. 75.) Some, without sufficient reason, regard Perperena as identical with Theodosiupolis, mentioned by Hierocles (p. 661 ).

PERRHIDAE. [Attica, p. 330, a.]
PERSABO'RA ( $\Pi \eta \rho \sigma a 6 \bar{\omega} \rho a$, Zosim. iii. 17), a very strong place in Mesopotamia, on the W. bank of the Euphrates, to which the emperor Julian came in his march across that country. Zosimus, who gives a detailed account of its siege, states that it was in size and importance second only to Ctesiphon. Ammianus, speaking of the same war, calls the place Pirisabora (xxiv. c. 2) ; and Libanius Soph. mentions a city of the same name as the then ruling king of Persia, evidently supposing that it derived its name from Sapor (or Shahpur). (Orat. Fun. p. 315.) Forbiger has conjectured that it is represented by the present Aubar, and that it was situated near the part of the river Euphrates whence the caual Nahr-sares flows, and no great distance from the Sipphara of Ptolemy (v. 18. 今8 7). [V.]

## PERSIS.

PERSE'POLIS (Пepoémo入ıs, Diod. xvii. 70 ; Ptol. vi. 4. § 4; Curt. v. 4. 6; Пepaaimodıs, Strab. xv. 729: Eth. Пeрбєко入itns), the capital of Persis at the time of the invasion of Alexander, and the seat of the chief palaces of the kings of Persia. It was situsted at the opening of an extensive plain (now called Mardusht), and near the junction of two streams, the Araxes (Bendamir) and the Medus ( $P u l_{w a i n}$ ). The ruins, which are still very extensive, bear the local name of the Chel Minar, or Forty Columns. According to Diodorus the city was originally surrounded by a triple wall of great strength and beauty (xvii. 71). Strabo states that it was, after Susa, the richest city of the Persians, and that it contained a palace of great beauty (xv. p. 729), and adds that Alexander burnt this building to avenge the Greeks for the similar injuries which had been inflicted on them by the Persians (xp. p. 730). Arrian simply states that Alexander burnt the royal palace, contrary to the entreaty of Parmenion, who wished him to spare this magnificent building, but does not mention the name of Perse. polis. (Anab. iii. 18.) Curtius, who probably drew his account from the many extant notices of Alexander's expedition by different officers who had accompanied him, has fully described the disgraceful burning of the city and paiace at Persepolis by the Greek monarch and his drunken companions. He adds that, as it was chiefly built of cedar, the fire spread rapidly far and wide.

Great light has been thrown upon the monuments which still remain at Persepolis by the researches of Niebuhr and Ker Porter, and still more so by the interpretation of the cuneiform inscriptions by Colonel Rawlinson and Prof. Lassen. From the resalt of their inquiries, it seems doubtful whether any portion of the present ruins ascend to so high a period as that of the founder of the Persian monarchy, Cyrus. The principal buildings are doubtless due to Dareius the son of Hystaspes, and to Xerses. The palace and city of Cyrus was at Pasargada, while that of the later monarchs was at Persepolis. (Rawlinson, Journ. of Roy. As. Soc. vol. x; Lassen, in Ersch and Gruber's Encycl. s.v.; Forgusson, Palaces of Nineceh and Persepolis Restored, Lond. 1851.) It has been a matter of some doubt how far Persepolis itself ever was the ancient site of the capital; and many writers have supposed that it was only the high place of the Persian monarchy where the great palaces and temples were grouped tingether. On the whole, it seems most probable that the rock on which the ruins are now seen was the place where the palaces and temples were placed, and that the city was extended at its feet along the circumjacent plain. Subsequent to the time of Alexander, Persepolis is not mentioned in history except in the second book of the Maccabees, where it is stated that Antiochus Epiphanes made a fruitless attenpt to plunder the temples. (2 Maccab. ix. 1.) In the later times of the Muhammedan rule, the fortress of Istakhr, which was about 4 miles from the ruins, seems to have occupied the place of Persepolis; hence the opinion of some writers, that Istakhr itself was part of the ancient city. (Niebuhr, ii. p. 121 ; Chardin, Voyages, viii. p. 245; Ker Porter, vol. i. p. 576; Ouseley, Travels, ii. p. 222.)

PE'RSICUS SINUS ( $\delta$ Пероıкдs $\kappa \delta \lambda \pi \sigma s$, Strab. ii. p. 78, xv. p. 727 ; Ptol. vi. 3. § 1, 4. § 1. $\mu v \chi \dot{u} s$,

Mare Persicum, Plin. vi. 13. s. 16), the great gulf which, extending in a direction nearly NW. and SE, separated the provinces of Susiana and Persis, and the western portion of Carmania from the opposite shores of Arabia Felix. There are great differences and great errors in the accounts which the ancients bave left of this gulf; nor indeed are the statements of the same author always consistent the one with the other. Thus some writers gave to it the shape of the human head, of which the narrow opening towards the SE. formed the neck (Mela, iii. 8; Plin. vi. 24. s. 28.) Strabo in one place states that, at the entrance, it was only a day's sail across (xv. p. 727), and in another (xvi. p. 765) that from Harmuza the opposite Arabian shore of Mace was visible, in which Ammianus (xxiii. 6) agrees with him. He appears to have thought that the Persian Gulf was little inferior in size to the Euxine sea (l.c.), and reckons that it was about 20,000 stadia in length. (Cf. Agathem. i. 3.) He placed it also, according to a certain system of parallelism. due $S$. of the Caspian (ii. p. 121, cf. also xi. p. 519). The earliest mention of the Persian Gulf would appear to be that of Hecataeus (Steph. B. s. r. Kúp $)$ ): but a doubt has been thrown upon this passage, as some MSS. read

[V.]
PERSIS (ì Mepois, Aeschyl. Pers. 60; Hernd. iii. 19 ; Plin. vi. 23. s. 25; Amm. Marc. xxiii. 6, \&cc.; $\hat{\eta}$ Пер $\boldsymbol{\kappa} \boldsymbol{\kappa} \dot{\eta}$, Herod. iv. 39 : Eth. Пépons, Perss), the province of Persis, which must be considered as the centre of the ancient realm of Persia, and the district from which the arms of the Persians spread over all the neighbouring nations, was bounded on the $\mathbf{N}$. by Media and part of the chain of the Parachoathras M.; on the W. by Susiana, which is separated from Persis by the small stream Arosis or Oroatis; on the S. by the Persian Gulf, and on the E. by the desert waste of Carmania. In the earlicr periods of history this province was altogether unknown, and it was not till the wars of Alexander and of his successors that the Greeks formed any real cunception of the position and character of the land, from which their ancient and most formidable enemies took their name. The whole province was very mountainous, with few extended plains; it possessed, however, several ralleys of great beauty and fertility, as those for instance in the neighbourhood of Persepmlis (Strah. xv. p. 727 ; Arrian, Ind. c. 40 : Anmm. Marc. xxiii. 6; Chardin, Voy. iii. p. 255); the coast-line appears to have been, as it is now, sandy and hot, and uninhabitable, owing to the poison-bearing winds. (Plin. xii. 20.) The principal mountain chains bore the names of Parachoathras (Eluend) and Ochus (perhaps Nakhila), and were, in fact, prolongations to the sea of the still higher ranges of Media. It was watered by no great river, but a number of smaller streams are mentioned, some of them doubtless little more than mountain torrents. The chief of these were the Araxes (Bend-amir,) the Medus (Pulwain), and the Cyrus ( $K$ ír), in the more inland part of the country ; and along the coast, the Bagrada, Padargas, Heratemis, Rhogonis, Oroatis, Scc. (Plin. vi. 23. в. 26; Arrian, Ind. c. 39 ; Amm. Marc. xxiii. 6; Strab. xvi. p. 727, \&c.) The principal cities of Persis were, Pasargada, its earliest capital, and the site of the tomb of its first monarch, Cyrus; Perseroins. the far-famed seat of the palaces and temples of Dareius the son of Hystaspes, and his successors; Gabae, one of the residences of the Persian kings; 'Taoce, and Aspadana.

The Persae were properly the native inhabitants
of this small district; though in later times the name was applied generally to the subjects of the great king, whose empire extended, under Dareius the son of Hystaspes, from India to the Mediterranean. In the earliest times of the Old Testament they are not mentioned by name as a distinct people, and when, in the later days of the captivity, their name occurs, they mast be taken as the inlabitants of the great empire above noticed (Esek. xxxviii. 5 ; Esth. i. 3-18; Ezra, iv. 5; 1 Maccab. i. 1, \&cc.), and not simply of the limited district of Persis. According to Herodotus, the ancient people were divided into three leading classes, warriors, husbandmen, and nomades. In the first class, the Pasargadae, Maraphï, and Maspii, were the most important subdivisions. The Achaemenidae, rom whom their well-known line of kings descended, was one of the families of the Pasargadae. The tribes of hushandmen bore the names of Panthialaci, Derusiaei and Germanii; those of the nomades were called, Dai, Mardi, Dropici and Sagarti. (Herod. i. 125) It is clear from this account that Herudotus is describing what was the state of the Persae but a little while before his own times, and that his view embraces a territory far more extensive than that of the small province of Persis. We must suppose, from his notice of the nomade tribes, that he extended the Persian race over a considerable portion of what is now called Khorasan; indeed, over much of the country which at the present day forms the realm of Persia. In still later times, other tribes or suldivisions are met with, as the Paraetaceni, Messabatae, Stabaei, Suzaei, Hippophagi, \&cc. \&cc. Herodotus states further that the most ancient name of the people was Artaei (Herod. vii. 61), a form which modern philology has shown to be in close connection with that of the Arii, the earliest title of their immediate neighbours, the Medes. Both alike are derived from the old Zend and Sanscrit Arya, signifying a penple of noble descent; a name still preserved in the modern I'rak (Ariakz). (Maller, Journ. Asiat. iii. p. 299; Lassen, Ind. Alterth. ii. p. 7.) There can be no doubt that the name Persae is itself of Indian origin, the earliest form in which it is found on the cuneiform inscriptions being Parasa. (Lassen, Alt-Pers. Keil-Inscr. f. 60.)

The Persian people seem to have been in all times noted for the pride and haughtiness of their language (Aeschyl. Pers. 795; Amm. Marc. xxiii. 6): but, in spite of this habit of boasting, in their earlier bistory, under Cyrus and his immediate successors, they appear to have made excellent soldiers. Herolotus describes fully the arms and accoutrements of the fuot-soldiers, archers, and lancers of the army of Xerxes (vii. 61), on which description the well-known sculptares at Persepolis afford a still living commentary. (Cf. also Strab. 2v. p. 734; Xen. Cyrop. vi. 3. § 31.) Their cavalry also was celebrated (Herod. L. c. ix. 79, 81; Xen. Cyrop. vi. 4. § 1). S(labo, who for the most part confines the name of Persae to the inhabitants of Persis, has fully described some of the manners and customs of the proople. On the subject of their religious worship Herodotus and Strabo are not at one, and each writer gives separate and unconnected details. The general conclusion to be drawn is that, in the remotest ages, the Persians were pure fire-wornhippers, and that by degrees they adopted What became in later times a characteristic of their religious system, the Dualistic arrangement of two separate principles of good and evil, Hormuad and

Ahriman. (Strab. xv. p. 727-736; Herod. i. 33, 133; Xen. Cyrop. i. 22.) Many of their ancient religious customs have continued to the present day; the fire-worshippers of India still contending that they are the lineal descendants of the ancient Persians. The language of the ancient people was strictly Indo-Germanic, and was nearly connected with the classical Sanscrit: the carliest specimens of it are the cuneiform inscriptions at Murghab, - the site of Pasargada, and the place where Cyrus was buried,-and those of Dareius and Xerxes at Persepolis and Eehistán, which bave been deciphered by Colonel Rawlinson and Professor Lassen. (Rawlinson, Journ. As. Soc. vol. x.; Lassen, Zeitschrift f. Morgenl. vi. 1; Hitzig, Grabschrift d. Darius, Zurich, 1847; Benfey, Pers. Keil-Inscrift, Leipzig, 1847.)

The government of Persia was a rigid monarchy. Their kings tived apart from their subjects in well secured palaces (Esth. iv. 2, 6), and rejoiced in great parks (זapdסeifot), well stocked with game and animals for the chase (Cyrop. i. 3. § 14, viii. 1. § 38, Anab. i. 2. §7; Curt. viii. 1. § 11), and passed (in later times, when their empire was most widely extended) their summer at Ecbatana, their spring at Susa, and their winter at Babylon. (Nehem. i. 1; Dan. viii. 2; Esth. i. 2, 5; Xen. Anab. iii. 5. § 15, Cyrop. viii. 6. § 22.) Like other eastern monarchs, the Persian kings possessed a well appointed harem, many curious details of which we gather from the history of Esther (cf. also Curt. iii. § 3; Athen. xiii. p. 557 ; Plut. Artax. c. 43); and they were accustomed to receive from their subjects direct adoration (rpoorúvnots), as the presumed descendants or representatives of Hormuzd. (Plut. Themist. c. 7; Curt. vi. 6. § 2, viii. 5. § 6.) Their local government was a pure despotism; but in some extruordinary cases a sort of privy council was called of the seven chief princes, who stood around the royal throne, like the Amshaspands round the throne of Hormuzd. (Herod. vij. 8, viii. 67; Esth. i. 14, 19, vii. 14.) Whatever document had once passed the king and had been sealed by the royal signet was deemed irrerocable. (Esth. i. 19, viii. 8; Dan. vi. 9. 16; cf. also Chardin, Voy. iii. 418.) Over the individual provinces-which in the time of Dareius were said to have been twenty in number (Her. iii. 89), but were subsequently much more numerous (Esth. i. 1), probably from the subdivision of the larger ones-were placed satraps, whose business it was to superintend them, to collect the revenues, and to attend to the progress of agriculture. (Her. iii. 89, 97; Joseph. Anh. xi. 3, \&c.) Between the satraps and the kings was a well organised system of couriers, who were called arrapot ordacadydau ( Plut. Fort. Alex. vii. p. 294, ed. Reiske), who conveyed their despatches from station to station on horses, and had the power, when necessary, to press horses, baats, and even men into their service. As this service was very irksome and oppressive, the word ayrapevesty came to mean compulsion or detention ander other circumstances. (Joseph. Ant. xiii. 2. § 3; Esth. iii. 13, 15, viii. 10, 14 ; Bedeley's Mentuder, p. 56.)

The history of the Persian empire need not be repeated here, as it is given under the names of the respective kings in the Dict. of Bioyr.
[V.].
PERTU'SA, a town of the Ilergetes in Hispania. Tarraconeusis, which still exists under the old name on the Alcanadre. (Itin. Ant. p. 391.) [T.H.D.]
PERU'SIA (Hepouria: Eth. Perusinus: Perugia), one of the most important and powerful cities of

Etruria, situated nearly on the eastern frontier of that country, on a lofty hill on the right bank of the Tiber, and overlooking the lake of Thrasymene which now derives from it the name of Lago di Perugia. It closely adjoins the frontiers of Umbria, and hence the tradition reported by Servius, that it was originally an Umbrian city, inhabited by the tribe called Sarsinates, is at least a very probable one. (Serv. ad Aen. x. 201.) The same author has, however, preserved to us another tradition, which ascribes the foundation of Perusia to a hero named Auletes, the brother of Ocnus, the reputed founder of Mantua. (Ib. x. 198.) Justin's assertion that it was of Achaean origin (xx. 1) may be safely rejected as a mere fable; but whatever historical value may be attached to the statements of Servius, it seems probable that Perusia, in common with the other chief places in the same part of Etruria, was in the first instance an Umbrian city, and subsequently passed into the hands of the Etruscans, under whom it rose to be a powerful and important city, and one of the chief members of the Eiruscan confederacy. It is not till b. c. 310, when the Rornans had carried their armis beyond the Ciminian forest, that the name of Perusia is heard of in history; but we are told that at that period it was one of the most powerful cities of Etruria. (Liv.ix. 37.) The three neighbouring cities of Perusia, Cortona, and Arretium, on that occasion united in concluding a peace with Rome for thirty years (Liv. l.c.; Diod. xx. 35); but they seem to have broken it the very next year, and shared in the great defeat of the Etruscans in general at the Vadimonian lake. This was followed by another defeat under the walls of Perasia itself, which compelled that city to sue for peace; but the statement that it surrendered at discretion, and was occupied with a Roman garrison, is one of those obvious perversions of the truth that occur so frequently in the Roman annals. (Liv. ix. 40.) When we next meet with the name of Perusia, it is still as an independent and powerful state, which in B. c. 295, in conjunction with Clusiun, was able to renew the war with Rome; and though their combined forces were defeated by Cn. Fulvius, the Perusians took the lead in renewing the contest the next year. On this occasion they were again defeated with heary loss by Fabius, 4500 of their troops slain, and above 1700 taken prisoners. (Id. x. 30, 31.) In consequence of this disaster they were compelled before the close of the year to sue for peace, and, by the payment of a large sum of money, obtained a truce for forty years, в. c. 294. (Id. x. 37.) At this time Livy still calls the three cities of Perusia, Volsinii, and Arretium (all of which made peace at the same time) the three most powerful states and chief cities of Etruria. (Id. l.c.)

We find no other mention of Perusia as an independent state; and we have no explanation of the circumstances or terms under which it ultimately became a dependency of Rome. But during the Second Punic War it figures among the allied cities which then formed so important a part of the Roman power: its colorts were serving in her armies (Liv. axiii. 17), and towards the end of the contest it was one of the "populi" of Etruria which came forward with alacrity to furnish supplies to the fleet of Scipio. Its contribution consisted of corn, and timber for shipbuilding. (Id. xxviii. 45.) With this exception, we meet with no other mention of Perusia till near the close of the republican period, when it bore so conspicuous a part in the civil war between

Octavian and L. Antonius, in B. C. 41, as to give to that contest the name of Bellam Perusinum. (Suet. Aug. 9; Tac. Ann. v. 1; Oros. vi. 18.) It was shortly after the outbreak of hostilities on that occasion that L. Antonius, finding himself pressed on all sides by three armies under Agrippa, Salvidienus, and Octavian himself, threw himself into Perusia, trusting in the great natural strength of the city to enable him to hold out till the arrival of his generals, Ventidius and Asinius Pollio, to his relief. But whether from disaffection or incapacity, these officers failed in coming to his support, and Octavian surrounded the whole hill on which the city stands with strong lines of circumvallation, so as to cut him off from all supplies, especially on the side of the Tiber, on which Antonius had mainly relied. Famine soon made itself felt in the city; the siege was protracted through the winter, and Ventidius was fuiled in an attempt to compel Octavian to raise it, and drew off his forces without success. L. Antonius now made a desperate attempt to break through the enemy's lines, but was repulsed with great slaughter, and found himself at length compelled to enpitulate. His own life was spared, as were those of most of the Roman nobles who had accompanied him; but the chicf citizens of Perusia itself were put to death, the city given up to plunder, and an accidental contlagration having been spread by the wind, ended by consuming the whole city. (Appian, B. C. v. 3249; Dion Cass. xlviii. 14; Vell. Pat. ii. 74; Flor. iv. 5 ; Suet. Aug. 14, 96.) A story told by severa! writers of Octavian having sacrificed 300 of the prisoners at an altar consecrated to the memory of Caesar, is in all probability a fiction, or at least an exaggeration. (Dion Cass. l.c.; Suet. Aug. 15; Seliec. de C'lem. i. 11 ; Merivale's Roman Empire, vol. iii. p. 227.)

Perusia was raised from its ashes again by Angustus, who settled a fresh body of citizens there, and the city assumed in consequence the surname of Augusta Perusia, which we find it bearing in inscriptions; but it did not obtain the rank or title of a colony; and its territory was confined to the district within a mile of the walls. (Dion Cass. xlriii. 14; Orell. Inscr. 93-95, 608.) Nutwithstanding this restriction, it appears to have speedily risen again into a flourishing municipal town. It is noticed by Strabo as one of the chief towns in the interior of Etruria, and its municipal consideration is attested by numerous inscriptions. (Strab. v. p. 226; Plin. iii. 5. s. 8: Ptol. iii. 1. § 48; Tab. Peut.; Orell. Inscr. 2531, 3739,4038 .) From one of these we learn that it acquired under the Roman Empire the title of Colonia Vibia; but the origin of this is unknown, though it is probable that it was derived from the emperor Trebonianus Gallus, who appears to have bestowed some conspicuous benefits on the place. (Vermiglioli, Iscriz. Perug. pp. 379-400: Zumpt, de Colon. p. 436.) The name of Perusia is not again mentioned in history till after the fall of the Luman Empire, but its natural strength of position rendered it a place of importance in the troubled times that followed; and it fiyures comspicuously in the Guthic wars, when it is called by Procopius a strong fortress and the chief city of Etruria It was taken by Belisarius in $\mathbf{1 . 1}$. $\mathbf{5 3 7}$, and occupied with a strong garrison: in 547 it was besieged by Totila, but held out against his arms for nearly two years, and did not surrender till after Belisarius had guitted Italy. It was again recovered by Narses in 552. (Prucop. B. G. i. 16,17 , iii $6,25,35$, iv. 33.)

It is still mentioned by Paulus Diaconus (Hist. Lang. ii. 16) as one of the chief cities of Tuscia under the Lombards, and in the middle ages became an independent republic. Perugia still continues a considerable city, with 15,000 inhabitants, and is the capital of one of the provinces of the Roman states.

The modern city of Perugia retains considerable vestiges of its ancient grandeur. The most important of these are the remains of the walls, which agree in character with those of Chiusi and Tode, being composed of long rectangular blocks of travertine, of very regular masonry, wholly different from the ruder and more massive walls of Cortona and Volterra It is a subject of much doubt whether these walls belong to the Etruscan city, or are of later and Roman times. The ancient gates, two of which still exist, must in all probability be referred to the latter period. The most striking of these is that now known as the Arco diAugusto, from the inscription "Augusta Perusia" over the arch: this probably dates from the restoration of the city under Augustus, though some writers would assign it to a much more remote period. Another gate, known as the Purta Marzia, also retains its ancient arch; while several others, though mure or less modernised, are certainly of ancient construction as high as the imposts. It is thus certain that the ancient city was not more extensive than the modern one; but, like that, it occupied only the summit of the hill, which is of very considerable elevation, and sends down its roots and underfalls on the one side towards the Tiber, on the other towards the lake of Thirasymene. Hence the lines of circumrallation drawn round the foot of the hill by Octavian enclosed a space of 56 stadia, or 7 Roman miles (Appian, B. C. v. 33). though the circuit of the city itself did not exceed 2 miles.

The chief remains of the ancient Etruscan city are the sepulchres without the walls, many of which have been explored, and one-the family tomb of the Volumnii-has been preserved in precisely the same state as when first discovered. From the inscriptions, some of which are bilingusl, we learn that the fanily name was written in Etruscan "Velimnas," which is rendered in Latin by Volumnius. Other sepulchres appear to have belonged to the families whise names assumed the Latin forms, Axia, Caesia, Petronia, Vettia, and Vibia. Another of these tombs is remarkable for the careful construction and regular masonry of its arched vault, on which is engraved an Etruscan inscription of considerable length. But a far more important monument of that people is an inscription now preserved in the museum at Perugia, which extends to forty-six lines in length, and is the only considerable fragment of the language which has been preserved to us. [Etrikia, p. 858.] Numerous sarcophagi, urns, vases, and other relics from the various tombs, are preserved in the same museum, as well as many inscriptions of the Roman period. (Vermiglioli, Iscrizioni Perugine, 2 vols. 4to., Perugis, 1834 ; Id. Il Sepolcro dei Volunni, 4to., Peragia, 1841 ; Dennis's Etruria, vol. ii. pp. 458489.)

We learn from ancient authors that Juno was regarded ae the tutelary deity of Perusia till after the burning of the city in B.c. 40 , when the temple of Vulcan being the only edifice that escaped the configeration, that deity was adopted by the surviving citizens as their peculiar patron. (Dion Cass. xlviii. 14: Appian. B. C. г. 49.) [E. H. B.]

PESLA or PESCLA (Not. Inp. c. 28, vol. i.
p. 75, ed. Böcking), is probably the border-furtress in the N. of the Thebaid, which Ptolemy (iv. 5. § 71) calls Пa $\sigma \sigma d \lambda \omega \nu$ or חd $\alpha \sigma \sigma a \lambda o s$. Pesla stood on the right bank of the Nile, and was the quarters of a German company (turma) of cavalry (D'Anville, Mém. sur 1 E.gypte, p. 190). [W. B. D.]
 Eth. Пea $\sigma$ voúvtıos) the principal town of the Tolistobrii, in the west of Galatia, situated on the southern slope of Mount Dindymus or Agdistis, near the left bank of the river Sangarius, from whose sources it was about 15 miles distant. (Paus. i 4. §5: Strab. xii. p. 567.) It was 16 miles south of Germa, on the roud from Ancyra to Amorium. (It. Ant. pp. 201, 202.) It was the greatest commercial town in those parts, and was believed to have derived its name from the image of its great patron divinity, which was said to have fallen ( $\pi \in \sigma \epsilon i v$ ) from heaven. (Herodian, i. 11; Amm. Marc. xxii. 9.) Pessinus owes its greatest celebrity to the goddess Rhea or Cybele, whom the natives called Agdistis, and to whom an immensely rich temple was dedicated. Her priests were anciently the rulers of the place; but in later times their honours and powers were greatly reduced. (Strab. l. c., x. p. 469 ; Diod. Sic. iii. 58, \&cc.) Her temple contained her image, which, according to some, was of stone (Liv. xxix. 10, 11), or, according to others, of wood, and was believed to have fallen from heaven. (Apollod. iii. 11; Amm. Marc. l.c.) The fame of the goddess appears to have extended all over the ancient world; and in b. c. 204, in accordance with a command of the Sibylline books, the Romans sent a special embassy to Pessinus to fetch her statue, it being believed that the safety of Rome depended on its removal to Italy. (Liv. l. c.; Strab. xii. p. 567.) The statue was set up in the temple of Victory, on the Palatine. The goddess, however, continued nevertheless to be worshipped at Pessinus; and the Galli, her priests, sent a deputation to Manlius when he was encamped on the banks of the Sancarius. (Liv. xxxviii. 18; Polyb. xx. 4.) At a still later period, the emperor Julian worshipped the goddess in her ancient temple. (Amm. Marc. Lc.) The kings of Pergamum adorned the sanctuary with a magnificent temple, and porticoes of white marble, and surrounded it with a beautiful grove. Under the Roman dominion the town of Pessinus began to decay, although in the new division of the empire under Constantine it was made the capital of the province Galatis Salutaris. (Hieroel. p. 697.) After the sixth century the town is no longer mentioned in history. Considerable ruins of Pessinus, especially a well-preserved theatre, exist at a distance of 9 or 10 miles to the south-east of Serri Hissar, where they were first discovered by Texier. (Descript. de l'Asie Mincure). They extend over three hills, separated by valleys or ravines. The marble seats of the theatre are nearly entire, but the scena is entirely destrosed; the whole district is covered with blocks of marble, shafts of columns, and other fragments, showing that the place must have been one of unusual magnificence. (Hamilton, Researches, i. p. 438, foll.; Leake, Asia Minor, p. 82, foll., who seems to be mistaken in looking for Pessinus on the right bank of the Sangarins. [L.S.]

PETA'L1AE, incorrectly called l'etalia (Пєтa入ia) by Strabo (x. p. 444), small islands off the cuast of Euboea, at the entrance of the Euripus, now l'etalius. (Plin. iv. 12. s. 23; Leake, Northern Grecce, rol. ii. p. 423.)

PETAVO'NIUM (חetavóviov, Ptol. ii. 6. § 35), a town of the Superatii in Hispania Tarraconensis, SE. of Asturica. (Itin. Ant. p. 423.) [T. H. D.]

PETELIA or PETI'LIA ( $\boldsymbol{\epsilon} \tau \tau \eta$ ia : Eth. Пe $\quad$. $\eta$ Aivos, Petelinus: Strongoli), an ancient city of Brattium, situated about 12 miles N. of Crotona, and 3 miles from the $E$. coast of the peninsula. According to the Greek traditions it was a very ancient city, founded by Philoctetes after the Trojan War. (Strab. vi. p. 254 ; Virg. Aen. iii. 401 ; Serv. ad loc.) This legend probably indicates that it was really a town of the Chones, an Oenotrian tribe; as the foundation of Chone, in the same neighbourhood, was also ascribed to Philoctetes. It was only a small place (Virg. l. c.), but in a strong situation. We have no account of its receiving a Greek colony, nor is its name ever mentioned among the Greek cities of this part of Italy; but, like so many of the Oenotrian towns, became to a great extent Hellenised or imbued with Greek culture and manners. It was undoubtedly for a long time subject to Crotona, and comprised within the territory of that city; and probably for this reason, its name is never mentioned during the early history of Magna Graecia. But after the irruption of the Lucanians, it fell into the hands of that people, by whom it was strongly fortified, and became one of their most important strongholds. (Strab. l. c.) It is apparently on this account, that Strabo calls it "the metropolis of the Lucanians," though it certainly was not included in Lucania as the term was understood in his day. Petelia first became conspicuous in history during the Second Punic War, when its citizens remained faithful to the Roman alliance, notwithstanding the general defection of the Bruttians around them, B. c. 216. They were in consequence besieged by the Bruttians as well as by a Carthaginian force under Himilco: but though abandoned to their fate by the Roman senate, to whom they had in vain sued for assistance, they made a desperate resistance; and it was not till after a siege of several months, in which they had suffered the utmost extremities of famine, that they were at length compelled to surrender. (Liv. xxiii. 20, 30; Polyb. vii. 1; Appian, Annib. 29; Frontin. Strat. iv. 5. § 18 ; Val. Max. vi. 6, ext. § 2; Sil. Ital. xii. 431.) The few inhabitants who escaped, were after the close of the war restored by the Romans to their native town (Appian, l. c.), and were duabtless treated with especial favour; so that Petelia rose again to a prowperous condition, and in the days of Strabo was one of the few cities of Bruttium that was still tolerably flourishing and populous. (Strab. vi. p. 254.) We learn from inscriptions that it still continued to be a flourishing municipal town under the Roman Empire (Orell. Inser. 137, 3678, 3939 ; Mommsen, Inscr. R. N. pp. 5, 6): it is mentioned by all the gcographers and its name is still found in the Tabula, which places it on the road from Thurii to Crotona. ( Mel. ii. 4. § 8 ; Ylin. iii. 10. s. 15 ; Ptol. iii. 1. $\$ 75$; Tab. Peut.) But we are unable to trace its history further: its identification with Strongoli is, however, satisfactorily made out by the inscriptions which have been found in the latter city. Strongoli is an episcopal see, with about 7000 inhabitants: its situation on a lofty and rugged hill, commanding the plain of the Nieto (Neacthus), corresponds with the accounts of Petelia, which is represented as occupying a position of great natural strength. There are no ruins of the ancient city, but numerous
minor objects of antiquity have been found on the spot, besides the inscriptions above referred to.

The existence of a second town of the name of Petelia in Lucania, which has been admitted by several writers, rests mainly on the passage of Strabo where he calls Petelia the metropolis of Lucania; but he is certainly there speaking of the well-known city of the name, which was andoubtedly in Bruttium. The inscriptions published by Antonini, to prove that there was a town of this name in the mountains near Velia, are in all probability spurious (Mominsen, I. R. N. App. p. 2), thongh they have been adopted, and his authority fullowed by Romanelli and Cramer. (Rumanelli, val. i. p. 348 ; Cramer's Italy, vol. ii. p. 367.)

The Pertelisi Montes ( 7 d Mevidiva bpl), mentioned by Plutarch (Crass. 11), to which Spartacus retired after his defeat by Crassus, are evidently the rugged group of the Apennines S. of the Crathis, between Petelia and Consentia.
[E. H. B.]
PE'TEON (Пéтecov : Eth. Heré́vios), a town of Bueotia, mentioned by Homer (IL ii. 500), was situated near the road from Thebes to Antbedon. (Strab. ix. p. 410.) Strabo contradicts himself in the course of the same page (l.c.), in one passage placing Peteon in the Thebais, and in another in the Haliartia. (Comp. Plut. Narr. Am 4 ; Plin. iv. 7. s. 12; Steph. B. s.v.) The position of Peteon is uncertain. Leake supposes it may be represented by some ancient remains at the southern extremity of the lake Paralimni. (Northern Greoce, rol. ii. p. 320.)

PETINESCA, in the country of the Helvetii, is placed in the Itins. between Aventicum (Avenches) and Salodurum (Solothurn); at the distance of xiii. in the Anton. Itin. from Aventicum ana xiiii. in the Table; and at the distance of $\mathbf{x}$. from Salodurum in both the Itineraries. Sume geographers bave placed Petinesca at a place named Büren; but the distance does not agree with that given by the Itins. between Petinesca and Salodurum, as D'Anville observes, who also says that the position of Bienne (Biel) corresponds to the ancient numbers, if we take them to indicate Gallic leagues. Cluver also placed Petinesca at Biel.
[G. L.]

## PETITARUS. [Achelous.]

PETOVIO (Motófiov, or חataviov, Ptol. ii. 16. § 4 : Pettau), also called Poetovio (Itin. Ame p 262; and in inscriptions ap. Orelli, n. 3592), Patavio, and Petaviona, was an important town in Upper Pannonia, on the river Dravus and the trintiers of Noricum. In inscriptions it is called a Roman colony, and bears the surname of Ulpia; whence it may be inferred that it received Roman colonists from either Trajan or Hadrian, who probably also extended the place. Its importance is sufficiently attested by the fact that it was the station of the Legio xiII. Gemina, and that an imperial palace existed outside its walls. (Tac. Hist. iii. 1; Amm. Marc. xiv. 37 ; It. Hieros. p. 561 ; Geogr. Rav. iv. 19.) The modern town of Pettou is situated on the left bank of the Irave; and as coins, inscriptions, and other ancient remains are found only on the opposite side, it is probable that the ancient Pe tovio was situated on the right bank opposite to the modern Pettau. (Comp. K. Mayer, Versuch wber Steyermärkivche Alterthümer, Griä, 1782, 4to.; Muchar, Noricum. i. p. 364.)
[L. S.]
I'ETRA ( 1 ét $\rho a$ ), " rock," the name of several towns. I. In fiurope. 1. P'etiea Pertusa, in Uiabria. [Intercisa.]
2. (Пérpa : Eth. Mépivos, Petrinus : Petralia), a city of Sicily, mentioned both by Pliny and Polemy among the inland towns of the island. Cicero also notices the Petrini among the communities that suffered from the exactions of Verres (Cic. Verr. iii. 39 ; Plin. iii. 8. s. 14 ; Ptol. iii. 4. § 14); and their name is mentioned at an earlier period by Diodorus as submitting to the Romans during the First Punic War. (Dicd. xxiii. 18; Exc. H. p. 505.) The name is written Petraea by Silius Italicus (xiv. 248), and the Petrinae of the Antunine linerary is in all probability the same place. (ltin. Art. p. 96.) Though so often mentioned by ancient authors, they afford very little clue to its position; but it is probable that the name is retained by the modern Petralia, a small town about 8 miles $W$. of Gangi, supposed to represent the ancient Engyum. [Engyum.] Ptolemy indeed places these two towns near one another, though he erroneously transfers them both to the neighbourhood of Syracuse. which is wholly at variance with the mention of Petra in Diodorus among the towns subject to the Carthaginians as late as B. C. 254. (Cluver. Sicil. p. 367.)
[E. H. B.]
3. A fortress of Macedonia, among the mountains beyond Libethra, the possession of which was disputed by the Tbessalian Perrhaebi and the Macedonian kings. (Liv. xxxix. 26, xliv. 32.) It commanded a pass which led to Pgthium in Thessaly, by the back of Olympus. By this road L. Aemilius Paullus was enabled to throw a detachment on the rear of the Macedonian army which was encamped on the Enipens, after the forces of Perseus had been overthrown at the pass of Petra by P. Scipio Nasica, who had been sent against it with the consul's eldest son Q. Fabius Maximus. (Liv. xlv. 41.) Petra was situated on a great insulated ruck naturally separated from the adjoining mountain at the pass which leads from Elasona or Sercia into the maritime plairs of Macedonis. Here, which is at once the least difficult and inost direct of the routes across the Olympene barrier, or the frortier between Macedonia and Thessaly, exactly on the Zygos, are the ruins of Petra. (Leake, Northern Greece, vol. iii. pp. 337,430.) [E. B. J.]
4. A fortress of the Maedi, in Thrace. (Liv. xl. 22.)
5. A town in Illyricum, situated upon a hill apon the coast, which had only a moderately good harbour. (Caes. B. C. iii. 42.)
6. A place in the Corinthia. [Vol. I. p. 685, a.]
7. A place in the immediate neighbourhood of Elis. [Vol. I. p. 821, a.]

PETRA. II. In Asia. 1. ( § 5, viii. 20. § 19 ; חétpa or Métpal, Suid. s. v. reviencos; the Skla of the Old Testament, 2 Kiugs,rxiv. I; Isaiah, xvi. 1: respecting its various nanes see Robinson, Biblical Kesearches, vol. ii. Notes and IIL p. 653), the chief town of Arabia Petrace, once the capital of the Idumaeans and soksequently of the Nabataei, now Wady Musa. [Nabatael.]

Petra was situated in the eastern part of Arabia Petraca, in the district called under the Christian emperors of Rome Palaestina Tertia (Vet. Rom. Itin. p. 721. Wessel.; Malala, Chronogr. xvi. p. 400, ed. Bonn). According to the division of the ancient geographers, it lay in the northern district. Gebalene; whilst the modern ones place it in the southern portion, Esh-Sherah, the Seir, or moun-tain-kad. of the Old Testament (Genesia, xxxvi. 8).

It was seated between the Dead Sea and the Elunitic gulf; being, according to Diodorus Siculus (xix. 98), 300 stadia S. of the former, whilst the Tub. Peut. places it 98 Roman miles N . of the latter. Its site is a wilderness overtopped by Mount Hor, and diversified by cliffs, ravines, plains, and Wadys, or watered valleys, for the most part but ill cultivated. Strabo (xvi. p. 779) describes it as seated in a plain surruunded with rocks, hemmed in with barren and streamless deserts, though the plain itself is well watered. Pliny's description (vi. 32), which states the extent of the plain at rather less than 2 miles, agrees very nearly with that of Strabo, and both are confirmed by the reports of modern travellers. "It is an area in the bosom of a mountain, swelling into mounds, and intersected with gullies." (Irby and Mangles, ch. viii.) It must not, however, be understood to be completely hemmed in with rocks. Towards the N. and S. the view is open; and from the eastern part of the valley the summit of Jount Hor is seen over the western cliffs. (Rohinson, ii. p. 528.) According to Pling (l. c.) Petra was a place of great resort for travellers.

Petra was subdued by A. Cornelius Palma, a lieutenant of Trajan's (Dion Cass. Ixviii. 14), and remained under the Roman dominion a considerable time, as we hear of the province of Arabia being enlarged by Septimius Severus A. d. 195 (id. lxav. 1, 2; Eutrop. viii. 18). It must have been during this period that thoee temples and mausoleums were made, the remaius of which still arrest the attention of the traveller; for though the predominant style of the architecture is Egyptian, it is mixed with florid and over-louded Roman-Greek specimens, which clearly indicate their origin. (Robinson, ii. p. 532.)

The ralley of Wudy Musa, which leads to the town, is about 150 feet broad at its entrance, and is encircled with cliffs of red sandstone, which gradually increase from a height of $\mathbf{4 0}$ or 50 feet to 200 or $\mathbf{2 5 0}$ feet. Their height has been greatly exaggerated, having been estimated by some travellers at 700 and even 1000 feet (Irby and Mangles, ch. viii.; Stephens, ii. p. 70; see Robinson, ii. p. 517 and note). The valley gradually contructs, till at one spot it becomes only about 12 feet broad, and is so overlapped by the cliffs that the light of day is almost excluded. The ravine or Sik of Wady Musa extends, with many windings, for a good English mile. It forms the principal, and was anciently the only avenue to Petra, the entrance being broken through the wall. (Diod. Sic. ii. 48, six. 97 ; Robinson, ii. p. 516 ; Laborde, p. 55.) This valley contains a wonderiul necropolis hewn in the rocks. The tombs, which adjoin or surmount one another, exhibit now a front with six lonic columns, now with four slender pyramids, and by their mixture of Greek, Roman, and Oriental architecture remind the spectator of the remains which are found in the valley of Jehoshaphat and in other parts of Palestine. The further side of the ravine is spanned by a bold arch, perhaps a triamphal one, with finely-sculptured niches evidently intended for statues. This, like the other remains of this extraordinary spot, is ascribed by the natives either to the Pharaohs or to the Jins or evil genii. Alung the bottom of the valley, in which it almost vanishes, winds the stream mentioned by Strabo and Pliny, the small but charming Wady Musa. In ancient times its bed seems to have been paved, as many traces still show. Its stream was spanned by frequent bridges, its sides strengthened with stono walls or quays, and namerous small canals derived
from it supplied the inhabitants with water. But now its banks are overspread with hyacinths, oleanders, and other flowers and shrubs, and overshadowed by lofty trees.

Opposite to where the Sik terminates, in a second muine-like but broader valley, another monument, the finest one at Petra, and perhaps in all Syria, strikes the eye of the traveller. This is the $\dot{K} h u z n e h,-w e l l$ preserved, considering its age and site, and still exhibiting its delicate chiselled work and all the freshness and beauty of its colouring. It. has two rows of six columns over one another, with statues between, with capitals and sculptured pediments, the upper one of which is divided by a little round temple crowned with an urn. The Arabs imagine that the urn contains a treasure,-El Khuzneh, whence the name, -which they ascribe to Pharaoh (Robinson, ii. p. 519). The interiordoes not correspond with the magnificence of the façade, being a plain lofty hall, with a chamber adjoining each of its three sides. It was either a mausoleum, or, more probably, a temple.

From this spot the cliffs on both sides the Wady are pierced with numerous excarations, the chambers of which are usually small, though the façades are occasionally of some size and magnificence; all. however, so various that scarce two are esactly alike. After a gentle curve the Wady expands, and here on its left side lies the theatre, entirely hewn out of the rock. Its diameter at the bottom is 120 feet (Irby and Mangles, p. 428), and it has thirty-three, or, according to another account, thirty-eight, rows of seats, capable of accommodating at least 3000 spectators. Strangely enough, it is entirely surrounded with tombs. One of these is inscribed with the name of $\mathbf{Q}$. Praefectus Florentinus (Laboride, p. 59), probably the governor of Arabia Petraea under Hadrian or Antoninus lius. Another has a Greek inscription, not yet deciphered. A striking effiect is produced by the bright and lively tints of the variegated stone, out of which springs the wild fig and tamarisk, while creeping plants overspread the walls, and thorns and brambles cover the pedestals and cornices (Isaiah, xxxiv. 13). Travellers are agreed that these excavations were mostly tombs, though some think they may originally have served as dwellings. A few were, doubtless, temples for the worship of Baal, but subsequently converted into Christian churches.

Proceeding down the stream, at about 150 paces from the theatre, the cliffs begin to expand, and soon vanish altogether, to give place to a small plain, about a mile square, surrounded with gentle eminences. The brook, which now turns to the W., traverses the middle of this plain till it reaches a ledge of sandstone cliffs, at a distance of rather more than a mile. This was the site of Petra, and is still o, vered with heaps of hewn stones, traces of paved streets, and foundations of houses. There are remains of several larger and smaller temples, of a bridge, of a triumphal arch of degenerate architecture, and of the walls of a great public building - Kusr Faron, or the palace of Pharaoh.

On an eminence south of this is a single column (Zub Faron, i. e. hasta virilis Pharaonis), connected with the foundation-walls of a temple whose pillars lie scattered around in broken fragments. Laborde (p. 59) thinks that the Acropolis occupied an isplated hill on the W. At the NW. extremity of the cliffs is the Deir, or cloister, hewn in the rock. A ravine, like the Sik, with many
windings, leads to it, and the approach is partly by a path 5 or 6 feet broad, with steps cut in the rock with inexpressible labour. Its façade is larger than that of the Khuzneh; but, as in that building, the interior dines not answer to it, consisting of a large square chamber, with a recess resembling the niche for the altar in Greek ecclesiastical architecture, and bearing evident signs of having been converted from a heathen into a Christian temple. The destruction of Petra, so frequently prophesied in Scripture, was at length wrought by the Mahometans. From that time it remained unvisited, except by some crusading kings of Jerusalem; and perhaps by the single European traveller, Thetmar, at the beginning of the 13th century. It was discovered by Burckhardt, whose account of it still continues to be the best. (Rubinson, ii. p. 527.) Laborde's work is chiefly valuable for the engravings. See also Irby and Mangles, Travels, ch.viii; Kubinson, Bibl. Researches, vol. ii. p. 512, seq.
[T. H. D.]
2. A town in the land of the Lazi in Colchis, founded by Joannes Tzibus, a general of Justinian, in order to keep the Lazi in subjection. It was situated upon a rock near the coast, and was very strongly fortified. (Procoph B. Pers. ii. 15, 17.) It was taken by Chosroes in A. D. 541 , and its sabsequent siege by the Romans is described by Gibbon as one of the most remarkable actions of the age. The first siege was relieved; but it was afain attacked by the Romans, and was at length taken by assault after a long protracted resistance, A. In 551. It was then destroyed by the Rominans, and from that time disappears from history. Its ruins, which are now called Ouljenar, are described by Dubois. (Procop. B. Pers. ii. 17, 20, 30, B. Goth. iv. 11, 12; Gibbon, c. xlii. vol. v. p. 201, ed. Smith; Dubois, Voyage autour du Caucase, vol. iii. p. 86, seq.)
3. A very strong fortress in Sogdiana, held by Arimazes when Alexander attacked it. (Curt. vii. 11 ; comp. Arrian, iv. 19 ; Strab. xi. p. 517.) It is probably the inodern Kohiten, near the pass of Kolugha or Derbend. [See Dict. of Biogr. Vol. I. p. 286.]

PETRAS MAJOR (nétpas $\delta$ нéras, Scyl. p. 45; Ptol. iv. 5. § 3 : Stadiasm. § 33), a harbour of Marnarica, a day's sail from Plyni Portus, and the same as the large harbour which Strabo (xvii. p. 838) places near Ardanis Prom., and describes as lying oppesite to Chersonesus of Crete, at a distance of 3000 stadia. It agrees in position with Port Bardiah, where there are springs to the W. of Marsa Solonm.
[E. B. J.]
PETRAS MINOR (Hétpas $\delta \mu$ ukpós, Scyl. b.c.: Ptol. iv. 5. § 2 ; Stadiasm. § 39), a barbour of Marmarica. half a day's sail from Antipyrgus. It has been identified with Magharab-el-Heabes, where there are a great number of catacombs remarkable for their Graeco-Argyptian style. These curions excavations, of which plans are given in Pacho (Vogage dans la Marmarique, Planches, pl. v.), are to be identified according to that traveller (p.49), with the sinuous calerns of Bombaka (BópBaia), resembling the Aegyptian "hyprgaca," which the Greeks called "Syringes," mentioned by Synesius (Ep. 104) ; but Barth (Wamierungen, p. 512) has shown that the description of the bishop of Itolemais cannot be applied to then catacombs and their locality. A coin with the epigraph nE-PA, which Pellerin referred to this purt in Marmarica is by Eckhel (iv 116) assigned to a Cretan mint
[E. B. J.]

PETRIA＇NA，a fortress in the N．of Britannia Romana，between the Wall and the river Irthing， where the Als Petrians was quartered．Carnden （p．1020）identifies it with Old Penrith；but Hors－ ley（Brit．Rom．p．107）and others fix it，with more prohability，at Cambeck Fort or Castle－steeds．（Not． Imp．）It is called Banna by the Geogr．Rar．（Hors－ ley，p．498．）

PETROCO＇RII（Петрокб́poo，Ptol．ii．7．§ 12）， a Gallic poople，whom Ptolemy places in Aquitania． He names the chief city Vesunna，which is Perigord． Caesar mentions them（vii．75）as sending a con－ tingent of 5000 men to aid in raising the siege of Alesia；this is all that he says about thern．The passage in Pliny（iv．19．s．33）in which he describes the position of the Petrocorii is doubtful：＂Cadurci， Nitiobriges（a correction，see Nitiobriges），Tarne－ que amne discreti a Tolosanis Petrocorii．＂This passage makes the Tarnis（Tarn）the boundary be－ tween the territory of Tolosa（Toulouse）and the Petrocorii，which is not true，for the Cadurci were between the Petrocorii and the territory of Toulouse． Scaliger proposed to write the passage thus：＂Ca－ durci，Nitiobriges，Tarne amni discreti a Tolosanis ； Petrucorii．＂But this is not true，for the Nitiobriges did not extend to the Tarn．Strabo（iv．pp．190，191） mentions the Petrocorii among the people between the Garonne and the Loire，and as near the Nitio－ briges，Cadurci，Lemovices，and Arverni．He says that there are iron mines in the conntry．The Petro－ corii occupied the diocese of Perigueux and Sarlat （D＇Anville）．Besides Vesunua their territury con－ tained Corterate，Trajectus，Diolindum，and some other small places．
［G．L．］
PETROMANTALUM，in Gallia，is placed by the Antonine Itinerary on a road which runs from Caro－ cotinum through Rotomagus（Rouen）to Lutetia （Puris）．It also appears on a road from Caesar－ onnagus（Beaurais）to Briva Isarae or Pontoise，on the Oise，a branch of the Seine．In the Table the name is written Petrumriaco．The site is uncertain． The name bears some resemblance to that of Magni； bat the site of Magni does not accurately correspond to the distances in the Itineraries．
［G．L．］
PETHONII VICUS，in Gallia Narbonensis．Ho－ noré Bouche gives an inscription found at Pertuis， on the right bank of the Druentia（Durance），about 4 leagues north of Aquae Sextiae（ $A$ ix），in which inscription the place is called＂vicus C．Petronii ad ripam Druentiae．＂（D＇Anville，Notice，$f$ fc．）［G．L．］
PETROSACA．［MANTINELA，p．262，b．］
PETUARIA．［Parist．］
PEUCE（Пલ⿱㇒́nøy，Ptol．iii．10．§ 2 ；Strab．vii． p．305），an island of Moesia Inferior，formed by the two southernmost mouths of the Danube．It de－ rived its name from the abundance of pine－trees which grew upon it．（Eratosth．in Schol．Apollon． ir．310．）It was of a triangular shape（Apollon． l．c．），and as large as Rhodes．By Martial（vii． 84. 3）it is called a Getic island；by Valerius Flaccus （viii．217）a Sarmatian one．It has been identified with the modern island of Piczina or St．George， between Badabag and Ismail；but we must recol－ lect that these parts were but little known to the ancients，and that in the lapse of time the mouths of the Danube have undergone great alterations． （Plin．iv．12．s． 24 ；Mela，ii． 7 ；Avien．Descr．Orb． 440；Dion．Yerieg．401；Claud．IV Cons．Honor． 630，\＆r．）
［T．H．D．］
PEUCELAOTIS（Пevke入â̄tıs，Arriau，Anab．
iv．22，Indic． 4 ；Пeuko八ä̈тıs，Strab．xv．p．698； Plin．vi．17．s．21：Eth．Peucolaitae，Plin．；Hev－ $\kappa a \lambda \epsilon i s$, Dinnys．Per．1142），a district of India on the NW．froutier，along the Cophen or Cabul river，in the direction of the Panjib．The actual name of the town，which was probably Peucela，is nowhere found，but the form of the word leaves no doubt that it is，like the majority of the namew which have been preserved by Arrian，of genuine Sanscrit or Indian origin．Strabo and Pliny both call the city itself Peucolaitis．Arrian in one place gives the name to a district（iv．22），without mentioning that of the capital or chief town；in another he calls the capital Yeucelantis，or，according to the Florentine MS．，Peucela．（Indic．c．1．）There can be little donbt that this is the same place or district mentioned in Ptolemy under the form of Proclais（vii．1．§ 44）， and in the Periplus Mar．Erythr．（c．47）．Both are connected with the Gandarae，－the Sanscrit Gandiras，－and both are alike placed in NW． India．Prof．Wilson has shown that the Greek name is derived from the Sanscrit Pushkara or Pushkala， the Pushkalavati of the Hindus，which was placed by them in the country of the Gandharas，the Gandaritis of Strabo，and which is still represented by the modern Pekhely or Pakholi，in the neigh－ bourhood of Peshuiwur．（Wilson，Ariana，pp．183， 184．）
［V．］
PEUCE＇TII（Пevkétiol），a penple of Southern Italy，inhabiting the southern part of Apulia．This name was that by which they were known to the Greeks，but the Romans called them Poediculi， which，according to Strabo，was the national appel－ lation employed also by themselves．（Strab．vi．pp． $\mathbf{2 7 7}, 282$ ．）Their national affinities and origin，as well as the geographical details of the country occupied by them，will be found in the article Aputin．［E．H．B．］

PEUCI＇NI（Пevkivol，Ptol．iii．5．§ 19，10．§ 9 ； Strab．vii．p．305，seq．；Plin．iv．14．8．28），a branch of the Bastarnae，inhabiting the island of Peuce．Tacitus（Germ．46）and Jornandes（Goth． 16）write the name Peuceni，which also appears in several MSS．of Strabo；whilst Ammianus Marcel－ linus（xxii．8．§ 43）calls them Peaci，and Zosimus （i．42）Пєйкан．
［T．H．D．］
PHABIRANUM（\＄a6ipavov），a place in the country of the Chauci Minores，that is，the district between the Albis and Visurgis（Ptol．ii．11．§ 27）， is generally identified with the modern city of Bre－ men；though sume，with more probubility，look for its site at Bremervörde．（Wilhelm，Germanien， p．162．）
［L．S．］
PHA＇CIUM（\＄dкcov：Eth．Фaxicús），a town of
Thessaly，in the district Pelasgiotis，placed by Leake a little below the right bank of the Peneius at Alifuka，but by Kiepert upon the left bank． Brasidas marched through Phacium in B．c． 424. （lhuc．iv．78．）The town was laid waste by Pbilip， B．c． 198 （Liv．xxxii．13），and was occupied by the Koman praetor Baebius in the war with Antiochus， B．c．191．（Liv．xxxvi．13．）Phacium is probably the same place as Phacus，which Polybius（xxxi． 25）calls a town of Macedonia（Comp．Steph．B． s．v．：Leake，Northern Greece，vol．iv．p．493．）

PHACUSSA（Plin．iv．12．s． 23 ；Фakoû $\sigma \sigma a$ ， pl．，Steph．B．8．v．），an island in the Aegacan sea， one of the Sporades，now Fecussa．

PHAEA＇CES．［Corcyra．］
PHAEDRIADES．［DElfiI，p．764．］
PhaEDRIAS．［Megalopolis，p．309，b．］
PHAENLA＇NA（\＄aıvíava），a Lown in Rhaetia
or Vindelicia，on the southern bank of the Danube is mentioned only by Ptolemy（ii．12．§ 4）．［L．S．］

PHAENO（\＄aıv凶́，Euseb．Onomast．s．v．Фıvิ̀v； Фaı ${ }^{2}$ ，Hierocl．p．723），formerly a city of Idumaea， and afterwards a village of Arabia Petraea，between Petra and Zoar，containing copper mines，where con－ demned criminals worked．It was identified with Punon，one of the stations of the Israelites in their wanderings．（Numb．xxxiii．42；see Reland，Pa－ laestina，p． 951 ；Wesseling，ad Hierocl．l．c．）

PHAESTUS．1．（Фaı $\sigma$ ós：Eth．Фaif $\sigma t o s$ ），a town in the S ．of Crele，distant 60 stadia from Gortyna， and 20 from the sea．（Strab．x．p． 479 ；Plin． iv．12．s．20．）It was said to have derived its name from an eponymons hero Phaestus，a son of Her－ cules，who migrated from Sicyon to Crete．（Paus． ii．6．§ 7 ；Steph．B．s．v．；Eustath．ad Hom．l．c．） According to others it was founded by Minos．（Diod． v．78；Strab．l．c．）It is mentioned by Homer（Il． ii．648），and was evidently one of the most ancient places in the island．It was destroyed by the Gor－ tynians，who took possession of its territory．（Strab． l．c．）Its port was Matalum，from which it was distant 40 stadia，though it was only 20 ＇from the coast．（Strab．l．c．）We also learn from Strabo that Epimenides was a native of Phaestus．The in－ habitants were celebrated for their sharp and witty sayings．（Athen．vi．p．261，e．）Phaestus is men－ tioned also by Scylax，p．18；Polyb．iv． 55.

Stephanus B．（s．v．Фaıo $\sigma$ ós）mentions in the territory of Phaestus a place called Lisses，which he identifies with a rock in the Odyssey（iii．293）， where in our editions it is not used as a proper name， but as an adjective，－$\lambda t \sigma \sigma \boldsymbol{\eta}$ ，＂smooth．＂Strabo （l．c．）mentions a place Olysses or Olysse in the
 but this name is evidently corrupt；and instead of it we ought probably to read Lisses．This place must not be confounded with Lissus，which was situated much more to the W．（Kramer，ad Strab．l．c．）

coin of phaestus．
2．A town of Thessaly in the district Pelasgiotis， a little to the right of the Peneius．It was taken by the Roman praetor Baebius in B．c． 191. （Liv．xxxvi．13．）

3．A town of the Locri Ozolae in the interior， with a port called the port of Apollo Phaestius． （Plin．iv．3．s．4．）Leake places Phaestus at Vit－ hari，where are the ruins of a fortress of no great extent，and the port of Apollo near C．Andhromákhi． （Leake，Northern Greece，vol．ii．p．621．）

4．The later name of Phrisa in Triphylia in Elis． ［Phrixa．］

PHAGRES（Фáypचs，Hecat．ap．Steph．B．s．v．； Herod．vii． 112 ；Thuc．ii． 99 ；Scyl．p． 27 ；Strab． vii．p．331，Fr．33），a fortress in the Pieric hollow， and the first place after the passage of the Strymon． It is identified with the post station of Orfaná，on the great road from Greece to Constantinople，where Greek coins have been often found，and，among
other small productions of Hellenic art，oval sling bullets of lead，or the＂glandes＂of which Lucan （vii．512）speaks in his description of the battle of Pharsalia．These are generally inscribed with Greek names in characters of the best times，or with some emblem，such as a thonderbolt．（Leake，Northern Greece，vol．iii．p．176；Clarke，Travels，vol．viii． p．58．）
［E．B．J．］
PHAIA（\＄aía，Stadiasm．§ 43 ；ФӨía，Ptol．iv． 5. § 2），a harbour of Marmarica，the name of which Olshausen（Phoenizische Ortsnamen，in Rhein．Mus． 1852，p．324）connects with a Phoenician original． Barth（Reise，p．505）has identified it with a small bay upon the coast，a little to the N．of Wady Temmineh．
［E．B．J．］
PHALA＇CHTHIA（\＄a入ax日ia），a town of Thes－ saly in the district Thessaliotis．（Ptol．iii． 13. § 45.$)$

PHALACRA（фалáкра），a promontory of Mount Ida，in Mysia，of which the exact position is un－ known．（Eustath．ad Hom．Il．viii．47；Schol． ad Nicand．Alexiph． 40 ；Tzetz．ad Lycoph．40， 1170．）Stephanus Byz．，who mentions it under the name Phalacrae，states that all barren and ste－ rile mountains were called Phalacra．［L．S．］

PHALACRINE．［Falacrinum．］
PHALACRUM．［Corcyra，p．669，b．］
 town of Arcadia，in the district Maleatis on the road from Megalopolis to Sparta， 20 stadia from the Hermaeum towards Belbina．Leake originally placed it near Gardhiki，but subsequently a little to the eastward of Bura，where Gell remarked some Hel－ lenic remains among the ruins of the Burélka Ka－ lyvia．（Paus．viii．35．§ 3；Steph．B．s．v．；Leake， Morea，vol．ii．p．298；Peloponnesiaca，p．237．）
 town of the Perrhaebi in Thessaly，situated on the left bank of the Peneius，SW．of Gonnus．Strabo says（ix．p．440）that the Homeric Orthe became the acropolis of Phalanna；but in the lists of Pliny （iv．9．8．16）Orthe and Phalanna occur as two distinct towns．Phalanna was said to have derived its name from a daughter of Tyro．（Steph．B．s．v．） It was written Phalannus in Ephorus，and was called Hippia by Hecataeus．（Steph．B．）Pha－ lanna is mentioned in the war between the Romans and Perseus，B．c．171．（Liv．xlii．54，65．）Pha－ lanna probably stood at Karadjoli，where are the remains of an ancient city upon a hill above the village．（Leake，Northern Greece，vol．iii．p．379， vol．iv．p．298，）

PHALANTHUM（\＄á入av＊ov：Eth．Фàáveios），a town and mountain of Arcadia，in the district Oreho－ menia，near Methydrium．（Paus．viii．35．§ 9；Steph． B．s．v．；Leake，Peloponnesiaca，p．240．）

## PHALARA．［Lamia．］

PHALARUS．［Boeotia，p．412，b．］
PHALASARNA（ $\tau \grave{\alpha}$ фала́бapva：Eth．Фала－ $\sigma$ ápvos），a town of Crete，situated on the NW．side of the island，a little S ．of the promontory Cimarus or Corycus，described by Dicaearchus as having a closed－up port and a temple of Artemis called Dic－ tynna．Strabo says that Phalasarna was 60 stadia from Polyrrhenia，of which it was the port－town； and Scylax observes that it is a day＇s sail across from Lacedaemon to the promontory of Crete，on which is Phalasarna，being the first city to the west of the island．（Strab．x．pp．474，479；Scylax，pp． 17，18；Dicaearch．Descrip．Graec．119；Steph．B． s．v．；Plin iv 12．s．20．）The Cydonians had at
one time taken possession of Phalasarna，but were compelled by the Romans to give it up．（Polyb． xxiii．15．）

There are considerable remains of the walls of Phalasama．They exist in a greater or less degree of preservation，from its northern side，where it seems to have reached the sea，to its south－western point， cutting off the acropolis and the city along with it as a small promontory．There are other remains， the most curious of which is an enormons chair on the SW．side of the city，cut out of the solid rock； the height of the arms above the seat is 2 feet 11 inches，and its other dimensions are in proportion． It was no doubt dedicated to some deity，probably to Artemis．Near this chair there are a number of tombs，hewu in the solid rock，nearly 30 in number． （Pashley，Travels in Crete，vol．ii．p．62，seq．）

PHALE＇RUM．［ATtica，pp．304，305．］
PHALO＇RIA（Liv．；Фa入ढ́p $\eta$ ，Фала́ $\rho \epsilon \iota a$, Steph．B． s．v．：Eth．фa入opeús，фa入oopeíins），a town of His－ tizeotis in Thessaly，apparently between Tricca and the Macedonian frontier．Leake places it in one of the valleys which intersect the mountains to the northward of Trikkala，either at Sklítina or at Ardhim．（Liv．xxxii．15，xxxvi．13，xxxix．25； Leake，Northern Greece，vol．iv．pp．528，529．）

PHALYCLM（фd́入ukov），a town of Megaris mentioned by Theophrastus（Hist．PL ii．8），is clearly the same place as the Alycum（＂A入uко⿱）of Plutarch，who relates that it derived its name from a son of Sciron，who was buried there．（Thes．32．） It perhape stond at the entrance of the Scironian pass，where Dodwell（vol．ii．p．179）noticed some ancient vestiges，which he erroneously supposed to be those of Tripodiscus．［Tripodiscus．］
Phana，a town in Aetolia．［Parania．］
PHANAE．［Chios，p．609．］
PHANAGO＇RIA（థavayopia，Strab．xi．p． 494 ；
 ap．Steph．B．s．v．；Strab．xi．p． 495 ；Scymn．Ch． 891 ；Arrian，ap．Eustath ad Dionys．Per．306， 549；фaıעaүópŋ，Dionys．Per．552；comp．Priscian， 565：Arien．753；\＄avar6pa，Steph．B．s．v．Tav－
 Peripl．P．Euc．p．2；Phanagorus，Amm．Marc． xxii． 8 ；Фavaroupis，Procop．B．Goth．iv． 5 ：Eth． фavayopeús，less correctly фаvaүopeínns，Steph．B． 8．v．），a Greek city on the Asiatic side of the Cim－ merian Bosporus，founded by the Teians under Phanagorus or Phanagoras，who fled thither from the Persians．（Eustath．ad Dionys．Per．；Scymn． Ch．，Steph．B．，Peripl．P．Eux．U．cc．）It was situated upon an island，now called Taman，formed by the main branch of the Anticites（Kuban），which thows into the Black Sea，and a smaller branch，which falls into the sea of Azof．The main branch of the huban fonns a lake before it enters the sea，called in ancient times Corocondamitis（Strab．xi．p．494）， now the Kubanskoi Liman，on the left of which， entering from the sea，stood Phanagoria．（Strab．xi． p．495；respecting Phanagoria being upon an island， see Steph．B．，Eustath．，Amm．Marc．，l．c．）The city became the great emporium for all the traffic between the coast of the Palus Maeotis and the countries on the southern side of the Caucasus，and was chosen by the kings of Busporus as their capital in Asia，Panticapacum being their capital in Europe． （Strab．，Steph．B．，l．c．）It was at Phanagoria that the insurrection broke out against Mithridates the Great，shortly betore his death；and his sous，who beld the citadel，were obliged to surrender to the

PHARAE．
insurgents．（Appian，Mithr．108：Dict．of Biogr． Vol．II．p．1102，b．）In the sixth century of our era，Phanagoria was taken by the neighbouring bar－ barians and destroyed．（Procop．B．Goth．iv．5．） The most remarkable building in Phanagoria seems to have been a temple of Aphrodite，surnamed Apa－ turus（＇Axd́toupos），because the goddess，when at－ tacked by the giants in this place，is said to have summoned Hercules to her aid，and then to have concealed him and to have handed over the giants
 Strab．xi．p． 495 ；Steph．B．8．v．＇Aォáтoupov； Böckh，Inscr．No．2120．）We learn from an in－ scription that this temple was repaired by Sauro－ mates，one of the kings of Bosporus．The site of Phanagoria is now only a mass of bricks aud pot－ ters；and there is no building above ground．One cause of the disappearance of all the ancient monu－ ments at Phanagoria was the foundation in its neighbourhmod at an early period of the Russian colony of Tmutarakín．Dutour noticed traces of towers towards the eastern extremity of the town， where the citadel probably stood．The town of Ta－ man contains several ancient remains，inscriptions， fragments of columns，\＆c．，which have been brought from Phanagoria．There are numerous tombs above the site of Phanagoria，but they have not been ex－ plored like those at Panticapaeum．In one of them， however，which was opened towards the end of last century there was found a bracelet of the purest massive gold，representing the body of a serpent， having two heads，which were studded with rubies so as to imitate eyes and also ornamented with rows of gems．It weighed three－quarters of a pound． （Clarke，Travels，vol．i．p．394，seq．；Pallas，Reisen， vol．ii．p．286．\＆c．；Dubois，Voyage autour du Cat－ case，vol．v．p．64，seq．；Ukert，vol．iii．pt．ii．p．491．）

PHANAROEA（థaydpoia），a broad and exten－ sive valley in Pontus，watered by the rivers Iris， Lycus，and Scylax，and enclosed between the chain of Paryadres to the east，and Mounts Lithrus and Ophlimus to the west．The soil there was the best in Pontus，and yielded excellent wine and oil and other produce in abundance．（Strab．ii．p． 73，xii．pp．547，556， 559 ；Plin．vi．4；Ptol．v． 6. § 3，where it is erroneously called Phanagoris．） Phanaroea contained the towns of Eupatoria，Cabira， Polemonium，and others．［Pontus．］［L．S．］

PHA＇NOTE（Eth．фavotcús，Pol．），a strongly fortified town of Chaonia in Epirus，and a place of military importance．It stood on the site of the modern Gardhiki，which is situated in the midst of a valley surrounded by an amphitheatre of moun－ tains，through which there are only two narrow passes．It lies about halfway between the sea and the Antigonean passes，and was therefore of im－ portance to the Romans when they were advancing from Illyria in b．c．169．（Liv．xliii．23；Pol． xxvii． 14 ；Leake，Northern Grecce，vol．i．p．72，seq．）

PHANOTEUS．［Panopecs．］
PharaE（фарai）．1．Sometimes Pbara（фâpa， Strab．viii．p． 388 ；Pherae，Plin．iv． 6 ；фapífs， Herod．i．145，properly the name of the people：Eth． Фapıé́s，Strab．l．c．；\＄apaıє́＇s，Polyb．iv．6；Steph． B．s．v．：the territory $\boldsymbol{\eta}$ Фараıкћ，Strab．L．c．；Polyb． iv．59），a town of Achaia，and one of the twelve Achaean cities，was situated on the river Pierus or Peirus， $\mathbf{7 0}$ stadia from the sea，and $\mathbf{1 5 0}$ stadia from Patrice．It was one of the four cities which took the lead in restoring the Achaean League in b．c． 280．In the Social War（b．C．220，seq．）it
suffered from the attacks of the Aetolians and Eleans. Its territory was annexed by Augustus to Patrae, when the latter city was made a Roman colony after the battle of Actium. Pharae contained a large agora, with a curious statue of Hermes. The remains of the city have been found on the left bunk of the Kamenitza, near Prevezó. (Herod. i. 145; Strab. viii. pp. 386, 388; Pol. ii. 41, iv. 6, 59, 60, v. 94 ; Paus. vii. 22. § 1, seq.; Plin. iv. 6; Leake, Morea, vol. ii. p. 158.)
2. (Фapaí, Strab. Pans.: $\Phi \eta \rho \eta$, Hom. Il. v. 543: Фnpal, Il. ix. 151 ; $\Phi \in p a l$, Xen. Hell. iv. 8 . § 7 : Eth. \$apd́rns, Strab. viii. p. 388; Фapaidrचs, Paus. iv. 30. § 3: Kalamáta), an ancient town of Messenia, situated upon a hill rising from the left bank of the river Nedon, and at a distance of a mile from the Messenian gulf. Strabo describes it as situated 5 stadia from the sea (viii. p. 361), and Pausanias 6 (iv. 31. § 3); but it is prubable that the earth deposited at the mouth of the river Nedon has, in the course of centuries, encroached upon the sea Pherae occupied the site of Kulamita, the modern capital of Messenia; and in antiquity also it seems to have been the chief town in the southern Messenian plain. It was said to have been founded by Pharis, the son of Hermes. (Paus. iv. 30. § 2.) In the Iliad it is mentioned as the weli-built city of the wealthy Diocles, a vassal of the Atridae (v. 543), and as one of the seven places offered by Agamemnon to Achilles (ix. 151); in the Odyssey, Telemachus rests here on his journey from Pylos to Sparta (iii. 490). After the capture of Messene by the Achaeans in B. C. 182, Pharae, Abia, and Thuria separated themselves from Messene, and became each a distinct member of the league. (Polyb. xxv. 1.) Pharae was annesed to Laconia by Augnstus (Paus. iv. 30. § 2), but it was restored to Mesisenia byTiberius. [Messenia, p. 345.] Pausanias found at Pharae temples of Fortune, and of Nicomachus and Gorgasns, grandsons of Asclepius. Outside the city there was a grove of Apollo Carneius, and in it a fountain of water. (Paus. iv. 30. § 3, seq., iv. 31. § 1.) Strabo correctly describes Pharae as having an anchorage, but only for summer (viii. p. 361); and at present, after the month of September ships retire for safety to Armyro, so called from a river strongly impregnated with salt flowing into the sea at this place: it is the $\tilde{\delta} \delta \omega 0 \rho \dot{\alpha} \lambda \mu \nu \rho \dot{\delta} \boldsymbol{v}$, mentioned by Pausanias (iv. 30. §2) as on the road from Abia to Phariae.

There are no ancient remains at Kalamita, which is not surprising, as the place has always been well occupied and inhabited. The height above the town is crowned by a ruined castle of the middle ages. It was the residence of several of the Latin chieftains of the Morea. William Villehardouin II. was born here. In 1685 it was conquered and enlarged by the Venetians. It was the headquarters of the insurrection of 1770, and again of the revolution of 1821, which spread from thence over the whole peninsula. (Leake, Morea, vol. i. p. 342, seq. ; Boblaye, Récherches, ofc. p. 104 ; Curtius, Peloponnesos, vol. ii. p. 158.)
3. The later name of the Homeric Phare or Pharis in Laconia. [Phare.]

PHARAN or PARAN ( $\Phi_{\alpha} \alpha \bar{y}$ ), the name of a desert S. of Palestine, between this country and Aegypt. (Gen. xxi. 21 : 1 Kings, xi. 18.) It is nsually identified with the Wady Feirann, a beautiful and well watered valley, surrounded by mountains, NW. of Sinai, and near the western arm of the

Red Sea (Niebuhr, Reisebeschreibong, vol. i. p. 240, Arabien, p. 402); but though Feirdán may have preserved the ancient naine of the desert, it appears from Numbers (x. 12, 33, xiii. 26) that the latter was situated in the desert of Kadesli, which was upon the borders of the country of the Edumites, and which the Israelites reached after their departure from Mt. Sinai, on their way towards the land of Edom. (Burckbardt, Syria, p. 618.)

In the Wady Feirann are the remains of an ancient church, assigned to the fifth century, and which was the seat of a bishopric as early as A. D. 400. (Rubinson, Biblical Researches, vol. i. p. 186.) This city is described under the name of Feirias by the Arabic Edrisi, about A. D. 1150, and by Makrizi about A. D. 1400. (Burckhardt, Syria, p. 617.) It is apparently the same as Pharan (\$apáv). described by Stephanus B. (s. v.) as a city between Aegypt and Arabia, and by Ptolemy (v. 17. §§ 1,3 ) as a city of Arabia Petraea near the western arm of the Red Sea. A species of amethyst found in this valley had the name of Pharanitis. (Plin. xxxvii. 9. s. 40.) The valley of Pharan mentioned by Josephus (B. J. iv. 9. § 4) is obviously a different place from the Wady Feirán, somewhere in the vicinity of the Dead Sea, and is perhaps conconnected with the desert of Paran, spoken of above. (Robinson, Biblical Researches, vol. i. p. 552.)

PHARBAETHUS (\$d́p6aitos, Ptol. iv. 5. § 52; Steph. B. s. v.: Fith. \$apfaulitทs, Herod. ii. 166; Фар6ทтitns, Strab. xvii. p. 802), the capital of the Pharbaethite Nome in Lower Aegypt. (Plin. v. 9. s. 9.) It stord W. of the Yelusian arm of the Nile, 16 miles S. of Tanais. The nome was a Praefectura under the Roman emperors; and under the lharaohs was one of the districts assigned to the Calasirian division of the Aegyptian army. Pharbaethus is now Horbeyt, where the French Commission found some remains of Aegyptian statuary (Champollion, l'Egypte, vol. ii. p. 99). [W.B.D.]
 Фаркпб6ytos), a city of Histiaeotis in Thessuly, situated to the left of the Peneius, between Pelinnaeum and Atrax. It is probably represented by the ruins situated upon the slope of the rocky height above Gritziano. (Strab. ix. p. 438; Steph. B. 8. v.; Leake, Northern Greece, vul. iv. p. 316, seq.)

PHARE or PHARIS, afterwards called PHARAE ( $\Phi d p \eta$, Фâpıs, \$apal), a town of Laconia in the Spartan plain, situated upon the road from Amyclae to the sea. (Paus. iii. 20. § 3.) It was mentioned in the Iliad (ii. 582), and was one of the ancient Achaean towns. It maintained its independence till the reign of Telechus, king of Sparta; and, after its conquest, continued to be a Lacedaemonian town onder the name of Pharae. (Paus. iii. 2. § 6.) It was said to have been plundered by Aristomenes in the Second Messenian War. (Paus. iv. 16. §8.) It is also mentioned in a corrupt passage of Strabo (viii. p. 364), and by other ancient writers. (Lycophr. 552; Stat. Theb. iv. 226 ; Steph. B. s. v. \$âpis.) Pharis has been rightly placed at the deserted village of Bufio, which lies south of the site of Amyclae, and contains an ancient "Treasury," like those of Mycense and Orchomenus, which is in accordance with Pharis having been one of the old Achaean cities before the Dorian conquest. It is surprising that the French Cummission have given no description or drawing of
this remarkable monument. The only account we possess of it, is by Mure, who observes that "it is, like that of Mycenae, a tumulus, with an interior vault, entered by a door on one side, the access to n hich was pierced horizontally through the slope of the hill. Its situation, on the summit of a knoll, itself of rather conical form, while it increases the apparent size of the turnulus, adds much to its general loftiness and grandeur of effect. The roof of the vault, with the greater part of its material, is now gone, its shape being represented by a round cavity or crater on the summit of the tumulus. The doorway is still entire. It is 6 feet wide at its upper and narrower part. The stone lintel is 15 feet in length. The vault itself was probably between 30 and 40 feet in diameter." Mure adds: "Menelaus is sxid to have been buried at Amyclac. This may, therefore, have been the royal vanit of the Spartan branch, as the Mycenaean monument was of the Argive branch of the Atridan family." But even if we suppose the monument to have been a sepulchre. and not a treasury, it stond at the distance of 4 or 5 miles from Amyclae, if this town is placed at Aghici Kyriaki, and more than 2 miles, even if placed, according to the French Commission, at Sklavokihori [Amyclar.] In addition to this, Menelaus, according to other accounts, was buried at Therapne. (Mure, Tour in Greece, vol. ii. p. 246 ; Leake, Morea, vol. iii. p. 3, Peloponnesiaca, p. 354; Curtius, Peloponnesos, vol. ii. p. 248.)

PHARMACC'SA (фap $\mu a x o \bar{v} \sigma \sigma a)$, a small island before the entrance of the bay of lassus. not fur from Cape Poseidion; its distance from Miletus is stated at 120 stadia. In this island Attalus was tilled, and near it Julius Caesar was once captured by pirates. (Stadiasm. Mar. Mag. p. 282; Steph. B. 2. v.; Suet. Caes. 4; Plut. Caes. 1.) It still bears its ancient name Farmaco. [L. S.]

PHARMATE'NUS (фар $\mu a r \eta \nu \delta s$ ), a small coast river of Yontus, 120 stadia to the west of Pharnacia. (Arrian, Peripl. Pont. Eux. p. 17 ; Anonym. Peripl. P.E. p. 12.) Hamilton (Researches, i. p. 266) identifies it with the Buzaar Su.
[L.S.]
PHARNA'CIA (фарעакía: Eth. Фapvakeús), an important city on the coast of Pontus Polemnniacus. was by sea 150 stadia distant from cape Zephyrium (Arrian, Periph Pont. Eux. p. 17; Anonym. Peripl. P. E. p. 12), bat by land 24 miles. According to Pliny (vi. 4) it was 80 ( 180 ?) miles east of Amisus, and 95 or 100 miles west of Trapezus. (Comp. Tab. Peut, where it is called Carnassus for Cerasus, this latter city being confounded with Pharnacia.) It was evidently founded by one Pharnaces, probably the grandfather of Mithridates the Great; and the latter during his wars with the Romans kept his harem at Pharnacia. Its inhabitants were taken from the neighbouring Cotyura, and the town was strongly fortitied. (Sirab. xi. p. 548; Plut. Lucull. 18.) The place acquired great prosperity through its commerce and navigation, and through the iron-works of the Chalybes in its vicinity. (Strab. xi. pp. 549, 551.) According to Scylux (p. 33) the site of this town had previously been occupiod by a Greek colony called Choerades, of which, however, nothing is known. But that he actually conceived Choerades to have occupied the site of Pharnacia, is clear from the mention of the island of Ares ("Apeces $थ \bar{\eta} \sigma o s$ ) in connection with it. for that island is known to have been situated off Iharnacia. (Arrian and Anonym. Peripl. l.c.) Arrian is the ouly one who atfiams that Pharnacia occupied the
site of Cerasns; and although he is copied in this iustance by the anonymous geographer, yet that writer afterwards correctly places Cerasus 150 stadia further east (p. 13). The error probably arnse from a confusion of the names Choerades and Cerasus; but in consequence of this error, the name of Cerasus was in the middle ages transferred to Pharnacia, which hence still bears the name of Kerasunt or Kerasonde. (Comp. Hamilton, Researches, i. pp. 250, 261, foll.: Cramer, Asia Minor, i. p. 281.) Pharnacia is also mentioned by Stephanus Byz. (s. v.), several times by Strubo (ii. p. 126, xi. p. 499, xii. pp. 547, 549, 560, xiv. p. 677), and by Ptolemy (v. 6. § 5). Kespecting its coins, see Eckhel (Loctr. Num. vol. iii. p. 357). Another town of the same name in I'hrygia is mentioned by Stephanus Byz. (8. v.).
[L. S.]
PHARODINI. [VARINI.]
PHAROS (\$áos, Ephorus, ap. Steph. B., Fr. 151 ; Scyl. p. 8 ; Scymn. p. 427; Diodor. 17. 13 ; Strab. vii. p. 315), an island off the coast of IIlyricum, which was colonised by Greek settlers from Paros, who, in the first instance, gave it the name of their own island, which was afterwards changed to Pharos. In this settlement, which took place B. c. 385, they were assisted by the elder Dionysius. When the Romans declared war against the Illyrians B c. 229, Demetrius, a Greek of Pharos, betrayed his miztress, Queen Teuta, for which he was rewarded with the greater part of her dominions. (Polyb. ii. 11.) The traitor, relying on his connection with the court of Macedon, set the Romans at defiance; he soon brought the vengeance of the republic upon himself and his native island, which was taken by L. Aemilius in в. c. 219. (Polyb. iii. 16 ; Zonar. viii. 20.) Pliny (iii. 30) and Ptolemy (ii. 17. § 14) speak of the island and city under the same name, Pharia (\$арía), and Polybius (l. c.) says the latter was strongly fortified. The city, the ancient capital, stood at Sturi Grad or Citta Vecchia, to the N. of the island, where remains of walls have been found, and coins with the legend $\Phi A R I \Omega N$. After the fall of the Roman Empire the island continued for a long time in the hands of the Narentine pirates. Its Slavonic name is Hear, a corruption of Pharos; and in Italian it is called Lésina or Liesina. For coins of Pharos see Eckhel, vol. ii. p. 160 ; Sestini, Monet. Vet. p. 42 ; Mionnet, vol. ii. p. 46. (Wilkinson, Dalmatia, vol. i. pp. 243-251; Neigebaur, Die Sud-Slaven, pp. 107 -111.)
[E. B. J.]
PHAKOS (\$\&́os, Strab. xvii. p. 791, seq.; Steph. B. s. v.: Eth. ©dpios), a long narrow strip of rock lying off the northern coast of Aegypt, having the New Port of Alexandreis E. and the Old Harbour SW. [Alexandreia, Vol. I. p. 97.] Its name is said to have been derived from a certain pilot of Menelaus, who, on his return from the Trojan War, died there from a serpent's bite. Pharos is mention y in the Odyssey (iv. 355). and is described as one day's sail from Aegypt. This account has caused considerable perplexity, since Pharos is actually rather less than a mile from the seaboard of the Delta; and it is not probable that the land, in the course of centuries. has advanced or the sea receded materially. It is perfectly intelligible, however, if we suppse the anthor of the Odyssey to mean by Aecyptus, not the country itself but its river, since the Pharos is even now nearly a day's sail from the Canopic arm of the Nile. Any other theory is untemable; for this portion of the coast of the Delta consists of rocky bars and
shelves, which remain unchanged, and, though its surface has been heightened, its superficial area has not been materially enlarged since the country was peopled. Pharos was inhabited by fishermen under the Pharaohs of Aegypt; but it first became a place of importance under the Macedonian kings. During his survey of the coasit, B. c. 332, Alexander the Great perceived that the island would form, with the help of art, an excellent breakwater to the harbour of his projected capital. He accordingly caused its southern extremity to be connected with the mainland by a stone mole seven stadia, or about an Euglish mile, in length, which from this circumstance was called the Heptastadium or Sevenfurlong Bridge. At either end the mole was left open for the passage of ships, and the apertures were covered by suspension bridges. In later times a street of houses, erected on the mole itself, converted the island of Pharos into a suburb of Alexandreia, and a considerable portion of the modern city stands on the foundations of the old Heptastadium.

Yet, long after its junction with the Delta, Pharos was spoken of as an island ( $\dot{\eta}$ ra入aí $\nu \bar{\eta} \sigma o s$, Aelian, H. An. ix. 21 ; тотро́тєроу עทेбos, Zonar. iv. 10). The southern portion of this rocky ledge (xoupas) was the more densely populated; but the celebiated lighthouse, or the Tower of the Pharos, stood at the NE. point, directly in a line with point Pharillon, on the eastern horn of the New Port. The lighthouse was erected, at a cost of 800 talents, in the reign of Ptolemy I., but was not completed until that of his successor Phitadelphus. Its architect was Sostratus of Cnidus, who, according to Pliny (xxxvi.12.s.18), was permitted by his royal patron to inscribe his own name apon its base. There is indeed another story, in which it is related that Sostratus, being forbidden to engrave his name on his work, secretly cut it in deep letters on a stone of the building, which he then adroitly covered with some softer and perishable material, on which were inscribed the style and titles of Ptolemy. Thus a few generations would read the name of the king, but posterity would behold the authentic impress of the architect. (Strab. xvii. p. 791 ; Suidas, s. v. $\Phi$ dpos ; Steph. B. s. v.; Lucian, de Conscrib. Hist. c. 62.) Pharos was the seat of several temples, the most conspicuous of whirh was one dedicated to Hephaestos, standing near the northern extremity of the Heptastadium.

That Pharos, in common with many of the Deltaic cities, contained a considerable population of Jews, is rendered probable by the fact that here the translators of the Hebrew Scriptures resided during the progress of their work. (Joseph. Antiq. xii. 2. § 13.) Julius Caesar established a colony at Pharos, less perhaps to recruit a declining population than with a view to garrison a post so inportant as regarded the turbulent Alexandrians. (Caesar, B. Civ.iii. 112.) Subsequently the island seems to have been comparatively deserted, and inhabited by fishermen alone. (Montfancon, Sur le Phare dAlexandrie, Mém. de l'Acad des Inscript.ix. p. 285.) [W. B. D.]

PHARPAR. [Damascus.]
PHARRA'SII. [Prasir.]
PHARSA'LUS ( $\Phi \alpha \rho \sigma a \lambda o s:$ Eth. Фapodilos: the territory is \$apбa入(a, Strab. ix. p. 430), one of the most important cities of Thessaly, situated in the district 'Thessaliotis near the contines of Phthiotis, upon the left bank of the Enipens, and at the foot of Mt. Narthacium. The town is first mentioned after
the Persian wars; but it is probable that it existed much earlier, since there is no other locality in this part of Thessaly to be compared to it for a combination of strength, resources, and convenience Hence it has been supposed that the city was probably named Phthia at a remote period, and was the capital of Phthiotis. (See Leake, Northern Greece, vol. iv. p. 484.) Among its ruins there are some remains which belong apparently to the most ancient times. On one side of the northern gateway of the acropolis are the remnants of Cyclopian walls; and in the middle of the acropolis is a subterrancous construction, built in the same manner as the treasury of Atreus at Mycenae. Leake observes that Pharsalus "is one of the most important military positions in Greece, as standing at the entrance of the most direct and central of the passes which lead from the plains of Thessaly to the vale of the Spercheius and Thermopylae. With a view to ancient warfare, the place had all the best attributes of a Hellenic polis or fortified town: a hill rising gradually to the height of $\mathbf{6 0 0}$ or $\mathbf{7 0 0}$ feet above the adjacent plain, defended on three sides by precipices, crowned with a small level for an acropolis, watered in every part of the declivity by subterraueous springs, and still more abundantly at the foot by sources so copions as to form a perennial stream. With these local advantages, and one of the most fertile plains in Greece for its territory, Pharsalus inevitably attained to the highest rank among the states of Thessaly, and became one of the largest cities of Greece, as its ruined walls still attest." The city was vearly 4 miles in circuit, and of the form or an irregular triangle. The acropolis consisted of two rocky tabular summits, united by a lower ridge. It was about 500 yards long, and from 100 to 50 broad, but still narrower in the connecting ridge. Livy speaks of Palaepharsalus (xliv. 1), and Strabo distinguishes between Old and New Pharsalus. (Strab. ix. p. 431.) It is probable that at the time of these writers the acropolis and the upper part of the town were known by the name of Palyepharsalus, and that it was only the lower part of the town which was then inhabited.
Pharsalus is mentioned by Scylax (p. 25) among the towns of Thessaly. In B. C. 455 it was besieged by the Athenian commander Myronides, after his victory in Boeotia, but without success. (Thac. i. 111.) At the commencement of the Peloponnesian War, Pharsalus was one of the Thessalian towns that sent succour to the Athenians. (Thuc. ii. 22.) Medius, tyrant of Larissa, took Pharsalus by force, about B. c. 395. (Diod. xiv. 82.) Pharsalus, under the conduct of Polydamas, resisted Jason for a time, but subsequently formed an alliance with him. (Xen. Hell. vi. 1. § 2, seq.) In the war between Antiochus and the Romans, Pharsalus was for a time in the possession of the Syrian monarch; but on the retreat of the latter, it surrendered to the consul Acilius Glabrio, B. c. 191. (Liv. xxxvi. 14.)

Pharsalus, however, is chiefly celebrated for the memorable battle fought in its neighbourhood between Caesar and Pompey, b. c. 48. It is a curious fact that Caesar has not mentioned the place where he gained his great victory; and we are indebted for the name to other authorities. The exact site of the battle has been puinted out by Leake with his usual clearness. (Northern Greece, vol. iv. p. 475 , seq.) Merivale, in his narrative of the battle (Bistory of the Romans under the Empire, vol. ii. p. 286, seq.), has raised some difficulties in the in-
terpretation of Caesar's description, which have been commented apon by Leake in an essay printed in the Traneactions of the Royal Society of Literature (rol iv. p. 68, seq., 2nd Series), from which the following account is taken.

A few days previous to the battle Caesar had taken possession of Metropolis, a city westward of Pharsalus, and had encamped in the plain between these two cities. Meantime Pompey arrived at Larissa, and from thence advanced southwards towards Pharsalus; he crossed the Enipeus, and encamped at the foot of the heights, which are adjacent to the modern Férsala on the east. Caesar's camp, or rather his last position before the battle, was in the plain between Pharsalus and the Enipeas, at the distance of abuat 3 miles from the still extant north-western angle of the walls of Pharsalus. There was a distance of $\mathbf{3 0}$ stadia, or about 4 Roman miles, from the two camps. (Appian, B.C. ii. 65.) Appian adds that the army of Pompey, when drawn up for battle, extended from the city of Pharsalus to the Enipeus, and that Caesar drew up his forces npposite to bim. (B.C. ii. 75.) The battle was fought in the plain immediately below the city of Phanalus to the north. There is a level of about $2 \frac{1}{1}$ miles in breadth between the Enipeus and the elevation or bauk apon which stood the northern walls of Pharsalus. Merivale is mistaken in saring that "the plain of Pharsalus, 5 or 6 miles in breadth, extends along the left bank of the Enipeus." It is true that 5 or 6 miles is about the breadth of the plain, but this breadth is equally divided between the two sides of the river; nor is there anything to support Merivale's conjecture that the course of the river may have changed since the tiine of the battle. Leake observes that the plain of $2 \frac{1}{2}$ miles in breadth was amply sufficient for 45,000 men drawn up in the usual manner of three orders, each ten in depth, and that there would be still space enough for the 10,000 cavalry, upon which Pompey fonnded chiefly his hopes of victory; for the breadth of the plain being too great for Caesar's numbers, he thought himself snre of being able, by his commanding force of cavalry, to turn the enemy's right.

At first Pompey drew up his forces at the foot of the hills; but when Caesar refused to fight in this position, and began to move towards Scotussa, Pompey descended into the plain, and arranged his army in the position already described. His right wing being protected by the Enipeus, which has precipitous banks, he placed his cavalry, as well as all his archers und slingers, on the left. Caesar's left wing was in like manner protected by the Enipeus; and in the rear of his right wing, behind his small body of horse, he stationed six cohorts, in order to sustsin the anticipated attack of the enemy's cavalry. Pompey resolved to await the charge. Caesar's line advanced running, halted midway to recover their breath, and then charged the enemy. While the two lines were thus occupied, Pompey's cavalry on the left began to execute the movement upon which he placed his hopes of victory ; but after driving back Caesar's small body of horse, they were nnexpectedly assailed by the six cohorts and put to flizht. These cohorts now advanced against the rear of Pompey's left; while Caesar at the same time brought up to his front the third line, which had been kept in reserve. Pompey's troops now gave way in every direction. Caesar then advanced to attack the fortified camp of the enemy, which was defeuded for some time by the cohorts left in charge
of it; but at length they fled to the monntains at the back of the camp. Pompey proceeded straightway to Larissa, and from thence by night to the sea-coast. The hill where the Pompeians had taken refuge being without water, they soon quitted it and took the road towards Larissa. Caesar fullowed them with four legions, and, by taking a shorter road, came up with them at the distance of 6 miles. The fugitives now retired into another mountain, at the foot of which there was a river; but Caesar having cut off their approach to the water before nightfall, they descended from their position in the morning and laid down their arms. Caesar proceeded on the same day to Larissia. Leake observes that the mountain towards Larissa to which the Pompeians retired was probably near Scotussa, since in that direction alone is any mountain to be found with a river at the foot of it.

In the time of Pliny. Pharsalus was a free state (iv. 8. s. 15). It is also mentioned by Hierocles ( $p$. 642) in the sixth century. It is now named Férsala ( $\tau d \boldsymbol{d} \Phi \dot{\rho} \rho \sigma a \lambda a$ ), and the modern town lies at the foot of the ancient Acropolis.

## COIN OF PHARSALIES.

PHARU'SII (\$apobotot, Strab. ii. p. 131, xvii. pp. 826, 828; Ptol. iv. 6. § 17 ; Polyb. ap. Plin. v. 1. s. 8, vi. 35), a penple on the $\dot{W}$. coast of $N$. Africa, about the situation of whom Strabo, Pliny, and Ptolemy are in perfect agreement with one another, if the thirty juurneys of Strabo (p. 826) between them and Lixus ( $E l-$-Araish), on the W. coast of Morocco, to the S. of Cape Spartel, be set aside as an error either of his information or of the text: which latter is not improbable, as numbers in MSS. are so often corrupt. Nor is this mere conjecture, because Strabe contradicts himself by asserting in another place (p. 828) that the Pharusii had a great desert between thein and Mauretania, which they crossed, like natives of the present day, with bags of water hung from the bellies of their horses. (Leake, London Geog. Journ. vol. ii. D. 16.) This locality, extending from beyond Cape bojador to the banks of the Senegal, was the seat of the many towns of the Tyrians, amounting, accotding to some (Strnb. p. 826), to as many as 300, which were destroved by the Pharusii and Nigritae. (Comp. Humboldt, Cosmos, vol. ii. p. 129, note 123, trans.) Strabo reckons this number of 300 commercial settlements, frmm which this part of the crast of the Atlantic received the dame of Sinus Emporicus, as an exaggeration. He appears in this to have followed the criticism of Artemidorns upon Eratosthenes, whom Strabo depreciates. The number 300 may be an exaggeration, or one not intended to be literally taken; but it is incredible that Eratosthenes should represent a coast as cuvered with Phoenician factories where none existed.

When Ezekiel prophesies the fall of Tyre, it is said (xxvii. 10) "The men of Pheres (the common version reads Persia), and Lud, and Phut were in thine armies." These Pheres thus joined with the Phut or Mauretanians, and the Ludim, who were

## PHASIS．

nomads of Africa（the Septagint and the Vulgate understand the Lydians），may be reasonably sup－ posed to belong to the same region．Without the vowel points，the name will represent the powerful and warlike tribe whom the Greeks call Pharasii． The similarity of the names seems to have given rise to the strange story which Sallust（B．J．18）copied from the Punic books，that Hercules had led an army of Persians into Africa．（＂Pharusii quondam Persae，＂Plin．v． 8 ；comp．Pomp．Mela，iii．10．§ 3．） The fierce tribes of Africa thus furnished the Phoe－ nicians with inexhaustible supplies of mercenary troops，as they afterwards did to Carthage．（Ken－ rick，Phoenicia，pp．135，277．）
［E．B．J．］

## PHARYGAE．［TARPHE．］

PHARY＇GIUM（\＄apíyioy），a promontory of Phocis，with a station for shipping，lying E．of Anticyra，between Marathus and Myus，now called Aghid．（Strab．ix．p．423；Leake，Northerm Greece， vol．ii．p．549．）

PHASAE＇LIS（фабaŋ入ls，Joseph．，Steph．B．， 2．v．；Фабท入is，Ptol．v．16．§ 7；Phaselis，Plin．xiii． 4．s． $19, \times x$ i．5．s． 11 ：Eth．$\Phi$ acan入（ $\tau \eta s$ ），a town of Palestine built by Herod the Great in the Aulon or Ghor，N．of Jericho，by which means a tract for－ merly desert was rendered fertile and productive． （Joseph．xvi．5．§ 2 ，xvii．11．§ 5，xviii．2．§ 2 ， B．J．i．21．§ 9．）The name seems still to have existed in the middle ages，for Brocardus，quoted by Robinson，speaks of a village named Phasellum， situated a league N．of Dik，and corresponding to the position of El－＇Aujeh，where there are ruins． （Robinson，Biblical Researches，vol．ii．p．305．）

PHASE＇LIS（фабך入is：Eth．фабท入írns），a ma－ ritime town of Lycia，on the Pamphylian galf， whence some say that it was 2 town of Pamphylia （Plin．v．36；Steph．B．＝v．；Dionys．Per．855； Stadiasm．Mar．Mag．§ 205）；but Strabo（xiv．p． 667）distinctly informs us that Phaselis belonged to Lycia，and that Olbia was the first Pamphylian town on the coast．The town was a Dorian colony（Herod．ii．178），situated on a headland， and conspicuous to those sailing from Cilicia to Rhodes．（Liv．$x \times x$ vii． 23 ；Cic．in Verr．ii．4．） Behind it rose a mountain of the same name，pro－ bably the same which is elsewhere called rà $\Sigma \delta \lambda^{2} \nu \mu a$ （Stadiasm．Mar．Mag．§ 204 ；Strab．xiv．p．666）； and in its vicinity there was a lake and a mountain－ pass leading between Mount Climax and the sea－ coast into Pamphylia．Phaselis had three harbours， and rose to a high degree of prosperity，though it did not belong to the political confederacy of the other Lycian towns，but formed an independent state by itself．It is mentioned by Thucydides（ii．69， comp．viii．88，89；Polyb．xxx．9）as a place of some importance to the commerce of the Athenians with Phoenicia and Cilicia．At a later period，having become the haunt of the pirates，it was attacked and taken by Servilius Isauricus．（Cic．in Verr． iv．10；Eutrop．vi．3；Flor．iii．6．）Although it was restored after this disaster，yet it never reco－ vered its ancient prosperity；and Lucan（viii． 249. \＆ec．）describes it as nearly deserted when visited by Pompey in his flight from Pharsalus．According to Athenaens（xiv．p．688）the town was celebrated for the manufucture of rose－perfume，and Nicander （ap．Athen．p．683）praised its roses．It was the common opinion among the ancients that the pha－ seli（ $\phi d \sigma \eta \lambda 01$ ），a kind of light sailing boats，were invented at Phaselis，whence all the coins of the turn show the image of such a boat．Pausanias
（iii．3．§ 6）reports that the spear of Achilles was exhibited in the temple of Athena at Pha－ selis．In Hierocles（p．683）the name of the place is corrupted into Phasydes；and the Acts of Coan－ cils show it to have been the see of a bishop．It may also be remarked that Phaselis was the birth－ place of Theodectes，a tragic poet and rbetorician of some note．（Steph．B．s．v．；comp．Scylax，p． 39 ； Ptol．v．3．§ 3，5．§ 2 ；Eckhel，Doctr．Num iii． p．6．）There are still considerable remains of the ancient Phaselis．The lake in its vicinity，says Beaufort（Karamania，p．56），is now a mere swamp， occupfing the middle of the isthmus，and was pro－ bably the source of those baneful exhalations which， according to Livy and Cicero，rendered Phaselis 80 unhealthy．The principal port was formed by a stone pier，at the western side of the isthmus；it projected about 200 yards into the sea，by which it has been entirely overthrown．The theatre is scooped rat of the hill，and fronting it are the re－ mains of several large buildings．There are also numerous sarcophagi，some of them of the whitest marble，and of very neat workmanship．The modern name of Phaselis is Tekrova（Comp．Fellows， Asia Minor，P．211，foll；Leake，Asia Minor， p．190．）
［L．S．］

## COIN OF PHASELIS．

PHASIA＇NI（\＄accavoi），a tribe in the eastern part of Pontus，on the river Phasis，froin which both they and the district called \＄acaunो $x^{\text {wipa }}$ derived their names．（Xenoph．Anab．iv．6．§ 5，vii．8．§ 25 ；Diodor．xir．29；Eustath．ad Dionye．Per． 689．）
［L．S．］
PHASIS（ $\Phi \hat{a} \sigma / 5$ ），a navigable river in Colchis，on the east of the Euxine，which was regarded in ancient times as forming the boundary between Eumpe and Asia，and as the remotest point in the east to which a sailer on the Euxine could proceed．（Strab．xi．p－ 497 ；Eustath．ad Dionys．Per． 687 ；Arrian，Periph． Pont．Eux．p．19；Herod．iv．40；Plat．Phned p． 109；Anonym．Peripl．Pont．p．1；Procop．Bell． Goth．iv．2，6．）Suhsequently it came to be looked upon as forming the boundary line between Asia Minor and Colchis．Its soarces are in the southern－ most part of the Montes Moschici（Plin．vi．4；Solin． 20）；and as these mountains were sometimes re－ garded as a part of Mount Caucasus，Aristotle and others place its sources in the Caucasus．（Strab． xi．p．492，xii．p．548；Aristot．Met．i．13；Pro－ cop．l．c．；Geogr．Rav．iv．20．）Strabo（xi．p．497； comp．Dionys．Per．694：Schol．ad Apollon．Rhod． ii．401）makes the Phasis in a general way flow from the mountains of Armenia，and Apollonius specifies its sources as existing in the country of the Ama－ ranti，in Colchis．For the first part of its course westward it bore the name Buas（Procop．Bell．Pers． ii．29），and after receiving the waters of its tribu－ taries Rhion，Glaucus，and Hippus，it discharges itself as a navigable river into the Euxine，near the town of Phasis．（Strab．xi．pp．498，500；Plin． l．c．）Some of the most ancient writers believed
that the Phasis was connected with the Northern Ocear. (Schol ad Apollon. Rhod. iv. 259; Pind. I'gth. iv. 376. Isthin. ii. 61.) The length of its course was also erroneonsly estimated by some at 800 Roman miles (Jul. Honor. p. 697, ed. Gronov.), but Aethicus (Cosmogr. p. 719) states it more correctly to be only 305 miles. The fact is that its course is by no means very long, but rapid, and of such a nature as to form almont a semicircle; whence Agathemerus (ii. 10) states that its mouth was not far from its sources. (Comp. Strab. xi. p. 500; Apollon. Rhod. ii. 401 : Ov. Met. vii. 6; Amm. Misc. xxii. 8; Prisc. 673.) The water of the Phasis is described as very cold, and as so light that it swam like oil on the Euxine. (Arrian, Peripl. Pont. Eux. p. 7, \&cc.; Procop. Bell. Pers. ii. SO; comp. Hesiod. Theog. 340 ; Hecat. Fragn. 1 s 7 ; Herud. iv. 37, 45, 86; Scylax, p. 25 ; Polyb. iv. 56, v. 55; Ptol. v. 10. §§ 1, 2.) The different statements of the ancients respecting the sources and the course of this river probably arose from the fact that different rivers were understood by the name $P$ hasis: but the one which in later times was commonly devignated by it, is undoubtedly the modern Rioni or Kion, which is sometimes also mentioned under the name Fachs, a corruption of Phasis. It has been conjectured with great probability that the river called Phasis by Aeschylus (ap. Arrian, l. c.) is the Hypanis; and that the Phasis of Xenophon (Anob. iv. 6. §4) is no other than the Araxes, which is actually mentioned by Constantine Porphyr. (de Admin. Imp. 45) under the two names kirax and Phasis.
[L. S.]
PHASIS ( $\Phi \hat{a} \sigma$ (s), the easternmost town on the coast of the Eusine, on the southern bank, and near the mouth of the river Phasis, which is said to have received this name from the town having previously been called Arcturus. (Plut. de Fluv. 8. v.; Eustath. ad Dion. Per. 689.) It was situated in a plain between the river, the sea, and a lake, and had been founded by the Milesians as a commercial establishment. (Strab. xi. p. 498; Steph. B. s. v.) The country around it was very fertile, and rich in tirimber, and carried on a considerable export commerce. In the time of Ammianus Marcellinus ( $x$ xii. 8), the place still existed as a fort, with a garrison of 400 picked men. It contained a temple of Cybele, the great goddess of the Phasiani. (Comp. Arrian, Peripl. Pont. Eux. p. 9; Scylax, p. 32; Strab. xi. pp. 497, 500 ; Ptol. v. 10. § 2, viii. 19. § 4; Pomp. Mela, i. 19 ; Plin. vi. 4 ; Zosim. ii. 33.) Some geographers regard Phasis and Sebastopolis as two names belonging to the same place [Sebastopolis]. The name of the town and river Phasis still survires in the languages of Europe in the wood pheaxants (phasianae aves), these birds being said to have been introduced into Europe from those regions $2 s$ early as the time of the Argonauts. (Aristoph. Acharn. 726 ; Plin. ii. 39, 44, x. 67 ; Martial, iii. 57, 16; Suet. Vit. 13; Petron. 93.) [L. S.]

PHASIS ( $\Phi \hat{a} \sigma t s$ ), a river of Taprobane or Ceylon. It is clear from the statement of Ptolemy that it was on the N . side of the island; but like other rivers and places in that island, it is hardly possible nive to identify it with any modern stream. Forbiger has conjectured that it is the same as the Awerie. Lasen has supposed it to be the Ambá, in that portivn of the island which was called Nagadwipa. li this be so, it flowed into the sea a little to the N . of the narrow ledige of rocks which connects Ceylon with the mainland of Hindostin. Forbiger further
supposes that this is the same river which Pliny calls Cydara in his account of the island of Tapro. bane (vi. 22. s. 24).

PHAURA. [ATtica, p. 330, b.]
PhaZANIA. [Garamantrs.]
PHAZE'MON ( $\Phi$ a ${ }_{\eta} \eta \mu \omega \dot{\nu} \nu$ ), a small town in the west of Pontus, south of Gazelonitis, and north of Amasia; it contained hut mineral springs, which, according to Hamilton (Researches, i. p. 333), are the modern baths of Caursa. (Strab. xii. pp. 553, 560, 561.) Pompey, after his victory over Mithridates, planted a colony there, and changed its name into Neapolis, from which the whole district was called Neapolitis, having previously been called Phazemonitis. (Strab. xii. p. 560; Steph. B. s. v. $\boldsymbol{\Phi}$ a$\mu_{1} \int_{\omega} \dot{\nu}$, for thus the name is erroneously written.) Phazemon is generally supposed to correspond in situation with the modern town of Mazifun or Marsifun.
[L.S.]
PHECA or PHECADUM, a fortress near Gomphi in Thessaly. (Liv. $x \times x$ i. 41, xxxii. 14.) [Gomphi.] PhEGAEA. [Attica, p. 330, b.]
PHE'GIA. [Psophis.]
PHEIA or PHEA (aí \$eial, Hom. Il. vii. 135, Od. xv. 297 ; Фeıd, Thuc. Strab; Феá, Steph. B. s. v.: Eth. фєárทs, Steph. B.), a city of Elis in the Pisatis, situated upon the isthmus connecting the promontory Ichthys (C. of Katikolo) with the mainland. Strabo erroneously speaks of two promontories upon this part of the coast; one called Pheia, from the name of the neighbouring town, and another more to the south, of which he has not given the name. (Strab. viii. 343.) Pleia is mentioned by Homer, who places it near the Iardanus, which is apparently the mountain torrent north of Ichthys, and which flows into the sea on the northern side of the lofty muuntain Skaphidi. (Hom. l.c.) Upon a very conspicuous peaked height upon the isthmus of Ichthys are the ruins of a castle of the middle ages, called Pontikikiastro, built upon the remains of the Hellenic walls of Pheia On either side of Ichthys are two harbours; the northern one, which is a small creek, was the port of Pheis; the southern one is the broad bay of Katikolo, which is now much frequented, but was too open and exposed for ancient navigation. The position of these harbours explains the narrative of Thucydides, who relates that in the first year of the Peloponnesian War (b. c. 431), the Athenian fleet, having sailed from Methone in Messenia, landed at Pheia (that is, in the bay of Katákolo), and laid waste the country; but a storm having arisen, thoy sailed round the promontory Ichthys into the harbour of Pheia. In front of the harbour was a small island, which Polybius calls Pheias (Strab. l. c.; Polyb.iv.9). About a mile north of the small creek at Pontikodiastro, there is a harbour called Kkortus, which Leake is disposed to identify with the port mentioned by Thucydides, on the ground that the historian describes it "not as the port of Pheia, but as a harboar in the district
 more probable that the historian intended the creek at the foot of Pontikókastro. In any case Pheia stood on the isthmus of Ichthys, and neither at Khortus nor at the month of the torrent of Skaphidi, at one or other of which spots Pheia is placed by Boblaye, though at neither are there any ancient remains. (Leake, Morea, vol ii. p. 189, seq., Peloponnesiaca, p. 213, seq.; Boblaye, Récherches, gc. p. 131: Curtius, Peloponnesos, vol. ii. p. 44, seq.)

PHELLIA. [Laconia, p. 110, a.]

PHELLOE. [Aegeira.]
PHELLUS. [Antiphelles.]
PHE'NEUS (фévєos, Hom. Il. ii. 605; фeved́s, Steph. B. 8. v.: Eth. $\Phi \in \nu \in \alpha, \eta \eta s:$ the territory $\dot{\eta}$
 \$evint, Polyb.), a town in the NE. of Arcadia, whose territory was bounded on the N. by that of the Achacan towns of Acgeira and Pallene, E. by the Stymphalia, W. by the Cleitoria, and $S$. by the Caphyatis and Orchomenia. This territory is shut in on every side by lofty mountains, offshoots of Mt. Cyllene and the Aroanian chain; and it is about 7 miles in length and the same in breadth. Two streams descend from the northern mountains, and unite their waters about the middle of the valley; the united river is now called Foniatiko, and bore in ancient times the name of Olbius and Aroanius. (Paus. viii. 14. §3.) There is no opening through the mountains on the $S$. ; but the waters of the united river are carried off by katavothra, or subterranean channels in the limestone rocks, and, after flowing underground, reappear as the sources of the river Ladon. In order to convey the waters of this river in a single channel to the katavothra, the inhabitants at an early period constructed a canal, 50 stadia in length, and 30 feet in breauth. (Paus. l. c.; comp. Catull. lxviii. 109.) This great work, which was attributed to Hercules, had become useless in the time of Pausanias, and the river had resumed its ancient and irregular course; but traces of the canal of Hercules are still visible, and one bank of it was a conspicuous object in the valley when it was visited by Leake in the year 1806. The canal of Hercules, however, could not protect the valley from the danger to which it was exposed, in consequence of the katavothra becoming obstructed, and the river finding no outlet for its waters. The Pheneatae related that their city was once destroyed by such an inondation, and in proof of it they pointed out upon the mountains the marks of the height to which the water was said to have ascended. (Paus. viii. 14. § 1.) Pausanias evidently refers to the yellow border which is still visible upon the mountains and around the plain; but in consequence of the great height of this line upon the rocks, it is difficult to believe it to be the mark of the ancient depth of water in the plain, and it is more probably caused by evaporation, as Leake has suggested; the lower parts of the rock being constantly moistened, while the upper are in a state of comparative dryness, thus producing a difference of colour in process of time. It is, however, certain that the Pheneatic plain has been exposed more than once to such inundations. Pliny says that the calamity had occurred five times (xxxi. 5. s. 30); and Eratosthenes related a memomble instance of such an inundation through the obstruction of the katavothra, when, after they were again opened, the water rushing into the Ladon and the Alpheius overflowed the banks of those rivers at Olympia. (Strab. viii. p. 389.)

The account of Eratusthenes bas been confirmed by a similar occurrence in modern times. In 1821 the katavothra became obstructed, and the water continued to rise in the plain till it had destrnyed 7 or 8 square miles of cultivated country. Such was its condition till 1832, when the subterranenns channels again opened, the Ladon and Alphcius overflowed, and the plain of Olympia was inundated. Other ancient writers allude to the kutavolhra and subterraneons course of the river of Pheneus. (Theophr. Hist. Plant. iii. 1; Diod. xv. 49.)

Pheneus is mentinned by Homer (Il. ii. 605), and was more celebrated in mythical than in historical times. Virgil (Aen. viii. 165) represents it as the residence of Evander; and its celebrity in mythical times is indicated by its connection with Hercales. Pausanias found the city in a state of complete decay. The acropolis contained a ruined temple of Athena Tritonia, with a brazen statue of Poseidon Hippius. On the descent from the acropolis was the stadium; and on a ncighbouring hill, the sepulchre of Iphicles, the brother of Hercules. There was also a temple of Hermes, who was the principal deity of the city. (Paus. viii. 14. § 4, seq.)

The lower slope of the mountain, apon which the remains of Pheneus stand, is occupied by a villare now called Foniá. There is, however, some difficalty in the description of Pausanias compared with the existing site. Pausanias says that the acropolis was precipitous on every side, and that only a small part of it was artificially fortified; but the summit of the insulated hill, upon which the remains of Pheneus are found, is too small apparently for the acropolis of such an important city, and moreover it has a regular slope, though a very rugged surface. Hence Leake supposes that the whole of this hill formed the acropolis of Phenens, and that the lower town was in a paut of the subjacent plain; bat the entire hill is not of that precipitous kind which the description of Pausanias would lead one to suppose, and it is not impossible that the acropolis may have been on some other height in the neighboarhood, and that the hill on which the ancient remains are found may have been part of the lower city.

There were several roads from Pheneus to the surrounding towns. Of these the northern rad to Achaia ran through the Pheneatic plain. Upon this roal, at the distance of $\mathbf{1 5}$ stadia from the city, was a temple of Apollo Pythius, which was in ruins in the time of Pausanias. A little above the temple the rond divided, the one to the left leading acms Mt. Crathis to Aegeira, and the other to the right ruming to Pellene: the boundaries of Aegeira and Pheneus were marked by a temple of Artemis Pyronia, and those of Pellene and Pheneus by that which is called Porinas ( $\delta$ калоúpevos Hapivas), supposed by Leake to be a river, but by Curtius a rock. (Paus. viii. 15. $\S \S 5-9$.

On the left of the Pheneatic plain is a great mountain, now called Turtovana, but which is not mentioned by Pausanias. He describes, however, the two roads which led westward from Phenens around this mountain. - that to the right or NW. leading to Nonacris and the river Styx, and that to the left to Cleitor. (Paus. viii. 17. §.) Nomacris was in the territory of Pheneus. [Nonacris.] The road to Cleitor ran at first along the canal of Hercules, and then crossed the mountain, which formed the natural boundary between the Pheneatis and Cleitoria, close to the village of Lycuria, which still bears its ancient name. On the other side of the mountain the road passed by the sources of the river Ladon. (Paus. viii. 19. §4, 20. § 1.) This monntain, from which the Ladon springs, was called Pentelein (Mevteतfía, Hesych. and Phot. s. v.) The fortress, named Penteleium ( $\Pi$ evténeiov), which Plutarch says was near Pheneus, must have been situated upon this mountain. (Plut. Arat. 39, Cleom. 17.)

The sonthern road from Pheneus led to Orchomenus, and was the way by which Pausamias cane to the former city. The road passed frum the Ur-
chomenian plain to that of Phencus througn a narrow ravine（ $\phi \dot{a} \rho a \gamma \xi$ ），in the middle of which was a fountain of water，and at the further extre－ mity the village of Caryae．The mountains on either side were named Oryxis（＂Opvtss），and ScI－ athis（ $\mathbf{\Sigma}$ ilatis），and at the foot of either was a subterraneous channel，which carried off the water from the plain．（Paus．viii．13．§ 6，14．§ 1．） This ravine is now called Gióza，from a village of this name，which occupies the site of Caryae＊．The moantains on either side are evidently the Oryxis and Sciathis of Pausanias，and at the foot of either there is a katavothra，as he has remarked．
The eastern road from Pheneus led to Stym－ phalus，across Mt．Geronteium（now Skipezi），which formed the boandary between the territories of the two cities．
To the left of Mt．Geronteium near the road was a mountain called Tricrena（Tрiкр $\quad$ va），or the three fountains ；and near the latter was another mountain called Sepia（ $\sum \eta \pi i a$ ），where Aepytus is said to have perished from the bite of a snake． （Paus．viii．16．§§ 1，2．）（Leake，Morea，vol．iii． p．135，seq．，Peloponnesiaca，p．385，seq．；Curtius， Peloponnesos，vol．i．p．185，seq．）

## COIN OF THENEUS．

PheraE（ $\Phi$ épou：Eth．Фєpaîos，Pheraeus）． 1. One of the most ancient cities of Thessaly，was situated in the SE．corner of Pelasgiotis，W． of the lake Boebeis，and 90 stadia from Pagasae， Which served as its harbour．（Strab．ix．436．）It was celebrated in mythology as the residence of Admetus and his son Eumelus，the latter of whom led from Pherae and the neighbouring towns eleven ships to the Trojan War．（Hom．Il．ii．711－715．） Pherse was one of the Thessalian towns which assisted the Athenians at the commencement of the Peloponnesian War．（Thuc．ii．22．）At this time it was under the government of an aristocracy；but towards the end of the war Lycophron established a tyranny at Pherae，and aimed at the dominion of all Thessaly．His designs were carried into effect by his son Jason，whe was elected Tagus or general－ issimo of Thessaly about b．c．374，and exercised an important influence in the affairs of Greece． He had so firmly established his power，that，after his assassination in B．c． 370 ，he was succeeded in the office of Tagus by his two brothers Polydorus and Polyphron．The former of these was shortly after－ wards assassinated by the latter；and Polyphron was murdered in his turn by Alexander，who was either his nephew or his brother．Alexander go－ verned his native city and Thessaly with great cruelty till E．c． 359 ，when he likewise was put to death by his wife Thebe and her brothers．Two of these brothers，Tisiphonus and Lycophron，succes－

[^25]sively held the supreme power，till at length in b．c． 352 Lycophron was deposed by Philip，king of Macedon，and Pherae，with the rest of Thessaly， became virtually subject to Macedonia．（For details and authorities see the Lict．of Biogr．under the respective names above mentioned，）

In b．c． 191 Pherae surrendered to Antiochus， king of Syria，but it shortly afterwards fell into the hands of the Roman consul Acilius．（Liv．xxxvi． 9，14．）Situated at the end of the Pelasgian plain， Pherae possessed a fertile territory．The city was surrounded with plantations，gardens，and walled enclosures．（Polyb．xviii．3．）Stephanus B．（s．v．） speaks of an old and new Pherae distant 8 stadia from each other．

In the middle of Pherae was a celebrated fountain called Hypereia．（＇イлє́ $\rho \in \iota a$, Strab．ix．p． 439 ； Pind．Pyth．iv． 221 ；Sophocl．ap．Schol．ad Pind． l．c．；Plin．iv．8．s．15．）The fountain Messeis was also probably in Pherae．（Strab．ix．p． 432 ；Hom． Il．vi． 457 ；Val．Flacc．iv． 374 ；Plin．l．c．）

The remains of Pherae are situated at Velestino， where the ancient walls may be traced on every side except towards the plain．On the northern side are two tabular summits，below the easternmost of which on the southern side is the fountain Hy－ pereia，which rushes from several openings in the rock，and immediately forms a stream．Apollonius says（i． 49 ；comp．Schol．ad loc．）that Pherae was situated at the foot of Mt．Chalcodonium（ $\mathrm{X} \alpha \lambda \kappa \omega$ ． $\delta \delta \nu$ ov ），which is perhaps the southern and highest summit of Mt．Karadaigh．（Leake，Northern Greece，vol．iv p． 439 ，seq．）

2．In Messenia．［See Pharal，No．2．］
PHERINUM，a fortress in Thessaly，of uncertain site．（Liv．xxxii．14．）

PHEUGARUM（ $\Phi$ © $u$＇rapov），a town in the northern part of Germany，probably in the territory of the Dulgubini．（Ptol．ii．11．§ 27．）Its site is commonly assigned to the vicinity of Paderborn in Westphalia（Wilhelm，Germanien，p．134）；but nothing certain can be said about it．［L．S．］

Phiala．［Palaestina，p．519，b．］
PHIA＇LIA．［Phgalia．］
PHIARA（ $\Phi$ iapa），a town of the district Sarga－ rausena，in Cappadocia（Ptol．v．6．§ 13），appears to be the same as the one mentioned in the Anto－ nine Itinerary（p．205）under the name of Phiarasis， which was 36 miles west of Sebastia．
［L．S．］
PHIBALIS．［Megara，p．317，a．］
PHI＇CIUM．［Boeotia，p．412，a．］
PHIGALIA or PHIALIA（ $\Phi$ เya入ía，Paus．；
 Steph．B．s．v．；Фıa入ía，Paus．；Фıá $\epsilon \iota a$, Polyb．： Eth．Фı子a入єús，Фıa入єús，Фıra入eít $\eta$ s），an ancient town of Arcadia，situated in the south－western cor－ ner of the country，close to the frontiers of Messenia， and upon the right bank of the Neda，about half－ way between the sources and the mouth of this river． The name Phigalia was more ancient than that of Phialia，but the original name had again come into use in the time of Pausanias（viii．39．§ 2）．The city was said to have derived its more ancient name from Phigalus，a son of Lycaon，its original founder， and its later name from Phialus，a son of Lycaon， its second founder．（Paus．l．c．；Steph．B．）In b．c． 659 the inhabitants of Phigalia were obliged to sur－ render their city to the Lacedaemonians，but they recovered possession of it again by the help of a chosen body of Oresthasians，who，according to an oracle，perished fighting against the Lacedaemonians．

QQ ？
(Pans. viii. 39. §§ 4, 5.) In в. c. 375 Phigalia was rent asunder by hastile factions; and the supporters of the Lacedaemonian party, being expelled from the city, took possession of a fortress in the neighbourhood named Heraea, from which they made excursions against Phigalia. (Diod. xv. 40.) In the wars between the Aetolians and Achaeans, Phigalia became for some time the bead-quarters of the Aetolian troops, who from thence plundered Messenia, till they were at length driven out by Philip of Macelon. (Polyb. iv. 3, seq., 79, seq.) The Phigaleans possessed several peculiar customs, respecting which Harmodius of Lepreum wrote a special work. This author relates that they were given to excess both in eating and drinking, to which their cold and ungenial climate may perhaps bave contribnted. (Athen. iv. p. 149, x. p. 442.)

Phigalia was still a place of importance when visited by Pausanias. He describes it as situated upon a lofty and precipitous hill, the greater part of the walls being built upon the rocks. There are still considerable remains of the ancient walls above the modern village of Pávlitza. The city was upwards of two miles in circumference. The rock, upon which it stood, slopes down towards the Neda; on the western side it is bounded by a ravine and on the eastern by the torrent Lymax, which flows into the Neda. The walls are of the usual thickness, faced with masonry of the second order, and filled in the middle with rubble. On the summit of the acropolis within the walls are the remains of a detached citadel, 80 yards in length, containing a round tower at the extremity, measuring 18 feet in the interior diameter. In ancient times a tomple of Artenis Soteira stood on the summit of the acropolis. On the slope of the mountain lay the gymnasium and the temple of Dionysus Acratophorus; and on the ground below, where the village of upper Pávlitza stands, was the agora, adorned with a statue of the pancratiast Arrachion, who lost his life in the Olympic games, and with the sepulchre of the Oresthasians, who perished to restore the Phigaleans to their native city. (Paus. viii. 39. $\$ \S 5,6,40 . \S 1$.) Upon a rock, difficult of access, near the union of the Lymax and the Neda, was a temple of Eurynome, supposed to be a surnane of Artemis, which was opened only once a year. In the same neighbourhood, and at the distance of 12 stadia from the city, were some warm baths, traces of which, according to the French Commission, are visible at the village of Tragoi, but the waters have long ceased to flow. (Paus. viii. $41 . \S 4$, seq.)

Phigalia was surrounded by mountains, of which Pausanias mentions two by name, Cotilium ( $\tau \boldsymbol{d}$ Kaotilioy) and Elarux ( $T \delta$ 'Eגdion), the former to the left of the city, at the distance of 30 stadia,
and the latter to the right at the distance of 30 stadia. As Cotilium lies to the NE. of Phigalia, and Pansanias in this description seems to have looked towards the east, Mt. Elaeum should probably be placed on the opposite side of Phigalia, and consequently to the south of the Neda, in which case it would correspond to the lofty mountain of Kúvela. Mt. Elaeum contained a cavern sacred to Demeter the Black, situated in a grove of oaks. Of the position of Mt. Cotilium there is no doubt. On it was situated the temple of Apollo Epicurius, which was built in the Peloponnesian War by Ictinus, the architect of the Parthenon at Athens. It was erected by the Phigaleans in consequence of the relief afforded by Apollo during the plague in the Peloponnesian War, whence he received the surname of Epicurius. The temple stood in a place called Bassae, and according to Pausanias excelled all the temples of Peloponnesus, except that of Athena Alea at Tegea, in the beauty of the stone and the accuracy of its masonry. He particularly mentions that the roof was of stone as well as the rest of the building. (Paus. viii. 41. §§ 7, 8.) This temple still remains almost entire, and is next to the Theseium at Athens the best preserved of the temples of Greece. It stands in a glen (whence the name Bâroal, Dor.
 tilium, in the midst of a wilderness of rocks, studded with old knotty oaks. An eye-witness remarks that "there is certainly no remnant of the architectural splendour of Greece more calculated to fascinate the imagination than this temple; whether by its own size and beauty, by the contrast it offers to the wild desolation of the surrounding scenery, or the extent and variety of the prospect from its site." (Mure, Tour in Greece, vol. ii. p. 270.) A spring rises about 10 minutes SW. of the temple, and soon afterwards loses itself in the ground, as Pausanias has described. North of the temple was the highest summit of the mountain, which one reaches in 10 minutes' time by a broad roud constructed by the Greeks. This summit was called Cotilum (K $\dot{\sigma} \tau \boldsymbol{\tau} \boldsymbol{\lambda} \boldsymbol{\nu}$ ), whence the whole mountain derived the name of Cotilian; here was a sanctuary of Aphrodite, of which there are still some traces. The grandeur of the ruins of the temple have given to the whole of the surrounding district the name of the Columns ( $\sigma$ roìs $\sigma$ oúdous or kodorvaus). The temple is at least two hours and a half from the ruins of the city, and consequently more than the 40 stadia, which Pausanias mentions as the distance from Phigalia to Cotilium; bat this distance perhaps applies to the nearest part of the mountain from the city.
In modern times the temple remained long unknown, except to the shepherds of the country. Chandier, in

GROUND I'LAN OF THE TRMPIE OF APOLLO AT BASSAK

## PHIGAMUS

PHILAE.

1765, was the first who gave any account of it; it was subsequently visited and described by Gell, Dudwell, and others; and in 1812 the whole temple was very carefully examined by a body of artists and scholars, who cleared away the ruins of the cella, and thus became acquainted with the exact form of the interior of the building. The results of these labours are given by Stackelberg, Der Apollotempel zus Bassä in Arkadien, Rom. 1826. The temple was a peripteral building of the Duric order. The stone of which it is built is a hard yellowishbruwn limestone, susceptible of a high polish. It faces nearly north and south, was originally about 125 feet in length and 48 in breadth, and had 15 columns on either side, and 6 on either front. There were also 2 columns in the pronaos and 2 in the posticum; so that the total number in the peristyle was 42, of which 36 are standing. The cella was too narrow to allow of interior rows of columns as in the Parthenon; but on either side of the cella five fluted Ionic semi-columns projected from the walls, which supported the timbers of the hypaethron. The frieze of the cella, representing contests between the Centaurs and the Lapithae, and between Amazons and Greeks, is now in the British Museum. (Leake, Morea, vol. i. p. 490, seq., vol. ii. p. 1, seq.; Ross, Reicen im Peloponnes, p. 98, seq.; Boblaye, Récherches, $q \subset$., p. 165; Curtius, Peloponnesos, vol. i. p 318, seq.)
PHIGAMUS (\$rrauoûs or Фurauoús), a small coast river in Pontus, flowing into the Euxine 160 stadia west of Polemonium. (Arrian, Peripl. Pont. Eur. p. 16; Anonym. Peripl. P. E. p. 11.) [L. S.]
PHILA, one of the small islands on the south coast of Gallia, which Pliny (iii. 5) enumerates between the Stoechades (Isles dHieres) and Lero and Lerina (Les Lérins). Pliny's words are: "Tres Stoecbades . . . Ab his Sturium, Phoenice, Phila : Lero et Lerina adversum Antipolim." There seem to be no means of determining which of the islets between the Isles d'Hieres and Sainte Margucrite represent these three small islands of Pliny. [Lerina; Lekox.]
[G. L.]
PHILA ( $\Phi i \lambda a$ ), a frontier fortress of Macedonia towards Magnesia, and distant 5 M. P. from Heracleia, which stood near the mouth of the Peneus, on the left bank. It was occupied by the Romans when their army had penetrated into Pieria by the passes of Olympus from Thessaly. (Liv. xlii. 67, zliv. 2, 3, 7, 8, 34.) Stephanus of Byzantium (s. ©.) 2sserts that it was built by Demetrius, son of Antigonus Gonatas, and father of Philip, who named it, after his mother, Pbila.
[E.B. J.]
PHILADELPHEIA ( $\Phi \iota \lambda a \delta e ́ \lambda \phi \in i a:$ Eth. Фı $\lambda \alpha-$ sedфefrs). 1. An important city in the east of Lydia, on the north-western side of Mount Tmolus, and not far from the southern bank of the river Cogamus, at a distance of 28 miles from Sardes. (Plin. v. 30; It. Ant. p. 336.) The town was founded by Attalus Philadelphus of Pergamum. (Steph. B. s. v.) Strabo (xiii. p. 628, comp. xii. p. 579), who places it on the borders of Catacecaumene, remarks that it frequently suffered from violent shocks of earthquakes; the walls and honses were constantly liable to be demolished, and in his time the place had become nearly deserted. During the great earthquake in the reign of Tiberius it was again deatroyed. (Tac. Ann. ii. 47.) But in the midst of these calamities Christianity flourished at Philadelpheia at an early period, as is attested by the book of Kevelations (iii. 7). The twrn, which is melu-
tioned also by Ptolemy (v. 2. § 17) and Hierocles (p. 669), gadlantly defended itself against the Turks on more than one occasion, until at length it was conquered by Bajazid in A. D. 1390. (G. Pachym. p. 290; Dich. Duc. p. 70; Chalcond. p. 33.) It now bears the name Alluhsher, but is a mean though considerable town. Many parts of its ancient walls are still standing, and its ruined churches amount to about twenty-four. (Chaldler, Travcls, p. 310, foll.; Richter, Wallfahrten, p. 513, foll.)
2. A town in the interior of Cilicia Aspera, on the river Calycadnus. above Aphrodisias. (l'tol. v. 8. §5; Hierocl. p. 710 , who mentions it among the episcopal sees of Isauria.) Beaufort (Karamania, p. 2233) supposes the site to be represented by the town of Mout or Mood, which Leake regards as the site once occupied bs Claudiupolis (Asta Minor, p. 17).
[L. S.]
3. A town of Palestine in the district of Peraea, east of Jordan, near the river Jabbok, was the later name of Rabbath-Ammon, sometimes called Rabbah only, the ancient capital of the Ammonites. (Deut. iii. 11 ; Josh. xiii. 25.) It was besieged by Joab and taken by David. (2 Sam. xi. 1, xii. 26-31; 1 Chron. xx. 1.) It recovered its independence at a later period, and we find the prophets denouncing its destruction. (Jer. xlix. 3; Ezek. xxv. 5.) Subsequently, when this part of Palestine was subject to Aegypt, the city was restored by Ptolemy Philadelphus, who gave it the name of Philadelpheia. (Steph. B. s. v.; Euscb. Onom. s. v. 'Pá $\mu a \theta$, 'A $\mu \mu$ dv.) Stephanus says that it was originally called Ammana, afterwards Astarte, and lastly Philadelpheia. It is frequently mentioned under its new name hy Josephus (B. J. i. 6. § 3, i. 19. § 5, ii. 18. § 1), and also by Ptolemy (v. 17. § 23), Pliny (v. 18. s. 16), Hierocles (p. 722), and upon coins. (Eckhel, vol. iii. p. 351.) The old name, however, did not go out of use, for Polybins speaks of the city under the name of Rabbatamana ('Pa66atáuava, v. 71); and the ruius are now called Amman, a name which they also bore in the time of Abulfeda. (Tab. Syr. p. 91.) Burckhardt has given a description of these ruins, with a plan. The most important are the remains of a large theatre. There are also remains of several temples, some of the columns being three feet and a half in diameter. A river flows through the ruins of the town. (Burckhardt, Syria, p. 357.)

PHILAE ( $\Phi$ inaí, Strab. i. p. 40, xvii. pp. 803, 818, 820 ; Diod. i. 22; Ptol. iv. 5. § 74; Senec. Qunest. Nat. iv. 1 ; Plin. v. 9. s. 10), was, as the number of the word both in the Greek and Latin denotes, the appellation of two small islands situated in lat. $24^{\circ} \mathrm{N}$., just above the cataract of Syene. Groskurd (Strab. vol. iii. p. 399) computes the distance between these islands and Syene at about $6 \frac{1}{2}$ miles. Philae proper, although the smaller, is, from its namerous and picturesque ruins, the more interesting of the two. It is not more than 1250 English feet, or rather less than a quarter of a mile, long, and about 400 feet broad. It is composed of Syenite stone: its sides are stecp and jerhaps escarped by the hand of man, and on their summits was built a lofty wall encompassing the island. For Philae, being accounted one of the burying-places of Osiris, was held in high reverence both by the Aegyptians to the N. and the Aethiopians to the S.: and it was deenned profane for any bat priests to dwell therein, and was accordingly sequestered and denominated "the unapprouchable" (G6atus,
