The statements of ancient writers concerning the origin of the population of Sardiuia are extremely various and conflicting, and agree only in representing it as of a very mixed kind, and proceeding from many different sources. According to Pausanias, who has given these traditions in the greatest detail, its first inhabitants were Libyans, who crossed over under the conmmand of Sardus, the son of a native hero or divinity, who was identified by the Greeks with Hercules. (Paus. x. 17. § 2.) This Sardus was supposed to have given name to the island, which was previously called, or at least known to the Greeks, by that of Ichnuss ('IXvoî $\sigma a$ ), from the resemblance of its general form to the print of a man's foot. (Paus. l. c. § 1 ; Sil. Ital. xii. 358360; Pseud. Arist. Mirab. 104.) Timaens, according to Pliny, called it Sandaliotis from the same circumstance (Plin. iii. 12. s. 17); but it is clear that neither of these names was ever in general use. The fact that the earliest population came from Africa is intrinsically probable enougb, though little value can be attached to such traditions. Pausanias indeed expressly tells us ( $L$ c. § 7) that the population of the mountain districts (the people whom he calls Ilienses) resembled the Libyans both in their physical characters and their habits of life. The next settlers, according to Pausanias, were a Greek colony under Aristacus, to whom some writers ascribe the foundation of Caralis; and these were followed by a body of Iberians under a leader named Norax, who founded the city called Nora in the SW. part of the island. Next to these came a body of Greeks from Thespiae and Attica, under the command of Iolaus, who founded a colony at Olbia in the NE. corner of the island. After this came a body of Trojans, a part of those who had escaped from the destruction of their city, and established thenselves in the southern part of the island. It was not till long afterwards that they were expelled from thence by a fresh body of Libyans, who drove them ap into the more ragged and inaccessible parts of the island, where they retained down to a late period the name of Ilienses ('LAteis, Paus. x. 17. §§ 2-7; Sil. Ital. xii. 360-368). The existence of a mountain tribe of this name is a well-attested fact, as they are mentioned by Livy as well as by the geographers; and it is probable that the casual resernblance of name gave occasion to the fable of their Trojan origin. [Iliensks.] The Iolai or Iolaenses, on the other hand, had lost their name in the time of Strabo, and were called, according to him, Diaghesbians ( $\Delta$ cay $\quad$ obeis, v. p. 225), a name which is, however, not found in any other ancient author. Another tribe, whose name is found in historical times, is that of the Balari, who, according to Pau-
sanias, derived their origin from a body of mercenaries in the service of Carthage, that had fled for refuge to the mountains. (Paus. l.c. § 9.) To tbese must be added the Corsi, whose origin is sufficiently indicated by their name. They dwelt in the mountains in the $N$. of the island (the Montagne di Limbarra), and had evidently crossed over from the adjacent island of Corsica, as they are described by Pausanias as having done. (Pans. Lc.)

It is idle to attempt to criticise such traditions as these; they are related with many variations by other writers, some of whom term the Iolsenses, others the Ilienses, the most ancient inhsbitants of the island (Diod. iv. 29, v. 15; Mel. ii. 7. § 19 ; Strab. v. p. 225 ; Sil. Ital. l. c.); and it is clear that the different mountain tribes were often confounded with one another. Strabo alone has a statement that the earliest inhabitants of Sardinis (before the arrival of Iolaus) were Tyrrhenians ( v . p. 225), by which he must probably mean Pelasgians, rather than Etruscans. We have no account of any Greek colonies in Sardinia during the historical period; though the island was certainly well known to them, and seems to have been looked upon as affording a tempting field for colonisation. Thus we are told by Herodotus that when Phocaes and Teos were taken by Harpagus (B. c. 545) the project was suggested that all the remaining Ionians should proceed in a body to Sardinia, and establish themselves in that island. (Herod. i. 170.) Again in 8. c. 499, Histiaeus of Miletus pmmised Darius to subdue the whole island for him; and it appears that the project of emigrating there was serionsly entertained. (Id. v. 106, 124.) Pausanias indeed represents the Messenians as thinking of amigrating there at a much earlier period, just after the close of the Second Messenian War, в. c. 668 (Paus. iv. 23. § 5); but none of these projects were realised, and it veems certain that there were no Greek settlements in the island at the time when it fell into the hands of the Carthaginians.

The Carthaginian conquest is indeed the first fact in the history of Sardinia that can be considered as resting on any sure historical foundation; and even of this the date cannot be fixed with certainty. It is probable indeed that at a much earlier period the Phoenicians had not only visited the coasts of Sardinia for commercial purposes, but had established trading stations or factories there. Diodorus indeed expressly tells us that they planted colonies in Sardinia, as well as in Sicily, Spain, and Africa (Diod. v. 35); and there seems some reason to ascribe to them the first foundation of the important cities of Caralis, Nora, and Sukci. (Movers, die Phönizier, vol. iii. pp. 558, 573.) But in this case, as in many others, it is impossible to separate distinctly what was done by the Phoenicians themselves and what by their descendants the Carthaginians. It is, however, certain that it was reserved for the latter to form extensive and permanent settlements in the island, of which they reduced the greater part under their authority. According to Justin. the first Curthaginian expedition took place under a leader named Malchus, who was, bowever, defeated in a great battle by the native barbarians. (Justin, xviii. 7.) The next invasion was conducted by Hasdrubal, the son of Mago, and the elder brother (if we may trust to the accuracy of Justin) of Hamilcar, who was killed at Himera, B. c. 480. Hasdrubal himself, after many successes, was slaiu in battle; but the Carthaginians seem to have from this time maintained their footing

SARDINIA.
in the island. (Id. xix. 1.) The chronology of Justin does not claim much confideuce; but it seems probable that in this instance it is not far from correct, and that we may place the Carthaginian conquest about $500-480$ в.c. It can hardly have taken place much earlier, as the Ionian Greeks still looked upon the island as open to colonisation in the reign of Darius Hystaspis.

Of the details and circumstances of the Carthaginian conquest we have no account; but we are told in general terms that they made themselves masters of the whole island, with the exception of the ragged mountain districts which were held by the Ilienses and Corsi. (Paus. x. 17. § 9 ; Pol. i. 10.) They founded many towns, and from their superior civilisation struck such deep root into the country, that even in the time of Cicero the manners, character, and institutions of the Sardinians were still essentially Punic. It even appears that a considerable part of the population was of Punic origin, though this was doubtless confined to the towns and the more settled districts in their immediate neighbourhood. (Cic. pro Scaur. §§ 15, 42, 45.) Bat notwithstanding these clear evidences of the extent of the Carthaginian influence, we have scarcely any account of the long period of above two centuries and a half, daring which they continued masters of all the more important portions of the isiand. An isolated notice occurs in B. C. 379 of a great revolt in Sardinia, the inhabitants of which took advantage of a pestilence that had afflicted the Carthaginians, and made a vigorous effort to shake off their yoke, but without success. (Diod. xv. 24.) We learn also that already at this period Sardinia was able to export large quantities of corn, with which it supplied the fleets and armies of Carthage. (Diod. xiv. 63, 77.) The story current among the Greeks, of the Carthaginians having systematically discouraged agricultare in the island (Pseud. Arist. de Mirab. 104), is therefore, in all prubability, without fonndation. Daring the First Panic War (b. c. 259) L. Cornelius Scipio, after the conquest of Aleria in Corsica, directed his course to Sardinia, where he defested the Carthaginian fleet near Olbia, bat did not venture to attack that city. (Tonar. viii. 11.) Having, however, received reinforcements from Rome, he landed in the island, totally defeated the Carthaginian general Hanno, and took the city of Olbia, as well as several minor towns. The next year C. Sulpicius followed up this advantage, and ravaged the greater part of the island, apparently with little opposition. (Zonar viii. 11, 12; Pol. i. $24 ;$ Otue iv. 7, 8; Flor. ii. 2. § 16; Val. Max. v. 1.§ 2.)

No real footing was, however, gained by the Romans in Sardinia during the First Punic War; and the peace which put a close to that contest left the island subject to Carthage as before. But a few rears afterwards the Carthaginian mercenaries in Sardinia followed the example of their brethren in Africa, and raised the standard of revolt; they were indeed overpowered by the natives, and driven out of the island, but their cause was esponsed by the Romans, who undertook to restore them, and threatened the Carthaginians with war if they attempted the restoration of their own dominion in Sardinia. The latter were exhausted with the long and fierce contest with their mercenary troops in Africa, and were in no condition to resist. They consequently submitted to the demands of the Romans, and agreed by treaty to abandon all claims to Sardinia, B. c.
238. (Pol. i. 79, 88; Appian, Pum. 5; Liv. xxi. 1.) But the Carthaginians could cede no more than they pussessed, and the whole island was at this time in the hands of the natives. Its solijugation was not effected by the Romans till after several campaigns; and though in B.c. 235 T. Manlius Torquatus triumphed over the Sardinians, and is said to have reduced the whole island to suljection (Eutrop. iii. 3; Oros. iv. 12 ; Vell. Pat. ii. 38; Fast. Capit.), it is clear that this statement must be understood with considerable limitation, as the consuls of the two succeeding years, Sp. Carvilits and Pomponius Matho, were still able to earn the distinction of a triumph "de Sardis." (Fast. Capit.) The conquest of the island was now considered complete; and it was reduced to the condition of a province, to which a praetor was annually sent. Corsica was soon after annexed to his jurisdiction. But it is certain that the wilder mountain tribes of the interior, though they may have tendered a nominal submission, were not really subduted, and continued long after to molest the settled parts of the island by their depredations, as well as to find employment for the arms of the praetor by occasional outbreaks of a more serious description.

During the Second Punic War, Sardinia was naturally watched with considerable jealousy, lest the Carthaginians should attempt to regain possession of what they had so long held. But the war which broke out there in B. c. 215, under a native chief named Hampsicora, is attributed by the Roman writers themselves in great measure to the severity of taxation and the exactions of their governors. T. Manlius Torquatus, the same who as consul had already triumphed over the Surdinians, was appointed to quell this insurrection. He defeated the Sardinians under Hiostus, the son of Hampsicora, in the neighbourhood of Cornus: but the arrival of a Carthaginian force under Hasdrubal gave fresh spirit to the insurgents, and the combined armies advanced to the very gates of Caralis. Here, however, they were met by Torquatus in a pitched battle and totally defeated. Hasdrubal was taken prisoner, Hiostus slain in the battle, and Hampsicora in despair put an end to his own life. The remains of the defeated army took refuge in the fortress of Cornus; but this was soon reduced by Manlius, and the other towns of Sardinia one after the other made their submission. (Liv. xxiii. 32, 40, 41.)

From this time we hear no more of any general wars in Sardinia; and the large supplies of corn which the island began to fornish to Rome and to the armies in Italy (Liv. xxv. 22, xxx. 24) sufficiently prove that a considerable part of it at least was in the peaceable possession of the Roman anthorities. The mountain tribes were, however, still unsubdued; and in в. $\mathbf{c}$. 181 the llienses and Balari broke out into a fresh insurrection, which assumed so formidable a character that the consul Tib. Sempronius Gracchus was expressly sent to Sardinia to carry on the war. He defeated the insurgents with heavy loss, and followed up his victory with such vigour that he put to the sword or took prisoners not less than 80,000 persons. (Liv. xl. 19, 34, xli. 6, 12, 17, 28.) The number of captives brought to Rome on this occasion was so great that it is said to have given rise to the proverb of "Sardi venales" for anything that was chesp and worthless. (Vict. Vir. Ill. 65.) Another serious outbreak occurred in Sardinia as late as B. c. 114, to repress which M. Caecilius Metellus was
sent as procensul to the island, and after two years of continunus warfare he earned the distinction of a triumph, a sufficient proof of the formidable character of the insurrection. (Eutmp. iv. 25; Ruf. Fest. 4.) Tlis is the last time we hear of any war of importance in Sardinia; but even in the time of Strabo the mountaineers were in the habit of plundering the inhabitants of the more fertile districts, and the Roman praetors in vain endeavoured to check their depredations. (Strab. v. p. 225.)

The administration of the province was entrusted throughoat the period of the Republic to a praetor or proprator. Its general system was the same as that of the other provinces; but Sardinia was in some respects one of the least favoured of all. In the time of Cicero it did not contain a single free or allied city (civitas foederata) (Cic. pro Scaur. § 44): the whole province was regarded as conquered land, and hence the inhabitants in all cases paid the tenth part of their corn in kind, as well as a stipendium or annual contribution in money. (Cic. pro Balb. 18; Liv. xxiii. 41.) From the great fertility of the island in corn, the former contribution became one of the most important resources of the Roman state, and before the close of the Republic we find Sardinia, Sicily, and Africa alluded to as the "tria frumentaria subsidia reipublicae." (Cic. pro Leg. Manil. 12; Varr. R. R. ii. Pr. § 3; Valerins Muximus also terms them "benignissimae urbis nostrac nutrices," vii. 6. § 1.) Fur this reason, as soon as Pompeius was appointed to the command against the pirates, one of his first cares was to protect the coasts of these three provinces. (Cic. b. c.) Among the eminent persons who at different times filled the office of prator or propraetor in Sardinia, may be mentioned the elder Cato in B. C. 198 (Liv. xxxii. 8, 27); Q. Antonius Balbus, who was appointed by Marius to the government of the island, but was defeated and killed by L. Philippus, the legate of Sulla, в. c. 82 (Liv. Epit. Ixxavi.); M. Atius Balbus, the grandfather of Augustus, who was praetor in B. c. 62, and struck a coin with the head of Sardus Pater, which is remarkable as the only one belonging to, or connected with, the island [Biogr. Dict. Vol. I. p. 455] ; and M. Aemilius Scaurus, who was praetor in B. C. 53, and was accused by the Sardinians of oppression and peculation in his government, but was defended by Cicero in an oration of which some fragments are still extant, which throw an important light on the condition and administration of the island. (Cic. pro Scaur. ed. Orell.; Ascon. in Scaur.)
In b. c. 46 the island was visited by Caesar on his return from Africa, and the Sulcitani severely punished for the support they had given to Nasidius, the adiniral of Pompey. (Hirt. B. Afr. 98.) The citizens of Caralis, on the contrary, had shown their zeal in the cause of Caesar by expelling M. Cotta, who had been left by Pompey in charge of the island. (Caes. B. C. i. 30.) Sardinia was afterwards occupied by Menodorus, the lieutenant of Sextus Pompeius, and was one of the provinces which was assigned to the latter by the treaty of Misenum, B. o. 39 ; but it was subsequently betrayed by Menodorus himself into the hands of Octavian. (Dion Cass. xlviii. 30, 36, 45; Appian, B. C. v. 56, 66, 72, 80.) It was probably for some services rendered on one or other of these occasions that the citizens of Caralis were rewarded by obtaining the rights of Ruman citizens, a privilege apparently conferred on thiein by Augustus. ("Caralitani civiun Roma-
norum," Plin. iii. 7. s. 13.) This was in the dars of Pliny the only privileged town in the island: but a Roman colony had been planted in the extreme N . at a place called Turris Libysonis. (Plin. l. c.) Two other colonies were established in the island at a later period (probably under Hadrian), one at Usellis, on the W. coast, the other at Cornus. (Ptol. iii. 3. § 2; Zumpt, de Col. p. 410 .)

Under the Roman Empire we hear but little of Sardinia, which continued to be noted chietiy for its abundant supply of corn, and for the extreme unhealthiness of its climate. In addition to the last dissdvantage, it suffered severely, as already mentioned, from the perpetual incursions of the wild mountain tribes, whose depredations the Roman governors were unable to repress. (Strab. v. p. 225.) With the view of checking these marauders, it was determined in the reign of Tiberius to establish in the island a body of 4000 Jews and Egyptians, who, it was observed, would be little loss if they should perish from the climate. (Tac. Ann. ii. 85.) We have no account of the success of this experiment, bat it would seem that all the inhabitants of the island were gradually brought onder the Roman povernment, as at the present day even the wildest mountaineers of the interior speak a dialect of purely Latin origin. (De la Marmora, Voy. en Sard. vol. i. pp. 198, 202.) It is clear also from the number of roads given in the Itineraries, as well as from the remains of them still existing, and the ruins of aqueducts and other ancient buildings still extant, that the island must have enjoyed a considerable degree of prosperity under the Roman Empire, and that exertions were repeatedly made for its improvement. At the same time it was frequently chosen as a place of exile for political offenders, and nobles who had given umbrage to the emperors. (Tac. $A$ nn. xiv. 62, xvi. 9, 17 ; Dion Cass. Ivi. 27 ; Martial, viii. 32.) Its great importance to Rome down to the latest period of the Empire, as one of the principal sources from which the capital was supplied with corn, is attested by many writers, so that when at length it was occupied by the Vandals, it seemed, says a contemporary writer, as if the life-blood of the city had been cut off. (Prudent. adv. Symach. ii. 942; Salvian. de Provid. vi.)

During the greater part of the Rnman Empire Sardinia continued to be united with Corsica into one province: this was one of those assigned to the senate in the division under Augustus (Dion Cass. liii. 12); it was therefore under the government of a magistrate styled proconsul; but occasionally a special governor was sent thither by the emperor for the repression of the plundering natives. (Id. Iv. 28; Orell. Inscr. 74, 2377.). After the time of Constantine, Sardinia and Corsica formed two separate provinces, and had each its own governor, who bore the title of Praeses, and was dependent on the Vicarius Urbis Romae. (Nol. Dign. ii. p. 64; Böcking, ad loc.; Ruf. Fest.4.) It was not till A. D. 4.56 that Sardinia was wrested from the Roman Empire by Genseric, king of the Vandals: and though recovered for a time by Marcellianus, it soon fell again into the hands of the barbarians, to whom it continued subject till the fall of the Vandal monarchy in Africa, when Cyrillus recovered possession of the island for Justinian, A. D. 534. (Procop. B. V. i. 6, 10,11, ii. 5 .) It was again conquered by the Gothic king Totila in A. D. 551 (Id. B.G. iv. 24), but was recovered by Narses after the death of that monarch, and seems from this period to have
remained a dependency of the Byzantine Empire down to a late period. But in the 8 th century, after having suffered severely from the incursions of the Saracens, it passed for the most part into the hands of that people, though the popes continued to assert a nominal sovereignty over the island.

## III. Topography.

The principal physical features of Sardinia have been already described. Of the numerous ranges, or rather groups, of mountains in the island, the only ancient name that has been preserved to us is that of the Insani Montes (Liv. xex. 39; Claudian, B. G. 513; тג Maurbueva $\delta \rho \eta$, Ptol.), and even of these it is not easy to determine the position with any degree of accuracy: the name was apparently applied to the mountains in the N. and NE. of the island, which seem to have been regarded (though errovenasly) as more elevated than those farther $S$., so that the unhealthiness of the southern part of the island was popularly attributed ts the shutting out of the bracing north winds by this range of lofty monntains. (Claudian, l.c. 513-515.) From its extent and configuration, Sardinia could not possess any very considerable rivers. The largest were, the Thirsus (Oípgos, Ptol.: Tirso), which rises in the mountains in the NE. of the island, and flows into the Gulf of Oristano on the W. coast; the Sacer Fluvius ('Iepos notauós, Ptol.), which falls into the same gulf near Neapolis, now called the R. di Pabillonis; the Temus or Termus (Tépuos, Ptol.), still called the Temo, and falling into the sea near Bosa, to the N. of the Thyrsus; the Caedrius (Kaldpios, Ptol.). on the E. coast of the island, now the Fiume di Orosei; and the Saeprus (Kaırposs, Ptol.), now the Flumendosa, in the SE. quarter of the island. No ancient name has been preserved for the Rio Samassi, which flows into the Gulf of Cagliari, near the city of that name, though it is a more considerable stream than several of those named.

Ptolemy has preserved to us (iii. 3) the names of several of the more important promontories and headlands of the coast of Sardinia; and from its nature and configuration, most of these can be identifed with little difficulty. The most northern point of the island, opposite to Corsica, was the promontory of
 the Prenta del Falcone, or Lengo Sardo. The NW. point, forming the western boundary of an extensive bay, now called the Golfo del' Asinara, is the Gorditanam Prom. (Гopoítavoy axpov) of Pulemy: immediately opposite to it lies the Isola dell' Asimara, the Herculis Insula ('Hpariéous viños) of Ptolemy and Pliny, and one of the mowt considerable of the smaller islands which surround Sardinia. This headland forms the N. extremity of the ridge of mountains called Monti della Nurra: the $S$. end of the same range forms a bold headiand, now called Capo della Caccia, inmediately adjoining which is a deep land-locked bay, the Nymphreus Portus of Ptoleny ( $\mathrm{N} \dot{\mu} \mu \phi$ aios $\lambda \mu \dot{\eta} \nu$ ), now called Porto Conte. The Hermaeum Prom. ('Epuaiov arpor) of the same author is evidently the Cupo di Marragiu, about 12 miles N. of the river Temu: the Curacodes Portus (Kopancóns $\lambda 1 \mu \eta \nu$ ), which he places between that river and Tharros, is probably the amall bay that is found S. of Capo Manns. The Prom. Crassum ( Пaरcia axpa) must be Capo Altano, from whence the conast trends to the SE. as far as the Capo di Teuloula, the extreme S. point of the whole istand, which must be the oue called Cher-
sonesus by Ptolemy; but his positions for this part of the coast are very inaccurate. Opposite to this SW. corner of the island lay two small islands, one of them, called by Ptolemy the Island of Hawks ('Iepákw $\nu \hat{\eta} \sigma o s)$, is the Isola di S. Pietro; the other, now known as the Isola di S. Antioco, is
 while it is named by Pliny Enosis. It was joined to the mainland by a narrow strip of sand, and was the site of the celebrated town of Sulci, from whence the adjoining bay (now known as the Golfo di Palmas) derived the name of Sulcitanus Portus. Two other small ports mentioned by Ptulemy between Cape Teulada and the site of Nora (at Capo di Pula), Bitiae P'ortus and Herculis Portus, must be the small coves at Isola Rossa di Teulada and Porto Malfattano. The next headland, named Cunicularium I'rom. (Kouvikound́pov akpov, but the reading is doubtful), is the Punta della Savorra; and the promontory of Caralis must be the beadland immediately adjoining the city of that name, now called the Capo di S. Elia. Pliny, however, gives the name of Caralitanam Prum. to the SE. headland of Sardinia, for which (singularly enough) Ptolemy furnishes us with no name. The small island lying off it, called both by him and Pliny Ficaris, is a mere rock, now known as the Isola dei Cavoli. Proceeding along the E. casst of the island, we find the Sulpicius Portus (Zovarikios $\lambda(\mu \eta \nu)$, which cannot be identified with certainty,
 is certainly the Gulf of Terranova; while towards the NE. extremity of the island are two headlands called Columbarium and Arcti Promontorium. The latter is still called Capo dell Orso, from its fancied resemblance to the figure of a bear; the former cannot be clearly identified, though it is most probably the Capo di Ferro. Opposite this corner of Sardinia lie several small islands, of which the Isola della Madulalena is the most considerable, and next to it the Isola di Caprera. These are probably the Phintonis and Ilva of Ptolemy, while Pliny terms them Phintonis and Fossa. The Cuniculariae Insulae of Pliny are the small islets N. of these, now called the Isole dei Budelli.

The towns of Sardinia were not numerous, and but few of them attained to any importance, at least down to a late period. Hence they are very summarily dismissed by Strabo, who notices only Caralis and Sulci by name, while Pliny tells us the island contained eighteen " oppida," that is. towns of municipal rank, bat enumerates only six, besides the colony of Turris Libysonis (Strab. v. p. 22; Plin. iii. 7. 8. 13). The only towns which appear to have ever really been places of importance are: Caralis, the capita: of the whole island, in ancient as in modern times; Sulci, in the extreme SW. of the island, on the Isola di S. Antioco; Nora, on the coast between Caralis and Sulci at the Capo di Pula; Neapolis, on the W. coast, at the mouth of the Sacer Fluvius; Tharros, on a promontory at the N. extremity of the Gulf of Oristino ; Cornes, on the W. coart, about 16 miles further N.; Bosa (B $\bar{\omega} \sigma a$, Ptol. iii. 3. § 7; Itin. Ant. p. 83), also on the W. coast, at the mouth of the river Temus, still called Bosa; Turris Libisonis (Porto Torres), on the N. coast of the island; Tibula, at Lungo Sardo, near the extreme N. point or Cape Errebantium; and Olbia, on the Gulf of Terranova, in the NE. corner of the island. In the interior were: Forim Trajant (Fordungionus), situated on the river Thyrsus
almut 18 miles from its mouth; Userins, about 15 miles to the S . of the preceding; Valentia, to the SE. of Usellis: and Guruiss Vetus and Nova, both of which were situated between ${ }^{\circ}$ the rivers Thyrsus and Temus.

Of the minor towns mentioned by Ptolemy or the Itineraries, the following may be noticed: $1.0 n$ the W. coast, were Tilium (Ptol.), which must have been near the Capo Negretto: Osaca or Hosaca (Id.) at Flamentorgiu, a few miles W. of Neapolis: and Othoca (Itin. Ant.) apparently the modern Oristano, near the mouth of the river Thyrsus. 2. On the $\mathbf{S}$. coast, Pupulum (Ptol.) may probably be placed at Massacara, a few miles N. of Sulci; Bitia (Ptol.) at S. Isidoro di Teulada; and Tegula (Itin. Ant.) at the Capo di Terdada, the extreme S. point of the island. 3. On the E. coast, Feronia (Ptol.) must have been at or near Posada, 25 miles S. of Olbia, and is apparently the same place called in the Itineraries Portus Lugudonis. The other small places mentioned in the same Itinerary were probably mere stations or villages. 4. On the N. coast, besides the two considerable towns of Tibula and Turris Libysonis, Ptolemy places two towns, which he calls Juliola (probably the same with the Viniola of the Itinerary, still called Torre Vignola) and Plubium, which may probably be fixed at Castel Sardo. The small towns of the interior are for the most part very ancertain, the positions given by Ptolemy, as well as the distances in the Itineraries, varying so much as to afford us in reality but little assistance; and of the names given by Ptolemy, Erycinum, Heraeum, Macopsisa, Saralapis or Sarala, and Lesa, not oue is mentioned in the Itineraries. The Aquae Lesitanae (Ptol.) are probably the Acqui di Benctutti in the upper valley of the Thyrsus: the Aquae Hypsitanae are those of Fordungianus, and the Aquae Neapolitanae the Bagni di Siardara. There remain considerable ruins of a Roman town at a place called Castro on the road from Terranova (Olbia) to Oristano. These are supposed to mark the site of a place called in the Itineraries Lugudonec, probably a corruption of Lagudo or Lugudonis. In the SIV, portion of the island, also, between Neapolis and Sulci, are considerable Roman remains at a place called Antas, probably the Metalla of the Itineraries. (Itin. Ant. p. 84.).
The Itineraries give several lines of road through the island of Sardinia. (Itin. Ant. pp. 78-85.) One of these proceeded from Tibula, at the N. extremity of the island, which was the usual place of landing from Corsica, along the whole length of the E . coast to Ca ralis. It did not accurately follow the line of coast, though it seldom departed far from it, but struck somewhat inland from Tibula to Olbis, and from thence with someexceptions followed the line of coast. A more circuitons, but probably more frequented, route was that which led from Tibula to Turris Libysonis, and thence along the W. coast of the island by Bosa, Cornus, and Tharros to Othoca (Oristano), from which one branch led direct across the island through the plain of the Campidano to Caralis, while another followed nearly the line of the coast by Neapolis to Sulci, and from thence round the sonthern extremity of the island by Tegula and Nora to Caralis. Besides these, two other cross lines of road through the interior are given: the one from Olbia to Caralis direct, through the mountain country of the interior, and the other crossing the same wild tract from Olbis direct to Othoca. Very few of the stations on these lines of road can be identified, and the
names themselves are otherwise wholly nuknown The reader will find them fully discussed and examined by De la Marmorz (Voy. en Sardaigne, vol. ii. pp. 418-457), who has thrown much light on this obscure subject; but the results must ever remain in many cases uncertain.

We learn from the geographers that even under the Roman Empire several of the wild tribes in the interior of the island retained their distinctive appellations; but these are very variously given, and were probably subject to much fluctuation. Thus Strabo gives the names of four mountain tribes, whom he calls Parati, Sossinati, Balari and Aconites (Strab. v. p. 225), all of which, with the exception of the Balari, are otherwise entirely unknown. Pling mentions only three, the Ilienses, Balari, and Corsi, which he calls "celeberrimi in ea populoruin" (Plin. iii. 12. s. 17), and which are in fact all three well known names. The existence of the Ilienses under the Empire is also distinctly atteated by Pausanias (x. 17. § 7): yet neither their name nor that of the Balari is noticed by Ptolemy, though he gives those of no less than eighteen tribes as existing in his time. These are, beginning at the N. point of the island and proceeding from N. to S.: " the Tibulatii and Corsi, the Coracenses; then the Carenses and Cunusitanae; next to these the Salcitani and Luquidonenses; then the Aesaronenses; after them the Cornenses (called also Aechilenses); then the Ruacenses; nest to whom follow the Celsitani and Corpicenses; after them the Scapitani and Siculenses; next to these the Neapolitani and Valentini, and furthest to the $S$. the Sulcitani and Noritani." (Ptol. iii. 3. § 6). Of these the Corsi are otherwise well known [see above, pp. 908,909]; the four last names, as well as the Tibulates and Cornenses, are evidently derived from the names of towns, and are probably the inhabitants of districts manicipally dependent upon them, rather than tribes in the proper sense of the term. The other names are wholly unknown. After the fall of the Western Empire we find for the first time the name of Barbaricini (Baplapıkivol, Procop. B. V. ii. 13) applied to the mountaineers of the interior. This appellation. which appears to be merely a corruption of "Barbari vicini," was retained throughout the middle ages, and is still preserved in the name of Barbargia. giren to the wild mountain tract which extends from the neighbourhood of Cagliari towards the sources of the Tirso. These mountaineers were nut converted to Christianity till the close of the sixth centary, and even at the present day retain many curious traces of paganism in their customs and superstitious usages. (De la Marmora, vol. i. p. 30.)

## IV. Natural Productions, etc.

The chief produce of Sardinia in ancient times was, as already mentioned, its corn, which it produced in large quantities for exportation even before the period of the Roman conquest. Its mountain tracts were also well adapted for pasturage, and the native tribes subsisted mainly on the produce of their flocks and herds (Diod. v. 15), while they clothed themselves with the skins, whence they were sometimes called "pelliti Sardi." The island also poosessed mines both of silver and iron, of which the first are said to have been considerable. (Solin. 4. § 4.) They were undoubtedly worked by the Rumans, as we learn from existing traces, and from the name of Metalla given to a place in the SW: of the island, between Neapolis and Sulci (Itim

Ant. p. 84; De la Marmora, vol. ii. p. 453.) It had also extensive fisheries, especially of tunny; and of the murex, or shell-fish which produced the purple dye (Suid. s. v.). But its most peculiar natural productions were the wild sheep, or moufflon, called by the Greeks $\mu \boldsymbol{\mu v \sigma \mu \omega} \nu$ (Ovis Ammon Linn.), which is still found in large herds in the more unfrequented parts of the island (Strab. v. p. 225 ; Paus. x. 17. § 12 ; Aelian, H. A. xvi. 34), and a herb, called Herba Sardoa, the bitterness of which was said to produce a kind of convulsive grin on the countenances of those that tasted it, which was generally considered as the origin of the phrase, a Sardonic smile (risus Sardonicus; इapóćvios $\gamma$ é $\lambda$ cos, Paus. x. 17. § 13; Suid. s. v. Kapóóvıos; Serv. ad Virg. Ecl. vii. 41 ; Solin. 4. § 4.) But the etymology and origin of this phrase are exceedingly dnbious, and the peculiar herb alluded to by the ancients cannot be now ideutified. The bitterness of the Sardinian honey (Hor. A. P. 375), which was supposed to result from the same herb, is, however, a fact still observable at the present day. (Smyth's Sardinia, p. 104.) Pausanias mentions that the island was free from wolves, as well as from vipers and other renomous serpents, an advantage that it still enjoys (Paus. x. 17. § 12 ; Solin. 4. § 3; De la Marmora, vol. i. pp. 173, 177); but it contained a venomous spider, apparently a kind of tarantula, called Solifuga, which was peculiar to the island. (Solin. l.c.)

The native population of Sardinia seem to have enjoved a very evil reputation among the Romans. The harsh expressions of Cicero (pro Scaur. 9. §§ $15,42,8 \mathrm{sc}$.) must, indeed, be received with considerable allowance, as it was his object in those passages to depreciate the value of their testimony; but the proverbial expression of "Sardi venales" was generally understood as applying to the worthlessness of the individuals, as well as to the cheapness and abucdance of slaves from that country. (" Habes Sardos venales, alium alio nequiorem," Cic. ad Fam. vii. 24.) The praetors, even in the days of Angustus, seem to have been continually making inroads into the mountain territories for the purpose of carrying off slaves (Strab. v. p. 255); but as these mountaineers according to Strabo and Diodorus, lived in caves and holes in the ground, and were unacquainted with agriculture (Strab. l.c.; Diod. iv. 30), it is no wonder that they did not make nseful slaves.
Of the antiquities found in Sardinia, by far the most remarkable are the singular structures called by the inhabitants Nuraghe or Nuraggis, which are almost entirely peculiar to the island. They are a
kind of towers, in the form of a truncated cone, strongly built of massive stones, arranged in layers, but not of such massive blocks, or fitted with such skill and care, as those of the Cyclopean structures of Greece or Italy. The interior is occupied with one or more vaulted chambers, the upper cone (where there are two, one over the other, as is frequently the case) being approached by a winding stair or ramp, constructed in the thickness of the walls. In some cases there is a more extensive basement, or solid substruction, containing several lateral chambers, all constructed in the same manner, with rudely pointed vaultings, showing no knowledge of the principle of the arch. The number of these singular structures scattered over the island is prodigious; above 1200 have been noticed and recorded, and in many cases as many as twenty or thirty are found in the same neigbourhood: they are naturally found in very different degrees of preserration, and many varieties of arrangement and construction are observed among them; but their purpose and destination are still unknown. Nor can we determine to what people they are to be ascribed. They are certainly more ancient than either the Roman or Carthaginian dominion in the island, and are evidently the structures alluded to by the author of the treatise de Mirabilibus, which he describes as $\underset{\sim}{\text { ódo }}$, or vaulted chambers, the construction of which he ascribes to Iolaus. (Pseud. Arist. de Mirab. 104.) Diodorus also speaks of great works constructed by Daedalus for Iolaus, which must evidently refer to the same class of monuments. (Diod. iv. 30.) Both traditions are valuable at least as evidence of their reputed high antiquity; but whether they are to be ascribed to the Phoenicians or to the native inhabitants of the island, is a point on which it is very difficult to form an opinion. They are fully de scribed by De la Marmora in his Voyage en Sardaigne, vol. ii. (from which work the annexed figure is taken), and more briefly by Capt. Sinyth (Sardinia, pp. 4-7) and Valéry (Voy. en Sardaigne).

The work of De la Marmora, above cited, contains a most complete and accurate account of all the antiquities of Sardinia, as well as the natural history, physical geography, and present state of the island. Its authority has been generally followed throughout the preceding article, in the determination of ancient names and localities. The works of Captain Smyth (Present State of Sardinia, 8vo. London, 1828), Valéry (Voyage en Corse et en Sardaigne, 2 vols. 8vo. Paris, 1838), and Tyndale (Island of Sardinia, 3 vols. 8vo. London, 1849), though of much interest, are of inferior value.
[E. H. B.]

SARDONES．［Sombones．］
SARDO＇NYX（ $\left.\sum^{2} \alpha \delta \delta \dot{\omega} \nu \boldsymbol{\xi}\right)$ ，a mountain or chain of mountains in Hirulostan，noticed by Ptolemy（vii． 1．$\$ \S 20$ and 65）．It would seem to have been part of the range now known by the name of the Vindhya Mountains．Lassen，in his map，has identified them with the Pdyapippali Mountains on the right bank of the Narmada（Nerbudda），and Forbiger has supposed thein to be the Satpara Mountains，a con－ tinuation of the same chain．
［V．］
SARDO＇UM or SARDO＇NIUM MARE（ $\tau \delta$ इ Iap－
 yos，Herod．i．166），was the name given by the ancients to the part of the Mediterranean sea ad－ joining the island of Sardinia on the W．and S． Like all similar appellations it was used with con－ siderable ragueness and laxity；there being no na－ tural limit to separate it from the other parts of the Mediterranean．Fratnsthenes seems to have applied the name to the whole of the sea westward of Sar－ dinia to the const of Sprin（ap．Plin．iii．5．s．10）， so as to include the whole of what was termed by other authors the Mare Hibpanum or Baleari－ CUM；but this extension does not seem to have been generally adopted．It was，on the other hand， clearly distinguished from the Tyrrhenian sea，which lay to the E．of the two great islands of Sardinia and Corsica，between them and Italy，and from the Libyan sea（Mare Libycum），from which it was separated by the kind of strait formed by the Lilybaean promontory of Sicily，and the opposite point（Cape Bon）on the corst of Africa（Pol．i． 42；Strab．ii．pp．105，122；Agathem．ii．14； Dionys．Per．82．）Ptolemy，however，gives the name of the Libyan sea to that immediately to the S．of Sardinia，restricting that of Sardoum Mare to the W．，which is certainly opposed to the usage of the other geographers．（Ptol．iii．3．§ 1．）Strabo speaks of the Sardinian sea as the deepest part of the Mediterranean；its greatest depth was said by Posidonius to be nut less than 1000 fathoms． （Strab．ii．pp．50，54．）It is in fact quite un－ fathomable，and the above estimate is obvionsly a mere guess．
［8．H．B．］
SAREPTA（Édpє $\phi \theta a$ ），the＂Zarephath，a city of Sidon＂of the Old Testament（ 1 Kings，xvii． 9 ： 10；comp．St．Lrake，iv．26），apparently at the most extreme north（Obad．20），celebrated in the his－ tory of Elijah the prophet．It is said by Josephus to be not far from Tyre and Sidon，lying between the two．（Ant．viii．13．§ 2．）Pliny places it be－ tween Tyre and Oraithon，on the road to Sidon（v． 19．§ 17）．In the Itinerarium Hierosol mitanum the name does not occur，bat it is described by a periphrasis and placed viii．m．P．from Sidon（ p ． 583）．The Arabian geographer Sherif Ibn Idris， quoted by．Reland，places Zaraphand 20 miles from Tyre， 10 from Sidon．（Paluestina，p．985．）It was formerly celebrated for its wine，and is supposed to be intended by Pliny under the name of Tyrian， which be commends with that of Tripolis and Berytus（xiv．7）．Several of the later Latin poets have also sung the praises of the＂dulcia Bacchi munera，quae Sarepta ferax，quae Gaza crearet，＂ the quantity of the first syllable being common（ap． Reland，p．986）．The place is noticed by modern travellers．Dr．Robinson found＂a large village bearing the naine of Surrapend，＂five hours north of Tyre，three south of Sidon，near the sea－shore， where is a saint＇s tomb called El－Khüdr（ $=S t$ ． George），which he inayined to mark the site of a

Christian chapel mentioned by travellers in the middle ages．（Bibl．Res．vol．iii．pp．412， 413．）
［G．W．］
SARGANTHA［SRRguntia．］
SARGARAUSE＇NE（Eapyapauonvh），a district of Cappadocia，on the east of Commagene and near the frontiers of Pontus，containing，according to Ptolemy（v．6．§ 13），the towns of Phiara，Sinda－ gena，Gauraena，Sabalassus，Ariarathira，and Ma－ roga．（Strab．xii．pp．534， 537 ；Plin．vi．3．）［L．S．］

SARGE＇TIA（Zaprecia，Dion Cass．lxviii．14； Eapyevtia，Tzetz．Chil．ii． 61 ；Eapyévrcos，Tzetz． Chil．vi．53），a river of Dacia，upon which stood the roval palace of Decebalus．This river must be identitied with the Strel or Strey，a tributary of the Marosch，since we know that Sarmizegethusa was the residence of Decebalus．［Sarmizegethitsa．］ （Ukert，vol．iii．pt．ii．p．603．）

SARIPHI MONTES（ $\tau \alpha$ Zdapiфa $\delta_{p q}$ ），a chain of mountains，extending，according to Ptolemy，be－ tween Margiana and Ariana，and the watershed of several small streams．They are probably those now called the Hazaras．Mannert（v．2．p．65），has supposed them the same as the 之awфeipor（see Dion．Perieg．v．1099），but this is contrary to all probability．
［V．］
SARMA＇LIUS（It．Ant．p．203）or SARMA＇LIA （之apua入ia，Ptol．v．4．§ 8），a town in Galatia，on the rond from Ancyra to Tavia or Tavium，is sup－ posed by some to be the modern Karadjeleh．［L．S．］

SARMA＇TIA（ $\Sigma a p \mu d \tau i a: E t h . ~ \Sigma a p \mu d \tau a i)$ ，the name of a country in Europe and Asia．For the ear－ lier and Greek forms of the word see Sauromataz．

That $S-r m$ is the same root as $S-r b$ ，so that Sarmatae and Serbi，Servi，Sorabi，Srb，\＆cc．，may be，not only the name for the same populations， but also the same name，has been surmised，and that upon not unreasonable grounds．The name seems to have first reached the Greeks through the Scythians of the lower Dnieper and Don，who applied it to a non－Scythic population．Whether this non－Scythic population used it themselves， and whether it was limited to them by the Scy－ thians，is uncertain．It was a name，too，which the Getae used ；also one used by some of the Pan－ nonian populations．It was，prubably，the one which the Sarmatians themselves used partially，their neigh－ bours generally，just like Galli，Graeci，and many others．

More important than the origin of the name are the questions concerning（1）the area，（2）the po－ pulation to which it applied．Our chief anthority on this point is Ptolemy；Strabo＇s notices are inci－ dental and fragmentary．

The area given by Strabo to the Galatae and Germani，extends as far as the Borysthenes，or even the Don，the Tyrigetae being the most western of the non－German countries of the south－ east，and the Bastarnae being doubtful，－though，per－ haps，German（vii．p．289）．Of a few particular nations，such as the Jazyges，Hamasobii，and Rox－ olani，a brief notice is given，without，however，any special statement as to their Sarmatian or non－Sar－ matian affinities．In Asia，the country of the Sau－ romatae is called the plains of the Sarmatae，as opposed to the mountains of Caucasus．The inor－ dinate size given to Germany by Strabo well high obliterates，not only Sarmatia，but Scythia in Eurupe as well．

Pliny＇s notices are as incidental as Strabo＇s，and nearly as brief，－the development of Germany east－
wards being also inordinate. He carries it as far as the country of the Bastarnae.

The Germany of Tacitus is bounded on the east by the Sannatae and Inaci. The Sarmatae here are the population of a comparatively small area between the Darube and Theiss, and on the boundaries of Hungary, Mollavia, and Gallicio. But they are something more. They are the type of a large cless widely spread both eastward and northward; a class of equal value with that of the Germani. This, obvionsly, subtracts something from the vast extent of the Germania of Strabo (which nearly meant Northern Europe); but not enough. The pasition of the Bastarnue, Peucini, Venedi, and Finni, is still an open question. [ScrTHLA.]

This prepares us for something more systematic, and it is in Ptolemy that we find it. The Sarmatiae of Ptolemy fall into (1) the Eubopean, ard (2) the Asiatic.

## I. SARMATIA EUROPAEA.

The western boundary is the I'istula; the northern the Baltic, as far as the Vercelic gulf and a tract of unknown conutry; the southern, the country of the Jazyges Metanastac and Dacia; the eastern, the isthmus of the Crimea, and the Don. This gives us parts of Poland and Gallicia, Lithuania, Esthonia, and Western Russia. It includes the Finni (probably a part only), and the Alauni, who are Scythians eo nomine ('Alaûvot Exí0al). It includes the Bastarnae, the Peucini, and more especially the Venedi. It also includes the simple Jazyges, as opposed to the Jazyges Detanastae, who form a small section by themselves. All these, with the exception of the Finni, are especially stated to be the great nations of Sarmatia (to which add the Roxolani and Hamaxobii), as opposed to the smaller ones.

Of the greater nations of Samatia Europaea, the Peacini and Bastarnae of Ptolemy are placed further north than the Peucini and Bastarnae of his predecessors. By later writers they are rarels mentioned. [Venedi.] Neither are the Jazyges, who are the Jazyges Sarmatae of Strabo. These, along with the huxolani, lay along the whole side ( $\delta \lambda \eta \nu$ Thy micupà ) of the Maeotis, say in Kherson, Tauris and Ekaterinoslav. [Roxolami.] Hamaxobii is merely a descriptive term. It probably was applied to some Scythian population. Pliny writes Hamasobii aut Aorsi, a fact of which further notice is taken below. The Alauni, notwithstanding an 'Alauivoy oboos, and other complications, can scarcely be other than the Alani of Caucasus: the duchevess "Alaunot of the Periegesis (1. 302) are andoubted Scythians. Nestor, indeed, has a population otherwise unknown, called Uliczi, the cai being non-radical, which is placed on the Iniester. It does not, however, remove the difficulty.

The Peacini were best known as the occupants of one of the islands at the mouth of the Danube. They may also, however, have extended far into Bessarabia. So manifold are the changes that a word with Sarmatian or Scythian inflexion can andergo, that it is not improbable that Peuc-ini may be the modern words Buljack and Bess, in Bers-arabia. The following are the actual forms which the name of the Patz-inacks, exactly in the cruntry of the Peuc-ini, undergoes in the mediaeval and Byzantine writers. Haŗıvarizal, Pecenatici, Pizenaci, Pincenales, Postinagi, Peczenjezi (in Slavonic), Petinei, Pecinei (the nearest approach to

Pencini:) Then, in the direction of Budziak and Bessi, Behnakije, Petschnukije, Pizina-välr (in Norse), Bisseni and Bessi, (Zenss, Die Deutschen, se. s. vv. Pecinaci and Cumani). The Patzinaks were Scythians, who cannot be shown to be of recent origin in Europe. They may, then, have been the actual descendants of the l'eucini; though this is not necessary, for they may have been a foreign people who, on reaching the country of the Peucini, took the name; in such a case being Peuc-ini in the way that an Englishman is a Briton, i. e. not at all. The difference between the Peucini and Bastarnae was nominal. Perhaps the latter were Moldavian rather than Bessarabiain. The Atmoni and Siaones of Strabo were Basturnae.

The geography of the minor nations is more obscure, the arrangement of Ptolemy being somewhat artificial. He traces them in two parallel columns, from north to south, beginning, in both cases with the country of the Venedi, and taking the eastern bank of the Vistula first. The first name on this list is that of the Gythones, south of the Venedi. It is not to be understurd by this that// the Venedi lay between the Gythones and the Baltic, so as to make the latter an inland people, but simply that the Venedi of the parts about Memel lay north of the Gythones of the parts alrout Elling. Neither can this people be separated from the Guttones and Aestyii, i. e. the populations of the amber country, or East Prussia.

The Finni succeed ( $\Gamma \dot{u} \theta \omega \nu e s$ cliza $\Phi$ invor). It is not likely that these Finns (if Finns of Finland) can have laid due south of East Prussia; though not impossible. They were, probably, on the east.

The Bulanes (Sulones?), with the Phrugundiones to the south, and the Avareni at the head of the Vistula, bring us to the Dacian frontier. The details here are all conjectural. Zeuss has identified the Bulanes with the Burani of Zosimus, who, along with the Goths, the Carpi, and tho Urugundi, attacked the empire under Gallus. In Nestor a population called Sul-iczi occupies a locality between the Dnieper and Dniester: but this is too far east. In Livonia, Henry the Lett gives prominence to the nation of the Selones, a likelier identification.

For Bulanes (supposing this to be the truer reading) the word Polyane gives us the most plansible signification. Nestor uses it frequently. It is Pole, prinarily meaning occupants of plains. Wherever, then, there were plains they might be Polyane; and Nestor actually mentions two divisions of them; the Leliks, or Poles of the Vistula, and the Polyane of the Dnieper.

The Phrugundiones of l'tolemy have always been a crux geographica. Name for name, the: are so like Burgundiones as to have suggested thi idea of a migration from Poland to Burgund! Then there are the Urugundi and Burgundi of the Byzantine writers (see Zeuss, s.cv. Borani, Urugurdi), with whom the Ptolemaean population is, probably, identical. The writer who is unwilling to assume migrations unnecessarily will ask whether the several Burgundys may not be explained on the principle suggested by the word Polyane, i. e. whether the word may not be the name of more than one locality of the same physical conditions. Probably, this is the cave. In the German, and also in the Slavonic languages, the word Foirguni, Fergund, Vergunt, Virgumba, V'irgunndia, and Viraunnia, mean hill range, forest, elevated tract.

Of these there might be any amount,- their occur. rence in different and distant parts by no means implying migrations.

The Avareni may be placed in Gallicia.
South of them come the Ombrones, and the Anarto-phracti. Are these the Arnartes of Caesar ? The Anartes of Caesar were on the eastern confines of the Hercynian forest (Bell. Gall. vi. 24. 25), conterminous with the Daci, a fact which, taken along with the physical conditions of the country, gives us Western Gallicia, or Austrian Silesia, for the Anar-to-phracti. Then come the Burgiones, then the Arsiaetae (compare with Aorsi). then the Saboki, then the Piengitae, and then the Bessi, along the Carpathian Mountains. Gallicia, with parts of Volhynia, and Podolia give us ample room for these obscure, and otherwise unnamed, populations.

The populations of the second column lie to the east of those just enumerated, beginning again with the Venedi (únd toüs Oúevézas md入ıv). Vilıa, Grodno, with parts of Minsk, Volhynia, Podolia, and Kiev give us an area over which we bave six names to distribute. Its sonthern boundary are the Peucinian mountains (Bukhovinia f).
(1.) The Galindae. - These are carried too far east, i. e. if we are right in identifying them with the Galinditae of the Galandia and Golens of the middle ages, who are Enst Prussians on the Spirding Lake.
(2.) The Sudeni.-These, again, seem to be the Sudo-vitae (the termination is non-radical in several Prussian names) conterminous with the Galinditae, but to the norta-east of them. Their district is called Sudovia.
(3.) The Stavami - Concerning theoe, wo have the starting statement, that they extend as far as the Alauni ( $\mu$ éxpı tồ 'Alaúvovy). Is not "A入auvos an erroneous name developed out of some form of rantr- $\delta a l$ ? The extension of either the Stavani to Caucasus, or of the Alani to Prussia, is out of the question.
(4.) The Igylliones.- Zeuss has allowed bimself (s. v. Jarvingi) to hold that the true form of this word is 'Itrurccuves, and to identify this with a name that appears in 80 many forms as to make almost any conjecture excusable, - Jazwingi, Jacwingi, Jaczwingi, Jecwesin, Getuinzilae, Getweritac, Jentuisiones, Jentwosi, Jacintiones, Jatogjazi, Jatvojezi, or Getvesia, and Gotroezia, all actual forms. The area of the population, which was one of the most powerful branches of the Lithuanian stock in the 13th century, was part of Grodno, Minst, and Volhymia, a locality that certainly suits the Igylliones.
(5.) The Costoboci in Podolia.
(6.) The Transmontani. - This is a name from the Latin of the Dacians, -perhaps, Lowever, a translation of the cominon Slavonic Za-volovsknje, i. e. over-the-woatershed. It was npplied, perhaps, to the population on the northern frontier of Dacia in general.

The third list, beginning also with the Venedi, follows the line of the Baltic from Vilna and Courland towards Finland, and then strikes inland, eastwards and southwards. Immediately on the Venedic gulf lie the
(1) Veltae (Oర́citas). Word for word, this is the Vylte and Wizi of the middle ages ; a form which appears as early as Alfred. It was German, i. e. applied by the Franks to certain Slavonic population. It was also native, its plural being Weletabi. Few
nations stand out more prominently than thees Wilts of the Carlovingian period. They lie, however, to the roest of Prussia, and indeed of Pomerania, from which the Oder divided them. In short, they rere in Mecklenburg, rather than in Livomia or Esthonia, like the Veltae of Tacitus. Word for word, however, the names are the same. The nynonym for these western Willac or Welatabi was Liut-ici (Luticzi). This we know from special evidence. A probable synonym for the Veltae of Tacitus was also some form of Lif. This we infer from their locality being part of the present Lith- annia and Lett-land. Add to this that one writer at least (Adam of Bremen) places Wilzi in the country of Ptolemy's Veltae. The exact explanation of this double appearance of a peir of names is unknown. It is safe, however, to place the Veltae in Lett-land, i. e. in the soathern parts of Livonia, and probably in parts of Lithuania Proper and Courlamd. Coostantine Porphyrogeneta mentions them as Veltini. North of the Veltae -
(2.) The Osii (Ossii), probably in the isle of Ocsel. It should be added, however, the root wes-, wes-, appears frequently in the geography of Prussia Osilii, as a name for the occupauts of Oesel, appears early in mediaeval history.
(3.) The Carbones, north of the Osii. This is a name of many explanations. It may be the Finn word for forest $=$ Carbo. It may be the root Cwr(or $K-r$ ), which appears in a great number of Finn words,- Coralli (Karelian), Cur- (in Cur-land), Kur- (in Kur-ak), \&cc. The forms Cwrones and Curonia (Courland) approach it, bat the locality is south instead of north. It more probably =Kar-elia. It almost certainly shows that we have passed from the country of the Slavonians and Lithuanians to that of the Esthonians, Ingrians, and Finlanders Then, to the east, -
(4.) The Kar-eotae. - Here the Kar- is the common Finn root as before. Any part of the government of Novogorod or Olonets might have supplied the name, the present Finns of both belouying to the Kareliah division of the name (the -al-being non-radical). Then -
( $5,6,7,8,9,10,11,8 c$.) The Sali, south of whom the Agathyrsi, then the Aorsi and Pagyritae, south of whom the Savari, and Borusei as far as the Rhipacan mountains. Then the Akibi and Naski, south of whom the Vibiones and Idree, and sonth of the Vibiones, as fus as the Alanni, the Sturni. Between the Alanni and Hamarobii the Karyones and Sargatii. At the bend of the Tanais the Ophlones and Tanaitea.
There are few points in this list which are fixed. The bend of the Tanais ( $=$ Don) would place the Ophlones in Ekaterinoslas. The Borusci, if thoy reached the Rhipmean mountains, and if these were the Uralian rather than the Valdai range, must have extended far beyond both Earopean and Asiatic Sarmatia The Savari bear a name very like one in Nestor - the Sjevera, on the Desma, Sem, and Sula,-a word that may merely mean worthern. It is a name that reappears in Cancasus - Sabeiri.

The Aorsi may be the Ersod (the $d$ is inflexional), a branch of the Mordvins, occupant at the present time of a tract on the Oko. The Pa-gyritae may have been the tribes on $(p 0=o n)$ the Gerrius, such compounds being common in Slaronic, a $g$ Po-labi (on the Elbe), Po-morania (on the sea), \&c The rhole geography, however, is indefinite and uncortain.

For Agathyrsi; see Hunni. The Sargatii are mentioned in Ptolemy.

South of the Tanaitae came the Osuli (? Sul-iczi of Nestor, reaching as far as the Roxolani, i. e. occupying parts of Cherson and Ekaterinoslav.

Between the Roxolani and Hamaxobii the Rhakalani and Exnbugitac. The statement of Pliny that the Hamaxobii were Aorsi, conbined with similarity of name between Aorsi and Ersad, will not help us here. The Eroad are in the governments of Penza and Tamlov; the direction of the Hamaxobii is more westward. Rhakulani seems but another form of Roxolani. In Exo-bug-itae the middle syllable may give us the root Bug, the modern name of the Hypanis. It has been surmised that this is the case with Sa-bok-ae, and Costo-boc-i. The locality would suit.

Between the Peucini and Basternae (this difference between two nations otherwise identified creates a complication) lie the Carpiani, sbove whom the Gevini and Budini.

The Carpi must have been near or on the Carpathian Mountaine. They appear as a substantive nation in the later history of Rome, in alliance with the Sarmatao, \&ce. of the Dacian frontier. We have a Victoria Carpica Arpi; Carpiani and Kapmoodkel (which Zeuss renders Carpathian Dacians) are several forms of this name [CArpi]. They, along with the Costoboci, Armadoci, and Astingi, appear as the most important frontagers of Northern Dacia.

Between the Basternae and Roxolani the Chani, and under their own mountains (únd rd $\{8, a \quad \delta \rho \eta$ ) the Amadnci and Navari, and along the lake (marsh) of Byke the Torekkadae, and along the Achillsean Course ('Axildécos $\delta \rho \delta \mu o y$ ) the Tauroscythae, and south of the Bastarnae in the direction of Dacia the Tagri, and south of them the Tyrangetae.

For Tawrascythac and Tyrangetae, see e. vo. and Scrthin.

Tagri looks like a modified form of Zagora (Iramontane), a common Slavonic geographical name, applicable to many localities.

The Amadoci occupied lisia 8 pm . or the Mons Amadocus of Ptolemy. There was also a $\lambda$ luyn 'Amadoxy. This jaxta-position of a mountain and lake (pool, or swamp, or fen) should fix their locality more closely than it does. Their history connects them with the Costoboci. (Zeuss, e. vo. Costoboci, Amadoci.) The physical conditions, bowever, come out less clearly than our present topographical knowledge of Podolia, Minsk, \&c. explains. For the Navari see Neuri.

The name Chuni is important. [See Hunni.]
In Torek-kad-ac and Exo-bug-itae we have two elements of an apparent compound that frequently occurs in Scytho-Sarmatian geography-Tyn-get-ae, \&c., Costo-bok-i. Sa-boc-i. The gengraphy is quite compatible in the presence of these elements.

Rivers. - From the Vistula eastwards, the Clironus, the Rhabon, the Turuntus, the Chersinos,-the order of the modern names being the Pregel, Memel, Doma, Aa, and Neoa For the drainage of the Black Sea, see Scythin.

Moumtains.-Peace, the Montes Amadoci, the Mons Budinas, the Mons Alaunus, the Mons Carpathus, the Venedic mountains, the Rhipaean mountains. Noue of these are detinitely identified. It is difficult to say how Ptolemy named the most important range of so flat a tract as Russia, viz., the Valdai Mountains. On the other hand, the names of
his text imply more mountains than really exist. All his mountains were, probably, spurs of the Carpathians, just as in Sarmatia Asiatica they were of Caucasus.

Towns.-See Scrtria.

## II. SARMATIA ASIATICA.

The boundaries are - the Tanais, from its sources to its mouth, European Sirmatia from the sources of the Tanais northwards, the Maeotis and Cimmerian Bosporus, the Euxine as far as the river Corax, the range of Caucasus, the Caspian as far as the river Soana, the Volga as far as its bend (Scythia being on the east of that river), - and on the north an Unknown Land. Without knowing the point at which this terra incognita begins, it is impossible to give the northern limits of Sarmatia Asiatica. It is included, howerer, in the governments of Caucusus, Circassia, Astrakian, Don Kosaks, Saratov, Simbirsk, Kazan, Viatka, Kostroma, Vladimir (?), Nizhni Novogorod, Riazan (?), Tambov, and Penza; all the governments, in short, on the water system of the Volga; a view which makes the watershed between the rivers that empty themselves into the White Sea and the rivers that fall into the Caspian and Euxine a convenient provisional boundary.
For the obscure geography of Asiatic Sarmatia, the bend of the Tanais is our best starting point. To the north of it dwelt the Yerierbidi, a great nation; to the south the Iaxamatae, the former in Dom Kosaks, Voronezh, and Tambov, Saratov, the latter in Astrakhan North of the Perierbidi come the Assei, the Suardeni, the Zacatae, the Hippophagi Sarmatae, the Modocae, the Royal Sarmatians, the Hyperborean Sarmatians, the Unknown Land. In Kazan and Simbirsk we may place the Chaenides, and on the east of the Volga the Phtheirophagi and Materi. The Niolàris $\chi$ épa must be at the mouth of the Volga. If so, the order in which the names have been given is from north to south, and the Phtheirophagi are in Eastern Kazan, the Materi in Saratov.
The remaining populations are all (or nearly all) in the governments of Caucasus and Circassia, in the northern spurs of the Crucasian range. They are the Siraceni, the Pseasii, the Thymeotae, the Turambae, the Asturicani, the Arichi, the Zicchi, the Conapoeni, the Meteibi, the Agoritae, the Melanchlaeni, the Sapothraenj, the Scymuitae, the Amazones, the Sunani, the Sacani, the Orinaei, the Vali, the Servi, the Tusci, the Diduri, the Vodae, the Olondae, the Isondae, the Gerrhi. The Achaei, Kerketi, Heniochi, Suanocukchi, and Sanaraei are truly Caucasian, and belong to the geography of the mountain range rather than the Surmatian plains and steppes - for such they are in physical geography, and such was the view of Strabo, so far as he noticed Sarmatia at all.
It is difficult to determine the source of Ptolemy's information, difficult to say in what language we are to seek for the meaning of his names. The real populations, as they actually existed, were not very different from thowe of the Herodotean Scythia; yet the Herodotean names are wanting. These were, probably, Scythian, - the northern populations to which they applied being Ugrian. Are the names native? For the parts due north of Caucasus they may be 80 ; indeed it is possible that the greater number of them may be due to a Caucasian source. At the present time, when we are fairly supplied with
data both as to the names by which the populations of the parts in ques ion designate themselves, as well as those by which they are designated by their neighbours, there are no satisfactory identificatiuns at all. There are some that we may arrive at. by a certain anount of assumption; but it is doubtful whether this is legitimate. In the names, for instance, beginning with sa- (Sa-boci, \&c.) we may see the Slavonic for truns; in those with pothe Slavonic ad, - both of which are common in the geographical terminology of the Russians, Scc. But these are uncertain, as are the generality of the other coincidences.

In Siberia, for instance, a Samoyed tribe is named Motor-zi : name for name, this may be Materi; whether, however, it denote the same population is another question.

Are the Sarmatiae of Ptolemy natural divisions? Subject to an hypothesis, which will be just stated in the present article, but which will be exhibited in full in Scytila, the Sarmatiae of Ptolemy are objectionable, both for what it contains and what it omits. The whole of Asiatic Sarmatia is, more or less, arbitrary. It seems to be a development of the area of the Herodotean Sanromatae. In the north it comprised Finn or Ugrian, in the south Citcassian and Georgian, populations. The Alauni were Scythian, as were several other tribes. It is therefure no ethnological term. Neither are its buundaries natural, if we look at the physical conditions of the country. It was defined upon varging and different principles, -sometimes with a view to physical, sometimes to ethnological, sometimes to political geography. It cuntains more than a natural Sarmatia.

Ou the other hand, the Vistula was no ethnological line of demarcation. The western half of Poland was Sarmatian, in respect to its climate, surface, and the manners of its inhabitants. The Lygii, however, having been made part of Germania, remained 90 in the eyes of Ptolemy. That the popnlations on each side of the Lover Vistula, i. e. of West and East Prussin, were the same, is certain; it is certain, at least, that they were so at the beginning of the historical period, and all inference leads us to hold that they were so before. The Vistula, however, like the Rhine, was a good natural boundary.

The Jazyges Metanastac were most probably Sarmatian also. Pliny calls then Jazyges Sarmatae (iv. 2.5); the name Metanastae being generally interpreted removed. It is, however, quite as likely to be some native aljunct misunderstoud, and adapted to the Greek language.
The other Jazyges (i. e. of the Maeotis) suggested the doctrine of a migrition. Yet, if the current interpretation be right, there might be any amount of Jatyges in any part of Sarmatia. It is the Slaronic for language, and, by extension, for the people who speak a language:-" a po Ocje rjpje, gde wteczet' w Wolgu, juzyk swnj Muroma, i Czeremisi swoj jazyk, e Mordwa swoj juzyk;"-translated, "On the Oka river, where it falls into the Volga, a particniar people, the Muroma. and the Tsheremis, a peculiar people, and the Mordwins, a peculiar penple." (7euss, s. v. Ostfinnen). Hence it has at least a Slavonic gloss. On the other hand, it has a meaning in the Magyar language, where Jassag = bowman, a fact which has induced many scholars to believe that there were Magyars in Iungary before the great Magyar invasion, indeed before the Hun. Be this as it may, the district of the Jaryges Me-
tanastae is called the Jassag district at the present moment.

More than one of the Dacian populations were Sarmatian,-the difference between Dacia, the name of the Roman Province, and Sarinatia, the country of an independent and bostile population, being merely political. Indeed, if we look to the distribution of the Sarmatae, their south-eastern limit must have the parts about Tormi. [See Sauromatae.] Here, however, they were intrusive.

Ethnology. - The doctrine apon this point is merely stated in the present notice. It is developed in the article on Scythia. It is to the effect that, in its proper application, Sarmatian meant one, many, or all of the north-eastern members of the Slavonic family, probably, with some members of the Lithuanic, included.

History. - The early Sarmatian history is Scythian as well [Scythia], and it is not until Padnonia becomes a Roman province that the Sarmatian tribes become prominent in history, and, even then, the distribution of the several wars and alliances between the several nations who came under the general denomination is obscure. In doing this there is much that in a notice like the present may be eliminated. The relations of the Greeks and earlier Romans with Sarmatia were with Scythia and the Getae as well, the relations of the latter being with the provincials of Pannonia, with the Marcomanni, and Quadi, \&cc. Both are neighbours to a tribe of Jazyges.

The great Mithridatic Empire, or, at any rate, the Mithridatic Confederacy, contained Sarmatians eo nomine, descendants of the Herodotean Suuromata. Members of this division it must have been whom the Marcus, the brother of Lucius Lucullus, chastised and drove beyend the Danube, in his march through Moesia. Thoie, too, it was with whom the Cis-Danubian nations in general were oftenest in contact,-Jazyges, Roxolani, Costoboci, \&cc., who though (almost certainly) Sarmatian in their ethnological aftinities, are not, eo nomine, Sarmatian, but, on the contrary, populations with more or less of an independent history of their own. Thirdly, the Sarmatians, who, in conjunction with Getae, Daci, Moesians, Thracians, \&c., may hare been found in the districts south of the Danube, must be looked upon as intrusive and foreign to the soil on which they are found.

On the other hand, it must be remembered that the Sarmatae eo nomine fall into two divivions, divided from each other by the whole extent of the Roman province of Dacia, the ares of those of the east being the parts between the Danube and the Don, the area of those of the west being the parts between the Danube and Theiss. The relations of the former are with the Scythians, Roxolani, tha kings of Pontus, \&ce., over whom, some years later, M. Crassus triumphed. His actions, however, as well as those of M. Lucullas, so far as they were against the Sarmatae, were only accidental details in the campaigns by which Nioesia was reduced. The whole of the Trans-Danubian frontier of Moesia, east of Viminiacum, was formed by Imcia.

The point at which the Romans and Sarmatians would more especially come in contact was the country about Sirmium, where the three provinces of Pannonia, Illyricum, and Moesia joinell, and where the pre-eminently Sarmatian districts of the nations between the Danube and Theiss lay northwardn -pre-cuinently Sarmatian as opposed to the Dacians,
on one side, and the Quadi, sce., of the Regnum Vannianum, on the other. In the general Pannonian and Dalmatian cotbreak of A. D. 6, the Sarnatians of these parts took a share (Vell. Pat. ii. 110), as they, doubtlessly, did in the immediately previous war of the Marcomanni, under Maroboduus; the Marcomanni, Quadi, Jayyges, and western Daci, and Sarmatae being generally united, and, to all appearances, the members of a definite confederacy.
The Regnum Vannianum gives us the continuation of the history of these populations (A. D. 19-50). It is broken np; Vannius (? the Ban) himself displaced, and Vangio and Sido, strongly in the interest of Rome, made kings of the parts between the Marus and Cusus (Moravia) instead. To the Vannian confederacy (a Ban-at) the Sarmatae and Jazyges supply the cavalry, the occapants of the Baust itself the infantry (Tac. Annal. xii. 29).
For A. D. 35, we find an interesting notice in Tacitus, which gives definitude to the Sarmatia Asiatica of Ptolemy. It is to the effect that, in a war with Parthiu, Pharasmanes entered into an alliance with the Albamians of the coast of the Caspian and the Sarmatae Sceptuchi (? Ba $\sigma$ ìtioc). (Tac. Ann. vi. 33.)
A. D. 69 . Two pregnant sentences tell ns the state of the Sarmatian frontier at the accession of Galba: "Coortae in noe Surmatarum ac Suevorum gentes; nobilitatus cladibus mutuis Dacus " (Ilist. i. 2). The Suevi (who here mean the Quadi and Marconanni) and Sarmatae (ioot and horse) are naited. Dacia is paring the way to its final subjection. The Jazyges seem to fall off from the alliance; inasmuch as they offer their services to Rome, which are refused. The colleague of Sido is now Italicus, equally fuithful to Rome. (Hist. iii. 5.) In the following year it is Sarmatae aud Daci who act together, threatening the furtresses of Moesia and Pannonia (iv. 54).

An invasion of Moesia by the Roxolani took place A.d. 69. This is a detail in the history of the Eastern branch.

The conquest of Dacia now draws near. When this has taken place, the character of the Sarmatian area becomes pecculiar. It consists of an independent strip of land between the Roman Province and Quado-Marcomannic kingdom (Banat); its political relations fluctuating. When Tacitus wrote the Germania, the Gothini paid tribute to both the Quadi and Sarmatae; a fact which gives us $\mathbf{a}$ political difference between the two, and also a line of separation. The text of Tacitus is ambiguous: "Parten tributorum Sarmatae, partem Quadi, ut alienigenis impmunt ${ }^{n}$ (Germ. 43). Were the Sarnatae and Quadi, or the Quadi alone, of a different family from that of the Guthini? This is doubtfal. The difference itself, however, is important.

There were Sarmatians amongst the subjects as well as the allies of Decebalus; their share in the Ducisn War (A. D. 106) being details of that event. They were left, however, in possession of a larye portion of their country, i. e. the parts between the Vallum Romanum and the frontier of the Suevi, Quad, or occupants of Regnum Vannianum; the relations of this to the Roman and non-Roman areas in its neighbourhood being analogous to that of the Decumates Agri, between the Rhine and Upper Danube.

In the Marcomannic War (under M. Antoninus) the Sarnatae are as prominent as any nieubers of the confederacy: indeed it is probable that some of
the Marcomanni may have been Sarmatae, under another name. This is not only compatible with the undoubtedly German origin of the name Marcomanni (Marchmen), but is a probable interpretation of it. German as was the term, it might be, and very likely was, applied to a non-German population. There were two Marches: one held by Germans for lume and against the Sarmatians, the other held by the Sarmatians for themselves. The former would be a March, the other an Ukraine. In the eges of the Gernans, however, the men of the latter would just as much be Marchmen as themselves. What the Germans in the Roman service called a neighbouring population the Romans would call it also. We shall soon hear of certain Borderers, Marchnien, or men of the Ukraine, under the name of Limigantes (a semi-barbarous form from Limes); but they will not be, on the strength of their Latin names, Latins. The Solitudines Sarmatarum of the Roman maps was more or less of a Sarmatian March. The Jazyges and Quadi are (as usual) important members of the confederacy.
d. D. 270. Aurelian resigns the province of Dacia to the Barbarians; a fact which withdraws the scene of many a Sarmatian inroad from the field of observations, - the attacks of the Barbarians upon each other being unrecorded. Both before and after this event, however, Sannatian inroads along the whole line of the Danube, were frequent. Sarmatians, too, as well as Daci (Getae) were comprehended under the general name of Goth in the reigns of Decius, Claudius, \&c. Add to this that the name of Vandal is now becoming conspicuous, and that under the name of Vandal history we have a great deal that is Sarmatian.

The most important effect of the cession of Dacia was to do sway with the great block of Roman, Romanising, or Romanised territcry which lay between the Sarmatians of Pannonis and the Sarmatians of Scythia. It brought the latter within the range of the former, both being, then, the frontagers of Moesia. Add to this the fact of a great change in the nomenclature being effected. The German portion of the Marcomanni (Thervings and Grutungs) has occupied parts of Dacia. The members of this section of the German name would only know the Sarmatae as Vandals. Again, the Hun power is developing itself; so that great material, as well as nominal, changes are in the process of development. Finally, when the point from which the Surmatue come to be riewed has hecome Greek and Constantinopolitan, rather than Latin and Roman, the names Slaveni and Servi will take prominence. However, there is a great slaughter of the Sarmatians by Carus, on his way eastwards. Then there is the war, under Constantine, of the Sarmatae of the Border,- the Sarnatae Limigantes, - 2 Servile War. [See Limicantes.] The anthors who tell us of this are the writers of the Historia Augusta and Ammisnus; after whose time the name is either rarely mentioned, or, if mentioned, mentioned on the authority of older writers. The history is specific to certain divisions of the Sarmatian population. This was, in its several divisions, hostile to Rome, and independent; still, there were Sarmatian conquests, and colunies effiected by the transplantation of Sarimatae. One lay 80 far enst as Gaul.
"Arvaque Sauromatum nuper metata coloni"
(Auson. Mosellu)
applies to one of these. There were more of them. The general rule, however, is, that some particular division of the name takes historical prominence, and that the general name of Sarmatia, as well as the particular Sarmatae of the parts between Dacia and Pannoria, and those between Scythia and Persia, disappears. [See Vaxdam; ThaifaLAE.]
[R. G. L.]
SARMA'TICA I'NSULA, an island at that mouth of the Danube called Kalonstoma ( $\boldsymbol{\text { m madiy }}$ वт $\left.{ }^{\prime} \mu a\right)$. (Plin. iv. 24. s. 24.)
[T. H. D.]
 $\lambda a u$, Ptol. v. 9. §§ 11, 15), a narrow pass of the Caucasus, whence it is also called Caucasiae Portae. (Plin. vi.11. s. 12, 15. s. 15.) From its vicinity to the Caspian sea, it was also called by some of the ancients Portae Caspiae (Suet. Nero, 19), Claustra Caspiarum (Tac. H. i. 6), and Via Caspia (Id. Annvi. 33); but Pliny (l. c.) notes this as an error; and the proper Portas Caspiae were in the Taurus (Forbiger, Geogr. vol. ii. p. 47, note 92). The Sarmaticae Portae formed the only road between Sarmatia and Iberia. Ptolemy (l. c.) distinguishes from this pass another in the same mountain, which he calls al 'Al6dytac Ind places the latter in the same latitude as the former, namely the 47th degree, but makes its longitude 3 degrees more to the E. The Albanine Portae are those on the Alazon, leading over the mountain from Derbend to Berdan. At both spots there are still traces of long walls 120 feet in height; and on this circumstance seems to have been founded a legend, provalent in that neighbourhood, of the Black Sea and the Caspian having been at one time connected by such a wall. (Forbiger, Ibtd p. 55, note 13, b.; comp. Ritter, Erdkunde, ii. p. 837.) [T. H. D.]

SARMA'TICI MONTES (Lар $\mu a r u c d b_{p \eta}$ ), a range of mountains on the eastern frontier of Germany, meationed only by Ptolemy (ii. 11. § 6, viii. 10. §2), according to whom it appears to have extended north of the Danube as far as the sources of the Vistola, and therefore consisted of the mountains in Moravia and a part of the Car pathions.
[L. S.]
 Ptol. vii. 5. §§ 8, 6), a sea in the N. of Europe, washing the coast of Sarmatia, and which must thus have been the Baltic (Tac. Germ. 45). But sometimes the Black Sea is designated by the poets under this name, as by Ovid (ex Pont. iv. 10. 38) and by Valerius Flaccus (Sarmaticus Pontus, viii. 207.)
[T. H. D.]
SARMATINA, a town of Ariana, mentioned by Ammisnus (xxiii. 6). It is probably the same as the Sarmagana of Ptolemy (vi. 17. §4), as both be and Ammianus place it next to Bitara, in the same province.
[V.]
SARMIZEGETHU'SA (Zapurfer' $\theta o v \sigma a$, Ptol. iii. 8. §9: Zepul(eye日ovion, Dion Cass. Iviii. 9), one of the most considerable towns of Dacia, and the mesidence of the Dacian kings (Bariגetoy, Ptol. l. c.) It is called Sarmategte in the Tabula Peut, and Sarmazege by the Geogr. Rav. (iv. 7). It is incontextably the same place as that called $\tau \grave{a}$ Ba by Dion Cassius (Ixvii. 10; Ixviii. 8), who places it on the river Sargetia (Ib. c. 14); a situation which in also testified by ruins and inscriptions. At a later period a Roman colony was founded here by Trajan, after he had expelled and killed Decebalus king of the Dacians; as is testified by its nume of Colonia Ulpia Trajana Augusta and may be inferred
from Ulpian (Dig. 50. tit. 15. 1. 1.), from whom we also learn that it possessed the Jus Italicnm. It was the head-quarters of the Legio $\mathbf{2 I I}$. Gemina (Dion Cass. IV. 23), and at first probably there was only a Roman encampment here (Id. Iviii. 9; Anr. Vict. Caes. xiii. 4). Hadrian cunferred an aqueduct upon it, as appears from an inscription (Gruter, po 177. 3; Orelli, No. 812), and that emperor seems to have retained the colony, on account of its numerous Poman inhabitants, when he resolved to abandon the rest of Dacia to the barbarians. From an inscription to Trajan and his sister Marciana, there would appear to have been baths here (Orell. 791). Sarmizegethusa occupied the site of the present Varhely (called also Gradischte), on the river Strel or Strey, about 5 Roman miles from the Porta Ferrea, or Vulcan Pass. (Comp. Inscr. Grutèr. p. 272; Orelli, Nos. 831, 3234,3433, 3441.3527.3686, 4552; Zamosc. Amm. pp. 40, 74; Marsili, Danub. tab. 24, 55, \&c.; Ukert, iii. 2. p. 616, seq.; Zumpt, in Rhein. Mus. 1843, p. 253-259.) [T. H. D.]

SARNEIUS (¿自pvelos), a small stream of Hyrcania mentioned by Strabo (x. p. 511), which, after rising in M. Coranus, flowed in a westerly direction into the Caspian. Professor Wilson considers that it must be either the Atrek or the Gurgan. [V.]

SA'RNIA or SARMIA, is named in the Msritime Itin. among the islands of the Ocean between Gallia and Britannia. Supposed to be Guerneey. [G. L.]

SARNUS (8 Eapods: Sarmo), a river of Campania, flowing into the Bay of Naples. It has its sources in the Apennines, above Nuceria (Nocera), near which city it emerges into the plain, and, after traversing this, falls into the sea a short distance S. of Pompeii. Its present moath is about 2 miles distant from that city, bat wo know that in ancient times it flowed under the walls of Pompeii, and entered the sea close to its gates. [Pompeni.] The change in its course is doubtless owing to the great catastrophe of A. d. 79, which buried Pompeii and Herculanenm. Virgil speaks of the Sarnus as flowing through a plain (quace rigat aequora Sarmus, Aen. vii. 738); and both Silins Italicus and Station allude to it as a placid and sluggish stream. (Sil. Ital. viii. 538; Stat. Silv. i. 2. 265; Lucan, ii. 422.) According to Strabo it was navigable, and served both for the export and import of the produce of the interior to and from Pompeii. (Strab. v. p. 247 ; Plin. iii. 5. a. 9; Ptol. iii. 1. § 7 : Suet. Clar. Rhet. 4.) Vibius Sequester tells us ( $p$. 18) that it derived its name as well as its sources from a mountain called Sarus, or Sarnus, evidently the same which rises above the modern town of Sarno, and is still called Monte Saro or Sarno. One of the principal sources of the Sarno does, in fact, rise at the foot of this mountain, which is joined shortly after by several confluents, the most considerable of these being the one which flows, as above devcribed, from the valley beyund Nuceria.

According to a tradition alluded to by Virgil (l. c.), the banks of the Sarnus and the plain through which it flowed, were inhabited in ancient times by a people called Sarrastes, whose name is evidently connected with that of the river. They are representel as a Pelasgian tribe, who settled in this part of Italy, where they founded Nuceria, as well as several other cities. (Conon, ap. Serv. ad Aem. L.c.; Sil. Ital. viii. 537.) Bat their name seems to have quite disappeared in the historical period; and we find Nuceris occupied by the Alfatemi, who were an Osoan or Sabellian raco. [Nucerla.]

No trace is found in ancient authors of a covem of the name of Sarnus；but it is mentioned by the Geographer of Ravenna（iv．32），and seems，there－ fore，to have grown ap soon after the fall of the Buman Einpire．

SARON．［Sharom．］
SARON．［Saronicus Sntes．］
 chyl．Agam． 317 ；Strab．viii．pp．335，369，374， 380；इаршиикдs пбороs，Strab．viii．p． 335 ；इарш－ vıкдข шé入ayos，Strab．viii．pp．335，369；Kaparis Dब入aroa，Dionys．Per．422；also called ミa入auyı． ands кú入жоs，Strab．viii．p．335：Gulf of Egina），a gulf of the Aegaean sea，extending from the pro－ montories of Sunium in Attica and Scyllaeum in Troezenis up to the isthmus of Corinth．The length of the gulf，according to Scylax（p．20， Hudson），is $\mathbf{7 4 0}$ stadia．It washes the coasts of Attica，Megaris，Corinth，Epidaurus and Troezen， and contains the islands of Aegina and Salamis．It was said to have derived its name from Saron，a king of Troezen，who was drowned while hunting in a lagoon upon the Troezenian coast called Phoebaea and afterwards Saronis．（Paus．ii．30．§ 7；Etym． M．p．708．52；Leake，Morea，vol．ii．p．448．）A Troezenian river Saron is also mentioned（Eustath． ad Dionya．Per．422），and likewise a town of the same name．（Steph．B．s．v．）Some derived the name of the gulf from oapoovis，＂an oak．＂（Plin． iv．5．s．18．）
 a promontory on the coast of Cilicia， 80 stadia to the west of the mouth of the Calycadnus，and 120 from Selenceia In the peace between the Romans and Antiochas the Great this promontory and Cape Calycadnus were made the frontier between the kingdom of Syria and the free countries of Asia Minor．（Strab．xiv．p． 670 ；Ptol．v．8．§ 3；Ap－ pian，Syr． 39 ；Pomp．Mela，i． 13 ；Liv．$x \times x$ viii． 38；Plin．v． 22 ；Stadiasm．Mar．Magni，§ 163．） It now bears the name of Lissan－cl－Kahpe．（Leake， Asia Minor，p．203．）
［L．S．］
SARPEDO＇NIUM PROM．（Zaprobovin axp Herod．vii．58），the NW．extremity of the gulf of Melas，and due north of the eastern end of the island of Imbros，now Cape Paxi．

SARRASTES．［Sarnus． 1
SARRUM，in Gallia，is placed by the Table be－ tween Condate（Cognac）［Condate，No．5］and Vesunna（Perigucux）．It is supposed to be Char－ sans，but the real distances do not agree with the numbers in the table．
［G．L．］
SARS，a river on the W．mast of Hispania Tar－ raconensis，between the Proin．Nerium and the Minius．（Mela，iii．1．）Incontestably the modern Sar，which does not reach the sea，but falls into the ancient Ulla at Turris Augusti（Torres de Este）． （Comp．Florez，Esp．Sagr．xv．p．41．）［T．H．D．］

SA＇RSINA（Zdpoıva，Strab．：Eth．Sarsinas：Sar－ sina），a city of Umbria，situated in the Apennines， on the left bank of the river Sapis（Savio），about 16 miles above Caesena．It seems to have heen in very early times a powerful and important city，as it gave name to the tribe of the Sarsinates（Kapot－ várot，Pol．），who were one of the most considerable of the Umbrian tribes．Indeed some authors speak of them as if they were not included in the Um－ brian aation at all，bat formed a separate tribe with an independent national character．Thus Polybius， in enumerating the forces of the Italian nations， speaks of the Umbrians and Sarsinates，and Plautus，
in one passage，makes a similar distinction．（Poi．ii． 24；Plant．Mostell．iii．2．83．）The Fasti Capito－ lini，also，in recording the conquest of the Sarsinates， speak of the two consuls as triumphing＂de Sarsi－ natibus，＂without any mention of the Umbrians； but the Epitome of Livy，in relating the same event． classes them generally among the Uinbrians．（Liv． Epit．xv．；Fast．Capit．）The probable conclusion is that they were a tribe of the Umbrian race；but with a separate political organisation．We have no particulars of the war which ended in their subjec－ tion，which did not take place till B．C．266，so that they were one of the last of the Italian states that submitted to the Roman yoke．From this time Sarsina was certainly included in Umbria in the Roman sense of the term，and became an ordinary municipal town，apparently not of mach importance． （Strab．v．p．227；Plin．iii．14．s．19．）It derived its chief celebrity from its being the birthplace of the celebrated comic poet Plautus，who was born there about b．c．254，very shortly after the Roman conquest．（Hieron．Chron．ad Ol．145；Fest．s．v． Plotus，p．238．）Its territory contained extensive mountain pastures，－whence it is called by Silius Italicus＂dives lactis＂（Sil．Ital．viii．461），－as well as forests，which abounded in dormice，so mach prized by the Romans．（Martial，iii．58．35．）Va－ rious inscriptions attest the municipal rank of Sar－ sina under the Roman Empire（Orell．Inscr．4404； Gruter，Inscr．p．522．8，p． 1095.2 ）；but its name is not again found in history．In the middle ages it sunk into complete decay，but was revived in the 13th century，and is now a small town of 3000 in－ habitants，which retuins the ancient site as well as name．
［E．H．B．］
 a maritime town on the Singitic gulf between Singus and Ampelus Prom；now Kartali．（Leake， North．Greece，vol．iii．p．154．）［E．B．J．］

SARUE＇NA（Eapounva），a town of Cappadocia， in the district Chamane or Chamanene，on the north－ eastern slope of Mount Argaeus，celebrated for its hot springs（Ptol．v．6．§ 12 ；Tab．Peut．，where it is called Arauena，whence Aquae Arauenae；It Ant．p．202，where its name is Sacoena）．It is by some believed to be the modern Baslyan．［L．S．］
SARUNE＇TES，the name of an Alpine people（Plin． iii．20．s．24）in the valley near the sources of the Rhine．There seems no reason to doubt the correct－ ness of the name，and it may be preserved in Sargans， which is north of Chur，and between Chewr and the Lake of Constans．In a passage of Caesar（B．G．iv． 10）be mentions the Nantuates as a people in the upper part of the Rhine，above the Helvetii．The name Nantuatey［Nantuates］is corrupt；and it is possible that the name Sarunetes should be in its place．
［G．L．］
SARUS（Edpos），one of the principal rivers in the south－east of Asia Minor，having its sources in Mount Taurus in Cataonia．It first flows in a south－ eastern direction through Cappadocia by the town of Comana；it then passes through Cilicia in a south－ western direction，and，after flowing by the town of Adana，empties itself into the Cilician sea，on the south of Tarsus，after dividing itself into several branches．（Liv．xxxiii．41．）According to Xenophon （Anab．i．4．§1）its breadth at its month was 3 plethra or 300 feet；and Procopius（de Aedif．v．4）says it was a navigable river．（Comp．Strab．xii．p． 535 ； Ptol．v．8．§ 4 ；Appian，Syr． 4 ；Plin．vi． 3 ；Eu－ stath．ad Diom．Per．867，who erroneously calls．it

Sinarus.) The modern name of the Sarus is Sithen or Seihas. [L. S.]
SARXA, a station on the ruad from Philippi to Heracleia (Peut. Tab.), to the N. of the Lake Cercinites, between Strymon and Scotussa. Now Zikhna. (Leake, North. Greece, vol. iii. p. 227.) [E. B. J.]

SASI'MA (Edбধma), a town of Cappadocia, 24 Roman miles to the south of Nazianzus; the place contained the first church to which Gregory of Nazianzus was appointed, and he describes it as a most miserable town. (It. Ant. p. 144; It. Hicros. p. 577; Hierocl. p. 700, with Wesseling's note.) Some look for its site near the modern Babloma.
[L.S.]
SASO (Za $\sigma \dot{\omega}$, Ptol. iii. 13. §47; Ea $\sigma \omega \boldsymbol{\omega}$, Strab. vi. p. 281), a small, rocky island, lying off the coast of Grecian Illyria, N. of the Acroceraunian promontory, and possessing a landing-place which served as a station for pirates. (Comp. Polyb. v. 110; Mela, ii. 7; Plin. iii. 26. s. 30; Itin. Ant. p. 489.) It is still called Saseno, Sassono, or Sassa. [T. H. D.]

SASPI'RES, or SASPI'RI (Záoreipes, Za$\sigma \pi \in t p o l$, Herod. i. 104, iv. 37, 40, vii. 79: Apoll. Rhod. ii. 397, 1242; Steph. B. e. v.: cf. Amm. Marc. xxii. 8. § 21), a Scythian people, dwelling to the S. of Colclis and N. of Media According to Herodotus and Stephanus (ll.cc.) they were an inland people, but Apollonius places them on the seacoast. They belonged to the 18th satrapy of the P'ersian kingdom (Herod. iii. 94), and were armed in the same manner as the Colchians, that is, with wooden helmets, small sbields of untauned hide, short lances, and swords (Ib. vii. 79). The Parisian scholiast on Apollonius derives their name from the abondance of supplies found in their country. The Saspeires appear to have inhabited that district of Georgia lying on the upper course of the river Cyrus, in which Tiftis lies, which is still called Tschin Kartuel ; and as the district contains several other places, the names of which begin with the syllable Tschin, Ritter conjectures that the Saspeires were identical with the eastern Iberians, rospecting whom the Greeks invented so many fables. (Rennell, Geogr. of Herod. p. 503; Ritter, Erdkunde, ii. p. 922; Bähr, ad Herod. i. 104.) [T. H. D.]

SA'SSULA, a town of Latium, situated in the neighbourhood of Tibur, of which city it was a dependency. It is mentioned only by Livy (vii. 19) a.nong the towns taken from the Tiburtines in B. c. 354 , and was probably always a small place. The site has been identified by Gell and Nibby with the ruins of an ancient town, at the foot of the hill of Siciliano, between 7 and 8 miles from Tiooli (Tibur). The rains in question, consisting of a line of walls of polygonal construction, surrounding a hill of small extent, unquestionably indicate the site of an ancient town; but as we know that the Tiburtine territory contained several other towns besides Empuium and Sassula, the only two whose names are known to us, the identification of the latter is wholly arbitrary. (Gell, Top. of Rome, p. 394 ; Nibby, Dintorni, vol. iii. p. 63.) [E.H. B.]

SATACHTHA ( $\Sigma a r d \chi \theta a$, or $\sum a r d \chi \theta a \mu$, Ptol. iv. 7. § 17), a place in Aethiopia, on the left bank of the Nile, probably near the present Korti, or else somewhat more to the S ., near the half-destroyed village of Ambucote.
[T. H. D.]
SA'TALA ( इáta入a), an important town of Armenia Minor, as may be inferred from the numerous routes which branched off from thence to Pontus and Cappadocia. Its distance from Cacsareia was 3:5 miles, and 124 or 135 from Trapezus. The
town was situated in a valley surrounded by moumtains, a little to the north of the Euphrates, and was of importance, being the key to the mountain passes leading into Pontus; whence we find that in later times the Lugio xv. Apollinaris was stationed there. In the time of Justinian its walls had fallen into decay, but that emperor restored them. (Ptol. i. 15. § 9, v. 7. § 3, viii. 17. § 41 ; Dion Cass. lxviii. 18; Procop. de Aed. iv. 3 ; It. Ant. pp. 181, 183, 206, 207, 216, 217; Notit. Imp.; Tab. Peut.) The site of this town has not yet been discovered with certainty, though ruins found in varions parts of the country have been identified with it by conjecture. (Tournefort, Voyages, Letter 21, c. 2. p. 17 ; Rennell, Asia Minor, ii. p. 219 ; Cramer, Asia Minor, ii, p. 152, foll.)
[L. S.]
SATARCHAE, a Scythian people on the E. coast of the Tauric Chersonesus, who dwelt in caves and holes in the ground, and in order to avoid the rigour of winter, even clothed their faces, leaving only two small holes for their eyes. (Mela, ii. 1.) They were unacquainted with the use of gold and silver, and carried on their traffic by means of barter. They are mentioned by Pliny under the name of Scythi Sutarchi (iv. 26). According to Ptolemy (iii. 6. § 6) there was a town in the Tauric peninsula called Satarche ( $\sum a \tau d \rho \chi \eta$ ), which the scholiast (ad loc.) says was subsequently called Matarcha (Md́rapXa); but the account of the Satarchae living in caverns seems inconsistent with the idea of their having a town. Yet Valerius Flacens also mentions a town -or perhape a district-called Satarche, which, from his expression, " ditant sua mulctra Satarchen," we may conclude to have been rich in herds of cattle. (Argon. vi. 145.) The same poet describes the Satarchae as a yellow-haired race. (Ib.) [T.H.D.] SATI'CULA (Eatikoha, Diod.: Eth. Eatıkoגavós, Steph. B.; Saticulanus, Liv.; but Saticulus, Virg.), a town of Samnium, uearly on the frontiers of Campania. It is first mentioned at the outbreak of the First Sumnite War (b. c. 343), when the consnl Cornelius established his camp there, apparently to watch the movements of the Samnites in that quarter, and from thence subsequently adrancing into their territory, was drawn into a defile, where he narrowly escaped the loss of his whole army, but was saved by the courage and ability of Decius. (Liv. vii. 32, 34.) Again, in B. c. 315, during the Second Samnite War, it was besieged by the Roman dictator L. Aemilins, and was considered of sufticient importance to engage a Roman army for nearly a year, when it was taken by Q. Fabius. The Samnites made a vigorous attempt to relieve it, but without effect, and it fell into the hands of the Romans. (Id. ix. 21, 22; Diud. xix. 72.) From this time it continued in their power; and before the close of the war it was one of the places which they determined to occupy with a colony, which was established there in B. c. 313. (Vell. Pat. i. 14; Fest. 8. v. Saticula, p. 340, M.) Livy dues not notice the establishment of a colony there on this occusion, but he afterwards mentions it as one of the "coloniae Latinae," which distinguished themselves in the Second Punic War by their zeal and fidelity. (Liv. xxvii. 10.) It is remarkable, however, that a few years before the name of Saticula is found among the towns that had revolted to Hannibal, and were recovered by Fahius in b.c. 215. (Liv. xxiii. 39.). But it appears that all the MSS. have "Austicula" (Alschefski, ad loc.); and though this name is otherwise quite unknown, it is certainly not safo to alver
it, when, by so doing, we involve ourselves in a great historical difficulty; for the revolt of one of the Latin colonies is in itself most improbable, and was certainly not an event to be passed over with such slight notice. The territory of Saticulum (" ager Saticulanus") is again noticed during the same war in conjunction with that of Trebula (Liv. xxiii. 14); but from the end of the Second Punic War all trace of it disappears. The name is not found in any of the geographers, and its site is extremely uncertain. But the passages in Livy (ix. 21, 22) seem to point to its being situated not far from Plistia, which may very probably be placed at Prestia near Sta Agata dei Goti; while the description of the march of Marcellus in b. c. 216, shows clearly that it must have been situated $S$. of the Vulturnus, and probably in the valley at the back of Mount Tifats, between that ridge and the underfalls of Mount Taburnus. It may be added that such a position would be a very natural one for the Roman consul to occupy at the first outbreak of the Samnite wars, from its proximity to Capua.
[E. H. B.]
SATION. [Dassaretae, Vol. I. p. 756, a.]
SATNIOEIS ( $\Sigma a t v i$ ofts: Tuzla or Tiusha), a small river in the southern part of Troas, having its sources in Mount Ida, and flowing in a western direction between Hamaxitus and Larissa, discharges itself into the Aegean. It owes its celebrity entirely to the Homeric poems. (IL. vi. 34, xiv. 445, xxi. 87; Strab. xiii. pp. 605, 606, who states that at a later time it was called इaфviócis.)
[L.S.]
SATRAE (Kárpar, Herod. vii. 110-112), a Thracian people who occupied a portion of the range of the Pangaens, between the Nestus and the Strymon. Herodotus states that they were the only Thracian sribe who had always preserved their freedom; a fact for which he accounts by the nature of their country, -a mountainous region, covered with forests and snow - and by their great bravery. They alone of the Thracians did not follow in the train of Xerzes, when marching towards Greece. The Satrae were in possession of an oracle of Dionysus, situated among the luftiest mountain peaks, and the interpreters of which were taken from among the Bessi,a circumstance which has suggested the conjecture that the Satrae were merely 2 clan of the Bessi,a notion which is rendered more probable by the fact that Herodotus is the only ancient writer who mentions them; whereas the Bessi are repeatedly spoken of. We may infer from Pliny's expression, "Bessorum multa nomins ${ }^{n}$ (iv. 11. s. 18), that the Bessi were divided into many distinct clans. Herodotus says that to the Satrae belonged the principal part of the gold and silver mines which then existed in the Pangaens.
[J. R.]
SA"TRICUM (Eth. इarpıkayds, Satricanns: Casale di Conca), an ancient city of Latium, situated on the frontier of the Volscian territory, between the Alban hills and the sea. This position rendered it a place of importance during the wars between the Kumans and Volscians, and it is frequently mentioned in history at that period. It appears to have been originally a Latin city, as Diodorus mentions its name among the reputed colonies of Alba, and Dionysius also includes it in the list of the thirty cities of the Latin League. (Diod. vii. Fr. 3; Dionys. v. 61.) Bat when it first appears in history it is as a Volscian town, apparently a dependency of Antium. It had, however, been wrested from that people by the Romans at the same time with Corioli, Pollusca, \&cc ; and bence it is oue of
the towns the recovery of which by the Volscians is ascribed to Coriolanus. (Liv. ii. 39.) It seems to have continued in their power from this time till after the Gaulish invasion, as in R.C. 386 it was made the head-qnarters of the Volscians and their allies on the outbreak of a war with Rome, and, after their defeat by Camillus, was assaulted and taken by that general. (Id. vi. 7, 8.) It would appear that it must on this occasion have for the first time received a Roman colony, as a few years later (b, c. 381) it is styled a "colonia populi Romani." In that year it was attacked by the Volscians in concert with the Praenestines, and, after an obstinate defence, was carried by assault, and the garrison put to the sword. (Id. vi. 22.) It is subsequently mentioned on two occasions as affording shelter to the Volscian armies after their defeat by the Romans (Id. vi. 22, 32); after the last of these (b. C. 377) it was burnt by the Latins, who considered themselves betrayed by their Volscian allies. (llb. 33.) It was not till в. c. 348 that the city was robuilt by the Antiates, who established a colony there; but two years later it was again taken by the Romans under M. Valerius Corvus. The garrison, to the number of 4000 men, were made prisoners, and the town burnt and destroyed, with the exception of a temple of Mater Matuta (Id. vii. 27; Fast. Capit.) A few years later it was the scene of a victory of the Romans, under C. Plautins, over the Antiates (id. viii. 1), and seems to have been soon after restored, and received a fresh colony, as it was certainly again inhabited at the commencement of the Second Samnite War. In B.c. 320, after the disaster of the Caudine Forks, the Satricans revolted from Rome and declared in favour of the Samnites; but they were soon punished for their defection, their city being taken by the consul Papirias, and the Samnite garrison pyt to the sword. (Liv. ix. 12, 16; Oros, iii. 15.) From this time it seems to have continued subject to Rome; but its name disappears from history, and it probably sunk rapidly into decay. It is incidentally mentioned during the Second Pumic War (b. c. 206) on occasion of a prodigy which occorred in the temple of Mater Matuta, already noticed (Liv. xxviii. 11); but it seems certain that it ceased to exist before the close of the Republic. Cicero indeed alludes incidentally to the name in a manner that shows that the site at least was well known in his time (ad Q. Fr. iii. 1. § 4); but Pliny reckons it among the celebrated towns of Latium, of which, in his days, no vestige remained (Plin. iii. 5. s. 9); and none of the other geographers allude to its name. The site, like that of most of the Latin cities which disappeared at an early period, is a matter of much doubt; but several passages in Livy tend to prove that it must have been situated between Antium and Velitrae, and its site has been fixed with mach probability by Nibby at the farm or casale, now called Conca, about half way between Anzo and Velletri. The site is an isolated hill of tufo, of somewhat quadrangular form, and about 2500 feet in circuit, with precipitous sides, and presents portions of the ancient walls, constructed in much the same style as those of Ardea. of irregular square blocks of tufo. The sites of two gates, one on the E. the other to the W., may also be distinctly traced. There is therefore no doubt that the site in question is that of an ancient city, and the position would well accord with the supposition that it is that of Satricum. (Nibby, Dinlorni di Roma, vol. iii. p. 64, a.)
[E. H. B.]

SA'TTALA. [SETAE.]
sa'turae palus. [Pomptisar Paluder.]
SA'TURIUM. [Tarentum.]
SATURNI PROMONTORIUM, a headland in Hispania Tarraconensis, not far from Carthago Nova. (Plin. iii. 3. 8. 4.) It must be the amme promontory called Exou6parla axpa by Ptolemy (ii. 6. § 14). Now Cabo de Palos. [T. H. D.]

SATU'RNIA (Eacoupvia: Saturnia), an ancient city of Etruria, situated in the valley of the Albinia (Albegna), about 24 miles from its month. There is no doubt that it was an ancient Etruscan city; and as Pliny tells us that it was previously called Aurinia (iii. 5. 8. 8), it is probable that this was its Etruscan name, and that it first received that of Saturnia at the time of the Roman colony. But no mention of it is found in history during the period of Etruscan independence; and there is certainly no ground for the supposition of Müler that it was one of the twelve cities of the Etruscan League. (Miller, Etrusker, vol. i. p. 350.) Dionysias indeed mentions it as one of the cities founded by the $\mathrm{Pe}-$ lusgians, and subsequently taken from them by the Tyrrhenians and Fitruscans (Dionys. i. 20); but though this is strong evidence for the antiquity of the city, there is no proof that it was ever a place of importance ander the Etruscans; and it even seems probable that before the close of their rule, Saturnia bad sunk into the condition of a subordinate town, and a mere dependency of Caletra. At least it is remarkable that Livy, in speaking of the establishment of the Roman colony there, says that it was settled "in agro Caletrano." (Liv. xxxix. 55.) The foundation of this colony, which was established in B.c. 183, is the only historical fact recorded to us concerning Satarnia; it was a "colonia civium," and therefore would naturalls retain its colonial rank even at a late period. Pliny, however, calls it only an ordinary municipal town, bat Ptolenny gives it the rank of a colony, and it is mentioned as such in an inscription of Imperial times. (Plin. iii. 5. 2. 8; Ptol. iii. 1. § 49; Gruter. Inscr. p. 1098. 8.) It is probable therefore that it received a fresh colony under the Roman Empire, though we have no account of the circumstance. But it seems not to have been a place of any importance, and the existing remains which belong to this period are of little interest.

The modern town of Saturnia, which retains the ancient site as well as name, is but a very poor place; but its mediaeval walls are based on those of the ancient city, and the circuit of the latter may be distinctly traced. It occupied the summit of a conical hill, surrounded by steep cliffs, about 2 miles in circuit. Considerable portions of the walls remain in several places: these are constructed of polygonal masonry, resembling that of Cosa, but built of travertino; they are supposed by Micali to belong to the Roman colony, though other writers would assign them to the Pelasgians, the earliest inhabitants of Saturnia. (Micali, Ant. Pop. Ital. vol. i. pp. 152, 210; Dennis, Etruria, vol. ii. pp. 308-310.) Numerous tombs are also found in the neighbourhood of the town, but which more resemble the cromlechs of northern Europe than the more regular sepulchres of other Etruscan cities. (Demuis, l. c. pp. 314-316.)
[E. H. B.]
SATYRI MONUMENTUM ( $\tau \delta$ इ इatúpou $\mu \nu \tilde{\eta} \mu a$, Strab. xi. p. 494), a monument consisting of a vast mound of earth, erected in a very conspicuous situation on a promontory on the E. side of the Cim-

SAVO.
merian Bosporas, 90 stadia S. of Achilleum. It was in honour of a king of Bosporus, whom Dubois de Montpéreux identifies with Sutyrus I., who reigned B. c. 407-393. (Voyage autour du Caucase, 7. p. 48.) The same authority ( $\mathrm{Ib} . \mathrm{p} .36$ ) identifies the mound with the hill Koukwoba. [T. H. D.]

S ITYRO'RUM I'NSULAE (Zarvípoy ทฑ゙ซoL, Ptol. vii. 2. § 30), a gronp of three Indian islands, lying E. of the Chersonesus Aurea, in the same degree of latitude as its southern point. They were said to be inhabited by a race of men having tails like Satyrs; that is, probably, by apes resembling men. Perhaps the Anamba islands. [T. H. D.]

SATYRO'RUM PROMONTO'RIUM (Kar Úpop Gxpov, Ptol. vii. 3. § 2), a promontory on the coast of Sinae (China), forming the southern extremity of the bay Theriades, and placed by Ptolemy directly under the equator. It is probably the present Caps St. James. (Forbiger, Geogr. ii. p. 477, noto 51.)

## SAVA. [Mapharitis.]

SAVARI (Eavapoc, Ptol. iii. 5. § 22), a people in the N. of European Sarmatia, between the rivers Turuntus and Chesinus. Schafarik (Slav. Alterth. i. p. 212) identifies them with the Sjezoer, a powerful Slavorian race which dwelt on the rivers Desna, Sem, and Sula, and possessed the towns Tschernigoso and Ljubetsch, both of which are mentioned by Constantine Porphyrogenitus (de $A d m . I m p . c .9$ ). The name of the Sjewer does not occur in history after the year 1024, though their land and castles are frequently mentioned subsequently in Russian annals. (Jbid. ii. p. 129.)
[T. H. D.]
SAVARIA. [Sabaria.]
SAUCONNA. [ARAR]
SAVIA (Zaovia, Ptol. ii. 6. §56), a town of the Pelendones in Hispania Tarraconensis, the site of which is undetermined.
[T. H. D.]
SAVINCA'TES, a name which occurs in the inscription on the arch of Susa, and is placed next to the Adanates, whom D'Anville supposes to be the same as the Edenates [Edenates]. His reasons for placing the Savincates below Embrun and on the Druance, are not satisfactory. He finds a name Savines there, and that is all the proof except the assumption of the correctness of the position which he has assigned to the Adanates, and the further assumption that the two people were neighbours.
[G.L.]
SAULOE PARTHAYNISA (Lau入ón Mapoaúvioa), this curiously mised name which has passed into treatises of geography from the editions of Isidorus in the Geographi Graeci Minores of Hadson and Muller, appears to have rested on a bad reading of the Greek text. The amended text of the passace
 (Isidor.Stath. Parth. c. 12), which is probably correct (see Geog. Graec. ed. Müller, Paris, 1855.) [V.]

SAUNARIA ( Eauvapia), a town of unknown site in Pontus Polemoniacus, is mentioned only by Ptolemy (v. 6. § 10).
[L. S.]
SAUNIUM, a little river on the N. const of Hispania Tarraconensis, in the territory of the Concani and Saleni; now Saja. (Mela, iii. 1.) [T. H. D.] Savo. [Vada Sabbata.]
SAVO (Savone), a small river of Campania, which appears to have formed the boundary between that country and Latium, in the most extended sense of the term. It is a small and sluggish stream ("piger Savo," Stat. Silv. iv. 3. 66), flowing into the sea between Sinuessa and the mouth of the Vul-
turnus (Plin. iii. 5. s. 9). and was crossed by the Appian Way, a few miles from its mouth, by a bridge called the Pons Campanus, from its forming the frontier of that country.
[E. H. B.]
SAUROMATAE ( Iavpoudrau), probably the furm which the root Sarmat-took in the languages from which the information of the Greeks of the parts about Olbiopolis was derived. It is the only form found in Herodotus, who knows nothing of the later name Sarmatae. When this latter term, however, came into use, Sauromatae, especially with the Roman writers, became archaic and puetical, or exotic. This is the cave in the line -
" Ultra Sauromatas, fugere hinc libet," \&c.
(Juv. Sat. ii. 1),
and olsewhere.
The Greeks of the Black Sea would take the name from either the Scythians or the Getae; and it is probably to the language of the latter, that the form belonged. Hence, it is a form of Samartae, taken from one of the eastern dialects of Dacia by the Greeks (possibly having passed through a Seythian medium as well) as opposed to Sarmatae, which is from the western parts of the Dacian area, and adopted by the Romans. Its first and most convenient application is to the Asiatic branch of the Sarmatians. These may be called Sarmatians as well, as they are by Ptolemy. On the contrary, it is rare, even in a Greek author, to apply Searomatae to the Sarmatians of the Pannonian frontier. The evidence as to the identity of the words is superabundant. Besides the internal probability, there is the statement of Pliny -" Sarmatae, Graecis Sauromatae" (iv. 25).

With the writers of the Augustan age the ase of the two forms fluctuates. It is exceptional, however, for a Greek to write Sarmatae, or a Roman Sauromatae. Exceptional, however. as it is, the change is frequent. Diodorus wites Sauromatae (ii. 44), spenking of the Asiattic branch; Strabo writes Sauromatae under the same circumstances; also when following Greek authorities. For the western tribes he writes Sarmatae.

Ovid asees the term that best suits his metre, giving Sarmatace the preference, caeteris paribus.
"Sarmaticae major Geticaeque frequentia gentes."
(Trist. v. 7. 13.)
"Jam didici Getice Sarmaticeque Inqui."
'Ibid. v. 12. 58.)
"Stridula Sawomates panstra bubulcus agit."
(Ibid. iii. 12. 30.)
The Sanromatae of Herniotus were the ocenpants of a $\Lambda d \xi \leq s, 2$ word evidently used in a technical sense, and perhaps the term by which his informants translated the Scythian or Sarmatian equivalents to our word March; or it may $=$ street. The Bashkir country, at the present moment, is divided into four streets, roads, or ways, according to the countries to which they lead. The number of these $\Lambda \dot{d} \xi$ tes were two; the first being that of the Sauromatue. bruanded on the south and west by the Tanais and Mreutis, and extending northwards fifteen days' joorney. The cuantry was treeless. The second ^d§ıs, that of the Budini, followed. This was a wooded country. There is no necessity for connecting the Budini with Sarmatae, on the strength of their both being uccupants of a $\Lambda d \xi$ s. All that comes out of the text of Herodotus is, that the

Scythians near Olbiopolis knew of a $\wedge$ dkts of the Sauromatae and a $\Lambda d \xi$ is of the Budini. The former seems to have been the north-eastern part of the Lon Kozak country, with a portion of Saratov (iv. 21).

When Darius invaded Scythia, the Sauromatae, Geloni, and Budini acted together, and in opposition to the Agathyrsi. Neuri, Androphagi. Melanchlaeni, and Tauri; the former agreeing to help the Scythians, the latter to leare them to their fate. This suggests the probability that. politically, the $\Lambda d \xi$ tes were confederate districts (Herod. iv. 119).

The language of the Sauromatae was Scythian with solecisms, a statement which leads to the strange story of the Amazons (iv. 110-116), with whom the Sauromatae were most especially connected (iv. 117). The women amongst them remained unmarried until they had slain an enemy.

The account of Hippocrates is substantially that of Herodotus, except that he especially calls the Sauromatae Europeun and Scythian; though, at the same time, different from other nations. He makes the number, too, of enemies that the virgins must slay before they can mariy, three.

For further details, see Sarmatia. [R. G. L.]
SAVUS (Edos or इíovos: Sare), a great and narigable tributary of the Danube; it has its sources in the Carnian Alps (Plin. iii. 28; Jornand. de Reb. Get. 56), and, flowing in an eastern direction almost parallel with the more northern Dravus, reaches the Danube at Singidunum. A portion of its apper course forms the boundary between Noricum and Pannonia, but the whole of the lower part of the river belongs to the southern part of Pannonia, and some of the most inportant towns of that country, as Siscia, Servitiam, and Sirmium, were situated on its banks. (Strab. iv. p. 207, vii. p. 314 ; Appian, iii. 22; Ptol. ii. 16. § 1, iii. 9.§ 1 ; Justin, $\mathbf{x x x i i . ~ 3 , ~ 8 , ~ 1 6 ; ~ C l a u d . ~ d e ~ L a u d . ~ S t i l i c h . ~ i i . ~}$ 192.)
[L. S.]
SAXA RUBRA (Prima Porta), a village and station on the Flaininian Way, 9 miles from Rome. It evidently derived its name from the redness of the tufo rocks, which is still conspicuous in the neightourhood of Prima Porta. The name is written "Ad Rubras" in the Tabula, while Martial calls the place simply "Rubrae;" and this form is found also in the Jerusalem Itinerary. (Martial, iv. 64. 15; Itin. Hier. p. 612.) But the proper form of it seems to have been Suxa Rubra, which is used both by Liry and Cicero. The formermentions it during the wars of the Romans with the Veientes, in connection with the operations on the Cremera (Liv. ii. 49); and Cicero notices it as a place in the immediate vicinity of Rome, where M. Antonius halted before entering the city. (Cic. Phil. ii. 31.) It was there also that Antonius. the general of Vespaxian, arrived on his march upon Rome, when he learnt the successes of the Vitellians and the death of Sabinus. (Tac. Hist. iii. 79.) At a much later period also (B. c. 32) it was the point to which Maxentius advanced to mert Constantine previous to the battle at the Milvian bridge. (Vict. Cacs. 40. § 23.) We learn from Martial (l.c.), that a village had grown up on the spot, as would naturally be the case with a station so immediately in the neighbourhond of the city.

On a hill on the right of the Via Flaminia, a little beyond Prima Porta, are considerable ruins, which are believed to be those of the villa of Livia, known by the name of "Ad Gallinas," which was
situated 9 miles from Rome，on the Via Flaminia． （Plin．xr．30．s．40；Suet．Galb．1．）［E．H．B．］

SAXETANUM，a place in Hispania Bsetica （Itin．Art．p．405），called Sez（ $\Sigma \in \notin \xi$ ）by Ptolemy （ii．4．§7），Hexi by Mela（ii．6），and by Pliny（iii． 3）Sexti Firmum Julium．It is the＇E $\xi$ 亿тavḕ móncs of Strabo（iii．p．156）．On the name see Casaubon（ad Strab．i．p．50），and．Tzschuck（ad Melam，vol．ii．pt．2．p．447）．It was renowned for its salt－fish．（Strab．iii．p．156；Athen．iii．p． 121 ； Plin．xxxii．11．s． 53 ；Mart．vii．78，\＆xc．）Now most probably Motrih．（Cf．Florez，Esp．Sagr．xii． p．101．）
［T．H．D．］
SA＇XONES（之d\＆oves：Saxons），a German tribe， which，though it acted a very prominent part about the beginning and during the early part of the middle ages，yet is not even mentioned in ancient history previous to A．D．287．In that year，we are told by Eutmpius（vii．13；comp．Oros．vii．25），the Saxons and Franks infested the coasts of Armorica and Belgica，the protection of which was intrusted to Carausius．The fact that Pliny and Tacitus do not mention them in the country in which we after－ wands find them，does not prove that they did not exist there in the time of those writers．For the inhabitants of the Cimbrian Chersonesus，where subsequently we find the Saxons，are mentioned by those writers only under the general appellation of the Cimbri，without noticing any special tribes under separate naines．Ptolemy（ii．11．§ 11 ；comp．Steph． B．e．v．）is the first authority describing the ha－ bitations of the Sasons，and accoriling to him they occupied the narrow neck of the Cimbrian Cherso－ nesus，between the river Albis（ $E$（be）and Chalusus （Trave），that is，the country now called Holstein． Their neighbours on the south of the Albis were the Chauci，in the east the Suardones，and in the north the Singulones，Angli，and other smaller tribes of the peninsula．But besides this portion of the continent，the Saxuns also occupied three islands， called＂Saxon islands，＂off the coast of Holstein （Eajkbuev vīoos，Ptol．ii．11．§ 31），one of which was no doubt the modern Helgoland；the two others must either be supposed to have been swallowed up by the sea，or be identified with the islands of Dycksand and Vielochovel，which are nearer the coast than Helgoland．

The name Laxones is commonly derived from Sahs or Sachs，a battle－knife，but others connect it with seux（earth）or seat，according to which Saxons would describe the people as living in fixed seats or habitations，as opposed to the free or wandering Franks．The former，however，is the more probable origin of the name；for the living in fixed babitations was certainly not a characteristic mark of the ancient Sazons．

They appear to hare gradually spread along the north－western coast of Germany，and to have gained possession of a large extent of country，which the Ravenna Geographer（iv． $17,18,23$ ）calls by the name of Saxonia，but which was certainly not in－ habited by Saxons exclusively In A．D． 371 the Saxons，in one of their usual ravaging excursions on the coasts of Gaul，were surrounded and cut to pieces by the Roman army under Valentinian（Oros． vii．32；Amm．Marc．xxviii．2，5；comp．xxvi．4， xxvii．8；Zosim．iii．1，6）；and about the midde of the fifth century a band of Saxons led by Hengist and Horsa crossed over into Britain，which had been completely given up by the Kumann，and now fell inw the hands of the roving Saxons，who in con－
nection with other German tribes permanently esta－ blished themselves in Britain，and there developed the great features of their national character．（Beda， Hist．Eccles．i．12）．As the Romans never invailed the original country of the Suxons，we know of no towns or places in it，with the exception perhape of the town of Treva（Tphova）mentioned by Ptolemy （ii．11．§ 27）．Besides those already mentioned，there are but few passages in ancient writers in which the Saxons are mentioned，such as Marcian，p．53；Claud． de Laud Stil．ii．255；Sidon．Apoll．vii．90， 369. Among modern writers the reader may consult Kufahl， De Suxonum Origine，Berlin，1830，8vo．，and the best works on the early history of England and Ger－ many．
［L．S．］
SA＇XONUM I＇NSULAE．［SAxonfs．］
SCAIDA＇VA，a town in Moesia Inferior，between Novae and Trimammium．Itin．Ant．p．222．）It is called Scedeba（ $\sum \kappa \in \delta \in 6 \alpha$ ）by Procopius（de Aed． iv．11）．Varionsly identified with Ratonou and Rustschuck．
［T．H．D．］
SCA＇LABIS，a town of Lusitania，on the ruad from Olisipo to Emerits and Bracara．（Itin．Ant． pp．420，421．）Pling（iv．21．8．35）calls it a Ro－ man colony，with the surname Praesidium Juliom， and the seat of one of the three＂conventus juri－ dici＂of Lusitania．It is undoubtedly the sime place which Ptolemy（ii．5．§ 7）erroneously calla Eкa入abiokos，which is probably a corruption of Eкa入afis ко入．（колсоиia）The modern Santaremi． （Cf．Wesseling，ad Itin．L．c．；Isidor．de Vir．Ill．c． 44 ；Florez，Esp．Sagr．xiii．p．69．）［T．H．1．］

SCALDIS（Schelde，Escaut）a river in North Gallia．Caesar（B．G．vi．33），the first writer who mentions the Scaldis，says，when he was porsuing Ambiorix，that he determined to go＂as fur as the Scaldis which flows into the Mosa（Maas）and the extremity of the Arduenna＂（Ardennes）．All the MSS．quoted by Schneider（B．G．vi．33）have the reading＂Scaldenn，＂＂Schaldem，＂＂Scaldinn，＂and other trifling varieties，except one MS．which has ＂Sambim ：＂so that，as Schneider concludes，no cannot doubt that Caesar wrote＂Scaldis＂in His passage．Pliny（iv．17）describes the Scaldis as the boundary between the Gallic and Germanic nations，and says nothing of its union with the Mosa：＂A Scalde ad Sequanam Belgica；＂and＂a Scaldi incolunt extera Toxandri pluribus nominibus．＂ Some geographers suppose that the Tabuda of Ptolemy is the Scheldo［TABuDA．］

The passage of Caesar is most easily explained by supposing that he knew nothing of the lower course of the Schelle，and only reported what he heard．It is possible that the East Schelde was once the chief outlet of the Schelde，and it may have had some communication with the channels about the islands between the East Schelde and the lower course of the Mosa，which communication no longer exists．There is at least no reason for taking，in place of＂Scaldim＂or＂Scaldem，＂the reading ＂Sabin＂（Eá6u），from the Greek version of the Commentaries．

The Scluelle rises in France，in the department of Aisne．Below Anticerp it enters the sex by two anstuaries，the Mond or Weat Schelde and the Eust schelde．
［G．L．］
SCAMANDER（Ěкáuarópos：Mendere Su，or the river of Dumarbaschi），a famous little stiean in the plain of Troy，which according to Homer （Il．xx．74）was called Xanthus by the gods and Scumander by nen；though it probably owed then
name Xanthus to the yellow or brownish colour of its water (comp. Il. vi. 4, zxi.8). Notwithstanding this distinct declaration of the poet that the two names belonged to the same river, Pliny (v. 33) mentions the Xanthus and Scamander as two distinct rivers, and describes the former as flowing into the Portus Achaeorum, after having joined the Simoeis. In regard to the colour of the water, it was believed to have even the power of dyeing the wool of sheep which drank of it. (Aristot. Hist. Anim. iii. 12; Aelian, Hist. Anim. viii. 21 ; Plin. ii. 106; Vitruv. viii. 3,14.) Homer (Il. xxii.147, \&c.) states that the river had two sources close to the city of llion, one sending forth hot water and the other cold, and that near these springs the Trojan women used to wash their clothes. Strabo (xiii. p. 602) remarks that in his time no hot spring existed in those districts; he further asserts that the river had only one source; that this was far away from Troy in Mount Ida; and lastly that the notion of its rising near Troy arose from the circumstance of its flowing for some time under ground and reappearing in the neighbourhood of Ilion. Homer describes the Scamander as a large and deep river (IL. xx. 73, xxi. 15, xxii. 148), and states that the Simoeis fluwed into the Scamander, which after the junction still retained the name of Scamander (Il. v. 774, xxi. 124; comp. Plin. ii. 106; Herod. v. 65; Strab. xiii. p. 595). Although Homer describes the river as large and deep, Herodotus (vii.42) states that its waters were not sufficient to afford drink to the army of Xerxes. The Scamander after being joined by the Simoeis has still a course of about 20 stadia eastward, before it reaches the sea, on the east of Cape Sigeum, the modern Kum Kale. Ptolemy (r. 2. § 3), and apparently Pomp. Mela (i. 18), assign to each river its own mouth, the Simoeis discharging itself into the sea at a point north of the mouth of the Scamander. To account for these discrepancies, it must be assumed that even at that time the physical changes in the aspect of the country arising from the muddy deposits of the Scamander had produced these effects, or else that Prolemy mistcok a canal for the Scamander. Even in the time of Strabo the Scamander reached the sea only at those reasons when it was swollen by rains, and at other times it was lost in marshes and sand. It was from this circumstance, that, even before its junction with the Simoeis, a canal was dug, which flowed in a western direction into the sea, south of Sigeum, so that the two rivers joined each other only at times when their waters were high. Pliny, who calls the Scamander a navigable river, is in all probability thinking of the same canal, which is still navigable for small barges. The point at which the two rivers reach the sea is now greatly changed, for owing to the depooits at the mouth, the coast has made great advances into the sea, and the Portus Achueorum, probably a considerable bay, has altogether disappeared. (Comp. Leake, Asia Minor, p. 289, foll., and the various works and treatises on the site and plain of ancient Troy.)
[L.S.]
SCAMA'NDRIA, a small town of Mysia, no doubt situated on the river Scamander in the plain of Troy (Plin. v. 33; Hierocl. p. 662, where it is called Scamandros). Leake (Asia Minor, p. 276) conjectures that it stood on a hill rising below Bu marbaschi. An inscription referring to this town is preserved in the museum at Paris (Choiseul-Gouffier, Voyage Pittorcsque, tom. ii. p. 288.) [L. S.]
SCAMBO'NDAE. [ATHKNAE, p. 302, 2.]

SCAMPAE. [Illyricum, Vol. II. p. 36, b.]
SCANDARIUM. [Cos.]
SCANDEIA. [Crthera.]
SCA'NDIA (Ekavoía) or SCANDNA'VIA. Until about the reign of Augustus the countries north of the Cimbrian Chersonesus were unknown to the ancients, unless we assume with soine modern writers that the island of Thule, of which Pytheas of Massilia spoke, was the western part of what is now sometimes called Scandinavia, that is Siceden and Norway. The first ancient writer who alludes to these parts of Europe, Pomp. Mela, in the reign of Claudius, states (iii. 3) that north of the Albis there was an immense bay, full of large and small islands, between which the sea flowed in narrow channels. No name of any of these islands is mentioned, and Mela only states that they were inhsbited by the Hermiones, the northernmost of the German tribes. In another passage (iii. 6) the same geographer speaks of an island in the Sinus Codanus, which, according to the common reading, is called Codanonia, or Candanovia, for which some have emended Scandinavia. This island is described by him as surpassing all others in that sea both in size and fertility. But to say the least it is very doubtful as to whether he alludes to the island afterwaris called Scandia or Scandinavia, especially as Mela describes his island as inhabited by the Teutones. The first writer who mentious Scandia and Scandinavia is Pliny, who, in one passage (iv. 27), likewise speaks of the Simas Codanus and its numerous islands, and adds that the largest of them was called Scandinavia; its size, he continues, is unknown, but it is inhabited by 500 pagi of Helleviones, who regard their island as a distinct part of the world (aller terrarum orbis). In another passage (iii. 30) be mentions several islands to the east of Britannia, to one of which he gives the name of Scandia. From the manner in which he speaks in this latter passage we might be inclined to infer that he regarded Scandinavia and Scandia as two different islands; but this appearance may arise from the fact that in each of the passages referred to he followed different authorities, who called the same island by the two names Scandia and Scandinavia. Ptolemy (ii. 11. § $\$ 33,34,35$ ) speaks of a group of four islands on the east of the Cimbrian Chersonesus, which he calls the Scandiae Insulae ( Kavojiau $\hat{\eta} \sigma o l$ ), and of which the largest and most eastern one is culled Scandia, exterding as far as the mouth of the Vistula. In all these accounts there is the fundamental mistake of regarding Scandinavia as an island, for in reality it is connected on the north. east with the rest of Europe. Pliny speaks of an immense mountain, Sevo, in Scandiuavia, which may possibly be Mount Kjölen, which divides Sweden from Norway, and a southern branch of which still bears the name of Seve-Ryggen. The different tribes mentioned by Ptolemy as inhabiting Scandia are the Chredini (Xaiסeıvol), Phavonae (\$avoval), Phiraesi (\$црaî̃oı), Gutae (Гoürai), Dauciones ( $\Delta a u k i \omega \nu \in s)$, and Levoni ( $\Lambda \in \cup \omega \bar{\nu} o l$ ). At a later time, Jornandes (de Reb. Get. p. 81, \&c.) enumerates no less than twenty-eight different tribes in Scandinavia. Tacitus does not indeed mention Scandia, but the Sitones and Suiones (whence the modern name Sroedes) must unquestionably be conceived as the most northern among the German tribes and as inhabiting Scandia (Germ. 44, 45). It is well known that according to Jornandes the Goths, and according to Paulus Diacouns (v. 2) the

I．ongobardi，originally came from Scandinavia．It deserves to be noticed that the southern part of the supposed island of Scandia，the modern Sweden，still bears the name Scania，Scone，or Schonen．Pliny （viii．16）mentions a peculiar animal called achlis， and resembling the alcis，which was found only in Scandinavia．For further discussions about the va－ rious tribes of Scandinavia，which all the ancients treat as a part of Germania Magna，see Wilhelm， Germanien，p．343，\＆cc．；Zeuss，Dic Deutschen，foc． pp．77，156，\＆c．
［L．S．］
SCA＇NDILA，a small island in the northern part of the Aegaean sea，between Peparethus and Scyros， now Skandole．（Plin．iv．12．s．23；Mela，ii． 7. §8．）

SCANDINAVIA．［Scandia．］
 de Exilio，p．605；Marcellin．Vit．Thucyd．§ 19）， or the＂foss wood，＂situated on the confines of Mace－ donia and Thrace，in the auriferous district of Mt． Pangaeum，to which Thucydides was exiled，and where he composed his great legacy for all ages－ the history of the war in which he had served as general．
［E．B．J．］
SCA＇PTIA（Eth．इncarrinios，Scaptiensis：Pas－ serceno），an ancient city of Latium，which appears to have ceased to exist at a very early period．Its name is found in Dionysius among the thirty cities of the Latin League（Dionys．v．61）；and it therefore seems probable that it was at that time a considerable， or at all events an independent，town．No mention of it is subsequently found in history，but aftar the great Latin War it was included in one of the new Roman tribes created on that occasion（b．c．332）， to which it gave the name of Scaptian．（Fest．e．v． Scaptia，p． 343 ；Liv．viii．17．）No subsequent mention is found of the town，and it is only noticed by Pliny among the＂clara oppida＂of Latium， which in his time had utterly disappeared（Plin．iii． 5．8．9）．Silius Italicus also alludes to the＂Scaptia pubes，＂but in a passage from which no inference can be derived（viii．395）．The Scaptienses no－ ticed by Suetonius（Aug．40）and elsewhere were the members of the Scaptian tribe．There is no real clue to its position；that derived from the passage of Festus，from which it has been com－ monly inferred that it was in the neighbourhood of Pedum，being of no valuo．The words＂quam Pe－ dani incolebant，＂found in all the ordinary editions of that author，are in fact merely a supplement of Ursinus，founded on an inference from Livy（viii． 14,17 ），which is by no means conclusive．（See Müller＇s note．）But supposing that we are justified in placing Scaptia in this neigbbourhood，the site suggested by Nibby，on the hill now occupied by a farm or casale called Passerano，is at least probable enough；the position is a strong one，on the point of one of those narrow ridges with precipitous sides between two ravines，which abound in this part of the Campagna．It is about 3 miles NW．of Galli－ cano，the presumed site of Pedum；and the exist－ ence of an ancient town on the spot is attested by the fragments of ancient walls，the large，roughly－ hewn masses of which are found worked up into more recent buildings．Its situation closely resem－ bles that of Gallicano itself，as well as that of Zagarolo，about 3 miles further $\mathbf{S}$ ．（where there are also indications of ancient habitation）；and the iden－ tification of any of the three can be little more than conjectural．（Nibby，Dintormi，vol．iii．pp．70， 71．）
［E．H．B．］

SCARABA＇NTIA（Exapbaytia，Ptol．ii．15．§ 5），a town on the western bank of Lake Pelso in Upper Pannonia，on the road leading fron Carnuntam to Sabaria．（Plir．iii．27；It．Ant．pp．233，261， 262，266；Tab．Peut．）According to coins and inscriptions found at the place，it was a municipium with the surname of Flavia Augusta．Hence it ap－ pears that the reading in Pliny．＂Scarabantia Julia，＂ is not correct，and that we must read either Scara－ bantia Flavia，or Scarabantia et Julia．Its site is now occupied by the town of Oedenburg，in Hun－ garian Soprony or Sopron．（Comp．Mucbar，Nori kum，i．p．168；Schönwisner，Antiquitates Saba－ riae，p． 31 ；Orelli，Inscript．n．4992．）［L．S．］
SCA＇RBIA，a town in Rhactia，between Par： tenum and Veldidena，on the road leading from Augusta Vindelicorum into Italy，occupied the site of the modern Scharnitz（Tabula Peutinge－ riana．）［L．S．］

SCARDONA（Ekaposiva，Ptol．ii．17．§ 3；Pro－ cop．B．G．i．7．16，iv． 23 ；Plin．iii．26；Geogr． Rav．v． 14 ；Exdodev，Strab．vii．p． 315 ；Sardona， Peut．Tab．），a town in the territory of the Libarnii on the Titins， 12 M ．P．from where that river meets the sea．From the circumstance of its having been one of the three＂conventus＂of Dalmatia，it mast have been a place of importance，and was used from early times as a depôt for the goods which were transported by the Titius to the inland Dalmatians．（Strab．Le．） The modern Scardóna in Illyric Scardin or Scradin， retains the name of the old city，though it does not occupy the site，which was probably further to the W．（Wilkinson，Dalmatia，vol．i．p．191．）Pto－ lemy（ii．17．§ 13）has an island of the same name off the Liburnian coast，－perhape the rocky and cu－ riously－shaped island of Pago．［E．B．J．］

SCARDUS，SCODRUS，SCORDUS NONS（rb Endporor ${ }^{\circ}$ pos，Polyb．xxviii． 8 ；Ptol．ii．16．§ 1）， the desolate heights which are mentioned inci－ dentally by Livy（xliii．20，xliv．31）as lying in the way from Stymbara to Scodra，and as giving rise to the Oriuns．They seem to have compre－ hended the great summits on either side of the Drilo，where its course is from E．to W．（Leake， Northern Greece vol．iii．p．477．）In Kiepert＇s map（Europaischen Turkei）Scardus（Schor－Dagh） extends from the Ljubatrin to Shalesh；over this there is a＂col＂from Kalkandele to Prisdren not less than 5000 foet above the level of the sea．Ac－ cording to the nomenclature of Grisebach，Scandus reaches from the Ljubatrin at its NE．extremity to the SW．and S．as far as the Klissoura of Devol；S． of that point Pindus commences in a continuation of the same axis．
［E．B．J．］
SCARNIUNGA，a river of Pannonis，mentioned only by Jornandes（de Reb．Get 52），which it is impossible to identify from the vague manner in which it is spoken of．
［L．S．］
SCARPHE（ $\mathrm{Zxdp} \phi \eta$ ），in Boeotia．［ETBONUE．］
SCARPHE or SCARPHEIA（Emap申n，Hom．； ミкd́pфeic，Strab．，Paus．，Steph．B．：Eth．Ekapфeís， ミкapфatés），a town of the Locri Epicnemidii，men－ tioned by Homer．（Il．ii．532．）According to Strabo it was 10 stadia from the sea， 30 stadia from Thronium，and a littlo less from some other place of which the name is lost，prohably Nicaea． （Strab．ix．p．426．）It appears from Pausanias that it lay on the direct road from Elateia to Thermopylae by Thronium（viii．15．§ 3），and likewise from Livy，who states that Quintius Fla－ mininus marched from Elateia by Thronium and

Scarphria to Heracleia (xxxiii. 3). Hence the town may be placed between the modern villages of - A ndera and Molo. (Leake, Northern Greece, vol. ii. p. 178.) Scarpheia is said by Strabo to have been destroyed by an inundation of the sea caused by an earthquake (i. p. 60), but it must have been afterwards rebuilt, as it is mentioned by subsequent writers down to a late period. (Plin. iv. 7. s. 12; Ptol. iii. 15. § 11 ; Hierocl. p. 643; Geog. Rav. iv. 10; Const. Porphyr. de Them. ii. 5. p. 51, Bonn.) Scarpheia is also mentioned by Lycophr. 1147; Appian, Syr. 19; Pans. ii. 29. § 3, x. 1. § 2.

SCARPONA or SCABPONNA, in Gallia, is placed in the Antonine Itin. and in the Table on a rad between Tullum (Toul) and Divodurum (Metz). The two authorities agree in placing it at the distance of x . from Tullum; but the Itin. makes the dintance from Scarpona to Divodurum xii., and the Table makes it xiiii. The larger number cones nearer to the truth, for the place is Charpayne, on the Mosel. An inscription has been found at Charpagne, which is as follows : " mivir viarum curand. Sabell. V. S. P. M. Scarp. Civit. Leuc." Scarpona was in the territory of the Leuci. [Leuci.] Jorinus, Equitam Magister, defeated the Alemanni near Scarponna in A. D. 366. in the reign of Valentinian and Valens. (Amm. Marc. xxvii. 2; D'Anville, Notice, \&c.; Ukert, Gallien, p. 506.) [G. L.]

SCENAE (Znnvai). 1. A town of Mesopotamia on a canal from the Euphrates, and on the borders of Babylonia, 18 schoeni from Seleucia, and 25 days' journey from the passage of the Euphrates at Zeusma. (Strab. xvi. p. 748.) It belonged to the peaceful and nomadic tribe of the Sienitae, and therefore, though called by Strabo $\alpha \xi \iota 6 \lambda o y o s ~ \pi \sigma \lambda i s$, was probably only a city of tents, as, indeed, its mame implies.
2. Scenar Mandrar, a place in Middle Efypt, on the right bank of the Nile, between Aphroditopolis and Babylon, a little SE. of Memphis. (Itin. Ant. p. 169.) It had a Roman garrison, and in later times became the see of a Christian bishop. (Not. Imp.; comp. Wesseling, ad Itin. l. c.)
3. Scenae Veteranorum, a place in Lowet Egypt, on an arm of the Nile, and ou the road from Heliupolis to Vicus Judaeorum. (Itim. Ant. pp. 163, 169.) It lay SW. of Bubastus.
[T. H.D.]
SCENI'TAE ( Enviital), a general name for various Arab tribes in Pliny, often distinguished by some other appellation. Thus, towards the lower part of the Euphrates, beyond the "Attali latrones, Arabum gens," be places the Scenitae (vi. 26), whom he mentions again more fully (c. 28), "Nomadas inde infestatoresque Chaldaeorum Scenitae, ut diximus cladunt, et ipsi vagi, sed a taberuaculis cognominati, quae ciliciis metantur, ubi libuit. Deinde Nabataei," \&cc. Then again below the confluence of the Euphrates and Tigris he places the Nomades Scenitae on the right bank of the river, the Chaldaei on the left. He speaks also of the Scenitso Sabaei. Strabo also uses the name in the same latitude of application of many various tribes of Arabia, Syria, and Mesopotamis (see Index, s. v.); but Ptoleny assigns them a definite seat near the mountains which stretch along the north of the peninsula, north of the Thaditae (al. Oaditae) and Saraceni (vi. 7. 8 21); and in this vicinity, towards the Red Sea, it is that Ammianus Marcellinus places the Scenite Arabs, whom posterity called Saracens (xxiii. 6.) [Saraceni.] The remark of Bochart is therefore borne out by anthorities: "Ubi Scevol. $\boldsymbol{L}$.
nitas Eratosthenes, ibi Saracenos ponunt Procopius et Marcianus. Saraceni nimirun a Scenitis hoc solum differunt, quod Scenitarum nomen est vetustius." (Geogr. Sucr. iv. 2. p. 213.) [G.W.]
 SE. of Mysia, on the river Aesepus, 150 stadia to the SE. of Alexandria Troas, and not far from Dicte, one of the highest points of Mount Ida. It was apparently a place of the highest antiquity; for it was believed to have been founded immediately after the time of the Trujan War, and Demetrius, a native of the place, considered it to have been the capital of the dominions of Aeneas. (Strab. xiii. p. 607). The same author stated that the inhabitants were transferred by Scamandrius, the son of Hector, and Ascanius, the son of Aeneas, to another site, lower down the Aesepus, about 60 stadia from the old place, ard that there a new town of the same name was founded. The old town after this was distinguished from the new one by the name of Palaescepsis. For two generations the princes of the house of Aeneas maintained themselves in the new town; but the form of govermment then became an oligurchy. During this period, colonists from Miletus joined the Scepsians, and instituted a democratic form of government. The descendants of the royal family, however, still continued to enjoy the regal title and some other distinctions. (Strab. l. c. comp. xiii. p. 603; xiv. p. 635; Plin. v. 2; Steph. B. s. v.) In the time of Xenophon (Hell. iii. 1. § 15), Scepsis belonged to Mania, a Dardanian princess; and after her death it was seized by Meidias, who had married her daughter; but Dercyllidas, who had obtained admission into the town under some pretext, expelled Meidias, and restored the sovereign power to the citizens. After this we hear no more of Scepsis until the time of the Macedonian supremacy, when Antigonus transferred its inhabitants to Alexandria Troas, on account of their constant quarrels with the town of Cebrene in their neighbourhood. Lysimachus afterwards allowed them to return to their ancient home, which at a later time became sabject to the kings of Perganum. (Strab. xiii. p. 597.) This new city became an important seat of learning and philosophy, and is celebrated in the history of the works of Aristotle. Strabo (xiii. p. 608) relates that Neleus of Scepsis, a pupil of Aristotle and friend of Theophrastus, inherited the library of the latter, which also contained that of Aristotle. After Neleus' death the library came into the hands of persons who, not knowing its value, and being unwilling to give them up to the library which the Pergamenian kings were collecting, concealed these literary treasures in a pit, where they were exposed to injory from damp and worms. At length, however, they were rescued from this place and sold to Apellicon of Teos. The books, in a very mutilated condition, were conveyed to Athens, and thence they were carried by Sulla to Rome. It is singular that Scylax (p. 36) enumerates Scepsis among the Aeolian coast-towns ; for it is evident from Strabo (comp. Demosth. c. Aristocr. p. 671) that it stood at a considerable distance from the sea. The town of Palaescepsis seems to have been abandoned entirely, for in Pliny's time ( V .33 ) not a vestige of it existed, while Scepsis is mentioned by Hierocles (p. 664) and the ecclesiastical notices of bishoprics. In the neighboarbood of Scepsis there existed very productive silver mines. It was the birthplace of Demetrius and Metrodorus. The former, who bestowed much labour on the topography of Troas, spoke of
a district, Corybissa, near Scepsis, of which otherwise nothing is known. Extensive ruins of Scepsis are believed to exist on an eminence near the village of Eakiupshi. These ruins are about 3 miles in circumfereuce, and 8 gates can be traced in its walls. (Forbiger, Handbuch der Alt. Geogr. vol. ii. p. 147.)
[L.S.]
SCHE'DIA ( $\sum_{\chi \in \delta(a, ~ S t r a h . ~ x v i i . ~ p p . ~ 800, ~ 803), ~ a ~}^{\text {a }}$ large town-like village of Lower Egypt, situated on the great canal which connected Alexandria with the Canopic arm of the Nile, near Andropolis. At Schedia was the general custom-house for goods, ascending or descending the river, and also the station for the splendid vessels in which the prefects visited the upper country; whence it is singular that it is not mentioned by any later writer than Strabo. Mannert (x. pt i. p. 601) seeks it on the lake of Aboukir; whilst Reichardt, from the similarity of the name, takes it to have been the moder:a Dsjedie.
[T. H. D.]
SCHE'RIA. [Corcyra.]
SCHINUSSA, a small island in the Aegaean sea, one of the Spurades, S. of Naxos. (Plin.iv. 12. s. 68.)

SCHISTE ( $\dot{\eta} \sigma \chi$ IGTiो $\delta \delta 6$ ) , the name of the raad leading from Delphi into Central Greece, was more particularly applied to the spot where the road divided into two, ard which was called tpeís кé $\lambda \in u \theta o \iota$, reckoning the road to Delphi as one of the three. Of the other two roads, the NE. led to Daulis; the SE. parted into two, one leading to Trachis and Lebadeia, the other to Ambrysus and Stiris. At the spot where the three roads met was the tomb of Laius and his servant, whos were here slain by Oedipus. It must have stood at the entrance of the Zimend Derveni, or opening between the mountains Cirphis and Parnassus, which leads to Delphi. The road from this point becomes very steep and rugged towards Delphi, as Pausanias has described it. (Aes hyl. Oed. Tyr. 733; Eurip. Phoen. 38; Paus. ix. 2. § 4, x. 5. 8 3; Leake, Northern Greece, vol. ii. p. 105.)

SCHOENUS ( $\sum$ xolvoûs), the name of several towns, from the reeds or rushes growing in their neighbourhood. 1. (usually $\Sigma$ ¿oivos), a town in Boeotia, mentioned by Homer (Il. ii. 497), and placed by Stabo upon a river of the same name in the territory of Thebes, upon the road to Anthedon, and at the distance of 50 stadia from Thebes. (Strab. ix. p. 408; Eustath. ad loc.; Steph. B. s. v.; Nicander, Theriac. 887 ; Plin. iv. 7. s. 12.) This river is probably the strean flowing into the lake of Hylica from the valley of Moriki, and which neur its mouth is covered with rushes. Nicander is clearly wrong, who makes (l.c.) the Schoenas flow into the lake Copais. (Ulichs, Reisen, p. 258; Leake, Northern Greece, vol. ii. p. 320.) Schoenus was the birthplace of the celebrated Atalanta, the daughter of Schoenus (Paus. viii. 35. § 10); and hence Statius gives to Schoenus the epithet of " Atalantaeus." (Stat. Theb. vii. 267.)
2. A lown in the centre of Arcadia near Methydrium, which was said to have derived its name from the Boertian Schoenus. (Paus. viii. 35. § 10; Steph. B. 8. v.; Leake, Peloponnesiaca, p. 240.)
3. A harbour in the Coritithia. [Cominthus, p. 683, a.]
4. A river near Maroncia in Thrace, mentioned only by Mela (ii. 2. § 8).

SCHOENUS, a bay on the west coast of Caria, on the south-cast of the Cnidian Chersonesus, and opposite the ishand of Syme. (Pomp. Mela, i. 16;

Plin. v. 29.) It should be observed, however, that this description of the bay of Schoenus is only conjectural, and based upon the order in which Pliny mentions the places in that locality.
[L. S.]
SCIA ( Xxia: Ech. Exieús), a small town in Euboea (Steph. B. s. v. Zxtás), probably in the territory of Eretria, since Pausanias (iv. 2. § 3) mentions Scium as a district belonging to Eretria.

SCIAS. [Megalopolis, p. 309, b.]
SCIATHIS. [Pheneus, p. 595, a.]
SCI'ATHUS ( $\left.{ }^{2} \times 1 a \theta o s: ~ E t h . ~ \Sigma i x i d \theta i o s: ~ S k i a t h o\right), ~$ a small island in the Aegaean sea, N. of Euboea, and a little E. of the Magnesian coast of Thessaly, is described by Pliny as 15 miles in circumference (iv. 12. s. 23). It is said to have been originally colonised by Pelasgians from Thrace, who were succeeded by Chalcidians from Euboea. (Scymn. Ch. 584.) It possessed two towns, one of which was also called Scfathus, but the name of the other is unknown. (Scylax, p. 23, Hudson; Strab. ix. p. 436; Ptol. iii. 13. § 47.) It is frequently mentioned in the history of the invasion of Greece by Xerxes, since the Persian and Grecian fleets were stationed near its coasts. (Hervd. vii. 176, 179, 182, 183, viii. 7.) It afterwards became one of the subject allies of Athens, but was so insignificant that it had to puy only the small tribute of 200 drachmae yearly. (Franz, Elem. Epigr. 52.) The town of Sciathus was destrojed by the last Philip of Macedonia, B. C. 200, to prevent its falling into tha hands of Attalus and the Romans. (Liv. $x \times x i$. 28, 45.) In the Mithridatic War it was one of the haunts of pirates. (Appian, Mithr. 29.) It was subsequently given by Antony to the Athenians. (Appian, B. C. v. 7.) Sciathus was celebrated for its wine (Athen. i. p. 30, f.), and for a species of fish found off its coasts and called reoopecús. (Athen. i. p. 4, c.; Pollox, vi. 63.) The modern town lies in the SE. part of the island, and possesses an excellent harbour. The inhabitants have only been settled here since 1829, previous to which time their town stood in the NE. part of the island upon a rock projecting into the sea, and accessible only upon one side, as more secure against the pirates. Ross says that the new lown stands upon the site of the ancient city, but the latter was not the homonymous capital of the island, which oceupied the site of the old town in the NE. part of the island, as appears from an inscription found there by Leake. The ancient city in the SE. of the island, upon which the modern town now stands, is probably the second city mentioned by Scylax, but without a name. (Ross, Wanderungen in Griechenland, vol. ii. p. 50 ; Leake, Northern Greece, vol. iii. p. 111.)

SCIDRUS (Exiôpos: Eth. Exıôpanós, Steph. B.: Sapri), a Greek city on the coest of Lucunia, on the Tyrrhenian sea, between Pyxus (Buxentum) and Lails. It is mentioned only by Herodotus (vi. 21), from whom we learn that it was, as well as Laïs, a colony of Syburis, and was one of the places to which the surviving inlabitants of that city retired, after its destruction by the Crotoniats. It does not appear from bis expressions whether these towns were then first founded by the fugitives, or had been previously settied as regular colonies; but the latter supposition is mach the more probable. It is singular that no sabsequent trace is found of Scidrus; its name is never again mentioned in history, nor alluded to by the geographers, with the exception of Stcphanus of Byzantiuin
(s. v.), who calls it merely a " city of Italy." We have therefure no clue to its position; for even its situation on the Tyrrhenian sea is a mere inference fron the manner in which it is mentioned by Herodotus in conjanction with Laiis. But there exist at Sapri, on the Gulf of Policastro, extensive remains of an ancient city, which are generally considered, and apparently not without reason, as indicating the site of Scidrus. They are said to consist of the remains of a theatre and other public buildings of the ancient walls, and constructions around the port. (Antonini, Lucunia, part ii. c. 11 ; Romanelli, voul. i. p. 377.) This last is a remarkable landboiked basin, though of small extent ; and it is singular that, even if the town had ceased to exist. no allasion should be found to the existence of this secure port, on a const almost wholly destitute of natural harbours. But the high mountains which shut it in and debar it from all communication with the interior probably prevented it from ever attaining to any importance. Sapri is at the present day a mere fishing village, about 6 miles E. of Policastro.
[E. H. B.]
SCILLUS ( town of Triphylia, a district of Elis, situated 20 stadia south of Olympia. In B.c. 572 the Scillnatians assisted Pyrrhus, king of Pisa, in making wur upon the Eleians; but they were completely conquered by the latter, and both Pisa and Scillus were razed to the ground. (Paus. v. 6. § 4, vi. 22. § 4.) Scillus remained desolate till nbout B. с. 392, when the Lacedaemonians, who had a few years previously compelled the Eleians to renounce their supremacy over their dependent cities, colonised Scillus and gave it to Xenophon, then an exile from Athens. Xenophon resided here more than twenty years, but was expelled from it by the Eleians soon after the battle of Leuctra, в. c. 371: He has left us a description of the place, which he says was situated 20 stadia from the Sacred Grove of Zeus, on the road to Olympia from Sparta. It stood upon the river Selinus, which was also the name of the river -flowing by the temple of Artemis at Ephesus, and like the latter it abounded in fish and shell-fish. Here Xenophon, from a tenth of the spoils acquired in the Asiatic campaign, dedicated a temple to Artemis, in imitation of the celebrated temple at Ephesus, and instituted a festival to the goddess. Scillus stood amidst woods and meadows, and afforded abandant pasture for cattle; while the neighbouring mountains supplied wild hogs, roebucks, and stags. (Xen. Anab. v. 3. §§ 7-13.) When Pausanias visited Scillus five centuries afterwards the temple of Artermis still remained, and a statue of Xenophon, made of Pentelic marble. (Paus. v. 6. § 5, seq.; comp. Strab. viii. pp. 344, 387 ; Plut. de Exsil. p. 603.) There are no remains to identify Scillus, but there can be no doubt that it stood in the woody vale, in which is a small village called Rasa, and through which flows a river falling into the Alpheius nearly opposite the Cladeus. (Leake, Morea, vol. ii. p. 213, seq.. Peloponnesiaca, p. 9; Boblaye, Recherches, Ge. p. 133: Curtius, Peloponnesos. vol. ii. p. 91.)

SCINCOMAGUS ( $\Sigma_{x} \gamma_{\gamma} \delta \mu \alpha \gamma o s$ ). This place is first mentioned by Strabo (iv. p. 179), who says, when he is speaking of one of the passes of the Alps, that from Ebrodunum (Embrinn) on the Gallic side through Brigantium (Briançon) and Scincomagus and the pass of the Alps to Ocelum, the limit of the lamd of Cottius is 99 miles; and at Scincomagus Italy begins: and the distance fram

Scincomagas to Ocelum is 27 miles. (See Groskurd's note on the passage, Transl. Strab. i. p. 309.) Pliny also (ii. 108) makes Italy extend to the Alps at Scincornagus, and then he gives the breadth of Gallia from Scincomagus to the Pyrenees and Illiberis. (See the notes and emendations in Harduin's edition.) It appears then that Sicincomagus was at the foot of the Alps on the Italian side; and if the position of Ocelum were certain, we might probably determine that of Scincomagus, which must be on the line of the passage over the Alps by the Mont Genevre. It was a grest mistake of Bouche and Harduin to suppose that Scincomagus was the same as Segusio or Susa. D'Anville guesses that Scincomagus may be a place which he calls "Chamlat de Siguin, at the entrance of the Col de Cestrieres, which leads from the valley of Sézane (Cesano) into that of Pra-gelas." As usual, he relies on the resemblance of the ancient and modern names, which is often useful evidence; for "magus" in Scincomagus is merely a common Gallic name for town. D'Anrille also supposes that this position of Scincomagus is confirmed by the site of Oceluin, as he has fixed it. [Ocelum.] But all this is vague.

SCIO' NE ( Kncóurn, Herod. vii. 123, viii. 128 ; Thuc. iv. 120-123, 133, v. 32; Strab. vii. p. 330 ; Pomp. Mela, ii. 2. § 11 ; Plin. iv. 17: Eth. Exiovaios, Herod.; Zxıwveús, Steph. B. s. v.), the chief town on the istbmus of Pallene in Macedonia. Although it called itself Achaean, like many other colonial towns, in default of any acknowledged mother-city, it traced its origin to warriors returning from Troy. Under concert with Brasidas the Scionarans proclaimed their revolt from Athens, two days after the truce was sworn, March, в.c. 421. Brasidas, by a speech which appealed to Grecian feeling, wound up the citizens to the highest pitch of enthusiasm. The Athenians, furious at the refusal of the Lacedaemonians to give up this prize, which they had gained after the truce, passed a resolution, under the instigation of Cleon to kill all the grown-up male inhabitants of the place, and strictly besieged the town, which Brasidas was nnable to relieve, though he had previously conveyed away the women and children to a place of safety. After a long blockade Scione surrendered to the Athenians, who put all the men of military age to death, and sold the women and children to slavery. The site of this ill-fated city must be sought for between the capes Paliúri and Posidhi. (Leake, Northers Greece, vol. iii. p. 157.)
[E.B.J.]

## SCIRA'DILM. [Salamis.]

SCIRI or SCIRRI, a population rariously placed by various authors. The first who mentions them is Pling (iv. 13. 8. 27), who fixes them in Eningia, i. e. in the parts to the NE. of the extreme frontier of what he and his contemporaries call Germania, i. e. East Prussia, Courland, Livonia, Esthonia, and part of Finnland, "quidam haec habitari ad Vistalam usque fluvium a Sarmatis, Venedis, Sciris, Hirris, tradunt." No other author either mentions the Hirri or places the Sciri thus far northward.

The most interesting notice of them is in the socalled Olbian inscription (Bückh, Inscr. no. 2058), wherein they are mentioned as dangerous neighbours to the town of Olbia along with the Galatae, the Thisamatae, the Scythae, and the Saudaratae (Zeuss, Die Deutschen, $\boldsymbol{f}^{\prime} c$. , s.v. Galatae); and, doubtless, the neighbouring town of Olbia was their true locality.

302

## scolds

The evidence of Jornandes makes them Alans ("Sciri et Satagariiet ceteri Alanorum," Reb. Get.49), evidence which is important, since Peria, the notary of the Alan king Candax, was the writer's grandfather. They are made by Sidonius (Carm. vii. 322) part of Attila's army, by Jornandes subjects of Odoucer, by Procopius members of the Goth and Alan alliance. They were, almost certainly, a Scythian tribe of Kherson, who during the period of the Greek settlements harassed Olbia, and, during the Byzantine period, joined with the other barbarians of the Lower Danube againts Rome. Of these, the chief confederates were the Heruli and Turcilingi; with whom they found their way as far west as Bavaria. The present country of Styria (Styermark) =the March of the Stiri or Sciri, the change from $S c$ to $S t$ being justified by the Bavarian Count Von Schiern in one part of a document of the 10th century being made a Comes de Stira in another. Add to this the existence of a Nemus Scirorum in Bararia. (See Zeuss, s. v. Sciri).

The Sciri of the later writers were probably a portion of the Scythians of the parts between the Danube and Jon, ander a newer and more specific name. The transplantation into Styria along with an inroad of Uldis, king of the Huns, seems to lave broken up the name and nation. Sozomenes saw the remnants of them labouring as slaves in the mines of Mount Olympus in Bithynia (ix. 5). [R. G. L.]

SCIRI'TIS (ì Expitis: Eth. ミкipíns, fem. Excpites), a rugged and barren mnuntuinous district, in the north of Laconia. between the upper Eurotas on the west and the Oenus on the east, and extending north of the highest ridge of the mountains, which were the natural boundary between Laconia and Arcadia. The name probably expressed the wild and rugged nature of the country, for the word signified hard and rugged (okipoy, okeîpoy, $\sigma \kappa \lambda \eta \rho \delta \nu$, Hesych.). It was bounded by the Dlaenalians on the north, and by the Parrhasians on the west, and was originally part of Arcadia, but was conquered at an early period, and its inhabitants reduced to the condition of Lacedxemonian Perioeci. (Steph. B. 8. v. Exipos ; Thuc. v. 33.) According to Xenophon they were subjected to Sparta even before the time of Lycurgus. (De Rep. Lac. c. 12.) They were distinguished ahove all the other Perioeci for their bravery; and their contingent, called the Exupitns $\lambda$ óoos, 600 in number, usaally cocupied the extreme left of the Lacedaemonian wing. (Thuc. v. 67, 68.) They were frequently placed in the post of danger, and sometimes remained with the king as a body of reserve (Xen. Cyr. iv. 2. § 1 , Hell. v. 2. § 24, v. 4. § 52 ; Diod. xv. 32.) On the first invasion of Laconia by the Thebans the Sciritae, tugether with the Perioeci of Caryme and Sellasia, revolted from Sparta, in consequence of which their country was sabsequently ravaged by the Laceduemonians. (Xen. Hell. vii. 24. § 1.) The only towns in the Sciritis appear to have been Scince and Onux, ealled Ium by Xenophon. The latter is the only place in the district mentioned in historical times [Oci; $]$. Scirns may perhaps have been the same as Scirtoniuin ( $\mathrm{E} \kappa$ кртwnov), in the district of Aegytis. (Prus. viii. 27. § 4 ; Steph. B. 8. v.)

The road from Spurta to Tegea, which is the same as the present ruad from Sparta to Tripolitzi, led through the Sciritis. (Leake, Morea, vol. iii. p. 28; Boblaye, Recherches. gc. p. 75; Ross, Reisen im Peloppanes, p. 178; Curtius, Peloponnesos, vol. ii. p. 26.3.)

SCIRO'NIA SAXA. [Mecard, p. 316, b.] SCIRRI. [SCIkI.]
SCIRTIA'NA, a station on the Egnatian road, between Brucida (Presba) and Castra or Parembole. The name is 10 doubt connected with that of the Scirtones ( Kkiptoves), whom Ptoleng (iii. 17.§ 8) couples with the Dassaretian Pirustae as Illyrian tribes near Macedonia
[E. B. J.]

## SCI'RTONES. [Sctrtiana.] <br> \section*{SCIRTO'NIUM. [Sctritis.]}

SCIRTUS (Exipros, Prucop. de Aed. ii. 7), a river of Mesopotamia, a western tributary of the Chaboras (Chabur). It flowed from 25 sources, and ran past Edessa. (Chron. Edess. in Asseman, Bibl. Or. i. p. 388.) Its name, which signifies use skipping or jumping (from $\sigma$ кıpTdoo). is said to have been derived from its rapid course and its frequent overflowings; and its present mane of Duisan means the same thing.
[T. H.D.]
SCIRLDI. [Attica, p. 326, a.]
SCISSLiM. [Cissa.]
SCI'TTIUAI. [Sotiates.]
SCODRA ( $\dot{\eta}$ Ex $\delta \delta \delta \rho \alpha$, Ptul. ii. 16. (17.) § 12; Enóopai, Hierucl. p. 656: Eth. Scodrenses, Liv. xlv. 26), one of the inore important towns of Rexnan Illyricuin (Montenegro), the capital of the Labeates, seated at the southern extremity of the luke Labeatis, between two rivers, the Clausula on the E., and the Barbanna on the W. (Liv. xliv. 31), and at a distance of 17 miles from the sea-coast (Plin. iii. 22. n. 26). It was a very strong place, and Gentius, king of the lllyrians, attempted to defend it against the Romans, b. c. 168, but was defented in a battle under the walls. Pliny erroneoasly places it on the Drilo (l.c.). At a later period it became the chief city of the province Praevalitana. It is the present Scutari, which is also the name of the lake Lubeatis. (Wilkinson, Dalmatiu and Hontenegro, vol. i. p. 476 .)
[T. H. D.]
SCOLLIS ( $\Sigma \kappa \delta \lambda \lambda 1 s$ ), $n$ mountain between E.lis and Achaia, now called Sandameriotiko, 3333 feet bigh, from which the river Larisus rises, that forms the houndary between Achaia and Elis. Strabo describes it as aljacent to Mount Lampeia, which was connected with the range of Erymanthus. (Strab. viii. p. 341.) Strabo ulso identifies it with the "Olenian Ruck" of Homer. (IL ii 617 ; Strab. viii. p. 387 ; Leake, Morea, vol ii. pp. 184, 230; Peloponnesiaca, p. 203.)

SCOLOTI. [Scythia.]
 p. 408), a town of Chalcidice near Olynthus, mentioned together with Spartolus, in the treaty between Athens and Sparta in the tenth year of the Peloponnesian War.
[E. B. J.]
 town of Boeotia, mentioned by Honer (IL ii. 49 ${ }^{\circ}$ ), and described by Strabo as a village of the Parasopia below Cithaeron (ix. p. 408). Pausanias, in bis dencription of the route from Plataea to Thebes, says, that if the traveller were, instead of crosning the Asopus, to follow that river for about 40 stadisic he would arrive at the ruins of Scolus, where thers was an unfinished temple of Demeter and Core (ix. 4. § 4). Mardonius in his march from Tauagra to Plataea passed through Scolus. (Herod. ix. 15.) When the Lacedaemonians were preparing to invade Boeotia, B. c. 377, the Thebans threw up an intrenchment in front of Sculus, which probably extended from Mit. Cithaeron to the Asopus. (Xen. Hell. 8. 4. § 49, Agesil. 8.) Strabo says that

Scolus was so disagreeable and rugged ( $\tau \rho a \chi$ ús) that it gare rise to the proverb, " never let us go to Scolus, nor follow any one there" (ix. p. 408). Leake places Scolus just below the projection of Cithaeron, on a little rocky table-height, overlooking the river, where stands a metokhi dependent on a conrent in the Eleutheris, called St. Meletius. (Northern Greece, vol. ii. p. 330.)
SCOMBRA'RIA ( $\Sigma к u \mu$ ßрарía, Strab. iii. p. 159), an island on the $\mathbf{S}$. crast of Spain, in front of the bay which formed the harbour of Carthago Nova, and 24 stadia, or 3 miles, distant from the coast. It derived its name from the scombei, tunny-fish, or mackarel, which were found here in great quantities, and from which the Romans prepared their garum. (Plin. xxxi. 8. s. 43.) It was also called Hercalis Insula Now Islote.
[T. H. D.]
SC0MBR t'Sia. [Saturni Prom.]
 $\mu \mathrm{mor}$, Thuc. ii. 96 ; Aristut. Meteor. i. 13; Scopius, Plin iv. 17 : Eth. Exóspoc, Hesych.), an outlying moontain of the chain of Haemus, or that cluster of great summits between Ghiustendil and Sufia, which sends tributaries to all the great rivers of the N. of European Turkey. As the most central point, and nearly equidistant from the Euxine, the Aegean, the Adriatic, and the Danube, it is probably the Haernus of the traveller's tale in Livy (xl. 21), to which Philip, son of Demetrius, king of Macedonia, made a fruitless excursion with the expectation of beholding from thence at once the Adriatic and the Euxine (Black Sea), the Danube and the Alps. (Leake, Northern Greece, vol. iii. p. 474.) [E. B. J.] SCOMIUS. [Scombrce.]
SCOPAS ( $\sum_{\text {Kodas), an eastern tributary of the }}$ Sangarius in Galatia, which according to Procopius (de Aed. v. 4) joined the Sangarius, 10 miles east of the town of Juliopolis. Pliny (v. 43) calls it Scopins, and according to Procopius this river frequently overflowed the country, which is perhaps alluded to in the Jerusalem Itinerary ( $p .574$ ), where a station called Hycronpotumum (i. e. íypò mota$\mu \boldsymbol{\mu}^{\prime}$ ) is mentioned about 13 miles to the east of Juliopolis. The inodern name of the river is Aladan. (Comp. Leake. Asia Minor, p. 79; Eckhel, Doctr. Num iii. p. 101.)
[L. S.]
scotelds. [Halonnesus.]
SCOPI. [Scuri.]
SCO'PIA ( $\Sigma$ котia aкра), a headland on the west coast of Caria, to the west of Myndus, and opposite the island of Cus. (Pul. v. 2. § 10.) Strabo (xiv. p. 658) mentions two headlands in the same vicinity, Astypalsea and Zephyrium, one of which may possibly be the same as Scopia.
[L. S.]
SCORDISCI (Kkopסíanol) a powerful Celtic tribe, in the southern part of Lower Paunonia, between the rivers Savus, Dravus, and Danubius. They and the Buii were overpowered by the Dacians. (Sirab. vii. pp. 293, 313.) Some call then an Illyian tribe, because, living on the borders of Illyricum, they were much mixed up with them. They were in the end greatly reduced by their struggles with the Dacians and the Triballi, so that when they came in contact with the Komans they were eavily subdued. (Appian, Illyr. 3; Liv. xli. 23; Justin, $x \times x i i .3$; Plin. iii. 28 ; Ptol. ii. 16. § 3.) In Pannonia they seem to have gradually become assimilated to the Pannonians, whence in later times they disappear from history as a distinct nation or tribe.
SCORDISCUS. [Scridises.]

SCORDUS MONS [Scambrs.]
SCOTANE. [Clfitor, p. 633. a.]
SCOTI. The Scoti were the ancient inhabitants of Hibernia, as appears from notices in some of the Latin writers. (Claudian, de IV. Cons. Homor. 33. de Laud. Stil. ii. 251; Oros. i. 2.) For several centuries Ireland was considered as the land of the Sonti, and the name of Scotis was equiralent to that of Hibernia. (1sid. Orig. xiv. 6; Beda, i. 1, ii. 4; Gengr. Rav. i. 3, v. 32; Alfred the Great, ap. Oros. p. 30. \&cc.) We have no accounts respecting the subdivisions of the Scoti; but perhape they are to be sought in the names of the Irish counties, as J/nnster, Leinster, Ulster, Connaught. Ammianus mentions the Scoti, in conijunction with the Altacotti, as committing formidable devastations (xxvii. 8. § 4). According to St. Jerome (adv. Jovin. v. 2. 201, ed. Mart.) they had their wives in common; a custom which Dion Cassius reprexents as also prevailing among the kindred race in Caledonia ( $x \times x$ vi. 12). At a later period the names of Scotia and Scoti ranish entirely from Ireland, and hecome the appellations of the neighbouring Caledonia and its inhabitants. This was effected through a migration of the Scoti into Caledonia, who settled to the N. of the Clyde; but at what time this happened, cannot be ascertained. Beda (i. 1) states that it took place under a leader called Reuda. The new settlement waged war with the surrounding Picts, and even against the Anglir-Saxons, but at first with little success. (Id. i. 24, iv. 36.) U1timately, however, in the year 839, under king Keneth, they succeeded in subduing the Picts (Fordun, Scot. Hist. ap. Gale, i. 659, seq.); and the whole country N. of Solicay Frith subsequently obtained the name of Scotland. (Cump. Zeuss, Die Deutschen u. die Nachbarstïmme. p. 568; Gibbon, vol. iii. p. 268, and notes, ed. Smith.) [T. H.D.]
scotitas. [laconia, p. 113, b.]
SCOTUSSA (Peut. Tab.; Scotusa, Plin. iv. 17. s. 18: Eth. Scotussaei, Plin. iv. 17. s. 18), a station m the road from Heracleia Sintica to Philippi, which passed round the $\mathbf{N}$. of the lake Cercinites, answering to the place where the Strymon was crossed just above the lako. (Leake, Northern Greece, vol. iii. p. 227.)
[E. B. J.]
 Exotougбaios), an ancient town of Pelavgiotis in Thessaly, lying between Pherae and Pharsalus, near the frontiers of Phthiotis. Scotussa is not mentioned in Homer, but according to some accounts the oracle of Dodona in Epeirus originally came from this place. (Strab. vii. p. 329.) In B. c. 394 the Scotussaei joined the other Thessalians in oppising the march of Agesilaus through their country. (Xen. Hell. iv 3. § 3.) In в. c. 367 Scotussa was treacherously seized by Alexander, tyrant of the neighbouring town of Pherae. (Diod. xv. 75.) In the territory of Scotussa were the hills called Cynescephalae, which are memorable as the scene of two battles, one fought in B. c. 364, between the Thebans and Alexander of Pherae, in which Pelopidas was slain, and the other, of still greater celebrity, fuught in B. C. 197, in which the last Plilip of Macedonia was defeated by the Roman consal Flamininus. (Plut. Pelop. 32; Strab. ix. p. 441 ; Polyb. xviii. 3, seq.; Liv. xxxiii. 6, seq.) In B. C. 191 Scotussa surrendered to Antiochus, but was recovered shortly afterwards, along with Pha1salus and Pherae, by the consul Acilius. (Liv. xsxvi. 3, 14.) The ruins of scotussa are found at

Suplf．The city was about two or three miles in circumference；but of the walls only a few courses of masonry have been preserved．The acropolis stood at the soath－western end of the site，below which，on the east and north，the ground is covered with foundations of buiidings，heaps of stones，and fragments of tiles and pottery．（Leake，Northern Greece，vol．iv．p．454，seq．）
SCULTENNA（Enoú入tavya，Strab．：Panaro）， a river of Gallia Cispadana，and one of the prin－ cipal of the southern tributaries of the Padus． （Plin．iii．16．s． 20 ；P．Diac．Hist．Lang．iv．47．） It crosses the Aemilian Way about 5 miles E．of Mutina（Modena），and falls into the Po a little be－ low Bondeno，being the last of the tributaries of that river which now flow into its main stream． In the lower part of its course it now bears the name of Panaro，but in the upper part，before it leaves the valleys of the Apennines，it is still known as the Scoltenna．It has its sources in one of the loftiest and most rugged groups of the Apen－ nines，at the foot of the Monte Cimone，and from thence flows for many miles through a deep and winding valley，which appears to have been the abode of the Ligurian tribe of the Friniates．The district atill bears on old maps the title of Frignano．（Ma－ gini，Carte d＇Italia，tav．16．）In B．c． 177 the banks of the Scultenna were the scene of a decisive conflict between the Ligurians and the Roman con－ sul C．Claudius，in which the former were defeated with great slaughter（Liv．xli．12，18）；but the site of the battle is not more exactly indicated． Strabo speaks of the plains on the banks of the Scultenna，probably in the lower part of its course， as producing wool of the finest quality．（Strab．v． p．218．）
［E．H．B．］
SCUPI（Znô̂тo，Ptol．iii．9．§ 6，siii． 11. § 5 ； Hierocl．；Niceph．Bryenn．iv．18；Geog．Rav．iv． 15；тd̀ $\sum \kappa \delta \pi i a, ~ A n n a ~ C o m n . ~ i x . ~ p . ~ 253 ; ~ \Sigma к o u ́ w i o v, ~$ Procop．de Aed．iv． 4 ；Orelli，Inscr．1790：Uschküb）， a town which，from its important position at the débouché from the Illyrian into the plains of Paeonia and the Upper Axius，was in all ages the frontier tnwn of Illyricum towards Macedonia There is no evidence of its ever having been possessed by the kings of Macedonia or Paeonia．Under the Romans it was ascribed to Dardania，as well in the time of Ptolemy as in the fifth centnry，when it was the capital of the new diocese of Dardania（Marquardt， in Becker＇s Röm．Alt．iii．pt．i．p．110）．The Roman road from Stobi to Naissus passed by Scupi，which was thus brought into connection with the great SE． ronte from Viminacium on the Danube to Byzantium． It was probably seldom under the complete authority of Constantimople，though after the memorable vic－ tory in which，under its walls，Basil，the＂Slayer of the Bulgarians＂，in the beginning of the eleventh century，avenged the defeat he had suffered from Samuel，king of Bulgaria，twenty－one years before， in the passes of Mt．Haemus，this city surrendered to the Byzantine army（Cedren．p．694）．In the reign of Michael Palaeologus it was wrested from the emperor by the Servians，and became the residence of the Kral（Cantacuzenus，p．778．） Finally，under Sultan Bayezid，Scupi，or the＂Bride of Rûmili，＂received a colony of Ottoman Turks （Chalcondyles，p．31）．（Leake，Northern Grecce， vol．iii．p．478．）
［E．B．J．］
SCUKGUM（ Kooipyov），a town in the north of Germany，in the territory of the Helvecones，be－ tween the Viadus and the Vistula，the exact site of

## SCYLACIUM．

which is unknown．（Ptol．ii．11．§27；somp．Wil－ helm．Germanien，p．253．）
［L．S．］
SCYDISES（Zкvoifons），a chain of rugged mountains in the east of Pontus，which was con－ nected in the north with the Moschici Montes on the east，and with Mons Paryadres on the north－west， while in the south－west it was connected with Anti－ thurus．（Strab．xi．p．497，xii．p．548；Ptol．v． 6. § 8，where it is called Exopoíaros．）Modern tra－ vellers identify it with the Tshambü Bel（Wiener Jahrbiucher，vol．cv．p．21．）
［L．S．］
SCYDRA（ $\times x u ́ \delta \rho a:$ Eth．Exudpaios），a town of Emathia in Macedonia，which Ptolemy places bo－ tween Tyrissa and Mieza．（Steph．B．8．v．；Ptol．iii． 13．§ 39 ；Plin．iv．10．2．17．）It is perhaps the same as the station Scurio in the Jerusalem Itinerary （p．606），where it is placed between Edessa and Pella，at the distance of 15 miles from cither． （Cramer，Ancient Greece，vol．i．p．228．）

SCYLACE（Kxu入dk $\boldsymbol{\eta}$ ），an ancient Pelasgian town of Mysia，on the coest of the Propontis，eust of Oyzicus．（Steph．B．2．थ．）In this place and the neighbouring Placia，the Pelaegians，moconding to Herodotus（i．57），had preserved their ancient lna－ guage down to his time．Scylax（p．35）mentions only Placia，but Mela（i．19）and Pliny（v．40） speak of both as still existing．These towns seem never to have been of any importance，and to hare decayed at an early period．
［L．S．］
SCYLA＇CIUM or SCYLLE＇TIUM（Exva入ウ＇ tiov，Steph．B．，Strab．；Exu入dxiov，Ptol．：Eth． Eivu入入hrucos：Squillace），a town on the E．coast of Brattium，situated on the shores of an extensive bay，to which it gave the name of Scylleticus Sinus．（Strab．vi．p．261．）It is this bey，still known as the Gulf of Squillace，which indents the coast of Bruttium on the E．as deeply as that of Hipponinm or Terina（the Gulf of St．Ewfewia）does on the W．，so that they leave but a comparatively narrow isthmus between them．（Strab．l．c．；Plin iii．10．s．15．）［Brutrium．］According to a tra－ dition generally received in ancient times，Scylletium was founded by an Athenian colony，a part of the followens who had accompanied Menestheus to the Trojan War．（Strab．l．c．；Plin．l．c．；Serv．ad Aem． iii．553．）Another tradition was，however，extant， which ascribed its foundation to Ulysses．（Cassiod． Var．xii．15；Serv．Lc．）But no historical value can be attached to such statements，and there is no trace in historical times of Scylletium having been a Greek colony，still less an Athenian one．Its name is not mentioned either by Scylax or Scymnus Chius in enumerating the Greek cities in this part of Italy，nor is there any allusion to its Athenian origin in Thu－ cydides at the time of the Athenian expedition to Sicily．We learn from Diodorus（xiii．3）that it certainly did not display any friendly feeling towards the Athenians．It appears，indeed，during the his－ torical period of the Greek colonies to have deen a place of inferior consideration，and a mere depen－ dency of Crotona，to which city it continued subject till it was wrested from its power by the elder Diony－ sius，who assigned it with its territory to the Locrians． （Strab．vi．p．261．）It is evident that it was still a small and unimportant place at the time of the Second Punic War，as no mention is found of its name during the operations of Hannibal in Brut－ tium，though he appears to have for some time had his head quarters in its immediate neighbourhoud， and the place called Castra Hannibalis mast have been very near to Scylacium．［Castra Has－
miballs．］In B．c． 124 the Romans，at the insti－ gation of C．Gracchus，sent a colony to Scylacium， which appeare to have assumed the name of Miner－ vium or Colonia Jinervia．（Vell．Pat．i．15；Momm－ sen，in Berichte der Süchsischen Gesellschaft der Wissenechaften，1849，pp．49－51．）The name is written by Velleius＂Scolatium；＂and the form＂Sco－ lacium＂is found also in an inscription of the reign of Antoninus Pius，from which it appears that the place must have received a fresh coluny under Nerva．（Orell Jnecr．136；Monmsen，l．c．）．Scylacium appears to have become a considerable town after it received the Roman colony，and continued such throughout the Roman Einpire．（Mel．ii．4．§ 8；Plin．iii． 10. 8．15；Ptol．iii．1．§ 11．）Towards the close of this period it was distinguished as the birthplace of Cassiodorus，who has left us a detailed but rhetorical description of the beauty of its situation，and fertility of its territory．（Cassiod．Var．xii．15．）

The modern city of Squilluce is a pbor place，with only about 4000 inhabitants，though retaining its episcopal see．It stands upon a hill about 3 miles from the sea，a position according with the descrip－ tion given by Cassiodorus of the ancient city，but it is probable that this occupied a site nearer the sea， where considerable ruins are said still to exist， though they have not been described by any modern traveller．

The Scyliletictes Sinus（ $\Sigma \kappa v \lambda \lambda \eta \tau \iota \kappa \delta s \kappa \delta \lambda \pi o s$ ）， or Gulf of Squillace，was always regarded as dan－ gerous to mariners；hence Virgil calls it＂navifra－ gum Scylaceum．＂（Aen．iii．553．）There is no natural port throughout its whole extent，and it still bears an evil reputation for shipwrecks．The name is found in Aristutle as well as Antiochus of Syracuse，but would seem to have been unknown to Thucydides；at least it is difficult to explain other－ wise the peculiar mamer in which he speaks of the Terinaean gulf，while relating the voyage of Gy － lippos along the E coast of Bruttium．（Thuc．vi． 104；Arist．Pol．vii．10；Antiuch．ap．Strab．vi． p．254．）
［E．H．B．］
SCYLAX（ZKú入ak），the chief tributary of the Iris in Pontus；it had its sources in the east of Galatia，and flowing in a north－western direction， emptied itself into the Iris near Eupatoria or Mag－ nopolis．（Strab．sii．p．547．）Its modern name is T＇choterlek Irmak．（Hamulton，Researcles，vol．i． pp．365，374．）
［L．S．］
SCYLLAE（Tab．Peut．；Geogr．Rav．iv．6，v．12）， a town of Thrace，on the Euxine，where the long wall，erected by the emperor Anastasius Dicorus for the defence of Constantinople，terminated．This wall commenced at Selymbria，on the Propontis， and was carried across the narrow part of Thrace， at the distance of about 40 miles from Constan－ tinople，its length being 2 days＇journey（Pro－ cop．de Aed．iv． 9 ；Gibbon，Decline and Fall，c． 40．）

SCYLLAEUM（гो Ekúvגaıov：Scilla），a pro－ montory，and town or fortress，on the W．coast of Brattium，about 15 miles N．of Rlipgium，and almost exactly at the entrance of the Sicilian strait． The promontory is well described by Strabo（vi． p．257）as a projecting rocky headland，jutting out boldly into the sea，and united to the mairland by a narrow neck or isthmus， 80 as to form two small but well sheltered bays，one on each side．There can be no doubt that this rocky promontury was the one which became the subject of so many fables，and which was represented by Homer and other poets as
the abode of the monster Scylla．（Hom．Od．xii． 73，\＆c．，235，\＆cc．：Biogr．Dict．art．Scylla．）But the dangers of the rock of Scylla were far more fabulous than those of its neighbour Charybdis，and it is difficult to understand how，eren in the infancy of navigation．it could have offiesed any obstacle more formidable than a hundred other headlands whose names are unknown to fame．（Senec．Ep．79； Smyth＇s Sicily，p．107．）At a later period Anaxi－ las，the despot of Rhegium，being struck with the natural strength of the position，fortified the rock， and establinhed a naval station there，for the pur－ pose of checking the incursions of the Tyrrhenian pirates．（Strab．vi．p．257．）In consequence of this a small town grew up on the spot；and hence Pliny speaks of an＂oppidum Scyllaeum；＂but it was pro－ bably always a small place，and other writers speak only of the promontory．（Plin．iii．5．s．10；Mel．ii． 4．§ 8；Ptol．iii．1．§ 9．；Steph．Byz．e．v．）At the present day the rock is still occupied by a fort， which is a post of considerable strengit，while a small tuwn stretches down the slopes towards the two bays．The distance from the castle to the op－ pasite point of the Sicilian coast，marked by the Torre del Faro，is stated by Capt．Smylh at 6047 yards，or rather less than $3 \frac{1}{2}$ Eng．miles，but the strait afterwards contracts considerably，so that its width between the Punta del Pezzo（Caenys Prom．） and the nearest point of Sicily does not exceed 3971 yards．（Siuyth＇s Sicily，p．108．）
［E．H．B．］
SCYLLAELIS（ Kкu入入aiuv），a promontory of Troezenia，and the most easterly point of the Yelo－ ponnesus，is said to have derived its name from Scylla，the daughter of Nisus，who，after betraying Megara and Nisaea to Minos，was thrown by the latter into the sea，and was washed ashore on this promontory．Scyilaeum formed，along with the opposite promontory of Sunium in Attica，the en－ trance to the Saronic gulf．It is now called Kavo－ Skyli；but as Pausanias，in the paraplus from Scyl－ laeum to Hermione，names Scyllaeum first，and then Bucephala，with three adjacent islands，it is neces－ sary，as Leake has observed，to divide the extremity now known as Kavo－Shyli into two parts；the bold round promontory to the N．being the true Scyl－ lazum，and the acute cape a mile to the $S$ ．of it Bucephala，since the three islands are adjacent to the latter．（Paus．ii．34．§§ 7，8；Scylax，p．20， Hudson；Strab．viii．p．373；Thuc．v．53；Plin．iv． 5．s．9；Mela，ii．3；Leake，Morea，vol．ii．p．462， Peloponnesiuca，p． 282 ；Boblaye，Recherches，p．59； Curtius．Pelnponnesos，vol．ii．p．452．）

SCYLLE＇TICLS SINUS．［Scylacium．］
SCYRAS．［Laconia，p．114，b．］
SCYROS or SCYRUS（ $\Sigma \kappa i ̂ p o s: ~ E t h . ~ \Sigma x u ́ p l o s: ~$ Skyro），an island in the Aegaean sea，and one of the nurthern Sporades，was so called from its rugged－ ness．It lay east of Euboea，and contained a town of the same name（Strab．ix．p．436：Scylax，p．23； Ptol．iii．13．§ 47），and a river called Cephissus． （Strab．ix．p．424．）Scyros is frequently mentioned in the stories of the mythical period．Here Thetis concealed her son Achilles in woman＇s attire among the daughters of Lycomedes，in order to save him from the fate which awaited him under the walls of Troy．（Apollod．iii．13．§ 8 ；Paus．i．22．§ 6； Strab．ix．p．436．）It was here also that Pyrrhus， the son of Deidamia by Achilles，was brought up， and was fetched from thence by Ulysses to the Trojan War．（Hom．Il．xix．326，Od．xi．507； Suph．I＇hil．239，seq．）According to another tradi－

## SCY'RHIA.

tion Scyros was conquered by Achilles (Hom. Il. i. 668; Paus. i. 22. § 6); and this conquest was connected in the Attic legends with the death of Thesens. After Theseus had been driven out of Athens he retired to Scyros, where he was first hospitably received by Lycomedes, but was afterwards treacherously harled into the sea from one of the rocks in the island. It was to revenge his death that Peleus sent Achilles to conquer the island. (Plut. Thes. 35; Paus. i. 22. § 6; Philostr. Heroic. 19) Scyros is said to have been originally inhabitel by Pelasgians, Carians, and Dolopians; and we know from Thucydides that the island was atill inhabited by Dolopians, when it was conquered by Cimon after the Persian wars. (Nicolaus Datmasc. ap. Steph. B. s. v.; Scymn. Ch. 580, seq.; Thuc. i. 98 ; Diod. xi. 60.) In B. c. 476 an oracle had directed the Athenians to bring home the bones of Theseus; but it was not till B. c. 469 that the island was conquered, and the bones conveyed to Athens, where they were preserved in the Theseium. Cimon expelled the Dolopians from the island, and peopled it with Athenian settlers. (Thuc. Diod. I. cc.; Plut. Thes. 36, Cim. 8; on the date of the conquest of Scyros, which Clinton erroneously places in B. C. 476, see Grote, History of Greece, vol. v. p. 409.) From this time Scyros was subject to Athens, and was regarded even at a later period, along with Lemnos and Imbros, as a possession to which the Athenians had special claims. Thus the peace of Antalcidas, which declared the independence of all the Grecian states, nevertheless allowed the Athenians to retain possession of Scyros, Lemnos, and Imbros (Xen. Hell. iv. 8. § 15, v. 1. §31); and though the Macedonians subsequently obtained possession of these islands, the Romans compelled Philip, in the peace concluded in B. c. 196, to restore them to the Athenians. (Liv. xxxiii. 30.) The soil of Scyros was unproductive (Dem. c. Callip. p. 1238; Eustath. ad Hom. Il. ii. p. 782 ; Suidas,s. v. apxخ Eкvpla); but it was celebrated for its breed of goats, and for its quarries of variegated marble. (Strab. ix. p. 437; Athen. i. p. 28, xii. p. 540; Zenob. ii. 18; Plin. xxxvi. 16. s. 26.)

Scyros is divided into two parts by a narrow isthmus, of which the sonthern half consists of high rugged mountains. The northern half is not so mountainous. The modern town of St. George, on the eastern side of the island, stands upon the site of the ancient town. It covers the northern and western sides of a high rocky peak, which to the eastward falls steeply to the sea; and hence Homer correctly describes the ancient city as the lofty Scyros (Ekupov aiteiav, Il i. 664). The Hellenic walls are still traceable in many parts. The city was harely 2 miles in circumference. On the isthmus sunth of Scyros a deep bay still retains the name of Achilli ('Axinגt), which is doubtless the site of the Achilleion, or sanctuary of Achilles, mentioned by Eustathius (ad IL ix. 662). Athena was the divinity chiefly worshipped at Scyros. Her temple stood upon the shore close to the town. (Stat. Achill. i. 285, ii. 21.) Tournefort says that he faw some remains of columns and cornices of white marble, close by a forssken chapel, on the left hand going into the fort of St. George; these are probably remains of the temple of Athena. (Tournefort, l'oyige, vol. i. p. 334, trans.; Leake, Northern Greece, vol. iii. p. 106, seq.; Fiedler, Reise, vol. ii. p. 66; Ross, Wanderungen in Griechenland, vol. ii. p. 32, seq.)

SCYRUS (Exîpos), a tributary of the Alpheius, in southern Arcadia. [Megalopolis, p. 309, b.]
SCY'THIA (方 Exvela, 方 Zкvouct): ELL. Exions, Scytha), the country of the Scythae, a vast area in the eastern half of Northern Europe, and in Western and Central Asia. Its limits varied with the differences of date, place, and opportunities of information on the part of its geographers. Indeed, to a great extent, the history of Scyihia is the history of a

Name-It is obvious that the term came from the Greeks to the Romans; in this respect anlike Sarmatia, Dacia, and others, which, in fornn at least, aro Roman rather than Greek. But whence did the Greeks get it? for it is by no means either significant in their tongue, or a Greek word at all. They took it from one or more of the populations interjacent between themselves and the Scythae; these being Thracians, Sarmatians, and Getae. Probably all three used it; at any rate, it seems to have been used by the neighbours of the Greeks of Olbiopoiis. and by the Thracians on the frontiers of the Greeks of Dlacedonia. This is in favour of its haring been a term common to all the forms of speech between Macedonia and the Borysthenes. Scyth-, then, is a Sarmatian, Thracian, and Getic term in respect to its introduction into the Greek language. Was it so in its originf The presumption as well as the evidence is in favour of its having been so. There is the express eridence of Herodotus (iv. 6) that the population which the Greeks called Scythae called themselves Scoloti. There is the fact that the Persian equivalent to Scythae was Sakae. Thirdly, there is the fact that in the most genuine-looking of the Scythic myths there is no such eponymus as Scythe or Scythes, which would scarcely have been the case had the name been native. Scyth, then, was a word like German or Allemand, as applied to the Deutsche, a word strange to the language of the population designated by it, bat not strange to the language of the neighboaring countries. To whom was it applied? To the tribes who called themselves Scoloti.

What was the extent of the term ? Did it apply not only to the Scoloti, but to the whole of the class to which the Scoloti belonged? It is safo to say that, at first, at least, there were many congeners of the Scoloti whom no one called Scythae. The number, however, increased as the term became general. Did the name denote any populations of a different family from the Scoluti? Rarely, at first; afterwards, frequently. If the populations designated by their neighbours as Scythae called themselves by some other name, what was that name? Scoluti applied only to a part of them. Had the word Scyth-a meaning in any langunge? if so, what was it, and in what tongues? Both these points will be noticed in the sequel, the questions involved in them being at present premature, though by no means unimportant.
The knowledge of the Scythian family dates from the beginning of Greek literature.
Scrthlans of Hesiod, etc.-Populations belonging to the Scythian family are noticed by Homer under the names of Abii, Glactophagi, and Hippemolyi, the habit of milking their mares being as definite a characteristic of a Scythian as anything in the way of manners and customs can be. Hesiod gives us Scythae under that name, noting them also as Hippemolgi. The Scythians of Homer and Hesiod are poetical rather than historical nations. They are associated with the Mysu of Bulgaria (not of Asiu),
a point upon which Strabo enlarges（vii．3．§§ 7，8）． They are Hamaxobii（ $\langle\nu$ dxthuas olki＇Xovtes），and \＆$\gamma$ a apparent simplicity of their milk－drinking habits got them the credit of being men of mild and inno－ cent appetites with Ephorus（Strab．vii．p．302），who contrasts then with the cannibal Sarmatae．There was also an apparent confusion arising out of the likeness of $N \delta \mu a \delta$ es to $N \delta \mu i o t$（from $\nu \delta \mu o s=l a v$ ）． The Prometheus of Aeschylus is bound to one of the rocks of Caucasus，on the distant border of the earth，and the inaccessible desert of the Scythians．

Such are the Scythae of Aeschylus and Hesiod． The writers of the interval，who knew them as the invaders of Asia，and as historical agents，must have had a very different notion of them．Fragmentary allusions to the evils inflicted during their incoads are to found in Callinus，Archilochus，\＆c．The notice of them，however，belongs to the criticism of the historical portion of the account of

Thans－Danubian Scythians of Herodotus： Scoloti：Scythlans or Hippocrates．－Much of the Herodotean bistory is simple legend．The strarge story of an intermarriage of the females who．whilst their husbands were in Asin，were left behind with the slaves，and of the rebellion therein originating having been put down by the exhibition， on the part of the retarning masters，of the whips with which the backs of the rebels had been pre－ riously bat too familiar，belongs to the Herodotean Scythians（iv．1－6）．So do the myths concerning the origin of the nation，four in number，which may be designated as follows：－

1．The Account of the Scythians themselves．－ This is to the effect that Targitans，the son of Zeus by a daughter of the river Borysthenes，was the father of Leipoxais，Arpoxais，and Colaxais．In their reign，there fell from beaven a yoke，an axe （ $\sigma$ drapis），a plough share，and a cup，all of gold． The two elder failed in taking them up；for they burnt when they approached them．But the younger did not fail ；and ruled accordingly．From Lei－ porais descended the Auchaetae（ $\gamma^{6}$ vos）；from Ar－ posais the Catiari and Traspies；from Colaxais the Paralatai．The general name for all is＂Sico－ loti，whom the Greeks call Scythae．＂This was exactly 1000 years before the invasion of Darius． The gold was sacred；the country large．It ex－ tended so far north that the continual fall of feathers （snow）prevented things from being seen．The number of the kingdoms was three，the greatest of which had charge of the gold．Of this legend，the elements seem partly Scythian，and partly due to the country in which the Sicythians settled．The deacent from the Borysthenes belongs to this latter class．The story of the sons of Targitaus is found， in its main features，amongst the present Tartars． In Targitaus more than one commentator has found the root Turk．The threefold division reminds us to the Great，Middle，and Litule Hordes of the Kir－ ghiz；and it must be observed that the words great－ est and middle（ $\mu \mathrm{e} \boldsymbol{\gamma} \boldsymbol{i} \sigma \tau \eta$ and $\mu \epsilon \dot{\sigma} \eta$ ）are found in the Herodotean account．They may be more tech－ nical and defiuite than is generally imagined．In the account there is no Eponymus，no Scytha，or even Scolotos．There is also the statement that the Scythians are the youngest of all nations．This they might be，as immigrants．

2．The Account of the Fontic Greeks．－This is to the effect that Agathyrsus，Gelonus，and Scythes （the youngest）were the sons of Hercules and

Echidna，the place where they met being the Hylara． The son that could draw the bow was to rule．This was Scythes，owing to manoenvres of bis mother． He stayed in the land：the others went ont．The cup appears here as an emblem of anthority．

3．The Second Greek Account．－This is historical rather than mythological．The Massagetae press the Scythians upon the Cimmerii，the latter flying before them into Asia．This connects the history of the parts about the Bosporus with Media．The inference from the distribution of the signs of Cin：－ merian occupancy confirms this account．There were the burial－places of the Cimmerii on the Tyras； there was the Cimmerian Bosporus，and between them，with Cimmerian walls，Scythia（ $\dot{\eta}$ ミixu沙方）． This is strong evidence in favour of Scythian ex－ tension and Cimmerian preoccupancy．

4．The Account of Aristeas of Proconnesus．－ This is a speculation rather than either a legend or a piece of history．Aristeas（Mure，History of Greek Literature，vol．ii．469，seq．）visited the country of the Issedones．North of these lay the Ari－ maspi ；north of the Arimaspi the Monophthalmi； north of the Monophthalmi the Gold－guarding Grif－ fins（Гpúres xpugoфaldkot）；and north of these，the Hyperborei．The Hyperborei made no movements； but the Griffins drove the Monophthalmi，the Mono－ phthalmi the Arimaspi，the Arimaspi the Issedones， the Issedones the Scythians，the Scythians the Cim－ merians，the Cimmerians having to leave their land； but they，as we learn elsewhere，attack the Medes． （Herod．iv．5－16）．No one had ever been further north than Aristeas，an unsafe authority．The in－ formation of Herodotus himself is chiefly that of the Greeks of the Borysthenes．He mentions，however， conversations with the steward of one of the Scythian kings．

The Emporium of the Burystheneitae was central to the Scythia of the sea－coast．In the direction of the Hypanis，i．e．west and north－west，the order of the population was as follows：the Callipidac
 sumers of corn；to the north of whom lay the Scythae Aroteres，not only sowers of corn，but sel－ lers of it；to the north of these the Neuri；to the north of the Neuri either a desert or a terra incog－ nita（iv．17，18．）The physical geography belps us bere．The nearer we approach the most fertile province of Modern Russia，Podolia，wherein wo place the Scythae Aroteres，the more the Scythian character becomes agricultural．The Hellenes Scy－ thas（Callipidae and Alazunes）belong more to Kherson．That the Hellenes Scythae were either a mixed race，or Scythicised Greeks，is unlikely．The doctrine of the present writer is as follows：seeing that they appear in two localities（viz．the Govern－ ments of Kherson and Caucasus）；seeing that in each of these the populations of the later and more historical periods are Alani（Ptoleny＇s form for those of Kherson is Alauni）；seeing that even the Alani of Caucasus are by one writer at least called d $\alpha \times \kappa$－ evres＇Alaûvot；seeing that the root A入av might have two plarals，one in－ot and one in－es，he ends in seeing in the Hellenic Scythians simply certain Scy－ thians of the Alan name．Neither does he doubt about Geloni being the same word，－forms like Chuni and Hunni，Arpi and Carpi being found for these parts．At any rate，the locality for the Callipidae and Alazones suits that of Ptolemy＇s Alauni，whilst that of the Scythian Greeks and Geloni of Caucasus suits that of the Alans of the fourth and titlis centuriess

The Scythian affinities of the Neuri are implied ruther than categorically stated; indeed, in another part there is the special statement that the Tyras rises out of a great lake which separates the Scythian and Neurid countries (tigv Eikvoikivo кal tiv Nev́pioa hiv). This, however, must not be made to prove too much ; since the Scythians that were conterminous with the Neuri were known by no special name, but simply by the dexcriptive term Scythae Aroteres. [Exampaeus; Neuri.] In Siberian gengraphy Narym = marsh. Hence Neuri may be a Scythian gloss. There may also have been more Neuri than one, e.g. on the Narym of the headwaters of the Dnieper, i. e. of Pinsk. A fact in favour of the Neuri being Scythian is the following. The occupants of Volhynia, when its history commences, which is as late as the 13th century, are of the same stock with the Scythians, i. e. Comanian Turks. Not only is there no evidence of their introduction being recent, but the name Omani (Lygii Omani) appears about the same parts in Ptolemy.

East of the Borysthenes the Agricultural Scythae occupy the country as far as the Panticapes, 3 dnys distant. Northwards they extend 11 days up the Borysthenes, where they are succeeded by a desert; the desert by the Androphagi, a nation peculiar and by no means Scythian (c. 19). Above the Androphagi is a desert.
The bend of the Dnieper complicates the geography here. It is safe, however, to make Ekaterinoslav the chief Georgic area, and to add to it parts of Kiev, Kherson, and Poltara, the agricultural conditions increaking as we move northwards. The two deserts ( $\langle\rho \hat{\eta} \mu 0$ ) command notice. The first is, probably, a March or political frontier, such as the old Suevi used to have between themselves and neighbouns; at least, there is nothing in the conditions of the soil to make it a natural one. It is described as $\langle\rho \bar{\eta} \mu \mathrm{os}\langle\pi\rangle$ modabry. The other is < $\rho \bar{\eta} \mu \mathrm{os}$ d $\lambda \eta \theta \in \cos$, - a distinction, apparently, of some value. To be natural, however, it inust be interpreted forest rather than steppe. Kursk and Tshernigov give us the area of the Androphagi; Kursk having a slight amount of separate evidence in favour of its haring been "by no means Scythian" (c. 18).

The Hylaea, or wooded district of the Lower Dnieper, seems to have been common ground to the Scythac Georgi and Scythae Nomades; or, perhaps it was uninliabited. The latter extend 14 days eastward. i. e. over Taurida, part of Ekaterinoslav, and Don Kosaks, to the Gerrhus.

The Palaces ( $\tau \mathrm{d}$ na入éveva Baбi入tia) succeed; their occupants being the Royal Scythians, the best and most numerous of the name, who look upon the others as their slaves. They extend, southwards, into the Crimea ( $\tau$ inv Taupikivy), and, eastwards, as far as the ditch dug by the offspring of the blind slaves (the statement that the Scythians blinded their slaves on account of the milk being one of the elements of the strange Servile legend previously noticed), and the Maeotic Einporium called Kremni. Some touch the Tanais.
North of the Royal Scythians lie the Melanchlaeni (a prubable translation of Karakalpak $=$ black bonnet), a different nation and not Scythian (c. 20), with marshes, and either a desert or a terra incognita above them. This distunction is, almost certainly, real. At the present moment a population, to all appearances aboriginal. and neither Slavonic nor Sicilhian (but Ugrian or Finn), occupies parts of

Penzn and Tambov having, originally, extended both firther west and further south. To the north the forest districts attain their maximum development. [Mislanchlaent.] The Boyal Segthizns may have occupied parts of Voronesh.

East of the Tanais it was no longer Seythia, bat the $\Lambda d \xi l e s$ of the Sauromatae. [See Sauromatar; Budini; Grloni; Thyssagetar: Itracaf.] The want of definite boundaries makew it difficult to say where the Iurcae end. Beyond them to the eaxt lay other Scythians, who, haring revolted fronn the Royal, settled there. Up to their districts the soil was level and deep, beyond it rough and stony, with mountains beyond. These are occopied by a nation of Bald-heads, flat-nosed and bearded, Scythians in dress, peculiar in language, collectors of a substance called $\alpha \sigma \chi \cup$ from a tree called rovicuby (c.23). Their flocks and herds are few ; their manners so simple that no one injures thein, \&c. [Argippaki; Issedones; Hyperborei; Akimaspi.] In the parts about the mountains of the Argippaci trade was carried on by means of seven interpreters. Let this be the caravan trade of Orenburg, near its terminus on the Volga, and we shull find that seven is about the number of languages that could at the present moment be brought together at a fair in the centre of Orenburg. For the modern Russian take the language of the Sauromatae; for the Scythian that of the modern Tartars. To these wo can add four Ugrian forms of speech,- the Tshuwash, the Mordwin, the Tsheremiss, and the Votiak, with the two forms of speech akin to the Ostiak and Permian to choose the fifth from. The Tshuwash of Kasam and the Bashkirs of Orenburg have mixed characters at the present time,-Turk and Ugrian.

Rivers. - The chief river of the Herodotean Scythia was the Ister [Danubius], with its five mouths; and then the Tyras (Dniester), the Hypanis (Bog), the Borysthenes (Dnieper). the Panticapes [see s. v.], the Hypacyris [see Carcina], the Gerrhus [see a. v.], and the Tamais (Don); the feeders of the Ister (i.e. the rivers of the present Danubian Principalities) being the Porata (Scythic, in Greek Puretas), the Tiarantos, the Araros, the Naparis, and the Ordessus (cc. 47, 48). To these add, from the country of the Agathyrsi, the Maris (c. 49), or modern Maras of Transyltania. The difference between the ancient and modern names of rivers is nowhere greater than liere,- the Maras being the only name now in uso which represents the original one; unless we chouse to hold that, word for word, Aleta = Araros. Word for word, indeel, Naparis is Dnieper; but then the rivers are different. This creates a grave difficulty in the determination of the language to which the names of the Scythian rivers should be referred. Yet the question is important, inasmuch as, in the names, as they come down to us, we have so many glosses of some language or other. Upon the whole, however, the circumstances under which they reached Herodotus suggest the notion that they are Scythian: e.g. the express statement that porata is a Scythian form. Again; Hypanis is, word for word, Kuban, - a word of which the appearance in both Asia and Europe is best explained by suppowing it to be Scythian. On the other hand, they are as little signiticant in the language which, amongst those at present existing, best explains the urdoubted Scythian glusses, as they are in the Slavonic, Latin, or Greek.

The physical gengraphy of Ilemotean Scythia was a steppe, with occasionul districts (chiefly along

SCYTHIA.
SCYTHIA.
939
the courses of the rivers and at their head-waters) of a more practicable character.

Mountaiss.-These were the eastern continuation of the Carpathians, and the hills of the Crimea or Tauris. These were but imperfectly known to Herodotus.

Lakes. [See Exampaeve and Buce.]
Towns, exclusirely Greek colonies. [See Olbiopolis; Panticapaeum.]

Beyond the Sauromatac (s. v.) lay "other Scythians, who, having revolted from the Ruyal, reached this country," i. a some part of Orenburg (c. 22).

Thirdly, there were the Sacae, whom we may call the Siythians of the Persian frontier. Their occupancy was the parts conterminous with Bactria, and it was under Darius, the son of Hystaspes, that they, along with the Bactrians, joined in the invasion © Greece. Their dress was other than Bactrian, consisting of a pointed turban, a bonnet, leggings, native bows daggers, and the axe called odapapis -a word which is probably technical. There were Scythae Amyrgii, truly, however, Scythae, inasmuch as the Persians called all the Scythians by the namo Sacar Under the reign of Cyrus they wore independenk Under Darins, they, aloog with the Caspii, formed the 15th satrapy (iii. 93). This connects them with their frontagers on the west, rather than the enst.

There is no difficulty, however, in fixing them. From Asterabad to Balk they extended along the northern frontier of Perxia, in the area, and probably as the ancestors, of the present Turcomans and Uzbeks. The name Amyrgii will be noticed in the sequel.

The Sacae, if not separated from the " other Scythisns" by the greater part of Independent Tarlary, were, at anly rate, a population that presented itself to the infornants of Herodotus under a different aspect. The Sacae were what the Persians found on their northern frontier. The eastern Scythae were the Scythians beyond the Seuromatae, as they appeared to the occupants of the parts about the Tanais.

It is not difficult to see the effect of these three points of view npon future geographers. With Scythians in Transyleania, Scythians in Orenburg, with Scythinns (eveu though called Sacae) in Khorasan and Turcomania, and with a terra incognita between, the name cannot but fail to take upon itself an inondinate amount of generality. The three isolated areas will be connected; and the listorical or ethnological unity will give way to a geographical. At present, however, there is a true unity over the whole of Scythia in the way both of

Physiognomy and Manners.-The physical ennformation of the Scythians is not only mentioned incidentally by Herodotus, but in a more special manner by Hippocrates: "The Scythian fivos is widely different from the rest of mankind, and is like to nothing but itself, even as is the Aegyptian. Their budies are thick and fleshy, and their limbs loose, without tone, and their bellies the sinoothest (?), softest (?), moistest (?) (kolica irpoitaras) of all bellies as to their lower parts (raféar кoidecor aí кdion); for it is not possible for the belly to be dried in such a country, both from the soil and climate, but on account of the fat and the smoothuess of their flesh, they are all like each other, the men like the men, the women like the women." (Hippocr. de Aere, \&c. pp. 291, 292.)

Coming as this notice does from a physician, it has commanded considerable attention; it has, however, no pretensions to be called a description, though this has often been done. In the hands of later writers its leading features become exaggerated, until at length the description of a Scythian becomes an absolute caricature. We may see this by reference to Ammianus Marcellinus and Jornandes, in their accounts of the Huns. The real fact inferred from the text of Hippocrates is, that the Scythians had a peculiat physiognomy, a physiognomy which the modern ethnologist finds in the population of Northern and Central Asia, as opposed to those of Persia, Caucasus, Western and Southern Europe.

Their general habits were essentially nomadic, pastoral, and migratory; the commonest epithets or
 'Iñoto $\xi$ oral, and the like.

Concerning their Religion, we have something more thau a mere cursory notice (iv. 59). (i.) Tabiti (Tabitr): This was the Scythian name for the nearest equivalent to the Greek Histia (Vesin), the divinity whom they most especially worshipped. (ii.) Papseus : " Most properly, in my mind, is Zans thus called." So writes Herodotus, thinking of the ideas engendered by such exclamations as חanâs. (iii.) Apia: This is the name for earth; as (iv.) Detosyrus (Oiróoupos) is for Apollo, and (v.) Artimpasa for Aphrodite, and (vi.) Thamimasada for Poseidon, the God of the Royal Scythians most especialiy. To Destosyrus we have the following remarkable inscription (Gud. Inscrip. Antiq. p. 56. 2; see Zeass, 8. v. Skythen): ӨEA. ZEAOITOEKTPA (? ZEA$\eta \nu \eta$ ) KAI APOLL $\Omega N \Omega$. OITOEKTPR. MIOPA. M. OTAIIOZ. ПAOKAMOE. NESKOPOI. ANEE ( $\eta$ кe). Here the connection is with the Persian god Mithras.

The Scoloti sacrificed to all their gods, but to Mars the most especially; for, besides the deities which have been mentioned under their several Scythian names, Mars and Heracles were objects of particular adoration. The Scythian Venus, too, was the 'A甲positn oujpayin. To Ares, however, they sacrificed most especially and most generally; for there was a place of worship to him in every efros (mark the use of this word, which is applied to the divisions of the Persian empire as well), where horses, sheep, and captives were sacrificed, and where the emblem of the god was an iron sword,--even as it was with the Alani of Ammianus and the Huns of Priscus.

Human beings were sacrificed, but no swine. Neither were swine eaten, nor were they tolerated in the country. This is noticed, becanse in Inany of the nations of Northern Asia, e. g. the Wotiaks and others, the hog, even now, is held in abomination, and that by Pagan tribes untinctured with Mahometanism.

Notwithstanding the praises of the earlier poets, the wars of the "just and illustrious" Scrthians were of a piece with the worship of their war-god. They scalped their enemies, and they used their skulls as drinking cups (cc. 64-65). Once a year the monarch of each nome filled a vast vat with wine and apportioned it to the warriors who had killed most enemies during the year. Those whose hands were unstained got none, and were disgraced; those who had killed many took a double allowance (c. 66).

Their sonthsayers, amongst other superstitions, practised rhabdomancy, amongst whom the Enareas

## SCYTHIA.

(avop';yovot) are the most famous. They got their art from Aphrodite, as they got their ailment. During the Scythian invasion of Asia, a portion of the conquerors plundered the temple of the Aphrodite Urania in Ascalon, for which sacrilege they and their children were afflicted with $\mathfrak{J} \dagger \boldsymbol{\lambda} \in \iota a$ vovagos, the names of the sufferers being 'Evdipees (i. 105, 106). The nature of this Athieca yoũos has yet to be satisfactorily explained.

The sacerdotal and regal relations are curious. When the king ails hecalls his priests, who tell him that his ailment comes from some one baving foresworn himself in the greatest oath a Scythian can take. This is " by the hearth of the king." Take it falsely, and the king will sicken. Upon sickening, however, he sends for the uffender, whom the priests have indicated. The charge is denied. Other priests are sent for. If their vaticinations confirn the earlier ones, death and confiscation are the fate of the perjurer. Otherwise, a third set is called. If these agree in the condemnation of the first, a load of faggots, drawn by bullocks, is brought in, the lying priests have their hands bound behind them, the faggots are set a-light to, the beasts are goaded into a gallop, the flames catch the wind, the men are burnt to death, and the bullocks scorched, singed, or burnt to death also. The sons of the offending perjurer are killed, his daughters left unhurt.

Their oaths were made over a mixture of wine and blood. The swearers to them punctured themseives, let their blood fall into a vat of wine, drank the mixture, and dipped in it their daggers, arrows, javelin, and $\sigma d y a p / s$.

The ferocity exhibited in their barials was of the same kind. The tombs of the kings were on the Gerrbus. Thither they were brought to be buried, wherever they might die. They were entombed with sacrifices both of beasts and men, Hippothusia, Anthropothysia, and Suttee - all these characterised the funeral rites of the Scythians סucaútra-

Language. - The specimens of this fall into two divisions, the Proper and the Common Names. The former are the names of geographical localities and individuals. In one way or the other, they are numerous; at least they appear so at first. But we rarely are sure that the fact itself coincides with the first presumptions. The names of the rivers have been noticed. Of those of the gods, none have been definitely traced to any known language in respect to their meaning. Neither have they been traced to any known inythology as Proper Names. Next come the names of certain kings and other historical individuals, none of which have given any very satisfactory place for the old scythian.

With the Common Names (and under the class of Common Names we may place such Proper Names as are capable of being translated) the results improve, though only slightly. Of these terms the chief are the following: -
 naine of a well-head. [See s. v.] (ii.) Oiúpmara= avסpoктdvot $=$ Men-killers, a name applied by the Scythisns to the Amazons. Here oid $=$ man. $\pi a r d=$ kill (iv. 110). (iii.) Temerinda $=$ Mater Maris, applied to the Euxine. This is not from Herodotus, but from Pliny (vi. 7). (iv.) Arimaspi
 eye. (Herod. iv. 27) These will be considered under the head of Ethnology.

History.-The Herudotein view of the Scythians is incomplete without a nutice of the historical portion of his account; not that the two parts are, by any means, on the same level in the way of trustworthy information. The geography and descriptions are from contemporary sources. The history is more or less traditional. Taking it, however, as we find it, it falls into two divisions:-1, The Invasion of Asia by the Scythians; and 2, The Invasion of Scythia by Darius.

1. Invasion of Asia by the Scythians.-In the reigns of Cyasares king of Melia and of Sadyattes king of Lydia, the Scythians invade Asia, bodily and directly. They had previously inraded the country of the Cimmerians, whom they had driven from their own districts on the Maeotis, and who were thas thrown south wards. The Scythians pressed the Cimmerians, the Massagetae the Scythians. Chains of cause and effect of this kind are much loved by historians. It is only, however, in the obscure portions of history that they can pass unchallenged. The Cimmerians take Saldis during the last years of the reign of Ardys (b. c. 629.) They are expelled by Alyattes, his son. (Herod. i. 15, 16.) It seems that the Cimmerians were followed op by their ejectors; inasmuch as five years afterwards (B. C. 624) the Scythians themselves are in Medis; Cyaxares, who was engaged upon the siege of Ninoveh (Ninus), being culled back to oppose them. He is defeated; and the Scythians occupy Asia for 28 years, Cyaxares sarviving their departure. From Media they direct their course towards E.gypt ; from the invasion of which they are diverted by Psammitichas. Their attack upon the temple of the Venus Urania, in Ascalon, during their passage through Palestine, along with its mysterious sequelae, has been already noticed. The king who led them was named Madyes. (Herod. i. 103, seqq.) They were ejected s.c. 596.

There was a band of Scythians, however, in Media, in the reign of Croesus, B. C. 585, the account of which is as follows. Cyaxares, still reigning, receives a compa:ly (eld $\eta$ ) of Scythians, as suppliants, who escape (Ure $\xi \dagger \lambda \theta_{\epsilon}$ ) from Lydia into Media. He treats them well, and sends his son to them to learn the use of the bow, along with the Scythian language, until he finds that their habits of hunting and robbing are intolerable. This, along with a particular act of atrocity, determines Cy axares to eject them. They fly back to Alyattea, who refuses to give them up. But Alyattes dies, and the quarrel is entailed upon his son, Croesus The battle that it led to was fought May 28, bu. 585, when the eclipse predicted by Thales interrupted it.

The Scythian invasion might easily be known in its general features to both the Greeks of Asia and the Jews; and, accordingly, we find sufficient allusions to an invasion of northern barbarians, both in the Scriptures and in the fragments of the early Greek poets, to justify us in treating it as a real fact, however destitute of confirmation some of the Herndotean details may have been. (See Mare's Critical History, q'c. vol. iii. p. 133, seq.) Though further removel from his time than
2. Invasion of Scythia by Darius.-It is, probably, a more accurate piece of history. Darius invades Scythia for the sake of inflicting a chaxtisement for the previous invasion of Asia. This had been followed, not by any settlement of the Scythians elsewhere, but by a return bome. The strange
story of the Servile War of Whips belongs to this period.

When the approach of Darius becomes threatening, the Geloni, Budini, and Sauromatae join with the Scythians in resisting it; the Agathyrsi, Neuri, Androphagi, Melanchlaeni, and Tauri reserving themselves for the defence of their own territory if nttacked (iv. 119). To the three constituents of the confederacy there are three kings, Scopasis, Ianthyrus, and Taxacis, each with an allotted district to defend. This was done by destroying the gravs and tillage, driving off the flocks and herds, and corrupting (we can scarcely translate $\sigma v \gamma \chi^{\circ} \hat{v}$ by poisoning) the wells. The points whereon attack was anticipated were the frontiers of the Danube and the Don. These they laid waste, having sent their own wives and children northwards. The first brant of the war fell upon the Budini, whose Wooden City was burnt. Darius then moved southward and westward, pressing the other two divisions apon the countries of the Melanchlaeni, Neuri, and Agathyrsi. The latter warn the Medes aguinst encroaching on the frontier. Idanthyrsus answers enigmatically to a defiance of Darius. Scopasis tampers with the Ionians who have the custody of the bridge over the Danube. The Medes suffer from dearth, and determine to retreat across the Danube. The Scythians reach the passage before them, and require the Ionians to give it up. And now appeara, for the first time, the great name of Miltiades, who is one of the commanders of the guard of the bridge. He advises that the Scythians shonld be conciliated, Darius weakened. A half-measure is adopted, by which the Scythians are taught to distrust the Ionians, and the Medes escape into Thrace -so ending the Scythian invasion of Darius. (Herod. iv. 120-142.)

Criticism of the Herodotean Accounts. -The notices of Herodotus apon the Scythae, though full, are excursive rather than systematic. Part of their history appears as Lydian, part as Scythian Proper. There is much legend in his accounts; but the chief ohscnrities are in the geography. Even here the details are irregular. One notice arises out of the name Scythae, another out of the geography of their rivers, a third out of the sketch of Tauris. [See Tauris and Tauroscythae.] In this we hear that Scythia is bounded first by the Agathyrsi, next by the Neuri, then by the Androphagi, and lastly by the Melanchlaeni. The area is fourcornered; the longest sides being the prolongations along the coast and towards the interior. From the Ister to the Borysthenes is $\mathbf{1 0}$ days: 10 days more to the Maeotis ; from the coust to the Melanchlaeni, 20 days ;-200 studia to each day's journey. If this measurement be exact, it would hring Tula, Tambov, Riazan, Scc., within the Scythian area, which is going too far. The days' journeys inland were probably shorter than those along the coast.

The Agathyrsi were in Transylvania, on the Maros. The evidence, or want of evidence, as far as the text of Herodotus goes, is the same as it is with the Neuri. Their fruntagers were knuwn as Scythac Aruteres, i. e., the generic name was with them specific. Hence any Scythians whatever with a specific name must have been contrasted with them; and this seems to have been the case with the Agathyrsi. [Hunni, p. 1097.] Assuming, however, the Agatnyrsi to have been Scythian, and to have lain on the Maros, we carry the Herodotean Suy thas as far west as the Theior; nor can we ex.
clude them from any part of Wallachia and Mfol . davia. Yet these are only known to Herodotus as the country of the Sigynnes. The frontier, then, between the Scythae and Getae is difficult to draw. Herodotus has no Getae, eo nomine, north of the Danube : yet such there must have been. Upon the whole, we may look upon the Darabian Principalities as a tract scarcely known to Herodotus, and make it Scythian, or Getic, or mixed, according to the evidence of other writers, as applicable at the time ander consideration. It was probably Getic in the East, Sarmatian in the West, and Scythian in respect to certain districts occupied by intrusive populations.

Thucydides mentions the Getae and Scythians but once (ii. 96), and that together. The great alliance that Sitalces, king of Thrace, effects against Perdiccas of Macedon includes the Getae beyond Mount Haemns, and, in the direction of the Euxine sea, the Getae who were conterminous ( $8 \mu \mathrm{\mu} \rho \mathrm{ol}$ ) with the Scythians, and whose armour was Scythian ( $\delta \mu \dot{\sigma} \sigma \kappa \in v 0$ ). They were each archers and horsemen (iкпотоईбтal); whereas the Dii and the mountaineers of Rhodope wore daggers. According to Ovid (Triet. v. 7. 19), the occupants of the level country do so too:-
"Dextera non segnis fixo dare vulnera cultro,
Quem vinctum lateri barbara omnis habet."
The Scythians of the Macedonlan Period. -Passing over the notices of Xenophon, which apply to Thrace Proper rather than to the parts north of Mount Haemus, and which tell us nothing concerning the countries beyond the Danube, passing, also, over the notices of a war in which Philip king of Macedon was engaged against Atheas, and in which he crossed Mount Haemus into the country of the Triballi, where he received a wound, -we come to the passage of the Danube by Alexander. In the face of an enemy, and without a bridge, did the future conqueror of Persia cross the river, defeat the Getae on its northern bank, destroy a town, and return. (Arrian, Anab. i. 2-7.) This was an invasion of Scythia in a geographical sense only; still it was a passage of the Danube. The Getae of Alexander may have been descenjants of the Sigynnes of Herndotus. They were not, eo nomine, Scythians.

When Alexander was on the Danube the famous embassy of the Galatae reached him. They had heard of his fame, and came to visit him. They were men of enormous stature, and feared only that the beavens should fall. This disappointed Alexunder, who expected that they would fear him. Much bas been written concerning the embassy as if it came from Gaul. Yet this is by no means necessary. Wherever there is a Halicz or Galacz in modern geography, there may have been a Galat-ian locality in ancient; just as, wherever there is a Kermass or Carman-ia, there may have been a German one, and that without any connection with the Galli or Germani of the West. The roots G.L-t and K-ron-m, are simply significant geographical terms in the Sarmatian and Turk tongues - tongues to which the Getic and Scythian may most probably be referred.

Such is the present writer's opinion respecting the origin of the statements that carry certain Galatae as far as the Lower Danabe, and make the Basternae, and even the occupants of the Tanais, Germans - not to mention the Caramanians of Asia Minor and Carmani us of Persia. In the present
instance, however, the statenent of Strabo is very specific. It is to the effect that the ambassadors to
 and that Ptolemy was the authrity. Nevertheless, Ptolemy may have written 「a入dras, and such Galatae may have been the Galatae of the Olbian Inscription. [See infra and Sciria.]

The next Macedonian who crossed the Danube was Lysimachus, who crossed it only to re-cross it in his retreat, and who owed his life to the generosity of a Getic prince Dromichuetes. This was about B. c. 312.

Onr next authorities (fragmentary and insufficient) for the descendants of the Herodotean Scrthians are the occupants of the Greek towns of the Euxine. Even those to the south of the Danube, Callatis, Apollonia, \&cc., had some Scythians in the neighhood, sometimes as enemies, sometimes as protec-tors,-sometimes as protectors against other barbarians, sometimes as protectors of Greeks against Greeks, as was the case during the Scythian and Thracian wars of Lysimachus. The chief frontagers, however, were Getae. Between Olbia, to the north of the Danube (=Olbiopolis of Herodotus), and the native tribes of its neighbourhood, the relations are illustrated by the inscription already noticed. (Böckh, Inscr. Graec. na 2058.) It records a vote of public gratitude to Protogenes, and indicates the troubles in which he helped his fellow-citizens. The chief of those arose from the pressure of the barbarians around, by name Saudaratae, Thisametae, Sciri [see Sciri], Galatae, and Scythae. The date of this inscription is uncertain; but we may see the import of the observations on the word Gratatas when we find the assumption that they were Gauls of Gallia used as an instrument of criticism :-" The date of the above inscription is not spceified; the terror inspired by the Guuls, even to other barbarians, seems to suit the second century B. a better than it suits a later period." (Grote, Hict. of Greece, vol. xii. p. 644, note.) What, however, if the Galatae of Wallachia were as little Galli as the Cermanians of Persia are Germans, or as Galace is the same as Calais 9 The present writer wholly disconnects them, and ignores the whole system of hypothetical migrations by which the identity is supported.

A second Olbia in respect to its Helleno-Scythic relations, was Bosporus, or Panticapaenm, a Greek settlement which lasted from B. c. 480 till the reign of Mithridates. [Panticapaeum.]
From Bosporus there was a great trade with Athens in corn, hides, and Scythian slaves,-Scythes, as the name of a slave, occurring as early as the time of Theognis, and earlier in the Athenian drama than thnee of Davus and Geta (Dacian and Getic) which belong to the New Comedy,-Scythes and Scythaena being found in the Old.

The political relations were those of independent municipalities; sometimes sovereign, sometimes protected. The archons of Bosporus paid tribute to the Scythian princes of their neighbourhood, when they were powerful and united: took it, when the Scythians were weak and disunited. Under this latter category came the details of the division of the Mamtue, viz.. Sindi, Toraeti, Dandarii, Thetes, \&ec. Of these, Parysades I. (a Scythic rather than a Greek name) was king, being only archon of his native town. In the civil wars, too, of Bosporus, the Sicthiuns took a part; nor were there wanting exauples of Scythian manners even in the case of the

Panticapaean potentates. Eumelus loat bis life ly being thrown out of a four-wheeled wagon-and-four with a tent on it.

Scytifines of the Mithridatic Period, etc. - The Scythians pressed on Parysades IV., who called in Mithridates, who was conquered by Rome. The name now becomes of rare occurrence, subordinate to that of the Sarmatae, Daci, Thracians, \&c. In fact, irstead of being the nearest neighbous to Greece, the Scythae were now the most distant enemies of Rome.

In the confederacy of the Dacian Boerebistes, in the reign of Augustus, there were Scythian elements. So there were in the wars against the Thracian Rhescuporis and the Roxolani. So there were in the war conducted by J. Plautins in the reign of Vespasian, as shown by the following in. sctiption: regibus basternarum et rhotolanorum filios dacorum . . . erertob kemisit . . . scytharum quoque rege a chersonest ques EST ULTRA BORYSTHENEM OBSIDIONE BUMMOTO. (Grut. p. 4.53; Böckh, vol. ii. pt. 1. p. 82; Zeues, 8. v. Skythen.)

Though the history of the Scythians, eo nomine. be fragmentary, the history of more than one Scythian population under a change of name is both prominent and important. In the article Hunni reasons are given for believing that the descendants of the Herodotean Agathyrsi, of Scythian blum, were no unimportant element in the Dacian nationality.

After the foundation of Constantinople the Scythian nations appear with specific histories und names, Hun, Avar, \&cc.

The continuity of the history of the name of the Herodotean Sicythians within the Herodotean area is of great importance; as is the explanation of namis like Galatae and Germani; as also is the considerstion of the sources whence the nomenclature and information of the different authorities is derived. It is importunt, because, when we find one name disup. pearing from history, and another appearing, theio is (according to, at least, the current criticism) a presumption in favour of a change of population. Sometimes this presumption is heightened into what is called a proof; yet the presumption itself is unreal. For one real change of name referrible to an actual change of population there are ten where the change has been merely one in respect to the sources whence the information was derived, and the channels through which it came. This is what ocrurs when the same country of Deutschland is called Germany by an Englishinan, Allemagme in France, Lamagna in Italy. This we know to be nominal. We ought at least to ask whether it may not be so in ancient history - and that not once or twice, but always - before we assume hypothetical movements and migrations.

Now in the case of Scythia we can see our way to great nominal and but slight real changes. We see the sources of information changed from Greek to Latin, and the channels from Getic and Macedonian to Dacian.

If so, the occupants of Hungary, the Principalities, and South-western Rinssia under the Caesars inay to the descendants of the occupants of the same districts in the time of Herodutus. That there are some differences is not only likely but admitted,-differences in the way of admixture of blood, modification of nationality, changes of frontier, differences of the kind that time always effects, even in a stationary condition of nations. It is ouly denied that.
any wholesale change can be proved, or even reasenably supprosed. Who can be shown to have eliminated any definite Scythian population from any definite Scythian occupancy? With the Greeks and Komans the negative evidence is nearly conclusive to the fact that no such elimination ever took place. That the Barbarians might have displaced each other is admitted; but there is no trustworthy evidence to their having done so in any single instance. All opinions in favour of such changes rest upon either the loose statements of insufficiently-informed Writers, or the supposied necessity of accounting for the appearance and change of certain names by means of certain appearance and changes of population.

The bearings of this will appear in the notice of the Ethnology of Scythia. They appear also under Hesvis.

Of the Sacar, eo nomine, the histery is obscure. In one sense, indeed, it is a nonentity. There is no classical historian of the Sacae. How far the ethnologist can infer them is a question which will be treated in the sequel.

Of the history of the populations akin to the Sacae, the details are important; but then it is a history of the Massagetae, Parthi, \&cc., \& history full of critical prelimicaries and points of inference rather than testimony.

The Scythia of all the authors between Herodotus and Ptolemy means merely the country of the Scythre, the Scythae being such northern nations as, without being, eo nomine, Sarmatian, were Hamaxobii and Hippemolgi; their habits of milking their mares and travelling in tented wagons being their most genuine characteristic. These it was which determined the views of even Strabo, whose extension of Germania and Galatia (already noticed) left him no room for a Scythia or even a Sarmatia; Sarmatia, which is to Ptolemy as Germania was to Strabo: for the Sarmatia of Ptolems leaves no room in Europe for a Scythia; indeed, it cuts deeply into Asiatic Scythia, the only

Scythia of Ptolemy.-The Scythia of Ptolemy is exclosively Asiatic, falling into, 1. The Scythia within the Imaus 2. The Scythia bejond the Imaus.

This is a geographical division, not an ethnological one. Scythae Alauni are especially recognised as a population of European Sarinatia.

As Ptolemy's Sarmatia seems to have been formed out of an extension of the area of the Herodotean Sauromatae, his Scythia seems to have grown out of the eastern Scythae of the Herodotean Scythia, i. e. the Scythae of Orenburg. It did not grow out of the country of the Sucue, inasmuch as they are mentioned separately; even as the Jazyges of the Theiss were separated from the Sarmatians. The continuatior, however, of the Herodutean account must make the Sacae Scythians. They may be disposed of first.

The Sacar of Ptolemy were bounded by the Sogdiuss on the west, the Scythians on the north, and the Seres on the east. They were nomads, withont towns, and resident in woods and caves. The mountain-range of the Comedi ( $\dot{\eta}$ Koon $\eta \delta \bar{\omega} \nu$ d $\rho \in(\cdots h)$ was in their conntry; so was the Stone Tower ( $\Lambda$ i $\theta$ wos IIupyos). The populations were: 1, 2. The Caratae and Comari along the Jaxartes. 3. The Cumedae, on the Comedian mountain. 4. The Massagetas along the range of the Ascatancas ('Aakardjkas). 5. In the interjecent country, the

Grynaei Scythae; and, 6, the Toornae; south of whom, along the Imaus, 7 , the Byltae. (Htol. vi. 13.)

Scythia intra Imatim. - Bounded on the $S$. and E. by Sogdiana, Margiann, and the Sacae ; on the W. by the Caspian and Sarmatia Asiatica; on the N. by a terra incognita; and on the E. by the northern prolongation of the Imaus. (Ytol. vi. 14.)

Kivers. The Khymmus, the Daix, the Jaxartes, the Iastus, and the Polytimetus.

Mountains. - The eastern part of the Montes Hyperborei, the Montes Alani (observe the reappearance of this name), the Montes Rhymmici, the Mons Nornssus, the MM. Aspisii, Tapyri, Syebi, Anarei, all W. of the Imaus.

Populations. - The Alani Scythae (on the confines of the terru incognita), the Suabeni, the Alanorsi, S. of whom the Saetiani, and Massaei, and Syebi; and (along the Imaus) the Tectosaces and (on the eastern head-waters of the Rha) the Khobusci, S. of whom the Asmani; and then the Paniardi, S. of whom, ulong the river, the district called Canodipsas, S. of which the Coraxi; then the Orgasi, after whom, as far as the sea (i. e. the Caspian, in this chapter called Hyrcanian), the Erymmi, with the Asiotae on the E. of them, succeecied by the Aorsi; after whom the Juxartae, a great nation along the river of the same name; then $S$. of the Saetiani, the Mologeni and Samnitue, as far as the MM. Rhymmici. Thell, S. of the Massaei and MM. Alani, the Zaratae and Sasones ; and further W. and as far as the MM. Rhyinmici, the Tybiacae, succeeded by the Tabieni, S. of the Zaratae, and the lastae und Machaetegi alung the Mons Norossus; S. of whom the Norosbes and Norossi, and the Cachagre Scythae along the Jaxartae. On the W. of the MM. Aspisii, the Aspisii Scythae; on the E. the Galactophagi Scythae; E. of the MM. Tapuri and the Suebi, the Tapurei ; and above the MM. Aurei and the Mons Ascatancas, the Srythae Anarei, and the Ascatancae and Ariacae along the Jaxartes, $S$ of whom the Namastae; then the Sugaraucae, and, along the Oxus, the Khibii, with their town Davaba.

Scythia extra Imaum was bounded by Scythia intra Imaum, the Sacae, the Terra In:ugnita, and the Seres. It contained the western phrt of MM. Auxacii, Casii and Emodi, with the source of the river Oechardus. (Ptol. vi. 15.)

Its Populations were the Abii Scythae, the Hippophagi Scythae, the Chatae Siythae, the Charaunaei Scythae; the designation Scythae being applied to each.

Districts.-The Auxacitis, the Casia ( $\dot{\eta}$ Kajla

Towns.-Auxacia, Issedon, Scythica, Chaurana, Sieta.

The remarks that applied to the Sarmatia Asiatica of Piolemy apply here. Few names can be safely identified. Neither is it safe to say through what languages the information came. Some words suggest a Persian, some a Turk source, some are Mongol. Then the geography is obscure, That the range of Pamer was unduly prolonged northwards is evident [Imaus]; this being an error of the geographer. The courses, however, of the Oxus and Jaxartes may themselves have changed.

The prolongation of the Pamer range being carried in a northern and north-eastern direction, 80 as to include not only the drainages of the Oxus and Jaxartes, bat that of the Balkash Lake as well, gives us the lime of the Imaus; the terra incognita to the
N. being supposed to begin with the watershed of the Irtish, Obi, and other rivers falling into the Arctic Ocean. Within the limits thus described we may place the Nor-osbi and Nor-ossi, on the eastern edge, i. e. in the parts where at the present moment the lakes distinguished by the name Nor occur. It should be added, however, that the syllable is generally final, as in Koko-nor, \&c. Still it is a prominent element in compound names, and indicates Mongol occupancy. The Byitae may be placed in Bulti-stan, i. e. the country of the Bulti=Little Tibet, the gloss being Persian.

In Ascatancas (the Greek spelling is the more convenient Aoka-т $\alpha \boldsymbol{\gamma} \kappa$-as), we have the Turkish -tagh = mountain just as it actually occurs in numberless compounds.

Karait is a naine of common application, chiefly to members of the Mongol family.

Mass-agetae is a term full of difficulty. Can it have arisen out of the common name Mus-tag ?

In Scythia extra Imaum, the Casia and Achassa ( $\chi$ लिpal) may be made one and identified with the Cesii of Pliny. The most reasonable explanations of these names is to be found in the sugrestion of Major Cunningham's valuable work on Ladak (p. 4), where the Achussa Regio = Ladakh, and the Chatae, and Chauronse Scythae $=$ Chang-thang and Khor respectively.
Roughly speaking, we may say that the country of the Sacue was formed by an irregular tract of land on the head-waters of the Oxns and the watershed between it and the Jaxartes, a tract which included a portion of the drainage of the Indas. It is only a portion of this that could give the recognised conditions of Scythian life, viz. steppes and pasturages. These might be founded on the great table land of Pamer, but not in the mountain districts. These, however, were necessary for "residences in woods and caves"; at the same time, the population that occupied them might be pastoral rather than agricultural. Still they would not be of the Scythian type. Nor is it likely that the Sacme of Ptolemy were so. They were not, indeed, the Sacae of Herodotas, except in part, i. e. on the desert of the Persian frontier. They were rather the mountuineers of Kaferistan, Wakhan, Shugnan, Roshan, Astor, Hunz-Nagor, and Little Tibet, partly Persian, partly Bhot (or Tibetan), in respect to their ethnology.

The Scythians beyond the Innaus.-These must be divided beiween Ladakh, Tibet, Chinese Tartary, and Mongolia in respect to their geography. Physically they come within the conditions of a Scythian occupancy ; except where they are true mountaineers. Ethnologically they may be distributed between the Mongol, Bhot, and Turk families - the Turks being those of Chinese Tartary.

The Turcoman districts of the Oxus, Khiva, the Kirghiz country, Ferghana, Tashkesd, with the parts alout the Balkash, give us the Scythia within the Imaus. It coincides chiefly with Independent Tartary, with the addition of a small portion of Mongolia and southern Siberia. Its conditions are generally Scythian. In the upper part, however, of the Jaxartes, the districts are agricultural at present; nine-tenths of this area is Turk, part of the population being Nomades, part industrial and agricultural.

The Scythia of the Byzantine Authors.This means not only Hunns, Avars, Alans, and Surmatians, but even Germans, Goths, and Vandals.

It is used, however, but rarely. It really existed only in books of geography. Every division of the: Scythian name was known under its specific designation.

Ethyology.-If any name of antiquity be an ethnological, rather than a geographical, term, that name is Scythia. Ptolemy alone applies it to an area, irrespective of the races of its occupants. With every earlier writer it means a number of populations connected by certain ethnological characterintics. These were physical and moral-physical, as when Hippocrates describes the Scythian physiognomy; moral, as when their nomadic habits, as Hamaxobii and Hippemolgi, are put forward as dis. tinctive. Of language as a test less notice is taken; though (by Herodotus at least) it is by no means overlooked. The division between Scytbian and non-Scythian is always kept in view by him. Of the non-Scythic populations, the Sauromatae were one; hence the ethnology of Scythia involves that of Sarmatia, both being here treated together.

In respect to them, there is no little discrepancy of opinion amongst modern investigators. The first question respecting them, however, has been answered unanimously.

Are they represented by any of the existing divisions of mankind, or are they extinct? It is not likely that such vast families as each is admitted to have been has died out. Assuming, then, the prosent existence of the congeners of both the Sarmatae and the Scythae, in what family or class are they to be found? The Scythae were of the Turk, the Sarmatae of the Slavono-Lithuanic stock.

The evidence of this, along with an exposition of the chief differences of opinion, will now be given, Scythia being dealt with first. Premising that Turk means all the populations whose language is akin to that of the Ottomans of Constantinople, and that it comprises the Turcomans, the Independent Tartars, the Uzbeks, the Turks of Chinese Tartary, and even the Yakuts of the Lena, along with several other tribes of less importance, we may examine the a priori prohabilities of the Scythae having been, in this extended sense, Turks.

The situs of the nations of South-western Russia, \&c., at the beginning of the proper historical period, is a presumption in favour of their being so. Of these the best to begin with are the Cumanians (12th century) of Volhynia. That they were Turk we know from special statements, and from samples of their language compared with that of the Kirghis of Independent Tartary. There is no proof of their being new coners, however mach the doctrine of their recent emigration may have been gratuitously assumed. The Uzes were what the Cumanians were; and before the Uzes, the Patzinaks (10ih century) of Bessarabia and the Danubian Principalities were what the Uzes were. Earlier than the Patzinake, the Chazars ruled in Kherson and Taurida (7th and 8th centuries) like the Patzinaks, in the same category with definitely known Cumanians and Uzes. These four popalations aro all described by writers who knew the true Turks accurately, and, knowing them, may be relied on. This knowledge, however, dates only from the reign of Justinian [Turcar]. From the reign, then, of Justinian to the 10th century (the date of the break-ap of the Camanians), the Herodotean Scythia was Turk - Turk without evidence of the occupation being recent.

The Avars precede the Chazars, the Huns the

Avass the Alani the Huns [Husmi; Avarrs]. The migrations that make the latter, at least, recent occupants being entirely hypothetical. The evidence of the Huns being in the same category as the Avars, and the Avars being Turk, is conclusive. The same applies to the Alani-a population which brings us to the period of the later classics.
The conditions of a population which should, at one and the same time, front Persia and send an offset roand the Caspian into Southern Russia, \&\&., are best satisfied by the present exclusively Turk area of Independent Tartary.

Passing from the presumptuous to the special evidence, we find that the few facts of which we are in possession all point in the same direction.

Physical Appearance. - This is that of the Kirghiz and $l^{\prime}$ zbelis exactly, though not that of the Ottomans of Rumelia, who are of mixed blood. Allowing for the change effected by Mahoinet, the same remark applies to their
Manners, which are those of the Kirghiz and Twrcomans.
Language.-The Scythian glosses have not been satisfactorily explained, i. e. Temerinda, Arimaspi, and Exampaeus hare yet to receive a derivation that any one but the inventor of it will admit. The oior-, however, in Oior-pata is exactly the er, aer, =man, \&ce, a term found through all the Turk dialects. It should be added, however, that it is Latin and Keltic as well (vir, fear, gwr). Still it is Turk, and that unequivocally.
The evidence, then, of the Scythae being Turk consists in a series of small particulars agreeing with the $\dot{a}$ priori probabilities rather than in any definite point of evidence. Add to this the fact that no other class gives us the same result with an equally small amount of hypothesis in the way of migration and change. This will be seen in a review of the opposite doctrines, all of which imply an annecessary amount of anproven changes.

The Mongol Hypothesis.-This is Niebuhr's, developed in his Researches into the History of the Scythians, fre; and also Neumann's, in his Hellenen im Skythenlande. It accounts for the manuers and physiognomy, as well as the present doctrine; bat not for anything else. It violates the rule against the unnecessary multiplication of causes, by bringing from a distant area. like Mongolia, what lies nearer, i.e. in Tartary. With Niebuhr the dectrine of fresh migrations to account for the Tarks of the Byzantine period, and of the extirpation of the older Scythians, takes its maximum development, the least allowance being made for changes of name. "This" (the time of Lysimachus) "is the last mention of the Scythian nation in the region of the Ister; and, at this time, there could only be a remnant of it in Budzack" (p. 63).

The Fim Hypothesis.-This is got at by making the Scythians what the Huns were, and the Huns what the Maryars were-the Magyars being Finn. It arises out of a wrong notion of the name, Hungary, and fails to account for the difference between the Scythians and the nations to their north.

The Circassian Hypothesis.-This assumes an exteusion of the more limited area of the northern occupants of Caucasus in the direction of Russia and Hungary. Such an extension is, in itself, probable. It fails, however, to explain any one fact in the descriptions of Scythia, though valid for some of the older populations.

The Indo-European Hypothesis. - This doctrine takes many forms, and rests on many bases. The
vol 1.
-get- in words like Masss-get-se, \&cc., is supposed to $=$ Goth $=$ German. Then there are certain names which are Scythian and Persian, the Persian being Indo-European. In the extreme form of this hypothesis the Sacae $=$ Saxons, and the Yuche of the Chinese authors $=$ Goths.

If the Scythians were intruders from Independent Tartary, whom did they displace? Not the Sarmatians, who were themselves intruders. The earlier occupants were in part congeners of the Northern Cuucasians. They were chiefly, however, Ugrians or Finns; congeners of the Mordvins, Tsheremess, and Tshuwashes of Penza, Saratov, Kazan, \&c.: Dacia, Thrace, and Sarmatia being the original occupancies of the Sarmatae.

If so, the ethnographical history of the Herodotean Scythia runs thus:-there was an original occupancy of Ugrians; there was an intrusion from the NE. by the Scythians of Independent Tartary, and there was intrusion from the SW. by the Sarmatians of Dacia. The duration of the Scythian or Turk occupancy was from the times anterior to Herodotus to the extinction of the Cumanians in the 14th century. Of internal changes there was plentr; but of any second migration from Asia (with the exception of that of the Arars) there is no evidence.
Such is the history of the Scythae.
The Sacae were, perhaps, less exclusively Turk. though Turk in the main. Some of them were, probably, Mongols. The Sacae Amyrgii may have been Ugrians ; the researches of Norris upon the second of the arrow-headed alphabets haring led him to the opinion that there was at least one invasion of Persia analogous to the Magyar invasion of Hungary, i. e. effected by members of the Ugrian stock, probably from Orenburg or Kazan. With them the root $m$-rd $=$ man. History gives us no time when the Turks of the Persian frontier, the Sacae, were not pressing southwards. Sacastene ( $=$ Segestan) was one of their occapancies ; Carmania probably another. The Parthians were of the Scythian stock; and it is difficult to believe that, word for word, Persia is not the same as Parthia. The history, however, of the Turk stock is one thing: the history of the Scythian name another. It is submitted, however, that the two should be connected. This being done, the doctrine of the recent diffusion of the Tarks is a doctrine that applies to the name only. There were Tark invasions of Hungary, Turk invasions of Persia, Tark invasions of China, Assyria, Asia Minor, and even north-eastern Africa, frum the earliest period of history. And there wero Sarmatian invasions in the opposite direction, invasions which have ended in making Scythia Slavonic, and which (in the mind of the present writer) began by making parts of Asia Median. Lest this be taken for an exaggeration of the Turk influence in the world's history, let it be remembered that it is only a question of date, and that the present viev only claims for the Turk conquests the place in the antehistorical that they are knowo to have had in the historical period. With the exception of the Mongol invasions of the 13th century and the Magyar occupancy of Hungary, every conguest in Southern Asia and Europe, from the North, has been effected by members of the stock under notice. [See Sarmatia; Venedi; Fenni ; Sitones ; Turcae.] [R. G. L.]

SCYTHI'NI (Exveivoi, Xen. Anab. iv. 7. § 18; ミкoítivol, Diod. xiv. 29; 之кvөךvol, Steph. B. s. r.), an Asiatic people dwelling on the borders of Armenia, between the rivers Harpasus on the E. and

Asparus on the W., and bounded by the mountains of the Chalybes on the $S$. The Ten Thousand Greeks, in their retreat under Xenophon, were compelled to march four days through their territory. Rennell (Geogr. of Herod. p. 243) seeks them in the province of Kars (comp. Ritter, Erdkunde, vol. i. p. 764).
[T. H. D.]
SCYTHO'POLIS. [Bethsax].
SCYTHOTAURI. [TAUROSCYTHAR.]
SEBAGENA ( $\Sigma e 8 d \gamma \eta \nu a$, or, as others read, 'E8árnva), a town in Cappadocia, of uncertain site. (Ptol. v. 6. § 15.)
[L. S.]
SEBASTE ( $\sum_{6} \in \operatorname{Ba\sigma }$ 亿升). 1. A town in a small island off the coest of Cilicia, built by Archelans king of Cappadocia, to whom the Romans had given Cilicia Aspera. (Strab. xiv. p. 671.) It seems to hare received its name Sebaste in honour of Augustus; for, until his time, both the island and the town were called Eleusa, Elaeusa, or Elaenssa (Joseph. Ant. xvi. 4. § 6, Bell. i. 23. § 4 ; comp. Ptol. v. 8. § 4 ; Hierocl. p. 704 ; Stadiasm. Mar. Magn. § 172, where it is called 'Eneous; Steph. B.
 Pliny ( v .22 ) still applies to the town, though he erroneously places it in the interior of Caria Stephanus, in one of the passages above referred to, calls Sebaste or Elaeussa an island, and in the other a peninsula, which may be accounted for by the fact that the narrow channel between the island and the mainland was at an early period filled up with sand, as it is at the present, - for the place no longer exists as an island. Sebaste was situated between Corycus and the mouth of the river Lamus, from which it was only a few miles distant. Some interesting remains of the town of Sebaste still exist on the peninsula near Ayash, consisting of a temple of the composite order, which appears to have been overthrown by an eartliquake, a theatre, and three aqueducts, one of which conveyed water into the town from a considerable distance. (Comp. Beaufort, K'aramania, p. 250, foll.; Leake, Asia Minor. p. 213.)
2. A town in Phrygia Pacatiana, between Alydda and Eumenia, is noticed only by Hierocles, (p. 667) and in the Acts of the Council of Constantinople (iii. p. 674); but its site has been identified with that of the modern Segikler, where inscriptions and coins of the town have been found. The ancient name of the place is still preserved in that of the neighbouring stream, Stbasli Su. (Comp. Hamilton's Researches, i. p. 121, \&c.; Arundell, Discoveries, i. P. 136, who erroneously takes the remains at Segikler for those of the ancient Eucarpia.)
3. [Cabira, Vol. I. p. 462.]
[L. S.]
SEBASTE. [SAmaria.]
SEBASTEIA ( (iebdotela), a town in the soath of Pontus, on the north bank of the Upper Halys. As it was near the frontier, Pliny (vi. 3) regards it as not belonging to Pontus, but to Colopene in Cappadocia. (Ptol. v. 6. § 10; Hierocl. p. 702; It. Ant. pp. 204, 205.) The town existed as a small place before the dominion of the Romans in those parts, but its ancient name is anknown. Pompey increased the town, and gave it the name of Megalopolis (Strab. xii. p. 560). The name Sebastia must have been given to it before the time of Pliny, he being the first to use it. During the imperial period it appears to have risen to considerable importance, so that in the later division of the Empire it was made the capital of Armenia Minor. The identity of Sebastia with the modern Sizas is established partly by the rosemblance of the names, and partly by the agreement
of the site of Sizas with the description of Gregory of Nyssa, who states that the town was situated in the valiey of the Halys. A small stream, moreover, flowed through the town, and fell into a neighbouring lake, which commanicated with the Halys (Urat.I. in XL. Mart. p. 501, Orat. II. p. 510 ; comp. Basil. M. Epist. viii.). In the time of the Byzantine empire Sebasteia is mentioned as a large and flourishing tuwn of Cappadocia (Nicet. Ann. p. 76; Ducas, p. 31); while Stephanus B. (s. v.) and some ecclesiastical writers refer it to Armenia. (Sozom. Hist. Eccl. iv. 24 ; Theodoret. Hist. Eccl. ii. 24.) In the Itinerary its name appears in the form of Sevastin, and in Abulfeda it is actually written Siwas. The emperor Justinian restored its decayed valls. (Procop. de Aed. iii. 4.) The town of Sivas is still large and populous, and in its vicinity some, though not very important, remains of antiquity are seen. (Fontanier, Voyages en Orient. i. p.179, foll.) [L.S.]

SEBASTO'YOLIS (Kefaotóroncs.) 1. A town in Pontus Cappadocicus (Ptol. v. 6. § 7), which, according to the Antonine Itinerary ( p 205), was situated on a route leading from Tavium to Sebastia, and was connected by a road with Caesareia (p. 214). Pliny (vi. 3) places it in the district of Colopene, and agrees with other authorities in describing it as a small town. (Hierocl. p. 703; Nocell. 31; Gregor. Nyssen. in Macrin. p. 202.) The site of this place is still uncertain, some identifying the town with Cabira, which is impossible, unless we assume Sebastopolis to be the same town as Sebaste, and others believing that it occupied the site of the modern Turchal or Turkhal.
2. A town in Pontus, of unknown site (Ptol. v. 6. §9), though, from the place it occupies in the list of Ptolemy, it must have been sitnated in the south of 'Themiscyra.
3. About Sebastopolis on the east coast of the Euxine see Droscurins, and abont that in Mrsia, see Myrina.

SEBASTOPOLIS (Hierocl. p. 638), a place in the interior of Thruce, near Philippopolis. [J. R]

SEBATUM, a town situated either in the southwestern part of Noricum, or in the east of Rhaetia, on the road from Aemona to Veldideua ( $I t, A n t \mathrm{p}$ 280), seens to be the modern Suchbs. (Comp Duchar, Norikum, i. p. 250.)
[L.S.]
SEBENDU'NUM (EEEEivסouvov, Ptol. ii. 6. § 71 ), a town of the Castelluni in Hispania Tarraconemsis. There is a coin of it in Sestini (p.164). [T.H.D.]

SEBENNYTUS (Leéénvatos, Ptol. iv. 5. § 50 ;
 p. 802 : Eth. $\left.\Sigma \in 6 \in \operatorname{lin}^{2} \eta\right)^{2}$, the chief town of the Sebenuytic nome in the Eryptian Delta, situated on the Sebennytic arm of the Nile, nearly due E. of Sais, in lat. $31^{\circ} \mathrm{N}$. The modern hamlet of Semenhoud, where some ruins have been discovered, occupies a portion of its site. Sebenngtus was anciently a place of some importance, and standing on a peninsula, between a lake ( $\lambda i \mu \nu \eta$ Eeberoutixí: Burlos) and the Nile, was favourably seated for trade and intercourse with Lower Aegypt and Meinphis. The neglect of the canals, however, and the elevation of the alluvial soil have nearly obliterated its site. (Champollion, l'Egypte, vol. ii. p. 191, seq.)
[W. B. D.]
SEBE'THUS (Fiume della Mauddalena), s small river of Campania, flowing into the Bay of Naples, immediately to the E. of the city of Neapolis. It in alluded to by several ancient writers in connection with that city (Stat. Sile. i. 2. 263; Colum. x. 134;

SEBINUS LACUS.
Vib. Sequest. p. 18), and is generally considered to be the same with the stream which now falls into the sea a little to the E. of Naples, and is cominonly called the Fiume della Maddalena. This rivulet, which rises in a fountain or basin called La Bolla, about 5 miles from Naples, is now a rery trifling stream, but may have been more considerable in ancient times. The expressions of prets, however, are not to be taken literally, and none of the geographers deem the Sebethus worthy of mention. Virgil, however, alludes to a nymph Sebethis, and an inscription attests the local worship of the river-god, who had a chapel (sedicula) erected to him at Neapolis. (Gruter, Inscr. p. 94. 9.)
[E. H. B.]
SEBI'NUS LACUS (Lago d' Iseo), a large lake in the N. of Italy, at the foot of the Alps, formed by the waters of the river Ollins (Oglio), which after flowing through the land of the Camuni (the Val Camonica), are arrested at their exit from the mountains and form the extensire lake in question. It is not less than 18 miles in length by 2 or 3 in breadth, so that it is inferior in magnitude only to the three great lakes of Northern Italy; but its name is mentioned only by Pliny (ii. 103. s. 106, iii. 19. s. 23), and seems to have been little known in antiquity, as indeed is the case with the Lago d Iseo at the present day. It is probable that it derived its name from a town called Sebum, on the site of the modern Iseo, at its SE. extremity, but no mention of this name is found in ancient writers. (Cluver, Ital. p. 412.)
[E. H. B.]
SEBRIDAE (Ee6pl8ar, Ptol. iv. 7. § 33), or SOBORIDAE (Eo8opioar, Ptol. iv. 7. § 29), an Aethiopian race, situated hetween the Astaboras (Tacazze) and the Red Sea. They probably correspond with the modern Samhar, or the people of the "maritime tract." There is some likelihood that the Sembritae, Sebridae, and Soboridae are but varions names, or corrupted forms of the name of one tribe of Aethiopians dwelling between the upper arms of the Nile and the Red Sea. [W. B. D.]

SEBLJRRI (Z Gouphol and Ecoupfol, Ptol. ii. 6. § 27), a people in the NW. of Hispania Tarraconensis, on both banks of the Minius, probably a subdivision of the Callaici Bracarii.
[T. H. D.]
SECELA or SECELLA. [Ziklag.]
SECERRAE, called by the Geogr. Rav. (iv. 42) and in a Cod. Paris. of the Itin. Ant. (p. 398) Skterrae, a town of the Laeëtani in Hispania Tarraconensis, on the road from the Summum Pyrenaeum and Juncaria to Tarraco Variously identified with S. Pere de Sercada, Arbucias, and San Sclomi (properly Santa Colonia Sejerra). The last identification seems the most probable.
[T. H. D.]
SE'ClA (Secchia), a river of Gallia Cispadana, one of the southern tributaries of the Padus, which crosses the Via Aemilia a few miles W. of Modena. It is evidently the same stream which is called by Pliny the Gabellus; but the name of Secia, corresponding to its modern appellation of Secchia, is found in the Jerusalem Itinerary, which marks a station called Pons Secies, at a distance of 5 miles from Matina. (Itin. Hier. p. 606.) The same bridge is called in an inscription which records its restoration by Valerian, in A. D. 259, Pons Seculae. (Murat. Inscr. p. 460.5; Orell. Inscr. 1002.) The Secchia is a considerable stream, having the chanacter, like most of its neighbours, of a mountain torrent.
[E. H. B.]
SECOANUS (之inkoavos, Steph. s. v.), a river of the Hassaliots, according to one reading, but accord-

SEGASAMUNCLUM.
ing to another reading, a city of the Massaliots, " from which connes the ethnic name Sequani, as Artemidorus says in his first book." Nothing can be made of this fragment further than this; the name Sequanus belonged both to the basin of the Rhone and of the Seine.
[G. L.]
SECOR or SICOR ( $\left.\Sigma_{\eta} \boldsymbol{\kappa} \dot{\omega} \rho \geqslant \sum_{i} \kappa \delta \rho \lambda_{i} \mu \eta \nu\right)$, a port which Ptolemy (ii. 7. § 2) places on the west cnast of Gallia, between the Pectonium or Pictonium Promontorium and the mouth of the Ligeris (Loire). The name also occurs in Marcianus. The latitudes of Ptolemy cannot be trusted, and we have no other means of fixing the place except by a guess. Accordingly D'Anville supposes that Necor may be the port of the Sables d'Olonne; and other conjectures bave been made.
[G. L.]
SECURISCA (Eexolpigka, Procop. de Aed. iv. 7. p. 292, ed. Bonn.), a town in Moesia Inferior, lying S. of the Danube, between Oescus and Novae. (Itin. Ant. p. 221 ; comp. Geogr. Rav. iv. 7; Theophyl. vii. 2.) Variousily identified with Sohegurli, Sistov, and Tchereselan.
[T. H. D.]

## SEDELAUCUS. [Sidolocus.]

SEDETA'NI. [Edetani.]
SEDIBONIA'TES, are placed by Pliny in Aquitania (iv. c. 19). He says, "Aquitani, unde nomen provinciae, Sediboniates. Mox in oppidum contributi Convenae, Begerri." The Begerri are the Bigerriones of Caesar. [Bigerriones.] We have no means of judging of the position of the Sediboniates except from what Pliny says, who seems to place them near the Bigerriones and Convenae. [Converafe.]
[G. L.]
SEDU'NI, a people in the valley of the Upper Rhone, whom Caesar (B. G. iii. 1, 7) mentions: "Nantuates Sedunos Veragrosque." They are also mentioned in the trophy of the Alps (Plin. iii. 20) in the same order. They are east of the Veragri, and in the Valais. Their chief town had the same name as the people. The French call it Sion, and the Germans name it Sitten, which is the ancient name, for it was called Sedunum in the middle ages. An inscription has been found at Sion: "Civitas Sedunorum Patrono." Sitten is on the right bank of the Rhone, and crossed by a stream called Sionnce. The town-hall is said to contain several Roman inscriptions. [Nantuates; Octodurus.]
[G. L.]
SEDU'SII, a German tribe mentioned by Caesar (B. G. i. 51) as serving under Ariovistus; but as no particulars are stated about them, and as they are not spoken of by any subsequent writer, it is impossible to say to what part of Germany they belonged. Some regard them as the same as the Edusones mentioned by Tacitus (Germ. 40), and others identify them with the Phundusi whom Ptolemy (ii. 11. § 12) places in the Cimbrian Chersonesus; but both conjectures are mere fancies, based on nothing but a faint resemblance of names. [L. S.]

SEGALLAUNI ( $\Sigma \in \gamma a \lambda \lambda a v \nu o i, P t o l . ~ i i . ~ 10 . ~ § ~ 11) . ~$. Ptolemy places them west of the Allobroges, and he names as their town Valentia Colonia (Valence), near the Rhone. Pliny (iii. 4) names them Segovellauni, and places them between the Vocontii and the Allobroges; but be makes Valentia a town of the Cavares. [Cavares.]
[G. L.]
SEGASAMUNCLUM ( $\Sigma \in \gamma / \sigma a \mu \delta \gamma \kappa o u \lambda o v$, Ptol. ii. 6. §53), a town of the Autrigones in Hispania Tarraconensis. (Itin Ant. p. 394.) Variously identified with S. Maria de Ribaredonda, Cameno, and Ballwercanes.
[T. H. D.]
3P 2

SE'GEDA AUGURI'NA, an important town of Hispania Bsetica, between the Baetis and the coast. (Plin. iii. 1. s. 3.) Commonly supposed to be $S$. Iago della Hiquera near Jaen.
[T.H.D.]
SEGELOCUM (Itin. Ant p. 475, called also Agelocum, Ib. p. 478), a town in Britannia Romana, on the road from Lindum to Eboracum, according to Camden (p. 582) Littleborough in Nottinghamshire.
[T.H.D.]
SEGE'SAMA (Zeqe $\sigma \alpha \mu a$, Strab. iii. p. 162), or Segesamo and Segisamo (Itin. Ant. pp. 394, 449, 454; Orell. Inscr. no. 4719), and Segisamonrnsfrs of the inhabitants (Plin. iii. 3. s. 4), a town of the Murbogi or Turmodigi in Hispania Tarraconensis, on the road from Tarraco to Asturica, now called Sasamo, to the W of Briviesca. (Florez, Esp. Sagr. vi. p. 419, xv. p. 59.) [T. H. D.]

SEGESSERA, in Gallia, is placed in the Table between Corobiliun (Corbeil) and Andomatunum (Langres), and the distance of Segessera from each place is marked xxi. The site of Segessera is not certain. Some fix it at a place named Suzannecourt. [Corobilium.]
[G. L.]
SEGESTA ( Kéreata: Eth. इeveorayds, Segestanus: Ru. near Calatafimi), a city of Sicily in the NW. part of the island, about 6 miles distant from the sea, and 34 W . of Panormus. Its name is always written by the Attic and other contemporary Greek writers Egesta ("Eyeota: Eth. 'Ey $\quad$ otaios, Thuc. \&c.), and it has hence been frequently asserted that it was first changed to Segesta by the Romans, for the parpose of avoiding the ill otnen of the name of Egesta in Latin. (Fest. 8.v. Segesta, p. 340.) This story is, however, disproved by its coins, which prove that considerably before the time of Thucydides it was called by the inhabitants themselves Segesta, though this form seems to have been softened by the Greeks into Egesta. The origin and foundation of Segesta is extremely obscure. The tradition current among the Greeks and adopted by Thucydides (Thuc. vi. 2; Dionys. i. 52; Strab. xiii. p. 608), ascribed its foundation to a band of Trojan settlers, fugitives from the destruction of their city; and this tradition was readily welcomed by the Romans, who in consequence claimed a kindred origin with the Segestans. Thacydides seems to have considered the Elymi, a barbarian tribe in the neighbourhood of Eryx and Segesta, as descended from the Trojans in question; but another account represents the Elymi as a distinct people, already existing in this part of Sicily when the Trojans arrived there and founded the two cities. [Elym.] A different story seems also to have been current, according to which Segesta owed its origin to a band of Phocians, who had been among the followers of Philoctetes; and, as usual, later writers sought to reconcile the tro accounts. (Strab. vi. p. 272; Thac. l.c.) Another version of the Trojan story, which would seem to have been that adopted by the inhabitants themselves, ascribed the foundation of the city to Egestus or Aegestus (the Acestes of Virgil), who was said to be the offspring of a Trojan damsel named Segesta by the river god Crimisus. (Serv. ad Aen. i. 550, v. 30.) We are told also that the names of Simois and Scamander were given by the Trojan colonists to two small streams which flowed beneath the town (Strab. xiii. p. 608); and the latter name is mentioned by Diodorus as one still in use at a much later periud. (Diod. $\mathbf{x x} .71$.)

It is certain that we cannot receive the statement of the Trojan origin of Segesta as historical ; but what-
ever be the origin of the tradition, there seems no doubt on the one hand that the city was occupied by a people distinct from the Sicanians, the native race of this part of Sicily, and on the other that it was not a Greek colony. Thucydides, in enumerating the allies of the Athenians at the time of the Peloponnesian War, distinctly calls the Segestans barbarians; and the history of the Greek colonies in Sicily was evidently recorded with sufficient care and accuracy for us to rely upon his authority when he pronounces any people to be non-Hellenic. (Thuc. vii. 57.) At the same time they appear to have been, from a very early period, in close connection with the Greek cities of Sicily, and entering into relations both of hostility and alliance with the Hellenic states, wholly different from the other barbarians in the island. The early influence of Greek civilisation is shown also by their coins, which aro inscribed with Greek characters, and bear the unquestionable impress of Greek art.

The first historical notice of the Segeatans transmitted to us represents them as already engaged (as early as B. c. 580) in hostilities with the Selinuntines, which would appear to prove that both cities had already extended their territories so far as to come into contact with each other. By the timely assistance of a body of Cnidian and Rhodian emigrants under Pentathlus, the Segestans at this time obtained the advantage over their adversaries. (Diod. v. 9.) A more obscure statement of Diodoras relates that again in B. c. 454, the Segestans were engaged in hostilities with the Lilybaeans for the possession of the territory on the river Mazaras. (Id. xi. 86.) The name of the Lilybaeans is here certainly erroneous, as no town of that name existed till long afterwards [Lilybaeum]; but we know not what people is really meant, though the presumption is that it is the Selinuntines, with whom the Segestans seem to have been engaged in almost perpetual disputes. It was doubtless with a view to strengthen themselves against these neighbours that the Segestans took advantage of the first Athenian expedition to Sicily under Laches (B. c. 426), and concluded a treaty of alliance with Athens. (Thac. vi. 6.) This, however, seems to have led to no result, and shortly after, hostilities having aqain broken out, the Selinuntines called in the aid of the Syracusans, with whose assistance they obtained great advantages, and were able to press Segesta closely both by land and sea. In this extremity the Segestans, having in vain applied for assistance to Agrigentum, and even to Carthage, again bad recourse to the Athenians, who were, without much difficulty, persuaded to esponse their cause, and send a fleet to Sicily, b.c. 416. (Thac. vi. 6; Diod. xii. 82.) It is said that this result was in part attained by fraud, the Segestans having deceived the Athenian envoys by a fallacious display of wealth, and led them to conceive a greatly exacgerated notion of their resources. They, however. actually furnished 60 talents in ready money, and 30 more after the arrival of the Atbenian armament. (Thuc. vi. 8, 46; Diod. xii. 83, xiii. 6.)

But though the relief of Segesta was thas the original object of the great Athenian expedition to Sicily, that city bears little part in. the subsequent operations of the war. Nicias, indeed, on arriving in the island, proposed to proceed at once to Selinus, and compel that penple to submission by the display of their formidable armament. Bnt this advice was overruled: the Athenians turned their
arms against Syracuse, and the contest between Seresta and Selinus was almost forgoten in the inore important struggle between those two great powers. In the summer of B. C. 415 an Athenian tleet, proceeding along the coust, took the sinall town of Hyccara, on the coast, near Segesta, and made it over to the Segestans. (Thuc. vi. 62; Diod. xiii. 6.) The latter people are again mentioned on more than one occasion as sending auxiliary troops to assist their Athenian allies (Thuc. vii. 57 ; Diod. xiii. \%): but no other notice occurs of them. The final defeat of the Athenians left the Segestans again exproed to the attacks of their neighbours the Seliunntines; and feeling themselves unable to cope with them, they again had recourse to the Carthacinians, who determined to expouse their cause, and sent them, in the first instance, an auxiliary force of 5000 Africans and 800 Campanian mercenaries, which sufficed to ensure them the victory over their rivals, B. C. 410. (Diod. xiii. 43, 44.) But this was followed the next year by a vast armament under Hannibal, who landed at Lilybseum, and, proceeding direct to Selinus, took and destroved the city. (Ib. 54-58.) This was followed by the deatruction of Himera; and the Carthaginian power now became firmly established in the western portion of Sicily. Secesta, surrounded on all sides by this formidable neighbour, naturally fell gradually into the position of a dependent ally of Carthage. It was one of the few cities that remained faithtul to this alliance even in B. C. 397 , when the great expedition of Dionysius to the W. of Sicily and the sirge of Motya seemed altogether to shake the power of Carthage. Dionysius in consequence laid siege to Segesta, and pressed it with the utmost vigour, expecially after the fall of Motya; but the city was able to defy his efforts, until the landing of Hi mileo with a formidable Carthaginian force clanged the aspect of affairs, and compelled Dionysius to raise the siege. (Id. xiv. 48, 53-55.) From this tine we hear little more of Segesta till the time of Azathocles, under whom it suffered a great calamity. The despot having landed in the W. of Sicily on his return from Africa (B. c. 307), and being received into the city as a friend and ally, suddenly turned upon the inhabitants on a pretence of disaffection, and put the whole of the citizens (said to amount to $\mathbf{1 0 , 0 0 0}$ in number) to the sword, plundered their wealth, and sold the women and children into slavery. He then changed the name of the city to Dicaeopolis, and assigned it as a residence to the fugitives and deserters that had gathered around him. (Diod. xx. 71.)

It is probable that Segesta neveraltogether recovered this blow; but it soon resumed its original name, and again appears in history as an independent city. Thus it is mentioned in B. C. 276, as one of the cities which joined Pyrrhus during his expedition into the W. of Sicily. (Diod. xxii. 10. Exc. H. p. 498.) It, however, soon after fell again under the power of the Carthaginians ; and it was probably on this occasion that the city was taken and plundered by them, as alluded to by Cicero (Verr. iv. 33); a circumstance of which we have no other account. It continued subject to, or at least dependent on that people, till the First Punic War. In the first year of that war (B.c.264) it was attacked by the consul Appius Claudius, but without success (Diod. xxiii. 3. p. 501); but shortly atter the inhabitants put the Carthaginian garrison to the sword, and declared for the alliance of Kume. (Ib. 5. p. 502; Zonar. viii. 9.) They were in con-
sequence besieged by a Carthaginian force, and were at one time reduced to great straits, but were relieved by the arrival of Duilius, after his naval victory, B. c. 260. (Pol.i. 24.) Segesta seems to have been one of the first of the Sicilian cities to set the example of defection from Carthage; on which account, us well as of their pretended Trojan descent, the inhabitants were treated with great distinction by the Rumans. They were exempted from all public burdens, and even as late as the time of Cicero continued to be " sine foedere immunes ac liberi." (Cic. Verr. iii. 6, iv. 33.) After the destruction of Carthage, Scipio Africanus restored to the Segestans a statue of Diana which had been carried off by the Carthaginians, probably when they obtained possession of the city after the departure of Pyrrhus. (Cic. Verr. iv. 33.) During the Servile War also, in B.c. 102, the territory of Segesta is again mentioned as one of those where the insurrection broke out with the greatest fury. (Diod. $x \times x \nabla i .5$, Exc. Phot.p. 534.) But with the exception of these incidental notices we hear little of it under the Roman government. It seems to have been still a considerable town in the time of Cicero, and had a port or emporium of its own on the bay abrut 6 miles distant ( $\tau \delta \tau \bar{\omega} \nu$ Aly $\in \sigma$ -
 Є $\mu \pi$ ópıov, Ptol. iii. 4. § 4). This emporium seems to have grown up in the days of Strabo to be a more important place than Segesta itself: but the continued existence of the ancient city is attested both by Pliny and Ptolemy; and we learn from the former that the inhabitants, though they no longer retained their position of nominal independence, enjoyed the privileges of the Latin citizenship (Strab.l.c.; Plin. iii. 8. s. 14 ; Ptol. iii. 4. § 15.) It seems, however, to have been a decaying place, and no trace of it is subsequently found in history. The site is said to have been finally abandoned, in consequence of the rarages of the Saracens, in A. D. 900 (Amico, ad Fazell. Sic. vii. 4. not. 9), and is now wholly desolate; but the town of Castell' $a$ Mare, about 6 miles distant, occupies nearly, if not precisely, the same site as the ancient emporium or port of Segesta.

The site of the ancient city is still marked by the ruins of a temple and theatre, the former of which is one of the most perfect and striking ruins in Sicily. It stands on a hill, about 3 miles NW. of Calatafimi, in a very barren and open situation. It is of the Doric order, with six columns in front and fourteen on each side (all, except one, quite perfect, and that only damaged), forming a parallelogram of 162 feet by 66. From the columns not being fluted, they have rather a heary aspect; but if due allowance be made for this circumstance, the architecture is on the whole a light order of Doric ; and it is probable, therefore, that the temple is not of very early date. From the absence of fluting, as well as other details of the architecture, there can be no donbt that it never was finished, - the work probably being interrupted by some political catastrophe. This temple appears to have stood, as was often the case, outside the walls of the city, at a short distance to the W. of it. The latter occupied the summit of a hill of small extent, at the foot of which flows, in a deep valley or ravine, the torrent now calied the Fiume Gaggera, a confluent of the Fiume di S. Bartolomeo, which flows about 5 miles E. of Segesta. The latter is probably the ancient Crimisus [Crimisub], celebrated for the great victory of Tinnoleon orer the Cartha;iniuns, while the Gaggeru must probably be the stream called by Diodorus (xx. 71) the Sicamander

Two other streams are mentioned by Aelian（V． $\boldsymbol{H}$ ． ii．33）in connection with Segesta，the Telmessus and the Porpax ；but we are wholly at a loss to determine them．Some vestiges of the ancient walls may still be traced；but almost the only ruins which remain within the circuit of the ancient city are those of the theatre．These have been lately cleared out， and exhibit the praecinctio and sixteen rows of seats， great part in good preservation．The general form and arrangement are purely Greek；and the building rests at the back on the steep rocky slope of the hill， out of which a considerable part of it has been ex－ cavated．It is turned towards the $\mathbf{N}$ ．and commands a fine view of the broad bay of Castell＇a Mare． （For a more detailed account of the antiquities of Segesta，see Swinburne＇s Travels，vol．ii．pp． 231 － 235；Smyth＇s Sicily，pp．67，68；and especially Serra di Falco，Antichità della Sicilia，vol．i．pt．ii．） Ancient writers mention the existence in the territory of Segesta of thermal springs or waters，which seem to have enjoyed considerable repatation（ $\tau \grave{\alpha}$ गेєpmà
 $\tau$ à＇Eyєбтaîa，Diod．iv．23）．These are apparently the sulphureous springs at a spot called Calametti， about a mile to the N．of the site of the ancient city． （Fazell．Sic．vii．4．）They are mentioned in the Itinerary as＂Aquae Segestanae sive Pincianae＂ （Itin．Ant．p．91）；but the origin of the latter name is wholly unknown．

The coins of Segesta have the figure of a dog on the reverse，which evidently alludes to the fable of the river－god Crimisus，the mythical parent of Aegestus，having assumed that form．（Serv．ad Aen． i．550，v．30；Eckhel，vol．i．234．）The older coins （as already observed）uniformly write the name ZEIEミTA，as on the one annexed：those of later date，which are of opper only，bear the legend ELEETAI

## COIN OF SEGESTA．

SEGESTA（Sestri），a town on the coast of Li－ guria，mentioned by Pliny，in describing the coast of that country from Genua to the Macra．（Plin．iii． 5．s．7．）He calls it Segesta Tigulliorum；so that it seems to have belonged to a tribe of the name of the Tigullii，and a town named Tigullia is mentioned by him just before．Segesta is commonly identified with Sestri（called Sestri di Levante to distinguish it from another place of the name），a considerable town about 30 miles from Genoa，while Tigullia is probably represented by Tregoso，a village about 2 miles further inland，where there are considerable Roman remains．Some of the MSS．of Pliny，in－ deed，have＂Tigullia intus，et Segesta Tigulliorum，＂ which would seem to point clearly to this position of the two places．（Sillig，ad loc．）It is probable， also，that the Tegulata of the Itineraries（Itin． Ant．p．293）is identical with the Tigullia of Pliny．
［E．H．B．］
SEGESTA，or SEGESTICA．［Siscin．］
SEGIDA（之é $\gamma$ ıóa，Strabo，iii．p．162）．
1．A
town of the Arevaci in Hispania Tarraconensis． According to Appian，who calls it $\Sigma \in \gamma \emptyset \eta \delta \eta$（vi．44）， it belonged to the tribe of the Belli，and was 40 stadia in circumference．Stephanus B．（s．v．）calls it $\Sigma \in \gamma i \delta \eta$ ，and makes it a town of the Celtiberians， of whom indeed the Arevaci and Belli were only subordinate tribes．Segida was the occasion of the first Celtiberian War（Appian，l．c．），and was pro－ bably the same place called Segestica by Livy （xxxiv．17）．

2．A town of Hispania Baetica，with the sur－ name Restituta Julia．（Plin．iii．1．s．3．）［T．H．D．］

SEGISA（之́́ ${ }^{\prime}$ ıa，Ptol．ii．6．§ 61），a town of the Bastitani in Hispania Tarraconensis，perhaps the modern Sehegin．
［T．H．D．］
SEGI＇SAMA and SEGISAMA JU＇LIA（ $\mathrm{E} \in-$ ríaua＇Iovגía，Ptol．ii．6．§50），a town of His pania Tarraconensis．We find the inhabitants men－ tioned by Pliny as Segisamajulienses（iii．3．s．4）． Ptolemy ascribes the town to the Vaccaei，but Pliny to the Turmodigi，whence we may probably conclude that it lay on the borders of both those tribes．The latter author expressly distinguishes it from Se － gisamo．
［T．H．D．］
SEGISAMO．［Segesama．］
SEGISAMUNCLUM．［Segasamunclum．］
SEGNI，a German tribe in Belgiam，mentioned by Caesar（B．G．vi．32）with the Condrusi，and placed between the Eburones and the Treviri．In B．G．ii． 4 Caesar speaks of the Condrusi，Eburones， Caeraesi，and Paemani，＂qui uno nomine Germani appellantur；＂but he does not name the Segni in that passage．There is still a place named Sinei or Signei near Condroz，on the borders of Namur；and this may indicate the position of the Segni．［G．L．］

SEGOBO＇DIUM，in Gallia，placed in the Table on a road from Andomatunum（Langres）to Vesontio （Besançon）．The Itin．gives the same road，but omits Segobodium．D＇Anville supposes Segobodium to be Seveux，which is on the Saône，and in the di－ rection between Besançon and Langres．［G．L．］

SEGOBRI＇GA（ $\sum^{2} \mathcal{\gamma} \delta \delta \rho ı \gamma a$ ，Ptol．ii．6．§ 58）． 1．The capital of the Celtiberi in Hispania Tarra－ conensis．（Plin．iii．3．s．4．）It lay SW．of Caesar－ angusta，and in the jurisdiction of Carthago Nova． （Plin．l．c．）The surrounding district was cele－ brated for its talc or selenite．（Id．xxxvi．22．s．45．） It must have been in the neighbourhood of Priego， where，near Pennaescrite，considerable ruins are still to be found．（Florez，Esp．Sagr．vii．p．61．）For coins see Sestini，i．p．193．（Cf．Strab．iii．p．162； Front．Strat．iii．10．6．）

2．A town of the Edetani in Hispania Tarra－ conensis，known only from inscriptions and coins， the modern Segorbe．（Florez，Esp．Sagr．v．p．21， viii．p．97，and Med．pp．573，650；Mionnet，i．p．50， and Supp．i．p．102．）
［T．H．D．］

COIN OF SEGOBRIGA．
SEGOBRI＇GII．［Massila，p．290．］

SEGODU'NUM (Lerobouvov). Ptolemy (ii. 7. § 21) calls Segodanum the chief town of the Ruteni [Ruteni], a Gallic people west of the Rhone, in the Aquitania of Ptolemy. In some editions of Ptolemy the reading is Segodunum or Etodunum. In the Table the name is Segodum, which is probably a corrupt form; and it has the mark of a chief town. It was afterwards called Civitas Rutenorum, whence the modern name Rodez, on the Avegron, in the department of Aveyron, of which it is the chief town.
[G. L.]
SEGODU'NUM (Eerobouvor), a town of southern Gernany, probably in the country of the Hermunduri, is, according to sone, the modern Wurzburg. (Ptol. ii. 11. § 29; comp. Wilhelin. Germamien, p. 209.)
[L.s.]
SEGO'NTIA. 1. A town of the Celtiberi in Hispania Tarraconensis, 16 miles from Caesaraugusta (Itin. Ant. pp 437, 439.) Most probably identical with the Seguntia of Livy (xxxiv. 19). The modern Rueda, according to Lapie.
2. (之erovтіа Пардцка. Ptol.ii. 6. § 66), a town of the Barduli in Hispanis Tarraconensis. [T. H. D.] SEGONTIACI, a people in the S. part of Britannia, in Hampshire. (Camden, pp. 84, 146; Caes. B. G. . . 21; Orelli, Inscr. 2013.) [T. H. D.]

SEGO'NTIUM, a city in the NW. part of Britannia Secunda, whence there was a ruad to Deva. (Itin. Ant. p. 482.) It is the modern Caermurvon, the little river by which is still callied Skjont. (Caunden, p. 798.) it is called Seguntio by the Geogr. Rav. (v. 31).
[T.H.D.]
SEGURA, in Gallia, appears in the Table on a road from Portus Namnetum ( Nanes) to Limunum, or Limonum (Poitiers). D'Anville suppones that Segora is Bressuive, which is on the road from Nantes to Poiticrs.
[G.L.]
SEGOSA, in Gallia, is placed by the Antwine Itin. on a road from Aquae Tarbellicae (Dux) to Burdigala (Bordeaux). The first station from Ayuse Tarbellicae is Mosconnum, or Mostomium, the site of which is unknown. The next is Segosa, which D'Anville fixes at a place named Escoussé or Escoursé. But he observes that the distance, 28 Gallic leagues, between Aquae and Segoes is less than the distance in the Itin.
[G. L.]
SEGOVELLAUNi. [Segallauni.]
SEGU'VIA (Eerousia, Ptol. ii. 6. § 56). 1. A town of the Areraci in Hispania Tarraconensis, on the raad from Emerita to Caesaraugusta. (Itin. Ant. p. 435; Plin. iii. 3. s. 4; Flor. iii. 22.) It still exists under the ancient name. For coins see Florez (Med. ii. p. 577), Mionnet (i. p. 51, and Suppl. i. p. 104), and Sestini (p. 196).
2. A town of Hispania Baetica, on the river Silicence. (Hirt. B. A. 57.) In the neighbourhood of Sacili or the modern Perabad. [T. H. D.]

SEGUSIA'NI (Eeyofavai or Eerovolavoi), a Gallic people. When Caesar (b.c. 58) was leading against the Helvetii the troops which he had raised in North Italy, he crossed the Alps and reached the territory of the Allobroges. From the territory of the Allobroges he crossed the Rhone into the country of the Segusiani: "Hi sunt extra Provinciam trans Rhodanum primi." (B. G.i.10.) He therefore places them in the angle between the Rhone and the Siwne, for he was following the Helvetii, who had not yet crossed the Saine. In another place (vii. 64) Lespeaks of the Aedui and Segusiani as bordering on the Provincia, and the Segusiani were dependents of the Aedui (vii. 75). Strabo (iv. p. 186) places the

Segasiani between the Rhodanus and the Dubis (Doubs), on which D'Anville remarks that he ought to have placed them between the Rhone and the Loire. But part of the Segusiani at least were west of the Rhone in Caesar's time, as he plainly tells us, and therefure some of them were between the Rhone and the Doubs, though this is a very inaccurate way of fixing their position, for the Doubs ran through the territory of the Sequani. Lugdunum was in the country of the Segusiani. [Lugdunum.] Pliny gives to the Segusiani the name of Liberi (iv. 18).

In Cicero's oration Pro P. Quintio (c. 25), a Gallic people named Sebaguinos, Sebaginnos, with several other variations, is mentioned. The reading "Sebusianos" is a correction of Lambinus. Baiter (Orelli's Cicero, 2nd ed.) has written "Segusiavos" in this passage of Cicero on his own anthority; but there is no name Segusiavi in Gallia. It is probable that the true reading is "Segusianos." Ptolemy (ii. 8. § 14) names Kodumna (Roanne) and Forum Segusianorum as the towns of the Segusiani, which shows that the Segusiani in his time extended to the Loire [Roduman]; and the greater part of their territory was probably west of the Rhone and Saône. Mionnet, quoted by Ukert (Gallien, p. 320), has a medal which he supposes to belong to the Segusiani.
[G. L.]
SEGU'SIO (Eeqovícon : Eth. Zeqourtands, Segusinus : Susa), a city of Gallia Trauspadana, situated at the foot of the Cottian Alps, in the valley of the Duria (Dora Riparia), at the distance of 35 miles from Augusta Taurinorum (Turin). It was the capital of the Gaulish king or chieftain Cottius, from whom the Alpes Cottiae derived their name, and who became, in the reign of Angustus, a tributary or dependent ally of the Roman Empire. Hence, when the other Alpine tribes were reduced to subjection by Augustus, Cottius retained the government of his territories, with the title of Praefectus, and was able to transmit them to his son, M. Julius Cottius, upon whom the emperor Claudius even conferred the title of king. It was not till after the death of the younger Cottius, in the reign of Nero, that this district was incorporated into the Roman Empire, and Segusio became a Roman municipal towu. (Strab. iv. pp. 179, 204; Plin. iii. 20. s. 24 ; Amm. Marc. xv. 10.)

It was probably from an early period the chief town in this part of the Alps and the capital of the surrounding district. It is situated just at the junction of the route leading from the Mont Genère duwn the valley of the Dora with that which crosses the Mont Cenis; both these passages were among the natural passes of the Alpo, and were doubtless in use from a very early period, though the latter seems to bave been unaccountably neglected by the Romans. The road also that was in most frequent use in the latter ages of the Republic and the early days of the Empire to arrive at the pass of the Cuttian Alps or Mont Gexerve, was not that by Segusio up the valley of the Duria, but one which ascended the ralley of Fexestrelles to Octlum (Uxeau), and from thence crossed the Col de Sestrieres to Scingomagus (at or near Cesanne), at the foot of the actual pass of the Genevre. This was the route taken by Caesar in B. c. 58, and appears to have still been the one most usual in the days of Strabo (Caes. B. G. i. 10; Strab. iv. p. 179); but at a later piriod the road by Segusio seems to have come into general use, and is that given in the Itineraries. (Itin. Ant. pp. 341,

357．）Of Segusio as a municipal town we hear little ；but it is mentioned as such both by Pliny and Ptolemy，and its continued existence is proved by inscriptions as well as the Itineraries；and we learn that it continued to be a considerable town，and a military post of importance，as commanding the passes of the Alps，until long after the fall of the Western Empire．（Plin．iii．17．s．21；Ptol．iii． 1. §40；Gruter，Inscr．p．111．1；Orell．Inecr．1690， 3803 ；Amm．Marc．xv．10；Itin．Hier．p． 556 ； P．Disc．Hist．Lang．iii．8；Greg．Tur．iv．39．）

Ammianus tells us that the tomb of Cottius was still visible at Segusio in his time，and was the object of much honour and veneration among the inhabitants （Ainm．Le．）．A triumphal arch erected by him in honour of Augustus is still extant at Susa；it enn－ merates the names of the＂Civitates＂which were subject to his rule，and which were fourteen in num－ ber，though Pliny speaks of the＂Cottianae civitates xii．＂（Plin．iii．20．s．24；Orell．Inscr．626．）All these are，however，mere obscure mountain tribes， and the names of most of them entirely unknown． His dominions extended，according to Strabo，across the mountains as far as Ebrodunam in the land of the Caturiges（Strab．iv．p．179）；and this is con－ firmed by the inscription which enamerates the Ca－ tariges and Medulli among the tribes subject to his authority．These are probably the two omitted by Pliny．Ocelum，in the valley of the Clusone，was comprised in the territory of Cottius，while its limit towards the Taurini was marked by the station Ad Fines，placed by the Itineraries on the road to Au－ gusta Taurinorum．But the distances given in the Itineraries are incorrect，and at variance with one another．Ad Fines may probably be placed at or near Avigliana， 15 miles from Turin，and 20 from Susa． The mountain tribes called by Pliny the＂Cottianae civitates，＂when anited with the Roman government， at first received only the Latin franchise（Plin．L．c．）； but as Segusio became a Roman municipium，it must have received the full franchise．
［E．H．B．］
SEGUSTERO，a name which occurs in the Anto－ nine Itin．and in the Table，is a town of Gallia Nar－ bonensis，and the name is preserved in Sisteron，the chief town of an arrondissement in the department of Basses Alpes，on the right bank of the Durance． Roman remains have been found at Sisteron．The name in the Notit．Prov．Galliae is Civitas Segeste－ riorum．It was afterwards called Segesterium，and Sistericum，whence the modern name comes．（D＇An－ ville，Notice，（foc．）
［G．L．］
SEIR，M．（ $\sum \eta \in l \rho, ~ L X X . ~ \Sigma ́ d e \iota p a, ~ \sum \dot{\eta} \in i p o v$, Joseph）．＂The land of Seir＂is equivalent to＂the country of Edom．＂（Gen．xxxii．3．）Mount Seir was the dwelling of Esau and his posterity（xxxvi．8，9； Deut．ii．4，5），in the possession of which they were not to be disturbed．（Josh．xxiv．4．）Its general situ－ ation is defined in Deuteromomy（i．2）between Horeb and Kadesh Barnea．The district must have been extensive，for in their retrograde movement from Kadesh，which was in Seir（i．44），the Israel－ ites compassed Mount Seir many days（ii．1，3）．The original inhabitants of Mount deir were the Horims； ＂but the children of Esau succeeded them，when they had destroyed them from beforo them，and dwelt in their stead＂（ii．12， 22 ；comp．Gen． xiv．6）．It obviously derived its name from＂Seir the Horite＂（xxavi．20，21），and nut，as Jusephus erroneously supposes，from the Hebrew רישy $=$ hir－ sutus．（Ant．i．20．§ 3．）The range bordering Wady Araba is marked $\mathbf{~ K}$ ．Shehr in some modern maps，

## SELEUCEIA．

but without sufficient authority for the name．Dr． Wilson confines the name to the eastern side of the Araba，from a little north of Petra to the Gulf of Akabah，which range he names Jebel－esh－Sherak （Lands of the Bible，vol．i．pp．289，290，337，340）； but since Kadesh was in Seir，it is obvious that this name must have extended much more widely，and on both sides the Araba．Mr．Rowlands heard the name $E_{s}$－Serr given to an elevated plain to the east of Kadesh，which must，he thinks，be the Seir alluded to in Deut．i．44，where the Iaraelites were chased before the Amalekites．（Williams＇s Holy City，vol．i． appendix，p．465．）
［G．W．］
SEIRAE．［Psophis．］
SELACHUSA，an isladd lying off the Argolic promontory of Speiraeum，mentioned only by Pliny （iv．12．s．57）．

SELAH．［Petra．］
SELAMBINA（ $\sum \eta \lambda d \mu \delta i \nu a$, Ptol．ii．4．§ 7），a town on the coast of Hispania Baetica between Sex and Abdera．（Plin．iii．1．s．3．）Florez（Esp．Sagr． xii．pp．3，6）identifies it with Calabreña，but，ac－ cording to Ukert（ii．p．i．p．351），it is to be sought in the neighbourhood of Sorbitan．
［T．H．D．］
SELAS．［Messenia，p．342，b．］
SElasia．［Sellasia．］
SELEMNUS．［Achaia，p．13，b．No．10．］
SELENTIS or SELENITIS（Ze入evTls or Ze入eVI－ fis）a district in the south－west part of Cilicia，ex－ tending along the coast，but also some distance in the interior；it derived its name from the town of Selinus．（Ptol．v．8．§§ 2，5．）
［L．S．］

two lakes formed by the sea，north of the mouth of the Caystrus，and not far from the teinple of the Ephesian Artemis．These two lakes，which communicated with each other，were extremely rich in fish，and formed part of the revenue of the temple of Artemis， though they were on several occasions wrestod from it． （Strab．xiv．p． 642 ；Plin．v．31．）The name of the lakes，derived from Selene，the moon－goddess，or Arte－ mis，probably arose from their connection with the great goddess of Ephesus．（Comp．Chandler＇s Travels in Asia Minor，vol．i．p．162．）［L．S．］
SELEUCELA or SELEUCIA，two towns in Syria． 1．Ad Belum（Ze入eúkeia $\pi$ jpòs Bグ入q），sometimes called Seleucobelus，situated in the district of Cassiotis，placed by Ptolemy in long． $69^{\circ} 30^{\prime}$ ，lat． $34^{\circ}$ 45＇．The Belus was a tributary of the Orontes， running into it from the W．，and since，as Pococke re－ marks，Seleucia was exactly in the same latitude as Paltos，it must hare been due E．of it．Now Boldo．the ancient Paltos，lies two hours S．of Jebilee，ancient Gahala，on the coast．Seleucia ad Beluin must be looked for $1^{\circ} 10$ to the E．，according to Ptoleny＇s reckoning，who places Paltos in long． $63^{\circ}$ 20＇，lat． $34^{\circ} 45^{\prime}$ ．Mudern conjecture has identified it with Shoyh and Divertigi，which is placed 30 miles E． of Antioch．（Ptol．v．15．§ 16 ；Pococke，Syria． vol．ii．p．199．）Pliny mentions it with another not elsewhere recognised，in the interior of Syris：＂Se－ leucias praeter jain dictam（i．e．Pieria），duas，quae ad Euphratem，et quae ad Belum vocantur＂（v． 23. § 19）．

2．Pieria（Zie入eúnela IItepia：Eth．Ze入eukeús）， a maritime city of Syria，placed by Ptolemy in long． $68^{\circ} 36^{\prime}$ ，lat． $35^{\circ} 26^{\prime}$ ，between Rhossus and the mouths of the Orontes．Its ancient name，according to Strabo，was＂Rivers of Water＂（＂Tסatos тотa－ $\mu 0$ ），a strong city，called Free by Pompey（Strab．xvi． 2．§ 8）．Its position is fully described by Polybius．

It was situated on the sea between Cilicia and Phoenice, over against a large mountain called Coryphaeum, the base of which was washed on its W. side by the sea, towards the E. it dominated the districts of Antioch and Seleucis. Seleucia lay on the $S$. of this mountain, separated from it by a deep and rugged valley. The city extended to the sea through broken ground, but was surrounded for the most part by precipitons and abrupt rocks. On the vide towards the sea lay the factory ( $\tau d<\mu \pi 0 \rho \in i a$ ) and suburb, on the level ground, strongly fortified. The whole hollow (kitos) of the city was likewise strongly furtified with fine walls, and temples, and buildings. It had one approach on the sea side, by an artificial road in steps ( $\kappa \lambda, \mu a \kappa \infty т \neq \nu)$, distributed into frequent and continuous slopes (cuttings? -iरк入ípagt) and carves (tunnels?-бкаı $\omega \mu a \sigma$ ). The embouchure of the Orontes was not far distant- $\mathbf{4 0}$ stadia, according to Strabo (xvi. p. 750). It was built by Seleucus Nicator (died B. C. 280), and was of great importance, in a military view, during the wars between the Seleucidae and the Ptolemies. It was taken by Ptoleng Euergetes on his expedition into Syria, and held by an Egyptian garrison until the time of Antiochus the Great, who, at the instigation of Apollophanes, a Seleucian, resolved to recover it from Ptciemy Philopator (cir. B. c. 220), in order to remove the disgrace of an Egyptian garrison in the heart of Syria, and to obviate the danger which it threatened to his operations in Coele-Syria, being, as it was, a principal city, and well nigh, so to speak, the proper bome of the Syrian power. Having sent the fleet myainst it, under the admiral Diognetus, he himself marched with his army from Apameia, and encamped near the Hippodrome, 5 stadia from the city. Having in vain attempted to win it by bribery, he divided his forces into three parts, of which one under Zeuxis made the assault near the gate of Antioch, a second under Hermogenes near the temple of the Limenri, the third under Ardys and Diognetus by the arsenal and suburb, which was first carried, whereupon the garrison capitulated (Yolyb. v. 58-60). It was afterwards a place of arms in the further prosecution of the war against Ptolemy (66). The Mount Coryphaeum of Polybius is the Pieria of Ptolemy and Strabo, from which the town derived its distinguishing appellation. Strabo mentions, from Posidonius, that a kind of asphaltic soil was quarried in this place, which, when spread over the roots of the vine, acted as a preservative against blight (vii. p. 316.) He calls it the first city of the Syrians, from Cilicia, and states its distance from Soli, in a straight course, a little less than 1000 stadia (xiv. p. 676). It was one of the four cities of the Tetrapolis, which was a synonym for the district of Seleucis, the others being Antioch, Apameia, and Landiceia, which were called sister cities, being all founded by Seleucus Nicator, and called by the names respectively of himself, his father, his wife, and his mother-in-law; that bearing his father's name being the largest, that bearing his own, the strongest. (Strab. ari. p. 749.) The auguries attendilig its foundation are mentioned by John Malalas (Chronographia, lib. viii. p. 254). It became the port of Antioch, and there it was that St. Paul and Barnabas embarked for Cyprus, on their first mission to Asia Minor (Acts, xiii. 4), the Orontes never having been navigable even as far as Antioch for any but vessels of light draught. Pliny calls it "Seleucia libera Pieria," and describes it as situated on a promontory (v. 21) cixxv. M. P. distant from Zeugma on the Euphrates (12). He de.
signates the Coryphaeum of Polybius, the Pieria of Strabo, Mount Crsius, a naine also extended by Strabo to the mountains about Seleucia, where he speaks of the Antiocheans celebrating a feast to Triptolemus as a demigod, in Mount Cassius around Seleucia (xvi. p. 750). The ruins of the site have been fully explored and described in modern times, first by Pococke (Observations on Syria, chap. xxii. p. 182, \&c.), who identified many points noticed by Polybius, and subsequently by Col. Chesney (Journal of the R. Geog. Sociely, vol. viii. p. 228, \&c.). The mountain range noticed by Polybius is now called Jebel Musa; and the bill on which the city stood appears to be the "low mountain, called Bin-Kiliseh," or the 1000 churches. Part of the site of the town was occupied, according to Pococke, by the village of Kepse, situated about a mile from the sea. The masonry of the once magnificent port of Seleucia is still in so good a state that it merely requires trifling repairs in some places, and to be cleaned out; a project contemplated, but not executed, by one Ali Pasha, when governor of Aleppo. The plan of the port, with its walls and basins, its piers, floodgates, and defences, can be distinctly traced. The walls of the suburb, with its agora, the double line of defence of the inner city, comprehending in their circumference about 4 miles, which is filled with ruins of houses ; its castellated citadel on the summit of the hill, the gate of Antioch on the SE. of the site, with its pilasters and towers, near which is a double row of marble columns; large remains of two temples, one of which was of the Corinthian order; the amphitheatre, near which Antiochus encamped, before his assault apon the city, with twenty-four tiers of benches still to be traced; the numerous rocky excavations of the necropolis, with the sarcophagi, always of good workmanship, now broken and scattered about in all directions, all attest the ancient importance of the city, and the fidelity of the bistorian who has described it. Most remarkable of all in this view is the important engineering work, to which Pulybius alludes as the only communication between the city and sea, fully described by Cul. Chesney, as the most striking of the interesting remains of Seleucia. It is a very extensive excavation, cut through the solid rock from the NE. extremity of the town almost to the sea, part of which is a deep hollow way, and the remainder regular tunnels, between 20 and 30 feet wide, and as many high, executed with great skill and considerable labour. From its eastern to its western extremity is a total length of 1088 yards, the greater part of which is traversed by an aqueduct carried along the face of the rock, considerably above the level of the road. Its termination is rough and very imperfect, abont 30 feet above the level of the sea; and while the bottom of the rest of the excavation is tolerably regular, in this portion it is impeded by large masses of rock lying across it at intervals: which would imply either that it was never completed, or that it was finished in this part with inasonry, which may liave been carried off for building purposes. It is, perhaps, in this part that the stairs mentioned by Polybius may have been situated, in order to form a communication with the sea. There can be no doubt whatever that this excavation is the passage mentioned by him as the sole communication between the city and the sea; and it is strange that any question should have arisen concerning its design. A rough plan of the site is given by Pocucke (p. 183); but a much more
carefully axecuted plan, with drawings and sections of the tunnels, \&c., has lately been published by Captain Allen, who surveyed the site of the harbour, but not of the town, in 1850. (The Dead Sea, gic., Map at end of vol. i., and vol. ii. pp. 208-230.) [G. W.]

COIN OF SELEUCELA IN SYRIA.
SELEUCEIA or SELEUCIA ( $\Sigma \in \lambda \epsilon u ́ \kappa \epsilon \iota a)$. A town near the northern frontier of Pisidia, surnamed Sidera ( $\grave{\eta}$ さı $\grave{\delta} \eta \rho \bar{a}$, Ptol. v. $5 . \S 4$; Hierocl. p. 673), probabiy on account of iron-works in its vicinity. There are some coins of this place with the image of the Asiatic divinity Men, who was worshipped at Antioch, and bearing the inscription Kגavסiofe入euxfoov, which might lead to the idea that the place was restored by the emperor Claudius. (Sestini, Mon. Vet. p. 96.) Its site is now occupied by the town of Ejerdir.
2. A town in Pamphylia between Side and the mouth of the river Earymedon, at a distance of 80 stadia from Side, and at some distance from the sea. (Stadiasm. Mar. Mag. § 216.)
3. An important town of Cilicia, in a fertile plain on the western bank of the Calycadnus, a few miles above its mouth, was founded by Seleucus I., surnamed Nicator. A town or towns, however, had previously existed on the spot under the names of Olbia and Hyria, and Seleucus seems to have only extended and united them in one town under the name Seleucia. The inhabitants of the neighbouring Holmi were at the same time transferred to the new town, which was well built, and in a style very different from that of other Cilician and Pamphylian cities. (Steph. B. s. v.; Strab. xiv. p. 670.) In situation, climate, and the richness of its productions, it rivalled the neighboaring Tarsus, and it was much frequented on account of the annual celebration of the Olympia. and on account of the oracle of Apollo. (Zosim. i. 57; Basil. Vita S. Theclae, i. p. 275, Orat. xxvii. p. 148.) Pliny (v. 27) states that it was sarnamed Tracheotis; and some ecclesiastical historians, speaking of a council held there, call the town simply Trachea (Sozom. iv. 16; Socrat. ii. 39 ; comp. Ptol. v. 8. § 5; Amm. Marc. xiv. 25; Oros. vii. 12.) The town still exists ander the name of Selefkieh, and its ancient remains are scattered over a large extent of ground on the west side of the Calycadnus. The chief remains are those of a theatre, in the front of which there are considerable ruins, with porticoes and other large buildings: farther on are the ruins of a temple, which had been converted into a Christian chorch, and several large Corinthian columns. Ancient Seleaceia, which appears to have remained a free city ever since the time of Augustux, remained in the same condition even after a great portion of Cilicia was given to Archelans of Cappadocia, whence both imperial and autocomous coins of the place are found. Selenceia was the birthplace of several men of eminence, such as the peripatetics Athemans and Xenarchns, who flourished in the
raign of Augnstus, and the sophist Alexander, who taught at Antioch, and was private secretary to the emperor M. Aurelius (Philostr. Vit. Soph. ii. 5.) According to some authorities, lastly, the emperor Trajan died at Selenceia (Eutrop. viii. 2, 16; Oros. l. c.), though others state that he died at Selinus.

COLN OF SELEUCEIA IN CILICLA.
4. Seleucia in Caria [Tralles.] [L. S.]
SELEUCEIA or SELEUCIA ( $\sum \in \lambda \epsilon$ éreıa, Polyb. v. 48 ; Strab. xi. p. 521 ; Ptol. v. 18. § 8), a large city near the right bank of the Tigris, which, to distinguish it from several other towns of the same name, is generally known in history by the titue of
 Appian, Syr. 57.) It was built by Seleacus Nicator (Strab. l. c.; Plin. vi. 26. s. 30; Tacit. Ann. vi. 42; Joseph. Ant. Jud. xviii. 9. §8; Amm. Marc. cxiii. 20), and appears to have been placed near the junction with the Tigris, of the great dyke which was carried across Mesopotamia from the Euphrates to the Tigris, and which bore the name of Nahar Malcha (the royal river). (Plin. L.c., and Isid. Char. p. 5.) Ptolemy states that the artificial river divided it into two parts (r. 18. §8). On the other hand, Theophylact states that both rivers, the Tigris and Euphrates, surrounded it like a rampart -by the latter, in all probability, meaning the Nahar Malcha (v.6). It was situated about 40 miles NE. of Babylon (according to Strabo, 300 stadia, and to the Tab. Peutinger., 44 M.P.). In form, its original structure is said to have resembled an eaglo with its wings outspread. (Plin. L c.) It was mainly constructed of materials brought from Babylon, and was one principal cause of the ruin of the elder city, as Ctesiphon was (some centuries later) of Seleuceia itself. (Strab. xvi. p. 738.) It was placed in a district of great fertility, and is said, in its best days, to have had a population of 600,000 persons. (Plin. L.c.) Strabo adds, that it was even larger than Antiocheia Syriae, -at his time probably the greatest commercial entrepôt in the Esst, with the exception of Alezandreia (xvi. p. 750). Even so late as the period of its destruction its population is atill stated to have amounted to half a million. (Eutrop. v. 8; comp. Oros. viii. 5.) To its commercial importance it doubtless owed the free character of its local government, which appears to have been administered by means of a senate of 300 citizens. Polybins states that, on the overthrow of Molon, the Median rebels Antiochus and Hermeias descended on Seleuceia, which had been previously taken by Molon, and, after punishing the people by torture and the infliction of a heary fine, exiled the local magistracy, who were called Adeiganse. ('Abectodua, Polyb. v. 54.) Their love of freedom and of independent government was, however, of longer duration. (Plin. l. c.; Tacit. Ann. vi. 42.)

Seleuceia owed its ruin to the wars of the Romans with the Parthians and other eastern nations. It is first noticed in that between Crussus and Orodes (Dion Cass. xl. 20); but it would seem
that Crassus did not himself reach Seleaceia. On the adrance of Trajan from Asia Minor, Selenceia was taken by Erucius Ciarus and Julins Alexander, and partially burnt to the ground (Dion Cass. Ixviii. 30); and a few years later it was still more com. pletely destroyed by Cassius, the general of Lacius Verus, daring the war with Vologeses. (Dion Cass. lxxi. 2; Eutrop. v. 8; Capitol. Verus, c. 8.) When Severas, during the Parthian War, descended the Euphrates, he appears to have found Seleuceia and Babylon equally abandoned and desolate. (Dion Cass Ixxv. 9.) Still later, in his expedition to the East, Julian found the whole country round Selenceia one vast marsh full of wild game, which his soldiers hunted. (Amm. Marc. xxiv. 5.) It would seem from the indistinct notices of some authors, that Selenceia once bore the name of Coche. [Coche.]
[V.]
SELEUCIS (Eeneukis), a district of Syria, mentioned by Ptolemy, as containing the cities of Gephura, Gindarus, and Imma (r. 15. § 15). Strabo calls it the best of all the districts: it was also called Tetrapolis, on account of its four most important cities, for it had many. These four were, Antioch, Seleuceia in Pieria, Apameia, and Laodiceia (xvi. p. 749). It also comprehended, according to Strabo, four satrapies ; and it is clear that he uses the name in a much wider sense than Ptolemy, who places the four cities of the tetrapolis of Strabo's Selencis in so mans separate districts ; Antioch in Cassiotis, Apameia in Apamene, Laodiceia in Laodicene, while he only implies, but does not state, that Selenceia lies in Seleacis.
[G. W.]
 city in Pisidia, on the southern slope of Mount Taurus, at the part where the river Earymedon forces its way through the mountains towards the south. The town was believed to be a Greek colony, for Strabo (xii. p. 520) states that it was founded by Lacedaemonians, but adds the somewhat unintelligible remark that previously it had been founded by Calchas (Comp. Pulyb. v. 76; Steph. B. e. v.; Dion. Per. 858). The acropolis of Selge bore the name of Cesbedium (Keatédiov; Polyb. l. c.) The district in which the town was situated was extremely fertile, producing abundance of oil and wine, bat the town itself was difficult of access, being surrounded by precipices and beds of torrents flowing towards the Eurymedon and Cestrus, and requiring bridges to make them passable. In consequence of its excellent laws and political constitution, Selge rose to the rank of the most powerful and populous city of Pisidia, and at one time was able to send an army of 20,000 men into the field. Owing to these circumstances, and the valour of its inhabitants, for which they were regarded as worthy kinsmen of the Lacedremonians, the Selgians were never subject to any foreign power, but remained in the enjoyment of their own freedom and independence. When Alexander the Great passed through Pisidia, the Selgians sent an embassy to him and gained his favour and friendship. (Arrian, Anab. i. 28.) At that time they were at war with the Telmissians. At the period when Achaens had made himself master of Western Asia, the Selgians were at war with Pednelissus, which was besieged by them; and Achacus, on the invitation of Pednelissus, sent a large force against Selge. After a long and vigorons siege, the Selgiane, being betrayed and despairing of resisting Achaseus any longer, sent deputics to sue for peaco, which wis granted to them on the fol.
lowing terms: they agreed to pay immediately 400 talents, to restore the prisoners of Pednelissus, and after a time to pay 300 talents in addition. (Polyb. v. 72-77.) We now have for a long time no particulars about the history of Selge : in the fifth centary of our era Zosimus (v. 15) calls it indeed a little town, but it was still strong enough to repel a body of Goths. It is strange that Pliny does not notice Selge, for we know from its coins that it was still a flourishing town in the time of Hadrian; and it is also mentioned in Ptolemy (v. 5. § 8) and Hierocles (p.681). Independently of wine and oil, the country about Selge was rich in timber, and a variety of trees, among which the storax was much ralued from its yielding a strong perfume. Selge was also colebrated for an ointment prepared from the iris root. (Strab. L c.; Plin. xii. 55, $\mathbf{x x i}$. 19; comp. Liv. xxxv. 13.) Sir C. Fellows (Asia Minor, p. 171, foll.) thinks that he has discovered the ruins of Selge about 10 miles to the north-east of the village of Boojak. They are seen on a lofty promontory " now presenting magnificent wrecks of grandeur." "I rode," says Sir Charles, "at least 3 miles through a part of the city, which was one pile of temples, theatres, and buildings, vying with each other in splendour. . . . . The material of these ruins had suffered mach from the exposure to the elements, being grey with a lichen which has eaten into the marbie, and entirely destroyed the surface and inscriptions; but the scale, the simple grandeur, and the uniform beauty of style bespoke its date to be the early Greek. The sculptured cornices frequently contain groups of figures fighting, wearing belmets and body-armour, with shields and long spears; from the ill-proportioned figures and general appearance, they must rank in date with the Aegina marbles. The ruins are so thickly strewn, that little cultivation is practicable; but in the areas of theatres, cellas of temples, and any space where a plough can be used, the wheat is springing ap. The general style of the temples is Corinthian, but not so florid as in less ancient towns. The tombs are scattered for a mile from the town, and are of many kinds, some cut in chambers in face of the rock, others sarcophagi of the heaviest form: they have had inscriptions, and the ornaments are almost all martial; several seats remain among the tombs. I can scarcely guess the number of temples or columned buildings in the town, but I certainly traced fifty or sixty.... Although apparently unnecessary for defence, the town has had strong walls, partly built with large stones in the Cyclopean mode. . . I never conceived so high an idea of the works of the ancients as from my visit to this place, standing as it does in a situation, as it were, above the world." It is to be regretted that it was impossible by means of inscriptions or coins to identify this place with the ancient Selge more satisfactorily. (Comp. Von Hammer, in the Wiener Jahrbicher, vol. cvi. p. 92.)
[L. S.]

CODS OF ExLar

SELGOVAE ( $\Sigma_{i} \lambda$ yooūat, Ptol. ii. 3. § 8), a people on the SW. coast of Britannia Barbara, in the E. part of Galloway and in Dumfries-shire. Camden (p. 1194) derives the name of Solway from them.
[T. H. D.]
SELI'NUS (Ee入avous) 1. A village in the north of Laconia, described by Pausanias as 20 stadis from Geronthrae; but as Pausanias seems not to have visited this part of Laconia, the distances may not be correct. Leake, therefore, places Selinus at the village of Kosmas, which lies further north of Geronthrae than 20 stadia, but where there are remains of ancient tombs. (Paus. iii. 22. § 8 ; Leake, Peloponnesiaca, p. 363 ; Boblaye, Recherches, gc. p. 97; Curtius, Peloponnesos, vol. ii. p. 304.)
2. A river in the Triphylian Elis, near Scillus. [Scillus.]
3. A river in Achaia. [Achala, p. 13, b. No. 6.]

SELI'NUS ( $\Sigma \in \lambda ı \nu o u ̂ s: ~ E t h . ~ \Sigma i e \lambda ı v o u ́ v t i o s, ~ S e l i-~$ nuntius: Ru. at Torre dei Pulci), one of the most inportant of the Greek colonies in Sicily, situated on the SW. coast of that island, at the mouth of the small river of the same name, and 4 miles W. of that of the Hypsas (Belici). It was founded, as we learn from Thucydides, by a colony from the Sicilian city of Megara, or Megara Hyblaea, under the conduct of a leader named Pammilus, about 100 years after the settlement of that city, with the addition of a fresh body of colonists from the parent city of Megara in Greece. (Thuc. vi. 4, vii. 57 ; Scymn. Ch. 292; Strab. vi. p. 272.) The date of its foundation cannot be precisely fixed, as Thucydides indicates it only by reference to that of the Sicilian Megara, which is itself not accurately known, but it may be placed about в. c. 628. Diodorus indeed would place it 22 years earlier, or B. c. 650 , and Hieronymus still further back, B. c. 654; but the date given by Thucydides, which is probably entitled to the most confidence, is ircompatible with this earlier epoch. (Thuc. vi. 4; Diod. xiii. 59; Hieron. Chron. ad ann. 1362 ; Clinton, Fast. Hell. vol. i. p. 208.) The name is supposed to have been derived from the quantities of wild parsley ( $\sigma \in \lambda \iota \nu \delta s$ ) which grew on the spot; and for the same reason a leaf of this parsley was adopted as the symbol of their coins.

Selinus was the most westerly of the Greek colonies in Sicily, and for this reason was carly brought into contact and collision with the Carthaginians and the barbarians in the W . and NW. of the island. The former people, however, do not at first seem to have offered any obstacle to their progress; but as early as b.c. 580 we find the Selinuntines engaged in hostilities with the people of Segesta (a non-Hellenic city), whose territory bordered on their own. (Diod. v. 9). The arrival of a body of emigrants from Rhodes and Cnidus who subsequently founded Lipara, and who lent their assistance to the Segestans, for a time secured the victory to that people; but disputes and hostilities seem to have been of frequent occurrence between the two cities, aud it is probable that in B. c. 454, when Diodorus speaks of the Segestans as being at war with the Lilybaeans (xi. 86), that the Selinuntines are the people really meant. [Lilybaeum.] The river Mazarus, which at that time appears to have formed the buundary between the two states, was only about 15 miles W. of Selinus; and it is certain that at a somewhat later period the territory of Selinas exteaded to its banks, and that that city had a fort
and emporium at its mouth. (Diod. xiii. 54.) On the other side its territory certainly extended as far as the Halycus or Salso, at the nouth of which it had founded the colony of Minoa, or Heracleia, as it was afterwards termed. (Herod. v. 46.) It is evident, therefore, that Selinus had early attained to great power and prosperity; but we have very little information as to its history, We learn, however, that, like most of the Sicilian cities, it had passed from an oligarchy to a despotism, and about b. C. 510 was subject to a despot named Peithagoras, from whom the citizens were freed by the assistance of the Spartan Euryleon, one of the companions of Dorieus: and thereupon Euryleon himself, for a short time, seized on the vacant sovereignty, but was speedily overthrown and pat to death by the Selinuntines. (Herod. v. 46.) We are ignorant of the causes which led the Selinuntines to abandon the cause of the other Greeks, and take part with the Carthaginians during the great expedition of $\mathrm{Ha}-$ milcar, в. c. 480; but we learn that they had even promised to send a contingent to the Carthaginian army, which, however did not arrive till after its defeat. (Diod. xi. 21, xiii. 55.) The Selinuntines are next mentioned in B. c. 466, as co-operating with the other free cities of Sicily in assisting the Syracusans to expel Thrasybulus (Id. xi. 68) ; and there is every reason to suppose that they fully shared in the prosperity of the half century that followed, a period of tranquillity and opulence for most of the Greek cities in Sicily. Thucydides speaks of Selinus just before the Athenian expedition as a powerful and wealthy city, possessing great resources for war both by land and sea, and having large stores of wealth accumulated in its temples. (Thuc. vi. 20.) Diodorus also represents it at the time of the Carthaginian invasion, as having enjoyed a long period of tranquillity, and possessing a numerous population. (Diod. xiii. 55.)

In в. c. 416, a renewal of the old disputes between Selinus and Segesta became the occasion of the great Athenian expedition to Sicily. The Seli. nuntines were the first to call in the powerful aid of Syracuse, and thus for a time obtained the complete advantage over their enemies, whom they were able to blockade both by sea and land; but in this extremity the Segestans had recourse to the assistance of Athens. (Thuc. vi. 6; Diod. xii. 82.) Though the Athenians do not appear to have taken any measures for the immediate relief of Segesta, it is probable that the Selinuntines and Syracusans withdrew their forces at once, as we hear no more of their operations against Segesta. Nor does Selinas bear any important part in the war of which it was the iminediate occasion. Nicias indeed proposed, when the expedition first arrived in Sicily (b. c. 415), that they should proceed at once to Selinus and compel that city to submit on molerate terms (Thuc. vi. 47); but this advice being overruled, the efforts of the armament were directed against Syracuse, and the Selinuntines in consequance bore but a secundary part in the subsequent operations. They are, however, mentioned on several occasions as furnishing auxiliaries to the Syracusans; and it was at Selinus that the large Peloponnesian force sent te the support of Gylippus landed in the spring of 413 , having been driven over to the coast of Africa by a tempest. (Thuc. vii. 50, 58 ; Diod. xiii. 12.)

The defeat of the Athenian armament left the Segestans apparently at the mercy of their rivals; they in vain attempted to dissum the hostility of the

Selinuntines by ceding without further contest the frontier district which had been the original subject of dispute. But the Selinuntines were not satisfied with this concession, and continued to press them with fresh aggressions, for protection against which they sought assistance from Carthage. This was, after some hesitation, accorded them, and a small force sent over at once, with the ansistance of which the Segestans were able to defeat the Selinuntines in a battle. (Diod. xiii. 43, 44.) But not content with this, the Carthaginians in the following spring (в. с. 409) sent over a vast army amounting, according to the lowest estimate, to 100,000 men, with which Hanniba! (the grandson of Hamilcar that was killed at Himera) landed at Lilybaeum, and from thence marched direct to Selinus. The Selinuntines were wholly unprepared to resist such a force: so little indeed had they expected it that the fortifications of their city were in many places oat of repair, and the auxiliary force which had been pmomised by Syracuse as well as by Agrigentum and Gela, was not yet ready, and did not arrive in time. The Selinuntines, indeed, defended themselves with the courage of despair, and even after the walls were carried, continued the contest from bouse to house; but the overwhelming numbers of the enemy rendered all resistance hopeless; and after a siege of only ten days the city was taken, and the greater part of the defenders put to the sword. Of the citizens of Selinus we are told that 16,000 were slain, 5000 made prisoners, and 2600 under the command of Empedion escaped to Agrigentuin. (Diod. xiii. 54-59.) Shortly after Hannibal destroyed the walls of the city, but gave permission to the surviving inhabitants to return and occapy it, as tributaries of Carthage, an arrangement which was confirmed by the treaty subsequently concluded between Dionysius and the Carthaginians, in B. c. 405. (Id. xiii. 59, 114.) In the interval a considerable number of the survivors and fugitives had been brought together by Hermocrates, and established within its wulls. (Ib. 63.)

There can be no doubt that a considerable part of the citizens of Selinus availed themselves of this permission, and that the city continued to subsist under the Carthaginian dominion; but a fatal blow had been given to its prosperity, which it undoubtedly never recovered. The Selinuntines are again mentioned in b. c. 397 as declaring in favour of Dionysius during his war with Carthage (Diod. xiv. 47 ); but buth the city and territory were again given up to the Carthaginians by the peace of 383 (1d. xv. 17); and though Dionysius recovered posisession of it by arms shortly before his death (1d. xv. 73), it is probable that it soon again lapsed under the dominion of Carthage. The Halycus, which was established as the eastern boundary of the Carthaginian dominion in Sicily by the treaty of 383 , seems to have generally continued to be so recognised, notwithstanding temporary interruptions; and was again fixed as their limit by the treaty with Agathocles in B. c. 314. (Id. xix. 71.) This last treaty expressly stipulated that Selinus, as well as Heracleia and Himera, should continue subject to Carthage, as before. In B. c. 276, however, during the expedition of Pyrrhus to Sicily, the Selinuntines voluntarily sobmitted to that monarch, after the capture of Heracleia. (Id. xxii. 10. Exc. H. p. 498.) During the First Punic Wur we again find Selinus subject to Carthage, and
its territory was repeatedly the theatre of military operations between the contending powers. (ld. xxiii. 1, 21 ; Pol. i. 39.) But before the close of the war (about b. c. 250), when the Carthaginians were beginning to contract their operations, and confine themselves to the defence of as few points as possible, they removed all the inhabitants of Selinus to Lilybaeum and destroyed the city. (Diod. xxiv. 1. Exc. H. p. 506.)

It seems certain that it was never rebuilt. Pliny indeed, mentions its name ("Sdinus nppidum," iii. 8. s. 14), as if it was still exinting as a town in his time. but Strabo distinctly classes it with the cities which were wholly extinct; and Ptolemy, though he mentions the river Selinns, has no notice of a town of the name. (Strab. vi. p. 272; Ptol. iii. 4. § 5.) The Thermae Selinuntiaf, which derived their name from the ancient city, and seen to have been much frequented in the time of the Romans, were situated at a considerable distance from Selinus, being undoubtedly the same as those now existing at Sciacca: they are silphureous springs, still much valued for their medical properties, and dedicated, like most thermal waters in Sicily, to St. Calogero. At a later period they were called the Aquae Labodes or Larodes, under which name they appear in the Itineraries. (Itin. Ant. p. 89; Tab. Peut.) They are there placed 40 miles W. of Agrigentum, and 46 from Lilybacum; distances which agree well with the position of Sciacca. This is distant about 20 miles to the $E$. of the ruins of Selinus.

The site of the ancient city is now wholly desolate, with the exception of a solitary guardhouse, and the ground is for the most part thickly overgrown with shrubs and low brushwood; but the remains of the walls can be distinctly traced throughout a great part of their circuit. They occupied the summit of a low bill, directly abutting on the sea, and bounded on the $W$. by the marshy valley through which flows the river Madiuni, the ancient Selinus; on the E. by a smaller valley or depression, also traversed by a small marshy stream, which separates it from a hill of similar character, where the remains of the principal temples are still visible. The space enclosed by the existing walls is of small extent, so that it is probable the city in the days of its greatness must have covered a considerable area without them: and it has been supposed by some writers that the present line of walls is that erected by Hermocrates when he restored the city after its destruction by the Carthaginians. (Diod. xiii. 63.) No trace is, however, found of a more extensive circuit, though the remains of two lines of wall, evidently connected with the port, are fourd in the small ralley $E$. of the city. Within the area surrounded by the walls are the remains of three temples, all of the Doric order, and of an ancient style; none of them are standing, but the foundations of them all remain, together with numerons portions of columns and other architectural fragments, sufficient to enable us to restore the plan and design of all three without difficuity. The largest of them (marked C. on the plan) is 230 feet long by 85 feet broad, and has 6 columns in front and 18 in length, a very unusual proportion. All these are hexastyle and peripteral. Besides these three temples there is a small temple or Aedicula (marked B.), of a different plan, bat also of the Doric order. No other remains of buildings, beyond mere frag. ments and foundations, can be traced within the
walls; but the outlines of two large edifices, built of squared stones and in a massive style, are distinctly traceable outside the walls, near the NE. and

SELINUS.
NW. angles of the city, though we have no cluc to their nature or purpose.
But much the most remarkable of the ruins at

plan of selinus.

A CD. Temples within the city.
B. Small temple or aedicula in the city.

EF F G. Great temples without the city.
Selinus are those of three temples on the hill to the E., which do not appear to have been included in the city, but, as was often the case, were built on this neighbouring eminence, so as to front the city itself. All these tenples are considerably larger than any of the three above described; and the most northerly of them is one of the largest of which we have any remains. It had 8 columns in front and 17 in the sides, and was of the kind called psendo-dipteral. Its length was 359 feet, and its breadth 162 , so that it was actually longer than the great temple of Jupiter Olympius at Agrigentum, though not equal to it in breadth. From the columns being only partially fluted, as well as from other signs, it is clear that it never was completed; but all the more important parts of the structure were finished, and it must have certainly been one of the most imposing fabrics in antiquity. Only three of the columns are now standing, and these imperfect; but the whole area is filled up with a heap of fallen masses, portions of columns, capitals, \&c., and other huge architectural fragments, all of the must massive character, and forming, as observed by Swinburne, "one of the most gigantic and sublime ruins imaginable." The two other temples are also prostrate, but the ruins have fallen with such regularity that the portions of almost every column lie on the ground as they have fallen; and it is not only easy to restore the plan and design of the two edifices, but it appears as if they could be rebuilt with little difficulty. These temples, though greatly inferior to their gigantic weighbour, were still larger than that at Segesta, and even exceed the great temple of Neptune at Paestum; so that the three, when standing, must have presented a spectacle unrivalled in antiquity. All these buildings may be safely referred to a period anterior to

H M. Remains of edifices outside the walls. N. River Selinus, now the Madiuni.
the Carthaginian conquest (в.c. 409), though the three temples last described appear to have been all of them of later date than those within the walls of the city. This is proved, among other circumstances, by the sculptared metopes, several of which have been discovered and extricated from among the fallen fragments. Of these sculptures, those which belonged to the temples within the walls, present a very peculiar and archaic style of art, and are universally recognised as among the earliest extant specimens of Greek sculpture. (They are figured by Mïller, Denkmäler, pl. 4,5, as well as in many other works, and casts of them are in the British Museum.) Those, on the contrary, which have been found among the ruins of the temple marked E. on the opposite hill, are of a later and more advanced style, though still retaining considerable remains of the stiffness of the earliest art. Besides the interest attached to these Selinuntine metopes from their important bearing on the history of Greek sculpture, the remains of these temples are of value as affording the most unequivocal testimony to the use of painting, both for the architectural decoration of the temples, and as applied to the sculptures with which they were adorned. A very fall and detailed account of the ruins at Selinus is given in the Duke of Serra di Falco's Antichita Siciliane, vol. ii., from which the preceding plan is derived. A more general description of them will be found in Swinburne's Travels, vol. ii. pp. 242-245; Smyth's Sicily, pp. 219221 ; and other works on Sicily in general.

The coins of Selinus are numerous and various. The earliest, as already mentioned, bear merely the figure of a parsley-leaf on the obverse. Those of somewhat later date (including the one figured below) represent a figure sacrificing on an altar,

SELINUS．
SELLASIA．
959
which is consecrated to Aesculapios，as indicated by the cock which stands below it．The subject of this type evidently refers to a story related by Diogenes Laertius（viii．2．§ 11）that the Selinun－ tines were afflicted with $a$ pestilence from the marshy character of the lands adjoining the neigh－ bouring river，but that this was cured by works of drainage，saggested by Empedocles．The figure standing on the coin is the river－god Selinus，which was thus made conducive to the salubrity of the cits．

SELI＇NUS（Xe入unoûs：Eth Ee入ınoivtios or Ee－ $\lambda_{\text {ivoviocos：Selenti），a port－town on the west coast of }}$ Cilicis，at the mouth of a small river of the same name，which is now called Selenti（Scylax，p． 40 ； Liv．xxxiii．20；Strab．xiv．p．682；Ptol．v．8．§ 2， viii．17．§ 42 ；Plin．v．22．）This town is memorable in history as the place where，in A．D．117，the em－ peror Trajan is said by some anthors to have died （Dion Cass．lxviii．33）．After this event the place for a time bore the name of Trajanopolis；but its bishops afterwards are called bishops of Selinus．（Hierocl．p． 709．）Basil of Selencia（Vita S．Theclae，ii．17） describes the place as reduced to a state of insig－ nificance in his time，though it had once been a great commercial town．（Comp．Stadiasm．Mar．Mag．§§ 203，204；Lucan，viii．260；Chrom．Paschale，p．253．） Selinus was situated on a precipitons rock，sur－ rounded on almost every side by the sea，by which position it was rendered almost impregnable．The whole of the rock，however，was not included in the ancient line of fortifications；inside the walls there still are many traces of houses，but on the ontside，and between the foot of the hill and the river，the remains of some large buildings are yet standing，which appear to be a mansoleum，an agora， a theatre，an aqueduct，and some tombs（Beaufort， Karamania，p．186，foll．）

Respecting the small river Selinus，flowing by Pergamum，see Peronmum，p． 575.

SELLA＇SIA（Ze入入aoia，Xen．Polyb．Diod．；Ze－入avia，Steph．B．，Hesych．s．v．；the latter is perhaps the correct form，and may come from oé入as；the name is connected by Hesychius with Artemis
 Laconia，situated in the valley of the Oenus，on the road leading from Tegea and Argos，and one of the bulwarks of Sparta against an invading army．Its distance from Sparta is nowhere men－ tioned；but from the description which Polybius gires of the celebrated battle fought in its neigh－ bourhood between Antigonus and Cleomenes，it is probable that the plain of Krevati was the site of the battle．We learn from Polybias that this battle took place in a narrow opening of the vale of the Denus，between two hills named Evas and Olympus，and that the river Gorgylus flowed across the plain into the Evenus．Soath of the Khan of

Kreoald is a small plain，the only one in the valley of the Oenus，about ten minutes in width and a quarter of an hour in length，at the end of which the rocks again approach so close as barely to leave room for the passage of the river．The mountain， which bounds this plain on the east，is Olympus，a continuation of the mountain of Vresthéna：it rises very steep on the left bank of the Oenus．The mountain on the western side is Evas，now Turlaes， which，though not so steep，is still inaccessible to cavalry．Towards the north the plain is shut in by a mountain，over which the road leads to Tegea， and towards the south by a still higher mountain． The Oenus，which flows near the eastern edge of the plain，can be crossed at any point without diffi－ calty．It receives on its right side a small brook， the Gorgylus，which descends from a ravine on the northern side of Mt．Evas．On the summit of the hill，more than 2800 feet above the sea，which shuts in the plain on the south，and over which the road leads to Sparta，are the ruins of Sellasia，described below．

The battle of Sellasia，of which Polybins gives a detailed account，requires a few words of explanation． In b．c．221，Cleomenes，the Spartan king，ex－ pecting that Antigonus，the Macedonian king，and the Achaeans，would invade Laconia，fortified the other passes which led into the country，and took up his own position with the main body of his forces in the plain of Sellasia，since the roads to Sparta from Argos and Tegea united at this point．His army amounted to $20,000 \mathrm{men}$ ，and consisted of Lacedaemonians，Perioeci，allies，and mercenaries． His left wing．containing the Perineci and allies，was stationed on Mt．Eras under the command of his brother Eucleidas；his right wing，consisting of the Lacedaemonians and mercenaries，encamped upon Mt．Olympus under his own command；while his cavalry and a part of the mercenaries occupied the small plain between the hills．The whole line was protected by a ditch and a palisade．Antigonus marched into Laconia from Argos with an army of 30,000 men，bat found Cleomenes 80 strongly in－ trenched in this position，that he did not venture to attack him，but encamped behind the small stream Gorgylus．At length，after several days＇hesitation， both sides determined to join battle．Antigonus placed 5000 Macedonian peltasts，with the greater part of his auxiliary troops，on his right wing to oppose Eucleidas；his cavalry with 1000 Achaeans and the same number of Megalopolitans in the small plain；while he hinself with the Macedonian pha－ lanx and 3000 mercenaries occupied the left wing，in order to attack Cleomenes and the Lacedaemonians on Mt．Olympus．The battle began on the side of Mt．Evas．Eucleidas committed the error of awaiting the attack of the enemy upon the brow of the hill， instead of availing himself of his superior position to charge down upon them；but while they were climbing the hill they were attacked upon the rear by some light troops of Cleomenes，who were sta－ tioned in the centre with the Lacedaemonian cavalry． At this critical moment，Philopoemen，who was in the centre with the Megalopolitan horse，diverted the attack of the light infantry by charging without orders the Lacedaemonian centre．The right wing of the Macedonians then renewed their attack，do－ feated the left wing of the Lacedaemonians，and drove them over the steep precipices on the opposite side of Mt．Evas．Cleomenes，perceiving that the only bope of retrieving the day was by the defeat

## SELLASIA.

of the Macedonians opposed to him, led his men out of the intrenchments and charged the Macedonian pbalanx. The Lacedaemonians fought with great bravery; but after many vain attempts to break through the impenetrable mass of the phalanx, they were entirely defeated, and of 6000 men only 200 are said to have escaped from the field of battle. Cleomenes, perceiving all was lost, escaped with a
few horsemen to Sparta, and from thence proceeded to Gythium, where he embarked for Aegypt. Antigonus, thus master of the passes, marched directly to Sellasia, which he plundered and destroyed, and then to Sparta, which submitted to him after a slight resistance. (Polyb. ii. 65-70; Plut. Cleom. 27, 28, Philop. 6; Paus. ii. 9. § 2, iii. 10. § 7, iv 29. § 9 , vii. $7 . \S 4$, viii. 49 . § 5.)

B B. Road to Argos.
C C. Road to Megalopolis.
D D. Road to Sparta.

In the preceding account of the battle we have followed the excellent description of Ross. (Reisen im Peloponnes, p. 181.) The French Commission had previously supposed the plain of Krevatá to be the site of the battle of Sellasia (Boblaye, Recherches, foc. p. 73); and the same opinion has been adopted by Curtius. (Peloponnesos, vol. ii. p, 260.) Leake, however, places Sellasia to the SE., near the monastery of the Forty Saints ( ${ }^{\prime}$ A \%ıot इapávтa), and supposes the battle to have been fought in the pass to the eastward of the monastery. The ruins near the Khan of Krevatá he maintains to be those of Caryae. (Leake, Morea, vol. ii. p. 529, Peloponnesiaca, p. 341, seq.) But Ross informs us that in the narrow pass NE. of the monastery of the Forty Saints there is barely room for a loaded mule to pass; and we know moreover that Sellasia was
situated on the high road from Sparta to Tegea and Argos, which must have led through the plain of Krevatá. (каг $\tau$ тोे $\lambda \in \omega \phi \delta \rho o \nu$, Paus. iii. 10. § 7; Plut. Cleom. 23 ; Xen. Hell. vi. 5. § 27 ; Diod. xv. 64 ; Liv. xxxiv. 28.)

On leaving the plain of Krevata, the road southwards ascends the mountain, and at the distance of a quarter of an hour leaves a small ruin on the left, called by the peasants Palaeogíla (ท̂ Пa入aıo The remains of the walls are Hellenic, but they are of very small extent, and the place was probably either a dependency of Sellasia or one to which the inhabitants of the latter fled for refuge at one of the periods when their city was destroyed.

The ruins of Sellasia lie $1 \frac{1}{2}$ miles beyond Palaeogúla upon the summit of the mountain. The city was about $1 \frac{1}{2}$ miles in circumference, as appears
from the foundations of the walls. The latter were from 10 to 11 feet thick, and consist of irregular but very small stones. The northern and smalier half of the city was separated by a wall from the southern half, which was on lower ground.

From its position Sellasia was always exposed to the attacks of an invading army. On the first inrasion of Laconia by the Thebans in B. c. 369, Sellasia was plunderei and burnt (Xen. Hell. vi. 5. § 27): and because the inhabitants at that time, wogether with several others of the Perioeci, went over to the enemy, the town was again taken and dentroyed fuur years later by the Lacedaemonians themselves, assisted by some auxiliaries sent by the younger Dinnysius. (Xen. Hell. vii. 4. § 12.) It suffered the same fate a third time after the defeat of Cleomenes, as has been already related. It appears to have been never rebuilt, and was in ruins in the time of Pausanias (iii. 10. §7).

SELLE'IS (EeA mantioned by Homer, upon which Ephyra stood. [Ephyra, No. 2.]
2. A river in Sicyonia, upon which Strabo also places a town Ephyra. [Ephyra, No. 3.]

SELLE'TAE (Plin. iv. 11. s. 18, init.), a people of Thrace, whose country was called Selletica ( $\sum \in \lambda \lambda \pi r a \kappa t$, Ptol. iii. 11. §8). It was north of the Haemas, between that range of mountains and the Panysus.
[J.R.]
SELLE'TICA. [Selletae.]
SELLI or HELLL, an ancient tribe in Epeiras, in whose country, called Hellopia, the oracle of Doduna was situated. [Dodona, p. 782, a.]

SE'LLIUM (É̇ंAov, Ptol. ii. 5. § 7), a place in Lusitania, lying N. of Scalabis (Jtin. Ant. p. 421). Identified with Ceice or Seijo. [T. H.1).]

SELLLUS, according to Avienus (Ora Marit. 507) a high mountain in Hispania Tarraconensis, on which the city of Lebedontia once stood. Ukert (ii. pt. i. p. 484) identifies it with C.Salom. [T.H. D.] SELY'MBRIA ( $\sum \eta \lambda u 6 p i \eta$, Herod. vi. 33; $\Sigma \eta \lambda u$ Epla, Xen. Anab. vii. 2. § 15, \&cc.; Strab. vii. p. 319;
 p. 198, Reiske), a Thracian town on the Propontis, 22 miles east from Perinthus, and 44 miles west from Cinstantinople (Itin. Hier. p. 570, where it is called Salamembria), near the southern end of the wall, built by Anastasius Dicorus for the protection of his capital. (Procop. de Aed. iv. 9; see ScyllaE).

According to Strabo (l.c.), its name signifex "the town of Selys;" from which it has been inferred that Selys was the name of its founder, or of the leader of the colony from Megara, which founded it at an earlier period than the establish. ment of Byzantium, another colony of the same Grecian state. (Scymn. 714.) In honour of Eudoxia, the wife of the emperor Arcadius, its name was changed to Eudoxiupolis (Hierocl. p. 632), which it bore for a considerable time; but its modern name, Silicri, shows that it subsequently resumed its original designation.

Kespecting the history of Selymbria, only detached and fragmentary notices occur in the Greek writers. In Latin authors, it is merely named (Mela, ii. 2. § 6 ; Plin. iv. 11. s. 18, xxix. 1. s. 1 ; in the latter passage it is said to have been the birthplace of Prodicus, a disciple of Hippocrates). It was here that Xenophon met Medosades, the envoy of Seuthes (Anab. vii. 2. § 28), whose forces afterwards encamped in its neighbourhood (Ib.5. § 15). When

Alcibiades was commanding for the Athenians in the Propontis (в. c. 410), the people of Selymbris refused to admit his army into the town, but gave him money, probably in order to induce him to abstain from furcing an entrance. (Xen. Hell. i. I. §21.) Some time after this, however, he gained possession of the place through the treachers of some of the townspeople, and, having levied a contribution upon its inhabitants, left a garrison in it. (Ib. 3. § 10 ; Plut. Alcib. 30.) Selymbria is mentioned by Demosthenes (b.c.) in B. C. 351, as in alliance with the Athenians; and it was no doubt at that time a member of the Byzantine confederacy. According to a letter of Philip, quoted in the orntion de Corona (p. 251, R.), it was blockaded by him about b.c. 343; but Professor Newman considers that this mention of Selyinbria is one of the numerous proofs that the documents inserted in that speech are not authentic. (Class. Mus. vol. i. pp. 153, 154.)
[J. R.]
SEMACHIDAE. [AtTICA, p. 330, b.]
SEMA'才A SILVA ( $\sum \eta \mu a \nu \dot{\alpha}$ or $\left.\sum \eta \mu a \nu o u s ~ y ̈ \lambda \eta\right)$, one of the mountain forests of ancient Germany, on the south of Mons Melibocus (Ptol. ii. 1. § 7 ), is perhaps only a part of the Harz mountain or of the Thüringer Wald. (Zeuss, Die Deutschen, p. 8; Wilhelm, Germanien, p. 38, \&c.) [L. S.]

SEMANTHINI ( $\sum_{\eta \mu a \nu \theta i v o l, ~ P t o l . ~ v i i . ~ 3 . ~ § 4), ~ a ~}^{\text {a }}$ people dwelling in the land of the Sinae $E$. of the Semanthine mountains, which derived their name from them.
[T. H. D.]
SEMANTHINI MONTES ( $\tau \delta$ इ $\sum_{\eta \mu \nu \nu i \nu}^{\prime} \nu$ üpos, Ptol. vii. 2. §8), a mountain chain in the country of the Sinae (China), which, according to Ptoleny, extended from the sources of the Aspithra in a NiV. direction as far as those of the Serus. It is probably the chain which separates the Chinese province of Yunnan from the districts of Mien and Lantschua.
[T. H. D.]
SEMBRI'TAE ( $\sum e \mu 6 \rho i \tau a l$, Strab. xvi. pp. 770 -786; Sembkrritae, Plin. vi. 30. s. 35), a people inhabiting the district of Tenesis in Aethiopia, although they seem to have heen of Aegyptian origin. The first mention of the Sembritae occurs in Eratosthenes (ap. Strab. xvii. p. 786), who says that they occupied an island above Merö́; that their name implies "immigrants;" that they descended from the Aegyptian war-caste, who, in the reign of Psaminitichus (в. c. 6.58), abandoned their native land; and that they were governed by a queen, although they were also dependent on the sovereigns of Mervie. Artemidorus, also quoted by Strabo (xvi. p. 730), says on the contrary, that they were the ruling order in Merue: these accounts, however, may be reconciled by the supposition that Firatosthenes and Artemidorus described them at diffierent periods. If the Sembritae were the Aegyptian refugees, they wele also the Automoloi ('A $\sigma \mu \mathrm{a} \chi$ ) noticed by Herodotus (ii. 30). Pliny (1.c.) speaks of four islands of the Sembritae, each containing one or more tuwns. These were therefore not islands in the Nile, or in any of its principal tributaries, the Astapus, or Astaburas, but tracts between rivers, mesoputamian districts like Meroi itself, which in the language of Nubia are still denominated "islands." The capital of the Sembritae was, according to Pliny, Sembobis. It stood on the left bank of the river, 20 dass' journey above Meroe. Pliny names also, among other of their principal towns, Sai in Arsbia, -i. a on the right bank of the Nile, for he assumes that river as the boundary between Lybia and Arabia, - Esar or

Sape (Sobah), on the left bank, 17 days' journey above Meroé, and Daron again on the Arabian side.

Withont heing able to define the position of this tribe, or to state their relations to the Aethiopians of Meroê, we shall perhaps not err in placing them on the Blue Nile [Astapus], and in the neighbourhood of Axame. The geographers (Heeren, \&cc.) who describe the Sembritae as dwelling near the White Nile, have forgotten both their vicinity to Arabia - i. e. the eastern portion of Merö̈- and the character of the regions which the Astapus and Astaboras respectively water. The White Nile flows through lagoons and morasses unsuited for towns and permanent settlements; while the Blue Nile has always had on its banks a numerous population, dwelling in large villages and towns. Along the Blue Nile ran the principal highways of the trade of Aegypt with Suthern Aethiopia, while the White Nile led off to the uncivilised and scattered tribes of the Libyans. The Sembritae, if seated on the latter river, would probably have eluded observation altogether; whereas on the former they would be as well known to the caravans and their guides as any other of the Aethiopian races. Moreover, the mesopotamian districts suited to towns lie to the east of Aethiopia Proper, and would afford a secure retreat to the refugees from Aegypt in search of a new habitation. (See Cooley's CLuwdius Ptolemy and the Nile, pp. 7-27.) The present Senaar corresponds nearly with the territory of the Sembritae. [W.B.D.]

SEMIRA'MIDIS MONS ( $\Sigma \in \mu \epsilon \iota \rho \mu u i \delta o s ~ o ̈ \rho o s), ~ a ~$ remarkable circular mountain on the N. side of the Persian gulf, and the eastern linit of Caramania. It is noticed both by Arrian (Peripl. M. E. p. 20, ed. Huds.) and by Marcian (Peripl. M. Ext. c. 27, ed. Müller, 1855), who states that it was opposite to Mt. Pasabo, in Arabia, and that these two mountains, with their promontories, form the straits at the entrance of the gulf of Persia. Ptolemy speaks of it, and states that it was also called Strongylus, probably from its form (vi. 8. § 11). Its modern name appears to be Elbourz. (Vincent, Voyage of Nearchus, i. p. 319-321.)
[V.]
SEMNONES ( $\sum$ f $\mu \nu \omega v e s$ or $\sum$ Éfavoves), or perhaps more correctly Sennones, are described as the most ancient and illustrious anong the Suevi in the north of Germany. They dwelt between the Albis and Viadus, being surrounded on the west by the Cherusci, on the south by the Silingi, on the east by the Manimi and Burgundiones, and on the morth-west by the Longobardi. (Tac. Germ. 39; Ptol. ii. 11. §§ 15, 17; Vell. Pat. ii. 106.) Their country accordingly extended from the hills of Lusatia in the south, as far as Potsdam in the north, and in it they formed 100 communities (pagi), which gave them such strength that they regarded themselves as the head of the Suevi. Their country contained an ancient forest (Semnonum Silva), hallowed by awful superstition and sarrificial rites; at stated seasons deputies from all the kindred tribes met in it, and commenced their proceedings with a human sacritice. No one, moreover, was allowed to enter this forest except he was bound in chains, a mark of humiliation in the presence of the god; and if any one stumbled he was not permitted to rise, but had to crawl along. As to the history of the Semnones, we learn from Tacitus (Ann. ii. 45) and Strabo (vii. p. 290) that in the time of Augustus they were united with the Marcomanni under Maroboduus. In the Monumentum Ancyranum the Semannes, are mentioned
among the German tribes which sought the friendship of the emperor and the Romans. They appear to have been governed by kings, one of whom bore the name of Masyus, and reigned in the time of Domitian. (Dion Cass. lxvii. 5, comp. 1xxi. 20.) After the reign of M. Aurelius they are no longer mentioned in history, from which circumstance some have unnecessarily inferred that the Semnones were not a distinct tribe, but only a general name for several kindred tribes. As to the Silva Semnonum, it is generally supposed to have existed near finsterivalde or Sonnenvalde, between the rivers Elster and Spree, where three large places have been discovered, which were evidently intended as a sort of altars. (Kruse, Dettsche Alterth. vol. ii. part 9, p. 132; Zenss, Die Deulschen, p. 130.) [L.S.]
 called also for distinction's sake Sena Gallica ( $\Sigma \in \nu a \gamma a ́ \lambda \lambda ı k a$, Ptol.: Sinigaglia), a city of Umbria, but situated in the district known as the Gallicus Ager, on the coast of the Adriatic, at the mouth of a small river of the same name. The district in which it was situated had previously belonged to the Galli Senones, and there can be no doubt that both the river and town derived their name from that of this people. (Sil. Ital. viii. 453; Pol. ii. 19.) It is therefore probable that there was a Gaulish town of the name before the Roman conqnest, but we have no account of it until the establishment of $n$ Roman colony there, which seems to have taken place immediately after the final subjertion of the Senones in B. c. 289. (Pol. ii. 19; Liv. Epit. xi.) The colony must have been a "colonia civium," ns its name is not mentioned by Livy among the Latin colonies in the Second Punic War. It was at Sena that the two consuls Livius and Nero united their forces before the battle of the Metaurus;B. C. 207 (Liv. xxvii. 46 ; Appian, Annib. 52; Vict. Vir. Ill. 48), on which account that battle is described by some anthors as being fought "ad Senam," and even Cicero alludes to it as the "Senense praelium." (Cic. Brast 18; Eut:op. iii. 18; Oros. iv. 18.) Its name is not again mentioned in history till the Civil Wars between Marius and Sulla, when it was taken and plundered by Pompeius, the lieutenant of Sulla, B. c. 82. (Appian, B. C. i. 88.) It seems to have תlways continued to be a flourishing and considerable town, and under the Triumvirate received a fresh accession of colonists. (Lib. Col pp. 226, 258.) Its name is mentioned by all the geographers, as well us in the Itineraries. It was situated on the line of roud which led along the coast from Ancona to Fanum Fortunae, where it joined the Flaminian Way, properly so called. (Strab. v. p. 227; Plin. iii. 14. s. 19; Ptol. iii. 1. § 22; Itin. Ant. pp. 100, 316 : Tab. Peut.) The name was early corrupted from Sena Gallica into the contracted form Senogallia, which is already found in Pliny, and appears alion in the Itineraries. The Geographer of Ravenna has Senegallia, thus approaching still more closely to the modern form of Singaglia. The city is mentioned as still in existence during the Gothic Wars, after the fall of the Western Empire, and again under the Lombards (Procop. B. G. iv. 23; P. Diac. Hist. Lang. ii. 22); it was for some time also one of the cities of the Pentapolis under the exarchs of Kavenna, but fell into decay in the middle ages, and is alluded to by Dante in the 14 th centary as verging rapidly to extinction. (Dante, Par. xvi. 75.) It, however, revived again, and is now a flourishing town, with a considerable trade, but has no ancient remains.

The riverSena, alluded to br Silius Italicus and Lucan, must be the small stream now called the Nevola or Nigola, which falls into the sea at Sinigaglia. (Sil. Ital. viii. 453; Lucan, ii. 407.)
[E. H. B.]
SENA (Ealva, Ptol.: Eth. Senensis: Siena), a city of Etruria, sometimes called Sena Julia, to distinguish it frm the city of the same name on the Adriatic. It was situated nearly in the heart of Etruria, about 28 miles E. of Volaterrae and 40 S. of Florentia. There is no reason whatever to suppose that there was an Etruscan city on the site, and no allusion to its existence occurs before the establishment of the Roman colong. Eren the date of this is not accurately known; but it is probable from the epithet of Julia that it was founded either by Caesar himself or by the Triumvirate in his honour. It is singular that its name is not found in the Liber Coloniarum; but its colonial rank is attested by Pliny, who calls it "colonia Senensis," as well as by Tacitus. (Plin. iii. 5. s. 8; Tac. Hist. iv. 45.) It is subsequently mentioned by Ptolemy, as well as in the Tabula, which places it on a line of mad from Florentia to Clusium. (Ptol. iii. 1. § 49; Tab. Peut.) But it seems never th have been a place of much importance in ancient times, and it was not till the middle ages that it rose to be one of the first cities of Tuscany. It has no remains of antiquity. (Dennis's Etruria, vol. ii. p. 135.)
[E. H. B.]
SENA INSULA, in Gallia. On this island, which was opposite to the coast of the Osismii, was an oracle of a Gallic goddess. Nine virgins named Gallicenae (Barrigenae, ed. I. Vossius) had the care of the oracle. They could raise storms by their verses, change themselves into beasts, heal diseases, and foretell the future, but they were only propitions to seamen who came to consult them. (Mela, iii. 6.) This is the island of Sein, incorrectly called on the maps Isle des Saints, which is at the entrance of the bay of Inouarnerez, and separated from a point of land on the coast of Britany (Pointe Raz) by a narrow channel. D'Anville supposes that this may be the island which Strabo places opposite the mouth of the Loire. This island was inhabited only by women who were possessed by Dionysus. They allowed no man to enter their island; but so far from keeping their virginity, they used to visit the men on the mainland. These two stories are very different. Strabo names his island that of the Namnites, as Grockurd (Strab. Transl. i. p. 198) has it: but the name is Samnites in the common texts of Strabo. This seems to be the same island that Dionysius speaks of (Perieg. 571) as being visited by the women of the Amnitae for the purpose of performing the rites of Bacchus. D'Anville further thinks that Pliny (iv. 16) may be speaking of Sena when he mentions after the islands which are near to Britain, Siambis, or Amnis, as some MSS. have it, and Axantos, which is evidently Uxantis or Ouessant. Sina, as the Maritine Itin. names it, is mentioned there with Uxantis.
[G. L.]
SENIA (Eevía, Ptol. ii. 16. (17.) § 2), a Ruman colony on the coast of Liburnia ("Colonia Senensis," Tac. H. iv. 45), and on the road from Aquileia to Siscia. (Itin. Ant. p. 273.) It had a harbour. (Comp. Plin. iii. 21. 8. 25; Geogr. Rav. iv. 31 ; Tab. Peut.) Variously identified with Zeng or Senga.
[T. H. D.]
SENOMAGUS, in Gallia Narbonensis, is mentioned in the Table, and placed north of Avenio (Arignon), on a road along the east side of the

Rhone. Some geographers guess that it may be near the I'ont St. Esprit.

SE'NONES' ( Zévoves, इévvoves. Steph. B. s. v.). Polybius (ii. 17) names the Italian Senones, Einv $\boldsymbol{y}$ The Roman puets make the penultima short:-
"Ut Braccatoram pueri Senonumque minores."
(Juv. riii. 234.)
An absurd explanation of the name is $q$ noted by Festus (8. v. Senones) and by Servius (ad Aen. viii. 656).

The Senones were one of the great Celtic nations' who bordered on the Belgae. (Caes. B. G. ii. 2.) They were north-west of the Aedui and bordered on them. Their capital was Agedincum (Sens), on the right bank of the Yonne, which is a branch of the Seine. (Ptol. ii. 8. § 12.) The Senones are in the Lugdunensis of Ptoleny and Pliny. Besides Agedincum there were in the country of the Senones, Autissiodurum (Auxerre) and Melodunum (Melun) on the Seine not far from Yaris, which shows that their territory extended from the neighbourhood of Paris along the Seine and along the lonne to the borders of the small nation of the Mandubii [MANnubir], whose town was Alesia, and to the borders of the Lingones. The railroad from Paris to Dijon, which passes near Melun, Fonlainebleau, Sens, Joigny, St. Florentin, Tonnerre on the Armançon, a branch of the Yorne, runs through the country of the Senones. Between St. Florentin and Flogny, which is about half-way between St. Florentin and Tonnerre, extends a vast plain, level as the sea, fertile, and in summer covered with wheat. A large part of the territory of the Senones is a fertile countiy. In seems to have comprehended the dioceses of Sens and $A$ uxerre. Besides Melodunum and Agedincum, Caesar mentions Vellaunodunum as a town of the Senones (vii. 11), on the side towards the Carnutes.

The Senones were at first well disposed to Caesar (B. G. ii. 2), probably through fear of their neighbours, the Beigae and the German people north of the Marne. Caesar had given them Cavarinus for a king, but the Senones expelled him (v. 54); and when the Koman proconsul ordered the senate of the Senones to come to him, they refused. In the spring of r. c. 53 Caesar summoned the states of Gallia to a meeting, but the Senones, Carnutes, and Treviri would not come (vi. 3), upon which he transferred the merting of the states to Lutetia Parisiorum. He says that the Parisii bordered on the Senones, and "within the memory of their fathers they had united their state with that of the Senones; "but he does not explain the nature of this union. He marched from Lutetia (Paris) into the country of the Senones, which presents no difficulties for an anny. The Senones yielded in spite of Acco, who was the leader in the revolt; and Caesar took with him Cavarinus and the cavalry of the Senones, in which force it is probable that they were strong, as their country is well adapted for grazing and corn. At the close of the year Caesar whipped Acco to death, and quartered six of his legions at Sens for the winter (vi. 44). In b. c. 52 the Senpnes sent 12,000 men with the rest of the Gallic forces to attack Caesar before Alesia (vii. 75). The Senones seem to have given Caesar no more trouble; but in B. c. 51 Drappes, a Senon, at the head of a number of dexperate men, was threntening the Provincis. Drappes was caught and starved himself to death. (B. G. viii. 30, 44.) [G.L.]

SENONES (之i $\downarrow \nu \omega \nu \epsilon s)$, a nation of Gaulish origin, which was settled in Italy, on the coast of the Adriatic, extending from the river Aesis (Esiur),

## SENTICE．

a few miles N．of Ancors，to the Utis（Montone）． （Liv．v．35．）The listory of their migration froll Transalpine Gaul，their settlement in ltaly，and their wars with the Romans，which ended in the extermination of the whole nation，are fully related under the article Gatlia Cisalpina（pp．936－ 938）．After the conquest of the Senones，and their expulsion from their lands on the Adriatic，two colonies were founded in their territory，the one at Sena，the other at Ariminum；and at a later period the remainder of their lands was portioned out among the Roman citizens by an agrarian law of the tribune C．Flaminius．This district，which still retained the name of the＂Gallicus ager，＂was after－ wards considered as a part of Uinbria，and included for all administrative purposes under that appella－ tion．Its topography will therefore be most con－ veniently given in the article Uarria．［E．H．B．］

SE＇N「ICE（Eєvтıкグ，l＇tol．ii．6．§ 50），a town of the Vaccaei in Hispania Tarraconensis，varionsly identified with Los Santos，Zamora．Calzulilla de Mandiges，and Zarzosa．［T．H．D．］

SE＇NTIl）ES（Éévtıঠ́ss，Ptol．iv．5．§ 21 ），a people in the S．of Marmarica．［T．H．D．］

SE＇NTII（ （ivtioı），a people of Gallia Nar－ bonensis（Ptol．ii．10．§ 19），whose town Ptolemy names Dinia，which is Digne．［Dinin．］［G．L．］

SENTI＇NUM（Eevtivov：Eth．इevtivatクis，Sen－ tinas－ātis ：Sentino），a city of Umbria，on the E． slope of the Apennines，but near the central ridge of thuse mountains，and not far from the sources of the Aesis（Esino）．It is celebrated in history as the scene of a great battle fought in the Third Samnite War，b．c．295，when the allied forces of the Samnites and Gauls were defeated by the Roman consul $Q$ ． Fabius．Gellius Egnatius，the Samnite general，was slain in the battle；while the Roman consul P．Decius fullowed the example of his father，and devoted him－ self for the safety of the Roman army．（Liv．x． 27 －30，Pol．ii．19．）＇The scene of this decisive vic－ tory，one of the most memorable in the Roman annals， is placed by Livy＂in Sentinati agro ；＂but we have $n o$ more precise clue to its prosition，nor do the details of the battle give us any as－istance．Sentinum itself seems to have been a strong town，as in the l＇erusian War it was bevieged by Octarian himself without success：though it was afterwards taken by surprise by his lieutenant，Salvidienus IRufus，by whom it was plundered and burnt to the ground．（Dion Cass． xlviii．13．）It was subsequently revived，by receiving a body of coloniste，under the Triumvirate（Lib．Col． p． 258 ），but did not obtain the title of a Colonia，and continued under the Immnan Empire to be a town of manicipal rank．（Plin．iii．14．s．19；Strab．v． p． 227 ；Ptol．iii．1．§ 53；Orell．Inscr． 3861.4949 ．） Its site is marked by the village still called Sentino， on the river of the same name（a small stream falling into the Esino），a few miles below the modern town of Sasso Ferruto．
［E．H．B］
SENUS（ Lévos or Eaîvos，Ptol．vii．3．§ 2），a river in the land of the Siuae（China）which ran into the Sinus Nugnus between the Siouth－horn C＇ipe （Ndtion кépas），S．of Ambastus，und Rabuna． Probably the modern Saigon or Saung．（Comp． Forbiger，Geogr ii p．478．）
［＇I．H．D．］

SEPELACI，a town of the Edetani in Hispania Tarraconensis（ltin．A ut．p．400），identitied with／Bur－ rianc，Onda，or Castellon de la Plunu．［T．H．D．］

## SEPPHORIS．

SE＇PIA．［PHENKI＇s，p．595，л．］
SE＇P＇IAS（ $\sum \eta \pi i d s$ ），a promontory of Macnesis， opposite the island of Sciathos，and forming the SL． extremity of Thessaly．It is now called C．St．George． It is celebrated in mythology as the spot where Peleus laid in wait for Thetis，and from whence he carried off the goaldess（Eurip．Androm．1266）．and in history as the scene of the great shipwreck of the Heet of Xerses．（Herod．vii．113．188：Strab． ix．p． 443 ；Apoll．Rhod．i．580；Ptol．iii．13．§ 16 ； Ilin．iv 9．s．16；Mela，ii．3；Leake，Northers Greece，vol．iv．p．382．）

SEPON＇IA PARAMICA（Eetortla Пapáцıкa， Ptol．ii．6．§ 50），a town of the Vaccaei in His－ pania Tarraconensis lying to the W．of Lacobriga （or the modern Lobera）．
［T．H．D．］
SEPPHORIS（之епфф́pıs，al．Ź́ффорıs：Eth．之eतोwoitns），a town of Upper Galilee，not men－ tioned under this name in Scripture，but frequently by Josephus．It was garrisoned by Antigonus，in lis war with Herod the Great，until the latter took it，early in his Galileean campaign（Ant．xiv． 15. § 4．）It seems to have been a place of arms，and to have been occasionally the royal residence，for in the troubles which arose in the courtry during the presidency of Varus，the robber－chief Juias，son of Ezekias，seized the palace of Sepphoris，and carried off the arms and treasure which it contained （ $x$ rii．12．§ 5）．It was subsequently taken and burned by Varus（§9）．Herod the tetrarch（An－ tipas）afterwards rebuilt and fortified it，and made it the glory of all Galilee，and gave it independence （xviii．2．§ 1）；although，according to the statement of Justus the son of listus，he still maintained the superiority of his newly founded city Tiberias；and it was not until Nero had assigned Tiberias to Agrippa the Younger that Sepphoris established its supremacy，and became the royal residence and depositury of the archives．It is termed the strongest city of Galilee，and was early taken by Gallus，the general of Cestius．（B．J．ii．18．§ 11．）It main－ tained its allegiance to the Romans after the general revolt of Galilee（Ib．iii．2．§ 4，4．§ 1），but did not break with the Jewish leaders．（Vita，8，9．）Its early importance as a Jewish town，uttested by the fact that it was one of the five cities in which district sanhedrims were instituted by Gabinius （B．J．i．8．§ 5），was further confirmed by the destruction of Jeruvalem，after which catastrophe it became for some years the seat of the Great Sanhe－ drim，until it was transferred to Tiberias．（Robiuson， Bibl．Res．vol．iii．p．202．）It was subsequently called Diccaesareia，which is its more common appellation in the ecclesiastical annals；while Epi－ phanius and S．Jerome recognise both namps．A revolt of the Jewish inhabitants，in the reign of Constantius（A．D．339），led to the destruction of the city by Constantius Gallus Caesar．（Socrates， H．E．ii．33；Sozomen，H．E．iv．7．）This town， once the most considerable city of Galilee，was situated according to S ．Jerome 10 miles west of Mount Tabor．（Onomast．s．v．Eabفop；Procopius Gazaeus．Comment．in Lib．Juticum．）It was much celebrated in the history of the Crusaders，for its fountain－a favourite camping place of the Christians．It is stil］represented by a poor village bearing the name bephurich，distant about 5 miles to the north of Nazareth，retaining no vestiges of its former greatness，but conspicaous with a ruined tower and church，both of the middle ages；the latter professing to mark the site of the birthplace
of the Virgin Mary, assigned by a late tradition to this locality. It became the see of a suffragan bishop, under the metropolitan of Scythopolis (Le Quien, Oriens Christianus, vol. iii. pp. 713. 714), and there are coins still extant of the reigns of Dımitian, Tıajan, \&cc. (Reland, Palaestina, pp. 199 -1003; Eckhel, Doct. Vet. Num. vol. iii. pp. 425, 426.)
[G. W.]

## SF:PTEM AQUAE. [Reate.]

SEPTEM ARAE, a place in Lusitania (Itin. Ant. pp. 419, 420). Variously identitied with Codesera and Arronches.
[T. H. D.].
SEPTEM FRATRES ('ExTdסe入фoc üpos, Ptol.iv. 1. §5), a group of mountains in the northernmost part of Jauritania Tingitana, connected by a tongue of land with the promontory of Abyla (now Ximiera near Certa). and thus on the narrowest part of the Fretum Gaditanum (Plin. v. 1. s. 1; Solin. c. 28; Strab. xvii. p. 827.) One of these mountains, now called the Ape Mountains (Graberg Von Hemsö, Empire of Morocco, Germ. Tr. p. 24), bore, according to Strabo (l.c.) the name of the Elephant (Entфas), probably from the number of elephants which were to be found there. (Plin. L.c.: Mart. Cap. ri. p. 216.) The Geogr. Rav. (iii. 11) also mentions in this neighbourhond a town called septem Fratrex, which is perhaps the same place mentioned in the Itin. Ant. (p.9) as a station between Tingis and Abyle. Procopius also (B. Vand. i. 1; conp. ii. 5, and de Aed. vi. 7) mentions here a castle or fortress called $\Sigma$ ह́ntov; and hidiore (Orig. xv. 1) a castle and town called Septa, perhaps the modern Ceuta. (Comp. Mela, i. 5. §5, et ibi Tzschncke)
[T. H. D.]
SEPTEM MARIA ('EnTd $\pi \in \lambda d \gamma \eta$ ), was the name commonly given to the extensive lagunes at the mouth of the Padus, and the adjoining rivers, and which extend along a considerable part of the shores of the Adriatic from the mouths of the Padus to Altinum. Pliny indeed seems to use the term in a more restricted sense, as he speaks of "Atrianoram paludes, quae Septem Maria appellantur" (iii. 16. s. 20); but the Itinerary distinctly applies the name to the whole extent of the lagunes from Kavenna to Altinam (Itin. Ant. p. 126); and Herodian, who notices them particularly (viii. 7), clearly uses the term in the same sense.
[E. H. B.]
SEPTEM PAGI ('ExTd Mdyot), was the name given to a district close to Rome, but on the right bank of the Tiber, which according to tradition had originally formed part of the territory of the Veientes, but was ceded by them to the Runans as early as the reign of Komulus. (Dionys. ii. 55; Plut. Kom. 25.) According to the authorities followed by Dionysius it was again surrendered to the Etruscans by the treaty concluded with Porsena, but was shortly after restured by that monarch to the Komans. (Dionys. v. 31, 36.) Livy mentions the same circumstances, but without giving the name of the district. (Liv. ii. 13, 15.) It is evident, however, that this was a well-known appellation, but we are unable to fix its boundaries more definitely.
[E. H. B.]
SEPTE'MPEDA ( $\Sigma \in \pi \tau \epsilon ́ \mu \pi \in \delta \sigma$, Strab., Ptol : Eth. Septempedanus: San Severino), a town of Picenum, in the upper valley of the Potentia, 9 miles above Treia. It is mentioned by all the geographers, and the "ager Septempedanus" is noticed in the Liber Coloniarum. (Plin. iii. 13. s. 18; Strab. v. p. 241; Ptol. iii. 1. § 52; Lib. Col. p. 258.) Pliny assigns it the rank of a municipal town, and this is contirmed by inscriptious, one of which is of the age of Aurelian.
(Orell. Inscr. 1026; Gruter, Inser. p. 308. 3.) It is placed by the Itinerary of Antoninus on that branch of the Flaminian Way which, quitting the main high road at Nuceria, crossed the Apennines to Prolaqueum and thence dencended the valley of the Potentia by Septempeda and Treia to Auximum and Ancona. (Itin. Ant. p. 312.) It early became an episcopal see, and derives its modern nanse of San Severino from one of its bishops who, flourished in the middle ages. It still retains its rank as an episcopal city, and is the capital of the surrounding city, though it has not more than 3000 inhabitants. (Rampoldi, Dizim. Corogr. vol. iii. p. 837.) [E. H. B.]
SEPTIMANCA, a town of the Vaccaei in Hispania Tarraconensis (Itin. Aut. p. 435). Now Simuncas.
[T. H.D.]
SEPULCHRUM EURIPIDIS (Amm. Mare. xxvii. 4. § 8: comp. Gell. xv. 20; Plut. Lycurg. 36; Vitruv. viii. 3; Plin. xxxi. 19; Itin. Hierosol.), the remarkable monument erected to Euripides in Macedonia, at the narrow gorge of Aulon or Arethusa (Besikia or Kumili Búghazi), where the mountains close upon the road. The ancients (Vitruvius, b. c.; Plin. L. c.) placed it at the confluence of two streams, of which the water of one was poisonous, the other so sweet and health-giving that travellers were wont to halt and take their meals by its currents. In the Jerusalem Itinerary, a document as late as the 13th century, it occurs as a station letween P'ennana and Apollonia. (Comp. Clarke's Trarels, vol. viii. pp. 9-13.) [E. B. J.]

SE'QUANA ( $\Sigma \eta \kappa o u a ́ y a s, ~ \Sigma \eta \pi o d v a s, ~ P u l . ~ i i . ~ 8 . ~$ § 2), the Seine, one of the large rivers of Gallia. The Seine rises in the highlands south of Langres, but in the department of Cöte dOr, and flows in a northwest direction past Chatillon-sur-Seine, Troyes, Melun, Paris, Mantes, Elboeuf; Kouen, and Le Havre. It enters the Atlantic below Le Harre. The course of the Scine is about 470 miles, and the area of its basin is about 26,000 Euglish square miles, which is only one half of the area of the basin of the Loire. The chief branches of the Seine which join it on the right bank are the Aube, the Marne, and the Oise; on the left bank. the Yonne, the Loing, and the Eure. None of the hills which bound the basin of the Seine, or are contained within it, have a great eleration, and a large part of the country included within this basin is level.

Caesar (B. G. i. 1) makes the Sequana and the Matrona (Marne) the boundary between the Celtae and the Belgae. Strabo (iv. p. 192) says that the Sequaua rises in the Alps, a statement which we must not altogether impute to an erroneous nution of the position of the river's source, though bis knowledge of Gallia was in many respects inaccurata, but to the fact that he extended the name of Alps far beyond the proper limits of those mountains. But his inaccuracy is proved by his saying that the Sequana flows parallel to the Rhine, and through the country of the Sequani. He is more correct in fixing its outlet in the country of the Caleti and the Lexovii. The Seine was navigated in the time of Strabo and much earlier. [Gillia Trarsalpisa, Vol. I.]

The Mátrona, as Ausonius names it (Masella, จ. 462), 一
" Matrona non Gallos Belgasque intersita fines," joins the Seine a few miles above Paris; it is the largest of the attluents of the Seine.

Ainmianus Marcellinus (xv. 11) says that the
united streams of the Sequana and Matrona entered the sea near Castra Constantia (Coutances), which is a great mistake. In the cosmography of Aethicus the Sequana is named Geon or Geubonna. [G. L.]

SE'QUANI ( $\left.\sum \eta \kappa o v a v o i\right)$, a Celtic nation in the upper valley of the Arar or Saûne. Lucan (i. 425) follows the quantity of the Greek form: -

## "Optima gens flexis in gyrum Sequana fraenis."

Caesar fixes the position of the Sequani. Their territory extended to the Rhine. (B. G. i. 1.) The Jura separated them on the east from the Helvetii; and the narrow pass between the Jura and the Rhone at Fort l'E'cluse was in the possession of the Sequani (B. G. i. 6, 8). The southern boundary of their territory from Fort [Ecluse was the Rhone; but they did not possess all the country in the angle between the Rhone and the Saone, for part of it was held by the Allobroges (B. G. i. 12), and part by the Segusiani (B.G.i. 10) and by the Ambarri, who were dependent on the Aedui (B. G. i. 11). When Caesar describes the march of the Helvetii from Fort IEcluse to the Saone, he says that the Helvetii first passed through the territory of the Sequani, and then entered the territory of the Aedui, which they plundered. But they had not yet reached the Saone, as Casar's narrative shows, and it is clear from this passage (B. G. i. 11) and those already cited, that a large tract of councry between the Rhone and Saone did not belong to the Sequani, for the line of march of the Helvetii from Fort CEcluse to the Saóne would probably bring them to the Saone at a point not much lower down than Micon. The western boundary of the Sequani was the Arar, also called the Sauconna, a name which appears to be the same as the name of the Sequani. Their neighbours on the west side of the Saine were the Aedui, with whom the Sequani had disputes about the river tolls (Strab. iv. p.192). On the north their neighburs were the Leuci and Lingones. Strabo (ir. p. 186) describes the Arar and Dubis (Douls), as flowing through the country of the Sequani. D'Anville has an argument to show that the part of the dioceses of C/hâlon-sur-Saône and Mácon which is east of the Saóne belonged to the old territory of the Sequani, which may be true; but the towns Matisco (.Macon) and Cabillonum (Claalon) were on the west side of the Suône and in the territory of the Aedui (B. G. vii. 90).

In another passage besides that already referred to, Caesar shows that the Sequani extended to the Rhine, for in describing the course of this river from south to north, he says that it passes by the territory of the Helvetii, Sequani, Mediomatrici and Tribocci. (B. G. iv. 10.)

The Sequani belonged to the division of Belgica under the Empire (l'iin. iv. 17 ; Ptol. ii. 9. § 21 ). The territory of the Sequani contained much good land, some of the best in Gallia. Their chief town was Vesontio (Besançon) on the Dotbs, and they had other towns also. They fed hogs, and their hams and bacon were exported to Rome as Strabo (iv. p.192) says; and Varro (de R.R. ii. 4) may mean to say the same, when he speaks of Gallic bacon.

The Sequani had kings, sometimes at least; for Gallic kings were not perpetnal. (B. G. i. 3.) Before Caesar went into Gallia, the Arverni and Acdui had bren the two most powerful peoples. The Sequani were in league with the Arverni, who occupied the centre of all Gallia, but hostile to their meightours tho Aedui. To maintain themselves against tine

Aedui, the Arverni and Sequani hired Germans to come over the Rhine. The Germans came in great numbers, and in Caesar's time it was computed that there were 120,000 of them in Gallia. This is the first historical notice of a permanent settlement of Germans in these parts. The Sequani with the asxistance of their allies defeated and humbled the Aedui, but they gained nothing by this victory. Ariovistus, the king of these German mercenaries, took from the Sequani a third part of their lands, and was threatening to take a second third, when Caesar drove the Germans into the Rhine, after defeating them near that river. If the Germans were all destroyed or driven away from the territory of the Sequani by Caesar, they came again, for the country on the west bank of the Rhine, which belonged to the Sequani, the Upper Alsace, has been German for many centurics.

In B. c. 52, the Sequani were among the nations who sent their contingent to attack Cuesar befure Alesia.
[G. L.]
SERA ( $\sum \tilde{\eta} \rho a$, Ptol. i. $11 . \S 1,17, \S 5$, vi. 13. § 1 . 16. § 8 , viii. $24 . \S 8$ ), the capital of the country of Serica, and one of the chief commercial towns of the Seres. It was the remotest point of Eastern Asia with which the ancients had any commerce, or of which they possessed any knowledge. It was situated on the mountain Ottorocorras at the castern source of the Bautisus. Mannert (iv. p. 501) identifies it either with Singan in the province of Schensi, or with Honan on the Hoang-ho; but according to Heeren (Ideen, i. 2. p. 668) it is Pekin itself.
[T. H.D.]
 the S. of Asiatic Sarmatia.
[T. H. D.]
SERANUSA, perhaps more correctly Seramusa, a town of the interior of Pontus Polemoniacus, on the south-east of Comana Pontica (Tab. Peut.; Ptol. v. 6. § 9, where it is written $\Sigma$ iéploura or

[L.S.]
SERAPIUM (It. Anton. p. 170; Serapiu, Tab. Peut.), a large village seated near the junction of the canal of the Ptolemies with the Bitter Lakes, east of the Delta. Serapium was 18 miles distant froin Heroopolis and 50 from Clysma, at the top of the Sinus Heroopolites. Its temple of Serapis, and its position on the canal that connected the Nile with the Red Sea, rendered it a place of con-ilerable traffic. It was probably founded, or at least enlarged, by the Ptolemies after Philadelphus (B.c. 274) had extended the canal to the Bitter Lakes.
[W. B. D.]
 a small river on the N . coast of Mantitania, which fell into the sea to the W. of Rusuccurum; either the present Masiafran, or, mere probably, the Isser.
[T II. D.]
SERBI or SIRBI (Eipfoc or Eipfoc, Piol. v. 9. § 21), a people in Asiatic Sarmatio, according to Ptolemy (l. c.) between the Ceraumian mountains and the river Kha, above the Diduri and below the Vali. Pliny, however (vi. 7. s. 7), places them on the E. shore of the Maeotis, between the Vali and the Arrechi. (Comp. Schaffarik, Slav. Alterth. i. p. 165.)
[T. H. D.]
SERBO'NIS LACUS. [Sirbonts Lactes.]
 § 12) (the first of these forms is the more usual with the Romans, the latter with the Greeks), a considerable town of Upper Moesia, which in eatilier times was regarded as belonging to Thrace (I'tol. l.c.), but which in the third century was attributed
to Dacia Inferior，and made its capital．（Theodoret． Hise Eccl．ii．4．）It lay in a fruitful plain，at the spot where the sources of the Oescus united，and on the high－road from Naissus to Philippopolis，be－ tween Meldia and Burburaca．（Itin．Ant．p．135； Itin．Hierosol．p．567．）From the time of Aurelian it bore on its coins the surname of Ulpia；probably because，when Dacia was relinquished，the name of that Dacian town ries transferred to it，and its in－ habitants，perhaps，located there．The emperor Maximian was born in its neighbourhood．（Eutrop． ix．14，22．）It was destroyed by Attila（Priscus， de Legat．p．49），but shortly afterwards restored．In the middle ages it occurs under the name of Triad－ itza（Tpıádır 〔a，Niceph．Chron．Ann．Is．Angeli，iii．p． 214 ；Aposp．Geogr．in Hudson，iv．p．43），which was perhaps its original Thracian appellation，and which is still retained in the dialect of the inhabitants． （See Wesseling，ad Itin．Ant．l．c．）Its extensive rains lie to the S．of Sophia．（Comp．Procop．de ded．iv．1．p．267，4．p．282；Hierocl．p． 654 ；Amm． Marc．xxxi．16；Gruter，Inscr．p．540．2；Orelli， nos．3548，5013．）The Geogr．Kav．（iv．7）incor－ rectly writes the name Sertica，since it was derived from the Thracian tribe of the Serdi．It is called by Athanasius（Apol contra Arianos，p．154）

［T．H．D．］
SERE＇NA，a town in Lower Pannonia，on the south bank of the Danube，on the road from Poeto－ vium to Mursa．（It．Hieros．p．562；Geog．Rav．iv． 19，where it is called Serenis；Tab．Peut．，where its nane is Serona．）It is thought to have occupied the site of the modern Moszlavina
［L．S．］
SERES．［Seric．l．］
SERE＇TIUA（ fortified town of Dalmatia，which with Rhaetimus was captured by Germanicus in the campaign of A．D． 7 ．
［E．B．J．］
SERGU＇NTIA（ Eep pouvtia，Strab．iii．p．162），$^{\text {（ }}$ a small town of the Arevaci on the Durius，in Hispania Tarraconensis．Ukert（ii．pt．i．p．455）takes it to have been the Eápravoa of St phanus B． （s．e．）
［T．H．D．］
SE＇RIA（Eépıa，Ptol．ii．4．§ 12），a town of the Turdetani in Hispania Baetica，with the surname of Fiana Julia．（Plin．iii．1．s．3．）It lay E．of the mouth of the Anas，and N．of the Baetis．［T．H．D．］

SERIA＇NE，a city of Syria mentioned in the Itinerary of Antoninus as xviii．M．P．distant from Andruna，which was exvii．M．P．from Calcis，exxxviii． M．P．from Dolicha，now Doluc．（Itin．Ant．pp．194， 19．5．）Mannert thinks that it corresponds in situation with the Chalgbon（Xarvew $\omega$ ）of Ptolemy（v． 15. §17），which gave its name to a district of Syria Chalybonitis．It is certainly identical with the modern Siria， 2 long days SE．of Aleppo，in the devert，the ruins of which were discovered and de－ scribed by Pietro della Valle．（Mamurt，Geographie， part ri．vol．i．p． 411 ．）
［G．W．］
SE＇RICA（ $\dot{\eta}$ ミ $\eta \rho ⿺ \kappa \eta$ ท，Ptol．vi．16．§§ 1，3 4，6， vii．2．§ 1,3 ．§ 1,5 ．§ 1 ，viii． 24 ．§§ $1,5,27$ ．§ 2 ． 8 sc ．），a tract of country in the E．part of Asia，in－ babited by the people called Seres．According to the description of Ptolemy，it was bounded on the W．by Scythia extra Imaum，on the NE．by an un－ known land，on the E．by the Sinae，and on the S．by India．Pliny on the contrary（vi．13．s．15）seems to exiend it on the E．as far as the coast of Asia， as he mentions an Oceanus Sericus，and in another place（1b．17．s．20）speaks of a promontory and tay．Modern opinions vary respecting its site；but
tie best geographers，as Rennell，D＇Anville，and Heeren，concur in placing it at the NW．angle of the present empire of China．（See Yates，Tex－ trinum Antiq．p．232，note）．The name of Serica， as a country，was not known before the first century of our era，though there are earlier accounts of the people called Seres．It seems highly improbable， however，that they were known to Hecataeus，and the passage on which that assumption is founded occurs only in one MS．of Photius．They are first mentioned by Ctesias（p．371，n．22，ed．Bähr）； lut according to Mela（iii．7）they were in his time known to all the world by means of their commerce． On the nothern borders of their territories were the more eastern skirts of the mountains Annibi and Auxacii（the Altai），which stretched as；far as here from Scythia．In the interior of the country were the Montes Asmiraei，the western part of the IDa－Uri chain；and towards the southern borders the Casii Montes（now Khara，in the desert of Gobi），together with a southern branch called Thagurus，which trended towards the river Bautisus（Hvang－ho．）On the farther side of that river lay the Ottorocorras， the most eastern branch of the Emodi mountains， called by Ptolemy（vi．16．§ 5）тd Enpıкá ठрך． Aniong the rivers of the country，the same author （ $I b$. § 3）names，in its northern part，the Oechardes （probably the Selenga），and，in the S．，the Bautes or Bautisus（Hoang－ho），which flowed towards the land of the Sinae．Pliny，bowever（l．c．），mentions several other rivers，which seem to have been coast ones，as the Psitaras，Cambari，Lanos，and Atianos， as well as the promontory of Cliryse and the bay of Cyrnaba．Serica enjoyed a serene and excellent climate，and possessed an abundance of cattle，trees， and fruits of all kinds（Amm．Marc．xxxiii． 6. § 64 ；Plin．l．c．）．Its chief product，however，was silk，with which the inhabitants carried on a very profitable and most extensive commerce（Strab．xv p．693；Arist．Hist．Nett．v．19；Virg．Georg．ii． 121 ； Plin．and Amm．ll．cc．\＆c．）．Pliny records（xi． 22. s．26），that a Greek woman of Cos，named Pam－ phila，first invented the expedient of splitting these substantial silken stuffs，and of manufacturing those very fine and veil－like dresses which became so cele－ brated under the name of Coae vestes．Both Serica and its inhabitants are thought to have derived their name from their staple pruduct，since，as we learn from Hesychius（s．v．ミinpes），the insect，from the web of which the brilliant stuff called holosericon was prepared，was named Ser（ $\sum \hat{\eta} \rho$ ）．（Comp．Klaproth， Sur les Noms de la Chine in the Mem．rel．à l＇Asie， iii．p．264；and Tableaux Hist．de l＇Asie，pp． 57 and 68．）It has been doubted，however，from the appa－ rent improbability that any people should call them－ selves Seres，or silkworms，whether the name of Seres was ever really borne by any nation；and it has been conjectured that it was merely a mercantile appella－ tion by which the natires of the silk district were known．（Latham，in Class．Mus．vol．iii．p．43，seq．） Lassen（Ind．Alt．i．p．321）has produced from the Mahabharata，ii．50．as the real names of the Seres， those of Caka，Tukhara，and Kanka，who are re－ presented as bringing just the same goods to market as are ascribed by Pliny（xxxiv．14．s．41）to the Seres，namely，wool，skins，and silk．Yet，though it may be allowed to be imprubable that a people should have called themselves＂Silkworms，＂yet it seems hardly less so that such an appellation should have been given them by foreigners，and that they should have been known by it and no other for a
period of several centuries. On the other hand, may it not be possible that the product was called after the people, instead of the people after the product? We are not without examples of an analogous procedure; as, for instance, the name of the phasis, or pheasant, from the river Phasis: of our own word currants, anciently and properly Corinths, from the place whence that sinall species of grape was originally brought, \&c. However this may be, we may refer the reader who is desirous of a further account of the origin and manufacture of silk, to an excellent dissertation in the Textrinum Antiquarum of Mr. Yates (part i. p. 160, seq.), where he will find all the passages in ancient authors that bear upon the subject carefully collected and discussed.

Besides its staple article, Serica also produced a vast quantity of precious stones of every kind (Expos. tot. M/undi, ap. Hudson, iii. p. 1, seq.). as well as iron, which was esteemed of a better quality even than the Parthian (Plin. l. c.) and skins (Per. M. Erythr. p. 22; Amm. l. c.)

According to Pausanias (vi. 22. § 2) the Seres were a mixture of Scythians and Indians. They are mentioned by Strabo (xv. p. 701), but only in a cursory manaer. It appears from Mela (iii. 7) and from Pliny (vi.17. s. 24), compared with Eustathius (ad Dionys. Per. v. 753, seq.), and Ammianus Marcellinus ( $l$. c.), that they were a just and gentle people, loving tranquillity and comfort. Although addicted to commerce, they were completely isolated from the rest of the world, and carefully aroided all intercourse with strangers. From these habits, they were obliged to carry on their commercial transactions in a very singular manner. They inscribed the prices of their goods upon the bales in which they were packed, and then deposited them in a solitary building called the Stone Tower; perhaps the same place mentioned by Ptolemy (vi. 15. § 3) under the name of Hormeterion, situated in a valley on the upper course of the Jaxartes, and in the Seythian district of Casia. The Scythian merchants then approached, and having deposited what they deemed a just price for the goods, retired. After their departure, the Seres examined the sum deposited, and if they thought it sufficient took it away, leaving the goods; but if not ennugh was found, they removed the latter instead of the moner. In the description of this mode of traffic we still recognise the characteristics of the modern Chinese. The Parthians also traded with the Seres, and it was probably through the former that the Romans at a later period procured most of their silk stuffs; though the Parthians passed them off as Assyrian goods, which seems to liave been believed by the Romans (Plin. xi. 22. s. 25). After the overthrow of the Parthian einpire by the Persians, the silk trade naturally fell into the hands of the latter. (Vopisc. Aurel. c. 45 ; Procop. B. Pers. i. 20, \&c.) With regard to their persons, the Seres are described as being of unusual size, with blue eyes, red liair, and a rough voice ( Plin. vi. 22. 8. 24), almout totally unacquainted with diseases and bodily infirmities (Expos. tot. Mundi, l. c.), and consequently reaching a very great age (Ctes. l.c.; Strab. xv. 1. 701; Lucian, Macrob. 5). They were armed with bows and arrows (Hor. Od. i. 29. 9; Charic. vi. 3). Ptolemy (ll. cc.) enumerstes several distinct tribes of them, as the Annibi, in the extreme N., on the mountains named after them; the Zizyges, feetween them and the Auxitcian mountains; the Dannae, to the $S$. of these; and still further $S$.
down to the river Oechardes, the Pialae : the Oechardae, who dwelt about the river of the same name; and the Garenaei and Nabannae, to the E. of the Annibi. To the S. of these again was the district of Asmiraea, near the mountains of the same name, and still further in the same direction the Issedones; to the E. of whom were the Throani. To the S. of the Issedones were the Asparacae, and S. of the Throani the Ethaguri. Lastly, on the extreine southern borders were seated the Batae and the Ottorocorrae, - the latter, who must doubtless be the same people called by Pliny Attacori, on the like-named mountain. To the southern district must also be ascribed the Sesatae mentioned in Arrian's Peripl. M. Erythr. (p. 37), small men with broad foreheads and flat noses, and, from the description of them, evidently a Mongol race. They migrated yearly with their wives and children to the borders of the Sinae, in order to celebrate their festivals there; and when they had returned to the interior of their country, the reeds which they left behind them, and which had served them for straw, were carefully gathered up by the Sinae, in order to prepare from it the Malabathron, a species of ointment which they sold in India. (Comp. Ritter, Erdkunde, ii. p. 179, v. p. 443, 2nd ed.; Bohlen, das Alte Indien, ii. p. 173; Heeren's, Ideen, i. 2. p. 494). According to Ainmianus (l. c.) the towns of Serica were few in namber, but large and wealthy. Ptolemy, in the places cited at the head of this article, names fifteen of them, of which the most important seem to have been, Sera, the capital of the nation; Issedon; Throana, on the E. declivity of the Asmiraei mountains, and on the eastermmost source of the Oechardes; Asmiraea, on the same stream, but somewhat to the NW. of the preceding town; Aspacara, on the left bank of the Bautisus, not far from its most western source; and Ottorocorra.
[T. H. D.]
SERIMUM (之é $\rho \not \mu \mathrm{ov}$, Ptol. iii. 5. § 28), a town on the Borysthenes, in the interior of European Sarmatia.
[T. H D.]
SERI'PHOS or SERI'PHUS (乏épiфos: Eth. Xeplotus: Serpho), an island in the Aegaean sea, and one of the Cyclades, lying between Cytlinos and Siphnos. According to Pliny (iv. 12. s. 22) it is 12 miles in circumference. It possessed a town of the same name, with a harbour. (Scylax, p. 22; Ptol. iii. 15. § 31.) It is celebrated in mythology as the place where Danaë and Perseus were driven to shore in the chest in which they had been exposed by Acrisius, where Persuus was brought up, and where he afterwards turned the inhabitants into stone with the Gorgon's head. (Apollod. ii. 4. § 3; Pind. Pyth. x. 72, xii. 18; Strab. x. p. 487 ; Ov. Met. v. 242.) Seriphos was colonised by Ionians from Athens, and it was one of the few islands which refused submission to Xerxes. (Herod. viii. 46, 48.) By subsequent writers Seriphos is almost always mentioned with contempt on account of its poverty and insignificance (Aristoph. Acharn. 542; Plat. Rep. i. p. 329: Plut. de Exsil. 7. p. 602; Cic. de Nat. Deor. i. 31, de Senect. 3); and it was for this reason employed by the Roman emperors as a place of banishment. for state criminals. (Tac. Ann. ii. 85, iv. 21 : Juv. vi. 564, x. 170; Senec, ad Comsol. 6.) It is curious that the ancient writers make no mention of the iron and copper mines of Seriphos, which were, however, worked in antiquity, as is evident from existing traces, and which, one might have suppesed, wuald lave bestuwed some prosperity upon the island.

But though the ancient writers are silent about the mines，they are careful to relate that the frogs of Seriphos differ from the rest of their fraternity by being dumb．（Plin．viii．58．s．83；Arist．Mir． Ausc． 70 ；Aelian，Hist．An．iii．37；Suidas，s．v．
 upon the site of the ancient city，on the eastern side of the island，and contains upwards of 2000 in－ habitants．It is built upon a steep rock，about 800 feet above the sea．There are only a few remains of the ancient city．（Ross，Reisen auf den Griech． Inseln，vol．i．p．134，seq．；Fiedler，Reise，g＇c．vol．ii． p．106，seq．）

## COLN OF SERIPHOS．

SERMO，a town of the Celtiberi in Hispania Tar－ raconensis．（Itin．Ant．p．447．）Variously iden－ tified with Miel and Mezalocha．
［T．H．D．］ SERMYLE（Eepuún $\eta$ ，Herod．vii．122；Thuc． v．18；Eepuv入ia，Scyi．p．26；Hecataeus，ap．Steph． B．s．v．；Bückh，Inscr．Graec．vol．i．p． 304 ：Eth． $\Sigma_{є \rho \mu \dot{\lambda} \lambda i o t), ~ a ~ t o w n ~ o f ~ C h a l c i d i c e, ~ b e t w e e n ~ G a l e p s u s ~}^{\text {a }}$ and Mecyberna，which gave its name to the Toronaic gulf，which was also called Sermilicus Sincs
 Ormylia，between Molyró and Lerna，is identified from its name，which differs little from the ancient form，with the site of Sermyle．（Leake，Northern Greece，vol．iii．p． 155. ）
［E．B．J．］
SERMY＇LICUS SINUS．［Sermyle．］
SEROTA，a town on the frontier between Upper and Lower Pannonia，on the right bank of the river Dravus．（It．Ant．p．130；It．Hieros．p． 562 ； Geog．Rav．iv．19，where it is called Sirore，while the Table calls it Sirota．）It is possible that this town may have belonged to the tribe of the Serretes men－ tioned by Pliny（iii．28）as inhabiting a part of Pannonia．The town of Serota is commonly iden－ Lified with the modern Veröcze or Verovits．［L．S．］ SERPA，a place in Hispania Baetica，on the Anas，and in the ternitory of the Turdetani．（Itin． Ant．p．426．）It still bears its ancient name．See Resendi Ant．Lusit．p． 194.
［T．H．D．］
SERRAEPOLIS（ $\Sigma \in \rho \rho$ рaimo入ıs $\kappa \omega \mu \eta$ ，Ptol．v． 6. § 4），a village on the coast of Cilicia，lying between Mallus and Aegae（Ayaz）．

SERRAPILLI，a tribe mentioned by Pliny（iii． 28），as dwelliug on the river Dravus in Pannonia． The resemblance of name has induced some geo－ graphers to assume that they dwelt about the modern town of Pilisch；but this is a mere con－ jecture．
［L．S．］
SERRETES．［Serota．］
SERRHAE［Siris．］
SERRHEUM or SERRHIUM（ $\Sigma(\notin \rho \rho$ Iov，Dem．p．
 promontory and town on the southern coast of Thrace，now Cape Makri It lay to the west of Maroneia，and opposite to the island of Samo－ thrace．It is repeatedly mentioned by Demosthenes （！p．85，114，133，R），as having been taken by Philip，contrary to his engagements with the Athe－ nians；and Livy（xxxi：16）states that it was ons of the Thracian towns captured by Philip V．in the
year в．c． 200 ．（Plin．iv．11．s． 18 ；Mcla，ii． 2．）According to Stephanus Byz．（l．c．）a town on the island of Samothrace bure the same name．
［J．R．］
SERRI，a penple of the Asiatic Sarmatia，on the Enxine．（Plin．vi．5．s．5．）Mela（i．19）places them between the Meianchlaeni and Siraces．［T．H．D．］ SERRIUM．［Serrhevm．］
SERVIODU＇RUM，a town in the north－east of Vindelicia on the Danube，on the road from Reginum to Boiodurum，near Augustana Castra．（Tab．Peut．； Not．Imp．）It must have occupied the site of the modern Straubing，or some place in the neighbour－ hood，such as Azelburg，where ancient remains still exist．
［L．S．］
SERYI＇TIUM，a town in the southern part of Upper Pannonia，on the river Dravus，on the road from Siscia to Sirmium．（It．Ant．p．268；Geog． Rav．iv．19，where it is called Serbetium；Tab． Peut．）Its site has been identified with several modern places；but the most probable conjecture is that it occupied the place of the modern Sieverovczi， the point at which the roads leading from Sirmium and Siscia to Salona met．
［L．S．］
SESAMUS（ $\sum \eta \sigma \alpha \mu \dot{s}$ ），a small river on the coast of Paphlagonia，flowing into the Euxine near the town of Amastris，whence in later times the river itself was called Amastris．（Anonym．Peripl．P．E． p．5：Marcian．p． 71 ；Amasthis．）
［L．S．］
SESARETHUS．［Taulantil．］
SESATAE．［SERICA．］
SESECRI＇ENAE（ $\sum \eta \sigma \in \kappa \rho i \in v a l ~ \nu \eta ̂ r o 九, ~ A r r i a n, ~$ Peripl．M．Erythr．p．30），a group of islands oppo－ site to the S．coast of India intra Gangem，and pro－ bably in the Sinus Colchicus－where Ptolemy （vii．1．§ 10）places a town with the somewhat similar name of $\Sigma \omega \sigma$ ikoupat．It must have been in the neighbourhood of Taprobane，since the Periplus mentions the Aifiठitwv $\nu \tilde{\eta} \sigma o s$ as close to the Sese－ crienae，whilst Ptolemy（vii．4．§ 11）places the same island amongst a number of others lying before Taprobane，many of which must undonbtedly have belinged to the Sesecrienae．
［T．H．D．］
SESSITES（Sesia），a river of Gallia Transpadana， and one of the most impirtant of the northern tributaries of the Padus．It flows beneath the walls of Vercellae（Vercelli），and joins the Padus about 16 miles below that city．Its name is noticed only by Pliny（iii．16．s．20）and the Geographer of Ravenna （iv．36），who writes the name Sisidus．［E．H．B．］
SESTIA＇NAE ARAE（callerl by Ptolemy Einatiou B $\omega \mu 0 l$ Kкpov，ii．5．§ 3）．the W．promontory of the N．coast of Gallaecia in Hispania Tarraconensis．It had three altars dedicated to Augustus，whence its name．（Plin．iv．20．s．34：Mela，iii．1．）It is the present Cabo Villano（Florez，Esp．Sagr．xx． p．44；Sestini，Med．Isp．p．103．）［T．H．D．］

SESTIA＇RIA PROMI．（ $\sum \eta \sigma \tau \tau a \rho i a$ akpa，Ptol．iv． 1．§7），a headland on the N．coast of Mauritania Tingitana，between capes Russadir and Abyla．It is probably the same that is called Cannarum Promon－ torium in the Itin．Ant．（p．11），lying at a distance of 50 miles from Kussadir，or the present Cubo Quilates．
［T．H．D．］
SESTI＇NUM（Eth．Sestinas：Sestino），a town in the interior of Umbria，mentioned only by Pliny，who enumerates the Sestinates among the towns of that region（Plin．iii．14．s．19；Gruter，Inscr．p．108．7）， but which still retains its ancient name．It is situ－ ated among the Apennines，at the source of the river Foglia（Pisaurus）．
［E．H．B．］

SESTUS(Z $\eta \sigma \tau 6$ s: $E t h$. इhottos), the principal town of the Thracian Chersonesus, and opposite to Abydus, its distance from which is variously stated by ancient writers, probably because their measarements were made in different ways; some speaking of the mere breadth of the Hellespont where it is narrowest; others of the distance from one city to the other; which, again, might be reckoned either as an imaginary straight line, or as the space traversed by a vessel in crossing from either side to the other, and this, owing to the current, depended to some extent upon which shore was the starting point. Strabo (xiii. p. 591) states that the strait is 7 stadia across near Abydus; but that from the harbour of Abydus to that of Sestus, the distance is 30 stadia.* (On this point the following references may be consulted : Herod. vii. 34: Xen. Hell. iv. 8. 5; Pulyb. xvi. 29; Scyl. p. 28; Plin. iv. 11. 8. 18. Ukert (iii. 2. § 137, note 41) has collected the rarious statements made by the moderns respecting this subject.)

Owing to its position, Sestus was for a long period the usual point of departure for those crossing over from Europe to Asia; but subsequently the Romans selected Callipolis as the harbuur for that purpose, and thus, no doubt, hastened the decay of Sestus, which, though never a very large town, was in earlier times a place of great importance. According to Theopompus (ap. Strab. l.c.), it was a well-fortified town, and connected with its port by a wall 200 feet in length ( $\sigma \kappa$ é $\lambda \epsilon!\delta(\pi \lambda \epsilon \theta \rho \varphi$ ). Dercyllidas, also, in a speech attributed to him by Xenophon (Hell. iv. 8. § 5), describes it as extremely strung.

Sestus derives its chief celebrity from two circumstances, - the one poetical the other historical. The former is its connection with the romantic story of Hero and Leander, too well known to render it necessary to do more than merely refer to it in this place (Ov. Her. xviii. 127; Stat. Silv. i. 3. 27, \&.c.); the latter is the formation (B. c. 480) of the bridge of bnats across the Hellespont, for the passage of the army of Xerxes into Europe; the western end of which bridge was a little to the south of Sestus (Herci. vii. 33). After the battle of Mycale, the Athenians seized the opportunity of recovering the Chersonesus, and with that object laid siege to Sestus, into which a great many Persians had hastily retired on their approach, and which was very insufficiently prepared for defence. Nutwithstanding this, the garrison held out bravely during many months; and it was not till the spring of B. c. 478 that it was so much reduced by famine as to have become mutinous. The governor, Artayctes, and other Persians, then fled from the town in the night; and on this being discovered, the inhabitants opened their gates to the Athenians. (Herod. ix. 115, seq.; Thuc. i. 89.) It remained in their possession till after the battle of Aegospotami, and used to be called by them the corn-chest of the Piraceus, from its giving them the command of the trade of the Euxine. (Arist. Rhet. iii. 10. § 7.) At the close

[^34]of the Peloponnesian War (b. c. 404), Sestus, with most of the other possessions of Athens in the same quarter, fell into the hands of the Lacedaemonians and their Persian allies. During the war which soon afterwards broke ont between Sparta and Persia, Sestus adhered to the former, and refused to obey the command of Pharnabazus to expel the Lacedaemonian garrison ; in consequence of which it was blockaded by Conon (B. c. 394), but without much result, as it appears. (Xen. Hell. iv. 8. § 6.) Some time after this, probably in consequence of the peace of Antalcidas (b. c. 387), Sestus regained its independence, though only for a time, and perhaps in name merely; for on the next occasion when it is mentioned, it is as belonging to the Persian satrap, Ariobarzanes, from whom Cotys, a Thracian king, was endeavouring to take it by arms (b. c. 362 ?). He was, however, compelled to raise the siege, probably by the united forces of Timotheus and Agesilaus (Xen. Ages. ii. 26; Nep. Timoth. 1); the latter authority states that Ariobarzanes, in return for the services of Timotheus in this war, gave Sestus and another town to the Athenians*, from whom it is said to have soon afterwards revolted, when it submitted to Cotys. But his successor, Cersobleptes, surrendered the whole Cbersonesus, including Sestas, to the Athenians (в. c. 357), who, on the continued refusal of Sestus to yield to them, sent Chares, in B. c. 353, to reduce it to obedience. After a short resistance it was taken by assanlt, and all the male inhabitants capable of bearing arms were, by Chares' orders, barbarously massacred. (Diod. xvi. 34.)

After this time we have little information respecting Sestus. It appears to have fallen under the power of the Macedonians, and the army of Alesander the Great assembled there (в.c. 334), to be conveyed from its harbour in a Grecian fleet, from Europe twithe shores of Asia. By the terms of the peace concleded (в. c. 197) between the Romans and Philip, the latter was required to withdraw his garrisons from many places both in Europe and in Asia; and on the demand of the Khodians, actuated no doubt by a desire for free trade with the Euxine, Sestus was included in the number. (Liv. xxxii. 33.) During the war with Antiochus, the Romans were about to lay sirge is the town (в. с. 190); but it at once surrmdered. (Liv. xaxvii. 9.) Strabo mentions Sestus ava place of some commercial importance in his time; but history is sileut respecting its subsequent destinies. According to D'Anville its site is occupied by a ruined place called Zemenic ; but more recent authorities name it Jalowa (Mannert, vii. p. 193). (Herud iv. 143; Thuc. viii. 62; Polyb. iv. 44; Diod. xi. 37; Arrian, Anab. i. 11. §§ 5, 6; Ptol. iii. 12. §4, viii. 11. § 10; Steph. B. s. v.; Scymn. 708; Lucan, ii. 674.)
[J. R.]
SESUVII [Essur].
SETABIS. [Saftabis.]
SETAE, SETTAE, or SAETTAE (Léral, 之éttal, or Eaittal), a town in Lydia, near the sources of the river Hermus, which is not mentioned by any of the earlier writers. (Hierocl. p. 663; Ptul. v. 2. § 21 ; Concil. Constant. iii. p. 502; Concil. Nicuen.

[^35] Niepos. (Sie Dicl. Biogr. Vul. 1II. p. 1146, a.)

SETANTII．
SETUACOTUM．
ii．p． 591 ；comp．Sestini，Geog．Num．p．55．）It is commonly supposed to have occupied the site of the modern Sidas Kaleh．［L．＇S．］

SETA＇NTII（ $\sum_{e \tau d}$ prokably belonging to the Brigantes on the W．coast of Britannia Romana，and possessing a harbour （Eetautiav $\lambda_{1} \mu \dot{\eta} v$, Ptol．l．c．），commonly thought to have been at the mouth of the river Ribble． Reichard，however，places it on the S．coast of the Solway Frith，while Camden（p．793）would read， with one of the MSS．of Ptolemy，＂Segontiorum Portus．＂and seeks it near Caernarvon．［T．H．D．］

SETANTIORUM PORTUS．［SETANTII．］
SETEIA（ $\Sigma$ ervta or इernta elo $\chi$ voras，Ptol．ii． 3. § 2），an estuary on the W．coast of Britannia Ro－ mana，opposite the isle of Mona，into which the Dee discharges itself．
［T．H．D．］
SETELSIS（Eete入नis or Ze入evols，Ptol．ii．6．§ 72），a town of the Jaccetani in Hispania Tarra－ conensis，now Solsona．See 2 coin in ．Sestini，p． 189.
［T．H．D．］
SETHERIES，a river of Asiatic Surmatia，on the E．coast of the Pontus Euxinus，and in the territory of the Sindi．（Plin．vi．5．s．5．）［T．H．D．］

SE＇TIA（Zintia：Eth．Setinus：Sezze），an ancient city of Latium，situated on the S．slope of the Vol－ scian mountains，between Norba and Privernum， looking over the Pontine Marshes．It is probable that it was originally a Latin city，as its name is found in the list given by Dionysius of the thirty cities of the Latin League．（Dionys．v．61．）But it must have fallen into the hands of the Volscians， at the time their power was at its height．No mention of it is，however，found during the wars of the Romans with that people until after the Gaulish invasion，when a Roman coluny was established there in b．c．392，and recruited with an additional body of colonists a few years afterwards．（Vell．Pat．i． 14；Liv．vi．30．）At this time Setia must have been the most advanced point of the Roman dominion in this direction，and immediately adjoined the ter－ ritory of the Privernates，who were still an inde－ pendent and powerful people．［Privernum．］This expnsed the new colonists to the incursions of that peosple，who，in B．c．342，laid waste their territory， as well as that of Norba．（Liv．vii．42，viii．1．） The Privernates were，however，severely funished for this aggression，and from this time the Setini seem to have enjoyed tranquillity．But it is re－ markable that a few years later L．Annius of Setia appears as one of the leaders of the Latins in their great war against Rome，b．c．340．（Liv．viii．3．） Setia was a Colonia Latina，and was one of those which，during the pressure of the Second Punic War（b．c．209），declared its inability to furnish any further supplies either of men or money．（Liv． xxvii．9．）It was，at a later period of the war， severely punished for this by the imposition of much heavier contributions．（Id．xxix．15．）From its strong and somewhat secluded position，Setia was selected as the place where the Carthaginian hos－ tuges，given at the close of the war，were detained in custody，and in b．c． 198 became in consequence the scene of a very dangerous conspiracy among the slaves of that and the adjoining districts，which was suppressed by the energy of the praetor L．Cor－ nelius Merula．（Id．xxxii．26．）From this time we hear no more of Setia till the Civil Wars of Marius and Sulla，when it was taken by the latter after a regular siege，b．c．82．（Appian，B．C．i． 8i．）It appears therefore to have been at this
period a strong fortress，an advantage which it owed to its position on a hill as well as to its forti－ fications，the remains of which are still visible． Under the Empire Setia seems to have continued to be a flourishing municipal town，but was chicfly celebrated for its wine，which in the days of Martial and Juvenal seems to have been esteemed one of the choicest and most valuable kinds：according to Pliny it was Augustus who first brought it into vogue．（Plin．xiv．6．s．8；Martial，x．36．6， xiii．112；Juv．x．27；Strab．v．pp．234， 237 ；Sil． Ital．viii．379．）We learn from the Liber Coloniarum that Setia receised a colony under the Triumvirate； and it is probable that it subsequently bore the title of a Colonia，though it is not mentioned as such by Pliny．（Plin．iii．5．s．9；Lib．Colon．p．237； Orell．Inscr．2246；Zumpt，de Colon．p．338．）

The position of Setia on a lofty hill，looking down upon the Pontine Marshes and the Appian Way，is alluded to by several writers（Strab．v．p．237； Martial，x．74．11，xiii．112），among others in a fragment of Lucilins（ap．A．Gell．xvi．9），in whose time it is probable that the highroad，of the ex－ treme hilliness of which he complains，passed by Setia itself．It was．however，about 5 miles distant from the Appian Way，on the left hand．There can be no doubt that the modern town of Seize occupies the same site with the ancient one，as ex－ tensive remains of its walls are still visible．They are constructed of large polygonal or rudely squared blocks of limestone，in the same style as those of Norba and Cora．The substructions of sereral edifices（probably temples）of a similar style of construction，also remain，as well as so $e$ incon－ siderable ruins of an amphitheatre．（Westphal， Küm．Kamp．p．53；Dudwell＇s Pelasgic Remuins， pp．115－120．）
［E．H．B．］
S：＇ㄷIA（ Śécia，Ptol．ii．4．§ 9）．1．A town of the Turduli in Hispania Baetica，between the Baetis and Mount Ilipula．

2．A town of the Vascones in Hispania Tarra－ conensis．（Ptol．ii．6．§ 67．）［T．H．D．］
SE＇TIDA（之étıסa，Ptol．ii．4．§ 12），a town of the Turdetani in the W．of Hispania Baetica．［T．H．D．］ SETIDA＇VA（Eetioava），a town in the north－ east of ancient Germany，on the north of the sources of the Vistula，so that it belonged either to the Omani or to the Burgundiones．（Ptol．ii．11．§ 28．） Its exact site is not known，though it is commonly assumed to have occupied the place of the modern Zydowo on the south of Gnesen．（Wilhelm，Ger－ manien，p．253．）

SETISACCM（ $\sum$ efíakov，Ptol．ii．6．§ 52），a town of the Murbogi in the N．of Hispania Tarra－ conensis．
［T．H．D．］
SETIUS MONS or PROM．［Blascon；Fecyi Jugum．］

SETOTRIALLACTA（Letotpia入入dкta，Ptol． ii．6．§56），a town of the Arevaci in Hispania Tar－ raconensis．
［T．H．D．］
SETO＇VIA（Eetovía，Appian，Illyr．27），a town of Dalmatia，situated in a well－wooded valley，which was besieged by Octavius in the campaign of в．с． 34．It has been identified with Sign，situated in the rich valley of the Cettina，and bounded by mountains to the right and left．［E．B．J．］
 a town in the south of Germany between the upper part of the Dainube and the Silva Gabreta，perhaps belonging to the territory of the Narisci（Ptol．ii．II § 30）；but its site is quite unknown．［L．S．］

SETUIA（ Setov（a），a town of the Quadi，in the south－east of Germany，apparently near the sources of the river Aucha，a tributary of the Danube，in the Carpathian mountains．（Ptol．ii．11．§ 29．） Its identification is only matter of conjecture．［L．S．］

SEVACES（之єойaкєs），a tribe in the western part of Noricum，is mentioned only by Ptoleny（ii． 14．§ 2．）
［L．S．］
SEVE ${ }^{\prime}$ RI MURUS．［Vallum．］
SEVE＇RUS MONS，a mountain of Central Italy mentioned only by Virgil（Aen．vii．713），who places it among the Sabines，and associates it with the Mons Tetrica．It therefure evidently belonged to the lofty central ranges of the Apennines，in that part of Italy，but cannot be identified with more accuracy．［Apenninus．］
［E．H．B．］
SEUMARA or SEUSAMORA（ $\Sigma$ éruapa and $\Sigma \in u-$ $\sigma \dot{\alpha} \mu o \rho \alpha$, Strab．xi．p．501）， 2 town in the Caucasian Iberia．
［T．H．D．］
SEVO，a lofty mountain in the extreme north of ancient Germany，in the island of Scandia，in the territory of the Ingaevones．It was believed to equal in extent and magnitude the Ripaei Montes．（Plin． iv． 27 ；Solin．20．）There can be no doubt that this mountain is the same as Mount Kjülen which at present separates Sweden from Norway，and the southern branch of which still bears the name of Seve－ Ryggen．［Scandia．］
［L．S．］
SEURRI．［Seburri．］
SEX．［Saxetanum．］
 Aed．iv．11．p．307），a town of Moesia Inferior，on the Danube，on the great high－road between Tri－ mammium and Tigra．（liin．Ant．p．222．）Ac－ cording to the Notit．Imp．（where it is called Sexagintaprista），the 5th cohort of the 1st Legio Ital．， together with a squadron of cavalry，lay in garrison here．Some identify it with Ruslschuk，whilst others place it further to the E．，near Lipnik．［T．H．D．］

SENTANTIO，in Gallia Narbonensis．The true name of this place is preserved in an inscription found at Nemausus（Nimes），and published by Ménard．The name is written Sextatio in the An－ twinise Itin ；and Sostantio in the Jerusalem Itin． The remains of Sextantio are supposed to be those which are about 3 miles north of Montpellier，on the banks of the Ledus（Lez）．

SHAALABBIN（ （ $a \lambda a \mu i v$, LXX．），a city of the tribe of Dan（Josh．xix．42）joined with Ajalon （Iaa入ćv），and mentioned in the LXX．（not in the Hebrew）as one of the cities in which the Amorites continued to dwell，after the occupation of Canaan by the Israelites（xix．48）．This last fact identifies it with the Shalbim（LXX．Ba入abiv）of the book of Judges（i．35），which is also joined with Aijalon， and of which the same fact is related．It is there placed in Mount Heres．Eusebius mentions a village named Salaba（ KaNa6d），in the borders of Sebaste（Onomast．s．v．），which could not be in Dan：but S．Jerome（Comment．in Ezech．xlviii．） mentions three towns in the tribe of Dan，Ailon， Selebi and Emaus．It is joined with Makaz and Beth－shemesh in 1 Kings iv．9，which also indicates a situation in or near the plain of Sharon．In Mr． Sinith＇s list of places in the district of Ramleh，is a village named Selbit，containing all the radicals of the Scripture name，and probably identical with Selebi of Josephus，as the modern Yalo is with Ajalun and＇Amecis with Emmaus．Its place is not detinitely fixed．（Rubinson，Bibl．Rcs．vol．iii． 2ud appeudix，p．120．）
［G．W．］

SHALISHA（LXX．Alex．$\sum \dot{a} \wedge \iota \tau \sigma a$, Vat．$\left.\Sigma \in \lambda x a\right)$ ， a district of Palestine，in or near Mount Ephraim（l Sam．ix．4），in which was probably situated Baal Shalisha．［Banl Shalisha．］
［G．W．］
SHARON（ Kapஸ́v：Eth．इapwvitns）．1．Part of the great western plain of Palestine，distinguished for its fertility，mentioned by the prophet Issiah with＂the glory of Lebanon，and the excellency of Carmel and Sharon．＂（Isaiah，xxxv．2．）＂The rose of Sharon＂is used proverbially in the Canticles （ii．1．）It is remarkable that the name dies not occur in either of these passages in the LXX．，but in the latter is translated by Gutos tov rediou，by which appellative Symmachus translates it in the former passage，while Theodotion and Aquila retain the proper name．Its richness as a pasture land is intimated in 1 Chronicles（xxvii．29），where we read that＂Shitrai the Sharonite＂was overseer of David＇s ＂herds that fed in Sharon？＂It doubtless derived its name frym a village mentioned only in the New Testament（Acts，ix．35）in connection with Lydda， in a manner that intinates its vicinity to that town．Its site has not been recovered in modern times，but it occurred to the writer，on the spot， that it may possibly be represented by the rillage of Butus（ $=$ Peter），on the north of the road between Lydda and Bethoron，and may have changed its name in honour of the Apostle，and in commemora－ tion of the miracle wrought by him．S．Jerome in his commentaries limits the name to the district about Joppa，Lydda，and Iamnia（ad Ies．xxxiii．lxv．） Eusebius calls the district Saronas（ Eapoovas），and extends it from Joppa to Caesareia（of Palestine）； while other writers reckon to it the whole of the coast north of Caesareia，as far as Carmel．（Ono－ mast．sub voce．）The width of the plain about Jaffa is little less than 18 miles，and the luxariance of its soil is still attested by the numerous wild flowers with which it is carpeted in the spring，－ roses，lilies，tulips，narcissus，anemones，carnations， and a thousand others，no less than by the abun－ dant regetation and increase where the land is cul－ tivated as garden or corn land．（Ritter，Palüstina， \＆c．vol．iii．part i．pp．25，586－588．）Reland has shown that the classical name for this fruitful dis－ trict was $\delta \rho u \mu$ bs，which Strabo joins with Carmel， as then in the power of the pirates who had Joppa for their port（xvi．2．§ 28，p．759）．Reland sug－ gests an ingenious account of this synonym，which appears also in Josephus（who dues not use the Scripture name）inconnection with Carmel，in a man－ ner that clearly points to the district described by Strabo under the same name．In one passage the
 кaлcirat，Ant．xiv．13．§ 3）；in the parallel pas－ sage it is singular（ $\mathbf{\epsilon \pi} \boldsymbol{\pi}$ тो ка入oú $\mu \in \nu=\nu \quad \Delta \rho v \mu \sigma \nu$ ， Bell．Jud i．13．§ 2）．Now $\delta \rho u \mu{ }^{\prime}{ }^{\prime}$ ，according to ancient etymologists，signified any kind of wood， and，as Ritter remarks，the traces of the forests of Sharon are still to be discovered in the vicinity of Carmel；but according to Pliny the Sinus Saronicus derived its name from an oak grove，＂ita Graecia antiqua appellaate quercum．＂（ $H . N$ ．iv．5．s．9．） The very probable conjecture of Reland therefore is that $\Delta \rho u$ uós is simply a translation of Saron or Sarona，for according to the Etymolngicum Magnum

2．Eusebius and St．Jerome recognise another Sharon，to which they apply the prophecy of lsaiah （xxxiii．9），＂Sharon is like a wilderness＂（\％${ }^{2} \eta$ dyeveto o Edowv，LXX．），which they refer to the
country between Tabor and the sea of Tiberias (Onomast. s. v.) But an the name is here introduced in connection with Lebanon and Carmel, Bayhan being also introduced,-and as no other notice of a Galiaean Sharon is to be met with, it seems more reasonable to refer the notice in Isaiah to the plain of Sharon on the west coast.
3. There was certainly another Sharon beyond Jordan, apparently near the region of Gilead, for the children of Abihail, of the tribe of Gad, are said to have ${ }^{4}$ dwelt in Gilead in Bashan, and in her towns, and in all the suburbs of Sharon " (1 Chron. v. 16); and it is possible that "the herds that fed in Sharon," under charge of David's chief herdsman, Shitrai the Sharonite, may have pastured in this trans-Jordanic district, not in the plain of the Mediterranean. Beland indeed maintains that the mention of the suburbs of Sharon in connection with the Gadites, is no proof of the existence of a trans-Jordanic Sharon, for that, as the tribe of Gad was specially addicted to pastoral pursuits, they may have pastured their flocks in the suburbs of the towns of other and distant trites. But this hypothesis seems much more forced than the very natural theory of a second Sharon in the tribe of Gad properly so called. (Palaestina, pp. 370, 371,988 .) [G. W.]

SHAVEH (LXX. Vat. $\dot{\eta}$ kothds тov̂ इabú, Alex. $\dot{\eta}$ Eavin). "The valley of Stiaveh, which is the king's dale," where Melchizedek met Abraham returning from the slaughter of the kings. (Gen. xiv. 17.) The learned are not agreed concerning the city of Melchizedek. They who regard his Salem as identical with Jerusalem, naturally identify " the king's dale," equivalent to "the valley of Shaveh," with "the king's dale ${ }^{n}$ where Absalom erected his monument ( 2 Sam. xviii. 18), and place it in the vicinity of "the king's fardens," in the valley of the Kedron, where tradition prints out "Absalom's hand" or place. [Jerusalem, Vol. II. p. 17, a. and p. 23, b.]
[G. W.]
SHAVEH KIRJATHAIM ( Iranslated by the LXX. Eavì $\dot{\eta} \pi \delta \lambda(s)$, the original seat of that very ancient people the Einims, where they were smitten by Chedurlaomer, king of Elam. (Gen. xiv. 5.) It no doubt passed with the other possessions of the Emims to the Moabites (Deut. ii. 9-11), and is probably identical with the Kiriathaim (LXX. KapiaOalر) of Jeremiah (xiviii. 23) and Ezekiel (xxv. 9).

Sheba. [Sabaea.]
SHECHEM. [Neapolis II.]
SHILOH. [Silo.]
SHITTIM (LXX. Earteiv al. Zartiv), the last station of the Israelites befure crossing the Jordan. described to be by Jordan in the plains of Muab. Abel-shittim was at one extremity of their vast encampment, as Beth-Jesimoth was at the other. (Numb. xxv. 1, $\mathbf{x x x i i i} .49$.) It was from thence that Joshua sent the spies to reconnoitre Jericho (Josh. ii. 1), and from thence that they marched to their miraculous passage of the Jordan (iii. 1). In Micah (vi. 5) it is mentioned in connection with Gilgal, being the last encampment on the east of Jordan, as Gilgal was the first on the west. Here the LXX. render àmò tồ $\sigma$ रoiv $\boldsymbol{\gamma}$ à .
[G. W.]
SHUNEM (LXX. $\Sigma \omega \mu \alpha \nu: E t h . \Sigma \omega \mu a \nu i \tau \eta \dot{s}, \Sigma \omega-$ mavitis), a villace of Palestine celebrated as the birthplace of Abishag ( 1 Kings, i. 3), and for the miracle of Elisha. (2 Kings, iv.) It was situated in Iskachar (Josh. xix. 18; LXX. इouvá $\mu$ ), near Gilbon, to the north; for when Saul and the Is-
raelites were encamped in Gilboa, the Philistines pitched in Shunem, so that he had to pass through their lines to come to Endor. (1 Sam. xxviii. 4.) Eusebius mentions a village named Sanim, in the borders of Sebaste, in the district of Acrabattene, which cannot be identical with this. But the Subem ( 6 $\quad \mathrm{h} \mu$ ) of the same author, which he places v. M. P. south of Mount Tabor, corresponds very well with the site of the modern village of Sollam, which still marks the site of ancient Shunem. It is a miserable village, situated abore the plain of Esdraelon, on the road between Jenin and Nazareth, about $1 \frac{1}{2}$ hour north of Zerin, ancient Jeareel, on the sterp slope of the western spur of Little Hermon (EdDühy).
[G. W.]
SHUR (Zoúp, LXX.), a place repeatedly mentioned to describe the western extremity of the borders of the posterity of Ishmael (Gen. xxy. 18), of the Amalekites only ( 1 Sam. xv. 7), of the Geshurites, Gezrites, and Amalekites (xxvii. 8), in all which passages it is placed " over against," "before," and on the way to Egypt. Hagar's well, afterwards called Beer-lahai-roi, between Kidesh and Bered, was "in the way to Shur." (Gen. xri. 7, 14.) The name is still found in the south of l'alestine. " Moilahhi ( $=$ Beer-lalıai-roi) lies on the great roud from Beersheba to Shur, or Jebel-es-Sur, which is its present name,-a grand chain of mountains rumning north and south, a little east of the longitude of Suez, lying, as Shur did, before Ecryt. (Gen. xvi. 7.) It lies at the sonth-west extremity of the plain of Paran, as Kadesh does at its utmost north east extremity. (Rowlands, in Williams's Holy City, vol. i. appendix No. 1. pp. 465, 466.)
[G. W.]

## SHUSHAN. [Stsa.]

SIAGUL (Elayoúd, Ptol. iv. 3. § 9. (the most easterly town of Zeugitana, only 3 miles from the coast, and to which Putput served as a harbour. Shaw (Travels, ch. 2) identifies it with some ruins at the village of Kassir-Asseite, from two inscriptions which he found there, with the words Civ. Siagitana; but which he inust have read incorrectly. since the town would have been called Siagulitana. According to Maffei (Mus. Veron. p. 457. 2) there is also an inscription with the words Civ. Siagitana near Turuz in Africa; which Orelli (i. p. 334) refers either to Sigus in Numidia or to Sigu in Mantitania Caenariensis.
[T. H. D.]

## SIANTICUM. [Santicum.]

SIARCM, a town of Hispania Baetica, SE. of Hispalis. Now Saracatin, in the territory of Etrera. (Plin. iii. 1. s. 3; Gruter, Inscr. p. 803; Florez, Med. ii. p. 571, iii. p. 117, Esp. Sagr. ix. p. 112, \&c.)
['T. H. D.]
SIATA, an island on the Gallic coast, which is mentioned in the Maritime Itin. after Vindilis, or Belle Isle. D'Anville conjectures Siata to be the Isle de Houat, which is off the coust of the department of Morbihan, and between Belle Isle and tho mainland.
[G. I..]
SIATUTANDA (Eıaroútavסa), is mentioned by Ptolemy (ii. 11. § 27) as a town of Germany; but had probably no existence at all, the geographer imagining that in the words of Tacitus ( $d n n$. iv. 73), "ad sua tutanda digressis rebellibus" the name of some town was contained. Notwithstanding this evident origin of the name, some modern geographers still persist in assuming a town sistutanda. [L.S.]

SI'BAE (Ei6at, Arrian, Ind. c. 5; Diod. xvii. 96; Strab. xv. p. 688), a nation of the Panjub. beluw

SIBARIA.

## SICAMBRI.

the junctinn of the Hydaspes and Acesines, encountered by Alexander in his attempt to invade India. They are described as a rude, warlike people, armed only with clubs for defensive weapons. The Greeks noticed this use of the club, and that the people were in the habit of branding the representation of a club on the backs of their cattle, and that they were clothed in the skins of wild animals. From these facts they inferred that they must be descendants of Hercules. There can be doubt that they are the same race as are called Sobii in Curtius (ix. 4. § 2). A tribe of similar character, called Siapul or Siapuch, still exists in that country, who use the club, and wear the skins of gaats for clothing. (Ritter, vii. p. 279, v. p. 467 ; Bohlen, Alte-Indicn, i. p. 208.) It is possible that they have derived their name from the god Siva. [V.]

SIBARIA, a town of the Vettones in Hispania Tarraconensis, N. of Salmantica, and on the road from Emerita to Caesaraugusta. (Itin. Ant. p. 434.) Variously identified with Santiz, Fuente de Saburra. Periausende, and Zamocina. [T. H. D.]
 place in Caria, and one of the six towns which were given by Alexander the Great to Ada, a daughter of king Hecatomnus of Halicarnassus, and thus became subject to Halicarnassus. (Steph. B. s. v.; Plin. v. 29.) Its exact site cannot be ascertained. [L.S.]

SIBERE'NA ( $\Sigma 16 \in \rho \eta \eta_{\eta} \eta$ : Sta Severina), a town of Brattium situated in the monntains about 15 miles NW. of Crotoma. The name is mentioned only by Stephanus of Byzantium (s. v.), who calls it an Oenotrian city, but it is probable that it is the same place which is now called Santa Severina, an appellation that is already noticed by Constantine Porphyrogenitus in the tenth century. It was at that time apparently a place of importance, but is now much decayed. (Const. Porph. de Adm. Imp. ii. 10; Holsten. Obs. in Steph. Byz. s. v.) [E.H. B.]

SI'BERIS ( $\sum^{\prime} 6_{6} \rho(s)$, a river of Galatia, a tributary of the Sangarius; it flowed in a southwestern direction, and joined the main river near the little town of Syceon, not far from Juliopolis. (l'rocnp. de Acd. v. 4.) Procopius also mentions that this river frequently overflowed its banks, a fact which is perhaps alluded to in the name of a station called Hycron I'otamon, about 13 miles east of Juliopolis (It. Hieros. p. 574); though it is possible also that the name may be misspelt for Hieron Potamon, which is only another name for the Hieras of Pliny (v. 43), and unquestionably identical with the Siberis which now bears the name of Kirmir.
[L.S.]
SIBUZA'TES, an Aquitanian people, who submitted to I'. Crassus, Caesar's legatus in B. c. 56. (B. G. iii. 27.) There are many varieties in the manuscript readings of this name. It is merely by conjecture founded on resemblance of name, that they have been placed about Saubusse or Sobusse, on the Adour, between Aquas Turbellicse (Dax) and Bayonne.
[G. I..]
SIBYLLA'TES, one of the Aquitanian tribes mentioned by Pliny (iv. 19). D'Anville conjectures that the name is preserved in that of the Vallis Subola, mentioned by Fredegarius. He argues that they cannot be the same people as the Sibuzates who submitted to P. Crassus, because Caesar speaks of a few of the remotest Aquitanian trikes which did not submit to the Roman generul, trusting to the approaching winter season (B.G. iii. 27); from which remark we may infer that these remotest tribes were in the vallegs of the Pyrenees. "The peopie of the
valley of Somle might derive this advantage from their situation, which is shut in between Lovo Navarre and the high part of Béarn." (D'Anville.) [G. L.] SIBYRTUS. [Sybilita.]
SICAMBRI, SYCAMRRI, SYGAMBRI, SUGAMBHI, or SUCAMBRI ( Eírau6pot, Zoírau6pou, or $\Sigma$ इoúraulfot). a powerful German tribe, occupving in the time of Caesar the eastern bank of the Rhine, and extending from the Sieg to the Lippe. It is generally assumed that this tribe derived its name from the little river Sizg, which falls into the Rhine a little below Bonn, and during the middle ages was called Sega, Segaha, but is not mentioned by any ancient writer; this assumption, however, is at least only a probable conjecture, though it must be admitted that in the time of Caesar they inhabited the country north and south of the Sieg, and to the north of the Ubii. (Caes. B. G. iv. 16, foll., vi. 35; Strab. vii. pp. 290, 291 ; Dion Cass. xxxix. 48, xl. 32, liv. 20, 32, 33, 36.) When the Usipetes and Tencteri were defeated by Caesar, the remnants of these tribes took refuge in the country of the Sicambri, who took them under their protection. Caesar then demanded their surrender; and this being refused, he built his famous bridge across the Rline to strike terror into the Germans. The Sicambri, however, did nut wait for his arrival, but, on the advice of the U.ipetes and Tencteri, quitted their own country and withdrew into forests and uninhabited districts, whither Caesar neither would nor could follow them. A few years later, в. c. 51, during the war against the Eburones, we find Sicambri fighting against the army of Caesar on the left bank of the Khine. and nearly defeating the Romans; Caesar's arrival, who had been in another part of Gaul, alone saved his legions. The Sicambri were then obliged to return across the Rhine. In B. c. 16 the Sicambri, with the Usipetes and Tencteri, again invaded Gallia Belgica, and M. Lollius, who had provoked the barbarians, sustained a serious defeat. A similar nttack which was made a few years later, was repelled by Drusus, who pursued the Germans into their own country. After the withdrawal of the Remans, the Sicambri formed a confederation among their conntrymen against the common eneny, and as the Chati who had received the country of the Ubii on the right bank of the Rhine, refused to join them, the Sicambri made war upon them; and as they left their own territory unprotected, Drusus penetrated through it into the interior of Germany. After the death of Drusus, Tiberius undertook the completion of his plans against Germany. None of the tribers offered a more vigorous resistance than the Sicambri; but in the end they were obliged to submit, and 40,000 Sicambri and Suevi were transplanted into Gaul, where as subjects of Rome they received settleinents between the lower course of the Meruse and the Rhine. In that country they subsequently formed an important part of the nation or confederacy of the Franks. Those Sigambri who were not transplanted into Gaul seem to have withdrawn into the hills of Mons Retico, and for a long time they are not mentioned in history; they reappear in the time of Ptolemy (ii. 11. § 8), when they are spoken of as neighbours of the Bructeri Minores. The Sicambri are described as hold, brave, and cruel, and we hear nothing of towns in their country; they seem in fact to have iived in villages and isolated farms. (Caes. B. G. iv. 19 ; comp. Tac. Am. ii. 26, iv. 47, xii. 39; Suet. Aug. 21, Tib. 9; Eutrop. vii. 9; Oros. vi. 21; Hurat. Carm. iv. 2. 36. 14.

SICI＇LIA（之ıкe入ia：Eith．Zıкe入tótns，Siciliensis： Sicily），one of the largest and most important islands in the Mediterranean．It was indeed gene－ rally reck，ned the largest of all；though some ancient writers considered Sardinia as exceeding it in size， a view which，according to the researches of modern geographers，turns out to be correct．［Sakdinia．］

## I．General Drscription．

The general form of Sicily is that of a triangle， having its shortest side or base turned to the E．， and separated at its NE．angle from thee adjoining coast of Ituly only by a narrow strait，called in ancient times the Fretcm siculum or Sicilian Strait，but now more commonly known as the Straits of Messina．It was generally believed in antiquity that Sicily had once been joined to the continent of Italy，and severed from it by some natural conrul－ sion．（Strab．vi．p．258；Plin．iii．8．s．14；Virg． Aen．iii．414．）But though this is probably trae in a geological sense，it is certain that the separation must have taken place at a very early period，not only long before the historical age，but before the first dawn of tradition．On the other side，the W．extre－ mity of Sicily stretches out far towards the coast of Airica，so that the westernmost point of the island， the headland of Lilybaeum，is separated only by ar： interval of 80 geogr．miles from the Hermacan Promontory，or Cape Bon in Africa．

The general triangular form of Sicily was early recognised，and is described by all the ancient geo－ graphers．The three promontories that may be con－ sidered as forming the angles of the triangle，viz． Cape Pelorus to the NE．，Cape Pachynus to the SE．， and Lily baeum on the W．，were also cenerally known and received（1＇ol．i．42；Strab．vi．pp．265，266； Plin．iii．8．s． 14 ；Ptol．iii．4；Mel．ii．714）．Its dimensions are variously given：Strabo，on the au－ thority of Posidonius，estimates the side from Pelo－ ras to Lilybaeum，which he reckons the longest，at 1700 stadia（or 170 geogr．miles）；and that from Pachynus to Pelorus，the shortest of the three，at 1130 stadia．Pling on the contrary reckons 186

Roman miles（ 149 geogr．）from Pelorus to Pachy－ nus， 200 M．P．（ 160 geogr．miles）from Pachynus to Lilybaeum，and 170 M．P．（ 136 gengr．）from Lilybaeum to Pelorus：thus making the northern side the shortest instead of the longest．But Strabo＇s views of the proportion of the three sides are entirely correct；and his distances but little exceed the truth，if some allowance be made for the wind－ ings of the coast．Later gengraphers，from the time of Ptolemy onwards，erroneously conceived the position of Sicily as tending a great deal more to the SW．than it really does，at the same time that they gave it a much more recular triangular form；and this error was perpetuated by modern geographers down to the time of D＇Anville，and was indeed not altogether removed till the publication of the va－ luable coast survey of the island by Captain Smyth． （Nee the map published by Magini in 1620，and that of D＇Anville in his Analyse Géographique de ［Italie，Paris 1；44．）

A considerable part of Sicily is of a mountainous charac：er．A range of mountains，which are geolo－ gically of the same character as those in the southern portion of Bruttium（the group of Aspromonte）， and may be considered almost as a continuation of the same chain，interrupted only by the intervening strait，rises near Cape Pelorus．and extends at first in a SW．direction to the neighbourhood of Taur－ $\operatorname{mina}$（Tauromenium）from whence it turns nearly due W．and continues to hold this course，running parallel with the N．coast of the island till it rises into the elevated group of the Monte Madonia，a little to the S．of Cefaliu（Cephaloedium．）From thence it breaks up into more irregular masses of limestone mountains，which form the central nuclens of the W．portion of the island，while their arms extending down to the sea encircle the Bay of Palermo，as well as the more extensive Gulf of Castellamare，with bold and almost isolated head－ lands．The detached mass of Mount Eryx（Monte di S．Giuliano）rises near Trapani almost at the W． extremity of the island，but with this exception the W．and SW．coast round to Sciacca． 20 miles be－ yond the site of Selinus，is comparatively low and shelving，and presents no bold features．Another range or mass of mountains branches off from that of the Monte Madonia near Polizzi，and trends in a SE．direction through the heart of the island， forming the liuge hills，rather than mountains，on one of which Einna was built，and which extend from thence to the neighbourhood of Piazza ard Aidone．The whole of the SE．corner of the island is occupied by a mass of limestone hills，never rising to the dignity nor assuming the forins of moun－ tains，but forming a kind of table－land，with a general but very gradual slope towards the $S$ ．and SE．；broken up，howerer，when viewed in detail， into very irregular masses，being traversed by deep valleys and ravines，and presenting steep escarpments of limestone rock，so as to constitute a rugged and difficult country．

None of the mountains above described attain to any great elevation．The loftiest group，that of the Monte Madonia，does not exceed 3765 feet．while the average height of the range which extends from thence to Cape Pelorus，is little，if at all，above 3000 feet high．Montc S．Giuliano，the ancient Eryx，erroneounly considered in ancient times as the highest mountain in Sicily after Aetna［Enrx］．is in reality only 2184 feet in height（Smyth＇s Sicily， p．242）．The ancient appellations given to these

## SICILIA.

mountains seem to have been somewhat vague and fluctuating; but we may assign the mame of Nextunius Mons to the chain which rises at Cape Pelorus, and extends from thence to the neighbourhood of Tauromenium; while that of Mons Nebrodes seems to have been applied in 2 more general sense to the whole northerly range extending from near Tauromenium to the neighbourhood of Panormus; and the Heraei Montes of Diodorus can be no others than a part of the same range. (See the respective articles.) But incomparably the most important of the mountains of Sicily, and the most striking physical feature of the whole island, is the great volcanic mountain of Aetna, which rises on the $E$. coast of the island, and attains an elevation of 10.874 feet, while its base is not less than 90 miles in circumference. It is wholly detached from the mountains and hills which surround it, being bounded on the N. by the river Acesines or Alcantara, and the valley through which it flows, and on the W. and S. by the Symaethus, while on the E. its streams of lava descend completely into the sea, and constitute the line of coist for a distance of near 30 miles. The rivers already mentioned constitute (with trifling exceptions) the limits of the volcanic district of Aetna, but volcanic formations of older date, including beds of lava, ecoriae, \&c., are scattered uver a considerable extent of the SE. portion of the island, extending from the neighbourhood of Palagonia to that of Paluzzolo, and even to Syracuse. These indeed belong to a much more ancient epoch of volcanic action, and can never have been in operation since the existence of man upon the island. The extensive action of volcanic fires upon Sicily was, however, observed by the ancients, and is noticed by several writers. The apparent connection between Aetna and the volcannes of the Aeolian Islands is mentioned by Strabo, and the same author justly appeals to the craters of the Palici, and to the numerous thermal springs throughout the island, as pronfs that the subterranean agencies were widely diffused beneath its surface (Strab. vi. pp. 274, 275).

- Few countries in Europe surpass Sicily in general productiveness and fertility. Its advantages in this respect are extolled by many ancient writers. Strabo tells us (vi. p. 273) that it was not inferior to Italy in any kind of produce, and even surpassed it in many. It was generally believed to be the native country of wheat (Diod. v. 2), and it is certain that it was not surpassed by any country either in the abundance or quality of this production. It was equally celebrated for the excellence of its honey and its saffron, both of which were extensively exported to Rome; as well as for its sheep and cittle, and excellent breeds of horses, among which those of Agrigentum seem to have been the most celebrated (Strab. l.c.; Sil. Ital. xiv. 23; Virg. Aen. iii. 704). There were indeed no exteusive plains, like those of Campania or Civalyine Gaul; the largest being that now called the Piano di Catanin. extending along the banks of the Symaethus, and known in ancient times as the Leontintis or Lafestryconics Campus. But the whole island was intersected by numerous streams, and beautiful valleys; and though a considerable part of its surface (as already observed) was occupied either by mountains or rocky hills, the slopes and undertalls of these abounded in scenery of the most charming description, and were adapted for the growth of vines, olives, and fruits of every descrifition.

The climate of Sicily may be considered as intermediate between those of Southern Italy and Africa. The northern part of the island, indeed, closely resembles the portion of Italy with which it is more immediately in contact; but the sont hern and southwestern parts present strong indications of their more sontherly latitude, and have a parched and arid appearance (at least to the eyes of northern travellers), except in winter and spring. The abundance also of the dwarf palm (Chamaerops humilis Linn.), a plant unknown to other parts of Europe, tends to give a peculiar aspect to these districts of Sicily. The climate of the island in general was certainly not considered unhealthy in ancient times; and though at the present day many districts of it suffer severely from malaria, there is good reason to believe that this would be greatly diminished by an increased population and more extensive cultivation. It is remarkable, indeed, in Sicily, as in the south of Italy, that frequently the very sites which are now considered the most unhealthy were in ancient times occupied by flourishing and populous cities. In many cases the malaria is undoubtedly owing to local causes, which might be readily obviated by draining marshes or affording a free outlet to stagnant waters.

## II. History.

The accounts of the early population of Sicily are more rational and consistent than is generally the case with such traditions. Its name was obviously derived from that of the people who continued in historical times to be its chief inhabitants, the Siculi or Sicels (Eikedot); and the tradition universally received represented these as crossing over from the mainland, where they had formerly dwelt, in the extreme southern portion of Italy. Thie traditions and notices of this people in other parts of Italy, and of their previous wanderings and migiations, are, indeed, extremely obscure, and will be discussed elsewhere [SICULI] ; but the fuct that they were at one time settled in the Bruttian peninsula, and from thence passed over into Sicily, may be safely received as historical. There is every probability also that they were not a people distinct in their origin from the races whom we subsequently find in that part of Italy, but were closely connected with the Oenotrians and their kindred tribes. Indeed, the names of $\Sigma$ Eiceid's and 'Ita入b's are considered by many philologers as of common origin. There seems, therefore, little doubt that the Sicelis, or Siculi, may be regarded as one of the branches of the great Pelasgic race, which we find in the earliest times occupying the southern portion of Italy: and this kindred origin will account for the facility with which we find the Sicels subsequently auiopting the language and civilisation of the Greek colonists in the island, at the same time that there remain abundant traces of their common descent with the people of Italy.

But the Sicels, who occupied in the historical period the greater part of the interior of the island, were mot, according to the Greek writers, its earliest inhabitants. Thurydides indeed assigns their immigration to a period only three centurics before the settlement of the first Greek colonies (Thuc. vi. 2); and Dicolorus, without assigning any date, agrees in representing them as the latest comers among the native population of the island (Diod. v. 6). The first notices of Sicily allude to the existence of races of gigantic men, of savage manners, under the
names of Laestrygones and Cyclopes; but these fabulous tales, preserved only by the early poets in a manner that renders it impossible to separate truth from falsehood, are justly discarded by Thucydides as anworthy of serious consideration (Thuc. vi. 2). It may suffice to remark, that Homer (of course, the earliest authority on the subject) says nothing directly to prove that he conceived either the Cyclopes or Laestrygones as dwelling in Sicily; and this is in both cases a mere inference of later writers, or of sone tradition now unknown to us. Homer indeed, in one passage, mentions (but not in connection with either of these savage races), "the island of Thrinakia " (Odyss. xii. 127), and this was generally identified with Sicily, though there is certainly nothing in the Odyssey that would naturally lead to such a conclusion. But it was a tradition generally received that Sicily had previously been called Trinacria, from its triangular form and the three promontories that formed its extremities (Thuc. ri. 2; Diod. v. 2 ; Strab. vi. p. 265), and this name was connected with the Homeric Thrinakia. It is obvious that such a name could only have been given by Greek navigators, and argues a considerable amount of acquaintance with the configuration of its shores. It could not, therefore, have been (as supposed even by Thucydides) the original or native name of the island, nor could it have been in use even among the Greeks at a very early period. But we cannot discard the general testimony of ancient writers, that this was the earliest appellation by which Sicily was known to the Greeks.

Another people whom Thncydides, apparently with good reason, regards as more ancient than the Sicels, were the Sicani, whom we find in historical times nccupying the western and north-western parts of the island, whither, according to their own tradition, they had been driven by the invading Sicels, when these crossed the straits, though another tradition ascribed their removal to the terror and devastation caused by the eruptions of Aetna (Thuc.vi.2; Diod. v. 6). The Sicanians claimed the honour of being autochthons, or the original inhatitants of the island, and this view was followed by Timacus; but Thucydides, as well as Philistus, adopted another tradition, according to which they were of Iberian extraction (Thuc. l.c.; Diod. l. c.). What the arguments were which he regards as conclusive, we are anfortunately wholly ignorant; but the view is in itself probable enough, and notwithstanding the close resemblance of name, it is certain that throughout the historical period the Sicani and Siculi are uniformly treated as distinct races. Hence it is improbable that they were merely tribes of a kindred origin, as we should otherwise have been led to infer from the fact that the two names are evidently only two forms of the same appellation.

A third race which is found in Sicily within the historical period, and which is regarded by ancient writers as distinct from the two preceding ones, is that of Eirymi, who inhabited the extreme northwestern corner of the island, about Eryx and Segesta. Tradition ascribed to them a Trojan origin (Thuc. vi. 2; Dionys. i. 52), and though this stury is probably worth no more than the numerous similar tales of Trojan settlements on the coust of Italy, there must probably have been some foundation for regarding them as a distinct people from their neighbours, the Sicani. Buth Thucydides and Scylax specially mention them as such (Tluc. l. c.; Sicyl. p. 4. § 13): but at a later period, they seem to VOL IL
have gradually disappeared or been merged into the surrounding tribes, and their name is not again found in history.

Such were the indigenous races by which Sicily was peopled when its coasts were first visited, and colonies establishied there, by the Ploenicians and the Greeks. Of the colonies of the former yeople we have little information, but we are told in general by Thucydides that they occupied numerous points around the coasts of the island, establishing themselves in preference, as was their wont, on projecting beadlands or small islands adjoining the shore. (Thuc. vi. 2). But these settlements were apprarently, for the most part, mere trading stations, and as the Greeks came to establish themselves permanently and in still increasing numbers in Sicily, the Phoenicians gradually withdrew to the NW. corner of the island, where they retained three permanent settlements, Motya, Panormus, and Solveis or Soluntum. Here they were supported by the alliance of the neighbouring Elymi, and had also the advantage of the proximity of Carthage, upor. which they all became eventually dependent. (Thuc. l.c.)

The settlement of the Greek colonies in Sicily began about the middle of the eighth century m. $C$, and was continued for above a century and a half. Their dates and origin are known to us with much more certainty than those which took place during the corresponding period in the south of Italy. The earliest were established on the $\mathbf{E}$. coast of the island, where the Chalcidic colony of Naxos was founded in b.c. 735, and that of Syracese the following year (в. c. 734), by a body of Corinthian settlers ander Archias. Thus the division between the Chalcidic and Doric colonies in Sicily, which bears so prominent a part in their politicul history, became marked from the very outset. The Chalcidians were the first to extend their settlements, having founded within a few years of the parent colony (about b. с. 730) the two cities of Leontini and Catana, both of them destined to bear an important part in the affairs of Sicily. About the same time, or shortly after (probably about в. c. 728), a fresh body of colonists from Dlegara founded the city of the same uame, called, for distinction's sake, Megara Hyblaka, on the E.coast, between Syracuse and Catana. The first colony on the S . coast of the island was that of Gela, founded in в. c. 690 , by a body of emigrants from Rhodes and Crete; it was, therefore, a Doric colony. On the other hand, the Chalcidians founded, at what precise period we know not, the colony of Zancle (afterwards called Messana), in a position of the utmost importance, as commanding the Sicilian Straits. The rapid rise and prosperity of these first settlements are shown by their having become in their turn the parents of other cities, which soon vied with them, and, in some cases, surpassed them in importance. Thus we find Syracuse extending its power by establishing in succession the colonies of Acrae in b. c. 664, Casmenae in b. c. 644, and Cararina in b. c. 599. Of these, the last alone rose to be a flourishing city and the rival of the neighbouring Gela. The latter city in its turn founded the culony of Agrigentim, in b. c. 580, which, though one of the latest of the Greek colonies in the island, was destined to becume one of the most powerful and flourishing of them all. Still further to the W.. the colony of Seluncs, planted as carly as в. c. 628, by a body of settlers from the Hyllaean Megara, reinforced with emigrants from the parent city in Greece, rose to a state of power

3 ュ
and prosperity far surpassing that of either of its mother cities. Selinus was the most westerly of the Greek colonies, and immediately bordered on the territory of the Elyini and the Phoenician or Carthaginian settlements. On the N. coast of the island, the only independent Greek colony was Himera, founded about b. c. 648 by the Zanclacans; Myine, another colony of the same people, having apparently continued, from its proximity, to be a mere dependency of Zancle. To the above list of Greek colonies must be added Calinipolis and Euboea, both of them colonies of Naxss, but which never seem to have attained to consideration, and disappear from history at an early period.*

Our accounts of the early history of these numerous Greek colonies in Sicily are unfortunately very scanty and fragmentary. We learn indeed in general terms that they rose to considerable power and importance, and enjoyed a high degree of wealth and prosperity, owing as well to the fertility and natural advantages of the island, as to their foreign commerce. It is evident also that at an early period they extended their dominion over a considerable part of the adjoining country, so that each city had its district or territory, often of considerable extent, and comprising a subject mpulation of native origin. At the same time the Sicels of the interior, in the central and northern parts of the island, and the Sicanians and Elymi in the W., maintained their independence, though they seem to have given but little trouble to their Greek neighbours. During the sixth century b. c. the two most powerful cities in the island appear to have been Agrigentum and Gela, Syracuse not having yet attained to that predominance which it subsequently enjoyed. Agrigentum, though one of the latest of the Greek colonies in Sicily, seems to have risen rapidly to prosperity, and under the able, though tyrannical government of the despot Phalaris (B. c. 570-554) became apparently for a time the most powerful city in the island. But we know very little about his real history, and with the exception of a few scattered and isolated notices we have hardly any account of the affairs of the Greek cities before b. c. 500. At or before that period we find that a political change had taken place in most of these communities, and that their governments, which had originally been oligarchical, had passed into the hands of despots or tyrants, who ruled with uncontrolled power. Such were Panaetius at Leontini, Cleander at Gela, Terillus at Himera, and Scythes at Zancle (Arist. Pol. v. 12 ; Herod. vi. 23, vii. 154). Of these Cleander seems to have been the most able, and laid the foundation of a power which enabled his brother and successor Hippmerates to extend his dominion over a great part of the island. Callipolis, Leontini, Naxos, Zancle, and Camarina successively fell under the arms of Hippocrates, and Syracuse itself only escaped subjection by the intervention of the Corinthians (Herod. vii. 154). Bat what Hippocrates had failed to effect was accomplished by Gelon, who succeeded him as despot of Gela, and by interposing in the civil dissensions of the Syracusans ultimately succeeded in making

* The above summary of the progress of Greek colonisation in Sicily is taken almost wholly from Thucydides (vi. 3-5). See, however, Scymnus Chius (270-299) and Strabo (vi. pp. 267-272). The dates are fully discossed by Clinton (Fasti Hellenici, vol. i.).
himself master of that city also, в. c. 485. From this time Gelon nerlected his former government of Gela, and directed all his efforts to the aggrandizement of his new acquisition. He destroyed Camarina, and removed all the inhabitants to Syracuse, together with a large part of those of Gela itself, and all the principal citizens of Megara Hyblaea and Euboea (Herod. vii. 156).

Syracuse was thus raised to the rank of the first city in Sicily, which it retained for many centuries afterwards. A few years before (b. c. 488), Theron had established himself in the possession of the sovereign power at Agrigentum, and subsequently extended his dominion orer Himera also, from whence he expelled Terillus, в. c. 481. About the same time also Anaxilaus, despot of Rhegium, on the other side of the straits, had established a footing in Sicily, where he became master of Zancle, to which he gave the name of Messana, by which it was ever afterwards known [Mpssiva]. All three rulers appear to have been men of ability and enlightened and liberal views, and the cities under their immediate govemment apparently made great prugress in power and prosperity. Gelon especially undoubtedly possessed at this period an amount of power of which no other Greek state could boast, as was sufficiently shown by the embassy sent to him from Sparta and Athens to invoke his assistance against the threatened invasion of Xerxes (Herod. vii. 145, 157). But his attention was called off to a danger more immediately at hand. Terillus, the expelled despot of Himera, had called in the assistance of the Carthaginians, and that people sent a vast fleet and army under a general named Hamilcar, who laid siege to Himern, в. c. 480. Theron, however, was able to maintain possession of that city until the arrival of Gelon with au army of 50,000 foot and 5000 horse to his relief, with which, though vastly inferior to the Carthaginian forces, he attacked and totally defeated the army of Hamilcar. This great victory. which was contemporaneous with the battle of Salamis, raised Gelon to the highest pitch of reputation, and became not less celebrated among the Sicilian Greeks than those of Salamis and Plataea among their continental brethren. The vast number of prisoners taken at Himera and distributed as slaves among the cities of Sicily added greatly to their wealth and resources, and the opportunity was taken by many of them to erect great public works, which continued to adorn them down to a late period (Diod. xi. 25).

Gelon did not long snrvive his great victory nt Himera : but he transmitted his power unimpaired to his brother Hieron. The latter, indeed, though greatly inferior to Gelon in character, was in some respects even superior to him in power: and the great naval victory by which he relieved the Cumaeans in Italy from the attacks of the Carthayinians and Tyrrhenians (в. c. 474) earned him a wellmerited reputation throughout the Grecian world. At the same time the rule of Hieron was estremely oppressive to the Chalcidic cities of Sicily, the power of which he broke by expelling all the citizens of Naxos and Catana, whom he compelled to remove to Leontini, while he repeopled Catana with a large body of new inhabitants, at the same time that he changed its name to Aetna. Themn had continued to reign at Agrigentum until his death in B. c. 472, but his son Thrasydaeus, who succealed him, quickly incurred the enmity of the citizens, who were enabled by the assistance of Hieron to expel him,
and were thas restored to at least nominal freedom. A similar revolution occurred a few years later at Syracuse, where, on the death of Hieron (b. c. 467), the power passed into the hands of Thrasybulus,
whose violent and tyrannical proceedings whose violent and tyrannical proceedings quickly became the sigual for a general Srevousans. This cities of Sicily, who united general revolt of all the the Syracusans, and succeeded in expelling Thrasybnlus from his strongholds of Ortygia and Achradina (Divel. xi. 67, 68), and thus driving him from The
(B.c.466) became forlonian dynasty at Syracnse internal dissecame for a time the occasion of violent Whica in many cases broke out into actual warfare, But after a few years these were terminated by a general congress and compromise, B. c. 461 ; the exiles were allowed to return to their respective cities: Camarina, which had been destroyed by Gelon, was repeopled and became once more a flourishing city; while Catana was restored to its original Chalcidic citizens, and resumed its ancient name (Diod. si. 76). The tranquillity thus reestablished was of unusual permanence and duration; and the half century that followed was a period of
the greatest prosperity the greatest prosperity for all the Greek cities in the (with the exception of Syracuse) their attained degree of opulence and power. This is distinctly stated by Diodorus (I. c.) and is remarkably confirmed by the still existing monuments,-all the greatest architectural works being referable to this period. of the form of government established in the Siclian cities at this time we have little information, but it seems cerrain that a democratic constitution was in
almost all instances substituted oligarclies. But prosperous as this period (B. c. 461-409) undoubtedly was, it was by no means one of unbroken tranquillity. It was distarbed in the first instance by the ambitious schemes of Ducetius, a Siculian chief, who endeavoured to organise all the Sicels of the interior into one confederacy, which should be able to make head against the Greek cities. He at the same time founded a new city, to
which lie gave the naine of Police near the fountain of the Palici. But these attempacred Ducetius, remarkable as the only instance in the Whole history of the island in which we find the Sicels attempting to establish a political power of their own, were frustrated by his defeat and banishment by the Syracasans in b. c. 451; and though he once more returned to Sicily and endearoured to establish himself on the $N$. caast of the island, his (Diod. xi. 88, $90-92$, xii. 8,29 .) He found n. 445 .
Ho successor; and the Sicels of the interior ceased to be formidable to the Greek cities. Many of their Syrns were actually reduced to subjection by the position; but the operation of Hellenic influences was gradually diffusing itself throughout the whole
island.
The next important event in the history of Sicily is the great Athenian expedition in B. c. 415 . Already, at an earlier period, soon after the outbreak. of the Peloponnesian War, the Athenians had inter-
fered in the affairs of Sicily, and, in в. c. 427 had sent a squadron under Laches and Charoey, had support the lonic or Chalcidic cities in the island,

SICILIA.
which were threatened by their more powerful Doric neighbours. But the operations of these commanders, las well as of Eurymedon and Sophocles, who followed them in b. c. 425 with a large force, were of pacifimportant character, and in в. c. 424 a general pacification of the Greek cities in Sicily was brought 65). B a congress held at Gela (Thuc. iv. 58 , long unbroken. The Syracusans took did not remain the intestine dissensions democratic party from that Leontini to expel the tines were encazed in war wity : while the Selinunneighbours the Sed war with their non-Hellenic hard that the latter westans, whom they prested so ance to Athens. There forced to apply for assistaid in the same quarter antine exiles also sued for were at this tim ather, and the Athenians, who out an expedition on the light of their power, sent the protection of their allargest scale, nominally for as Thucydides observes, in in Sicily, but in reality, selves masters of the whopes of making themIt is impossible the whole island (Thuc. vi. 6). ceedings of that celebrated relate in detail the probe more fully noticedebrated expedition, which will are admirably related in Grticle Spracusare, and vol. viii. ch. 58-60 in Grote's History of Greece, in great measure to the failure may be attributed Nicias, who lingered at Caclays and inactivity of ing at once to besiege Syracuse itself, and thus gave the Syracusans time to strengthen and enlarge their fortifications, at the same time that they revived the courage of their allies. The siege of Syracuse was not actually commenced till the spring of $414 \mathrm{~B} . \mathrm{c}$., 413 and it was continued till the month of September, 413 B. c., with the most unremitting exertions on
both sides. The Syracusans were snpported by chief Dorian cities incusans were sapported by the of Agrigentum, which the island, with the exception as well as by a portion stood aloof from the contest, greater part of those barbarians, as well as the Chalcidic cities of Naxos und Cat, as well as the tans, furnished assistance to the Athenians (Thuc. vii. 57, 58).

The total defeat of the Athenian armament (by far the most formidable that had been seen in Sicily since that of the Carthaginians under Hamilcar), seemed to give an irresistible predominance to the Dorian cities in the island, and to Syracuse especially. But it was not long before they again found invader. The Selinuntines a still more powerful tage of the failure of attacks upon their neigh Athenians to renow their latter, feeling their neighbours of Segesta, and the applied for protection to Cart to cope with them, now that we hear nothing Carthage. It is remarkable in the affairs of nothing of Carthaginian intervention Himera until this occuat the time of the battle of abandoned all accasion, and they seem to have the island, though they projects connected with there by means of they still maintained a footing of Panormus, Motya, and Suluect or dependent towns determined to arail and Soluntum. But they now offered them, and sent an armelves of the opportunity seemed like that of the Atheniant to Sicily, which so much for the relief of Segests as forculated not of the whole island. Hannibal, the for the conquest milcar who had been Hannibal, the grandson of HaLilybaeum, in B. c. 409 , with an armera, landed at 100,000 men, and marching strangy estimated at laid siege at once to the city. Straight upon Selinus, laid siege at once to the city. Selinus was at this
time, next to Agrigentum and Syracuse, probably the most flourishing city in Sicily, but it was wholly unprepared for defence, and was taken after a siege of only a few days, the inhabitants put to the sword or made prisoners, and the walls and public buildings razed to the ground (Diod. xiii. 54-58). From thence Hannibal turned his arms against Himera, which was able to protract its resistance somewhat longer, but eventually fell also into his power, when in order to avenge himself for his grandfather's defeat, he put the whole male population to the sword, and so utterly destroyed the city that it was never again inhabited (Id. xiii. 59-62).

After these exploits Hannibal returned to Carthage with his fleet and army. But his successes had now awakened the ambition of the Carthaginian perple, who determined upon a second invasion of Sicily, and in B. c. 406 sent thither an army still larger than the preceding, ander the command of Hannibul. Agrigentum, at this time at the very highest point of its power and opulence, was on this occasion the first object of the Carthaginian arms, and though the citizens had made every preparation for defence, and in fact were enabled to prolong their resistance for a period of eight months they were at length compelled by famine to surrender. The greater part of the inhabitants evacuated the city, which shared the fate of Selinus and Himera (Diod. xiii. 81, 91).

Three of the principal Greek cities in Sicily had thus already fallen, and in the spring of в. c. 405 , Himilco, who had succeeded Hannibal in the command, advanced to the attack of Gela. Meanwhile the power of Syracuse, upon which the other cities had in a great degree relied for their protection, had been in great measure paralysed by internal dissensions : and Dionysius now availed himself of these to raise himself to the possession of despotic power. But his first operations were not more successful than those of the generals he replaced, and after an ineffectual attempt to relieve Gela, he abandoned both that city and Camarina to their fate, the inhabitarts of both emigrating to Leontini. Dionysius was able to fortify himself in the supreme power at Syracuse, and hastened to conclude peace with Himilco apon terms which left the Carthaginians undisputed masters of nearly half of Sicily. In addition to their former possessions, Selinus, Himera, and Agrigentum were to be subject to Carthage, while the inhabitants of Gela and Camarima were to be allowed to return to their native cities on condition of beconing tributary to Carthage (Diod. xiii. 114.)

From this time Dionysius reigned with undisputed authority at Syracuse for a period of 38 years (B. c. 405-367), and was able at his death to transmit his power unimpaired to his son. But though he raised Syracuse to a state of great puwer and prosperity, and extended his dominion over a large part of Sicily, as well as of the adjoining part of Italy, his reign was marked by great and sudden changes of fortune. Though he had dexterously availed himself of the Carthaginian invasion to establish lis power at Syracuse, he had no sooner consolidated his own authority than he began to turn his thoughts to the expulsion of the Carthaginians from the island. His arms were, howerer, directed in the first instance against the Chalcidic cities of Sicily, Naxos, Catana, and Leontini, all of which successively fell into his power, while he extended his dominions over a great part of the Sicel
communities of the interior. It was not till he had effected these conquests, as well as made vast preparations for war, by enlarging and strengthening the fortifications of Syracuse and building an enormous fleet, that he proceeded to declare war against Carthage, b.c. 397. His first successes were rapid and sudden : almnst all the cities that had recently been added to the Carthaginian dominion declared in hix favour, and he carried his victorious arms to the extreme W. point of Sicily, where Motya, one of the chief strongholds of the Carthaginian power, fell into his hands after a long siege. But the next year (в. с. 396) the state of affairs changed. Himilco, who landed in Sicily with a large army, not only recovered Motya and other towns that had been taken by Dionysins, but advanced along the N. coast of the island to Messana, which he took by assault and utterly destroyed. Dionysius was even compelled to shut hinself up within the walls of Syracuse, where he was closely besieged by Himilco, but a sudden pestilence that broke out in the Carthaginian camp reduced them in their turn to such straits that Himilco was glad to conclude a secret capitulation and retire to Africa (Diod. xiv. 47 -76). Hostilities with Carthage were renewed in B. C. 393 , but with no very decisive result, and the peace concluded in the following year (в. с. 392) seems to have left matters in much the same state as before. In B. C. 383 war again broke out between Dionysius and the Carthaginians, but after two great battles, with alternate success on both sides, a fresh treaty was concluded by which the river Halycus was established as the boundary between the two powers. The limit thus fixed, though often infringed, continued to be recognised by several successive treaties, and may be considered as forming from henceforth the permanent line of demarcation between the Carthaginian and the Greck power in Sicily (Diod. xv. 17).
(For a more detailed account of the reign of Dionssius and his wars with the Carthaginians, see the article Dionysics in the Biogr. Dict. Vol. I. p. 103:3. The same events are fully narrated by Mr. Grute, vol. x. ch. 81, 82, and vol. xi. ch. 83.)

Several important towns in Sicily derived their origin from the reign of the elder Dionysius and the revolutions which then took place in the island. Among these were Tauromenium, which arose in the place and not far from the site of the ancient Naxos, which had been finally destroyed by Dionysius : Tyndaris, founded by the Syracusin despot on the N. coast of the island, with a body of colonists principally of Messenian origin; Alalisa, in the same part of Sicily, founde.l by the Sicel chief Archonides; and Lilybaeum, which grew up adjoining the port and promontory of that name, a few iniles S. of Motya, the place of which it took as one of the principal Carthaginian ports and strongholds in the island.

The power of Syracuse over the whole of the eastern half of Sicily appeared to be effectually consolidated by the elder Dionysins, but it was soon broken up by the feeble and incompetent government, of his son. Ouly ten years after the death of the father (b.c. 357), Dion landed in Sicily at the head of only a few hundred mercenary troops, and raised the standard of revolt; all the dependent subjects of Syracuse soon flocked around it, and Dion was welcomed into the city itself by the acclamations of the citizens. Dionysius himself was absent at the I time, but the island-citudel of Ortyoia was leld by
his garrison, and still secured hin a footing in Sicily
At was not till after a long blockade that his son Apollocrates was compelled to surrender it into the hands of Dion, who thus became master of Syracuse, B.c. 356. But the success of Dion was far from restoring liberty to Sicily, or even to the Syracusans: the despotic proceedings of Dion excited universal discontent, and he was at length assassinated by Callippus, one of his own officers, B. c. 353. The period that followed was one of great confusion, but With which we are very imperfectly acquainted. Successive revolutions occurred at Syracuse, during whish the younger Diunysius found means to effect his return, and became once more master of Ortygia. named Hest of the city was still held by a leader Carthaginians. Ortrgia was now besieged of the sea and land by a Carthacinan hesieged both by was in this state of things that fleet and army. It equally opposed to Hicetas and party at Syracuse, course to the parent Hicetas and Dionysius, had reof 1200 soldiers was Timoleon, b. c. 344 sent to their assistance under brilliant; and within less successes were rapid and landing in Sicily, he found himself unexpectedly is the prosession of Ortypia, which wexpectedly in surrendered to him by Dionysius. Hicetas and the Carthagimians were, however, still masters of the rest of the city; but mistrust and disunion enfeebled their defence: the Carthaginian general Magon suddenly withdrew his forces, and Timoleon easily wrested the city from the hands of Hicetas,
B. $\mathbf{c} 343$.
Syracuse was now restored to liberty and a democratic form of government; and the same change was quickly extended to the other Greek cities of Sicily. These had thrown off the yoke of Syracuse during the disturbed period through which they had recently passed, but had, with few exceptions. fallen into the hands of local despots, who had established themselves in the possession of absolute power. Such were, Hicetas himself at Leontini, Mamercus at Catana, and Hippon at Messana, while minor despots, also of Greek origin, had obtained in like manner the Centuripa and Agyrium. Timoleon now turned his arms in succession against all these petty rulers, and overthrew them one after another, restoring the city in each case to the possession of independent and free self-goverminent. Meanwhile the Greeks had been threatened with a more general danger from a fresh Carthaginian invasion; but the total defeat of their generals Hasdrubal and Hamilcar at the river Crimisus (r.c. 340), one of the most brilliant and decisive victories ever gained by the Greeks over the Carthaginians, put an end to all fears from that quarter : and the peace that followed once more established the Halycus as the boundary between the two nations (Diod. xv. 17).
Tue restoration of the Sicilian Greeks to liberty by Timoleon, was followed by a period of great prosperity. Many of the cities had suffered severely, either from the exactions of their despotic rulers, or place, but theses and revolutions that had taken colonists from Corinth now recruited with fresh who poured into the ioland in ver cities of Greece, exiles were everywhere restored, and a fresh impulse seemed to be given to the development of Hellenic influences in the island. Unfortunately this period of reviving prusperity was of short duration. Only

SICILIA.
twenty three ycars after the battle of the Cri 981 a despotisin was again established at Syracuisus, Agathocles (b. c. 317), an adventurer whe use by himself to power by very much the same means as the elder Dionysius, whom he resembled in energy and ability, while he even surpassed him in samguinary and unsparing severity. The reign of Agathocles (в. c. 317-289) was undoubtedly a period that excrcised the most disastrous influence over Sicily; it was occupied in great part with internal dissensions and civil wars, as well as by long continued struggles between the Greeks and Carthaginians. Like Dionysius, Agathocles had, in the first instance, made use of Carthaginian support, to estabiish himself in the possession of despotic power, but as he gradually extended his aggressions, and authority, he Greek city after another under his with Carthage. In b.c. 310, he was dresh collision river Himera, near s.c. 310, he was defeated at the Carthaginian general the hill of Ecnomus, by the battle that it general Hamilcar, in so decisive a his allies and depend to extinguish all his hopes: yoke, and Sy dependent cities quickly threw off his by a Carthaginian flself was once more blockaded thocles adopted the det. his army to Africa, and carrying on the war at the very gates of Carthage. During his absence (which was protracted for nearly four years, B.c. 310-307) Hamilcar had brought a large part of Sicily under the dominion of Carthage, but was foiled in all his attempts upon Syracuse, and at length was himself taken prisoner in a night attack, and put to death. The Agrigentines, whose name had been scarcely mentioned tor a long period, but whose city appears to have been revived under Timoleon, and now again appears as one of the most considerable in Sicily, made a fruitless attempt to raise the banner of freedom and independence, while the Syracusan exile Deinocrates, at the head of a large army of exiles and mercenaries, maintained a sort of independent position, aloof from all parties. But Agathocles, on his return from Africa, concluded peace with Carthage, and entered into a compronise with Deinocrates, while he established his own power at Syracuse by a fearful massacre of all that were opposed to him. For the last twelve years of his reigu (n.c. 301-289), his dominion seems to have been firmly established over Syracuse and a great pirt of Sicily, so that he was at liberts to follow out his elsewhere. schemes in the south of Italy and
After the death of Agathocles (B. C. 289), Sicily seems to have fallen into a state of great confusion; Syracuse apparently still retained its predominant; position among the Greek cities, under a despot named Hicetas: but Agrigentum, which had also fallen into the hands of a despot named Phintian, was raised to a position that almost enabled it to dispute the supremacy. Phintias extended his dominion over several other cities, and having mado himself master of Gela, utterly destroyed it, in order to found and people a new city at the mouth of the river Himera, to which he gave the name of Phintias. This was the last Greek city founded in Sicily. Meanwhile the Carthaginians were becoming more and more preponderant in the island, and the Greeks were at length led to invoke the assistance of Pyrrhus, king of Epirus, who was at this time carrying on war in Italy against the Romans. He
readily listened to their overtures, and landed in
the island in the autumn of B.c. 278. Phintias was at this time dead, and Hicetas had not long before been expelled from Syracuse. Pyrrhus therefore had no Greek adversaries to contend with, and was able to turn all his efforts against the Carthaginians. His successes were at first mpid and decisive : he wrested one town after another from the dominion of Carthage, tonk Panormus, which had long been the metropolis. of their Sicilian possessions, and had never before fallen into the hands of a Greek invader, and carried by assault the strong fortresses of Ercte and Eryx: but he was foiled in an attack on Lilybacum ; jealousies and dissensions now arose between him and his Sicilian allies, and after little more than two years he was fain to retarn to Italy (B.c. 276), abandoning all his projects upon Sicily (Diod. Exc. Hoesch. xxii. 10, pp. 497-499).

The departure of Pyrrhus left the Sicilian Greeks without a leader, but Hieron, who was chosen general by the Syracusans, proved hinself worthy of the occasion. Meanwhile a new and formidable enemy had arisen in the Mamertines, a band of Campanian mercenaries, who had possessed themselves by treachery of the important city of Messana, and from thence carried their anms over a considerable part of Sicily, and conquered or plundered many of its principal towns. Hieron waged war with them for a considerable period, and at length obtained so decisive a victory over them, in the immediate neighbourhood of Messana, that the city itself must have fallen, had it not been saved by the intervention of the Carthaginian general Hannibal. Hieron was now raised to the supreme power at Syracuse and even assumed the title of king, B. c. 270 . A few years after this we find him joining bis arms with the Carthaginians, to effect the expulsion of the Mamertines, an object which they would doubtless have accomplished had not that people appealed to the protection of Rome. The Romans, who had recently completed the conquest of Italy. gladly seized the pretext for interfering in the affairs of Sicily, and espoused the cause of the Mamertines. Thus began the First Punic War, b. c. 264.

It is impossible here to relate in detail the events of that long-protracted struggle, during which Sicily became for twenty-three jears the field of battle between the Iomans and Cartharinians. Hieron, who had found himself at the beginning engaged in active hostilities with Rome, after sustaining several defeats, and losing many of his subject towns, wisely withdrew from the contest, and concluded in b. c. 263 a separate peace with Rome, by which he retained possession in full sovereignty of Syracuse and its territory, including the dependent towns of Acrie, Helorus, Netum, Megara, and Leontini, together with Tauromenium (Diod. xxiii. Fixc. H. p. 502). From this time to the day of his death Hieron remained the faithful ally of the Romans, and retained the sovereign power at Syracuse undisturbed. In the rest of Sicily all trace of independent action on the part of the several Greck cities disappears: Agrigentum was indeed the only one of these cities in the i-land which appears to have retaiced any considerable importance: it was not taken by the Roman consuls till after a long and obstinate sicge, B. C. 262 , and was severely punished for its protractel resistance, the inhabitants being sold as slaves. Agrigentum indeed at a later period fell again into the hands of the Carthagimians, b. c. 255, but on the other hand the Romans made themselves mas-
ters of Panormns, for a long time the capital of the Carthaginian dominion in the island, which was thenceforth occupied by a strong Roman garrison, and never again fell into the hands of its former masters. For several years before the conclusion of the war, the possessions of the Carthaginians in Sicily were confined to the monntain of Eryx, occupied by Hamilcar Barca, and to the two strongly fortified seaports of Lilybaeum and Drepanum, the former of which defied all the attacks of the Romans, as it had previously done those of Pyrrhus. The siege, or rather blockade, of Lilybaeum was continued for nearly ten years, until the destruction of the Carthaginian fleet off the islands of the Aegates, B. c. 241, compelled that people to parchase peace by the surrender of all their remaining possessions in Sicily.

The whole island was now reduced into the condition of a Roman province, with the exception of the territory still governed by Hieron as an allied, but independent sovereign. The province thus constituted was the first that had ever borne that name (Cic. Verr. ii. 1): it was placed under the government of a praetor, who was sent annually from Rome (Appian, Sic. 2). On the first outbreak of the Second Punic War (b.c. 218), the consul Seinpronius was at first sent to Sicily as his province, to guard against any threatened invasion from Africa; but he was soon recalled to oppose Hannital in Italy, and for some years Sicily bore but an unimportant part in the war. A great change, however, occurred in the fourth year of the war (b. c. 215), in consequence of the defection of Hieronymus, the grandson and successor of Hieron at Syracuse, who abandoned the alliance of Rome to which Hieron had continued constant throughout his long reign, and espoused the Carthaginian cause. Hieronymus indeed was bocn after hssassinated, but the Carthaginian party at Syracuse, headed by Hippocrates and Epicydes, still maintained the ascendency, and Marceilus, who had been sent in haste to Sicily to put down the threatened revolt, was compelled to form the siege of Syracuse, b. c. 214. But so vigorous was the resistance offered to him that he soon found himsclf obliged to convert the siege into a blockade, nor was it till the autumn of B. C. 212 that the city finally fell into his hands. Meanwhile the war had extended itself to all parts of Sicily: many cities of the Roman province had followed the example of Syracuse, and joined the alliance of Carthage, while that power spared no exertions for their support. Even after the fall of Syracuse, the war was still continued: the Carthaginian general Mutines, who had made himself master of Agrigentum, carried on a desultory warfare from thence, and extended his ravages over the whule island. It was not till Mutines had been induced to desert the Carthayinian cause, and betray Agrigentum into the hands of the Romans, that the consul Laevinus was able to reduce the revolted cities to submission, and thus accomplished the final conquest of Sicily, B. c. 210 (Liv. xxvi. 40; xxvii. 5).

From this time the whole of Sicily became anited as a Roman province, and its administration was in most respects similar to that of the other provinces. But its lot was anything but a fortunate one. Its great natural fertility, and especially its productiveness in corn, caused it, inderil, to be a possession of the utmost importance to Rome; but these very circumstances seem to hare made it a favourite field for
speculators, who bought up large tracts of land, which they cultivated solely by means of slaves, so that the free population of the island became materially diminished. The more mountainous portions of the island were given up to shepherds and herdsmen, all likewise slares, and accustomed to habits of rapine and plunder, in which they were encouraged by their masters. At the same time the number of wealthy proprietors, and the extensive export trade of some of the towns, maintained a delusive appearance of prosperity. It was not till the outbreak of the Servile War in B. c. 135 that the fall extent of these evils becaine apparent, but the frightful state of things then revealed sufficiently shows that the causes which had produced it must have been long at work. That great outbreak, which cominenced with a local insurrection of the slaves of a great proprietor at Enna, named Damophilus, and was headed by a Syrian slave of the name of Eunus, quickly spread throughout the whole island, so that the slaves are said to have mustered 200,000 armed men. With this formidable force they defeated in succession the armies of several homan praetors, so that in B.c. 134, it was thought necessary to send against them the consul Fulvius Flaccus, and it was not till the year в. c. 132 that their strongholds of Tauromenium and Finna were taken by the consul P. Rupilius. (Died. xxxiv. Exc. Phot., Exc. Vales.) The insurrection was now finally quelled, but the state of Sicily had undergone a severe shock, and the settlement of its affairs was confided to P. Kupilias, together with ten commissioners, who laid down a code of laws and rules for its internal government which continued to be observed in the days of Cicero (Cic. Verr. ii. 16).

But the outbreak of the second Servile War, under Salvius and Athenion, less than thirty years after the termination of the former one (в.c. 103), and the fact that the slaves were again able to maintain the contest against three successive consuls till they were tinally varquished by M. A ${ }^{\text {guilius, in b. c. } 100 \text {, }}$ sufficiently proves that the evils in the state of society had been but imperfectly remedied by Rupilius; nor can we believe that the condition of the island was in reality altogether so flourishing as it is represented by Cicern during the interval which elapred between this Servile War and the pratorship of Verres, b. c. 73. But the great natural resonrces of Sicily and its important position as the granary of Rome undoubtedly entabled it to recover with rapidity from ail its disisters. The elder Cato liad called it the store-room (cella penaria) of the Roman state, and Cicero observes that in the great Social War (b.c. 90-88) it supplied the Roman armies not only with food, but with clothing and arms also (Cic. Verr. ii. 2). But the praetorship of Verres (b. c. 73-70) inflicted a calamity upon Sicily scarcely inferior to the Serviie wars that had so recently devastated it. The rhetorical expressions of Cicero must not indeed be always understood literally ; but with every allowance for exaggeration, there can no doubt that the evils resulting from such a government as that of Verres were chormous; and Sicily was just in such a state as to suffer from them most severely.

The orations of Cicero against Verres convey to us much curious and valuable information as to the condition of Sicily ander the Roman republic as well as to the administration and system of govermment of the Roman provinces generally. Sicily at that time formed but one province, under the goverument
of a praetor or pro-praetor, but it had always two quaestors, one of whom resided at Syracuse, the other at Lilybaeum. This anomaly (for such it appears to have been) probably arose from the different parts of the isliand having been reduced into the form of a province at different periods. The island contained in all above sixty towns which enjoyed municipal rights: of theee, three only, Messana, Tauromenium, and Netum, were allied cities (civitates fuederatae), and thas enjoyed a position of nominal independence; five were exempt from all fiscal burdens and from the ordinary jurisdiction of the Roman magistrates (civitates immunes et liberae): the rest were in the ordinary position of provincial towns, but retained their own magistrates and municipal rights, as well as the possession of their respective territories, subject to the payment of a tenth of their produce to the Roman state. These tenths, which were paid in kind, were habitually farmed out, according to principles and regulations laid down in the first instance by Hieron, king of Syracuse, and which therefore continued to be known as the Lex Hieronica. For judicial purposes, the island appears to have been divided into districts or conventus, but the number of them is not stated; those of Syracuse, Agrigentum, Lilybaeum, and Panormus are the only ones mentioned.

Sicily took little part in the Civil War between Caesar and Pompey. It was at first held by M. Cato on behalf of the latter, but abandoned by him when Pompey himself had quitted Italy, and was then occupied by Curio, as pro-praetor, with four le_ions (Caes. B. C. i. 30, 31). Caesar himself visited it previous to his African war, and it was from Lilybaeum that he crossed over with his army into Africa (Hirt. B. Afr. 1.) After the death of Cacsar, it fell into the hands of Sextus Pompeius, whose powerful flect enabled him to defy all the efforts of Octavian to recover it, and was at length secured to him by the peace of Misenum, B. c. 39, together with Sardinia and Corsica. But Octavian soon renewed his attempts to dispossess him, and though he sustained repeated defeats at sea, and lust a great part of his flect by a stonn, the energy and ability of Agrippa enabled him to triumph over all obstacles; and the tinal defeat of his fleet at Naulochus compelled Pompeius to abandon Sicily, and take refuge in the east (Appian, B. C. v. 77-122; Ition Cass. xlix. 1-1:). There seems no doubt that the island suffered severely from this contest, and from the rapacity or exactions of Sextus Pompeius: Strabo distinctly ascribes its decayed condition in his time principally to this cause (Strab. vi. pp. 270, 272). Augustus made some attempts to relieve it by sending colonies to a few cities, among which were Tauromenium, Catana, Syracuse, Thermae, and Tyndaris (Strab. vi. p. 272 ; Plin. iii. 8. s. 14); but the effect thus produced was comparatively small, and Strabo describes the whole island as in his time, with few exceptions, in a state of decay, many of its ancient cities having altogether disappeared, while others were in a declining condition, and the interior was for the most part given up to pasturage, and inhabited onily by herdsinen (Strab. l. c.)

Augustus appears to have greatly remodelled the internal administration of Sicily: so that the condition of most of the towns had undergone a change between the time of Cicero and that of Pliny. Caesar had indeed proposed to give Latin rights to all the Sicilians, and M. Antonius even brought
forward a law to admit them without distinction to the Roman franchise (Cic. ad Att. xiv. 2), but neither of these measures was accomplished; and we learn from Pliny that Messana was in his day the only city in the island of which the inhabitants possessed the Roman citizenship: three others, Centuripa, Netum, and Segesta enjnyed the Jus Latii, while all the others (except the colonies already mentioned) were in the ordinary condition of "civitates stipendiariae" (Plin. iii. 8. s. 14). We hear very little of Sicily under the Einpire; but it is probable that it never really recovered from the state of decay into which it had fallen in Strabo's time. Alnost the only mention of it in history is that of an outbreak of slaves and banditti in the reign of Gallienus which seems to have resembled on a smaller scale the Servile wars that had formerly derastated it (Treb. Poll. Gallien, 4). The increasing importance of the supply of corn from Africa and Egypt renders it proballe that that from Sicily had fallen off, and the small namber of remains of the imperial period still existing in the island, though so many are preserved from a much carlier date, seems to pruve that it could not then have been very flourishing. At a late period of the Empire, also, we find very few names of towns in the Itineraries, the lines of road being carried throngh stations or "mansiones" otherwise wholly unknown, a sufficient proof that the neighbouring towns had fallen into decay. (Itin. Ant. pp. 86-98.) In the division of the provinces under Augustus, Sicily was assigned to the senate, and was governed by a proconsul ; at a later period it was considered as a part of Italy, and was governed by a magistrate named a Consularis, subject to the authority of the Vicarius Urbis Rornae. (Notit. Dign. ii. p. 64 ; and Böcking, ad luc.)

Its insular position must have for a considerable time preserved Sicily from the ravages of the barbarians who devastated Italy towards the close of the Western Empire. Alaric indeed attempted to cross over the straits, but was foiled by a tempest. (Hist. Miscell. xiii. p. 535.) But Genseric, being master of a powerful fleet, made himself master of the whole island, which was held by the Vandals for a time, but subsequently passed into the hands of the Goths, and continued attached to the Gothic kingdom of Italy till it was conquered by Belisarius in A. D. 535. It was then united to the Eastern Empire, and continued to be governed as a dependency by the Byzantine emperors till the ninth century, when it fell into the hands of the Saracens or Arabs. That people first landed at Mazara, in the W. of the island in A. D. 827, and made themselves masters of Agrigentuin; but their progress was vigorously opposed. They took Messana in 831, and Panormus in 835, but it was not till 878 that Syracuse, the last fortress in the island, fell into their hands. The island continued in the possession of the $\mathrm{Sa}_{\mathrm{a}}$ racens till the middle of the eleventh century. when it was partially recovered by the Byzantine emperors with the assistance of the Normans. But in 1061 the Norman Roger Guiscard invaded Sicily on his own account, and, after a long struggle, wholly reduced the island under his dominion. It has since remained attached, with brief exceptions, to the cruwn of Naples, the monarch of which bears the title of King of the Two Sicilies.

The extant remains of antiquity in Sicily fully confirm the inference which we should draw from the staternents of ancient hibtoriaus, as to the
prosperity and opulence of the island under the Greeks, and its comparatively decayed condition under the Romans. The ruins of the latter periud are few, and for the most part unimportant, the exceptions being confined to the three or four cities which we know to have received Roman colonies : while the temples, theatres, and other edifices from the Greek periud are numerous and of the most striking character. No city of Greece, with the exception of Athens, can produce structures that vie with those of which the remains are still visible at Agrigentum, Selinus and Segesta. At the same time the existing relics of antiquity, especially coius and inscriptions, strongly contirm the fact that almost the whole population of the island had been gradually Hellenised. It is evident that the strong line of demarcation which existed in the days of Thucsdides between the Greek cities and those of non-Hellenic or barbarian origin had been to a great degree effaced before the island passed under the dominion of Rome. The names of Sicilian citizens mentioned by Cicero in his Verrine orations are as purely Greek where they belong to cities of Siculian origin, such as Centuripa and Aggrium, or even to Carthaginian cities like Panormus and Lilybaeum, as are those of Syracuse or Agrigentum. In like manner we find coins with Greek legends struck by numerous cities which undoubtedly never received a Greek colony, such as Alaesa, Menaenum, and many others. It is probable indeed that during the Roman Republic the language of the whole island (at least the written and cultivated language) was Greek, which must, however, have gradually given way to Latin under the Empire, as the Sicilian dialect of the present day is one of purely Latin origin, and differs but slightly from that of the south of Italy. Of the language of the ancient Sicels we have no trace at all, and it is highly probable that it was never used as a written language.

## III. Topograpity.

The general description of the physical features of Sicily has been already given. But it will be necessary here to describe its coasts in somewhat more detail. The E. coast extending from Cape Pelorus to Pachynus, consists of three portions of a very different character. From Pelorus to Tauromenium, a distance of about 40 miles, it is closely bordered by the chain of mountains called the Mons Neptunius, the slopes of which descend steeply to the sea, furming a very uniform line of coast, furrowed by numerous sinall torrents. Two of the small headlands between these valleys appear to have borne the names of Drepanum (Plin.) and Argennum (Ptol.), but their identification is quite uncertain. S. of Tauromenium, from the mouth of the Acesines to that of the Symaethus, the whole coast is formed by beds of lava and other volcanic matters, which have flowed down from Aetna. Off this coast, about midway between Acium and Catuna are some rocky islets of volcanic origin, called by Pliny the Cyclopum Scopuli: the name of Portus Ulyssis is given by the same author to a port in this neighbourhood, but it is impossible so say which of the many small slieltered coves on this line of coast be means to designate. S. of the Symaethus the coast is mach varied, being indented by sereral deep bays and inlets, separated by projecting racky headlands. The principal of these is the bay of Megara (Sinus Megarensis) sn called from the Greek city of that naine; it was bounded on the $N$. by the Xiphonian
promontory，now Capo di Sta Croce（Eıф ${ }^{\text {Lias }}$ àкpot hpiov，Strab．vi．p．267），within which was
 4），evidently the harbour of $A$ uyusta，one of the finest natural harbours in the island．Between this and Syracuse is the remarkable peninsular promon－ tory of Thamsus（Magnisi），while immediately S ． of Syracuse occurs the remarkable landlocked bay called the Great Harbour of that city，and the rocky headland of Plemmyrium which bounds it on the S．From this point to Cape Pachynus no ancient names have been preserved to us of the headiands or harbours．From Cape Pachynus to the site of Gela the coast is low but rocky．Along this line must be placed the port of Ulysses（Portus Odysseae） mentioned by Cicero，and the promontory of Ulysses of Ptolemy，both apparently in the immediate neigh－ bourhood of Cape Pachynus［Pachyncs．］The Bucra promontory（Buóкpa akpa）of Ptolemy，which he places further W．，is wholly unknown，as is also the port of Caucana of the same author（Kaukava入цグv，Ptol．iii．4．§ 7）．The remainder of the S．coast of Sicily from Gela to Lilybaeum presents on the whole a very uniforn character；it has few or no natural ports，and no remarkable headlands． It is bounded for the most part by hills of clay or soft linestone，generally sloping gradually to the sea，but sometimes furming cliffs of no great eleva－ tion．The celebrated promontory of Lilybaeum is a low rocky point，and its famous port，though secure，is of small extent．N．of Lilybaeum was the promontory of Aegithalles，with the adjacent low islands，on one of which the city Motya was built；while the more considerable islands of the Aegates lay a few miles further to the W．，and the promontory of Drepranum adjoining the city of the same name formed the NW．point of Sicily．It is remarkable that no ancient name is preserved to us for the deep gulf of Castellamare which occurs on the coast between Trapani and Palerno，though it is one of the inost remarkable features of the N ． soast of Sicily；nor are the two stizking heidlands that bound the Bay of Palerno itself known to us by their ancient names．The buld and insulated hill of Nonte Sta Rosalia is，however，the ancient Eicte．The northern coast of Sicily is bold and varied，formed by offshoots and ridges of the northern chain of mountains descending abruptly to the sea； hence it was always a rugged and diticult line of communication．But none of the rocky headlands that interrupt it are mentioned to us by their ancient names，till we come to that of Mylae adjoining the town of the same name（Miluzzu），and the Pha－ lacrlan Phomontory（I＇tol．iii．4．§ 2），ap－ parently the Capo di Rusucolmo within a few miles of Cape Pelorus．

Frum the triangular form of Sicily and the confi－ guration of the mountain chains which traverse it，it is evident that it could not have any rivers of import－ ance．Most of them indeed are little more than mere mountain torrents，swelling with great rapidity after violent storms or during the winter rains，but nearly，if not wholly，dry during the summer months． The most important rivers of the island are： 1 ．The Symaetius（Simeto or Giarretta），which rises in the northern chain of mountains（the Mons Nebrodes）， and flows to the S．and SE．round the foot of Aetna， falling into the sea about 6 miles S．of Catania．It re－ ceives several tributaries，of which the Dittuino is cer－ tainly the ancient Currsas，that flowed near the city of Assorus，while the Avisurus of Stephanus can
be no other than the northern or main branch of the Symathus itself．The Cyamosorus（Kuauóowpos） of Polybius，which appears to bave been in the neighbourhood of Centuripa，must probably be the branch now called Firume Salso，which joins the Simeto just below Centorbi．2．The Acesines or Asines（F．Cantara），which rises very near the Symaethus，but Hows along the northern foot of Aetna，and falls into the sea just below Taurome－ nium．3．The Himera（F．Salso），the most consi－ derable of two rivers which bore the same name， rising in the Monte Madonicu（Mons Nebrodes） only about 15 miles from the $\mathbf{N}$ ．coast，and flowing due S．；so that it traverses nearly the whole breadth of Sicily．and falls into the sea at Alicata（Phintias）． 4．The Halycus（Phatani），so long the boundary between the Carthaginian and Greek territories in the island，is also a considerable stream；it rises not far from the Himera，but flows to the SW．，and enters the sea between Agrigentum and Selinus， close to the site of Heraclea Minoa．5．The Hyp－ sas（Belici），falling into the sea on the S．coast，a few miles E．of Selinus；and 6，the Avapus（Anapo）， which flows under the walls of Syracuse and falls into the great harbour of that city．It is unlike most of the rivers of Sicily，being a full clear stream， supplied from subterranean suurces．The same character belongs still more strongly to its tributary the Cyane，which has 2 considerable volume of water，though its whole course does not exceed two miles in length．

The minor rivers of Sicily which are mentioned either in history or by the georraphers are nume－ rous，but in many cases are very difficult to identify． Beginning at Cape Pachynus and proceeding along the coast westward，we find：1，the Dotychanus （Motúxavos，Ptol．iii．4．§ 7），evidently so called from its flowing near Motyca，and therefure pro－ bably the stream now called Fïume di Scicli； 2. the Hirminius of Pliny，probably the Fiume di Rayusa，very near the preceding；3，the Hipraris； and 4，the Oanus，two small streams which flowed under the walls of Camarina，nuw called the $F . d i$ Camarana and Frascolari；5，the Gela or Gelas， which gave name to the city of Gela，and must therefore be the Fiume di Terranova；6，the Acra－ GAS，a small stream flowing under the walls of Agri－ gentum，to which it gave name，and recciving a tributary called the Hypsas（Drago），which must not be confounded with the more important river of the same name already mentioned；7，the Camicus， probably the Fiunce delle Canne，about 10 miles W． of Girgenti；8，the Selinus，flowing by the city of that name，now the Mudiuni；9，the Mazara or Maz．nits，flowing by the town of the same name， and still called Fiume di Mazara．Besides these Ptolemy mentions the Isburus and Sosias or Sossius， two names otherwise wholly unknown，and which cannot be placed with any approach to certainty． Equally uncertain is the more noted river Achates， which is placed by Pliny in the same part of Sicily with the Mazara and Hypsas；but there is great confusion in his enumeration as well as that of Ptolemy．It is generally identified with the Dirillo， but this is situated in quite a different part of Sicily． The Acithius of Ptolemy，which he places between Lilybacuin and Selinus，may be the Fiume di Mar－ sala．

Along the N．coast，procceding from Lilybaeum to Cape Pelorus，we meet with a number of small streams，having for the must part a short torrent
like course, from the mountains to the sea. Their identification is for the most part very obscure and uncertain. Thas we find three rivers mentioned in connection with Segesta, and all of them probably flowing through its territory, the Porpax, Telmessus, and Crimesses or Crimisces. The last of these is probably the Fiume di S. Bartolomeo, about 5 miles E. of Segesta: the other two, which are mentioned only by Aelian ( $I^{\prime} . H$. ii. 33), cannot be identified, though one of them is probably the Fiume Gaggera, which flows beneath Segesta itself, and falls into the $F$. di S. Bartolonco near its mouth. But, to complicate the question still more, we are told that the names of Scamander and Simois were given by the Trojan colonists to two rivers near Segesta; and the furmer name at least seems to have been really in use. (Strab. xiii. p. 608; Diod. xx. 71 .) Proceeding eastward we find: 1, the Orethus (Vib. Sequest. p. 15), still called the Oreto, a sinall stream flowing under the walls of Panormus ; 2, the Eleutherus ('Enєútepus, Ptol. iii. 4. § 3), placed by Ptolemy between Panormus and Soluntum, and which must therefore be the Fiume di Bagarin; 3, the northern Himera, commonly identitied with the Fiume di S. Leonardo, near Termini, but more probably the Fiume Grande, about 8 miles further E. [Himera]; 4, the Monaluy (Movanos, Ptol.), between Cephaloedium and Alacsa, now the Pollina; 5, the Halesus or Alaesus, flowing beneath the city of Alaesa, now the Pettineo; 6, the Chydas (Xúdas, Ptol.), between Alaesa and Aluntium; 7, the Timethus (Tímpoos, Id.), between Agathyrna and Tyndaris; 8, the Helicon ('Елıк ${ }^{\prime} \nu$, Id.), between Tyndaris and Mylae; 9. the Phacelinus (Vib. Sequest.), which was near Mylae, or between that city and Messana (the nearer determination of these four last is wholly uncertain); 10, the Melas of Ovid (Fast. iv. 476) is generally placed in the same neighbourhood, though without any obvious reason.

Along the E. const the names may be more clearly identified. 1. The Onobalas of Appian (B. C. v. 109) is probably identical with the Acesines already noticed; 2, the Acrs, a very small stream, is the Fiume di Jaci; 3, the Amenanus, flowing through the city of Catana, is the Giudicello; 4, the Terias is the Fiume di $S$ Leomardo, which flows from the Lake of Lentini; 5, the Pantagias is the Porcari; 6, the Alabics is the Cantaro, a small stream flowing into the bay of Augusta. The Anapus and its confluent the Cyane have been already mentioned. S. of Syracuse occur three smail rivers, memorable in the retreat of the Athenians: these are. 1, the Cacypamas (Cassibili); 2, the Einnecs (Fiume di Arola); and 3, the Asinarus (falconara). A few miles $S$. of this was the Helonus, now called the Abisso, flowing by the city of the same name. No other stream occurs between this and Cape Pachynum.

Sicily contains no lakes that deserve the name; but there are a few pools or marshy lacroons, of which the names have been preserved to us. Of the latter description were the Lysimeina Palus near Syracuse, and the Camarina Pales adjoining the city of the same name. The Lacis lialicondum, oa the contrary, was a deep pool or basin of volcanic origin: while the small lake called by the peets Pergus or Pergusa is still extant in the neighbourhosul of Enna. The Lago di Lentini, though much the most considerable accumulation of waters in Sixily, is not mentioned by any ancient author.

The towus and cities of Sicily were very numerous.

The Greek culonies and their offshnots or dependencies have been already mentioned in relating the histoly of their settlement; but the names of all the towns so far as they can be ascertained will be bere enumerated in geographical order, without reference to their origin, omitting only the places mentioned in the Itineraries, which were probably mere villages or stations. 1. Beginning from Cape Pelorus and proceeding along the E. coast towards Cape Pachynus, were: Messana, Tauromenium, Naxos, Actust, Catana and Syracuse. Trotilum,destroyed at an early period, as well as Megara Hyblaka, were si tuated between Catana and Syracuse. The Chalcidic colonies of Callifolis and Euboea, both of which disappeared at an early period, must have been situated on or near the $E$. coast of the island, and to the N. of Syracuse, but we have no further clue to their situation. S. of Syracuse, between it and Cape Pachynus, was Heiorus, at the month of the river of the same name. 2. W. of Cape Pachynus, proceeding along the S. coast, were Cabarixa, Gela, Phintias, Agrigentum, Hekaclea Minoa, Theimae Selinuntiaf, Selinus, Mazara, and Lilybaelim. Besides these the more obscure towns of Camicus, Caena, and Inycum, the two former dependencies of Agrigentum, the latter of Selinus, inust be placed on or near the $S$. coast of the island. 3. N. of Lilybaeum was Motya, which ceased to exist at a comparatively early period, and Drepranima (Trapani) at the NW. angle of the island. Between this and Panormus, were Eryx at the fuct of the mountain of the same name, and a short distance from the coast, the Emporium of Segesta, Hyccara, and Cetaria. Proceeding eastward from Panoratus, along the $N$. coast of the island, were Soluntubi, Thermae, Himera, Cephaiciedium, Alaesa, Calacta, Agathyrna, Aluntium, Tyndaris, and Mylak.

The towns in the interior are more difficult to enumerate: with regard to some of them indeed we are at a loss to deternine, even in what region of the island they were situated. For the purpose of enumeration it will be convenient to divide the island into three portions; the first comprising the western half of Sicily as far as the river Himera, and a line drawn from its sources to the N. coast : the other two, the NE. and SE. portions, being separated by the course of the river Dittaino and that of the Symacthus to the ser. 1. In the western district were Segesta and Halicyar, the mosit westerly of the inland cities; Entella, on the river Hypsas, about midway between the two seas: Iaeta and Macella, both of which may probably be placed in the mountainous district between Entella and Panormus; Thocala, near Calutabellotha, in the mountains inland from the Thermae Selinuntiae; Scmera, of very uncertain site, but probably situated in the same part of Sicily; Herbessus, in the neighbourhowd of Agrigentum; Petra, near the sources of the W. branch of the Himera in the Madonia mountains; and Esoyum (Gangi), at the head of the Fiume Grande, the E. branch of the same river. Paropis must apparently be placed on the northern declivity of the same mountains, but further to the W.

A little to the E. of the Himera and as nearly as possible in the centre of the island, was situated the firtress of Enna (Castro Gioranni), so that the broundary line between the NE. and NW. regions may be conveniently drawn from thence. 2. In the NE. region were: Assorus and Agymual.

NE. of Enna, but W. of the valley of the Symaethus; Centuripa (Centorbi), nearly due E. of Enda; Adranum (Adernó), on the E. bank of the Symaethus, at the foot of Mount Aetna; Hybla Major (which mast not be confounded with the city of the same name near Syracuse), and Artna, previously called Inessa, both situated on the southern slope of the same mountain. N. of Agyrium, on the southern slopes of the Mons Nebrodes were situated Herbita, Capitium, and probably also Galaria : while on the northern declivities of the same mountains, fronting the sea, but at some distance inland, were placed Apollonia (probably Pollina). Amestratus (Mistretta), Abacaenum, a few miles inland from Tyndaris, and Noare, probably Nuara. Three other towns, Imachara, Ichara, and Tissa, may probably be assigned to this same region of Sicily, though their exact pusition cannot be determined. 3. In the SE. portion of Sicily, S. of the Symaethus and its tributary the Chrysas or Dittaino, were situated Ergetium, Morgantla, Leontini, and Hybla: as well as Menaenum and Herbessus: but of all these names Leontini (Lentini) and Menaenum (Mineo) are the only ones that can be identified with anything like certainty. In the hills $W$. of Syracuse were Achat (I'alizzolo), Bidis (S. Gio. di Bidino), and Cacyrum (Cassaro); and W. of these again, in the direction towards Gela, must be placed the $\mathrm{He}-$ raean Hybla, as well as Echetla, in the neighbourhood of Gran Michele. SW. of Syracuse, in the interior, were Netum or Neetum (Noto Vecchio), and Hotyca (Modica), both of which are well known. The Syracusan colony of Casmenae must probably have been situated in the same district but its site has never been identified.

After going through this long list of Sicilian towns, there remain the following, noticed either by Cicero or Pliny, as municipal towns, to the position of which we have no means of even approximating. The Acherini (Cic.),Tyracini (Cic.; Tyracienses, Plin.), Acestaei (Plin.), Etini (Id.), Herbulenses (Id.). Semellitani (Id.), Talarenses (Id.). Many of the above names are probably corrupt and merely false readings, but we are at a loss what to substitute. On the other hand, the existence of a town called Mutistratiom or Mytistratum is attested by both Cicero and Pliny, and there seems no sufficient reason for rejecting it as identical with Amestratus, as has been done by many modern gengraphers, though its site is wholly uncertain. Equally unknown are the following names given by Ptolemy among the inland towns of the island: Aleta ("A入nta), Hydra or Lydia ( ${ }^{\circ} \mathrm{r} \delta \rho a$ or $\Lambda v \delta i ́ a$ ), Patyorus (Пariopos), Coturga or Cortuga (Kótvp̧a or Kófruya), Legum or Letum ( $\Lambda \hat{\eta} \gamma 0 \nu$ or $\Lambda \hat{\eta} \tau 0 \nu$ ), Ancrina ("Ayкрiva), Ina or Ena ("I $\nu a$ or ${ }^{\circ} H \nu a$ ), and Elcethium ('EAcétiov). It would be a waste of time to discuss these names, most of which are probably in their present form corrupt, and are all of them otherwise wholly anknown. On the other hand the existence of Nacona, mentioned by Stephanus of Byzantium, but not noticed by any other writer, is confirmed by coins.

The topography of Sicily is still very imperfectly known. The ruins of its more celebrated cities are indeed well known. and have been often described; especially in the valuable work of the Duke of Sirra di Falco (Antichità della Sicilia, 5 vols. fol. Palermo, 1834-1839), as well as in the well-known travels of Swinburne, Sir R. Hoare, \&c. (Swinburne's

Travels in the Two Sicilies, 2 vols. 4to. Lond. 1783; Sir R. Hoare's Clussical Tour throngh Italy and Sicily, 2 vols. 8vo. Lond. 1819; St. Non, Voyage Pittoresque de Naples et de la Sicile, 5 vols. fol. Paris, 1781; Biscari, Principe di, Viaggio per le Antichità della Sicilia, 8vo. Palermo, 1817, \&c.): but the island has never been thoroughly explored by an antiquarian traveller, like those to whom we are indebted for our knowledge of Greece and Asia Minor. The valuable work of Cluverius (Sicilias Antiqua, fol. Lugd. Bat. 1619) must here, as well as for Italy, be made the foundation of all subsequent researches. But much valuable information is found in the more ancient work of Fazello, a Sicilian monk of the sixteenth century, as well as of his commentator Amico, and in the Topographical Dictionary of the latter author. (Thomae Fazelli de Rebus Siculis Decades Duo, first edit. in fol. Panormi, 1558, republished with copious notes by Amico, 3 vols. fol. Catanae, 1749-1753; Amico, Lexicon Topographicum Siculum, 3 vols. 4to. Catanae, 1759). Mach, however, still remains to be done. Many localities indicated by Fazello in the sixteenth century as presenting ancient remains have never (so far as we are aware) been visited by any modern traveller: no go xl map of the island exists, which can be trusted for topographical details, and there can be little doubt that a minute and careful examination of the whole country, such as has been made of the neighbouring island of Sardinia by the Chev. De la Marmora, would well reward the labours of the explorer. Even the ruins described by Sir R. Hoare as existing in the neighbourhood of Sta Croce, or those situated near Vindicari, a few miles N. of Cape Pachynus and commonly ascribed to Imachara, have never been examined in detail, nor has any clue been obtained to their identification.

The Itineraries give several lines of route through the island, but many of the stations mentioned are wholly uncertain, and were probably never more than obscure villages or mere solitary posthouses. The first line of route (Itin. Ant. pp. 86-89) proceeds from Messana along the E. coast by Tauromenium and Acium to Cat:una, and from thence strikes inland across the centre of the island to Agrigentum; the course of this inland route is wholly uncertain and the names of the three stations upon it, Capitoniana, Gelasium Philosophiana and Petiliana, are entirely unknown. From Agrigentum it followed the line of coast to Lilybaeum; the stations given are Cena [Carna], Allava, Ad Aquas (i. e. the Aquae Labodes or Thermae Selinuntiae), Ad fluviam Laiarium, and Mazara; all except the 3rd and 5th of very uncertain site. A second route (Itin. Ant. pp. 89,90) proceeds in the inverse direction from Lilybaeum to Agrigentum, and thence by a more southerly line, through Calvisiana, Hybla, and Acrae (Palazzolo) to Syracuse, and from thence as before along the E. coast to Messana. A third line follows the N . coast of the island from Lilybaeum by Panormus to Messana. The stations on this line are better known and can for the most part be determined: they are, Drepana, Aqnae Segestanae (near Segesta), Parthenium (Partinico), Hyccara (Muro di Carini), Panormus, Soluntum, Thermae, Cephaloedium, Halesus (Alaesa), Calacte, Agatinnam, (Agathyrnum), Tyndaris, and Messana. A fourth route (Itin. Ant. p. 93) crossed the interior of the island from Thermae, where it branched off from the preceding, passing through Enna, Agyrium, Centuripa and Aetna to Catana. A fifth gives us a line

## SICULI.

of strictly maritime route around the sonthern extremity of the island from Agrigentum to Syracuse; but with the exception of Pintis, which is probably Phintias (Alicata), none of the stations can be identified. Lastly, a line of road was in use which crossed the island from Agrigentum direct to Pa . normus (Itin. Ant. p. 96), but none of its stations are known, and we are therefore unable to determine oven its general course. The other routes given in the Itinerary of Antoninus are only unimportant variations of the preceding ones. The Tabula gives only the one general line around the island (crossing, however, from Calvisimn on the $S$. coast direct to Syracuse), and the cross line already mentioned from Thermae to Catana. All discussion of distances along the above routes must be rejected as useless, until the routes theinselves can be more accurately determined, which is extremely difficult in so hilly and broken a country as the greater part of the interior of Sicily. The similarity of names, which in Italy is so often a sure guide where all other inldications are wanting, is of far less assistance in Sicily, where the long period of Arabic dominion has thrown the nomenclature of the islund into great confusion
[E.H.B.]

COIN OF SICILIA.
SICILIBBA or SICILIBRA (in the Geogr. Rav. Siciliba, iii. 5), a place in Africa Propria (Itin. Ant. pp. 25, 45), variously identified with Bazibah and Huowch Alouina.
[T. H. D.]
SI'CINOS (Eixuvos: Eth. Euxuitrns: Sikino), a small island in the Aegaean sea, one of the Sporades, lying between Pholegandros and Ios, and containing a town of the same name. (Scylax, p. 19; Strab. 2. p. 484; Ptol. iii. 15. § 31.) It is said to have been originally called Oenoë from its cultivation of the vine, but to have been named Sicinos after a son of Thoas and Oence.. (Steph. B. s. v.; Apoll. Rhod. i. 623; Schol. ad loc.; Plin. iv. 12. s. 23; Etym. M. p. 712. 49.) Wine is still the chief production of the island. It was probably colonised by Ionians. Like most of the other Grecian islands, it submitted to Xerxes (Herod. viii. 4), but it afterwards formed part of the Atheuian maritime empire. There are some remains of the ancient city situated upon a lofty and rugged mountain, on whose summit stands the church of S. Marina. There is also still extant an ancient temple of the Pythian Apollo, now converted
 in a depression between the main range of mountains, and the summit lying more to the left, upon which the ruins of the ancient city stand. We learn from an inscription found there by Ross that it was the temple of the Pythian Apollo. (Ross, Reisen auf den Griech. Inseln, vol. ii. p. 149, seq.; Fiedler, Keise, vol. ii. p. 151, seq.)

SICOR. [Secor]
Sl'CORIS (Eikopis, Dion Cass. xli. 20), a tributary riser of the lherus in Hispania Tarraconensis. It ruse in the Pyrenees in the territory of the Cer-
retani, and separated the countries of the Ilergetes and Lacetani. It flowed past Ilerda, and according to Vibius Sequester (p. 224, ed. Bipont) bore the name of that town. A little afierwards it received the Cinga, and then flowed into the lberus near Octogesa. (Caes. B. C. i. 40, 48; Plin. iii. 3. 8. 4; Lucan. iv. 13, seq.) Ausonius describes it as fluwing impetuously ("torrentem," Epist. 2xv. 59). Now the Segre.
[T. H. D.]
SI'CULI ( (ucelol), is the name given by ancient writers to an ancient race or people that formed one of the elements in the primitive popalation of Italy, as well as Sicily. But the accounts given of them are very confused and uncertain. We find the Siculi mentioned: 1, as among the early inhabitants of Latium; 2, in the extreme S. of Italy; 3. in Sicily; 4, on the shores of the Adriatic. It will be convenient to examine these notices separately.

1. The Siculi are represented by Dionysius as the earliest inhabitants of the country subsequently called Latium (i.9), as well as of the southern part of Etruria; they were an indigenous race, i. a one of whose wanderings and origin be had no account. They held the whole cuantry till they were expelled from it by the poople whom he calls Aborigines, descending from the mountains of Central Italy [Aborigises], who made war upon them, in conjunction with the Pelasgians; and after a long protracted struggle, wrested from them one town after another (Id. i. 9, 16). Among the cities that are expressly mentioned by him as having once been occupied by the Siculi, are Tibur, where a part of the city was still called in the days of Dionysius Zıce入tóv. Ficulea, Antemnae, and Tellenac, as well as Falerii and Fescennium, in the country atterwards called Etruria (Id. i. 16, 20, 21). The Siculi being thus finally expelled from their possessions in this part of Italy, were reported to have migrated in a body to the southern extremity of the peninsula, from whence they crossed over the straits, and established themselves in the island of Sicily, to which they gave the name it has ever since borne. [Siclula.] (Id. i. 22.) Dionysius is the only author who has left us a detailed account of the conquest and expulsion of the Siculi, but they are mentioned by Pliny among the races that had successively occupied Latium (Plin. iii. 5. 8. 9); and this seems to have been an established and received tradition.
2. We find the Siculi frequently mentioned in the southernmost portion of the Italian peninsula, where they appear in close connection with the Oenotrians, Morgetes, aud Itali, all of them kindred tribes, which there are good reasuns for assigning to the Pelasgic race. [Ocnotria.] It is probable, as suggested by Strabo, that the Siculi, more than once, mentioned by Humer (Odyss. xx. 383, xxiv. 211, \&cc.), were the inhabitants of the coast of Itals opposite to Ithaca: and the traditions of the Epizephyrian Locrians, reported by Polybius, spoke of the siculi as the people in whose territory they settled, and with whom they first found themselves engaged in war. (Yolyb. xii. 5, 6) Numerous traditions also, reported by Dionysius (i. 22, 73) from Antiochus, Hellanicus, and others, concur in bringing the Siculi and their eponymons leader Siculus ( Euce $\lambda \delta_{s}$ ) into closo connection with Italus and the Itali: and this is confirned by the linguistic relation which may fairly be admitted to exist between Eakend́s and 'Itahós (Niebuhr, vol. i. P. 47) though this is not close cnough to be in itself conclusive. So far as
our scanty knowledge goes, therefore, we must conclude that the two shores of the Sicilian strait were at one period peopled by the same tribe, who were known to the Greeks by the name of Sicels or Siculi; and that this tribe was probably a branch of the Oenotrian or Pelasgic race. The legends which connected these Siculi with those who were expelled from Latium seem to have been a late invention, as we may infer from the circumstance that Sicelus, who is represented by Antiochus as taking refuge with Morges, king of Italia, was called a fugitive from Rome. (Dionys. i. 73.)
3. The Siculi or Siceli were the penple who occupied the greater part of the island of Sicily when the Greek colonies were first established there, and continued thronghout the period of the Greek domination to occupy the greater part of the interior, especially the more rugged and mountainons tracts of the island. [Sicilas.] The more westerly portions were, however, occupied by a people called Sicani, whom the Greek writers uniformly distinguish from the Siculi, notwithstanding the resemblance of the two names. These indeed would seem to have been in their origin identical, and we find Roman writers using them as such; so that Virgil more than once employs the name of Sicani, where he can only mean the ancient Latin penple called by Dionysius Siculi. (Virg. Aen. viii. 795, xi. 317.)
4. The traces of the Siculi on the western shores of the Adriatic are more ancertain. Pliny indeed tells us distinetly that Numana and Ancona were founded by the Siculi (Plin. iii. 13. s. 18); but it is by no means improbable that this is a mere confusion, as we know that the latter city at least was really founded by Sicilian Greeks, as late as the time of Dionysius of Syracuse [Ancona]. When, however, he tells us that a considerable part of this coast of Italy was held by the Siculians and Liburnians, before it was conquered by the Umbrians ( $I b$. 14. s. 19), it seems probable that he must have some other authority for this statement; Pliny is, however, the only author who mentions the Siculi in this part of Italy.

Frum these statements it is rery difficult to arrive at any definite conclusion with regard to the ethnographic aftinities of the Siculi. On the one hand, the notices of them in Southern Italy, as alrealy observed, seem to bring them into close connection with the Itali and other Oenotrian tribes, and would lead us to assign them to a Pelasgic stock: but on the other it must be admitted that Dionysius distinctly separates them from the I'elasgi in Latium, and represents them as expelled from that country by the Pelasgi, in conjunction with the so-called Aborigines. Hence the opinions of modern scholars have been divided: Niebuhr distinctly receives the Siculi as a Pelasgic race, and as forming the Pelasgic or Greek element of the Latin people; the same view is adopted by 0 . Mïller (Etrusker, pp. 1016, \&c.) and by Abeken (Mittel Italien, p. 5); while Grotefend (Alt Itulien, vol. iv. pp. 4-6), followed by Forbiger and others, regards the Siculi as a Gaulish or Celtic race, who had gradually wandered southwards through the peninsula of Italy, till they finally crossed over and established themselves in the island of Sicily. This last hypothesis is, however, purely conjectural. We hare at least some foundation for supposing the Siculi as well as the Oenotrians to be of Pelasgic origin : if this be rejected, we are wholly in the dark as to their origin or affinities.
[E. H. B.]
 Strab. \&c.), was the name given in ancient times to that portion of the Mediterranean sea which bathed the eastern shores of Sicily. But like all similar appellations, the name was used in a somewhat vague and fluctuating manner, so that it is difficult to fix its precise geographical limits. Thus Strabo describes it as extending along the eastern shore of Sicily, from the Straits to Cape Pachynus, with the southern shore of Italy as far as Locri, and again to the eastward as far as Crete and the Peloponnese; and as filling the Corinthian Gulf, and extending northwards to the Iapygian promontory and the mouth of the Ionian gulf. (Strab. ii. p. 123.) It is clear, therefore, that he included ander the name the whole of the sea between the Peloponnese ani Sicily, which is more commonly known as the Ionian sea [Ionicm Mare], but was termed by later writers the Adriatic [Adriaticum Mare]. Polybius, who in one passage employs the name of Ionian sea in this more extensive sense, elsewhere uses that of the Sicilian sea in the same general manner as Strabo, since he speaks of the island of Cephallenia as extending out towards the Sicilian sea ( $\mathrm{\nabla} .3$ ); and even describes the Ambracian gulf as an inlet or arm of the Sicilian sea (iv. 63, v. 5). Eratosthenes also, it would appear from Pliny. applied the name of Siculuin Mare to the whole extent from Sicily to Crete. (Plin. iii. 5. 8. 10.) The usage of Pliny himself is obscure; but Mela distinguishes the Sicilian sea from the lonian, applying the former name to the western part of the broad sea, nearest to Sicily, and the latter to its more easterly portion, nearest to Greece. (Mel. ii. 4. § 1.) But this distinction does not seem to have been generally adopted or continued long in use. Indeed the name of the Sicilian sea seems to have fallen much into disuse. Ptoleiny speaks of Sicily itself as thounded on the N . by the Tyrihenian sea. on the S . by the African, and on the E. by the Adriatic; thus omitting the Sirilian sea altngether (Ptol. iii. 4. § 1); and this seems to have continued under the Ronan Empire to be the received nomenclature.

Strabo tells us that the Sicilian sea was the same which had previously been called the Ausonian (Strab. ii. p. 133, v. p. 233); but it is probable that that name was never applied in the more extended sense in which he uses the Sicilian sea, but was confined to the portion more immediately adjoining the southern cuasts of Italy, from Sicily to the Iapygian promontory. It is in this sense that it is employed by Pliny, as well as by Pulybius, whom he cites as his authority. (Plin. l.c.)
[E. H. B.]
SICUM (Eıkoìv, Ptol. ii. 16.§ 4 ; Plin. iii. 22; Siclis. Peut. Tab.), a town of Dalmatia, to the E. of Tragurium, on the road to Salona, where Claudius is said to have quartered the veterans. (Plin. l.c.) From its position it cannot be Sebenico, with which it has been identified, but may be represented by the vestiges of a Roman station to the NW. of Castel Vetturi, on the Riviere dei Castelli, where a column with a dedicatory inscription to M. Julius Philippus has been lately found, as well as much poitery and Roman tiles. (Wilkinson, Dalmatia, vol. i. p. 176.)
[E. B. J.]
 Anecd. p. 555: Eth. Eixucuvios: the territury $\Sigma_{1-}$ кuavia: Vasiliki.)

1. Situation.-Sicyon was an important city of Peloponnesus, situated upon a table-height of no gre:t elevation, at the distance of about 2 miles from the

Corinthian gulf．Strabo（viii．p．382）correctly de－ scribes it as occupying a strong hill distant 20 stadia from the sea，though he adds that others made the distance 12 stadia，which may，however，have refer－ ence to the lower town built at the foot of the table－ height．Upon this height the modern village of Vasi－ liká now stands．It is defended on every side by a natural wall of precipices，which can be ascended only by one or two narrow passages from the plain．A river flows upon either side of the hill，the one on the eastern side being the Asopus，and that on the western side the Helisson．When Sicyon was at the beight of its power，the city consisted of three parts，the Acropolis on the hill of Vasiliki，the lower town at its foot，and a port－town upon the coast．The port－town was well fortified．（Eıku－ $\omega \nu i \omega \nu$ 入ıй̀ ，Xen．Hell．vii．3．§ 2；Polyb．v．27； Paus．i1．12．§ 2；Strab．l．c．）

II．History．－Sicyon was one of the most an－ cient cities of Greece，and is said to have existed under the name of Aegialeia（Aifiá $\lambda \in i a$, Puus．ii． 5．§ 6）or Aegiali（Aijıa入oi，Strab．viii．p．382） long before the arrival of Pelops in Greece．It was also called Mecone（Mincúvn），which was appa－ rently its sacerdotal name，and under which it is celebrated as the＂dwelling－place of the blessed，＂ and as the spot where Prometheus instituted the Hel－ lenic sacrifices and deceived Zeus．（Steph．B．s．v．之ıcuผ́v ；Strab．viii．p．382；Callim．Fragm．195，p． 513 ，ed．Ernesti；Hesiod．Theog．535．）Its name Tel chinin（Teג ${ }^{\text {ivia }}$ ）has reference to its being one of the earliest seats of the workers in metal．（Steph．B． a．v．ミıкváv）．Its name Aegialeia was derived from a mothical autochthon Aegialeus，and points to the time when it was the chief city upon the southern coast of the Corinthian galf，the whole of which was also called Aegialeia．Its later name of Sicyon was said to have been derived from an Athenian of this name，who became king of the city，and who is represented as a son of either Ma－ rathon or Metion．（Paus．ii．6．§ 5．）This legend points to the fact that the carly inhabitants of Sicyon were Ionians．Aegialeus is said，in some traditions，to have been the son of Inachus，the first king of Argos，and the brother of Phoronens． A long series of the successors of Aegialeus is given， among whom one of the most celebrated was the Argive Adrastus，who，being expelled from his own dominions，fled to Polybus，then king of Sicyon，and afterwards succeeded him on the throne．（Euseb． Chron．p．11．seq．：August．Civ．Dei，xviii．2；Paus． ii．6．§§ 6，7．）Homer indeed calls Adrastus first king of Sicyon（Hom．Il．ii．572）；and we know that in historical times this hero was worshipped in the city．（Herod．v．67．）Sicyon was subse－ quently conquered by Agamemnon，who，however， left Hippolytus on the throne；but Sicyon became a tributary city to Mycenae．（Pans．ii．6．§§ 6，7； Hom．IL ii．572，xxiii．299．）Hippolytus was the grandson of Phaestus，who was a son of Hercules； and in consequence of this connection，the inhabit－ ants were not expelled or reduced to subjection upon the conquest of the city by the Dorians under Phalces，the son of Temenus；for while the Dorian conquerors，as in all other Doric states，were di－ vided into three tribes ander the names of Hylleis， Pamphyli，and Dymanatae，the original Sicyonians were formod into a fourth tribe，under the name of Aecialeis，which possessed the same political rights as the other three．（Paus．ii．6．§ 7 ；Stral．viii． p．389；Herod．v．68．）Sicyon was now a Dorian
state；and from this time its real history begins． It was at first dependent upon Argos（Paus．l．c．）， which was for some time the most powerful state in the Peloponnesus，Sparta being second to it．In the First Messenian War the Sicyonians fought on the side of the Messenians along with the Argives and Areadians．（Paus．iv．11．§ 1．）In the Second Messenian War，about B．c．676，Sicyon became subject to the tyranny of the Orthagoridae，who governed the city for more than 100 years．and whose rule is praised by Aristotle（ Iol．v．9．§ 21） for its mildness．The family of the Orthagoridae belonged to the non－Dorisn tribe，and the con－ tinuance of their power is to be accounted for by the fact of their being supported by the original population against the Doriun conquerors．Ortha－ goras，the founder of the dynasty，is said to have been originally a cook．（Aristot．l．c．；Hellad．ap． Phot．cod．279，p． 530 ；Liban．vol．iii．p．251，ed． Reiske．）In other accounts Andreas is mentioned as the first of the Sicyonian tyrants（Herod．vi． 126；Diod．Fragm．Vat．14）；and it is probable that he is the same person as Orthagoras，as the two names do not occur in the same author．He was succeeded by his son Myron，who gained a cha－ riot victory at Olympia in B．C．648；Mymn by Aristonymus；and Aristonymus by Cleisthenex （Herod．vi．126；Paus．ii．8．§ 1，vi．19．§ 1．）The latter was celebrated for his wealth and magniti－ cence，and was also distinguished by his bitter hatred against Argos，and his systematic endeavour to depress and dishonour the Dorian tribes．He changed the ancient and venerable names of the three Dorian tribes into the insulting names of Hy－ atae，Oneatae，and Choercatae，from the three Greek words signifying the sow，the ass，and the pia； while he declared the superiority of his own tribe by giving it the designation of Archelai，or Inds of the people．Cleisthenes appears to have continued despot till his death，which may be placed about B．c． 560 ．The dynasty perished with him．He left no son；but his daughter Agariste，whom so many suitors wooed，was married to the Athenian Megacles，of the great family of the Alcmaeonidae， and became the mother of Cleisthenes，the founder of the Athenian democracy after the expulsion of the Peisistratidae．The names given to the tribes by Cleisthenes continued in use for sixty years after the death of the tyrant，when by mutual agreement the ancient names were restored．（Herod．vi． 126 －131；Grote，Hist．of Greece，vol．iii．p．43，seq．； Dict．of Biogr．art．Cleistrenes．）

A Dorian reaction appears now to have taken place，for during a long time afterwards the Sicyonians were the steady allies of the Spartans． In the invasion of Greece by Xerxes（в．с．480）， the Sicyonians sent a squadron of 15 ships to Salamis（Herod．viii．43），and a body of 3000 hoplites to Plataea．（Herod．ix．28．）In the interval between the Persian and Peloponnesian wars the territory was twice invaded and laid waste by the Athenians，first under Tolmides in b．c． 456 （Thuc．i．108；Paus．i．27．§ 5），and a second time under Pericles，b．c． 454 （Thuc．i． 111 ；Diod．xi． 88）．A few years later（B．c．445）the Sicyonians supported the Megarians in their revolt from Athens． （Thuc．i．114．）In the Peloponnesian War they sided with Sparta，and sent a contingent of ships to the Pelopimnesian fleet．（Thuc．ii．9，80，83．）In B．c． 424 the Sicyonians assisted Brasidas in his operations against the Athenians in the Megarid
(Thuc. iv. 70), and in the same vear they repulsed a descent of the Athenians under Demosthenes upon their territory. (Thuc. iv. 101.) In B.c. 419 they united with the Corinthians in preventing Alcibiades from erecting a fortress upon the Achaean promontory of Rhium. (Thuc. v. 52.) About this time a demncratical revolution appears to have taken place, since we find the Lacedaemonians establishing an oligarehical government in Sicyon in b.c. 417. (Thuc. v. 82.) In the wars of Lacedaemon against Corinth, в. c. 394, and against Thebes, в.c. 371, the Sicyomians esponsed the side of the Lacedaemonians. (Xen. Hell. iv. 2.§ 14, iv. 4. § 7, seq. vi. 4. § 18.) But in b. c. 368 Sicyon wis compelled by Epaminondas to juin the Spartan alliance, and to admit a Theban harmost and garrison into the citadel. Euphron, a leading citizen of Sicyon, taking advantage of these circumstances, and supported by the Arcadians and Argives, succeeded in establishing a democracy, and shortly atterwards made himself tyrant of the city. But heing expelled by the Arcadians and Thebans, he retired to the barbour, which he surrendered to Sparta. By the assistance of the Athenians he returned to Sicyon ; but finding himself unable to dislodge the Theban garrison from the Acropolis, he repaired ts Thebes, in hopes of obtaining, by corruption and intricue, the banishment of his opponents and the restoration of his own power. Here, however, he was murdered by some of his enemies. (Xen. Hell. vii. 1-3; Diod. xv. 69, 70 ; Dict. of Biogr. art. Euphron.) Sicyon seems, however, to have been favorable to tyrants ; for, after a short time, we again find the city in their power. The facility with which ambitious citizens obtained the supreme power was probably owing to the antagonism between the Dorian and old Ionian inhabitants. Demosthenes mentions two Sicyonian tyrants, Aristratus and Epichares. in the pay of Philip (de Cor. pp. 242, 324). In the Lamian war, after the death of Alexander the Great, B.C. 323, the Sicyonians juined the other Greeks against the Macedonians. (Diod. xviii. 11.) The city subsequently fell into the hands of Alexander, the son of Polysperchon ; and after his murder in B. c. 314, his wife Cratesipolis continued to hold the town for Cussander till b.c. 308, when she was induced to betray it to Ptolenay. (Diod. xix. 67, xx. 37.) In B. C. 303, Sicyon passed out of the hands of Ptolemy, heing surprised by Demetrius Poliorcetes in the night. It appears that at this time Sicyon consisted of three distinct parts, as already mentioned. the Acropolis, on the hill of Vasilika, the lower city at its foot, and the port-town. It is probable that formeriy the Acropolis and the lower city were united with the port-town, by walls extending to the sea; but the three quarters were now separated from one another, and there was even a vacant space between the lower town and the citadel. Seeing the difficulty of defending so extensive a space with the diminished resources and population of the city, and anxious to secure a strongly fortified place, Demetrius compelled the inhabitants to remove to the site of the ancient Acropolis, which Diodorus describes as "a site very preterable to that of the former city, the inclosed space being an extensive plain, surrounded on every side by precipices, and so difficnlt of access that it would not be passible to attack the walls with machines." This new city was called Demetrias. (Diod. xx. 102; Plut. Demetr. 25 ; Paus. ii. 7. § 1 ; Strab. viii. p. 382.) The name Demetrias
soon disappeared ; but the city continued to remain upon its lofty site, which was better adapted than most mountain heights in Greece for a permanent population, since it contained a good supply of water and cultivable land. Psusanias (Lc.) represents the lower town as the original city of Aegialeus; but Col. Leake justly remarks, it is more natural to conclude that the first establishment was made upon the hill Vasiliki, which, by its strength and its secure distance from the sea, possesses attributes similar to those of the other chief cities of Greece. Indeed, Pausanias himself confirms the antiquity of the occupation of the hill of Vasiliki, by describing all the inost ancient monuments of the Sicyonians as standing upon it. (Leake, Morea, vol. iii. p. 367.)

After Demetrius quitted Sicyon, it again became subject to a succession of tyrants, who quickly displaced one another. Cleon was succeeded in the tyranny by Euthydemus and Timocleides; but they were expelled by the people, who placed Cleinias, the father of Aratus, at the head of the govermment. Cleinias was soon afterwards murdered by Abantidas who seized the tyramy, b.c. 264. Abantidus was murdered in his turn, and was succeeded by his father Paseas; but he again was murdered bv Nicocles, who had held the sovervign power onlv four months, when the young Aratus surprised the citadel of Sicyon, and delivered his native city from the tyrant, B. c. 251. (Paus. ii. 8. §§ 1-3; Plut, Arat. 2.) Through the influence of Aratus, Sicyon now joined the Achacan League, and was one of the most important cities of the confederacy. (Paus. ii. 8. § 3; Plut. Arut. 9; Polyb. ii. 43.) In consequeuce of its being a member of the league, its territory was devastated, both by Cleomenes, B. c. 233 (Plut. Arat. 41, Cleom. 19 : Polyb. ii. 52), and by the Aetolians, B. c. 221. (Polyb. iv. 13.) In the Roman wars in Greece, Sicyun was favoured by Attalus, who hestowed handsome presents upon it. (Polyb. xvii. 16; Liv. xxxii. 40.) The conquest of Corinth by the Pomans, B. c. 146, was to the advantage of Sicyon, for it obtained the greater part of the neighbouring territory and the administration of the lsthmian games. (Paus. ii. 2. § 2.) But even befure Corinth was rebuilt, Sicyon again declined, and appears in an impoverished state towards the end of the Republic. (Cic. ad Att. i. 19, 20, ii. 1.) After the restoration of Corinth, it still further declined, and its ruin was completed by an earthquake, which destryyed a great part of the city, so that Pausanias found it almost depopulated (ii. 7. § 1). The city, however, still continued to exist in the sixth century of the Christian era; for Hierocles (p. 646, Wess.) mentions New Sicyon (Néa $\Sigma_{i-}$ $\kappa \nu \omega \nu$ ) among the chief cities of Achaia. The maritime town was probably Old Sicyon. Under the Byzantine empire Siicyon was called Hellas, and the inhabitants Helladici, probably in contradistinction to the surrounding Slavonic inhabitants.

 Bonn.) The name Vasilikí ( (d Bafi入ıkd) has reference to the ruins of the temples and other public buildings.
III. Art, $8 \cdot \mathrm{c}$.-Sicyon is more renowned in the artistic than in the political history of Greece. For a long time it was one of the chief seats of Grecian art, and was celebrated alake for its painters and sculptors. According to one tradition painting was invented at Sicyon, where Telephanes was the first to practise the monagram, or drawing in outline
(Plin. xxxv. 3. s. 15); and the city long remained the home of painting (" diu illa fuit patria picturae," Plin. xxxv. 11. 8. 40). Sicyon gave its name to one of the great schools of painting, which was founded by Eupompus, and which produced Pam1 hilus and Apelles. (Plin. xxxv. 10. s. 36.) Sicyon was likewise the earliest school of statuary in Greece, which was introduced into the city by Dipoenus and Scyllis from Crete about b.c. 560 (Plin. xxxvi. 4); but its earliest native statuary of celebrity was Canachus. Lysippus was also a native of Sicyon. (Dict. of Biogr. 8. vv.) The city was thas rich in works of art; but its most valuable paintings, which the Sicyonians had been obliged to give in pledge on account of their debts, were removed to Rome in the aedileship of M. Searrus, to adorn his theatre. (Plin. xxxv. 11. 8. 40.)

Sicyon was likewise celebrated for the taste and skill displayed in the rarious articles of dress made by its inhabitants, among which we find mention of a particular kind of shne, which was much prized in all parts of Greece. (Athen. iv. p. 155; Pollux, vii. 93 ; Hesych. e. v. इıxumvia; Auctor, ad Herenn. iv. 3, de Orat. i. 54; Lucret. iv. 1121; Fest. 2. v. Sicyonia.)
IV. Topography of the City.- Few cities in Greece were more finely situated than Sicyon. The hill on which it stood commands a most splendid view. Towards the west is seen the plain so celebrated for its fertility; towards the east the prospect is bounded by the lofty hill of the Acrocorinthas; while in front lies the sea, with the noble mountains of Parnassus, Helicon, and Cithaeron rising from the opposite coast, the whole forming a charming prospect, which cannot have been without influence in cultivating the love for the fine arts, for which the city was distinguished. The hill of Sicyon is a tabular summit of a triangular shape, and is divided into an upper and a lower level by a low ridge of rocks stretching right across it, and forming an abrupt separation between the two levels. The upper level, which occupies the sonthern point of the triangle, and is about a third of the whole, was the Acropolis in the time of Pausanias ( $\grave{\eta}$ vùv

MAP OF THE SITE OF sIcYon (from Leake). A. Vasilikd. $\quad 66 \mathbf{6}$. Remalus of ancient walls.

Pausanias came to Sicyon fro:n Corinth. After crossing the Asopus, he noticed the Olympicium on the right, and a little farther on the left of the ruad
the tomb of Eupolis of Athens, the comic poet. After passing some other sepulchral monuments, he entered the city by the Corinthian gate, where was a fountain dropping down from the overhanging rocks, which was therefore called Stazusa ( E Td́Sovioa), or the dropping fountain. This fountain has now disappeared in consequence of the falling in of the rocks. Upon entering the city Pausanias first crossed the ledge of rocks dividing the opper from the lower level, and passed into the Acropolis. Here he noticed temples of Tyche and the Dioscuri, of which there are still some traces. Below the Acropolis was the theatre, the remains of which are found, in conformity with the description of Pausanias, in the ledge of rocks separating the two levels On the stage of the theatre stood the statue of a man with a shield, said to have been that of Aratus. Near the theatre was the temple of Dionysus. from which a road led past the ruined temple of Artemis Limnaea to the Agora. At the entrance of the Agora was the temple of Peitho or Persuasion: and in the Agora the temple of Apollo, which appears to have been the chief sunctuary in Sicyon. The festival of Apollo at Sicyon is celebrated in the ninth Nemean ode of Pindar; and Aratus, when he delivered his native city from its tyrant, gave as the watchword 'Axb入leey ט̄repסfkios. (Plut. Arat. 7.) In the time of Polybius (xvii. 16) a brazen colossal statue of king Attalus L., 10 cabits high, stood in the Agora near the temple of Apollo; but this statue is not mentioned by Pausanias, and had therefore probably disappeared. (Paus. ii. 7. §§ 2-9.) Near the temple of Peitho was a sanctuary consecrated to the Roman emperors, and formerly the house of the tyrant Cleon. Before it stood the heroum of Aratus (Paus. ii. 8. § 8), and near it an altar of the Isthmian Poseidon, and statues of Zeus Meilichins and of Artemis Putrua, the forner resembling a pyramid, the latter a column. In the Agora were also the council-house (Bovieuthpiov), and a stoa built by Cleisthenes out of the spoils of Cirrha; likewise a brazen statue of Zeus, the work of Lysippus, a gilded statue of Artenis, a ruined temple of Apollo Lyceius, and statues of the daughters of Proetus, of Hercules, and of Hermes Agoraeus. (Paus. ii. 9. §§ 6, 7.) The Poecile Stoa or painted stwa, was probably in the Agora, but is not mentioned by Pausanias. It was adorned with numerous paintings, which formed the subject of a work of Polemon. (Athen. xiii. p.5:7).

Puusanias then proceeded to the Gymnasium, which he describes as not far from the Agora. The Gymnasium contained a marble statue of Hercules by Scopas; and in another part a temple of Hercules in a sacred inclosure, named Paedize. From thence a road led to two large inclosures, sacred to Asclepius and Aphrodite, both of which were adorned with several ntatues and buildings. From the Aphrodisium Puasanias went past the temple of Artemis Pheraea to the gyinnasiom of Cleinias, which was ased for the training of the Ephebi, and which contained statues of Artemis and Hercules. (Paus. ii. 10.) It is evident that this gymnasium was different from the one already described, ay Pausanias continues his course towards the sea-side. From thence he turns towards the gate of the city called the Sacred, near which there formerly stood a celebrated temple of Athena, built by Epopeus, one of the mythical kings of Sicyon, but which had been burnt by lightning, and of which nothing then remained but the altar: this temple may perhape have been
the one sacred to Athena Colocasia, mentioned by Athenaeus (iii. p. 72). There were two adjoining temples, one sacred to Artemis and Apollo, built by Epopeus, and the other sacred to Hera, erected by Adrastus, who was himself worshipped by the people of Sicyon (Herod. v. 68; Pind. Nem. ix. 20). There can be little doubt that these ancient temples stood in the original Acropolis of Sicyon; and indeed Pausanias elsewhere (ii. 5. § 6) expressly states that the ancient Acropolis occupied the site of the temple of Athena. We may place these temples near the northern edge of the hill upon the site of the modern village of Vasiliká; and accordingly the
remarkable opening in the rocks near the village may be regarded as the position of the Sacred Gate, leading into the ancient Acropolis. (Leake, Morea, vol. iii. p. 372.)

In descending from the Heraeam, on the road to the plain, was a temple of Demeter; and close to the Heraeum were the ruins of the temple of Apollo Carneius and Hera Prodromia, of which the latter was founded by Phalces, the son of Temenus. (Paus. ii. 11. §§ 1, 2.)
The walls of Sicyon followed the edge of the whole hill, and may still be traced in many parts. The direction of the ancient streets may also still be

plan of the ruins of sicyon (from the French Commission).
A. Acropolis from the time of Demetrius.

1. Temple of Tyche and the Dioscuri.
2. Theatre.
3. Probable site of the Gymnasium.
vOL II.
4. Probable site of the Agora.
5. Roman Building.
a a Road from the lake of Stymphalus to Vasilika and Corinth.
followed by the existing foundations of the houses: they run with mathematical precision from NE. to SW., and from NW. to SE., thus following the rule of Vitruvius. Few of the ruins rise above the ground; but there is a Roman building better preserved, and containing several chambers, which lies near the ridge separating the two levels of the hill. Leake supposes that this building was probably the praetorium of the Romall governor during the periud between the destruction of Corinth by Mummius and its restoration by Julius Caesar, when Sicyon was the capital of the surrounding country; but more recent observers are inclined to think that the ruins are those of baths. West of this building are the theatre and the stadium; and the modern road which leads from Vasiliki to Stymphalus runs between this Roman building and the theatre and then through a portion of the stadium. The theatre was cut out of the rock, separating the two levels of the hill, as already described; its total diameter was about 400 feet, and that of the orchestra 100. Each wing was supported by a mass of inasonry, penetrated by an archel passage. To the NW. of the theatre are the remains of the stadium, of which the total length, including the seats at the circular end, is about 680 feet. Col. Leake remarks that "the stadium resembles that of Messene, in having had seats which were not continued through the whole length of the sides. About 80 feet of the rectilinear extremity had no seats; and this part, instead of being excavated out of the hill like the rest, is formed of factitious ground, supported at the end by a wall of polygonal masonry, which still exists." There are also, in various parts of the hill, remains of several subterraneous aqueducts, which supplied the town with water. The opening of one of them is seen on the SE. side of the theatre; and there is another opening now walled up W. of the modern village. The tyrant Nicocles escaped through these subterraneous passages when Sicyon was taken by Aratus. (Plut. Arat. 9.)
V. Topography of the Sicyonia. - The territory of Sicyon was very small, and, in fact, was little more than the valley of the Asopus. In the apper part of its course the valley of the Asopus is confined between mountains, but near the sea it opens out into a wide plain, which was called Asopia. ('Agarria, Strab. viii. p. 382, ix. p. 408; Paus. ii. 1. § 1.) This plain was celebrated for its fertility
 Lucian, Icarom. c. 18), and was especially adapted for the cultivation of the olive. ("Sicyonia bacca," Virg. Georg. ii. 519; Ov. Ep. ex Pone. iv. 15. 10; Stat. Theb. iv. 50.) The neighbouring see supplied an abundance of excellent fish. (Athen. i. p. 27.) It was separated from the Corinthia on the E. by the river Nemea, and from the territory of Pellene on the $W$. by the Sythas; and on the $S$. it was bounded by the territories of Phlius and Cleonae. At one time the territory of Sicyon mast have extended even beyond the Sythas, since Gonussa or Donussa, which lay W. of this river, is described by Pausanias as belonging to the Sicyonians. [Peilene, p. 571, a.] Between the Helisson and the Sythas was probably the river Selleeis, with the neighbouring village of Ephyra, mentioued by Strabo (viii. p. 338). [Ephyra, No. 3.] Sixty stadia S. of Sicyon, and near the fiontiers of Phliasia, wns Titane or Titana, the most important of the dependencies of Sicyon. [Titank.]. Forty stadia bejond Titane was Phlius; but this road, which
was too narrow for carriages, was not the direct road from Sicyon to Phlius. The direct roed was to the right of the Asopus; and the circuitous road through Titane to the left of that river. Between these two roads, at the distance of 20 staulia from Sicyon, was a sacred grove, containing a temple of the Eumenides. (Paus. ii. 11. § 3, seq.) East of Sicyon was Epieicia, on the river Nemea. [Epieicia.] In the same direction was the fortress Derar. ( $\Delta$ dpar, Xen. Hell. vii. 1. § 22.) There was also a furtress Phoebia, taken by Epaminondas in his march through the valley of the Asopas: it is probably the same place as Buphia. [Buphia.] Strabo (is. p412) mentions a demus Plataeas in the Sicyonia (Hagen, Sicyonia, Regimont. 1831 ; Gompf, Sicyoniacorum Spec. Berol. 1832, Torg. 1834; Bobrik, De Sicyoniae Topographia, Regimont. 1839; Leake, Morea, vol. iii. p. 351, seq.; Boblaye, Recherches, gc. p. 30, seq.; Ro:s, Reisen im Pelo. ponnes, p. 39, seq.; Curtius, Peloponnesos, vol. ii p. 482, seq.; Bealé, Etudes our le Péloponien, p. 343, seq.)

COIN OF SICYON.
SIDAE (Eiסau), a place in Boootis, celebrated for its pomegranstes. Hence the Boeotians called this fruit $\sigma i \delta \eta$, though the more usual name was pood. As the Athenians are said to hare contended with the Boeotians for the possession of the place, it must have been apon the borders of Attica, but its exact site is unknown. (Athen. zir. Pp. 650, 651.)

SIDE ( $\sum(8 \eta$ : Eth. Ziofirns), a town with a good harbour on the coast of Pamphylia, 50 stadia to the west of the river Melas, and 350 east of Attaleia. (Stad. Mar. Mag. § 214, foll.) The town was founded by Cumae in Aeolis. (Scylax, Peripl p. 40; Strab. xiv. p. 667, comp. p. 664 ; Steph. B. 2. v.; Pomp. Mela, i. 15.) Arrian (Anab. i. 26) who admits the Cumaean origin of the place, relates a tradition current at Side itself, according to which the Sidetae were the most ancient colonists sent out from Cumae, but soon after their establishment in their new home forgot the Greek language, and formed a peculiar idiom for themselves, which was not understood even by the neighbouring barbarians. When Alexander appeared before Side, it surrendered and received a Macedonian garrison. In the time of Antiochus the Great, a naval engagement took place off Side between the fleet of Antiochus, commanded by Hannibal, and that of the Rhodians, in which the former was defeated. (Liv. xxxv. 13, 18, xxxvii. 23, 24.) Polybius (v. 73) states that there existed great enmity between the people of Side and Aspendus. At the time when the pirates had reached their highest power in the Mediterrariean, they made Side their principal port, and used it as a market to dispose of their prisoners and bouty by anction. (Strab. xiv. p. 664.) Side continued to be a town of considerable importance under the Ruman emperors, and in the ultimate division of the province it became the metropolis of Pamphylia Prima. (Hierocl.
p. 682; Concil. Const. ii. p. 240.) The chief divinity of this city was Athena, who is therefore seen represented on its coins, holding a pomegranate ( $\sigma i \delta \eta$ ) in her hand. (Sestini, Num. Vet. p. 392, foll.; comp. Xenoph. Anab. i. 2. § 12: Cicero, ad Fam. iii. 6; Athen. viii. p. 350; Paus. viii. 28. § 2; Ptol. v. 5. § 2, viii. 17. § 31.) The exact site of ancient Side, which is now called Esky Adalia, as well as its remains, have been described by modern travellers. Beaufort (Karamania, p. 146, foll), who gives an excellent plan of the present condition of the place, states that the city stood on a low peninsula, and was surrounded by walls; the part facing the land was of excellent workmanship, and mach of it is still perfect. There were four gates, one from the coantry and three from the sea. The agora, 180 feet in diameter, was surrounded by a double row of columns. One side of the square is at present occupied by the ruins of a temple and portico. The theatre appears like a lofty acropolis rising from the centre of the town, and is by far the largest and best preserved of any seen in Asia Minor. The harbour consisted of two small moles, connected with the quay and principal sea gate. At the extremity of the peninsula were two artificial harbours for larger vessels. Both are now almost filled with sand and stones, which have been borne in by the swell. The earliest coins of Side are extremely ancient; the inscriptions are in very barbarous characters, resembling the Phoenician, and the imperial coins exhibit the proud titles of $\lambda a \mu \pi \rho o \tau \alpha \dot{\alpha} \eta$ and évōofos. (Eckhel, vol. iii. pp. 44, 161 ; Spanheim, De Usu et Praest. Num. p. 879; Fellows, Asia Minor, p. 201 ; Leake, A sia Minor, p. 195, foll.)

Respecting Side, the ancient name of Polemonium, see Polemonium.
[L. S.]
SIDE ( $\Sigma(i \delta \eta)$, a town on the eastern coast of Laconia, a little N. of the promontory Malea. It was said to have existed before the Dorian conquest, and to have derived its name from a daughter of Danaus. The inhabitants were removed by the Dorian conquerors to the neighbouring town of Boeae. It probably occupied the site of the monastery of St. George, where there is a port. (Scylax, p. 17; Pans. iii. 22. § 11 ; Boblaye, Recherches, fc. p. 99: Curtius, Peloponnesos, vol. ii. p. 297.)

SIDE'NE ( $\Sigma^{\prime} \delta \delta \dot{\eta} \nu \eta$ ). 1. A town of Mysia, on the river Granicus, which was destroyed by Croesus, and was never rebuilt, in consequence of a curse pronounced on the site by the destroyer. (Strab. xiii. pp. 587, 601.)
2. A town in Lycia, mentioned only by Stephanus B. (s. v.) on the anthority of the Lydiaca of Xarthus.
3. A district on the coast of Pontus, about the mouth of the river Sidenus, which derived its name from the town of Side, afterwards called Polemonium. The greater part of the district was formed by the deposits of the river (Strab. i. p. 52, ii. p. 126, xii. pp. 547, 548, 556 ; Plin. vi. 4.) [L. S.]

SIDE'NI ( $\Sigma i \delta \eta \nu o i)$, a people of Arabia Felix, placed by Ptolemy between the Thamyditae on the north, and the Darrae on the south, on the Elanitic gulf (vi. 7. § 4). Mr. Forster identifies them with the Djeheyne tribe of Barckhardt, in the north of the Hedjaz, extending along the coast from Jebel Hassane (certainly identical with the Hippos Mons -both meaning Horse-mountain - of Ptolemy), to Yembo. "All the circumstances, of name, locality, and neighbourhood," he says, "concur to prove their identity." (Aralia, vol. i. p. 126.) [G. W.]

SIDE'NI ( $\left.\Sigma_{i} \delta \in i \nu 0 i, \Sigma_{\epsilon} \delta_{i} \nu o i, \Sigma_{i} \delta \eta \nu o i\right)$, a German tribe on the coast of the Baltic, between the mouth of the river Suebus and that of the Viadus. (Itol. ii.
 only a corrupt form of the name of this same tribe. (Zeuss, Die Deutschen, p. 154.)
[L. S.]
SIDE'NUS, a small river of Pontus, having its sources in Mount Paryadres, and flowing throngh the district of Sidene into the Euxine; at its mouth was the town of Side or Polemonium (Plin. vi. 4), from which the river is now called Pouleman Chai. (Comp. Hamilton, Researches, i. p. 270.) [L. S.]

SIDERIS, a river of Hyreania, mentioned by Pliny (vi. 16. s. 18), which flowed into the Caspian sea. It cannot be now determined to which river he refers, but he states from it the Caspian sea was called the Hyrcanian.

SIDE'RUS (Eıঠ̈qpoûs). according to Scylax (p. 39) a promontory and a port-town on the coast of Lycia. The same place seems to be meant in Stephanus B. (8. v. ミióapous), when he calls Sidarus a town and harbour. Col. Leake (Asia Minor, p. 189) has shown that the town of Siderus is in all probability no other than Olympus, on the south of Phaselis.
[L.S.]
SIDICI'NI (Eisisivou), a people of Central Italy bordering on the Samnites and Campanians. In the time of the geographers they had disappeared as a people, or become absorbed into the general appellation of Campanians (Strab. v. p. 237), but at an earlier period they appear as a wholly independent people. Their chief city was Teanum, on the E. slope of the volcanic mountain group of Rocca Monfina: but they had at one time extended their power considerably further to the N . and up the valley of the Liris, as the territory of Fregellae is said to have been subject to them, before they were dispossessed of it by the Volscians (Liv. viii. 22). It is clear however that this extension of their limits was of short duration, or at all events had ceased before they first appear in history. Strabo tells us expressly that they were an Oscan tribe (l.c.), and this is confirmed by the coins of Teanum still extant, which have Oscan inscriptions. They were therefore closely allied to the neighbouring tribes of the Campanians on the S . and the Aurunci and Ausones on the W. Hence Virgil associates the inhabitants of the Sidicinian plains ("Sidicina aequora," Aen. vii. 727) with the Auruncans and the inhabitants of Cales. The last city is assigned by Silius Italicus to the Sidicini, but this is opposed to all other authorities (Sil. Ital. viii. 511). The name of the Sidicini is first mentioned in history in B. c. 343, when they were attacked by the Samnites, who had been long pressing upon their neighbours the Volscians. Unable to contend with these formidable assuilants, the Sidicini had recourse to the Campanians, who sent an army to their assistance, but were easily defeated (Liv. vii. 29, 30), and being in their turn threatened by the whole power of the Samnites, invoked the assistance of Rome. During the war which followed (the First Samnite War), we lose sight altogether of the Sidicini, but by the treaty which put an end to it (in B. c. 341) it was particularly stipulated that the Samnites should be at liberty to pursue their ambitious designs against that people (ld. viii. 1, 2). Thus abandoned by the Ro:nans to their fate the Sidicini had recourse to the Latins (who were now openly shaking off their connection with Rome) and the Campanians: and the Samnites were a second time drawn off from

## SIDON.

their special attack on this petry people to oppose a more powerful coalition ( $\mathrm{Ib} .2,4,5$ ). It is clear that the Sidicini took part as allies of the Latins and Campanians in the war that followed: bat we have no account of the terms they obtained in the general settlement of the peace in B. c. 338 . It is certain, however, that they retained their independence, as immediately afterwards we find them engaging in a war on their own account with their neighbours the Auruncans. The Romans espoused the defence of the latter people, but before they were able to take the field, the Auruncans were compelled to abandon their ancient city, which was destroyed by the Sidicini, and withdrew to Suessa. (Liv. viii. 15.) The Ausonians of Cales had on this occasion been induced to make common cause with the Sidicini, bat their combined forces were easily defeated by the Roman consuls. Cales soon after fell into the hands of the Romans ; but though the territory of the Sidicini was overrun by the consuls of B. c. 332, who established their winter-quarters there to watch the movements of the Saunites, their city of Teanum still held out (Ib. 16, 17). Nor do we know at what time it fell into the power of the Romans, or on what terms the Sidicini were ultimately received to submission. But it is probable that this took place before в. c. 297, when we are told that the consul Decius Mus adranced to attack the Samnites "per Sidicinum agrum " in a manner that certainly implies the district to have been at that time friendly, if not subject, to Rome (Liv. x. 14).

After this the uame of the Sidicini never appears in history as that of a penple, but their territory (the "Sidicinus ager") is mentioned during the Second Punic War, when it was traversed and ravaged by Hannibal on his march from Capus to Rome (Liv. axvi. 9). The Sidicini seem to have gradually come to be regarded as a mere portion of the Campanian people, in common with the Ausonians of Cales and the Auruncans of Suessa, and the name still occurs occasionally as a municipal designation equivalent to the Teanenses (Liv. xxvi. 15; Cic. Phil. ii. 41). Strabo speaks of them in his time as an extinct tribe of Oscan race: and under the Roman Empire the only trace of them preserved was in the epithet of Sidicinum, which still continued to be applied to the city of Teanum. (Strab. v. p. 237 ; Plin. iii. 5. s. 9 ; Ptol. iii. 1. § 68; Sil. Ital. v. 551, xii. 524.) [Teanum.]
[E. H. B.]
 c. 37), a small place on the coast of Carmania, noticed by Arrian in Nearchus's voyage. Kempthorne thinks that it is represented by a smail fishing village called Mogou; but Müller suggests, what seems more probable, that it is the present Ihan. (Geogr. Gracc. Minor. p. 359, ed. Müller, Paris, 1855.)
[V.]
SIDOLOCUS or SIDOLEUCUS, in Gallia, is mentioned by Ammianus Marcellinus when he is speaking of Julian's march from Augustodunum to Autissiodurum. Sidolucum is supponed to be Sauliens [Снона.]
 and important maritime city of Phoenicia, which, according to Josephus, derived its origin and name from Sidon, the firstborn son of Canaan (Gen. x. 15: Joseph. Ant. i. 6. § 2), and is mentioned by Moses as the morthern extremity of the Canamitish settlements, as Gaza was the southernmost (Gen. x. 19); and in the blessing of Jacob it is said of Zebulun "his border shall be unto Sidon" (xlix.
13). At the time of the Eisodus of the children of Israel, it was already distinguished by the appellation of "the Great" (Josh. xi. 8; compare in LXX. ver. 2), and was in the extreme north border which was drawn from Mount Hermon (called Mount Hor in Num. xxxiv. 7) on the east to Great Sidon, where it is mentioned in the border of the tribe of Asher, as also is "the strong city of Tyre." (Josh xix. 28, 29.) It was one of several cities from which the Israelites did not disposses the old inhabitants. (Judg. i. 31.)

As the origin of this ancient city, its history, and manufactures, have been noticed under Phoznicin, it only remains in this place to speak of its geographical position and relations so far as they either serve to illustrate, or are illustrated by, its history.

It is stated by Josephns to have been a day's journey from the site of Dan, afterwards Paneas (Ant. v. 3. § 1). Strabo places it 400 stadia S. of Berytus, 200 N. of Tyre, and describes it as situated on a fair haven of the continent. He does not attempt to settle the questions between the rival cities, but remarks that while Sidon is most celebrated by the poets (of whom Homer does not so much as name Tyre), the colonists in Africa and Spain, even beyond the Pillars of Hercules, showed more honour to Tyre (xvi. 2. §§ 22, 24). Herodotus's account of the origin of the race has been given under Phoenicia [p. 607, b.], and is shown to be in accordance with that of other writers Justin follows it, but gives 2 different etymology of the name: "Condita urbe, quam a piscium uberitate Sidona appellaverunt, nam piscem Phoenices Sidon vocant; " but this is an error corrected by Michaelis and Gesenius (Lex. 8. v. . 겨, " to hunt or snare" game, birds, fish, \&cc, indifferently, so that the town must have derived its name from the occupation of the inhabitants as fishers, and not from the abundance of fish; and Ritter refers to the parallel case of Beth saida on the sea of Tiberias. (Erdkunde, Syrien, vol. iv. p. 43.) Pliny, who mentions it as " artifex vitri Thebarumque Boeotiarum parens," places "Sarrpta et Ornithon oppida " between it and Tyre (v. 19). It is reckoned xxx. M. p. from Berytus, xxiv. from Tyre, in the Itinerary of Antoninus (p. 149). But the Itinerarium Hierosolymitanuin reckons it xxviii. from Berytus, placing Heldua and Parphirion between ( $p$. 584). Scylas mentions the closed harbour of Sidon ( $\lambda_{\text {cuin }}$ $\kappa \lambda \in i \tau d s$, p. 42, ed. Hudson), which is more fully described by a later writer, Achilles Tatius (circ. A. D. 500 ), who represents Sidon as situated on the Assyrian sea, itself the metropolis of the Phoenicians, whose citizens were the ancestors of the Thebans. A double harbour shelters the sea in a wide gulf; for where the bay is covered on the right hand side, a second mouth has been formed, through which the water again enters, opening into what may be regarded as a harbour of the harbour. In this inner basin, the vessels could lie securely during the winter, while the outer one served for the summer. (Cited by Reland, Palacs. p. 1012). This inner port Reland conjectures, with great probability, is the closed port of Scylax, and to be identified with the second harbour described by Strabo at Tyre, where he sars there was one closed and another open harbour, called the Egyptian. The best account of the site is given hy Pococke. "It was situated," he says, "on a rising ground, defended by the sea on the nurth and west. The present city is mustly on
the north side of the hill. The old city seems to have extended further east, as may be judged from the foundations of a thick wall, that extends from the sea to the east; on the soath it was probably bounded by a rivulet, the large bed of which might serve for a natural fosse; as another might which is on the north side, if the city extended so far, as some seem to think it did, and that it stretched to the east as far as the high hill, which is about three quarters of a mile from the present town. . . . On the north side of the town, there are great ruins of a fine fort, the walls of which were built with very large stones, 12 feet in length, which is the thicioness of the wall; and some are 11 feet broad, and $j$ deep. The harbour is now choked up.... This harbour seems to be the minor port mentioned by Strabo (xvi. p. 756) for the winter; the outer one probably being to the north in the open sea between Sidon and Tyre (?), where the shipping rides in safety during the summer season." (Observations on Palestine, p. 86.) The sepulchral grots are cut in the rock at the foot of the hills; and some of them are adorned with pilasters, and handsomely painted.

The territory of the Sidonians, originally circumscribed towards the north by the proximity of the hostile Gibbites, extended southwards to the tribe of Zebulon, and Mount Carmel; but was afterwards limited in this direction also by the growing power of their rivals the Tyrians. (Ritter, l. c. p. $43, \& \mathrm{c}$.)

COIN OF SIDON.
SIDO'NES ( $\Sigma(\delta \omega \nu \epsilon s)$, a tribe in the extreme east of Germany, about the sources of the Vistula (Ptol. ii. 11. §21), and no doubt the same which appears in Strabo (vii. p. 306) under the name of $\mathbf{\Sigma} i \delta \delta o \nu \in s$, as a branch of the Bastarnae.
[L. S.]
SIDO'NIA. [Pedonia.]
 $\Sigma_{i}$ oovóvtios), a village in the Corinthia, on the Saronic gulf, between Crommyon and Schoenus. It was taken by the Lacedaemonians along with Crommyon in the Corinthian War, but was recovered by Iphicrates. (Xen. Hell. iv. 4. § 13, iv. 5. § 19.) It probably stood in the plain of Susaki. (Scylax; Steph. B. s. v.; Plin. iv. 7. s. 11 ; Boblaye, Recherches, gc. p. 35; Leake, Peloponnesiaca, p. 397 ; Curtius, Peloponnesos, vol. ii. p. 555.)

SIDUSSA ( $\sum_{i}^{\prime} \delta o v \sigma \sigma a$ ), a small town of Ionia, belonging to the territory of Erythrae. (Thucyd. viii. 24; Steph. B. s. v.) Pliny (v. 38) erroneously describes it as an island off the coast of Erythrae. It is probable that the place also bore the name of Sidus ( $\Sigma_{i}$ סoves), as Stephanus B. (s. v.) mentions a town of this name in the territory of Erythrae.
[L. S.]
 Lycia, on the southern slope of Mount Cragus, to the north-west of the mouth of the Xanthus. (Plin. v. 28 ; Steph. B. s. v.; Ptol. v. 3. § 5 ; Hierocles, p.

684; Cedrenus, p. 344.) The ruins of this city, on a lofty height of Mount Cragus, have first been discovered and described by Sir C. Fellows. (Lycia, p. 151, foll.) They are at the village of Tortoorcar Hissá, and consist chiefly of splendidly built tombs, abounding in Greek inscriptions. The town itself appears to have been very sinall, and the theatre, agora, and temples, are of diminutive size, but of great beauty.
[L. S.]

## SIELEDIVA. [TAprobane.]

SIGA (Eira, Ptol. iv. 2. § 2), a commercial town of Mauritania Caesariensis, seated near the mouth of a river of the same name in a large bay. The mouth of the river formed the port of the city, at a distance of 3 miles from it (Sigensis Portus, Itin. Ant. p. 13), opposite to the island of Acra, on the highroad, and near Cirta, the residence of Syphax. (Strab. xvii. p. 829; Plin. v. 2. s. 1.) In Strabo's time it was in ruins, but must have been subsequently restored, since it is mentioned in the Itinerary (p. 12) as a Roman municipium. (Comp. Ptol. l. c.; Mela, i. 5; Scylax, 51, 52.) According to Shaw (Travels, p. 12), who, however, did not visit the place, its ruins are still to be seen by the present Tacumbrit; others identify it with the Areschkul of the Arabs, at the mouth of the Tafna, near Rasgun.
[T. H. D.]
SIGA ( $\Sigma(\gamma \alpha a$, Ptol. iv. 2. § 2), a river of Mauritania Caesariensis, falling into a bay of the sea opposite to the island of Acra (now Caracoles). Scylax (p. 51) calls it Eioov. Probably the present Tafna.
[T. H. D.]
 montory in Troas, forming the north-western extremity of Asia Minor, at the entrance of the Hellespont, and opposite the town of Elaens, in the Thracian Chersonesus. Near it the naval camp of the Greeks was said to have been formed during the Trojan War. (Herod. r. 65, 94; Thucyd. viii. 101; Strab. xiii. pp. 595, 603; Pomp. Mela, i. 18; Plin. v. 33; Ptol. v. 2. § 3; Serv. ad Aen. ii. 312.) This promontory is now called Yenisheri.

Near the promontory was situated the town of Sigeum, which is said to have been an Aeolian colony, founded under the guidance of Archaeanax of Mytilene, who used the stones of ancient Troy in building this new place. But some years later the Athenians sent troops under Phrynon and expelled the Mytileneans ; and this act of violence led to a war between the two cities, which lasted for a long time, and was conducted with varying success. Pittacus, the wise Mytilenean, is said to have slain Phrynon in single combat. The poet Alcaeus also was engaged in one of the actions. The dispute was at length referred to Periander, of Corinth, who decided in favour of the Athenians. (Strab, xiii. p. 599; Herod. v. 95; Steph. B. s. v.; Diog. Laërt. i. 74.) Henceforth we find the Pisistratidae in possession of Sigeum, and Hippias, after being expelled from Athens, is known to have retired there with his family. (Herod. v. 65). The town of Sigeum was destroyed by the inhabitants of Ilium soon after the overthrow of the Persian empire, so that in Strabo's time it no longer existed. (Strab. xiii. p. 600 ; Plin. v. 33.) A hill near Sigeum, forming a part of the promontory, was believed in antiquity to contain the remains of Achilles, which was looked upon with such veneration that gradually a small town seems to have risen around it, under the name of Achilleum [Achilleum]. This tomb, which was visited by Alexander the Great, Julius

3 s 3

Caesar, and Germanicus, is still visible in the form of a mound or tumulus. [L. S.]
SIGMAN (E'í $\mu$ av ), a river in Gallia. Ptolemy (ii. 7. § 2) places the mouth of the Sigman between the Aturis (Adour) and the Garonne; and between the Sigman and the Garonne he places Cu rianum Promontorium. [Curianum.] Marcianus (Peripl.), who has the name Signatius, gives two distances between the mouth of the Aclour and that of the Sigman, one of which is 500 and the other 450 stadia. We cannot trust either the latitudes of Ptolemy or the distances of Marcian along this coast. There is no river between the Advur and the Garonne that we can suppuse to have been marked down by the ancient coasting ships to the exclusion of the Leyre, which flows into the Bassin d'Arcachon. But Gosselin supposes the Sigman to be the Mimisan, which is about half-way between the $A$ dour and the Bussin d'Arcachon.
[G. L.]
SI'GNIA ( E rquia: Eth. Signinus: Segni), an ancient city of Latium, situated on a lofty hill at the NW. angle of the Volscian mountains, looking down upon the valley of the Succo. It is represented by ancient authors as a Roman colony founded by Tarquinius Superbus, at the same time with Circeii. (Liv. i. 55; Dionys. iv. 63.) No trace of it is found befire this; its name does not figure among the cities of the Latin League or those of which the foundation was ascribed to Alba; and the story told by Dionysius (l.c.), that it originated at first in a fortuitous settlement of some Roman troops encamped in the neighbourhoxd, which was afterwards enlarged and strengthened by Tarquin, certainly points to the fact of its being a new town, and not, like so many of the Ruman colonies, a new settlement in a proviously existing city. It passed, after the expulsion of Tarquin, into the hands of the Roman Kepublic, as it was attacked in B. c. 497 by Sextus Tarquinius, who in vain endeavoured to make himself master of it (Dionys. v. 58). A few years later, it received a fresh colony, to recruit its exhausted population (Liv. ii. 21). From this time it appears to have continued a dependency of Rome, and never, so fur as we learn, fell into the power of the Volscians, though that people held all the neighbouring mountain country. Signia must indeed, from its strong and commanding position, overlooking all the valley of the Trerus and the broad plain between it and Praenesto, have been a point of the utmost importance for the Romans and Latins, especially as securing their communications with their allies the Hernicans. In B. c. 340 the Signians shared in the general defection of the Latins (Liv. viii. 3); but we have no account of the part they took in the war that followed, or of the terms on which they were received to submission. We know only that Signia became again (as it had probably been before) a Colonia Latina, and is mentioned as such during the Second Punic War. On that occasion it was one of those which continued faithful to Rome at the most trying period of the war (Liv. xxvii. 10), and must therefore have been still in a fluurishing condition. On acconnt of its strong and secluded position we find it selected as one of the places whre the Carthaginian hostages were depusited for safety (Id. xxxii. 2): but this is the last mention of it that occurs in history, except that the battle of Sacriportus is described by Plutarch as taking place near Signia (Plut. Sull. 28). That decisive action was fought in the plain between Signia and Praeneste [Sacripontes]. It, however, certanly continued during
the later ages of the Republic and under the Empire to be a considerable municipal town. It received a fresh body of colonists under the Triumvirate, but it is doubtful whether it retained the rank of a Colonia. Pliny does not reckon it as such, and though it is termed "Colonia Signina" in some inscriptions, these are of doubtful authenticity. (Strab. v. p. 237; Plin. iii. 5. s. 9; Sil. Ital. viii. 378; Lib. Colon. p. 237 ; Zumpt, de Col p. 338; Gruter, Inscr. p. 490. 5, \&cc.)

Signia was chiefly noted ander the Roman Empire for its wine, which, though harsh and astringeut, was valued for its medical qualities, and seems to have been extensively used at Rome (Strab. v. p 237 ; Plin. xiv. 6. s. 8; Athen. i. p. 27 ; Sil. Ital. l. c.; Martial, xiii. 116; Cels. de Med. iv. 5). Its territory produced also pears of a celebrated quality (Juv. xi. 73; Plin. xv. 15. s. 16; Colum. v. 10. § 18: Macrob. Sat. ii. 15), as well as excellent vegetables, which were sent in large quantities to Rome (Culum. x. 131). These last were grown on a hill near the city, called by Columella Mons Lepinus, apparently one of the underfalls of the Volscian mountains; but there is no authority for applying the name (as modern writers have frequently done) to the whole of that mass of monntains [Lipincts Mons]. Signia also gave name to a particular kind of cement known as "opus Signinnm," and extensively employed both for pavements and reservoirs of water (Plin. xxxv. 12. s. 46; Colum. i. 6. § 12, viii. 15. § 3; Vitruv. viii. 7. § 14).

The modern town of Segni (a poor place, with about 3500 inhabitants) occupies a part only of the site of the ancient city. The latter embraced within the circuit of its walls the whole summit of the hill, which stands boldly out from the Volscian mountains, with which it is connected only by a narrow neck or isthmus. The line of the ancient walls may be traced throughout its whole extent; they are constructed of large masses of stone (the hard limestone of which the hill itself consists), of polygonal or rudely squared form, and afford certainly one of the most remarkable specimens of the style of construction commonly known as Cyclupean or Pelasgic, of which striking instances are found also in other cities in this part of Latium. The city had in all five gates, two of which still retain their primitive construction; and one of these, known as the Porta Saracinesca, presents a remarkable instance of the rudest and most massire Cyclopean construction. The architrave is formed of single masses of stone not less than 12 feet in length, laid across from one impnst to the other. This gate bas been repeatedly figured*; another, less celebrated but scarcely less remarkable, is found on the SE. side of the town, and is constructed in a style precisely similar. The age of these walls and gates has been a subject of much controversy; on the one hand the rude and massive style of their construction, and the absence of all traces of the arch in the gateways, would seen to assign them to a remote and indetinite antiquity; on the other hand, tho historical notices that we possess concerning Signia all tend to prove that it was not one of the inost ancient cities of Latium, and that there could not have existed a city of such magnitude previous to the settlement of the Roman colony under Tarquin. (For the discussion of this question as well as for

[^36]SIGRIANE．
SILA．
the description of the remains themselves，see the Annali dell＇Inetitnto Archeologico for 1829，pp． 78－87，357－360；Classical Museum，vol．ii．pp． 167－170；Abeken，Mittel Italiem，p．140，\＆c．） The only other remains within the circuit of the walls are a temple（now converted into the church of S．Pietro）of Roman date，and built of regularly aquared blocks of tufo；and nearly adjoining it a circular reservoir for water，of considerable size and lined with the＂opus Signinum．＂（Annali，L c．p． 82．）Several inscriptions of imperial date are also preserved in the modern town．
［E．H．B．］

GATE OF BIGNIA．
SIGRIA＇NE（খ̀ Erypiant，Strab．xi．p．525），a district of Media Atropatene，near the Caspian Gates．Ptolemy calls it Eirpiavich（vii．2．§ 6）．

SI＇GRIUM（Zíypiov），the westernmosit promontory of the island of Lesbos，which now bears the name of Sigri（Strab．xiii．pp．616，618．）Stephanus B． （a．v．）calls Sigrium a harbour of Lesbos．［L．S．］

SIGULO＇NES（Eiroúdoves），a German tribe mentioned by Ptolemy（ii．11．§ 11）as inhabiting the Cimbrian Chersonesus，to the north of the Saxones，but is otherwise unknown．
［L．S．］
SIGYNNES（Eıruvves，Herod．v． 9 ；Eipuvot， Apoll．Rhod．iv．320；Orph．Arg．759；$\Sigma$ líyuvot， Strab．xi．p．520）．The only namie of any Trans－ Danubian population，other than Scythian，known to Herodotus was that of the Sigynnes，whom he seems to have described as the Thracians described them to either himself or his informants．The Thracian notion of one of these Sigynnes was that he wore a Median dress，and considered himself a descendant of the Medes；though how this could be was more than Herudotus could say．＂Any－ thing，however，is prosible in a long space of time．＂The horses of the Sigynnes were andersized －ponics，indeed，rather than horses．They were flatnosed and long－haired ；their coat being five fingers deep．They were too weak to carry a man on their back ；but not too weak for harness．In chariots they were light and quick；and in the drawing of chariots the Sigynnes took great delight．

We must look on Sigynnes as a general and col－ lective name for a large assemblage of populations； inastnuch as their country is said to extend as far westwards as the Heneti on the Adriatic．Suy that it reached what was afterwards the frontier of Pan－
nonia．On the north it must really have been bounded by some of the Scythian districts．In the language of the Ligyans above Massilia，the word Sigynna means a merchant，or retail－dealer，or car－ rier．In Cyprus they call spears by the name Sigynna．The resemblance of this word to the name Zigeun＝Gipsy has often been noticed．Word for word，it may be the same．It may also hare been applied to the gipsies with the meaning it has in Ligyan．It does not，however，follow that the Sigynnes were gipsies．
［R．G．L．］
SIHOR（ $\sum$ known as＂the River of Egypt，＂the southern boundary of the Promised Land，identified by the LXX．with Rhinocorura，the modern Wady－el－ Arish．［Rhisocorura．］（Joshua，xiii．3； 1 Chron． xiii．5；Jeremiah，ii．18．）In the first cited passage，
 nov Aipúrtov；in the second，derd dplay Alybutov， and only in the last is a proper name retained，and there it is changed to 「ワöv．St．Jerome（Onomast． s．v．），following Eusebius，describes it as before Egypt，and speaks of a village of the name between Aelia and Eleutheropolis，which it is difficult to imagine that they could have identified with the Sihor above named．St．Jerome says that he has said more on the subject＂in libris Hebraicorum quaestionum，＂but the passage is not to be found there．In his＂Epitaphium Paulae＂he writes， ＂veniam ad Aegypti flumen Sior，qui interpretatar turbidus＂（ $p .677$ ）；but he here probably means the Nile，which is sometines supposed to be called Sihor，as in the passage of Jeremiah above referred to．The village named by Eusebius and St．Jerome doubtless marked the site of the city of the tribe of Judah，situated in the mountains，and written Zior in the authorised version，but $\begin{gathered}\text { ing in the ori－}\end{gathered}$ ginal（Joshua，xv．54），and in the LXX．Eicop， （al．Zcopai $\theta$ ）．

2．Sihor or Shihor Libnath（LXX．Zidy kal Mabayd日），perhaps to be taken as two names，as by the LXX．，Eusebins，and St．Jerome，who name ＂Sior in tribu Aser，＂without the addition of Libnath．It is mentioned only in the border of Asher．（Joshua，xix．26．）The various conjec－ tures concerning the place or places are stated by Bonfrerius（Comment．in loc．），but none are satis－ factory，and the site or sites have still to be re－ covered．
［G．W．］
SILA（ $\eta$ I $\overline{\text {（ }}$ a：Sila）was the name given in ancient times to a part of the Apennines in the $S$ ． of Bruttium，which were clothed with dense foresta， and furnished abundance of pitch，as well as timber for ship－building．Strabo tells us it was 700 stadia （ 70 geog．miles）in length，and places its commence－ ment in the neighbourhood of Locri．（Strab．vi．p－ 261．）It is evident，therefore，that he，as well as Pliny（iii．5．s．10），who notices it in connection with Rhegium and Leucopetra，assigned the name to the southernmost group of the Apennines（the range of Aspromonte），S．of the isthmus which separates the Terinaean and Scylletic gulfs．At the present day the name of Sila is given only to the detached and outlying mountain group $\mathbf{N}$ ．of that isthmus，and E．of Cosenza（Consentia）It is probable that the name，which evidently means only＂the forest，＂and is connected with the Latin silva，and the Greek Ji $\lambda \eta$ ，was originally applied in a more general sense to all the forest－covered mountains of this part of Calabria，though now restricted to the group in question．
［E．H．B．］
384

SILACE＇NAE，a place in Lower Pannonia，on the south of Lake Peiso．（It．Ant．p．233，where it appears in the ablat．form Silacenis）．Its exact site is unknown．
［L．S．］
SILANA，a town in the NW．of Thessaly，near the frontiers of Athamania，mentioned along with Gomphi and Tricca by Liry．Leake conjectures that it occupied the site of Polizina，near which are several squared blocks of ancient workmanship． （Liv．xxxvi．13；Leake，Northern Greece，vol．iv． p．529．）

SI＇LARUS（Zídapos，Ptol．；Eı入apis，Strab．：Sele）， a considerable river of Southern Italy，flowing into the gulf of Posidonia，and forming the boundary between Campania and Lucania．It rises in the mountains near Teora，on the confines of the Hir－ pini，and not far from the sources of the Aufidus； thence flows for some distance in a southerly direction till it receives the waters of the Tanager（Tanagro）， a considerable stream，which joins it from the SE．； it then turns to the SW．and pursues that direction to the sea，which it enters about 5 miles to the N ． of the city of Paestum．About 5 miles from its mouth it receives another important tributary in the Calor（Calore），which joins it from the S．Between the Calor and Tanager，on the S．bank of the Silarus rises the unountain groap of Mount Albarnus，men－ tioned by Virgil in connection with that river．The ＂luci Silari＂of the same author are evidently the same with the extensive woods which still clothe the valley of the Sele from its confluence with the Tanagro to within a few miles of the sea．（Virg． Georg．iii．146．）The Silarus was in the days of Strabo and Pliny the recugnised boundary between Campania（including under that name the land of the Picentini）and Lucania；but this applies only to its course near its mouth，as Eburi（Eboli），though situated to the N ．of it，is included by Pliny among the towns of Lucania（Strab．v．p．251，vi．p．252； Plin．iii．5．8s．9，10，11．s．15；Ptol．iii．1．§ 8；Mel． ii．4．§9；Tab．Peut．．；Dionys．Per．361．）A pecu－ liarity of its waters，mentioned by several ancient writers，is that they had the power of petrifying sticks，leaves，and other substances immersed in them．（Strab．v．p． 251 ；Plin．ii．103．s．106；Sil． Ital．viii．582．）

The name is written by Lucan and Columella Siler，and the same form is found in Vibius Sequester， indicating an approach to the modern name of Sele． （Lucan，ii． 426 ；Colum．x．136；Vib．Seq．p． 18．）
［E．H．B．］
SILAS（Zi入hs，Arrian，Ird．c．6；Strab．xv．p． 703；Diod．ii．37），a river of the Upper Panjáb， the story of which，as told by ancient writers，is clearly fabulous．According to Arrian and others， the water of this river was so light that nothing could swim in it．Lassen，who has examined this story with his usual acuteness，has shown from the Mahabhirata that there was a stream in the nor－ thern part of India called the Sila，the water of which was endowed with a highly petrifying power， from which circumstance the river obtained its signification，Sila meaning in Sanscrit a stone． （Zeitschr．f．Kunde des Morgenlands，ii．p．63．） It may be remarked that the name occurs differently written．Thus Diodorus writes Ei $i \lambda \lambda a \nu$ motauóv；
 evidently refers to the same story，but calls the river Side in his quotation from Ctesias（xxxi． 2. 8．18）．
SI＇LBIUSI（EiABtov：Eth．Silbianus），a small
town of Phrygia，on the east of Apamea and Celacnae，and beyond the source of the Maeander （Ptol．v．2．§ 25 ；Plin．v．29）．In the Byzantine writers it is sometimes mentioned under corrapt forms of its name，such as Silbia（Hierocl p．667）， Sublas（Cinnamus，vi．15），or Sublium and Syblaea （Oriens Christ．p．809）．This place，which was the see of a bishop，belonged to the conventus of Apamea．Modern travellers seek its site in the neighbourhood of Sandukli．（Kiepert，in Franzis Fünf Inschriften，p．37．）
［L．S．］
SILI or SIMI（之í入ot or इı $\mu$ ol，Strab．xvi．p．772）， a tribe of Aethiopians，who used the homs of the oryx，a species of gazelle，as weapons．Some have considered them to be the same as the Aibionts Eınol of Agatharchides，p．42．（Comp．Diodor．iii． 8．） ［T．H．D．］
SILICENSE FLUMEN，a river in Hispania Baetica，in the neighbourhood of Cordnba，probably the Guadajoz，or one of its tributaries．（Hirt． B．A．57．）
［T．H．D．］
SILINDIUM（ ${ }^{2} \lambda i(\nu \delta i o v$ ），a small town of Troas at the foot of Mount Ida，is mentioned only by Stephanus B．（8．v．）on the authority of Demetrius of Scepsis．
［L．S．］
SILINGAE（ $\sum_{i} \lambda(\gamma \gamma a i)$ ，a tribe of Germany，on the south of the Semnones，between the western slopes of Mons Asciburgins and the river Albis． （Ptol．ii．11．§ 18．）It is generally supposed that this name is the one from which the modern Silesia or Schlesien is formed．（Latham，Tacit．Germ． p．138；Palacky，Gesch．von Bühmen，vol．i． p．68．）［L．S．］

SILIS（Sele），a small river of Venetia，in the N．of Italy，which rises in the mountains above Treviso（Tarvisium），and flows into the lagunes at Altinum（Altino）．It is still called the Sele．（Plin． iii．18．s．22．）
［E．H．B．］
SILLA（ Zí $\lambda \lambda a$ ，Isid．Charax，§ 2，ed．Müller，1855）， a river of Apolloniatis，a district of Assyria，which， according to Isidorus，flows through the centre of the town of Artemita．［Arthmita．］There can be littlo doubt that this is the river now called the Diyaleh It is also，in all probability，the same as that called by Steph．B．（s．v．＇Andueia）the Delas．Forbiger imagines that the Diabus of Ammianus（xxiii．6）， the Durus of Zosimus（iii．25），and the Gorgos of Ptolemy（iv．1．§ 7），refer to the same river．It is， however，more likely that the first of these streams is the same as that elsewhere called the Zuba－ tus．
 town of Palestine，in the tribe of Ephraim，in the mountain region according to Josephus（Ant．v．1）， where the ark and the tabernacle were first established by Joshua on the settlement of the land by the tribes of Israel．There also were assembled the national convocations for the division of the land and the trans－ action of other public basiness affecting the whole Union．（Joshua，xviii．1，10，xix．51，xxi．2，$x$ xii． 9．）There Samuel ministered before the Lord in the days of Eli the high－priest（ 1 Sum ．i．－iii．）． There was the seat of the Divine worship until the disastrous battle of Aphek，from which period the decline of Shiloh must be dated（ch．iv．）until its desolation became proverbial in Israel．（I＇salm Lxxviii． 60 ；Jeremiah，vii．12，xxvi．6，9．）Its situation is very particularly described in the book of Judges（ $x \times x i .19$ ），as＂on the north side of Bethel， on the east side of the highway that goeth up from Bethel to Shechem，and on the south of Lebonah．＂

St. Jerome places it xii. M. P. from Neapolis (=Shechem $=$ Vablus), in the toparchy of Acrabattena. (Onomast. s. v.) Its ruins were shown, and the remains of the altar among them, in his day. (Comment. in Sophon. i. 14, Epitaph. Paulae.) From these notes the site is easily identified with the modern Silin, on the east of the Nablus road, about four hours south of that town, situated over against a village named El-Lebban (Lebonah), which lends its name also to a Khan on the road-side. Silun is merely a heap of ruins lying on a hill of moderate elevation at the south-eastern extremity of a valley thruggh which passes the great north road from Judaea to Galilee. "Among the ruins of modern bouses are traces of buildings of greater antiquity, and at some distance, towards the east, is a well of good water, and in the valleys many tombs excarated in the rock." (Robinson, Bibl Res. vol. iii. pp. 86-89.) Among the tombs of Shiloh, if Reland's conjecture is correct, is to be sought the very slender authority on which the pagans rested their assertion that their demigod Silenus was buried in the country of the Hebrews; and the fact of the effigy of this deity being found on the coins of Flavia Neapolis, certainly lends countenance to his ingenious hypothesis that the fable originated in the imaginary correspondence between this name and the town of Ephraim. (Palaestina, p. 1017.) But the error which he has copied from Benjamin of Tudela, of placing the tomb of Samuel in Shiloh, is obviously attributable to a lapee of memory on the part of that writer, as no one has ever identified Shiloh with the modern Nebi Samueib. The error is corrected by Asher. (Itinerary of R. Benjamin of Tudela, ed. A. Asher, vol. i. p. 78, vol. ii. p. 95.)
[G. W.]
SIloAM. [Jerusalem, p. 28, b.]
SI'LPIA, a town in Hispania Baetica, N. of the Baetis, and apparently in the Sierra Morena. (Liv. xxviii. 12.) Probably Linares.
[T. H. D.]
SI'LSILIS (Not. Imp.), a fort situated on the right bank of the Nile, between Ombus and Apollinopolis Magns in Upper Aegypt. The original name of this place is nearly preserved in the modern Siliti The fort of Silsilis stood at the foot of the mountain now called Gebel Selsilek, or " hill of the chain," and was one of the points which commanded the passage of the river. For at this spot the Arabian and Libyan hills approach each other so nearly that the Nile, contracted to about half its ordinary width, seems to flow between two perpendicular walls of sandstone. Silsilis was one of the principal seats for the worship of the Nile itself, and Rameses II. consecrated a temple to it, where it was worshipped under the emblem of a crocodile and the appellation of Hapimoou. The stone quarries of Silsilis were also celebrated for their durable and beautiful stone, of which the great temples and monuments of the Thebaid were for the most part built. (Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 283.)
[W. B. D.]
SILVANECTES. This name occurs in the Notitia of the Provinces of Gallia, where the chief town is called Civitas Silvanectium. In the Notit. Imp. the Silvanectes are placed in Belgica Secunda, but the name there denotes a town, according to the usage then established of giving to the capital towns the names of their people. It appears almost certain that the Subanecti of Ptolemy (ii. 9. § 11) is the same name as Silranectae or Silvanectes. Ptolemy places the Subanecti east of the Seine, and makes

SIMOIS.
Ratomagus their capital. But this Ratomagus is, conjectured to be the same as the Augustomagus of the Itin. and of the Table, which is Senlis [Augustomagus].

Pliny (iv. c. 17) mentions the Ulmanetes in Gallia Belgica: "Suessiones liberi, Ulmanetes liberi, Tungri." It is possible that this too may be a corrupted form of Silvanectes, for the modern name Senlis confirms the form Silvanectes, and the name Ulmanetes is otherwise unknown.
[G. L.]
SI'LVIA, a place in Illyria, on the road from Sirmium to Salona. (Itin. Ant. p. 269.) It is probably the same town as the Salvia of Ptolemy [Salvia]. It is identified with Keupris by Lapie.
[T. H. D.]
SI'LVIUM (Zi入oúiov: Eth. Silvinus: Garngnone), a town of Apulia in the interior of the country. It is noticed by Strabo (vi. p. 283) as the frontier town of the Peucetii, and its name is noticed by Pliny among the municipal towns of Apulia (Plin. iii. 11. s. 16). But at a much earlier period it is mentioned by Diodoras as an Apulian tuwn, which was wrested from the Samnites by the Romans in B. c. 306 (Diod. xx. 80). Our only clue to its position is derived from the Itineraries, which place it 20 miles from Venusia, on the branch of the Appian Way which led direct to Tarentum. This distance coincides with the site of a town (now destroyed) called Garagnone, situated about midway between Spinazzolo and Poggio Orsino, and nearly due E. of Venosa (Pratilli, Viu Appia, iv. 6. p. 478; Romanelli, vol. ii p. 188).
[E.H.B.]
SILURA, an island of Britain, separated only by a narrow strait from the coast of the Dumnonii, who inhabited the most SW. point of Britannia. (Solin. c. 22.) It is probably the same island which Sulpicius Severns (ii. 51) calls Sylina, and seems to mean the Scilly 1slames.
[T. H. D.]
SI'LURES (इinupes, Ptol. ii. 3. § 24), a powerful and warlike people in the W. part of Britannia Romana, whose territory was bounded on the S. by the estuary of the Sabrina. The important towns of Isca and Venta belonged to them. Tacitus (Agr. 11) calls them descendants of the Iberi of Spain, and states that they had emigrated from Ireland into Britain; but there seems to be no foundation for this opinion. (Cf. Zeuss, Die Deutschen, p. 202.) Although subjugated by the Romans, they caused them continual alarm; and they were the only people of Britain who, at a later period, maintained their independence against the Saxons. (Beda, Hist. Ecc. i. 12, seq.; cf. Tac. Ann. xii. 2, 31; Plin. iv. 16. s. 30.)
[T. H. D.]
SINE'NA ( $\Sigma i \mu \eta \nu a:$ Eth. Ei $\mu \eta \nu \in u ́ s)$, a town on the coast of Lycia, 60 stadia from Aperlae (Plin. v. 27 ; Steph. B. s. v.; Stadiasm. Mar. Mag. §§ 239, 240, where it is called Somens, E $\delta \mu \eta \eta$ a ; comp. Leake Asia Minor, p. 188; Spratt and Forbes, Travels in Lycia, vol. i. p. 137, vol. ii. pp. 86, 274.) [L. S.] SI'MENI. [Iceni.]
Simeon. [Palakstina, p. 529, b.]
SIMITTU ( $\sum_{1} \mu i \sigma \theta o v$, Ptol. iv. 3. § 29), called by Pliny (v. 4. § 4) Simittuense Oppidum, a Roman colony in the interior of Numidia, on the road from Cirta to Curthago, 7 miles to the W. of Bulla Regia. (Itin. Ant. p. 43.) There were some mineral waters 5 miles E . of the town (Ib.). It lay on the site of the present A in Semit, in the Qued-eb-Bull, 2 leagues to the W. of Bull.
[T. H D.]
SIMOIS ( $\sum 1 \mu b \in t s$ ), a small river of Truas, having its source in Mount Ida, or more accuratoly in Mount

Cotylus, which passed by Ilion, joined the Scamander helow that city. This river is frequently spoken of in the Iliad, and described as a rapid mountain torrent. (Il. iv. 475, v. 7i4, xii. 22, xxi. 308; comp. Aeschyl. Agam. 692; Strab. xiii. p. 597; Ptol. v. 2. § 3; Steph. B. s. v.; Pomp. Mela, i, 18; Plin. v. 33; and Scamander.) Its present name is Dhembrek Chai, and at present its course is so altered that it is no longer a tributary of the Scamander, but flows directly into the Hellespont.
[L. S.]
SIMUNDU. [Taprobane.]
SIMYLLA ( $\sum_{\mu \nu ́ \lambda \lambda a, ~ P t o l . ~ v i i . ~ 1 . ~ § ~ 6), ~ a ~ c o m-~}^{\text {a }}$ mercial entrepôt on the western const of Hindostan, in the district called 'Aprand $\Sigma a \delta i \nu \omega \hat{\nu}$. It is noticed in the Periplus by the name of $\Sigma h \mu \nu \lambda \lambda a$, and was probably at or near Bassein, a little N. of Bombay.
[V.]
SI'MYRA ( $\left.\sum \nmid \mu u \rho \rho a\right)$, a maritime city of Phoenicia mentioned by Pliny in connection with Marathus and Antaradus, N. of Tripolis, Orthosia, and the river Eleutherus (v. 20). It is placed by Ptolemy between the mouth of the Eleutherus and Orthosia, and, if the figures can be trusted, 10 west of the former, 14' north; in the same latitude with Orthosia (i. e. $34^{\circ} 40^{\prime}$ ), but $40^{\prime}$ east of it, which would seem either to imply an ignorance of the coast, or to intimate that Simyra lay at some distance from the shore, and that the Elentherus ran southward to the sea. Strabo says that it was occupied by the Aradians, together with the neighbouring Marathns (xvi. p. 753), apparently placing it north of the Eleutherus. In addition to what has been said under Marathus, and in confirmation of the identification there attempted, the following may be cited from Shaw, and will serve to illustrate the situation of Simyra: "The ancient Marathus may be fixed at some ruins near the Serpent Fountain, which make, with Rou-wadde and Tortosa, almost an equilateral triangle. About 5 miles from the river Akker, and 24 to the SSE. of Tortosa, there are other considerable ruins known by the name of Sumrah, with several rich plantations of mulberry and other fruit trees growing in and round abont them. These, from the very name and situation, can be no other than the remains of the ancient Simyra . . . the seat formerly of the 7emarites. Pliny v. 20) makes Simyra a city of Coelesyria, and acquaints us that Mount Libanus ended there to the northward; but as Sumrah lies in the Jeune (i. e. the great plain), 2 leagues distant from that mountain. this circumstance will better fall in with Arca, where Mount Libanus is remarkably broken off and discontinued." (Travels, pp. 268, 269.) The ruins of Arca are 5 miles E. of Sumrah, and 2 leagues WSW. of Arca is the Nahr-el-Berd, the Cold River, which Shaw and others identify with the Elentherus. It is manifest how irreconcilable all this is with Ptolemy and other ancient gengraphers. [Eifeutherus; Orthosia; Marathus.] [G.W.]

Sina. [Sena.]
SINAE (oi इivat, Ptol. vii. 3, \&c.), the ancient nation of the Chinese, whose land is first described by Ptolemy (l. c.) and Marcianus (p. 29, seq.), but in an unsatisfactory manner. Indeed, the whole knowleige of it possessed by the Greeks and Romans rested on the reports of individual merchants who had succeeded in gaining admittance among a people who then, as in modern times, isolated themselves as much as posilile from the rest of the world. For the assumption which Deguignes sought to establish, that a political alliance was formed between

Rome and China, and that the emperor M. Aurelius Antoninus sent a formal embassy thither in the year 166, rests solely on the name of Yan-Tun, which that writer discovered in some ancient Chinese annals, and must therefore be regarded with great suspicion. (See Bohlen, das Alte Indien, i. p. 71.) According to the description of Ptolemy, the country of the Sinae extended very far to the S., and was connected with the E. cuast of Africa by an unknown land, so that the Indian Ocean formed a large mediterranean sea. He does not venture to define its eastern boundary, but finishes his account of the known earth with the 180th degree of longitude, without, however, denying that there wero tracts of anknown land still farther to the $\mathbf{F}$. But Cosmas Indicopleustes (ap. Montfaucon, N. Coll. Patrum, ii. p. 337), who calls the country of the Sinae TKivis $\langle a$, was the first who laid down its correct boundary by the ocean on the E. On the N. it was bounded by Serica, and on the S. and W. by India extra Gangem, from which it was divided by the river Aspithra (probably the Bangpa-Kung) and the Semanthine mountains. Thus it embraced the southern half of China, and the eastern part of Further India, as Tongquin, Cochin-China, Camboja, \&c. Ptolemy mentions several large bays and promontories on the coast. At the extrene NE. of the Indian Ocean, where the land of the Sinae abutted on Further India, was the grest gulf (of Siam), which on the coast of the Sinse was formed by the South Cape ( $\tau \boldsymbol{\delta}$ Notion axpoy) (probably Cape Camboja), and on the side of Indis by another large promontory (perhaps Cape Romania). To the S. of South Cape, and between it and the Cape of the Satyrs ( Larúpcon Kкpov), Ptolemy and Marcianns (p. 30) place another large bay called Theriodes (Ompióōns кó入चos); and to the S. of the Cape of Satyrs, again, and between it and the mouth of the river Cottiaris, the Bay of the Sinae ( $\left.\Sigma_{1} \cdot \omega \bar{\omega} \nu \kappa \delta \lambda \pi o s\right)$. These very rague and incorrect accounts do not permit us to decide with any confidence respecting the places indicated by Ptolemy; but it has been conjectured that the Cape of the Satyrs may have been Cape St. James, the Theriodes Sinus the bay between it and the mouth of the river Camboja or Maykiang, and the Bay of the Sinae the gulf of Tongquin. Among the mountains of the country Ptolemy names orily the Montes Semanthini ( $\sum \eta \mu a \nu \theta \omega \nu \delta \nu \quad$ bos $)$, which formed its NW. boundary. Among the rivers indicated are the Aspithra (A $A \sigma \pi \theta^{\prime} \alpha a$ ), rising in the mountains just mentioned, to which we have already alluded; the Ambastus ("Ap6aatos), probably the Camboja, which fell irto the Great Bay between the towns of Bramins and Rhabana; the Senns or Sainos ( Eévos or Eaivos) more to the S.; and further still in the same direction the Cottiaris (KorTlapts), which emptied itself into the bay of the Sinae to the N. of the town of Cattigara. The last may perhaps be the Si Kiang, which discharges itself at Canton. Respecting the nation of the Sinac themselves, we have no information, though Ptolemy mentions several subdivisions of them; as in the $N$. the Semanthini, on the like named mountains ; $\mathbf{S}$. of them the Acadorae, with a town called Acadra, and again to the S. the Aspithrae, on the Aspithra, and haring a city of the same name as the river. SE . of the latter, on the Great Bay, and dwelling on the river Ambastus, were the Ambastae. Lastly, in a still more southern district between the bay of Theriodes and that of the Sinae, were the Aethiopes

Ichthyophagi and the Sinae Ichthyophagi. Among the 8 cities mentioued by Ptolemy, namely, Bramma, Rhabans, Cattigara, Acadra, Aspithra, Cocconagra, S.rata, and Thinae or Sinae, the last was undoubtedly the most important, and was regarded by him and others as the capital of the nation. It has been conjectured to be Thsin, in the province of Chensi, or even Nankin itself. It may be remarked that the Sinae were anciently called Thinae (Bival); thourh it is said that this form of their name only amse from the Arabic pronunciation of Sinae. (See Sickler, ii. p. 518; Gesenius, Heb. Lex. p. 788.) The next town in point of importance was Cattigara, which both Ptolemy and Marcianus regard as the chief place of trade. [Cattigara.] [T.H.D.]

SINAI ( $\left.\Sigma \iota v a ̄ \gamma^{\prime} p o s\right)$, the celebrated mountain of Arabia Petraea. It, however, lent its name to the whole peninsula in which it was situated, which must therefore first be described. It is formed by the bifurcation of the Red Sea at its northern extremity, and is bounded by the Heroopoliticus Sinus (or Sea of Suez) on the west, and the Aelaniticus Sinus (the Guljof Akaba) on the east, ending in the Posidium Promontorium (Ras Mohammed). At the northern extremity of the Sea of Suez stood Arsinge (Siuez), and Aelana (Akaba), at the extremity of the gulf that bears its name. The caravan road of the great $M a j$, which joins these two towns, traverses a high table-land of desert, now called Et-Tih=" the Wilderness of the Wandering," part of ancient Idumarea. To the south of this road, the plateau of chalk formation is continued to Jebel Tih, the $\mu$ ciava úp of Ptolemy, extending from the eastern to the western gulf, in a line slightly curved to the sonth, and bounded in that direction by a belt of sandstone, consisting of arid plains, almost without water or signs of vegetation. To this succeeds the district of primitive granite formation, which extends quite to the southern cape, and runs into the Gulf of Akaba on the east, but is separated by a narrow strip of alluvial soil called EL-Káa from the Sea of Suez. The northern part of the Tih is called in Scripture "the wilderness of Paran" (Numb. xii. 16, xiii. 3, xxxii. 8, \&c.), in which the Istaelites abode or wandered during great part of the forty years; although Eusebius and St. Jerome, as will be presently seen, identify this last with the wilderness of Sim. This wilderness of Sin is commonly supposed to be connected, in name and situation, with Mount Sinai ; but as the Israelites entered on the wilderness of $\operatorname{Sin}$ on leaving their encampment by the Red Sea, the next station to Elitn (Exod. xvi. 1; Numb. xxxiii. 10, 11), and traversed it between Elim and Rephidim, where they had apparently left it (Exod. xvii. 1), -for Dophiah and Alush are inserted between the two in Numbers xxxiii. 12-14, - and yet had not arrived at Sinai (ver. 15; Exod. xvi.1), it may be questioned whether the identification rests on solid ground. Eusebius and St. Jerome, who distinguish between the deserts of Sin and Sinai, yet appear to extend the former too far eastward. "The desert of Sin," they say, "extends between the Red Sea and the desert of Sina; for they came from the desert of Sin to Rephidim, and thence to the desert of Sinai, near Mount Sina, where Moses received the dispensation of the Law; but this desert is the same as that of Kiuldes according to the Hebrew, but not according to the LXX." The confusion indicated by this last reinark may be explained by the obserrations, 1st, that Zin, which is a synonym " for the wilderness of

Kadesh " (Numb. xx. 1, xxxiii. 36), is identical in Greek with the Sin (i. e. $\Sigma i \nu$ ); the $\Sigma$ representing both the $\boldsymbol{Y}$ (tsadi) of $\$ \$$ and the $D$ (samech) of ; tical with Kadesh, as it is in the Hebrew, the LXX. read so as to make " the desert of Paran," which they identify with "the desert of Kadesh," an intermediate station between Sin and Mount Hor ( Numb. xxxiii. 36, in LXX.)

The wilderness of Sin, then, mast be fixed to the northwest part of the granite district of the peninsula between Serbal and the Red Sea, while Zin is north of Ezion Geber, between it and Mount Hor, the southern extremity in fact of Wady Musa, or the Arabah, north of Akaba.

With respect to Sinai, it is difficult to decide between the rival claims of the two mountains, which, in modern as in ancient times, have been regarded as the Mountain of the Law. The one is Serbal above-mentioned, situated towards the NW. extremity of the granite district, towering with its five sharp-pointed granite peaks above the fruitful and agreeable onsis of Wady Pharan, still marked by extensive ruins of the churches, convents, and baildings of the old episcopal town of Paran; the other between 30 and 40 miles south-east of Serbal, in the heart of the granite district, where native traditions, of whatever value, have affixed to the mountains and valleys names comnected with the inspired narrative of the giving of the Law, and where the scenery is entirely in unison with the events recorded. Emerging from the steep and narrow valley Nakba IIava, whose precipitous sides rise to the perpendicular height of 1000 feet, into the wide plain called Wady Müsa, at the northern bawe of the truditionary Horeb, Russegger describes the scene as grand in the extreme. "Bare granite mountains, whose summits reach to a height of more than 7000 Paris feet above the level of the sea; wonderful, I might say fabulons, forms encompass a plain more than a mile in length, in the background of which lies the convent of St. Catharine, at the foot of Jebel Müsa, between the holy Horeb on the west, and Ebestimmi on the east." In this valley, then, formed at the base of Horeb by what may be called a junction of the Wady-er-Rahah and Wudy-esh-Sheikh, but which, according to Russegger's express testimony, bears in this place the native name of Wady Mûsa, must the children of Israel have encamped before Jebel Müsa, whose rugged northern termination, projected boldly into the plain, bears the distinctive name of Ras Sasîfah. Jebel Müsa rises to the height of 5956 Paris feet above the sea, but is far from being the highest of the group. Towering high above it, on the south, is seen the summit of Horeb, having an elevation of 7097 Paris feet, and south of that again Jebel Katherina, more than 1000 feet higher still (viz. 8168 Paris feet), all outtopped by Jebel-om-Shomer, the Lighest of this remarkable group, which attains an altitude of 8300 Paris feet. Over against Jebel Misa on the north, and confining the valley in that direction, is the spur of a mountain which retains in its name, Jebel Sena, a memorial of the ancient Scripture appellation of the Mountain of the Law. To attempt anything like a full discussion of the questions at issue between the adrocates of the conflicting traditions or hypotheses, would be as inconsistent with the character of such an article as this, as with the limits which must be assigued it: a very few remarks

## SINAL.

must suffice. There seems, then, to be no question that the site of Horeb was traditionally known to the Isruelites for many centuries after the Exodus (1 Kings, xix. 8); and if so, it is improbable that it was subsequently lost, since its proximity to Elath and Ezion Geber, which were long in their possession, would serve to ensure the perpetuity of the tradition. It is worthy of remark that Josephus nowhere uses the name Horeb, but in the passage parallel to that above cited from the lst book of Kings, as uniformly throughout his history, substitutes Td Eivaion boos, - so far confirming the identity of locality indicated by the two names, learnedly maintained by Dr. Lepsius, who holds Horeb to be an Amalekite appellative equivalent in signification with Sin, both signifying "earth made dry by draining off the water," which earth he finds in the large mounds of alluvial deposit in the bed of Wady Furan, at the northern base of Serbal, his Sinai. Buxtorf, however, cites rabbinical authorities for another etymology of Sinai, derived from the nature of the rock in the vicinity. (See Shav's Travels, 4to. p. 443, and note 7.) Josephus does not in any way identify the site; but Eusebius and St. Jerome have been erroneously understood to describe Serbal under the name Sina, when they say that Pharan was south of Arabia, nest to the desert of the Saracens, through which the children of Israel journeyed when they decamped from Sina (Onomast. s. v. Iharan.); for they obriously confound the city of Paran with the wilderness mentioned in Numbers (xii. 16, xiii. 3); and the description is so vague as to prove only their ignorance, if not of the true site of the city Pharan (which they place 3 days east of Aila), at least of the utter want of all connection between this and the desert of Zin, which is Paran; and in this, as in other passages, on which much reliance has been placed in this discussion, it is clear that they are not writing from any local knowledge, but simply drawing deductions from the Seripture narrative (see e. g. Onomast. s. v. Raphadim), which we are perhaps equally competent to do. The earliest Christian writer, then, who can be quoted as a witness to the true site of the "Monntain of the Law" is Cosmas Indicopleustes (circ. A. D. 530), who undoubtedly describes Mount Choreb, in the Sinaic (desert ?), as near to Pharan, about 6 miles distant; and this Pharan must be the Pharan of the ecclesiastical annals, whose ruins at the foot of Mount Serbal have been noticed above. This then is direct historical testimony in favour of a hypothesis first started by Burckhardt in modern times, advocated by Dr. Lepsius, and adopted by Mr. Forster and others. But then it appears to be the only clear historical evidence, and must therefore be compared with that in favour of the existing tradition, which, as it is accepted in its main features by Drs. Robinson and Wilson, Ritter, Mr. Stanley, and other eminent scholars, is obviously not unworthy of regard. That the present convent of St. Catharine was originally founded by the emperor Justinian (about A. D. 556), is as certain as any fact in history; and it is equally difficult to imagine that, at 80 shurt an interval after the jonrney of Cosmas, the renembrance of the true Sinai could have been lost, and that the emperor or the monks would have acquienced in what they knew to be a fictitious site; for the mountain had long been regarded with veneration by the monks, who, however, had erected no monastery before this time, but dwelt in the mountains and valleys about the bush in which God appeared to

Moses (Eutychii Annales, tom. ii. p. 163; comp. Procopius, De Aedificiis Justiniani, v. 8); so that when their monasteries are mentioned in earlier times, it is clear that the monastic cells only are to be understood. On the whole, then, the testimony of Cosmas can hardly avail acainst a tradition which was not originated, but only perpetuated, by the erection of Justinian's monastery. To this historical argument in favour of the existing traditions a topographical one may be added. If Rephidim is correctly placed by Dr. Lepsius and others at Wody Faran, at the foot of Serbal, it seems to follow incontestably that Serbal cannot be Sinai; for what occasion could there be for the people to decamp from Rephidim, and journey to Sinai, if Rephidim were at the very base of the mount? (Exod. xix. 1, 2). Dr. Lepsius feels the difficulty, and attempts to remove it by insinuating that the sacred narrative is not to be implicitly trusted. That Horeb is mentioned in connection with Rephidim is certainly 2 palpable difficulty (Exod. xviii. 1-6), but in a choice of difficulties it is safer to adopt that which does least violence to the sacred text.

By far the strongest argument in favour of the identity of Serbal with Sinai is to be found in the celebrated inscriptions with which the rocks on that mountain and in the surrounding valleys are covered. Not that anything can be certainly determined from these mysterious records, while the art of deciphering them is still in its infancy. The various theories respecting them cannot here be discussed; the works containing them are referred to at the end of the article : but it may be well to put on record the whole of the earliest testimony concerning them, and to offer for their elucidation an observation suggested by an early writer which has been strangely overlooked in this discussion. It is an interesting theory of Cosmas Indicoplenstes, that the Isruelites, having been instructed in written characters in the Lec:slogue given in Horeb, were practised in writing, as in a quiet school, in the desert for forty years: " from whence it comes to pass," he proceeds, "that you may see in the desert of Mount Sinai, and in all the stations of the Hebrews, all the rocks in those parts, which have rolled down from the mountains, engraven with Hebrew inscriptions, as 1 my self, who journeyed in those parts, testify; which certain Jews also having read, interpreted to us, saying that they were written thus. 'The pilgrimage ( $6_{\pi \in \rho \sigma t s) ~ o f ~ s u c h ~ a n ~ o n e, ~ o f ~ s u c h ~ a ~ t r i b e, ~}^{\text {a }}$ in such a year, and such a month,- -as is frequently written in our hostelries. For they, having newly acquired the art, practised it by multiplying writing, so that all those places are full of Hebrew inscriptions, preserved even nnto this time, on account of the unbelievers, as I think; and any one who wishes can visit those places and see them, or they can inquire and learn concerning it that I have spoken the truth." (Cosmas Indicopleastes, de Mundo, lib. v. apud Montfaucon, Collectio Nora Patrum, tom. ii. p. 205.) On this it may suffice to remark, that while it is certain that the characters are neither the original nor later Hebrew,- i. e. neither Phoenician nor Chaldaic, - still the Jews in Cosmas's company could decipher them. We know that they are fir the most part similar to the ancient Arabian (the Hamyaritic or Hadramatic) claracter, with which the whole region in the south of the Arabian peninsula teems. If, then, Mr. Forster's ingemious and very probable conjecture of the identity of the rock-hewn inscription of Hissn Ghorab with that
copied by Abderakhman from the sonthern coast of Arabia, preserved and translated by Schultens, be correct, it will follow that the old Adite character was decipherable even two centuries later than the date assigued to Cosmas, who could scarcely have failed to discover the Christian origin of these inscriptions, if they had been really Christian. Indeed it may well be questioned whether any Christians conld have been sufficiently conversant with this ancient character to use it as freely as it is used on the rocks of the peninsula. Certainly if the hypothesis of this place having been resorted to as a place of pilgrimage by the pagan tribes of Arabia, and so having acquired a sanctity in the very earliest times, could be established, the fact might furnish a clue to the future investigation of this deeply interesting subject, and, as Ritter has suggested, might serve to remove some difficalties in the Sacred Narrative. Now the journal of Antoninus Placentinus does in fuct supply so precisely what was wanting, that it is singular that his statement has attracted so little notice in connection with the Sinaitic inseriptions; which, however, he does not expressly mention or even allude to. But what we do learn from hiin is not unimportant, viz., that be. fore the time of Islàm, in " the ages of ignorance," as the Mohammedans call them, the peninsula of Mount Sinai was a principal seat of the idolatrous superstition of the Arabians; and that a feast was held there in bonour of their miraculous idol, which was resorted to by Ishmaelites, as he calls them, from all parts; the memorial of which feast seems still to be preserved by the Bedawin. (Burckhardt, Syria, pp. 566,567.) Now when it is remembered that the eastern commerce of Greece and Rome, conducted by the Arabs of Yemen and Hadramant, must have brought their merchants and sailors to the vicinity of this ancient sanctuary at Arsinoe or at Elana, the pilgrimage becomes almost a matter of course; and the practice which we know prevailed in their own country of graring their memorials with an iron pen in the rock for ever, was naturally adopted by them, and imitated by the Christian pilgrims in after times. Undue stress has been laid on the frequency of the inscriptions abont Serbal, contrasted with their rarity about Jebel Mûsa; but it should be remembered that they are executed almost entirely in the soft sandstone which meets the granite on and around Serbal, but which is scarcely found in the interior, where the hard, primitive rock did not encourage the scribbling propensities of the travellers, as the softer tablets in the more western part, where the blocks of trap-stone (which are also largely interspersed with the granite, and which present a black surface without, but are lemoncoloured within) were studiously selected for the inscriptions, which, in consequence, come out with the effect of a rubricated book or illuminated manuscript, the black surface throwing out in relief the lemon-coloured inscriptions.

This account of the peninsula must not be concluded without a brief notice of the very remarkable temple of Sarbut el-Chidem, and the stelas which are found in such numbers, not only in the temple, but in other western parts of the peninsula, where large masses of copper, mixed with a quantity of iron ore, were and still are found in certain strata of the sandstone rocks along the skirts of the primeval chain, and which gave to the whole district the name still found in the hieroglyphics, Maphat, "the copper land," which was under the particular pro-
tection of the goddess Hathor, Mistress of Maphat. The temple, dedicated to her, stands on a lofty sandstone ledge, and is entirely filled with lofty stelae, many of them like obelisks with inscriptions on both sides; so crowded with them in fact, that its walls seem only made to circumscribe the stelae, although there are several erected outside it, and on the adjacent hills. The monuments belong, apparently, to various dynasties, but Dr. Lepsius has only specially mentioned three, all of the twelfth. The massive crust of iron ore covering the hillocks, 250 yards long and 100 wide, to the depth of 6 or 8 feet, and blocks of scoriae, prove that the smelting furnaces of the Egyptian kings were situated on these airy heights; but the caverns in which the ore was found contain the oldest effigies of kings in existence, not excepting the whole of Egypt and the pyramids of Gizeh.

The chief authorities for this article, besides those referred to in the text, are Niebuhr (Voyage en Arabie, vol. i. pp. 181-204); Seetzen (Reisen, vol. iii. pp. 55-121). For the physical history and description of the peninsula, Russegger is by far the fullest and most trusiworthy authority (Reisen, vol. iii. pp. 22-58). Dr. Robinson has investigated the bistory and geography of the peninsula, with his usual diligence (Travels, vol. i. §§ 3, 4. pp. 87241); and Dr. Wilson has added some important observations in the way of additional information or correction of his predecessor (lands of the Bible, vol. i. chapters vi.-viii. pp. 160-275). Lepsitus's Tour from Thebes to the Peninsula of Sinai (Letters, pp. 310-321,556-562), which has been translated by C. H. Cottrell (London, 1846), argues for Serbal as the true Mountain of the Law; and his theory has been maintained with great learning and industry by Mr. John Hogg (Remarks on Mfount Serbal, foc. in Transactions of the Royal Society of Literature, 1849). The graphic description of the country from Mr. A. P. Stanley's pen is the latest contribution to the general history of the peninsula (Sinai and Palestine, 1856). The decipherment of the inscriptions has been attempted by the Jearned Orientalists of Germany, Gesenius, Rnediger, Beer, and others (Ch. Bunsen, Christianity and Mankind, vol. iii. pp. 231-234); and Mr. Forster has published a vindication of his views against the strictures of Mr. Stanley on his original work (The Voice of Israel from the Rocks of Sinai, 1851; The Israelitish Authorship of the Sinaitic Inscriptions, 1856).
[G. W.]
SINCHI, a sub-division of the Sarmatian tribe of the Tauri. (Amm. Mar. xxii. 8. § 33.) [T. H. D.]

SINDA ( $\Sigma(i \nu \delta \alpha:$ Eth. Sindensis), a town which seems to have been situated on the western frontier of Pisidia, in the neighbourhood of Cibyra and the river Caularis (Liv. xxxviii. 15; Strabo, xii, p. 570, xiii. p. 630). Stephanus B. (8. v. Eıvdia). Tho speaks of Sindia as a town of Lycia, is pr. batoly alluding to the same place. (Comp. Hierocl. p. 680; Polyb. Excerpt. de Leg. 30.) Some writers have confounded Sinda with Isionda, which is the more surprising, as Livy mentions the two as different towns in the same chapter. (Leake, Asia Minor, p. 152.)
[L. S.]
SINDA SARMATICA (Ei $\nu \delta a \kappa \omega ́ \mu \eta$, Ptol. v. 9. § 8), a town or village in Asiatic Sarmatia, in the territory of the Sindi, with an adjoining harbour
 mouth of the Bosporus Cimmerius at Corocondama, and, according to Arrian (Per. P. Eux. p. 19), 500
stadia from Panticapaenm, and 300 from the Ioly Harbour. But, according to Pliny, who calls it Civitas Sindica (vi. 5. s. 5), it was 67 miles from the latter. It lay apparently on the lake of Corocondametis. According to Scylax ( $p$. 31) Sinda was a Greek colony; though Mela, who calls it Sindos (i. 19), regards it, with less probability, as a sea-port founded by the Sindi themselves. (Comp. Strab. xii. p. 496; Scymn. Fr. v. 154.)
2. A town of the Sindi, on the W. coast of the Sinus Magnus, or on the E. coast of the Aurea Chersonesus in India extra Gangem, between the mouths of the Dorias and Daonas. (I'tol. rii. 2. § 7 ; Steph. B. p. 602.)
[T. H. D.]
SINDI (Eivסol, Hernd. iv. 28), a people in Asiatic Sarmatia, on the E. coast of the Pontus Euxinus and at the foot of the Caucasus, in the district called Sindice. (Herod. l. c.; Hipponax. p. 71, ed. Welck.; Hellanic. p. 78; Dionys. Per. 681; Steph. B. p. 602 ; Amm. Marc. $\mathbf{x x i i .} 8$. § 41, \&cc.) Besides the sea-port of Sinda, other towns belonging to the same people were, Hermonassa, Gorgippia, and Aborace. (Strab. xi. p. 495.) They had a monarchical form of government (Polyaen, viii. 55), and Gorgippia was the residence of their kings. (Strab. l.c.) Nicolaus Damascenus (p. 160, ed. Orell.) mentions a peculiar custom which they had of throwing upon the grave of a deceased person as many fish as the number of enemies whon he had overcome. Their nane is rariously written, and Mela calls them Sindones (i. 19), Lucian (Tox. 55). Eivסiavol. Eichwald (Alt Geogr. d. Kasp. M. p. 356) holds them to have been a Hindoo colony. (Comp. Bayer, Acta Petrop. ix. p. 370 ; St. Croix, Mem. de IAc. des Inser. xlvi. p. 403; Larcher, ad Herod vii. p. 506; Ukert, vol. iii. pt. 2. p. 494, \&c.)
[T. H. D.]
SI'NDICE ( $\Sigma\left\llcorner\downarrow \delta ı \kappa \frac{1}{1}\right.$, Strab. xi. pp. 492, 495, \&cc.), the tract of country inhabited by the Sindi, which, according to Scylax (p. 31). lay between that belonging to the Mreotne, on the Malus Maeotis, and that of the Cercetae (the modern Cherkas), and which must therefore be sought at or near the peninsula of Taman. According to Strabo (xi. p. 492) it reached to the Achaei, and extended in a sontherly direction from the Hypanis. [T. H. D.]

SINDOCANI)A ( $\Sigma\llcorner\nu \delta o \kappa \alpha \nu \delta a$, Ptol. vii. 4. § 3), a city in the middle of the $W$. coast of Taprobane, belonging to the perple called Sandocandac. Hence it has been conjectured, either that the name of the town should be changed into Sandocanda, or that the people should be called Sindocandae. [T. H. D.]

SINDOMANA (Zıvסómava, Strab. xr. p. 701), a town on the lower course of the Indus, and in the neighbourhood of the island of Pattalene. (Comp. Arrixn, Arab. vi. 15; Diod. xvii. 102; Curtins, ix. $8,13,17$.)
[T. H. D.]
SyDUS (Eivסos, Herod. vii. 123; Steph. B. s.e.), a matitime town of Mygdonia in Macedonia, bet ween Therme (Thessalonica) and Chalastra. [E. B. J.]

SINGA ( E irroc Ptol.v. 15. § 10), a city of the Syrian province of Commagene, to the N. of Doliche. and situated on the river Singas ( $I b . \S 9$ ). (now the Senaja), which had its source in Mount Pieria and flowed to the NW. till it fell into the Euphrates to the S. of Sam'sata.
[T. H. D.]
SINGAMES (乏ırүduךs, Arrian, I'er. P. Eux. p. 10), a navigable river of Colchis, which entered the Pontus Euxinus 210) stadia N. of the Cobus, and 120 stadia SE. from the Tarsuras. (Plin. vi. 4. s. 4.) Nuw the Usingiri.
[T. H. D.]

SI'NGARA (rd Eiryapa, Dion Cass xriii. 22), a strongly fortified post at the northern extremity of Mesopotamia, which for awhile, as appears from many coins still extant, was occupied by the Lomans as an advanced colony against the Persians. Its position has not been clearly defined by ancient writers, Stephanus B. calling it a city of Arabia, near Edessa, and Ptolemy placing it on the Tigris (v. 18. § 9). There can, however, be no doubt that it and the mountain near it, called by Ptolemy $\delta$ Eiryapas ofos (v. 18. § 2), are represented at the present day by the district of the Singár. It appears to have been taken ly Trajan (Dion Cass. lxviii. 22); and as the legend on some of the coins reads ATP. CEII . KOA. CINIAPA . and bears the head of Gordian on the obverse, it appears to have formed a Roman colony under the emperors Severus and Gordian. It was the scene of a celebrated nocturnal conflict between Constantius and Sapor, the king of Persia, the result of which was so unsatisfactory that both sides claimed the victory. (Amm. Marc. xviii. 5; Eutrop. x. 10; Sext. Ruf. c. 27.) Still later, under the reign of Julian, it is recorded that it underwent a celebrated siege, and at length was carried by the Persians by storm, though gallantly defended by the townspeople and two legions. (Amm. Marc. xx. 6.) The country around it is stated by Ammianus and Theophylactus to have been extremely arid, which rendered it equally ditfcult to take or to relieve from a distance. $\qquad$
SINGIDA'VA (Eırriסava, Ptol. iii. 8. § 8), a town in the interior of Dacia, between the rivers Tysia and Aluta, now Dora on the Marosch. [T.H.D.]
SINGIDU'NUM ( $\Sigma / \gamma \gamma l(\nu) \delta o u v o \nu, ~ o r ~ \Sigma i r y i n \delta o u v o \nu, ~$ Ptol. iii. 9. § 3), a town in Moesia Superior, at the spot where the Savus falls into the Danubius, and on the main road along the banks of the latter river, opposite to the town of Taurunum (Semlin) in Pannonia. (Itin. Ant. p. 132; Itin. Hierosol. p. 56.3.) By Procopius (de Aed. iv. 6. p. 287) it is called Eirmióv. It was a fortress, and the head-quarters of the Legio Iv. Flavia Felix (Not. Imp.), the modern Belgrade.
[T. H. D.]
SI'NGILI or SINGILLS, a town of Hispmia Baetica. (Plin. iii. 1. s. 3.) It lay near Castillon or Valsequilla, and D'Anville (i. p. 39) identities it with Puente de don Gonzalo. Concerning its ruins and inscriptions, see Florez, Esp. Sagr. ix. p. 42, xii. 20; Morales, p. 21.
[T. H. D.]
SINGITICUS SiNUS. [Singus.]
SI'NGONE ( $\sum_{\gamma} \gamma \gamma^{\prime} \nu \eta$ ), a town of the Quadi in the south-east of Germany, mentioned by Ptolemy (ii. 11. § 30), but otherwise unknown. [L. S.]

SI'NGULIS, a tributary river of the Baetis, navigable as far up as Astigi. (Plin. iii. 1. s. 3.) Now the Xenil.
[T. H. D.]

SINGUS (Eíros, Hernd. rii. 122; Thuc. v. 18; Biicklı, Corp. Inscr. vol. i. p. 304 ; I'tol. iii. 13. § 11; Steph. B. s.v.; Plin. iv. 17 : Eth. Eıryaiot), a wown of Sithonia in Macelomia, upon the gulf to which it gave its name, Singiticus Sinus (Erryiticis кó入तos, Ptol. L.c.: Gulf of A'ghion Oros), identified with Sykia. probably a corrnpted form of the old name. (Leake, Northern Greece, vol. iii. p. 153.)
[E. B. J.]
SINIAR, a district of Babslonia, which is mentioned in Genesis under the title of the "land of Shinar." It is noticed under the name of Eevvadap ty s Babunavias by Histiseus of Miletus, quoted by Josephus (Ant. Jud. i. 5) and Eusebius (Praepar. Evang. ix. 15; comp. Gen. xi. 2; Isaikh, xi. 11;

Zech. v. 11). It would seem to comprehend especially the great plain land of Babylonia, as distinguished from Assyria and Elymais (Gen. xiv. 1), and probably extended to the junction of the Tigris and Euphrates, if not as far as the Persian gulf. Some have, without reason, confounded it with Singara, the modern Singir.

SINIS (Eivis), a Roman colony in the district of Delitene in Armenia Minor. (l'tol. v. 7. § 5.) The place is not mentioned by any other writer, but it is possible that it may be the same place as the one which Procopius (de Aed. iii. 4) simply calls Kолळ la
[L. S.]
SINNA. 1. (Eivva, Ptol. v. 18. §§ 11,12 ), the name of two towns in Mesopotamia, one on the $S$. declivity of Mount Masius, the other more to the SE., on the Tigris.
2. ( tress in Lebanon.
[T. H. D.]
SINONIA (Zannone), was the name given in ancient times to the smallest of the three islands known as the Isole di Ponza. It is situated about 5 miles to the NE. of Pontia (Ponza), the principal island of the group (Plin. iii. 6. s. 12; Mel. ii. 7. § 18).
[E. H. B.]
SINO'PE (Zıvón $\boldsymbol{T}$ : Eth. Eıvanteus), the most important of all the Greek colonies on the coast of the Euxine, was situated on a peninsula on the coast of Paphlagonia, at a distance of 700 stadia to the cast of Cape Carambis (Strab. xii. p. 546 ; Marcian, p 73 ; Eustath. ad Diwn. Per. 775.) It was a very ancient place, its origin being referred to the Argonauts and to Sinope, the daughter of Asopus. (Apollon. Rhod. ii. 947 ; Val. Flacc. v. 108.) But the Sinopians themselves referred the foundation of their city to Autolycus, a companion of Heracles, and one of the Argonants, to whom they paid heroic honours (Strab. l. c.). But this ancient town was small and powerless, until it received colonists from Miletus. The Milesians were in their turn dispossessed by the Cimmerians, to whom Herodotus (iv. 12) seems to assign the foundation of the city; but when the Cimmerians were driven from Asia Minor, the Ephesians (in B. c. 632) recovered possession of their colony. (Scymn. 204, foll.; Anonym. Periph. P. E. p. 8.) The leader of the first Milesian colony is called Ambron, and the leaders of the second Cous and Critines; though this latter statement seems to be a mistake, as Eustathius and Stephanus B. (s. v.) call the founder Critius, a native of Cos. After this time Sinope soon rose to great power and prosperity. About the commencement of the Peloponnesian War the Siropians, who were then governed by a tyrant, Timesileon, received assistance from the Athenians; and after the expulsion of the tyrant, 600 Athenian colonists were sent to Sinope (Plut. Pericl. 20). At the time of the retreat of the Ten Thou:and under Xenophon, Sinope was a wealthy and flourisling city, whose dominion extended to the river Halys, and which exercised great influence over the tribes of Paphlagonia and Cappadocia, independently of its colonies of Cerasus, Cutyora, and Trapezus. It was mainly owing to the assistance of the Sinopians, that the returning Greeks were enabled to procure ships to convey them to Heracleia (Xenoph. Amib. v. 5. § 3; Arrian, Peripl. P. E. p. 17; Diod. Sic. xiv. 30, 32; Amm. Marc. xxii. 8). Strabo also acknowledges that the fleet of the Sinopians held a distinguished position among the naval powers of the Greeks; it was mixtress of the Euxine as far as the entrance
of the Bosporas, and divided with Byzantium the lucrative tunny fisheries in that sea. In the time of Ptolemy Suter, Sinope was governed by a prince, Scydrothemis, to whom the Ecyptian king sent an embassy. (Tac. Hist. iv. 82, foll.) Its great wealth, and above all its excellent situation, excited the cupidity of the kings of Pontus. It was first assailed in B. c. 220, by Mithridates IV., the greatgrandfather of Mithridates the Great. Polybius (iv. 56), who is our principal authority for this event, describes the situation of Sinope in the following manner : It is built on a peninsula, which advances out into the sea. The isthmus which connects the peninsula with the mainland is not more than 2 stadia in breadth, and is entirely barred by the city, which comes up close to it, but the remainder of the peninsula stretches out towards the sea. It is quite flat and of easy access from the town; but on the side of the sea it is precipitous all around, and dangerous for vessels, and presents very few spots fit for effecting a landing. This description is confirmed by Strabo (xii. p. 54.5), for he says that the city was built on the neck of the peninsula; but he adds, that the latter was girt all around with rocks bollowed out in the form of basins. At high water these basins were filled, and rendered the shore inaccessible, especially as the rocks were everywhere so pointed that it was impossible to walk on them with bare fect. The Sinopians defended themselves bravely against Mithridates, and the timely aid of the Rhodians in the end enabled them to compel the agressor to raise the siege. Pharnaces, the successor of Mithridates IV., was more successful. He attacked the city unexpectedly, and finding its inhabitants unprepared, easily overpowered it, B. c. 183. From this time Sinope became the chief town, and the residence of the kings of Pontus. (Strab. l. c.; Polyb. xxiv. 10.) Mitliridates, surnamed Euergetes the successor of Pharnaces, was assassinated at Sinope in B. c. 120 (Strab. x. p. 477). His son, Mithridates the Great, was born und educated at Sinope, and did much to embellish and strengthen his birthplace: he formed a harbour on each side of the isthmus, built naval arsenals, and constructed admirable reservoirs for the tunny fisheries. After his disaster at Cyzicus, the king intrusted the command of the garrison of Sinope to Bacchides, who acted as a cruel tyrant; and Sinope, pressed both from within and from without, was at last taken by Lucullus, after a brave resistance. (Strab. l.c.; Plut. Lucull. 18; Appian, Bell. Mithr. 83; Memnon, in Phot. Cod. p. 238, ed. Bekker.) Lucullus treated the Sinopians themselves mildly, having pat the Pontian garrison to the sword; and he left them in possession of all their works of art, which embellished the city, with the exception of the statue of Autolycus, a work of Sthenis, and the sphere of Billarus. (Strab. Plut. ll. cc ; Cic. pro Leg. Man. 8.) Lucullus restored the city to its ancient freedom and independence. But when Pharnaces, the son of Mithridates, had been routed at Zela, Caesar took Sinope under his protection, and established Roman colonies there, as we must infer from coins bearing the inscription Col. Jul. Caes. Felix Sinope. In the time of Strabo Sinope was still a large, splendid, and well fortified city; for he descrites it as surrounded by strong walls, and adorned with fine porticoes, squares, gymuasia, and other public edifices. Its commerce indeed declined, yet the tanny fisheries formed an meshaustible
source of revenue, which maintained the city in a tolerable state of prosperity. It passessed exteusive suburbs, and numerous villas in its ricinity (Strab. l. c.; Plin. vi. 2). From Pliny's letter's ( $x .91$ ), it appears that the Sinopians suffered some inconvenience from the want of a good supply of water, which Pliny endeavoured to remedy by a grant from the emperor Trajan to build an aqueduct conveying water from a distance of 16 miles. In the time of Arrian and Marcian, Sinope still continued te be a flourishing town. In the middle ages it belonged to the empire of Trebizond, and fell into the hands of the Turks in A. D. 1470, in the reign of Mohammed II. Sinope is also remarkable as the birthplace of several men of eminence, such as Diogenes the Cynic, Baton, the historian of Persia, and Diphilus, the comic poet.

Near Sinope was a small island, called Scopelus, around which large vessels were obliged to sail, before they could enter the harbour; but small craft might pass between it and the land, by which means a circuit of 40 stadia was avoided (Marcian, p. 72, \&c.) The celebrated Sinopian cinnabar ( $\Sigma$ iv $\omega \pi ⿺ 𠃊 h$
 of the district of Sinope, but was designated by this name only because it formed one of the chief articles of trade at Sinope. (Groskurd on Strabo, vol. ii. p. 457, foll.) The imperial coins of Sinope that are known, extend from Augustus to Gallienus. (Sestini, Num. Vet p. 63; Rasche, Lex. Num. iv. 2. p. 1105, foll.)
Sinope, now called Sinab, is still a town of some importance, but it contains only few remains of its former magnificence. The wall across the isthmus has been built up with fragmeuts of ancient archi tecture, such as columns, architraves, \&c., and the same is found in several other parts of the modern town; but no distinct ruins of its temples, porticoes, or even of the great aqueduct, are to be seen. (Hamilton, Researches, vol. i. p. 306, \&cc.) [L. S.]

SINO'RIA ( $\sum_{\text {ivopia, Strab. xii. p. 555), a town }}$ on the frontier of Armenia Major, a circumstance which gave rise to a pun of the historian Theophanes who wrote the name Euvopia. The place is no doubt the same as the one called Sinorega by Appian (Mithrid. 101), by Ammianus Marcellinus (xvii. 7) Synhoriam, by Ptolemy (v. 7. § 2) Sinibra or Sinera, and in the Antonine Itinerary (p. 208) Sinervas. The pun upon the name made by Theophanes seems to show that the form Sinoria, which Strabo gives, is the correct one. The town was a fortress built by Mithridates on the frontier between Greater and Lesser Armenia; but assuming that all the different names mentioned above are only varieties or corruptions of one, it is not easy to fix the exact site of the town, for Ptolemy and the Antonine Itinerary place it to the south-west of Satala, on the road from this town to Melitene, and on the Euphrates, while the Table, calling it Sinara, places it 79 miles to the north-east of Satala, on the frontiers of Pontus; but there can be no doubt that the Sinara of the Table is altogether a different place from Sinoria, and the site of the latter place must be sought on the banks of the Euphrates between Satala and Melitene, whence some identify it with Murad Chai and others with Seni Beli.
[L. S.]
SINOTIUM. [Synodium.]
SINSII (Eivococ, Ptol. iii. 8. §5), a people in the S. of Dacia.
[T. H. D]
SINTI (Thuc. ii. 98; Steph.B. s.v.; Liv. xlii.51), a Thrucian tribe who occupied the district lying
between the ridge called Cercine and the right or W. bank of the Strymon, in the upper part of the course of that river, which was called from thence Sintice (Eivtuct. Ptol. iii. 13. § 30). When Macedonia was divided into four provinces at the Roman conquest, Sintice was associated with Bisaltia in the First Macedonia, of which Amphipolis was the capital (Liv. xlv. 29). It contained the three towns Heracleia, Paroecopolis, Tristolus. [E.B.J.] SINTIES. [Lemnos.]
 vovéनoŋvós, Sinuessanus: Mondragone), a city of Latium, in the more extended sense of the name, situated on the Tyrrhenian sea, about 6 miles N . of the mouth of the Vulturnus. It was on the line of the Via Appia, and was the last place where that great highroad touched on the sea-coast. (Strab. v. p. 233.) It is certain that Sinuessa was not an ancient city; indeed there is no trace of the existence of an Italian town on the spot before the foundation of the Roman colony. Some authors, indeed, mention an obscure tradition that there had previously been a Greek city on the spot which was called Sinope; bat little value can be attached to this statement. (Liv. x. 21; Plin. iii. 5. s. 9.) It is certain that if it ever existed, it had wholly disappeared, and the site was included in the territory of the Ausonian city of Vescia, when the Romans determined to establish simultaneously the two colonies of Minturnae and Sinuessa on the Tyrrhenian sea. (Liv. x. 21.) The name of Sinuessa was derived, according to Strabo, from its situation on the spacious gulf (Sinus), now called the Gulf of Gaeta. (Strab. v. p. 234.) The object of establishing these colonies was chiefly for the purpase of securing the neighboaring fertile tract of country from the ravages of the Samnites, who had already repeatedly overrun the district. But for this very reason the plebeians at Rome hesitated to give their names, and there was some difficulty found in carrying out the colony, which was, however, settled in the following year, b. c. 296. (Liv. x. 21; Vell. Pat. i. 14.) Sinuessa seems to have rapidly risen into a place of importance; but its territory was severely ravaged by Hannibal in B. c. 217, whose cavalry carried their devastations up to the rery gates of the town. (Liv. xxii. 13, 14.) It subsequently endeavoured, in common with Minturnae and other "coloniae maritimae," to establish its exemption from furnishing military levies; but this was overruled, while there was an enemy with an army in Italy. (Id. xxvii. 38.) At a later period (b. C. 191) they again attempted, but with equal ill success, to procure a similar exemption from the naval service. (Id. xxxvi. 3.) Its position on the Appian Way doubtless contributed greatly to the prosperity of Sinuessa; for the same reason it is frequently incidentally mentioned by Cicero, and we learn that Caesar halted there for a night on his way from Brundusium to Rome, in B. c. 49. (Cicad Att. ix. 15, 16, xiv. 8, ad Fam. xii. 20.) It is noticed also by Horace on his journey to Brandusium, as the place where he met with his friends Varius and Virgil. (Sat. i. 5. 40.) The fertility of its territory, and especially of the neighbouring ridge of the Mons Massicus, so celebrated for its wines, must also have tended to promote the prosperity of Sinuessa, but we hear little of it under the Koman Empire. It received a body of military colonists, apparently under the Triunvirate (Lib. Col. p. 237), but did not retain the rank of a Colonia, and
is termed by Pliny as well as the Liher Coloniarum only an "oppidum," or ordinary municipal town. (Plin. iii. 5. s. 9; Lib. Col. L c.) It was the furthest town in Latium, as that term was understood in the days of Strabo and Pliny, or " Latium adjectum," as the latter author terms it ; and its territory extended to the river Savo, which formed the limit between Latiun and Campania. (Strab. v. pp. 219, 231, 233; Plin. iii. 5. s. 9; Mel. ii. 4. § 9.) At an earlier period indeed Polybius reckoned it a town of Campania, and Ptolemy follows the same claswification, as he makes the Liris the southern limit of Latium (Pol. iii. 91 ; Ptol. iii. 1. § 6); but the division adupted by Strabo and Pliny is probably the most correct. The Itineraries all notice Sinuessa as a still existing town on the Appian Way, and place it 9 miles from Minturnae, which is, however, considerably below the truth. (Itin. Ant. p. 108; Itin. Hier. p. 611 ; Tab. Peut.) The period of its destruction is unknown.

The ruins of Sinuessa are still visible on the seacoast just below the hill of Mondragone, which forms the last underfall or extremity of the long ridge of Monte Mussico. The most important are those of an aqueduct, and of an edifice which appears to have been a triumphal arch; but the whole plain is covered with fragments of ancient buildings. (Cluver. Ital. p. 1080; Romanelli, vol. iii. p. 486.)

At a short distance from Sinuessa were the baths or thermal springs called Aquae Sinurssanae, which appear to have enjoyed a great reputation among the Romans. Pliny tells us they were esteemed a remedy for barrenness in women and for insanity in men. They are already mentioned by Livy as early as the Second Punic War; and though their fame was eclipsed at a later period by those of Baiae and other fashionable watering-places, they still coutinoed in use under the Empire, and were resorted to among others by the emperor Clandius. (Liv. $\mathbf{x x i i}$. 13; Tac. $A n n$. xii. 66 ; I'lin. $\mathbf{~ x x i . ~ 2 . ~} 8$. 4.) It was there, also, that the infamous Tigellinus was compelled to put an end to his own life. (Tac. Hist. i. 72; Plat. Oth. 2.) The mild and warm climate of Sinuessa is extolled by some writers as contributing to the effect of the waters (Tac. Ann. xii. 66): hence it is called "Sinuessa tepens" by Silius Italicus, and "mollis Sinuessa" by Martial. (Sil. Ital. viii. 528 ; Mart. vi. 42.) The site of the waters is still called I Bayni, and the remains of Roman buildings still exist there. [E. H. B.]

SINUS AD GRADUS or AD GRADUS. [Fossa Mariana.]

SION, M. ( $\sum^{\prime}(\omega \nu)$, originally the name of a particular fortress or hill of Jerusalem, but often in the poetical and prophetic books extended to the whole city, especially to the temple, for a rexson which will presently be obvious. Sion proper bas been always assumed by later writers to be the SW. hill of Jerusaiem, and this has been taken for granted in the article on Jerusalem [Jerusalem, p. 18]. The counter hypothesis of a later writer, however, maintained with great learning, demands some notice urder this head. Mr. Thrupp (Antient Jerusalem, 1855) admits the original identity of Sion and the city of David, but believes both to have been distinct from the upper city of Josephus, which latter he identifies with the modern Sion, in agreement with other writers. The transference of the name and position of Sinn be dates as far back as the return from the Babylonish vol. II.
captirity, believing that the Jews had lost the tradition of its identity with the city of David; so that, while they correctly placed the latter, they erroneonsly fixed the former where it is still found, viz., at the SW. of the Temple Mount, which mount was in fact the proper "Sion." identical with " the city of David;" for it is admitted that the modern Sion is identical not only with that recognised by the Christian (he might bave added the Jewish) inhabitants of Jerusalem, and by all Christian (and Jewish) pilgrims and travellers from the days of Constantine, but with the sion of the later Jewish days, and with that of the Maccabees. The elaborate argument by which it is attempted to remove this error of more than 2000 years' standing from the topography of Jerusalem, cannot here be stated, much less discussed; but two considerations may be briefly mentioned, which will serve to vindicate for the SW. hill of the city the designation which it has enjoyed, as is granted, since the time of the Babylonish captivity. One is grounded on the language of Holy Scripture, the other on Josephus. Of the identity of the original Sion with the city of David, there can be no doubt. Mr. Thrupp (pp. 12, 13) has adduced in proof of it three conclusive passages from Holy Scripture (2 Sam. v. 7; 1 Kings, viii. 1; 1 Chron. xi. 5). It is singular that be did not see that the second of these passages is utterly irreconcilable with the identity of the city of David with the Temple Mount; and that his own attempt to reconcile it with his theory, is wholly inadequate. According to that theory Mount Sion, or the city of David, extended from the NW. angle of the present Haram, to the south of the same enclosure; and the tombs of Darid, which were certainly in the city of David, he thinks might yet be discovered beneath the south-western part of the Haram (p. 161). That the temple lay on this same mount, between these two points, is not disputed by any one. Now, not to insist upon the difficulty of supposing that the threshing-floor of Araunih the Jebusite, where the temple wis undoubtedly founded ( 2 Chron. iii. 1), lay in the very heart of the city of David, from which David had expelled the Jebusites, it is demonstrable, from the contents of the second passage above referred to, that the temple was in no sense in the city of David; for, after the completion of the temple, it is said in that and the parallel passage (2 Chrom. v. 2, 5, 7) that Solumon and the assembled Israelites brought up the ark of the covenant of the Lord out of the city of David, which is Sion, into the temple which he had prepared for it on what Scripture calls Mount Moriah (2 Chron. iii. 1). Again, in 2 Samuel, v. 6-9, we hare the account of David's wresting " the stronghold of Sion, the same is the city of David," out of the hands of the Jebusites; after which "David dwelt in the fort, and called it the city of David." Josephas, in recording the same events, states that David "laid siege to Jerusalem, and took the lower city by assault, while the citadel still held out." (Ant. vii. 3. § 2.) This citadel is clearly identified with the upper city, both in this passage and in his more detailed description of the city, where he says " that the hill upon which the upper city was built was by far the highest, and on account of its strength was called by King David the fortress" (фpoípiov). (Bell. Jud. v. 4. § 1.) We are thus led to a conclusion directly opposite to that arrived at by Mr. Thrupp, who says that " the accounts in the boiks of Sainuel and Chronicles represent David as taking the stronghold of Sion first

3 т
and the Jebusite city afterwards; Josephns represents him as taking the lower city first, and afterwards the citadel. There can be no doubt, therefore, that in Josephus's view, Sion was the lower city, and the Jebusite city the citadel; ${ }^{n}$ for a comparison of the 7th with the 9th verse in 2 Sam . v., and of the 5th with the 7th verse in 1 Chron. xi. can leave no doubt that the intermediate rerses in both passages relate to the particulars of occupation of Sion, which particulars are narrated by Josephus of the occupation of the upper city, here called by him by the identical name used by the sacred writer, of the "cestle in which David dwelt; therefore they called it the city of David; ${ }^{n}$ and this $\varphi$ pooupooy of Josephus is admitted by Mr. Thrupp to be the upper city (p. 56, note 2). That the name Sion was subsequently used in a much wider acceptation, and applied particularly to the sanctuary, is certain; and the fact is easily explained. The tent or tabernacle erected by David for the reception of the ark was certainly on Mount Sion, and in the city of David (2 Sam. vi. 12; 1 Chrom xv. 1, 29), and therefore in all the language of his own divine compositions, and of the other Psalmists of the conclusion of his and the commencement of Solomon's reigu, Sion was properly identified with the sanctuary. What could be more natural than that, when the ark was transferred to the newly-consecrated temple on the contiguous hill, which was actually united to its former restingplace by an artificial embankment, the signification of the name should be extended so as to comprehend the Temple Mount, and continue the propriety and applicability of the received phraseology of David's and Asaph's Psalms to the new and permanent abode of the most sacred emblem of the Hebrew worship? But to attempt to found a topographical argument on the figurative and frequently elliptical expressions of Psalms or prophecies is surely to build on a foundation of sand. It was no doubt in order not to perplex the topography of Jerusalem by the use of ecclesiastical and devotional terminology that Josephas has wholly abstained from the use of the name Sion.
[G. W.]
SIPH or ZIPH (LXX. Alex. Z( $\phi$, Vat. 'OG6: Eth. Zupaios), a city of the tribe of Judah, mentioned in connection with Maon, Carmel, and Juttah (Josh xv. 55). The wilderness of Ziph was a favourite hiding-place of David when concealing himself from the malice of Saul. (1 Sam. xxiii. 14, 26, $\mathbf{x} \mathbf{v i}$. 1 ; Psalm liv. title.) This wilderness of Ziph was contiguous to the wilderness of Maon (1 Sam. xxiii. 25); and this Maon is connected with Carmel in the history of Nabal and Abigail (xxv. 2). The three names are still found a few miles south of Hebron, as Kirmel, Main, Ziph. The ruins lie on a low ridge between two small wadys, which commence here and run towards the Dead Sea. "There is here little to be seen except broken walls and foundations, most of them of unhewn stone, but indicating solidity, and covering a considerable tract of ground. Numerous cisterns also remain." (Robinson, Bibl. Res. vol. ii. p. 191). Ziph is placed by St. Jerome 8 miles E. of Hebron (S. would be more correct), and the desert of Ziph is frequently mentioned in the annals of the recluses of Paleatine, while the site of the town was identified by travellers at least three centuries ago. (Fürer, Itinerarium, p. 68.) [G.W.]
SIPHAE or TIPHA (Eiфac, Thuc. iv. 76; Scylax, p. 15; Steph. B. e. v.; Ptol. iii. $15 . \$ 5$; Plin. iv. 3. s. 4; Tiфa, Paus. ix. 32.§ 4 : Eth. Tiфaîos, Tıфaıévs), a town of Boeotia, upon the Corinthian
gulf, which was said to have derived its name from Tiphys, the pilot of the Argoraants. In the time of Pausanias the inhabitants of Siphae pointed out the spot where the ship Argo anchored on its retarn from its celebrated voyage. The same writer mentions a temple of Hercules at Siphae, in whose honour an annual festival was celebrated. (Paus. h.c.) Thucydides (l.c.), Apollonins Rhodias (i. 105), and Stephanus B. (s. v. Elфau) describe Siphae as a dependency of Thespias; and it is accordingly placed by Mïller and Kiepert at Alikés. But Leake draws attention to the fact that Paasanias describes it as lying W. of Thisbe; and he therefore places it at port Saraindi, near the monastery dedicated to St. Taxiarches, where are the remains of a small Hellenic city. On this supposition the whole of the territory of Thisbe would lie between Thespiae and Siphae, which Leake accounts for by the superiority of Thespiae over all the places in this angle of Boeotia, whence the whole country lying upon this part of the Corinthian gulf may have often, in common acceptation, been called the Thespica. (Leake, Northern Greece, vol. ii. p. 515.)

SIPHNOS or SIPHNUS (Elфvos: Eth. Eípres: Siphno Gr., Siphanto Ital.), an island in the Aegaean sea, one of the Cyclades, lying SE. of Seriphos, and NE. of Melos. Pliny (iv. 12. s. 22. §66) describes it as 28 miles in circuit, but it is considerably larger. The same writer says that the island was originally called Merope and Acis; its ancient name of Merope is also mentioned by Stephanus B. (s.v.). Siphnos was colonised by Ionixns from Athens (Herod. viii. 48), whence it was said to have derived its name from Siphnos, the son of Sunius. (Steph. B. 8. v.) In consequence of their gold and silver mines, of which remains are still seen, the Siphnians attained great prosperity, and were regarded, in the time of Polycrates (B.c. 520), as the wealthiest of all the islanders. Their treasury at Delphi, in which they deposited the tenth of the produce of their mines (Pans. x. 11. § 2), was equal in wealth to the treasuries of the most opulent states; and their public buildings were decorated with Parian marble. Their riches, however, exposed them to pillage; and a party of Samian exiles, in the time of Polycrates, invaded the island, and levied a contribution of 100 talents. (Herod. iii. 57. 38.) The Siphnians were among the few islanders in the Aegaean who refused tribate to Xerxes, and they fought with a single ship on the side of the Greeks at Salamis. (Herod. viii. 46, 48.) Under the Athenian supremacy the Siphnians paid an annual tribute of 3600 drachmae. (Franz, Elem. Epigr. Gr. n. 52.) Their mines were afterwards less productive; and Pausanias (h.c.) relates that in consequence of the Siphnians neglecting to send the tenth of their treasure to Delphi, the gods destroyed their mines by an inundation of the sea. In the time of Strabo the Siphnians had become so poor that Eiфyiov dorpóraloy became a proverbial expression. (Strab. x. p. 448; comp. Eustath. ad
 The inoral character of the Siphnians stood low;
 used as a term of reproach. (Steph. B.; Suid.; Hesych.) The Siphnians were celelrated in antiquity, as they are in the present day, for their skill in pottery. Pliny (xxxvi. 22. § 159. Sillig) mentions a particular kind of stone, of which drinking cups were made. This, according to Fiedler, was a species of tulc, and is probably intended by

Stephanus B. when he speaks of Eípviov mochplov.
Siphnos possessed a city of the same name (Ptol. iii. 15. § 31), and also two other towns, Apollonia and Minoa, mentioned only by Stephanus B. The ancient city occupied the same site as the modern town, called Kastron or Seraglio, which lies upon the eastern side of the island. There are some remains of the ancient walls; and fragments of marble are found, with which, as we have already seen, the public buildings in antiquity were decorated. A range of mountains, about 3000 feet in height, runs across Siphnos from SE. to NW.; and on the high ground between this mountain and the eastern side of the island, about 1000 feet above the sea, lie five neat villages, of which Stavri is the principal. These villages contain from 4000 to 5000 inhabitants; and the town of Kastron about another 1000. The climate is healthy, and many of the inhabitants live to a great age. The island is well cultivated, but does not produce sufficient food for its population, and accordingly many Siphnians are obliged to emigrate, and are found in considerable numbers in Athens, Smyrna, and Constantinople. (Tournefort, Voyage, foc. vol. i. p. 134, seq. transl.; Fiedler, Reise, vol. ii. p. 125, seq.; Ross, Reise auf den Griech. Inseln, vol. i. p. 138, seq.)

COIN OF SLPHNOS.
SIPIA, in Gallia, is placed by the Table on a route from Condate (Rennes) to Juliomagus (Angers). The distance from Condate to Sipia is xvi. and this distance brings us to a little river Seche at a place called Vi-seche, the Vi being probably a corruption of Vadum. The same distance xvi. measured from Vi-seche brings us to Combaristum (Combre) on the road to Angers. But see the article Combaristum. The Seche is a branch of the Vilaine (D'Anville, Notice, foc.).
[G. L.]
SIPONTUM, or SIPUNTUM, but in Greek always SIPUS (之ııroûs -oûvtos : Eth. 之ııroúvtios, Sipontinus: Sta Maria di Siponto), a city of Apulia, situated on the coast of the Adriatic, immediately S . of the great promontory of Garganus, and in the bight of the deep bay formed by that promontory with the prolongation of the coast of Apulia. (Strab. vi. p. 284.). This bay is now called the Gulf of Manfredonia, from the city of that name which is situated within a few miles of the site of Sipontum. The Cerbalus, or Cervaro, and the Candelaro fall into this bay a short distance S. of Sipontum, and form at their mouth an extensive lagune or saltwater pool ( $\sigma \tau \rho \mu a \lambda i \mu \nu \eta$, Strab. l.c.), now called the Pantano Salso. Like most places in this part of Apulia the foundation of Sipontum was ascribed to Diomed (Strab. l.c.): but with the exception of this vague and obscure tradition, which probably means no more than that the city was one of those belonging to the Daunian tribe of Apulians, we have no account of its being a Greek colony. The name is closely analogous in form to others in this part of

Italy (Hydruntum, Butuntum, \&cc.): and its Greek derivation from $\sigma \eta \pi i a$, a cuttle-fish (Strab. l.c.), is in all probability fictitious The Greek form Sipus, is adopted also by the Roman poets. (Sil. Ital. viii. 633; Lucan. v. 377.) The only mention of Sipontum in history before the Roman conquest is that of its capture by Alexander, king of Epirus, about в. c. 330. (Liv. viii. 24). Of the manner in which it passed under the yoke of Rome we have no account; but in B. c. 194 a colony of Roman citizens was settled there, at the same time that those of Salernum and Buxentum were established on the other sea. (Liv. xxxiv. 45.) The dands assigned to the colonists are said to have previously belonged to the Arpani, which renders it probable that Sipontum itself had been merely a dependency of that city. The new colony, however, does not seem to have prospered. A few years later (b.c. 184) we are told that it was deserted, probably on account of malaria; but a fresh body of colonists was sent there (Liv. xxxix. 22), and it seems from this time to have become a tolerably flourishing town, and was frequented as a seaport, though never rising to any great consideration. Its principal trade was in corn. (Strab. vi. p. 284; Mel. ii. 4. § 7; Plin. iii. 11. s. 16; Ptol. iii. 1.§ 16 ; Pol. x. 1.) It is, however, mentioned apparently as a place of some importance, during the Civil Wars, being occupied by M. Antonius in B. C. 40. (Appian, B. C. v. 56; Dion Cass. xlviii. 27.) We learn from inscriptions that it retained its municipal government and magistrates, as well as the title of a colony, under the Roman Empire (Mommsen, Inscr. R. N. 927-929); and at a later period Panlus Diaconus mentions it as still one of the " urbes satis opulentae" of Apulia. (P.Diac. Hist. Lang. ii. 21.) Lucan notices its situation immediately at the foot of Mount Garganus (" subdita Sipus montibus." Lucan, v. 377). It was, however, actually situated in the plain and immediately adjoining the marshes at the mouth of the Candelaro, which must always have rendered the site unhealthy; and in the middle ages it fell into decay from this cause, till in 1250 Manfred king of Naples removed all the remaining population to a site about a mile and a half further N., where he built a new city, to which he gave the name of Manfredonia. No ruins of the ancient city are now extant, but the site is still marked by an ancient church, which bears the name of Sta Maria di Siponto, and is still termed the cathedral, the archbishop of Manfredonia bearing officially the title of Archbishop of Sipontum. (Craven's Southern Tour, p. 67 ; Romanelli, vol. ii. p. 209.) The name of Sipontum is found in the Itineraries (Itin. Ant. p. 314; Tab. Peut.), which give a line of road proceeding along the coast from thence to Barium, passing by the Salinae at the mouth of the Palus Salapina, and therefore following the narrow strip of beach which separated that lagune from the sea. There is still a good horse-road along this beach; but the distances given in the Itineraries are certainly corrupt.
[E. H. B.]
SI'PYLUS ( $\Sigma^{\prime}(\pi x u \lambda o s)$, a mountain of Lydia between the river Hermus and the town of Smyrna; it is a branch of Mount Tmolus, running in a northwestern direction along the Hermus. It is a rugged, much torn mountain, which seems to owe its present form to violent convulsions of the earth. The mountain is mentioned even in the Iliad, and was rich in metal. (Hom. Il. xxiv. 615; Strab. i. p. 58, xii. p. 579, xiv. p.680.) On the eastern slope of the
mountain, there once existed, according to tradition, an ancient city, called Tantalis, afterwards Sipylus, the capital of the Maeonians, which was believed to have been swallowed up by an earthquake, and plunged into a crater, afterwards filled by a lake, which bore the name of Sale or Saloë (Strab. i. p. 58, xii. p. 579; Steph. B. 8. v.; Plin. v. 31; Paus. vii. 24. § 7). Pling relates that the spot once occupied by Sipylus was successively occupied by other towns, which he calls Archaeopolis, Colpe and Lebade. Pausanias (v. 13. §4) calls the lake the marsh of Tantalus, and adds that his tomb was conspicuous near it, and that the throne of Pelops was shown on the summit of the mountain above the temple of (Cybele) Plastene. The tops of the houses of Sipylus were believed to have been seen under the water for some time after (Pans. vii. 24. § 7); and some modern travellers, mistaking the ruins of old Sinyrna for those of Sipylus, imagine that they have discovered both the remains of Sipylus and the tomb of Tantalus. Chandler (Travels in Asia Minor, p. 331) thought that a small lake of limpid water at the north-eastern foot of Mount Sipylus, not far from a sepulchre cut in the rock, might be the lake Sale; but Hamilton (Researches, i. p. 49, foll.) has shown that the lake mast be sought for in the marshy district of Manissa.

In speaking of Mount Sipylus, we cannot pass over the story of Niobe, alluded to by the poets, who is said to have beell metamorphosed into stone on that mountain in her grief at the loss of her children. (Hom. Il. xxiv. 614; Soph. Antig. 822; Ov. Met. vi. 310; Apollod. iii. 5; Paus. viii. 2. § 3.) Pausanias (i. 21. § 5) relates that he himself went to Mount Sipylus and saw the figure of Niobe formed out of the natural rock; when viewed close he saw only the rock and precipices, but nothing resembling a woman either weeping or in any other posture; but standing at a distance you fancied you saw a woman in tears and in an attitude of grief. This phantom of Niobe, says Chandler (p. 331), whose observation has been confirmed by sabsequent travellers, may be defined as an effect of a certain portion of light and shade on a part of Sipylus, perceivable at a particular point of view. Mount Sipylus now bears the name of Saboundji Dagh or Sipuli Dagh. [L. S.]

SIRACELLAE (Itin. Ant. p. 332; Ib. p. 333, Siracelle; It. Hier. p. 602, Sirogellae ; Tab. Peut. Syrascellae; and in Geog. Rav. iv. 6, and v. 12, Syrascele), a place in Thrace, on the road from Trajanopolis to Callipolis, and on the main road to Constantinople. Its distance from Trajanopolis is variously given in the Itin. Ant., and the readings of the MSS. differ, - one stating the distance to be as much as 59,000 paces, another as little as 50,000 . According to Mannert (vii. p. 20.5), its site is near the modern Chachan or Rissqueur (?) of P. Lucas (Trois Voy. p. 47); but Richard places it near Zerna, and Lapie near Malgara or Migalgara; the uncertainty of the Itinerary above mentioned being probably the cause of this discrepancy.
[J. R.]
SIRACE'NE. [Sinoc.]
 great and inighty people of Asiatic Sarmatia on the east shore of the Macotis, beyond the Rha and on the Achardeus, in the district called by Strabo (xi. 504) Siracene. They appear under various names. Thus Strabo (xi. p. 506) and Mely (i. 19) call them Siraces; Tacitus (Ann. xii. 15, seq.) Siraci (in Strabo, xi. p. 492, 乏ıpakui); and in an inseription (Böckl, ii. p. 1009) we find the form Eıpáxot.

They were governed by their own kings, and the Ihomans were engaged in a war with them, A. D. 50. (Tac. l. c.; Strab. ib. p. 504.)
[T. H. D.]
SIRAE or SEIRAE. [Psoris.]
SIRAE, in Macedonia. [Simis.]
SIRANGAE ( $\Sigma$ párrau or $\sum \eta \rho \alpha \alpha_{\gamma} \gamma \boldsymbol{\alpha}$, Ptol. iv. 6.
§ 17), a tribe in the interior of Libye. [T. H. D.] SIRBES. [Xanthus.]
SIRBI. [SERbl.]
SIRBITUM, a city of Aethiopia, above which the mountains cease, and at a distunce of 14 days' sail from Meroë. (Plin. vi. 30. s. 35.) From these particulars Mannert (x. pt. i. p. 171) is induced to regard it as the modern Senaar.
[T. H.D.]
SIRBO'NIS LACUS (ウ̀ Eipfovis or Eıphavidos $\lambda\{\mu \nu \eta$, Herod. ii. 6; Diodor. i. 30; Ptol. ir. 5. §§ 12, 20; Strab. i. pp. 50, 65, xvii. 760-763; Eípfar, Steph. B. s. v.; Plin. v. 12. s. 14 : Sebaket-Bardvi), was a rast tract of morass, the centre of which formed the Sirbonian lake, lying between the eastern angle of the Delta, the Isthmus of Suzz, Mount Casius, and the Mediterranean sea. With the latter it was at one time connected by a natural channel ( $\tau \delta$ zкре $\gamma \mu a$ ), runuing through bars of quicksard and shingle ( $\tau \alpha \beta \alpha d p a \theta \rho a$ ), which separated the sea from the morass. The limits of the Serbonian bog have, however, been mach contricted in later ages by the elevation of the sea-borde and the drifting of the sands, and the lake is now of inconsiderable extent. The Sirbonian region is celebrated in history for having been the scene of at least the partial destruction of the Persian army in B. c. 350, when Darius Ochus was leading it, after the storming of Sidon, to Aegypt, in order to restore the authority of Persir in that kingdom. Diodorus (i. 30) has probably exaggerated the serious dissiter into a wital annililation of the invading host, and Milton (P. L. ii. 293) has adopted the statement of Diodurus, when he speaks of
"—_that Serbonian bog Betwirt Damiata and Mount Casius old Where armies whole have sunk."
The same Persian army, however, afterwards took Pelusium, Bubastis, and other cities of the Deltah The base of the Deltaic triangle of Aegypt was reckoned by Herodotus (ii. 6) from the bay of Plinthine to the lake of Serbonis.
[W. B. D.]
Silenu'sae I'NsUlaE. [Minervae Promontoriva ].

SIRICAE, 2 place in Cappadocia on the road from Comana to Melitene, and 24 miles NTV. of the first. (Itin. Ant. pp. 210, 211.) According to Lapie, near the Benbodagh.
[T. H.D.]
SIRIO, in Gallia, is placed by the Itins. on a road from Burdigala (Bordeaux) to Aginnum (Agen). The distance is probably corrupt in the Table, which places Sirio x. from Bordeaux; for the true distance is xv . or xvi. Gallic leagues. D'Anville fixes Sirio (the Pont de Siron) near the point where the small river Siron or Ciron joins the Garonne on the left bank.
[G. L.]
SIRIS (Eipls: Eth. Eiplins, but also Eipivos; Sirites), an ancient city of Magna Graecia, situated at the mouth of the river of the same name flowing into the Tarentine gulf, and now called the Sinno. There is no doubt that Siris was a Greek colony, and that at one time it attaived to a great amount of wealth and prosperity; but its history is extremely obscure and unceriain. Its first origin was generally ascribed to a Trojan colony; and, as a proof of this.
an ancient statue of Minerva was shown there which claimed to be the true Trojan Palladium (Strab. vi. p. 264 ; Lycophr. Alex. 978 -985). Whatever may have been the origin of this legend, there seems no doubt that Siris was originally a city of the Chones, the native Oenotrian inhabitants of this part of Italy (Strab. l. c.). A legend found in the Etymologicon (s. v. Sipts), according to which the city derived its name from a daughter of Morges, king of the Siculi, evidently points in the same direction, as the Morgetes also were an Oenotrian tribe. From these first settlers is was wrested, as we are told, by a body of Ionian colonists from Colophon, who had Hed from their native city to avoid the dominion of the Lydians. (Strab. l.c.; Athenae. xii. p. 523.) The period of this emigration is very uncertain; but it appears probable that it must have taken place not long after the capture of the city by Gyges, king of Lydia, about 700-690 в.c. Archiluchus, writing about $660 \mathrm{ec} . \mathrm{c}$. , alludes to the fertility and beauty of the district on the banks of the Siris; and though the fragment preserved to us by Athenaeus does not expressly notice the existence of the city of that name, yet it would appear from the expressions of Athenaeus that the poet certainly did mention it ; and the fact of this colony having been so lately established there was doubtless the cause of his allusion to it (Archil. ap. A then xii. p. 523). On the other hand, it seems clear from the account of the settlement at Metapontum (Strab. vi. p. 265), that the territory of Siris was at that time still unoccupied by any Greek colony. We may therefore probably place the date of the Ionian settlement at Siris between 690 and 660 B. c. We are told that the Ionic colonists gave to the city the uame of Polieum (Пo入íciov, Strab. vi. p. 264 ; Steph. B. s. v. Eipıs); but the appellation of Siris, which it derived from the river, and which seems to have been often given to the whole district (in इipts, used as equiralent to $\dot{\eta}$ इipitis), evidently prevailed. and is the only one met with in common use. Of the history of Siris we know literally nothing, except the general fact of its prosperity, and that its citizens indulged in habits of luxury and effeminacy that rivalled those of their neighbours the Sybarites. (Athen. xii. p. 523.) It may be received as an additional proof of their opulence, that Damasus, a citizen of Siris, is noticed by Herodotus among the suitors for the daughter of Cleisthenes of Sicyon, atout $580-560$ B. c., on which occation Siris and Sybaris among the cities of Italy alone furnished claimants. (Herod. vi. 127.) This was probably about the period that Siris was at the height of its prosperity. But an Ionian city, existing as it did in the midst of the powerful Achaean colonies, must naturally have been an object of jealonsy to its neighbours; and hence we are told that the Metapontines, Sybarites, and Crotoniats formed a league against Siris; and the war that ensued ended in the capture of the city, which appears to have been followed by the expulsion of the inhabitants (Justin. xx. 2). The date of the destruction of Siris cannot be fixed with any approach to certainty: it was probably after 5.50 в. C., and certainly preceded the fall of its rival Sybaris in B. c. 510. Its ruin appears to have been complete, for we meet with no subsequent mention of the city, and the territory is spuken of as open to colonisation at the time of the Yersian War, b. c. 480 . (Herod. viii. 62.)

Upon that occasion we learn incidentally that the Athenians considered themselves as having a claim of old standing to the vacant district of the Sirites,
and even at one tin $\mathbf{e}$ thought of removing thither with their wives and families. (Herod. l. c.) The origin of this clain is unknown; but it seems pretty clear that it was taken up by the Athenian colonists who established themselves at Thurii in в. c. 443, and became the occasion of hostilities between them and the Tarentines. These were at length terminated by a compromise, and it was agreed to found in common a fresh colony in the disputed territory. This appears to have been at first established on the site of the ancient city, but was soon after transferred to a spot 3 miles distant, where the new colony received the name of Heracleia, and soon rose to be a flourishing city. (Strab. vi. p. 264 ; Diod. xii. 36.) [Heraclein.] According to Strabo, Siris still contimued to exist as the port or naval station of Heracleia; but no other mention of it is found, and it is not clear whether Strabo himself meant to speak of it as still subsisting in his day. No remains of it are extant, and the exact site does not appear to have been determined. But it may be placed on the left hank of the river Siris (now called the Sinno), at or near its mouth; a position which well accords with the distance of 24 stadia ( 3 miles) from Heracleia, the remains of which are visible at Policoro, near the river Agri, the ancient Aciris. [Heracleia.]
The river Siris is mentioned by Lycophron (Alex. 982), as well as by Archiluchus in a passage already cited (ap. Athen. xii. p. 523); but the former author calls it Eivis, and its modern naine of Sinno would seem to be derived from an ancient period; for we find mention in the Tabula of a station 4 miles from Heracleia, the name of which is written Semnum, probably a corraption for Ad Simnum or Sinnum. The Siris and Aciris are mentioned in conjunction by Pliny as well as by Strabo, and are two of the most considerable streams in Lucania. (Plin. iii. 11. s. 15; Strab. vi. p. 264.) The name of the former river is noticed also in connection with the first great battle between Pyrrhus and the Romans, B. c. 280, which was fought upon its banks (Plut. Pyrrh. 16). It has been absurdly confounded by Florus and Orosius with the Liris in Campania. (Flor. i. 18. § 7 ; Oros. iv. 1.)

The fertile district of the Siritis ( $\dot{\eta}$ Eipitis or Eetpitis) is a portion of the level tract or strip of plain which borders the gulf of Tarentum from the neighbourhood of Rocca Imperiale to the mouth of the Bradano. This plain stretches inland from the mouth of the Sinno to the foot of the hill on which stands the modern city of Tursi, about 8 miles from the sea. It is a tract of extraordinary natural fertility, but is now greatly neglected, and, in common with all this coast, desolated by malaria. [E. H. B.]

SIRIS, SIRAE, SERRHAE (Eipis, Herod. viii.
 ミıротаioveis, Herod. v. 15; Steph. B.: Serrés), a town of Macedonia, standing in the widest part of the great Strymonic plain on the last slopes of the range of mountains which bound it to the NE. Xerxes left a part of his sick here, when retreating to the Hellespont (Herod. l. c.): and P. Aemilius Paulus, after his victory at Pydna, received at this town, which is ascribed to Odomantice, a deputation from Perseus, who had retired to Samothrace. (Liv. l. c.) Little is known of Serrhae, which was the usual form of the name in the 5th century (though from two inscriptions found at Serrés it appears that Sirrha, or Sirrhae, was the more ancient orthography, and that which obtained at least until the division of the empire), untul the great spread of
the Serrian kingdom. Stephen Dushan in the 14th century seized on this large and flourishing city, and assumed the imperial crown bere, where he estublished a court on the Romau or Byzantine model, with the title of Emperor of Romania, Sclavonia, and Albania. (Niceph. Greg. p. 467.) After his death a partition of his dominions took place but the Greeks have never since been able to recover their former preponderance in the provinces of the Strymonic valley. Sultan Murad took this town from the Servians, and when Sigismund, king of Hungary, was about to invade the Ottoman dominions, Bayezid (Bajazet Ilderim) summoned the Christian princes who were his vassals to his camp at Serrhae, previous to his victory at Nicopolis, A. D. 1396. (J. von Hammer, Gesch. des Osman Reiches, vol. i. pp. 193, 246, 600.)

Besides the Macedonian inscriptions of the Roman empire found by Leake (Inscr. 126) and Cousinéry, the only other vestige of the ancient town is a piece of Hellenic wall faced with large quadrangular blocks, but composed within of small stones and mortar forming a mass of extreme solidity. Servian remains are more common. (Leake, Northern Greece, vol. iii. pp. 200-210.)
[E. B. J.]
SI'RMIO (Sermione), a narrow neck or tongue of land, projecting out into the Lake Benacus (Lago di Garda), from its southern shore. Though a conspicuous and pictureaque object in all views of the lake from its southern shores, it is unnoticed by any of the geographers, and its name would probably have been unknown to us, but for the circumstance that Catullus, who was a native of the neighbouring Verona, had a villa on its shores, and has sung the praises of Sirmio in one of the most charming odes in the Latin language (Catull. xxxi.). The name of Sirmio is, however, found in the ltineraries, which place a "Sermione mansio" on the road from Brixia to Verons, and just midway between the two cities, 22 M. P. from each (Itin Ant. p. 127). This must, however, have been situated at the entrance of the peninsula, probably where a road turned off to it, as it is clear that the highroad could never have turned aside to the promontory itself.

Extensive substructions and other remains of an ancient villa are still visible at the extremity of the promontory, where it juts out into the lake: but these undoubtedly belong to an abode on a mnch more magnificent scale than the villa of Catullus, and probably belong to some villa of the imperial times, which had replaced the humbler dwelling of the poet.
[E.H.B.]
SI'RMIUM (Eipuioy), an important city in the south-eastern part of Lower Pannonia, was an ancient Celtic place of the Taurisci, on the left bank of the Savus, a little below the point where this river is joined by the Bacuntius (Plin. iii. 28.) Zosimus (ii. 18) is mistaken when he asserts that Sirmium was surrounded on two sides by a tributary of the lster. The town was situated in a most favourable position, where several roads met (It. Ant. pp. 124, 131 ; It Hieros. p. 563), and during the wars against the Dacians and other Danubian tribes, it became the chief depôt of all military stores, and gradually rose to the rank of the chief city in Pannonia. (Herodian, vii. 2.) Whether it was ever made a Roman colony is not quite certain, though an inscription is said to exist containing the words Dec. Colon. Sirmiens. It contained a large manufactory of arms, a spacious forum, an imperial palace, and other public build-
ings, and was the residence of the admiral of the first Flavian fleet on the Danube. (Amm. Marc. xvii. 13, xix. 11; Natit. Imp.) The emperar Probus was born at Sirmium. (Vopisc. Prob. 8, 21; comp. Strab. ii. p. 134; Ptol. ii. 16. §8, viii. 7. § 6; Steph. B. 2. v.; Eutrop ix. 17; Aethicua, p. 715, ed. Gronov.; Geog. Rav. iv. 19.) The city is mentioned for the last time by Procopios (B. Goth iii. 33, 34), as being in the hands of the Arari, but when and how it perished are questions which history does not answer. Extensive ruins of it aro still found about the modern town of Mitrovits. (Siee Orelli, Inecript n. 3617; Marsili, Danubiene, p. 246, foll.)

SIRNIDES, a group of sinall islands off the promontory Sammonium in Crote. (Plin. iv. 12. a 20.)

SIROC (ZLpow), a town of Parthyene, noticed by Isidorus. (Stath. Parth. c. 12, ed. Müller.) It is not clear whether there is any corresponding modern town; but Rennell thinks it is represented by the present Seralihe. (Geog. Herod. p. 297.) Ptolemy places a district which he calls Siracene among the Astabeni, a people who occupied part of Hyrcania (vi. 9. § 5). It is not impossible that Siroc and Siracene may be thus connected.
[V.]
SISAPON (之uбanáv, Strab. iii. p. 142), a considerable town in Hispania Baetica. (Cic. Phil ii. 19; Plin. iii. 1. s. 3.) It lay N. of Corduba, between the Baetis and the Anas, and was celebratel for its silver mines and veins of cinnabar (Strab. l. c.: Vitrup. vii. 9; Plin. xxxiii. 7. s. 40; Diowcor. v. 109.) The town of $A$ lmadew in the Sierra Horena, with which Sisapon is identified, still possessees a rich mine of quicksilver. "The mine is apparently inexhaustible, becoming richer in proportion as the shafts deepen. The vein of cinnabar, aboat 25 feet thick, traverses rocks of quarts and slate; and runs towards Almadencjos. Virgin quicksilver occurs also in pyrites and bornstein." "Between 20,000 and 25,000 quintals of mercary are now procured annually." (Ford, Hasalbook of Spain, p. 70 ; comp. Laborde, Itin. ii. p. 133; Dillon's Travele, ii. pp. 72, 77.) The name of this town is variously written It appears on coins as "Sisipo" (Sestini, p. 87), whilst others have the correct name. (Florez, Med iii. p. 119 ; Mionnet, i. p. 25, and Supp. i. p. 114.) The form "Sisalone" (Itim Asf. (p. 444) is probably corrupt. It appears to be the same town called Zucarán力 by Ptolemy (ii. 6. § 59), who, however, places it in the territory of the Oretani, in Hispania Tarraconensis, an which indeed it borders.
[T. H. D.]
SISAR [UsAR.]
SISARA ( $\sum 1 \sigma d \rho a$, Ptol.iv. $8 . \S$ 17), a lake in Africa Propria, in the neighbourhood of Hippo Diarrhytus. Now Benizert or Bizerta. [T. H. D.]

SISARACA (Eıбdpana, Ptol. ii. 6. \& 52), a town of the Murbogi or Turmodigi in Hispania Tarraconensis. For coins, Seestini, p. 197. [T.H.D.]
 ii. 19, de Aedif. ii. 4), a fortress of Mesopotamia, above Dara, noticed by Procopins, It is not elsowhere mentioned.
[V.]
 Zevé $\sigma \tau a$, $\Sigma \in \gamma \in \sigma T u \kappa f)$, a great town in the south of Upper Pannonia, on the southern bank of the Sarus, on an island formed by that river and two others, the Colapis and Odra, a canal dug by Tiberine completing the island. (Dion Cass, xlix. 37.) It was situated on the great road from Almona to Sirmium.

STTACE.
SITONES.
(It. Ant. pp. 259, 260, 265, 266. 272, 274 ; Plin. iii. 28.) According to Pliny the name Segestica belonged only to the island, and the town was called Siscia; while Strabo (vii. p. 314) says that Siscia was a fort in the neighbourhood of Segestica; but if this was so, it mast be supposed that subsequently the fort and town became anited as one place. (Comp. Strab. iv. p. 202, v. p. 214, vii. p. 218 ; Appian, Illyr. 16, 23. \&c.) Siscia was from the first a strongly fortitied town; and after its capture by Tiberius, in the reign of Augustus (Appian, Dion Cass., ll. cc.; Vell. Pat. ii. 113), it became one of the most important places of Pannonia; for being situated on two navigable rivers, it not only carried on considerable commerce (Strab. v. pp. 207, 214), but became the central point from which Augustus and Tiberius carried on their undertakings against the Pannonians and Illyrians. Tiberius did much to enlarge and embellish the town, which as early as that time seems to have been made a colonia, for Pliny mentions it as such: in the time of Septimius Severus it received fresh colonists, whence in inscriptions it is called Col. Septimia Siscia. The town contained an imperial mint, and the treasury for what was at a later time called the province Savia; at the same time it was the station of the small fleet kept on the Savus. Siscia maintuined its importance until Sirmium began to rise, for in proportion as Sirmium rose, Siscia sank and declined. (Comp. Zosim. ii. 48; Orelli, Inscript. n. 504, 505, 2703, 3075, 3346, 4993.) The modern town of Siseck, occupying the place of the ancient Siscia, contains many interesting remains of antiquity. (Marsili, Damubius, p. 47; Schönwisner, Antiq. Sabariae, P. 52, foll.; Muchar, Norikum, i. p. 159.)
[L. S.]
SITACE ( Eirdkry), a large town, first noticed by $^{2}$ Xenophon (Anab. ii. 4. § 13), situated about 8 parasangs from the Median Wall, and 15 from the Tigris and the mouth of the Physcus. The exact situation cannot be now determined, but several travellers have noticed, in this neighbourhood, extensive ancient remains, which may perbaps belong to this city. (Mannert, v. pt. ii. p. 281; Niebuhr, ii. p. 305; Ives, Travels, foc. p. 133.)
[V.]
SITACUS (Eiraxós, Arrian, Ind. c. 38), 2 river of Persis, to which Nearchus came in his celebrated coasting voyage. It is in all probability the same as that called by Pliny Sitiogagus (vi. 23. s. 26); although his statement that, from its mouth, an ascent could be made to Pasargada in 7 days, is manifestly erroneous. There is no reason to doubt that it is at present represented by a stream called Sita-Rhegidn. (Vincent, Voy. of Nearchus, i. p. 385 ; D'Anville, Mém de l'Acad xxx. p. 158; Ritter, Erdkunde, vii. p. 763.)

SITHƯNIA ( $\Sigma_{1}, \theta_{0}$ vin, Herod. vii. 123; Steph. B.; Virg. Bucol. x. 66 ; Hor. Carm. i. 18. 9: Longos), the central of the three prongs which ran out into the Aegean from the great peninsula of Chalcidice, forming a prolongation to the peak called Solomón or Kholomón. The Sithonian peninsula, which, though not so hilly as that of Acte, is not so inviting as Pallene, was the first, it appears, to be occupied by the Chalcidic colonists. A list of its towns is given in Cralcidices. [E. B. J.]

SITIA, a place in Hispania Baetica (Plin. iii. 1. 8. 3.)

SITIPI (Zituфt, Ptol.iv. 2. § 34), a town in the interior of Mauretania Caesariensis, situated in an extensive plain not far from the borders of

Numidia, and on the road from Carthage to Cirta (Itin. Anh. pp. 24, 29, 31, \&cc.; comp. Amm. Marc. xxviii. 6.) At first, under the Numidian kings, it was but an unimportant place: but under the Roman dominion it became the frontier town of the new province of Numidia, was greatly enlarged and elevated to be a colony; so that on the subsequent division of Nauretania Caesar. into two smaller provinces it became the capital of Mauretania Sitifensis. Under the dominion of the Vandals, it was the capital of the district Zabé. (Zá6ך, Procop. B. rand. ii. 20.) It is still called Setif, and lies upon an eminence in a delightful neighbourhood. Some ruins of the ancient town are still to be seen. (Shav's Travels, p. 49.)
[T. H. D.]
SITILLIA, in Gallia, is placed by the Table on a road from Aquae Bormonis (Bourbon [Archambauld) to Pocrinium, supposed to be Perrigmi. Sitillia is xvi. from Aquae Bormonis and xiiii. from Pocrinium Sitillia is probably a place named Tich (D'Anville Notice, $\boldsymbol{q}^{c} \mathrm{c}$.)
[G. L.]
SITIOGAGUS. [Sitacus.]
SITOMAGUS, a town of the Jceni or Simeni, in the E. part of Britannia Romana. (Itin. Ant. p. 480.) Camden (p. 456) identifies it with Thetford in Norfolk, whilst others seek it at Stormarket, Southwold, and Saxmundham. In the Tab. Peut it is erronoously written "Sinomachus."
[T. H. D.]
SITONES, a population conterminous with the Suiones, from whom they differ only in being governed by a female: "in tantum non modo a libertate sed etian a servitute degenerant. Hic Suevise finis." (Tac. Germ. 45.) The Sitonian locality is some part of Finlund; probably the northarn half of the coast of the Gulf of Bothnia.

The statement that they were under a fomale rule is explained as follows. The name by which the East Bothnian Finlanders designate themselves is Kainu-laiset (in the singular Kainu-lainen). The Swedes call them Quaens (Kuoains). The mediseral name for their country is Cajan-ia. Now quinna in the Norse language $=$ woman, being our words queen aud quean; and in the same Norse tongue the land of the Quaens would be Cvena-land; as it actually is, being Cwaen-land (Queen-land) in AngloSaxon. Hence the statement of Tacitus arises out of information concerning a certain Cwaen-land, erroneously considered to be a terra feminarum, instead of a terra Quaenorum. The reader who thinks this fanciful should be informed that in Adam of Bremen, writing in the 12th centary, when the same country comes under notice, the same confusion appears, and that in a stronger form. The Sitonian country is actually terra feminarum. More than this, the feminue become Amazons: "circa haec litora Baltici maris ferunt esse Amasonas, quod nunc terra feminarum dicitur, quas equae gusta aliqui dicunt concipere. .... Hae simnl viventes, spernunt consortia virorum, quos etiam, si advenerint, a se viriliter repellunt," c. 228. (Zeuss, Lis Deutschen, foc., s. v. Kwenen.)

It is worth noticing that King Alfred's locality of the Cwenas is, in respect to their relations to the Svias, exactly that of Tacitus,-Cvena-land succeeding Soea-land.

The Sitones seem to have been the ancient repreo sentatives of the Finns of Finland, - the Fenni of the ancients being the Laps. This is not only what the words Sitones and Quaen suggest, but the inference from the word Fenni also. To the Finlander, Fin is a atrange name. The Siwede calls him Qwaen;
he calls bimself Suoma-lainen or Hamelainen. On the other hand, it is the Lap of Finmark that is called a Fin, and it is the Norwegian who calls him so. [Fenni.]
[K. G. L.]
SITTACE ( 之ırтákๆ, Ptol. vi. 1. § 6), a town of ancient Assyria, at the southern end of this province, on the road between Artemita and Susa. (Strab. xvi. p. 744.) It is called Sitta ( $\Sigma(\tau \tau \pi a)$ by Diodurus (xvii. 110). It was the capital of the district of Sittacene, which appears to have been called in later times Apolloniatis (Strab. xi. p. 524), and which adjoined the province of Susis (xv. p. 732). Pliny, who gives the district of Sittacene a more northerly direction, states that it bore also the names of Arbelitis and Palaestine (vi. 27. s. 31). It is probably the same country which Curtius calls Satrapene (v. 2).
[V.]

## Sittace'ne. [Sittace.]

SITTOCATIS (Eirtokatis, Arrian, Ind. c. 4), a navigable river, which, according to Arrian, flowed intu the Ganges. It has been conjectured by Mannert that it is the same as the present Sind, a tributary of the Jumna, near Rampur (v. pt. i. p. 69).
[V.]
SIUPH (ELol $\phi$. Herod. ii. 172), a town of the Sailic nome in the Delta of Egypt. It does not appear to be mentioned by any other writer besides Herodotus.
['T. H. D.]
SIVA ( ziova), a town in the prefecture of Cilicia in Cappaducia, on the road from Mazaca to Tavium, at a distance of 22 miles from Mazaca. (Ptol. v. 6. § 15; Tab. Pent.)
 iv. 5. § 15), was a portion of the chain of hills which rans along the western coast of the Red Sea from the Heroopolite gulf to the straits of Bab-el-Mandeb. Between lat. $24^{\circ}$ and $25^{\circ}$ in this range is the Mount Smaragdus, the modern Djebel Zabareh, which derived its name from the emeralds found there, and early attracted by its wealth the Aegyptians into that barren region. The principal mine was at Ijebel-Zabareh; but at Bender-el-Sogheir to N., and at Sekket to S., each a portion of Mount Smaragdus, there are traces of ancient mining operations. Sinall emeralds of an inferior quality are still found in this district. (Mannert, Geograph. vol. x. p. 21.) Strabo (xvii. p. 815) and Pliny ( $x \times x$ vii. 15. s. 16) mention the wealth obtained from these mines. At Sekket there is a temple of the Pulemaic era; but the mines were known and wrought at least as early as the reign of Amunoph IIL., in the 18th dynasty of the native kings of Aecypt.
[IV. B. D.]
Silifind. [Laconia, p. 114, b.]
SMILA. [Chossara.]
SMYRNA ( $\Sigma \mu u ́ p \nu a$ : Eth. $\sum \mu \nu p \nu a i o s$, Smyrnaeus: Smyrna or Izmir), one of the most celebrated and most flourishing cities in Asia Minor, was situated on the east of the month of the Hermus, and on the bay which received from the city the name of the Sinyrnaeus Sinus. It is said to have been a very ancient town founded by an Amazon of the name of Smyrna, who had previmasly conquered Ephesus. In consequence of this Smyrna was regarded as a colony of Ephesus. The Ephenian colonists are said afterwards to have been expelled by Aeolians, who then occupied the place, until, aided by the Colophonians, the Ephesian colonists were euabled to re-establish themselves at Smyrna. (Strab. xir. p. 633; Steph. R. s. v.; Plin. v. 31.) Herodotns, on the other hand (i. 150), states that Smgrna originally belonged to
the Aeolians, who admitted into their city some Colophonian exiles; and that these Colophonians afterwards, during a festival which was celebrated outside the town, made themselves masters of the place. From that time Smyrna ceased to be an Aeolian city, and was received into the Ionian confederacy (Comp. Paus. vii. 5. § 1.) So far then as we are guided by authentic history, Smyrna belonged to the Aeolian confederacy until the year B. c. 688, when by an act of treachery on the part of the Colophonians it fell into the hands of the Ionians, and became the 13 th city in the Ionian League. (Herod. l. c.; Paus. l. c.) The city was attacked by the Lydian king Gyges, but successfully resisted the aggressor (Herod. i. 14; Paus. ix. 29. § 2.) Alyattes, however, about b. c. 627, was more successful; he took and destroyed the city, and henceforth, for a period of 400 years, it was deserted and in ruins (Herod. i. 16; Strab. xiv. p. 646), though some inhabitants lingered in the place, living $\kappa \omega \mu \eta \delta \delta \nu$, as is stated by Strabo, and as we must infer from the fact that Scylax (p. 37) speaks of Sinyrna as still existing. Alexander the Great is said to hare forned the design of rebuilding the city (Paus. vii. 5. § 1); but he did not live to carry this plan into effect; it was, however, undertaken by Antigonus, and finally completed by Lysimachus. The new city was not built on the site of the ancient one, but at a distance of 20 stadia to the south of it, on the southern coast of the bay, and partly on the side of a hill which Pliny calls Mastusia, but principally in the plain at the foot of it extending to the sea. After its extension and embellishment by Lysimachus, new Smyrna became one of the most magnificent cities, and certainly the finest in all Asia Minor. The streets were handsome, well paved, and drawn at right angles, and the city contained several squares, porticues, a public library, and numerous temples and other public buildings; but one great drawback was that it had no drains. (Strab. l. c.; Marm. Oxon. n. 5.) It also poosessed an excellent harbour which could be closed, and continued to be one of the wealthiest and mosit flourishing commercial cities of Asia ; it afterwards became the seat of a conventus juridicus which embraced the greater part of Aeolis as far as Magnesia, at the foot of Mount Sipylus. (Cic. p. Flacc. 30; Plin. v. 31.) During the war between the Romans and Mithridates, Simyma remained faithful to the former, for which it was rewarded with various grants and privileges. (Liv. xuxv. 42, xxxvii. 16, 54, xxxviii. 39.) But it afterwards suffered much, when Trebonius, one of Cacnar's murderers, was besieged there by Dolabella, who in the end took the city, and put Trebonius to death. (Strab. l. c.; Cic. Phil. xi. 2; Liv. Epit. 119; Dion Cass. xlvii. 29.) In the reign of Tiberius, Smyrna had conferred upon it the equivocal honour of being allowed, in preference to several other Asiatic citics, to erect a temple to the emperor (Tac. Ans. iii. 63, iv. 56). During the years A. D. 178 and 180 Smyrna suffered much from earthquakes, but the emperor M. Aurelius did much to alleviate its sufferings (Dion Cass. lxxi. 32.) It is well known that simyrna was one of the places claiming to be the bi thplace of Homer, and the Smyrnaeans themselves were so strongly convinced of their right to claim this honour, that they erected a temple to the great bard, or a ' $O \mu$ hipetov, a splendid edifice containing a statue of Homer (Strab. L.c.; Cic. p. Arch. 8): they oven showed a cave in the neigh-
bonrhood of their city，on the little river Meles， wbere the poet was said to have composed his works． Smyrna was at all times not only a great commercial place，but its schools of rhetoric and philosophy also were in great repute．The Christian Church also flourished through the zeal and care of its first bishop Polycarp，who is said to have been put to death in the stadium of Smyrna in A．D． 166 （Iren． iii．p．176）．Under the Byzantine emperors the city experienced great vicissitudes：having been occupied by Tzachas，a Turkish chief，about the close of the 11 th century，it was nearly destroyed by a Greek fleet，commanded by John Ducas．It was restored， huwever，by the emperor Comnenus，but again sub－ jected to severe sufferings during the siege of Ta－ merlane．Not long after it fell into the hands of the Turks，who have retained possession of it ever since．It is now the great mart of the Levant trade．Of Old Smyrna only a few remains now exist on the north－eastern side of the bay of Smyrna； the walls of the acropolis are in the ancient Cyclopean style．The ancient remains of New Smyrna are more numerous，especially of its walls which are of a solid and massive construction；of the stadium between the western gate and the sea，which，how－ ever，is stripped of its marble seats and decorations； and of the theatre on the side of a hill fronting the bay．These and other remains of ancient buildings have been destroyed by the Turks in order to obtain the materials for other buildings；but numerous remains of ancient art have been dug out of the ground at Smyrna．（Chandler＇s Travels in Asia，pp．76，87； Prokesch，Denkvourdigkeiten，i．p．515，foll．；Ha－ milton，Researches，i．p． 46 p foll．；Sir C．Fellows， Asia Minor，p．10，foll．）
［L．S．］

## COIN OF SMYRNA．

SMYRNAEUS SINUS（ $\sum_{\mu \nu \rho \nu a i ́ \omega \nu ~ к o ́ \lambda \pi o s), ~ a l s o ~}^{\text {人 }}$ called the bay of Hermus（＂Eputios кó入tos），from the river Hermus，which flows into it，or the bay of Meles（Me入⿱㇒冋刂tov к．），from the little river Meles，is the bay at the head of which Smyrna is situated． From its entrance to the head it is 350 stadia in length，but is divided into a larger and a smaller basin，which have been formed by the deposits of the Hermus，which have at the same time much nar－ rowed the whole bay．A person sailing into it had on his right the promontory of Celaenae，and on his left the headland of Phocaea；the central part of the bay contained numerous small islands．（Strab． xiv．p．645；Pomp．Mela，i．17；Vit．Hom．2； Steph．B．s．v． $\mathbf{\Sigma} \mu \hat{v}^{\prime} \rho \boldsymbol{v a}$ a．）
［L．S．］
SOANAS（Eodvas，Ptol．vii．4．§ 3），a small river of Taprobane（Ceylon），which flowed into the sea on the western side of the island．Lassen（in his map）calls it the Kilau．On its banks lived a people of the same name，the Soani．（Ptol．vii． 4．§ 9．）
［V．］
SOANDA or SOANDUM（Éóavסa or इ Zóa $\nu \delta o \nu$ ）， a castle of Cappadocia，between Therma and Sacoena．（Strab．xiv．p．663；It．Ant．p．202．）The
same place seems to be alluded to by Frontinus（iii． 2．§ 9），who calls it Suenda．Hamilton（Researches， ii．p． 286 ，foll．）identifies it with Ssoghanli Dere，a place situated on a rock，about 8 miles on the south－west of Karahissar，but other geopraphers place it in a different locality．
［L．S．］
SOAS．［Sonus．］
SOATRA（之óarpa），or probably more correctly Savatra（ Kav́atpa），as the name appears on coins， was an open town in Lycaonia，in the neighbour－ hood of Apameia Cibotus，on the road from thence to Laodiceia The place was badly provided with water（Strab．xiv．p． 668 ；Ptol．v．4．§ 12 ；Hierocl． p． $672 ; T a b$. Peut．），whence traveliers are inclined to identify its site with the place now called Su Ver－ mess，that is，＂there is no water here．＂［L．S．］

SOATRAE，a town in Lower Moesia（Itin．Ant． p．229），variously identified with Pravadi and Kiopikeni．In the Tab．Peut．and by the Geogr． Rav．（iv．6）it is called Scatrae［T．H．D．］
 eastern coast of Hindostan，mentioned in the Peri－ plus（p．34）．It is probably the same as the modern Sabras，between Pondicherry and Madras．（See Lassen＇s map．）
［V．］
SOCANAA or SOCANDA（इ $\omega \kappa \alpha \nu \alpha a_{a}$ or $\sum \omega \kappa \alpha{ }^{2} \nu-$ סa），a small river of Hyrcania，noticed by Ptolemy （vi．9．§ 2）．It is probably the present Gurgan．Am－ mianus Marcellinus speaks of a place called Socun－ da ，on the shores of the Hyrcanian or Caspian sea （xxiii．6）．
［V．］
 island of the Sinus Arabicus（Red Sea），placed by Ptolemy（vi．7．§44），who alone mentions it，in long． $70^{\circ}$ ，lat． $16^{\circ} 40^{\prime}$ ，and therefore off the N ．coast of his Elisari，the Sabaei of other geographers， $30^{\prime}$ east of his Accipitrum Insula（＇Iєра́кшע）and $2^{\circ} 20^{\prime}$ south of them．They are probably identical with the Farsan islands，of the E．I．Company＇s Chart，described by commanders Moresby and Elwon， in their Sailing Directions for the Red Sea，as＂the largest all along this coast，situated upon the ex－ tensive banks west of Gheesan．They are two in number，but may be considered as forming one island，being connected by a sandy spit of shoal－ water，across which camels frequently pass from one to the other．＂The westernmost is Farsan Kebeer（ $=$ the greater）， 31 miles in length，extend－ ing from lat． $16^{\circ} 35^{\prime}$ long． $42^{\circ} 13^{\prime}$ to lat． $16^{\circ} 54^{\prime}$ long． $41^{\circ} 47^{\prime}$ ．Farsan Seggeer（ $=$ the smaller）is，on its NE．side， 18 miles in length，and extends to lat． $17^{\circ} 1 \frac{1^{\prime}}{2}$ ：their whole breath is only 12 miles．The land is of considerable height，interspersed with some plains and valleys：the hilly parts are coral rock（pp． 38， 39 ；C．Müller，Tabulae in Geog．Graec．Min．tab． viii）．In other comparative atlases，adopted by Arrowsmith，the modern name is given as Kotumbul， 1s．，considerably to the N．of the Farsan，described by the same writers as lying only 2 miles from the main，a small island about $\frac{1}{2}$ a mile in length and therefore not likely to have been noticed by Ptolemy， who obviously mentions only the more important． （Sailing Directions，p．50．）Mannert identifies the Socratis Insula with Niebuhr＇s Firan，where the traveller says the inhabitants of Loheia have a pearl fishery．This name does not occur in the＂Sailing Directions，＂but is probably the same as Farsan． （Mannert，Geographie von Arabien，p．49；Niebuhr， Description de l＇Arabie，p．201．）
［G．W．］
SOCUNDA．［Socanal．］

s. v.; Sodoma, -orum, Tertul. Apolog. 40; Sodoma, -20, Sever. Sulp. i. 6 ; Sedul. Carm. i. 105; Sudomum, Solin. 45. § 8; Sudomi, Tertull. Carm. de Sodom. 4), the infamous city of Canaan situated near the Dead Sea in an exceedingly rich and fruitful country, called in its early history "the plain of Jordan" and described as "well watered everywhere. before the Lord destroyed Sodom and Gomorrah, even as the garden of the Lord, like the land of Egypt, as thou comest to Zoar." (Gen. xiii. 10-12.) It is also reckoned one of "the cities of the plain" (xiii. 12. xix. 29), and wus probably the capital of the Pentapolis, which consisted of Sodom, Gomorrah, Admah, Zeboiim, and Bela, afterwards Zoar (Deus. xxix. 23; Gen. xiv. 8, xix. 22), all of which towns, however, had their several petty kings, who were confederate together against Chedorlaomer king of Elain and his three allies, Amraphel king of Shinar, Arioch king of Ellasar, and Tidal king of nations. After Chedorlaomer had succeedod in reducing these sovereigns to suljection, they served him twelve years; in the thirteenth jear they revolted, and in the fourteenth year were again vanquished by their northern enemies, when the conquerors were in their turn defeated by Abraham, whose nephew Lot had been carried captive with all his property. The sacred historian has preserved the names of four of the petty kings who at this time ruled the cities of the plain, viz. Bera of Sodom, Birsha of Gomorrah, Shinab of Admah, and Shemeber of Zeboiim; and the scene of the engagement was "the vale of Siddiin, which is the salt seen (Gen. xiv.), an expression which seems clearly to imply that the battle-field, at least, was subsequently submerged; the admission of which fact, however, would not involve the consequence that nolake had previously existed in the plain; although this too may be probably inferred from the earlier passage already cited, which seems to describe a wide plain watered by the river Jordan, as the plain of Egypt is irrigated by the Nile: and as this vale of Siddion was full of slime-pits (beds of bitumen), its subsidence naturally formed the Asphalt Lake. The catastrophe of the cities, as deacribed in the sacred narrative, does not certainly convey the idea that they were submerged, for fire and not water was the instrument of their destruction (Gen. xix.; S. Jude 7); so that the cities need not necessarily have been situated in the middle of the valley, but on the sloping sides of the hills which confined the plain, from which they would still be appropriately denominated "cities of the plain." (Reland, Pulaestina, p. 255.) This is remarked in order to remove what has been regarded as a fundamental objection to the hypotheses of a late traveller, who claims to have recovered the sites of all the cities of the Pentapolis, which, as he maintains, are still marked by very considerable ruins of former habitations. Whatever value may be attached to the identification of the other four, there is little doubt that the site of Sodom is correctly fixed near the south-western extremity of the lake, where the modern native name Usdom or Esdom, containing all the radicals of the ancient name, is attached to a plain and a hill (otherwise called Khashm or Jebel el-Milhh, i. e. the salt hill), which consequently has long been regarded as marking the site of that sccursed city. This singular ridge has been several times explored and described by modern travellers, whose testimony is collected and confirmed by Dr. loobinson (Bibl. Res. vol. ii. p. 481-483); but it was reserved for the diligence or imagination of $M$. de

Saulcy to discover the extensive débris of this ancient city, covering the small plain and mounds on the north and north-east of the ealt-ridge, and extending along the bed of Wady Zwroeiral (Voyage autour de la Mer Morta, vol. ii. pp. 7174). On the other side of the question M. Van de Velde is the latest suthority. (Syria and Palestine in 1851 and 1852, pp. 114, 115 , note). Lieut Lynch, of the American exploring expedition, has given a striking view of this salt mountain, illustrstive of his description of the vicinity of Usdom. (Expedition to the Dead Sea, pp. 306-308.) [G.W.]

SODRAE ( $\sum \delta \delta \rho a t$ ), a tribe met with by Alexander the Great in the lower Parjáb, near Pattalene, according to Diodurns (xvii. 102). The name is probably of Indian origin, and may represent the caste of the Sudras.
[V.]
SOGDI ( $\Sigma \delta \gamma^{\circ} \delta 0$ ), one of the smaller tribes noticed by Arrian (Anab. vi. 15) as encountered by Alexander in the lower Panjáb. By their name, they would appear to represent an immigration from the north.
[V.]
SOGDIA'NA ( $\boldsymbol{\eta}$ E Korotart, Strab. ii. p. 73, xi. p. 516 ; Ptol. vi. 12, \&cc.), a widely extending diso trict of Central Asia, the boundaries of which are not consistently laid down by ancient authors. Generally, it may be stated that Sogdiana lay between the Oxus and the Jaxartes, as its N. and 8 . - limits, the former separating it from Bactriana and Ariana, the latter from the nomad populations of Scythia. (Strab. xi. pp. 511, 514 ; Ptol. vi. 12. § 1.) To the W. the province was extended in the direction of the Caspian sea, but, in early times at least, not to it; to the E. were the Sacae and the Seres. The district comprehended the greater part of the present Turkestan, with the kingdom of Bokhara, which bears to this day the name of Songh The character of the country was very dirersitied; some part of it being very mountainous, and soine part, as the valley of Bolchara, very fertile and productive. The larger extent would seem to bave been, as at present, a great waste. (Arrian, Anab. iv. 16; Curt. vii. 10. § 1.) At the time when Alexander visited the country, there appear to have been extensive forests, filled with all manner of game, and surrounded, at least in some parts, with walls, as preserves, Alexander is said to have hanted down 4000 wild beasts. (Curt. viii. 1. § 19.)

The principal mountain chains are those called the Montes Oxii tw the N. (at present the Pamer Mountains,) the Comedaruin Montes (probably the range of the $A k$-tagh or White Movitains) to the S., and the Montes Sogdii (the modern name of which is not certain, there being a doubt whether they comprehend the Belur-tagh as well as the Kara-tagh). The two great rivers of the conntry were those which formed its boundaries; the Oxus (Gihon or Amu-Darja) and the Juxartes (Silon or Syr-Darya). There are, also, besides thene main streams, several smaller ones, feeders of the great rivers, as the Demus, Bascatis, and the Polytimetns, the latter, doubtless, the stream which flows bexide the town of Sogd. The generic name of the inhabitants of Sogdiana is Sogdii or Sogdiani (Arrian, iv. 16, 18; Plin. vi. 16 ; Curt. iii. 2. § 9, \&c.), race who, us is stated by Strabo (xi. p. 517), appear, in character at least, to have bone a great resemblance to their neighbours of Bectriana. Besides these, Ptolemy and other writers have given a list of other names, - those, probably, of local tribes,
who occupied different parts of the province. Many of these show by the form of their name that if not directly of Indian descent, they are clearly connected with that country. Thus we have the Pasicae, near the Montes Oxii ; the Thacori (Takurs) on the Jaxartes; the Oxydrancae, Drybactae, and Gandari (Gandháras), under the mountains; the Mardyeni (Madras), Chorasmii (Khwaresmians), near the Oxus; and the Cirrodes (Kirátas) near the same river. (Wilson, Ariana, p. 164.)

The historians of Alexander's march leave us to suppose that Sogdiana abounded with large towns; but many of these, as Professor Wilson has remarked (l. c.), were probably little more than forts erected along the lines of the great rivers to defend the country from the incursions of the barbarous tribes to its N. and E. Yet these writers must have had good opportunity of estimating the force of these places, as Alexander appears to have been the best part of three years in this and the adjoining province of Bactriana. The principal towns of which the names have been handed down to us, were Cyreschata or Cyropolis, on the Jaxartes (Steph. B. s. v.; Curt. vi. 6) ; Gaza (Ghaz or Ghazna, Ibn Haukíl, p. 270); Alexandreia Ultima (Arrian, iii. 30; Curt. l. c.; Amm. Marc. xxiii. 6), doubtless in the neighbourhood of, if not on the site of the present Khojend; Alexandreia Oxiana (Ptol. vi. 12. § 5; Steph. B. s. v.); Nautaca (Arrian, iii. 28, iv. 18), in the neighbourhood of Karshi or Naksheb; Branchidae (Strab. xi. p. 518), a place traditionally said to have been colonised by a Greek population; and Marginia (Curt. vii. 10.§ 15), probably the present Marghinan. (Droysen, Rhein. Mus. 2 Jahr. p. 86; Mannert, iv. p. 452 ; Burnes, Travels, i. p. 350; Memoirs of Báber, p. 12; De Sacy, Notices et Extraits, iv. p. 354; Thirlwall, Hist. of Greece, vi. p. 284.)

SOGDII MONTES. [Sogdiana.]
SOGIU'NTII, an Alpine people mentioned by Pliny (iii. 20. s. 24). Nothing but resemblance of name gives us any indication of the position of many small mountain tribes, but the names remain frequently very little changed. The position of the Sogiuntii is conjectured to be shown by the name Sauze or Souches, NE. of Briançon in the department of Hautes Alpes. But this is merely a guess; and even the orthography of the name Sogiuntii is not certain.
[G. L.]
SOLE, a small town in the interior of Hyrcania, mentioned by Ammianus (xxiii. 6).
[V.]
SOLEN ( $\sum \omega \lambda \boldsymbol{\eta} \nu$, Ptol. vii. $1 . \S \S 10,34$ ), a small river of $S$. India, which has its sources in M. Bettigo, and flows thence into the Sinus Colchicus or Gulf of Manaar. It is not certain which of two rivers, the Vaiparu or the Tamraparni, represent it at present: Lassen inclines to the latter. [V.]

SOLENTA. [Olynta Insula.]
SOLENTUM. [Solus.]
SOLETUM (Soleto), a town of Calabria, situated in the interior of the Iapygian peninsula, about 12 miles S. of Lupiae (Lecce). It is mentioned only by Pliny, in whose time it was deserted ("Soletum desertum," Plin. iii. 11. s. 16), but it must have been again inhabited, as it still exists under the ancient name. That the modern town occupies the ancient site is proved by the remains of the ancient walls which were still visible in the days of Galateo, and indicated a town of considerable maguitude (Galateo, de Sit. Iapyg.p. 81 ; Romanelli, vol.ii. p.26.) [E.H. B.]

portant town on the coast of Cilicia, between the mouths of the rivers Lamus and Pyramus, from each of which its distance was about 500 stadia. (Strab. xiv. p. 675 ; Stadiasm. Mar. Mag. § 170, \&c.) The town was founded by Argives joined by Lindians from Rhodes. (Strab. xiv. p. 671 ; Pomp. Mela, i. 13; Liv. xxxvii. 56.) It is first mentioned in history by Xenophon (Anab. i. 2. § 24) as a maritime town of Cilicia; it rose to such opulence that Alexander the Great could fine its citizens for their attachment to Persia with 200 talents. (Arrian, Anab. ii. 5. §5; Curt. iii. 17.) During the Mithridatic War the town of Soli was taken and destroyed by Tigranes, king of Armenia, who probably transplanted most of its inhabitants to Tigranocerta. (Dion Cass. xxxvi. 20; Plut. Pomp. 28; Strab. xi. p. 532.) But the place was revived by Pompey, who peopled it with some of those pirates who had fallen into his hands, and changed its name into Pompeiupolis. (Пounๆїoúnoגıs, Plut. l. c.; Strab. xiv. p. 671 ; $\Lambda_{\text {Ppian, Mithr. } 105 \text {; Ptol. v. 8. § 4; Plin. }}^{\text {P }}$ v. 22; Steph. B. 8. v.; Tac. Ann. ii. 58; Hierocl. p. 704.) Soli was the birthplace of Chrysippus the philosopher, and of two distinguished poets, Philemon and Aratus, the latter of whom was believed to be buried on a hill near the town. The Greek inhabitants of Soli are reported to have spoken a very corrupt Greek in consequence of their intercourse with the natives of Cilicia, and hence to have given rise to the term solecism ( $\sigma 0 \lambda o t \kappa \iota \sigma \mu o s^{\prime}$ ), which has found its way into all the languages of Europe; other traditions, however, connect the origin of this term with the town of Soli, in Cyprus. (Diog. Laert. i. $2 . \S 4$; Eustath. ad Dion. Per. 875 ; Suid. s. v. Ediou.) The locality and the remains of this ancient city have been described by Beaufort (Karamania, p. 261, foll.). "The first object that presented itself to us on landing," says he, "was a beautiful harbour or basin, with parallel sides and circular ends ; it is entirely artificial, being formed with surrounding walls or moles, which are 50 feet in thickness and 7 in height. Opposite to the entrance of the harbour a portico rises from the surrounding quay, and opens to a double row of 200 columns, which, crossing the town, communicates with the principal gate towards the country. Of the 200 columns no more than 42 are now standing; the remainder lie on the spot where they fell, intermixed with a vast assemblage of other ruined buildings which were connected with the colonnade. The theatre is almost entirely destroyed. The city walls, strengthened by numerous towers, entirely surrounded the town. Detached ruins, tombs, and sarcophagi were found scattered to some distance from the walls, on the outside of the town, and it is erident that the whole country was once occupied by a numerous and industrious people." The natives now call the place Mezetlu. (Comp. Leake, Asia Minor, p. 213, foll.) The little river which passed through Soli was called Liparis, from the oily nature

cons of soll.
of its waters．（Vitruv．viii．3；Antig．Caryst．150； Plin．l．c．）Pliny（ixxi．2）mentions bituminous springs in the vicinity，which are reported by Beunfort to exist at Bikhardy，about six hours＇walk to the north－east of $1 / \mathrm{eze}$ tlu．
［L．S．］
SOLI or SOLOE（Ediol，Ptol．v．14．§ 4），an important seaport town in the W．part of the N． coast of Cyprus，situated on a small river．（Strab． xiv．p．683．）According to Plutarch（Sol．26）it was founded by a native prince at the suggestion of Solon and nauned in honour of that legislator．The sujourn of Solon in Cyprus is mertioned by $\mathrm{He}-$ rodotus（ v ．113）．Other accounts，however，make it an Athenian settlement，founded under the auspices of Phalerus and Acamas（Strab．l．c．），or of Demophon，the son of Theseus（Plut．L c）．We learn from Strabo（l．c．）that it had a temple of Aphrodite and one of Isis；and from Galen（de Simp．Med．ix．3，8）that there were mines in its neighbourhood．The inhabitants were called Solii （Eó入ıoc），to distinguish them from the citizens of Soli in Cilicia，who were called इodeis（Diug． Laert．V．Solon，4）．According to Pococke（ii．p． 323），the valley which surrounded the city is still called Solea；and the ruins of the town itself may be traced in the village of Aligora．（Comp．Aesch． Pers．889；Scyl．p．41；Shudiasm．M．Magni， § 295，seq．；Const．Porphyr．de Them．i．p．39， Lips．；Hierocl．p．707，\＆c．）．
［T．H．D．］
solia．［Araf Hesperi．］
SOLICI＇NIUM，a town in the Agri Decumates，in South－western Germany，on Mount Pirus，where Valentinian in A．D． 369 gained a victory over the Alemanni．（Amm．Marc．xxvii．10，xxviii．2，$x \times x$. 7．）A variety of conjectures have been made to identify the site of the town，but there are no positive criteria to arrive at any satisfactory con－ clusion．
［L．S．］
SOLIMARIACA，in Gallia，is placed in the Antonine Itin．on the road from Andomatunum （Langres）to Tulluin Lencorum（Toul），and nearly half－way between Mosa（Meuse）and Tullum．There is a place named Soulosse，which in name and in position agrees with Solimariaca．＂The trace of the Roman road is still marked in several places by its elevation，both on this side of Soulosse and beyond it on the road to Toul．＂（D＇Anville，Notice，g＇c．）［G．L．］

SOLIMNIA，a sniall island of the Aegaean sea， off the coast of Thessaly，near Scopelos．（Plin．iv． 12．s．23．）

SOLIS INSULA（Plin．vi．22．s．24），an island mentioned by Pliny betwoen the mainiand of India and Ceylon，in the strait．There can be no doubt that it is the present Kamiseram Cor，famous for a temple of Rana．It bore also the name of $K \bar{\omega} \rho \nu$ ［Cory．］
［V．］
SOLIS FONS．［OASIS，p．458．］
SOLIS PORTUS（＇H $\lambda_{i o v} \lambda_{\iota} \mu \nRightarrow \nu$ ，Ptol．vii．4．§ 6）， a barbour near the SE．corner of Taprobane（Ceylon）． It has been conjectured by Forbiger that it is the present Vendelusbai，－a name we do not discover on the best maps．Its position，south of the Malea mountains（ddam＇s Peak），is certain．［V．］

SOLIS I＇ROMONTO＇RIUM（＇I 1 ра̀＇Hスiov áкра）， ＂Sacra solis extrema，＂a promoutory of the east coast of Arabia at the south of the Persian gulf． between the mouth of the river Lar and Rhegma，in the country of the Nariti．（Ptol．vi．7．§ 14．） ［LAR；Rhegma．］
［G．W．］
 on the coust of Acarnania，on the Ionian sea．

Its exact site is uncertain，but it was probably in the neighbourhood of Palaerus，which lay between Leucas and Alyzia．［Palakic＇s．］Leake，however， places it S．of Alyzia，at Stravolimióna（i．e．Port Stravo）．Sollium was a Corinthin colony，and as such was taken by the Athenians in the first year of the Peloponnesian War（в．c．431），who gave both the place and its territory to Palaerus．It is again mentioned in B．C．426，as the place at which Demosthenes landed when he resolved to invade Aetolia．（Thuc．ii．30，iii．95，comp．v．30；Steph． B．8．v．；Leake，Northern Greece，vol．iv．p．18， seq．）

SOLMISSUS（ $\Sigma$（ $\lambda \mu \mu \sigma \sigma b s$ ），a hill near Ephesns， rising above the grove of Leto，where the Curetes， by the loud noise of their arms，prevented Hera from hearing the cries of Leto when she gave birth to her twins．（Strab．siv．p．640．）
［L．S．］
SOLOMATIS（Eo入ómatts，Arrian，Ind．c．4）， a river named by Arrian as one of the feeders of the Ganges．There has been much difference of opinion as to what modern stream this name represents． Mannert thinks that it is one of the affluents of the Jumna（v．pt．i．p．69）；while Benfey，on the other hand，considers it not unlikely that under the name of Solomatis lurks the Indian Sarasváti or Sarsooti， which，owing to its being lost in the sands，is fabled by the Indians to flow ander the earth to the spot where the Ganges and Jumna join，near Allaha－ bad．（Benfey，art．Indien，in Ersch und Gruber， p．4．）

SOLO＇NA（Eth．Solonas：Città del Sole），a town of Gallia Cispadana，mentioned only by Pliny among the municipal towns of the 8th region（Plin．iii． 15. s．20），but the name of the Solonates is found also in an inscription，which confirms its municipal rank （Gruter，Inscr．p．1095．2）．Unfcrtunately this inscription，which was found at Ariminum，affords no clue to the site of Solona：it is placed conjecturally by Cluver at a place called Cittià del Sule about 5 miles SW．of Forli：but this site would seem too close to the important town of Forum Livii．（Cluver． Ital．p．291．）
［E．H．B．］
SOLO＇NIUM（Żo入ćviov），in Gallia Narbonensis， where C．Pomptinus defeated the Allobroges，в．C． 61．（Dion Cass．xxxvii．c．48；Liv．Epit．103，where it is said，＂C．Pontinius Praetor Allobroges qui re－ bellaverant ad Salonem（Solonem ？）domuit．＂）It has been conjectured that Solonium is Sallimaz，in the department of Ain，near the small river Brimas； but this is merely a guess．The narrative of Dion is useless，as usual，for determining anything with precision．Other guesses have been made abont the position of Solonium ；one of which is too absurd to mention．
［G．L．］
SOLO＇NIUS AGER（इonáviov，Plat．），was the name given to a district or tract in the plain of Latium，which appears to have bordered on the ter－ ritories of Ostia，Ardea，and Lanuvium．But there is some difficulty in determining its precise situation or limits．Cicero in a passage in which he speaks of a prodigy that happencd to the infant Roscius， places it＂in Solenin，qui est campus agri Lamu－ vini＂（de Div．i．36）；but there are some rensuns to suspect the last words to be an interpolation．On the other hand，Livy speaks of the Antiates as making incursions＂in agrum Ostiensem，Ardeatem， Solonium＂（viii．12）．Plutarch mentions that Ma－ rius retired to a villa that he possessed there，when he was expellex from Kome in в．c．88；and from thence repaired to Ostis．（Plut．Mar．35．）But
the most distinct indication of its locality is afforded by a passage of Festus (s. v. Pomonal, p. 250), where he tells us " Pomonal est in agro Solonio, via Ostiensi, ad duodecimum lapidem, diverticulo a miliario octaro." It is thence evident that the "ager Solonius" extended westward as far as the Via Ostiensis, and probably the whole tract bordering on the territories of Ostia, Laurentum, and Ardea, was known by this name. It may well therefore have extended to the neighbourhood of Lanurium also. Cicero tells us that it abounded in snakes. (De Div. ii. 31.) It appears from one of his letters that he had a villa there, as well as Marius, to which he talks of retiring in order to avoid contention at Rome (ad Att. ii. 3).

The origin of the name is unknown; it may probably have been derived from some extinct town of the name; but no trace of such is found. Dionysius, indeed, speaks of an Etruscan city of Solonium, from whence the Lucumo came to the assistance of Romalus (Dionys. ii. 3i); but the name is in all probability corrupt, and, at all events, cannot afford any explanation of the Latin district of the name.
[E. H. B.]
SOLO'RIUS MONS, an offshoot of Mons Argentarius, running to the SW., on the borders of Hispania Tarraconensis and Baetica, and connecting Mount Ortospeda with Mount Ilipula. (Plin. iii. 1. s. 2.) It is probably the same mountain mentioned by Strabo (iii. p. 156) as rich in gold and other mines, and the present Sierra Nevada. [T. H. D.]
 גoûs, Diod.: Eth. इoגouvtivos, Diod., but coins have इoגovtivos; Soluntinus: Solanto), a city of Sicily, situated on the N. coast of the island, about 12 miles E. of Panormus, and immediately to the E. of the bold promontory called Capo Zaffarana. It was a Phoenician colony, and from its proximity to Panormus was one of the few which that people retained when they gave way before the advance of the Greek colonjes in Sicily, and withdrew to the NW. corner of the island. (Thuc. vi. 2.) It afterwards passed together with Panormus and Motya into the hands of the Carthaginians, or at least became a dependency of that people. It continued steadfast to the Carthaginian alliance ev:n in B. C. 397 , when the formidable armanent of Dionysius shook the fidelity of most of their allies (Diod. xiv. 48); its territory was in consequence ravaged by Dionysius, but without effect. At a later period of the war (в. c. 396) it was betrayed into the hands of that despot (lb. 78), but probably soon fell again into the power of the Carthaginians. It was certainly one of the cities that usually formed part of their dominions in the island; and in B. c. 307 it was givet: up by them to the soldiers and mercenaries of Agathocles, who had made peace with the Carthagi:iuns when abandoned by their leader in Africa. (Dind. xx. 69.) During the First Punic War we find it still subject to Carthage, and it was not till after the fall of Panormus that Soluntum also opened its gates to the Romans. (Id. xxiii. p. 505.) It continued to subsist under the Roman dominion as a municipal town, but apparently one of no great consideration, as its name is only slightly and occasicnally mentioned by Cicero (Verr. ii. 42, iii. 43.) But it is still noticed both by Pliny and Ptolemy (Plin. iii. 8. s. 14; Ptol. iii. 4. § 3, where the name is corruptly written 'Oגounis), as well as at a later period by the Itineraries, which place it 12 miles from Panormus and 12 from Thermae (Termini).
(Itin. Ant. p. 91; Tab. Peut.) It is probable that its complete destruction dates from the time of the Saracens.

At the present day the site of the ancient city is wholly desolate and uninhabited. It stood on a lofty hill, now called the Monte Catalfano, at the foot of which is a small cove or port, with a fort, still called the Custello di Solanto, and a station for the tunny fishery. The traces of two ancient roads, paved with large blocks of stone, which led up to the city, may still be followed, and the whole summit of the hill is covered with fragments of ancient walls and foundations of buildings. Among these may be traced the remains of two temples, of which some capitals, portions of friezes, \&c. have been discorered; but it is impossible to trace the plan and design of these or aly other edifices. They are probably all of them of the period of the Roman dominion. Several cisterns for water also remain, as well as sepulchres; and some fragments of sculpture of considerable merit have been discovered on the site. (Fazell. de Reb. Sic. viii. p. 352 ; Amico, Lex. Top. vol. ii. pp. 192-195; Hoare's Class. Tour, vol. ii. p. 234 ; Serra di Falco, Ant. della Sicilia, vol. v. pp. 60-67.)
[E. H. B.]

COIN OF SOLUS.
SOLYGEIA, SOLYGEIUS. [Corinthus, pp. 684, b, 685, a.]

SOLYMA ( $\tau \grave{\alpha} \Sigma \delta \delta \lambda \nu \mu a)$, a high mountain near Phaselis in Lycia. (Strab. xiv. p. 666.) As the mountain is not mentioned by any other writer, it is probably only another name for the Chimaera Mons, the Olympus, or the mountains of the Solymi, mentioned by Homer. (Od. v. 283.) In the Stadiasmus it is simply called the ő ópos $\mu \epsilon$ '́ $\gamma \alpha$ : it extends about 70 miles northward from Phaselis, and its highest point, now called Taghtalu, rises immediately above the ruins of Phaselis, which exactly corresponds with the statement of Strabo. (Leake, Asia Minor, p. 189.)
[L.S.]
SOLYMI. [LYCTA.]
SOMENA. [Simena.]
SONAUTES, according to Pliny (vi. 1), a river in Pontus; while, according to Apollonius Rhodius (ii. 747), the Acheron in Bithynia was anciently called Soonautes (Zowvaúr $\eta$ s).
[L. S.]
SONEIUM, a place in Moesia Superior, on the borders of Thrace, at the pass of Mount Scomius, called Succi. (Itin. Hieros. p. 567.) Identified with Bagna.
[T. H. D.]
SONISTA, a town in Upper Pannonia, on the road from Poetovium to Siscia. (Geog. Rav. iv. 19; Tab. Peut.; It. Hieros. p. 561, where it is written Sunista.) Its exact site is unknown. [L. S.]

SO'NTIA (Eth. Sontinus: Sanza), a town of Lucania, known only from Pliny, who enumerates the Sontini among the municipal towns of that province (Plin. iii. 11. s. 15). It is probable that it is the same place now called Sunza, situated in the mountains about 12 miles N. of the Gulf of Policastro.
[E. H B.]

SO'NTIUS (Isonso), one of the most considerable of the rivers of Venetia, which has its sources in the Alpe, at the foot of the lofty Mt. Terglou, and has from thence a course of above 75 miles to the sea, which it enters at the inmost bight of the Adriatic, between Aquiloia and the Timavus. It receives at the present day the waters of the Natisone and Torre, the ancient Natiso and Turras, both of which in ancient times parsued independent courses to the sea under the walls of Aquileia, and from the E. those of the Wippach or Vipav, called by the ancients the Fluvius Frigidus. Though so important a stream, the name of the Sontius is not mentioned by any of the geographers; but it is found in the Tabula, which places a station called Ponte Sonti (Ad Pontem Sontii) 14 miles from Aquileia on the highroud to Aemona (Layback). This bridge, which lay on the main entrance into Italy on this side, was a military point of considerable importance. It checked for a time the march of the emperor Maximin when advancing upon Aquileia, in A. D. 238 (Herodian, viii. 4; Capit. Maximin. 22); and at a later period it was here that Odoacer took up his position to oppose the advance of Theodısius, by whom he was, however, defeated in a decisive battle, A. D. 489 (Cassiod. Chron. p. 472; Id. Var. i. 18; Jornand. Get 57). The Sontius is correctly described by Herodian, though he does not mention its name, as a large and formidable stream, especially in spring and suinmer, when it is fed by the melting of the Alpine snows.
[E. H. B.]
SONUS (Einvos, Arrian, Ind. c. 4; Plin. vi. 18. 8. 22), a principal affluent of the Ganges, which flows in a NE. direction to it from the Vindhya Moventains. Its modern name is Soane. There is no doubt that it has been contracted from the Sanscrit Suvarna, golden. The Soas ( $\sum$ ŵas) of Ptolemy (vii. 1. \& 30) is certainly the same river. [V.]
 Dion Cass. $\mathbf{x x x v i}$. 36; Procop. de Aedif. iii. 2, B. Pers. i. 21 : Eth. इ $\omega(\boldsymbol{\eta} \eta \nu$ bs), a district of Armenia, lying between Antitaurus and Mount Masius, separated by the Euphrates from Melitene in Armenia Minor, and by Antitaurus from Mesopotamia. Its capital was Carcathiocerta. (Strab. xi. pp. 521, 522,527 .) Il formed at one time, with the neighbouring districts, a separate west Armenian kingdom, governed by the Sophenian Artanes, but was annexed to the east Armenian kingdom by Tigranes. Sophene was taken away from Tigranes by Pompey. (Strab. xi. p. 532 ; Dion Cass. $x \times x$ vi. 26; Plut. Lucull. 24, Tomp. 33.) Nero gave Sophene as a separate kingdom to Sohaemus. (Tac. Ann. xiii. 7.)

SOPLA'NAE, a town in the central part of Lower Pannonia, on the road from Mursa to Sabaria (It. Ant. pp. 231, 232, 264, 267), was according to Ammianus Marcellinus (xxviii. 1) the birthplace of the emperor Maximinus. Its site is occupied by the modern Fünfkirchen.
[L. S.]
SORA ( $\Sigma \hat{\omega} \rho a:$ Eth. Soranus: Sora), a city of Latium, situated in the valley of the Liris, on the right bank of that river, about 6 miles to the N. of Arpinum. Though included in Latium in the more extended sense of that term, as it was anderstood under the Roman Empire, Sora was originally a Volscian city (Liv. x.1), and apparently the most northerly possessed by that people. It was wrested from them by the Romans in B. c. 345, being surprised by a sudden attack by the consuls Fabius Dorso and Ser. Sulpicius. (Liv. vii. 28.) It was subsequently occupied by the Romans with a colony:
the establishment of this is not mentioned by Livy, but in B. O. 315 he telle us the inhabitants had revolted and joined the Samnites, putting to death the Roman colonists. (Id. ix. 23; Diod. xix. 72.) The city was in consequence besieged by the dictator C. Fabius, and, notwithstanding the great dofeat of the Romans at Lautulae, the siege was continued into the following year, when the city was at length taken by the consuls C. Sulpicius and M. Poetelins; the citadel, which was in a very strong and inaccessible position, being betrayed into their hands by a deserter. The leadera of the defection were sent to Rome and doomed to execation; the other inhabitants were spared. (Liv. ix 23, 24.) Sora was now occupied by a Roman garrison; but notwithstanding this it again fell into the hands of the Samnites in B.c. 306, and it was not recovered by the Romans till the following year. (Id. ix. 43, 44; Diod. xx. 80, 90.) After the close of the Second Samnite War it was one of the points which the Romans determined to secure with a colony, and a body of 4000 colonists was sent thither in B. C. 303. (Id. x. 1.) From this time Sora became one of the ordinary "coloniae Latinae " and is mentioned in the Second Punic War among the refractory colonies, which in B. c. 209 refused any further contributions. (Liv. xxvii. 9, xxix. 15. The text of Livy gives Cora in the first passage, and Sora in the second, but the same place is necessarily meant in both passages, and it is probable that Sora is the true reading.) From this time we hear little more of Sora, which lapsed into the condition of an ordinary municipal town. (Cic. pro Planc. 9). Its rank of a Colonia Latina was merged in that of a municipium by the Lex Julia; but it received a fresh colony under Augustus, consisting, as we learn from an inscription, of a body of veterans from the 4th legion. (Lib. Colom p. 237 ; Plin. iii. 5. s. 9; Orell. Inecr. 3681.) Javenal speaks of it as a quiet country town, where houses were cheap (Juv. iii. 223); and it is mentioned by al: the geographers among the towns of this part of Italy. (Strab. v. p. 238; Ptol. iii. 1. § 63; Sil. Ital. viii. 394; Orell. Inser. 3972.) Nothing more is heard of it under the Koman Empire, but it survived the fall of the Western Empire, and continued throughout the middle ages to be a place of consideration. Sora is still an episcopal see, and much the most important place in this part of Italy, with about 10,000 inhabilants. The modern town undoubtedly occupies the same site with the ancient one, in the plain or broad valley of the Liris, resting upon a bold and steep hill, crowned by the ruins of a mediaeral castle. The ancient citadel, described by Livy, stood on a hill at the back of this, called the Rocca di S. Angelo, where some remains of the ancient walls, constructed of massive polygonal blocks, are still visible. No remains of Ruman times are preserved, except a few inscriptions, and some foundations, supposed to be those of a temple. (Romanelli, vol. iii. pp. 362-366; Hoare's Classical Tour, vol. i. pp. 299-302.)
[E. H. B.]
SORA ( $\Sigma$ ópa or $\Sigma \bar{\omega} \rho a$ ), a town of Paphlagonia, noticed only by the latest writers of antiquity, and of unknown site. (Constant. Porph. Them. i. 7; Novellae, xxix. 1; Hierucl. p. 695; Conc. Nicaen. ii. p. 52; Conc. Chalced p. 664, where it is called Sura.)

SORA ( $\Sigma \hat{\omega} \rho a$, Ptol. vii. 1. § 68), a town in the southern part of India, between M. Bettigo and Adeisathron. It was the capital of a nomad race
called Sorae (Ptol. l. c.), and the royal residence of a king named Arcates. The people are evidently the same as the Surae of Pliny (vi. 20. 8. 23). Lassen places them in the mountains above Madrus (see map).
[V.]
SORACTE (Monte S. Oreste), a mountain of Etraria, situated between Falerii and the Tiber, about 26 miles N . of Rome, from which it forms a conspicuous object. It is detached from the chain of the Apennines, from which it is separated by the intervening valley of the Tiber; yet in a geological sense it belongs to the Apennine range, of which it is an outlying offset, being composed of the hard Apennine limestone, which at once distinguishes it from the Mons Ciminus and the other volcanic hills by which it is surrounded. Though of no great clevation, being only 2420 feet in height, it rises in a bold and abrupt mass above the surrounding plain (or rather table-land), which renders it a striking and picturesque object, and a conspicuous feature in all views of the Campagna. Hence the selection of its name by Horace in a well-known ode (Carm. i. 9) is peculiarly appropriate. It was consecrated to Apollo, who had a temple on its summit, probably on the saine spot now occupied by the monastery of S.Siloestro, and was worshipped there with peculiar religious rites. His priests were supposed to possess the power of passing unharned through fire, and treading on the hot cinders with their bare feet. (Ving. Aen. vii. 696, xi. 785--790; Sil. Ital. v. 175-181, vii. 662; Plin. vii. 2.) Its rugged and craggy peaks were in the days of Cato still the resort of wild goats. (Varr. K. R. ii. 3. § 3.)

Soracte stands about 6 miles from Civita Castellama, the site of the ancient Falerii, and 2 from the Tiber. It derives its modern appellation from the village of Sant' Oreste, which stands at its S. extremity on a steep and rocky hill, forming a kind of step or ledge at the foot of the more elevated peaks of Soracte itself. This site, which bears evident sigos of ancient habitation, is supposed to be that of the ancient Feronia or Lucus Feroniae. (Dennis's Etruria, vol. i. p. 179.)
[E. H. B.]
SORBIODU'NUM, or SORVIODU'NUM, a town of Britannia Romana, in the territory of the Belgao. (Itis. Ant. pp. 483, 486.) It is identified with Old Sarum, where coins of several Roman emperors have been found, and where the traces of the ancient Roman walls show it to have been about half a mile in circumference. (Camden, p. 113.) [T.H.D.]

SORDICE, a lake in Gallia. A river Sordus ran out of the $E^{\prime \prime}$ lang Sordice, in the country of the Sordones or Sordi. [Sordones.]
"Stagnum hic palusque, quippe diffuse patet, Et incolae istam Sordicen cognominant."
(Avienus, Or. Mar., as I. Vossius reads it.)
The Sordice is supposed by some geographers to be the $E^{\prime}$ tang de Lewcute; but others take it to be an étang further south, called $E^{\prime}$ tang de St. Nazaire, and the $E^{\prime}$ lang de Leucale to the that near Salsulae, which is described by Strabo, Mela, and others. [Salsular; Ruscino.]
[G. L.]
SORDONES, or SARDONES, as the name has sometimes been written, a people in Gallia. Mela (ii. 5) writes : after the Salsulae fons "is the ora Sordonum, and the small streams Telis and Tichis; the Colonia Ruscino, and the vicus Illiberis." Pliny (iii. 4) begins his description of Gallia Narbonensis from the foot of the Pyrences. He says "On
the coast is the regio Sordonum or Surdonam, and in the interior the Consnarani; the rivers Techum, Vernodubrum ; towns, Illiberis and Ruscino." These Sordones are the Sordi of Avienus (Or. Marit. 562):
"Sordus inde denique
Populus agebat inter avios locos
Ac pertinentes usque ad interius mare,
Qua pinifertae stant Pyrenae vertices,
Inter ferarum lustra ducebat greges,
Et arva late et gurgitem ponti premit:"
as I. Vossius reads the passage in bis edition of Mela. The Sordi then occupied the coast of the Mediterranean from the Pyrenees northward, and the neighbouring part of the interior at the north foot of the Pyrenees. Ptolemy, as D'Anville observes, does not mention the Sordones, and he has made the territory of the Volcae Tectosages comprehend Illiberis and Ruscino. The Sordones probably occupied the whole of the territory called Roussillon, and thes would be in possession of that pass of the Pyrenees called Col de Pertus, which is defended by the fort of Bellegarde. They bordered on the Consorani. [Consorani.]
[G. L.]
SORICA'RIA, a place in Hispania Baetica, mentioned by Hirtius (B. Hisp. c. 24), and the same called also "Soritia" by that author (c. 27). Ukert (ii. pt. i. p. 361) seeks it in the neighbourhood of the Flumen Salsum (the Salado), S. of the Baetis, and between Osuna and Antequera.
[T. H. D.]
SORINGI (之ஸ́pıroı, Peripl. M. E. p. 34), a people of the southern part of Hindostan, who apparently dwelt along the banks of the Chaberus (Káveri). Lassen places them below the Sorae, on the slopes of the hills above Madras.
[V.]
SORITIA. [Soricaria.]
SORNUM, ( ${ }^{2}$ oppoy, Ptol. iii. 8. § 10), a city of Dacia; now Gieritza.
[T. H. D.]
SORO'RES (AD), a station in Lusitania, N. of Emerita. (Itin. Ant. p. 433.) Variously identified with Montanches and Aliseda.
[T. H. D.]
SOSTOMAGUS, in Gallia, is placed by the Jerusalem Itin. between Tolosa (Toulouse) and Carcaso (Carcassone), 38 miles from Toulouse and 24 from Carcassone. The road is nearly direct, and if the distances are correct, we might perhaps find some name like Sosto in the proper place. Some geographers have found Sostomagus near Castelnaudari.
[G. L.]
SOTERA, a place in Ariana, mentioned by Ammianus (xxiii. 6). It is probably the same as that called by Ptolemy E'́tcipa (vi. 17. § 7). [V.]

SOTIA'TES or SONTIA'TES, a people of Aquitania. Schneider (Caesar, B. G. iii. 20) who writes "in Sontiatium fines" has a long note on the various forms of this word. Nicolaus Damascenas (quoted by Athenaeus, vi. p. 249) writes the name Sotiani, but as Caesar was his anthority for what he says, he may have altered the form of the word. In Dion Cassius (xxxis. c. 46) the reading is 'Anidras (ed. Reimarus); but there are other variations in the MSS. In Pliny (iv. 19) we find among the nations of Aquitania "Ausci, Elusates, Sottiates, Osquidates Campestres." Orocius (vi. 8, ed. Haverkamp) has Sontiates, but one MS. has Sotiates and others have Sociates.

In b. c. 56 Caesar sent P. Crassus into Aquitania. Crassus caine from the north, and after summoning the men of fighting age who were on the muster rolls of Toulouse, Carcassone, and Narbonne,
he entered the territory of the Sutiates，the first of the Aquitanian peoples whom he attacked．The Sotiates were the neighbours of the Elusates a name represented by the town of Eause．A line drawn from Auch（Ausci）on the Gers to Bazas in the department of La Gironde，passes near Sus，a town which is on the Gctise，and in the Gabaret． In the middle ages it was called Sotium．Ancient remains have been found at Sos．Here we have an instance of the preservation of ancient names in this part of France，and there are many other instances．

D＇Anville in determining the position of the Sotiates argues correctly that Crassus having passed through the Santones，a people who had submitted to Caesar （B．G．iii．12）and would offer no resistance，entered Aquitania by the north，and the Sotiates who were only seven or eight leagues south of the Garonne would be the first tribe on whom he fell．He says that he has evidence of a Roman road very direct from Sos to Eause ；and he is convinced that this is part of the ruad described in the Jerusalem Itin．be－ tween Vasatae and Elusa．On this road the name Scit－ tium occurs in the Itin．，and as the distance between Scittium and Elusa correspinds very nearly to the distance between Sos and Eause，he conjectures that this word Scittium is written wrong，and that it shouid be Sotium．

The Sotiates，who were strong in cavalry，attacked the Romans on their march，and a battle took place in which they were defeated．Crassus then assaulted their town，which made a stout resistance．He brought up his vineae and towers to the walls，but the Sotiates drove mines under them，for as they had copper mines in their country they were very skilful in burrowing in the ground．At last they sent to Crasuus to propose terms of surrender（B．G． iii．21）．While the people were giving up their arms on nue side of the town，Adcantuannus，who was a king or chief，attempted to sally out on another side with his 600 ＂soldurii．＂The Romans met him there，and after a bard fight Adcantuannus was driven back into the town；but he still obtained the same ensy terms as the rest．

These Soldurii were a body of men whe attached themselves to a chief with whom they enjoyed all the goor things without working，so long as the chief lived；but if any violence tink off their leader it was their duty to share the same fate or to die by their own hand．This was an lberian and also a Gallic fashion．The thing is easily understood． A usurper or any desperate fellow seized on power with the help of others like himself；lived well，and fed his friends：and when his tyranny came to an end，he and all his crew must kill thenselves．if they wished to escape the punishment which they deserved．（Plut．Sertor．c．14；Caesar，B．G．vii． 40 ：and the passage in Athenaeus．）

The MSS．of Capar vary in the name of Adcan－ tnannus．Schneider writes it Adiatunus，and in Allienapus it is＇A $\delta$ dácouov．Schneider mentions a medal of Pellerin，with REX $\triangle$ ALETVRNVE and a lion＇s head on one side，and on the other so－ TIOGA．Walckenaer（Géugr．fic．i．284）may be speaking of the same medal，when he describes one which is said to have been found at Toulorses，with a head of Adictanus on one side and the word Sotiagae on the other．He thinks it＂very suspected；＂ and it may be．
［（i．L．］
SOZO＇POLIS（ $\Sigma \omega$ 欠ুко入ıs）．a town noticed only by late writers as a place in Pisidia，on the north of Termessus，in a plain surrounded on all sides by
mountains．（Hierocl．p．672；Evagr．Hist．Ecclea iii．33．）It is prossibly the same place which ste－ phanus B．notices under the name of Soznsa．Nicetas （ $1 n n$. p．9）mentions that it was taken by the Turks，but recovered from them by John Comnenus． （Comp．Ann．p． 169 ；Cinnsmus，p．13．）The traveller Paul Lucas（Sec．Voy．vol．i．c．33）ob－ served some ancicut remains at a place now called Souzou，south of Aglasoum，which probably beling to Sozopolis． ［L．S．］
SOZO POLIS，a later name of Apollonia in Thrace． ［Vol．I．p．160．］
［J．R．］
 Scylax，p．25；$\sum \pi a \lambda \epsilon \theta \rho \eta$ ，Steph．B．s．©．；$\sum \pi d-$ $\lambda a \theta \rho o \nu$, Hellanic．ap．Steph．B．s．v．：Eth．シォa－ $\lambda a \theta \rho a i o s)$ ，a town of Magnesia，in Thessaly，upon the Pagasaean gulf．It is conjectured that this town is meant by Lycophron（899），who describes Prothous，the leader of the Magnetes in the Iliad，as $\delta$ éк Пa入aú $\theta \rho \omega \nu$（ $\left.\sum \pi a \lambda a u ́ \theta \rho \omega \nu\right)$ ）．（See Nïller，ad Scyl．l．c．）

SPALATUM．［Salona．］
SPANETA，a town in Lower Pannonia，of un－ known site．（It．Ant．p．268；It．Hieros．p．563； Geog．Rav．iv．19，who writes Spaneatis．［L．S．］ SPARATA，a place in Moesia Superior，probably on the river Isker．（Itin．Hieros．p．567．）By the Geogr．Rav．it is called Sparthon（iv．7）．［T．H．D．］

SPARTA（ $\sum \pi d \rho \tau \eta$ ，Dor．$\sum \pi d \rho \tau \alpha$ ：Eth．इinap－ Tidinns，Spartiates，Spartanus），the capital of La－ conia，and the chief city of Peloponnesus．It was also called Lacedaemon（ $a$ ake $\delta a i \mu \omega v:$ Eth．Aa－ $\kappa \in \delta a, \mu \dot{v} i o s$, Lacedaemonius），which was the ori－ ginal name of the country．［See Vol．II．p．103，a．］ Sparta stood at the upper end of the middle vale of the Eurotas，and upon the right bank of the river． The position of this valley，shut in by the mountain ranges of Taygetus and Parnon，its inaccessibility to invaders，and its extraordinary beauty and great fertility，have been described in a previous article ［Laconin］．The city was built upon a range of low hills and upon an adjoining plain stretching SE． to the river．These hilly are offshoots of Mt．Tay－ getus，and rise almost immediately above the river． Ten stadia S．of the point where the Oenus flows into the Eurotias，the latter river is divided into two arms by a small island overgrown with the oleander，where the foundations of an ancient bridge are risible． This is the most important point in the topography of the site of Sparta．Opposite to this bridge the range of hills rises upon which the ancient city stood；while a hollow way（Map，$f f$ ．）leads throuch them into the plain to Mayila，a village situated about half－way be－ tween Mistrí and the island of the Eurotas．Upon emerging from this bollow into the plain，there rises on the left hand a hill，the south－western side of which is occupied by the theatre（Map，A．）．The centre of the building was excrated out of the hill； but the two wings of the cavea were entirely artificial， being built of enomnous masses of quadrangular stones．A great part of this masonry still remains； hut the seats have almost entirely disappeared，be－ cause they have for many agres been used as a quarry by the inhabitants of Mistra．The extremities of the two wings are about 430 feet from one arother， and the dianeter or length of the orchestra is about 170 feet ；so that this theatre was probably the largest in Greece，with the exception of those of Athens and Megalopolis．There are traces of a wall around this hill，which also embraces a considerable part of the adjoining plain to the east．Within the
space enclosed by this wall there are two terraces, upon one of which, amidst the ruins of a church, the French Commission discovered traces of an ancient temple. In this space there are also some ancient doors, formed of three stones, two upright with the architrave, buried in the ground; but no conjecture can be formed of the building to which they belonged without excavations.

The hill we have been describing is the largest of all the Spartan heights, and is distinguished by the wall which surrounds it, and by containing traces of foundations of some ancient buildings. From it two amaller hills project towards the Eurotas, parsllel to one another, and which may be regarded as portions of the larger hill. Upon the more southerly of the two there are considerable remains of a circular brick building, which Leake calls a circus, but Curtius an anphitheatre or odeum (Map, 3). Its walls are 16 feet thick, and its diameter only about 100 feet; but as it belongs to the Roman period, it was probably sufficient for the diminished population of the city at that time. Its entrance was on the side towards the river. West of this building is a valley in the form of a horse-shoe, enclosed by walls of earth, and apparently a stadium, to which its length nearly corresponds

To the north of the hollow way leading from the bridge of the Eurotas to Magúla there is a small insulated hill, with a flat summit, but higher and more precipitous than the larger hill to the south of this way. It contains but few traces of ancient buildings (Map, B.). At its southern edge there are the remains of an aqueduct of later times.

The two hills above mentioned, north and south of this hollow way, formed the northern half of Sparta. The other portion of the city occupied the plain between the southern hill and the rivulet falling into the Eurotas, sometimes called the River of Magula, because it flows past that village, but more usually Trypítibo, from Trypi, a village in the mountains (Map, $\propto$ ). Two canals, beginning at Maguila, run across this plain : upon the southern one (Map, $b b$ ), just above its junction with the Trypiótiko, stands the small village of Psychiko (Map, 6). Between this canal and the Trypiotiko are some heights upon which the town of New Sparta is now built (Map, D.). Here are several ancient ruins, among which are some remains of walls at the southern extremity, which look like city-walls. The plain between the heights of New Sparta and the hill of the theatre is covered with corn-fields and gardens, among which are seen fragments of wrought stones, and other ancient remains, cropping out of the ground. The only remains which make any appearance above the ground are those of a quadrangular building, called by the present inhabitants the toinb of Leonides. It is 22 feet broad and 44 feet long, and is built of ponderous square blocks of stone. It was probably an heroum, but cannot have been the toinb of Leonidas, which we know, from Pausanias (iii. 14. § 1), was near the theatre, whereas this building is close to the new town.

This plain is separated from the Eurotas by a range of hills which extend from the Roman amphitheatre or circus to the village of Psychiko. Between the hills and the river is a level tract, which is not much more than 50 yards wide below the Roman amphitheatre, but above and below the latter it swells into a plain of a quarter of a mile in breadth. Beyond the river Trypiotiko there are a few traces of the foundations of ancient buildings near the little

VOL IL
village of Kalagonia (Map, 7). Leake mentions an ancient bridge over the Trypiótiko, about a quarter of a mile NE. of the village of Kalagoniá. This bridge, which was still in use when Leake visited the district, is described by him as having a rise of about one-third of the span, and constructed of larce single blocks of stone, reaching from side to side. The same traveller noticed a part of the ancient causeway remaining at either end of the bridge, of the same solid construction. But as this bridge is not noticed by the French Commission, it probably no longer exists, having been destroyed for its materials. (Leake, Morea, vol. i. p. 157, Peloponnesiaca, p. 115.)

Such is the site of Sparta, and sach is sll that now remains of this famous city. There cannot be any doubt, however, that many interesting discoveries might be made by excavations; and that at any rate the foundations of several ancient buildings might be found, especially since the city was never destroyed in ancient times. Its present appearance corresponds wonderfully to the anticipation of Thucydides, who remarks (i.10) that " if the city of the Lacedisemonians were deserted, and nothing remained but its temples and the foundations of its buildings, men of a distant age would find a difficulty in believing in the existence of its former power, or that it possessed two of the five divisions of Peloponnesus, or that it commanded the whole country, as well as many allies beyond the peninsula, $\rightarrow 0$ inferior was the appearance of the city to its fame, being neither adorned with splendid temples and edifices, nor built in contiguity, but in separate quarters, in the ancient method. Whereas, if Athens were reduced to a similar state, it would be supposed, from the appearance of the city, that the power had been twice as great as the reality." Compared with the Acropolis of Athens, which rises proudly from the plain, still crowned with the columns of its glorious temples, the low bills on the Eurotas, and the shapeless heap of ruins, appear perfectly insignificant, and present nothing to remind the spectator of the city that once ruled the Peloponnesus and the greater part of Greece. The site of Sparta differs from that of almost all Grecian cities. Protected by the lofty ramparts of mountains, with which nature had surrounded their fertile valley, the Spartans were not obliged, like the other Greeks, to live within the walls of a city pent up in narrow streets, but continued to dwell in the midst of their plantutions and gardens, in their original village trim. It was this rural freedom and comfort which furmed the chief charm and beauty of Sparta.

It must not, however, be supposed that Sparta was destitute of handsome public buildings. Notwithstanding the simplicity of the Spartan habits, their city became, after the Messenian wars, one of the chief seats of poetry and art. The private kouses of the Spartans always continued rude and unadorned, in accordance with a law of Lycurgus, that the doors of every house were to be fishioned ouly with the saw, and the ceiling with the axe (I'lut. Lyc. 13); but this regulation was not intended to discourage architecture, bat to prevent it from ministering to private luxury, and to restrain it to its proper objects, the buildings for the gods and the state. The palace of the kings remained so simple, that its doors in the time of Agesilaus were said to be those of the original building erected by Aristodemus, the founder of the Spartan monarchy (Xen. Ages. 8. $\S 7$ ); but the temples of the gods were built with

3 T
great magnificence, and the spoils of the Persian wars were employed in the erection of a beautiful stoa in the Agora, with figures of Persians in white marble upon the columns, among which Pausanias adimired the statues of Mardonius and Artemisia (iii. 11. §3). After the Persian wars Athens became more and more the centre of Greek art; but Sparta continued to possess, even in the time of Pausanias, a larger number of monuments than most other Grecian cities.

Sparta continued unfortified during the whole period of autonomons Grecian history; and it was first surmunded with walls in the Macedonian period. We learn from Polybius (ix. 21) that its walls were 48 stadia in circumference, and that it was much larger than Megalopolis, which was 50 stadia in circuit. Its superiority to Megalopolis in size must have been owing to its form, which was circular. (Polyb. v. 22.) Leake remarks that, " as the side towards the Eurotas measured about two miles with the windings of the outline, the computation of Polybius sufficiently agrees with actual appearances, though the form of the city seems rather to lave been semicircular than circular." (Morea, vol. i. p. 180.) Its limits to the eastward, at the time of the invasion of Philip (b. c. 218), are defined by Polybins, who says (v. 22) that there was a distance of a stadium and a half between the foot of the cliffs of Mt. Menelaium and the nearest part of the city. Livy also describes the Eurotas as flowing close to the walls (xxxiv. 28, xxxv. 29). When Demetrius Poliorcetes made an attempt upon Sparta in b. C. 296, some temporary fortifications were thrown up; and the same was done when Pyrrhus attacked the city in b.c. 272. (Paus. i. 13. § 6, vii. 8. § 5.) But Sparta was first regularly fortified by a wall and ditch by the tyrant Nabis in B. c. 195 (Liv. xxxiv. 27; Paus. vii. 8. § 5); though even this wall did not surround the whole city, but only the level parts, which were more exposed to an enemy's attack. (Liv. xxxiv. 38.) Livy, in his account of the attack of Sparta by Philopoemen in B. C. 192, alludes to two of the gates, one leading to Pharae, and the other to Mount Barbosthenes. (Liv. xxxv. 30.) After the capture of the city by Philopoemen, the walls were destroved by the Achaean League (Pans. vii. 8. § 5); but they were shortly afterwards restured by order of the Romans, when the latter tonk the Spartans under their protection in opposition to the Achaeans. (Paus. vii. 9. § 5.) Its walls and gates were still standing when Pausanias visited Sparta in the second century of the Christian era, but not a trace of them now remains. When Alaric took Sparta in A. D. 396, it was no longer fortified, nor protected by arms or men (Zosim. v.6); but it continued to he inhabited in the thirteenth century, as we learn from the "Chronicle of the Morea." It was then always called Lacedaemon, and was confined to the heights around the theatre. The walls which surrounded it at that time may still be tracel, and have been mentioned ahove. It is to the medieval Lacedaemon that the ruins of the churches belong, of which no less than six are noticed by the French Commission. Aiter the conquest of Peloponnesus by the Franks in the thirteenth century, William de Villehardouin built a strong fortress upon the hill of Misithra. usually pronounced Mistrá, as little more than two miles west of Sparta, at the foot of M. Taygetus. The inhaioitants of the medieval Lacedsemon soon abandoned their town and wok refuge within the fortress
of Mistri, which long continued to be the chiiff place in the valley of the Eurotas. The site of Spartu was occupied only by the small villages of Maguila and Psychiki, till the present Greek government resolved to remove the capital of the district to its ancient seat. The position of New Sparta upon the southern part of the ancient site has been already described.
It has been observed that Sparta resembled Rume in its site, comprehending a number of contiguous hills of little height or boldness of character. (Mure, Tour in Greece, vol. ii. p. 236.) It also resembled Rome in being formed out of several earlier settlements, which existed before the Dorian conquest, and gradually coalesced with the later city, which was founded in their midst. These earlier places, which are the hamlets or $\kappa \bar{\omega} \mu \alpha u$ mentioned by Thucydides (i. 10), were four in number, Pitane, Limnae or Limnaeum, Mesoa, and Cynosura, which were united by a common sacrifice to Artemis. (Paus. iii. 16. § 9.) They are frequently called $\phi$ unal, or tribes, by the grammarians (Müller, Dorians, iii. 3. § 7), and were regarded as divisions of the Spartans; but it is clear from ancient writers that they are names of places.* We are best informed about Pitane, which is called a $\pi \delta \lambda 1 s$ by Euripides (Troad. 1112), and which is also mentioned as a place by Pindar ( $x$ poss
 dotus, who had been there, calls it a $\delta \bar{\eta} \mu o s$ (iii. 55 ). He also mentions a $\lambda$ dóos nıraydrns (ix. 53); and though Thucydides (i. 20) denies its existence. Caracalla, in imitation of antiquity, composed a $\lambda$ ó $\chi$ os Hitavatys of Spartans. (Herodian. ir. 8.) It appears from the passage of Pindar quoted above, that Pitane was at the ford of the Eurotas, and consequently in the northern part of the city. It was the favourite and fashionable place of residence at Sparta, like Collytus at Athens and Craneion at Corinth. (Plut. do Exsil. 6. p. 601.) We are also told that Pitane was near the temple and stronghold of Issorium, of which we shall speak presently. (Polyaen. ii. 1. § 14 ; Plat. Ages. 32.) Limnae was situated upon the Enrotas, having derived its name from the marshy ground which once existed there (Strab. viii. p. 363); and as the Dromas ocenpied a great part of the lower level towards the southern extremity, it is probable that Limnae occupied the northern. (Leake, Morea, vol. i. p. 177.) It is probable that Mesoa was in the SE. part of the city [see below, p. 1028, b.], and Cynosura in the SW.

In the midst of these separate quarters stood the Acropolis and the Agora, where the Dorian invaders first planted themselves. Pausanins remarks that the Lacedaemonians had no acropolis, towering above other parts of the city, like the Cadmeia at Thebes and Larissa at Argos, but that they gave this name to the loftiest eminence of the group (iii. 17. § 2). This is rather a doubtful description, as the great hill, upon which the theatre stands, and the hill at the northern extremity of the site, present nearly the same elevation to the eye. Leake places the Acropolis upon the northern bill, which, he obserres, was

[^37]better adapted for a citadel than any other, as being separated from the rest, and at one angle of the site; but Curtius supposes it to have stood upon the hill of the theatre, as being the only one with a sufficiently large surface on the summit to contain the nomerous buildings which stood upon the Acropolis. The latter opinion appears the more probable; and the larger hill, cleared from its surrounding rubbish, surrounded with a wall, and crowned with buildings, would have presented a much more striking appearance than it does at present.

The chief building on the Acropolis was the temple of Athena Chalcioecas, the tutelary goddess of the city. It was said to have been begun by Tyndareus, but was long afterwards completed by Gitiadas, who was celebrated as an architect, statuary, and poet. He caused the whole building to be covered with plates of bronze or brass, whence the temple was called the Brazen Honse, and the goddess received the surname of Chalcioecus. On the bronze plates there were represented in relief the labours of Hercules, the exploits of the Dioscuri, Hephaestus releasing his mother from her chains, the Nymphs arming Per-eus for his expedition against Medusa, the birth of Athena, and Amphitrite and Poseidon. Gitiadas also made a brazen statue of the goddess. (Paus. iii. 17. §§ 2, 3.) The Brazen House stood in a sacred enclosure of considerable extent, surrounded by a stos or colonnade, and containing several sanctuaries. There was a separate temple of Athena Ergane. Near the southern stoa was a temple of 7eus Cosmetus, and before it the tomb of Tyndarcus; the western stom contained two eagles, bearing two victories, dedicated by Lysander in commemoration of his victories over the Athenians. To the left of the Brazen House was a temple of the Muses; behind it a temple of Ares Areia, with very ancient wooden statues; and to its right a very ancient statue of Zeus Hypatus, by Learchas of Rhegium, parts of which were fastened together with nails. Here also was the $\sigma \times h$ vepua, a booth or tent, which Curtius con-
 iepoû (Thuc. i. 134), where Pausanias took refuge as a suppliant. Near the altar of the Brazen House stood two statues of Pausanias, and also statues of Aphrodite Ambologēra (delaying old age), and of the brothers Sleep and Death. The statues of Pausanias were set up by order of the Delphian Apollo to expiate his being starved to death within the sacred precincts. (Paus. iii. 17. § 2-18. § 1.)

The Agora was a spacious place, surrounded, like other Greek market-places, with colonnades, from which the streets issued to the different quarters of the city. Here were the public buildings of the magistrates, - the coancil-house of the Gerusia and senate, and the offices of the Ephori, Nomophylaces, and Bidiaci. The most splendid building was the Persian stoa, which had been frequently repaired and enlarged, and was still perfect when Pausanias visited the city. The Agora contained statues of Julius Caesar and Augustus: in the latter was a brazen statue of the prophet Agias. There was a place called Chorus, marked off from the rest of the Agora, because the Spartan youths bere danced in honour of Apollo at the festival of the Gymnopaedia. This place was adomed with statues of the Pythian deities, Apollo, Artemis, and Leto; and near it were temples of Earth, of Zeus Agoracus, of Athena Agoraea, of Apollo, of Poseidon Asplateius, and of Hera. In the Agora was a colossal statue
representing the people of Sparta, and a temple of the Moerae or Fates, near which was the tomb of Orestes, whose bones had been brought from Tegea to Sparta in accordance with the well-known tale in Herodotus. Near the tomb of Orestes was the statue of king Polydorus, whose effigy was used as the seal of the state. Here, also, was a Hermes Agoraeus bearing Dionysus as a child, and the old Ephoreia, where the Ephors originally administered justice, in which were the tombs of Eipimenides the Cretan and of Aphareus the Aeolian king. (Patus. iii. 11. §§ 2-11.)

The Agora was near the Acropolis. Lycurgus, it is said, when attacked by his opponents, fled for refuge from the Agora to the Acropolis; but was overtaken by a fiery youth, who struck out one of his eyes. At the spot where he was wounded, I.ycurgus founded a temple of Optiletis* or Ophthalmitis, which must have stood immediately above the Agora. Plutarch says that it lay within the temenos of the Brazen House; and Pausanias mentions it, in descending from the Acropolis, on the way to the so-called Alpium, beyond which was a temple of Ammon, and probably also a temple of Artemis Cnagia (Plut. Lyc. 11 ; Apophth. Lac. p. 227, b.; Paus. iii. 18. § 2.) The Agora may be placed in the great hollow east of the Acropolis (Map, 2). Its position is most clearly marked by Pausanias, who, going westwards from the Agora, arrived immediately at the theatre, after passing only the tomb of Brasidas (iii. 14. § 1). The site of the theatre, which be describes as a magnificent building of white marble, has been already described.

The principal street, leading out of the Agora, was named Aphetais ('Aфєтats), the Corso of Sparta (Map. dd). It ran towards the southern wall, through the most level part of the city, and was bordered by a succession of remarkable inonuments. First came the house of king P'olydorus, named Booneta (Bow$\nu \eta r a)$, because the state purchased it from his widow for some oxen. Next came the office of the Bidiaei, who originally had the inspection of the race-course; and opposite was the temple of Athena Celeutheia, with a statue of the goddess dedicated by Ulysses, who erected three statues of Celeutheia in different places. Lower down the Aphetais occurred the heroa of Iops, Amphiaraus, and Lelex,the sanctuary of Poseidon Taenarius,-a statue of Athena, dedicated by the Tarentini, - the place called Helleniam, so called because the Greeks are said to have held counsel there either before the Persian or the Trojan wars, - the tomb of Talthybius, -an altar of Apollo Acreitas, - a place sacred to the earth named Gaseptume, - a statue of Apollo Maleates, - and close to the city walls the temple of Dictynna, and the royal sepulchres of the Eurypontidae. Pausanias then returns to the Hellenium, probably to the other side of the Aphetais, where he mentions a sanctuary of Arsinoe, the sister of the wives of Castor and Pollux ; then a temple of Artemis near the so-called Phruria ( $\Phi$ poúpıa), which were perhaps the temporary fortifications thrown up before the completion of the city walls; next the tombs of the Iamidac, the Eleian prophets,- sanctuaries of Maro and Alpheius, who fell at Ther-mopy!ae,-the temple of ¿eus Tropaeus, built by the Dorians after conquering the Achaean inhabitants of Laconia, and especially the Amyclaei,-the temple

* So called, because d $\pi$ finot was the Lacedaemonian form for $\dot{o} \phi \theta a \lambda \mu o i$, Plut. Lyc. II.
of the mother of the gods, -and the heroa of Hippolytus and Aulon. The Aphetais apon quitting the city joined the great Hyacinthian road which led to the Amyclaeum. (Paus. iii. 12. §§ 1-9.)

The next most important street leading from the Agora ran in a south-easterly direction. It is usually called Scias, though Pausanias gives this name only to a building at the beginning of the street, erected by Theodorus of Samos, and which was used even in the time of Pausanias as a place for the assemblies of the people. Near the Scias was a round structure, said to have been built by Epimenides, containing statues of the Olympian Zous and Aphrodite; next came the tombs of Cy nortas, Castor, Idas, and Lyncens, and a temple of Core Soteira. The other buildings along this street or in this direction, if there was no street, were the temple of Apollo Carneius, who was worshipped here before the Dorian invasion,-a statue of Apollo Aphetaeus,-a quadrangular place surrounded with colonnades, where small-wares ( $\langle\hat{\omega} \pi o s$ ) were anciently sold,-an altar sacred to Zeus, Athena, and the Dioscuri, all surnamed Ambulii. Opposite was the place called Colona and the temple of Dionysus Coloratas. Near the Colona was the temple of Zeus Euanemus. On a neighbouring hill was the temple of the Argive Hera, and the temple of Hera Hypercheiria, containing an ancient wooden statue of Aphrodite Hera. To the right of this hill was a statue of Hetoemocles, who had gained the victory in the Olympic games. (Pans, iii. 12. § 10-iii. 13.) Although Pausanias does not say that the Colona was a hill, yet there can be no doubt of the fact, as колava is the Doric for ко入बom, a hill. This height and the one upon which the temple of Hera stood are evidently the heights NW. of the village of Prychiko between the Eurotas and the plain to the S . of the theatre (Map, C.).

After describing the streets leading from the Agora to the S. and SE. Pausanias next mentions a third street, running westward from the Agora. It led past the theatre to the royal sepulchres of the Agiadae. In front of the theatre were the tombs of Pansanias and Leonidas (iii. 14. § 1).

From the theatre Pausanias prubably went by the hollow way to the Eurotas, for he says that near the Sepulchres of the Agiadse was the Lesche of the Crotani, and that the Crotani were a portion of the Pitanatae. It would appear from a passage in Athenaeus (i. p. 31) that Pitane was in the neighbourhood of the Oenus; and its proximity to the Eurotas has been already shown. [See above, p. 1026, a.] It is not improbable, as Curtius observes, that Pitane lay partly within and partly without the city, like the Cerameicus at Athens. After proceeding to the tomb of Taenarus, and the sanctuaries of Poseidon Hippocarius and the Aeginetan Artemis, Pausanias returns to the Lesche, near which was the temple of Artemis Lssoria, also called Limnaea. Issorium, which is known as a stronghold in the neighbourbood of Pitane (Polyaen. ii. 1. § 14; Plut. Ages. 32), is supposed by Cartius to be the hill to the north of the Acropolis (Map, C.). Leake, as we have already seen, regards this hill as the Acropolis itself, and identifies the Issoriam with the height above the ruined amphitheatre or circus. Pausanias next mentions the temples of Thetis, of Demeter Chthonia, of Sarapis, and of the Olympian Zeus. He then reached the Dromus, which was used in his day as a place for running. It extended along the stream southwards, and contained gym.
nasia, one of which was dedicated by a certain Eurycles. The Roman amphitheatre and the stadium, of which the remains have been already described, were included in the Dromus. In the Dromus was a statue of Hercules, near which, but outside the Dromus, was the house of Menelaus The Dromus must have formed part of Pitane, as Menelaus is called a Pitanatan. (Hessch. a. v.) Proceeding from the Dromus occurred the temples of the Dioscuri, of the Graces, of Eileithyia, of Apollo Carneius, and of Artemis Hegemone ; on the right of the Dromus was a statue of Asclepius Agnitas; at the beginning of the Dromus there were statues of the Dioscuri Aphetarii; and a little further the heroum of Alcon and the temple of Poseidon Domatites. (Paus. iii. 14. §si 2-7.)

South of the Dromus was a broader level, which was called Platanistas, from the plane-trees with which it was thickly planted. It is described as a round island, formed by streams of running water, and was entered by two bridges, on each of which there was a statue of Hercules at one end and of Lycurgus at the other. Two divisions of the Spartan Ephebi were accustomed to cross these bridges and fight with one another in the Plataniston; and, though they had no arms, they frequently inflicted severe wounds upon one another. (Paus. iii. 15. §8, seq.; Lucian, Anachars. 38; Cic. Tusc. Qnaest. v. 27.) The running streams surmunding the P'lataniston were the canals of the Trypiotiko, which were fed by several springs in the neighbourbood, and flowed into the Eurotas. Outside the city was the district called Phoebueum, where each division of the Ephebi sacrificed the night before the contest. The Phoebaeum occupied the narrow corner south of the Plataniston formed by the Trypiotiko and the Eurotas. Pausanias describes it as near Therapne, which was situated upon the Menelaium, or group of hills upon the other side of the Eurotas, mentioned below. The proximity of the Phoebaeum to Therapne is mentioned in another passage of Pausanias (iii. 19. $\S 20$ ), and by Herodotus (vi. 61). The heroum of Cynisca, the first female who conquered in the chariotrace in the Olympic games, stood close to the Platiniston, which was bordered upon one side by a colonnade. Behind this colonnade there were several heroic monuments, among which were those of Alcimus, Enaraephorus, of Dorceus, with the fountain Dorceia, and of Sebrus. Near the latter was the sepulchre of the poet Alcman; this was followed by the sanctuary of Helena and that of Hercules, with the monument of Oeonus, whose death he here avenged by slaying the sons of Hippocoon. The temple of Hercules was close to the city walls. (Pans. iii. 14. § 8-15. § 5.) Since the poet Alcman, whose tomb was in this district, is described as a citizen of Mesoa [Dict. of Biogr., art. AlcMax], it is probable that this was the position of Mesom, the name of which might indicate a tract lying betweentworivers.
 Steph. B. s. v. Méativn.)

After reaching the SE. extremity of the city, Pausanias returns to the Dromus. Here be mentinus two ways: the one to the right leading to a temple of Athena Axiopoenas, and the other to the left to another temple of Athena, founded by Theras, near which was a temple of Hipposthenes, and an ancient wooden statue of Enyalius in fetters. He then describes, but without giving any indication of its position, the painted Lesche, with its surmunding heroa of Cadmus, Oeolycus, Aegeus, and Amphilo-
chus, and the temple of Hera Aegophagus. He afterwards returns to the theatre, and mentions the different monuments in its neighbourhood; among which were a temple of Poseidon Genethlins, heroa of Cleodacus and Oebalus, a temple of Asclepius, near the Booneta, the most celebrated of all the temples of this god in Sparta, with the heroum of Teleclus on its left ; on a height not far distant, an ancient temple of Aphrodite armed, upon an upper story of which was a second temple of Aphrodite Morpho; in its neighbourhood was a temple of Hilacira and Phoebe, containing their statues, and an egg suspended from the roof, said to have been that of Leda. Pausanias next mentions a house, named Chiton, in which was woven the robe for the Amyciaean Apollo; and on the way towards the city gates the heroa of Cheilon and Athenaens. Near the Chiton was the house of Phormion, who hospitably entertained the Dioscuri when they entered the city as strangers (Paus. iii. 15. § 6-16. § 4.) From these indications we may suppose that the Amyclaean road issued from this gate, and it may therefore be placed in the sonthern part of the city. In that case the double temple of Aphrodite probably stood upon one of the heights of New Sparta.

Pausanias next mentions a temple of Lycurgus ; behind it the tomb of his son Eucosmus, and an altar of Lathria and Alexandra : opporite the temple were monuments of Theopompus and Eurybiades, and the heroum of Astrabacus. In the place called Linnaeum stood the temples of Artemis Orthia and Leto. This temple of Artemis Orthia was, as we have already remarked, the common place of meeting for the four villages of Pitane, Mesoa, Cynosura, and Limnae. (Pans.iii. 16. § 6, seq.) Limnae was partly in the city and partly in the saburbs. Its position to the $\mathbf{N}$. of the Dromus has been mentioned above ; and, if an emendation in a passage of Strabo be correct, it also included a district on the left bank of the Enrotas, in the direction of Mt. Thornax ( $\tau \dot{\delta} \boldsymbol{\Lambda} \mu \mu \nu a i o y ~$ катà $\tau \delta \nu[\Theta \delta \rho v a] \kappa a$, Meineke's emendation instead of $\left[\Theta_{\rho \bar{q}}\right] \kappa a$, Strab. viii. p. 364).

The most ancient topographical information respecting Sparta is contained in the answer of the Delphic oracle to Lycurgus. The oracle is reported to have directed the lawgiver to erect temples to Zeus and Athena, and to fix the seat of the senate and kings between the Babyca and Cnacion. (Plut. Lyc. 6.) These names were obsolete in the time of Plutarch. He says that the Cnacion was the Oenus, now the Kelefina; and he also appears to have considered the Babyca a river, though the text is not clear; in that case the Babyca must be the Trypiotilo, which forms the southern boundary of the city. It appears, however, from the same passage of Plutarch, that Aristotle regarded the Babyca as a bridge, and only the Cnacion as a river; whence he would seem to have given the name of Cuacion to the Trypiotiko, and that of Babyca to the bridge over the Eurotas.

The left, or eastern bank of the Eurotas, was not ocenpied by any part of Sparta. When Epaminondas invaded Laconia in B. C. 370 he marched down the left bank of the Eurotas till he reached the foot of the bridge which led through the hollow way into the city. But he did not attempt to force the passage across the bridge; and he saw on the other side a body of armed men drawn up in the temple of Athena Alea. He therefore continued his march along the left bank of the river till he arrived opposite to Amyclae, where he crossed the river. (Xen. Hell.
vi. 5. § 27.) The account of Xenophon illustrates a prossage of Pausanias. The latter writer, in describing (iii. 19. § 7) the road to Therapne, mentions a statue of Athena Alea as standing between the city and a temple of Zeus Plusius, above the right bank of the Eurotas, at the point where the river was crossed; and as only one bridge across the Eurotas is mentioned by ancient writers, there can be no doubt that the rosd to Therapne crocsed the bridge which Xenophon speaks of, and the remains of which are still extant. Therapne stood upon the Menelaium or Mount Menelaius, which rose abruptly from the left hand of the river opposite the south-eastern extremity of Sparta. (Mevendiov, Polyb. v. 22; Meve入deiov, Steph. B. 8. v.; Menelaius Mons, Liv. xxxiv. 28.) The Menelaium has been compared to the Janiculum of Rome, and rises about 760 feet above the Eurntas. It derived its name from a temple of Menelaus, containing the tombs of Menelans and Helen, whither solemn processions of men and women were accustomed to ropair, the men imploring Menelaus to grant them bravery and success in war, the women invoking Helen to bestow beauty upon them and their children. (Paus. iii. 19. § 9 ; Herod. vi. 61; Isocr. Encom. Hel. 17; Hessch. 8. v. 'E入ivia, Өєpazvatifia.) The foundations of this temple were discovered in 1834 by Ross, who foand amongst the ruins several small figures in clay, representing men in military costume and women in long robes, probably dedicatory offerings made by the poorer clasises to Menelaus and Helen. (Ross, Wanderungen in Griechenland, vol. ii. p. 13, seq.) The temple of Menelaus is expressly said to have been situated in Therapiee ( $\Theta e \rho d \pi v \eta$, Oepderval; Theramne, Plin. iv. 5. s. 8), which was one of the most ancient and venerable places in the middle valley of the Eurotas. It was said to have derived its name from a daughter of Lelex (Paus. iii. 19. § 9), and was the Achaean citadel of the district. It is described by the puets as the lofty well-towered Therapne, surrounded by thick woods (Pind. Isthm. i. 31; Coluth. 225), where slept the Dioscuri, the guardians of Sparta. (Pind. Nem. x. 55.) Here was the fountain of Messeis, the water of which the captive women had to carry (Paus. iii. 20. § 1; Hom. Il. vi. 457); and it was probably upon this height that the temple of Menelaus stood, which excited the astonishment of Telemachus in the Odyssey. Hence Therapne is said to have been in Sparta, or is mentioned as sy-

 Schol. ad A poll. Rhod. ii. 162, Pind. Jsthm. i. 31.) It is probable that further excavations upon this spot would bring to light some tombs of the beroic ages. The Phoebaeum, which has been already described as the open space on the right bank of the Eurotas [see p. 1028, b.], contained a temple of the Dioscuri. Not far from this place was the temple of Poseidon, surnamed Gaezochus. (Paus. iii. 20. § 2.)

After the power of Sparta was destroyed by the battle of Leuctra, its territory was exposed to invasion and the city to attack. The first time that an enemy appeared before Sparta was when Epaminondas invaded Laconia in B. C. 390, as already related. After crossing the river opposite Amyclae, he marched against the city. His cavalry advanced as far as the temple of Puseidon Gaeaochns, which we have seen from Pausanias was in the Phoebarum. We also learn from Xenophon that the Hippodrome was
in the neighbonrhood of the temple of Poseidon, and consequently must not be confounded with the Dromus. The Thebans did not advance further, for they were driven back by a body of picked hoplites, whom Agesilaus had placed in ambush in the sanctuary of the Tyndaridae (Dioscuri), which we likewise know from Pausanias was in the Phoebaeum. (Xen. Hell. vi. 5. §§ 31, 32.) In в. c. 362 Epaminondas made a daring attempt to surprise Sparta, and actually penetrated into the market-place; but the Spartans having received intelligence of his approach, the city had been put into a state of defence, and Epaminondas again withdrew without venturing upon an assault. (Xen. Hell. vii. 5. §§ 11-14; Polyb. ix. 8; Diod. xv. 83.) In B. c. 218 Philip unexpectedly entered Laconia, descended the vale of the Eurotas by the left bank of the river, passing by Sparta, and then laid waste the whole country as far as Taenarus and Malea. Lycurgus, the Spartan king, resolved to intercept him on his return: he occupied the heights of the Menelaium with a body of 2000 men, ordered the remaining forces of Sparta to be ready to take up their position between the city and the western bank of the river, and at the same time, by means of a dam, laid the low ground in that part under water.

Philip, however, contrary to the expectation of Lycurgus, stormed the Menelaium, and brought his whole army safely through the pass, and encamped two stadia above the city. (Polyb. v. 17-24.) In b. c. 195 Quinctius Flamininus attacked Sparta, because Nabis, the tyrant of the city, refused obedience to the terms which the Roman general imposed. With an army of 50,000 men Flamininus assaulted the city on its three undefended sides of Phcebaeum, Dictynnaeum, and Heptagoniae. He forced his way into the city, and after overcoming the resistance which he met with in the narrow ways at the entrance of the city, marched along the broad road (probably the Aphetais) leading to the citadel and the surrounding beights. Thereupon Nabis set fire to the buildings nearest to the city walls, which compelled the Romans to retreat. But the main object of Flamininus had been answered, for three days afterwards Nabis sent his son-in-law to implore peace. (Liv. xxxiv. 38, 39.) The position of the Phoebaeum has been already explained. The Dictynnaeum was so called from the temple of Artemis Dictynna, which Pausanias describes as situated at the end of the Aphetais, close to the walls of the city (iii. 12. §8). Leake thinks that the name of the village of Kalagonia may be a

corruption of Heptagoniae; but it is more probable that the Heptagonise lay further west in the direction of Mistri, as it was evidently the object of Flamininus to attack the city in different quarters.

The small stream which encloses Sparta on the south, now called the Trypütiko or river of Magula, is probably the ancient Tiasa (Tíaoa), upon which stwod the sanctuary of Phaiena and Cleta, and across which was the road to Amyclae. (l'aus. iii. 18. § 6.) Leake, however, gives the name of Tiass to the Pandeleimona, the next wrrent southwards falling into the Eurotas.

With respect to the gates of Sparta, the most important was the one opposite the bridge of the Eurotas: it was probably called the gate to Therapne. Livy mentions two others, one leading to the Messenian town of Pharae, and the other to Muunt Barbuothenes (xxxv. 30). The furmer must have been upon the western side of the city, near the village of Maguila. Of the southern gates the most important was the one leading to Amyclae.

In this article it has not been attempted to give any account of the political history of Sparta, which forms a prominent part of Grecian history, and cannot be narrated in this work at sufficient length to be of any value to the student. A few remarks upin the subject are given under Laconia.

The modern authority chietly fullowed in drawing up the preceding account of the topography of Sparta is Curtius, Peloponnesos, vol. ii. p. 219, seq. Valuable information has also been derived from Leake, Morea, rol. i. p. 150, seq., Peloponnesiaca, p. 129, seq. See also Mure, Tour in Greece, vol. ii. p. 220. seq.; Ross, Wanderungen in Griechenland, vol. ii. p. 11, seq.; Expedition scientifiupe de Morée, vol. ii. p. 61, seq.: Boblaye, Recherches, gc., p. 78, seq.; Beulé, E'tules sur le Peloponise, p. 49, seq.

SPABTATIUS CAMPUS (之тартdpiov rediov, Strab. iii. p. 160), a district near Carthago Nova in Hispania Tarraconensis, 100 miles long and 30 broad, which produced the peculiar kind of grass called spartum, used for making ropes, mats, \&c. (Plin. xix. 2. s. 8 ) It is the stipa tenacissima of Linnaeus; and the Spaniards, by whom it is called esparto, still manufacture it for the same purposes as those described by Pliny. It is a thin wiry rush, which is cut and dried like hay, and then soaked in water and plaited. It is very strong and lasting, and the manufacture still employs a large number of women and children. It was no doubt the material of which the Iberian whips mentioned by Horace (Epod. iv. 3) were composed. (See Ford, Handb. of Spain, p. 168.) From this district Carthago Nova itself obtained the surname of "Spartaria." [T. H. D.]

SPARTO'LUS ( $\Sigma \pi \alpha \varphi \tau \omega \lambda o s$, Thuc. ii. 79, г. 18; Steph. B.), a town of the Chalcidic peninsula, at no great distance from Olyninus (Isaeus, de Dicaengen. Haered. p. 55), under the walls of which the Athenian forces were routed, B. C. 249 . It belonged to the Bottiseans, and was perhaps their capital, and was of sufficient importance to be mentioned in the treaty between Sparta and Athens in the tenth year of the Peloponnesian War. [E.B.J.]

SPAUTA (乏̃aüra), a lake in Media Atropatene, which is intensely salt, so as to cause the itch on the bodies of persons who have unwittingly bathed in it, with injury also to their clothes (Strab. xi. p. 523). Its present name is the Sea of Urumich. Its earliest Armenian name is said to have been Kaputan, or Kuputan Chous, whence the Greek form would seem
to have been modified. (I. Ingigi, Archacol. Ar men. i. p. 160; St. Martin, Mémoires, i. p. 59.) It is probably the same as the Maptianخ तíup $^{\prime}$ of Ptolemy (vi. 2. § 1i). Many travellers have visited it in modern times. (Tavernier, i. ch. 4; Morier, Sec. Voy. ii. p. 179.)

SPELAEUN, a place in Macedonia which Livy says was near Pella ( $x / v .33$ ).

SPELUNCA (Sperlonyia), a place on the coast of Latium (in the more extemued seuse of that name), situated between Tarracina and Caieta. The emperor Tiberius had a villa there, which derived its name from a natural cave or grotto, in which the emperor used to dine, and where he on one occasion very nearly lost his life, by the falling in of the roof of the cavern (Tac. Ann. iv. 59 ; Suet. Tib. 39). The villa is not again mentioned, but it would appear that a village had grown up around it, as Pliny mentions it in describing the coast ("locus, Speluncae," Plin. iii. 5. s. 9), and its memory is still preserved by a village named Sperlonga, on a rocky point about 8 miles W. of Ciaëta. Some Roman remains are still visible there, and the care belonging to the Imperial villa may be identified by some remains of architectural decoration still attached to it (Craven's Abruzzi, vol. i. p. 73). [E. H. B.]

SPEUS ARTE'MIDOS, the present grottoes of Beni-hassan, was situated N. of Antinoe, in Middle Aecypt, on the eastern bank of the Nile, in lat. $27^{\circ}$ $40^{\circ} \mathrm{N}$. The name is variously written: Peos in the Itinerary of Antoninus (p. 167, Wesseling); P'ois in the Notitia Imperii; but Speos is probably the true form, implying an excavation ( $\sigma \pi$ eos) in the rocks. Speos Artenidos was rediscovered by the French and Tuscan expedition into Aegypt early in the present century. It was constructed by some of the Pharaohs of the 18th dynasty in a desert-valley running into the chain of Arabian hills. The structure as a whole consists of a teinple, and of between thirty and forty catacombs. The temple is dedicated to Pasht, Bubastis, the Artemis of the Greeks. (Herod. ii. 58.) The catacombs appear to have served as the general necropolis of the Hermopolite nome. For although Hermopolis and its district lay on the western bank of the Nile, yet as the eastern hills at this spot approach very closely to the stream, while the western hills recede from it, it was more convenient to ferry the dead over the river than to transport them across the sands. Some of these catacombs were appropriated to the mummies of animals, cats especially, which were worshipped by the Hermopolitans. In the general cemetery two of these catacombs merit particular attention : (1) the tomb of Neoopth, a military chief in the reign of Sesortasen I. and of his wife Rotei; (2) that of Amenheme, of nearly the same age, and of very similar construction. The tomb of Neoopth, or, as it is more usually denominated, of Rotei, has in front an architrave excavated from the rock, and supported by two columns, each 23 feet high, with sisteen fluted facelets. The columns have neither base nor capital; but between the architrave and the head of the column a square abacus is inserted. A denteled cornice runs over the architrave. The effect of the structure, although it is hardly detached from the rock, is light and graceful. The chamber or crypt is 30 feet square. and its roof is divided into three raults by two architraves, each of which was originally supported by a single column, now vanished. The walls are painted in compartments of the most brilliant coluurs, and the
draving is generally in the best style of Aegyptian art. They represent various events in the life of Neoopth. From the tomb of Rotei, indeed, might be compiled a very copious record of the domestic life of the Aegyptians. On its walls are depicted, among many others, the following subjects: the return of warriors with their captives; wrestlers; hunting wild beasts and deer; the Nile boats, including the Bari or high-prowed barge, and fisheries; granaries and tlax-dressing; spinning and weaving; games with the lance, the ball, and the discus; and the rites of sepulture. The tomb of Amenheme is covered also with representations of men in various postures of wrestling; and the other grottoes are not less interesting for their portraitures of civil and domestic life. (Wilkinson, Modern Egypt and Thebes; Rosellini, Mon. Civ. vol. i.; Kenrick, Anc. Egypt, vol. i. p. 47, foll.)
[W.B.D.]
 the S. of Thessaly, rising in Mount Tymphrestus (Strab. ix. p. 433), and flowing into the Maliac gulf. The Dryopes and Aenianes dwelt in the upper part of its course till it entered the plain of Malis, through which it flowed to the sea. In ancient times it joined the sea at Anticyra; and the rivers Dyras, Melas, and Asopas fell separately into the sea to the $S$. of the Spercheius. (Herod. vii. 198.) But the Spercheius has changed its course, and now falls into the sea much further south, about a mile from Thermopylae. The Dyras and Melas now anite their streams, and fall into the Spercheius, as does also the Anopus. [Thermopylae.] Spercheius is celebrated in mythology as a river-god [Lict. of Biogr. e. v.], and is mentioned in connection with Achilles. (Hom. IL. xvii. 142.) Its name also frequently occurs in the other poets. (Aesch. Pers. 486; Sophocl. Phil. 722; Virg. Georg. ii. 485; Lucan, vi. 366.) (Leake, Northern Greece, vol. ii. pp. 8, 11, 15.)

SPERCHIAE, a place in Thessaly, which, according to the description of Livy (xxxii. 13), would seem to have been situated at no great distance from the sources of the Spercheius. Ptolemy (iii. 13. § 17) mentions a place Spercheis between Echinas and Thebes in Phthiotis; and Pliny (iv. 7. s. 13) places Sperchios in Doris. It is prubable that these three names indicate the same place, but that its real position was unknown.

SPHACTE'RIA. [Prlus.]
SPHAF'RIA. [Calaureia.]
SPHA'GIAE. [Pylus.]
SPHENDALE. [ATtica, p. 330, a.]
SPHENTZANIUM, a place in Dalmatia, SE. of the road from Scodra to Naissus. (Ann. Comn. 9. p. 252). Protably the modern Pecciana [T. H. D.]

SPHETTUS. [ATtica, p. 332, b.]
SPHI'NGIUM. [Boeotia, p. 412, a.]
SPINA ( $\Sigma \pi i v \alpha r \eta s$ and $\Sigma \pi ı v i \tau \eta s)$, an ancient city of Italy, situated near the southernmost mouth of the Padus, within the limits of Gallia Cisalpina. It was, according to Dionysius, a Pelasgic settlement, and ore of the most flourishing cities founded by that people in ltaly, enjoying for a considerable time the dominion of the Adriatic, and deriving great wealth from its commercial relations, so that the citizens had a treasury at Delphi, which they adorned with costly offerings. They were subsequently expelled from their city by an overwhelming force of barburians, and compelled to abandon Italy. (Dionys. i. 18, 28.) Strabo gives a similar account of the naval
greatness of Spina, as well as of its treasury at Delphi; but he calls it a Greek (Hellenic) city; and Scylax, who notices only Greek, or reputed Greek, cities, mentions Spina apparently as such. Its Greek origin is confirmed also by Justin, whose anthority, however, is not worth mach. (Strab. v. p. 214, ix. p. 421 ; Scyl. p. 6. § 19; Justin, xx. 1 ; Plin. iii. 16. 8. 20.) But these authorities, as well as the fact that it had a treasury at Delphi, which is undoubtedly historical, seem to exclude the supposition that it was an Etruscan city, like the neighbouring Adria; and whatever be the foundation of the story of the old Pelavgic settlement, there seems no reason to doubt that it was really a Groek colony, though we have no account of the period of its establishment. Scylax alludes to it as still existing in his time: hence it is clear that the barbarians who are said by Dionysius to have driven out the inhabitants, can be no other than the neighbouring Gauls; and that the period of its destruction was not very long before the conquest of Cisalpine Gaal by the Romans. It does not appear to have ever been rebuilt or become a Roman town. Strabo speaks of it as in his time a mere village; and Pliny repeatedly alludes to it as a place no longer in existence. (Plin. iii. 16. 2. 20, 17.s.21; Strab. v. p. 214.) No subsequent trace of it is found, and its site has never been ascertained. We know, however, that it must have been situated on or near the southernmost arm of the Padus, which derived from it the name of Spiseticum Osticy, and which probably corresponded with the modern Po di Primaro. [Padus.] But the site of Spina must now be sought far from the sea : Strabo tells us that even in his time it was 90 stadia ( 11 miles) from the coast; though it was said to have been originally situated on the sea. It is probably now 4 or 5 miles further inland; but the changes which have taken place in the channels of the rivers, as well as the vast accumulations of alluvial soil, render it almost hopeless to look for its site.

Pliny tells us that the Spinetic branch of the Padus was the one which was otherwise calied Eridanus; but it is probable that this was merely one of the attempts to connect the mythical Eridanas with the actual Padus, by applying its name to one particular branch of the existing river. It is, however, probable that the Spinetic channel was, in very early times, one of the principal mouths of the river, and much more considerable than it afterwards became. [ $\mathrm{P}_{\mathrm{A}}$ Dus.]
[E. H. B.]
Sl'INAE, a place in Britannia Romana, E. of Aqua Solis (Bath). (Itin. Ant. pp. 485, 486.) Now the village of Spene near Neubury in Berkshire, which has its name of new in regard to Spinae, the ancient borough. (Camden, p. 166.) [T. H. D.]

SPIRAEUM (Plin. iv. 5. s. 9) or SPEIRAEUM (Ptol. iii. 16. § 12), a promontory on the eastern coust of Peloponnesus upon the confines of the territories of Corinth and Epidaurus. For detajls, see Vol. I. p. 685, a

SYOLE'TIUM (Ermantriov: Eth. Spoletinus: Spoleto), a city of Umbria, situated between Interumna (Terni) and Trebia (Trevi), about 9 miles S. of the sources of the Clitumnus. Its name is not mentioned in history as an Umbrian town, nor have we any account of its existence previous to the establishment of the Roman colony, which was settled there in B. c. 240, just after the close of the First Punic War (Liv. Epit. xx.; Vell. Pat. i. 14). It was a Colonia Latina, and its name is repeatedly meutioned during the Second Punic War.

In B. c. 217, just after the battle at the Lake Trusimenus, Hannibal advanced to the gates of Spoletium, and made an assault upon the city, but was repuised with so much vigour by the colonists, that he drew off his forces and crossed the Apennines into Picenum. (Liv. xxii. 9.) A few years later (b. c. 209) Spoletium was one of the colonies which distinguished themselves by their fide'ity and zeal in the service of Rome, at the most trying monent of the war. (Id. xxvii. 10.) For some time after this we hear but little of Spoletium, thongh it seems to have been a flourishing municipal town. In b. c. 167 it was selected by the senate as the place of confinement of Gentius, king of Illyris, and his sons; but the citizens declined to take charge of them, and they were transferred to Ívuvinm (Liv. xlv. 43). But in the civil war between Marius and Sulla it suffered severely. A battle was fought beneath its walls in B. c. 82 , between Pompeius and Crassus, the generals of Sulla, and Carrinas, the lieutenant of Carbo, in which the latter was defeated, and compelled to take refuge in the city. (Appian, B. C. i. 89.) After the victory of Sulla, Spuletium was one of the places severely punished, all its territory being confiscated, apparently for the settlement of a military colony. (Flor. iii. 21 ; Zumpt, de Colon. p. 254.) Florus calls Spoletium at this time one of the "municipia Italine splendidissima;" but this is probably a rhetorical exuggeration. Cicero, however, terms it, in reference to a somewhat earlier periox," colonia Latina in primis firma et illustris." (Cic. pro Balb. 21.) It became a municipium (in common with the other Latin colonies) by virtue of the Lex Julia; and does not appear to have subsequently obtained the title of a colony, though it received a fresh accession of settlers. (Lib. Col. p. 225; Zumpt, l.c.) It is again mentioned during the Perusian War (b.c. 41), as affording a retreat to Munatius Plancus when he was defeated by Octavian (Appian, B. C. v. 33); and seems to have continued under the Empire to be a flourishing municipal town, though rarely mentioned in history. (Strab. v. p. 227; Plin. iii. 14. 8. 19; Ptol. iii. 1. § 54 ; Orell. Inscr. 1100, 1103, 3966.) It was at or near Spoletium that the emperor Aemilianns was encamped, when the death of his rivals Gallus and Volusianus gave him temporary possession of the empire; and it was there also that he was himself put to death by his soldiers, after a reign of only three months. (Vict. Epit. 31.) Spoletium is again mentioned during the Gothic Wars, after the fall of the Western Empire, when it was taken by the Gothic king Totila (Procop. B. G. iii. 12), who partially destroyed its furtifications; but these were re-tored by Nirses (lb. iv. 33). It was at this time regarded as a strong fortress, and was a place of importance on that account. Under the Lombards it became the capital of a duchy (about A. D. 570), the dukes of which coon rendered themselves altogether independent of the Lombard kings, and established their authority over a considerable part of Central Iualy. The duchy of Spoleto did not cease to exist till the 12th century.

Spoletium was not situated on the Via Flaminia, properly so called. That line of highroad proceeded from Narnia to Mevania (Becagna) by a more direct course through Carsulae, thus leaving on the right hand the two important towns of Interamma and Spoletium. (Strab. v. p. 227.) We learn from Tacitus that this continued to be the line of the

Flaminian Way as late as the time of Vespasian (Tac. Hist. iii. 60): but at a later period the road through Interamna and Spoletium came into general use, and is the one given in the Itineraries. (Itin. Ant. p. 125 ; Itin. Hier. p. 613.) This must have followed very nearly the same line with the modern road from Rome to Perugia, which crosses a steep mountain pass, called Monte Somma, between Spoleto and Terni; and this was probably the reason that this line was avoided in the first instance by the Via Flaminia. But there must always have been a branch road to Spoletium. and from thence, as we learn from Suetonius (Vesp. 1), another branch led to Nursia in the upper valley of the Nar.

Spoleto is still a tolerably flourishing place, with the rank of a city. It has several Roman remains, among which the most interesting is an arch commonly called the Porta dAsmibale, as being supposed to be the gate of the city from whence that general was repulsed. There is, however, no foundation for this: and it is doubtful whether the arch was a gateway at all. Some remains of an ancient theatre are still visible, and portions of two or three ancient temples are built into the walls of modern churches. A noble aqueduct, by which the city is still supplied with water, though often ascribed to the Romans, is not really earlier than the time of the Lombard dukes. Some remains of the palare inhabited by the latter, but first built by Theodoric. are also visible in the citadel which crowns the hill above the town.
"E. H. B.] group of islands in the Aegaean, Cretan, and Carpathian seas, so called because they were scattered throughout these seas, in opposition to the Cyclades, which lay round Delos in a circle. But the distinction between these groups was not accurately observed, and we find several islands sometimes ascribed to the Cyclades, and sometimes to the Sporades. The islands usually included among the Cyclades are given under that article. [Vol. I. p. 723.] Scylax makes two groups of Cyclades; but his southern group, which he places off the coast of Laconia and near Crete, are the Sporades of other writers: in this southern group Scylax specifies. Melos, Cimolos, Oliaros, Sicinos, Thera, Anaphe, Astypalaea (p. 18, ed. Hudson). Strabo first mentions among the Sporades the islands lying off Crete, Thera, Anaphe, Therasia, Ins, Sicinos, Lagusa, Pholegandros (x. pp. 484, 485). Then, after describing the Cyclades, he resumes his enumeration of the Sporades, - Amorgos, Lebinthos, Leria. Patmos, the Corassiae, Icaria. Astypalaea, Telos, Chalcia, Nisyros, Casos, the Calydnae (x. pp. 487489). Pling (iv. 12. s. 23) gives a still longer list. An account of each island is given under its own name.
STABA'TIO, in Gallia, a name which nccurs in the Table on a road from Vienna (Vienne) past Cularo (Grenable) to the Alpis Cottia (Mont Genevre). Stabatio is placed between Durotincum and Alpis Cottia. D'Anville fixed Stabatio at Monestier or Monetier near Briançon.
[G. L. $]$
STA'BIAE (ETábial: Eth. Stabianus; Rn. near Castell'a Mare), a city of Campania, situated at the foot of the Mons Lactarius, about 4 miles S. of Pompeii, and a mile from the sea. The first mention of it in histury occurs during the Social War (b. c. 90), when it was taken by the Samnite general C. Papius (Appian, B. C. i. 42). But it was retaken by Sulla the following year (B. c. 89), and entirely destroyed
(Plin. iii. 5. s. 9). Nor was it ever restored, so as to resume the rank of a town; Pliny tells us that it was in his time a mere village, and the name is not mentioned by any of the other geographers. It is, however, incidentally noticed both by Ovid and Columella (Ovid. Met. xv. 711 ; Colum. R.R.x.133), and seems to have been, in common with the whole coast of the Bay of Naples, a favourite locality for villas. Ainong others Pomponianus, the friend of the elder Pliny, had a villa there, where the great naturalist sought refuge during the celebratel eruption of Vesuvius in A. D. 79, and where he perished, suffucated by the cinders and sulphureous fumes (Plin. Ep. vi. 16). It is certain that Stabiae was on this occasion buried under the ashes and cinders of the volcano, though less completely than Pompeii and Herculaneum; but the site was again inhabited, and the name was retained throughout the period of the Roman Empire, though it appears to have never again risen into a place of any consideration. It was chiefly resorted to by invalids and others, on account of its neighbourhood to the Mons Lactarius, for the purpose of adopting a milk diet (Galen, de Meth. Med. v. 12 ; Cassiod. Var. xi. 10; Symmach. Ep. vi. 17). Its name is found also in the Tubula, and was preserved in that of Castell 'a Mare di Stabia, borne by the modern town. The Stabiae of the Lower Empire seems to have been situated on the coast, in the bight of the Bay of Naples; and probably did not occupy the same site with the older town, which seems to have been situated about a mile inland at the foot of the hill of Gragnano. The exact spot was forgotten till the remains were accidentally brought to light about $\mathbf{1 7 5 0}$; and since that time excavations have been frequently made on the site, but the results are far less interesting than those of Pompeii and Herculaneum. They confirm the account of Pliny, by showing that there was no town on the spot, but merely a row of straggling villas, and these for the most part of an inferior class. They seem to have suffered severely from the earthquake of A. D. 63, which did so much d.unage to Pompeii also. (Swinburne's Travels, vol. i. p. 82.)
[E. H. B.]
STA'BULA, in Gallia, is placed by the Antonine Itin. vi. from Cambes (Gros Kembs) and aviii. from Argentovaria (Artzenheim). These distances bring us to a place between Otmarsheim and Bautzheim, where Khenanus, quoted by D'Anville, says that tracres of an old place are found.

The word Stabula meant a station or resting place for travellers. a kind of inn, as we see from a passage of Ulpian (Dig. 47. tit. 5. s. 1): "qui naves, cauponas, stabula exercent;" and the men who kept these places were " Stabularii."
[G. L.]
STA'BULUM, AD, in Gallia, is placed by the Antonine Itin. between Salsulae (Salses) and Summus P'yrenaeus, or the pass of the Pyrenees at Bellegarde. It is supposed to be Le Boulu, which looks like a part of the old name, on the left bank of the Tech. The distances in the Itin. both from Salsulae to Ad Stabulum, and from Ad Stabulum to Summus l'yrenaeus, are a great deal too much. The name, however, and the place Le Boulu on the Tech seem to fix the position of this Stabulum. [Centuriones, Ad; Stabela.]
[G. L.]
STA'BCLCM DOME'DIS (Itin. Ant. p. 331; It. Hier. p. 603), a place on the coast of Thrace. on the Via Egnatia, 18,000 paces, according to lin. Ant.. 12.000 , according to It. Hier., from Ponula, or Maximianopolis; probably the same as I'liny (iv.
11. s. 18) calls Tirida: "Oppidum fuit Tirida, Dio medis equorum stabulis dirum." This Diomedes was king of the Bistones in Thrace, and was in the habit of throwing strangers to be devoured by his savage horses, till at length he himself was punished in the same way by Hercules. (Mela, ii. 2. § 8.) Lapio places it near the modern Iassikeni.
[J. R.]
STA'BULUM NOVUM, a town probably of the Cosetani, in Hisparia Tarraconensis. (Itin. Ant. p. 390.) Variously identified with Villanueda de Sitges, Villanueva, and Solivela, or Sagarre.
[T. H. D.]
STACHIR ( $\Sigma r d \chi \in \varphi$, P'tol. iv. 6. §§ 7 and 8), s river on the W. coast of Libya Interior, which rose in Mount Ryssadium. Not far from its source it formed a lake named Clonia, and after flowing in a westerly direction, discharged itself into the Sinus Hesperius, to the SE. of the promontory of Ryssadium. It is probably the same river which Pliny (v. 1. s. 1) calls Salsus, and may be the modera St. John or St Antonio river, also called Rio de Guaon. [T. H. D.]
STAGEIRA, STAGEIRUS (Licdyeipos, Herod. vii. 115 : Thuc. iv. 88, v. 18 ; Strab. vii. p. 331 ,
 § 10 ; Plin. iv. 17, xvi. 57), a town of Chalcidice in Macedonia, and a colony of Andros. The army of Xerxes, after passing through the plain of Syleus, passed through Stageirus to arrive at Acantbus. In the eighth year of the Peloponnesian War it surrendered to Brasidas, and two years afterwards was included in the treaty between Sparta and Athens. It was the birthplace of Aristotle. Alexander, from regard to his great teacher, restored this town, which with other Grecian colonies in that quarter had fallen into decay, when W. Thrace bad becone part of the Macedonian kingdom. (Plut. Alex. 7; Diog. Laert. v. § 4 ; Theophr. H. P. 102; Aelian, V. H. iii. 17.) But the improvement was not permanent, and no memorial of the birthplace of Aristotle remains, unless the coins inscribed 'Op0aropteov are of this place, as Eckhel (vol. ii. p. 73) supposed, on the authority of a fragment in the Geographi Minores (vol. iv. p. 42, ed. Hudson). Leake (Northern Grecce, vol. iii. p. 168) has fixed the site at Starros, which he considers to be a contraction of the old name: it is almost presumption to differ with so great an authority in comparative geography; but it may be observed that the name Stavrós or "Cross" is common enough in Greece, and Mr. Bowen (Moant Athos, fic. p. 120, London, 1852) has shown, from a comparison with the passage in Herodotus (l. c.), that the traditional beliet of the Macedonian peasants in identifying Isborve or Nizoro, as it is called by them, with Stareirus, rests upon satisfactory grounds. The position of this village, on the $S$. face of a wooded mountain which commands a view of Mt. Athos and the Aegean, is very much that of an Hellenic city, and thers are vast substructions of Hellenic masonry all around. The Epitomiser of Strabo (vii. p. 331), who lived not long before the eleventh century, has a port and island called Carbus (Káxpos) near stageirus, which is probably the island of Leftheruitha near C. Marmiri; Leake (L c.) prefers, in accordance with his views that Starros represents Stageirus, the port and island of I.ybtadidha.
[E. B. J.]
STAGNA VOLCARUM, on the coast of Gallia Narbonensis. Mela (ii. 5) speaks of the Stagna Volcarum, which he places W. of the Rhone. They are the long line of ctangs between digwes-Hurte
and Agde. separated from the land by a long, narrow, Hat, which widens near Cette, where the Mons Setius is. These lagunes are the E'tanys de Tau, de Frontignan, de Maguelone, and others. Avienus (Or. Marit. 58) mentions the Taurus or E'tang de Tau:

## " Taurum paludem namque gentiles vocant."

[Fecyi Jugum; Lentes].
[G. I..]
STALIOCA'NUS PORTUS ( $\Sigma(\tau) a \lambda \iota o \kappa a \nu \partial s \lambda_{t}$ $\mu \boldsymbol{\mu}$ ). Ptolemy (ii. 8. § 2) places this port between Gobaeum Promontorium [Gobaneum] and the mouth of the Tetus, on the carst of Gallia Lugdunensis. D'Anville (Notice, g'c.) found in a manuscript plan of the Anse du Conquet the name of Port Sliocan, N. of Cap Mahe, at the bottom of the rad of LooChrist. Lobinean in his History of Bretagne says that the name means White Tower, and that there were traces of a port there, constructed of brick and cement. Gosselin places the Staliocanus on the N. coast of Bretagne, at the outlet of the river on which Morlaix stands. It is impossible to determine which of the numerous bays on this irregular coast is Ptolemy's Staliucanus.
[G. L.]
STANACUM, a place in Noricum, on the road leading along the Danube from Augusta Vindelicorum to Carnuntum and Vindobona. (It. Ant. p. 249 ; Tab. Peut.) Its exact site is uncertain. (Comp. Muchar, Norikum, i. p. 285.) [L. S.]

STATIELLI (Eratie入lot), a tribe of Ligurians, who inhabited the northern slopes of the Apennines, on both sides of the ralley of the Bormida. Their locality is clearly fixed by that of the town of Aquae Statiellae, now Acqui, which grew up under the Ruman Empire from a mere watering place into a large and populous town, and the chief place of the surrounding district. The Statielli are mentioned by Livy in в. c. 173, as an independent tribe, who were attacked by the Roman consul, M. Popillius: after defeating them in the field, he attacked and unk their city, which Liry calls Carystus, and, not content with disarming them, sold the captives as slaves. This proceeding was severely arraigned at Rome by the tribunes, especially on the ground that the Statielli had previously been uniformly faithful to the Roman alliance; but they did not succeed in enforcing reparation (Liv. xlii. 7, 8, 9, 21). Livy writes the name Statiellates, while Decimus Brutus, who crossed their territory on his march from Mutina, B. c. 44, and addresses one of his letters to Cicero from thence, dates it " finibus Statiellensium" (Cic. ad Fam. xi. 11). Pliny, who enumerates them among the tribes of Ligurians existing in his time, calls them Statielli, and their chief town Aquae Statiellorum (Plin. iii. 5. s. 7). The site of Carystas, mentioned only by Livy, in the passage above cited, is wholly unknown. [E. H. B.]

STATO'NIA (Eratwoia: Eth. Statoniensis), a town of Southern Etruria, which is mentioned by Strabo among the smaller towns ( $\pi о \lambda(\chi \nu a t)$ in that part of Italy. (Strab. v. p. 226.) Pliny also inentions the Statoues among the municipalities of Etruria (iii. 5. s. 8), but neither author affords any nearer clue to its situation. We learn, however, that it was celebrated for its wine, which was one of the most noted of those grown in Etruria (Plin. xiv. 6. s. 8), and that there were valuable stone-quarries in its territory. (Vitruv. ii. 7. § 3.) From the terms in which Vitruvius speaks of these, it seems probable that the district of Statonia, which he calls " pratectura Statoniensis," adjoined that of Tarquinii; and buth Pliny and seneca allude to the
existence of a lake " in agro Statoniensi," in which there were floating islauds. (Plin. ii. 95. s. 96; Senec. N. Q iii. 25.) This cau hardly be any other than the smail Lago di M/ezzuno, a few miles W. of the more extensive Lago di Bulsena: we nust therefore probably look for Statonia between this and Tarquinii. But within this space several sites have been indicated as possessing traces of ancient habitation; among others, Farncse and Castro, the last of which is regarded by Cluver as the site of Statonia, and has as plausible a claim as any other. But there is nothing really to decide the point. (Cluser, Ital. p. 517 ; Dennis's Etruria, vol. i. pp. 463-468.)

STATUAS (AD), the name of two places in Pannonis, one of which was situated on the Danube, a little to the west of Bregetio (It. Ant. p. 246; Notit. Imp.), and the other further southeast, in the neighbourhood of Alisca and Alta Ripa (It. Ant. p. 244), which Muchar (Norikum, i. p. 264) identifies with Szekszard.
[L.S.]
STATUAS (AD), a town in the territory of the Contestani in Hispania Tarraconensis. (Itin. Ant. p. 400.) Variously identitied with Adsaneta and Xativa or S. F'elipe.
[T. H. D.]
S'TAVANI ( ¿ ravavol, Ptol. iii. 5. § 25), a people in European Sarmatia, at the N. foot of Mons Bodinus. Ukert (iii. 2. § 435) conjectures that we should read $\Sigma$ ithavavot, that is, Slavi, and seeks them on the lunia and the Ilmersee.
[T. H. D.]
 a town of Phrygia, between Peltae and Synnada. (Ptol. v. 2. § 25; Paus x. 27. § 1.) Kiepert (in Franz's Fünf Inschriften, p. 36) identifies it with the modern Afijum Karalissur. (Comp. Sestini, Num. Vet. p. 126.)
[L. S.]
STEI'RIA. [Attica, p. 332, a.]
STELAE ( $\sum$ riñau, Steph. B. s. v.), a Cretan city which is described by the Byzantine geographer as being near two towns, which are called, in the published editions of his work, Paraesus and Rhithymna. In Mr. Pashley's map the site is fixed at the Mohammedan village of Philippo on the route from Kasteliana (Inatus) to Hayhias Dhéka (Gortyna).
[E. B. J.]
STELLA'TIS CAMPUS was the name given to a part of the rich plain of Campania, the limits of which cannot be clearly determined, but which appears to have adjoined the "Falernus ager," and to have been situated likewise to the N . of the Vulturnus. Livy mentions it more than once during the wars of the Romans with the Samnites (ix. 44, x. 31), and again during the Second Punic War, when Hannibal found himself there by an error of his guides (Liv. xxii. 13). From his expressions it would appear to have adjoined the "Calenus ager," and apparently was the part of the plain lying between Cales and the Vulturnus. It was a part of the public lands of the Roman people, which the tribune Rullus proposed by his agrarian law to parcel out among the pooret citizens (Cic. de Leg. Agr. i. 7. ii. 31): this was for the time successfully opposed by Cicero, but the measure was carried into effect a few years later by the agrarian law of Cnesar, passed in his consulship. B. c. 59 (Suet. Caes. 20). The statement of Suetonius that the district thus named was previonsly recarded by the Romans as consecrated, is clearly negatived by the language of Cicero in the passages just referred to. The name of Stellatinus Ager seems to have been given to a district in quite another part of ltaly, forming a part of the
territory of Capena in southern Etruria. It was from this district that the Stellatine tribe derived its name (Fest. s. v. Stellatinn).
[E. H. B.]
STENA, a station in Macedonia, on the road from Tauriana (Doirrán) to Stobi (Peut. Tab.), which is evidently the pass now called Demirkapi, or "Iron Gate," where the river Axius is closely bordered by perpendicular rocks, which in one place have been excavated for the road (Leake, Northern Greece, vol. iii. p. 442.)
[E. B. J.]
STE'NTORIS LACUS (Eiteytopis $\lambda$ ( $\mu \nu \eta$, Herod. vii. 58: Acropol. p. 64), a lake on the south-east coast of Thrace, formed by the Hebrus, and opening into the Aegean near the town of Aenos. Pliny (iv. 11.s. 18) incorrectly places on it a Strstoris Portus; and Mannert conjectures that perhaps the right reading in Herodotus ( $b . c$. ) is $\lambda \iota \mu$ éva, not $\boldsymbol{\lambda}\langle\boldsymbol{\mu} \boldsymbol{\eta} \boldsymbol{\eta}$.
[J. R.]
STENUS, a river of Thrace, mentioned by Mela only (ii. 2. § 8) as near Maronea, on the south coast. The name is probably corrupt, as it occurs in the MSS. in a great variety of forms,-Stenos, Stonos, Schoenus, Scenus, Sithenos, \&cc. (See Tzschucke, ad loc.).
[J. R.]
 Eth. Erevuc ${ }^{2}$ tpios), a town in the north of Messenia, and the capital of the Dorian conquerors, built by Cresphontes. Andania had been the ancient capital of the country. (Paus. iv. 3. §7; Strab. viii. p. 361.) The town afterwards ceased to exist, but its name was given to the northern of the two Messenian plains. (Paus. iv. 33. § 4, iv. 15. § 8; Herod. ix. 64.) [Messenia, p. 341.]

STEPHANAPHANA, more correctly, perhaps, Stephani Fanum, a place in Illyris Graeca, on the Via Egnatia (Itim Hieros. p. 608). It was the
 by Justinian. (Procop. de Aed. iv. 4.) Lapie places it on the river Boscovitza.
[T.H.D.]
STEPHANE ( $\sum_{r e \phi \alpha}{ }^{2} \eta$ ), a small port town on the enast of Paphlagonia, according to Arrian (Peripl. P. E. p. 15) 180 stadis east of Cimolis, but according to Marcian (p. 72) only 150. The place was mentioned as early as the time of Hecataeus as a town of the Mariandyni (Steph. B. 8. v. Ereфavis), under the name of Stephanis. (Comp. Scylax, p. 34; Ptol. v. 4. § 2.) The modern village of Stephanio or Estifan probably occupies the site of the ancient Stephane.
[L. S.]
STEREO'NTIUM ( $\sum$ efepeórtiov), a town in Northwestern Germany, probably in the country of the Bructeri or Marsi, the exact site of which cannot be ascertained. (Ptol. ii. 11. § 27.)
[L. S.]
STIPHANE ( $\mathrm{E} \tau 1 \phi d \nu \eta$ ), a lake in the northwestern part of Pontus, in the district called Phazemonitis. The lake was entensive and abounded in fish, and its shores afforded excellent pasture (Strab. xii. p. 560.) Its modern name is Bughaz Kieus Ghieul. (Hamilton, Researches, i. p. 336. foll.)

STI'RIA. [ATtica, p. 332, a.]
 situated 120 stadia from Chacroneia, the road between the two places running across the mountains. The inhabitants of Stiris claimed descent from an Athenian colony of the Attic demus of Steiria, led by Peteis, when he was driven out of Altica by Aegeus. Pausanias describes the city as situated upon a rocky summit, with only a few wells, which did not supply water fit for drinking, which the inhabitants obtained from a fountain, four stadia below the city,
to which fountain there was a descent excavated among the rocks. The city contained in the time of Pausanias a temple of Artomis Stiritis, made of crude brick, containing two statues, one of Pentelic marble, the other of ancient workmanship, covered with bandages. (Paus. x. 35. §§ 8-10.) Stiris was one of the Phocian cities destroyed by Philip at the close of the Sacred War (Paus. x. 3. § 2); but it was afterwards rebuilt and was inhabited at the time of the visit of Pausanias. The ruins of Stiris, now called Palet khora, are situated upon a tabular height defended by precipitous rocks, about a quarter of an hour's ride from the monastery of St. Lake. The summit is surrounded with a wall of loose construction, and the suiface of the rock within the inclosure is excavated in many places for habitations. The fountain of water described by Pausaniss is probably the copions source within the walls of the monastery issuing from the side of the hill. This fountain is mentioned in an inscription fixed in the outer wall of the charch. (Leake, Northern Greece, vol. ii. p. 528, seq.)

STLUPI or STLUPPI (Zir ii. 16. (17.) § 9), a place in Liburnia. The inhabitants are called Stlupini by Pliny (iii. 21. s. 25). Perhaps the present Sluni.
[T. H. D.]
STOBI (之 ${ }^{2} \delta 80$, Strab. vii. p. 329, Fr. 4, riii. p. 389; Ptol. iii. 13. §4; Liv. xxxiii. 19, xxxix. 59. xl. 21, xlv. 29; Plin. iv. 17), a town in the NW. of Paeonia in Macedonia, which appears to have been a place of some importance under the Macedonian kings, although probably it had been greatly reduced by the incursions of the Dardani, when Philip had an intention of founding a new city near it in memory of a victory over these troublesome neighbours, and which he proposed to call Perseis, in honour of his son. At the Roman conquest, Stobi was made the place of deposit of salt, for the supply of the Dardani, the monopoly of which was given to the Third Macedonia. In the time of Pliny (L c.) Stobi was a municipal town, but probably as late as the time of Heliogabalus it was made a "colonia." When about A. D. 400 Macedonia was under a "consular," Stobi became the chief town of Macedonia II or Salutaris (Marquardt, in Becker's Röm. Alter. vol. iii. pt. i. p. 118). According to the Tabular Itinerary it stood 47 M. P. from Heracleia of Lyncus, which was in the Via Egnatia, and 55 M. P. from Tauriana, and was therefore probably in the direct road from Heracleia to Serdica. The position mast have been therefore on the Erigon, 10 or 12 miles above the junction of that river with the Axius, a situation which agrees with that of Livy, who describes it as belonging to Deariopus of Paeonia, which was watered by the Erigon. Stobi was a point from which four roads issued. (Peut. Tab.) One proceeded NW. to Scupi, and from thence to Naissus on the great SE. route from Viminacium on the Danube to Byrantium; the second NE. to Serdica, 100 M. P. SE. of Naissus on the same mute; the third SE. to Thessalonica; and the fourth SW. to Heracleia, the last forming a communication with that central point on the Via Egnatia leading through Stobi from all the places on the three former rootes. In A. D. 479 Stobi was captured by Theodoric the Ostrogoth (Malch. Philadelph. Exc. de Leg. Rom. pp. 78-86, ap. Müller, Fragm. Hist. Graec. vol. iv. p. 125); and in the Bulgarian campaign of A. D. 1014, it was occupied by Basil II. and the Byzantino army (之róreiov, Cedran. p. 709). The geography of the basin of the Erigon in which Stobi was situated
is so imperfectly known that there is a difficulty in identifying its site: in Kiepert's map (Europaische Turkei) the ruins of Subi are marked to the W. of Demirlapi, or the pass of the " Iron Gate." (Leake, Northern Greece, vol. iii. pp. 306, 440.) [E. B. J.]

STOBORRUM PROM. (ETd\&ophov Kkpov, Ptol. iv. 3. § 5), a headland of Numidia, between the promontory of Hippus and the town of Aphrodisium, at the E. point of the Sinus Olchacites. Now Cap Ferro or Ras Hadid.
[T. H. D.]
STOE'CHADES (al ZToixádes vî̃ol) or STI'CHADES, on the S. coast of Gallia. Strabo (iv. p. 184) speaks of the Stoechades islands lying off the coast of Narbonensis, five in number, three larger and two smaller. They were occupied by the Massaliots. Steph. B. (s. v. Eroixdסes) says, "islands near Massalia; and they are also named Ligystides." Ptolemy (ii. 10. § 21) also mentions five ivlands Stoechades, which he places in the meridian of the Citharistes Promontorium [Citraristes].
Pliny (iii. 5) mentions only three Stoechades, which he suys were so named from being in a line ( $\sigma$ roixpos), and he gives to them the Greek names respectively Prote, Mese or Pomponiana, and Hy paea. These must be the islands now named Isles $d$ Hieres, of which the most westerly is Porqueroles, the central is Portcroz, and the most easterly is TIsle du Levant or du Titan, opposite to the town of Hieres, in the department of Var. These islands are mere barren rocks. Besides the three larger islands, which have been enumerated, there are two others at least, mere rocks, l'Esquillade and Bayneau, which make up the number of tive. Coral was got in the sea about the Stoechades (Plin. xxxii. 3), and is still got on this part of the French coast.

Agathemerus (Geog. Min. ii. p. 13, ed. Hudson) places the Stwechades along the coast which was occupied by the settlements of the Massaliots; but he fixes the two small Stoechades near Massilia. These are the two dismal rocks named Ratoneau and Pomègue which are seen as soon as you get out of the port of Marseille, with some still smaller rocks near them [Massilia, p. 292], one of which contains the small fort named Chätecuu dIf.

The Stoechades still belonged to the Massaliots in Tacitus' time (Hist. iii. 43). The Romans who were exiled from Rume sometimes went to Massilia, as L. Scipio Asiaticus did; if he did not go to the Stoechades as the Scholiast says (Cic. pro Sest. c. 3); but the Roman must have found the Stuechades a dull place to live in. When Lucan (iii. 516) says "Stoechados arva," he uses a poetic license; and Ammianus (xv. 11) as usual in his geography blunders when he places the Stoechades about Nicaea and Antipolis (Nizza, Antibes). [G. L.] STOENI. [Evganei.]
STOMA, AD, a place in Moesia on the Sonthernmost arm of the Dunube. (Tab. Peut.; Geogr. Rav. iv. 5.) Mannert (vii. p. 123) places it by the modern Zof.
[T. H.D.]

## STOMaLIMNE. [Fossa Mariaxa.]

STRADELA, a towil of Palestine mentioned only in the Itinerarium Hierosolymitanuin as x. M.P. from Maximianopolis, and xii. M.P. from Sciopolis (i. e. Scythopolis), and identified by the writer with the place where Ahab abode and Eliss prophesied, and -by a strange confusion-where David slew Golisth (p. 586, ed. Wesseling). The name is undoubtedly a corruption of Esdraela, the classical form of the Scriptural Jezreel. [Espraetia.] [G. W.]

STRA'GONA ( 2 paybra), a town in the south-
eastern part of Germany, either in the country of the Silingae or in that of the Diduni, on the northern slope of Mons Asciburgius. (Ptol. ii. 11. § 28.) If the resemblance of names be a safe guide, we might identify it with Strigau, though this hardly agrees with the degrees in which it is placed by Ptolemy; whence others suppose it to have been situated at Strehlen, between Schweidnitz and Brivg.

STRAPFLLUM. [APULIA, p. 167.]

## STRA'TIA. [Enispe.]

 a town of Chalcidice in Macedonia, which Ptolemy places on the Singitic gulf. Leake (Northern Greece, vol. iii. p. 160) considers that there is here the same mistake as in the case of Acanthus [Acanthus], and refers it to the Hellenic remains on the coast of the Strymonic gulf in the contined valley of Stratimi. [E.B.J.]

STRATONICEIA ( $\Sigma$ гратоviкeia or इitpatoviк $\eta_{\text {, }}$ Ptol. จ. 2. § 20: Eth. ミтpatovicés), one of the most important towns in the interior of Caria, was situated on the south-esst of Mylasa, and on the south of the river Marsyas. It appears to have been founded by Antiochus Soter, who named it atter his wife Stratmice. (Strab. xiv. p. 660; Steph. B. 8. v.) The subsequent Syro-Macedonian kings adorned the town with splendid and costly buildings. At a later time it was cerled to the Rhodians. (Liv. xxxiii. 18, 30.) Mithridates of Pontus resided for some time at Stratoniceia, and married the daughter of one of its primcipal citizens. (Appian, Mithr. 20.) Some time atter this it was besieged by Labienus, and the brave resistance it offered to him entitled it to the gratitude of Augustus and the Senate (Tac. Ann. iii. 62; Dion Cass. xlviii. 26). The emperor Hadrian is said to have taken this town under his special protection, and to have changed its name into Hadrianopolis (Steph. B. L. c.), a name, however, which dues not appear to have ever come into use. Pliny (v. 29) enumerates it among free cities in Asia. Near the town was the temple of Zeus Chrysaoreus, at which the confederate towns of Caria held their meetings; at these meetings the several states had votes in proportion to the number of towns they possessed. The Stratoniceans, though not of Carian origin, were admitted into the confederacy, because they possessed certain small towns or villages, which formed part of it. Menippus, surnamed Catochas, according to Cicero (Brut. 91) one of the most distinguished orators of his time, was a native of Stratoniceia. Stephanus B. (s v. 'I $\delta$ pids) mentions a town of Idrias in Caria, which had previonsly been called Chrysaoris; and as Herodotus (v. 118) makes the river Marsyas, on whose banks stood the white pillars at which the Carians held their national meetings, flow from a district called Idrias, it is very probable that Antiochus Soter built the new city of Stratoniceia upon the site of Idrias. (Leake, Asia Minor, p . 235.) Eskihissar, which now occupies the place of Stratoniceia, is only a small village, the whole neighbourhood of which is strewed with marble framents, while some shafts of columns are standing single. In the side of $a$ hill is a theatre, with the seats remaining, and ruins of the proscenium, among which are pedestals of statues, some of which contain inscriptions. Outside the village there are broken arches, with pieces of massive wall and marble coffins. (Chandler, Travels in Asia Jinor, p. 240; Leake, Asia Minor, p. 229; Fellows, Asia Minor,
p．254，foll．，Lycia，p．80，foll．；Sestini，Num．Vet． p．90．） ［L．S．］
STRATO＇NIS INSULA，an island in the Ara－ binn gulf between the harbour Elaea and the har－ bour Saba．（Strab．xvi．p．770；Plin．vi．29．s．34．）

STratonis turris．［Caksareia，No．4， p． 470.$]$

STRATUS（シitpátos：Eth．ミípátoos：its ter－ ritory $\dot{\eta}$ Zirpatın＇：Surovigli），the chief town of Acarnania，was situated in the interior of the country， in a fertile plain on the right bank of the Achelons． It commanded the principal approaches to the plain from the northward，and was thus a place of great military importance．Strabo（x．p．450）places it 200 stadia from the mouth of the Achelons by the course of the river．At the distance of 80 stadia S ．of the town the river Anapus flowed into the Achelous； and 5 Roman miles to its N．，the Achelons received another tributary stream，named Petitauras．（Thuc． ii．82；Liv．xliii．22．）Stratus joined the Athenian alliance，with most of the other Acarnanian towns， at the commencernent of the Peloponnesian War．In B．C． 429 it was attacked by the Ambraciots，with a number of barbarian auxiliaries，aided by some Pelo－ ponnesisn troops，under the command of Cnemus； but they were defeated under the walls of Stratus， and obliged to retire．Thucydides describes Stratus at that time as the chief town of Acarnania，which it is also called by Xenophon in his account of the expedition of Agesilaus into this country．（Thuc． ii．80，seq．，iii．106；Xen．Hell．iv．6．）When the Aetolians extended their dominions，Stratus fell into the hands of this people，whence it is called by Livy a town of Aetolia．It is frequently mentioned daring the Macedonian and Roman wars．Neither Philip V．nor his snccessor Perseus was able to wrest the town from the Aetolians；and it remained in the power of the latter till their defeat by the Romans，who restored it to Acarnania，together with the other towns，which the Aetolians had taken from the Acarnanians．（Polyb．iv．63，v．6，7，13，14，96； Liv．xxxvi．11，xliii．21，22．）Livy（xliii．21）gives an erroneous description of the position of Stratus when he says that it is situated above the Ambra－ cian gulf，near the river Inachus．

There are considerable remains of Stratus at the modern village of Surovigli．The entire circuit of the city was about $2 \frac{1}{2}$ miles．The eastern wall followed the bank of the river．Leake discovered the remains of a theatre situated in a hollow：its interior diameter below is 105 feet，and there seem to have been about 30 rows of seats．（Leake， Northern Greece，vol．i．p．137，seq．）

STRAVIA＇NAE or STRAVIA＇NA，a town in Lower Pannonia，on the road from Siscia to Mursa， of which the exact site has not been ascertained． （It．Ant．p．265，where it appears in the ablat．form Stavianis．）
［L．S．］
 Crete，which Stephanus of Byzantium（s．v．）men－ tions on the authority of Herodian（others read Herodotus），but no further notice is found of it either in Herodotus or any other author．［E．B．J．］
STRISVINTA（Eipgovivta），a place in the south－ east of Germany，near Mons Asciburgius，of uncertain site．（Ptol．ii．11．§ 29．）
［L．S．］
STRO＇BILUS（ETpobidos），a peak of mount Cancasus，to which，according to the legend．Prome－ thens had been fastened by Hephaestus．（Arrian， Peripl．P．E．p．12．）［L．S．］

STRO＇NGYLE．［Agoliae Insuiafe］

## STUCCIA．

STRO＇NGYLUS．［SEmitamidis Moxs．］
 Strofadia and Strivali），formerly called Plot：ae （nגcotai），two small islands in the Imian sea，abrout 35 miles S．of Zacynthus，and 400 stadia distant from Cyparissia in Messenia，to which cits they belonged．The sons of Boreas pursued the Harpies to these islands，which were called the＂Turning＂ islands，because the Boreadae here returned from the pursuit．（Strab．viii．p．359；Ptol．iii．16．§ 23；Steph．B．s．v．；Plin．iv．12．s．19；Mela，ii．7； Apoll．Rhod．ii．296：Apollud．i．9．§ 21；Virg．Aen． iii．210；It．Ant．p．523．）

STRUCHATES（ETfoúzares），one of the six tribes into which Herodotus divides the ancient in－ habitants of Media．（Herod．i．101．）［V．］

STRUTHUS．［Hermione．］
STRYME（ $\Sigma \tau \rho i \mu \eta)$ ，a town on the S．mast of Thrace，a little to the W．of Mesembria，between which and Stryme flowed the small river Lissus， which the army of Xerxes is said to have drunk dry．（Herod．vii．108．）Stryme was a colony of Thasos；but disputes seem to have arisen respecting it between the Thasii and the people of the neigh－ bouring city of Maroneia．（Philip．ap Demos．p． 163，h．）
［J．R．］
STRYMON（ETpumav，Ptol．iii．13．§ 18），the largest river of Macedonia，after the Axius，and， before the time of Philip，the ancient boundary of that country towards the E．It rises in Mount Scomius near Pantalia（the present Gustendil） （Thuc．ii．96），and，taking first an E．and then a SE．course，flows through the whole of Macedonis． It then enters the lake of Prasias，or Cercinitis，and shortly after its exit from it，near the town of Am－ phipolis，falls into the Strymonic gulf．Pliny，with less correctness，places its sources in the Hisemus （iv．10．s．12）．The importance of the Strymon is rather magnified in the ancient accounts of it，from the circumstance of Amphipolis being seated near its mouth；and it is navigable only a few miles from that town．Apollodorus（ii．5．10）has a legend that Hercules rendered the upper course of the river shallow by casting stones into it，it having been previously navigable much farther．Its banks were much frequented by cranes（Juv．xiii． 167 ；Virg． Aen．x．269；Mart．ix．308）．The Strymon is fre－ quently alluded to in the classics．（Comp．Hesind． Theog．339；Aesch．Suppl．258，Agam．192；Herod． vii． 75 ；Thuc．i． 200 ；Strab．vii．p． 323 ；Mela i． 2；Liv．xliv．44．\＆cc．）Its present name is Struma， but the Turks call it Karask（Comp．Leake， North．Gr．iii．pp．225，465，\＆c．）［T．H．D．］
 Strab．vii．p．330），a bay lying between Macedonia and Thrace，on the E．side of the peninsula of Chalcidice（Ptol．iii．13．§ 9）．It derived its name from the river Strymon，which fell into it．Now the gulf of Rendina．
［T．H．D．］
STRYMO＇NII（ $\sum$ ippunóviot），the name by which， according to tradition，the Bithymians in Asia ori－ ginally were called，because they had immigrated into Asia from the country about the Strymon in Europe．（Herod．vii．75；Steph．B．s．v．ミ $\left.\tau \rho \boldsymbol{v}^{\prime} \mu \dot{v} v.\right)$ Pliny（v．40）further states that Bithynia was called by some Strymonis．
［L．S．］
STURERA．［STMMBARA．］
STU＇CCIA（之roukкía，Ptol．ii．3．§ 3），a small river on the W．coast of Britain，identified by Camden（p．772）with the Ystuyth in Cardigan－ shire．
［T．H．D．］

STURA（Stura），a river of Northern Italy，one of the confluents of the Padus（Plin．iii．16．s．20）， which joins that river a few miles below Turin （Augusta Taurinorum），within a few miles of the Duria Minor or Ilora Riparia．It still retains its ancient name and is a considerable stream，rising in the glaciers of the Alps，between the Rocho Melon and Mont Iseran．
［E．H．B．］
STURA（ iroupd），a small place in Pattalene， near the mouths of the Indus，mentioned by Arrian （Ind．c．4）．
［V．］
STURIUM INSULA．［Philat］．
STU＇RNIUM（Eroûpvor：Eth．Sturninus：Ster－ nnccio），a town of Calabria，mentioned both by Pliny and Ptolemy among the municipal towns of that region．（Plin．iii．11．s．16；Ptol．iii．1．§ 77．） Its name is not otherwise known，but it is supposed to be represented by the modern village of Ster－ naccio，about 10 miles $S$ ．of Lecce（Lupise）and a short distance NE．of Soleto（Soletum）．（Cluver． ltal．p． 1231 ；Romanelli，vol．ii．p．114．）There exist coins with the inscription ETY，and types resembling those of the Tarentines，which are as－ cribed to Sturnium．
［E．H．B．］
STYLLA＇NGIUM（Eitud入dryoov，Polyb．iv．77， 80；Erud入dyıov，Steph．B．s．v．：Eth．Eiva入áyıos， Erudderucús），a town of Triphylia in Elis of un－ certain site，which surrendered to Philip in the Social War．

STY＇MBARA（ETimbapa，Strab．vii．p．327； Zitubép $\beta$ a，Polyb．xxviii．8．§8；Stubera，Liv．xxxi． 39，xliii．20，22），a town on the frontier of regal Macedonia，which is by some assigned to Deuriopus， and by others to Pelagonia，which in the campaign of B．C． 400 was the third encampment of the consul Sulpicius；it must be looked for in the basin of the Erigon．（Leake，Northern Greece，vol．iii．p． 306．）
［E．B．J．］
STYMPHA＇LIS，a district annexed by the Ro－ mans，along with Atintania and Elimiotis，to Mace－ donia upon the conquest of this kingdom，A．D． 168. （Liv．x／v．30．）From the mention of this district along with Atintania and Elimiotis，which were portions of Epeirus upon the borders of Thessaly，it would appear that Stymphalis is only another form of the more common name Tymphalis or Tym－ phasa ；though．it is true，as Cramer has observed， that Diodorus has mentioned Stymphalia（Diod．xx． 28），and Callimachus speaks of the Stymphalian oxen in that territory（Hymn．in Dian．179）． Ptolemy（iii．13．§ 43）likewise mentions a town Gyrtona in Stymphalia，but in this passage other Mis．read Tymphalia．（Cramer，Ancient Greece， vol．i．p．198．）
STYMPHA＇LUS（Z $\bar{\tau} \dot{\prime} \mu \phi a \lambda o s, ~ \Sigma \tau \dot{\prime} \mu ф \eta \lambda o s$, Paus． et alii；тd इivú $\mu \phi \eta \lambda o v$, Schol．ad Pind．Ol．vi．129； Styinphalum，Plin．iv．6．s．10；Stymphala，Lucret．
 a town，district，mountain，and river in the NE．of Arcadia．The territory of Stymphalus is a plain， about six miles in length，bounded by Achaia on the N．，Sicyonia and Phlissia on the E．，the territory of Mantineia on the S．，and that of Orchomenus and Pheneus on the W．This plain is shut in on all sides by mountains．On the N．rises the gigantic mass of Cyllene，from which a projecting spur， called Mt．Stymphalus，descends into the plain． （Zivíдфалоs $8 \rho 0$ ，Ptol．iii．16．§ 14 ；Hesych．8．v．； nivalis Stymphalus，Stat．Silv．iv．6．100．）The mountain at the southern end of the plain，opposite Cyllena，was called Apelaurum（ $\tau \boldsymbol{\delta}$＇Antiaupov，

Polyb．iv．69）${ }^{*}$ ，and at its foot is the kata－ vóthra or subterraneons outlet of the lake of Stym－

 is formed partly by the rain－water descending from Cyllene and Apelaurum，and partly by three streams which flow into it from different parts of the plain．From the west descends a smail stream，which rises in Mount Geronteium in the neightourhond of Kastania：and from the east comes another stream，which rises near Dusa．But the most important of the three streams is the one which rises on the northern side of the plain， from a copious kefaloryysi．In summer it flows about two miles through the plain into the kata－ vóthra of Apelaurum；but in winter it becomes almost immediately a part of the waters of the lake， though its course may be traced through the shal－ lower water to the katavothra．This stream was called Stymphalus by the ancients；it was regarded by them as the principal source of the lake，and was universally believed to make its reappearance，after a subterranean course of 200 stadia，as the river Erasinus in Argolis．（Herod．vi．76；Paus．ii．3．§ 5，ii．24．§ 6，viii．22．§ 3；Strab．viii．p．371； Angos，Vol．I．p．201，a．）The Stymphalii wor－ shipped the Erasinus and Metope（MeTán $\eta$ ，Aelian， V．H．ii．33），whence it has been concluded that Metope is only another name of the river Stym－ phalus．Metope is also mentioned by Callimachus （Hymn．in Jov．26），with the epithet pebbly（ $\pi 0$. iúvтetos），which，as Leake observes，seems not very appropriate to a stream issuing in a hody from the earth，and flowing through a marsh．（Peloponnesiaca， p．384．）The water，which formed the source of the Stymphalus，was conducted to Corinth by the emperor Hadrian，by means of an aqueduct，of which considerable remains may still be traced．The state－ ment of Pausanias，that in summer there is no lake，is not correct，though it is confined at that time to a small circuit round the katavóthra．As there is no outlet for the waters of the lake except the katavóthra， a stoppage of this subterraneous channel by stones， sand，or any other substance occasions an inundation． In the time of Pausanias there occurred such an inundation，which was ascribed to the anger of Artemis．The water was said to have covered the plain to the extent of 400 stadia ；but this number is evidently corrupt，and we ought probably to read $\tau \in \sigma \sigma a \rho \alpha ́ к о \nu \tau a$ instead of teTpaкoбious．（Paus．viii． 22．§ 8．）Strabo relates that Iphicrates，when be－ sieging Stymphalus without success，attempted to obstruct the katavóthra，but was diverted from his purpose by a sign from heaven（viii．p．389）． Strabo also states that originally there was no sub－ terraneous outlet for the waters of the lake，so that the city of the Stymphalii，which was in his time 50 stadia from the lake，was originally situated upon its margin．But this is clearly an error，even if his statement refers to old Stymphalus，for the breadth of the whole lake is less than 20 stadia．

The city derived its name from Stymphalus，a son of Elatus and grandson of Arcas；but the ancient city，in which Temenus，the son of Pelasgus，dwelt， had entirely disappeared in the time of Pausanias，

[^38]and all that he could learn respecting it was, that Hera was formerly worshipped there in three different sanctuaries, as virgin, wife, and widow The modern city lay upon the southern edge of the lake, about a mile and a half from the katavothra, and upon a rocky promontory connected with the mountains behind. Stymphalus is mentioned by Homer (Il. ii. 608), and also by Pindar (OL. vi. 169), who calls it the mother of Arcadia. Its name does not often occur in history, and it owes its chief importance to its being situated upon one of the most frequented routes leading to the westward from Argolis and Corinth. It was taken by Apollonides, a general of Cassander (Diod. xix. 63), and subsequently belonged to the Achaean League (Polyb. ii. 55, iv. 68, \&cc.). In the time of Pausanias it was included in Argolis (viii. 22. § 1). The only building of the city, mentioned by Pausanias, was a temple of Artemis Stymphalia, under the roof of which were figures of the birds Stymphalides; while behind the temple stood statues of white marble, representing young women with the legs and thighs of birds. These birds, so celebrated in mythology, the destraction of which was one of the labours of Heracles (Dict. of Biogr. Vol. II. p. 396), are said by Pausanias to be as large as cranes. but resembling in form the ibis, only that they have stronger beaks, and not crooked like those of the ibis (viii. 22. § 5 ). On some of the coins of Stymphalus, they are represented exactly in accordance with the description of Pausanias.

The territory of Stymphalus is now called the vale of $Z$ araki, from a village of this name, about a mile from the eastern extremity of the lake. The remains of the city upon the projecting cape already mentioned are more important than the cursory notice of Pausanias would lead one to expect. They cover the promontory, and extend as far as the fountain, which was included in the city. On the steepest part, which appears from below like a separate hill, are the ruins of the polygonal walls of a small quadrangular citadel. The circuit of the city walls, with their round towers, may be traced. To the east, beneath the acropolis, are the foundations of a temple in antis; but the most important ruins are those on the southern side of the hill, where are numerous remains of buildings cut out of the rock. About ten minutes N. of Stymphalus, are the ruins of the medieval town of Krónia (Leake, Morea, vol.iii. p. 108, seq.; Peloponnesiaca, p. 384 ; Boblaye, Recherches, fc., p. 384 ; Ross. Reisen im Peloponnes, p. 5t; Curtius, Peloponnesos, rol. i. p. 201, seq.).
 of Euboea, on the W. coast, N. of Carystus, and nearly opposite the promontory of Cynosura in Attica. The town stood near the shore in the inner part of the bay, in the middle of which is the island Aegileia, now called Sturanisi. Styra is mentioned by Homer along with Cargstus (Ih ii. 539). Its inhabitants were originally Dryopians, though they denied this origin (Herod. viii. 46; Paus. iv. 34. § 11), and clained $t \omega$ be descended from the demus of Steiria in Attica. (Strab. x. p. 446.) In the First Persian War (b. c. 490) the Persians landed at Aegileia, which belonged to Styra, the prisoners whom they had taken at Eretria. (Herod. vi. 107.) In the Second Persian War (b.c. 480, 479) the Styrians fuught at Artemisium, Salamis, and Plataeae. They sent two ships to the naval engagements, and at Plataeas they and the Erctians amounted together
to 600 men. (Herod. viii. 1, 46, ix. 28; Paus. v. 23. § 2.) They afterwards became the subjects of Athens, and paid a yearly tribute of 1200 drachmae. (Thuc. vii. 57 ; Franz, Elem. Epigr. Gr. n. 49.) The Athenian fleet was stationed here b. c. 356. (Dem. c. Mid. p. 568.) Strabo relates (x. p. 446) that the town was destroyed in the Maliac war by the Athenian Phaedrus, and its territory given to the Eretrians; but as the Maliac war is not mentioned elsewhere, we ought probably to substitute Lamiac for it. (Leake, Northern Greece, vol. ii. pp. 422, 432.)

STYX ( $\sum \tau v(\xi)$, a waterfall descending frmm a lofty rock in the Aroanian mountains, above Nonacris, a town in the NE. of Arcadia, in the district of Pheneus. The water descends perpendicularly in two slender cascades, which, after winding among a labyrinth of rocks, anite to form a torrent that falls into the Crathis. It is by far the highest waterfall in Greece; the scenery is one of wild desolation; and it is almost impussible to climb over the rocks to the foot of the cascade. The wildness of the scenery, the inaccessibility of the spot, and the singularity of the waterfall made at an early period a deep impression upon the Greeks, and invested the Styx with superstitious reverence. It is correctly described by both Homer and Hesiod. The former poet speaks of the "down-flowing water of the Styx" ( $\tau \mathrm{d}$ каtei6ofuevov Etuyds idoap, Il. xv. 37), and of the "lofty torrents of the Styx" (Eivuyos izacos aind $\beta \in \in \theta \rho a$, Ih viii. 369). Hesiod describes it as "a cold stream, which descends from a precipitous lofty

 ennial most ancient water of the Styx, which flows through a very rugged place " (Eitujds kq0itov
 Theog. 805). The account of Herodutus, who does not appear to have visited the Styx, is not so accurate. He says that the Styx is a fountain in the town Nonacris; that only a little water is apparent; and that it dropt from the rock into a cavity surrounded by a wall (ri. 74). In the same passage Herodotus relates that Cleomenes endeavoured to persuade the chief men of Arcadia to swear by the waters of the Styx to support him in his enterprive. Ainng the later descriptions of this celebrated stream that of Pausanias (viii. 17. § 6) is the must full and exact. "Not far from the ruins of Nonscris," he says, "is a lofty precipice higher than I ever remember to have seen, over which descends water, which the Greeks call the Styx." He adds that when Homer represents Hera swearing by the Styx, it is just as if the poet had the water of the stream dropping before his eyes. The Styx was transferred by the Greek and Roman poets to the invisible world [see Dict of Gr. and Rom. Biogr. and Myth. art. STYx]; but the waterfall of Nonacris continued to be regarded with superstitious terrors; its water was supposed to be poisonous; and it was believed that it destroyed all kinds of vessels, in which it was put, with the exception of those made of the hoof of a horse or an ass. There was a report that Alexander the Great had been poisoned by the water of the Styx. (Arrian, Amab. vii. 27; Plut. Alex. 77, de Prim. Frig. 20. p. 954; Paus. viii. 18. § 4 ; Strab. viii. p. 389; Aelian, H. An. x. 40; Antig. Hist. Mirab. 158 or 174; Stob. Ech Phys. i. 52. § 48; Plin. ii. 103. s. 106 , $\mathbf{x x x}$. 16 . s. 53, xxi. 2. s. 19; Vitruv. viii. 3; Senec. \& N. iii. 25.) The belief in the deleterions nature of the
water continues down to the present day, and the inhabitants of the surrounding villages relate that no vessel will hold the water. It is now called ra Mavpayépia, or the Black Waters, and sometimes rd $\Delta p a k o-\nu \epsilon ́ p i a$, or the Terrible Waters. (Leake, Morea, vol. iii. p. 160, seq.; Fiedler, Reise durch Griechenland, vol. i. p. 400, who gives a drawing of the Styx: Curtius, Pelopennesos, vol. i. p. 195.)
 which was shown the tomb of Car, the ancestor of all the Carians; the place was in fact believed to have received its name from this circumstance, for in Carıan oova signified a tomb, and $\gamma \dot{\text { énas a a king. }}$ (Steph. B. 8. v.) Strabo, who calls the place Syangela (xiii. p. 611), states that this town and Myndus were preserved at the time when Mansolus united six other towns to form Halicarnassus. [L.S.]
SUANA (इoũava, Ptol.: Eth. Suanensis: Socana), a town of Southern Etruria, situated in the valley of the Fiora (Arminia), about 24 miles from the sea, and 20 W . of Volsinii (Bolsena). No mention of it is found in history as an Etruscan city, but both Pliny and Ptolemy notice it as a municipal town of Etruria under the Roman Empire. (Plin. iii. 5. s. 8; Ptol. iii. 1. § 49.) Its site is clearly marked by the modern town of Sovana or Soana, which was a considerable place in the middle ages, and still retains the title of a city, and the see of a bishop, though now a very poor and decayed place. It has only some slight remains of Roman antiquity, but the ravines around the town abound with tombs hewn in the rock, and adorned with architectural façades and ornaments, strongly resembling in character thise at Castel d'Asso and Bieda. These relics, which are pronounced to be among the most interesting of the kind in Etruria, were first discovered by Mr. Ainsley in 1843, and are described by him in the Annali dell' Instituto di Corrispondenza Archeologica for 1843 (pp. 223-226); also by Mr. Dennis (Etruria, vol. i. pp. 480-500).
[E.H.B.]
SUARDONES, a tribe of the Suevi in Northern Gernany, on the right bank of the Albis, south of the Saxones, and north of the Langobardi. (Tac. Germ. 40.) Zeuss (Die Deutschen, p. 154), deriving their name from suard or sward (a sword), regards it as identical with that of the Pharodini, mentioned by Ptolemy (ii. 1L§13) as living in nearly the same part of Germany. [L.S.]

SUARNI, a rade people of Asiatic Sarmatia, in the neighbourhood of the Portae Caucasiae and the Rha. They possessed gold mines (Plin. vi. 11. s. 12). They are probably the same people whom Ptolemy calls Surani ( $\Sigma$ ovpavoi, v. 9. § 20) and places between the Hippic and Ceraunian mountains. [T. H. D.]

SLASA ( Zoudira: Eth. Suasanus: Ru. near Custel Leome), a town of Umbria mentioned both by Ptolemy and Pliny, of whom the latter reckons it among the municipal towns of that country. Ptolemy places it, together with Ostra, in the district of the Senones, and it was therefore situated on the northern declivity of the Apennines. Its site is clearly identified at a spot between S. Lorenzo and Castel Leone in the valley of the Cesano, about 18 miles from the sea. Considerable ruins were still extant on the spot in the time of Claver. including the remains of the walls, gates, 2 theatre, \&c.; and inscriptions found there left no doubt of their identification. (Cluver, Ital. p. 620.)
[E. H. B.]
SUASTE'NE (乏ova $\sigma \tau \dot{\eta} \eta \eta$, Ptol. vii. 1. § 42), a district in the NW. of India, beyond the Panjab, and above the junction of the Kabul river and the
vol. IL.

Indus. It derives its name from the small river Suastus (the Suvastí or Suwad), which is one of the tributaries of the Kabul river. [Gorya.] [V.] SUASTUS. [Suastene]

## SUBANECTI. [Silvanectes.]

SUBATII. [Tubantes.]
SUBDINNUM. [Cenomani.]
SUBERTUM, another reading of Sudertum.
SUBI, a river on the E. coast of Hispania Tarraconensis, which entered the sea near the town of Subur. (Plin. iii. 3. 8. 4.) Probably the modern Francoli.
[T. H. D.]
SUBLA'QUEUM (Subiaco), a place in the valley of the Anio about 24 miles abrive Tibur (Tivoli). It derived its name from its situation below the lake or lakes formed by the waters of the Anio in this part of its course, and called the Simbruina Stagna or Simbrivir Laces. These lakes have now entirely disappeared: they were evidently in great part artificial, formed as reservoirs for the Aqua Marcia and Aqua Claudia, both of which were derived from the Anio in this part of its course. There is no mention of Sublaqueum before the time of Nero, who had a villa there called by Frontinus "Villa Neroniana Sublacensis;" and Tacitus mentions the name as if it was one not familiar to every one. (Tac. xiv. 22; Frontin. de Aquaed. 93). It seems certain therefore that there was no town of the name, and it would appear from Tacitus ( $l$ c. ) that the place was included for municipal purposes within the territory of Tibur. Pliny also notices the name of Sublaqueum in the 4th Resion of Augustus, but not ainong the municiral towns: as well as the lakes (" lacus tres amoenitate nobiles") from which it was derived. (Plin. iii. 12. s. 17.) It appears from mediaeval records that these lakes continued to exist down to the middle ages, and the last of them did not disappear till the year 1305 . (Nibby, Dintorni, vol. iii. p. 125.) Subiaco obtained a great celebrity in the midtle ages as the place of retirement of St. Benedict, and the cradle of the celebrated monastic order to which he gave his name. It seems probable that the site was in his time quite deserted, and that the modern town owes its origin to the monastery founded by him, and a castle which was soon after established in its neighbourhood. (Nibly, l.c. p. 123.)
[E. H. B.]
SUBLA'VIO (It. Ant. p. 280) or SUBLA'BIO (Tab. Peut.), a place in Rhaetia, on the site of the modern convent of Seben, near the town of Clausen. Some suppose the correct name to be Subsavione, which occurs in a middle age document of the reign of the emperor Conrad II.
[L.S.]
SUBUR ( ZoúGoup, Ptol. ii. 6. § 17), a town of the Laeëtani in Hispania Tarraconensis lying E. of Tarraco. (Mela, ii. 6.) Ptolemy (L c.) ascribes it to the Cosetani, and Pliny (iii. 3. s. 4) to the Ilergetes. It is mentioned in an inscription. (Gruter, p. 414.) Variously identified with Sitges and Villanueva.
[T. H. D.]
SUBUR (इoúGoup, Ptol. iv. 1. § 13). 1. A town in the interior of Mauretania Tingitana, near the river of the same name.
2. (Ptol. iv. 1.§ 2), a river of Manretania Tingitana. Pliny (v. 1. s. 1) calls it a fine navigable river. It fell into the Atlantic near Colonia Banasa, 50 miles S. of Lixus. It is still called Subu or Cubrm, and rises amnng the forests of Mount Salelo in the province of Sciaus (Graberg of Hemsö, Das Kaiserreich Marokko, tr. by Reumont, p. 12). [T H. D.] SLBUS (Eoûbos, Ptol. iv. 6. §8), a river on the
W. coast of Libya Interior, which had its source in Mount Sagapola, and discharged itself to the S. of the point of Atlas Major; now the Sus. [T. H. D.]

SUBZUPARA, a place in Thracia, on the road from Philippopolis to Hadrianopolis (Itin. Ant. pp. 137, 231). It is called Castozobra or Castra larba in the Jtin. Hieros. (p. 568), and Ka $\quad$ jpáSapba by Procopius (de Aed. iv. 11. p. 305, ed. Bomu). and still retains the name of C'astro Zarvi, or simply Zarvi. It has, however, also been identified with Hirmenly and Coiunlou In the Tab. Peut. it is called Castra Rubra.
[T. H. D.]
SU'CCABAR (Zovxá6aß̧ı, Ptol. iv. 2. § 2.5, 3. § 20, xiii. 13. § 11 ), a town in the interior of Mauretania Caesariensis, lying to the SE. of the mouth of the Chinalaph, and a Roman colony with the name of Colunia Augusta (Plin. v. 2. s. 1). It appears in Ammianus Marcellinus under the name of Oppidum Sugabarritanum (xxix. 5). Mannert (x. 2. p. 451) would identify it with the present Mazuna, where Leo Africanus (Lohrsbach, p. 382) found considerable remains of an ancient city, with inscriptions, \&cc.
[T. H. D.]
SUCCI or SUCCORUM ANGUSTIAE, the principal pass of Mount Haemus in Thrace, between Philippopolis and Serdica, with a town of the same name. (Amm. Marc. xxi. 10. § 2, xxii. 2. § 2 , xxvi. 10. § 4.) It is called इoûkıs by Sozomenus (ii. 22), and Eouadkees by Nicephorus (ix 13). Now the pass of Ssulu Derbend or Deniir Kapi (Comp. V. Hammer, Gesch. des Osman. Keichs, i. p. 175.)
[T. H. D.]
SUCCO'SA (Zourk $\omega \overline{\sigma a}$, Ptol. ii. 6. § 68), a town of the llergetes in Hispania Tarraconensis [T.H.D.]

SUCCOTH (LXX. इoк $\chi \omega \theta \alpha$, Vat., $\Sigma \omega \chi \bar{\omega}$, Alex.), a city of the tribe of Gad in the valley, formerly part of the kingdom of Sihon king of Heshbon (Josh. xiii. 27). It is connected with Zarthan in 1 Kings, vii. 46, where Hiram is said to have cast his brasen vessels, \&re. for Solomon's temple "in the plain of Jordan, in the clay ground between Succoth and Zarthan," elsewhere called Zaretan, mentioned in the account of the miraculons passage of the Israelites (Josh. iii. 16). The city doubtless derived its name from the incident in the life of Jacob mentioned in Genesis (xxxiii. 17) where the name is translated by the LXX. as in the parallel passage in Josephus (Ant. i.21.§1), Eк7vaí (booths). It was therefore south of the Jabbok, and the last station of Jacob before he crossed the Jordan towards Shechem. S. Jerome, in his commentary on the passage, says, "Snchoth: est usque hodie civitas trans Jordanem hoc vocabulo in parte Scythopoleos," from which some writers have inferred that Scythopolis may have derived its name from this place in its vicinity (Robinson, Bibl. Res. vol. iii. p. 175. n. 5), and this hypothesis is supported by the respectable names of Reland, Gesenius, and Rossenmüller. A place called Succat is still pointed out by the Arabs south of Beisan (=Bethshan = Scythopolis), on the east side of Jordan, rear the mouth of Wady Mis.
[G. W.]
SUCCUBO, a town in Hispania Baetica, in the jurisdiction of Corduba. (Plin. iii. 1. s. 3.) Capitolinus mentions it under the name of Municipium Succubitanum. (Antom. Phil. 1; cf. Florez, Espp. Sagr. xii. p. 302.)
[T. H. D.]
SUCHE (rd Zoúxov фpoupiov, Sirab. xvi. p. 770), the Suchim of the Hebrews (2 Chron. xii. 3), and the modern Suachim, was a harbour on the western const of the Red Sea, just above the bay of

## SUEL.

Adule, lat. $16^{\circ} \mathrm{N}$. It was occupied by the Aegrptians and Greeks successively as a fort and trading station; but the native population of Suche were the Subate Aethinpians.
[W. B. D.]
SUCIDAVA (亡ouri8ava, Ptol. iii. 10. § 11), a town in Moesia Interior, between Durostorum and Axiopolis. (Itin. Ant. p. 224; Tab. Peut.; Not. Imp.) Procopius calls it Eukiסd8a (de Aed. iv. 7. p. 298, ed. Bonn) and Eikibioa (Ib. p. 291). Variously iuentified with Osenik, or Assenik, and Satonou.
[T. H. D.]
SUCRO (Zoúcpoov, Ptol. ii. 6. § 14), a river of Hispania Tarraconensis, which rose in the country of the Celtiberi in a S . offishoot of Mount Idubeda, and after a considerable bend to the SE. discharged itself in the Sucronensis Sinus, to the S. of Valentia. (Strab. iii. pp. 158, 159, 163, 167 ; Mela, ii. 6; Plin. iii. 3. ss. 4, 5, 11.) Now the Xucar. [T. H. D.]

SUCRON ( Zoúkpav, Strab. iii. p. 158), a town of the Edetani in Hispania Tarraconensis, on the river of the same name, midway between Carthago Nova and the river Iberus. (Itin. Ant. p. 400; cf. Cic. Balb. 2; Liv. xxviii. 24, $x$ xix. 19; App. B. C. i. 110; Plut. Sert. 19, \&c.) It was already destroyed in the time of Pliny (iii. 3. s. 4). Variously placed at Alcira, Sueca, and Cullera. (Cf. Florez, Esp. Sagr. v. p. 35: Marca, Hisp. ii. 5.) [T. H. D.]

SUCRONENSIS SINUS, a bay on the E. cusat of Hispania Tarraconensis, now the Gulf of Valencio. (Mela. ii. 6 and 7.)
[T. H. D.]
SUDE'NI (Kovסףvoi), a tribe in the east of Germany, about the Gabreta Silva, and in close proximity to the Marcomanni. (Ptol, ii. 11. § 15; comp. Sinemi.)
[L. S.]
SUDERTUM (Zoúdifptov: Eth. Sudertanus), a town in the southern part of Etruria, apparently situated between Volsinii and the ses-coast, bat we have no clue to its precise situation. The name itself is uncertain. The MSS. of Pliny, who enumerates it among the municipal towns of Etruria, vary between Sudertani and Subertani ; and the same rariation is fuand in Livy (xxvi. 23), who mentions a prodigy as occurring "in foro Sudertano." Ptolemy on the other hand writes the rame ミovסepvov, for which we should probably read Koviסєpтov. (Ptol. iii. 1. § 50.) Cluver would identify it, without any apparent reason, with the Maternum of the Itineraries, and place it at Farnese. Sorano, a few miles NE. of Sovana (Suana), would seem to have a more plausible claim, but both identifications are merely conjectural. (Cluver, ItaL. p 517 ; Dennis's Etruria, vol. i. p. 478.) [E. H. B.]

SUDE'TI MONTES (Eoús $\eta r a \quad 8 \rho \eta$ ), a range of mountains in the SE. of Germany, on the N. of the Gabreta Silva, thus forming the western part of the range still called the Sudeten, in the NW. of Bohemia. (Ptol. ii. 11. §§ 7, 23.) [L. S.]
SUE'BUS (Zointos), a river on the north coast of Germany, between the Albis and Viadus, which flows into the Baltic at a distance of $\mathbf{8 5 0}$ stadia to the west of the mouth of the Viadus (Mlarcian. p.53). and which, according to Ptolemr (ii. 11. § 1), divided at its mouth into several branches. Notwithstanding these explicit statements, it is extremely difficult to identify the river, whence some regard it as the Peene, others as the Warne, and others again as the Viadus or Oder itself, or rather the central branch of it, which is called the Sicine or Schuceene.
[L. S.]
SUEL (Zuven, Ptol. ii. 4. § 7). a town of His pania Bactica, on the road from Malaca to Gades.
(Itin. Ant. p. 405.) According to inscriptions it was a Roman municipium in which libertini had been settled. (Reines. pp. 13, 131; Spon, Miscell. v. p. 189 ; Orelli, Inscr. no. 3914 ; Mela, ii. 6 ; Plin. iii. 1. s. 3.) It is the modern Fuengirola. (Inscr. in Aldrete, Orig. Ling. Cast. i. 2.) [T. H. D.]

SUELTERI, a people of Gallia Narbonensis, enumerated by Pliny (iii. 4), between the Camatullici and the Verrucini. The name Selteri is placed in the Table above Forum Julia (Frejus). Nothing can be ascertained about the position of this people [Camatullici].
[G. L.]
SUESIA PALUS, a large lake of Germany mentioned only by Pomponius Mela (iii. 3) along with two others, the Estia and Melsagium, but it is impossible to say what lake he is alluding to.
[L.S.]
SUESSA, sometimes called for distinction's sake SUESSA AURUNCA ( $\Sigma \dot{v} \epsilon \sigma \sigma \alpha$ : Eth. Suessanus: Sessa), a city of Latium in the widest sense of that term, but previously a city of the Aurunci, situated on the SW. slope of the volcanic mountain of Rocca Monfina, about 5 miles S. of the Liris, and 8 from the sea. Though it became at one time the chief city of the Aurunci, it was not a very ancient city, but was founded as late as B. c. 337 , in consequence of the Aurunci having abandoned their ancient city (called from their own name Aurunca), which was situated a good deal higher up, and about 5 miles N. of Suessa. [Aurunca.] Aurunca was now destroyed by the Sidicini, and Suessa became thenceforth the capital of the Aurunci (Liv. viii. 15). That people had, after their defeat by T. Manlius in B. c. 340, placed themselves under the protection of Rome, and we do not know by what means they afterwards forfeited it: perhaps, like the neighbouring Ausonians of Vescia and Minturnae, their fidelity had been shaken by the defeat of the Romans at Lautulae: but it is clear that they had in some manner incurred the displeasure of the Romans, and given the latter the right to treat their territory as conquered land, for in B. c. 313 a Roman colony was established at Suessa. (Liv. ix. 28; Vell. Pat. i. 14.) It was a colony with Latin rights, and is mentioned among those which in the Second Punic War professed their inability to furnish their required quota to the Roman armies. It was punished a few years later by the imposition of double contributions. (Liv. xxvii. 9, xxix. 15.) It is again mentioned in the Civil Wars of Marius and Sulla, when it espoused the party of the latter, but was surprised and occupied by Sertorius. (Appian, B. C. i. 85, 108). In the time of Cicero it had passed into the condition of a manicipium by virtue of the Lex Julia, and is spoken of by that orator as a prosperous and flourishing town: it was the scene of a massacre by Antonius of a number of military captives. (Cic. Phil. iii. 4, iv. 2, xiii. 8.) It received a fresh colony under Augustus, and assumed in consequence the titles of "Colonia Julia Felix Classica," by which we find it designated in an inscription. (Lib. Col. p. 237; Plin. iii. 5. s. 9; Gruter, Inscr. p. 1093. 8; Orell. Inecr. 4047.) Numerous other inscriptions attest its continuance as a flourishing and important town under the Roman Empire (Orell. Inser. 130, 836, 1013, 2284, 3042 ; Mommsen, Inscr. R.N. pp. 210-212); and this is confirmed by existing remains: but no mention of it is found in history. Nor is its name found in the Itineraries; but we learn from existing traces that there was an ancient road which branched off from the Via Appia at Minturnae and proceeded
by Suessa to Teanum, from which it was continued to Beneventum. (Hoare's Class. Tour. vol. i. p. 145. This is evidently the same line given in the Itin. Ant. p. 121, though the name of Suessa is not there mentioned.)

Suessa Aurunca was the birthplace of the celebrated satirical poet Lucilius, whence he is called by Juvenal "Auruncae alumnus." (Auson. Epist. 15. 9; Juv. i. 20.)

The modern city of Sessa undoubtedly occupies the ancient site: and considerable ruins are still visible, including, besides numerous inscriptions and other fragments, the remains of a temple incorporated into the church of the Vescovado, a remarkable cryptoporticus, and several extensive subterranean vaults under the church of $S$. Benedetto, constructed of reticulated masonry. Some remains of an amphitheatre are also visible, and an ancient bridge of 21 arches, constructed for the support of the road which leads into the town at the modern Porta del Borgo. It is still called Ponte di Ronaco, supposed to be a corruption of Ponte Aurunco (Hoare, l. c. pp. 145147; Giustiniani, Diz. Topogr. vol. ix. p. 28, \&c.).
The fertile plain which extends from the foot of the hills of Sessa to the Liris and the sea, now known as the Demanio di Sessa, is the ancient " Ager Vescinus," so called from the Ausonian city of Vescia, which seems to have ceased to exist at an early period [Vescia]. The district in question was probably afterwards divided between the Roman colonies of Suessa and Sinuessa.
[E. H. B.]

COIN OF SUESSA AURUNCA.
SUESSA POME'TIA ( $\mathbf{\Sigma} o v ́ \epsilon \sigma \sigma \alpha \quad \Pi \omega \mu \epsilon \nu \tau 1 a ́ \nu \eta$, Dionys.: Eth. Пaucviivos), an ancient city of Latium, which had ceased to exist in historical times, and the position of which is entirely unknown, except that it bordered on the "Pomptinus ager" or Pomptinae Paludes, to which it was supposed to have given name. Virgil reckons it among the colonies of Alba, and must therefore have considered it as a Latin city (Aen. vi. 776): it is found also in the list of the same colonies given by Diodorus (vii. Fr. 3); but it seems certain that it had at a very early period become a Volscian city. It was taken from that people by Tarquinius Superbus, the first of the Roman kings who is mentioned as having made war on the Volscians (Liv. i. 53; Strab. v. p. 231; Vict. Vir. Ill. 8): Strabo indeed calls it the metropolis of the Vulscians, for which we have no other authority; and it is probable that this is a mere inference from the statements as to its great wealth and power. These represent it as a place of such opulence, that it was with the booty derived from thence that Tarquinius was able to commence and carry on the construction of the Capitoline temple at Rome. (Liv. l. c. ; Dionys. iv. 50 ; Cic. de Rep. ii. 24 ; Plin. vii. 16. s. 15). This was indeed related by some writers of A piolae, another city taken by Tarquin (Val. Antias, ap. Plin. iii. 5. s. 9), but the current tradition seems to have been
$3 \times 2$
that connected with Pometia (Tac. Hist. iii. 72). The name of Suessa Pometia is only once mentioned lefore this time, as the place where the sons of Ancus Marcius retired into exile on the accession of Servius. (Liv. i. 41). It is clear also that it survived its capture by Tarquin, and even appears again in the wars of the Republic with the Volscians, as a place of great power and importance. Livy indeed calls it a "Colonia Latina," but we have no account of its having become such. It, however, revolted (according to his account) in н. с. 503, and was not taken till the following year, by Sp . Cassius, when the city was destroyed and the imhabitants sold as slaves. (Liv. ii. 16, 17). It nevertheless appears again a few years afterwards (b. c. 495) in the hands of the Volscians, but was again taken and pillaged by the consul P. Servilius (Ib. 25; Dionys. vi. 29). This time the blow seems to have been decisive; for the name of Suessa Pometia is never again mentioned in history, and all trace of it disappears. Pliny notices it among the cities which were in his time utterly extinct ( ${ }^{\prime}$ 'lin. iii. 5. s. 9), and no record seems to have been preserved even of its site. We are, however, distinctly told that the Pomptinus ager and the Pomptine tribe derived their appellation from this city (Fest. s. v. Pomptina, p. 233), and there can therefore be no doubt that it stood in that district or on the verge of it; but beyond this all attempts to determine its locality must be purely conjectural.
[E. H. B.]
SUESiseta'NI, a people of Hispania Tarraconensis, mentioned only by Livg (xxv. 34, xxviii. 24, xxsiv. 20, xxxix. 42) and especially in connection with the Sedetani (or Edetani). Marca (Hisp. ii. 9. 4) takes them for a branch of the Cossetani; and Ukert (ii. pt. i. p. 318) seeks them near the Celtiberi, Lacetani, and Ilergetes. [T.H.D.]

SUESSIONES, or SUE'SSONES (OU̇éqбoves, Ptol. ii. 9. § 11), a people of Gallia Belgica. The Remi told Caesar (B. G. ii. 3) in b. c. 57 that the Suessiones were their brothers and kinsmen, had the same political constitution and the same laws, formed one political body with them, and had the same head or chief: their territory bordered on the territory of the Remi, and was extensive and fertile: within the memory of man the Suessones had a king, Divitiacus, the most powerful prince in Gallia, who even had the dominion of Britannia; at this time (b. c. 57) they had a king named Galba, a very just and wise man, to whom the Belgae who were combining against Caesar unanimously gave the direction of the war. The Suessiones had twelve towns, and promised a contingent of 50,000 men for the war with Caesar.

Caesar (B. G. ii. 12) took Noviodunum, a town of the Suessiones, and the people submitted [Noviodrenm; Augusta Surssionum]. The Suessiones had the rich country between the Oise and the Marne, and the town of Sozssons on the Aisne preserves their name unchanged. The Suessiones are mentioned (B. G. vii. 75) among the peoples who sent their contingent to attack Caesar at Alesia, b. c. 52; but their force was only 5000 men. Cuesar paid the Suessiones for their pains by subjecting them to their bruthers the Remi (B.G. viii. 6: "qui Remis erant attributi"); in which passage the word "attributi" deuotes a political dependence, and in Gallia that signified payment of money. The Remi took care of themselves [Remi].

Pliny names the Suessiones Liberi (iv. 17), which, if it means anything, may mean that they were re-
leased in his time from their dependence on the Remi. In Pliny's text the name "Sueconi" stands between the name Veromandui and Suessiones; but nobody has yet found out what it means.

The orthography of this name is not quite certain; and the present name Soissons is as near the truth as any other form. In Strabo (iv. p. 195) it is ミove $\sigma \sigma \omega \bar{\nu} \epsilon s$, and Lucan (i. 423) has-
"Et Biturix, longisque leves Suessones in armis:"
Suessones is a correction; but there is no doubt about it (ed. Oudendorp).
[G. L.]
SUE'SSULA (Zovívoouna: Eth. Suessulanus: Sessola), a city of Campania, situated in the interior of that country, near the frontiers of Samnium, betwen Capua and Nola, and about 4 miles NH. of Acerrae. It is repeatedly mentioned during the wars of the Romans with the Samnites, as well as in their campaigns against Hannibal. Thus in the First Samite War (b. c. 343) it was the scene of a decisive victory by Valerius Corrus over the Samnites, who had gathered together the remains of their army which had been preciously defeated at Mount Gaurus (Liv. vii. 37). In the great Campanian War shortly after, the Suessulani followed the fortunes of the citizens of Capua, and shared the same fate, so that at the close of the contest they must have obtained the Roman civitas, but witheut the right of suffrage (Id. viii. 14). In the Second Punic War the city bears a considerable part, though apparently more from its position than its own importance. The line of hills which rises from the level plain of Campania immediately above Suessula, and forms a kind of prolongation of the ridge of Mount Tifata, was a station almost as convenient as that mountain it-elf, and in B. c. 216, it was occupied by Marcellus with the view of protecting Nola, and watching the operations of Hannibal against that city (Liv. xxiii. 14, 17). From this time the Romans seem to have kept up a permanent camp there for some years, which was known as the Castra Claudiana, from the name of Marcellus who had first established it, and which is continually alluded to during the operations of the subsequent campraigns (Liv. xxiii. 31, xxiv. 46, 47, xxv. 7, 22. xxvi. 9). But from this period the name of Sucssula disappears from history. It continued to be a municipal town of Campania, though apparently one of a secondary class; and inscriptions attest its municipal rank under the Empire. It had received a body of veterans as colonists under Sulla, but did not attain the colonial rank (Strab. v. p. 249; Plin. iii. 5. s. 9; Orell. Inscr. 129, 130, 2333; Lib. Col. p. 237). The Tabula places it on a line of road from Capua to Nola, at the distance of 9 miles from each of those cities (Tab. Peut). It was an episcopal see in the first ages of Christianity, and its destruction is ascribed to the Saracens in the 9th century. Its ruins are still risible in a spot now occupied by a marshy forest about 4 miles S. of Maddinloni, and an adjacent castle is still called Torre di Sessola. Inscriptions, as well as capitals of columns and other architectural fragments, have been found there (Pratilli Tia Appia, iii. 3. p. 347; Romanelli, vol. iii p. 590).
[E. H. B.]
SUETRI (Eountpiot, Ptol. iii. 1. § 42, written Zourtpiot in some editions), a Ligurian people, placed by Pling (iii. 4) above the Oxybii, who were on the coast between Frijus and Antibes. The Suetri are the last people nanned in the Trophy of the Alpes If the position of their town Salinae [SalusaE] is
properly fixed, the Suetri were in the northern part of the diocese of Frijus.
[G. L.]
SUEVI ( $\Sigma o \bar{\eta} 6 o t$ or $\Sigma$ Kovņot), is the designation for a very large portion of the population of ancient Germany, and comprised a great number of separate tribes with distinctive names of their own, such as the Sembones. German authors generally connect the name Suevi with Swiban, i. e. to sway, move unsteadily, and take it as a designation of the unsteady and migatory habits of the people, to distinguish them from the Ingaevones. who dwelt in villages or fixed habitations (Zeuss, Die Deutschen, p. 55, foll.); others, however, and apparently with, good reason, regard the name as of Celtic or even Slavonian origin; for the Romans no doubt employed the name, not because indigenous in Germany, but because they heard it from the Celts in Gaul. We must, however, from the first distinguish between the Suevi of Caesar (B. G. i. 37, ( $\mathbf{5 1}, 54$, iii. 7, iv. 1, \&c.) and those of Tacitus (Germ. 38, \&cc.): the Suevi in Caesar occupied the eastern banks of the Rhine, in and about the country now called Bauen, while Tacitus describes them as occopying the country to the north and east of the Suevi of Caesar, so that the two writers assign to thern quite a different area of country. Strabo (vii. p. 290) again states that in his time the Suevi extended from the Rhenus to the Albis, and that some of them, such as the Hermunduri and Longobardi, had advanced even to the north of the Albis. Whether the nations called Suevi by Caesar and Tacitus are the same, and if so, what causes induced them in later times to migrate to the north and east, are questions to which history furnishes no answers. It is posisible, however, that those whom Cressur encountered were only a branch of the great body, perhaps Chatti and Longobardi. That these latter were pure Germans cannot be doubted ; but the Suevi of Tacitus, extending from the Baltic to the Danube, and occupying the greater part of Germany, no doubt contained many Celtic and still more Slavonic elements. It has in fact been conjectured, with great probability, that the name Suevi was applied to those tribes which were not pure Germans, but more or less mixed with Slavonians; for thus we can understand how it happened that in their habits and mode of life they diftered so widely from the other Germans, as we see from Tacitus; and it would also account for the fact that in later times we find Slavonians peaceally established in countries previously occupied by Suevi. (Comp. Plin. iv. 28; Ptol. ii. 11. § 15; Oros. i. 2.) It deserves to be noticed that Tacitus (Germ. 2, 45) calls all the country inhabited by Suevian tribes by the name Suevia. The name Suevi appears to have been known to the Romans as early hs в. c. 123 (Sisenna, ap. Non. s. v. lancea), and they were at all times regarded as a powerful and warlike people. Their country was covered by mighty furests, but towns (oppida) also are spoken of. (Caes. B. G. iv. 19.) As Germany became better known to the Romans, the generic name Suevi fell more and more into disuse, and the separate tribes were called by their own names, although Ptolemy still applies the name of Suevi to the Semnones, Longobardi, and Angii.
In the second balf of the third century we again find the name Suevi limited to the country to which
it hald been applied by Caesir. it hall been applied by Caesar. (Ammm. Marc. xvi. 10; Jornand. Get. 55; Tab. Peut.) These Suevi, from whom the modern Surbia and the Suabians de-
rive their naumes rive their names, seen to have been a body of ad-

SULCI.
1045
renturers from rarions German tribes, who assumed the ancient and illustrious name, which was as applicable to them as it was to the Suevi of old. These later Suevi appear in alliance with the Alemannians and Burgundians, and in possession of the German side of Gaul, and Switzerland, and even in Italy and Spain, where they joined the Visigoths. Ricimer, who acts so prominent a part in the history of the Roman empire, was a Suevian. (Comp. Zeuss, l. c.; Wilhelm, Germanien, p. 101, \&c.; Grimm, Deutsche Gram. i. pp. 8, 60, ii. p. 25, (iesch. der Deutschen Spr. i. p. 494 ; Latham, on Tacit. Germ. Epileg. p. lxxi )
SLiL. [L. S.] SUEVICUM MARE, is the name given by Tacitus (Germ. 45) to the Bultic Sea, which Ptolemy § 2.) SUFES a place in Byzacena (Itin. Ant. S.]
48, 49. 51, 55). Now Sbiba or Sbihah. [T. H. I).] SUFE'TULA a town of Byzacene, 25 miles S. of Sufes. In its origin it seems to have been a later and smaller place than the latter, whence its name as a diminutive-little Sufes. In process of time, however, it became a very considerable town, as it appears to have been the centre whence all the roads leading into the interior radiated. Some vast and magnificent ruins. consisting of the remains of three temples, a triumphal arch, \&c., at the present Sfaitla, which is seated on a lofty plateau on the rixht bank of the Wed Ischmila, 80 kilomètres SW. of Kairoan, attest its ancient importance. (See Shaw's Travels, p. 107 ; Pelissier, in Rerue A rcheol. July 1847.) ['T. H. D.] Sü̈́úsi ( ミvḯús; Xúta, Stadiasm, §§ 331,332), the harbour of Elyrus in Crete, 50 stadia to the W. of Poecilassus, situated on a plain. It probably existed as late as the time of Hierocles, though now entirely uninhabited. Mr. Pashley (Travels, vol. ii. p. 100) found remains of the city walls as well as other public buildings, but not more ancient than the time of the Roman Empire. Several tombs exist resembling those of Hághio Ky'rko; an aqueduct is also remaining.
SULLLUM [HELVILLUM.]
SLINDING: an aqueduc
[E. B. J.]
SUINDINUM. [Cenomani.]
44) as the are mentioned only by Tacitus (Germ. dwelling on most northern of the German tribes, dheling on an island in the ocean. He was no doubt thinking of Scandia or Scandinavia: and Suiones unquestionably contains the root of the modern name SUISSA, a town in Armenia Minor [L. S.] pp. 207, 216), where, according Minor (It. Ant. Imperii (p.27), where, according to the Notitia stationed (P. 27), hite is now unknown Dacorum was SUISSATIUM (in Ptol. Voueardotov, i.] § 65), a town of in Ptol. Zoueardatov, ii. 6. conensis. The Geogr. Rav. (iv. 45) calls Tarrastatium. It is the modern Vittoria) calls it Sell-

 of the Paus.: Eth. Sulcitanus: S. Antioco), one in the SWS considerable cities of Sardinia, situated now call. corner of the island, on a small island, now called Isola di $S$. Antioco, which is, however, joined to the mainland by a narrow isthmus or neck of sand. S. of this isthmus, between the island and the mainland, is an extensive bay, now called the Golfo di Palmas, which was known in ancient times as the Sulcitanus Portus (Ptol.). The foundation of Sulci is expressly attributed to the Cartha-
ginians (Paus. x. 17. §9; Claudian. B. Gild. 518), and it seems to have become under that people one of the most considerable cities of Sardinia, and one of the chief se:ats of their power in the island. Its name was first inentioned in history during the First Punic War, when the Carthaginian general, Hannibal, having been defeated in a sea-fight by C. Sulpicius, took refuge at Sulci, but was slain in a tumult by his own soldiers (Zonar. viii. 12). No other mention of the name occurs in history till the Civil War between Pompey and Caesar, when the citizens of Sulci received in their port the fleet of Nasidius, the adiniral of Pompey, and furnished him with supplies; for which service they were severely punished by Caesar, on his return from Africa, B. c. 46, who imposed on the city a contribution of $\mathbf{1 0 0}, 000$ sesterces, besides heavils increasing its annual tribute of corn (Hirt. B. Afr. 93). Notwithstanding this infliction, Sulci seems to have continued under the Roman Empire to be one of the most flourishing towns in the island. Strabo and Mela both mention it as if it were the second city in Sardinia; and its municipal rank is attested by inscriptions, as well is by Pling. (Strab. v. p. 225; Mel. ii. 7. § 19; Plin. iii. 7. s. 13; 1'tol. iii. 3. § 3; Inscr. ap De la Marmora, vol. ii. pp. 479, 482.) The Itineraries give a line of road proceeding from Tibula direct to Sulci, a sufficient proof of the importance of the latter place. (ltin. Ant. pp. 83, 84.) It was also one of the four chief episcopad sees into which Sardinia was divided, and seems to have continued to be inhabited through a great part of the middle ages, but ceased to exist before the 13th century. The remains of the ancient city are distinctly seen a little to the N . of the modern village of $S$. Antioco, on the island or peninsula of the saine name: and the works of art which have been found there bear testimony to its flourishing condition under the Romans. (De la Marınora, vol. ii. p. 357; Snyth's Sardinia, p. 317.) The name of Sulcis is given at the present day to the whole district of the mainland, immediately opposite to S. Autioco, which is one of the most fertile and best cultivated tracts in the whole of Sardinia. The Sulcitani of Ptoleny (iii. 3. § 6) ure evidently the inhabitants of this district.

The Itineraries mention a town or village of the name of Sulci on the E. coast of Sardina. which must not be confounded with the more celebrated city of the name. (Itin. Ant. p. 80.) It was probably situated at Girasol, near Tortoli. (De la Darmora, p. 443.)
[E. H. B.]
SULGAS, river. [Gallia, p. 954 ; Vindalicm.]
SU'LIA, SULE'NA ( (ounia, इou入hya, Stadiasm. $\S \S 324,325)$, a promontory of Crete, 65 stadia from Matala, where there was a harbour and good water, identitied by Mr. Pashley (Trarels, vol. i. p. 304) with Haighio Goline, the chief port of Anuri, on the S. const of the island. [E. B. J.]

SULIS, in Gallia, is placed in the Table on a route from Dartoritum, which is Dariorigum [DAmonious ] the capital of the Veneti, to Gesocribate the western extreinity of Bretagne. The distance from Dariorigum to Sulis is xx. By following the direction of the route we come to the junction of a small river named Seuel with the river of Blavet. The name and distance, as D'Anville supposes, indicate the position of Sulis.
[G. L.]
sCLLONIACAF, a tumn in Britannia Romana (Itin. Anl. p. 471), now Brockley Hill in Hrrtfordshire. (Canden, p. 359.) [T. H. D.]
sLLDIO (Sirmoneta), an ancient cits of L tium,
mentioned only by Pliny (iii. 5. s. 9) among thase which were extinct in his time, and incidentally noticed by Virgil. (Aen. x. 517.) It is in all probability the same place with the modern Sermoneta, which stands on a hill between Norba and Setia, looking over the Pontine Marshes. [E. H. B.]
SULMO (Zou入ṻv: Eth. Sulmonensis: Sulmona), a city of the Peligni, situated in the valley of the Gizio, in a spacious basin formed by the junction of that river with several minor streams. There is no doubt that it was one of the principal cities of the Peligni, as an independent tribe, but no notice of it is found in history before the Roman conquest. A tradition alluded to by Ovid and Silius Italicas, which ascribed its foundation to Solymus, a Phrygian and one of the compranions of Aencas, is evidently a mere etymological fiction (Ovid, Fast. iv. 79; Sil. Ital. ix. 70-76.) The first mencion of Sulmo occurs in the Second Punic War, when its territory was ravaged by Llannibal in B. c. 211, but without attacking the city itself. (Liv. xxvi. 11.) Its name is not noticed during the Sucial War, in which the Peligni twok so prominent a part; but according to Florus, it suffered severely in the subsequent civil war between Sulla and Marius, having been destroyed by the former as a punishment for its attachment to his rival. (Flor. iii. 21.) The expressions of that rhetorical writer are not, however, to be construed literally, and it is more probuble that Sulmo was confiscated and its lands assigned by Sulla to a body of his soldiers. (Zumpt, de Colon. p. 261.) At all events it is certain that Sulmo was a well-peopled and considerable town in b.c. 49, when it was occupied by Domitius with a garrison of seven cohorts; but the citizens, who were favourably affected to Caesar, opened their gates to his lieutenant M. Antonius as soon as he appeared before the place. (Caes. B. C. i. 18; Cic. ad Att. viii. 4, 12 a .) Nothing more is known historically of Sulmo, which, however, appears to have always continued to be a considerable provincial town. Ovid speaks of it as one of the three municipal towns whose districts composed the territory of the Peligni ("Peligni pars tertia ruris," A mor. ii. 16.1): and this is confirmed hoth by Pliny and the Liter Coloniarum; yet it does not seem to have ever been a large place, and Ovid himself designates it as a small provincial town. (Amor. iii. 15.) From the Liber Coloniarum we learn also that it had receired a colony, probably $n$ the time of Augustus (Plin. iii. 12. 8. 17; Lib. Colon. pp. 229, 260); though Pliny does not give it the title of a Colonia. Inscriptions, as well as the geographers and Itineraries, attest its continued existence as a municipal town throughout the Kuman Empire. (Strab. v. p. 241 ; Ptol. iii. 1. § 64; Tab. Peut.; Urell. Incer. 3856 ; Mommsen, /nacr. R.N. pp. 287-289.) The modern city of Sudinona undoubtedly occupies the ancient site: it is a tolerably flourishing place and an episcopal see, having succeeded to that dirnity after the fall of Valea, which bad arisen on the ruins of Corfimiun. (Romanelli, vol. iii. pp. 154156.)

The chief celebrity of Sulmo is derived from its having been the birthplace of Ovid, who repestedly alludes to it as such, and celebrates its salubrity. and the numerous streams of clear and perennial water in which its neighbourhood abounded. But, like the whole district of the Peligni, it was extremely cold in winter, whence Ovid himseli, and Silius Italicus in imitation of him, calls it "gehdus

Sulmo" (Ovid, Fast. iv. 81, Trist. iv. 10. 3, Amor. ii. 16; Sil. Ital. viii. 511 .) Its territory was fertile, both in corn and wine, and one district of it, the Pagus Fahianus, is particularly mentioned by Pliny (xvii. 26. s. 43) for the care bestowed on the irrigation of the vineyards.

The remains of the ancient city are of little interest as ruins, but indicate the existence of a considerable town; among them are the vestiges of an amphitheatre, a theatre, and thermae, all of them without the gates of the modern city. About 2 miles from thence, at the foot of the Monte Morrone, are some ruins of reticulated masonry, prubably those of a Roman villa, which has been called, without the slightest reason or authority, that of Ovid. (homanelli, vol. iii. pp. 159, 161 ; Craven's Abruzzi, vol. ii. p. 32.)

Sulnno was distant seven miles from Corfinium, as we learn both from the Tabula and from Caesar. (Caes. B. C. i. 18; Tab. Peut.) Ovid tells us that it was 90 miles from Rome (Trist. iv. 10. 4), a statement evidently meant to be precise. The actual distance by the highroad would be 94 miles; viz. 70 to Cerfennia, 17 from thence to Corfinium, and 7 from Corfinium to Sulmo. (D'Anville, Anal. Gcogr. de CItalie, pp. 175, 179.) There was, however, probably a branch road to Sulno, after passing the Mons Imeus, avoiding the detour by Corfinium. [E. H. B.]
SUMA'TIA ( B. s. v.; ミovuךтia, Paus. viii. 36. § 7; इoumdteiov, Paus. viii. 27. § 3; ミuv $\boldsymbol{\eta} \boldsymbol{r} \in \iota a$, Steph. B. s. v.), a town of Arcadia in the district Maenalia, on the southern slope of Mt. Maenalus. It was probably on the summit of the hill now called Sylimna, where there are some remains of polygonal walls. (Leake, Morea, vol. ii. p. 51 ; Ross, Peloponnes, p. 120.)

SLMMONTORIUM, a place in Vindelicia (lt. Ant. p. 277), where, according to the Notitia Imperii, the commander of the 3rd legion was stationed. Its exact site is uncertain.
[L. S.]
SUMMUS PYRENAEUS. One of the passes of this name mentioned in the Antonive Itin. and the Table was on the road from Narbo (Narbonne) to Juncaria (Junquera) in Spain. The road passed from Narbo through Ad Centuriones and Ad Stabulum ; but the distances in the Itins. are not correct; nor is the distance in the Itin. correct from Summus Pyrenaeas to Juncaria. The pass, however, is well marked; and it is the Col de Pertus, which is commanded by the fort of Bellegarde. This is the road by which Hannibal entered Gallia, and the Roman armies marched from Gallia into Spain. A second pass named Summus Pyrenaeus in the Antonine Itin. was on the road from Beneharnum [Beneharnum] in Aquitania to Caesaraugusta (Saragosa) in Spain. The road went through lluro (Oleron) and Aspa Laca [Aspa Luca] and Forum Ligneum [Forum Ligneum], which is 5 from Sunimus Pyrenaeus. This road follows the Gave d Aspe from Oleron; and on reaching the head of the valley there are two roads, one to the right and the other to the left. That to the right called Port de Bernere must be the old road, because it leads into the valley of Aragues and to Beilo in Spain, which is the Ebellinum of the Itin. on the road from Summus Pyrenaeus to Saragosa.

There is a third pass the most western of all also named Summus Pyrenaeus on the road from Aquae Tarbellicae (Dax) in Aquitania to Pompelon (Pamplona) in Spain. The Summus Pyrenaeus is the Sommet de Castel-Iinon, from which we descend
into the valley of Roncesvalles on the road to Pamplona [Imus Pyrenakus]. (D'Anville, Notice, gc.)
[G. L.]
SUNA [Aborigines.]
SU'NICI. Tacitus ( ${ }^{\prime}$ ist. iv. 66) mentions the Sunici in the history of the war with Civilis. Civilis having made an alliance with the Agrippinenses (Cöln) resolved to try to gain over the nearest people to Cöln, and he first secured the Sunici. Claudius Labeo opposed him with a force hastily raised among the Betasii, Tungri and Nervii, and he was confident in his position by having possession of the bridge over the Mosa. [Pons Dlosae]. No certain conclusion as to the position of the Sunici can be derived from this; but perbaps they were between Cöln and the Maas. Pliny (iv. 17) mentions the Sunici between the Tungri and the Frisiabones.
[G. L.]
SU'NIUM ( Koúviov: Eth. Eouvicús), the name of a promontory and demus on the southern coast of Attica. The promontory, which forms the most southerly point in the country, rises almost perpendicularly from the sea to a great height, and was crowned with a temple of Athena, the tutelary goddess of Attica. (Paus. i. 1. § 1 ; Zoúviov ipov, Hom. Od. iii. 278 ; Soph. Ajax, 1235; Eurip. Cycl. 292; Vitruv. ir. 7). Sunium was fortified in the nineteenth year of the Peloponnesian War (b.c. 413) for the purpose of protecting the passage of the cornships to Athens (Thuc viii. 4), and was regarded from that time as one of the principal fortreses of Attica (Comp. Dem. pro Cor. p. 238; Liv. $x \times x i$. 25; Scylax, p. 21.) Its proximity to the silver mines of Laurium probably contributed to its prosperity, which passed into a proverb (Anaxand. ap. Athen. vi. p. 263, c.) ; but even in the time of Cicerc it had sunk into decay (ad Att. xiii. 10). The circuit of the walls may still be traced, except where the precipitous nature of the rocks afforded a natural defence. The walls which are fortified with square towers, are of the most regular Hellenic masonry, and enclose a space of a little more than half a mile in circumference. The southern part of Attica, extending northwards from the promontory of Sunium as far as Thoricus on the east, and Anaphlystus on the west, is called by Herodotus the Suniac angle
 Sunium was especially sacred to Athena, we learn from Aristophanes (Equit. 557, Aves, 869) that Poseidon was also worshipped there.

The promontory of Sunium is now called Cape Kolinnes, from the ruins of the temple of Athena which still crown its summit. Leake observes that "the temple was a Duric hexastyle; but none of the columns of the fronts remain. The original number of those in the flanks is uncertain; but there are still standing nine columns of the southern, and three of the northern side, with their architraves, together with the two columns and one of the antae of the pronaus, also bearing their architraves. The columns of the peristyle were 3 feet 4 inches in diameter at the base, and 2 feet 7 inches under the capital, with an intercolumniation below of 4 feet 11 inches. The height, including the capital, was 19 feet 3 inches. The exposed situation of the building has caused a great corrosion in the surface of the marble, which was probably brought from the neighbouring mountains; for it is less homogeneous, and of a coarser grain, than the marble of Pentele. The walls of the fortress were faced with the same kind of stone. The entabla-
ture of the peristyle of the temple was adorned with sculpture, some remains of which have been found among the ruins. North of the temple, and nearly in a line with its eastern front, are foundations of the Propylaeuin or entrance iuto the sacred peribolus: it was about 50 feet long and 30 broad, and presented at either end a front of two Duric columns between antae, supporting a pediment. The columns were 17 feet high, including the capital, 2 feet 10 inches in diameter at the base, with an opening between them of 8 feet 8 inches." (The Demi of Attica, p. 63, 2nd ed.) Leake remarks that there are notraces of any third building visible, and that we must therefore conclude that here, as in the temple of Athena Polias at Athens, Poseidon was honoured only with an altar. Wordsworth, howerer, remarks that a little to the NE. of the peninsula on which the temple stands is a conical hill, where are extensive vestiges of an ancient building, which may perhaps be the remains of the temple of Poseidon. (Athens and Attica, p. 207.)

SUNNESIA, a small island on the S. coast of Spain (Geogr. Rav. v. 27.)
[T.H. D.]
SUNONENSIS LACUS, a lake in Bithynia, between the Ascania Lacus and the river Sangarius. (Amm. Marc. xxvi. 8.) It is probably the same lake which is mentioned by Evagrius (Hist. Eccl. ii. 14) under the name of Boav $\lambda i \mu \nu \eta$ in the neighbourhood of Nicomedeia, and which is at present known under the name of Shabanja. It seems, also, to be the same lake from which the younger Pliny (x. 50) proposed to cut a canal to the sea. [L.S.]

SUPERAEQUUM or SLPEREQUUM (Eth. Superaequanus: Castel Vecchio Subequs), a town of the Peligni, one of the three which pmsessed municipal rights, and among which the territory of that perple was divided. [Peligni.] Hence it is mentioned both by Pliny and in the Liber Coloniarum, where it is termed "Colonia Superaequana." It received a colony of veterans, probably under Augustus, to which a fresh body of colonists was added in the reign of M. Aurelius. (Plin. iii. 12. s. 17; Lib. Colon. p. 229; Zumpt, de Colon. p. 361.) The name is not mentioned by any other author, but several inscriptions attest its municipal importance. Its site, which was erroneously transferred by Cluverius to Palena, was clearly fixed by Holstenius at a place still called Castel Vecchio Subequo (in ulder documents Subrequo or Subrego), where the inscriptions alluded to are still extant. It is situated on a hill on the right bank of the Aternus, and about 4 miles on the left of the Via Valeria. Its territory probably comprised the hilly district between that roid and the Aternus. (Cluver, Ital. p. 758 ; Holsten. Not. in Cluver. p. 145; Rumanelli, vol. iii. pp. 134137 ; Mommsen, Inscr. R. N. p. 289.) [E. H. B.] SUPERATII. [Astures.]
superum Mare. [Admaticum Mare.]
SU'IPARA (Zoúmқapa, Peripl. M. E. c. 52, ed. Miill.), a place on the western coast of Uindostan, at no great distance from Barygaza or Beroach. Ptolemy calls it इoundpa (vii. 1. §6). In Lassen's map it is placed on the left bank of the Tupati or Managuna, not far to the N. of Surat. This place is also mentioned by Edrisi (i. p. 171), and by Cosmas Indicoplenates under the form of 'Opja日d (p. 337, ed. Montfatuc.). It has been suspected, with much reason, by Benfey, that this is the "Ophir" of the Bible,- the name in Sanscrit and Hebrew respectively offiring some remarkable amalogies. (Benfey, art. Indien, in Ersch wnd Gruber, p. 28.) [V.]
 situated on the Euphrates, in the district of Palinyrene, long. $72^{\circ} 40^{\prime}$, lat. $35^{\circ} 40^{\prime}$ of Ptolemy, who places it between Alalis and Alamata (v. 15. § 25); apparently the Sure of the Peutinger Table. according to which it was 105 M.P. distant from Palnyra. It is called in the Notitiae Imperii (§ 24) Flavia Turina Sura (ap. Msmert, p. 408). It is probably identical with the Ura of Pliny, where, nccording tw him, the Euphrates turns to the east from the deserts of Palmyra (v. 24. s. 87). He, however, mentions Sura (26. s. 89) as the nearest town to Philiscam, a town of the larthians on the Euphrates. It was 126 stadia distant from Heliopolis, which was situated in what was called "Barbaricus campus." It was a Ruman garrison of some importance in the Persian campaigns of Belisarius; and a full accourt is given of the circumstances under which it was taken and burned by Chosroes I. (A. d. 532), who, having marched three long days' journey from Circesium to Zenobia, alung the course of the Euphrates, thence proceeded an equal distance up the river to Sura. Incidental mention of the bishop proves that it was then an episcopal see. ('rucop. Bell. Jers. i. 18, ii. 5.) Its walls were so weak that it did not hold out more than halt an hour ; but it was afterwards more substantially fortified, by order of the emperor Justinian. (Id. de Aedificiis Justinimi, ii. 9.) "About 36 miles below Balis (the Alalis of Ptolemy), fullowing the course of the river, are the ruins of Sura; and about 6 miles lower is the fond of El-Hammam," which Col. Chesney identifies with the Zeugma of Thapsacus, where, according to loral tradition, the army of Alexander crossed the Euphrates (Expedition for Survey, foc. vol. i. p. 416). In the Chart (iii.) it is called Sooreah, and marked as "brick ruins," and it is prubable that the extensive brick ruins a little below this site, between it and Phunsa (Thapsacus), may be the remains of Alamata, mentioned in connection with Sura by Ptolemy. Ainsworth is certainly wrong in identifying the modern Suriyeh with the ancient Thapsacus (p. 72).
[G. W.]
SURA, a branch of the Mosella in Gallia. Auso nius (Mosella, v. 354):-
" Namque et Pronacae Nemesaeque adjuta meatu
Sura tuas properat non degener ire sub undas."
The Sura (Sour or Sure), comes from, Laxembonrg, and after receiving the Pronsea (Prum) and Nemesa (Nins), joins the Our, which falls into the Moselle on the left bank above tugusta Trevirorum. [G. L.]

## SURAE. [Sorae.]

SURASE'NAE (Koupaghyar, Arrian, Ind. c. 8), an Indian nation, noticed by Artian. who appear to have dwelt along the banks of the Jumna. They were fanous for the worslip of the Indian Hercules, and had two principal cities, Methora (Maduma) and Cleisobora. The name is, pure Sanscrit. Surasénakis.
[V.]
SURDAONES, a people of Hispania Tarraconensia, seated near Ilerda, and probably belonging to the Ilergetes (Plin. iii. 3. s. 4.) [T.H.D.]

SU'RIUM ( Eov́poov, Ptol. v. 10. §6) a place in Colchis, at the mouth of the Surius. (Plin. vi. 4. s. 4.) There is still at this spot a plain called Suram. (Ritter, Errdhende, ii. p. 809.) [T. H. D.]

SU'RIUS a small tributary river of the Plasis in Colchis. (Plin. vi. 4. s. 4.) According to the name authority, its water had a petrifying power (ii. 103. s. 106.)
[T.H.D.]

SURRENTINUM PROM. [Minervae Prom.]
 Ptol. : Eth. Surrentinus: Surrento), a city on the coast of Campania, on the southern side of the beautiful gulf called the Crater or Bay "f Naples, about 7 miles from the headland called Minervae Promontorium, which forms the southern boundary of that bay. We have very little infurmation as to its early history: its name is never mentioned till after the Roman conquest of Campania. Tradition indeed ascribed the foundation of Surrentum to the Greeks, but whether it was a colony from Cumae, or an earlier Greek settlement, we have no account: and there dues not appear any evidence that it had, like many places in this part of Italy, a distinctly Greek character in historical times. Strabo calls it a Campanian city (Strab. v. p. 2i7), but this may very probably refer to its nut being one of those occupied by the Picentines. According to the Liber Coloniarum a great part of its territory, and perhaps the town itself, was considered in a certain sense as consecrated to Minerva, on account of its proximity to her celebrated temple on the adjuining promontory, and was for that reason occupied by Greek settlers ( $L$ ib. Col. p. 236). It nevertheless received a partial colony under Augustus (1b.), but wi:hout attaining the rank or character of a Colonia. Numerous insciptions record its existence as a municipal town under the Roman Empire, and it is noticed by all the geographers: but its name is rarely mentioned in history (Strab. l. c.; Plin. iii. 5. £. 9 ; Mel. ii. 4. § 9 ; Ptol. iii. $1 . \$ 7$; Orell. Inscr. 3742 ; Monmsen, Inscr. R. N. 2111-2125). It was, however, resorted to by wealthy komans on account of its beautiful scenery and delightful climate; among others Pollius Felis, the friend of Statius, had a villa there, which the pret has celebrated at considerable length in one of his miner poems (Silv. ii. 2). We are told also that Agrippa Postumus, when he first incurred the displeasure of Augustus, was ordered to retire to Surrentuin, befure he was consigned to more complete banishment in the island of Planasia (Suet. Aug. 65).

But the chief celebrity of Surrentum was derived from its wine, which enjoged a high reputation at Rome, and is repeatedly alluded to by the puets of the Empire. It was considered very wholesome, and was in consequence recommended by physicians to canvalescents and invalids. Tiberius indeed is said to have declared that it owed its reputation entirely to the physicians, and was in reality no better than sinegar. It did not attain its maturity till it had been kept 25 years (Plin. xiv. 6. s. 8 ; Athenae. i. p. 126 ; Orid. Met. xv. 710 ; Martial, siii. 110 ; Stat. Silv. iii. 5. 102; Strab. v. p. 243; Colum. $R$. R. iii. 2. § 10). We learn from Martial also (xiii. 110, xiv. 102) that Surrentum was noted for its pottery. The hills which produced the celebrated wae were those which encircle the plain in which the city was situated ("Surrentind colles," Ovid. Met. l. c.), and separate it from the gulf of Posidonia on the other side These hills form a part of the ridge which descends from the lofty mountain group of the Morte S. Angelo between Castellamare and Amalfi, and is continued as far as the headland opposite Capri This point, now called the Punta della Campanella, the ancient Promonturium Minenae, was known also by the name of Surrentinum Promontorium, from its close connection with the town of Surrentum (Tac. $A n n$. iv. 67 ; Stat. Sile. v. 3. 165). The celcbrated sunctuary of the sirens,

SUSA.
1049
from which Surrentuin itself was supposed to have derived its name, seems to have been situated (though the expressions of Strabo are not very clear) between this headland and the town (Strab. v. p. 247 ). But the islands of the sirens (Sirenusae Insulae) were certainly the rocks now called $L i$ Galli, on the opposite side of the promontory. The villa of Pollius, which is described by Statius as lowking down upon the deep Ginlf of Puteoli, stond upon the headland now called Cupo di Sorrento, on the W. of the town, separating the Bay of Sorrento from that of Massa: extemsive ruins of it are still visible, and attest the accuracy of the pnet's description. (Stat. Silv. ii. 2; Swinburne's Tracels, vol. i. pp. 88-90.)

The other ruins still visible at Sorrento and in its neighbourhood are of no great interest: they present numerous fragments of buildings of imperial times, to some of which the names of a temple of IIercules, temple of Neptune, \&c. have bee:n applied by local antiquarians, with no other foundation than the fact that we learn from Statius the existence of temples to those divinities at Surrentum. The most comsiderable relic of antiquity is a Piscina of large dimensions, which is in such good preservation that it still serves to supply the inhabitants with water. The modern town of surrento is a flourishing and populous place with a population of above 6000 souls: it is much resorted to by strangers on account of its mild and delicious climate, for which it is already extolled by Silius Italicus (" Zephyro Surreatum molle salutri," Sil. Ital. v. 466 ) [E. H. B.]

SUSA ( 7 d Zuṽ $a$, Aeschyl. P'ers. 535, 730; Herod. i. 188; Xen. (yr. viii. 6. § 8, \&c.; in 0. T. Sucshan, Esther, i. 2 : Nehemuiuh, i. 1; Daniel, viii. 2), the chief city of the province of Susiana, on the eastern bank of the Choompes (Kerhhoh). There was considerable doubt annong the ancient writers as to the exact position of this celebrated city. Thus Arrian (vii. 7), Pliny (vi. 27. s. 31), and Daniel (viii. 2) place it on the Eulaeus (Ulai in Daniel): while from other authors (Strab. xv. p. 728) it may be gathered that it was situated on the Chouspes. (For the pribable cause of this confusion, see Chonspres.) We may add, however, that, according to Curtius, Alexander on his way from Babylon had to cross the Chonspes before he could reach Susa (v. 2), and that the same inference may be drawn from the account of Aristacoras of the relative position of the places in Persia in his address to Cleonenes. (Herod. v. 52.) It appears to have been an early tradition of the country that Susa was founded by Dareius the son of Hystappes (Plin. l. c.): and it is described by Aeschylus as
 termed Meuvóveiov kate (Herod. v. 54). and its orisin is attributed to Memmon, the son of Tithonus. (Strab. l. c.; Steph. B. s. v.) The name is said to have been derived from a native l'ersian word Susan (meaning lily), from the great abundance of these plants in that neighbourhoud. (Steph. B. s. v.; Athen. xii. p. 513, ed. Cassaub.) Athenaeus also contirms the account of the excellence of the cimate of Susa (l.c.). It may be remarked that the word $\sum$ Kovervov was well known as applied to an unguent extracted from lilies. (Diuscor. iii. c. de lilio: Athen. xv. p. 609; Etymol. M. 8. ท. Eovóvov). The city was said to have been 120 stadia in circumference (Strab. l. c.), and to have been surrounded by a wall, built like that of Babylow of burnt brick. (Strab. Lc.; Paus. iv. 31.
§ 5.) Diodorns (xix. 16, xvii. 65) and Cassiodorus (vii. 15) speak of the strength and splendour of its citadel; and the latter writer affirms that there was a splendid palace there, built for Cyrus by Memnon. Besides this structure, Pliny speaks of a celebrated temple of Diana (l. c.; see also Nart. Capella, vi. de India, p. 225, ed. Grotius), in all probability that of the Syrian goddess Anaitis: while St. Jerome adds, that Daniel erected a town there (Hieronym. in Dan.). a story which Josephus narrates, with less probability, of Ecbatana. (Ant. x. 11.) Susa was one of the capitals at which the kings of Persia were wont to spend a portion of the year. Thus Cyrus, according to Xenophon, lived there during the three months of the spring. (Cyrop. viii. 6. § 22.) Strabo offers the most probable reason for this custom, where he states that Susiana was peculiarly well suited for the royal residence from its central position with respect to the rest of the empire, and from the quiet and orderly character of its government (l. c.) From these and other reasons, Susa appears to have been the chief treasury of the Persian empire (Herod. v. 49); and how vast were the treasures laid up there by successive kings, may be gathered from the narrative in Arrian, of the sums paid by Alexander to his soldiers, and of the preserits made by him to his leading generals, on the occasion of his marriage at Susa with Barsine and Parysatis (Curt. vii. 4, 5): even long after Alexander's death, Antigonus found a great amount of plunder still at Susa. (Diod. xix 48.)

With regard to the modern site to be identified as that of the ruins of Susa, there has been considerable difference of opinion in modern times. This has, however, chiefly arisen from the scarcity of travellers who have examined the localities with any sufficient accuracy. The first who did so, Mr. Kinneir, at once decided that the modern Sis, situated at the junction of Kerl:hah and river of Diz, must represent the Shushan of Daniel, the Susa of profane authors. (Travels, p. 99; comp. Malcolm, Hist. Persia, i. p. 256.) Rennell had indeed suspected as much long before (Geogr. Herodot. i. p. 302); but Vincent and others had advanced the rival claim of Shester. (Anc. Commerce, i. p. 439.) The question has been now completely set at rest, by the careful excarations which have been made during the last few years, first by Colnnel (now Sir W. F.) Williams, and secondly by Mr. Loftus. The results of their researches are given by Mr. Loftus in a paper read to the Royal Society of Literature in November, 1855. (Transactions, vol. v. new series.) Mr. Loftus found three great mounds, measuring together inore than $3 \frac{1}{2}$ miles in circumference, and ahove 100 feet in height; and, on excarating, laid bare the remains of a gigantic colonnade, having a frontage of 343 feet, and a depth of 244 , consisting of a central square of 36 columns, flanked to the N., E., and W. by a similar number-the whole arrangement being nearly the same as that of the Great Hall of Xerxes at Persepolis. A great number of other curious discoveries were made, the most important being numerous inscriptions in the cuneiform character. Enough of these has been already deciphered to show, that some of the works on the monnd belong to the most remote antiquity. Among other important but later records is an inscription,the orily memorial yet discovered of Artaxerxes Mnemon, the conqueror of the Greeks at Cunasa, which describes the completion of a palace, com-- menced by Dareius the sun of Hystaspes and
dedicated to the goddesses Tanaitis and Mithra. A Greek inscription was also met with, carved on the base of a column, and stating that Arreneides was the governor of Susiana. The nativer exhibit a monument in the neighhourhood, which they call and believe to be the tomb of Laniel. There is no question, however, that it is a modern structure of the Mohammedan times.
[V.]
SUSIA'NA (í Kovalauth, Ptol. vi. 3. § 1 ; Polyb. v. 46: Strab. xv. 729, \&c.; 方 Kovals, Strab. Xv. 731 ; ì Eovaıás, Strab. ii. p. 134), an extensive province in the southern part of Asia, consisting in great measure of plain country, but traversed by some ranges of mountains. Its boundaries are rariously given by different writers according as it was imagined to include more or less of the adjacent district of Persis. Generally, its limits may be stated to have been, to the N., Medis with the mountains Charbanus and Cainbalidus, part of the chain of the Parachoathras; to the E. the outlying spurs of the Parachoathras and the river Oroatis; to the S. the Persian gulf from the mouth of the Oroatis to that of the Tigris; and to the W. the plains of Mesopotamia and Babylonia. (Cf. Ptol. l. c. with Strab. l. c., who, however, treats Susiana as part of Persis). As a province it appears to have been very fertile, expecially in grain, but exposed along the coasts to intense heat. (Strab. xv. p. 731.) The vine, the Macedonians are said to have introduced. (Strab. l.c.) Its principal mountains are those on the N ., called by Pliny Clarbanus and Cambalidus (vi. 27. s. 31), while a portion of the Montes Uxii probably belonged to this province, as in them is a pass called Пúлaı ミuбíts. (Polyaen. iv. 3. 27.)

Susiana was intersected by numerous rivers which flowed either to the Tigris or Persian gulf, from the high mountain watershed whereby it was surrounded. Of these the principal were the Eulaeus (Karin), the Choaspes (Kerkhah). the Coprates (river of Diz), the Hedyphon or Hedypnus (Jerráhi), and the Oreatis (Tab). The inhabitants of the district appear to have borne indifferently the names of Susii or Susiani, and, as inhabitants of the plain country, to have heen devoted to agricultural etnployments; in the mountains, horrever, were tribes of robbers, who, from time to time, were strong enough to levy black mail even on their kings when traversing their passes. (Strab. xv. p. 728.) Another name, whereby the people were known, at least in early times, was Cissii (Aesch. Pers. 16), and the land itself Cissia (Strab. xv. p. 728; Herud. v. 49). This name is clearly connected with that of one of the chief tribes of the people, the Cossaei, who are repeatedly mentioned in ancient authors. (Strab. xi. p. 522 ; Arr. Ind. 40 ; Polyb. v. 54, \&c.) There were many different tribes settled in different parts of Susiana; but it is hardly possible now to determine to what different races they may have belonged. Among these, the most prominent were the Uxii, a robber tribe on the mountain borders of Media; the Messabatae, who occapied a valley district, probably now that known as Mah-Sabndan; the Cossaei, in the direction along the Median mountains; and the Elymaei, inlahitants of Elymais the remnant, in all probability, of the earliest dwellers in this provinceFlam being the name whereby this whole district is known in the sacred records. (Isauih, xxi. 2; Jerem. xlix. 25.) Besides these, seversl smaller districts are noticed in different authors, as Cabandene, Corthiana, Gabiene, and Characene. Though l'tulemy has preserved the names of several snuall
towns, there seems to have been no city of importance in Susiana, excepting Susa itself. [V.]

SUSUI)ATA (Zovoovóáta), a place in the southeast of Germany, probably in the country initabited by the Silingae, at the foot of the Vandalici Montes. (Ptol. ii. 11. § 28.) Its exact site cannot be ascertained.
[L. S.]
SUTHCL, a town and fortress in the interior of Numidia, where Jugurtha had a treasury. (Sall. Jug. 37.)
[T. H. D.]
SU'TRIUM (Żoúrpiov: Eth. Sutriensis: Sutri), a city of Eiruria, situated in the southern part of that country, 32 miles from Rome, on the line of the Via Cassia. There is no doubt that it was an ancient Etruscan site, but apparently a small town, and in all probability a mere dependency of one of its more powerful neighbours. It was not till after the fall of Veii that the Romans carried their arms as far as Sutrium, which they first attacked in B. C. 391, with what success is uncertain (Diod. xiv. 98); but it must have fallen into their hinds either in that or the following year, as we find it in a state of dependency on Home immediately after the Gaulish invasion. (Liv. vi. 3.) The very year after that event (B. c. 389 ) the neighbouring Etruscans laid siege to Sutrium with a large force; the city fell into their bands, but was recovered (as the tradition related) by the dictator Camillus on the same day. (Liv. vi. 3; Diod. xiv. 117.) Very nearly the same story is told again in B. C. 385 , when the city was half taken by the Etruscans, but recovered by Camillus and Valerius. (Liv. ri. 9.) It was doubtless with a view to guard against the repetition of these surprises that two ytars afterwards Sutrium received a Roman colony, B. c. 383 (Vell. Pat. i. 14), and hencefurth becane, in conjunction with the neighbouring Nepete, one of the principal frontier furtresses of the Koman territwry on this side; hence Livy terms it " claustra Etrariae." (Liv. ix. 32.) We do not find any subsequent mention of it in history till B. C. 311 , when the Etruscans again laid siege to the city with their united forces, but were defeated in a great battle under its walls by Aemilius Barbula. (Liv. b. c.) The next year (b. c. 310) they were able to renew the siege at the opening of the campaign, but were once more defeated by the consul Q. Fabins Maximus, and took refuge in the Ciminian forest, which lay only a few miles distant. (I6. 33, 35.) But this barrier was now for the first time passed by the Roman arms, and henceforth the wars with the Etru-cans were transferred to a more northerly region. From this time, therefore, we hear but little of Sutrium, which was, however, still for a time the outpost of the Roman power on the side of Etruria. (Liv. x. 14.) Its name is next mentioned after a long interval during the Second Punic War, as one of the Coloniae Latinae, which, in B. C. 209, declared their inability to bear any longer the burdeus of the war. It was in consequence punished at a later period by the imposition of still heavier contributions. (Liv. $x x$ vii. $\mathfrak{G}$, xxix. 15.) Its territory was one of those in which permission was given to the exiled citizens of Capua to settle. (Id. xxvi. 34.)

Sutrium continued under the Roman government to be a small and unimportant cuuntry town: it is only once again mentioned in history, at the outbreak of the Perusian War (b. C. 41). when it was occupied by Agrippa, in oriler to cut off the cominunications of Lucius Antonius with Rome. (Appiat,
B. C. v. 31.) But its position on the Cassian Way preserved it from falling into decay, like so many of the Etruscan cities, under the Roman Ermpire: it is noticed by all the geographers, and its continued existence down to the close of the Western Empire is proved by inscriptions as well as the Itineraries. We learn that it received a fresh colony unde. Angustus, in consequence of which it bears in inscriptions the titles "Culonia Julia Sutrina." (Strab. v. p. 226 ; Plin. iii. 5. 8. 8; Ptol. iii. 1. § 50 ; Itin. Ant. p. 286; Tab. Peut.; Lib. Col. p. 217 ; Gruter, Inscr. p. 302. 1 ; Zumpt, de Col. p. 351.)

The modern town of Sutri is but a poor place with only ubout 2000 inhabitants, but retains its episcopal see, which it has preserved throughout the middle ages. It occupies the site of the ancient city, as is shown by many fragments of columns and other architectural ornaments built into the modern houses, as well as by some portions of the ancient walls, which resemble in their style of construction those of Nepe and Falerii. The situation is, liko that of most of the towns in this part of Etruria, on a nearly isolated hill bounded by precipitons cliffs or banks of tufo rock, of no great elevation, and surrounded by small glens or ravines on all sides. In the cliffs which bound these are excavated numerous tombs, of no great interest. But the most remarkable relic of antiquity at Sutri is its amphitheatre, which is excavated in the tufo rock, and is in this respect unique of its kind. It is, however, of small size, and, though irregular in construction, its architectural details are all of a late character: bence it is probable that it is really of Roman and Imperial times, though great importance has been sometimes attached to it as a specimen of an original Etruscan amphitheatre. Its anomalies and irregularities of structure are probably owing only to the fact that it was worked out of a previously existing stone-quarry. (I)ennis's Etruria, vol. i. pp. 94-97; Nibby, Dintorni, vol. iii. pp. $142,143$.
[E. H. B.]
SUZAEI ( Kov (aiou), a tribe of ancient Persis, noticed by Ptoleny (vi. 4. § 3). Lassen considers from this name that they were connected with the people of Susa, and that they were of the same race as the Uxii, one of the mountain races of Susiana. (lirsch. u. Grüber's E'ncych. iii. sect. vol. xvii. p. 438.)
[V.]
SYAGROS PROMONTORIUM (之íarpos áxpa), a promontory of the $S$. coast of Arabia, at the eastern extremity of the Adramitae, the westernmost of the gulf of the Sachalitae, placed by Ptoleny in long. $90^{\circ}$, lat. $14^{\circ}$ (vi. 7. § 11). He comments on an error of his predecessor, Marinus, who, he says, places the gulf Sachalites on the W. of Cape Syagros, while all who had navigated those seas distinctly asserted that the country Sachalitis and its synonymous bay were to the E. of Syagros (i. 17. §§ 2, 3). Marcianus (p. 23, ap. Hudson Geogr. Min. tom. i.) agrees with Ptolemy. The author of the Periplus ascribed to Arrian seems, however, to confirm the testimony of Marinus, by placing the Sinus Sachalites next to Cane Emporium, between that and Syagros Promontorium, and naming the bay to the E. of Syagros, Omana, which he reckons as 600 stadia in width; but as he mentions still further to the E., Moscha Portus, as a magazine for the spicery of Sacbalitis, which he there more fully describes, it is possible that he may have included all the country as far $E$. as Moscha under this name. It is at least clear that the Omana Sinus could be no part of the present
district of Oman. The maps give no bay to the W. of Syagros, where the Tretus Portus was situated. The Periplus says that the cape extended eastward, places a castle with a harbour and magazine at Syagros, and describes, in connection with it, the Dioscoridis Insula (Socotora), which Pliny places at a distance of $\mathbf{2} 240$ stadia.

There is no difficulty in identifying this promontory Syagros with the modern Ras Fartask, which derives its designation from the snout of the animal commemorated in its Greek name, which was probably a loose translation of its native appellation. The Periplus describes Syagros as the largest promontory in the world, - an hyperbolical expression, no doubt, but better suited to this cape than to any other on the coast, since the isolated mountain that forms Ras Fartask reaches an elevation of 2500 feet, and is visible at a distance of 60 miles; while those of Ras Sangra (al. Saukira), further to the E., sometimes identified with Syagros on account of the similarity of name, do not exceed 600 feet. The subject, it must be admitted, is not free from difficulty, mainly owing to the fact that Ptolemy places Mosecha Portus,-which is usually supposed to be the same as the Moscha Portus of the Periplus, and is identified with Dzafar or Saphar, - W. of Syagros; in which case Ras Noos (al. Nous), or Ras Saugra (al. Saukira), must be his Syagros, and the Sachalites Sinus still further E. But since the distance between Socatia and the coast at Ras Fartask, about 2000 stadia, approximates much more nearly to Pliny's figures, 240 M.P. ( $=2240$ stadia), than that between the same island and either of the other capes, 一for Ras Noos is 3600 stadia distant, and Ras Suugra considerably more,-the most probable solution of the difficulty is found in the hypothesis adopted above, of two ports called Moscha on the same coast. [Moscha.] (See Müller's Notes to Didut's ed. of the Gengr. Graec. Min. vol. i. pp. $\mathbf{2 7 9}, 280$.) The question has been examined by Dean Vincent, who was the first to fix correctly this important point in Arabian geography, and his main conclusions are acquiesced in by Mr. Forster, who has corroborated them by fresh evidence from the researches of modern travellers; and it is an interesting fact, that while the Greek geographers appear to have translated the native name of the cape, which it retains to this day, the natives would appear to have adopted a moditication of that Groek tramslation as the name of the town situated, then as now, under the cape, which still bears the name of Sugger. (Vincent, Periplus, vol.ii. pp. 331-351; Furster, Arabia, vol. ii. pp. 166-177.) [G. W.]

SY'BARIS ( (ibapts: Eth. Eubapitクs, Sybarita), a celebruted city of Magna Graecia, situated on the W. shore of the Tarentine gult, but a short distance from the sea, between the rivers Crathis and Sybaris. (Strab. vi. p. 263; Diod. xii. 9.) The last of these, from which it derived its name, was the stream now called the Cuscile, which at the present dav falls into the Crati about 3 miles from its mouth, but in ancient times undoubtedly pursued an independent course to the sea. Sybaris was apparently the earliest of all the Greek colonies in this part of Italy, being founded, according to the statement of Scymnus Chius, as early as B. c. 720. (Nymn. Ch. 360; Clinton, F. II. vol. i. p. 174.) It was an Achacan colony, and its Oekist wiss a citizen of Helice in Achaia: but with the Achacan cemigrants were mingled a number of Truezemian citizens. The Achacans, however, eventually ob-
tained the preponderance, and drove out the Troezenians. (Strab. l. c.; Arist. Pol. v. 3.) The Sybarites indeed appear to have sought for an origin in heroic times; and Solinus has a story that the first founder of the city was a son of Ajax Oïleus (Solin. 2. § 10); but this is evidently mere fiction, and the city was, historically speaking, andoubtedly an Achaean colony. It rose rapidly to great prosperity, owing in the first instance to the fertility of the plain in which it was situated. Its citizens also, contrary to the policy of many of the Greek states, freely admitted settlers of other nations to the rights of citizenship, and the vast population of the city is expressly ascribed in great measure to this cause. (Dind. xii. 9.) The statements transmitted to us of the power and opulence of the city, as well as of the luxurious habits of its inhabitants, have indeed a very fabulous aspect, and are without doubt grossly exaggerated, but there is no reason to reject the main fact that Sybaris had in the sixth century b. c. attained a degree of wealth and power unprecedented among Greek cities, and which excited the admiration of the rest of the Hellenic world. We are told that the Sybarites ruled over 25 subject cities, and could bring into the field 300,000 of their own citizens (Strab. l. c.), a statement obviously incredible. The subject cities were probably for the most part Oenotrian towns in the interior, but we know that Sybaris had extended its dominion across the peninsula to the Tyrrhenian sea, where it had founded the colonies of Posidonia, Laüs, and Scidrus. The city itself was said to be not less than 50 stadia in circumference, and the horsemen or knights who figured at the religious processions are said to have amounted to 5000 in number (Athen. xii. p. 519), which would prove that these wealthy citizens were more than four times as numerous as at Athens. Smindyrides, a citizen of Sybaris, who was one of the suitors for the daughters of Cleisthenes of Sicyon, is said by Herodotus to have surpassed all other men in refined luxnry. (Herod. vi. 127.) It was asserted that on this occasion he carried with him a train of 1000 slaves, including cooks, fishermen, \&c. (Athen. vi. p. 273; Diod. viii. Fr. 19.) It is unnecessary to repeat here the tales that are told by various writers, especially by Athenaeus, concerning the absurd refinements of lusury ascribed to the Sybarites, and which have rendered their very name proverbial. (Athenae. xii. pp. 518-521; Diod. viii. Fr. $18-20$; Suid. s. v. Eubapıtıкais.) They were particularly noted for the splendour of their attire, which was formed of the finest Milesian wool, and this gave rise to extensive commercial relations with Miletus, which proluced a close friendship between the two cities. (Timaeus, ap. Athen. xii. p. 519; Herod. vi. 21.) As an instance of their magnificence we are told that Alcimenes of Sybaris had dedicated as a votive offering in the temple of the Lacinian Juno a splendid figured robe, which long afterwards fell into the power of Dinnysius of Syracuse, and was sold by him for 120 talents, or more than 24.000l. sterling. (Pseud Arist. Mirab. 96; Athen. xii. p. 541.)

Notwithstanding these details concerning the wealth and luxury of Sybaris, we are almost wholly without information as to the history of the city until shortly before its fall. Herodotus incidentally refers to the time of Smindyrides (about $580-560$, B. c.) as the period when Sybaris was at the height of its power. At a later period it seems to have been agitated by political dissensions, with the
circumstances of which we are very imperfectly acquainted．It appears that the government had previously been in the hands of an oligarchy，to which such persons as Smindyrides and Alcimenes naturally belonged；but the democratic party，headed by a demagogue named Telys，succeeded in over－ throwing their power，and drove a considerable number of the leading citizens into exile．Telys hereupon seems to have raised himself to the position of despot or tyrant of the city．The exiled citizens took refuge at Crotona；but not content with their victory，Telys and his partisans called upon the Crotoniats to surrender the fugitives．This they refused to do，and the Sybarites hereupon declared war on them，and marched upon Crotona with an army said to have amounted to 300,000 men．They were met at the river Traeis by the Crotoniats， whose army did not amount to more than a third of their numbers；notwithstanding which they obtained a complete victory，and put the greater part of the Sybarites to the sword，continuing the pursuit to the very gates of the city，of which they easily made themselves masters，and which they determined to destroy so entirely that it should never again be inhabited．For this purpose they turned the course of the river Crathis，so that it inundated the site of the city and buried the ruins under the deposits that it brought down．（Diod．xii．9，10；Strab．vi．p． 263；Herod．v． 44 ；Athenae．xii．p． 521 ；Scymn． Ch．337－360．）This catastrophe occurred in в．c． 510 ，and seems to have been viewed by many of the Greeks as a divine vengeance upon the Sybarites for their pride and arrogance，caused by their exces－ sive prosperity，more especially for the contempt they had shown for the great festival of the Olympic Games，which they are said to have attempted to supplant by attracting the principal artists，athletes， \＆ce．，to their own public games．（Scymn．Ch．350－ 360；Athen．l．c．）

It is certain that Sybaris was never restored． The surviving inhabitants took refuge at Laiis and Scidrus，on the shores of the Tyrrhenian sea．An attempt was indeed made， 58 years after the de－ struction of the city，to establish them anew on the ancient site，but they were quickly driven out by the Crotouiats，and the fugitives afterwards com－ bined with the Athenian colonists in the foundation of Thurii．［Thurir．］At the present day the site is utterly desolate，and even the exact position of the ancient city cannot be determined．The whole plain watered by the rivers Coscile and Crati （the ancient Sybaris and Crathis），so renowned in ancient times for its fertility，is now a desolate swampy tract，pestilential from malaria，and fre－ quented only by vast herds of buffaloes，the usual accompaniment in Southern Italy of all such pesti－ ferous regions．The circumstance mentioned by Strabo that the river Crathis had been turned from its course to inundate the city，is confirmed by the accidental mention in Herodotus of the dry channel
 44）：and this would sufficiently account for the disappearance of all traces of the city．Swinburne indeed tells us that some＂degraded fragments of aqueducts and tombs＂were still visible on the peninsula formed by the two rivers，and were pointed out as the ruins of Sybaris，but these，as be justly observes，being built of brick，are probably of Roman times，and have no connection with the ancient city． Keppel Craven，on the other hand，speaks of＂a wall sometimes visible in the bed of the Crathis when the
waters are very low＂as being the only remaining relic of the ancient Sybaris．（Swinburne＇s Travels， vol．i．pp．290－292；Craven＇s Southern Tour，pp． 217，218．）The ruins marked on Zannoni＇s large map as IAntica Sibari are probably those of Thurii ［Thurie．］But it is certain that the locality has never yet been thoroughly examined，and it is pro－ bable that some light may even yet be thrown upon the site of this celebrated city：especially if the marshy plain in which it is situated should ever be reclaimed and cultivated．There is no doubt that if this were done，it would again be a tract of surpass－ ing fertility：it is cited as such by Varro，who tells us that＂in Sybaritano＂wheat was said to produce a hundred－fold．（Varr．R．R．i．44．）Even at the present day the drier spots produce very rich crops of corn．（Swinburne，l．c．）

The river Sybaris was said to be so named by the Greek colonists from a fountain of that name at Bura in Achaia（Strab．viii．p．386）：it had the property，according to some authors，of making horses shy that drank of its waters．（Pseud．Arist．Mi－ rab． 169 ；Strab．vi．p．263．）It is a considerable stream，and has its sources in the Apennines near Murano，flows beneath Castrovillari，and receives several minor tributary streams before it joins the Crathis．

## COIN OF SYBARIS．

## SY＇BOTA．［Corcyra，p．670．］

SYBRITA（之úfpıta，Scyl．p． 18 ；ミoúfןıтa，
 Polyb．ap．Steph．B．s．v．：Eth．ミıfpútios，Böckh， Corp．Inscr．vol．ii．p．637），a town of Crete， 8 M．P． from Eleutherna（Peut．Tab．），and famous for its numerous and beautiful silver coins，which，though some of them belong to a very early period，are the finest specimens of the Cretan mint；the types are always connected with the worship of Dionysus or Hermes．（Eckhel，vol．ii．p．320．）［E．B．J．］

SYCAMINA（之uкаuivळv $\pi \delta \dot{\lambda} \lambda s$ ），a city of Pales－ tine，placed by Strabo between Acre（＇A $\kappa \eta$ ）and Caesareia Palaestinae（ $\Sigma \tau \rho \alpha ́ \tau \omega \nu o s ~ \pi \dot{v} \rho \gamma o s$ ），the name of which alone remained in his time．There were，he says，many such ；of which he specifies this and Bu－ colon（Bovk $\delta \lambda \omega \nu$ ）and Crocodeilon（Крокобеi $\lambda \omega \nu$ ）． （Strab．xvi．p．758．）It was here that Ptolemy La－ thyrus，son of Cleopatra，landed the army of 30,000 men whom he had brought from Cyprus to besiege Ptolemais，which would imply that it was not far distant from Acre（Josephus，lib．xiii．13．§ 3）． The Itinerary of Antoninus makes it xxiv．M．P．from Ptolemais，xx．M．P．from Caesareia ；the Jerusalem Itinerary xv．M．P．from Ptolemais，xvi．from Caesareia． （Wesseling，pp．149，584．）The last－named authority places it at Mount Carmel，thereby justifying its iden－ tification with the modern Kaipha or Haifa，followed by Reichard，Mannert，and Kiepert，rather than with Atlit，suggested by Lapie．Indeed the testimony of Eusebius would seem to be conclusive on this point，
as he speaks of a village of this name（Eucaulvov $\pi \delta \lambda(s)$ on the coast between Ptolemais and Caesareia， near Mount Carmel，called also Hepha（＇ $\mathrm{H} \phi \mathrm{d}$ ）in his day．（Onomast．s．v．＇Iaфé日．）Dr．Wilson，however， thinks that the modern Haifa＂more probably oc－ cupies the site of the＇Mutatio Calamon，＇given in the Jerusalem Itinerary as 12 Roman miles from Ptolemais，while the＇Mansio Sicamenos＇of the same work was 3 miles farther on．Ruins have been dis－ covered along the shore，about 2 Roman miles to the the W．of Haifa；．．．these ruins may have been those of Sycaminos．＂（Lands of the Bible，vol．ii． p．241．）Haifu is a small walled town to the S ．of the Bay of Acre，at the northern base of the pro－ montory of Mount Carmel，distant about 10 miles from Ptolemais（Acre）；a distance far too small to satisfy the statement of the Itinerary of Antoninus， or even that of the Jerusalem Itinerary．But，not－ withstanding this，its identity with Sycamina seems to be sufficiently established by the testimony of Eusebius，joined to the historical fact recorded by Josephus，which better suits this than any other place on the coast，being in fact the very place where lbrahim Pasha，when engaged in a similar enterprise against Acre，landed some of his troops and concen－ trated his army，in 1831，preparatory to forming the siege of the town．（Alderson，Notes on Acre， pp．23，24．）
［G．W．］
SYCE（EUNn），a town of Cilicia，which accord－ ing to the Ravenna Geographer，who calls it Sycae （i．17），was situated between Arsinoë and Celenderis． （Athen．iii．5；Steph．B．8．v．इukal．）Leake （Asia Minor，p．202）looks for its site near the moder Kizliman．
［L．S．］
SYCEON，a town of Galatia，situated at the point where the river Siberis flowed into the Sangarius．（Procop．de Aed．v． 4 ；Vit．Theod． Syccotae， 2 ；Wessel．ad Hierocl．p 697．）［L．S．］

SYCU＇RIUM，a town of Thessaly in the district Pelaggiotis，at the foot of Mt．Ossa，which Leake identifies with Marmariani．（Liv．xlii． 54 ；Leake， Northern Greece，vol．iii．p．3i4．）

SYEBI MON＇TES（ $\tau$ d Zúnba $8 \rho \eta$ ，Ptol．vi． 14. § 8），a mountain chain in Scrthia，running from the Tapuri mountains in a NE．direction towards Imans．
［T．H．D．］
 in the west of Cilicia，between Coracesinm and Selinus（Strab．xiv．p．669，where the common but erroneous reading is Arsinoë ：Steph．B．s．v．； Ptol．v．8．§ 1；Hierocl．p．683；Lucan，viii．259； Flor．iv．2．）It should，however，be observed that Stephanus B．calls it a town of Isauria，and that Hierocles assigns it to Pamphylia．Beaufort （Karamania，p．178）observed some ruins on a steep hill in that district，which he thinks may mark the site of Syedra；and Mr．Hamilton，in his map of Asia Minor，also marks the ruins of Sydre on the same spot，a little to the south－east of Alaya， the ancient Coracesium．
［L．S．］
SYE＇NE（ $\Sigma v^{\prime} \eta \nu \eta$ ，Herod．ii．30；Strab．ii．p．133， xvii．p．797，seq．；Steph．B．s．v．；Ptol．vii．5．§ 15，viii．15．§ 15 ；Plin．ii．73．s．75，v．10．s． 11 ， vi．29．s． 34 ；It．Anl．p．164），the modern Assovan， was the frontier town of Aegypt to the $S$ ．Syene stiond upon a peninsula on the right bank of the Nile，immediately below the Great Falls，which ex－ tend to it from Philae．It is supposed to have de－ rived its name from Suan，an Acgyptian goddess， the llithya of the Greeks，and of which the import is＂the opener；＂and at Syene Upper Aegipt was
in all ages，conceived to open or begin．The quarries of Syene were celebrated for their stone， and especially for the marble called Syenite．They furnished the colossal statues，obelisks，and mono－ lithal shrines which are found throughout Aegypt； and the traces of the quarrymen who wrought in these 3000 years ago are still visible in the native rock．They lie on either bank of the Nile，and a road， 4 miles in length，was cut beside them from Syene to Philae．Syene was equally important as a military station and as a place of tratic．Under every dynasty it was a garrison town；and here were levied toll and custom on all boats passing southward and northward．The latitude of Syene－ $24^{\circ} 5^{\prime} 23^{\prime \prime}$－was an object of great interest to the ancient geographers．They believed that it was seated immediately ander the tropic，and that on the day of the summer solstice a vertical staff cast no shadow，and the sun＇s disc was reflected in a well at noonday．This statement is indeed incorrect； the ancients were not acquainted with the true tropic：yet at the summer－solstice the length of the shadow，or xhenth of the staff，could scarcely be dis－ cerned，and the northern limb of the sun＇s disc would be nearly vertical．The Nile is nearly 3000 yards wide above Syenc．From this frontier town to the northern extremity of Aegypt it flows for more than 750 miles without bar or cataract．The vorage from Syene to Alexandreia usually occupied betwien 21 and 28 days in favourable weather．［W．B．D．］

SYGAMBRI．［Sicambri．］
SYLINA INSULA．［Silera．］
SYLLIUM（Évanıov），a fortified town of Pamphylim，situated on a lofty height between Aspendus and Side，and between the rivirs Euryme－ don and Cestrus，at a distance of 40 stadia from the coast．（Strab．xiv．p．667；Arrian，Anab．i． 25：Scylax，p．40；Ptol．v．5．§ 1；Hierocl．p．679； Polyb．xxii．17；Steph．B．mentions it under the name $\sum \dot{v} \lambda \in \epsilon o \nu$ ，while in other passages it is called $\sum \dot{u}$－入atov，Zúd $\lambda \frac{1}{}$ ，and Zidouov．）Sir C．Fellows（Asiz Minor，p．200）thinks that the remains of a Greek town which he found in a wood on the side of a rocky hill near Bolcascooe belong to the ancient Syllium；but from his description they do not appear to exist on a lofty height．
［L．S．］
SYMAETHUS（之ímaiOos：Simeto）．one of the most considerable rivers of Sicily，which rises in the chain of Mons Nebmdes，in the great furest now called the Bosco di Caronia，and flows from thence in a southerly direction，skirting the base of Aetua，till it turns to the E．and flows into the sea alout 8 miles S．of Catania．In the lower part of its course it formed the boundary between the territory of Leontini and that of Catana．（Thuc．vi．65．）It receives in its course many tributaries．of which the most considerable are，the Fiume Salso，flowing from the neighboarhood of Nicosia and Traina， probably the Cyamosorus of Polybius（i．9），which he describes as flowing near Centuripa（Centorbi）， and the Dittaino，which rises in the halls near Asaro，the ancient Assorus．This is undoubtedly the stream called in ancient times Cinryass．Stephanus of Byzantium apparently gives the name of Adranus to the apper part or main branch of the Symacthus itself，which flows under the walls of Abranum （ Aderno）．This part of the river is still called the Simeto；but in the lower part of its course， where it approaches the sea，it is now known as the Giarretta．Such differences of name are conmmon in modern，as well as in ancient times．The Syume－

thns is much the most considerable river on the F . coast of Sicily, and is in consequence noticed by all the geographers (Scyl. p. 4.§ 13; Strab. vi. p. 272; Plin. iii. 8. s. 14 ; Ptol. iii. 4. § 9). It is also repeatedly alluded to by the Roman poets (Virg. Aen. ix. 584 ; Ovid, Fast. iv. 472; Sil. Ital. xiv. 232.)
[E. H. B.]
SY'MBOLON PORTUS (ZunBúnao $\lambda_{\iota} \mu \not \approx \nu$, Ptol. iii. 6. § 2 ; इumbúdou $\lambda_{\iota} \not \mu \hbar \nu$, Arrian, Per. Pont. Eux. p. 20), a harbour with a narrow entrance on the S. coast of the Chersonesus Taurica, between the town of Chersonesus and the port of Cienus. In ancient times it was the chief station for the pirates of the Tauric peninsula. (Strab. vii. p. 309 ; Plin. iv. 12. s. 26: Anon. Per. Pont. Eux. p. 6.) Now the port of Balaklava. (Comp. Clarke's Travels, ii. p. 398; Pallas, ii. p. 128.)
[T. H. D.]
 a place in the Thracian district of Edonis, in the neighbourhood of Philippi. (Comp. Leake, North. Gr. iii. p. 217.)
[T. H. D.]
SYJiBRA ( $\sum \dot{u} \mu 6 \rho a$ ), a small town in Babylonia mentioned by Zosimus (iii. 27). It is probably the same as that called by Ammianus, Hucumbra (xxiv. 8).

SYME ( $\Sigma \dot{v} \mu \eta:$ Symi), an island off the coast of Caria, whe west of Cape Cynossema, between the Cnidian peninsula and khodes, at the entrance of the Sinus Schoenus. (Herod. i. 174; Thuc. viii. 41; Strab. xiv. p. 656; Scylax, p. 38; Athen. vi. p. 262.) The island is described as 37 Roman miles in circumference, and as possessing eight harbours (Plin. v. 31, 133) and a town of the same name as the island. The island itself is very high but barren. According to Stephanus B. (s. v.; comp. Athen. vii. p. 296) Syme was formerly called Metapontis and Aegle, and obtained its later name from Syme, a daughter of lalysus, who, together with Chthonius, a son of Poseidon, is said to have first peopled the island. In the story of the Trojan war, Syme enjoys a kind of celebrity, for the hero Nireus is said to have gone with three ships to assist Agamemnon. (Hom. Ihii. 671 ; Dictys. Cret. iv. 17; Dares Pbryg. 21.) The first historical population of the island consisted of Dorians ; but subsequently it fell into the hands of the Carians, and when they, in consequence of frequent droughts, abandoned it, it was for a long time uninhabited, until it was finally and permanently occupied by Argives and Lacedaemonians, mixed with Cnidians and Rhodians. (Iiod. Sic. v. 33; Raoul-Rochette, Hist. des Colon. Grecques, i. p. 337, iii. p. 72.) There are still a few but unimportant remains of the acropolis of Syme, which, however, are constantly diminished, the stones being used to erect monderin buildings. (Comp. Ross, Reisen auf den Griech. Inseln. vol. iii. p. 121 , foll.)
[L. S.]
SYMPLE'GADES. [Bosporus, p. 424.]
SYNCA (Zúvka), a small village of Babylonia noticed by Zosimus (iii. c. 28).
[V.]
SYNNADA ( Phrygia Salutaris, at the extremity of a plain about 60 stadia in length, and covered with olive plantations. It is first noticed during the march of the consal Manlias against the Gallograeci (Liv. xxxviii. 15, xlv. 34); and Cicero (ad Att. v. 20; comp. ad Fam. iii. 8. xv. 4) mentions that he passed through Synnada on his way from Ephesus to Cilicia. In Strabo's time (xii. p. 577) it was still a small town, but when Pliny wrote (r. 29) it was an important place, being the conventus juridicus for the
whole of the surmounding country. It was very celebrated among the Romans for a beautiful kind of marble furnished by the neighbouring quarries, and which was commonly called Symadic marble, though it came properly from a place in the neighbourhood, Ducimia, whence it was more correctly called Docimites lapis. This marble was of a light colour, interspersed with purple spots and veins. (Strab. l. c.; Plin. xxxp. 1; Stat. Silv. i. 5. 36; Comp. Steph. B. s. v.; Ptol. v. 2. § 24 : Martial, ix. 76; Symmach. ii. 246.) There still are appearances of extensive quarries between Kosru-Khan and Buhoulun, which Col. Leake (Asia Minor, p. 36) is inclined to identify with those of Symada or Docimia. Remains of the town of Synnada still exist under the name Eiski-kara-hissar about 3 miles to the north-west of these quarries, where they were discovered by Texier. Earlier travellers imagined they had found them at Surmina or Surmench, or in the plain of Sundakleh. (Comp. Hamilton, Researches. i. p. 466, ii. 177; Journal of the $R$. Geogr. Society, vii. p. 58, viii. p. 144; Eckhel, Doctr. Num. iii. p. 172; Sestini, Num. Vet. p. 127.)
[L. S.]
SYNNAUS (Eúrvaos), a town in Phrygia Pacatiana, not far from the sources of the Macestus, probably on the site of the modern Simazul. (Ptol. v. 2. § 22 ; Socrat. Hist. Eccl. vii. 3; Niceph. Hist. Eccles. xiv. 11; Concil. Chalced. p. 6it: Hanilton, Researches, ii. p. 124; Franz, Fianf Inschriften, p. 33.) [L. S.]

SYNOlDICM ( vórcoy, Strab. vii. p. 315), a town of Dalmatia, situated in a deep gorge between two hills, where Gabinius was defeated, and to which the Dalmatians retreated in the campaign of s.c. 34. Octavius, suspecting their intentions, sent skirmishers over the high ground while he advanced through the ralley and burnt Synodium. [E. B. J.]

SYRACU'SAE ( $\Sigma$ upakoüбaı: Eth. 乏upakóvoıos, Steph. B.; but Thucydides, Diodorus, \&c. use the form ミupakótoo, which, as we learn from coins and inscriptions, was the native form ; Syracusanus: Siracusa, Syracuse), the most powerful and important of all the Greek cities in Sicily, situated on the E. coast of the island, about midway between Catana and Cape Pachynus. Its situation exercised so important an influence upon its history and progress, that it will be desirable to descrite this somewhat nore fully before proceeding to the history of the city, reserving, at the same time, the topographical details for subsequent discussion.

## I. Situation.

Syracuse was situated on a table-land or tabular hill, forming the prolongation of a ridge which branches off from the more elevated table-land of the interior, and projects quite down to the sea, between the bay known as the Great Harbour of Syracuse, and the more extensive bay which stretches on the N. as far as the peninsula of Tharsus or Magnisi. The broad end of the kind of promontory thus formed, which abuts upon the sea for a distance of about $2 \frac{1}{8}$ miles, may be considered as the base of a triangular plateau which extends for above 4 miles into the interior, having its apex forned by the point now called Mongibellisi, which was occupied by the ancient fort of Euryalcs. This communicates, as already stated, by a narrow ridge with the table-land of the interior, hut is still a marked point of separation, and was the highest point of
the ancient city, from whence the table-land slopes very gradually to the ses. Though of small elevation, this plateau is bounded on all sides by precipitous banks or cliffs, varying in height, but only accessibie at a few points. It may be considered as naturally divided into two portions by a slight valley or depression running across it from N. to S., about a mile from the sea: of these the upper or triangular portion was known as Erirolae, the eastern portion adjuining the sea bore the name of Achradina, which thus forms in some degree a distinct and separate platean, though belonging, in fact, to the same mass with Epipolae.

The SE. ancle of the phateau is separated from the Great Harbour by a small tract of low and level ground, opposite to which hes the island of Ortyois, a lur islet about a mile in length, extending across the mouth of the Great Harbour, and originally divided by only a narrow strait from the mainland, whilst its southern extremity was separated from the nearest puint of the headland of Plemmyrium by an interval of about 1200 yards. forming the entrance into the Great Harbour. This last was a spacious bay, of above 5 miles in circumference; thus greatly exceeding the dimensions of what the ancients usually understood by a port, but forming a very nearly land-locked basin of a somewhat oval form, which afforded a secure shelter to shipping in all weather; and is even at the present day one of the finest harbours in Sicily. But between the island of Ortygia and the mainland to the N . of it, was a deep bight or inlet, forming what was called the Lesser Port or Portus Lacceius, which. though very inferior to the other, was still equal to the ordimary requirements of ancient commerce.
S. of the Great Harbour again rose the peninsular pronontory of Plemmyrium, forming a table-land bounded, like that on the $N$. of the bay, by precipitous escarpments and cliffs, thcugh of no great elevation. This table-land was prolonged by another plateau at a somewhat lower level, bounding the southern side of the Great Harbour, and extending from thence towards the interior. On its NE. angle and opposite to the heights of Epipolse, stood the temple of Jupiter Olympius, or the Ocrmpieum, overlonking the low marnhy tract which intervenes between the two table-lands, and through which the river Anapus finds its way to the sea. The beautiful stream of the Crane rises in a source about $1 \frac{1}{2}$ mile to the N . of the Olympieum, and joins its waters with those of the Anapus almost immediately below the temple. From the foot of the hill crowned by the latter extends a broad tract of very low marshy ground, extending along the inner side of the Great Harbour quite to the walls of the city itself. A portion of this marsh, which seems to tave formed in ancient times a shallow pool or lagoon, way known by the name of Lysimelein (nueıué $\lambda e l a$, Thuc. vii. 53 ; Theocr. Id. xvi. 84). though its more ancient appellation would seem to have been Syraco ( $\sum$ upaxí), from whence the city itself was supposed to derive its name. (Steph. B. s. v. ミupakovaat ; S.ymn. Ch. 281.) It is, however, uncertain whether the names of Syraco and Lysimeleia may not originally have belonged to different portions of these marshes. This marshy tract, which is above a mile in breadth, extends towards the interior for a considerable distance, till it is met by the precipitous escarpments of the great table !and of the interior. The proximity of
these manshes must always have been prejudicial to the healthiness of the situation; and the legend, that when Archias and Myscellus were about to found Syracuse and Crotona, the latter chose heaith while the former preferred wealth (Steph. B. l. c.), points to the acknowledged insalabrity of the site even in its most flourishing days. Bat in every other respect the situation was admirable; and the prosperity of Syracuse was doubtless owing in $n$ great degree to natural as well as political causex. It was, moreover, celebrated for the mildness and serenity of its climate, it being generally asserted that there was no day on which the sun was not visible at Syracuse (Cic. Verr. v. 10), an advantage which it is said still to retain at the present day.

## II. History.

Syracuse was, with the single exception of Naxns. the most ancient of the Greek colonies in Sicily. It was a Corinthian colony, sent out frmm that city under a leader named Archias, son of Euagetes, who belonged to the powerful family of the Baccliadae, but had been compelled to expatriate himself. According to some accounts the colony was strengthened by an admixture of Dorian or Locrian colonists with the original Corinthian settlers; but it is certain that the Syracusans regarded themselves in all ages as of pure Corinthian origin (Theocr. Id. xv. 91), and maintained relations of the closest amity with their parent city. The colony was founded in e. c. $\mathbf{3 4}$, and the first settlers established themselves in the island of Ortygio, to which it is probable that the city was confined for a considerable period. (Thuc. vi. 2; Strab. vi. p. 269; Scymn. Ch. 279-282; Marm. Par. ; concerning the date, see Clinton, F. H. vol. i. p. 164.) The name of Ortygia is evidently Greek, and derived from the well-known epithet of Dinna, to whom the island was regarded as consecrated (Diod. v. 3); but the city veems to have assumed from the very begirning the name of Syracusae, which was derived, as already mentioned, from the name of the adjoining marsh or lake, Syraco, doubtless an indigenous name, as it has no signification in Greek. It appears indeed that the forn Syraco was used by Epicharmus for the name of the city itself, but this was evidently a mere poetic license. (Strab. viii. p. 364.)

As in the case of most of the Greek colonies in Sicily, we have very little information concerning the early listory and progress of Syracuse; but we may infer that it rose steadily, if not rapidly, to prosperity, from the circomstance that it continued to extend its power by the foundation of fresh colonies : that of Acrae within 70 yeurs after its own establishment (b. c. 664); Casmenae 20 years later (в. c. 644), and Camarina 45 years afterwards, or B. c. 599. Norie of these colonies, however, rose to any considerable power: it was obviously the policy of Syracuse to keep them in the position of mere dependencies; and Camarina, having given umbrage to the parent city, was destroyed only 46 years after its foundation. (Thuc. vi. 5; Scymn. Ch. 294-296.) Syracuse was not, however, free from internal dissensions and revolations. An obscure notice preserved to as by Thucydides indicates the occurrence of these as early as B. c. 648, which led to the expulsion of a party or clan called the Myletidne, who withdrew into exile and joined in the foundation of Himera. (Thuc. vi. 5.) Another indication of such dispates is found in Aristotle (Pod. v. 4), but we are nuable
to assign any definite place in chronology to the occurrence there alluded to. At a later period we find the government in the hands of an exclusive oligarchy called the Geomori or Gamori, who, from their name, would appear to have been the descendants of the original colonists, around whom there naturally grew up a democracy or plebs, composed of the citizens derived from other sources. At length, aboat b. C. 486, a revolution took place; and the democracy succeeded in expelling the Geomori, who thereupon withdrew to Casinense. (Herod. vii. 155; Dionys. vi. 62.) But this revolution quickly led to another; Gelon, the powerful despot of Gela, having espoused the cause of the exiles. Gela was at this time at least equal, if not saperior, to Syracuse in power. Hippocrates, its late despot, had extended bis power over many of the other cities in the east of Sicily, and defeated the Syracusans themselves in a great battle at the river Helorus. He would probably indeed have made hinself master of Syracuse upon this occasion had it not been for the interposition of the Corinthians and Corcyracans, who brought about a peace upon equitable terms. (Herod. vii. 154.) But the expulsion of the Geomori opened a fresh opportunity to Gelon, who, putting himself at the head of the exiles, eaxily effected their restoration, while the people of Syracuse readily admitted Gelon himself as their ruler with despotic authority. (Ib. 155.)

This revolution (which occurred in B. c. 485) seemed at first likely to render Syracuse subordinate to Gela, but it ultimately produced a directly contrary effect. Gelon seems to have been fully alive to the superior advantages of Syracuse, and from the moment he had established his power in that city, made it the chief object of his solicitude, and directed all his effurts to the strengthening and adorning his new capital. Among other measures, he removed thither the whole body of the citizens of Camarina (which had been repeopled by Hippocrates), and subsequently more than half of those of Gela itself, admitting them all to the full rights of Syracusan citizens. Afterwards, as he directed his arms successively against the Sicilian Megara and Enboea, he removed the wealthy and noble citizens of both those cities also to Syracuse. (Ib. 156.) That city now rose rapidly to a far greater amount of power and prosperity than it had previously enjoyed, and became, under the fustering care of Gelon, unquestionably the first of the Greek cities in Sicily. It was probably at this period that it first extended itself beyond the limits of the island, and occupied the table-land or heights of Achradina, which were adapted to receive a far more numerous population, and had already become thickly peopled before the time of Thucydides. (Thuc. vi. 3.) This portion of the city now came to be known as the Outer City ( $\dot{\eta} \boldsymbol{\xi} \boldsymbol{\xi} \propto \pi \delta \lambda(s)$, while the island of Ortygia was called the Inner City, though still frequently designated as "the Island." Strictly speaking, however, it had ceased to merit that term, being now joined to the mainland by an artificial dike or causeway. (Thuc. l.c.)

From the time of Gelon the history of Syracuse becomes inseparably blended with that of Sicily in general ; its position in the island being so important that, as Strabo justly remarks, whatever vicissitudes of fortune befel the city were shared in by the whole island. (Strab. vi. p. 270.) Hence it would be useless to recapitulate the events of which a brief summary has been already given in
vol 11.
the article Stcilia, and which are more fully dotailed by all the general historians of Greece. The foliowing summary will, therefore, be confined to those historical events which more iminediately affected the city itself, as distinguished from the political vicissitudes of the state.

There can be no doubt that Syracuse continued to flourish extremely throughout the reign of Gelon (B. c. 485-478), as well as that of his successor Hieron (в. c. 478-467), who, notwithstanding the more despotic character of his guvernment, was in many respects a liberal and enlightened ruler. His patronage of letters and the arts especially rendered Syracuse one of the chief resorts of men of letters, and his court afforded shelter and protection to Aeschylus, Pindar, and Bacchylides. Nor was Syracuse itself deficient in literary distinction. Epicharmus, though not a native of the city, spent all the latter years of his life there, and Sophron, the celebrated writer of mimes, was a native of Syracuse, and exhibited all his principal works there. The care bestowed upon the arts is sufficiently attested by the still extant coins of the city, as well as by the accounts transmitted to us of other monuments; and there is every probability that the distinction of Syracuse in this respect commenced from the reign of Hieron. The tranquil reign of that monarch was fullowed by a brief period of revolution and distarbance; his brother Thrasybulus baving, after a short but tyrannical and violent reign, heen expelled by the Syracusans, who established a popular government, B. c. 466. This was for a time agitated by fresh tumults, arising out of disputes between the new citizens who had been introduced by Gelon and the older citizens, who claimed the exclusire possession of political power; but after some time these disputes were terminated by a compromise, and the new citizens withdrew to Messana. (Diod. xi. 67, 68, 72, 73, 76.)

The civil dissensions connected with the expulsion of Thrasybulus, which on more than one occasion broke out into actual hostilities, show how great was the extent which the city had already attained. Thrasybulus himself, and afterwards the discontented citizens, are mentioned as occupying the Island and Achradina, both of which were strongly fortified, and had their own separate walls (Diod. xi. 68, 73); while the popular party held the rest of the city. It is evident therefore that there were already considerable spaces occupied by buildings outside the walls of these two quarters, which are distinctly mentioned on one occasion as "the suburbs" (rd $\pi \rho u a \sigma \tau i=10,16.68)$. Of these, one quarter called Tycha, which lay to the W. of Achradina, adjoining the N. slupe of the table-land, is now first mentioned by name (Ibid); but there can be no doubt that the plain between the heights of Achradina and the marshes was already occupied with buildings, and formed part of the city, though it apparently was not as yet comprised within the fortifications.

The tinal establishment of the democracy at Syracuse was followed by a period of about sixty years of free government, during which we are expressly told that the city, in common with the other Greek colonies in Sicily, developed its resources with great rapidity, and probably attained to its maximum of wealth and power. (Diod. xi. 68,72.) Before the close of this period it had to encounter the severest danger it had yet experienced, and gave abundant proof of its great resources by coming off victorious in a contest with Athens, then at the very height of
its power The circumstances of the great siege of Syracuse by the Athenians must here be related in some detail, on account of their important bearing on all questions connected with the topography of the city, and the interest they confer on its localities. At the same time it will obviously be impossible to do more than give a very brief sketch of that memorable contest, for the details of which the reader must refer to the narrative of Thucydides, with the copious illustrations of Arnold, Grote, and Col. Leake.

It was not till the spring of B. C. 414 that the siege of Syracuse was regularly commenced. But in the autumn of 415 , the Athenians had already made a demonstration against the city, and sailing into the Great Harbour, effected a landing without opposition near the Olympieum, where they established their camp on the shore, and erected a temporary fort at a place called Dascon (Thuc. vi. 66; Diod. xii. 6), apparently on the inner bight of the harbour, between the mouth of the Anapus and the bay now called the Bay of Maddalena. But though successful in the battle that ensued, Nicias did not attempt to follow up his advantage, and withdrew to winter at Catana. The next spring the Athenians landed to the N. of Syracuse, at a place called Leon, about 6 or 7 stadia from the heights of Epipolae, while they established their naval station at the adjoining peninsula of Thapsus (Magnisi). The land troops advanced at once to occupy Epipolae, the military importance of which was felt by both parties, and succeeded in establishing themselves there, before the Syracusans could dislodge them. They then proceeded to build a fort at a place called Labdalum, which is deacribed by Thucydides as situated " on the top of the clitfs of Epipolae, looking towards Megara" (Thuc. vi. 97), and having occupied this with a garrison, so as to secure their communications with their fleet, they advanced to a place called Syce ( $\dot{\eta}$ इuk $\hat{\eta}$ ), where they established themselves, and began to construct with great rapidity a line of circumvallation across the plateau of Epipolae.* The construction of such a line was the customary mode of proceeding in Greek sieges, and it was with the special object of guarding against it that the Syracusans had in the preceding winter extended their fortifications by ruuning a new line of wall so as to enclose the temple of Apollo Temenites (Thuc. vi. 75), which probably extended from thence down to the Great Harbour. Nevertheless the Athenian line of circumvallation was carried on so rapidly as to excite in them the greatest alarm. Its northern extremity was made to rest on the sea at a point called Trogilus (probably near the Scala Greca), and it was from thence carried across the table-land

* The account here given of the Athenian operations assumes that "the circle" repeatedly spoken of by Thacydides (vi.98,99,\&c.), is the circuit of the lines of circumvallation. This is the construction adopted by Göller, and all earlier editors of Thucydides, as well as by Col. Leake; and appears to the writer of this article by far the most natural and intelligible interpretation. Mr. Grote, on the contrary, as well as Dr. Arnold in his later edition adopts the suggestion of M. Firmin Didot that "the circle" ( $\delta$ кúk or fortified camp of a circular form. It is difficult to understand the military object of such a work, as well as to reconcile it with the sabsequent details of the siege operations.
of the Epipolae, to the point nearest to the Great Harbour. Alarmed at the rapid progress of this wall, the Syracusans endeavoured to interrupt it by constructing a counter or cross wall (broreixifua or dicdociov teixos), directed apparently from the wall recently erected around the temple of Apollo Temenites towards the sonthern cliff of Epipolaa. (Thuc. vi. 99.) This wall was, however, carried by the Athenians by a sudden attack and destroyed, wherenpon the Syracusans attempted a second counterwork, carried through the marshes and low ground, so as to prevent the Athenians from connecting their works on Epipolae with the Great Harbour. But this work was, like the preceding one, taken and destroyed; and the Athenians, whoee fleet had meanwhile entered the Great Harbour, and established itself there, were able to construct a strong double line of wall, extending from the cliffs of Epipolae quite down to the harbour. ( 1 b. 100103.) On the table-land above, on the contrary, their works were still incomplete, and especially that part of the line of circumvallation near Trogilus was still in an unfinished state when Gylippos landed in Sicily, so that that commander was able to force his passage through the lines at this point, and effect an entry into Syracuse. (Id. vii. 2.) It is remarkable that the hill of Euryalus, though in fact the key of the position on the Epipolae, seems to have been neglected by Nicias, and was still andefended by any fortifications.

Gylippus immediately directed his efforts to provent the completion of the Athenian lines across the table-land, and obtained in the first instance an important advantage by surprising the Athenian fort at Labdalum. He next began to erect another cross wall, running out from the walls of the city acrose the platean, so as to cross and intersect the Athenian lines; and notwithstanding repeated efforts on the part of the Athenians, succeeded in carrying this on so far as completely to cat off their line of circumvallation, and render it impossible for them to complete it. (Id. vii. 4-6.) Both parties scem to have looked on the completion of this line as the decisive point of the siege; Nicias finding himself unable to capture the outwork of the Syracusans, almost despaired of success, and wrote to Athens for strong reinforcements. Meanwhile he sought to strengthen his position on the Great Harbour by occupying and fortifying the headland of Plemmyrium, which completely commanded its entrance. (Ib. 4.) The Syracusans, however, still occupied the Olympieum (or Polichne, as it was sometines called) with a strong body of troops, and having, under the guidance of Gylippus, attacked the Athenians both by sea and land, though foiled in the former attempt, they took the forts which had been recently erected on the Plemmyrium. (Ib. 4, 2224.) This was a most important advantage, as it rendered it henceforth very dificult for the Athenians to supply their fleet and camp with provisions; and it is evident that it was so regarded by both parties (1b. 25, 31): the Syracusans also subsequently gained a decisive success in a sea-fight within the Great Harbour, and were preparing to push their advantage further, when the arrival of Demosthenes and Eurymedon from Athens with a powerful tleet restored for a time the superiority of the Athenians. Demosthenes immediately directed all his effurts to the capture of the Syracusan counterwork on Epipolae; but meanwhile Gylippus had not neglected to strengthen lis position there, by constructing three
redoubts or forts, each of then occupied with a strong garrison, at intervals along the sloping plateau of Epipolae, while a fort had been also erected at the important post of Euryalus, at the extreme angle of the heights. (Thuc. vii. 43.) So strong indeed was their position that Demosthenes despaired of carrying it by day, and resolved upon a night attack, in which he succeeded in carrying the fort at Eurgalus, but was foiled in his attempt upon the other outworks, and repulsed with heavy loss. ( 16 . 43-45.)

The failure of this attack was considered by Demusthenes himself as decisive, and he advised the immediate abandonment of the siege. But the contrary advice of Nicias prevailed; and even when increasing sickuess in the Atheniun camp had induced him also to consent to a retreat, his superstitious fears, excited by an eclipse of the moon, again caused them to postpone their departure. The consequences were fatal. The Syracusans now became rather the besiegers than the besieged, attacked the Athenian Heet in the Great Harbour, and cut off and destrosed the whule of their right wing under Eurymedon, in the bay of Dascon. Elated with this success, they sought nothing less than the capture of the whole armament, and began to block up the mouth of the Great Harbour, from Ortygia across to Plemmyrium, by mooring vessels across it. The Athenians were now compelled to abandon all their outposts and lines on the heights, and draw together their troops as close to the naval camp as posisible; while they made a final effort to break through the barrier at the entrance of the harbour. But this attempt proved unsuccessful, and led to a complete deteat of the Athenian fleet. There was now no course but to retreat. The army under Nicias and Demosthenes broke up from its camp, and at first directed their course along the valley of the Anapus, till they came to a narrow pass, commanded by a precipitous ridge callod the Acraean hock ('Akpaion $\lambda$ ézas, Thac. vii. 78), which had been occupied in force by the Syracusans. Failing in forcing this defile, the Athenians changed their line of retreat, and followed the road to Helorus, but after forcing in succession, though not without heavy loss, the passage of the two rivens Cacyparis and Erineus, and reaching the banks of the Asinarus, the last survivors of the Atbenian army were compelled to lay down their arms. The whole number of prisoners was said to amount to 7000 . A troplyy was erected by the Syracusans on the bank of the Asinarus, and a festival called the Asinaria instituted to commemorate their victory. (Thuc. vii. 78-87; Diod. xiii. 18, 19.)

The failure of the Athenian expedition against Syracuse seemed likely to secure to that city the unyuestionable superiority among the Greek colonies in Sicily. But a new and furmidable power now appeared-the Carthaginians, who were invited by the Segestans to support them against the Selinuntines, but who, not content with the destruction of Selinus and Himera (b. c. 410), and with that of Agrigentum (B. c. 406), pushed forward their conquests with a view of making thernselves masters of the whole island. Dionysius, then a young man, took advantage of the alarm and excitement caused by this danger to raise himself to despotic power at Syracuse (b. c. 405), and he soon after concluded a peace with the Carthaginians, whose career of victory had been checked by a pestilence. The history of the reign of Dionysius at

Syracuse, which continued for a period of 38 years (b. c. 405-387), cannot be here related: it is briefly given in the Biogr. Lict, art. Dionysius, and very fully in Grote's History of Greece, vols. x. and xi.; but its influence and effects upon the city itself must be bere noticed. From a very early period he turned his attention to the strengthening and fortification of the city, and constructed great works, partly with a view to the defence of the city against external invasion, partly for the security of his own puwer. One of his first operations was to convert the island of Ortygia into a strong fortress, by surrounding it with a lofty wall, fortified with numerous towers, especially on the side where it adjuined the land, where he raised a strongly fortified front, called the Pentapyla; while, for still further security, he constructed an interior fort or citadel within the island, which became the acropolis of Syracuse, and at the same time the residence of Dionysius and his successors in the despotism. Adjoining this he constructed within the lesser port, or Portus Lacceius, docks for his ships of war on a large scale, so as to be capable of receiving 60 triremes: while they were euclused with a wall, and accessible only by a narrow entrance. But not content with this, he a few years afterwards added docks for 160 more ships, within the Great Port, in the recess or bight of it which approaches most nearly to the Portus Lacceius, and opened a channel of communication between the two. At the same time he adorned the part of the city immediately outside the island with porticoes and public buildings for the convenience of the citizens. (Diod. xiv. 7.) But his greatest work of all was the line of walls with which he fortified the heights of Epipolae. The events of the Athenian siege had sufficiently proved the vital importance of these to the safety of the city; and hence befure Dionysius engaged in his great war with Carthage he determined to secure their possession by a line of permanent fortifications. The walls erected for this purpuse alung the northern edge of the cliffs of Epipolas (extending from near Stu Panagia to the hill of Euryalus, or Mongibellisi) were 30 stadia in length, and are said to have been erected by the labour of the whole body of the citizens in the short space of 20 days. (Diod. xiv. 18.) It is remarkable that we hear nothing of the construction of a similar wall along the southern edge of the plateau of Epipolae ; though the table-land is at least as accessible on this side as on the other; and a considerable suburb called Neapolis had already grown up on this side (Diod. xiv. 9), outside of the wall of Achradina, and extending over a considerable part of the slope, which descends from the Temenitis towards the marshy plain of the Anapus. But whatever may have been the cause, it seems certain that Syracuse continued till a later period to be but inperfectly fortified on this side.
The importance of the additional defences erected by Dionysius was sufficiently shown in the course of the war with Carthage which began in B. C. 397. In that war Dionysius at first carried his arms successfully to the western extremity of Sicily, but fortune soon turned against him, and he was compelled in his turn to shut himself up within the walls of Syracuse, and trust to the strength of his fortifications. The Carthaginian general Himilco entered the Great Port with his fleet, and established his head-quarters at the Olympieum while he not only ravaged the country outside the walls, but made himself master of one of the suburbs,

## SYRACUSAE.

in which were situated the temples of Ceres and Proserpine, both of which he gave up to plunder. But the anger of the goddesses, brought on by this act of sacrilege, was believed to be the source of all the calamities that soon befel him. A pestilence broke out in the Carthaginian camp, from which they sustained very heavy losses, and Dionysius took advantage of their enfeebled state to make a general attack on their camp both by sea and land. The position occupied by the Carthaginians was very much the same as that which had been held by the Athenians: they occupied the headland of Plemmyrium, on which they had erected a fort, while they had also fortified the Olympieum, or Polichne, and constructed a third fort close to the edge of the Great Harbour for the protection of their fleet, which lay within the inner bay or harbour of Dascon. But Dionysius, by a sudden attack from the land side, carried both the last forts, and at the same time succeeded in burning a great part of the Carthaginian fleet, so that Himilco was compelled to abandon the enterprise, and by a secret capitulation secured a safe retreat for hinnself and the native Carthaginians in his arny, abandoning his allies and mercenaries to their fate. (Diod. xiv. 62, 63, 70-75.)

The defeat of the Carthaginian armarnent left Dionysius undisputed master of Syracuse, while that city held as unquestioned a pre-eminence over the other cities of Sicily; and it is probable that the city itself continued to increase in extent and population. The impregnable citadel in the island of Ortygia constructed by the elder Dionysius continued to be the bulwark of his power, as well as that of his son and successor. Even when the citizens, in B. C. 357, opened their gates to Dion, who made a triumphal entry into Achradina, and made himself master with little difficulty of the fort on the summit of Epipolae, the island still held out, and Dion was compelled to resort to a blockade, having erected a line or wall of contravallation acruss from the lesser port to the greater, so as effectually to cut off the garrison from all communication with the interior. (Plut. Dion. 29; Diod. xvi 12.) It was not till after the blockade had been continued for above a year that Apollocrates was compelled by scarcity of provisions to surrender this stronghold, and Dion thus became complete master of Syracuse, B. c. 356. But that event did not, as had been expected, restore liberty to Syracuse, and the island citadel still remained the stronghold of the despots who successively ruled over the city. When at length Timoleon landed in Sicily (b.c. 344) Ortygia was once more in the possession of Dionysius, while the rest of the city was in the hands of Hicetas, who was supported by a Carthaginian fleet and army, with which he closely blockaded the island fortress. But the arrival of Timoleon quickly changed the face of affuirs: Ortygia was voluntarily surrendered to him by Dionysius; and Neon, whom be left there as commander of the garrison, by a sudden sally made himself maxter of Achradina also. Soun after Timoleon carried the heights of Epipolse by assault, and thus found himself master of the whole of Syracuse. One of the first measures he took after his success was to demolish the fortress erected by Dionysius within the Island, as well as the palace of the despot himself, and the splendid monument that had been erected to him by his son and successor. On the site rere erected the new courts of justice. (Plut. Timol. 22.)

Syracuse had snffered severely from the king
period of civil dissensions and almost constant hostilities which had preceded its liberation by Timoleon; and one of the first cares of its deliverer wes to recruit its exhausted population, not only by recalling from all quarters the fugitive or exiled citizens, but by summoning from Corinth and other parts of Greece a large body of new colonists. Such was the success of his invitation that we are assured the total number of immigrants (including of course the restored exiles) amounted to not less than 60,000. (Plut. Timol 22, 23.) The democratic form of government was restored, and the code of laws which had been introduced by Dioclee after the Athenian expedition, but had speedily fallen into neglect under the long despotism of the two Dionysii, was now revived and restored to its full rigour. (Diod. xiii. 35, xvi. 70.) At the same time a new annual magistracy was established, with the title of Amphipolus of the Olympian Jove, who was thenceforth destined, like the Archon at Athens, to give name to the year. The office was apparently a merely honorary one, but the years continued to be designated by the names of the Amphipoli down to the time of Aagustus. (Diod. xvi. 70; Cic. Vert. ii. 51, iv. 61.)

There can be no doubt that the period following the restoration of liberty by Timoleon was one of great prosperity for Syracuse, as well as for Sicily in general. Unfortunately it did not last long. Less than 30 years after the capture of Syracuse by Timoleon, the city fell under the despotism of Agathocles (B. C. 317), which continued without interraption till B. c. 289. We hear very little of the fortanes of the city itself under his govermment, but it appears that, like his predecessor Dionysius, Agathocles devoted his attention to the construction of great works and public buildings, so that the city continued to increase in magnificence. We are told, among other things, that he fortified the entrance of the lesser port, or Portus Lacceing, with towers, the remains of one of which are still visible. During the absence of Agathocles in Africn, Syracuse was indeed exposed to the assaults of the Carthaginian general Hamilcar, who encamped, as Himilco had formerly done, at Polichne, and from thence made desultory attacks apon the city, but without any important result ; and having at length made a night attack apon the fort of Eargalus, he was defeated, and himself taken prisoner. (Diod. xx. 29.) After the death of Agathocles, Syracuse for a short time recovered its liberty, bat so0n fell again under the virtual despotism of Hicetas, and subsequently passed into the hands of successive military adventarers, till in B. c. 275, the government became vested in Hieron, the son of Hierocles, who, at first with the title of general autocrator, and afterwards with that of king, continued to reign over the city till b. c. 216. His wisdom and moderation proved a striking contrast to the despotism of several of the former rulers of Syracuse, and while his subjects flourished puder his liberal and enlightened rule, external tranquillity was secured by the steadiness with which he adhered to the alliance of Rome, after having once measured his strength against that formidable power. By the treaty concluded between him and the Romans in B. C. 263, he was recognised as king of Syracuse, with the dependent towns of Acrae, Helorus, Netum, Megara, and Leontini, to which was annexed Tanromenium also, as an outlying dependency. (Diod. sxiii. Exc. H. p. 502.) Notwithstanding the small extent of his territory,

Hieron was andoubtedly a powerful prince, and Syracuse seems to have risen, during this long period of peace and tranquillity, to a high state of wealth and prosperity. Its commercial relations with foreign countries, especially with Egypt, were assiduously cultivated and extended, while the matural resources of its fertile territory were developed to the utmost by the wise and judicious regulations of Hieron, which, under the name of the Lex Hieronica, were sulsequently introduced into all parts of Sicily, and continued to be observed by the Romans, in their administration of that province. At the same time the mona:ch adorned the city with many public works and buildings, including temples, gymnasie, \&cc., while he displayed his wealth and magnificence by splendid offerings, both at Rome and the most noted sanctuaries of Greece. On the whole it may probably be assumed that the reign of Hieron II. was the period when Syracuse attained its highest degree of splendour and magnificence, as well as of wealth and population.

But this state of things was abruptly changed after the death of Hieron. His grandson, Hieronymus, who succeeded him, deserted the alliance of Rome for that of Carthage, and though the young king was shortly after assassinated, the Carthaginian party continued to maintain its ascendency at Syracuse under two leaders named Hippocrates and Epicydes, who were appointed generals with supreme power. They shat the gates against Marcellus, who was in command of the Roman armies in Sicily, and having refused all terms of accommodation, compelled that general to form the siege of Syracuse, B. c. 2l4. (Liv. xxiv. 21-33.) The enterprise proved far more arduous than the Roman General seems to have anticipated. He established his camp, as the Carthaginians had repeatedly done, on the height of the Olympieum ; but his principal attacks wre directed against the northern walls, in the neighbourhood of Hexapylum (the outlet of the city towards Leontini and Megara), as well as against the defences of Achradina from the sea. His powerful fleet gave Marcellus the complete command of the sea, and be availed bimself of this to bring up his ships with powerful battering engines under the very walls which bordered the rocks of Achrudina : but all his efforts were baffled by the superior skill and science of Archimedes; his engines and shipes were destroyed or sunk, and after repeated attempts, both by sea and land, he fund himself compelled to abandon all active assaults and convert the siege into a blockade. (Liv. xxir. 33, 34.)

During the winter he left the camp and army at the Olympieum, under the command of T. Quinctius Crispinus, while he himself took up his winter-quarters and established a fortified camp at Leon, on the N. side of the city. But he was unabie to maintain a strict blockade by wea, and the Carthayinians succeeded in frequently throwing in supplies, so that the blockade was prolonged for more than two years; and Marcellus began to entertain little prospect of success, when in the spring of B. C. 212 an accident threw in his way the opportunity of scaling the walls by night, at a place called by Livy the Portus Trogiliorum (evidently the little cove called Scala Greca) ; and having thus surprised the walls he made himself master of the gate at Hexapylum, as well as of a great part of the slope of Epipolae. But the strong fort of Euryalus, at the angle of Epipolae, defied his efforts, and the walls of Achradina, which still retained its separate fortifications, euabled the

Syracusans to hold possessiun of that important part of the city, as well as of the island and fortress of Ortygia. The two quarters of Tycha and Neapolis were, however, surrendered to him, and given up to plunder, the citizens baving stipulated only for their lives ; and shortly after Philodemus, who commanded the garrison of Euryalus, having no hupes of relief, surrendered that important post also into the hands of Marcellus. (Liv. xxv. 23-25.) The Roman general was now in prassession of the whole heights of Epipolae, and being secured from attacks in the rear by the possession of Euryalus, he divided his forces into three camps, and endeavoured wholly to blockade Achradina. At the same time Crispinus still held the old camp on the hill of the Olympieum. (1b. 26.) In this state of things a vigorous effort was made by the Carthaginians to raise the sipge: they advanced with a large army under Himilco and Hippocrates, and attacked the camp of Crispinus; while Bomilcar, with a fleet of 150 ships , occupied the Great Harbour, and took possession of the shore between the city and the mouth of the Anapus, at the same time that Epicydes made a vigorous sally from Achradina against the lines of Marcellus. But they were repulsed at all points, and though they continued for some time to maintain their arn!y in the immediate neighbourhood of the city, it was suon attacked by a pestilence, arising from the marshy nature of the low grounds in which they were encamped, to which both Hippocrates and Himilco fell victims, with a great part of their troops. Bomilcar, also, who had quitted the port with the view of obtaining reinforcements trom Carthage, never returned, and Epicydes, who had gone out to meet him, abandoned the city to its fate, and withdrew to Agrigentum. The defence of Syracuse was nuw entrusted to the leaders of the mercenary troops, and one of these, a Spaniard named Mericus, betrayed his post to Marcellus. A body of Roman troops was landed in the night at the extremity of the island, near the fountain of Arethusa, and quickly made themselves masters of the whole of Ortygia; while Marcellus, having at the same time made a general assanlt on Achradina, succeeded in carrying a portion of that quarter also. The remaining part of the city was now voluntarily surrendered by the inhabitants; and Marcellus, after taking precautions to secure the royal treasures, and the houses of those citizens who had been favourable to the Romans, gave up the whole city to be pillaged by his soldiers. Archimedes, who had contributed so much to the defence of the city, was accidentally sluin in the confusion. The plunder was said to be enormous; and the magnificent statues, pictures, and other works of art which were carried by Marcellus to Rome, to adorn his own triumph, are said to have given the first impulse to that love of Greek art which afterwards became so prevalent among the Romans. (Lir. xxv. 26-31, 40; Plut. Marc. 14 -19; Diod. xxvi. Fr. 18-20.)
From this time Syracuse sank into the ordinary condition of a Roman provincial town; but it continued to be the unquestionable capital of Sicily, and was the customary residence of the Roman praetors who were sent to govern the island, as well as of one of the two quaestors who were charged with its financial administration. Even in the days of Cicero it is spoken of by that orator as "the greatest of Greek cities, and the most beautiful of all cities." (Cic. Verr. iv. 52.) Its public buildings had apparently suffered little, if at all, from its capture by

Marcellus, and were evidently still extant in the days of the orator, who enumerates most of them by name. All the four quarters of the city, the Island, Achradina, Tycha, and Neapolis, were still well inhabited; though as a measure of precaution no persons of native Syracusan extraction were permitted to dwell in the Island. (Ib. v. 32.) But the prosperity of Syracuse seems to have sustained a severe shock in the time of Sextus Pompeius, who, according to Strabo, inflicted upon it injuries, from which it appears never to have recovered. Such was its decayed condition that Augustus endeavoured to recruit it by sending thither a Roman colony (b. c. 21). But the new settlers were confined to the Island and to the part of the city immediately adjoining it, forming a portion only of Achradina and Neapolis. (Strab. ri. p. 270; Dion Cass. liv. 7 ; Plin. iii. 8. s. 14.) It is in this part of the town that the amphitheatre and other edifices of Roman construction are still found.

But though greatly fallen from its former splendour, Syracuse continued throughout the Roman Empire to be one of the most considerable cities of Sicily, and still finds a place in the 4th century in the Ordo Nobilium Urbium of Ausonius. The natural strength of the Island as a fortress rendered it always a post of the utmost importance. After the fall of the Western Empire, it fell with the rest of Sicily under the dominion of the Goths, but was recovered by Belisarius in A. D. 535, and annexed to the dominions of the Byzantine emperors, in whose hands it continued till the 9 th century, when it was finally wrested from them by the Arabs or Saracens. Syracuse was, with the single exception of Tauromenium, the last place in Sicily that fell into the hands of those invaders: it was still a very strong fortress, and it was not till 878, more than fifty years after the Saracens first landed in the island, that it was compelled to surrender, after a siege of nine months' duration. The inhabitants were put to the sword, the fortifications destroyed, and the city given up to the flames. Nor did it ever recover from this calainity, though the Island seems to have always continued to be inhabited. Its fortifications were strengthened by Charles V., and assuined very much their present appearance. The modern city, which is still confined to the narrow limits of the Island, contains about 14,000 inhabitants. But the whole of the expanse on the opposite side of the strait, as well as the broad table-land of Achradina and Epipolae, are now wholly bare and desolate, being in great part uncultivated as well as uninhabited.

## III. Topography.

The topographical description of Syracuse as it existed in the days of its greatness cannot better be introduced than in the words of Cicero, who has described it in unasual detail "You have often heard (says he) that Syracuse was the largest of all Greek cities, and the most beautiful of all cities. And it is 80 indeed. For it is both strong by its natural situation and striking to behold, from whatever side it is approached, whether by land or sea. It has two ports, as it were, enclosed within the buildings of the city itself, so as to combine with it from every point of view, which have different and separate entrances, but are united and conjoined together at the opposite extremity. The junction of these separates from the mainland the part of the town which is called the Island, but this is reunited to the continent by a bridge acruss the nar-
row strait which divides them. So great is the city that it may be said to consist of four cities, all of them of very large size; one of which is that which I have already mentioned, the Island, which is surrounded by the two ports, while it projects towards the mouth and eutrance of each of them. In it is the palace of king Hieron, which is now the customary residence of our praetors. It contains, also, several sacred edifices, but two in particular, which far surpass the others, one a temple of Diana, the other of Minerva, which before the arrival of Verres was most highly adorned. At the extremity of this island is a fountain of fresh water, which bears the name of Arethusa, of incredible magnitude, and full of tish: this would be wholly overflowed and covered by the waver were it not separated from the sea by a strongly-bailt barrier of stone. The second city at Syracuse is that which is called Achradina, which contains a forum of very large size, beautiful porticoes, a most highly ornamented Prytaneum, a spacious Caria, and a magnificent temple of Jupiter Olympius; not to speak of the other parts of the city, which are occupied by private buildings, being divided by one broad street through its whole length, and many cross streets. The third city is that which is called Tycha, because it contained a very ancient temple of Fortune; in this is a very spacious gymnasium, as well as many sacred edifices, and it is the quarter of the town which is the most thickly inhabited. The fourth city is that which, because it was the last built, is named Neapolis: at the top of which is a theatre of vast size; besides this it contains two splendid temples, one of Ceres, the other of Libera, and a statue of Apollo, which is known by the name of Temenites, of great beauty and very large size, which Verres would not have hesitated to carry off if he had been able to remove it." (Cic. Verr. iv. 52, 53.)

Cicero here distinctly describes the four quarters of Syracuse, which were commonly compared to four separate cities; and it appears that Diodorns gave the same account. (Diod. xxvi. 19, ed. Didot.) In later times, also, we find it alluded to as "the quadruple city" ("quadruplices Syracusae," Auson. Cl. Urb. 11). Others, however, enumerated five quarters, as Strabo tells us that it was formerly composed of five cities (xevtdixones fy rd manaiov, Strab. v. p. 270), probably because the heights of Epipolse towards the castle of Euryalus were at one time inhabited, and were reckoned as a fifth town. But we have no distinct statement to this effect. The several quarters of the city must now be considered separately.

1. Ortyaln ('Optuyla, Pind., Diod., Strab., \&c..), more commonly known simply as "the Island" ( $\dot{\eta} \hat{\eta} \sigma o s$, Thuc., \&c., and in the Doric dialect Nâбos: hence Livy calls it Nasus, while Cicero uses the Latin Insula), was the original seat of the colony, and continued throughout the flourishing period of the city to be as it were the citadel or Acropolis of Syracuse, though, unlike most citadels, it lay lower than the rest of the city, its strength as a fortress being derived from its insular position. It is about a mile in length, by less than half a mile in breadth, and of small elevation, though composed wholly of rock, and rising perceptibly in the centre. There is no doubt that it was originally an island, natorally separated from the mainland, though in the time of Thucydides it was united with it (Thuc. vi. 3): probably, however, this was merely effected by an artificial mole or causeway,

SYRACUSAE
for the parpose of facilitating the communication with＂the outer city，＂as that on the mainland was then called．At $a$ later period it was again severed from the land，probably by the elder Dionysius，when be constructed bis great docks in the two ports． It was，howerer，undoubtedly always connected with the mainland by a bridge，or series of bridges，as it is at the present day．The citadel or castle，con－ structed by Dionysius，stood within the island，but immediatcly fronting the mainland，and closely ad－ joining the docks or navalia in the Lesser Port． Its front towards the mainland，which appears to have been strongly fortified，was known as the Pen－ tapyla（（d⿳亠口子丸 тevtáжu入a，Plut．Dion．29）；and this seems to have looked directly upon the Agora or Forum，which we know to have been situated on the mainland．It is therefore clear that the citadel must have occupied nearly the same position with the modern fortifications which form the defence of Sy－ racuse on the land side．These were constructed in the reign of Charles V．，when the isthmus by which Ortygia had been reunited to the mainland was cut through，as well as a Roman aqueduct de－ signed to supply this quarter of the city with water， constructed，as it appeared from an inscription，by， the emperor Claudius．（Fazell．Sic．iv．i．p．169．）

Ortygia was considered from an carly time as consecrated to Artemis or Diana（Diod．v．3）， whence Pindar terms it＂the couch of Artemis，＂ and＂the sister of Delos＂（ $\delta \dot{\prime} \mu \nu i o v ~ ' A р т ́ ́ \mu i \delta o s, ~$ $\Delta d \lambda o v ~ к a \sigma r \gamma \nu d \tau a$, Nem．i．3）．Hence，as we learn from Cicero（l．c．），one of the principal edifices in the island was a temple of Diana．Some remains of this are supposed to be still extant in the NE． corner of the modern city，where two columns，with a portion of their architrave，of the Doric order，are built into the walls of a private house．From the style and character of these it is evident that the edifice was one of very remote antiquity．Much more considerable remains are extant of the other temple，noticed by the orator in the same passage－ that of Minerva．This was one of the most mag－ nificent in Sicily．Its doors，composed of gold and ivory，and conspicnous for their beautiful workman－ ship，were celebrated throughout the Grecian world： while the interior was adorned with numerous paint－ ings，among which a series representing one of the battles of Agathocles was especially celebrated．All these works of art，which had been spared by the generosity of Marcellus，were carried off by the in－ satiable Verres．（Cic．Verr．iv．55，56．）On the summit of the temple was a shield，which serred as a landmark to sailors quitting or approaching the port．（Polemon，ap．Athen．xi．p．462．）There can be no doubt that this temple，which must have stood on the highest point of the island，is the same which has been converted into the modern cathedral or church of Sta Maria delle Colonne．The co－ lumns of the sides，fourteen in number，are still per－ fect，though built into the walls of the church；but the portico and façade were destroyed by an earth－ quake．It was of the Doric order，and its dimen－ sions（ 185 feet in length by 75 in breadth），which nearly approach those of the great temple of Nep－ tune at Paestum，show that it must have belonged to the first class of ancient edifices of this descrip－ tion．The style of the architectural details and proportions of the columns would render it probable that this temple may be referred to the sixth cen－ tury b．c．，thus confirming an incidental notice of Diodorus（viii．Fr．9），from which it would ap－

SYRACUSAE．
pear that it was built under the government of the Geomori，and therefore certainly prior to the des－ potisin of Gelon．No other ancient remains are now extant in the island of Ortygia；but the celebrated fountain of Arethusa is still visible，as described by Cicero，near the southern extremity of the island，on its western shore．It is still a very copions source， but scarcely answering to the accounts of its mag－ nitude in ancient times；and it is probable that it has been disturbed and its supply diminished by earthquakes，which have repeatedly aftlicted the modern town of Syracuse．

At the extreme point of the island，and outside the ancient walls，probally on the spot where the castle built by John Maniaces now stands，was situ－ ated a temple of the Olympian Juno，with an altar from which it was the custom for departing sailors to take a cup with certain offerings，which they flung into the sea when they lost sight of the shield on the temple of Minerva（Pulemon，ap．Athen．b．c．）．Of the other edifices in the island the most remarkable were the Hexecontaclinus（olkos $\delta$＇ $\mathbf{E} \xi \eta \kappa o \nu \tau$ dik $\lambda ı$ vos калоúцеขos，Diod．xvi．86），built，or at least finished， by Agathocles，but the purpose and nature of which are uncertain ；the public granaries，a building of so massive and lofty a construction as to serve the pur－ poses of a fortress（Liv．xxiv．21）；and the palace of king Hieron，which was afterwards made the resi－ dence of the Roman practors（Cic．Verr．iv．52）． The site of this is uncertain ：the palace of Diony－ sius，which had been situated in the citadel con－ structed by him，was destroyed together with that fortress by Timoleon，and a building for the courts of justice erected on the site．Hence it is probable that Hieron，who was always desirous to court popu－ larity，would avoid establishing himself anew upan the same site．No trace now remains of the ancient walls or works on this side of the island，which have been wholly covered and concealed by the mo－ dern fortifications．The remains of a tower are， however，visible on a shoal or rock near the N．angle of the modern city，which are probably those of one of the towers built by Agathocles to guard the en－ trance of the Lesser Harbour，or Portus Lacceius （Diod．xvi．83）：but no traces have been discovered of the corresponding tower on the other side．

2．Achridina（＇A $\chi$ paifin ，Diod．，and this seems to be the more correct form of the name，though it is frequently written Acradina；both Livy and Cicero， however，give Achradina），or＂the outer city，＂as it is termed by Thucydides，was the most important and extensive of the quarters of Syracuse．It con－ sisted of two portions，comprising the eastern part of the great triangular plateau already described， which extended from the angle of Epipolae to the sea，as well as the lower and more level space which extends from the foot of this table－land to the Great Harbour，and borders on the marshes of Lysimeleia． This level plain，which is immedistely opposite to the island of Ortygia，is not，like the tract beyond it extending to the Anapus，low and marshy ground， but has a rocky soil，of the same limestone with the table－land above，of which it is as it were a lower step．Hence the city，as soon as it extended itself beyond the limits of the island，spread at once over this area ；but not content with this，the inhabitants occupied the part of the table－land above it nearest the sea，which，as already mentioned in the general description，is partly separated by a cross valley or depression from the upper part of the platean，or the heights of Epipolae．Hence this part of the city
was of considerable natural strength, and seems to have been early fortified by a wall. It is not improbable that, in the first instance, the name of Achradiza was given exclusively to the beights*, and that these, as well as the island, had originally their own separate defences ; but as the city spread itself out in the plain below, this must also have been protected by an outer wall on the side towards the marshes. It has indeed been supposed (Grote's Greece, vol. vii. p. 556) that no defence existed on this side till the time of the Athenian expedition, when the Syracusans, for the first time, surrounded the suburb of Temenitis with a wall; but no mention is found in Thucydides of so important a fact as the construction of this new line of defence down to the Great Harbour, and it seems impossible to believe that this part of the city should so long have remained unprotected. $\dagger$ It is probable indeed (though not certain) that the Agora was already in this part of the city, as we know it to have been in later times ; and it is highly improbable that so important a part of the city would have been placed in an unfortified suburb. But still more necessary would be some such defence for the protection of the naval arsenals or dockyards in the inner bight of the Great Harbour, which certainly existed before the Athenian invasion. It seems, therefore, far more natural to suppose that, though the separate defences of Ortygia and the heights of Achradina (Diod. xi. 67,73 ) were not destroyed, the two were from an early period, probably from the reign of Gelon, united by a common line of defence, which ran down from the heights to some point near that where the island of Ortygia most closely adjoined the mainland. The existence of such a boundary wall from the time of the Athenian War is certain ; and there seems little doubt that the name of Achradina, supposing it to have originally belonged to the heights or table-land, soon came to be extended to the lower aren also. Thus Diodorus describes Dionysius on his return from Gela as arriving at the gate of Achradina, where the outer gate of the city is certainly meant. (Diod. siii. 113.) It is probable that this gato, which was that leading to Gela, is the same as the one called by Cicero the Purtae Agragianae, immediately outside of which he had discovered the tomb of Archimedes. (Cic. Tusc. Qurest. v. 23.) But its situation cannot be determined : no distinct traces of the ancient walls remain on this side of Syracuse, and we know not how they may have been modified when the suburb of Neapolis was included in the city. It is probable, however, that the wall (as suggested by Col. Leake) ran from the brow of the hill near the amphitheatre in a direct line to the Great Harbour.

[^39]Of the buildings noticed by Cicero as still adorning Achradina in his day there are scarcely any vestiges. but the greater part of them were certainly situated in the lower quarter, nearest to the island and the two ports. The Forum or Agora was apparently directly opposite to the Pentapyla or fortified entrance of the island ; it was surrounded with porticoes by the elder Dionysius (Diud. xiv. ${ }^{7}$ ), which are obviously those alluded to by Cicero (" pulcherrimae porticus," Verr. iv. 53). The temple of Jupiter Olympius, noticed by the orator, also adjoined the Agora ; it was built by Hieron II. (Diod. xvi. 83), and must not be confounded with the more celebrated temple of the same divinity on a hill at some distance from the city. The prytaneum, which was most richly adornel, and among its chief ornaments possessed a celebrated statue of Sappho, which fell a prey to the cupidity of Verres (Cic. Verr. iv. 53, 57), was probably also situated in the neighbourhood of the Agora; as was certainly the Timoleonteum, or monument erected to the memnory of Timoleon. (Plut. Timol. 39.) The splendid sepulchral monument which had been erected by the younger Dionysius in memory of his father, but was destroyed after his own expulsion, seems to bave stood in front of the Pentapyla, opposite the entrance of the citadel. (Diod. xv. 74.) A single column is still standing on this site, and the bases of $u$ few others have been discovered, but it is uncertain to what edifice they belonged. The only other rains now visible in this quarter of the city are some remains of Roman baths of little importance. But beneath the surface of the soil there exist extensive catacombs, constituting a complete necropolis : these tombs, as in most similar cases, are probably the work of successive ages, and can hardly be referred to any particular period. There exist, also, at two points on the slope of the hill of Achradina, extensive quarries hewn in the rock, similar to those found in Neapolis near the theatre, of which we shall presently speak.

Traces of the ancient walls of Achradina, crowning the low cliffs which bound it towards the sea, may be found from distance to distance along the whole line extending from the quarries of the Cappuccini round to the little bay or cove of Sta Panagia at the NW. angle of the plateau. Recent researches have also discovered the line of the western wall of Achradina, which appears to have run nearly in a straight line from the cove of Sta Panagia, to the steep and narrow pass or hollow way that leads ap from the lower quarter to the heights above, thus taking advantage of the partial depression or valley already noticed. The cove of Sta Panagia may perhaps bo the Portus Trooiliorum of Livy (xxv. 23), though the similar cove of the Scala Gireca, about half a mile further W., would seem to have the better claim to that designation. The name is evidently the same with that of Trogilus, mentioned by Thucydides as the point on the N . side of the heights towards which the Athenians directed their lines of circumvallation, but without succeeding in reaching it. (Thuc. vi. 99, vii. 2.)
3. Tycha (TúX $\eta$ ), so called, as we are told by Cicero, from its containing an ancient and celebrated temple of Fortune, was situated on the plateau or table-land W. of Achradina, and adjoining the northern face of the cliffs looking towards Megara Though it became one of the most populons quarters of Syracuse, no trace of its existence is found at tt.e period of the Atheninn siege ; and it may fairly be assumed that there was as yet no considerable
suburb on the site, which must otherwise have materially interfered with the Athenian lines of circumvallation, while the Syracusans would naturally have attempted to protect it, as they did that of Temenitis, by a special outwork. Yet it is remarkable that Diodorus notices the name, and even speaks of it as a distinct quarter of the city, as early as b. C. 466, during the troubles which led to the expulsion of Thrasybulus (Diod. xi. 68). It is difficult to reconcile this with the entire silence of Thucydides. Tycha probably grew up after the great wall erected by Dionysius along the northern edge of the plateau had completely secured it from attack. Its position is clearly shown by the statement of Livy, that Marcellus, after he had forced the Hexapylum and scaled the heights, extablished his camp between Tycha and Neapolis, with the view of carrying on his assaults upon Achradina. (Liv. xxv. 25.) It is evident therefore that the two quarters were not contiguons, but that a considerable extent of the table-land W. of Achradina was still unoccupied.
4. Neapolis (Nedmodis), or the New City, was, as its name implied, the last quarter of Syracuse which was inhasited, though, as is often the case, the New Town seems to have eventually grown up into one of the most splendid portions of the city. It may, however, well be doubted whether it was in fact more recent than Tycha ; at least it appears that some portion of Neapolis was already inhabited at the time of the Athenian invasion, when, as already mentioned, we have no trace of the existence of a suburb at Tycha. But there was then already a suburb called Temenitis, which had grown up around the sanctuary of Apolio Temenites. The statue of Apollo, who was worshipped under this zame, stood as we learn from Cicero, within the precincts of the quarter subsequently called Neapolis; it was placed, as we may infer from Thucydides, on the height above the theatre (which he calls бuкра $^{\text {a }}$ Tenevitis), forming a part of the table-land, and probably not far from the southern escarpment of the plateau. A suburb had apparently grown up around it, which was surrounded by the Syracnsans with a wall just before the commencement of the siege, and this outwork bears a conspicuous part in the operations that followed. (Thuc. vi. 75). But this extension of the fortifications does not appear to have been permanent, for we find in B.c. 396 the tempies of Ceres and the Cora, which also stood on the beights not far from the statue of Apollo, described as situated in a suburb of Achradina, which was taken and the temples plundered by the Carthagiuian general Hinnilco. (Diod. xiv. 63.) The name of Neapolis ( $\eta$ Néa $\pi \delta$ dis) is indeed already mentioned some years before (Id. xiv. 9), and it appears probabie therefure that the city had already begun to extend itself over this quarter, though it as yet formed ouly an unfurtified saburb. In the time of Cicero, as is evident from his description, as well as from existing remains, Neapolis had spread itself over the whole of the southern slope of the table-land, which here forms a kind of second step or underfall, rising considerably above the low grounds benenth, though still separated from the heights of Tennenitis by a second line of cliff or abrupt declivity. The name of Temenitis for the district on the height seems to bave been lost, or merged in that of Neapolis, which was gradually applied to the whole of this quarter of the city. But the name was retained by the adjoining gate, which was called the Temenitid Gate
(Plut. Dion. 29, where theie seems no doubt that we should read $T \epsilon \mu \in \nu i \tau \iota \delta a s$ for Mevitioas), and seems to have been one of the principal entrances to the city.

Of the buildings described by Cicero as existing in Neapolis, the only one still extant is the theatre, which he justly extols for its large size (" theatrum maximum," Verr. iv. 53). Dickiorus also alludes to it as the largest in Sicily (xvi. 83), a remark which is fully borne out by the existing remains. It is not less than 440 feet in diameter, and appears to have had sixty rows of seats, so that it could have accommodated no less than 24,000 persons. The lower rows of seats were covered with slabs of white marble, and the several cunei are marked by inscriptions in large letters, bearing the name of king Hieron, of two queens, Philistis and Nereïs, both of them historically unknown, and of two deities, the Olympian Zeus and Hercules, with the epithet of Eíq $\rho \dot{\omega} \nu$. These inscriptions evidently belong to the time of Hieron II., who probably decorated and adorned this theatre, but the edifice itself is certainly referable to a much earlier period, probably as early as the reign of the elder Hieron. It was used not merely for theatrical exhibitions, but for the assemblies of the people, which are repeatedly alluded to as being held in it (Diod. xiii. 94 ; Plut. Dion. 38, Timol. 34, 38, \&c.), asowas frequently the case in other cities of Greece. The theatre, as originally constructed, must have been outside the walls of the city, but this was not an unusual arrangement.

Near the theatre hare been discovered the remains of another monument, expressly mentioned by Diodorus as constructed by king Hieron in that situation, an altar raised on steps and a platform not less than 640 feet in length by 60 in breadth (Diod. xiv. 83). A little lower down are the remains of an amphitheatre, a structure which unduabtedly belongs to the Roman colony, and was probably constructel soon after its establishment by Augustus, as we find incidental mention of gladiatorial exhibitions taking place there in the reigns of Tiberius and Nero (Tac. Ann. xiii. 49; Val. Max. i. 7. § 8). It was of considerable size, the arena, which is the only part of which the dimensions can be distinctly traced, being somewhat larger than that of Verona. No traces have been discovered of the temples of Ceres and Libera or Proserpine on the height above : the colossal statue of Apollo Temenites had apparently no temple in connection with it, though it had of course its altar, as well as its sacred enclosure or tépevos. The statue itself, which Verres was unable to remove on account of its large size, was afterwards transported to Rome by Tiberius (Suet. Tib. 74).

Immediately adjoining the theatre are extensive quarries, similar in character to those already mentioned in the cliffs of Achradina. The quarries of Syracuse (Latomiae or Lautumiae) are indced frequently mentioned by ancient authors, and especially noticed by Cicero among the most remarkable objects in the city. (Cic. Verr. v. 27 ; Aelian, V. H. xii. 44.) There can be no doubt that they were originally designed merely as quarries for the extraction of the soft limestone of which the whole table-land consists, and which makes an excellent building stone; but from the manner in which they were worked, being sunk to a considerable depth, without any outlet on a level, they were found places of such security, that from an early period they were em-
ployed as prisons. Thus, after the Athenian expedition, the whole number of the captives, more than 7000 in number, were confined in these quarries (Thuc. vii. 86, 87; Diod. xiii. 33); and they continued to be used for the same purpose under successive despots and tyrants. In the days of Cicero they were used as a general prison for criminals from all parts of Sicily. (Cic. Verr. v. 27.) The orator in one passage speaks of them as constructed expressly for a prison by the tyrant Dionysius (Ib.55), which is a palpable mistake if it refers to the Lautumiae in general, though it is not unlikely that the despot may have made some special additions to them with that view. But there is certainly no authority for the popular tradition which has given the name of the Ear of Dionysius to a peculiar excavation of singular form in the part of the quarries nearest to the theatre. This notion, like many similar ones now become traditional, is derived only from the suggestion of a man of letters of the 16th century.
5. Eptpolae ('Etimonai), was the name originally giren to the upper part of the table-land which, as already described, slopes gradually from its highest point towards the sea. Its form is that of a tolerably regular triangle, having its vertex at Euryalus, and its base formed by the western wall of Achradina. The name is always used by Thucydides in this sense, as including the whole upper part of the plateau, and was doubtless so employed as long as the space was uninhabited; but as the

SYRACUSAE.
suburbs of Tycha and Temenitis gradually spread themselves over a considerable part of the heights, the name of Epipolae came to be applied in a more restricted sense to that portion only which was nearest to the vertex of the triangle. It is generally assumed that there subsequently arose a considerable town near this angle of the walls, and that this is the fifth quarter of the city alladed to by Strabo and those who spoke of Syracuse as a Pentapolis or aggregate of five cities. But there is no allusion to it as such in the passage of Cicero already quoted, or in the description of the capture of Syracuse by Marcellus; and it seems very doubtful whether there was ever any considerable population at this remote point. No restiges of any ancient buildings remain within the walls; but the line of these may be distinctly traced along the top of the cliffs which bound the table-land both towards the N. and the S.; in many places two or three courses of the masonry remain; but the most important ruins are those at the angle or vertex of the triangle, where a spot named Mongibellisi is still crowned by the ruins of the ancient castle or fort of Euryalus
 a入os, which was adopted by the Romans). The ruins in question afford one of the best examples extant of an ancient fortress or castle, designed at once to serve as a species of citadel and to secure the approach to Epipolae from this quarter. The annexed plan will give a good idea of its general

PLAN OF THE FORT EURYALUS.
form and arrangement. The main entrance to the city was by a double gate (A.), flanked on both sides by walls and towers, with a smaller postern or saliy-port a little to the right of it. The fortress itself was an irregular quadrangle, projecting about 200 yards beyond the approach to the gate, and fortified by strong towers of solid masonry with a deep ditch cut in the rock in front of it, to which a number of subterraneous passages gave access from within. These passages communicating with the fort above by narrow openings and stairs, were evidently designed to facilitate the sallies of the besieged without exposing the fortress itself to peril. As the whole arrangement is an unique specimen of ancient fortification a view is added of the external, or N . front of the fort, with the subterranean openings.

There can be no doubt that the fortress at Mon-
gibellisi is the one anciently known as EuryalusThis clearly appears from the mention of that fort at the time of the siege of Syracuse by Marcellus, as one capable of being held by a separate garrison after the capture of the outer walls of Epipolae, and threatening the army of Marcellus in the rear, if he proceeded to attack Achradina. (Lir. xxv. 25, 26.) Euryalus is also mentioned by Thucydides at the time of the Athenian expedition, when it was still unfortified, as the point which afforded a ready ascent to the heights of Epipolae (Thuc. vi. 99, vii. 2); and it must indeed have always been, in a military point of view, the key of the whole position. Hence, the great care with which it was fortified after the occupation of Epipolae by the Athenians had shown the paramount importance of that position in case of a siege. The existing fortifications may, indeed, be in part the work of Hieron II. (as
supposed by Col. Leake); but it is certain that a $\mid$ the importance of this was sufficiently shown in the strong fort was erected there by Dionysius I.*, and reign of Agathocles, when the attack of Hamilcar

VIEW OF THE fort euryalus.
was repulsed by means of a strong garrison posted at Euryalus, who attacked his army in flank, while advancing to the attack of Epipolae. (Diod. xx. 29.)

Some writers on the topography of Syracuse have supposed the fortress of Mongibellisi to be the ancient Hexapylum, and that Euryalus occupied the site of Belvedere, a knoll or hill on the ridge which is continued from Mongibellisi inland, and forms a communication with the table-land of the interior. But the hill of Belvedere, which is a mile distant from Mongibellisi, though somewhat more elevated than the latter point, is connected with it only by a narrow ridge, and is altogether too far from the table-land of Epipolae to have been of any importance in connection with it ; wliile the heights of Mongibellisi, as already observed, form the, true key of that position. Doreover, all the passages that relate to Hexapylum, when attentively considered, point to its position on the $N$. front of the heights, looking towards Megara and Thapsus; and Colonel Leake has satisfactorily shown that it was a fort constructed for the defence of the main approach to Syracuse on this side; a road which then, as now, ascended the heights at a point a short distance W. of the Scala Greca, where a depression or break in the line of cliffs affords a natural approach. (Leake, Notes on Syracuse, pp. 258, 342, \&c.) The gate at Hexapylum thus led, in the first instance, into the suburb or quarter of Tycha, a circumstance completely in accordance with, if not necessarily required by, a passage in Livy (xxiv. 21), where the two are mentioned in close connection.

It is more difficult to determine the exact position of Labdalum, where the Athenians erected a fort during the siege of Syracuse. The name is not subsequently mentioned in history, so that we have no knowledge of its relation to the fortifications as they existed in later times; and our only clue to its position is the description of Thucydides, that it stood "on the summit of the cliffs of Epipolae, looking towards Megara." It was probably situated (as placed by Göller and Mr. Grote) on the point of those heights which forms a slightly projecting

[^40]angle near the farmhouse now called Targia. Its purpose was, doubtless, to secure the communications of the Athenians with their fleet which lay at Thapsus, as well as with the landing-place at Leon.

It was not till the reign of the elder Dionysius (as we have already seen) that the heights of Epipolae were included within the walls or fortifications of Syracuse. Nor are we to suppose that even after that time they became peopled like the rest of the city. The object of the walls then erected was merely to secure the heights against military occupation by an enemy. For that purpose he in B. c. 402 constructed a line of wall 30 stadia in length, fortified with numerous towers, and extending along the whole N . front of the plateau, from the NW. angle of Achradina to the hill of Euryalus. (Diod. xiv. 18.) The latter point must at the same time have been occupied with a strong fort. The north side of Epipolae was thus securely guarded; but it is singular that we hear of no similar defence for the S . side. There is no doubt that this was ultimately protected by a wall of the same character, as the remains of it may be traced all around the edge of the plateau ; but the period of its construction is uncertain. The portion of the cliffs extending from Euryalus to Neapolis may have been thought sufficiently strong by nature; but this was not the case with the slope towards Neapolis, which was easily accessible. Yet this appears to have continued the weakest side of the city, as in в. с. 396 Himilco was able to plunder the temples in the suburb of Temenitis with apparently little difficulty. At a later period, however, it is certain from existing remains, that not only was. there a line of fortifications carried along the upper escarpment as far as Neapolis, but an outer line of walls was carried round that suburb, which was now included for all purposes as part of the city. Strabo reckons the whole circuit of the walls of Syracuse, including the fortifications of Epipolae, at 180 stadia (Strab. vi. p. 270); but this statement exceeds the truth, the actual circuit being about 14 English miles, or 122 stadia. (Leake, p. 279.)

It only remains to notice briefly the different localities in the immediate neighbourhood of Syracuse, which are noticed by ancient writers in connection with that city. Of these the most important
is the Olympinum, or Temple of Jupiter Olympius, which stood, as already mentioned, on a height, facing the southern front of Epipolae and Neapolis, from which it was about a mile and a half distant (Liv. xxiv. 33), the interval being occupied by the marshy plain on the banks of the Anapus. The sanctuary seems to have early attained great celebrity : even at the time of the Athenian expedition there had already grown up around it a small town, which was known as Polichne ( $ो$ Modixum, Diod.), or the Little City. The military importance of the post, as commanding the bridge over the Anapus and the road to Helorus, as well as overlooking the marshes, the Great Harbour, and the lower part of the city, caused the Syracusans to fortify and secure it with a garrison before the arrival of the Athenians. (Thuc. vi. 75.) For the same reason it was occupied by all subsequent invaders who threatened Syracuse; by Himilco in s.c. 396, by Hamilcar in B. c. 309, and by Marcellus in в. c. 214. The remains of the temple are still visible: in the days of Cluverius, indeed, seven columns were still standing, with a considerable part of the substructure (Cluver. Sicil. p. 179), but now only two remain, and those have lost their capitals. They are of an ancient style, and belong probably to the original temple, which appears to have been built by the Geomori as early as the 6th century B. $\mathbf{c}$.

The adjoining promontory of Plenmyrium does not appear to have been ever inhabited, though it presents a table-land of considerable height, nor was it ever permanently fortified. It is evident also, from the account of the operations of saccessive Carthaginian fleets, as well as that of the Athenians, that the Syracusans had not attempted to occupy, or even to guard with forts, the more distant parts of the Great Harbour, though the docks or arsenal, which were situated in the inner bight or recess of the bay, between Ortygia and the lower part of Achradina, were strongly fortitied. The sonthern bight of the bay, which furms an inner bay or gulf, now known as the bay of Sta Maddalena, is evidently that noticed both during the Athenian siege and that by the Carthaginians as the gulf of Dascon. ( $\Delta \dot{\alpha} \sigma \kappa \omega v$, Thuc. vi. 66; Diod. xiii. 13, xiv. 72.) The fort erected by the Athenians for the protection of their fleet apparently stood on the adjacent height, which is connected with that of the Olympieum.

Almost immediately at the foot of the Olympieum was the ancient bridge across the Anapus, sorne remains of which may still be seen, as well as of the ancient road which led from it towards Helorus, menorable on account of the disastrous retreat of the Athenians. They did not, however, on that occhsion cross the bridge, but after a fruitless attempt to penetrate into the interior by following the valley of the Anapus, struck across into the $\mathrm{He}-$ lorine Way, which they rejoined some distance beyond the Olympieum. Not far from the bridge over the Anapus stowd the monument of Gelon and his wife Demarete, a sumptuous structure, where the Syracusans were in the habit of paying heroic honours to their great ruler. It was adorned with nine towers of a very massive construction; but the monament itself was destroyed by Himilco, when he encamped at the adjacent Olympieuin, and the towers were afterwards demulished by Agathocles. (Diod. xi. 38, xiv. 63.)

About a mile and a half SW. of the Olympieum is the fountain of CYANE, a copious and clear stream
rising in the midst of a marsh : the sanctuary of the nymph to whom it was consecrated ( $\tau \boldsymbol{\tau} \tau \hat{\eta} s$ Kudums $i \in p o v$, Diod.), must have stood on the heights abuve, as we are told that Dionysius led his troops round to this spot with a view to attack the Carthaginixn camp at the Olympieum (Diod. xiv. 72); and the marsh itself must always have been impassable for troops. Some ruins on the slope of the hill to the W. of the source are probably those of the temple in question. [Cyane.] The fountain of Cyane is now called La Pisma: near it is another smaller source called Pismotta, and a third, known as Il Cefalino, rises between the Cyane and the Anapus. The number of these fountains of clear water, proceeding no doubt from distant sources among the limestone hills, is characteristic of the neighbourhood of Syracuse, and is noticed by Pliny, who mentions the names of four other noted sources besides the Cyane and the more celebrated Arethusa. These he calls Temenitis, Archidemia, Magaea, and Milichia, but they cannot be now identified. (Plin. iii. 8. s. 14.) None of these springs, however, was well adapted to supply the city itself with water, and hence an aqueduct was in early times carried along the heights from the interior. The existence of this is already noticed at the time of the Athenian siege (Thuc. vi. 100); and the channel, which is in great part subterraneous, is still visible at the present day, and conreys a stream sufficient to turn a mill situated on the steps of the great theatre.

A few localities remain to be noticed to the N. of Syracuse, which, though not included in the city, are repeatedly alluded to in its history. Lkon, the spot where the Athenians first landed at the cornmencement of the siege (Thuc. vi. 97), and where Marcellas established his winter quarters when he found himself unable to carry the city by assault (Liv. xxiv. 39), is probubly the little cove or bay about 2 miles N. of the Scala Greca: this is not more than a mile from the nearest point of Epipolae, which would agree with the statement of Thucydides, who calls it 6 or 7 stadia from thence; Livy, on the contrary, says it was 5 miles from Hexspylum, but this must certainly be a inistake. About 3 miles further N . is the promontory of Thapsus ( $\grave{\eta}$ Өáqos, now called Magnisi), a low but rocky peninsula, united to the mainland by a sandy isthmus, so that it formed a tolerably secure port on its S. side. On this account it was selected, in the first instance, by the Athenians for their naval camp and the station of their Heet, previous to their taking posesssion of the Great Harbour. (Thac. vi. 97.) It had been one of the first points on the Sicilian coast occupied by Greck colonists, bat these speedily removed to Megara (Thuc. vi. 4); and the site seems to bare subsequently always remained uninhabited, at least there was never a town upon it. It was a low promontory, whence Virgil appropriately calls it "Thapsus jacens." (Virg. Aen. iii. 689; Ovid, Fast. iv. 477.) Abont a mile inland, and directly opposite to the entrance of the isthmus, are the remains of an ancient monument of large size, built of massive blocks of stone, and of a quadrangular form. The portion now remaining is above 20 feet high, but it was formerly surmounted by a column, whence the name by which it is still known of L'Aguglia, or "the Needle." This monnment is popularly believed to have been erected by Marcellus to commemorate the capture of Syracuse ; but this is a mere conjecture, for which there is no foundation. It is probably in reality a sepulchral
monument. (D'Orville, Sicula, p. 173; Swinburne, vol. ii. p. 318.)

The topography of Syracuse attracted attention from an early period after the revival of letters; and the leading features are so clearly marked by nature that they could not fail to be recognised. But the earlier descriptions by Fazello, Bonanni, and Mirabella, are of little value. Cluverius, as usual, investigated the subject with learning and diligence; and the ground has been carefully examined by several modern travellers. An excellent survey of it was also made by British engineers in 1808; and the researches and excavations carried on by the duke of Serra di Falco, and by a commission appointed by the Neapolitan government in 1839 have thrown considerable light upon the extant remains of antiquity, as well as upon some points of the topography. These have been discussed in a separate memoir by the architect employed, Saverio Cavallari, and the whole subject has been fully investigated, with constant reference to the ancient authors, in an elaborate and excellent memoir by Col. Leake. The above article is based mainly upon the researches of the last author, and the local details given in the

COINS OF SYRACUSAE.

SYRIA. 1069 great work of the duke of Serra di Falco, the fourth volume of which is devoted wholly to the antiquities of Syracuse. (Fazell. de Reb. Sic. iv. 1; Bonanni, Le Antiche Siracuse, 2 vols. fol. Palermo, 1717; Mirabella, Dichiarazione della Pianta dell' antiche Siracuse, reprinted with the preceding work; Cluver. Sicil. i. 12; D'Orville, Sicula, pp. 175-202; Smyth's Sicily, pp. 162-176; Swinburne, Travels in the Two Sicilies, vol. ii. pp. 318-346; Hoare, Classical Tour, vol. ii. pp. 140-176; Leake, Notes on Syracuse, in the Transactions of the Royal Society of Literature, 2nd series, vol. iii. pp. 239354 ; Serra di Falco, Antichità della Sicilia, vol. iv; Cavallari, Zur Topographie von Syrakus, 8vo. Göttingen, 1845.)
[E. H. B.]
 41 ; Ptol. vii. 1. § 2), a district of ancient India, near and about the mouths of the Indus. There can be no doubt that it is represented by the modern Saurashtrán, for a long time the seat of a powerful nation. Surashtra means in Sanscrit "the beautiful kingdom." Ptolemy (l.c.) mentions a small village Syrastra, which may have once been its capital. It is probable that the Syrieni of Pliny (vi. 20. s. 23) were inhabitants of the same district.
[V.]
SYRGIS (Zúprıs, Herod. iv. 123), a considerable river of European Sarmatia, which flowed from the country of the Thyssagetae through the territory of the Maeotae, and discharged itself into the Palus Maeotis. Modern geographers, have variously attempted to identify it. Rennell (Geogr. of Herod. p. 90) considers it to be one of the tributaries of the Wolga. Gatterer (Comment. Soc. Gott. xiv. p. 36) takes it to be the Donetz, whilst Reichard identifies it with the Irgitz, and Linder (Scythien, p. 66) with the Don itself.
[T. H. D.]
SY'RIA (Zupía: Eth. Zúpoos), the classical name for the country whose ancient native appellation was Aram, its modern Esh-Sham.
I. Name.-The name Aram (\%), more comprehensive than the limits of Syria Proper, extends, with several qualifying adjuncts, over Mesopotamia and Chaldaea. Thus we read (1.) of Aram of the two rivers, or Aram Naharaim (הרם גברִים, LXX. $\tau \grave{\eta} \nu \mathrm{M} \epsilon \sigma \sigma \pi o \tau \alpha \mu i ́ a \nu, G e n . ~ x x i v . ~ 10)$, equivalent to Padan-Aram, or the Plain of Aram (a) LXX. т̂̂s Mefototapias Zupías, Gen. xxv. 20, xxviii. $2,5,6,7$, xxxi. 18), but comprehended also a mountain district called "the mountains of the east" (Num. xxii. 5, xxiii. 7; Deut. xxiii. 4). (2.) Aram Sobah (אָּם צוֹבְה, LXX. Zov\&á, 1 Sam. xiv. 47; 2 Sam. viii. 3, x. 6, 8). (3.)
 $\Delta a \mu a \sigma \kappa o \hat{v}, 2 \mathrm{Sam} . \operatorname{viii}$ 5). (4.) Aram Beth-Rehob
 (5.) Áram Maacâh (صְyְָ̧, LXX. Maaxà, 1 Chron. xix. 6). Of these fire districts thus distinguished, the first has no connection with this article. With regard to the second, fourth, and fifth, it is doubtful whether Sobah and Rehob were in Mesopotamia or in Syria Proper. Gesenius supposes the empire of Sobah to have been situated north-east of Damascus; but places the town, which he identifies with Nesebin, Nisibis, and Antiochia Mygdoniae,
 a comparison of $2 \mathrm{Sam} . \mathrm{x} .6$ with 1 Chron. xix. 6 seems rather to imply that Rehob was in Mesopotamia, Soba and Maacha in Syria Proper ; for, in
the former passace, we have the Aramites of BethRehob, and the Aramites of Soba, and the king of Maacah, - in the latter, Aram Naharaim = Mesopotamia, and Aram Maacah and Zobah; from which we may infer the identity of Beth-Rehob and Mesopotamia, and the distinction between this latter and Mascah or Zobah : and again, the alliance between Hadadezer, king of Zobal, and the Aramites of Damascus (2 Sam. viii. 3-6; 1 Chron. xix. 3-6) would imply the contiguity of the two states; while the expedition of the former "to recover his border," or "establish his dominion at the river Euphrates" (ver. 3), during which David attacked him, would auppose a march from west to east, t hrough Syria, rather than in the opposite direction through Mesopotamia.

With regard to the origin of the name Aram, there are two Patriarchs in the early genealogies from whom it has been derived; one the son of Shem, the progenitor of the Hebrew race, whose other children Uz, Asshur, Arphasad, and Lud, represent ancient kingdoms or races contiguous to Syria; while Uz, the firstborn son of Aram, apparently gave his name to the native lard of Job, at a very early period of the world's history. (Gem. x. 22, 23.) The other Aram was the grandson of Nahor, the brother of Abraham, by Kernuel, whose brother Huz is by some supposed to have given his name to the country of Job, as it can scarcely admit of a doubt that the third brother, Buz, was the patriarch from whom the neighbouring district took its name. (Gen. xxii. 20, 21 ; Job, i. 1, xxxii. 2.) But as we find the name Aram already applied to describe the country of Bethuel and Laban, the uncle and cousin of the later Aram, it is obvious that the country must have derived its name from the earlier, not from the later patriarch. (Gen. xxv. 20, xxviii. 5, \&c.)

The classical name Syria is commonly supposed to be an abbreviation or modification of Assyria, and to date from the period of the Assyrian subjugation of the ancient Aram; and this account of its origin is confirmed by the fact that the name Syria does not occar in Homer or Hesiod, who speak of the inhabitants of the country under the name of Arimi, (eiv 'Apímors, Hoin. Il. B. 783. Hes. Theog. v. 304), in connection with the myth of Typhon, recorded by Strabo in describing the Orontes [Orontes]; and this writer informs us that the Syrians were called Aramaei or Arimi (i. p. 42, xiii. p. 627, xvi. pp. 784, 785), which name was, however, extended too far to the west or north by other writers, so as to comprehend Cilicia, and the Sacae of Scythia. (See Bochart, Geog. Sac. lib. ii. cap. 6.) Herodotus, the earliest extant writer who distinctly names the Syrians, declares the people to be identical with the Assyrians, where he is obvionsly speaking of the latter, making the fonmer to be the Greek, the latter the barbarian name (vii. 63); and this name he extends as far south as the confines of Egypt,-placing Sidon, Azotus, Cadytis, and, in short, the Phenicims in general, in Syria (ii. 12, 158, 159), calling the Jews the Syrians in Palestine (ii. 104); and as far west. as Asia Minor, for the Cappadocians, he says, are called Syrians by the Greeks (i. 72), and speaks of the Syrians about the Thermodon and Parthenius, rivers of Bithynia (ii. 104). Consistently with this early notice, Strabo, at a much later period, states that the name of Syri formerly extended from BabyIonia as far as the gulf of lssus, and thence as far as the Euxine (xvi. p. 737); and in this wider sense
the name is used by other classical writers, and thus includes a tract of country on the west which was not comprehended within the widest range of the ancient Aram.
II. Natural boundaries and divisions. - The limits of Syria proper, which is now to be considered, are clearly defined by the Mediterranean on the west, the Euphrates on the east, the range of Amanus and Taurus on the north, and the great Desert of Arabia on the south. On the west, however, a long and narrow strip of coast, commencing at Marathus, and running south to Mount Carmel, was reckoned to Phoenice, and has been described under that name. In compensation for this deduction on the south-west, a much more ample space is gained towards the south-east, by the rapid trending away of the Euphrates eastward, between the 36th and 34th degree north lat., from near the 38th to the 4 lst degree of east longitude, thereby increasing its distance from the Mediterranean sea, from about 100 miles at Zeugma (Bir), to 250 miles at the boundary of Syria, south of Circesium (Karkisia). Commencing at the northern extremity of the lssicus Sinus ( $G u l f$ of Iskanderun), near lissus itself, the Amanas Mons (Alma Dagh), a branch of the Tauras, runs of first in a northern direction for 18 miles, then north-east for 30 more, until it joins the main chain (Durdün Dagh), a little westward of Mar'ash, from whence it runs due eastward to the Euphrates. The southern line cannot be accurately described, as being marked only by an imaginary line drawn through an interminable waste of sand. This irregular trapezium may now be subdivided.

For the purposes of a physical description, the ranges of Lebanon and Antiliianus may be assumed as landmarks towards the south, while the river Orontes affords a convenient division in the geography of the country towards the north; for the valley of the Orontes may be regarded as a continuation northward of the great crevass of Coelesyria, the watershed being in the vicinity of Basibek. so that "this depression extends along the whole mestorn side of the country, having on each side, through nearls 6 degrees of latitude, an almost continuous chain of mountains, from which numerous oflsets strike into the interior in different directions." (Col. Chesney, Expedition for the Survey of the Euphrates and Tiyris, vol. i. p. 384.)

1. The western range.-Where the range of Amanus meets the coast at the Gulf of Iskanderin, near the river Issus, it leaves only a narrow pass beiween its base and the sea, formerly occupied by the Armenian, Syrian, or Amanidan gates of the varivus geographers, which will be again referred to below. This range then adrances southwards under various names, approaching or receding from the coast, and occasionaliy throwing out bold headlands into the sea, as at Ras Khanzeer, Ras Bosyt (I'osidium Prom.), Ras-esh-Shaka, \&cc. The part of the chain north of the Orontes is thus described by Col. Chesney (p. 384): "The base of the chain consists of manes of serpentines and diallage rocks, rising abruptly from plains on each side, and supporting a tertiary formation, terminating with bold ragged peaks and conical summits, having at the crest an elevation of 5387 feet. The sides of this mass are occasionally furrowed by rocky fissures, or broken into valleys, between which there is a succession of rounded shoulders, either protruding through forests of pines, oaks, and larches, or diversified by the arbutus, the myrtle, oleander, and other shrubs. Some basalt
appears near Ayas, and again in larger masses at some little distance from the NE. side of the chain. ... Southward of Beilan the chain becomes remarkable for its serrated sides and numerous summits, of which the Akhma Tagh shows about fifteen between that place and the valley of the Orontes." The sharp ridge of JebelKhoms terminates in the rugged and serrated peaks of Cape Khanzir, which overhangs the sea, and separates the Gulf of Iskanderün from the Bay of Antioch. South of this is Jebel Musa, the Mons Pieria of classic writers, a linestone offeet from Mount Rhoms, and itself imperfectly connected with the other classical mount, Casius, by the lower runge of Jebel Simán. A little to the south of the embouchure of the Orontes, Mount Casius reaches an elevation of 5699 feet, composed of supra-cretaceous limestone, on the skirts of which, amung the birch and larch woods, are still to be seen the rains of the temple, said to have been consecrated by Cronus or Ham (Ammianus Marcell. xxii. 14), while the upper part of its cone is entirely a naked rock, justifying its native modern name Jebel-el-Akra (the bald mountain). From this point the mountain chain continues southward, at a much lower elevation, and receding further from the coast, throws out its muts both east and west, towards the Orontes on the one side and the Mediterranean on the other. This range has the general name of Jebel Anzarich from the tribe that inhabits it, but is distinguished in its various parts and branches by local names, chietly derived from the towns and villages on its sides or base. The southern termination of this range must be the intervening plains which Pliny places between Libanus and Bargylus ("interjacentes campi"), on the north of the former. (Plin. v. 20.) These plains Shaw finds in the Jeune (fruitful), as the Arabs call a comparatively level tract, which "commences a little south of Maguzzel, and ends at Sumrah, extending itself all the way from the sea to the eastward, sometimes five, sonetimes six or seven leagues, till it is terminated by a long chain of mountains. These seem to be the Mons Bargylus of Pliny." Sumrah be identifies with Simyra, - which Pliny places in Cuelesyria at the northern extremity of Mount Libanus,-but remarks that, as Sumrah lies in the Jeune, 2 leagues distant from that mountain, this circumstance will better fall in with Arca, where Mount Libanus is remarkably broken off and discontinued. (Shaw, Travels in Syria, pp. 268, 269, 4to ed.) We here reach the confines of Phoenice, to which a separate article has been devoted, as also to Mount Lebanon, which continues the coastline to the southern extremity of Syria.
2. Coelesyria, and the valley of the Orontes. Althongh the name of Coelesyria (Hollow Syria) is sometimes extended so as to include even the const of the Dediterranean-as in the passage above cited from Pliny-from Seleucis to Egypt and Arabia (Sirabo, ut infra), and especially the prolongation of the southern valley along the crevass of the Jordan to the Dead Sea (see Keland, Palaestina, pp. 103, 458. 607, 774), yet, according to Strabo, the name properly describes the valley between Libanus and Antilibanus (xvi. 2. § 21), now known among the natives as EL-Bükäa (the deep plain). "Under this name is enibraced the valley between Lebanon and Anti-Lebanon, from Zahleh southward; including the villages on the declivities of buth mountains, or rather at their foot : for the eastern doclivity of Lebanon is so steep as to have very few
villages much above its base; and the western side of Anti-Lebanon is not more inlabited. Between Zahleh and its suburb, Mu'alluhah, a stream called El-Bürdony descends from Lebanon and runs into the plain to join the Lituny. The latter river divides the $B u \dot{k} k \ddot{a} a$ from north to south; and at its southern end passes out through a narrow gorge, between precipices in some places of great height, and finally enters the sea north of Sur. where it is called Kásiméyeh" [Leontrs]. To the south of the Bükiia is the Merj 'Ayin (meadono of the springs)," between Belàd Beshärah and Wády-etTein, on the left of the Litany. Here Lebanon and Anti-Lebanon come together, but in such a manner that this district may be said to separate rather than to unite them. It consists of a beautiful fertile plain, surrounded by hills, in some parts high, but almost every where arable, until you begin to descend towards the Littiny. The mountains farther south are much more properly a continuation of Lebanon than of Anti-Lebanon." (Dr. Eli Smith, in Biblical Kesearcles, vol. iii. Appendix B. pp. 136, 140.) This then is the proper termination to the sonth of Coelesyria. The Merj 'Ayin terninates in the Erd-el-Huleh, which is traversed by the several tributaries of the Jordan, and extends as far south as the Bahr-el-Huleh. [Samachonitis Lacus; Palaestina, pp. 521, 522.]

To return now to the watershed. Baalbek gives its name to the remainder of the Büku"a, from the village of Zahleh northward (Smith, ut sup. p. 143), in which direction, as has been stated, the remotest sources of the Orontes are found, not far from Baalbek, which lies in the plain nearer to the range of Antilibanus than to Lebanon. [Orontre; Heliofolis.] The copious fuuntain of Labreh is about 10 miles north-east of Baallek; and this village gives its name to the stream which runs for 12 miles through a rocky desert, until it falls into the basin of a much iarger stream at the village of Er-Kas or 'Ain Zerka, where is the proper source of the Orontes, now EL'Azi. The body of water now " becomes at least threefold greater than before, and continues in its rugged chasm generally in a north-easterly course for a considerable distance, until it passes near Ribleh," then runs north through the valley of Homs, having been fed on its way by numerous streams from the slopes of Lebanon and Antilibanus, draining the slopes of Jebel Anzerieh, and forming as it approaches Homs the Bahr-eh. Kades, which is 6 miles long by about 2 wide. (Chesney, ut sup. p. 394; Robinson, Journal of the R. G.S. vol. xxiv. p. 32.) Emerging from the lake, it waters the gardens of Homs about a mile and a balf to the west of the town, then running north to Er-Rustam, where is a bridge of ten arches, it is turned from its direct course by Jebel Arbayn on its left bank, round the roots of which it aweeps almost in a semicircle, and enters Hamah, where it is crossed by a bridge of thirteen arches. It now continues its course north-west for about 15 miles to Kalúat-es-Sejar (Larissa), then due west for 8 miles, when it turns due north, and so continues to the Jisr Hadid mentioned below. About 20 miles below Larissa it passes Kaliat-em-Medaik (Apameia) on its right bank, distant about 2 miles; a litule to the north of which it receives an affluent from the small lake Et-Taka, remarkable for its abundance of black-fish and carp (Burckliardt, Syria, p. 143; Chesney, p. 395), then, ranning through Wady-el-Ghab, euters the Birket-el-Howash, 8 milia
north of A pameia, where its impetuosity is curbed and its waters dissipated in the morasses, so that it flows off in a diminished stream to Jisr Shoyher, to be again replenished in its course through the plain of ' $U m k$ by other sffluents, until it reaches its northernmost point at Jior Hadid (the Iron Bridge), a little below which it winds round to the west, and about 5 miles above Antioch receives from Bahr-el Abiad (the White Sea) the Nahr-elKowshit, a navigable river, containing a greater volume of water than EL-Azy itself. It now flows to the north of Antioch and the infamous groves of Daphne, through an exceedingly picturesque valley, in a south-west course to the sea, which it enters a little to the south of Seleucia, after a circuitous course of about 200 miles, between $34^{\circ}$ and $36^{\circ} 15^{\prime}$ of north latitude, $36^{\circ}$ and $37^{\circ}$ of east longitude.
3. Antilibanus and the eastern range. -The mountain chain which confines Coelesyria on the east is properly designated Antilibanus, but it is further extended towards the north and south by offsets, which confine the valley of the Orontes and the Jordan valley respectively. Antilibanus itself, now called Jebeb-esh-Shurkeh (Eastern Mountain), which is vastly inferior to Libanus both in majesty and fertility, has been already described, as has also its southern prolougation in Mount Hermon, now Jebel-esh-Sheikh, sonetimes Jebel-eh-Telge (the Snow Mountain). [Antilibances.] The northern chain, on the east of the Orontes valley, has not been sufficiently surveyed to admit of an accurate description, but there is nothing striking in the height or general aspect of the range, which throws out branches into the great desert, of which it furms the western boundary.
4. The eastern desert.-Although for the purposes of a geographical description the whole country east of the mountain cl:ains above described may be regarded as one region, and the insufficient materials for a minute and accurate survey make it convenient so to regard it, yet it is far from being ann uniform flat, presenting throughout the same features of desolation. On the contrary, so far as it has yet been explored, particularly to the south of the parallel of Damascus, the country is diversified by successions of hills and valleys, which often present large fertile tracts of arable land, cultivated in many parts by a hardy and industrious race of inhabitants. By far the richest of these is the plain of Damascus (ElGhiitah), at the foot of the eastern declivity of Antilibanus, the most excellent of the four earthly paradises of the Arabian geographers. (Dr. Eli Smith, in Bib. Res. vol. iii. Append. B. p. 147.) It owes its beauty, not less than its fertility, to the abundance of water conveyed to it in the united streams of the Barada and the Phégeh, which, issuing together from the eastern roots of Antilibanus, and distributed into numerous rivulets, permeate the city and its thousands of gardens, and finally lose themselves in the Sea of the Plain, Bahr-el-Merj, which the exploration of a recent traveller has found to consist of two lakes instead of one, as has been hitherto represented in all modern maps. (Porter, Five Years in Damascus, 1855, vol. i. pp. 377-382, and map.) Indeed, so much fresh light has been thrown on the sunth-west of Syria by Mr. Porter's careful surveys, that the geograply of the whole country will have to be greatly moditied in all future maps, as we are now, for the first time, in a position to define with some degree of accuracy the limits of several districts mentioned buth by sacred and classical writers,
whose relative position even has hitherto been only matter of doubtful conjecture. The statements of Burckhardt, who has hitherto been the sole authority, require considerable correction.

The Barada, the ancient Abana, from its rise in Antilibanus, near the plain of Zebclany to its termination in the South and East Lakes, is computed to traverse a distance of 42 miles, and to water a tract equal to 311 square miles, inhabited by a population of 150,000 souls, or an average of 482 to every square mile, including Damascus and its suburbs. "The prevailing rock of the mountains through which it flows is limestone. In the higher regions it is hard and compact, but near Damascus sof and chalky, with large nodules of flint intermixed. Fossil shells and corals in great variety are found along the central chain of Antilibanus, through which the river first cuts. In the white hills near Damascus are large quantities of ammonites. At Súk W'ady Barada (near its source) is a vast bed of organic remains, not less than a mile in length, and in some places exceeding 100 feet in thickness. Tranks of trees, branches of every size and form, and even the delicate tracery of the leaves may be seen scattered about in vast masses. There are in several places among the mountains traces of volcanic action. On a lofty suminit, two hours' north-east of Sük, is what appears to be an extinct crater. The mountain has been rent, the linestone strata thrown back, and black porous trap-rock fills up the cavity. The plain of Damascus has a loamy soil intermixed with tine sand. The substratum is generally conglomerate, made up of rounded sinouth pebbles, flint, and sand. The south-eastern portion of the plain is entirely volcanic." (Porter, Journal of Sacred Literature, vol. iv. p. 262.) The plain of Damascus is bounded towards the south by a low range of hills called Jebel-el-Aswad (the Black Mountain), the southern base of which is washed by a stream, which has lately been supposed by some travellers to represent the ancient Pharpar. It is now called Nahr-elAvorj, which, rising in the roots of Hermon, runs in a course about north-east to a small lake named Bahret-el-Heijainy, only abuat 4 miles south of the Bahret-el-Kibliych, into which the Barada flows. It runs partly through a limestone and partly through a volcanic formation, which continues hence far to the south. (Porter, in Journal of Sac. Lit vol. v. pp. 45-57, Travels, vol. i. pp. 297-322.) On the south side of the river, opposite to Jebel-elAscoul, is another low monntain range called Jebred Mania, and a higher elevation connected with this range commands a view of thove ancient divisions of Southern Syria, which have hitherto been only conjecturally placed in modern maps. Their boundaries have notwithstanding been indelibly traced by the hand of nature, and the limits so clearly defined that they actually exist, mostly under their identical ancient names, as an evidence of the fidelity of classical and sacred geographers. But these will be more conveniently considered in connection rith Trachonitis, round which they are grouped [Trachonitis], particularly as this part of the country may be regarided as debateable ground between Syria, Arabia, and Palestine.

Turning now to the north of Damascus and the cast of the mountain range, the country between this city and Aleppo offers nothing worthy of particular notice; indeed its geography is still a blank in the map of Syria, except iss western side, which is traversed by the Haj read, the most northern part
of which has been deacribed by Burckhardt, and its southern by the no less enterprising and more accurate Porter, in more recent times. (Barckhardt, Syria, p. 121, \&cc.; Porter, Lamascus, vol. ii. p. 350. \&ce.)

The northern part of Syria is now comprehended in the pashalic of Aleppo. It is bounded on the east by the Euphrates, and on the north and west by the mountain chains of Taurus and Amanus, the former of which throws off other diverging branches to the soath, until they ultimately flank the valley of the Orontes on the east, so contiuuing the connection between Antilibanus and its parent stock. Aleppo itself is situated in a rich and extensive plain, separated on the east by undulating hills from the almost unoccupied country, which consists of a level sheeptrack, extending from thence to the Euphrates. The sandy level of this Syrian desert is, however, diversified by occasional ranges of hills, and the plateaus are of various elevation, rising a little west of the meridian of Aleppo to a height of 1500 feet above the Mediterranean, and thence declining suddenly to the east and much more gradually to the west. It is on one of these ranges in the heart of the desert, northeast of Damascus, that Palmyra is situated, the only noticeable point in all the dreary waste, which has been described in an article of its own [Palmiza]. The tract between Damascus and Palmyra has been frequently explored by modern travellers, as well as the ruins themselves; but there is no better account to be found of them than in Mr. Porter's book, already so frequently referred to (vol. i. pp. 149254 ; compare Irby and Marigles, pp. 257-276).
III. Ancient geographical dicisions.-The earliest classical notice of Syria, which could be expected to enter into any detail, is that of Xenophon in his Anabasis. Unhappily, however, this writer's account of the march of Cyrus through the north of Syria is very brief. The following notes are all that he offers for the illustration of its ancient geography. Lssus he mentions as the last city of Cilicia, towards Syria. One day's march of 5 parasangs brought the army to the gates of Cilicia and Syria: two walls, 3 stadia apart, - the river Cersus (Képoos) flowing between,-drawn from the sea to the precipitous rocks, fitted with gates, allowing a very narrow approach along the coust, and so difficult to force, even against inferior numbers, that Cyrus had thought it necessary to send for the fleet in order to enable him to turn the flank of the enemy : but the position was abandoned by the general of Artaxerxes. One day's march of 5 parasangs brought them to Myriandrus (Mupiavסpos), a mercantile city of the Phoenicians, on the sea. Four days' march, or 20 parasangs, to the river Chalus (Xdios), abounding in a fish held sacred by the Syrians. Six days, or 30 parasangs, to the fountains of the Daradax (al. Dardes, $\Delta \dot{d} p \delta \eta$ ), where were palaces and parks of Belesys, governor of Syria. Three dars, 15 parasangs, to the city Thapsacus on the Euphrates (Anab.i. 4. §§ 4-18). It is to be remarked that the 9 days march of 50 parasangs beyond this is said by Xenophon to have led through Syria, where he uses that term of the Aram Naharaim, of the Scriptures, equivalent to Mesopotamia. Of the places named by the historian in Syria Proper, Issus has been fully described [Isscs]. The position of the Cilician and Syrian gates is marked by the narrow passage left between the base of the Amanus and the sea, where the ruins of two walls. separated by an interval of about 600 yards, still
preserve the tralition of the fortifications mentioned in the narrative. The Cersus, however, now called the Merkez-su, appears to have been diverted from its ancient channel, and rons to the sea in two small streams, one to the north of the northern wall, the other to the south of the southern. The site of Myriandrus has not yet been positively determined, but it must have been situated about half-way between Iskanderiun (Alexandria) and Arsis (Rhosus), as Strabo also intimates (see below). From this point the army mast have crossed the Amanus by the Bcilin pass, and have marched through the plain of ' $\mathcal{C m k}$, north of the lake of Antioch, where three fordable rivers, the Labotas ( Kara-su), the Oenoparas (Aswoid), and the Arceuthus ('Afrin), must have been crossed on their march ; which, however, are unnoticed by the historian. The river Chalus, with its sacred fish, is identitied with the Chalib or Konceik, the river of Aleppo, the principal tributary to which in the mountains is still called Baloklic. su, or Fish-river. The veneration of fish by the Syrians is mentioned also by Diodoras, Lucian, and other ancient writers. (Ainsworth, Travels in the Track of the Ten Thowsand, pp. 57-65.) The source of the river Daradax, with the palaces and parks of Belesvs, 30 parasangs, or 90 geographical miles, from Chalus, is marked by an ancient site called to the present day Bailis," peculiarly positioned with regard to the Euphrates, and at a point where that river would be first approached on coming across Northern Syria in a direct line trending a little southward, and corresponding at the same time with the distances giren by Xenophon." (Ainsworth, l. c. p. 66.) The ruins of a Roman castle, built upon a mound of ruins of greater antiquity, doubtless preserve the site of the satrap's palace; while the rich and productive alluvial soil of the plain around, covered with grasses, flowering plants, jungle, and shrubs, and abounding in game, such as wild boars, francolin, quails, landrails, \&ec., represents "the very large and beautiful paradise:" the river Daradax, however, is reduced to a canal cut from the Euphrates, about a mile distant, which separated the large park from the mainland; and Mr. Ainsworth thinks that the fact of the fountain being 100 feet wide at its source, "tends to show that the origin of a canal is meant, rather than the source of a river" (p. 67. n. 1). Thapsacus is described in a separate article. [Thapsacus.]

Far more full, but still unsatisfactory, is the description of Syria given by Strabo, a comparison of which with the later notices of Pliny and Piolemy, illustrated by earlier histories and subsequent Itineraries, will furnish as complete a view of the classical geography of the country as the existing materials allow. The notices of Phoenicia, necessarily intermingled with those of Syria, are here omitted as having been considered in a separate article [Phoznicia]. On the north Syria was separated from Cilicia by Mons Amanus. From the sea at the gulf of Issus to the bridge of the Euphrates in Commagene was a distance of 1400 stadia. On the east of the Euphrates, it was bounded by the Scenite Arabs, on the south by Arabia Felix and Egypt, on the west by the Egyptian sea as far as Issus (xvi. p. 749). He divides it into the following districts, commencing on the north: Commagene, Seleucis of Syria; Cuelesyria; Phoenice on the coast ; Judaea inland. Commagene was a small territory, having Samosata for its capital, surrounded by a rich country. Seleucis, the fortress of Mesopo-
tamia, was situated at the bridge of the Euphrates in this district, and was assigned to Commagene by Pompey. Seleucis, otherwise called Tetrapolis, the best of the before-named districts, was subdivided according to the number of its four principal cities, Seleucis of Pieria, Antioch, Apameia, and Laodiceia. The Orontes flowed from Coelesyria through this district, having to the east the cities of Bambyce, Beroea, and Heracleia, and the river Euphrates. Heracleis was 20 stadia distant from the temple of Athens at Cyrrhestis. This gave its name to Cyrrhestice which extended as far as Antiochis to the south, touched the Amanus on the north, and was conterminous with Commagene on the east. In Cyrrhestice were situated Gindarus, its capital, and near it Heracleum. Contiguous to Gindarus lay Pagrae of Antiochis, on the Amanus, above the plain of Antioch, which was watered by the Arceuthus, the Oroutes, the Labotas, and the Oenoparas, in which was also the camp of Meleager; above these lay the table mount, Trapezas. On the coast were Seleuceia and Mount Pieria, attached to the Amanus, and Rhosus ('Pwod's), between Issus and Seleuceia. South of Antiochis was Apameia, lying inland; south of Seleucis Mount Casins and Anticasius : but the former was divided from Seleucein by the embouchure of the Orontes and the rock-bewn temple of Nyinphaenm; then Posidium a small town, Heraclein, Laodiceia, \&c. The mountains east of Laodiceia, sloping gradually on their west side, bad a steeper inclination on the east towards Apameia (named by the Macedonians Pella) and the Chersonese, as the rich valley of the Orontes about that city was called. Conterminous with the district of Apamene, on the east, was the country of the phylarch of the Arabs, named Parapotamia, and Chalcidice, extending from the Massyas; while the Scenite Arabs also occupied the south, being less wild and less distinctively Arabs in proportion as they were brought nearer by position to the influences of Syrian civilisation. (Ibid. pp. 749-753.) Then follows the description of the corst, which belongs to Phoenicia (sup. p. 606), and his extraordinary mis-statement about Libanns and Antilibanus (p. 755) alluded to under those articles. According to this view, the western termination of Libanus was on the cusst, a little to the south of Tripoli, at a place called $\Theta \in o v i \pi p \sigma \sigma \omega \pi o v$, while Antilibanus commenced at Sidon. The two ranges then ran parallel towards the east, nutil they terminated in the mountains of the Arabians, above Damascus, and in the two Trachones [Trachonitis]. Between these two ranges lay the great plain of Coelesyria, divided into several districts, the width at the sea 200 stadia, the length inland about double the width; fertilised by rivers, the largest of which was the Jordan, and having a lake called Gennesaritis [Tiberias Mare]. The Chrysorthors, which rose near Damascus, was almost wholly absorbed in irrigation. The Lycus and Jordau were navigated by the Aradians. The westernmost of the plains, along the sea-border, was called Macra (Máxpa mediov), next to which was Massyas, with a hilly district in which Chalcis was situated as a kind of acropolis of the district, which commenced at Laodiceia ad Libanam. This hilly district was held by the Ituraeans and Arabs [Ituraea]. Above Massyas was the Royal Plain (Avìc̀v Baoı入ısds) and the country of Damascus, followed by the Trachones, \&c. (pp. 755, 756 ). This very confused and inaccurate description has been sufficiently corrected in the account above given of the Physical Geo-
graphy of Syria, and need not be further noticed than to observe that it is very strange that, after Syria had been occupied by the Macedonians and the Romans for so many years, and notwithstanding the frequent campaigns of the Roman legions in that country, even its main features were so little known.

Pliny confines Syria to the limits usually assigned it, that is he distinguishes between Syria and Yalestine, which are confounded by Strabo. He de-cribes Galilee as that part of Judaea which adjoins Syria (v. 14. 8. 15), but coincides with Strabo in giving a deacription of the coast under the name of Phoenice (19. s. 17). His notion of the direction of the ranges of Libanus and Antilibanus is more correct than that of Strabo; but his description of the coast of Phoenice, like that of his predecessor, is far more correct than that of the interior of the country; while his grouping of the various districts is altogether arbitrary and incorrect. Thus, while he correctly describes Mount Lebanon as commencing behind Sidon, he makes it extend for 1500 stadia (a monstrous exaggeration, if the reading is correct) to Simyra, and this he calls Coelesyria. Then be loosely states the parallel range of Antilibanus to be equal to this, and adds a fact, unnoticed by other writers, that the two ranges were joined by a wall drawn across the intermediate valley. Within, i. e. east of, this last range ("post eum introrsus ") he places the region of Decapolis and the tetrarchies which be had before enumerated (viz. Trachonitis, Paneas, Abila, Arca, Ampeloessa, Gabe), and the whole extent of Palestine ("Palaestinae tota laxitas"), -a confusion on the part of the author involving a double or triple error; for, 1st, unless Damascus be included in the Decapolis, the whole region lay sonth of Antilibanus ; 2dly, the cities of the Decapolis lay in several tetrarchies, and therefore ought not to be distinguished from them as a separate district ; 3 dly , the tetrarchies themselves, which are wrongly enumerated, lay, for the most part, within Coelesyria proper, and only Abilene, in any proper sense, to the east of Antilibanus, although this description might loosely apply to Trachonitis also [T\&aCHOnitis]. But to destend to particulars.

Phoenice terminates to the north, according to Pliny, at the island Aradus, north of the river Eleutheros, near Simyra and Marathos. On the coast were situated Carne, Balanea, Paltos, Gabale, the promontory on which lay Laodiceia Libera, Diospolis, Heraclea, Charadrus, Posidium; then the promontory of Syria of Antioch, then that of Seleucia Libera, called also Pieria. Another egregions error follows this generally correct statement, and is accompanied with another example of exaggeration. Mons Casius he places above Seleucia (" super eam") - from which it is distant about 15 miles to the north, the Orontes intervening - and states its ascent to be xix. M.P., and its direct height iv. M. P., or nearly 20,000 feet 1 -its actual height being abont 5,700 feet,-from the summit of which the sun might be seen above the horizon at the fourth watch, i. e. three hours before sunrise. North of this came the town Khosos, behind which ("a tergo") Portae Syriae, between the Rhosii Montes and the Taurns; then Myriandros, on the coast, and Mount Amanus, on which was Bomitae, and which separated Syria from Cilicia (v. 20-22). In the interior the following districts belonged to Coelesyria: Apameia, divided by the river Marsyas from the tetrarchy of the Nazerini ; Bambyce, otherwise called Hierapolis, but Mabog by the Syrians (famous for the worship
of the monstrons Atargatis, the Derceto of the Greeks); Chalcis ad Belum, which gave its name to the region of Chalcidene, the most fertile in Syria; then Cyrrhestice, named from Cyrrhum; the Gazatae, Gindareni, Gabeni; two tetrarchies named Granucomatae; the Emeseni; Hylatae; the Ituraeans and their kindred Baetarreni; the Mariammitani, the tetrarchy of Mammisea, Paradisus, Pagrae, Pinaritae; two other Seleuciae, the one at the Euphrates, the other at Belus; the Cardstenses. All these he places in Coelesyria: the towns and peoples enumerated in the rest of Syria, omitting those on the Enphrates, which are separately described, are the Arethusii, Beroeenses, Epiphanoenses; on the east, the Laodiceans by Libanus, the Leucadii, Larisaei, be-ides seventeen tetrarchies with barbarous names not further specified. The towns named in connection with the Euphrates are, Samosata, the head of Commagene, xl. M. P. below the cataracts, where it receives the Marsyas; Cingilla the end, and Immea the commericement, of Commagene; Epiphania, Antiochia ad Euphraten; then Zeugma, lxxii. M. P. from Samosata, celebrated for the bridge over the Euphrates - whence its name - which connected it with Apameis on the left bank of the river; Europus; Thapsacus, then called Amphipolis. On reaching Ura, the river turned to the east, leaving the vast desert of Palmyra on the right. Palmyra was cocxxxvii. M. P. from the Parthian city of Seleuceia ad Tigrim, cciii. M. P. from the nearest part of the Syrian coast, and xxvii. M. P. from Damascus. Below ("infra") the deserts of Palmyra was the region Strelendena, and the above-named Hierapolis, Beroea, and Chalcis; and beyond ("ultra") Palmyra, Emesa and Elatius, half as near again ("dimidio propior") to Petra as was Damascus (Ib. cc. 23-26).

It is difficult to discover many of these names in their Latin disguise still further obscured by corrupt readings; but many of them will occur in the more accurate and methodical notices of Ptolemy, in connection with which a comparative Geography of Ancient and Modern Syria may be attempted. The boundaries of Syria are fixed by Ptolemy consistently with earlier writers. On the N., Cilicia, part of Cappadocia, and Mons Amanus; on the W. the Syrian sea ; on the S. Judaea ; on the E. the Arabian desert as far as the ford of the Euphrates, near Thapsacus; then the river itself as far as Cappadocia (Ptol. v. 15. §§ 1-8).

The districts and towns are enumerated ander the following subdivisions:-
i. The Const ( $\$ \S 2,3$ ) after Issus and the Cilician Gates. 1. Alexandreia by the Issus. 2. Myriandrus. 3. Rhossus. 4. The Rhossian Rock ( $\sigma$ кóreinos). 5. Seleuceia of Pieria. 6. The mouth of the Orontes. 7. Poseidion. 8. Heracleia. 9. Landiceia. 10. Gabala. 11. Paltos. 12. Balaneae. [Then follows Phoenice, from the Eleutheras to the Chorseus, S. of Dora. See Phornice.] Of the above-named maritime towns of Syria, No. 2 alone has occurred in Xenophon, 5 parasangs S. of the Cilician Gates. Both this and most of the others occur in Strabo and Pliny, and the distances are furnished by the author of the Stadiasmus Maris Magni, and the Itinerarium Hierosolymitanum. . Alexandreia (Iskanderín), not mentioned by Strabo or Pliny, was 45 stadia from the Cilician Pylae. Myriandrus was 80 stadia from Alexandreia. Its site has not been identified (Ainsworth, Travels in the Track of the Ten Thousand, p. 59), but is conjecturally, though probably. placed by Pococke on the river Dulgekan. (Observations
on Syria, p. 179.) Rhossus (now Arsius) is 90 stadia from Myriandrus; while the Rhossicus Scopulus, 80 stadia from Rhossus, is to be identified in the Ras Khanzeer, the southern promontory of the Gulf of Iskanderin, a well-known nautical feature on this coast. (Ib. p. 180; Chesney, Expedition, i. p. 410.) Between Seleuceia and the Hhossic rock the Stadiasmus inserts Georgia, 40 stadia from the former, 80 from the latter. Seleaceia is clearly marked by extensive and important ruins. [Seleuceia.] From Seleuceia to the Orontes, 40 stadia. Between the Orontes and Poseidion the Stadiasmus enumerates Nymphaeum, 15 stadia; Long Island (Maкрd $\nu \bar{\eta} \sigma o s)$, one of the Pigeon Rocks, 50 stadia ; Chaladrus, or Chaladropolis (obviously the Charadrus of Ptolemy), 10 stadia; Sidonia, 60 stadia, above which was a lofty mountain called the Throne ( $\Theta \rho b \nu o s$ ), distant 80 stadia from Poseidium. Heracleia (Ras-el-Basit), situated on a cape called Polia, was 100 stadia from Poseidium, and Laodiceia 120 stadia direct distance from Heracleia; between which the Stadiasmus inserts Pasieria and Albus Portus, the former 120 stadia from Polia, the latter 30 stadia from Laodiceia, with a like interval between the two. From Laodiceia the Stadiasmus reckons 200 stadia to Balaneae (Banias), in direct distance, subdivided as follows: from Laodiceia to a navigable river, probably Nahr-el-Kebir, 70 stadia; from that to Gabala (Jebili), 80; to Paltus (Boldo), 30; to Cape Balaneae, 70 stadia.
ii. By the Euphrates (§ 11). 1. Cholmadara. 2. Samosata.
iii. Pieria. (§ 12.) 1. Pinara. 2. Pagrae. 3. The Syrian Gates. This was the N.-western part of the country, where Bagras still marks about the centre of the district. [Pagrae.]
iv. Cyrrhestice (§ 13). 1. Ariseria. 2. Rhegias. 3. Buba. 4. Heracleia. 5. Niara. 6. Hierapolis. 7. Cyrrhus. 8. Berrhoea. 9. Baena. 10. Paphara. This district lay to the east of Pieria, and corresponded with the fertile plain watered by the three streams that flow into the lake of Antioch, the Labotas, the Arceuthus, and the Oenoparas of Strabo; on the last and easternmost of which, now called the Afrin, the modern village of Corus still represents the ancient Cyrrhus, the capital of the district to which it gave its name. This part of Syria is so little known that it is impossible to identify its other ancient towns, the names of which, however, might doubtless be recovered in existing villages or sites. The village of Corus, which has ruins in its vicinits, is situated on the slopes of the Taurus, about 40 miles N. by W. of Aleppo and 15 miles NW. of Kilis, the seat of the Turcoman government, whose limits nearly correspond with those of the ancient Cyrrhestice. (Chesney, Euphrates Expedition, vol. i. p. 422, and map i.)
v. By the Euphrates (§ 14). 1. Urima. 2. Arnstis. 3. Zeugma. 4. Europus. 5. Caecilia. 6. Bethamania. 7. Gerrhe. 8. Arimara. 9. Eragiza or Errhasiga. These towns of the Euphrates were situated lower down the stream than those mentioned above (iii.), apparently between Samosat and the river Sajur, a tributary of the Euphrates, which, rising near 'Ain Tab, enters that river a little below some ancient ruins, supposed to represent the Caecilia of Ptolemy (No. 5). The names of several of these towns are still preserved in the native villages situated between the Sajur and the Euphrates; and it is clear that the geographer did
not intend to say that all these towns were on the river. The castle of Oroum, not far above BirehJik and Port William, is Urima (No. 1 in the list), to the west of which, not far from 'A in Tab, is the small village of Arull, Arulis (No. 2). (Chesney, p. 419.)
vi. Skleucis (§ 15). 1. Gephyra. 2. Gindarus. 3. Imma The Seleucis of Ptolemy comprehended a small part only of that district described under the same name by Strabo, probably that tract of coast to the north of the Orontes, it which Seleuceia Pieria was situated. [Seleucis; Seleuceia Pieria.]
vii. Cassiotis (§ 16). 1. Antioch on the Orontes. 2. Daphne. 3. Bactäialle. 4. Audeia (al. Lydia). 5. Seleuceia ad Belum. 6. Larissa. 7. Epiphaneia. 8. Rhaphanese. 9. Antaradus. 10. Marathus. 11. Mariame. 12. Mamuga. This district comprehended the coast from the mouth of the Orontes to Aradus, so including part of Phoenice, while to the east it extended as far as the Orontes; thus corresponding nearly with the pashalic of Tripoli in the modern division of the country. This also was part of Strabo's Seleucis, in which he places Antioch. Of the towns recited, 7, 6, 5, 1, 2 were situated at or near the Orontes; 8, 9 , and 10 on the coast (see under the names): 3,4,11, and i2 have not been identified.
viii. Chalybonitis (§ 17). 1. Thema. 2. Acoraca (al. Acoraba). 3. Derrhima. 4. Chalsbon. 5. Spelunca ; and, by the Euphrates, 6, Barbarissus. 7. Athis. Chalybonitis received its name from No. 4 in the list of cities, afterwards called Beroea by Seleucus Nicator, and so designated by Strabo, situated about half-way been Antioch and Hierapolis. [Beroka, Na. 3.] This fixes the district to the east of Cassiotis, in the pashalic of Aleppo, whose renowned capital called in Arabic Chaleb, is the modern representative of Chalybon, which had resumed its ancient name as early as the time of Ptulemy, unless it had rather retained it throughout among the natives. The district extended from the Orontes to the Euphratea. The sites have not been identified.
is. Chalcidice (§ 18). 1. Chalcis. 2. Asapheidama. 3. Tolmidessa. 4. Maronias. 5. Coara. This district lay south of Aleppo, and therefore of Chalybonitis, according to Pococke (Observations on Syria, p. 149), which is confirmed by the existence of Kemnasserin, which he takes to be identical in situation with Chalcis, and which, among Arab writers, gives its name to this part of Syria, and to the gate of Aleppo, which leads in this direction. [Chalcis, No. 1.]
x. Apamene (§ 19). 1. Nazaba (al. Nazama). And on the east of the Orontes, 2. Thelmenissus (al. Thelbenissus). 3. Apameia. 4. Emissa. This is comprehended in Strabo's Seleucis, and is easily identified with the district of Homs. [See Emesa, \&c.] xi. Ladodicene (\$ 20). 1. Scabiosa Laodiceia, 2. Paradisus. 3. Jabruda. To the south of the furmer, higher up the Orontes, also comprehended in the Seleucis of Strabo. No. 1 is identical with Strabo and Pliny's Laodiceia ad Libanum, placed by Mr. Porter and Dr. Robinson at Tell Neby Mindian on the left bank of the Orontes, near Lake Homs, Paradisus (2), still marked by a pyramid, on which a e represented hunting scenes. (ixee atwove, p. 495, s.v. Orontis.) Dr. Robinson so nearly agrees with this identification as to place Paradisus at Juscieh-el-Kudim, which is only a fer miles distant from

## SYRIA.

the pyramid of Hurmul to the east. (Robinson, Bib. Res. 1852, p. 556 ; Porter, Fine Years in Damascus, vol. ii. p. 339.) Jabruda (3) is distinctly marked by Yabrid on the east of Antilibsnus, a town mentioned by writers of sacred geography as an episcopal city in the fourth century, a distinction which it still retains.
sii. Phonnice, inland cities (§ 21). 1. Arca. 2. Palaeobiblus. 3. Gabala 4. Caesareia Panias. These have been noticed under the articles Рновnice, \&c.
xiii. Cofleryria, cities of the Decapolis (§§ 22. 23). 1. Heliopolis. 2. Abila, named of Lysanias, 3. Sasna. 4. Ina. 5. Damascus. 6. Sumulis. 7. Abida. 8. Hippus. 9. Capitulias. 10. Gadara. 11. Adra 12. Scythopolis. 13. Gerasa. 14. Pella. 15. Liom. 16. Gadôra 17. Philadelpheio 18. Camatha. The statement of the geographer that these are the cities of the Decapolis, preceding, as it does, the enumeration of eighteen cities, can ouly be taken to mean that the ten cities of the Decapolis were comprehended in the list, and that the remainder might be regarded as situated in that region. It is remarkable, too, that the name Coelesyria is here used in a more restricted and proper sense than at the heading of the chapter under consideration, where it is equivalent to Syria in its widest acceptation. According to Pliny the nine cities marked by italics in the above list, with the addition of Raphana, - apparently the Raphaneae of Ptolemy in Cassiotis,-properly constituted the cities of the Decapolis, according to must authorities. These and the remaining cities require a very large district to be assigned to this division of the country, comprehending the whole length of the Budxiia, i. e. Coelesyria Proper, from Heliopolis (1) (Baalbek) to Philadelpheia (17) (Ammon), and in width from Damascus almost to the Mediterranean. Abila of Lysamias (2), has only lately been identified, and attracted the notice which it deserves, as the capital of the tetrarchy of Abilene, mentioned by St. Luke, in connection perhaps with this same Lysanias, whose name is attached to it by the geographer. (St. Luke, iii. 1.) It is situated in the heart of Antilibanus, on the north side of the river Baradan, where the nunerous remains of antiquity and some inscriptions leave no doubt of the identity of the site. (De Saulcy, Voyage autour de la Mer Morte, vol. ii. pp. 593-604; Porter, Damascus, vol. i. pp. 15, 102, $261-273$; Robinson, Bib. Res. 1852, pp. 479-484.)
xiv. Palmyrene (§ 24). 1. Rhesapha. 2. Cholle. 3. Oriza. 4. Putea. 5. Adada 6. Palmyra 7. Adacha 8. Danaban 9. Guria 10. Aueria (al. Aueira). 11. Casama. 12. Odmana 13. Atera; and, near the Euphrates, 14. Alalis. 15. Sura 16. Alamatha. This district obviously lay to the east of the last-named, and south of Chalybonitis It comprehended the vast desert region in which Palmyra is situated, but which is almost a blank on the map, so as to defy all attempts to identify the sites.
xv. Batanaka ( $\$ 26$ ). 1. Gerra. 2. Elere. 3. Nelaxa. 4. Adrama. This district will best be considered in connection with Trachonitis. [G.W.]
IV. History.-The earliest accounts which wo possess of Syria represent it as consisting of a number of independent kingdoms. Thus we hear of the kings of Maacha in the time of David ( $2 \mathrm{Sam} . \mathbf{x} .6$ ), of the kings of the neighbouring town of Gesher in the time of Solomon (lb. iii. 3, xiii. 3i), \&c. But of all the Aramaean monarchies the must
powerful in the time of Saul and David was Zobah, as appears from the number of men which that penple brought into the field against David (Ib. viii. 4), and from the rich booty of which they were spoiled by the Israelites (Ib. v. 7). Even after sustuining a signal defeat, ther were able in a little time to take the field again with a considerable force ( $I b$. x. 6). David nevertheless subdued all Syria, which, however, recovered its independence after the death of Solmmon, b.c. 975 . From this period Damascus, the history of which has been already given [DAmasces. Vol. I. p. 748], became the most considerable of the Syrian kingdoms. Syria was conquered by Tislath-Pileser, king of Assyria, about the year 747 e.c., and was annexed to that kingdom. Hence it successively formed part of the Babylonian and Persian empires ; but its history presents nothing remarkable down to the time of its conquest by Alexander the Great. After the death of that conqueror in b.c. 323, Syria and Mesopotamia fell to the share of his general Seleucus Nicator. The sovereignty of Seleucus, however, was disputed by Antigonus, and was not established till after the battle of Ipsus, in 301 в. c., when he founded Antioch on the Orontes, as the new capital of his kingdom. [Antiocheia, Vol. I. p. 142.] From this period the descendants of Scleucus, known by the appellation of Seleucidae, occupied the throne of Syria down to the year 65 в.c., when Antiochus XIII. Asiaticus was dethroned by Pompey, and Syria becanne a Koman province. (Plut. Pomp. 39 ; Appian, Syr. 46 ; Eutrop. vi. 14.) Into the history of Syria under the Seleucidae it is unnecessary to enter, since a table of that dynasty is given in the Dictionary of Biography [Vol. III. p. 769], and the public events will be found described in the lives of the respective monarchs.
The tract of which Pompey took possession under the name of Syria comprised the whole country from the gulf of Issus and the Euphrates to Egypt and the deserts of Arabia. (Appian, Syr. 50, Mith. 106.) The province, however, did not at first comprehend the whole of this tract, but consisted merely of a strip of land along the sea-coast, which, from the gulf of Issus to Damascus, was of slender breadth, but which to the $S$. of that city spread ituelf out as far as the town of Canatha. The rest was parcelled out in such a manner that part consisted of the teritories of a great number of free cities, and part was assigned to various petty princes, whase absolute dependence upon Rome led to their dominions being gradually incorporated into the province. (Appian, Syr. 50.) The extent of the prorince was thus continually increased during the first century of the Empire; and in the time of Hadrian it had become so large, that a partition of it was deemed advisable. Commagene, the most northern of the ten districts into which, according to Ptolemy ( v . 15), the upper or northern Syria was divided, had become an independent kingdom before the time of Pompey's conquest, and therefore did not form part of the province established by him. [Commagene, Vol. I. p. 651.] The extent of this province may be determined by the free cities into which it was divided by Pompey; the names of which are known partly from their being mentioned by Josephus (Ant. xiv. 4. § 4), and partly from the era which they used, namely that of B.c. 63, the year in which they received their freedom. In this way we are enabled to enumerate the following cities in the original prorince of Syria: Antiocheia, Se-
lenceia in Pieria, Epiphaneia, between Arethusa and Emesa, Apameia; nearly all the towns of the Decapolis, as Abila (near Giadara), Antiocheia ad Hippum or Hippos, Canatha, Dium, Gadara. Pella, and Philadelpheia; in Phoenicia, Tripolis, Sidon, Tyrus, Dora : in the north of Palestine, Scythopolis and Samaria ; on the coast, Turris Stratonis (Caesareia), Joppe, Iamneia, Azotus, Gaza ; and in the south, Marissa. The gift of freedom to so many cities is not to be attributed to the generosity of the Romans, but must be regarded as a necessary measure of policy. All these towns had their own jurisdiction, and administered their own revenues; but they were tributary to the Romans, and their taxes were levied according to the Roman system established on the organisation of the province. ("Syria tum primum facta est stipendiaria," Vell. Pat. ii. 37.) The first governors of Syria, and especially Gabinins, who was proconsul in the year 57 b. c., touk much pains in restoring the cities which had been destroyed. (Joseph. Ant. xiv. 5, § 3.) The divisions established in Judaea by Gabinins have been noticed in another article. [Palaestina, Vol. II. p. 532.] Caesar, during his expedition against Pharnacex, B.c. 47, confirmed these cities in their rights, and likewise extended them to others, as Grbala, Lao diceia ad Mare, and Ptolemais. (Eckhel, vol. iii. p. 314, sq. ; Norisius, Ep. Syrom. pp. 175-213, 450.) Of the regulations adopted in Syria during the reign of Augustus we have little information.

The same political reasons which dictated the establishment of these free cities, where it was possible to do so, rendered the continuance of dynastic governments necessary in the eastern and southern districts of the province, where either the nomadic charscter of the population, or its obstinate adherence to ancient institutions was adverse to the introduction of new and regular forms of government. These dynasties, however, like the free cities, were used as the responsible organs of the Roman administration, and were tributaries of Rome. Thus, in the histories of Commagene and Judaea, we find instances in which their sovereigns were cited to appear at Rome, were tried, condemned, and punished. The Roman idea of a province is essentially a financial one. A province was considered as a "praedium populi Romani" (Cic. Verr. ii. 3); and bence the dynasties of Syria may be considered as belonging to the province just as much as the free towns, since, like them, they were merely instruments for the collection of revenue. (Cf. Huschke, Ueber den zur Zeit der Geburt Jesu Christi gehaltenen Census, pp. 100-112.) Thus we find these petty sovereigns in other parts of the world regarding themselves merely as the agents, or procuratores, of the Roman people (Sall. Jug. 14; Muffei, Mus. Ver. p. 234); nor were they allowed to subsist longer than was necessary to prepare their subjects for incorporation with the province of which they were merely adjuncts.

The Syrian dynasties were as follows: 1. Chalcis ad Belum. 2. The dynasty of Arethusa and Emesa. 3. Abila. 4. Damascus. 5. Judaea. 6. Palmyra. These states have been treated of under their respective names, and we shall here only add a few particulars that may serve further to illustrate the history of some of them daring the time that they were under the Roman sway. All that is essential to be known respecting the first three dynasties has already been recorded. With regard to Damascus, it may be added that M. Aemilius Scanrus, the first
governor of Syria appointed by Pompey, after having punished its ruler, the Arabian priuce Aretas, for the attacks which he had made upon the province before it had been reduced to order, concluded a treaty with him in B. c. 62. It is to this event that the coins of Scaurus refer, bearing the inscription rex aretas. (Eckhel, vol. v. p. 131; cf. Dion Cass. xxxvii. 15; Appian. Syr. 51 ; Joseph. Ant. xiv 4. § 5,5. § 1.) Damascus was dependent on the Romans, and sometimes had a Roman garrison (Hieron. in Isai. c. 17; Joweph. Ant. xiv. 11. §7), though it cannot be doubted that the Arabian kings were in possession of it, on the condition of paying a tribute. It has already been remarked that the city was in the possession of an ethnarch of Aretas in A.D. 39: and it was not till the year 105, when Arabia Petraea became a province, that Damascus was united with Syria, in the proconsulship of Cornelius Palma. (Eckhel, vol. iii. p. 330.)

On the other hand, Juduea appears to have been annexed to the province of Syris immediately after its conquest by Pompey in B. c. 63 (Dion Cass. xxxvii. 15, 16; Eutrop. vi. 14 ; Liv. Ep. 102; Strab. xvi. p. 762, sq.; Joseph. B. J. i. 7. § 7 ; Amın. Marc. xiv. 8. § 12); though it retained its own administration, with regard especially to the taxes which it paid to the Romans. (Joseph. Ant. xiv. 4. § 4, B. J. i. 7. § 6.) The race of the Jewish kings ended with Aristobulus, whom Pompey, after the capture of Jerusalem, carried to Rome to adorn his triumph (Appian, Syr. 50; Dion Cass. xxxvii. 16 ; Plut. Pomp. 45; Joseph. Ant. xiv. 4, \&cc.) Hyrcanus, the brother of Aristobulus, was left indeed in Judaea as chief priest and ethnarch, in which offices he was confirmed by Caesar; but his dignity was only that of a priest and judge. (Dion Cass. L. c.; and Joseph. l. c. and xiv. 7. § 2, 10. § 2.) The land, like the province of Syria, was divided for the convenience of administration into districts or circles of an aristocratic constitution (Joseph. B.J. i. 8. § 5); and during the constant state of war in which it was kept either by internal disorders, or by the incursions of the Arabians and Parthians, the presence of Koman troops, and of the governor of the province himself, was almost always necessary.

It has been already related [Jerusalem, Vol. I. p. 26] that Antigonus, the son of Aristobulus, obtyined possession of the throne with the assistance of the Parthians in b. c. 40. In the following year the Parthians were expelled from Syria by Ventidius (Dion Cass. xlviii. 39-41; Liv. Epil. 127); and in в. c. 38 Judaea was conquered by Sosius, Antony's legatus, Antigonus was captured and executed, and Herod, surnamed the Great, was placed upon the throne, which had been promised to him two years previously. (Dion Cass. xlix. 1922; Piut. Anton. 34, sqq.; Tac. Hist. v. 9; Appian, B. C. v. 75; Strab. xvi. p. 765.) From this time, Judaea again became a kingdom. With regard to the relation of Herod to the Romans we may remark, that a Roman legion was stationed at Jerusalem to uphold his sorereignty, that the oath of fealty was taken to the emperor, as lord paramount, as well as to the king, and that the absolute depeudence of the latter was recognised by the payment of a tribute and the providing of subsidiary troops. (Joseph. Ant. xv. 3. § 7, xvii. 2. § 4 ; Appian, B. C. v. 75.) Herixd, therefore, is to be rezarded only as a procurator of the emperne, with the tutle of king. Antony assigned part of the rerenues of Judaea to Cleoputra. (Joseph. Aut. xv.
4. §§ 2, 4.) According to an ordinance of Csesar, the places in the jurisliction of Jerusalem, with the exception of Joppa, had to pay a yearly tribate of a fourth of all agricultural produce, which was to be delivered the following year in Sidon, besides a tenth to be paid to Hyrcanus. (Ibid xir. 10. § 6.) In the seventh, or Sabbath year, however, the tribute was intermitted. Besides this tribute, there was a capitation tax ; and it was for the organising of this tax that the census mentioned in the Gospel of St. Luke (ii. 1, 2) was taken in the year of our Saviour's birth, which appears to have been conducted by Herod's officers according to a Roman forma censualis. The division of Judsea among the sons of Herod, and its subsequeut history till it was incorporated in the province of Syria by the emperor Claudius, A. d. 44 (Tac. Ann. xii. 23, Hist. $v$. 9), have been already narrated [Vol. II. p. 532], as well as the fate of Jerusalem under the emperors Titus and Hadrian. [Vol. 1I. p. 26, seq.]

With regard to Palmyra, the sixth of the dynasties before enumerated, we need bere only add to what has been already said [Vol. II. p. 536] that it was united to the province of Syria by Hadrian, and bore
 B. p. 498, ed Meineke; cf. Gruter, p. 86. 8.) But whether it became a colony with the Jus Italicum on that occasion or at a later period, cannot be determined.

Respecting the administration of the province of Syria, it may be mentioned that the series of Roman governors commences with M. Scaurus, who was left there by Pompey in the year $62 \mathrm{~B} . \mathbf{c}$. with the title of quaestor pro praetore. Scaurus was succeeded by two pro-praetores, L. Marcius Philippus, 61-60, and Lentulus Marcellinus, 59-58; when, on account of the war with the Arabs, Gabinius was sent there as proconsul, with an army (Appian, Syr. jl; cf. Joseph. xiv. 4, seq., B. Jud. i. 6-8; Eckhel, vol. v. p. 131). We then find the following names: Crassus, 55-53; Cassins, his quaestor, 53-51 ; M. Calpurnius Bibulus, proconsul. (Drumann, Gesch. Roms, vol. ii. pp. 101, 118-120). After the battle of Pharsalus, Csesar gave Syria to Sex. Julius Caesar, B. c. 47, who was pat to death in the following year by Caecilius Bassus, an adherent of Pompey. (lb. p. 125, iii. p. 768.) Bassus retained possession of the province till the end of 44, 'when Cassius seized it, and assumed the title of proconsul. (Cic. ad Fam xii. 11.) After the battle of Philippi, Antony appointed to it his lientenant, L. Decidius Suxa, B. c. 41, whose overthrow by the Parthians in the following year occasioned the loss of the whole province. (Dion Cass, xiviii. 24; Liv. Epit. 127.) The Parthians, however, were driven out by Ventidius, another of Antong's lieutenants, in the autumn of 39. (Dion Cass. ib. 39-43; Liv. ib.; Plut. Ant. 33.) Syrin continued to be governed by Antony's officers till his defeat at Actium in 31, namely, C. Sosius, B. c. 38 (by whom, as we have said, the throne of Judaea was given to Herod), L. Munatius Plancus, b. c. 35, and L. Bibulus, b. c. 31. In b. c. 30, Octavian intrusted Syria to his legate, Q. Didius. After the division of the provinces between the emperor and senate in B.c. 27, Syria continned to have as governors legati Augusti pro praetore, who were alrays consulares. (Suct. Tib. 41 ; Appian, Syr. 51.) The most accurate account of the governors of Syria, from R. c. 47 to A. d. 69, will be found in Norisins, Cemotaphia Pisana. ( $\mathrm{O}_{\mathrm{pp}}$ rol. iii. pp. 424-531.) Their
residence was Antioch, which, as the metropolis of the province, reached its highest pitch of prosperity. It was principally this circumstance that induced the emperor Hadrian to divide Syria into three parts (Spart. Hadr. 14), namely: I. Syria, which by way of distinction from the other two prorinces was calied Syria Cuele, Magna Syria, Syria Major, and sometimes simply Syria. (Gruter, Inscr. 346. 1, 1091. 5; Orelli, Inscr. no. 3186, 4997; Galen, de Antidot. i. 2.) Antioch remained the capital till the time of Septimius Severus, who deprived it of that privilege on account of its having sided with Pescennius Niger, and substituted Laodiceia, which he made a colony in its stead (Capitol. M. Anton. 2.); Arid Cass. 9; Ulp. Dig. 50. tit.15. s. 1. §3); and although Caracalla procured that its rights should be restored to Antioch, yet Laodiceia retained its title of metropolis, together with a small territory comprising fuur dependent cities, whilst Antioch, which had also been made a coluny by Caracalla, was likewise called Metroculunia (Corp. Inscr. Gr. no.4472; Paul. Dig. 50. tit 15. s.8.§ 5; Eckhel, iii. p. 302, sq.,319, sq.) II. Syria Phoenice, or Syrophoenice, under a legutus Augusti pro praetore (Murat. 2009. 1, 2; Marini, Aui, fcc. p. 744), consisted of three parts, with three metropolitan cities, namely: 1. Tyre, which first obtained the title of metropolis, with relation to the Roman province, under Hadrian (Suidas, ii. p. 147, Bernh.), though it had that appeliation previously with relation to its own colonies (Strab. xvi. p. 756 ; Eckhel, vol. iii. p. 386). 2. Damascus, which from the time of Hadrian became a metrupolis, with a small territory comprising five towns. (Just. Mart. Dial. c. Tryphone, c. 78; Tertull. adv. Marcian,iii. 13; Eckhel, vol. iii. pp. 331333.) 3. Palmyra, which appears to have been the residence of a procurator Caesaris; whence we may infer that it was the centre of a fiscal circle (Notit. Jign. i. p. 85; Ulpian, Lig. 50. tit. 15. s. 1. § 5 ; Prucop. de Aed. ii. 11 ; Corp. Inscr. Gr. no. 4485. 4496-4499.) A fourth metropolis, Emesa, was added under Heliogabalus (Eckhel, iii. p. 311 ; Ulpian, Dig. 50. tit. 15.s.1.§4). Trachonitis also formed a separate circle at this time, with the village of Phaina as its $\mu \in \tau$ рокшнia (Corp.Inscr. Gr. 4551 ; Orell. Inscr. vol. ii. p. 437, no. 5040). III. Syria Palaestina, from the time of Hadrian adininistered by a legatus Augusti pro praet. The name of Syria Palacstina dies not appear on coins till the time of the Antonines (Eckhel, iii. p.435; cf.Aristid. ii. p. 470, Dind.; Galen. de Simpl. Medic. iv. 19; Just. Mart. Apol. i. 1 ; Corp. Inscr. Gr. no. 4029, $4151, \& \mathrm{c}$.). Its metropolis was Caesareia, anciently Turris Stratonis (Eckhel, iii. p. 432).

This division of the province of Syria was connected with an alteration in the quarters of the three legions usually stutioned in Syria. In the time of Dion Cassius (IV. 23) the Legio VI. Scythica was cantoned in Syria, the Legio III. Gallica in Phoeuicia, and the Legio VI. Ferrata in Syria Palaestina. The systern of colonisation which was begun by Augustus, and continued into the third century of our era, was also adapted to insure the security of the province. The first of these colonies was $\mathrm{Be}-$ rytus, where Augustus settled the veterans of the Legio V. Macedonica and VIII. Augusta. It was a Colonia juris Italici. (Eckhel, iii. p. 356 ; Orelli, Inscr. no. 514 ; Ulpian, Dig. 50. tit. 15.s.1.§ 1 ; Euseb. Chron. p. 155, Scal.) Augustus also founded Heliopolis (Baalbek), which received the jus Italicum under Septiınius Severus (Ulpian, l. c.; Eckhel, iii.
p. 334). Under Claudius w:s founded Ptolemais (Ace), which did not possess the jus Italicum (Ulpian, ib. § 3 ; Plin. v. 1 ; Eckhel, iii. p. 424). Vespasian planted two colonies, Caesareia (Turris Stratouis) and Nicopolis (Emmaus) Paul. Dig. 50. tit. 15. 8. 8. § 7 ; tickhel, iii. p. 430); which latter, however, though originally a military colony, appears to have possessed neither the right, nor the name of a colonia (Eckhel, iii. p. 454; Joseph. Bell. Jud. vii. 6; Sozomen, Hist. Eccles. v. 21.) The chief colony founded by Hadrian was Aelia Capitolina (Jerusalem), whose colonists, however, were Greeks, and therefore it did not possess the jus Italicum. (Dion Cass. Ixix. 12; Euseb. Hist Eccles.iv. 6 Malalas, xi. p. 279, ed. Bonn ; Ulpian, L.c. § 6.) Hudrian also probably founded Palmyra. Under Septimius Severus we have Laodiceia, Tyrus, and Sebaste (Samaria), of which the first two possessed the jus Italicum. (Ulpian, ib. § 3. and 7; Eckhel, iii. p. 319, 387 , seq., 440 , seq.) Caracalla founded Antioch and Emesa (Ulpian, ib. §4; Paul. ib. §5; Eckhel, iii. 302, 311), Elagabalus Sidon (Eckhel, iii. p. 371), and Philippus, apparently, Damancus (ib. p. 331). To these must be added two colonies whose foundation is unknown, Capitolias, of whowe former name we are ignorant (Paul. Dig. 50. tit. 15. s. 8 . § 7 ; Eckhel, iii. p. 328, seq.), and Caesareia ad Libanum (Arca). (Eckhel, ib. p. 361.)

At the end of the fourth century of our era, Syria was divided into still smaller portions, namely: 1. Syria prima, governed by a consularis, with the metropolis of Antioch and the following cities : Seleuceia, Laodiceia, Gabala, Paltos, Beroea, Chalcis. 2. Syria Secunda, under a praeses, with Apameia for its chief city, and the dependent towns of Epiphaneia, Arethusa, Larissa, Mariamne, Balaneia, Raphaneae, and Seleuceia ad Belun. Malalas (xiv. p. 265, ed. Bonn.) ascribes its separation froin Syria Prima to the reign of Theodosius II., which, howerer, may be doubted. Böcking attributes the division to Theodosius the Great (ad Not. Dignit. i. p. 129) 3. Phoenicia Prima, under a consularis, with the metropolis of Tyrus and the cities Ptolemais, Sidon, Berytus, Byblos, Botryo, Tripolis, Arcae, Orthosias, Aradus, Antaradus, Caesarea l'aneas. 4. Phoenicia Secuuda, or Phoenicia ad Libanum, under a praeses, having Damascus for its capital, and embracing the cities of Emesa, Laodiceia ad Libanum, Heliopolis, Abila, Palmyra. It was first separated by Theodosius the Great. 5. Palaestina Prima, administered by a consularis, and in the years 383-385 by a proconsul. Its chief city was Caesareia, and it coinprehended the towns of Dora, Antipatris, Diospolis, Azotus ad Mare, Azotus Mediterranea, Eleutheropolis, Aelia Capitolina (Jerusalem). Neapolis, Livias, Sebaste, Anthedon, Diocletianopolis, Joppa, Gaza, Raphia, Ascalon, \&ec. 6. Palaestins Secunda, under a praeses, with the capital of Scythopolis, and the towns of Gadara, Abila, Capitolias, Hippos, Tiberias, Dio Caesareia, and Gabse. 7. Palaestina Tertia. This was formed out of the former province of Arabia. (Procop. de Aed v. 8.) It was governed by a praeses, and its chief city was Petra (Cf. Palafstina, Vol. II. p. 533.)

With respect to these later subdivisions of Syria, the reader may consult Hierocles, p. 397, ed. Bonn, with the notes of Wesseling, p. 518, sqq.; the Notitia Dignit. i. p. 5, seq., and the commentary of Böcking, pp. 128-140, 511; Bingham, Orig. Eccl. vol. iii. p. 434, seq.; Norisius, de Epoch. Syromaced. in Opp. vol. ii. p. 374, sqq., p. 419, seq.
$3 z 4$

In the year 632，Syria was invaded by the Sara－ cens，nominally under the command of Abu Obeidah， one of the＂companions＂of Mahomet，but really led by Chaled，＂the sword of God．＂The easy conquest of Bosra inspirited the Doslems to attack Dannascus：but here the resistance was more deter－ mined，and，though invested in 633，the city was not captured till the following year．Heraclius had been able to collect a large force，which，however， under the command of his general Werdan，was completely defeated at the battle of Aisnadin；and Damascus，after that decisive engagement，though it still held out for seventy days，was compelled to yield．Heliopolis and Emesa speedily shared the fate of Bosra and Damascus．The last efforts of Heraclius in defence of Syria，though of extraor－ dinary magnitude，were frustrated by the battle of the Yermuk．Jerusalem，Aleppo，and Damascus successively yielded to the Saracen arms，and He－ raclius abandoned a province which be could no longer hope to retain．Thus in six campaigns （633－639）Syria was entirely wrested from the Roman ennpire．（Gibbon，Decline and Fall，ch． 51 ；Marquardt，Röm．Alterth．vol．iii．）［T．H．D．］

SYRIAE PORTAE（Euplaı זúnai），a pass be－ tween Mount Amanns and the coast of the bay of Issus，which formed a passage from Cilicia into Syria．It was 3 stadia in length，and only broad enongh to allow an army to pass in columns． （Xenoph．Anab．i．4．§ 4；Arrian，Anab．ii．8； Plin．v．18；Ptol．v．15．§ 12；Strab．xiv．p．676．） This mountain pass had formerly been closed up at both ends by walls leading from the rocks into the sea；but in the time of Alexander they seem to have existed no longer，as they are not mentioned by any of his historians．Through the midst of this pass，which is now called the pass of Beilan， there flowed a small stream，which is still known under the name of Merkez－su，its ancient name being Cersus．
［L．S．］
SYRIAS（Eupıás），a beadland in the Euxine， on the coast of Paphlagonia，which，to distinguish it from the larger promontory of Carambis in its vi－ cinity，was also called bxpa $^{\text {nextht．（Marcian，p．72；}}$ Arrian，Peripl．P．E．p．15；Anonym．Peripl．P．E． p．7．）Its modern name is Cape Indje．［L．S．］ SYRIE＇NI．［Syrastrene．］
SYRNOLA（Itin．Hier．p．568），a town in the north－western part of Thrace，between Philippopolis and Parembole．
［J．R．］
SYRO－PHOENICE．［SYRIA，p．1079．］
SYROS or SYRUS（Eûpos，also ミupin，Hom．Od． xv．403．and Eiopa，Diog．Laert．i．115；Hesych．； Suid．：Eth．Eúpos：Syra（ Eúpa），and the present inhabitants call themselves 之upiôtar or Euptayoi， not Xíptor），an island in the Aegaean sea，one of the Cyclades，lying between Rheneid and Cythnus， and 20 miles in circumference，according to some ancient authorities．（Plin．iv．12．s．22．）Syros prontuces good wine，but is upon the whole not fer－ tile，and does not deserve the praises bestowed upon it by Homer（l．c．），who describes it as rich in pas－ tures，cattle，wine，and wheat．It is usually stated upon the authority of Pliny（xxxiii．12．s．56）that Syros produced Sil or yellow ochre；but in Sillig＇s edition of Pling，Scyros is substituted for Syros．

Syros had two cities even in the time of Homer （Od．xv．412），one on the eastern，and the other on the western side of the island．The one on the eastern side，which wis called Syrns（Ptol．iii． 15. § 30），stood on the same site as the modern capital
of the island，which is now one of the most flourishing cities in Greece，containing 11,000 inhabitants，and the centre of a flourishing trade．In consequence of the numerous new buildings almost all traces of the ancient city have disappeared；but there were con－ siderable remains of it when Tournefort visited the island．At that time the ancient city was aban－ doned，and the inhabitants had built a town upon a lofty and steep hill about a mile from the shore： this town is now called Old Syra，to distingaish it from the modern town，which has arisen upon the site of the ancient city．The inhabitants of Old Syra，who are about 6000 in number，are chiefly Catholics，and，being under the protection of France and the Pope，they took no part in the Greek revo－ lution during its earlier years．Their neutrality was the chief cause of the modern prosperity of the island，since numerous merchants settled there in consequence of the disturbed condition of the other parts of Greece．

There are ruins of the second ancient city on the western coast，at the harbour of Maria della Grazia． Ross conjectures that its name may have been Gryn－ che or Gryncheia，since we find the $\Gamma \rho u \gamma \chi_{\hat{\eta}} \mathrm{s}$ ，who are otherwise unknown，mentioned three times in the inscriptions containing lists of the tributary allies of Athens．There was another ancient town in the island，named Eschatia．（Böckh，Inscr． no．2347，e．）Pherecydes，one of the early Greek philosophers，was a native of Syros．（Comp．Strah． x．pp．485， 487 ；Scylax，p．22；Steph．B．8．©．； Tournefort，Vonjage，vol．i．p．245，seq．Engl．tr．； Prokesch，Erinnerungen，vol．i．p．55，seq．；Ross， Reisen auf den Griech．Inselm，vol．i．p．5，seq．， vol．ii．p．24，seq．；Fiedler，Reise，vol．ii．p．164，seq．）

SY＇RTICA REGIO（ $\boldsymbol{\eta}$ Euptinct，Ptol．iv．3），a tract on the coast of N．Africa，between the Syrtis Major and Minor，about 100 miles in length．（Sirah． xvii．p．834，sq．；Mela，i．7；Plin．v．4．s．4．）After the third century it obtained the name of the Regio Tripolitana，from the three principal cities，which were allied together，whence the modern name of Tripoli（Not．Imp．Occid．c．45；Procop．de Aed． vi．3；cf．Solinus，c．27）．Mannert conjectures（x． pt．ii．p．133）that the emperor Septimius Severus， who was a native of Leptis，was the founder of this Provincia Tripolitana，which，according to the Not． Imp．（l．c．），was governed by its own duke （Dux）（Comp．Amm．Marc．xxviii．6）．The dis－ trict was attributed by Ptoleny，Mela，and Pliny to Africa Propria；but in reality it formed a separate district，which at first belonged to the Cyrenaeans， but was subsequently wrested from them and annexed to Carthage，and，when the whole kingdom of the latter was subjected to the Romans，formed a part of the Roman province of Africa．For the most part the soil was sandy and little capable of cultiva－ tion，as it still remains to the present day（Della Cella，Viuggio，p．50）；yet on the borders of the river Cinyps and in the neigbbourhood of the town of Leptis，there was some rich and productive land． （Herod．iv．198；Scylax，p．47；Strab．xvii．p．835； Ovid，ex Pont．ii．7．25．）Ptolemy mentions several mountains in the district，as Mount Giglins or Gigius （ $\tau \delta$ 「íriov $\delta \rho o s$, iv．3．§ 20），Mount Thizibi（ $\tau \boldsymbol{\delta}$ ©ífibı $\gamma$ pos，ib．）Mount Zuchabburi or Chuzaharri
 luetum or Vasaleton（rd Oíacá入autoy \＃Oíauá－ $\lambda \in \tau o v$ bpos，ib．§ 18）．The more important pro－ montories were Cephalae（Keфa入al axpor，Ptol．iv． 3. § 13），near which also，on the W，the same author
 Tpinpov axpor, ib.) and Zeitha ( (cd Zeita, ib. § 12). The principal rivers were the Cinyps or Cinyplius (Ptol. ib. § 20), in the eastern part of the district, and the Triton, which formed its western boundary, and by which the three lakes called Tritonitis, Pallas, and Libya were supplied (ib. § 19). Besides these waters there were extensive salt lakes and marshes along the coast (Strab. l.c.; Tab. Peut. tab. vii.) The lotus is mentioned among the scanty products of this unfertile land (Plin. xxiv. 1. s. 1), and a peculiar kind of precious stones, called after the country Syrtides geminae, was found on the coast (Id. $x \times x$ vii. 10. §67). The tribes that inhabited the country besides the Nasamones, Psyti, and Macae, who in the earlier times at least spread themselves over this district, were the Lotophagi [Vol. II. p. 205], who dwelt about Syrtis Minor, and the Gindanes [Vol. I. p. 1002], who were situated to the W. of the former. Ptolemy, however, in place of these more ancient tribes, mentions others that are heard of nowhere else, as the Nigitimi, Samanycii, Nycpii, Nygbeni, Elaeones, Damnesii, \&c. (iv. 3. §§ 23 27). But Egyptian and Phoenician colonists had been mixed at a very early period with these aboriginal Libyan tribes, whom the Greeks found there when they settled upon the coast, and with whom, probably, they had for some time previously bad connections. The most important towns of the Regio Syrtica were the three from which it subsequently derived its name of Tripolitana, that is, Leptis Blagna, Oea, and Sabrata; besides which we find Tacape and other places mentioned by Ptolemy. Opprsite to the coast lay the islands of Meninx and Cercina.
[T. H. D.]
SYRTIS MAJUR and MINOR (Eípots $\mu \in \gamma \dot{\alpha} \lambda \eta$ cal mekpd, Ptul. iv. 3), two broad and deep gulfs in the Libyan sea on the N. coast of Africa, and in the district called after them Regio Syrtica. The name is derived from the Arabic, Sert, a desert from the desolate and sundy shore by which the neighbourhood of the Syrtes is still characterised. The navigation of them was very dangerous because of their shallow and sunken rocks, so that the smaller Syrtis was considered in ancient times as altogether unnavigable, and even into the larger one only small ships ventured. (Strab. xvii. p. 835; Scylax, p. 48; Polyb. i. 39; Mela, i. 7; Plin. v. 4. s. 4; Procop. de Aed. vi. 3.) The reports of modern travellers, however, do not tend to establish these dangers. (Lauthier, Relnzione in Della Cella's Viaggio, p. 214, sqq.) The Greater Syrtis, which was the eastern one, now the Gulf of Sidra, extended from the promontory of Bureum on the E. side to that of Cephalae on the W. (Scyl. 46. sq.; Polyb. iii. 29; Strab. l. c. and ii. p. 123; Mela and Plin. ll. cc.) According to Strabo it was from 4000 to 5000 stadia in circumference (l. c.); but in another place (xvii. p. 835) he puts down the measure more accurately at 3930 stadia. Its depth, or landward recess, was from 1500 to 1800 stadia, and its diameter 1500 stadia. (Comp. Agathem. i. 3, and ii. 14). The smaller, or more western Syrtis (now Gulf of Cabes), was formed on the $E$. by the promontory of Zeitha and on the $W$. by that of Brachodes. (Scyl. p. 48; Polyb. i. 39, ii. 23, xii. 1 ; Strab. ii. p. 123, iii. p. 157, xvii. p. 8:34, \&c.) According to Strabo it had a circumference of 1600 stadia and a diameter of 600 (comp. Agathem. l.c.). Particulars respecting the size of hoth will likewise be found in Mela i. 7; and Ilin. Anf. p. 64: sqq. The shores of both were
inhospitable, and sandy to such a degree that men and even ships were often overwhelmed by the huge cloud-like masses lifted by the wind (Diod. xx. 41; Sall. Jug. 79; Herod. iii. 25, 26, iv. 173; Lucan, ix. 294, sqq.); and it is affirmed by modern travellers that these descriptions of the ancients are not exaggerated. (See Browne's Travels, p. 282; Bruce, Travels, iv. p. 458; Beechey, Expedition, foc. ch. 10; Ritter, Erdkunde, i. p. 1030.) [T. H.D.]

SYSPIKI'TIS (Evãipitis, Strab. xi. p. 503), a district in Armenia Major.
[T.H. D.]
SYTHAS. [ACHAIA, p. 13, b.]

## T.

TAANACH ( $\begin{aligned} & \text { ayde and Oavaáx), a town in }\end{aligned}$ Palestine, not far from Megiddo, with which it is generally mentioned, was originally one of the royal cities of the Canaanites. (Josh. xii. 21; Judges, v. 19; 1 Kinge, iv. 12.) It was assigned to Manasseh (Josh. xvii. 11), but was afterwards one of the cities given to the Levites. (Josh. xxi. 25.) "Taanach by the waters of Megiddo" was the scene of the great battle of Deborah and Barak. (Judges, v. 19.) In the time of the Judges the Canaanitish inhabitants still remained in Taanach (Juulges, i. 27), but in the reign of Solomon it appears as an Israelitish town. (1 Kings, iv. 12.) Eusebius dexcribes it as 3 Roman miles, and Jerume as 4 Roman miles from Legio, which is undoubtedly the Megiddo of Scripture. [Legio.] Taanach is still called Ta'annuk, a village standing on the slope of the hills which skirt the plain of Esdraelon towards the south. (Robinson, Bibl. Res. vol. ii. p. 316, vol. iii. p. 117, 2nd ed.; Stanley, Sinai and Palestine, p. 331.)

TABAE (TdBat: Eth. Tabnvds), a town which, according to Strabo (xii. p. 570), was situated on the contines bet ween Phrygia and Caria, and which, in another passage ( p .576 ), he evidently includes in Phrygia. The country was situated in a plain which derived from the town the name of Me $\delta$ loy Tabทyov. (Strab. xii. p. 576.) S:ephanas Byz. (s. v.) on the other hand calls Tabae a Lydian town, though he at the same time mentions another in Caria; but it is highly probable that not only both are one and the saine town, but also the same as the one assigned by Strabo to Phrygia, and that in point of fact the town was in Caria near the confines of Phrygia. Mythically the name of the place was derived from a hero Tabus, while others connected it with an Asiatic term $\tau$ d6a, which signified a rock. (Steph. B. l. c.) The latter etymology is not inconsistent with Strabo's account, for though the town is described as being in a plain, it, or at least a part of it, may have been built on a rock. The plain contained several other little tuwns besides Tabae. Livy (xxxviii. 13), in his account of the expedition of Manlius, states that he marched in three days from Gordiutichos to Tabae. It must then have been a considerable place, for, baving provoked the hostility of the Romans, it was ordered to pay 20 talents of silver and furnish 10,000 medimni of wheat. Livy remarks that it stood on the borders of Pisidia towards the shure of the Pamphylian sea. There can be no doubt that D'Anville is correct in identifying the modern Thaous or Davas, a place of some note north-east of Moglah, with the ancient Tabas. Col. Leake (Asia Minor, p. 153), relying too implicitly on Strabo, looks too far east for its site; for Hierocles
（p．689）distinctly enumerates it among the Carisn towns．Davas is a large and well－built town，and the capital of a considerable district；the governor＇s residence stands on a height overlooking the town， and commanding a most magnificent view．（Richter， Wallfuhrten，p．543；Franz，Fünf Inschriften，p． 30．）

It should be observed that Pliny（v．27）mentions another town in Cilicia of the name of Tabae，of which，however，nothing is known．［L．S．］

COIN OF TABAE．
TABALA（Td́6a入a），a town of Lydia near the river Hermus，is known only from coins found in the country；but it is no doubt the same as the one mentioned by Hierocles（ $p .670$ ）under the name of Gabala，which is perhaps ouly miswritten for Tabala． It is even possible that it may be the town of Tabae which Stephanus Ryz．assigns to Lydia．Some trace of the ancient piace seems to be preserved in the name of the village Tonbuili on the left bank of the Hermus，between Adala and Kula．［L．S．］

TABANA（Td́\＆ava，Ptol．iii．6．§6），a place in the interior of the Chersonesus Taurica．［T．H．D．］

TABASSI（Td6a $\sigma \sigma o t$ ，Ptol．rii．1．§ 65），a tribe of Indians who ncupied the interior of the southern part of Hindostin，in the neighbourhood of the present province of Mysore．Their exact position cannot be determined，but they were not far distant from M．Bettigo，the most S．of the W．Ghits． They derived their name from the Sanscrit Tapasja， ＂woods．＂（Lassen，Ind．Alterth．vol．i．p．243．）［V．］

TABERNAE，in Gallia，is placed by the Itinera－ ries between Noviomagus（Speier）and Saletio（Seltz）． The position of Tabernae is supposed to correspond to that of Rheinzabern．Tabernae is mentioned by Ammianus Marcellinus（xvi．2），anless in this pas－ sage he means another placo（No．2）which has the same name．

2．Between Argentoratum（Strassburg）and Divo－ durum（Metz）is Elsatz－Zabern，or Saverne as the French call it，which is about 21 miles from Strass－ burg．This seems to be the place which Ammianus （xvi．11）calls Tres Tabernae．When Julian was marching against the Alemanni，who were encamped near Argentoratum，he repaired Tres Tabernae，for the purpose of preventing the Germans from entering Gallia by this pass in the Vosges．Ammianus（xvi． 12）also gives the distance from Tres Tabernae to the German camp at Argentoratum at $14{ }^{\text {＂}}$ leugae，＂ which is 21 Roman miles，and agrees very well with the distance between Sacerne and Strassburg（D＇An－ ville，Notice，frc．）．

3．Tabernae is mentioned by Ansonius（Mosella， จ．8）on the road between Bingium（Bingen）and Noviomagus（Neumagen）；but the geographers are not agreed about the position，whether it is Bergza－ bern，a place which is out of the way，Baldenau，or Berncastel on the Mosel．Ausonius says there is a spring there：－
＂l＇raetereo arentem sitientibus undique terris
Dumnisoum riguasque perenni fonte Tabernas．＂

TABIE＇八：（Tabinvol，Ptol．vi．14．§ 11），a people in the N．part of Scythia，on this side of the Imaus．
［T．H．D．］
TABIE＇NI．（Tabinvol），an Aethiopian tribe， situated NW of the Regio Troglodytica，near the hexdland of Baziun（R＇as－el．Naschef），mentioned by Ptolemy alone（iv．27．§ 28）．［W．B．D．］

TABLAE，in Gallia，is marked in the Table be－ tween Lugdunum Batavomm（Leiden）and Novio－ magus（Aymegen）．D＇Anville and others suppose it to be Alblas，a little above the junction of the Leck and the AJans，and opposite to Dort．［G．L．］

TABOR，a celebrated mountain in Galilee，calle． by the Greek writers Atabyrium，under which name it is described．［Atabyrium．］
tabraca．［Thabraca．］
TABUDA，or TABULLAS in some editions of Ptolemy（ii．9．§ 3）．a river of North Gallia．The mouth of this river is placed by Ptulemy between Gesoriacum（Boulonge）and the mouth of the Masa （Maas）．In another passage（ii．9．§ 9），after fixiug the position of the Morini，whose towns were Geso－ riacum and Taruanna，he adds，＂Then after the Tabullas are the Tungri．＂All these indications seem to show that the Tabuda or Tabullas is the Schelde，which would be correctly placed between the Morini and the Tangri．Ortelins，cited by D＇Anville and others，is said to have produced evidence from writings of the middle ages，that the Schelde was named Tabul and Tabula．［G．L．］

TABURNUS MONS（Monte Taburno），was the name given in ancient times to one of the most inn－ portant mountain groups of the Apennines of Sam－ nium．It is situated nearly due W．of Beneventum， between the valley of the Calor（Calore）and thit of the smaller stream of the Isclero．Like the still mone elevated mass of the Monte Matese，which fronts it on the N．，it forms no part of the main chain of the Apennines（if that be reckoned，as usual，by the line of water－shed），but is considerably advanced to－ wards the W．，and its W．and NW．sh－pes consequently descend at once to the broad valley or plain of the Vulturnus，where that river receives its tributary the Calor．It is evidently these slopes and underfalls to which Virgil alludes as affording a favourable field for the cultivation of olives（Virg．Georg．ii． 38；Vib．Sequest．p．33），with which they are covered at this day．But in another passage he alludes to the＂lofty Tabarnus＂as covered with forests，which affurded pasture to extensive herds of cattle．（Id．Aen．xii．715．）Gratius Faliscus also speaks of it as a rugged and rocky group of moun－ tains（Cyneget．509）．We learn from that writer that it was included in the territory of the Caudine Samnites［Caudini］，and indeed the celebrated pass of the Caudine Forks was at a very short dis－ tance from the forot of Mount Taburnus．The name of Monte Taburno or Taburo is still conmonly ap－ plied to the whole group，though the different sum－ mits，like those of the Matese，have each their peculiar name．

There is no ground for reading（as has been sur－ gested）Tábupyoy むpos for Aíbupyon upos，in Poly－ bius，iii．100）；the mountain of which that authir is speaking must have been situated in quite a dif－ ferent part of Italy．
［E．H．B．］
TACAPE（Taкd́n or Kánท，Ptol．iv．3．§ 11）， a town in the Roman province of Africa，in the Regio Surtica and in the innermost part of the Syrtis Ninor．The surronnding country is represented by Pliny（xvi．27．s．50，xviii．22．s．51）as exceedingly
fruitful, but its harbour was bad. (Geogr. Nub. Clim. iii. pt. ii. p. 87.) In early times it was subject to Byzacium; but subsequently, as a Koman colony, belonged to the Regio Tripolitana, of which it was the most westerly town. In its neighbourhood were warm mineral springs called the Aquae Tacapitanae (Itin. Ant. p. 78), now El-Hammah. (Cf. Plin. v. 4. s. 3; Itin. Ant. pp. 48, 50. 59, \&c., where it is called Tacapae). Nuw Gabs, Cabes, or Quiles.
[T. H. D.]
TACARAEI (Takapaiob, Ptol. vii. 2. § 15), a mountain tribe of India extra Gangen, who lived in the extreme NW. near the junction of the Imaus and Emodus chains, adjoining the Mons Bepyrrhus. They must have occupied part of the district now called Assam.
[V.]
TACHOMPSO (Taxou4 $\omega$, Herod. ii. 29; Tacompsos, Plin. vi. 29. s. 33; Mela, i. 9. § 2), a town in the Kegio Didecaschoenus, S. of Aegypt and the Cataracts. It stood upon an island of the Nile, and was inhabited by a mixed colony of Aegyptians and Aethiopians. The Coptic word Tachempsa signifies "the place of many crocodiles." Tachompso was seated on the E . bank of the river, lat. $23^{\circ} 12^{\prime} \mathrm{N}$., Dearly opposite the town of Pselcis. As Pselcis incressed, Tachompso declined, so that it at last was reparled as merely a suburb of that town, and went by the name of Contra-l'selcis. Though supposed by some tw have been near the modern village of Conzo in Lower Nubia, it is impossible to reconcile any known heality with the ancient descriptions of this place. Heeren (African Nations, vol. i. pp. 346, 383) supposes it to have been either at the island Kahalshe (lalmis) or 20 miles further S as Ghyrshe. Herindotus (Lc.) describes the island on which Tachompso stood as a plain contiguous to a vast lake. But peither such a lake nor island now appear in this part of the Nile's course. The lake may have been the result of a temporary inundation, and the inland gradually undermined and carried away by the periodical floods.
[W. B. D.]
TACO'LA (Tdкcida, Ptol. vii. 2. § 5), a place on the west coast of the Aurea Chersonesus, in India extra Gangem, which Itolemy calls an emporium. There can be no doubt that it is represented now by either Tavoy or Tenasserim. [ V.$]$

TACU'BIS (Taкoubis, Ptol. ii. 5. § 7), a place in Lusitania.
[T. H. D.]
TADER, a river on the S. coast of Hispania liarraconensis. (Plin. iii. 3. s. 4.) It is probably indicated by Ptolemy (ii. 6. § 14) under Tépços notapoû éronai. Now the Segura. [T. H. D.]

TADINUM (Eth. Tadinas: Ru. near Guchelo), a town of Unbria, mentioned by Pliny among the municipal towns of that region. (Plin. iii. 14. s. 19.) It is not noticed by any other ancient author previuus to the fall of the Western Einpire; but its name is repeatedly found in the epistles of Gregory the Great, and it is evidently the same place called by Procopius Taginae (Tárıvaı, Procop. B. G. iv. 29), near which the Gothic king Totila was defeated by Narses in a great battle, in which he was himself mortally wounded, A. D. 552 . The site is clearly fixed by the discovery of some ruins and other ancient monuments in 1750 at a place about a mile and a half from Gualdo, where there is an old church consecrated in the middle ages to Sta Maria di Tudino. Gualdo is about 9 mles N. of Nocera (Nuceria), close to the line of the Flaminian Way: hence there is little doubt that we should substitute Tadinas for "Ptanias," a name obviously corrupt,
given in the Jerusalem Itinerary as a station on the Flaminian Way. (Itin. Hier. p. 614; Wesseling, ad hec.; Cramer, Italy, vol. i. p. 267.) [E. H. B.]

TADMOK [PALMyRa.]
TADU (Plin. vi. 29. s. 35; comp. Strab. xvii. p. 786), a small island of the Nile that formed the harbour of the city of Meroe. Bruce (Travels, vol. iv. p. 618) suppuses Tadu to have been the modern Curgo, N. of Schendy. As, however, the site of Merce is much disputed, that of Tadu is equally uncertain (Ritter, Erdkund vol. i. p. 567). [W. B.D.]

TAE'NARUM (Taivapoy, Herod. Strab. et alii; ì Tavvapia äкpa, Ptol. iii. 16. § 9), a promontory at the extremity of Laconia, and the most southerly point of Europe, now called C. Matapán. The name of Taenarum, bowever, was not confined to the extreme point bearing the name of Matapán. It has been shown by Leake that it was the name given to the peniusula of circular form about seven miles in circumference, which is connected with the end of the great Taygetic promontory by an isthmas about half a mile wide in a direct distance. Hence Taenarum is correctly described by Strabo as an aктो̀ Eккєєرévク (viii. p. 363). Leake conjectures with great probability that Matapan is merely another form of Métwonov, which may bave been the name given by the ancients to the southern extremity of the peninsula. (Morea, vol. i. p. 301.) On either side of the isthmus, which connects the promontory of Taenarum with that of Taygetus, is a bay, of which the one on the east is called Porto Quaylio, corrupted into Kaio, and the one on the west Marinári or Marmairi. The name of Quagli, was given to the eastern bay by the Venetians, because it was the last place in Europe at which the quails rested in the autumn before crossing over to Crete and Cyrene. Porto Quaglio is one of the best harbours in Laconia, being sheltered from the S. and SE.; it is nearly circular, with a narrow entrance, a fine sandy bottom, and depth of water for large ships. Porto Marmari is described as only a dangerous creek. In the Taenarian peninsula there are also two ports on its eastern side, of which the northern, called Vathí, is a long narrow inlet of the sea, while the southern, called Asomato or Kistérnes, is very small and ill sheltered. A quarter of a mile southward of the inner extremity of the last-mentioned port, a low point of rock projects into the sea from the foot of the mountain, which, according to the inluabitants of the peninsula, is the real C. Matapin. The western side of the peninsula is rocky and harbourless.

The whole of the Taenarian peninsula was sacred to Poseidon, who appears to have succeeded to the place of Helios, the more ancient god of the locality. (Hom. Hymn. in Apoll. 411.) At the extremity of this peninsula was the temple of Poseidon, with an asylum, which enjoyed great celebrity down to a late period. It seems to have been an ancient Achaean sauctuary before the Dorian conquest, and to have continued to be the chief sacred place of the Perioeci and Helots. The great earthquake, which reduced Sparta to a heap of ruins in b.c. 464, was supposed to have been owing to the Lacedaemonians having torn away some suppliant Heluts from this sanctuary. (Thuc. i. 128, 133; Paus. iii. 25. § 4; Strab. viii. p. 363; Eurip. Cycl. 292.) Near the sanctuary was a cavern, through which Hercules is ssid to have dragged Cerberns to the upper regions. (Paus. Strab. ll.cc.; Pind. Iyth. iv. 77; Taenariae fauces, Virg. Georg. iv. 467;

Tuenarus aperta umbris, Lucan, ix. 36.) There is a slight difference between Strabo and Pausanias in the position of the cave; the former placing it near the temple, which agrees with present appearances (see below); the latter describing the cave it. self as the temple, before which stood a statue of Poseidon. Among the many dedicatory offerings to Poseidon the most celebrated was the brazen statne of Arion seated on a dolphin, which was still extant in the time of Pausanias. (Herod. i. 23, 24.) The temple was plundered for the first time by the Aetolians. (Polyb. ix. 34.)

Taenarum is said to have taken its name from Trenarus, a son either of Zeus or Icarius or Elatus. (Paus. iii. 14. § 2; Steph. B. s. v.; Schol. ad Apoll. Rhod. i. 102.) Bochart derives the word from the Phoenician tinar "rupes" (Geograph. Sacra. p.459); and it is not improbable that the Phoenicians may have had a settlement on the promontory at an early period.

Pausanias (iii. 25. §4) mentions two harbours in connection with the Taenarian promontory, called respectively Psabiathui (Yaua0oús), and the Har-
 (p. 17) also mentions these two harbours, and describes them as situated back to back (avrixuyos). Strabo (viii. p. 373) speaks of the former of these two hariours under the name of Amathus ('A $\mu a-$ Ooís), but omits to mention the Harbour of Achilles. It would appear that these two harbours are the Porto Quaglio and the port of Vathy mentioned above, as these are the two most important in the peninsula. Leake identifies Psamathus with Quaglio, and the Harbour of Achilles with Vathy, but the French Commission reverse these positions. We have, however, no doubt that Leake is correct; for the ancient remains above the Porto Quaglio, the monastery on the heights, and the cultivated slopes and levels, show that the Trenarian population has in all ages been chiefly collected here. Moreover, no ancient writers speak of a town in connection with the Harbour of Achilles, while Strabo and others describe Amathus or Psamathus as a $\pi$ 6גus. (Steph. B. s. v. $\Psi a \mu a \theta o u ̈ s ; ~ c f . ~ A e s c h i n . ~ E p . ~ 1 ; ~ P l i n . ~$ iv. 5. s. 8.) If we were to take the description of Scylax literally, Psamathus would be Porto Quaglio, and the Harbour of Achilles Porto Marmari ; and accordingly, they are so identified by Curtius ; but it is impossible to believe that the dangerous creek of Marmiri is one of the two harbours so specifically mentioned both by Scylax and Pausanias.

The remains of the celebrated temple of Poseidon still exist at Asómato, or Kistérnes, close to $C$. Mataparr on the eastern side. They now form part of a ruined church; and the ancient Hellenic wall may be traced on one side of the church. Leake observes that the church, instead of facing to the east, as Greek churches usually do, faces southeastward, towards the head of the port, which is likely to have been the aspect of the temple. No remains of columns have been found. A few paces north-east of the church is a large grotto in the rowk, which appears to be the cave through which Hercules was supposed to have dragged Cerberus; but there is no appearance of any subterranean descent, as had been already remarked by Pausanias. In the neighbourhood there are several ancient cisterns and other remains of antiquity.

There were celebrated marble quarries in the Taenarian peninsula. (Strab. viii. p. 367.) Pliny describes the Taenarian marble as biack (xxxvi.
18. s. 29,22. s. 43); but Sextus Binpiricus (Pyrrh. Hypot. i. 130) speaks of a species that was whito when broken to pieces, though it appeared yellow in the mass. Leake inquired in vain for these quarries.
At the distance of 40 stadia, or 5 English miles, north of the isthmus of the Taenarian peninsula, was the town Taenarum or Taenarus, subsequently called Cabnepolis. (Kainhtionis, Pais. iii. 25. § 9; Kavth, Ptol. iii. 16. § 9; Plin. iv. 15. s. 16; Steph. B. s. v. Taivapos; the same town is probably mentioned by Strab. viii. p. 360, under the corrupt form Kuval8iov.) It contained a temple of Demeter and another of Aphrodite, the latter near the sea. The modern village of Kyparisso stands on the site of this town. Some ancient remains and inscriptions of the time of the Antonines and their successors have been found here. On the door-posts of a small ruined church are two inscribed quadrangular $\sigma$ rînal, decorated with mouldings above and below. One of the inscriptions is a decree of the Taenarii, and the other is by the community of the Eleuthero-Lacones ( $\tau \delta$ noulvy tüv 'Eлeuөepoлaкcáywv). We have the testimony of Pausanias (iii. 21. § 7) that Caenepolis was one of the Elenthero-Laconian cities ; and it would appear from the above-mentioned inscription that the maritime Laconians, when they were delivered from the Spartan yoke, formed a confederation and founded as their capital a city in the neighbourhuxd of the revered sanctuary of Poseidon. The pluce was called the New Town (Caenepolis); but, as wo learn from the inscriptions, it continued to be also called by its ancient name. For the inscriptions relating to Taenarum, see Böckh, Inscr. no. 1315 -1317, 1321, 1322, 1389, 1393, 1483 . (On the topography of the Taenarian peninsula, see Leake, Morea, vol. i. p 290, seq., Peloponnesiaca, p. 175, seq.; Boblaye, Recherches, fc., p. 89, seq.; Curtius, Peloponnesos, vol. ii. p. 277, seq.)

TAEZALI (Tai§aiot or Taifanot, Ptol. ii. 3. § 15), a people on the eastern coast of Britannia Barbara. In their territory was the promontory called Taika入ov axpoy (Ib. § 5), now Kinneird's Head
[T. H. D.]
TAGAE (Tayal, Polyb. x. 29. § 3), a town in the northern part of Parthia, situated in the defiles of the chain of Labatas, visited by Antiochas in his war against Arsaces. It has been conjectured by Forbiger that it is the same place as Tape, mentioned by Strabo (xi. p. 508) as a royal palace in the adjacent province of Hyrcania; but this conjecture seems unnecessary. Perhaps it may be represented by the present Dameghan.

TAGARA (Tárapa, Peripl. M. Erythr. §51, ed. Miller ; Ptol. vii. 1. §82), one of the two principal emporia of the interior of the Deccan, according to the author of the Periplas. It is not certain what modern town now represents this ancient site, but there is a fair presumption in favour of Deoghir, which was the seat of government down to A.D. 1293, and which is now in ruins, cloee to Dowlatabad. (Vincent, Voyage of Nearchus, ii. p. 413; Mannert, v. 1. p. 83; Kitter, Erdk. v. p. 513 ; Berghaus's Map.) Ptolemy, who places the town in Ariaca, probably copied from the author of the Peiplus. It may be remarked that the distance given between Barygaza (Beriach) Paethana ( Pythan), and Tagara (Deoghir), are not reconcileable with the actual position of these places.
[V.]

TAGASTE，or TAGESTENSE OPP．（Plin．v． 4．8．4），a town of Numidia，whose spot is now marked by the ruins at T＇ajilt on the Ored Lumise or Sugerast，a tributary of the river Mrjerda．（Itin． Anc．p．44．）Taguste is particularly distinguished by having been the birthplace of St．Augustine． （Aug．Conf．ii．3．）
［T．H．D．］
TAGO＇NIUS（Taywyios，Plut．Sert．17），a tri－ butary of the Tagus in Hispania Tarraconensis， either the Tajuna or Henares．（Cf．Florez，Esp． Sagr．v．p．40；Ukert，ii．pt．i．p．389．）［T．H．D．］

TAGORI．［TAGMI．］
TAGRI（Td́ $\gamma$ pos，Ptol．iii．5．§ 25），a people of European Sarmatia，on the borders of Dacia，and probably identical with the Tagori of Pliny（vi． 7. $x .7$ ）and Jornandes（Get．4）．
［T．H．D．］
TAGUS（Taros，Ptol．ii．5．§ 4），one of the principal rivers of Spain，being considerably larger than the Anas and having its sources between Mounts Orospeda and Idubeda，in the country of the Celtiberi．（Strab．iii．pp．139，152，162．） After a tolerably straight course of upwards of 300 miles in a westerly direction，it falls into the At－ lantic ocean below Olisippo，where it is 20 stadia broad，and capable of bearing the largest ships．It was navigable as far up as Moron for smaller ves－ selx According to Strabo，at flood tides it over－ flowed the country at its mouth for a circumference of 150 stadia．It was celebrated for its fish and oysters（Strab．ib．；Mart．x．78），and likewise for its gold rand（Plin．iv．22．s． 35 ；Mela，iii．1；Ca－ tull．xx．30；Ov．Met．ii．251，\＆c．）；of which last， Lowever，so little is now to be found that it hardly repays the amphibions paupers who earn a pre－ carious living by seeking for it．（Furd＇s Hand－ book of Spain，p．487；Dillon，i．p．257．）The Tagonius alone，is named as a tributary．The Tagus is still called Tajo in Spain，Tejo in Portugal．（Cf． Liv．xxi．5，xxvii． 19 ；Plin．iii．3．s．4，viii．42．s． 67 ；Sen．Thyest．352，\＆cc．）
［T．H．D．］
TAHPA＇NIS or TEHAPHE＇NES（Jerem．xliii． 7，xliv．1；Ezek．xxx．18；\＆s Táф̀as，I．XX．），is supposed to be the same place with the Daphue of Pelusium of the Greeks．It was the seat of a gar－ rison under the native and the Persian kiugs of Aegypt（Herod．ii．30），and was probably a place of considerable strength and importance，since it com－ manded the high road to Syria（Strab．xvii．p．802）． According to the Hebrew writers，Tahpanis was also occasionally a royal residence in Pharaonic times．In the reign of Psammitichus（b．c．6\％0， foll．）the troope quartered at Tahpanis，in common with the rest of the native Aegyptian arny，offended by the king＇s favour to his Carian and Greek mer－ cenaries，abandoned their country，and established themselves in the Regio Dodecaschoenus S．of Syene （Diodor．i．67）．From the Itineraries it appears that Daphne or Tahpanis was 16 Roman miles from Pelusium．Tel－defenneh，lying nearly in a direct line between the modern Sala－kë̈eh and Pelusium， is supposed to be on the site of Tahpanis．［W．B．D．］

TALABRIGA（（ dd Ta入d́bpıra，App．Hisp．73）， a town of Lusitania，between Eininium and Lango－ briga．（Itin．Ant．p．421；Plin．ii．5．s．7，iv． 21. 8．35．）Variously identified with Cacia，Aveiro， Talavera de la Reyna，ano Villarinho．［T．H．D．］

TALA＇BROCA（Ta入a6pó $\eta$ ，Strab．xi．p．508）， one of the four principal towns oi Hyrcania noticed by Strabo．It is perhaps the same place that is called Tambrax by Polybius（x．31）．Its site cannot nuw be identified．
［V．］

TAIACO＇RY（Ta入áкळpv，Ptol．vii．4．§ 7），a port on the north－western side of the island of Taprobane or Ceylon．It is described as an em－ porium，and has，probably，derived its name from the promontory of Cory，which was opposite to it， on the mainland．It appears to have been also called Aacote（＇Aakór $\eta$ ）．
［V．］
TALADUSII（Ta入aסoúvtot，Ptol．iv．2．§ 17），a people in the north part of Mauretania Caesari－ ensis．
［T．H．D．］
Talafus mons．［Tallaeus．］
TALAMNNA（Ta入auivn，Ptol．ii．6．§ 27），a town of the Seurri in Galiaecia．［T．H．D．］

TALARES（Tádapes），a Molossian people of Epeirus，extinct in the time of Strabo（ix．p．4：34）．

TALAURA（Tádaupa），a mountain fortress in Pontus to which Mithridates withdrew with his most precious treasures，which were afterwards Eound there by Lucullus．（Dion Cass．xxxv．14； Appian，Mithr．115．）As the place is not men－ tioned by other writers，some suppose it to have been the same as Gaziura，the modern Tourkihal which is perched apon a lofty isolated rock．（H：t－ milton，Researches，vol．i．p．360．）

TALBENDA（Tá入 $6 \in \nu \delta a$ or Tá入6ovסa），a town in the interior of Pisidia，noticed only by Ptolemy （v．5．§ 8 ）．
［L．S．］
TA＇LETUM．［Laconia，p．108，b．］
TALIA（Itin．Ant．p．218），or TALIATA（Not． Imp．），erroneously called Tavdrıs by Ptolemy（iii． 9．§4），Tabata by the Geogr．Rav．（iv．7），and Falista in the Tab．Pent．A place in Upper Miesia， between Norae and Egeta．Varionsly identified with Tatalia，Göyerdsinlik，and a place near Alt Porecs．
［T．H．D．］
TALICUS，a river of Scythia intra Imaum． （Amm．Marc．xxiii．6．§ 63．）
［T．H．D．］
TALLAELS or TALAEUS MONS（Bückh， Corp．Inscr．Graec．vol．ii．p．423；Hesych．s．v．）， the station of Talus，the mythical man of bronze， and the guardian of the island of Crete．The well－ known inscription which deplores the loss of Artemis， the chaste wife of Salvius Menas，is now buried by the mass of earth and stones heaped up at the en－ trance of the stalactitic cavern of Melidhoni．This grotto，memorable in modern times for the massacre of the Cretan Christians by the Mohammedans，is identified from the inscription with the spot where in ancient times human victims were presented before the statue of Talus．（Pashley，Travels，vol． i．pp．126－139．）
［E．B．J．］
TALMEN（Ta入 $\mu \eta \nu$ ，Arrian，Indic．c．29），a port of Gedrosia at which the fleet of Nearchus found a secure harbour．It is not clear what place now may be identified with it，and different geo－ graphers have held different opinions．Vincent （Voyage of Nearchus，i．p．271）thinks it is the bay formed by the mouth of a small river called by Ptolemy Candriaces or Hydriaces（vi．8．§8）．It was probably close to the modern town，Choubar Tiz and Purvg．（Cf．Gosselin，iii．p．148．）［V．］

TALMIS（It．Anton．p． 161 ；Olympiodor．ap． Photium，p．62，ed．Bekker），a towu in the Regio Dodecaschoenus，S．of I＇hilae，from which it was five days＇journey distant，situated in lat． $23^{\circ} 30^{\prime} \mathrm{N}$ ．， and consequently immediately under the tropic of Cancer．Talmis stood on the western bank of the Nile，and is represented by the modern Kalabsche． The Libyan hills which rise immediately behind the town afforded an inexhaustible supply of materials for building，and the ancient quarries are still visible

## TAMIATIIS.

in their sides. The ruins of T'almis are of surpessing interest, and comparatively in good preservation, probably because, being excarated in the sandstone, they escaped mutilation or destruction by the Persians. The principal structure was a rock-tenple at the foot of the hills, dedicated, as appears both from a hieroglyphical and a Greek inscription, to a deity named Mandulis or Malulis, a son of Isis. His mythical history is exhibited on bas-reliefs. But the sculptures at Talmis are of the highest interest, both as works of art and as historicul monuments. Their execution is the work of various ages: some, as appears by their rude forms, ascending to a remote antiquity, others, as those in the temple of Mandulis, being of the best days of Aegyptian art. The temple was founded by Ainunoph II., was rebuilt by one of the Ptolemies, and repaired in the reigns of the Caesars, Augustus, Caligula, and Trajan. The subjects of these sculptures represent partly the triumphs of the Pharaohs, and partly the tributes exacted by them from the conquered. On one wall is the warrior in his chariot putting to flight bearded men in short garments, armed with bows and arrows, and a sickle-shaped knife or sword. In another compartment the conqueror is in the act of putting his captives to death. Another represents the booty obtained after a victory, and, besides the captives, exhibits the spoils taken, e. g. lion-headed and lionclawed chairs, knives, loaves, sandals, skins of animals, \&cc. These sculptures illustrate also the natural history of $S$. Aethiopia. They cuntain figures of lions, antelopes, and bulls, greyhounds, giraties, ostriches and monkeys. The giratties and ostriches point clearly to a country south of the utinost limit of Aegyptian dominion, and seem to indicate wars with the Garamantes and the kingdom of Bornoo. Herodotus (iii. 97) mentions ebony wood among the articles of tribute which every three years Aethiopia offered to the Persian king. Fibony as well as ivory, a product of the interior of Libya, appears on the walls of the temple of Mandulis. A coloured facsimile of these sculptures is displayed in one of the rooms of the British Museum. At a short distance from Talmis stood another temple of scarcely inferior interest, and the space between is covered with heaps of earth and fragments of pottery, mixed with human bones and bandages that liave been steeped in bitumen - the evident traces of a large necropolis. At Talmis has been also discovered an inscription in the Greek lancuage, supposed to be of the age of Diocletian, in which Silco, king of Aethiopia and Nubia, connnemorates his victories over the Blemmyes. The wealth of Talmis, apparent in its sculptures, was doubtless in great measure owing to its position as a commercial station between Aegypt and Acthiopia, but partly also to the emerald mines in its neighbourhoorl. In the fifth century A.D., the town and its neighbourhood were occupied by the Blemmyes, who had a regular govermment, since they had chiefs of tribes ( $\psi v \lambda \alpha \mu \chi o 1$ ) and were celebrated for their skill in divination. (olympiodor. ap. Jhotiutn, p. 62.)
[W. B. I).]
TALUBATH (Tanoutcio, Piol. iv. 6. § 2.5), a town of Gaetulia, in the NW. of Libya Interior, perhaps the montern Tifilet.
[T. H. D.]
CALCCTAE, a tribe of India extra Gangen. mentioned by Pliny (vi. 19. s. 22). They were probably sested beyond the Brahmaputra, in the mountains of Birnuzh. Sillig, in his recent edition of Pliny, has given the n:ume as Thalutae. [V.]

TAMARA (Tapapt, Ptol. ii. 3. § 30), a town of
the Dumnonii, at the SW. extremity of Britannia Kinnana, at the mouth of the Tamarus. Now Tamerton near l'ymouth. (Camden, p. 25.) [T.H.1)]

TAMARICI, a Gallaecian tribe on the river Tamaris in Hispania Tarraconensis. (Plin. iv. 20. s. 34; Mela, iii. 1.) According to Pliny (xxx. 2. s. 18) there were certain noted springs in their territory, which are undoubtedly the same described by Florez (Cuntabria. p. 4) near the hermitage of S. Juan de fiventas divinas, 12 Spanish miles E. of Leon, and 5 N . of Saldanna. (Cf. Lkert, ii. pt. i. p. 302, note 80.)
[T. H. D.]
TAMARIS (called by Ptolemy, Ta $\alpha \dot{\rho} a$, ii. 6. § 2), a small river of Gallaecia in Hispania Tarraconensis, which falls into the Atlantic ocean by the port of Ebora, between the Minius and the promontory Nerium. (Mela, iii. 1.) Now the Tambre. [T.H.I.]

TAMARUS (Tamaro), a river of Samrium, which falls into the Calor (Calore), about 5 miles above Beneventum. Its name is known only from the Itinerary of Antoninus, which places a station "super Tamarum fluvium" on the road from Bo. vianum to Equas Tuticus. (Itim. Anh p. 103.) The line of this road is not very clear, but the modern name of the Tamaro leaves no doubt of the river meant. It rises in the mountains near Saepinum, only a few miles from Bovianum, and flows with a general direction from $\mathbf{N}$. to $\mathbf{S}$. till it joins the Calor as above indicated.
[E. H. B.]
 river on the S coast of Britannia Romana, now the Tamar.
[T.H.D.]
TAMASSUS (Ta $\alpha a \sigma \sigma \delta s$, Ptol. v. 14. § 6 ; called also Tamaseus by Pliny, v. 31. 8. 35, Tapdoos by Constantine Porphyr. de Them. i. p. 39, and Tamesa by Statius, Achill. i. 413; cf. coins in Eckhel, i. 3. p. 88), a town in the interior of the island of Cyprus, 29 miles SW. of Soloe, and on the road from that place to Tremithus. It lay in a fruitful neighbourhood (Ovid, M. x. 644), and in the vicinity of some extensive copper mines, which yielded a kind of rust uned in medicine (Strab. xir. p. 864). It is very probably the Te $\mu$ é $\sigma \eta$ of Homer (Od. i. 184: Nitzch, ad Lec; cf. Mannert, vi. 1. p. 452), in which case it would appear to have been the principal market for the copper trade of the island in those early times. Hence some derive its name from the Phoenician word themaes, signifying smelting.
[T. H. D.]
TAMBRAX. [TAIABROCA.]
TAMESA or TAMESLS (Tápeбa, Dion Cass. x. 3), a river on the E. coast of Britannia Romana, on which Londinium lay; the Thames. (Caes. B. G. v. 11; Tac. Ann. xiv. 32.) [T.H.D.] TAMESIS. [TAMESA.]
TAMIA (Tducia, Ptol. ii. 3. § 13), a town of the Vacomagi on the E. coast of Britamia Barbara, probably on Loch Tay.
[T.H. I.]
TAMIA'THIS (Tapia日ıs, Steph. B. f. т.), was a considerable town in Lower Aegypt, situated at the mouth of the Phatnitic arm of the Nile. It is lrass celebrated in history than its representative, the modern Jamiat or Drmictla, which, since the era of the Crusades, has always been, until the rive of Alexumbiria in the present century, one of the mast populuts and commercial places in the [belta. Many antique columns and borks from the ancient town are built into the walls of the mosques in the modern one. The present Damirffa, indeed, does not orcupy the site of Tamiathis, since, according to Abulfeda, the original town of that rame was destruyed, on

TAMNA.
TANAGRA.
1087
account of its exposed situation, and rebuilt higher up the Nile, abrout 5 miles further from the sea. The date of this change of position is fixed by Abulfeda in the year of the Hegira 648 (a.d. 1251).
[W.B.D.]
TAMNA (Tá $\mu v a, ~ S t r a b . ~ x v i . ~ p . ~ 768 ; ~ S t e p h . ~ B . ~ . ~$ s. c.; Tamna, Plin. vi. 28. s. 32 : Өoú ${ }^{2}$, Piol. vi. ‥ § 37 ; Thomna, Plin. xii. 14. 8. 32 : Eth. Tauvíns), a city of Arabia, and the chief town of the Cattabaneis (Catabani), according to Strabo, or of the Gebanitae, according to Pliny. It is described by Pliny as a large commercial town with 65 temples, to which caravans from Gaza in P'alestine resorted. It is probably Sand, the present capital of Yemen.

TAMNUM, in Gallia, is placed by the Itineraries on a road from Burdigala (Bordeaux) to Mediolanum Santonum (Saintes); but in the Table the name is written Lamnum. The distance from Blavia or Blavium (Blnye) to Tamnum is xvi. in the Ctins.; but the distunce xxii. in the Table is nearer the truth, if Tallemont or Talmon is the site of Taminum. Talmon is below Blaye on the right bank of the Girombe.
[G. L.]
TAMCGADIS, a town in Numidia, on the E. side of Mount Aarasius, and 14 miles NE. of Lambese. (lt. Ane. pp. 34, 40; Thamugadis, Tab. I'eut.) It still retains the name of Temuyadi. (Bruce.) Lapic identifies it with Ager Soulah. [T. H. D.]

TAMYNAE (Tapiva, Strub. et alii ; Tapiva, Steph. B. s. v. : Eth. Tauvvaios, Tapuveús), a town of Eubrea in the territory of Eretria, at the foot of ML. Cotylaenm, with a temple of Apollo, said to have teen built by Admetus. (Strab. x. p. 447 ; Steph. B. s. $\mathbf{v e}$. Táuuva, Korúdaiov.) It was taken by the Persians, when they attacked Eretria in r. c. 490 (Herod. vi. 101), but it is chicfly memorable for the victory which the Athenians, under Phocion, gained bere over Callias of Chalcis, b. c. 350. (Acsch. c. Cles. §§ 85-88, de Fals. Leg. 180 ; Deın. de Pac. 5: Plat. Phoc. 12.) Leake places Tamynae at the village of Ghymno, at the foot of a high mountain, which he supposes to be the ancient Cotylaeum (Ancient Greece, vol. ii. p. 439); but Ulrichs regards Aliveri, where there are several ancient remains, as the site of Tamynae. (Rheinisches Museum, for 1847, p. 512.)

TAMY'RACA (Taцuрáкท, Ptol. iii. 5. § 8, riii. 10. § 3), 2 town and promontory of European Sirrmatia in the neighbourhood of a lake (Arriam, I'er. P. Eiux. p. 20), and in the innermost part of the gulf of Carcinitis, now gulf of Achmeschid or Perekop. Hence, according to Strato, the Simus Carcinites was also called the gulf of Tamyracei (vii. p. 308). But the coast has undergone such extensive alterations at this part, that all attempts to determine the site of the town are unavailing. Some, indeed, have dioubted its existence, as it is mentioned only by Ptolemy. (Cf. Neumann, Die Hellenen in Shythenhinde. p. 375 ; Ukert, iii. 2. p. 457 ; Gail, Geogr. M. iii. p. 127.)
[T. H. D.]
TamyRaces Sinus [Carcina; Tamyhaca.]

TAMYRAS or DAMU'RAS (Tamípas, Strab. xvi. p. 756 ; $\Delta$ a $\mu$ oûpas, Polyb. v. 68), a river of Phoenicia between Sidon and Berytus, the modern Nahr-ed-Dimuir. (Robinson, Bibl. Res. vol. ii. p. 488, 2nd ed.) [Comp. Leontes.]

TANAGER or TANAGRUS (Tanagro), niver of Lucania, a tributary of the Silarus. It rises in the mountains near Lago Negro, flows for about

30 miles in a NNF. direction, through a broad and level upland valley called the lalle di Diano, till near La Polla it sinks into the earth, and emerges again throuch a cavern at a place thence called La Pertusa. Tlis peculiarity is mentioned by Pling, who calls it "fluvius in Atinate caapo," without mentioning its name (Plin. ii. 103. s. 106, with H:arduin's note) : but this is known to us from Virgil, who notices it in connection with Dount Alburnus, which rises immediately to the W. of it, and the epithet "siccus" which he applies to it (" sicci ripa Tanagri") doubtless refers to this same peculiarity. (Virg. Georg. iii. 151 ; Serv. ad loc.; Vib. Seq. p. 19.) There is no doubt, also, that in the Itinerary we should read "Ad Tanagrum" for "Ad Tanarum," a station which it places on the road from Silernum to Nerulum. (Itin. Ant. p. 109.) The same Itinerary gives a station " Ad Calorem," as the next on this line of route, which seems to show that the river was then, as now, called in the upper part of its course Calor or Calore, while in the lower part it assumes the name of Tanagro or Negro. This part of the route, however, is very confused.
[E. H. B.]
TANAGRA (Távarpa: Eth. Tavarpaios: the territory Tavarpaía, Paus. ix. 22. § 1, and Tavaypaikh or Tavayoıký, Strab. ix. p. 404: Adj. Tavarpıќs: Grimúdha or Grimála), a town of Bueotia, situated upon the left bank of the Asnpus, in a fertile plain, at the distance of 130 stadia from Oropus and 200 from Plataeae (Dicaearch. Stat. Gr. pp. 12. 14, ed. Hudson). Several ancient writers identified Tanagra with the Homeric Graea ( $\Gamma$ paia, Hom. Il ii. 498; Lycophr. 644); but others supposed them to be distinct places, and Aristotle regarded Oropus as the ancient Graea. (Steph. B. s. v. Távaүpa; Strab. ix. p. 404 ; Paus. ix. 20. § 2.) It is posible, as Leake has remarked, that Tamagra, sometimes written Tanagraea, may be connected with the ancient name Graea, Tana, being an Aeolic suffix, and that the modern name Grimadha or Grimaila may retain traces of the Homeric name. Tanagra was also called Poemandria, and its territory Poemandris, from the fertile meadows which surrounded the city. (Steph. B. s. v.; Strab. ix. p. 404.) The most ancient inhabitants of Tanagra are said to have been the Gephyraci, who came from Phoenicia with Cadmus, and from thence emigrated to Athens. (Herod. v. 57; Strab. ix. p. 404). From its vicinity to Attica the territory of Tanagra was the scene of more than one battle. In b. c. 457 the Lacedaemonians on their return from an expedition to Doris, took up a position at Tanagra, near the borders of Attica, with the view of assisting the oligarchical party at Athens to overthrow the democracy. The Athenians, with a thousand Argeians and some Thessalian horse, crossed Mount larnes and advanced against the Laceduemonians. Both sides foucht with great bravery : but the Lacedaemonians gained the victory, chiefly through the treacherous desertion of the Thessalians in the very heat of the engagement. (Thuc. i. 107, 108; Diod. xi. 80.) At the begining of the following year (b. c. 456), and only sixtytwo days after their defeat at Tanagra the Athenians under Myronides again invaded Bueotia, and gained at Oenophyta, in the territory of Tanagra, a briliiant and decisive victory over the Boeotians, which made them masters of the whole country. The walls of Tanagra were now razed to the ground. (Thuc. i. 108; Dind. xi. 81, 82.) In b. c. 426 the Athenisns made an incursion into the territory of Tanagra, and
on their return defeatel the Tanagraeans and Bneotians. (Thuc iii. 91.) Dicmearchus, who visited Tanagra in the time of Cassander, says that the city stands on a rugged and lotty height, and has a white chalky appearance. The houses are adorned with handsome porticoes and encaustic paintings. The surrounding country does not grow much corn, but produces the best wine in Boentia. Dicaearchus adds that the inhabitants are wealthy but frugal, being for the most part landholders, not manufacturers; and he praives them for their justice, gond faith, and hospitality. (De Statu Graec. p. 12.) In the time of Angustus, Tanagra and Thespiae were the two most prosperous cities in Boentia. (Strab. ix. p. 403.) Tanagra is called by Pliny (iv. 7. s. 12) a free state; it is mentioned by Ptolemy (iii. 15. § 20); and it continued to flourish in the sixth century. (Hierocl. p. 645.) Its public buildings are described at some length by Pansanias (ix. 20. § 3, seq.). The principal temple was that of Dionysus, which contained a celebrated statue of Parian marble, by Calamis, and a remarkable Triton. Near it were temples of Themis, Aphrodite and Apollo, and two of Hermes, in one of which he was worshipped as Criophorus, and in the other as Promachus. Near the latter was the theatre, and probably at no great distance the gymnasiom, which contained a picture of Corinna, who was a native of Tanagra. There was also a monument of this poetess in a conspicunus part of the city. Pausanias remarks as a peculiarity in Tanagra, that all their sacred buildings were placed by themselves, apart from the houses of the town (ix. 22. § 2.) He likewise notices (ix. 22. § 4) that Tanagra was famous for its breed of fight-ing-cocks, a circumstance which is mentioned by other writers. (Varr. de Re Rust. iii. 9. § 6; Hesych.
 pícol.) Tanagra pnesessed a considerable territory; and Strabo (ix. p. 405) mentions four villages belonging to it, Eleon or Heleon, Harma. Mycalessus, and Pharae. (Pherme, Plin iv. 7. s. 12).

The rains of Tanagra are situated at an uninhabited spot, called Grimádha or Grimála, situated 3 miles south of the village of Skimatari The site is a large hill nearly circular, rising from the north bank of the Asopus. The npper part of the site is rocky and abrupt. looking down upon the town beneath; and it was probably upon this upper height that the sacred edifices stood apart from the other buildings of the town. The walls of the city which embraced a circuit of about two miles, may still be traced, but they are a mere heap of ruins. About 100 yards below the height already described are the remains of the theatre, hollowed out of the slope. On the terrace below the theatre to the NE. are the foundations of a public building, formed of marble of a very dark colour with a green cast. The ground is thickly strewn in evers direction with remains of earthenware, betokening the existence of a numerous population in foriner times (Leako. Northern

cois of tanagra.

Greece, rol. ii. p. 454, weq.; Wordsworth, A thens and Attica, p. 14, seq.; comp. K. O. Nïller, Orchomenos, p. 20.)

TA'NAIS (Távais, Ptol. iii. 5. § 14, v. 9. §§ 1, 2, \&c.), a famous river, which in the course of time was universally assumed as the boundary between Europe and Asia (Strab. vii. 310, xi. 490; Mela, i. 3; Scyl. p. 30, \&cc.) The older writers of antiquity thought that it rooe from a large lake (Herod. iv. 57 ; Ephor. ap. Anon. Per. P. Eux. p. 4), which is really the case, its source being in the lake Ivan Ozero, in the goverument of Toula; whilst later writers held that it had its sources either in the Cancasus (Strah. xi. 493; Ammian. xxii. 8), or in the Rhipaean mountains. (Mela, i. 19; Lucan, iii. 272; Procop. B. G. iv. 6, \&c.) The last of these hypotheses was most generally accepted; but there was likewise a fourth which made it a branch of the Ister (Strab. 2. c.). Whilst Strabo, howerer, adduces these different opinions, he himself holds that its source was entirely unknown (ii. 107). It is represented as flowing in so rapid a strean that it never froze. (Meia, $l \mathrm{c}$. ; cf. Nonnus, Dionge. xxiii. 85.). It flows first in a SE. and then in a SW. direction; and after receiving the Hyrgis (or Syrgis) as a tributary, empties itself into the Palus Maeotis (Sea of Arof) by two mouths. (Herod. iv. 100.) These mouths, which are at the most northern point of the Palus Mueotis, Strabo places at the distance of 60 stadia from one another (vii. 310), whilst Artemidorus (ap. Eustath. ad Diom. 14) makes them only 7 stadia distant. At present, however, the Don has 13 mouths. (Clarke, Trav. i. p. 423.) The etymology of the name is discussed by Plutarch (do Flum. 14) and Eustathius (l.c.); but its true derivation is from the Scythian word Don or Dan, signifying water, which occurs in the names of other rivers, as Danubins, Eridanus, \&cc. (Forbiger, Handb. des All. Gengr. p. 325, n. 16.) The Tanais is frequently alluded to by the Latin poets. (Hor. Od. iii. 10.1 ; Virg. G. iv. 517 ; Or. Ex. Pont. iv. 10, 55, \&ce.) Clarke (Tracels, i. pp. 339, 448, note) would identify it with the Danaetz, from the similarity of the vame, an hypothesis also accepted by Lindner (Scythien, p. 66) ; but there can scarcely be a doubt that it should be identified with the Dom.
[T. H.D.]
TA'NAIS (Td́vais, Ptol. iii. 5.§ 26, viii. 18.§5), a town of Asiatic Sarmatia, lying on the more southern mouth and between both mouths of the river of the same name. It may also be described as situated at the northernmost point of the Palus Maeotis, and not far from the sea. It was a flourishing colony of the Milesians, enjoying an extensive commerce, and being the principal market of the surrounding tribes, both of Earope and Asia, who here bartered slaves and skins for the wine, apparel, and other articles of more civilised nations. (Strab. xi. p. 493.) The inhabitants soon reduced a considerable part of the neighbouring consts to subjection, but were in turn themselves subdued by the kings of the Bosporus (Id. vii. p. 310, xi. p. 495). An attempt to regain their independence only ended in the deatruction of their city by Polemon I. (Id. p. 493), a little before the time when Strabo wrote. Pliny (vi. 7. s. 7) speaks of Tanails as no longer existing in his time ; but it appears to have been subsequently restored (Ptol. u.cc.; Steph. B. p. 633), though it never recovered its former prosperity. Clerke (i.p. 415) coald discover no trace of it, nor even a probable site ; but its ruins are said to exist near the modern Nedrigoska

TANAITAE.
TANIS.
1089
(ef. Gräfe, Mém. de TAc. des Sc. à St. Petersb. vi. Ser. vi. p. 24 ; Stempowsky, Nouv. Jour. Asiat. i p. 55; Bückh. Inscr. ii. p. 1008). [T. H. D.]

TANAI'TAE (Tavaîtal, Ptol. iii. 5. § 24), a people of European Sarmatia, dwelling NE. of the Roxelani, and between them and the Tanais. [T. H. D.]
TANARUS (Tanaro), 2 river of Liguria, the most important of all the southern tributaries of the Padus. It rises in the Maritime Alps above Ceva (Ceba), flows at first due N., receives near Cherasco the waters of the Stura, a stream as considerable as itself, then turns to the NE., passes within a few miles of Pollentia (Pollenza), flows under the walls of Alba Pompeia and Asta (Asti), and discharges its waters into the Po about 15 miles below Valensa (Forum Fulvii). It receives many considerable tributaries besides the Stura already mentioned, of which the most important is the Bormida, the ancient name of which has not been preserved to us; but the Orba, a minor stream which falls into it a few miles above its junction with the Tanaro, is evidently the river Urbs, mentioned by Claudian (B. Get 555), the name of which had given rise to an ambiguous prophecy, that had misled the Gothic king Alaric. The Belbo, which falls into the Tanaro a few miles above the Bormida, has been identified with the Fevus of the Tabula; bat the names of rivers given in that docament in this part of Italy are so corrupt, and their positions so strangely misplaced, that it is idle to attempt their determination. Though the Tanarus is one of the most important rivers of Northern Italy, its name is not mentioned by any of the geographers except Pliny; nor does it occur in history until long after the fall of the Western Empire. (Plin. iii. 16. s. 20 ; P. Diac. Hist. Lang. vi. 58.)
[E. H. B.]
TANATIS, according to Sulinus (c. 12), an island in the neighbourhood of Britain. It is undoubtedly the same which Beda (Hist. Eccl. i. 25) calls Tanatos, and which still bears the name of Thanel.
[T. H. D.]
TANATIS. [Talla.]
TANAUS. [Argos, Vol. I. p. 201, a.]
TANE'TUM or TANNE'TUM (Td́ntrov, Ptol. : Eth. Tanetanus, Plin. : S. Ilario), a small town of Gallia Cispadana, on the Via Aemilia, between Regium Lepidum and Parma, and distant 10 miles from the former and 8 from the latter city. (Itin. Ant. p. 287 ; Itin. Hier. p. 616 ; Tab. Peut.) It is mentioned in history before the Roman conquest of this part of Italy, as a Gaulish village, to which the praetor L. Manlius retired after his defeat by the Boii in B. C. 218, and where he was surrounded and besieged by that people. (Pol. iii. 40; Liv. xxi. 25.) Its name is not again noticed in history, but it is mentioned both by Pliny and Ptolemy as a municipal town of Gallia Cispadana. though it appears to have never risen to be a place of importance. (Plin. iii. 15. s. 20 ; Ptol. iii. 1. § 46 ; Phlegon, Macrob. 1.) Livy calls the Gaulish town "vicus Pado propinquus," an expression which would lead to an erroneous idea of its position; for we learn from the Itineraries that it certainly stood on the Via Aemilia, at a distance of more than 10 miles from the Padus. The site is still occupied by a large village, which is now called, from the name of its principal church, Sant Ilario; but a hamlet or village about half a mile to the N. still retains the name of Taneto. It is distant about 2 miles from the river Enca, the Nicia of Pliny (iii. 16. s. 20),
which flows into the Po, abont 12 miles from the point where it crosses the Aemilian Way. [E. H. B.]

TANIS (Td́vis, Herod. ii. 166 ; Strab. xvii. p. 802; Ptol. iv. 5. § 52; the Zoan of the Hebrews, Numb. xiii. 23: the Coptic Tani or Athennes, and the modern San), was a city of Lower Aegypt, situated, in lat. $30^{\circ} 59^{\prime}$, on the Tanitic arm of the Nile. [Nilcts, Ostium Taniticum.] It was the capital of the Tanitic Nome. Although the name of Tanis does not appear in Aegyptian annals earlier than the xxi-st dynasty, which consisted of 21 Tanite kings, it had long previously been among the most important cities of the Delta. The branch of the Nile on which it stood was, with the exception of the $\mathrm{Pe}-$ lusiac, the most easterly, and the nearest to Palestine and Arabia. It is described in the Brok of Numbers (l. c.) as founded only seven years later than Hebron; and Hebron, being extant in the time of Abraham, was one of the oldest towns in Palestine. Tanis owed its importance partly to its vicinity to the sea, and partly to its situation among the Deltaic marshes. It probably was never occupied by the Hyksos, but, during their usurpation, aftirded refuge to the exiled kings and nobles of Memphis. It was a place of strength during the wars of the early kings of the New Monarchy-the xviiith dynastywith the shepherds; and when the Aegyptians, in their turn, invaded Western Asia, the position of Tanis became of the more value to them. For after Negypt became a maritine power, in its mars with Cyprus and Phoenicia, a city at no great dis. tance from the coast would be indispensable for its naval armaments. To these purposes Tanis was better adapted than the more exposed and easterly Pelusiun. The eastern arms of the Nile were the first that silted up, and the Pelusiac mouth of the river was at a very early period too shallow for ships of war. The greatness of Tanis is attested in many passages of the Hebrew writers. In the 78th Psalin the wonders that attended the departure of the Israelites from Aegypt are said to have been "wrought in the plain of Zoan." This Psalm, indeed, is somewhat later than David (b.c. 1055-1015); but it proves the tradition that Tanis was the capital of that Pharaoh who oppressed the Hebrew people. In the age of Isaiah (xix. 11, foll.), about 258 yeans later, Tanis was still reckoned the capital of the Delta, since the prophet speaks of the princes of Zoan and the princes of Noph (Memphis) as equivalent to the nobles of Aegypt. Again, Isaiah (xxx. 4) describes the ambassadors who were sent to Aegypt to form an alliance with its king as repairing to Zoan and Hanes, or Heracleopolis; and the desolation of Zoan is threatened by Ezekiel as the consequence of Nebuchadnezzar's invasion. Tanis probably declined as Sais and Memphis rose into importance; yet twenty years before the Christian era it was still a large town (Strab. xvii. p. 802); nor did it shrink into insignificance until nearly 80 A.d. (Joseph. B. Jud. iv. 11, § 4.) Its linen manufacture probably long sustained it. The marshy grounds in its environs were well suited to the cultivation of flax; and Pliny (ix. 1) speaks of the Tanitic linen as among the finest in Aegypt.

No city in the Delta presents so many monuments of interest as Tanis. The extensive plain of San is indeed thinly inhabited, and no village exists in the immediate vicinity of the buried citg. A canal passes through, without being able to fertilise, the field of Zoun, and wild beasts

VOL IIL
and marsh fevel prevent all but a few fishermen from inhabiting it. The mounds which cover the site of Tanis are very high and of great extent, being upwards of a mile from north to south, and nearly three quarters of a mile from east to west. The arm in which the sacred enclosure of the temple of Pthah stood is about 1500 feet in length by 1250 broad. The enclosure, which is of crude brick, is 1000 feet long and about $\mathbf{7 0 0}$ wide. A gateway of granite or fine gritstone, bearing the name of Rameses the Great, stands on the northern side of this enclosure. The numerous obelisks and the greater part of the sculptures of the temple were contributed by Rameses. His name is also inscribed on two granite columns outside the enclosure, and apparently uncounected with the temple. Though in a very ruinous condition, the fragments of walls, columns, and obelisks sufficiently attest the former splendour of this building. The architecture is generally in the best style of Aegyptian art. and the beanty of the lotus-bud and palm capitals of the columns is much celebrated by travellers. Among the deities worshipped at Tanis were P'thah (Hephaestus), Maut, Ka, Horus, \&c. The Pharahos who raised these monuments were of various dynasties, ranging from the kings of the xviith dynasty to the Acthiopian Tirhaka. The numerous remains of glass and pottery found here, and the huge mounds of brick, prove that the civil portions of Tanis were commensurate in extent and population with the religious. The modern village of Sin consists of mere huts. Early in the present century an attempt was made to establish nitreworks there; but they have been long abandoned; and the only occupation of the few inhabitants of this once flourishing city is fishing. North of the town, and between it and the coast of the Mediterranean, was the lake Tanis, the present Menzaleh. (Wilkinson, Mod. Egypt and Thebes, vol. i. pp. 407, 449, foll.; Kenrick, Ancient Emppt, vol. ii. p. 341.)
[ii.B.D.]
TANUS (Távos, Artemidorus, ap. Steph. B. s. v.), a town in Crete of which there is a coin with the epigraph TANI $\Omega$. (E.ckhel, vol. ii. p. 321). [E.B.J.]

TANI's. [Argos, Vol. I. p. 201, a.]
TA'OCE (Taók $\eta$, Arrian, Ind. c. 39 ; Strab. xv. p. 728), a town or fortress of the district of Taocene, in Persis. It was, according to Strabo, the seat of one of the three treasuries of the kings of Persia. It is not certain from Arrian's statement whether he means the town or the district, but probally the former. The town appears to have been placed near the river Granis. Ptoleny speaks of a promontory and a town of this name (vi. 4. $\S \S 2$ and 7 ). It is probable that it is the same place as that called by Al-E.lrisi, Toudj or Touj (ii. p. 391, \&c.). Where Dionysius (1069), emumerating the three palaces, speaks of the Tarkol, we ought most likely to read Twkol or Takol, with reference to the people of this district. The Granis is the river of Abushir. [Granis.] [V.]

TA'OCHI (Táoxol), a tribe in the interior of Pontus (Steph. B. s. v.), which is frequently noticed by Xenophon in the Anabasis (iv. 4. § 18). They lived in mountain fortresses in which they kept all their pussessions (iv. 7.§ I, comp. 6. §5, v. 15. § 17). They occupied the country near the frontiers of Armenia.
[L. S.]
TAPANI'TAF, (Tanavitat, Ptol. iv. 5. § 21), a people in the interior of Marmarica. [T. H. D.] TAL'E. [Tagae.]

TA'PHIAF, and more anciently TELEBO'IDES, a number of sinall islands off the western censt of Grecce, between Leucas and Acarnania (Plin. ir. 12. s. 19), also called the islands of the Taphii or
 who are frequently mentioned in the Homeric porems as pirates. (Od. xv. 427, xvi. 426.) When Athena visited Telemachus at Ithaca, she assumed the form of Mentes, the leader of the Taphisis. (Od. i. lo5.) The Taphians or Teleboans are celebrated in the legend of Amphitryon, and are said to have been subdued by this hero. (Herad. v. 59 ; Apollod. ii. 4. §§ 6, 7 ; Strab. l.c.; Plaut. Amph. i. 1 ; Ifict. of Biug. art. Amphithyon.) The principal island is called Taphos (Táфos) by Homer (Od. i. 417 ), and by later writers Taphius, Taphiussa, or Taphias (Taфıous, Taфıỗ $\sigma a$, Tapıás, Strab. l.c.; Plin. Lc.; Steph. B. s. v. Táфos), now Meganisi. The next largest island of the Taphii was Carnus, now Kilamo. (Neylax, p. 13; Steph. B. s. v.; Leake, Northern Grece, vol. iv. p. 16; Dodwell, vol. i. p. 60.) Stephanus B. mentions a town in Cephallenia, named Taphus, represented by the modern Tufii, where many ancient sepulchres are found. (Leake, Northern Greece, vol. iii. p. 67.)

TAPHIASSUS. [Aetolita, p. 63.]
TAPHIS (Itin. Anton. p. 161; Ta日is. Ptol. iv. 4. § 17 ; Tánıs, Olympiod. ap. Phot. p. 62, ell. Bekker), a town situated on the western bank of the Nile, in the Recio Dodecaschonus, S. of Philae and the Leaser Cataract. The rains of an ancient city have been discovered at Teffah in Lower Nubis, which are supposed to correspond with the ancient Taphis. It was in the neighbourhood of large stone-quarries. On the opposite side of the river was a suburb callei Contra-Taphis. Both torns in the 5 th century A. D. were occupied by the Blemmyes. [W. B. D.]

TAPHOS. [TAPmine.]
TAPHRAE or TAPHLOS (Táфpat, Steph. B. p. 642 ; cf. Mela. ii. 1 ; Plin. iv. 12. s. 26 ; Táфpos, Ptol. iii. 6. §5), that part of the neck of the Chersonesus Taurica which was cut through by a dyke and fortified (Herod. iv. 3). Pliny and Polomy (ll. cc.) mention a town called Taphrae; and Strabon (vii. 308) also notices at this spot a people called Táфpior. (Cf. D'Anville. Mém de VAc. d. Inscr. xxavii. p. 581 ; Rennell, Geogr. of Herod. p. 96 ; Mannert, iv. p. 291.) Perecop, or Presecop, the modern name of the isthmus, also signities in Rassian a ditch or entrenchment. (Clarke, Trav. ii. p. 316.)
[T. H. D.]
TAPHROS. [TAURES.]
TAPORI, a people of Lusitania. (Plin. iv. 22. s. 25.)
[T. H. D.]
TAPOSI'RIS (Tand́retpts, Strab. xvii. p. $\boldsymbol{i 9 9}$; Tandaipis, Ptol.iv. 5. § 34 ; Dinscorides, Mater. Mert. iii. 24 ; Taф $\sigma$ брıs, Steph. B. s. v.; Tapostris, Tab. Peut. : the Bosiri of Leo Africanus), was a town in the Libyan Nome, west of the Delta, and about 2.5 miles distant from Alexandreia. There were probatily several places of this name in Aegypt, since each Noine would be desirous to posisess a "tomb of Osiris." Abulfeda mentions a Busir near Schennytus, another in the Arsinoite Nome, the Fyoum ; a third at Gizeh, close to the Pyramids. The town, however, in the Libyan Nome appears to have been the most considerable of all, inasmuch as it was the place where the prefect of Alexandreia held the perioxlical census of the Libyan Nome. Its market, indeed, was so much frequented that the emperor Justinian (A.d. 527, foll.) constructed at Taposiris
a town-hall, and public baths. (Procop. de Aedif. vi. 1.) Nearer Alexandreia was a sinaller town of

TAPPUAH or BETH-TAPIUAH, a city in Palestine, upon the mountains of Judah, not far from Hebron, which Robinson identifies with the ancient village of Teffuh, lying in the midst of olivegroves and rinegards. (Josh. xv. 53; Rubinson, Bibl. Kes. vol. ii. p. 71, 2nd ei.) There was another Tappuah in the plain of Judah (Josh. xv. 34): but which of these was the place conquered by Juohua, cannot be determined. (Josh. xii. 17.)

TAPRO'BANE (ì Taxpubávŋ, Strab. i. 63, xv. 690. Sc. : Steph. B. s. v.; P'ol. vii. 4 ; Plin. vi. 22. 6. 24 ; Mela, iii. 77 ; Ov. ex I'ont. i. 5. 80), a very barge island, now Ceylon. It is situated to the SE. of the peninsula of Mindostin, and is all but joined to the continent by a reef now called Adan's Bridge, and by an island called Ramisúr or Rumisceram Cor, the K $\hat{\rho} \rho \nu$ of Ptolemy (vii. 1. § 11) and the Insula Solis of Pliny (vi. 22. s. 24). (Comp. Duncan. As. Res. v. p. 39 ; Ritter. Erdk. vi. p. 63.)

Taprobane was not known to the writers of clascical anticuity before the time of Alexander the Great, and the various narratives which have reached the West subsequent to his invasion of the Panjáb, though often correct as to its natural productions, are singularly erroneous as to its position, its size, and its sinape. Thus Onesicritus estimates it at 5000 stadia, though whether this number implies length, breadth, ar circumference, is not stated by Strabo (xv. p. 690). If the last, he is nearly correct, Rennell considering this to be about 660 miles. (See Map, and Memoir of India.) He adds that it was twenty days' sail from the continent - the ships being badly conatructed and unfit for sailing; a view remarkably confirmed by Pliny, who notices the change in the lengtb of the voyage owing to the improved kind of vessels, and the shallow character of the intervening strait (vi. 22. s. 24). Eratasthenes reduces the distance to a navigation of seven days - the same time as Pliny states (l. c.); but this is far too great (Strab. xv. p. 691), as it is really little more than 50) miles from its nearest shores to the mainland of Hindestin. (Vincent, Voy. of Nearchus, i. p. 49.5; Loyd, in Ind. Ann. Regist. 1799.) Eratusthenes is still more erroneous in the position he assigus to the island, for he extends it 8000 stadia in the direction of Africa (Strab. l.c.), while the author of the Periplus M. Erythr. makes it reach almost to the crast of Azania (c. 61, ed. Müller) - an error which has prubably led to that of Edrisi, who has confounded C. Comorin with Madagascar, and in his map has even placed this island to the E. of Ceylon. strabo supposes that Ceylon is not less than Britain (ii. p. 130), and Ptolemy gives it a length of more than 1000 miles, and a breadth of more than 700 (i. 14. §9, vii. 28. §3). (Compare with this the statement of Marco Polo, which is, as to circumference, identical with Ptolemy, l.c.; and Caesar Frederick, ap. Hackluyt's Voy. ii. pp. 225-227.)

The history of ancient Ceylom falls naturally ints three heads: 1. What may be gathered from the writers who followed the march of Alexander. 2. What we may learn from the Roman writers. 3. What may be obtained from the Byzantines.

Of the times preceding the invasion of India by Alexander we have no distinct notice in classical bistory; yet it may be inferred from Pliny that come report of its existence had reached the West,
where he states that it had long been the opinion that Taprobane was another world, and bore the name of Antichthonus, but that it was determined to be an island about the aera of Alexander (vi. 22. s. 24): while it is not impusisible that Herodotus may have heard some tradition on the subject, since hg states that cinnamon is produced in those countries in which Dionysus was brought up (iii. 111); from which passage, however, it cannot be determined whether the true cinnamon, that is the bark of the slirub, is intended, or some other kind of cassia.

To the first class of writers belong Onesicritus, the companion of Alexander, Megasthenes and Daimachus, who were sent as ambassadors by Seleucus to Sindrocottus (Chandragupta) and his son Amitrochates (Amitraghita), from whose memorials almost all that is preserved in Strabo and in the earlier portion of the notice in Pling has been taken. There is no reason to suppose that either Onesicritus or Megasthenes themselves visited this island; they probably collected, while in India, the narratives they subsequently compiled.

The second class of writers are of the perind when the vast commerce of Alexandria had extended to India subsequent to the death of Strato, A. D. 24. (Groskurd, Proleg. in Strab. i. p. 16.) Previous to this period, some few ships may have reached India from Erypt; but, from Strabo's own statement, they appear to have been those only of private individuals (l. c.). Pliny, the writer of the Periplus of the Erythraean Sea, Marcian of Heraclea, Mela, and Ptolerny, belong to this class, and, in the fulness of their narratives, show clearly how much additional knowledge had been acquired dnring the extension of the power of the early emperors of Rome.

Lastly, under the head of Byzantine writers, we have the remarkable account of the island in Cosmas Indicopleustes, the latest which belongs to the period of ancient or classical history.

The most important notice is that of Pliny (l.c.), who states that ambassadors from the island were received at Rome by the emperor Claudius, through the instrumentality of the freedman of a certain Annius Plocamus, who, after having been driven out of his course upon the island, remained there six months, and became intimate with the people and their rulers. He states that Plocamus landed at a port he calls Hippuros, which may be identified with the modern Kudremalai, which means the same in Sanscrit; and that the name of the king was Rachix, evidently the Indian Rajah: he adds that the island contained 500 towns, the chief of which was called Palaesimundum, and a vast lake Megisba, from which flowed two rivers, one called Cydara (Kundara or Kadambo in the Annals, nuw Aripo). It is not possible accurately to determine what modern place is to be identified with Megisba, but the Mahavanso speaks of enormons works of this nature attributed to Vasabha and other early kings. (Mah. pp. 65, 210, 221, 215.) Pliny adds some astronomical facts, which are not equally coincident with the truth; and remarks on the richness of the island in precious stones and metals, and on the fineness of the climate, which pxtended the life of man beyond its usual limits.

We may mention also, that Diodorus tells a remarkable story, which has been generally held to refer to Ceylon, though this is not capable of proof. According to him Iambulus, the son of a merchant, on his way to the spice countrics, was taken prisoner

## TAPROBANE

by the Aethiopians，and，after a time，with one other companion，placed in a boat and left to his fate． After a long voyage，be came to an island，rich in all kinds of natural productions and 5000 stadia
 Iambulus stayed there seven years，and thence went to Palibothra，where he was well received by the king，who is said to have been $\phi i \lambda(\lambda \lambda \lambda \eta \nu$（Diod．ii．55， \＆c．）．That the details of this voyage are fabulous no one can doubt，yet the narrative is probably founded on fact，and points to an early intercourse between the shores of Eastern Africa and India．

The fullest and by far the most interesting account of Ceylon，is that preserved by Cosmas Indicoplens－ tes，which was published by Montfaucon（Cull． Nov．Patr．ii．p．336）．Cosinas，who flourished in the reign of Justinian，about A．D．535，states that he obtained his information from a Greek named So－ patrus，whom he met at Adulis．According to this writer，the Taprobane of the Greeks is the Sielediba of the Hindus，an island lying beyond the Pepper Coast， or Malabar，and having near it a great number of small islands（i．e．the Maldives）．He reckons it about 900 miles in length and breadth，a measure he deduces from a native measare called Gaudia （still said to be known in the island，and the same as the Tamil naliguai，Vincent，ii．p．506）．There were，at the time he received his information，two kings in the island，one the possessor of the Myacinth （i．e．of the mountain districts which abound in pre－ cious stones），and the other of the plain country and coast，where in later times the Arabians，Purtu－ guese，Dutch，and English，have in succession esta－ blished factories．A Christian church，he adds，
 тıa⿱亠凶禸，with a priest and deacon ordained in Per－ sia．There is no doubt that these were Nestorians， whose Catholicos renided at Ctesiphon，and who，on the Malabar coast，are often called Christians of St． Thomas．He determines the position of Sielediba， by stating that it is as far fronit it China，as from the Persian Gulf to the island（ $p .138$ ）．Again， he says，which is less correct，that Sieledita is five days＇sail from the continent ；and that on the con－ tinent is a place named Marallo（Marawar P），which produces the pearl oysters；and adds，that the king of Ceylon sells elephants for their height ；and that in India elephants are trained for war，while in Africa they are captured fur their ivory．Horses imported from Persia pay no tax．It is remark－ able that this notice of the elephants is in strict accordance with that of Aelian，who asserts that they were bred in Ceylon and transported in large native vessels to the opposite continent，and sold to the king of Calingae（Hist．An．xxvi． 18）．Pliny（l．c．），on the authority of Onesicri－ tus，affirms that larger and nore warlike elephants are reared in this island than anywhere else in India， and that the hunting of them was a constant sport：and Ptolemy places under the Malea M．（Ailam＇s Pead） his $\lambda_{\lambda \epsilon \phi}{ }^{2} \nu \tau \omega \nu \nu o \mu a l$ ，in the exact position in which they were，till lately，most abundant（vii．4．§ 8）． The testimony of all modern travellers on the subject of the Ceylon elephant is，that those bearing great tusks，and therefure valuable for their ivory，are ex－ tremely rare in the island．（Compare also Dionys． Perieg．v．593，who calls Ceylon $\mu \boldsymbol{\eta} \tau \epsilon \rho a$＇A $\sigma \iota \eta \gamma \in \nu \in \omega \nu$ Inc申avicuv；Alex．Lychn．in Stepb．B．，who speaks of évpsavoc eגeqárres as the product of the island； Solin．c．56；and Tzetzes Chih．viii．Mist．215）． Coomas cuncludes his remarkable story with a notice
of a conference between the king of Ceylon and S － patrus，in which the latter convinced the king that the Romans were a greater people than the Persians， by exhibiting some gold coins of Byzantium．It confirms the veracity of the narrator that we know from other sources that the Sassanian princes of the sixth century had only silver money，while at the capital of the Eastern Empire gold coin was not rare．There were many temples in the island，one of them famous for a hyacinth of extraordinary size．
Few islands have lorne，at different times，so large a number of names：as many of these have consider－ able interest，we shall notice them in succession．

The first，as we have stated，by which it was known to the Greeks was Tampo\＆dun．Sereral ex－ planations have been given of this name；the best is probably Tamraparni（Sanscrit for red－leaved ；cf． Burnouf，Journ．Asiat．viii．p． 147 ；Mahavanso，ed． Turnour，p．50；Lassen，Insh．Ling．Prucrit．p．246）， a form slightly changed from the Puli Támbapanni， the spot where the first king Vignya is said to have landed（Mahazanso，l．c．）．This name is not on－ known in other Indian writings：thus we find so named a place on the adjoining continent of Hindo－ stin，and a river of the same district which Hows from the Ghats into the sea near Tinnerelly（Wilson， Vishnu Purana，p．176）；and a pearl－fishery at the mouth of this stream is noticed in the Raghu－mansn （iv．p．50；cf．also İishnu Purana，p．175，and Asiut． Research．viii．p．330）．Other interpretations of Taprobane may be found in Bochart（Geogr．Sacra， p．692），who，after the fashion of the scholars of his day，derives it from two Hebrew words，and imagines it the Ophir of the Bible；Wahl（Erdbeschr．r． Ost－Indien，ii．682，683），Mannert（v．p．285）， Duncan（Asiat．Research．v．p．39），Gladwin（Ayin Aliberi．iii．36），Bobler．（Altes Indien，i．27），Vin－ cent（I＇eriplus，ii．p．493），none of which are，how－ ever，free from objection．There can be no doubt that the early language of Ceylon approximated very closely to that of the adjoining continent，and wrs，in fact，a form of Tamil．（Cf．Rank，Cinyal． Skrift．p．1，Colombo，1821；Buchanan Hamiltur， ap．M．Martin＇s East India，ii．p．795；cf．aloo Ptol．viii．1．§ 80）．It may be observed that the name Tambapanni is fuund in the Girnar inscrip－ tion of Asoka（B．C．280），and would therefore na－ turally be known to the Scleucidan Greeks．（As． Journ．Beng．vii．p．159．）

We may add that Pliny states that the ancient inhabitants were called by Megasthenes Palacogomi （l．c．），doubtless the translation into Greek of some Indian name．It is not impossible that Megasthenes may have been acquainted with the Indian fable， which made the Rakshasas，or Giants，the children of the Earth，the earliest inhabitants of this island．

The next name we find applied to Ceylon was that of Simundu or Palaesimundu，which is fonnd after the time of Strabo，but had，nevertheles， gone out of use before Ptolemy．（Ptol．Lc．；Steph． B．s．v．Taprobune ；Peripl．Mf．E．，ed．Hudson， p．2；Murcian，ed．Hudson，p．26，and pp．2，9．） There is a difficulty at first sight about these names， as to which form is the correct one：on the whole， we are inclined to acquiesce in that of Palaesimundu （Maraugınoúvoov），on the authority of Marcian （l．c．）and of the Periplus（§ 61，ed．Müller）．Yliny， too，in his account of the embassy to Rome，calis the city，where the myal palace was，Palaesimundu． There can be little doubt that this word is the Graecised form of the Sanscrit Puli－Simania，the

Head of the Holy Law, which is confirmed by another name of analogous character, Andrasimundu (Ptol. vii. 4), a promontory now called Calpentyn (Mannert, Le. p. 211). The ancient city noticed by Pliny, with the royal palace, must be that elsewhere called Asurogrammon, and by the natives Anuríjápura, the roval seat of empire from B. c. 267 to A. D. 769 (Mahawanso, Intr. p. 1xi.). (For other derivations of Palaesimundu, see Dolwell, Lissert. de Geogr. Din. p. 95; Wahl, Eirdbeschr. ii. p. 684; Renaudot, Anc. Relat. des Indes, p. 133; MalteBran, Précis de Géogr. iv. 113: Mannert, i. p. 210; Paolino-a-St. Barth, loyage aux Indes, ii. p. 482.) The conjecture of Wilford (As. Res. x. p. 148) that it may be Sumatra, and of Heeren (Soc. Reg. Götting. vol. vii. p. 32) that it is the town of " Pontgemolle," do not need refutation.

The other names which this island has borne appear to have been as follow: Salice, with its inhabitants, the Salae, Serendivus, Sielediba, Serendib, Zeilan, Ceylon. These are all closely connuected and in reality euphonic modifications of one original form. The tirst, Salice, - perhaps more correctly Saline, - which seems to have been in use when Ptolemy wrote the common name of Taprobane ( $L$ c.), is certainly derivable from Sinala, the Pali form of Sinhala (Mahaw. cap. vii. p. 50): from this would naturally come the Eiene of Cosmas (Cosm. Indicopl. Le.), the termination of this name, $\delta, 6 a$, being nothing more than the Sanscrit duipa, an island. (Cf. in the same neighbourhood the Lakkadive and Maldive islands.) The slight and cominon interchange of the $\mathbf{L}$ and $\mathbf{R}$ gives the Serendivus of Ammianus (xxii. 7). From this, again, we obtain the more modern forms of the Arabic, Dutch, and English. Sinhala would mean the abode of lionswhich word is found with the same sense, and the form Sengkialo, in the narrative of the Chinese trarellers who visited Ceylon in A. D. 412. (Foe-koue-ki, p. sli., cf. p. 328, Annot. p. 336). Besides these names there is one other whereby alone this island is known in the sacred Brahminical writings. This is Lanka (see Mahábh. ii. 30, v. 1177, iii. c. 278, sce.). It is most likely that this name had passed out of use before the time of Alesander, as it is not mentioned by any of the classical writers : it has been, bowever, preserved by the Buddhists, as may be seen from the notices in the Mahatanso (pp. 2, 3, 49, \&c.). (Comp. also Colebrooke, Ess. ii. p. 427; Daris in As. Res. ii. p. 229.)

Ceylon is a very mountainous island, the greater masses being grouped towards the southern end, and forming thereby the watershed for most of its rivers. The ancients had a tolerably accurate knowledge of the position of these hills. To the N. were the Montes Galibi, terminating in a promontory called Boreum (now Cape Pedro), and overlooking the principal capital, Anurajápura. To the S . the great chain was kiown by the generic name of Malea, doabtless 2 forin derived from the Sanscrit Mala, a mountain. The centre of this group is the wellknown Adam's Peak-in the native Pali language, Samara Kúta (the Mountain of the Gods) (Upham, Sacred Books of Ceylon, iii. p. 202), and the high land now called Neura-Ellia.

The principal rivers of Ceylon, as known to the ancients, were the Phasis, which flowed froin the Montes Galibi in a northern direction; the Ganges (now Makavali-Ganga) the chief of all the streams whereby the island is watered, the principal source of which is in the S. range, of which

Adam's Peak is the pre-eminent mountain (Brooke on Mahavella-Ganga, Roy. Geograph. Journ. iii. p. 223), and whase course is nearly NE.; the Baraces, which rose in the M. Malea, and flowed SE. ; and the Soanas, which flows from the same source in a westerly direction. Besides these rivers was the celebrated lake called Megisba. the size of which has been extravagantly overstated by Pliny (vi. 22.8.24). It is prubable that this lake was formed by the connecting together of several great tanks, many remains of which still exist ; and thus Forbiger suggests that it may be near the mouths of the Maharali-Ganga, in which neighbourhood there are still extraordinary remains of canals. earthworks, \&c. (Brooke, l.c.). It was on the shores of this lake that Pliny placed the capital Palaesimundum, with a population of 200,000 souls. The island was rich in towns and peoples, which are not clearly distinguished by ancient writers ; of these the Anurngrammi with the town Anurogrammon (now Anurijipura) is the most important. The greatness of this place, which was the royal residence of the kings from b.c. 267 to A.d. 769 (Ma/awanso, Introd p. Ixi.), is shown by the vast remains which still exist on the spot. (Chapman, Ancient Anurájúpura, in Trans. Roy. As. Soc. ii. pl. ii. p. 463).

Other less known peoples and - places were the Snani, Sandocandae, Khogandani, Danae (now Tanyalle), the Norduli with their seaport Mordulamne, the Nagadibi, Spartana (now Trincomali), Maagrammon (probably Tamankadave), and the Modutti. For these and many more we are indebted to Ptolemy, who from his own account (i. 17. §4), examined the journals and conversed with several persons who had visited the island. It is a strong confirmation of what he states, that a considerable number of the names preserved can be re-produced in the native Indian form.

The people who inhabited the island were for the most part of Indian descent, their language being very nearly connected with the Pali, one of the most widely spread Indian dialects. To this race belong all the monuments which remain of its former greatness, together with a very curious and authentic series of annals which have been of late brought to light by the exertions of Sir Alexander Johnston and the critical acumen of Mr. Turnour (Mahawanso) and Upham (Sacr. Hist. Books). There are, however, still existing in the island some few specimens of a wholly different race, locally known by the name of the Veddahs. These wild and uncivilised people are found in the valleys and woods to the E. and S. of the Mahavali-Ganga; and are, in all probability, the remains of the aboriginal race who dwelt in the land antecedent to the arrival of Vigaya and his Indian followers. In physiognoiny and colour they bear a striking resemblance to the earliest inhabitants of the S . provinces of Hindostan and are, most likely, of similarly Scythic origin. (Knox, Account of Ceylon, Lond. 16.57; Perceval, Account of Ceylon, Lond. 1803: Gardiner, Descr. of Ceylon, Lond. 1807; Davy, Ceylon and its Inhabitants, Lond. 1821; W. TAPSUS FIUVIUS．［Tharge a．］
TAPU＇RA（Táто⿱䒑⿻二丨冂刂），，a town of uncertain site in Armenia Minor，is mentioned only by Ptoleny（ v ． 7．§ 3）． ［L．S．］
TAPUREI（Tatov́peot，Ptol．vi．14．§§ 12．13）， a tribe in Scythia intra Imaum．
［T．H．D．］
TAPU＇RI（Tánoupol or Tánvool，Strab．xi．p． 520；Plin．vi．16．s．18），a tribe whose name and probable habitations appear，at different periods of history，to have been extended along a wide space of country from Armenia to the east－ ern side of the Oxus．Strabo places them along－ side the Caspian Gates and Rhagne，in Parthia， （xi．p．514），or between the Derbices and Hyrcani （xi．p．520），or in company with the Amardi and other people along the southern shores of the Cas－ pian（xi．p．52．3）；in which last view Curtius（vi． 4. § 24，viii．1．§ 13），Dionysius（de Situ Orbis，733）， and Pliny（vi．16．s．18）may be considered to co－ incide．Ptolemy in one place reckons them among the tribes of Media（vi．2．sif），and in another ascribes them to Margiana（vi．10．§ 2）．Their name is written with some differences in different authors； thus Tánoupot and Tárı$\cdot \rho \frac{1}{c}$ occur in Strabo；Ta． puri in Pling and Curtius；Támupsoc in Steph．B． There can be no doubt that the present district of Taberistin derives its name from them．Aelian （V．H．iii．13）gives a peculiar description of the Tapuri who dwelt in Media．（Wilson，Ariana，p． 157．）
［V．］
TAPU＇RI MONTES，a chain of mountains，in Scythia，to the N．of the Jaxartes，apparently a portion of the A／tai range，towards its western ex－ tremity（Ptol vi．14．§7）．It may，however，be doubted whether this view of Ptolemy is really correct．It would seem more likely that they are con－ nected with the Tapuri，a tribe who nearly adjoined the Hyrcani［Tapuri］；and this a notice in Polybius would appear clearly to imply（v．44）．
［V．］．
TARACHI（Tápaxoı，Ptol．vii．4．§8），a tribe of Taprobane or Ceylon，who occupied the SE．corner of the island below the Malea mountains（Adam＇s Peak）．They appear to have had a port called＇H $\lambda$ iou $\lambda_{i}^{\prime} \mu \eta \nu$ ，probably in the neighbourhood of the present Vintam．Near to them was a river called the Barace（Ptol．vii．4．§ 5）．It is not unlikely that the river and the people had once the same name， which has since been modified by the change of the initial letters．
［V．］
TARANDRUS（Tápavסpos：Eth．Tapd $\nu \delta \rho$ oos），a place in Phrypia of unknown site，is mentioned only by Stephanus Byz．（8．v．）．
［L．S．］
TARANEI，a people in Arabia Deserta of un－ known site．（Plin．ri．28．8．32．）

TARAS［TaRENTUM．］
TARASCON（Taparкஸ́v：Tarascon），a town in the Provincia Narbonensis，on the east side of the Rhone，between Arles and Avignon The railway from Avignon to Marseille passes through Taruscom， and there is a branch from Tarascon to Nímes． Ptoleny（in whose text the name is written Tapov－ $\sigma \kappa \omega \nu)$ enamerates Tarascon among the towns of the Salyes［Salyes］．Strabo（iv．p．178）says that the rond from Nemausus（Nimes）to Aquase Sestiae passes through Ugernum（Beaucuire）and Tarascon， and that the distance from Nemausus to Aquae Sextiae is 53 Ruman miles；which，as D＇Anville ob－ serves，is not correct．In another passage（iv．p．187） Strabu makes the distance from Nimes to the bank of the Rhome opposite to Tarascon about 100 stadia， which is exact enough．［Tarusconienses．］［G．L．］

## TARENTUM．

## TARBA．［Tarmha．］

TARBELLL（Tápbechot，Táp6e入ot）are men－ tioned by Caesar among the Aquitanian peoples （B．G．iii．27）．They lived on the shores of the Ocean，on the Gallic bay（Strab．iv．p．190），of which they were masters．Gold was found abundantly in their country，and at little depth．Some pieces were a handful，and required little purification．The Tar－ belli extended scuthwards to the Aturis（ $A$ deur）and the Pyrences，as the passages cited from Tibulius （i．7，9）and Lucan（1＇harsal．i．421）show，so far as they are evidence ：－
＂Qui tenet et ripas Aturi，quo littore curvo Molliter admissum claudit Tarbellicus aequor．＂
Ausonius（Parent．iv．11）gives the name＂Tar－ bellus＂to the Ocean in thene parts．Ptolemy（ii． 7. §9）places the Tarbelli south of the Bituriges Vi－ visci，and makes their limits extend to the I＇yrenees． He names their city＂roara Airgovora，or Aquae Tarbellicae．［Aquae Tarbelimeae．］

Pliny（iv．19）gives to the Tarbelli the epithet of Quatuorsignani，a term which indicates the establish－ ment of some Ronan soldiers in this country，as in the case of the Cocossates，whom Pliny names Six－ signani．［Cocossatis．］The country of the Tar－ belli contained hot and cold springs，which were near one another．
［G．L．］
TARBESSUS（TapEnt $\sigma$ ós），a town of l＇isidia， mentioned only by Strabo（xii．p．570）．［L．S．］

TARENTI＇NUS SINU＇S（ $\delta$ Tapaytivos к $\delta \lambda \pi=5$ ： Golfo di Taranto）was the name given in ancient as well as in modern times to the extensive gulf cons－ prised between the two great promontories or penin－ sulas of Southern Italy．It was bounded by the Iapygian promontory（Capo della Leuca）on the N．， and by the Lacinian promontory（Capo delle Co－ lonne）on the S ．；and these natural limits being clearly marked，appear to have been gencrally re－ cognised by ancient geographers．（Strab．vi．pp． 261,262 ；Mel．ii．4．§ 3 ；Plin．iii．11．s．16； Ptol．iii．1．§ 12．）Strabo tells us it was 240 miles in extent．following the circuit of the shores，and $7(0)$ stadia（ $87 \frac{1}{2}$ miles）across from headland to headland． Pliny reckons it 250 miles in circuit，and 100 miles across the opening．The latter statement consider－ ably exceeds the truth，while Strabo＇s estimate is a very fair approximation．This extensive gulf de－ rived its name from the celebrated city of Tarentum， situated at its N E．extremity，and which enjoyed the advantage of a good port，almost the only one throughout the whole extent of the gulf．（Strab． vi．p．278．）But notwithstanding this disadvantage， its western shores were lined by a anccession of Greek colonies，which mse into flourishing cities． Crotona，Sybaris，Metapontum，and，at a later period， Heraclea and Thurii，all adorned this line of coast； the great fertility of the territory compensating fur the want of natural harbours．On the northern or lapygian shore，on the contrary，the only city was Callipolis，which never rose above a subondinate con－ dition．
［f．H．B．］
TARENTUM（Td́pas，－aytos：Eth．Tapavtivos， Trentinus：Taranto），one of the most pwwerful and celebrated cities of Southern Italy，situated on the N ．shore of the extensive bay，which derived from it，both in ancient and modern times，the name of the gulf of Tarentum．（Tabraminces Sinis： $\delta$ Tapantivos кó入пos：Golfo di Taranto）．It was included within the limits of the province of Calabria， as that term was used by the Romans；but the Grecks
wnuld generally hare reckoned it a city of Magna Graecia, and not have regarded it as included in lapygia. Its situation is peculiar, occupying a promontory or peninsula at the entrance of an extensive but shallow bay, now called the Mare Piccolo, but in ancient times known as the Port of Tarentum, an inlet of above 6 miles in length, and from 2 to 3 in breadth, but which was so nearly closed at its mouth by the peninsula occupied by the city, that the latter is now connected by a bridge with the opposite side of the harbour. There can be no doubt that the ancient city originally occupied only the same space to which the modern one is now contined, that of the low but rocky isiet which lies directly across the mouth of the harbonr, and is now reparated from the mainland at its E. extremity by an artificial fosse or ditch, but was previonsly juined to it by a narrow neck of sand. This may probably have been itself a later accumulation; and it is not unlikely that the city was originally founded on an isliud, somewhat resembling that of Ortygia at Syracuse, which afterwards became joined to the mainland, and has again been artificially separated from it. As in the case of Syracuse, this island or peninsula afterwards became the Acropolis of the enlarged city, which extended itself widely over the adjoining plain.

Tarentum was a Greek city, a colony of Sparta. founded within a few years after the two Achaean colonies of Sybaris and Crotona. The circumstances that led to its foundation are related with some variation by Antiochus and Ephorus (both cited by Strabo), but bothathors agree in the main fact that the colonists were a body of young men, born during the First Messenian War under circumstances which threw over their birth a taint of illegitimacy, on which account they were treated with contempt by the other citizens; and after an abortive attempt at creating a revilution at Sparta, they determined to emigrate in a body under a leader named Phalanthas. They were distinguished by the epithet of Partheniae, in allusion to their orisin. Phalanthus, who was apparently himself one of the disparaged class, and had been the chief of the conspirators at Sparta, after consulting the oracle at Delphi, became the leader and founder of the new colony. (Antio chus, ap. Strab. vi. p. 278; Ephorus, Ib. p. 279; Serv. ad Aen. iii. 551; Diod. xv. 66; Justin, iii. 4; Scymn. Ch. 332.) Both Antiochus and Ephorus represent them as establishing themselves without difficulty on the spot, and received in a friendly manner by the natives; and this is far nore probable than the statement of Pansanias, according to which they found themselves in constant warfare; and it wes not till after a long struggle that they were able to make themselves masters of Tarentum. (laus. $x$. 10. §6.) The same author represents that city as previonsly occupied by the indigrnous tribes, and already a great and powerful city, but this is highly improbable. The name, however, is probably of native origin, and seems to have been derived from that of the small river or stream which alwass continued to be known as the Taras; though, as usual. the Greeks derived it from an eponymous hero named Taras, who was represented as a son of Neptone and a nymph of the country. (Paus. Ib. §8.) It is certain that the hero 'Taras continued to be an object of special worship at Tarentum, while Phalanthus, who was revered as their Oekist, was frequently associated with him, and gradually became the subject of many legends of a very mythical character,
in some of which he appean to have heen confounded with Taras himself. (laus. x. 10. §§ 6-8, 13. § 10; Serv. ad Aen. l.c.) Nevertheless, there is no reason to doubt the historical character of Phalanthus, or the Lacedaemonian origin of Tarentum, which was confirmed by numerous local names and religious observances still retained there down to a very date period. (I'ol. viii. 30, 35.) The Roman poets also abound in allusions to this origin of the Tarentines. (Hor. Carm. iii. 5. 56, ii. 6. 11; Ovid. Met. xv. 50, \&c.) The date of the foundation of Tarentum is given by Hieronymus as B. c. 708, and this, which is in accordance with the circumstances related in connection with it, is probably conrect, though no other author has mentioned the precise date. (Hieron. Chron. ad OI. xviii.)

The history of Tarentum, for the first two centuries of its existence, is, like that of most other cities of Magna Graecia, almost wholly utiknown. But the main fact is well attested that it attained tu) great power and prosperity, though apparently at first overshadowed by the superior power of the Achaean cities, so that it was not till a later periox that it assumed the predominant position among the cities of Magna Graecia, which it ultimately attained. There can be no doubt that it owed this prosperity mainly to the natural advantages of its situation. (Scyinn. Ch. 332-336; Strab. vi. p. 278.) Though its territory was not so fertile, or so well adapted for the growth of grain as those of Metapontum and Siris, it was admirably suited for the growth of olives, and its pastures produced wool of the finest quality, while its port, or inner sea as it was called, abounded in shell-fi.h of all descriptions, among which the Murex, which produced the celebrated purple dye, was the most important and valuable. But it was especially the excellence of its port to which Tarentum owed its rapid rise to opulence and power. This was not only iandlocked and secure, but was the only safe harbour of any extent on the whole shores of the Tarentine gulf; and as neither Brundusium nor Hydruntum, on the opposite side of the Messapian peninsula, had as yet attained to any eminence, or fallen into the hands of a seafaring people, the port of Tarentum became the chief emporium for the commerce of all this part of Italy. (1'ol. x. 1; Flor. i. 18. § 3.) The story of Arion, as related by Herodotus (i. 24) indicates the existence of extensive commercial relations with Corinth and other cities of Greece as early as the reign of Periander, в. c. 625-585.

As the Tarentines gradually extended their power over the adjoining territories, they naturally came into frequent collision with the native tribes of the interior,-the Messapians and I'eucetians; and the first events of their history recorded to us relate to their wars with these nations. Their offerings at Delphi noticed by Pausanias (x. 10. § 6, 13. § 10 ), recorded victories over both these nations, in one of which it appears that Opis, a king of the Iapygians, who had come to the assistance of the Peucetians, was slain; but we have no knowledge of the dates or circumstances of these battles. It would appear, however, that the Tarentines were continually ${ }^{\text {gain- }}$ ing ground, and making themselves masters of the Messapian towns one after the other, until their progress was checked by a great disaster, their own forces, together with those of the Rhegians, who had been sent to their assistance, being totally de. feated by the barbarians with great slaughter. (Herod. vii. 170; Divd. xi. 52.) So heary was their
loss that Herodotus, without stating the numbers, says it was the greatest slaughter of Greeks that had occurred up to his time. The loss seems to lase fallen especially upon the nobles and wealthier citizens, so that it became the occasion of a political revolution, and the government, which had previously been an aristocracy, became thenceforth a pure democracy. (Arist. Pol v. 3.) Of the internal condition and constitution of Tarentum previously to this time, we know scarcely anything, but it seems probable that its institutions were at first copied from those of the parent city of Sparta. Aristotle speaks of its government as a жо入íteia, in the sense of a mixed government or commonwealth; while Herodotus incidentally notices a king of Ta rentuin (iii. 156), not long before the Persian War, who was doubtless a king after the Spartan model. The institutions of a democratic tendency noticed with commendation by Aristotie (Pol. vi. 5) probably belong to the later and democratic period of the constitution. We hear but little also of Tarentum in connection with the revolutions arising out of the influence exercised by the Pythagoreans: that sect had apparently not established itself so strongly there as in the Achaean cities; though many Tarentines are enumerated among the disciples of Pythagoras, and it is clear that the city had not altogether escaped their influence. (lambl. Vit. Pyth. 262, 266: Porphyr. Vit. Pyth. 56.)

The defeat of the Tarentines by the Messapians, which is referred by Diodorus to B. C. 473 (Diod. xi. 52), is the first event in the history of Tarentum to which we can assign a definite date. Great as that blow may have been, it did not produce any permanent effect in checking the progress of the city, which still appears as one of the most flourishing in Magna Graecia. We next hear of the Tarentines as interfering to prevent the Thurians, who had been recently established in Italy, from making themselves masters of the district of the Siritis. On what grounds the Tarentines could lay claim to this district, which was separated from them by the intervening territory of Metapontura, we are not infurmed; but they carried on war for some time against the Thurians, who were supported by the Spartan exile Cleandridas; until at length the dis. pute was terminated by a compromise, and a new colony named Heraclein was fuunded in the contested territory (в.c. 432), in which the citizens of both states participated, but it was agreed that it should be considered as a colony of Tarentum. (Antioch. ap. Strab. vi. p. 264 ; Diod. xii. 23, 36.) At the time of the Athenian expedition to Sicily, the Tarentines kept aloof from the contest, and contented themselves with refusing all supplies and assistance to the Athenian fleet (Thuc. vi. 44), while they afforded shelter to the Corinthian and Laconian ships under Gylippus (1b. 104), but they did not even prevent the second fleet under Demosthenes and Eurymedon from touching at the islands of the Choerades, immediately opposite to the entrance of their harbour, and taking on board some auxiliaries furnished by the Messapians. (Id. vii. 33.)

Another long interval now elapses, during which the history of Tarentum is to us almost a blank; yet the few notices we hear of the city represent it as in a state of great prosperity. We are told that at one time (apparently about 380-360 r.c.) Archytan, the P'ythagorean philowopher, exercised a paramount influence over the goverament, and tilled
the office of Strategus or general no less than seven times, though it was prohibited by law to hold it more than once ; and was successflul in every campaign. (Diog. Laert. viii. 4. §§ $79-82$.) It is evident, therefore, that the Tarentines were far from enjoying unbroken peace. The hostilities alluded to were probably but a renewal of their old warfare with the Messapians ; but the security of the Greek cities in Italy was now menaced by two more formidable fies, Dionysius of Syracuse in the south, and the Lucaniars on the north and wext. The Tarentines, indeed, seem to have at first looked upon both dangers with comparative indifference : their remote position secured them from the immediate brunt of the attack, and it is even doubtful whether they at first joined in the general league of the Greek cities to resist the danger which threatened them. Meanwhile, the calamities which befel the more southern cities, the destruction of some by Dionysius, and the bumiliation of others, tended only to raise Tarentum in comparison, while that city itself enjoyed an immunity from all hostile attacks ; and it seems certain that it was at this period that Tarentuin first rose to the preponderating position among the Greek cities in Ituly, which it thenceforth enjoyed without a rival. It was apparently as an acknowledgment of that superiority, that when Tarentum had juined the confederacy of the Greek cities, the place of meeting of their congress was fixed at the Tarentine colony of Heracleia. (Strab. vi. p. 280.)

It was impossible for the Tarentines any longer to keep aloof from the contest with the Lucsuians, whose formidable power was now beginning to threaten all the cities in Magna Graecis ; and they now appear as taking a leading part in opposing the progress of those barbarians. But they were not content with their own resources, and called in successively to their assistance several foreign leaders and generals of renown. The first of these was the Spartan king Archidamus, who crossed over into Itals with a considerable force. Of his operations there we have no account, but he appears to have carried on the war for some years, as Diodurus places his first landing in Italy in B. c. 346, while the battle in which he was defeated and sluin was not fought till the same time as that of Chaeroneia, B. c. 338. (Diod. xvi. 63. 88.) This action, in which Archidamus himself, and almost all the troops which he had brought with hin from Greece perished, was fought (as we are told), not with the Lucanians, but with the Messapians, in the neighbourtood of Manduria, only 24 miles from Tarentum (Plut. Agis. 3 ; Paus. iii. $10 . \S 5$; Divd. l. c.): but there can be no doubt, however, that both nations were united, and that the Lucanians lent their support to the Messapians, as the old enemies of Tarentum. Henceforth, indeed, we find both names continually united. A few years after the death of Archidamus, Alexander, king of Epirus, was invited by the Tarentines, and landed in Italy, b. c. 332. The operations of his successive campaigns, which were continued till B.c. 326, are very imperfectly known to us, but he appears to have first turned his arms against the Messapians, and compelled them to conclude a peace with the Tarentines, before he proceeded to make war upon the Lucanians and Bruttians. But his arms were attended with considerable success in this quarter also: be deteated the Samnites and Lucanians in a great battle near l'aestum, and penetrated into the beart of the Brut-
tian territory. Meanwhile, however, he had quarrelled with his allies the Tarentines, so that he turned against them, took their colony of Herac!eia, and endeavoured to transfer the congress of the Greak cities from thence to a place on the river Acalandrus, in the territory of Thurii. (Strab. vi. p. 280 ; Liv. viii. 24 : Justin. xii. 2.) Hence his death, in B.c. 226, only liberated the Tarentines from an enemy instead of depriving them of an ally. They appear from this time to have either remained tranquil or carried on the contest single-handed, till B. C. 303, when we find them again invoking foreign assistance, and, as on a former occasion, sending to Sparta for aid. This was again furnished them, and a large army of mercenaries landed at Tarentum under Cleonymus, the uncle of the Spartan king. But though be compelled the Messapiaus and Lucanians to sue for peace, Cleonymus soon alienated the minds of his Greek allies by his arrogance and lusurious habits, and became the object of general hatred before he quitted Italy. (Diod. xx. 104.) According to Strabo, the Tarentines subsequently called in the assistance of Agathocles (Strab. vi. p. 280); but we find no mention of this elsewhere, and Diodorus tells us that he concluded an alliance with the lapygians and Peucetians, which could hardly have been done with favourable intentions towards Tarentum. (Diod. xxi. p. 490.)

Not long after this the Tarentines first came into collision with a more formidable foe than their neighbours, the Messapians and Lucanians. The wars of the Romans with the Samnites, in which the descendants of the latter people, the Apulians and Lucanians, were from time to time involved, had rendered the name and power of Rome familiar to the Greek cities on the Tarentine gulf and coast of the Adriatic, thongh their arms were not carried into that part of Italy till about B.c. 283, when they rendered assistance to the Thurians against the Lucanians [Thurin]. But long before this, as early as the commencement of the Second Samnite War (b. c. 326), the Tarentines are mentioned in Koman history as supporting the Neapolitans with promises of succour, which, bowever, they never sent ; and afterwards exciting the Lucanians to war against the Romans. (Liv. viii. 27.) Again, in B. c. 321 we are told that they sent a haughty ennbassy to command the Samnites and Romans to desist from hostilities, and threatened to declare war on whichever party refused to obey. (Id. ix. 14.) But on this occasion also they did not put their threat in execution. At a subsequent period, probably about в. c. 303 (Arnold's Rome, vol. ii. p. 315), the Tarentines concluded a treaty with Rome, by which it was stipulated that no Roman ships of war should pass the Lacinian cape. (Appian, Samnit. 7.) It was therefore a direct breach of this treaty when, in B. C. 302, a Roman squadron of ten ships under L. Cornelius, which had been sent to the assistance of the Thurians, entered the Tarentine gulf, and even approached within sight of the city. The Tarentines, whose hostile disposition was already only balf concealed, and who are said to have been the prime movers in organising the confederacy apainst Rome which led to the Fourth Samnite War (Zonar. viii. 2.), immediately attacked the Roman ships, sunk four of them, and took one. After this they proceeded to attack the Thurians on ac-count of their having called in the Romans, expelled the Roman garrison, and made themselves masters of the city. (Appian, Samn. 7. § 1 ; Zonar. viii.
2.) The Romans sent an embassy to Tarentum to complain of these outrages; but their demands being refused, and their ambassador treated with contuanely, they had now no choice but to declare war upon the Tarentines, в.c. 281. (Appian, l. c. § 2; Zonar. L c.; Dion Cass. Fr. 145.) Nevertheless, the war was at first carried on with little energy; but meanwhile the Tarentines, following their usual policy, had invited Pyrrhus, king of Epirus, to their assistance. That monarch readily accepted the overture, and sent over his general Dilo to occupy the citadel of Tarentum with 3000 men, while he himself fullowed in the winter. (Lonar. viii. 2; Plut. Pyrrh. 15. 16.)

It is usual to represent the Tarentines as at this period sunk in luxury and effeminacy, so that they were unable to defend themselves, and hence compelled to bave recourse to the assistance of Pyrrbus. But there is certainly much exaggeration in this view. They were no doabt accustomed to rely much upon the arms of mercenaries, but so were all the more wealthy cities of Greece ; and it is certain that the Tarentines themselves (apart from their allies and mercenaries), furnished not only a considerable body of cavalry, but a large force or phalanx of heavy-armed infantry, called the Leucaspids, from their white shields, who are especially mentioned as serving under Pyrrhus at the battle of Asculum. (Dionys. xx. Fr. Didot. 1, 5.) It is unnecessary here to repeat the history of the campaigns of that monarch. His first successes for a time saved Tarentum itself from the brunt of the war: but when he at length, after his final defeat by Curius, withdrew from Italy (b. c. 274), it was evident that the full weight of the Roman arms would fall upon Tarentum. I'yrrhus, indeed, left Milo with a garrison to defend the city, but the Tarentines themselves were divided intu two parties, the one of which was disposed to submit to Rome, while the other applied for assistance to Carthage. A Carthaginian fleet was actually sent to Tarentum, but it arrived too late, for Milo had already capitulated and surrendered the citadel into the hands of the Ruman consul Papirius, B. c. 272. (Zonar. viii. 6 ; Oros. iv. 3.)

From this time Tarentum continued snbject to Rome. The mhabitants were indeed left in possession of their own laws and nominal independence, but the city was jealously watched; and a Roman legion seems to have been commonly stationed there. (Pol. ii. 24.) During the First Punic War the Tarentines are mentioned as furnishing ships to the Romans (Pol. i. 20): but with this exception we hear no more of it till the Second Punic War, when it became a military post of great importance. Hannibal was from an early period desirous to make himself master of the city, which, with its excellent port, would at once have secured his commanications with Africa. It is evident also that there was a strong Carthaginian party in the city, who shortly after the battle of Cannae, opened negotiations with Hannibal, and renewed them upon a subsequent occasion (Liv. xxii. 61, xxiv. 13); but they were kept down by the presence of the Roman garrison, and it was not till b. c. 212 that Nico and Philemenus, two of the leaders of this party, found an opportunity to betray the city into his hands. (Liv. ©xv. 8-10; Pol. viii. 26-33.) Even then the Roman garrison still beld the citadel; and Hannibal having failed in his attempts to carry this fortress by assault, wits compelled to resort to a bluckude. He cut it off un
the land side by drawing a double line of fortifications across the isthmus, and made himself master of the sea by dragging a part of the fleet which was shut up within the inner port (or Mare Piccolo), across the narrowest part of the isthmus, and launching it again in the outer bay. (Pol. viii. 34-36; Liv. xxv. 11.) This state of things continued for more than two years, during the whole of which time the Carthaginians continued masters of the city, while the Roman garrison still maintained possession of the citadel, and the besiegers were unable altogether to prevent them from receiving supplies from without, though on one occasion the Romans, having sent a considerable fleet under D. Quintius to attempt the relief of the place, this was met by the Tarentines, and after an obstinate conflict the Roman fleet was defeated and destroyed. (Liv. xxv. 15, xxvi. 39, xxrii. 3.) At length in B. c. 209 Frbius determined if possible to wrest from Hamibal the possession of this important post; and laid siege to Tarentun while the Carthaginian general was opposed to Marcellus. He himself encamped on the N . of the port, close to the entrance, so that he readily put himself in communication with M. Livius, the commander of the citalel. But while he was preparing his ships and engines for the assault, an accident threw in his way the opportunity of surprising the city, of which he made himself manter with little difficulty. The Carthagimian garrison was put to the sword, as well as a large part of the inhabitants, and the whole city was given up to plunder. (Id. xxvii. 12, 15, 16 ; Plut. Fab. 21-23.) Livy praises the magnanimity of Fabius in not carrying off the statues and other works of art in which Tarentum abounded (Liv. xxvii. 16; Plut. Fab. 23); but it is certain that he transferrel from thence to Rome a celebrated statue of Hercules by Lysippus, which long continued to adorn the Capitol. (Strab. vi. p. 278; Plin. xxxiv. 7. s. 18.) The rast quantity of gold and silver which fell into the hands of the victors sufficiently bears out the accounts of the great wealth of the Tarentines. (Liv. l.c.)

Tarentum had already suffered severely on its capture by Hannibal, and there can be no doubt that it sustained a still severer blow when it was retaken by Fabius. (Strab. vi. p. 278.) It was at first propesied to degrade it to a condition similar to that of Capua, but this was opposed by Fabius, and the decision was postponed till after the war. (Lir. xxrii. 25.) What the final resolution of the senate was, we know not; but Tarentum is alluded to at a subsequent period, as still retaining its position of an allied city, "urbs foederata." (Liv. xxxv. 16.) It is certain that it still remained the chief place in this part of Italy, and was the customary residence of the praetor or other magistrate who was sent to the S. of Italy. Thas we find in B. C. 185, L. Postumius sent thither to carry on investigations into the conspiracies that had arisen out of the Bacchanalian rites, as well as among the slave pmpulation. (Liv. xxxix. 29,41.) Bat it is nevertheless clear that it was (in common with the other Grcek cities of this part of Italy) fallen into a state of great decay; and hence, in B. c. 123, among the colonies sent out by C. Gracchus, was one to Tarentuin, which appears to have assumed the title of Colonia Neptunia. (Vell. Pat. i. 15; Plin. iii. 11. 8. 16; see Mommsen, in Berichte der Süchsischen Gesellschnft for 1849, pp. 49-51.) According to Stabu this colony becaune a flourishing one, and the
city enjoyed considerable prosperity in his day. But it was greatly fallen from its forner splendour, and only occapied the site of the ancient citadel, with a small part of the adjoining isthmus. (Strab. vi. p. 278.) It was, however, one of the few cities which still retained the Greek language and manners, in common with Neapolis and Rhegium. (Ib. $\mu$ 253.) The salubrity of its climate, as well as the fertility of its territory, and, above all, the importance of its port, preserved it from the complete decay into which so many of the cities of Magna Grsecia tell under the Roman government. It is repeatedly mentioned during the civil wars between Octarian, Antony, and Sex. Pompeius as a naval station of importance; and it was there that in B. C. 36 a fresh arrangement was come to between Octavian and Antony, which we find alluded to by Tacitus as the "Tarentinum foedus." (Appian, B. C. ii. 40, v. 50, 80, 84, 93 -99; Tac. Ann. i. 10.)

Even under the Einpire Tarentum continued to be one of the chief seaports of ltaly, though in some measure eclipsed by the growing importance of Brundusium. (Tac. Ann. xiv. 12, Hist. ii. 83.) An additional colony of veterans was sent there under Nero, but with little effect, most of them having soon again dispersed. (T'ac. Ann xiv. 27.) No subsequent mention of Tarentum is found in history until after the fall of the Western Empire, but it then appears as a considerable town, and bears an important purt in the Gothic Wars on account of its strugth as a fortress, and the excellence of its port. (Procop. B. G. iii. 23, 27, 37, iv. 26, 34.) It was taken by Belisarius, but retaken by Totila in A. D. 549, and continued in the hands of the Guths till it was finally wrested from them by Narses. From that time it continued subject to the Byzantine Empire till A. D. 661, when it was taken by the Lombard Romaaldus, duke of Beneventum ( $P$. Diac. vi. 1); and afterwards fell successively into the hands of the Saracens and the Greek emperors. The latter did not finally lose their hold of it till it was taken by Robert Guiscard in 1063. It has ever since formed part of the kingdom of Naples. The modern city of Tarentum has a population of about 20,000 souls; it is the see of an archbishop, and still ranks as the most important city in this part of Italy. But it is confined to the space occupied by the ancient citadel, the extremity of the peninsula or promontory between the two ports: this is now an island, the low isthmus which connected it with the mainland having been cut through by king Ferdinand 1 ., for the purpose of strengthening its fortitications.

Scarcely any remains are now extant of the celebrated and opulent city of Tarentum. "Never (says Swinburne) was a place more completely swept off the face of the earth." Some slight remains of an amphitheatre (of course of Roman date) are visible outside the walls of the modern city; while within it the convent of the Celestines is built on the foundations of an ancient temple. Even the extent of the ancient city can be very imperfectly determined. A few slight vestiges of the ancient walls are, however, visible near an old church which bears the name of Sta Maria di Murreta, about 2 miles from the gates of the modern city; and there is no doubt that the walls extended from thence, on the one side to the Mare Piccolo, on the other side to the outer sea. The general form of the city was thus triangular, having the citadel at the apex, which is now joined to the opposite shore by a
bridge of seven arches. This was already the case in Strabo's time, though no mention of it is found at the time of the siege by Hannibal.

The general furm and arrangement of the city cannot be better described than they are by Strabo. He sars: "While the whole of the rest of the Tarentine gulf is destitute of ports, there is here a very large and fair port, closed at the entrance by a large bridge, and not less than 100 stadia in circumference. [This is bencath the truth: the Mare Piccolo is more than 16 miles ( 128 stadia) in ciscuit.] On the side towards the inner recers of the port it forms an isthmus with the exterior sea, so that the city lies upon a peninsula; and the neck of the isthmus is so low that ships can easily be drawn over the land from one side to the other. The whole city also lies low, but rises a little towards the citadel. The ancient wall comprises a circuit of great extent; but now the greater part of the space adjoining the isthnus is deserted, and only that part still subsists which adjoins the mouth of the port, where also the Acropolis is situated. The portion still remaining is such as to make up a considerable city. It has a splendid Gymnasium, and a good-sized Agora, in which stands the bronze colrsisal statue of Jupiter, the largest in existence nest to that at Rhudes. In the interval between the Agora and the mouth of the port is the Acropolis, which retains only a few remnants of the splendid monuments with which it was adorned in ancient times. For the greater part were either destroyed by the Carthaginians when they took the city, or carried off as booty by the Romans, when they made themselves masters of it by assault. Ainong these is the colossal bronze statue of Hercules in the Capitol, a work of Lysippus, which was dedicated there as an offering by Fabius Maximus, who took the city." (Strab. vi. p. 278.)

In the absence of all extant remains there is rery little to be added to the above description. But Polybius, in his detailed narrative of the capture of the city by Hamibal. supplies as with some local names and details. The principal gate on the $E$. side of the city, in the outer line of walls, seems to have been that called the Temenid Gate (ai múnal T $\eta \mu$ èid $\delta a$, Pol. viii. 30); outside of which was a mound or tumulus called the tomb of Hyacinthus, whose worship had obviously been brought from Sparta. A broad street called the Batheia, or Luw Street, led apparently from this gate towards the interior of the city. This from its name may be conjectured to have lain close to the port and the water's edge, while another broad street led from thence to the Agora. (Ib. 31.) Another street called the Soteira ( $\left.\sum \omega \tau \epsilon i \rho a\right)$ was apparently on the opposite side of the city from the Batheia, and must therefire have adjoined the outer sea. (Ib. 36.) Immediately adjoining the Agora was the Museum (Movatiov), a public building which seems to have served for feativals and public banquets, rather than for any purposes connected with its name. ( 16 . 27. 29.) There is nothing to indicate the site of the theatre, alluded to by Polybins on the same occasion, except that it was decidedly vithin the city, which was not always the case. Strabo does not notice it, but it must have heen a building of large size, so as to be adapted for the general assemblies of the people, which were generally held in it, as was the case also at Syracuse and in other Greek cities. This is particularly mentioned on several occasions; it was there that the Roman ambassadurs
received the insult which finally led to the ruin of the city. (Flor. i. 18. § 3; Val. Max. ii. 2. § 5; Appian, Sumnit. 7.)

Livy inaccurately describes the citadel as standing on lofty cliffs (" praealtis rupibus," xxv. 11): the peninsula on which it stood rises indeed (as observed by Strabo) a little above the rest of the city, and it is composed of a rocky soil; but the whole site is low, and no part of it rises to any considerable elevation. The hills also that surruund the Mare Piccolo are of trifling height, and slope very gradually to its banks, as well as to the shore of the outer sea. There can be no doubt that the port of Tarentum, properly so called, was the inlet now called the Mare Picculo or "Little Sea," but outside this the sea on the $S$. side of the city forms a bay or roadstead, which affords good shelter to shipping, being partially sheltered from the SW. by the two small islands of S. Pietro and S. Paolo, apparently the same which were known in ancient times as the Choeraies. (Thuc. vii. 33.)

Tarentum was celebrated in ancient times for the salubrity of its climate and the fertility of its territory. Its advantages in both respects are extolled by Horace in a well-known ode (Carm. ii. 6), who says that its honey was equal to that of Hymettus, and its olives to those of Venafrum. Varro also praised its honey as the best in Italy (ap. Macrub. Sat. ii. 12). Its oil and wines enjoyed a nearly equal reputation; the choicest quality of the latter seems to have been that produced at Aulon (Hor. l. c.; Martial, xiii. 125; Plin. xiv. 6. s. 8), a valley in the neighbouhhood, on the slope of a hill still called Monte Melone [Aulon]. But the choicest production of the neighbourhood of Tarentum was its wool, which appears to have enjoyed an acknowledged supremacy over that of all parts of Italy. (1'lin. xxix. 2. s. 9; Martial, l. c.; Varr. R. R. ii. 2. § 18; Strab. vi. p. 284; Colum. vii. 2. § 3.) Nor was this owing solely to natural advantages, as we learn that the Tarentines bestowed the greatest care upon the preservation and improvement of the breed of sheep. (Culum. vii. 4.) Tarentum was noted likewise for its breed of horses, which supplied the famous Tarentine cavalry, which was long noted among the Greeks. Their territory abounded also in various kinds of fruits of the choicest quality, especially pears, fige, and chestnuts, and though not as fertile in corn as the western shores of the Tarentine gulf, was nevertheless well adapted to its cultivation. At the same time its shores produced abundance of shell-fish of all descriptions, which formed in ancient times a favourite article of diet. Even at the present day the inhabitants of Taranto subsist to a great extent upon the shell-fish produced in the M/are Piccolo in a profusion almost incredible. Its Pectens or scallops enjoyed a special reputation with the Roman epicures. (IIor. Sat. ii. 4. 34.) But by far the most valuable production of this class was the Murex, which farnished the celebrated purple dye. The Tarentine purple was considered second only to the Tyrian, and for a long time was the most valuable known to the Romans. (Corn. Nep. ap. Plin. ix. 39. s. 63.) Even in the time of Augustus it continued to enjoy a high reputation. (Hor. Ep. ii. 1, 207.) So extensive were the manufactories of this dye at Tarentun that considerable mounds are still visible on the shore of the Mare l'iccolo, composed wholly of bruken shells of this species. (Swinburne's Tracels, vol. i. p. 239.)

The clinate of Tarentum, though justly praised by Horace for its mildness, was generally reckoned soft and enervating, and was considered as in some degree the cause of the luxurious and effeminate habits ascribed to the inhabitants (" molle Tarentum," Hor. Sat. ii. 4. 34; "imbelle Tarentum," Id. Ep. i. 7. 45.) It is probable that this charge, as in many other cases, was greatly exaggerated; but there is no reason to doubt that the Tarentines, like almost all the other Greeks who became a manufacturing and commercial people, indulged in a degree of luxury far exceeding that of the ruder nations of Central Italy. The wealth and opulence to which they attained in the 4th century B. C. naturally tended to aggravate these evils, and the Tarentines are represented as at the time of the arrival of Pyrrhas enfeebled and degraded by luxurious indulgences, and devoted almost exclusively to the pursuit of pleasure. To such an excess was this carried that we are told the number of their annual festivals exceeded that of the days of the year. (Theopomp. ap. Athen. iv. p. 166 ; Clearch. ap. Athen. xii. p. 522 ; Strab. vi. p. 280; Aelian, V.IV. xii. 30.) Juvenal alludes to their love of feasting and pleasure when he calls it "coronatum ac petulans naddumque Tarentum" (vi. 297). But it is certain, as already observed, that they were not incapable of war: they furnished a considerable body of tmope to the army of Pyrrhus; and in the sea-fight with the Roman fleet off the entrance of the harbour, during the Second Punic War, they displayed both courage and skill in naval combat. (Liv. xxvi. 39.) In the time of their greatest power, according to Strabo, they could send into the field an army of 30,000 foot and 3000 horse, besides a body of 1000 select cavalry called Hipparchs. (Strab. vi. p. 280.) The Tarentine light cavalry was indeed celebrated throughout Greece, so that they gave name to a particular description of cavalry, which are mentioned under the name of Tarentines (Tapayrivor), in the armies of Alexander the Great and his successors; and the sppellation continued in use down to the period of the Koman Empire. (Arrian, Anab.; Id. Tact. 4 ; Pol. iv. 77, xi. 12 ; Liv. xxxv. 28; Aelian, Tact. 2. p. 14 ; Suidas, s. v. Taparrivou.) It is probable, however, that these may have been always recruited in great part among the neighbouring Messapians and Salleutines, who also excelled as light horsemen.

With their habits of laxury the Tarentines undouttedly combined the retinements of the arts usually associated with it, and were diligent cultivators of the fine arts. The great variety and beauty of their coins is, even at the present day, a sufficient proof of this, while the extraordinary numbers of them which are still found in the S. of Italy attest the wealth of the city. Ancient writers also speak of the numbers of pictnres, statues, and other works of art with which the city was adorned, and of which a considerable number were transported to Rome. (Flor. i. 18; Strab.vi.p. 278; Liv. xxvii.16.) Among these the most remarkable were the colus.al statue of Jupiter, mentioned by Strabo ( $L$ c.), and which was apparently still standing in the Agora in his time; the bronze statue of Hercules by Lysippus already noticed; and a statue of Victory, which was also carried to Rome, where it became one of the chief ornaments of the Curia Julia. (Dion Cass. 1i. 22.) Nor were the Tarentines deficient in the cultivation of literature. In addition to Archytax, the* I'ythagorean phalusopher, celebrated for his
mathematical attainments and discoveries, who long held at Tarentum a place somewhat similar to that of Pericles at Athens (Diog. Laert. viii. 4; Suid. 8. v. 'ApXútas ; Athen. sii. p. 545), Aristozenus, the celebrated musician and disciple of Aristotle, was a native of Tarentum; as well as Rhinthon, the dramatic poet, who became the founder of a new species of burlesque drama which was subsequently cultivated by Sopater and other authors. (Suid. 2. v. 'Piv $\theta \omega \nu$.$) It was from Tarentum also that the$ Romans received the first rudiments of the regular drama, Livius Andronicus, their earliest dramatic poet, haring been a Greek of Tarentum, who was taken prisoner when the city fell into their hands. (Cic. Brut. 18.)

Polybius tells us that Tarentum retained many traces of its Lacedaemonian origin in local names and customs, which still subsisted in his day. Such wus the tomb of Hyacinthus already mentioned (PoL viii. 30): the river Galaesus also was called by them the Eurotas (Ib. 35), though the native name ultimately prevailed. Another custom which he notices as peculiar was that of burging their dead within the walls of the city, so that a considerable space within the walls was occupied by a necropolis. (1b. 30.) This custom be ascribes to an oracle, but it may have arisen (as was the case at Agrigentum and Syracuse) from the increase of the city having led to the original necropolis being inclosed within the walls.

The name of Tarentum (Taras) was supposed to be derived from a river of the wame of Taras (Tdpas). which is noticed by several ancient writers. (Steph. B. s. v. Tápas ; Paus. x. 10. § 8.) This is commonly identified with a deep, but sluggish, stream, which flows into the sea about 4 miles W. of the entrance of the harbour of Tarentum, and is still called Tara, though corrupted by the peasantry into Fiume di Terra. (Romanelli, vol. i. p. 281 ; Swinburne, vol. i. p. 271 .) The more celebrated stream of the Galaests flowed into the Mare Piccola or harbour of Tarentum on its N. shore: it is commonly identified with the small stream called Le Citrezze, an old church near which still retains the name of Sta Maria di Galeso. [Gala esis.] Another locality in the immediate neighbourbood of Tarentum, the name of which is associated with that of the city by Horace, is AuLos, a bill or ridge celebrated for the excellence of its wines. This is identified by local topographers, though on very slight grounds, with a sloping ridge on the seashore abont 8 miles SE. of Tarentum, a part of which bears the name of Monte Melone, supposed to be a corruption of Aulone [Aulon]. A more obscure name, which is repeatedly mentioned in connection with Tarentum, is that of Saturiune (Earú $\rho o v)$. From the introduction of this name in the oracle alleged to have been given to Phalanthus (Strab. vi. p. 279), it seems probable that it was an old native name, but it is not clear that there ever was a town or even rillage of the name. It is more probable that it was that of a tract or district in the neighbourhoed of Tarentum. Stephanus of Byzan-
 (s. v. Earúpiov); and the authority of Serrius, who calls it a city (civitas) near Tarentum, is not worth much in comparison. There was certainly no city of the name in historical times. Virgil applies the epithet "Saturium" (as an adjective) to Tarentuin itself (Georg. ii. 197; Serv. ad loc. : many commentators, however, comsider "suluri" froma "satur"

TARETICA
to be the true realing), and Horace speaks of "Satureisuus cabellus" as equivalent to Tarentine. (Sat i. 6. 59.) The memory of the locality is proserved by a watch-tower on the coast, about seven miles SE. of Tarentum, which is still called Torre di Saturo (Romanelli, vol i. p. 294; Zannoni Carta del Regno di Napoli).
(Concerning the history and ancient institutions of Tarentum, see Heyne, Opuccula, vol. ii. pp. 217-232; and Lorentz, de Civitate Veterwm Tarentinorum, 4to. Lips. 1833. The present state and localities are described by Swinburne, vol. i. pp. 225-270; Keppel Craven, Southern Tour, pp. 174-190; and Romanelli, vol. i. pp. 282-289; but from the absence of existing remains, the autiquities of Tarentum have scarcely reccived as much attention as they deserve.)
[E. H. B.]

COINS OF TARENTUM.
TARE'TICA (Tapetuк力, or Topetunt Axpa, Ptol. v. 9. § 9), a headlind of Asiatic Sarmatia in the Pontus Euxinus, and in the neighbourhood of the modern town of Sudacki.
[T. H. D.]
TARGINES (Tacino), a small river of Brattium, mentioned only by Pliny (iii. 10. s. 15) among the rivers on the E. coast of tbat peninsula. It is probably the stream now called the Tacino, which rises in the mountains of the Sila, and falls into the Gulf of Squillace (Sinus Scylaceus).
[E. H. B.]
TARICHEAE or TARICHAEAE (Tapicear, Strab. xvi. p. 764 ; Joseph. Vita, 32, 54, 73 ; Tapıxaĩa, Joseph. B. J. iii. 10. § 1, et alibi; Tapixía, Steph. B. s. v.; Taricheae, Suet. Tïk 4 ; Tarichen, Plin. v. 15 : Eth. Tapoxedrns), a city in Lower Galilee situated below a mountain at the southern end of the lake of Tiberias, and 30 stadia from the city of Tiberias iteelf. (Joseph. B. J. iii. 10. § 1.) it derived its name from its extensive manufuctories for salting fish. (Strab. l. c.) It was strongly fortified by Josephns, who made it his hendquarters in the Jewish war ; and it was taken by Titus with great slaughter. (Joseph. B. J. iii. 10. §§ 1-6.) Its rains stand upon a rising ground, called Kerak, where at present there is a Muslim village, at the southern end of the like. The river Jordan, in issaing from the lake, runs st first sooth for about a furlong, and then turns west fir half a mile. The rising ground Kerak stands in the space between the river and lake, and was a place easily defensible according to the ancient mode of warfare. (Robinson, Bibl. Res. vol. ii. p. 387, 2nd ed.)
TARNE (Tdprq), is mentioned by Homer (Ih. r.

TARQUINII.
44), and after him by Strabo (ix. p. 413), as a town in Asia Minor: but Pliny (v. 30) knows Tarne only as a fountain of Mount Tmolus in Lyoia. [L. S.]

TARNIS (Tarn), a river in Gallia, a branch of the Garonne. It rises near Mount Lozire, in the Cévennes, and flows in the upper part of its conrse in a deep valley. After ranning near 200 miles it joins the Garonne below Moissac. Sidonius Apollinaris (24,44) calls it " citus Tarnis." [Lesora.] Ausonius (Mosella, v. 465) speaks of the gold found in the bed of the Tarn:-
"Et auriferum postponet Gallia Tarnem."
[G. L.]
TARODU'NUM (Tapdoouvov), a town in the sonth-west of Germany, between Mons Abnoba and the Rhenus. (Ptol. ii. 11. § 30.) It is aniversally identified with Mark Zarten near Freiburg in the Breisgas, which, down to the 8th century, bore the name of Zarduna, a name which is formed from Tarodunum in the same way in which Zabern is formed from Tabernac.
[L. S.]
TARO'NA (Tapâra, Plol. iii. 6. § 5), a place in the interior of the Chersonesus Taurica. [T. H. D.]
TARPHE (Td $\alpha \phi \eta$ : Eth. Tapфaios), a town of the Locri Epicnemidii, mentioned by Homer (Il. ii. 533). It was situated apon a height in a fortile and woody coantry, and was said to have derived its name from the thickets in which it stood. In the time of Strabo it had changed its name into that of Pbarygae (tapbrau), and was said to have received a colony from Argos. It contained a temple of Hera Pharygreen. It is probably the modern Pundonitza. (Strab. ix. p. 426; Groskurd and Kramer, ad loc.; Steph. B. e. v.; Leake, Northern Greece, vol. iv. p. 179.)

TARPODIZUS (It. Ant. p. 230 ; It. Hier. p. 569 ; in Geog. Rav. iv. 6, Tarpodizon), a town in the E. of Thrace, on the road from Byzantium to Anchialus. According to Kiepert, its site answers to that of the modern Bujuk-Derbend; according to Reichard, to that of Kodje-Tarla; according to Lapie, to that of Devolet-Agatch. But in some mape it is placed nearly due south of Sadame, and on or near the river Artiscus: if this is correct, Tarpodizus must have been in the neighbourhood of Erekli.
[J. R.]
TARQUI'NII (Tapkvila, Strab. Dionys; Tapkovival, Ptol: Eth. Tarquiniensis: Corneto), one of the most ancient and important cities of Etruria, situated aboat 4 miles from the Tyrrhenian sea, and 14 miles from Centumcellae (Civita Vecchia), near the left bank of the river Marta. All ancient writers represent it as one of the most ancient of the cities of Etruria; indeed according to a tradition generally prevalent it was the parent or metropolis of the twelve cities which composed the Etruscan League, in the same manner as Alba was represented as the metropolis of the Latin League. Its own reputed founder was Tarchon, who according to some accounts was the son, according to others the brother, of the Lydian Tyrrhenus; while both versions represented him as subsequently founding all the other cities of the league. (Strab. r. p. 219; Serv. ad Aen. x. 179, 198.) The same superiority of Tarquinii may be considered as implied in the legends that represented the divine being Tages, from whom all the sacred traditions and religious rites of the Etruscans were considered to emanate, as springing out of the soil at Tarquinii (Cic. de Div. ii. 23; Censorin. de Die Nat. 4; Juan. Lyd. de Ost. 3.) Indeed it seems cartain that there was a close counec-
tion considered as subsisting between this Tages and Tarchon himself, the eponymous hero of Tarquinii. (Müller, Etrusker, vol. i. p. 73.) It is impossible here to discuss the historical bearings of these traditions, which seem to point to Tarquinii as the point from whence the power and civilisation of the Etruscans emanated as from a centre, while on the other hand there is another body of traditions which seems to represent that people as gradually extending themselves from the north, and Cortona as the first centre and stronghold of their power. [Etruria, Vol. I. p. 859.] A somewhat different version is given by Justin, who states that Tarquinii was founded by the Thessalians, probably meaning the Pelasgians from Thessaly, to whom Hellanicus ascribed the colonisation of Etruria in general. (Justin, xx. 1; Hellanic. ap Diomys. i. 28.)

But whatever value may be attached to these traditions, they may at least be admitted as proving the reputed high antiquity and early power of Tarquinii as compared with the other cities of Southern Etruria: and this is confirmed by the important position it appears to have held, when its name first appears in connection with the Roman history. Cicero calls it "urbem Etruriae florentissimam" at the time when Demaratus, the father of Tarquinius Peicus, was said to have estabiished himself there. (Cic. de Rep. ii. 19.) It is remarkable indeed that the story which derived the origin of the Roman king Tarquinius from Corinth represented his father Demaratus as bringing with him Greek artists, and thus appears to ascribe the first origin or introduction of the arts into Etruria, as well as its religious institutions, to Tarquinii. (Plin. xxxp. 12. s. 43; Strab. v. p. 220.) It is unnecessary to repeat here the well-known story of the emigration of an Etruscan Lucumo from Tarquinii to Rome, where he became king under the name of Lucius Tarquinius. (Liv. i. 34; Dionys. iii. 46-48; Cic. de Rep. ii. 19, 20; Strab. v. p. 219.) The connection with Tarquinii is rejected by Niebuhr, as a mere etymological fable, but it is not easy to say on what grounds. The name of Tarquinius, as that of a gens or family, as well as that of the city, is undoubtedly Etruscan; the native form being "Tarcnas:" and the strong infusion of Etruscaninfluence into the Roman state before the close of the regal period is a fact which cannot reasonably be questioned. It is remarkable also that the Roman traditions represented the Tarquinians as joining with the Veientes in the first attempt to restore the exiled Tarquins, b.c. 509, though from this time forth we do not again hear of their name for more than a century. (Liv. ii. 6, 7; Dionys. v. 14.) The story of the emigration of the elder Tarquin to Rome, as well as that of his father Demaratus from Corinth, may fairly be deemed unworthy of lelief in its present form; but it is probable that in both cases there was a historical foundation for the fiction.

After the war already mentioned, in the first year of the Republic, no subsequent mention of Tarquinii occurs in luman history till b.c. 398, when the Tarquinians took up arms, and ravaged the Roman territories, while their army was engazed in the siege of Veii. They were, however, intercepted on their march home, and all their booty taken from them. (Liv. v. 16.) Livy distinctly calls them on this occasion "novi hostes:" but from this time they took an active part in the wars of the Etruscans with Rome. The conquest of Veii in
B.c. 396, had indeed the effect of bringing the Romans into immediate collision with the cities which lay next beyond it, and among these Tarquinii and Volsinii seem to have taken the lead. Already in B. c. 389, we find the Tarquinians joining with the other cities of Southern Etraria in an attempt to recover Sutrium: the next year their territory was in its turn invaded by the Romans, who took the towns of Cortuosa and Contenebra, both places otherwise unknown, but which appear to hare been dependencies of Tarquinii. (Liv. vi. 3, 4.) From this time we hear no more of them till b. c. 358, when the Tarquinians, baving ravaged the Roman territories, the consul C. Fabius marched against them, but was defeated in a pitched battle, and 307 of the prisoners taken on the occasion were put to death in the Forum of Tarquinii, as a sacrifice to the Etruscan deities. (Liv. vii. 12, 15.) Shortly after, we find the Tarquinians and Faliscans again in arms, and in the first battle which occurred between them and the Romans they are said to have obtained the victory by putting forward their priests with flaming torches and serpents in their hands, to strike terror into their assailants. (Liv. vii. 16, 17). But the Etruscans were defeated in thrir turn by C. Marcius Rutilus, who was named dictator to oppose them: and two years later (b. c. 354) the Romans took a sanguinary revenge for the massacre of their prisoners, by putting to death, in the Forum at Rome, 358 of the captives taken from the Tarquinians, chiefly of noble birth. (Ib. 19.) But the spirit of the Tarquinians was not yet subdued, and with the support of the Faliscans and Caerites, who now for a short time took part against Rome, they continued the war till B.c. 351, when they sued for peace, and obtained a truce for forty years. (Ib. 19-22.)
This truce appears to have been faithfully observed, for we hear nothing more of hositilities with Tarquinii till в. c. 311, when the Tarquinians appear to have united with the other confederate cities of Etruria in attacking the Roman colony of Sutrium. They were, however, defeated by the Roman consul Aemilius Barbula, and again the next year by Q. Fabius, who followed up his victory by passing the Ciminian forest, and carrying his arms for the first time into Northern Etrurial There is no doubt that the Tarquinians, though not mentioned by name, bore a part in this contest as well as in the great battle at the Vadimonian lake in the following year (в. с. 309), as we find them soon after making their submission to Rome, and purchasing the invour of the consul Decius by sending him supplies of corn. (Liv. ix, 32, 35-39, 41.) They now obtained a fresh truce for forty years (1b.41) : and from this time we hear no more of them as an independent nation. Whether this long truce, like the last, was faithfully observed, or the Tarquinians once more joined in the final struggles of the Eitruscans for independence, we know not ; but it is certain that they passed, in common with the other chiff cities of Etruria, gradually into the condition of dependent allies of Rome, which they retained till the Social War (b. c. 90), when they as well as all the other Etruscans ohtained the full Roman franchise. (Appian, B.C.i. 49.) The only mention of Tarquinii that orcurs in this interval is during the Second Punic War, when the citizens came forward to furnish the expedition of Scipio with sail-cloth for his fleet. (Liv. xxviii. 45.) According to the Librer Coloniarum a body of cuionists was sent thither by

Gracchus; but though it is there termed "Colonia Tarquinii," it is certain that it did not retain the title of a colony ; Cicero distinctly speaks of it as a "municipiam," and the Tarquinienses are ranked by Pliny among the ordinary municipal towns of Etruris Its municipal rank is further confirmed by inscriptions recently discovered on the site. (Lib. Cod. p. 219 ; Cic. pro Caec. 4 ; Plin. iii. 5. s. 8 ; Ptol. iii. 1. § 50 ; Inscr. in Bullett. d. Inst. Arch. 1830, pp. 198, 199.) From these last records we learn that it was apparentiy still a flourishing town in the time of the Antonines, and its name is still found in the Tabula near three centuries later (Tub. Peut.) It is probable, therefore, that it surrived the fall of the Western Empire, and owed its final desolation to the Saracens.

At the present day the site of the ancient city is wholly desolate and uninhabited; but on a hill about a mile and a half distant stands the modern city of Correto, the origin of which does not date further back than the eighth or ninth century. It was probably peopled with the surviving inhabitants of Tarquinii. The site of the latter is clearly marked: it occnpied, like most Etruscan cities, the level summit of a hill, bounded on all sides by steep, though not precipitous escarpments, and occupying a space of about $a$ mile and a halt in length, by half a mile in its greatest breadth. It is still known as Turchina, though called also the Piano di Civita. Hardly any ruins art now visible, but the outline of the walls may be traced around the brow of the hill, partly by foundations still in situ, partly by fallen blocks. The highest point of the hill (furthest to the W. and nearest to the Marta) seems to have served as the Arx or citadel, and here the foundations of some buildings, supposed to be temples, may be traced. Numerous fragments of buildings of Roman date are also visible, and though insignificant in themselves, prove, in conjunction with the inscriptions already mentioned, that the site was well inhabited in Roman times. (Dennis's Etruria, vol. i. pp. 371-3s.5.)

But by far the most interesting remains now visible at Tarquinii are those of the Necropolis, which occupied almost the whole of the hill opposite to the city, at the W. extremity of which stands the modern town of Corneto. The whole surface of the hill (says Dennis) "is rugged with tumuli, or what have once been such," whence the appellation by which it is now known of Montarozzi. Vast numbers of these tombs have been opened, and have yielded a rich harvest of vases, ornaments, and other objects of antiquity. But the most important are those of which the walls are adorned with paintings, which possess a double interest, both as works of art and from the light they throw upon Etruscan manners. It may indeed be asserted in general of the paintings in these tombs that while the influence of Greek art is unquestionably to be traced in their design and execntion, the subjects represented and the manners they exhibit are purely Etruscan. The number of these painted tombs found at Tarquinii greatly exceeds those which have been discovered on the site of any other city of Etruria; but they still bear only a very small proportion to the whole num ber of tombs opened, so that it is evident this mode of decoration was far from general. The paintings in many of those first opened, which are figured in the works of Micaliand Ingbirami, have since been allowed to fall into decay, and have in great measure disappeared. Detailed descriptions of all the most interesting of them, as well as those more recently
disencered, will be found in Dennis's Etruria (vol. i. pp. 281-3ti4.)
[E. H. B.]
 Steph. B.: Eth. Tapḩaкıvít $\eta \mathrm{s}$, Tarracinensis: Terracina). a city of Latium in the more extended sense of that name, but originally a Volscian city, situated on the Tyrrhenian sea, about 10 miles from Circeii, and at the extremity of the Pomptine Marshes. It was also known by the name of Anxur, and we learn from Pliny and Livg that this was its Volscian name, while Tarracina was that by which it was known to the Latins and Romans. (Plin. iii. 5. s. 9; Ennius ap. Fest. s. v. Anxur; Liv. iv. 59.) The name of Anxur is frequently used at a much later period by the Roman poets (Hor. Sat. i. 5. 26; Lucan. iii. 84; Martial, v. I. 6, \&c.), obviously because Tarracina could not be introduced in verse; but Cicero, Livy, and all other prose writers, where they are speaking of the Roman town, universally cail it Tarracina. The Greek derivation of the latter name suggested by Straho (v. p. 2:33), who says it was originally called Tpaxuv, from its rugged situation, is probably a mere etymological fancy. The first mention of it in history occurs in the treaty between Rome and Carthage concluded in в. c. 509, in which the people of Tarracina are mentioned in common with those of Circeii. Antium, \&c., among the subjects or dependencies of Rome. (1'ol. iii. 22.) It seems certain therefore that Tarracina, as weli as Circeii, was included in the Roman dominions before the fall of the monarchy. But it is clear that it must have again fallen under the dominion of the Volscians, probably not long after this period. It was certainly in the possession of that people, when its name next appears in history, in B. c. 406. On that occasion it was attacked by N. Fabius Ambustus, and taken by a sudden assault, while the attention of the V.ilscian armies was drawn off in another direction. (Liv. iv. 57; Diod. yiv. 16.) Livy speaks of it as having at this time enjoyed a long period of power and prosperity, and still possessing great wealih, which was plundered by the Roman armies. A few years afterwards (b. c. 402) it again fell into the hands of the Volscians, through the negligence of the Roman garrison (Liv. v. 8). In b. c. 400 , it was again besieged by the Roman arms under Valerius Potitus, and though his first assaults were repulsed, and he was compelled to have recourse to a blockade, it soon after fell into his hands. (lb. 12, 13.) An attempt of the Volscians to recover it in 397 proved unsuccessful (lb. 16), and from this time the city continued subject to Rome. Nearly 70 years later, after the conquest of Privernum, it was thought advisable to secure Tarracina with a Roman colony, which was established there in B c. 329. (Liv. viii. 21 ; Vell. Pat. i. 14.)

The condition of Tarracina as a Roman colony is not quite clear, for Velleius notices it as if it had been one of the "Coloniae Latinae," while Livy certainly does not consider it as such, for he omits its name among the thirty Latin colonies in the time of the Second Punic War, while he on two occasions mentions it in connection with the other maritime colonies, Antium, Minturnae, \&c. In common with these, the citizens of Tarracius in vain contended for exemption from military service during the Second Punic War, and at a later period claimed exemption from naval service also. (Liv. xxvii. 38, xxxvi. 3.) There can, therefore, be no doubt that Tarracina was a "colonia maritima civium," and it seens to have early become one of
the most important of the maritime towns sulject to Rome. Its position on the Appian Way, which here first touched on the sed (Strab. v. p. 233; Hor. Sat. i. 5. 26), doubtless contributed to its prosperity: and an artificial port seems to have in some degree supplied the want of a natural harbour. (Liv. xxvii. 4.) In a military point of riew also its position was important, as commanding the pessage of the Appian Way, and the narrow defile of Lautulae, which was situated a short distance from the city on the side of Fundi. (Liv. xxii. 15.) [Lautular.]

Under the Roman Republic Tarracina seems to have continued to be a considerable and flourishing town. Cicern repeatedly notices it as one of the customary halting-places on the Appian Way, and for the same reason it is mentioned by Horace on his journey to Brundusium. (Cic. de Orat. ii. 59, ad Fam. vii. 23, ad Att. vii. 5; Hor. Sat. i. 5. 26; Appian, B. C. iii. 12; Val. Max. viii. 1. § 13.) At the outbreak of the civil war between Caenar and Pompey, Tarracina was occupied by the latter with three cohorts under the praetor Rutilius Lupus, but they abanduned their post, when Ponpey withdrew to Brundusium. (Caes. B. C. i. 24; Cic. ad Att. viii. 11, в.) Again, during the civil war between Vespasian and Vitellius, Tarracina was evidently regarded as a place of importance in a military point of view, and was occupied by the partisans of Vespavian, but was wrested from them by L. Vitellins just before the death of his brother. (Tac. Wist. iii. 57, 76. 77.) It was at Tarracina also that the funeral convoy of Germanicus was met by his cousin Drusus and the chief personages of Rome. (Id. Ann. iii. 2.) The neighbourhood seems to have been a favourite site for villas under the Roman Empire: among others the Emperor Domitian had a villa there (Martial. v. 1. 6); and it was at another villa near the town, on the road to Fundi, that the emperor Galbs was born. (Suct. Galb. 4.) In addition to the other natural advantages of the situation, there existed mineral springs in the neigbbourbood, which seem to have been much frequented. (Martial, v. 1. 6, x.51.8.) The important position of Tarracina doubtless prevented its falling intodecay as long as the Western Empire subsisted. Its name is found in the Itineraries as a "civitas" (Itin. Ant. p. 187; Itin. IIier. p. 611), and even after the fall of the Roman dominion it appears as a fortress of importance during the Gothic wars. (Procnp. B. G. ii. 2, 4, \&c.)

The position of Tarracina at the extremity of the Pomptine Marshes, just where a prijecting ridge of the Volscian mountains runs down to the sea, and separates the marshy tract on the W. from a similar but much smaller tract on the E., which extends from thence towards Fundi, must in all ages bave rendered it a place of importance. The ancient city stood on the hill above the marshes. Horace distinctly describes it as standing on lofty rocks, which were conspicuous afar, from their white colour:-
"Impositum saxis late candentibus Ansur"
(Hor. Sat i. 5. 26); and the same circumstance is alloded to by other Latin poets. (Lucan, iii. 84; Sil. Ital. viii. 392.) Livy also describes the original Volscian town as " luco alto situm " (v. 12), though it extended also down the slope of the hill towards the marshes ("urbs prona in paludes," iv. 59). At a later period it not only spread itself down the hill, but occupied a considerable level at the foot of it
(as the modern city still does), in the neightourhood of the port. This last must always have been in great part artificial, but the existence of a regular port at Tarracina is noticed by Liry as early as B. C. 210. (Liv. xxvii. 4.) It was subsequently enlarged and reconstructed under the Roman Empire, probably by Trajan, and again restored by Antoninus Pias. (Capit. Ant. P. 8.) Its remains are still distinctly visible, and the whole circuit of the ancient basin, surrounded by a massive mole. may be clearly traced, though the greater part of it is now filled with sand. Considerable portions of the ancient walls also still remain, constructed partly in the polygoral style, partly in the more recent style known to the Romans as "opus incertum." Several ancient tombs and ruins of various buildings of Roman date are still extant in the modern city and along the line of the Via Appia The modern cathedral stands on the site of an ancient temple, of which only the substructions and two columns remain. This is generally calied, though on very uncertain authority, a temple of Apollo. The most celebrated of the ternples at Tarracina was, however, that of Jupiter, which is noticed by Livy (xxviii. 11, xl. 45), and the especial worship of this deity in the Volscian city under the title of Jupiter Anxurus is alluded to by Virgil (Aen. vii. 793). He was represented (as we are told by Servius) as a beautiful youth, and the figure of the deity corresponding to this description is found on a Koman coin of the Vibian fanily. (Eckhel, vol. v. p. 340.) It is probable that this temple was situated in the righest part of the city, very probably in the ancient citadel, which occupied the summit of a hill above the town, where remains of its walls and substructions are still extant.

Tarracina was distant by the Via Appia 62 miles from Kome, and 18 from the Forum Appii. (Itin. Ant. p. 107; Itin. Hier. p. 611; Westphal, Kür. Kamp. p. 68.) Three miles from the city, at the side of the Via Appia, as well as of the canal which was frequently used by travellers, was the fountain of Feronia, celebrated by Horace, together with the sacred grove attached to it. [Feronia.] [E.H.B.]

TA'KRACO (Tappaxúv, Ptol. ii. 6. § 17), an ancient city of Spain, probably founded by the Pheenicians, who called it Tarchon, which, according to Bochart, means " a citadel." This name was pro bably derived from its situation on a high rock, between 700 and 800 feet above the sea; whence we find it characterised as "arce potens Tarracu." (Auson. Clar. Urb. 9; cf. Mart. x. 104.) It was seated on the river Sulcis, on a bay of the Mare Internum, between the Pyrenees and the river Iberus. (Mela, ii. 6 ; Plin. iii. 3. \&. 4.) Livy xxii. 22) mentions a "portus Tarraconis;" and according to Eratosthenes (ap. Strab. iii. p. 159) it had a naval station or ruads (vaú $\sigma \tau a \theta \mu o v$ ); but Artemidorus (ap. Strab. L c.; Polyb. iii. 76) says with more prubability that it had none, and scarcely even an anchoring place; and Strabo himself calls it diluevos. This answers better to its present condition; for though a mole was constructed in the 15 th century with the materials of the ancient amphitheatre, and another subsequently by an Englinhman named John Smith, it still affords but little protection for shipping. (Ford's Mandlwok of Spain, p. 222.) Tarraco lay on the main rad along the S. coast of Spain. (Itin. Ant. pp. 391, 396, $399,448,452$.) It was fortified and much en-
larged by the brothers Publius and Cneius Scipio, who converted it into a fortress and arsenal against the Carthaginians. Subsequently it became the capital of the province named after it, a Roman colony, and "eonventus juridicus." (Plin. l. c.; Tac. Ann. i. 78; Solin. 23, 26; Polyb. x. 34; Liv. xxi. 61 ; Steph. B. p. 637 ) Augustus wintered at Tarraco after his Cantabrian campaign, and bestowed many marks of honour on the city, among which were its honorary titles of "Colonia Victrix Togata" and "Colonia Julia Victrix Tarraconensis." (Grat. Inser. p. 382; Orelli, no. 3127; coins in Eckhel, i. p. 27 ; Florez, Med. ii. p. 579 ; Mionnet, i. p. 51, Suppl. i. p. 104 ; Sestini, p. 202.) According to Mela (l.c.) it was the richest town on that coast, and Strabo (l.c.) represents its population as equal to that of Carthago Nova. Its fertile plain and sunny shores are celebrated by Martial and other poets; and its neighbourbood is described as producing good wine and flax. (Mart. x. 104, xiii. 118; Sil. Ital. iii. 369, xv. 177; Plin. xiv. 6. s. y, xix. 1. 8. 2.) There are still many important ancient remains at Tarragona, the present name of the city. Part of the bases of large Cyclopean walls near the Quartel de Pilatos are thought to be anterior to the Romans. The building just mentioned, now a prison, is said to have been the palace of Augustus. But Tarraco, like most other ancient towns which have continued to be inhabited, has been palled to pieces by its own citizens for the purpose of obtaining building materials The amphitheatre near the sea-shore has been used as a quarry, and but few vestiges of it now remain. A circus, 1500 feet long, is now built over it, though portions of it are still to be traced. Throughout the town Latin, and even apparently Phoenician, inscriptions on the stones of the houses proclaim the desecration that has been perpetrated. Two ancient monuments, at some little distance from the town, have, however, fared rather better. The first of these is a magnificent aqueduct, which spans a valley about a mile from the gates. It is 700 feet in length, and the loftiest arches, of which there are two tiers, are 96 feet high. The monument on the NW. of the city, and also about a mile distant, is a Roman sepulchre, vulgarly called the "Tower of the Scipios;" but there is no anthority for assuming that they were buried here. (Cf. Ford, Handbook; p. 219, seq.; Florez, Esp. Sagr. xxix. p. 68, seq.; Miñano, Diccion. viii. p. 398.)
[T. H. D.]
TARRACONENSIS PROVINCIA (called by the Greeks Tappancornota, Ptol. ii. 6, viii. 4. § 5, \&c.; and '16ทpia $\dot{\eta}$ repl Tap̧áкcuva, Dion Cass. liii. 3), at first constituted, as already remarked [Vol. I. p. 1081], the province of Hispania Citerior. It obtained its new appellation in، the time of Augustus from its chief city Tarraco, where the Romans had established themselves, and erected the tribunal of a praetor. The Tarraconensis was larger than the other two provinces put together. Its boundaries were, on the E. the Mare Internum; on the N. the Pyrenees, which separated it from Gallia, and further westward the Mare Cantabricum; on the W., as far southward as the Durius, the Atlantic ocean, and below that point the province of Lusitania; and on the S . the province of Lusitania and the province of Baetica, the boundaries of which have been already laid down. (Mela, ii. 6; comp. Strab. iii. p. 166; Plin. iv. 21. s. 35; Marcian, p. 34.) Thus it embraced the modern provinces of Murcia, Valencia, Catalonia, Arragon, Navarre, Biscay, Asturias, Galli-
cia, the N. part of Purtugal as far down as the Douro, the N. part of Leon, nearly all the Castiles, and part of Avdalusia. The nature of its climate and productions may be gathered from what has been already said [Hispania. Vol. I. p. 1086.] A summary of the different tribes. according to the various authorities that have treated upon the subject, has also been given in the same article [p. 1083], as well as the particulars respecting its government and administration [p. 1081.] [T. H. D.]

TARKAGA (Táp $\dot{\alpha} \gamma \mathrm{a}$, Ptol. ii. 6. § 67), called by the Geogr. Kav. (iv. 43) Terracha, a town of the Vascones in Hispania Tarraconensis (Plin. iii. 3. s. 4). Now Larraga. (Cf. Cellarius, Orb. Ant. i. p. 91.)
[T. H. D.]
TARRHA (Táp $\rho a$, Pansan. ix. 16. § 13 ; Theophrast. H. P. ii. 2; Steph. B. s. v.: Orac. ap. Euseb. P. E. p. 133, ed. Stephan.; Táppos, Stadiasm. §§ 329, 330),., a town on the SW. coast of Crete between Phoenice and Poecilassus, one of the earliest sites of the Apollo-worship, and the native country of the writer Lucillus. For Tarba (Tápba, Ptol. iii. 17. §3) Meursius proposes to read Tarrha There can be little or no doubt that its position should be fixed on the SW. coast of the island, at the very entrance of the glen of Hughia Rumeli, where the bold hanging mountains hem in the rocky bed of the river. (Pashley, Travels, vol. ii. p. 270). The Florentine traveller Buondelmonti, who risited Crete A. D. 1415, describes considerable remains of a temple and other buildings as existing on the site of the ancient city (ap. Cornelius, Creta Sacra, vol. i. p. 85).
[E. B. J.]
TARSATICA (Tapoátika, Ptol. ii. 17. § 2), called in the Itin. Ant. p. 273 , Tharsaticum, a place in Illyricum, on the road from Aquileia to Siscia through Liburnia, now Tersat, to the E. of Fiume. (Cf. Pliny, iii. 21. s. 25 ; Tab. Peut.) [T. H. D.]

TARSHISH. [Tartessus.]
TA'RSIA (Tapoin, Arrian, Ind. c. 37), a promontory on the coast of Carmania, visited by the fleet of Nearchus. The conjecture of Vincent (loyage of Nearchus, i. p. 362) that it is represented by the present Rás-al-Djerd appears well founded. It is perhaps the same as the Themisteas Promontorium of Pliny (vi. 25) as suggested by Müller. (Geog. Graec. i. p. 360.)
[V.]
TA'RSIUM (Tdpotov, Ptol. ii. 16. \& 8), a place in Pannonia Inferior, now Tersacz. [T. H. D.]

TA'RSIUS (Tápotos), a river of Mysia in the neighbourhood of the town of Zeleia, which had its source in Mount Temnus, and flowed in a northeastern direction through the lake of Miletopolis, and, issuing from it, continued its north-eastern course till it joined the Macestus. (Strab. xiii. $p$ p. 587.) Strabo indeed states that the river flowed in numerous windings not far from Zeleia; but he can scarcely mean any other river than the one now bearing the name Balikeari, and which the Turks still call Tarza. Hamilton (Researches, vol. ii. p. 106) identifies it with the Kara Su or Kara Dere Su, which flows into Jake Maniyas. [L. S.]

TARSU'RAS (Tapooúpas, Arrian, Per. P. Eux. p. 10), a river of Colchis falling into the sea between the Singames and the Hippus. (Cf. Plin. vi. 4. s. 4.) It is probably the same river called Tassiaros in the Tab. Peut.
[T. H. D.]
TARSUS (Tapad́s: Eth. Taponvobs or Tapoeús). sometimes also called Tarsi (Tapбoi), Tersus Tep$\sigma \delta \delta)$, Tharsus ( $\Theta a \rho \sigma \delta s$ ), or Tapads $\pi \rho \delta s \tau \hat{\varphi} \mathrm{~K} \delta \delta v \varphi$, to distinguish it from other places of the same name
was the chief city of Cilicia, and one of the most important places in all Asia Minor. It was situated in a most fertile and productive plain, on both sides of the river Cydnus, which, at a distance of 70 stadia from the city, flowed into a lagoon called Rhegma or Rhegmi. This lagoon formed the port of Tarsus, and was connected with the sea. The situation of the city was most favourable, for the river was navigable up to Tarsus, and several of the most important roads of Cilicia met there. Its foundation is ascribed to Sardanapalus, the Assyrian king, and the very name of the city seems to indicate its Semitic origin. But the Greeks claimed the honour of having colonised the place at a very early period; and, among the many stories related by them about the colonisation of Tarsus, the one adopted by Strabo (xiv. p. 673 ; comp. Steph. B. s. v.) ascribes the Coundation to Argives who with Triptolemus arrived there in search of Io. The first really historical mention of Tarsus occurs in the Anabasis of Xenophon, who describes it as a great and wealthy city, situated in an extensive and fertile plain at the foot of the passes of Mount Taurus leading into Cappadocia and Lycaonia. (Anab. i. 2. § 23, \&c.) The city then contained the palace of Syennesis, king of Cilicia, but virtually a satrap of Persia, and an equivocal ally of Cyrus when he marched against his brother Artaxerxes. When Cyrus arrived at Tarsus, the city was for a time given up to plunder, the troops of Cyrus being exasperated at the loss sustained by a detachment of Cilicians in crossing the mountains. Cyrus then concluded a treaty with Syennesis, and remained at Tarsus for 20 days. In the time of Alexander we no longer hear of kings; but a Persian satrap resided at Tarsus, who fled before the young conqueror and left the city, which surrendered to the Macedonians without resistance. Alexander himself was detained there in consequence of a dangerous fever brought on by bathing in the Cydnus. (Arrian, Anab. ii. 4; Curt. iii 5.) After the time of Alexander, Tarsus with the rest of Cilicia belonged to the empire of the Seleucidae, except during the short period when it was connected with Egypt under the second and third Ptolemy. Pompey delivered Tarsus and Cilicia from the dominion of the eastern despots, by making the country a Roman province. Notwithstanding this, Tarsus in the war between Caesar and Pompey sided with the former, who on this account honoured it with a personal visit, in consequence of which the Tarsians changed the name of their city into Juliopolis. (Caes. B. Alex. 66; Dion Cass. xlvii. 24; Flor. iv. 2.) Cassins afterwards punished the city for this attachment to Caesar by ordering it to be plundered, but M. Antony rewarded it with municipal freedom and exemption from taxes. It is well known how Antony received Cleopatra at Tarsus when that queen sailed up the Cydnus in a magnificent vessel in the disguise of Aphrodite. Augustus subsequently increased the favours previously bestowed upon Tarsus, which on coins is called a " libera civitas." During the first centuries of the empire Tarsus was a place of great importance to the Romans in their campaigns against the Parthians and Persians. The emperor Tacitus, his brother Florian, and Maximinus and Julian died at Tarsus, and Julian was buried in one of its suburbs. It continued to be an opulent town until it fell into the hands of the Saracens. It was, however, taken from them in the second half of the 10th century by the emperor Nicephorus, but was soon after again restored to them, and has remained in
their hands ever since. The town still exists under the name of Tersoos, and though greatly reduced, it is still the chief town of that part of Karamania. Few important remains of antiquity are now to be seen there, but the country around it is as delightful and as productive as ever.

Tarsus was not only a great commercial city, but at the same time a great seat of learning and philosophy, and Strabo (xiv. p. 673, \&c.) gives a long list of eminent men in philosophy and literature who added to its lustre; but none of them is more illustrious than the Apostle Panl, who belonged to one of the many Jewish families settled at Tarsus. (Acts, x. 30, xi. 30, xy. 22, 41, xxi. 39 ; comp. Ptol. v. 8. § 7; Diod. xiv. 20; Hierocl. p. 704; Stadiasm. Mar. M. § 156; Leake, Asia Minor, p214 : Russegger, Reisen in Asien, i. 1. p. 395, foll., 2. p. 639, foll.)

Another town of the name of Tarsus is said to have existed in Bithynia (Steph. B. s. v.), but nothing is known about it.
[L. S.]

COIN OF TARSUS.
TA'RTARUS (Tartaro), a river of Venetia, near the borders of Gallia Transpadana. It is intermediate between the Athesis (Adige) and the Padus ( Po ) ; and its waters are now led aside by artificial canals partly into the one river and partly into the other, so that it may be called indifferently a tributary of either. In ancient times it seems to have had a recognised mouth of its own, though this was even then wholly artificial, so that Pliny calls it the "fossiones Philistinae, quod alii Tartarum vocant." (Plin. iii. 16. s. 20.) In the upper part of its course it formed, as it still does, extensive marshes, of which Caecina, the general of Vitellins, skilfully availed himself to cover his position near Hostilia. (Tac. Hist. iii. 9.) The river is here still called the Tartaro: lower down it assumes the name of Canal Bianco, and after passing the town of Adria, and sending off part of its waters right and left into the Po and Adige, discharges the rest by the channel now known as the Po di Levante. The river Atrianus ('Atpiavòs noтauós), mentioned by Ptolemy (iii. 16. § 20), could be no other than the mouth of the Tartarus, so called from its flowing by the city of Adria; but the channels of these waters have in all ages been changing.
[E. H. B.]
TARTESSUS (Tapt $\eta \sigma \sigma o \delta s$, Herod. i. 163; Tap$\tau \eta \sigma \sigma \delta \delta_{s}$ and Taptecós, Diodor. Siculus, Frag. lib. xxv.), a district in the south of Spain, lying to the west of the Columns of Hercules. It is now the prevailing opinion among biblical critics that the Tarshish of Scripture indicates certain localities in the south of Spain, and that its name is equivalent to the Tartessus of the Greek and Roman writers. The connection in which the name of Tarshish occurs in the Old Testament with those of other places, points to the most western limits of the world, as known to the Hebrews (Genes. x. 4; ! 1 Chron. i. 7; Psalms, lx xii. 10; Isaiah, lxvi. 19);
and in like manner the word Tartessus, and its derivative adjectives, are employed by Latin writers as synonymous with the West (Ovid, Met. xiv. 416; Sil. Ital. iii. 399; Claud. Epist. iii. v. 14). Tarshish appears in Scripture as a celebrated emporium, rich in iron, tin, lead, silver, and other commodities; and the Phuenicians are represented as sailing thither in large shirs (Ezek. xxvii. 12, xxviii 13; Jerem. x. 9). Isaiah speaks of it as one of the finest colonies of Tyre, and describes the Tyrians as bringing its products to their market (xxiii. 1, 6, 10). Among profane writers the antiquity of Tartessus is indicated by the myths connected with it (Strab. iii. p. 149; Justin, sliv. 4). But the name is used by them in a very loose and indefinite way. Sometimes it stands for the whole of Spain, and the Tagus is represented as belonging to it (Rutilius, Itin. i. 356; Claud. in Rufin. i. 101 ; Sil. Ital. xiii. 674, \&c.). But in general it appears, either as the name of the river Baetis, or of a town situated near its mouth, or thirdly of the country south of the middle and lower coarse of the Baetis, which, in the time of Strabo, was inhabited by the Turduli. The Buetis is called Tartessas by Stesichorus, quoted by Strabo (iii. p. 148) and by Avienus (Ora Marit. i. 224), as well as the town situated between two of its mouths ; and Miot (ad Herod. iv. 152) is of opinion that the modern town of S. Lucar de Barameila stands on its site. The country near the lower cuurse of the Baetis was called Tartessis or Tartesia, either from the river or from the town; and this district, as well as others in Spain, was occupied by Phoenician settlements, which in Strabo's time, and even later, preserved their national customs. (Strab iii. p. 149, xvii. p. 832; Arr. Exp. Alex. ii. 16; App. Hisp. 2; Cuast. Porphyrog. de Them. i. p. 107, ed. Bonn.) There was a temple of Hercules, the Phoenician Melcarth, at Tartessus, whise worship was also spread amongst the neighbouring Iberians. (Arr. l.c.) About the middle of the seventh century b. c. some Samiot sailors were driven thither by stress of weather; and this is the first account we have of the intercourse of the Greeks with this distant Phoenician colony (Herod. iv. 152). About a century later, some Greeks from Phocsea likewise visited it, and formed an alliance with Arganthonius, king of the Tartessians, renowned in antiquity for the great age which he attained. (Herod. i. 163; Strab. iii. p. 151.) These connections and the vast commerce of Tartessus, raised it to a great pitch of prosperity. It traded not ouly with the mother country, but also with Africa and the distant Cassiterides, and bartered the manufactures of Phoenicia for the productions of these countries (Strab. i. p. 33; Herod. iv. 196; cf. Heeren, Ideen, i. 2. §§ 2, 3). Its riches and prosperity had become proverbial, and wo find them alluded to in the verses of Anacreon (ap. Strab. iii. p. 151). The neighbouring sea (Fretam Tartessium, Avien. Or. Mar. 64) yielded the lamprey, one of the delicacies of the Roman table (Gell. vii. 16); and on a coin of Tartessus are represented a fish aud an ear of grain (Mionnet, Med. Ant. i. p. 26). Weare unacquainted with the circumstances which led to the fall of Tartessus; but it may probably have been by the hand of Hamilcar, the Carthaginian general. It must at all events have disappeared at an early period, since Strabo (iii. pp. 148, 151), Pliny (iii. 1, iv. 22, vii. 48), Mela (ii. 6), Sallast (Hist. Fr. ii.), and others, confounded it with more recent Phoenician colonies, or took its name to be an ancient appellation of them.
[T. H. D.]

TARUSCONIENSES.
TARUALTAE (Tapoúa入tat, Ptol. iv. 6. § 19), a people of Libva Interior.
[T. H. D.]
TARVEDUS. [Umes.]
TARUENNA or TARUANNA (Tapovavva, Ptol. ii. 9. § 8), a town in North Gallia, and according to Ptolemy an inland town of the Morini. [Morini.] It is written Teruanns in the Table, where it is marked a capital town, and the modern name is Térouenne. It is mentioned in several Roman routes. The distance between Gesoriacum (Boulogne) in the Antonine Itin. and Taruenna does not agree with the true distance; nor does the distance in the same Itin. between Taruenna and Castellum (Cassel) agree with the actual measurement. In both instances we must assume that there is an error in the numerals of the Itin. D'Anville says that the Roman ruad appears to exist between Terouerne and the commencement of the Boulenois, or district of Boulogne, near Devre, where it passes by a place called La Chaussée. There are also said to be traces of a Roman road from Itins Portus (Wissant) to Térouenne.
[G. L.]
TARVESEDE (It. Ant. p. 2:9) or TARVESSEDOO, according to the Peuting. Table, was a place in Rhaetia on the road from Mediolanum leading by Comum to Augusta Vindelicorum. Its exact site is now unknown, though it seems to have been situated near Torre di Vercella.
[L. S.]
TARVI'SIUM (Tapbigiov: Eth. Tarvisianus: Treviso), a town of Northern Italy, in the province of Venetia, situated on the left bank of the river Silis (Sele), abrout 15 miles from its mouth. The name is not mentioned by any of the geographers, though Pliny speaks of the Silis as flowing "ex moutibus Tarvisanis," in a manner that would lead us to suppose it to have been a municipal town (Plin. iii. 18. s. 22), and this is confirmed by an inscription given by Muratori (Inscr. p. 328). After the fall of the Western Empire it appears as a considerable city, and is repeatedly noticed by Procopius during the Gothic Wars, as well as by Cassiodorus and Paulus Diaconus. (Cassiod. Var. x. 27; Procop. B. G. ii. 29, iii. 1, 2 ; P. Diac. Hist. Lant. ii. 12, iv. 3, v. 28, \&c.) It retained this consideration throughout the middle ages, and is still a thourishing city under the name of Treviso. [E. H. B.]

TARUS (Taro), a river of Gallia Cispadana, one of the southern tributaries of the Padus, which crosses the Aemilian Way between 5 and 6 miles west of Parma. (Plin. iii. 16. s. 20 ; Geogr. Kav. iv. 36.)
[E. H. B.]
TARUSATES are mentioned by Caesar (B. G. iii. 27) among the Aquitanian peoples who submitted to P. Crassus: "Vocates, Tarusates, Elusates." After Crassus had defeated the Sotiates [Sotiates] he entered the territory of the Vocates, and Tarusates, a statement which gives some indication of their position. Pliny (iv. 19) places the Tarusates between the Succasses and Basabocates; but the MSS. reading in Pliny seems to be Latusates, which probably should be Tarusates, There appears to be no variation in the name in the MSS. of Caesar. D'Anville conjectures that the name Tarusates is preserved in Twrsan, or Teursan, a part of the diocese of Aire. The town of Aire is on the Aturis (Adour).
[G. L.]
TARUSCONIENSES, as the name stands in Harduin's edition of Pliny (iv. 4), but the reading is doubtful. Harduin found Taracunonienses in five MSS., and there are other rariations. Besides Tarascon on the Rhone, there is Tarascon on the 4 B 3

Arriège, a branch of the Garonne. This Tarascon is in the Pays de Foix, and in a valley at the foot of the Pyrenees, which circumstance seems to indicate more probably the position of a small tribe or people than that of Tarascon on the Rhone. This Tarascon on the Arriege is mentioned in middle age documents under the name of Castrum Tarasco. Pliny's Tarusconienses, or whatever may be the true name, are enumerated among the Oppida Latina of Narbonensis.
[G. L.]
TASCIACA, a town in Gallia, placed by the Table between Araricum (Bourges) and Caessrodunuin (Tours). The first station from Avaricum is Gajoris, supposed to be Chabris on the Cher, and the next is Tasciaca, supposed to be Terée, also on the Cher. But the number axiiii. placed in the Table at the name of Tasciaca, which number should represent the distance from Chabris to Tezée, is nearly the distance between Tezee and Tours, and accordingly there is some error here. The Table gives no distance between Tasciaca and Caesarodunum. (D'Anville, Notioe; Ukert, Gallien.)
[G. L.]
TASCONI is the name of a Gallic people in the Narbonensis, mentioned by Pliny (iii. 4), as the name is read in five MSS. There is a sinall river Tescon or Tescou, which flows into the Tarn, near Montauban. D'Anville quotes a life of $\mathbf{S}$. Théodard, archbishop of Narbonne, which speaks of this river as called Tasco by the people of that part. and as the limit between the territories of the Tolosani, or people of Toulouse, and the Caturcenses, or people of Cahors. This is a valuable passage, for it shows how far north the Narbonensis, to which the territory of Toulouse belonged, extended in this part of its frontier; and it also confirms the conjecture about the northern limits of the Ruteni Provinciales [Ruteni], who were also included in the Narbonensis.
[G. L.]
TASTA. [Datil.]
TATTA LACUS ( $\boldsymbol{\eta}$ Tárta), a large salt lake on the frontiers between Lycaonia and Galatia; it had originally belonged to Pbrygia, but was afterwards annexed to Lycaonia. Its waters were so impregnated with brine, that any substance dipped into it, was immediately incrusted with a thick coat of salt; even birds flying near the surface had their wings moistened with the saline particles, so as to become incapable of rising into the air, and to be easily caught. (Strab. xii. p. 568; Plin. $x \times x i .41,45$; Dioscorid. v. 126.) Stephanus Byz. (8. v. Boticiov) speaks of a salt lake in Phrygia, which be calls Attaea ("Atraua), near which there was a town called Botieum, and which is probably the same as Lake Tatta. The Turks now call the lake Tuzla, and it still provides all the surrounding country with salt. (Leake, Asia Minor, p. 70.)
[L. S.]
TAUA. [TaUm.]
TAUA (Taṽa, Steph. B. s. v.; Taova, Ptol. iv. 5. § 50 ; Taba, Itin. Ant. p. 153), a town in Lower Aegypt, situated on the left bank of the Canopic arm of the Nile, S. of the city of Naucratis. It was the capital of the small Phthemphuthic Nome (Plin. v. 9. s. 9), and is supposed to be represented by the present Thaouch. (D'Anville, Memoire sur l'Egypte, vol. i. p. 82.)
[W. B. D.]
TAUCHI'RA or TEUCHI'RA (Taúxespa, Herod. iv. 171, et alii; TélXeipa, Hierocl. p. 732; Plin. v. 5. s. 5, \&c.), a town on the coast of Cyrenaica, founded by Cyrene. It lay 200 stadia W. of Ptolemaia. Under the Ptolemies it obtained the name
of Arsinoë. (Strab. xvii. p. 836; Mela, i. 8; Plin. l. c.) At a later perind it became a Roman colony (Tab. Peut.), and was fortified by Justinian. (Procop. de Aed. vi. 3.) Tauchira was particularly noted for the worship of Cybele, in honour of whom an annual festival was celebrated. (Synes. Ep. 3.) It is the same town erroneously written Tápixa by Diodorus (xviii. 20). It is still called Tochim. (Cf. Della Cella, Viagg. p. 198; Pacho, Voyage, p. 184.)
[T. H. D.]
TA'VIUM (Taoviov, Taviov) or TAVIA, a town in the central part of eastern Galatia, at some distance from the eastern bank of the river Halys, was the chief town of the Galatian tribe of the Trocmi, and a place of considerable commercial importance, being the point at which five or six of the great roads met. (Plin. v. 42; Strab. xii. p. 567 ; Ptol. v. 4. § 9; Steph. B. s. o. ${ }^{N}$ Aүкupa; Hierocl. p. 696; It. Ant. pp. 201, 203.) It contained a temple with a colossal bronze statue of Zeus. Leake (Asia Minor, p. 311) is strongly inclined to believe that Tshorum occupies the site of ancient Tavium; but Hamilton (Researches. i. p. 379, \&cc.) and most other geographers, with much more probability, regard the ruins of Boghaz Kicus, 6 leagues to the north-west of Jazgat or Juzghat, as the remains of Tavium. They are situated on the slope of lofty and steep rocks of limestone, some of which are adorned with sculptures in relief. There are also the foundations of an immense building, which are believed to be remains of the temple of Zeus. (Comp. Hamilton in the Journal of the Roy. Geogr. Soc. vol. vii. p74, foll.; Cramer, Asia Minor, ii. p. 98.) [L. S].

TAULA'NTII (Tau入dvtio, Ptol. iii. 13. § 3), a penple of Roman Illyria, in the neighbourhood of Epidamnus and Dyrrachium. In ancient times they were a powerful tribe, possessing several cities, and governed by their own kings, but subsequently they were reduced to subjection by the kings of Illyria, and at the time when the Romans waged war with Teuta they had sunk into insignificance. (Cf. Thucyd. i. 24 ; Arrian. Anab. i. 5; Mela, ii. 3 ; Liv. xlv. 26 ; Plin. iii. 22. s. 26.) Aristotle relates that they had a method of preparing mead from honey. (3ir. Ausc. t. ii. p. 716.) [T. H. D.]

TAUM, TAUS, or TAVA (Taoía eloqueas, Ptol. ii. 3. §5), a bay on the E. cosast of Britaunin Barbara. (Tac. Agr. 22.) Now Frith of Tay. [T. H. D.]

TAUM (AD), a place in the SE. of Britannia Romana, in the territory of the Iceni (Tab. Peut.). Probably Yarmouth.
[T. H. D.]
TAUNUS MONS, a range of hills in western Germany, beginning near the river Nicer (Neckar), and running northward till they reach the point where the Moenus (Main) joins the Rhenus. (Pomp. Mela, iii. 3; Tac. Ann i. 56, zii. 28.) This range of hills still bears its ancient name, though it is sometimes simply called the Höke, that is, the Height, Taunus being probably the Celtic word Dun or Daun, which signifies a beight. In various places along this range of hills Roman inscriptions have been found, in which Cives Taunenses are mentioned, from which it may be inferred that there once existed a town of the name of Taunus. (Orelli, Inscript nos. 181, 4981, 4982; Wilhelm, Germanien, p. 44.)
[L. S.]
TAURA'NIA, a town of Campania, mentioned only by Pliny (iii. 5. s. 9) as having in his time entirely disappeared, like Stabiae. He affurds no clue to its position. The name of Taurania (Tauparia) is found also in the older editions of Stephanus of

TAURANITIUM.
Byzantiom ; bat it appears that the true reading is Tauravia (Steph. B. s. v. ed. Mein.) [E. H. B.]
taurani'tivm, a district of Armenia Major lying $N$. of Tigranocerta. in the direction of Artaxata. (Tac. Ann. xiv. 24; Cf. Moses Chor. i. 5; Ritter, Erdkunde, x. p. 650, sq.) [T. H. D.]

TAURA'SIA (Taurasi), an ancient city of Samniam, in the country of the Hirpini situsted on the right bank of the river Calor, about 16 miles above its junction with the Tamarus. The name of the city is known only from the inscription on the tomb of L. Scipio Barbatus, which records it among the cities of Samnium taken by him during the Third Samnite War. (Orell. Inscr. 550.) It was probably taken by assanalt, and suffered severely, for no subsequent mention of the town occurs in history : but its territory ("ager, qui Taurasinorum fuerat"), which was doubtless confiscated at the same time, is mentioned long afterwards, as a part of the "ager publicus populi Romani," on which the Apuan Ligarians who had been removed from their own abodes were established by order of the senate. (Liv. xl. 38.) These Ligurians appear to have been settled in the plain on the banks of the Tamarus near its junction with the Calor ; but there can be little doubt that the modern village of Taurasi, though 16 miles further S ., retains the name, and marks (approximately at least) the site of the ancient Tanrasia.

Several madern writers identify these Taurasini Campi with the Arusini Campi near Beneventum, which were the scene of the defeat of Pyrrhus by M'. Curius Dentatus (Flor. i. 18; Oros. iv. 2), and the suggestion is probable enough, though unsupported by any authority. [Beneventum.] [E. H. B.]

TAUKAUNITES. [Bagraudanene.]
TAURE'SIUM (Tavpウ́ $\sigma t o v$, Procop. de Aed. iv. 1. p. 266), a place in Moesia Superior, near Scupi or Justiniana Prima. It was situated in the Haemus, not far from the borders, and was the birthplace of the emperor Justinian. (Cf. Gibbon, vol. v. p. 79, ed. Smith.)
[T.H.D.]
TAURI (Taīpot, Strab.vii. p. 308), the inhabitants of the Chersonesus Taurica, or modern Crimea. They were probably the remains of the Cimmerians, who were driven out of the Chersonese by the Scythians. (Herod. iv. 11, 12; Heeren, Ideen, i. 2. p. 271 ; Mannert, iv. p. 278.) They seem to have been divided into several tribes: but the two main divisions of them were the nomad Tauri and the agricuitural. (Strab. vii. p. 311.) The former possessed the northern part of the country, and lived on meat, mare's milk, and cheese prepared from it. The agricultural Tauri were somewhat more civilised; yet altogether they were a rude and savage people, delighting in war and plunder, and particularly addicted to piracy. (Herod.iv. 103 ; Strab. vii. p. 308 ; Mela, ii. 1 ; Tac. Ann. xii. 17.) Nevertheless, in early times at least, they appear to have been united under a monarchical government (Herod. iv. 119). Their religion was particularly gloomy and horrible, consisting of human sacrifices to a virgin goddess, who, according to Ammianus Marcellinus (xxii. 8. s. 34), was nained Oreiloche, though the Greeks regarded her as identical with their Artemis, and called her Tauropolos. (Soph. Aj. 172 ; Eur. Iph. Taur. 1457 ; Diod. iv. 44 ; Ach. Tat. viii. 2; Strab. xiii. 535 ; Böckh, Inscr. ii. p. 89.) These victims consisted of shipwrecked persons, or Greeks that fell into their hands. After killing them, they stuck their heads upon poles, or,

TAURICA CHERSONESUS
according to Ammianus (l.c.), affixed them to the wall of the temple, whilst they cast down the bodies from the rock on which the temple stood. (Herod. iv. 103; Ov. ex Pont. iii. 2. 45, seq., Trist. iv. 4. 63.) According to a tradition among the Tauri themselves, this goddess was Iphigenia, the daughter of Agamemnon (Herod. l.c.) They had also a custom of cutting off the heads of prisoners of war, and setting them on poles above the chimneys of their houses, which usage they regarded as a protection of their dwellings ( $1 b$ ). If the king died, all his dearest friends were buried with him. On the decease of a friend of the king's, he either cut off the whole or part of the deceased person's ear, according to his dignity. (Nic. Damasc. p. 160, Orell.)
[T. H. D.]
TAURIA'NUM (Traviano), a town on the W. const of Brutium, near the mouth of the river Motaurus (Marro). Its name is mentioned by Mela, who places it between sicylla and Metaurum. It was probably, therefore, situated to the S . of the river, while the town of Metaurum was on its N. bank. Subsequently all trace of the latter disappears ; but the name of Tauriana is still found in the Tabula, which places it 23 miles $S$. of Vibo Valentia. (Mel. ii. 4. §8; Tabr Peut.) It became the see of a bishop in the later ages of the Roman empire, and retained that dignity down to the time of Gregory VII., when the town had fallen into complete decay. Its ruins, however, still exist, and the site is said to retain the name of Traviano. (Holsten. Not. ad Cluver. p. 299; Romanelli, vol. i. p. 70.)

There can be no doubt that the "Tauroentum oppidum " of Pliny (iii. 5. s. 10), which he mentions immediately after the "Metaurus amnis," is the same place that is called by Mela Taorianum. [E.H. B.]

TAU'RICA CHERSONE'SUS ( $\dot{\eta}$ Taupuki Xepobrचoos, Ptol. iii. Arg. 2, \&c.), a peninsula stretching into the Pontus Euxinus from Sarmatia, or the country of the nomad Scythians, with which it is connected by a narrow isthmus, auciently called Taphrus, or Taphrae, now the isthmus of Perecop. The peninsula also bore the name of Chersonesus Scythica, and was sometimes styled simply Taurica. (Plin. iv. 12. s. 26 ; Scylax, i. p. 29, Huds.) It is now called the Crimea, from the once famous city of Eski-Krim; but since its incorporation with the Russian empire, the name of Taurica has also been again applied to it.

The isthmus which connects the peninsula with Sarmatia is so slender, being in some parts scarcely 40 stadia or 5 miles across (Strab. vii. p. 308; Clarke, Trav. ii. p. 314, 4th ed. 1816), as to make it probable that in a very remote period Taurica was an island. (Plin. l.c. ; cf. Pallas, Voyages, \&c., ii. p. 2, Fr. Transl. 4to.) The ancients compared it with the Peloponnesus, both as to size and shape (Strab. vii. p. 310; cf. Herod. iv. 99); and this comparison is sufficiently happy, except that Taurica throws out another smaller peninsula on its E. side, the Bosporan peninsula, or peninsula of Kertsck, which helps to form the S. boundary, or const, of the Palus Maeotis. The Chersonese is about 200 miles across in a direct line from Cape Tarchan, its extreme W. point, to the Straits of Kertsch, and 125 miles from N. to S., from Perecop to Cape Kikineis. It contains an area of about 10,050 square miles. Nearly three-fourths of Taurica consist of flat plains little elevated above the sea; the remainder towards the S is moun-
tainous. The NW. portion of the low country, or that which would lie to the W. of a line drawn from the isthmus to the mouth of the river Alma, consists of a sandy soil interspersed with salt lakes, an evidence that it was at one time covered by the sea (Pallas, Ib. p. 605, 8cc.) ; but the E. and S. part has a fertile mould. The mountain chain (Taurici Montes) begins to rise towards the centre of the peninsula, gently at first on the N ., but increasing in height as the chain appronches the sea, into which it sinks steeply and abruptly. Hence the coast at this part presents huge cliffs and precipices, and the sea is so deep that the lead often finds no bottom at the distance of a mile or two from the shore. From these mountains, which extend from Symbolon, or Balaclava, on the W., to Theodusia, or Caffa, on the E., many bold promontories are projected into the sea, enclosing between them deep and warm vallegs open to the S., and sheltered from the $\mathbf{N}$. wind, where the olive and vine flourish, the apricot and almond ripen, and the laurel creeps among the dark and frowning cliffs. The most remarkable mountains of this chain are that anciently called the Cimmerium at the N . extremity, and the Trapezus at the S. (Strab. vii. p. 309.) The former, which is said to have derived its name from the Cimmerians, once dominant in the Bosporus, is now called AghirmischDaghi. It lies nearly in the centre of the peninsula, to the NW. of the ancient Theodosia, and near the town of Eski-Krim, or Old Crim. Somie writers, however, identify Cimmerium with Mount Opouk, on the S. coast of the peninsula of Kertsch. (Kühler, Mém. de TAcad. de St. Petersb. 18.24, p. 649, seq. : Dubois de Montperrenx, Voyages, ofc. v. p. 253, seq.) But Trapezus is by far the highest mountain of Taurica. Kohl estimates its height at 5000 German feet (Reisen in Siudrussland, i. p. 204); other authorities make it rather less, or 4740 feet. (Neumann, Die Hellenen im Scythenlande, p. 448.) According to Mr. Seymoar, it is 5125 English feet high. (Russia on the Black Sca. p. 146.) Its form justities its ancient name, and is said to resemble that of the Table Mountain at the Cupe of Good Hope (Kohl, Ib.). A goord iden of it may be obtained from the vignette in Pallas (ii. p. 196). As it stands somewhat isolated from the rest of the chain, it presents a very striking and remarkable object, especially from the sea. At present it is called Tchatyr-Dagh, or the Tent Mountain. The other mountains seldom exceed 1200 feet. Their geological structure presents many striking deviations from the usual arrangement, especially in the absence of granite. These anomalies are fully described by Pallas in his second volume of travels. That part of Taurica which lay to the E. of them was called the Rugged, or Rocky, Chersonesus (трпкє́ $\eta$, Herod.l.c.) It is in these mountains that the rivers which water the peninsula have their sources, none of which, however, are considerable. They flow principally from the northern side, from which they descend in picturesque cascades. Only two are mentioned by the ancients, the Thapsis and the Istrianus. At present the most fertile districts of Taurica are the calcareous valleys minong the mountains, which, though often covered with only a thin layer of mould, produce excellent wheat. The nature of the country, however, does not now correspond with the descriptions of the ancients. Strabo (l.c.) praises its tertility in produc-
ing corn, especially in that part which lies between Panticapaeum (Kertsch) and Theodosia (Caffa), which at present is a desolate and monotonons steppe. But this may probably be accounted for by the physical and political revolutions which the country has undergone. Taurica yielded a large tribute of wheat to Dithridates Eupator, King of Bosporus. That sovervign took much interest in promoting the cultivation of the country, especially by the planting of trees; but all his care to rear the lanrel and the myrtle in the neighbourhood of Panticapapum is said to have been vain, though other trees grew there which required a mild temperature. (Plin. xvi. s. 59.) Wine was produced in abundance, as at the present day, and the custom mentioned by Strabo (p. 307), of covering the vines with earth during the winter, is still observed, though Pallas considers it unnecessary (Voyages, fre. ii. p. 444.)

The interest connected with the ancient history of the Tauric Chersonese is chiefly derived from the maritime settlements of the Greeks, and our attention is thus principally directed to the coasts. An account of the barbarous people who inhabited the peninsula at the time when these settlements were made is given in a separate article [Tauri]. Its coasts, like those of the Euxine in general, were early visited by the Bilesians, who planted some flourishing colonies upon it. Besides these we find a Dorian colony established near the site of the present Sebustupod; and, if we may believe Aeschines (contra Clesiph. p. $141, \mathrm{sq}$.) the Athenians once possessed the town of Nyinphateon on the Cimmerian Bosporus, which, according to him, was betrayed to the Bosporan kings by Gglon, the maternal grandfather of Demosthenes (Cf. Crateros in Harpocration, s. v. Nímфauov.) The interior of the peninsula was but little known to the ancients, and we shall therefore best explain their connection with it by taking a survey of the coasts.

We shall begin on the NW. side, ufter the bay of Carcina or Tamyraca, which has been already described [Carcina: Tamyraca]. Fram this bay the peninsula stretches to its most westerly point, Cape Tarchan, which presents some high land; but to the S. of Tarchan the coast sinks to a dead level as far as the river Alma, to the S. of which it again begins to rise in high cliffs. All the W. coast, however, presents no place of note in ancient history till we come to its extreme southern point, where a bald plateau of hills runs in a westerly direction into the sen. On the E. this tract is divided from the rest of the peninsula by a deep and broad valley, into which it falls by steep declivities. The harbour of Sebnstopol (or Roads of Aktiar) on the N., which bites into the land for about 4 miles in a SE. direction, and that of Balaclava on the $S$. corst of the peninsula, which rans up towards the N., form an isthmus having a breadth, according to Strabo (p. 308), of 40 stadia, or 5 miles. This measurement is confirned by Clarke (Trav. ii. p. 219), who, however, seems onls to bave been guided by his eye; for in reality it is rather more, or about 6 inites. The S. const of the little peninsula formed by this isthmus presents several promontories and small bays, with cliffs of from 500 to 700 feet in height.

So barren a spot presented no attractions to the Milesians, the chief colonisery of the Euxine ; but a more hardy race of emigrants, from the Dorian city of Heracleis in Pontus, found a new home apon it, and fuunded there the town of Chersonesus (Strab. b.c.). We learn from I'liny (iv. 12. s. 26) that it
was at first called Megarice, apparently from the circumstance that Megara was the mother city of the Pontic Heracleots. From these settlers the little peninsula we have just described obtained the name of the Chersonfesus Heracleotica, or Heracleotic Chersonese, sometimes also called "the smail Chersonesus " ( $\dot{\eta}$ muxpd, Strab. h. c.), by way of distinction from the great, or Tauric, peninsula.

The oripinal city of Chersonesus seems to have been founded at the westernmost point of the peninsala, close to the present Cape Fanary. The date and occasion of its foundation are not ascertained ; but Neumann conjectures that it may have been built about the middle of the fifth century в.c. (Lie Hellemen, dr. p. 383). Considerable remains of the ancient city were visible so late as the end of the last century (Clarke, Trav. ii. pp. 292, seq.; Pallas, ii. pp. 70, seq) : but every trace of them had vanished when Murawiew Apostol visited the spot (Keise durch Taurien, p. 62). They were destroyed by a certain Lieut. Kruse, who used the stones for building and converted the ground into a vineyard (Dabois de Montperreux, Voyages, \&c. vi. p. 133). The ancient Chersonesus, however, had fallen into decay betiore the time of Strabo; but the new town was Hourishing and appears from the ruins to have been seated on the W. side of what is now the Quarantine Harbour of Sebastopol (Neumann, p. 392). The place was much damaged towards the end of the fourteenth century by Olgierd, sovereign of Lithuania, since which time it has been gradually falling into ruins (Kuramsin, Russ. Gesch. v. 13. Gern. tr.). The Turks carried away many of its sculptures and columns to adorn Constantinople. Nevertheless, the town, although almost entirely deserted, remained for three centuries in so perfect a state that a plan might have been drawn of it at the time when it came into the presession of the Russians; but its ruin was soon completed by its new masters, who blew up the walls and destroyed the graves and temples. (Clarke, ii. p. 207.) Pliny (iv. 12. s. 26) gives the circumference of its walls at 5 miles; but their outline could still be traced in 1820, and according to Dubois de Montperreux (vi. 138), was only about a quarter of that size. It is probable that Pliny may have confounded the town walls with the wall or rampart which extended ucruss the isthmus, which, as we have already seen, Strabo describes as being 40 stadia, or 5 miles, brad. The same writer speaks of it in another place (p.312) as being fortified with a wall. This wall ran from Ctenus, at the E. extremity of the harbour of Sebustipol to Symbolon (Balaclava) on the S. coast, and appears to have been made by the Bosporan kings as a defence against the Scythians. An account of its remaining vestiges is given by Clarke (ii. p. 285, seq.; cf. Seymour, p. 149.). The whole enclosure was anciently corered with gardens and villas, and the foundations of houses and of the houndary walls of fields and gardens may still be traced, as well as many remains of the town on the promontory between Quarantine Bay and Streletska Bay. Vestiges of the principal street show it to have been 20 feet broad. The town wall on the land side was near 2 miles long, built of limestone, and 5 or 6 feet thick, with 3 towers (Seymour, p. 150). Many antiquities and coins have been found in the rains of Chersonesus. In the neighbourbood are graves of the most simple kind, hewn in the rock. They are easy of access, and present in this respect a remarkable contrast to those at Panticapreuin ; but, from this cause, nothing but bones have been

TAURICA CHERSONESUS. 1111
found in them, whilst those at Panticapaeum have yielded valuable antiquities. According to Clarke (ii. 201, 210), the town of Eupatorium strod close to Chersonesus, though others have identified it with Inkerman. About the latter place, the ancient Ctenus, the rock is pierced all over with the subterranean dwellings of the ancient Tauri. On the top are the ruins of the castle built by Diophantes, general of Mithridates, to defend the Chersonese against the Tauro-Scythians. These caverns or crypts are now rapidly falling in. (Seymour, p. 140.) Similar caves are found in other parts of the peninsula.

The Heracleotic Chersonese was noted as the seat of the savage worship of Diana Tauropolis. The natives, or Tauri, themselves had a worship of a similar kind [TAURI] ; but whether it was indigenous among them, or whetber they borrowed it from the Dorian Heracleots who settled here, cannot be ascertained. The account of the Tauri themselves, that their virgin goddess was Iphigenia, the daughter of Agamemnon, would seem to lead to the latter conclusion; though it is well known that the nations of pagan antiquity readily adopted one another's deities when any similarity was observable in their rights and attributes; and from the account of Herodotus (iv. 103) it might perhaps be inferred that this horrible worship existed among the Tauri before the arrival of the Greeks. Artenis was a peculiarly Durian deity, and was worshipped in several parts of Greece with human sacrifices. There was a tradition that the town of Chersonesus was founded by Artemis herself. The Heracleot Chersonites erected a famous temple on a headland which took the name of Parthenium from it. Strabo however merely calls the Parthenium " the temple of the virgin, a certain daemon" (p. 308), and does not mention Artemis. Opinions vary as to which is the real promontory of Parthenium. Dany seek it at cape Fanary or Chersonese, which seems too near the town of Chersonesus, as Strabo places the temple at the distance of 100 stadia from the town, though Fanary answers to his description in other respects. Clarke and Palias identify it with the Aia Barm or "Sacred Promontory" (Clarke, ii. p. 286, and note), between Cape Fiolente and Balaclava, which, besides its name, has also a ruin to recommend it; though the latter claim to notice is shared by C. Fiolente. Dubois de Montperreux (vi. p. 194, sq.) thinks that the temple may have stood on the spot now occupied by the monastery of St. George ; whilst Neumann, again places it on the headland a little to the NW. of $C$. Fiolente. It will be seen that these opinions rest on little more than conjecture. On the coins of the Heracleotic Chersonese the image of Artemis occurs by far the most frequently. She sometimes appears with Apollo, sometimes with Hercules, the patron hero of the mother city, but more generally alone, and always as the goddess of the chase, never as Selene (Von Köhne, in the Memoirs of the Archaeolog. and Numism. Society of St. Petersburg, vol. ii. ap. Neumann, p. 420). Ou other coins a fish is frequently seen; and one has a plough on the obverse, and an ear of corn between two fishes on the reverse (Ib.). The bays of the Heracleotic peninsula abound with fish, which formed a great part of the riches of the country.

Of the history of the Heracleotic Chersonesus we know but little, but it may perhaps be inferred from the Inscription of Agasicles that its constitution was republican. It was impor.
tant enough to take $a$ part in political affiars as an independent city, at least as late as about the middle of the 2 nd century b. c., when, like its mother city. Heracleis, it was a party to the alliance against Pharnaces I., king of Pontus, and Mithridates, satrap of Armenia. (Po「b. Frg. lib. xxvi. c. 6, vol. iv. p. 345, sqq., ed. Sweigh.) Soon afterwards, however, we find it struggling with the Taurians and their allies the Sarmatians for existence (Polgaen. Strat. viii. c. 56), and it was ultimately compelled to place itself under the protection of Mithridates the Great. Subsequently, however, it regained its independence, through the Romans, and under the name of Cherson or Chorson flourished till a late period of the middle ages, and even overturned the Bosporan kingdom. (Const. Porphyr. de Adm. Imp. c. 53.)

Leaving the Heracleotic Chersonese, we will now proceed to describe the remainder of the coast of the Tauric peninsula, which may be soon despatched, as an account of its different cities is given in separate articles. From the haven of Symbolon (Balaclava) to Theodosia (Caffa) the coast is correctly described by Strabo as craggy, mountainous, and stormy, and marked with many headlands ( $p$. 309). The distance, however, which he assigns to this tract of 1000 stadia, or 125 miles, is rather too small. In both the Periplus of the Euxine the distance given is 1320 stadia, but this must include all the indentures of the coast. The most remarkable promontory in this part was the Cria-metopon, or Ram's Head, which has been variously identified. Some writers have taken it for the promontory of Laspi, which is in reality the most southern point of the peninsula. Some again have identified it with Ai Petri, and a still greater number with the Aju-dagh. But the account given by Arrian and the Anonymous agrees better with Cape Aithodor. These writers say that the Criu-metopon lay 220 stadia to the W. of Lampas. (Arrian, Peripl. p. 20; Anon. Peripl. p. 6.) Now Lampas is undoubtedly the present Bijuk Lampat, the distance between which and Cape Aithodor agrees very accurately with the preceding measurement. Scymnus indeed (ii. 320, Gail) states the distance at only 120 stadia; but this is evidently an error, as it is too short by half even for Aju-dagh. Cape Aithodor is not much N. of Lapsi, and from its position might easily have been taken by the Greeks for the southernmost point of the peninsula. (See Neumann, 4.51, sq.)
From the traces of Greek names, ruins, remains of marble columns, \&c., it may be inferred that the whole of this tract was once in the hands of the Greeks. But these relics probably belong to the Byzantine times, since the older geographers mention only four places on this part of the coast, namely, Charax, Lagyra, Lampas, and Athenaeon.

To the E. of Theodosia the coast of the Euxine trends into a large bay, which, approaching the Palus Maeotis on the N., forms an isthmus about 12 miles broad, to the E. of which, as Sar as the Cimmerian Busporus, extends the Bosporan peninsula, or that of Kerlsch, which swells out to double the breadth of the isthmus. The western half of this peninsula is flat; but the eastern portion rises into hills, which surround the bay in which Panticapaeum was situated. It possessed several flourishing maritime towns, as Caveka and Cimmericum on the S. coast: Nymphaeon Panticapaeum, the Bosporan capital, on the Cimmerian Bosporns; with some others of less note, as Mynnecium, Porthmion, and Hermisium. There
were also probably towns in the interior; but we know the name of only one, namely, lluratum. (Ptul. iii. 6. §6.) Beyond the Bosporan straits we have little to guide us but the accounts of Ptolenn. From those straits, the N. coast of the peninsula, which is high and chalky, proceeded in a westerly direction to the modern Arabat Somewhere on this tract lay the Greek colony of Heracleion.

On the E. side of the Tauric peninsula, the Tungus of Arabat, a narrow slip of land scarcely raised above the level of the sea, 52 miles long and about half a mile broad, runs along the whole coast, dividing the Maeotis from the $\sum a \pi \rho d \lambda i \mu \nu \eta$, or Putrid Sca But though Strabo knew that the latter formed the western portion of the Maeotis (p. 208), he nowbere mentions the Tongue of Arabat. The Putrid Sea seens to be the Lacus Buges of Pliny (ir. 12. s. 26); but his description is not very intelligible. According to the accounts of recent travellers the Putrid Sea, now called the Shiváshe. does not appear to doserve its name, as it has neither an unpleasant smell nor are its shores unhealthy (Seymour, p. 33); yet in the times of Clarke and Pallas it seems to have possessed both these offensive qualities. (Clarke, Trav. vol. ii. p. 314, note.)

The chief feature in the history of the Chersonesus Taurica, is that of the kingdom of the Bosporus, a sketch of which has been already given. [Bosporus Cimmerics, Vol. I. p. 421, seq.] After the extinction of that dynasty, towards the end of the 4 th century of our era, the peainsula fell into the hands of the Huns, of which race remnants still existed between Panticapaeum and Cherson in the 6th century. (Procop. Goth. iv. 5.) It was subsequently overrun by the Goths and other nations who followed the great stream of emigration. Justinian reunited the kingdom of the Bosporus to the Greek Empire; and the Byzantine emperors, till the fall of Constantinople, always regarded the Tauric peninsula as part of their dominions. But the Ta tars had made themselves the actual masters of it before the middle of the 13 th century. Under these pussessors, the Genoese, who settled on the coasts towards the end of the same century, played the same part as the Greeks did when the country was possessed by the Tauri, and planted several flourishing colonies. (Neumaun, Die Hellenen im Skythenlunde; Georgii, Alte Geographie, vol. ii ; Clarke's Travels, vol. ii. ; Danby Seymour, Russia on the Black Sea; Forbiger, Handb. der alt. Geogr. vol. iii.) [T. H. I.]

TAUR'ICl MONTES. [Taurica Chersonesus.]

TAljRI'NI (Tavpivoi), a Ligarian tribe, who occupied the country on the E. slope of the Alpus down to the left bank of the Padus, in the upper part of its course. They were the most northerly of the Ligurian tribes, and from their geographical position would more naturally have been regarded as belonging to Cisalpine Gaul than to Liguria; but both Strabo and Pliny distinctly say they were a Ligurian tribe, and the same thing may be inferred from the omission of their name by Polybius where he is relating the successive settlements of the Gaulish tribes in the N. of Italy (Pol. ii. 17; Strab. iv. p. $2(14$; Plin. iii. 17. s. 21). Their territory adjoined that of the Vagienni on the $S$., and that of the Insubres on the NE.; though the Laevi and Lebecii, tribes of which we know very little, mast also have bordered on their NE. frontier (Pol. l.c.). The first mention of the Taurini in history is at the time of Hanuibal's pussage of the Alps (в. с. 218), when that general,
on descending into the plains of Italy, found the Taurini on hostile terms with the Insubres, and, in consequence, turned his arms against them, took their principal city, and put the inhabitants to the sword. (Pol. iii. 60; Liv. xxi. 38, 39.) Neither Poitbius nor Livy mention the name of this city, but Appian calls it Taurasia (Annih.5): it was probably situated on the same site which was afterwards occupied by the Roman colony. The name of the Taurini is not once mentioned during the long wars of the Romans with the Cisalpine Gauls and Ligurians, and we are ignorant of the time when they finally passed under the Roman yoke. Nor have we any precise account of the foundation of the Ruman colny in their territory which assumed the name of Augusta Taurinorum, though it is certain that this took place under Augustus, and it was doubtless connected with his final subjugation of the Alpine tribes in b.c. 8. From this time the name of the Taurini never again appears in history as that of a people; but during the latter ages of the Roman Empire the city of Augusta Taurinorum seems to have been commonly known (as was the case in many instances in Transalpine Gaul) by the name of the tribe to which it belonged, and is called simply Taurini in the Itineraries, as well as by other writers. (Itim. Ant. p. 341 ; Itin. Hier. p. 556 ; Tab. Peut.; Ammian. xv. 8. § 18.) Hence its modern name of Torino or Turin. This is the only city that we can assign with any certainty to the Taurini. On the W. their territory was bounded (at least in the days of Augustus) by the Segusiani and the other tribes subject to Cottius; and their limit in this direction is doubtless marked by the station Ad Fines, situated 18 miles from Augusta, on the road to Segusio (Itin. Ant. L.c.). But it appears probable that at an earlier period the nation of the Taurini was mure widely spread, or their name used in a more comprehensive sense, so as to comprise the adjoining passes of the Alps; for Livy speaks of the Insubrian Giauls who crossed into Italy, "per Taurinos saltusque invios Alpes transcenderunt" (Liv. v. 34), and Strabo, in enumerating, after Polybius, the passes across the Alps, designates one of them as $\tau \dot{\eta} \nu \delta i \alpha$ Taupivèv (Strab. iv. p. 209.). Whether the pass here meant is the Mont Geneure or the Mont Cenis (a much disputed point), it would not be included within the territory of the Taurini in the more restricted sense.
[E. H. B.]
TAURIS, an island of the Ionian sea, between Pharas and Corcyra, opposite to the NW. point of the peninsula of Hyllis and the mouth of the Naron. (Auct. B. A. 47.) Now Torcola. [T. H. D.]

TAURISCI. [Noricum, Vol. II. p. 447.]
TAUROEIS, TAUROE'NTIUM (Tavpóeis, Tavpoévtiov: Eth. Taupoévtios). Steph. B. (8. v. Tavpóts), who calls it a Celtic town and a colony of the Massaliots, quotes the first book of Artemidorus' geography for a foolish explanation of the origin of the name. The place is mentioned by Caesar (B. C. ii. 4), who says "Taurventa quod est castellum Massiliensium perreniunt;" by Strabo (iv. pp. 180, 184), by Scymnus Chius, and by Ptolemy (ii. 10. § 8), who places it between Massilia and Citharistes Promontorium. D'Anville erroneously supposes that Caesar uses Tauroenta for the plural number ; but it is the accusative of Tauroeis. Strabo (iv. p. 184) enumerates the Massaliot settlements botween Massilia and the Varus in this order: Tauroentium, Olbia, Antipolis, Nicaea. Mela (ii. 5) enumerates the places on this coast in a different order
from east to west: Athenopolis, Olbia, Taurois, Citharistes, and "Lacydon Massiliensium portus." Ptolemy, as we have seen, places Tauroeis between Massilia and Citharistes. In the Maritime Itin. the positions letween Telo Martius (Toulon) and Iminadrus seem to be out of order [lmmadics]; and they are to be placed thus - Aemines (Embiez), Thurgeis (Taurenti). Citharista [Citharista]. Carsici (Cassis), Immadrus, Massilia Geographers have been much divided in opinion on the site of Tauroeis, but the modern name seems to determine the place to be at the right of the entry of the bay of Ciotat.
[G. L.]
TAUROME'NIUM (Taupouéviov: Eth. Tavpo$\mu \in \nu i \tau \eta s$, Tauromenitunus: Taormina), a Greek city of Sicily, situated on the E. coast of Sicily, about midway between Messana and Catana. It was only about 3 miles from the site of the ancient Naxos, and there is no doubt that Tauromenium did not exist as a city till after the destruction of Naxos by Dionysius of Syracuse, b. c. 403; but the circumstances connected with its foundation are somewhat confused and uncertain. [Naxos.] It appears, however. from Diodorus that after the destruction of Naxos, the remaining inhabitants of that city were driven into exile, and its territory was assigned by Dionysius to the neighbouring Siculi. These, however, did not re-occupy the site of the ancient city, but established themselves on a hill to the N . of it, which was called the hill of Taurus ( $\delta$ ióoos $\delta$ каגoúmeyos Taùpos). Here they at first constructed only a temporary camp (in B. c. 396), but afterwards erected walls and converted it into a regular fortress or town, to which they gave the name of Tauromenium. (Diod. xiv. 58, 59.) The place was still in the hands of the Siculi in B. c. 394, and they held it against the efforts of Dionysius, who besieged the city in vain for great part of the winter, and though he on one occasion forced his way within the walls by a nocturnal surprise, was again driven out and repulsed with heavy loss. (Ib. 87, 88.) But by the peace concluded in B. c. 392, it was expressly stipulated that Tauromenium should be subject to Dionysius, who expelled the greater part of the Siculi that had settled there, and supplied their place with his own mercenaries. (Ib. 96.) From this time we hear no more of Tauromenium till b. c. 358, when we are told that Andromachus, the father of the bistorian Timaeus, brought together all the remains of the exiled Naxians, who were still scattered about in different parts of Sicily, and established them all at Tauromenium. (Id. xvi. 7.) This is related by Diodorus as if it were a new foundation, and even as if the name had then first been applied to the city, which is in direct contradiction with his former statements. What had become of the former inhabitants we know not, but there is little doubt that the account of this resettlement of the city is substantially correct, and that Tauromenium now for the first time became a Greek city, which was considered as taking the place of Naxos, though it did not occupy the same site. (Wesseling, ad Diod. xiv. 59.) Hence Pliny's expression, that Tauromenium had formerly been called Naxos (Plin. iii. 8. s. 14) is nearly, though not strictly, correct.

The new settlement seems to have risen rapidly to prosperity, and was apparently already a considerable town at the time of the expedition of Timoleon in b.c. 345. It was the first place in Sicily where that louder landed, having eluded the vigilance of
the Carthaginians, who were gnarding the straits of Messana, and crossed direct from Rhegium to Tauromenium. (Diod. xvi. 68; Plut. Timol. 10.) The city was at that time still under the government of Andromachus, whose mild and equitable administration is said to have presented a strong contrast with that of the despots and tyrants of the other Sicilian cities. He welcomed Timoleon with open arms, and afforded him a secure resting place until he was enabled to carry out his plans in other parts of Sicily. (Diod. l. c.; Plut. l. c.) It is certain that Andromachus was not deprived of the chief power, when all the other tyrants were expelled by Timoleon, but was permitted to retain it undisturbed till his death. (Marcellin. Vit. Thucyd. § 27.) We hear, however, very little of Tauromeniuin for some time after this. It is probable that it passed under the anthority of Agathocles, who drove the bistorian Timaeus into exile; and some time after this it was subject to a donestic despot of the name of Tyndarion, who was contemporary with Hicetas of Syracuse and Phintias of Agrigentum. (Diod. xxii. Exc. H. p. 495.) Tyndarion was one of those who concurred in inviting Pyrrhus into Sicily (b.c. 278), and when that monarch landed with his army at Tauromenium, joined hin with all his forces, and supported him in his march upon Syracuse. (Diod. l. c. pp. 495, 496.) A few years later we find that Tauromenium had fallen into the power of Hieron of Syracuse, and was employed by him as a stronghold in the war against the Mamertines. (Ib. p. 497.) It was also one of the cities which was left under his dominion by the treaty concluded with him by the Romans in b.c. 263. (Diod. xxiii. p. 502.) This is doubtless the reason that its name is not again mentioned during the First Punic War.

There is no doubt that Tauromenium continued to form a part of the kingdom of Syracuse till the death of Hieron, and that it ouly pissed under the government of Rome when the whole island of Sicily was reduced to a Roman province; but we have scarcely any account of the part it took during the Sercond Punic War, though it would appear, from a hint in Appian (Sic. 5), that it submitted to Marcellus on favourable terms; and it is probable that it was on that occasion it obtained the peculiarly favoured position it enjoyed under the Roman dominion. For we learn from Cicero that Tauromenium wats one of the three cities in Sicily which enjoyed the privileges of a "civitas foelerata" or allied city, thus retaining a nominal independence, and was not even subject, like Messana, to the obligation of furnishing ships of war when called upon. (Cic. Verr. ii. 66, iii. 6, v. 19.) But the city suffered severe calamities during the Servile War in Sicily, b.c. 134-132, having fallen into the hands of the insurgent slaves, who, on account of the great strength of its position, made it one of their chief posts, and were able for a long time to defy the arms of the consul Rupilius. They held out until they were reduced to the most fearful extremities by famine, when the citadel was at length betrayed into the hands of the consul by one of their leaders named Sarapion, and the whole of the survivors put to the sword. (Dind. xxxiv. Exc. Phot. p. 528; Oros. v. 9.) Tauromenium again bore a conspicuous part during the wars of Sextus Pompeius in Sicily, and, from its strength as a fortress, was one of the principal points of the position which he took up in r.c. 36, for defence ayainst Octuvian. It became the scene also of a sea-tight between a part of the fleet of Octavian,
commanded by the triumvir in person, and that of Pompeius, which terminated in the defeat and almoot total destruction of the former. (Appian, B.C. v. 103, 105, 106-111, 116; Dion Cass. zlix. 5.) In the settlement of Sicily after the defeat of Pompey, Tauromenium was one of the places selected by Augustus to receive a Roman colony, probably as a measure of precaution, on account of the strength of its situstion, as we are told that he expelled the former inhabitants to make room for his new colonists. (Diod. xvi. 7.) Strabo speaks of it as one of the cities on the E. coast of Sicily that was still subsisting in his time, though inferior in population both to Messana and Catana. (Strab. vi. pp. 267, 268.) Both Pliny and Ptolemy assign it the rank of a " colonia" (Plin. iii. 8. s. 14; Ptol. iii. 4. § 9), and it seems to have been one of the few cities of Sicily that continued under the Roman Empire to be a place of some consideration. Its territory was noted for the excellence of its wine (Plin. xiv. 6. 3. 8), and produced also a kind of marble which seems to have been highly valued. (Athen. v. p. 207.) Juvenal also speaks of the sea off its rocky coast as producing the choicest mullets. (Juv. v.93.)
The Itineraries place Tauromenium 32 miles from Messana, and the same distance from Catana. (Itin. Ant. p. 90; Tab. Peut.) It continued after the fall of the Roman Empire to be one of the more considerable towns of Sicily, and from the strength of its position was one of the last places that was retained by the Greek emperors; but it was taken by the Saracens in A. D. 906 after a siege of two years, and totally destroyed, a calamity from which it has never more than partially recovered. The present town of Taormine is a very poor place, with about 3500 inhabitants; but it still occupies the ancient site, on a lutty hill which forms the last projecting point of the mountain ridge that extends along the coast from Cape Pelorus to this point. The site of the town is about 900 feet above the sea, while a very steep and almost isolated rock, crowned by a Saracen castle, rises about 500 feet higher: this is undoubtedly the site of the ancient Arx or citadel, the inaccessible position of which is repeatedly alluded to by ancient writers. Portions of the ancient walls may be traced at intervals all round the brow of the hill, the whole of the summit of which was evidently occupied by the ancient city. Numerous fragments of ancient buildings are scattered over its whole surface, including extensive reservoirs of water, sepulchres, tesselated pavements, \&c., and the remains of a spacious editice, commonly called a Naumachia, but the real destimation of which it is difficult to determine. But by fir the most remarkable monument remaining at Taormina is the ancient theatre, which is one of the most celebrated ruins in Sicily, on account both of its remarkable preservation and of the surpassing beauty of its situation. It is built for the most part of brick. and is therefore probably of Roman date, though the plan and arrangement are in accordance with those of Greek, rather than Roman, theatres; whence it is supposed that the present structure was rebuilt opun the foundations of an older theatre of the Greek periox. The greater part of the seats have disappeared, but the wall which surrounded the whole cavea is preserved, and the prosceniun with the back wall of the scena and its appendages, of which only traces remain in most ancient theatres, are here preserved in singular integrity, and contribute much to the pictureaque
effect, as well as to the interest, of the ruin. From the fragments of architeotural decorations still extant we learn that it was of the Corinthian order, and richly ornamented. In size it ranks next to the theatre of Syracuse, among those of Sicily. Some portions of a temple are also visible, converted into the church of S. Pancrazio, but the edifice is of small size and of little interest. The ruins at Taornina are described in detail by the Duke of Serra di Falco (Antichità della Sicilia, vol. v. part iv.), as well as by most travellers in Sicily. (Swinburne's Travels, vol. ii. p. 380 ; Sinyth's Sicily, p. 129, \&cc.)
[E. H. B.]

## COIN OF TAUROMENIUM.

TAUROSCYTHAE (Taupooríval, Ptol. iii. 5. § 25), called by Pliny Tauri Scythae (iv. 12. 8. 26), a people of European Sarmatia, composed of a mixture of Taurians and Scythians. They were seated to the W. of the Jazyges, and the district which they inhabited appears to have been called Tauroscythis. (Cf. Strab. ap. Hudson, p. 87 ; Capit. MI. dnt. 9 ; Procop. de Aed. iii. fin.) [T. H. D.]

TAURU'NUM (Taúpouvov), a strong fortress in Lower Pannonia, at the point where the Savus joins the Danubius, on the road from Sirmium to Sinyidunum. It was the station of a small fleet of the Danubius. (Plin. iii. 28; Ptol. ii. 16. §4; It. Ant. pp. 131, 241 ; Tab. Peut.; Geogr. Lav. iv. 19, where it is called Taurynum.) Its site is now ocrapied by the fortress of Semlin, opposite to Belyrade.
[L. S.]
TAURCS MONS ( $\delta$ Taivos), one of the great mountain ranges of Asia, the name of which is believed to be derived from the Aramaic Tur or Tura, i. e., a high mountain or Alp, and accordinely is in reality a common noun applied to all the high mountains of Asia. The name has even been transferred to Europe, for the Taurian Chersonesus in Sarmatia and the Taurisci in the Norican Alps appear to owe their name to the same origin. We cannot wonder therefore when we find that Eratosthenes (ap. Strab. xv. 689) and Strabo (ii. pp. 68, 129 , x. p. 490) apply the uane to the whole range of mountains extending from the Mediterranean to the eastern ocean, although their connection is often broken. This extent of mountains is, according to Strabo's calculation (xi. p. 490), 45,000 stadia in length, and 3000 in breadth. But in the narrower and common acceptation Mount Taurus is the runge of mountains in Asia Minor which begins at Cape Sacrum or Cbelidonium on the coast of Lycia, which for this reason is called by Mela (i. 15) and Pliny (v. 28) Promontorium Tauri. It was, however, well known to the ancients that this promontory was not the real commencement, but that in tact the range extended to the south-western extremity of Asia Minor. (Strab. ii. p. 129, xi. p. 520, xiv. pp. 651, 666.) This range rises in the $W$. as a lofty and precipitous mountain, and runs without any interruptions, first in a northern direction between Lycia and Pamphylia, then in an eastern direction through Pisidia and leauria as far as the fruntiers of Cilicia and Lycaonia. There it separates into two muin
branches. The one proceeds north-eastward under the name of Antitaurus ('Avtíaupos). and surpasses the other in height. It runs through Cappadocia, where it forms Mount Argaens ('Apraios), and Armenia, where it is called Mons Capotes, and through the Montes Moschici it is connected with the Cancasus, while a more southerly branch, under the names of Abus and Macis or Massis, runs through Armenia towards the Caspian sea. The second branch, which separates itself on the frontiers of Cilicia and Lycaonia, retains the name of Taurus, and proceeds from Cilicis, where it forms the Portae Cilicise, and sends forth Mons Amanus in a southern direction, while the main branch proceeds through Cappadocia. After being broken through by the Euphrates, it again sends forth a southern branch under the name of Mons Masius. The name Taurus ceases in the neighbourhood of Lake Arsissa, the mountains further east having other names, such as Niphates, Zagrus, \&c. Most parts of Mount Taarus, which still bears its ancient name, were well wooded, and furnislied ubundance of timber to the maritime cities on the south coast of Asia Minor. [L. S.]

TAURUS PALUS, an étang on the coast of Narbonensis, west of the delta of the lhone. It is named in the verses of Avienus, quoted in the article Fecyi Jugum; and to the verses there cited may be added the following verse:-
"Taurum paludem namque gentici (gentili) vo-
But I. Vossins in his edition of Mela (ii. 5, note) writes the verses of Avienns thus:-
"In usque Taphrum pertivet,
Taphron paludem namque gentili vocant;"
an alteration or corruption which D'Anville justly condemns, for the étang is still named Taur, or vulgarly Tau.
[G. L.]
TAXGAE: TIUM (Tak ${ }^{2}$ aíiov), a place assigned by Ptoleny (ii. 12. § 5) to Rhaetia, but which more properly belonged to Vindelicia, was situated on the northerin shore of the Lacus Brigantinus, and probably on the site of the modern Lindau. [L. S.]

TA'XILA (Ták $\lambda a$, Arrian, $A n a b$. v. 8; Takía $\lambda a$, Ptol. vii. $1 . \S 45$ ), a place of great importance in the Upper Panjiab, between the Indus and Hydaspes, which was visited by Alexander the Great. It is said to have been ruled at that time by a chief named Taxiles, who behaved in a friendly manner to the Grecian king. The country around was said to be very fertile, and more abundant than even Egypt (Strab. xv. pp. 698-714). There can be little doubt that it is represented by the vast ruins of Manihyala, which has in modern times been the scene of some very remarkable researches (Elphinstone, Cabul, p. 79; Burnes, Travels, i. p. 65, ii. p. 470.) The famous Topes of Manikyala, which were examined by General Ventura and others (Asiatic Res. xvii. p. 563), lie to the eastward of Rawil-pindi. Wilson considers Taxila to be the same as the Takihsasila of the Hindus (Ariana, p. 196).
[V.]
TAY'GETUS. [Laconia, pp. 108, 109.]
TAZUS (TaSós, Ptol. iii. 6. § 6). 1. A town in the SE. part of the Chersonesus Tuurica.
2. A town of Asiatic Sarmatia, on the N. coast of the Pontus Euxinus. (Ptol. v. 9. § 9.). [T. H. D.]

TEA'NUM (T'avov: Eth. Teanensis: Civitate), sometimes also called Teanum Apulum (Cic. pro Cluent. 9; T'́áav "Axou入ov, Strab.: E'th. Teanenses Apuli), to distinguish it from the Campanisncity of the

## TEANUM.

same name, was a city of Apulia, situated on the right bank of the river Frento (Fortore), about 12 miles from its mouth. It appears to have been one of the most considerable cities of Apulia before its conquest by the Romans; but its name is first mentioned in B. $\mathbf{c}$ 318, when, in conjunction with Canusium, it submitted to the Roman consuls M. Foslius Flaccinator and L. Plautius Venno. (Liv. ix. 20.) It is again noticed during the Second Punic War, when it was selected by the dictator M. Junius Pera as the place of his winter-quarters in Apulia. (Id. xxiii. 24.) Cicero incidentally notices it as a municipal town, at the distance of 18 miles from Larinum (Cic. pro Cluent. 9), and its name is found in all the geographers among the municipal towns of Apulia. (Strab. vi. p. 285; Mel. ii. 4. § 6 ; Plin. iii. 11. s. 16; Ptol. iii. 1. § 72.) Its municipal rank is confinned also by an inscription, as well as by the Liber Coloniarum, and it is clear that it never attained the rank of a colony. (Orell. Inscr. 140; Lib. Col. p. 210.) Its ruins still exist at a place called Civilate, near the remains of a Roman bridge (now called the Ponte di Civitate), over the Fortore, by which the ancient road from Larinum to Luceria crossed that river. The distance from the site of Larinum agrees with that stated by Cicero of 18 miles (the Tabula erroneously gives only 12), and the discovery of inscriptions on the spot leaves no doubt of the idenctation. Considerable remains of the walls are still extant, as well as fragments of other buildings. Frum these, as well as from an inscription in which we find mention of the "Ordo splendidissimus Civitatis Theanensium," it seems probable that it continued to be a flourishing town under the Roman Empire. The period of its final decay is uncertain, but it retained its episcopal see down to modern times. (Holsten. Not. ad Cluver. p. 279; Momanelli, vol. ii. p. 291; Mommsen, Inscr. R. N. p. 271.)

Strabo speaks of Teanum as situated at some distance inland from a lake, the name of which he does not mention, but which is clearly the Lacus Pantanus of Pliny, now called the Lago di Lesina. From an inscription found on its banks it appears that this was comprised within the territory of Teanum, which thus extended down to the sea (Romanelli, l. c.), though about 12 miles distant from the coust.

Several Italian topographers have assumed the existence of a city in Apulia of the name of Teate, distinct from Teanum (Giovenazzi, Sito di Areja, p. 13; Romanelli, vol. ii. p. 286); but there seems no doubt that the two names are only different forms of the name, and that the Teates Apuli of Livy (ix. 20) are in reality the people of Teanum. It is true that that writer mentions them as if they were distinct from the Teanenses whom he had mentioned just before; but it is probable that this arises merely from his having followed different annalists, and that both statements refer in fact to the same people, and are a repetition of the same occurrence. (Bommsen, Unter-Ital. Dialekt. p. 301.) In like manner the Teate mentioned in the Liber Coloniarum (p. 261) is evidently the same place called in an earlier part of the same document (p. 210) Teanum. [E.H.B.]

TEA'NUM (Téavov: Eth. Teanensis: Teano), sometimes called for distinction's sake Teanum Sidicinum (Liv. xxii. 57: Cic. ad Att. viii. 11; Plin. i:i. 5. s. 9; Téavov Eiókivov, Strab. v. p. 237). an important city of Campania, situated in the interior of that province, on the Via Latina,
between Cales and Casinum. (Strab. v. p. 237.) It was therefore the frontier city of Campania, as that tenn was understood ander the Roman Empire; but originally Teanum was not reckoned a Campanian city at all, but was the capital of the small independent tribe of the Sidicini. [Stdicini.] It was indeed the only place of importance that they possessed, so that Livy in more than one instance alludes to it, where he is speaking of that people, merely as "their city," without mentioning its name (Liv. viii. 2, 17). Hence its history before the Roman conquest is identical with that of the people, which will be found in the article Sidicini. The first mention of Teanum after the Roman conquest, is in B.c. 216, immediately after the battle of Cannae. when Marcellus sent forward a legion from Rome thither, evidently with the view of securing the line of the Via Latina. (Liv. xxii. 57.) A few years later, b.c. 211, it was selected as a place of confinement for a part of the senators of Capua, while they were awaiting their sentence from Rome; but the consul Fulvius, contrary to the opinion of his colleague App. Clandius, caused them all to be put to death without waiting for the decree of the senate. (Liv. xxvi. 15.) From this time Teanum became an ordinary municipal town : it is incidentally mentioned as such on several occasions, and its pasition on the Via Latina doubtless contributed to its prosperity. A gross outrage offered to one of ita municipal magistrates by the Roman consul, was noticed in one of the orations of C. Gracchus (ap. A. Gell. x. 3), and we learn from Cicero that it was in his time a flourishing and populous town. (Cic. de Leg. Agr. ii. 31, 35, ad. Att. viii. 11, d.) Its name repeatedly occurs in the Social War and the contest between Sulla and Marius (Appian, B. C. i. 45, 85); and at a later period it was the place where the commanders of the legions in Italy held a kind of congress, with a view to bring about a reconciliation between Octarian and L. Antonius (Ib. v. 20). It was one of the cities whose territory the tribune Rullus proposed by his law to divide among the Roman people (Cic. l. c.); but this misfortane was averted. It subsequently, however, received a colony under Augustus (Lib. Col. p. 238; Plin. iii. 5. s. 9), and seems to have retained its colonial rank under the Empire. (Mommsen, Inscr. R. N. 3989, 3999.) Strabo tells us that it was the largest and most populous town on the Via Latina, and the most considerable of the inland cities of Campania after Capna. (Strab. v. pp. 237, 248.) Inscriptions and existing remains confirm this account of its importance, but we hear little more of it ander the Roman Empire. The Itineraries place it 16 miles from Casinum, and 18 from Venafrum: a cross road also struck off from Teanum to Allifae, Telesia, and Beneventum. (Jtin. Ant. pp. 121, 304; Tab. Peut.) Another branch also communicated with Suessa and Minturnae.

Teanum was not more than 5 miles from Cales : the point where the territories of the two cities joined was marked by two shrines or aediculae of Fortune, mentioned by Strabo, under the name of ai סúo Túxat (v. p. 249).

Teanum appears to have declined daring the middle ages, and the modern city of Teano is a poor place, with only about 4000 inhabitants, though retaining its episcopal soe. Many ruins of the ancient city are visible, though none of them of any great interest. They are situated below the modern city, which stands on a hill, and considerably nearer to

Calvi (Cales). The most important are those of an amphitheatre and a theatre, situated near the Via Latina ; but numerous remains of other buildings are found scattered over a considerable space, though for the most part in imperfect preservation. They are all constructed of brick, and in the reticulated style, and may therefore probably be all referred to the period of the Roman Empire. Numerous inscriptions have also been found, as well as coins, vases, intaglios, \&c., all tending to confirm the account given by Strabo of its ancient prosperity. (Romanelli, vol. iii. p. 456 ; Hoare's Class. Tour, vol. i. pp. 249-264; Mommsen, Inscr. R. N. pp. 208, 209).

At a short distance from Teano are some mineral springs, now called Le Caldarelle, which are evidently the same with the "aquae acidulae," mentioned both by Pliny and Vitruvius as existing near Teanum. (Plin. xxxi. 2.s.5; Vitruv. viii. 3. § 17.) The remains of some ancient buildings, called $I l$ Bagno Nuovo, are still visible on the spot. [E.H.B.]

COIN OF TEANUM SIDICINUM.
TEARI JULIENSES, the inhabitants of a town of the Ilercaones in Hispania Tarraconensis (Plin. iii. 3. § 4). It is called by Ptolemy Tıapoovia, and is probably the modern Trayguera. [T. H.D.]

TEARUS (Plin. iv. 11. s. 18; Téapos, Herod. iv. 90), now Teare, Deara, or Dere, a river in the SE. of Thrace, flowing in a SW. direction, until it joins the Contadesdos, their united waters falling into the Agrianes, one of the principal eastern tributaries of the Hebrus. Herodotus (l. c.) states that the sources of the Tearus are equidistant from Heraeum on the Propontis and Apollonia on the Euxine; that they are thirty-eight in number; and that, though they all issue from the same rock, some of them are cold, others warm. Their waters had the reputation, among the neighbouring people, of being pre-eminently medicinal, especially in cases of itch or mange ( $\psi \omega \dot{\omega} \rho \eta$ ). On his march towards the Danube, Darius halted his army for three days at the sources of the Tearus, and erected a pillar there, with an inscription commemorative of their virtues, and of his own.
[J. R.]
TEA'TE (Tєacéa, Strab. Ptol.: Eth. Teatinus: Chieti), the chief city of the Marrucini, was situated on a hill about 3 miles from the river Aternus, and 8 from the Adriatic. All the ancient geographers concur in representing it as the metropolis or capital city of the tribe (Strab. v. p. 241 ; Plin. iii. 12. s. 17 ; Ptol. iii. 1. $\S 60$ ); and Silius Italicus repeatedly notices it with the epithets "great" and "illustrions" (" magnum Teate," Sil. Ital. viii. 520; Clarum Teate, Id. xvii. 453); but, notwithstanding this, we find no mention of it in history. Inscriptions, however, as well as existing remains, concur in proving it to have been a flourishing and important town under the Roman dominion. It was apparently the only municipal town in the land of the Marrucini, and hence the
limits of its municipal district seem to have coincided with those of that people. We learn from the Liber Coloniarum that it received a body of colonists under Augustus, but it did not bear the title of a colony, and is uniformly styled in inscriptions a municipium. (Lib. Colon. p. 258; Orell. Inscr. 2175, 3853 ; Mommsen, Inscr. R. N. pp. 278, 279.) It derived additional splendour in the early days of the Empire from being the native place of Asinius Pollio, the celebrated statesman and orator; indeed the whole family of the Asinii seem to have derived their origin from Teate. Herius Asinius was the leader of the Marrucini in the Social War, and a brother of the orator is called by Catullus " Marrucine Asini." (Liv. Epit. Ixxiii. ; Catull. 12. 1.) The family of the Vettii also, to which belonged the Vettius Marcellus mentioned by Pliny (ii. 83. s. 85), appears to have belonged to Teate. (Mommsen, l.c. 5311.)

The Itineraries place Teate on the Via Valeria, though from the position of the town, on a hill to the right of the valley of the Aternus, the road must have made a considerable détour in order to reach it. (Itin. Ant. p. 310; Tab. Peut.) Its name is also noticed by P. Diaconus (ii. 20), and there seems no doubt that it continued throughout the middle ages to be a place of importance, and the capital of the surrounding district. Chieti is still one of the most considerable cities in this part of Italy, with above 14,000 inhabitants, and is the see of an archbishop. Still existing remains prove that the ancient city occupied the same site as the modern Chieti, on a long ridge of hill stretching from N. to S., though it must have been considerably more extensive. Of these the most important are the ruins of a theatre, which must have been of large size; those of a large edifice supposed to have been a reservoir for water, and two temples, now converted into churches. One of these, now the church of S. Paolo, and considered, but without any anthority, as a temple of Hercules, was erected by the Vettius Marcellus above noticed; the other, from the name of Sta Maria del Tricaglio which it bears, has been conjectured to have been dedicated to Diara Trivia. All these edifices, from the style of their construction, belong to the early period of the Roman Empire. Besides these, numerous mosaics and other works of art have been discovered on the site, which attest the flourishing condition of Teate during the first two centuries of the Christian era. (Romanelli, vol. iii. pp. 104 -109; Craven, Abruzzi, vol. ii. pp. 8,9.) [E.H.B.]

coin of teate.
TEBENDA (Téfevסa), a town in the interior of Pontus Galaticus (Ptol. v. 6. § 9), is no doubt the same as the Tebenna mentioned by Anna Comnena (p. 364, в.) as situated in the vicinity of Trapezus.
[L. S.]
TECE'LIA (Teke入ia), a town placed by Ptolemy
（ii．11．§ 27）in the north of Germany，perhaps in the country of the Chauci，on the left bank of the Visurgis（Weser）．Its site must probably be looked for near or at the village of Zetel，about 3 iniles from the western bank of the Weser．（Reichard， Germanien，p．245．）
［L．S．］
TECMON（Téкца⿱亠乂：Eth．Teкиஸ́vios），a city of Molossis in Epeirus，incorrectly called by Stephanus B．a city of Thesprotia，taken by L．Anicius，the Roman commander，in B．c．167．Leake supposes that Guriánista，near Kúrendo，about 20 miles to the IV．of Joónnina，may have been the site of Tec－ mon or Horreum，which Livy mentions in connection with Tecmon．（Liv．xlv．26；Steph．B．z．v．；Leake， Northern Greece，vol．iv．p．83．）

TECTOSACES（Tektóaakes，Ptol．vi．14．§ 9）， a people of Scythia within Imaus．［T．H．D．］

TECTOSAGES．［Volcae．］
TECTOSAGES，TECTOSAGAE，or TECTO－ SAGI（Tektóvayes，Tektoбá ${ }^{\prime}$ al），one of the three grest tribes of the Celts or Gallograeci in Asia Minor，of which they occopied the central parts． For particulars about their history，see Galatia． These Tectossges were probably the same tribe as the one mentioned by Polybius nuder the names of Aegosages or Rigosages．（Polyb．v．33，77．78， 111．）
［L．S．］

## TECUDI．［Tichis．］

TEDA＇NIUS（T $\eta \delta \alpha=105$ ），a small river of Illy－ ricum（Ptol．ii．16．§ 3），on the frontier of the district called Iapydia（Plin．iii．25），is in all pro－ bability the modern Zermanja
［L．S．］
TE＇GEA（Teréa，Steph．B．s．v．），a town of Crete， which．according to legend，was founded by Aga－ meinnon．（Vell．Pat．i．1．）The coins which Sestini and Pellerin attribnted to the Cretan Tegea have bren restored by Eckhel（vol．ii．p．321）to the Arcadian city of that name．
［E．B．J．］
 Tegeăta），one of the most ancient and powerful towns of Arcadia，situated in the SE．of the country．Its territory，called Thgeatis（ $T \in \gamma \in \hat{a} \tau i s$ ），was bounded by Cynuria and Argolis on the E．，from which it wes separated by Mt．Parthenium，by Laconia on the S．，by the Arcadian district of Maenalia on the W．，and by the territury of Mantineia on the N． The Tegeatae are said to have derived their name from Tegeates，a son of Lycaon，and to have dwelt originally in eight，afterwards nine，demi or town－ ships，the inhabitants of which were incorporated by Aleus in the city of Tegea，of which this hero was the reputed founder．The names of these nine townships，which are preserved by Pausanias，are： Gareatae（Гapeâtau），Phylaceis（\＄u入akeis），Cary－ ätae（Kapuâraı），Corytheis（Koputeis），Potachidae （Пavaxídı），Oeätae（Oiàrau），Manthyreis（May－ Oupeis）．Echervetheis（＇Exevt $\theta \in$ is），to which Aphei－ dantes（＇Aфeiסavres）was added as the ninth in the reign of king Apheidas．（Paus．viii．3．§4，viii． 45. § 1；Strab．viii．p．337．）The Tegeatae were early divided into 4 tribes（фunaí），called respectively Clareōtis（Kларє由̀тıs，in inseriptions Kpaptṑтss）， Hippothoitis（＇Irжönitis），Apoloneätis（＇Aлодлco－ veáris），and Athaneitis（＇Adaveâtis），to each of which belonged a certain number of metocei（ $\mu \dot{\epsilon}-$ tousot）or resident aliens．（Paus．viii．53．§ 6； Bückh，Corp．Inscr．no．1513．）

Tegea is mentioned in the lliad（ii．607），and was probably the most celcbrated of all the Mrca－ dian towns in the earliest times．This appears from its heroic renown，since its king Echemus is said
to have slain Hyllus，the son of Hercules，in single combat．（Herod．ix．26；Pans．viii．45．§ 3．）The Tegeatae offered a long－continued and success－ ful resistance to the Spartans，when the latter at－ tempted to extend their dominion over Arcadia． In one of the wars between the two people，Cbari－ läus or Charillus，king of Sparta，deceived by an oracle which appeared to promise victory to the Spartans，invaded Tegeatis，and was not only de－ feated，but was taken prisoner with all his men who had survived the battle．（Herod．i．66；Pans．iii． 7．§ 3，viii．5．§ 9，viii．45．§ 3，47．§ 2， 48. § 4．）More than two centuries afterwards，in the reign of Leon and Agesicles，the Spartans again fought unsuccessfully against the Tegeatae； but in the following generation，in the time of their king Anaxandrides，the Spartans，having obtained possession of the bones of Orestes in accordance with an oracle，defeated the Tegeatae and compelled them to acknowledge the supremacy of Sparta，about b．c．560．（Herod．i．65，67，seq．；Paus．iii．3．§ 5，seq．）Tegea，however，still retained its inde－ pendence，though its military force was at the dis－ posal of Sparta；and in the Persian War it appears as the second military power in the Peloponnesins， having the place of honour on the left wing of the allied army．Five bundred of the Tegeatae fought at Thermopylae，and 3000 at the battle of Plataes， half of their force consisting of hoplites and half of light－armed troops．（Herod．vii．202，ix．26，seq．， 61．）As it was not usual to send the whole furce of a state upon a distant march，we may probably estimste，with Clinton，the force of the Tegeatae on this occasion as not more than three－fourths of their whole number．This would give 4000 for the mili－ tary population of Tegea，and about 17,400 for the whole free population．（Clinton，F．H．vol．ii．p．417．）

Soon after the battle of Plataea，the Tegeatae were again at war with the Spartans，of the causes of which，however，we have no information．We only know that the Tegeatae fought twice against the Spartans between B．c． 479 and 464，and were each time defeated；first in conjunction with the Argives，and a second time together with the other Arcadians，except the Mantineians at Dipaea，in the Maenalian district．（Herod．ix．37；Paus．iii． 11．§ 7．）About this time，and also at a subse－ quent period，Tegea，and especially the temple of Athena Alea in the city，was a frequent place of refuge for persons who had rendered themselves ob－ noxious to the Spartan government．Hither fled the seer Hegesistratus（Herod．ix．37）and the kings Leotychides，and Pausanias，son of Pleistoanax． （Herod．vi．72；Xen．Hell．iii．5．§ 25；Paus．iii． 5．§ 6．）

In the Peloponnesian War the Tegeatae were the firm allies of the Spartans，to whom they remsinet faithful both on account of their possessing an aristn－ cratical constitution，and from their jealousy of the neighbouring democratical city of Mantineia，with which they were frequently at war．［For details see Mantineia．］Thus the Tegeatae not only re－ fused to join the Argives in the alliance formed against Sparta in B．c．421，but they accompanied the Lacedremonians in their expedition against Argos in 418．（Thuc．v．32，57．）They also fought on the side of the Spartans in the Corinthian War，394．（Xen．Hell．iv．2．§ 13．）After the battle of Leuctra，however（371），the Spartan party in Tegea was expelled，and the city joined the other Arcadian towns in the foundation of Megalopolis and
in the formation of the Arcadian confederacy．（Xen． Hell．vi．5．§ 6 ，seq．）When Mantineis a few years afterwards quarrelled with the supreme Arcadian government，and formed an alliance with its old enemy Sparta，Tegea remsined faithful to the new confederacy，and fuught under Epaminondas arainst the Spartans at the great battle of Mantineia．362． （Xen．Hell．vii．4．§ 36 ，seq．，vii． 5 ．§ 5 ，seq．）
Tegea at a later pericd joined the Aetulian League， but soman after the accession of Cleomenes III．to the Spartan throne it firmed an alliance with Sparta， together with Mantineia and Orchomenus．It thus became involved in hostilities with the Achacans， and in the war which followed，called the Cleomenic War，it was taken by Antigonus Doson，the ally of the Achaeans，and amnesed to the Achaean League， в．c． 222 ．（Pol．ii．46， 54 ，seq．）In 218 Tegea was attacked by Lycurgus，the tyrant of Sparta， who obtained pmosesision of the whole city with the exception of the acropolis．It subsequently fell into the hands of Machanidas，but was recovered by the Achaeans after the deteat of the latter tyrant，who was slain in battle by Philoppemen． （Pol．v．17，xi．18．）In the time of Stralo Tegea was the only one of the Arcudian towns which continued to be inhabited（Strab．viii．p．388）， and it was still a place of importance in the time of Pausanias，who has given us a minute account of its public buildings．（Paus．viii．45－48，53．） Tegea was entirely destroyed by Alaric towards the end of the 4 th century after Christ．（Claud．B． Get．576；comp．Z．nim．v．6．）
The territory of Teesea formed the southern part of the plain of Tripolitza，of which a description and a map are given uider Mantinisia．Tegea was about 10 miles S ．of the latter city，in a direct line，and about 3 miles SE．of the modern town of Tripolitzi．Being situated in the lowest part of the plain，it was exposed to inundations caused by the waters flowing down fron the sur－ rounding mountains；and in the course of ages the soil has been considerably raised by the depo－ sitions brought down by the waters．Hence there are scarcely any remains of the city visible，and its size can only be conjectured from the broken piees of stone and other frugments scattered on the plain， and from the foundations of walls and buildings discovered by the peasants in working in the fields． It appears，however，that the ancient city extended from the hill of $A$ io Sastis（St．Saviour）on the N．， over the hamlets Ibrahim－Effi muli and Paleo．Epis－ kopi，at least as far as Akhiria and Piali．This would make the city at least 4 miles in circum－ ference．The principal remains are at Piali．Near the principal church of this village Leake found the foundations of an ancient building，of fine squared stones，among which were two pieces of some large columns of marble；and there can be little doubt that these are the remains of the ancient temple of Athena Alea This temple was said to have been originally built by Aleus，the founder of Tegea；it was burnt down in b．c． 394 ，and the new building，which was erected by Scopas，is said by Pausunias to have been the largest and most magnificent temple in the Pelo－ ponvesus（Paus，viii．45．§4，seq．；for details see Dict． of Biogr．art．Scopas．）Pausanias entered the city through the gate leading to Pallantium，consequently the sooth－western gate，which must have been near Piali．He begins lis description with the temple of Athena Alea，and then goes across the great agora to the theatre，the remains of which Russ
traces in the ancient foundations of the rained church of Paleó－Fipiskopi．Perhaps this theatre was the splendid marble one built by Antiochus IV． Epiphanes in b．c．175．（Liv．xli．20．）Pausanias ends his description with the mention of a height （ $x \omega p l o \nu$ in $\downarrow \eta \lambda i o v$ ，viii．53．§ 9），probably the hill Aio Sostis in the N．of the town，and apparently the same as that which Pausanias elsewhere calls the
 Polybius the acropolis（акра，v．17）．None of the other public buildings of Terea mentioned by Pan－ sanias can be identified with certainty；but there can be no doubt if excavations were made on its site many interesting remains would be discovered， since the deep alluvial soil is favourable to their preservation．

The territory of Tegea N ．of the city，towards Mantineia，is a plain of considerable size，and is unually called the Tegeatic plain（Tєүєariкд⿱丷天 $\pi \in \delta \iota o v)$ ．There was a smaller plain，separated from the former by a low range of mountains $S$ ．of Tripolitzá，and lying between Teges and Pallantium： it was called the Manthyric plain（MavOvpıкду ate． $\delta(o \nu)$ ，from Manthyrea，one of the ancient demi of Tegea，the ruins of which are situated SW．of Tegea，on a slope of Mt．Boreium．（Paus．viii． 44. § 7，comp．viii．45．§ 1,47 ．§ 1 ；Steph．B．s．v． Mavevpéa．）The remainder of the Tegeatis on the E．and S ．is occupied by the mountains separating it from Argolis and Sparta respectively，with the exception of a small plain ruuning castward from the Tegeatic plain to the foot of Mt ．Parthenium， and probably called the Corythic plain，from Cory－ theis，one of the ancient demi of Tegea，which was situated in this plain．（Paus．viii．45．§ 1，54． § 4．）

The plain of Tegea having no natural outlet for its waters is drained by natural chasms through the limestone mountains，called katavóthra．Of these the two most important are at the modern village of Persoca and at the marsh of Taki．The former is situated in the Corythic plain above mentioned，at the foot of Mt．Parthenium，and the latter is the marsh in the Manthyric plain，SW．of Tegea．The chief river in the district is now called the Saranta－ potamos，which is unduabtedly the Alpheius of Puu－ sanias（viii．54．§ 1，seq．）．The Alpheius rose on the frontiers of Tegea and Sparta，at a place called Phylace（фu入áкך，near Kirya Vrysis），one of the ancient demi of Tegea，and，as we may infer from its name，a fortified watch－tower for the protection of the pass．A little beyond Phylace the Alpheius receives a stream composed of several mountain
 but upon entering the plain of Tegea its course was different in ancient times．It now flows in a north－easterly direction through the plain，receives the river of Dhulianá（the ancient Garates，rapa－ тทs，Paus．viii．54．§ 4），flows through the Cory－ thic plain，and enters the katavsthra at Persoví． Pausaniias，on the other hand，says（viii．54．§ 2） that the Alpheius descends into the earth in the Tegeatic plain，reappears near Asea（SW．of Tegea）， where，after joining the Eurotas，it sinks a second time into the earth，and again appears at Asea． Hence it would seem that the Alpheius anciently flowed in a north－westerly direction，and entered the katavóthra at the marsh of Taki，in the Manthyric plain．There is a tradition among the peasants that the course of the river was changed by a Turk，who acquired property in tie neighbourhood，because the
katavóthra at the Taki did not absorb quickly enough the waters of the marsh．The Garates therefore anciently flowed into the katavothra at Persova without having any connection with the Alpheins．It probably derived its name from Garea or Gareae，one of the ancient demi of Tegea，which may have been situated at the village of Dhuliand． （Ross，Peloponnes，p．70，seq．；Leake，Peloponne－ siaca，p．112，seq．）

There were five roads leading from Tegea．One led due N．across the Tegeatic plain to Mantineia． ［Mantinela．］A second led due S．by the valley of the Alpheins to Sparta，following the same route as the present road from Tripolitza to Mistra． A third led west to Pallantium．It first passed by the small mountain Cresium（Kphotov），and then ran across the Manthyric plain along the side of the Taki．Mount Cresium is probably the small isolated hill on which the modern village of Vuno stands，and not the high mountuin at the end of the plain，according to the French map．Upon reaching the Choma（ $\chi \hat{\omega} \mu a$ ），the road divided into two，one mad leading direct to Pallantium，and the other SW．to Megalopolis through Asea．（Paus． viii．44．§ 1，seq．；Xen．Hell．vi．5．§ 9，ai $8 \pi \boldsymbol{l}$ －d Пa入入dutiov фépougas xú入au．）This choma separated the territories of Pallantium and Tegea， and extended as far south as Monnt Boreium （Krávori），where it touched the territory of Megalo－ polis．There are still remains of this choma running NE．to SW．by the side of the marsh of Taki．These remains consist of large blocks of stone，and must be regarded as the foundations of the choma，which canuot have been a chaussie or canseway，as the French geographers call it，since $\chi \hat{\omega} \mu \boldsymbol{a}$ always sig－ nifies in Greek writers an artificial heap of earth，a tumulus，mound，or dyke．（Ross，p．59．）A fourth road led SE．from Tegea，by the sources of the Garates to Thyreatis．（Paus．viii．54．§4．）A fifth road led NE．to Hysiae and Argos，across the Corythic plain，and then across Mt．Parthe－ nium，where was a temple of Pan，erected on the spot at which the god appeared to the cou－ rier Pheidippides．This road was practicable for carriages，and was much frequented．（Paus．viii． 54．§ 5，seq．；Herod．vi．105，106；Dict．of Biogr． art．Pheidippides．）（Leake，Morea，vol．i．p．88， seq．，vol．ii．p．333，Peloponnesiaca，pp．112，seq．， 369 ；Ross，Peloponnes，p．66，seq．；Curtius，Pelo－ ponnesos，vol．i．p．247，seq．；Koner，Com．de Rebus Tegeatarum，Berol．1843．）

The Roman poets use the adjective Tegěeus or Tegeaeus as equivalent to Arcadian：thus it is given as an epithet to Pan（Virg．Georg．i．18），Cal－ listo，daughter of Lycaon（ Ov. Ar．Am．ii．55， Fast．ii．167），Atalanta（Ov．Met．viii．317，380）， Carmenta（Ov．Fast．i．627），and Mercury（Stat． Silv．i．54）

CON OF TEGEA．
TEGIA＇NUM（Eth．Tecianensis：Dictu），a mu－ nicipal town of Lucania，situated in the interior of that country，on the left bank of the river Tanager． Its name is found only in a corrupt form in Pliny，

## TEGYRA．

who enumerates the Tergilani among the＂popali＂ in the interior of Lucania（Plin．iii．11．8．15）；but the Liber Coloniarum mentions the＂Praefectura Tegenensis＂among the Praefecturae of Lucania （Lib．Col．p．209），and the correct form of the name is preserved by inscriptions．From the same source we learn that it was a town of manicipal rarik， while the discuvery of them in the neighbourhood of Diano leaves no doubt that that place represents the ancient Tegianum．（Romanelli，vol．i．p． 415 ； Mominsen，Inscr．R．N．pp．18，19．）The modern city of Diano is a considerable place situated on a hill about 4 miles west of La Sala，and gives the name of Valle di Diano to the whole of the exten－ sive upland valley which is traversed by the river Ta－ nagro in the upper part of its course．Some re－ mains of the ancient city are still visible in the plain at the foot of the hill（Romanelli，l．c．）．［E．H．B．］

TEGLI＇CIUM（Itia．Ant．p．223），Tegulicicm （Tab．Peut．），and Tegulitia（Geogr．Rav．iv．7），a place in Moesia Inferior，on the road between Can－ didiana and Dorostolum．It contained，according to the Not．Imp．，a garrison of light troops．Variously placed near Veternicza and Tataritza．Some mo－ dern writers identify it with the fortress in Moesia called Saltopyrgus by Procopius（de Aedif．ir． 7．）
［T．H．D．］
TEGNA，in Gallia Narbonensis，was on the Rr－ man road on the east bank of the Rhone between Vienna（Vienne）and Valentia（Valence）．The name occurs in the Table，in which the place is fixed at xiii．from Valentia．Tegna is Tein，the name of which in the writings of a later date is Tinctum． A milestone at Tein marks the distance to Vienna axsviii．Tein is right opposite to Tournon，which is on the west side of the river．Tournon is well situated，and the moantains there approach close to the Rhone．（D＇Anville，Notice，fc．；Ukert，Gal－ lien．）
［G．L．］

## Tligra．［Tigra．］

TEGULATA，in Gallia Narbonensis，is placed in the Itins．east of Aquae Sextiae（Aix）on the road to Ad Turrim（Tourves）．The distance from Aquas Sextiae to Tegulata is $\mathbf{x v}$ ．or xvi．，and from Tegu－ lata to Ad Turrim xvi．The distance measured along the road between Aqnae Sextiae and Ad Turrim is said to exceed the direct distance between these two places，which is not more than 28 Roman miles． Tegulata is supposed to be La Grande Peigière， near the bourg of Porrières or Pourrieres，perhaps somewhere about the place where C．Marius defeated the Teutones b．c．102，and where a pyramid was erected to commemorate the great victory．This monument is said to have existed to the fifteenth cen－ tury（A．Thierry，Hist des Gaulois，Deux．Partie， c．3）；and the tradition of this great battle is not yet effaced．Pourrières is said to be a corraption of Putridi Campi．（D＇Anville，Notice，foc．）［G．L．］ TEGULICIUM［Teglicium］．
TEGYRA（Terúpa：Éth．Terupeús），a village of Boentia，near Orchomenus，and situated above the marshes of the river Melas．It was celebrated for its oracle and Temple of Apollo，who was even said to have been born there．In its neighbourhowd was a mountain named Delos．Leake places Tegyra at Xeropyrgo，situated 3 miles ENE．of Skripis （Orchomenus），on the heights which buund the marshes．（Plut．Pelop．16，de Def．Or． 5 and 8 ： Lycophr．646；Steph．B．s．v．；Leake，Northern Greece，vol．ii．pp．155， 159 ；comp．Ulrichs， Reisen，vol．i．p．196．）

## TEHAPLIENES.

TEHAPHENES. [Tahpanis.]
TEICHIUM (Téxion), a town of Aetolia Epictetus, on the borders of Locris, and one day's march from Crocyleium. (Thuc. iii. 96.)

TEKOAH (Өєк心é, 1 Maccab. ix. 33; Өekẃa or ©ekové, Juseph. Vit. 75), a town of Palestine in Judah, to the sonth of Bethlehem. It was the residence of the wise woman who pleaded in behalf of Absalom; was furtified by Rehoboam; was the birthpiace of the prophet Amos, and gave its name to the adjacent desert on the east. (2 Sam. xiv. 2; 2 Chron. xi. 6; Amos, i. 1; 2 Chron. xx. 20; 1.Hacc. ix 33.) Jerome describes Tekoah as situated upon 2 hill, 6 miles south of Bethlehem, from which city it was visible. (Hieron. Prooem. in A mos. and Comm. in Jerem. vi. 1.) Its site still bears the name of Tekii'a, and is described by Robinson as an elevated hill, not steep, bat broad on the top, and covered with ruins to the extent of four or five acres. These consist chiefly of the foundations of bouses built of squared stones; and near the middle of the site are the remains of a Greek church. (Rubinson, Bibl. Res. vol. i. p. 486, 2nd eal.)

TELA, a place of the Vaccaei in Hispania Tarraconensis (Itin. Ant. p. 440). Variously identitied with Fordesillas and Medina de Rio Seco. [T.H.D.]

TE'LAMON (Te $\lambda a \mu \omega \prime \nu$ : Telamone), a city on the coast of Etruria, situated on a promontory between the Mons Argentarius and the mouth of the Linbro (Oinbrone), with a tolerable port adjoining it. The story told by Diodorus of its having derived its name from the hero Telamon, who accompanied the Argonauts on their voyage, may be safely dismissed as an etymological fable (Diod. iv. 56). There seems no reason to doubt that it was originally an Etruscan town, but no mention of its name occurs in history during the period of Etruscan independence. It is first noticed in B. C. 225, when ${ }^{4}$ great battle was fought by the Ronans in its immediste neighbourbood with an arny of Cisalpine Gauls, who had made an irruption into Etruria, but were intercepted by the consuls C. Atilius and L. Atemilius in the neighbourhood of Telamon, and totally defeated. They are said to have lost 40,000 men slain, and 10,000 prisoners, among whon was one of their chiefs or kings (Pol. i. 27-31). The battle, which is described by Polybius in considerable detail, is expressly stated by him to have occarred "near Telamon in Etruria:" Frontinus, in speaking of the same battle, places the scene of it near Populonia (Strat. i. 2. § 7 ), but the authority of Polytius is certainly preferable.. The only other mention of Telamon that occurs in history is in b. c. 87, when Marius landed there on his return from exile, and commenced gathering an army around him. (Plut. Mar. 41.) But there is no doubt that it continued to exist as a town, deriving some importance from its port, throughocit the periad of the Roman dominion. Its name is found boilh in Mela and Pliny, who calls it "portus Telamon," while Ptolemy notices only the promontory of the name (Tєланól aкpoу, I'tol. iii. 1. § 4 ; P'lin. iii. 5. s. 8; Mel. ii. 4. § 9). The Itineraries prove that it was still in existence as late as the 4 th century (Tab. Peut.; Itin. Marit. p. 500, where it is called "Portus Talamonis"); but from this time all trace of it disappears till the 14 th century, when a castle was erected on the site. This, with the miserable village which adjoins it, still bears the name of Telamone; and the shores of the bay are lined with remains of Roman buildings, but of no great interest ; VOL, IL
and there are no relics of Etrascan antiquity. (Dennis's Etruria, vol. ii. p. 258 .) [E. H. B.]
TELCHINES. [RHoDUs, p. 713.]
TELEBOAE. [Taphiae.]
TELE'BOAS ( $\delta$ T $\eta$ defóas notaud́s, Xen. Anab. iv. 4. § 3), a river of Ar:nenia Major, a tributary of the Euphrates. Probably identical with the Arsanias.
[T. H. D.]
TELE'PIIRIUS MONS. [Euboea.]

## TELEPTE. [Thala.]

TELE'SLA (T $\mathrm{T} \boldsymbol{\lambda} \epsilon \sigma / \mathrm{a}$ : Fth. Telesinus: Telese), a considerable city of Sumnium, situated in the valley of the Calor, a short distance from its right bauk, and about 3 miles above its confluence with the Vulturnus. It is remarkable that its name is never mentioned during the long wars of the Rumans with the Samnites, though the valley in which it was situated was often the theatre of hostilities. Its name first occurs in the Second Punic War, when it was taken by Hannibal on his first irruption into Samnium, B. c. 217 (Liv. xxii. 13); but was recovered by Fabius in B. c. 214 . (Id. xxiv. 20.) From this time we hear no more of it till it became an ordinary Roman municipal town. Strabo speaks of it as having in his time fallen into almost complete decay, in common with most of the cities of Samnium. (Strab. v. p. 250.) But we learn that it received a colony in the time of the Triumvirate (Lib. Colon. p. 238); and, though not mentioned by Pliny as a colony (the name is altogether omitted by him), it is certain, from inscriptions, that it retained its colonial rank, and appears $\omega$ have continued under the Roman Einpire to have been a flourishing and considerable town. (Orell. Inscr. 2626; Romanelli, vol. ii. p. 423; Mommsen, Inscr. R. N. 4840-4915.) It was situated on the line of the Via Latina, or rather of a branch of that road which was carried from Teanum in Campania through Allifae and Telesia to Beneventum (Itin. Ant. pp. 122, 304; Tab. Peut.), and this probably contributed to preserve it from decay.

The ruins of the ancient city are still visible about a mile to the NW. of the village still called Telese : the circuit of the walls is complete, inclosing a space of octagonal shape, not exceeding $1 \frac{1}{4}$ mile in circumference, with several gates, flanked by massive towers. The masonry is of reticulated work, and therefore probably not earlier than the time of the Roman Empire. The only ruins within the circuit of the walls are mere shapeless mounds of brick; but outside the walls may be traced the vestiges of a circus, and some remains of an amphitheatre. All these remains undoubtedly belong to the Roman colony, and there are no vestiges of the ancient Samnite city. The present viilage of Teless is a very small and poor place, rendered desolate by malaria; but in the middle ages it was an episcopal see, and its principal church is still dignified by the name of a cathedral. Its walls contain many Latin inscriptions, brought from the ancient city, the inhabitants of which migrated to the later site in the ninth century. (Craven, Abruzizi, vol.ii. pp.173-175; Giustiniani, lizion. Topogr. vol. ix. pp. 149, 150.)

Telesia was reinarkable as being the birthplace of the celebrated Samnite leader, during the Social War, Pontius Telesinus; and it is probable (though there is no distinct authority for the fact) that it was also that of the still more celebrated C. Pontius, who defeated the Romans at the Caudine Forks.

TELIS. [Rcscho.]
[E. H. B.]

TELLE'NAE (T $\in \lambda \lambda \eta \eta^{\prime} \eta$; Dion. Hal. ; T $\in \lambda \lambda \hat{\eta} \nu a t$, Strab.: Eth. Teג入 $\eta \nu \in \dot{U}$ s, Tellenensis), an ancient city of Latium, which figures in the early Roman history. According to Dionysius it was one of the cities founded by the Aborigines soon after their settlement in Latium (Dionys. i. 16), a proof at least that it was regarded as a place of great antiquity. Livy also reckons it as one of the cities of the Prisci Latini (i. 33). which may perhaps point to the same result, while Diudorus includes it in his list of the colonies of Alba. (Diod. vii. ap. Euseb. Arm. p. 185.) It was attacked by the Roman king Ancus Marcius, who took the city, and transported the inhabitants to Rome, where he settled them on the Aventine, together with those of Politorium and Ficana. (Liv. i. 33; Dinnys. iii. 38, 43.) Tellenae, however, does not seem, like the other two places just mentioned, to hare been hereby reduced to insignificance; for its name appears again in b. c. 493 among the confederate cities of the Latin League (Dionys. v. 61); and though this is the last mention that we find of it in history, it is noticed both by Strabo and Dionysius as a place still in existence in their time. (Dionys. i. 16; Strab. v. p. 231.) It is probable, however, that it had at that time fallen into complete decay, like Antemnae and Collatia; as it is only mentioned by Pliny among the once celebrated cities of Latium, which had left no traces of their existence in his day (Plin. iii. 5. s. 9), and from this time its name wholly disappears. The notices of Tellenae affiord scarcely any clue to its position; though the circumstance that it continued to be inhabited, however slightly, down to the days of Augustus, would affird us more hope of being able to identify its site than is the case with Politorium, Apiolae, and other places, which ceased to exist at a very eariy period. It is this reason that has led Nibby to identify the ruins of an ancient city at La Giostra, as those of Tellenae, rather than Pilitorium, as surposed by Gell. [Politorium.] The site in question is a narrow ridge, bounded by two rarines of no great depth, but with abrupt and precipitous banks, in places artificiaily scarped, and still presenting extensive remains of the ancient walls, constructed in an irregular style of massive quadrangular blocks of tuto. No doubt can exist that these indicate the site of an ancient city, hat whether of I'olitorium or Tellenae, it is impossible to determine; though the remains of a Roman villa, which indicate that the spot must have been inhabited in the early ages of the Empire, give some additional probability to the latter attribution. La Giostra is situated on the right of the Vis Appia, about 2 miles from a farm-house called Fiorano, immediately adjoining the line of the ancient highroad. It is distant 10 miles from Rone, and 3 from Le Frattocchie, on the Via Appia, adjoining the ruins of Bovillae. (Gell, Top. of Rome, pp. 280 -283; Nibby, Dintorni, vol. iii. pp. 146-153.)
Whether the proverbial expression of "tricae Tellenae" has any reference to the ancient city of Latium or not, can hardly be determined, the origin and meaning of the phrase being involved in complete obscurity. (Varro, ap. Non. i. p. 8; Arnob. adv. Gentes, v. p. 28, with Oehler's note.) [E. H. B.]

TELMLSSUS, or TELMISSUS (Te $\lambda \mu \eta \sigma \sigma o ́ s$,
 flurishing and prosperous city in the west of Lycia, was situated near Cape Telmissis (Strah. xiv. p. 665), or Telmissias (Sicph. B. s. v. T $\in \lambda \mu \boldsymbol{\sigma} \sigma-$ $\sigma$ os), on a bay which derived from it the name of

Sinus Telmissicus. (Lir. xxxvii. 16; Lucan. viii. 248.) On the south-west of it was Cape Pedulium, at a distance of 200 stadia. Its inhabitants were celebrated in ancient times for their skill as diviners, and were often consulted by the Lydian kings. (Herod. i. 78; comp. Arrian, Anab. ii. 3. § 4.) In the time of Strabo, however, who calls it a small town ( $\pi 0 \lambda(\chi \nu \eta)$, it seems to have fallen into decay; though at a later period it appears to have been an episcopal see. (Hierocl. p. 684; comp. Pomp. Mela, i. 15 : Plin. v. 28 ; Ptol. v. 3. § 2 ; Polyb. xxii. 27; Stadiasm. Mar. M. §§ 255, 256; Scylax p39, where it is miswritten Өtavıoods.) Considerable remains of Telmessus still exist at $3 / y / \mathrm{cs}$ or Meis; and those of a theatre, porticoes, and sepulchral chambers in the living rock, are among the most remarkable in all Asia Minor. (Leake, Asia Minur, p. 128; Fellows, Asia Minor, p. 243, where some representations of the remains of Telmessus are figured; Lycia, p. 106, foll.)
2. A small town of Caria, at a distance of 60 stadia from Halicarnassus, is likewise sometimes called Telmessus, and sometimes Telmissus. (Suid. 8. v. ; Etym. Mag. s. v. ; Arrian, Anab. i. 25. § 8; Cic. de Div. i. 41 ; Plin. v. 29, axx. 2.) The Carian Telinessus has often been confounded with the Lycian, and it is even somewhat doubtful whether the famous Telmessian soothsayers belonged to the Carian or the Lycian town. But the former must at all events have been an obscure place; nad that it cannot have been the same as the latter is clear from the statement of Polemo in Suidas, that it was only 60 stadia from Halicarnassus. [L. S.]

TELMESSUS, according to lliny (v. 29), a tributary of the river Glaucus in Caria, but it flowed in all probability near the town of Telmessus, which derived its name from it.
[L. S.]
TELMI'SSICLS'S SINUS, a bay between Lycia and Caria, which derived its name from the Lycian town of Telmestus (Liv. xxxvii. 16; Lucan, viii. 248 ); but it is more commonly known by the name Glaucus Sinus, and is at present called the Bay of Macri.
[L. S.]
TFLMISSIS PROMONTORIUM. [TeLmesises]
TE'LOBIS (T $\boldsymbol{\eta}$ 人obis. I'tol. ii. 6. § 72), a won of the Jaccetani in Hispania Tarraconensis, now Martorell. (Cf. Laborde, Itin. i. § 73; Swinburne, Lett. 8.)
[T. H. D.]
TELO MARTIUS (Toulon). in Galla Narbmensis. This name is not mentioned by the geographers. It occurs in the Maritime Itin. and in the Notit. Imp. Occid., where a " procurator Baphii Telonensis Galliarum " is mentioned, which indicates the existence of a dyeing establishment there. In Lucan (iii. 592) Telo is the name of a pilot or helmsman, and Oudendorp supposes that the poet gave the man this name because he was of the town Telo; which spems a strange conjecture. And again Silins (xiv. 443) is supposed to allade to the same town, when he says-

## "Et Neptunicolue transverberat ora Telonis."

The old Roman town is said to have been at or near Tindouzan, where the Lazareto now is. (Statist. du Dep. des Bouches du Rhone, referred to by Ukert, Gallien, p. 428.)
[G. L.]
TELONNUM, in Gallia. The Table has a name on the ronte between Aquas Bormonis (Bourion l'Archambault) and Augustodunum ( $A u t u n$ ), which name begins with $T$ and ends with onnum. D'Anville gives good reasons for supposing that the place
may be Toulon-sur-Arroux; and thus the modern name may enable us to correct the reading of the Table.
[G. L.]
TELOS (Tî̀os: Eth. T $\dot{\eta} \lambda t o s: ~ D i l o s ~ o r ~ P i s c o-~$ pia), a small rocky island in the Carpathian sea, between Rhodus and Nisyrus, from the latter of which its distance is only 60 stadia. Strabo (x. p. 488) describes it as long and high, and abounding in stones fit for millstones. Its circumference was 80 stadia, and it contained a town of the same name, a harbour, hot springs, and a temple of Poseidon. The attribute long given to it by Strabo is scarcely correct, since the island is rather of a circular form. The fainily of the Sicilian tyrant Gelon originally came from Telos. (Herod. vii. 153.) According to Pliny (iv. 69) the island was celebrated for a species of ointment, and was in ancient times called Agathussa. (Steph. B. s. v. Tīnos; Scylax, p. 38; Stadiasm. Mar. Magni, § 272.) The town of Telos was situated on the north coast, and remains of it are still seen above the modern village of Episcopi. The houses, it appears, were all built in terraces rising above one another, and supported by strong walls of unhewn stone. The acropolis, of which likewise a few remains exist, was at the top, which is now occupied by a mediaeval castle. Inscriptions have been found in Telos in great numbers, bat, owing to the nature of the stone, many of them are now illegible. (Comp. Ross, Hellenica, i. p. 59, foll., Reisen auf den Griech. Inseln, iv. p. 42 , foll.)

## TELPHU'SA. [Thelpusa.]

TEMA, a tribe and district in Arabia, which took their name from Tema, one of the twelve sons of Ishmael. (Gen. xxv. 15; Is. xxi. 14; Jer. xxv. 23; Job, vi. 19.) Ptolemy mentions in Arabia Deserta a town Themma ( $\Theta \dot{\epsilon} \mu \mu \eta$, v. 19. § 6). Tema is distinguished in the Old Testament from Teman, a tribe and district in the land of the Edomites (Idumaea), which derived their name from Teman, a grandson of Esau. (Gen. xxxvi. 11, 15, 42; Jer. xlix. 7, 20; Ezek. xxv. 13; Amos, i. 12; Hab. iii. 3; Obad. 9.) The Temanites, like the other Edomites, are celebrated in the Old Testament for their wisdom (Jerem. xlix. 7; Obad. 8; Baruch, iii. 22, seq.): and hence we find that Eliphaz, in the book of Job, is a Temanite. (Job, ii. 11, iv. 1.) Jerome (Onomast.s. v.) represents Tema as distant 5 miles (Eusebius says 15 miles) from Petra, and possessing a Roman garrison.
 in the Aurea Regio, in the district of India extra Gangem, probably now represented by the great river of Pegu, the Iravaddy. Near it was a town which bore the same name.

TEMA'THIA. [Messenia, p. 341, b.]
TEME'NIUM (T $\eta \mu \epsilon^{2} \nu \iota o \nu$ ), a town in the Argeia, at the upper end of the Argolic gulf, built by Ternenus, the son of Aristomachus. It was distant 50 stadia from Nauplia (Paus. ii. 38. § 2), and 26 from Argos. (Strab. viii. p. 368.) The river Fhrixus flowed into the sea between Temenium and Lerna. (Paus. ii. 36. § 6, ii. 38. § 1.) Pausanias saw at Temenium two temples of Poseidon and Aphrodite and the tomb of Temenus (ii. 38. § 1). Owing to the marshy nature of the plain, Leake was unable to explore the site of Temenium; but Ross identifies it with a mound of earth, at the foot of which, in the sea, are remains of a dam forming a harbour, and upon the shore foundations of buildings, fragments of pottery, \&c. (Leake,

Morea, vol. ii. p. 476 ; Russ, Reisen im Peloponnes, p. 149; Curtius, Peloponnesos, vol. ii. p. 383.)

TEMENOTHYRA (T $\eta \mu \epsilon \epsilon ้$ vov $\theta$ v́pat, Paus. i. 35. § 7 : Eth. T T $\mu$ evoovofeús, Coins), a small city of Lydia, according to Pausanias (l.c.), or of Phrygia, according to Hierocles (p. 668, ed. Wess.). It would seem to hare been situated upon the borders of Mysia, since the Trimenothuritae ( $\mathbf{T} \rho!\mu \in \nu \quad \rho_{0} \quad$ ovpital) -which name is probably only another form of the Temenothyritae - are placed by Ptolemy (v. 2. § 15) in Mysia. (Eckhel, vol. iii. p. 119.)

## COIN OF TEMENOTHYRA.

TE'MESA or TEMPSA (T $\epsilon \mu \epsilon ́ \sigma \eta$ and T T $\mu \psi \alpha$, Strab.; T $\epsilon \mu \dot{\epsilon} \sigma \eta$, Steph. B.; T $\epsilon \in \mu$, Ptol.: Eth. T $\epsilon$ $\mu \in \sigma$ aios, Tempsanus), an ancient city on the W. coast of Bruttium, a little to the N. of the Gulf of Hipponium, or Golfo di Sta Eufemia. Strabo tells us that it was originally an Ausonian city, but subsequently occupied by a colony of Aetolians who had accompanied Thoas to the Trojan War. (Strab. vi. p. 255.) Many writers appear to have supposed this to be the Temesa mentioned by Homer in the Odyssey on acconnt of its mines of copper (Odyss. i. 184); and this view is adopted by Strabo; though it is much more probable that the place alluded to by the poet was Temesa in Cyprus, otherwise called Tamasus. (Strab. l.c.; Steph. B. s. v.; Schol. ad Hom. Odyss. l.c.) We have no account of Temesa having received a Greek colony in historical times though it seems to have become to a great extent Hellenised, like so many other cities in this part of Italy. At one period, indeed, we learn that it was conquered by the Locrians (about 480-460 в. c.); but we know not how long it continued subject to their rule. (Strab. l.c.) Neither Scylax nor Scymnus Chius mention it among the Greek cities in this part of Italy ; but Livy says expressly that it was a Greek city before it fell into the hands of the Bruttians (Liv. xxxiv. 45). That people apparently made themselves masters of it at an early period of their career, and it remained in their hands till the whole country became subject to the dominion of Rome. (Strab.l.c.) During the Second Punic War it suffered severely at the hands, first of Hannibal, and then of the Romans; but some years after the close of the war it was one of the places selected by the Romans for the establishment of a colony, which was sent thither at the same time with that to Crotona, в. c. 194. (Liv. xxxiv. 45.) But this colony, the members of which had the privileges of Roman citizens, does not appear to have been numerous, and the town never rose to be a place of importance. Its copper mines, which are alluded to by several writers (Ovid, Met. xv. 706; Stat. Silv. i. 1. 42), had ceased to be productive in the days of Strabo (Strab. vi. p. 256). The only mention of Tempsa which occurs in Roman history is in connection with the great servile insurrection under Spartacus, when a remnant of the servile force seem to have established themselves at Tempsa, and for a time maintained possession of the town. (Cic. Verr.

4c 2
v. 15, 16.) Its name is afterwards found in all the geographers, as well as in the Tabula, so that it must have subsisted as a town throughout the Roman Empire. (Strab. l.c.; Plin. iii. 5. s. 10; Ptol. iil. 1. § 9; Tab. Peut.) Pausanias expressly tells us it was still inhabited in his day; and Pliny also notices it for the excellence of its wine. (Pans. vi. 6. § 10 ; Plin. xiv. 6. s. 8.) The period of its destruction is unknown; but after the fall of the Roman Empire the name wholly disappears, and its exact site has never been determined. The best clue is that afforded by the Tabul: (which accords well with the statements of Pliny and Strabu), that it was situated 10 miles S . of Clampetia. If this last town be correctly placed at Amanten [Clampetia], the site of Tempss must be lonked for on the coast near the Torre del Piano del Casale, about 2 miles S. of the river Saruto, and 3 from Nocera. Unfortunately none of the towns along this line of coast can be fixed with anything like certainty. (Cluver. Ital. p. 1286; Rumanelli, vol. i. p. 35.)

Near Temesa was a sacred grove, with a shrine or sanctuary of the hero Polites, one of the companions of Ulysses, who was said to have been slain on the spot, and his spectre continued to trouble the inhabitants, until at length Euthymus, the celebrated Locrian athlete, ventured to wrestle with the spirit, and having vanquished it, freed the city from all further molestation. (Strab. vi. p. 255: Paus. vi. 6. §§7-11; Suid. v. Éevvos.) [E. H. B.]

TEMI'SIIIA ( $\dot{\eta}$ T $\in \mu / \sigma \delta i a$, Ftol. vi. 4. § 3), one of the districts into which ancient Persia was divided. It cannot now be determined exactly what its position was; but, as it adjoined the Mesabatae, it probably was part of a long narrow plain which extends through that province in a direction north-west and south-east. (Lassen, in Ersch und Gruber's Encyel. vol. xvii. p. 438.)

TEMMICES. [Boeotia, p. 414.]
TEMNUS (T $\hat{\eta} \mu \nu o \nu \quad$ ópos), a mountain range of Mysia, extending from Mount Ida eastward into l'hrygia, and dividing Mysia into two halves, a northern and a southern one. It contained the sources of the Macestus, Mysins, Caicus, and Evenus. (Strab. xiii. p. 616: Ptol. v. 2. § 13.) Hamilton (Restarches, ii. p. 12.5) is inclined to believe that Mons Temnus is the same as the Ak Dagh, or, as it is commonly called in maps. Morad Dagh.
[L. S.]
TEMNUS (Tinuvos: Eth. T $\eta \mu \nu i t \eta s$ ). a town of Aeolis in Asia Minor, not far from the river Hermus, situated on a beight, from whicha a commanding view was obtained over the territorios of Come, Phocama, and Smyrna. (Strab. xiii. p. 621.) From a pasage in Pausanias (v. 13. s 4), it might be intirred that the town was situated on the northern bank of the Hermus. But this is irreconcilable with the statement that Temnnss was 30 miles south of Cyme, and with the remarks of all other writers alluding to the place. Pliny (v. 29) also seems to be mistaken in placing Temnus at the mouth of the Hermux. for although the deposits of the river have formed an extensive alluvial tract of land, it is evident that the sea never extended as far as the site of Temnus. The town bad already much decayed in the time of Strabo. though it never appo:rs to have been very larce. ( Xenoph. Hell. iv. 8. §5; Herod. i. 149; Polyb. v. 77, xx. 25; Cic. pro Flace. 18.) In the reigi of Tiberius it was much injured by an earthquake (Tac. $A \mathrm{~mm} . \mathrm{ii} .47$ ), and in the time of Pliny it had ceased
to be inhabited altogether. Its site is commonly identified with the maxiern Menimen, though Texier, in his Description de l'Asie Mineure, looks for it at the site of the village of Gucal-Hissar. [L. S.]

COIN OF TEMNCS.
TEMPE ( $\tau \mathrm{d}$ T'́ $\mu \pi \eta$, contr. of $\mathrm{T}(\mu \pi \in a$ ), a celebrated valley in the NE. of Thessuly, is a gorge between Mounts Olympus and Ossa, through which the waters of the lencius force their way into the sea. The beanties of Tempe were a favourite sabject with the ancient poets, and have been described at great length in a well-known passage of Aelian, and more briefly by Pliny: but none of these writers appear to have drawn their pictures from actual observation; and the scenery is distinguished rather by savage grandeur than by the silvan beauty which Aelian and others attribute to it. (Catull. lxiv. 285: 0v. Met. i. 568; Virg. Georg. ii. 469; Aelian, V. H. iii. 1 : Plin. ir. 8. s. 15.) The account of Livy, who copics from Polybius, an eye-witness, is more in accordance with reality. This writer says, "Tempe is a defile, difficult of access, even though not cuarled by an enenv; for besides the narrowness of the pass for 5 miles, where there is scarcely mom for a beast of burden, the rucks on both sides are sn perpendicular as to cause giddiness both in the mind and eyes of those who look down from the precipice. Their terror is also increased by the depth and roar of the Peneus rushing through the midst of the ralley." (Liv. sliv. 6.) He adds that this pass, so inaccessible by nature, was defended by four fortresses, one at the western entrance at Gonnus. a seeond at Condylon, a third at Charax, and a fourth in the rand itself, in the midile and narrowest part of the valley, which could be easily defended by ten men. The pass is now called Iykistinno, or the Wolfs Minth. Col. Leake gives about four miles and a half as the distance of the road through the valley. In this space the width of the gorge is in some parts less than 100 yards. comprehending in fact no more than the breadith of the raad in addition to that of the rirer. The modern rad follows in the track of the ancient military road made by the Romans, which ran along the right bank of the river. Leake remarks that even Livy in his description of Tempe scems to have added embellishments to the authority from which he borrowed; for, instead of the Pencius flowing rapidly and with a loud noise, nothing exn be more tranquil and steady than its orimary conrse. The remains of the fourth castle mentoned by Liry are noticed by Leake as standing on one side of an immense fissure in the precipices of Ossa, which affiod an extremely rocky. though not impracticable devent from the heights into the vale; while between the castle and the river space only was left for the road. About half a mile berond this fort there still remains an inscription engraved upon the rock, on the right-hand side of the road, where it ascends the hill: "L. Cassius Longinus Pro Cos. Tempe munivit." It is probatle from the position of this inscription that it relates to the making of the road, though some refer it to defensive works erected
by Longinus in Tempe. This Longinus appears to have been the L. Cassius Longinus who was sent by Caesar from Illyria into Thessaly. (Caes. B. C. iii. 34.) When Xerses invaded Greece, в. с. 480, the Greeks sent a force of 10,000 men to Tempe, with the iutention of defending the pass against the Persians; but having learnt from Alexander, the king of Macedonia, that there was another pass across Mt. Olympus, which entered Thessaly near Gonnus, where the gorge of Tempe commenced, the Greeks withdrew to Thermopylae. (Herod. vii. 173.)
It nas believed by the anclent historians and geographers that the gorge of Tempe had been prodaced by an earthquake, which rent asunder the mountains, and afforded the waters of the Peneius an egress to the sea. (Herod. vii. 129; Strab. ix. p. 430.) But the Thessalians maintained that it was the god Puseidon who had split the mountains (Herox. Lc.) ; while others supposed that this had been the work of Hercules. (Diod. iv. 58 ; Lucan, vi. 345.)

The pass of Tempe was connected with the worship of Apollo. This god was telieved to have gone thither to receive expiation after the slaughter of the serpent Pytho, and afterwards to have returned to Delphi, bearing in his hand a branch of laurel plucked in the valley. Every ninth year the Delphians sent a procession to Tempe consisting of wellborn youths, of which the chief youth plucked a branch of laurel and brought it back to Delphi. On this occasion a solemn festival, in which the inhabitants of the neighbouring regions tonk part, was celebrated at Tempe in honour of Apollo Tempeites. The procession was accompanied by a flute-player. (Aelian, V. H. iii. 1 ; Plut. Qunest. Grafc. c. 11. p. 292, de Musica, c. 14. p. 1136 ; Bückh, Inscr. No. 1767, quoted by Grote, Hist. of Greece, vol. ii. p. 365.)

The name of Tempe was applied to other beautiful valleys. Thus the valley, through which the Helorus flows in Sicily, is called "Heloria Tempe" (Ov. Fast. iv. 477); and Cicero gives the name of Tempe to the valley of the Velinus, near Reate (ad Att. iv. 15). In the same way Ovid speaks of the "Heliconia Tempe" (Am. i. 1. 15).
(Leske, Northern Greece, vol. iii. p. 390, seq. : Dudwell, vol. ii. p. 109, seq.; Hawkins, in Walpole's Collection, vol. i. p. 517, seq.; Kriegk, Das Thessalische Tempe, Leiprig, 1835.)

TEMPSA. [TEmesa.]
TEMPY'RA (Ov. Trist. i. 10.21; in Geogr. Rav. iv. 6, Tympira; in It. Ant. p. 322, Timpirum; and in It. Hier. p. 602, Ad Unimpara), a town in the S. of Thrace, on the Egnatian Wsy, between Trajanopolis and Maximianopolis. It was situated in a defile, which rendered it a convenient spot for the operations of the predatory tribes in its neighbourhood. Here the Thrausi attacked the Roman army under Cn. Manlius, on its return, loaded with booty, through Thrace from Asia Minor (b. c. 188); but the want of shelter exposed their movements to the Romans, who were thus enabled to defeat them. (Liv. xxxviii. 41.) The defile in question is probably the same as the KopniAco $\sigma \tau \epsilon \nu d$ mentioned by Appian (B.C. iv. 102), and through which, he states, Brutus and Cassius marched on their way to Philippi (Tatel, de Viae Egnatiae Parte orient. p. 34). Paul Lucas (Trois Voy. pp. 25, 27) recards it as corresponding to the modern Gürachine.
[J. R.]
TE'NCTERI or TE'NCHTERI (T'́ $\gamma \kappa \tau \epsilon \rho o r$,
 an important German tribe, which is first mentioned by Caesar (B. G. iv. 1,4). They appear, together with the Usipetes, originally to have occapied a district in the interior of Germany ; but on being driven from their original homes by the Suevi, and having wandered about for a period of three years, they arrived on the banks of the Lower Rhine, and compelled the Menapii who inhabited both sides of the river to retreat to the western bank. Some time atter this, the Germans even crossed the Rhine, esta-bli-hed themselves on the western bank, in the country of the Menapii, and spread in all directions as far as the districts of the Eburones and Condrusi, who seem to have invited their assistance against the Romans. This happened in b.c. 56. The Germans demanded to be allowed to settle in Gaul; but Caesar, declaring that there was no room for them, promised to procure habitations for them in the country of the Ubii, who happened to have sent ambassadors to him at that time. The Germans asked for three dars to consider the matter, requesting Caesar not to advance farther into their country. But, suspecting some treacherous design, he proceeded on liis march, and an engagement ensued, in which the Romans were defeated and sustained serious losses. On the following day the chiefs of the Gremans appeared before Caesar, declaring that their people had attacked the Iomans without their orders, and again begged Caesar to stop his march. Caesar, however, not only kept the chicfs us his prisoners, but immediately ordered an attack to be made on their camp. The people, who during the absence of their chief, had abandoned themselves to the feeling of security, were thrown into the greatest confusion by the unimspected attack. The men, however, fought on and among their waggons, while the women and children tork to flight. The Roman cavalry fursued the fugitives; and when the Germans heard the screams of their wives and children, and saw them cut to pieces, they threw away their arms and fled towards the Rhine; but as the river stopped their flight, a great number of them perished by the sword of the Romans, and others were drowned in the Rhine. Those who escaped across the river were hospitably received by the Sigambri, who assigned to the Tencteri the district between the Ruhr and the Sigg. (Caes. B. G.iv. 4-16; Livy, Epit. lib. cxxxviii.; Tac. Germ. 32, 33, Ann. xiii. 56, Hist. iv. 21, 64, 77 ; Plut. Caes. 21 ; Dion Cass. xxxix. 47, liv. 20, 21 ; Flor. iii. 10, iv. 12 ; Oros. iv. 20 ; Appian, de Reb. Gall. 4, 18 ; Ptol. ii. 11.§8.) The Tencteri were particularly celebrated for their excellent cavalry ; and in their new country, on the eastern bank of the Rhine, they possessed the town of Budaris (either Monheim or Dusseldorf), and the fort of Divitia (Deutz). In the reign of Angustus, the Tencteri joined the confederacy of the Cherusci (Liv. L. c.), and afterwards repeatedly appear joining other tribes in their wars ayainst Rome, until in the end they appear as a part of the great confederacy of the Franks. (Greg. Tur. ii. 9 ; comp. Wilbelm, Germanien, p. 141 ; Reichard, Germanien, p. 31 ; Latham, Tacit. Germ. p. 110 .)
[L. S.]
TE'NEA (Tevéa: Eth. Teved $\quad$ ns), the most important place in the Corinthia after the city of Corinth and her port towns, was situated south of the capital, and at the distance of 60 stadia from the latter, according to Pausarias. The southern gate of Corinth was called the Teneatic, from its leading to

Tenea. Stcphanus describes Tenea as lying between Corinth and Mycenae. (s. v. Tevéa.) The Teneatas claimed descent from the inhabitants of Tenedos, who were brought over from Truy as prisonens, and settled by Agamemnon in this part of the Corinthia; and they said that it was in consequence of their Trojan origin that they worshipped Apollo above all the other gods. (l'aus. ii. 5. § 4.) Strabo also mentions here the temple of Apollo Teneates, and says that Tenea and Tenedos had a common origin in Termus, the son of Cyenus. (Strab. viii. p. 380.) According to Dionysius, however, Tenea was of late foundation. (Cic. ad Att. vi. 2. § 3.) It was at Tenea that Oedipus was said to have passed his childhood. It was also from this place that Archias took the greater number of the colonists with whom he founded Syracuse. After the destruction of Corinth by Mummius, Tenea had the good fortune to continue undisturbed, becanse it is said to have assisted the Romans aguinst Corinth. (Strab. l.c.) We cannot, however, suppose that an insignificant place like Tenea could have acted in opposition to Corinth and the Achaean League; and it is more probable that the Teneatae were spared by Mummius in consequence of their pretended Trojan descent and consequent affinity with the Romans themselves. However this may be, their goud fortune gave rise to the line:

## 

Tenea lay in the mountain valley through which flows the river that falls into the Corinthian gulf to the east of Corinth. In this valley are three places at which vases and other antiquities have been discovered, namely, at the two villages of Chilimodi and Klenia, both on the road to Nauplia, and the latter at the very foot of the ancient road Contoporia [see Vol. I. p. 201, b.], and at the village of Athiki, an hour east of Chilimodi, on the road to Sophiko. In the fields of $A$ thiki there was found an ancient statue of Apollo, a striking confirmation of the prevalence of the worship of this god in the district. The Terieatae would therefore appear to have dwelt in scattered aboules at these three spots and in the intervening country; but the village of Tenea, properly so called, was probably at Chilimodi, since the distance from this place to Corinth corresponds to the 60 stadia of Pausanias.

Since one of the pases from the Argeia into the Corinthia runs by Klénia and Chilimórdi, there can be little doubt that it was by this road that Agesilaus marched from the Argeia to Corinth in b.c. 391. (Xen. Hell. iv. 5. § 19.) In the text of Xenophon the words are dкeîtev úxepba入ùv кatà Tertay e's Kópivoov, but Teveav ought to be sutstituted for T $\epsilon \gamma^{\prime}$ av, since it is impossible to believe that Agesilaus could have marched from the Argeia to Corinth by way of Tecea. Moreover, we learn from Strabo (viii. p. 380) that the well-known name of Tegea was in other cases substituted for that of Tenea. In the parallel passage of the Agesilans of Xenophon (ii. 17), the pass by Tenea is called кuтd $\tau$ da orevd. (Leake, Morea, vol. iii. p. 320, Peloponnrsiaca, p. 400; Curtius, Peloponnesos, vol. ii. 549, foll.)

TENE'BRIUM (TevéEpıò ${ }_{c} \kappa \rho o v$, P'tol. ii. 6.§ 16), a promontory on the E. coast of Spain, near the mouth of the Iberus. Stephanus B. (s. v.) also meutions a district called Tenebria, and Piolemy a hartour called Tenebrius, which Marca (Hisp. ii. 8) takes to be Alfichs near Tarrogona, but which must be looked for to the SII.
[T. H. D.]

## TENEDOS

TENEDOS (Tévéos: Eth. Tevéסios: Tenedo, Turk. Bogdsha-Adassi), an island off the coast of Troas, from which its distance is only 40 stadia, while from Cape Sigeum it is 12 miles distant. (Strab. xiii. p. 604 ; Plin. ii. 106, v. 39.) It was originally called Leacophrys, from its white cliffs, Calydna, Phoenice, or Lyrnessux (Strab. Lc.: Paus. x. 14. §3; Steph. B. 8.v. Tève $\delta o s ;$ Eustath. ad IIom. Il. p. 33; Plin. L. c.). and was believed to have received the name of Teriedos from Tennes, a son of Cycnus (Strab. riii. p. 380; Dind. v. 83; Conon, Narrat. 28; Cic. in Verr. i. 19). The island is described as being 80 stadia in circumference, and containing a town of the same name, which was an Aeolian settlement, and situated on the eastern coast. (Herod. i. 149; Thncyd. vii. 57.) The town possessed two harbours, one of which was called Bobetov (Arrian, Anab. ii. 2. § 2; Scylax, p. 35, who, however, notices only one), and a temple of the Smynthian Apollo. (Strab. L.c.; Hom. Il. i. 38, 452.) In the Trojan legend, the island plays a prominent part, and at an carly period scems to have been a place of considerable importance, as may be inferred fimm certain ancient proverbial expressions which owe their oripin to it, such as Tevétios ré̀ecus (Steph. B. s. v.; Apostol. xviii. 28; Diogenian. viii. 58; comp. Cic. ad Quiat. Frat.

 Plut. Quast. Gir. 28), Tevédion кa夫ól (Apostul. x.
 The laws and civil institutions of Tenedos seem to bave been celebratud for their wisdom, if we may credit Pindar, whose eleventh Nemean ole is inscribed to Aristagoras, a prytanis or chief inaristrate of the island. We further know from Stephanus B. that Aristotle wrote on the polity of Tenedos. During the Persian wars the island was taken possession of by the Persians (Herod. vi. 31), and during the Peloponnesian War it sided with Athens and paid tribute to her (Thuc. l. c. ii. 2), which seems to have amounted to 3426 drachmae every year. (Franz, Elem. Epigraph. n. 52.) Afterwards, in B. c. 389, Tenedos was ravaged by the Lacedaemonians for its fidelity to Athens (Xen. Hist. Gr. v. 1. § 6); but though the peace of Antalcidas gave up the island to Persia, it yet maintained its connection with Athens. (Dernasth. c. Polycl. p. 1223, c. Theocr. p. 1333.) In the time of Alexander the Great, the Tenedians threw off the Persian yoke, and, though reconquered by Pharnabazus, they soon again revolted from Persia. (Arrian, Anab. ii. 2, iii. 2.) Daring the wars of Macedomia with the Komans, Tenedos, owing to its situation near the entrance of the Hellespont, was an important naval station. (Polyb. xvi. 34, xxvii. 6; Liv. xxxi. 16, xliv. 28.) In the war against Mithridates, Lucullus fought a great naval battle near Tenedos. (Plat. Luc. 3; Cic. p. Arch. 9, p. Mur. 15.) In the time of Virgil, Tenedos seems to have entirely lost its ancient importance. and, being conscious of their weaknens, its inhabitants had placed themselves under the protection of Alexandria Tras (Paus. x. 14. § 4). The farourable situation of the island, however, prevented its utter decay, and the empemr Justinian caused granaries to be erected in it, to receive the supplies of corn conveyed from Egypt to Constantinople. (Procop. de Aed. v. 1.) The wonren of Tenedos are reported to have been of surpassitig beauty. (Athen. xiii. p. 609.) There are but fe:s ancient remains in the island worthy of notice. (Chandler, Travels in Asia Minor, p. 22; Prokesch,

Denkvoürdigkeiten, i. p. 111, foll.; Hemmer, Respublica Tenediorum, Hafniae, 1735.) [L. S.]

COLN OF TENEDOS.
TENEDOS (Tév $\nu \in \delta o s: E t h . T \in \nu \epsilon \delta \in \dot{\prime} s$ ), a fortified coast-town in the west of Pamphylia, 20 stadia to the west of Attalia. (Steph. B. s. v.; Stadiusm. Mar. M. §§ 224, 225.) It has been conjectured that this town is the same as Olbia, the remains of which are exactly 20 stadia from Attalia, and that one of the two names was I.ycian and the other Greek. (Müller, ad Stadiasm. p. 490.) [L. S.]

TENE'RICUS CAMPUS. [Boeotla, p. 413, b.]

TE'NESIS REGIO (T $\eta \nu \epsilon \sigma i s$, Strab. xvi. p. 770), was, according to Strabo, who alone mentions it, an inland province of Aethiopia, lying due E. of the Sabae, and not far distant from the kingdom or city of Meroe. Tenesis was governed, at least when Strabo wrote, by a queen, who was also the sovereign of Meroe. This was one of the many districts of Aethiopia assigned by rumour to the Automoli, Sembritae, or Aegyptian war-caste, who abandoned their native country in the reign of Psammetichus [Sembritae]. The lake Coloe and the sources of the Astapus are by some geographers placed in Tenesis. It was an allavial plain bounded on the E. by the Abyssinian Highlands, and frequented by elephants, rhinoceroses, \&c.
[W. B. D.]
TENOS (Tĥvos: Eth. Thytos: Tino), an island in the Aegrean sea, and one of the Cyclades, lying between Andros and Delos, distant from the former 1 mile and from the latter 15 miles. (Plin. iv. 12. s. 22.) It stretches from NW. to SE., and is 15 miles long according to Pliny (l.c.). or 150 stadia according to Scylax (p. 55). It was also called Hydrussa (' $\mathrm{r} \delta \rho o \hat{v} \sigma \sigma \alpha$, ${ }^{\prime} \Upsilon \delta \rho \rho \epsilon \sigma \sigma a$ ) from the number of its springs, and Ophiussa because it abounded in snakes. (Plin. l.c.; Mela, ii. 7. § 11 ; Steph. B. s. v.) The sons of Boreas are said to have been slain in this island by Hercules. (Apoll. Rhod. i. 1304, with Schol.) In the invasion of Greece by Xerxes, the Tenians were compelled to serve in the Persian fleet; but a Tenian trireme deserted to the Greeks immediately before the battle of Sa lamis (в. с. 480), and accordingly the name of the Tenians was inscribed upon the tripod at Delphi in the list of Grecian states which had overthrown the Persians. (Herod. viii. 82.) Pausanias relates that the name of the Tenians was also inscribed on the statue of Zeus at Olympia among the Greeks who had fought at the battle of Plataea (v. 23. § 2). The Tenians afterwards formed part of the Athenian maritime empire, and are mentioned among the subject allies of Athens at the time of the Sicilian expedition (Thuc. vii. 57). They paid a yearly tribute of 3600 drachmae, from which it may be inferred that they enjoyed a considerable share of prosperity. (Franz, Elem. Epigr. Gr. No. 49.) Alexander of Pherae took possession of Tenos for a
time (Dem. c. Polycl. p. 1207) ; and the island was afterwards granted by M. Autonius to the Rhodians (Appian, B. C. v. 7.) After the conquest of Constantinople by the Latins, Tenos fell to the sbare of the Venetians, and remained in their hands long after their other possessions in the Aegaean had been taken by the Turks. It was ceded by Venice to the Sultan by the peace of Passarovitz, 1718. It is still one of the most prosperous islands in the Aegaean, and the inhabitants are remarkable for their industry and good conduct. The present population is about 15,000 souls, of whom more than half are Catholics, - a circumstance which, by bringing them into closer connection with western Europe, has contributed to their prosperity.

The ancient city of Tenos, of the same name as the island, stood at the south-western end upon the same site as St. Nicolaos, the present capital. Scylax says that it possessed a harbour, and Strabo describes it as a small town. (Scyl. p. 22; Strab. x. p. 487 ; Ptol. iii. 14. § 30.) In the neighbourhrod of the city there was a celebrated temple of Poseidon situated in a grove, where festivals were celebrated, which were much frequented by all the neighbouring people. (Strab. l.c.; Tac. Ann. iii. 63; Clem. Protr. p. 18 ; Böckh, Inscr. No. 2329, 2331.) The attributes of Poseidon appear on the coins of Tenos. There was another town in the island nained Eriston ("Hpiãov; Böckh, Inscr. 2336, 2337), which was situated in the interior at the village of Komi. Among the curiosities of Tenos was mentioned a fountain, the water of which would not mix with wine. (Athen. ii. p. 43, c.) The island was celebrated in antiquity for its fine garlic. (Aristoph. Plut. 18.) The chief modern production of the island is wine, of which the best kind is the celebrated Malvasia, which now grows only at Tenos and no longer at Monembusia in Peloponnesus, from which place it derived its name. (Tournefort, Voyage, of.c. vol. i. p. 271, transl.; Exped. Scientif. vol. iii. p. 2 Fiedler, Reise, vol. ii. p. 241, seq.; Finlay, Hist. of Greece under Othoman and Venetian Domination, pp. 276, 287; and especially Ross, Reise auf den Griech. Inseln, vol. i. p. 11, seq., who cites a monograph, Marcaky Zallony, Voyaye à Tine, Tune des iles de lArchipel de la Gréce, Paris, 1809.)

COIN OF TENOS.
TE'NTYRA or TE'NTYRIS ( $\tau$ à Tévtupa, Strab. xvii. p. 814 ; Ptol. iv. 5. §§ 6, 8 ; Steph. B. s. v.: Eth. Tevrupit $\eta \mathrm{s}$ ), the Coptic Tentore and the modern Denderah, was the capital of the Tentyrite Nome in Upper Aegypt (Agatharch. ap. Phot. p.447, ed. Bekker). It was situated in lat. $26^{\circ} 9^{\prime}$ N., on the western bank of the Nile, about 38 miles N. of Thebes. The name of the city was probably derived from the principal object of worship there the goddess Athor (Aphrodite), being a contracted form of Thy-n-Athor or abode of Athor. The hieroglyphic legend of the genius of the place contains
the name of the town, and is generally attached to the head-dress of Athor, accompanied by the sign Kali or "the land." The Tentyrite Athor has a human face with the ears of a cow (Rosellini, Monum. del. Culto, pl. 29. 3), and her attributes so closely resenble those of Isis, that it was long doubtful to which of the two goddesses the great temple at Tentyra was dedicated. Like Isis, Athor is delineated nursing a young child named Elwou, said, in hierorlyphics, to be her son. He is the third member of the Tentyrite triad of deities.

The principal fabrics and produce of Tentrra were flax and linen. ( 1 lin. xix. 1.) Its inhabitants held the crocosile in abhorrence, and engaged in sanguinary contlicts with its worshippers, especially with those of the Oinbite Nome [Ombos]. Juvenal appears to have witnersed one of these combats, in which the Ombites had the worst of it, and one of them, falling in his flight, was torn to pieces and devoured by the Tentyrites. Juvenal, indeed, describes this fight as between the inhabitants of contiguous nomes ("inter finitimos"); but this is incorrect, since Ombos and Tentyra are more than 50 miles apart. As, however, Coptos and Tentyra were nearly opposite to each other, and the crocodile was worshipped by the Coptites aloo, we should probably read Coptos for Ombos in Juvenal. (Sal. xv.) The latter were so expert in the chase of this animal in its native element, that they were wont to follow it into the Nile, and drag it to shore. (Aelian, Hist. Anim. x. 24 ; Plin. viii. 25. s. 38.) Seneca (Nat. Quaest. ii. 2) saps that it was their presence of mind that gave the Tentyrites the advantage over the crocondile, for the men themselves were small sinewy fellows. Strabo (xrii. pp. 814, 815) saw at Rome the exhibition of a combat between the crocodile and inen purposely imported from Tentyra. They plunged boldly into the tanks, and, entangling the crocodiles in nets, haled them backwards and forwards in and out of the water, to the great amazement of the beholders.

So long as Aegypt was comparatively unexplored, no ruins attracted more admiration from travellers than those of Tentyra. They are the first in tolerable preservation and of conspicuous magnitude that meet the eyes of those who ascend the Nile. They are remote from the highways and habitations of men, standing at the foot of the Libyan bills, amid the sands of the western desert. But though long regarded as works of a remote era, Aegyptian art was already on the decline when the tempies of Tentyra were erected. The architecture, indeed, reflects the grandeur of earlier periods; but the sculptures are ungraceful, and the hieroglyphics unskilfully crowded upon its monuments. The most ancient of the inscriptions do not go farther back than the reigns of the later Ptolemies; but the names of the Caesars, from Tiberius to Antoninus lius (A.D. 14-161), are of frequent occurrence. Tentyra, in common with Upper Aegypt generally, alpears to have profited by the peace and security it enjoyed under the inperial government to enlarge or restore its monuments, which, since the Persian occupation of the country, had mostly fallen into decay. The principal structures at Tentyra are the great temple dedicated to Athor; a temple of Isis; a Typhomium; and an isolated building withont a mof, of which the object tas not been discovered. With the exception of the latter, these structures are inclosed by a crude brick wall, forming a square, each side of which occupies 1000 fect, aud which is
in some parts 35 feet high and 15 feet thick. Full descriptions of the remains of Tentyra may be found in the following works; Belzoni's Travels in Nubia; Hamilton's Aeggytiaca; and Richardson's Travels along the Mediterranean and Parts adjacent, in 1816-1817. Here it must suffice to notice briefly the three principal edifices :-

1. The Temple of A thor. - The approach to this temple is through a dromos, commencing at a solitary stone pylon, inscribed with the names of Doinitian and Trajan, and extending to the portico, a dis. tarce of about 110 paces. The portico is open at the top, and supported by twenty-four columns, ranged in four rows with quadrangular capitals, having on each side a colossal head of Athor, surmounted by a quadrangular block, on each side of which is carred a temple doorway with two winged globes above it. These heads of the goddess, looking down upon the dromos, were doubtless the roost imposing decorations of the temple. To the portico succeeds a hall supported by six columns, and flanked by three chambers on either side of it. Next comes a central chamber, opening on one side upon a staircase, on the other into two small chambers. This is followed by a similar chamber, also with lateral rooms ; and, lastly, comes the naos or sanctaary, which is small, surrounded by a corridor, and Hlanked on either side by three chambers. The hioroglyphics and picturesque decorations are so numerous, that nowhere on the walls, columns, architraves, or ceiling of the temple, is there a space of two feet unoccupied by them. They represent men and women engayed in various religious or secular employments; animals, plants, public ceremonies and processions, and the emblems of agriculture or manufactures. Occasionally, also, occur bistorical portraits of great interest, such as those of Cleopatra and her son Caesarion. The effect of this wilderness of highly-coloured basso-relievos was greatly enhanced by the mode by which the temple itself was lighted. The sanctuary itself is quite dark: the light is admitted into the chambers through small perforations in their walls. Yet the entire structure displays wealth and labour rather than skill or good taste, and, although so elaborately ornamented, was never completed. The emperor Tiberius finished the noos, erected the portico, and added mach to the decoration of the exterior walls; but some of the cartouches designed for royal or imperial names have never been filled up.

On the ceiling of the portico is the famons zodiac of Tentyra, long imagined to be a work of the Pharaonic times, but now ascertained to have been executed within the Christian era. Though denominated a zodiac, however by the French savans, is is doubtful whether this drawing be not merely mythological, or at most astrological, in its object. In the first place the number of the supposed signs is incomplete. The crab is wanting, and the order of the other zodiacal signs is not strictly observed. Indeed if any astral signification at all be intended in the picture, it refers to astrology. the zodiac, as we know it, being unknown to the Aegyptians. Archaeologists are now pretty well agreed that a panegyris or procession of the Tentyrite triad with their cognate deities is here represented. The Greek inseription, which, long overlooked, determines the recent date of this portion of the temple, runs along the projecting summit of the cornice of the portico. It was engraved in the twenty-first year of Tiberius, A. D. 35 (Letronne, Inscriph. p. 97). Upon the
cciling of one of the lateral chambers, behind the portico, and on the right side of the temple, was a smaller gmup of mythological figures, which hats also been styled a planisphere or zodiac. This being sculptured on a kind of sandstone, was removeable, and by the permission of Mehemet Ali, in 1821, was cut out of the ceiling by M. Lelorrain, and brought to Paris. It was purchased by the French government, and is now in the Imperial Museum. It is probably a few years older than the larger zodiac.
2. The Iseium. - "The chapel of Isis is behind the temple of Athor." (Strab. xvii. p. 814.) It stands, indeed, immediately behind its SW. angle. It consists of one central and two lateral chambers, with a corridor in front. Among its hieroglyphics appear the names of Augustus, Claudius, and Nero. About 170 paces E. of this chapel stands a pylon, with a Greek inscription, importing that in the thirty-first year of Caesar (Augustus) it was dedicated to Isis. (Letronne, $I b$. pp. 82, 84.)
3. The Typhonium, as it is denominated from the emblems of Typhon on its walls, stauds about 90 paces N. of the great temple. It comprises two outer passage-chambers and a central and lateral adytum. A peristyle of twenty-two columns surrounds the sides and the rear of the building. On its walls are incribed the names of Trajan, Hadrian, and Antoninus Pius. But although the symbols of the principle of destruction are found on its walls, Ty phon can hardly have been the presiding deity of this temple. From the circumstance that all the other sculptures refer to the birth of Ehoou, Chamfollion (Lettres sur l'Egypte, vol. ii. p. 67) suggests that this was one of the chapels styled "Mammeisi," or " lying-in places," and that it commemorated the accouchment of Athor, mother of Ehôou. Typhon is here accordingly in a subordinate character, and symbolises not destruction, but darkness, chaos, or the " night primeval," which precedes creation and birth.

For the monuments of Tentyra, besides the works already enumerated, Wilkinson's Ancient Egyptians and Modern Eygpt and Thebes, and the volumes in the Library of Entertaining Knorcledge, entitled British Museum, Eyyptian Antiquities, may be consulted; and for the zodiacs, Visconti, Oeurres tom. iv. ; Letronne, Observations sur lObjet des Représentations Zodiacales de l'Antiquité, 8vo. Paris, 1824 ; or Halma, Examen et Explications des Zodiaques Eqyptiennes, 8vo. 1822.
[W. B. D.]
TENURClO. [Tinurtiem.]
TEOS (Tíws: Ech. Thios), an Ionian city on the coast of Asia Minor, on the south side of the isthmus connecting the Ionian peninsula of Mount Mimas with the mainland. It was originally a colony of the Dlinyae of Orchomenos led out by Athamas, but during the Ionian migration the inhabitants were joined by numerous colonists from Athens under Nauclus, a son of Codrus, Apoecus, and Damasus; and afterwards their number was further increased by Boeotians under Geres. (Strab. xiv. p. 633; Paus. vii. 3. § 3; Herod. i. 142; Scylax, p. 37; Steph. B. s. v.) The city had two good harbours, one of which is mentioned even by Scylax, and the second, 30 stadia distant from the former, is called by Strabo Гejpaidau (xiv. p. 644), and by Livy (xxxvii. 27) Geraesticus. Teos became a flourishing commercial town, and enjoyed its prosperity until the time of the Persian dominion, when its inhabitants, unable to bear the insolence of the burbarians, abandoned
their city and removed to Abdera in Thrace. (Herod. i. 168; Strab. 2.c.) But though deserted by the greater part of its inhabitants, Teos still continued to be one of the Ionian cities, and in alliance with Athens. (Thucyd. iii. 32.) After the Sicilian disaster, Teos revolted from Athens, but was speedily reduced (Thucyd. viii. 16, 19, 20). In the war against Antiochus, the fleet of the Romans and Rhodians gained a victory over that of the Syrian king in the neighbourhood of this city. (Liv. l.c.; comp. Polyb. r. 77.) The vicinity of Teos produced excellent wine, whence Bacchus was one of the chief divinities of the place. Pliny (v. 38) erroneously calls Teos an island, for at most it could only be termed a peninsula. (Comp. Pomp. Mela, i. 17 ; Ptol. v. 2. §6.) There still exist considerable remains of Teos at a place called Sighajik, which seems to have been one of the ports of the ancient city, and the walls of which are constructed of the ruins of Teos, so that they are covered with a number of Greek inscriptions of considerable interest, referring, as they do, to treaties made between the Teians and other states, such as the Romans, Aetolians, and several cities of Crete, by all of whom the inviolability of the Teian territory, the worship of Bacchus, and the right of asylum are confirmed. The most interesting among the ruins of Teos are those of the theatre and of the great and splendid temple of Bacchus; the massive walls of the city also may still be traced along their whole extent. The theatre commands a magnificent view, overlorking the site of the ancient city and the bay as far as the bold promontory of Myonnesus and the distant island of Samos. For a detailed description of these remains, see Hamilton, Researches, ii. p.11, foll.; comp. Leake, Asia Minor, p. 350.
[L. S.]

## Coin of teos.

TERACA'TRIAE (Tepaкaтрíaı), a German tribe in Noricum, on the banks of the Danube, probably on the sonth of the territory occupied by the Baeni (Ptol. ii. 11. § 26.)
[L. S.]
TEREDON. [Euphrates].
TEREN (T $\dot{p} p \eta \nu$, Diod. v. 72), a river in Crete, perhaps a tributary of the Amnisus, or the modern Aposelemi.
[T. H. D.]
TERENU'THIS (Tepevoûts, Not. Imp.), the modern Teranieh, a town in Lower Aegypt, was situated on the left bank of the Canopic arm of the Nile. At this point a pass through the hills conducted to the Natron Lakes, about 30 miles to the W. of the town. The people of Terenuthis farmed of the government a monopoly for collecting and exporting natron. [Nitriae]. Ruins at the modern hamlet of Abou-Belleu represent the ancient Terenuthis. (Sonnini, Voyages, vol. i. p. 228.)
[W. B. D.]
TEREPS FLUVIUS. [Tader.]
TERESES FORTUNALES, a place in the W. of Hispania Baetica (Plin. iii. 1. s. 3). [T. H. D.]

TERGESTE (T $\notin \rho \gamma \epsilon \sigma \tau \epsilon$, Strab. Tépyє $\epsilon \tau 0 \nu$, Ptol.: Eth. Tergestinus: Trieste), a city of Venetia or Istria, situated on a bay to which it gave the name of Teroestinus Sinus, which forms the inner bight or extremity of the Adriatic sea towards the N. It
was very near the confines of Istria and Venetia, so that there is considerable discrepancy between ancient authors as to which of these provinces it belonged, both Strabo and Ptoleny reckoning it a city of Istria, while Pliny includes it in the region of the Carni, which was comprised in Venetia. (Strab. v. p. 215, vii. p. 314; Plin. iii. 18. s. 22; Ptol. iii. 1. § 27.) Mela on the contrary calls it the boundary of Illyricum (ii. 4. § 3). From the time that the Formio. a river which falls into the sea 6 miles S. of Trieste, became fixed as the boundary of the provinces [formio], there can be no doubt that Pliny's attribution is correct. It is probable that Tergeste was originally a native town either of the Carni or Istrians, but no mention is found of its name till after the Koman conquest, nor does it appear to have risen into a place of importance until a later period. The first historical mention of it is in B. c. 51 , when we learn that it was taken and plundered by a sudden incursion of the neighbouring barbarians (Caes. B. G. viii. 24 ; Appian, Illyr. 18) ; but from the terms in which it is there noticed it is evident that it was already a Roman town, and apparently had already received a Roman colony. It was afterwards restored, and, to protect it for the future against similar disasters, was fortified with a wall and towers by Octavian in B. c. 32. (Gruter, Inscr. p. 266.6.) It is certain that it enjored the rank of a Colonia from the time of Augustus, and is styled such both by Pliny and Ptolemy. (Plin. iii. 18. s. 22 ; Ptol. iii. 1. § 2i.) That emperor also placed under the protection and authority of the city the neighbouring barbarian tribes of the Carni and Catali, and, by reducing to suljection their more formidable neighbours, the Iapordes, haid the foundations of the prosperity of Tergeste. The growth of this was mainly promoted by the adrantages of its port, which is the only good harbour in this part of the Adriatic; but it was apparently overshadowed by the greatness of the neighbouring Aquileia, and Tergeste, though a considerable municipal town, never rose in ancient times to a commanding position. We even learn that in the reign of Antoninus Pias the citizens obtained the admission of the Carni and Catali-who had previously been mere subjects or dependents-to the Roman " civitas," in order that they might share the burthensome honours of the local magistracy. (Orell. Inscr. 4040.) The inscription from which we learn this fact is one of the most interesting municipal records preserved to us from ancient times, and has been repeatedly pablished, especially with notes and illistrations by C. T. Zumpt (İrcretum Municinale Tergestinum, 4to. Berol. 1837) and by Göttling (Funfizehn Römische Lirkunden, p. 75). No subsequent mentinn of Tergeste is found in history under the Roman Empire; but it is certain that it continued to exist ; and retained its ponition as a considerable town throughout the middle ages. But it is only within the last century that it has risen to the position that it now occupies of one of the most populous and flourishing cities on the Adriatic. The only remains of antiquity extant at Trieste are some portinns of a Roman temple, built into the modern catheiral, together with several inscriptions (including the celforated one already noticed) and some fragments of friezes, bas-reliefs, \&c.

Tergente is placed by the Itineraries at a distance of 24 miles from Aquileia, on the line of road which followed the coast from that city into Istria. (Itin. Aus. p. 270; Tab. Peut.) Pliny, less correctly,
calls it 33 miles from that city (Plin. l. c.). The spacious gulf on which it was situated, called by Pliny the Tergestinus Sisus, is still known hs the Gulf of Trieste.
[E. H. B.]
TERGOLAPE, a town in Noricum, on the road from Ovilaba to Juvavum ; was situated in all prio bability near Lambach. (Tab. Peut.; Muchar, Norikum, vol. i. p. 266.)
[L. S.]
TERIA (Ttpeia), is mentioned in Homer (ll. ii. 829) in connection with a lofty mountain, or as a mountain itself (Typeins סpos aixú), and, according to Strab (xii. p. 565, comp. xiii. p. 589), ought to be resarded as a height in the neighbourhood of Cy zicus; although others pointed out, at a distance of 40 stadia from Lampsacus, a hill with a temple of the Mother of the Goxis, surnamed Tereia. [L. S.]

TL'RIAS (Tppias: Hiume di S. Leonardo), a river of Sicily, on the E. cuast of the island, flowing into the sea between Catana and Syracuse. It is mentioned by Pliny (iii. 8. s. 14) inmediately after the Symaethus; and Scylax tells us it was navigable for the distance of 20 stadia up to Leontini. (Sicrl. p. 4. $\$ 13$.) Though this last statement is not quite accurate, inasmuch as Leontini is at least 60 stadia from the sea, it leave little donbt that the river meant is that now called the Fiume di $S$. Leonartlo, which flows from the Lake of Lentini (which is not mentioned by any ancient author) to the sea. It has its outlet in a small bay or cove, which affords a tolerable shelter for shipping. Hence we find the mouth of the Terias twice selected by the Athenians as a halting-place, while pruceeding with their fleet along the E. coart of Sicily. (Thur. vi. 50, 96.) The connection of the Terias rith I.eontini is confirmed by Dicdorus, who tells as that Dionysius encamped on the banks of that river near the city of Leontini. (Diod. xiv. 14.) [E. H. E.]

## TERICLAE. [TUICIAE.]

TERINA (Tepiva, but Ttpeiva I.ycophr: Eth. Tepıvaios, Terinaeus), a city on the W. coast of the Bruttian peninsula, near the Gulf of St. Eufemia, to which it gave the name of Terinaftes Sivus. All writers agree in representing it as $n$ Greek city and a colony of Crotona (Scymn. Cin. 307 ; Steph. B. \&. v.; Scyl. p. 4. § 12 ; Strab. vi. p. 256; Plin. iii. 5. 8. 10; Solin. 2. § 10), but we have no account of the time or circumstances of its foundation. It was regarded as the burialplace of the Siren Ligeia, a tradition which evidently pointed to the existence of a more ancient torn on the spot than the Greek colong. (Lycophir. Alex. 72f; Steph. B. s.v.) The name of Terinn is scarcely mentioned in history during the flumnshing period of Magna Graecia; but we learn from an incidental notice that it was engaced in war with the Thurians under Cleandridas (Polysen. Strat. ii. 10. §1)-s proof that it was at this time no inconsiderable city; and the number, beauty, and variety of its coins sufficiently attest the fact that it must hare been a place of wealth and importance. (Millingen, Numism. de IItalie, p. 53.) Almost the first notice of Teriua is that of its conquest by the Bruttians, an event which appears to have taken place soon after the rise of that people in 8.c. 356, as, according to Diodortas, it was the first Greek city which fell into their hands. (Diod. xvi. 15.) it was recovered from them by Alexander, king of Epirus, about 327 в. c. (Liv. viii. 24), but probably fell again under their yoke after the death of that monarch. It was one of the cities which declared in favour of Hunnibul during the Second Punic

War; but before the close of the war that general found himself compelled to abandon this part of Brattium, and destroyed Terina, when he could no loncer bold it. (Nitrab. vi. p. 256.) The city never recovered this blow; and though there seems to have been still a town of the name in existence in the dars of Strabo and Pliny, it never again rose to be a place of any importance. (Strab. b. c.; Plin. iii. 5. s. 10.) An inseription in which its name appeans in the reign of Trajan (Orell. Inscr. 150) is in all probability spurious.

The site of Terina cannot be detennined with any certainty: but the circumstance that the extensive bay now known as the Gulf of Sta Euf cmia was frequently called the Sinus Teiminaecs (Plin.
 sufficiently proves that Terina must have been ituated in its immediate proximity. The must probable conjecture is, that it occupied nearly, if not exactly, the same site as the old town of Sta Eufemia (which was destroved by a great earthyuake in 1638 ), about a mile below the modern village of the name, and near the N . extremity of the gulf to which it gives its name. Cluverius and other antiquariams have placed it considerably further to the N., near the modern Nocera, where there are said to be the ruins of an ancient city (Cluver. Ital. p. 1287; Barrius, de Sit. Calabr. ii. 10. p. 124): but this site is abure 7 miles distant from the gulf, to which it could bardly therefore have given name. There is also reason to suppose that the ruins in question are these of a town which bore in ancient times the name of Nucerin, which it still retains with little alteration. [Nicerin, No. 4.]

Lyontion seems to place Terina on the banks of a river, which he names Ocinarus ('Sclvapos, Lycophr. Alex. 729. 1009); and this name, which is not found elsewhere, has been generally identified with the river now called the Saruto (the Sabatus of the Itineraries), which flows by Nocera. But this identification rents on the position assumed for Terina: and the name of the Ocinarus may be equalty well applied to any of the streams falling into the Gulf of Sta Eufemia.

The variety and beatuty of the silver coins of Terina (which belong for the most part to the best period of Greek art), has been already alluded to. The winged female figure on the reverse, though commoniy called a Victory, is more probably intended for the Siren Ligeia.
[E. H. B.]

COIN OF TERINA.
TERINAEUS SINUS. [Hipponiates Sinus.]
TERI'OLA CASTRA or TERI'OLIS, a fortress in Phaetia, mentioned only in the Notitia Imperii, bat generally identified with the castle near Meran, near which many Roman remains are found. (Comp. Pailhausen, Beschreib. der Rüm. Heerstrasse von Verona nach Augsburg, p. 86.) [L. S.]

TFRMANTIA. [Termes.]
TERMERA (тd Tє $\rho \mu \notin \rho a$ or T T $\rho \mu \epsilon \rho о \nu:$ Eth. T $\epsilon \rho \mu \in-$ peus), a maritine town of Caria, on the south coist
of the peninsula of Halicarnassus, near Cape Termerium. (Herod. v. 37; Strab. xiv. p. 657; Plin. v. 29 ; Steph. B. s. v., who erroneously assigns the town to Lycia.) Under the Romans this Dorian town was a free city. According to Suidas (s. v.) the place gave rise to the proverbial expression Tєриє́pia кака́, it being used as a prison by the rulers of Caria; but his remark that it was situated between Melos and Halicarnassus is unintelligible. Cramer supposes its site to be marked by the modern Carburylar or Gumishlu.
[L. S.]
TERMERE (Tє $\rho \mu \epsilon \rho \eta$ ), a place of ancertain site, mentioned only by Ptolemy (v. 2. § 16) as situated in the extreme north of Lydia, in the district Catacecaumene, near the two sources of the river Hermus.
[L. S.]
TERMERIUM. [TERMERA.]
TERMES (Tépues, Ptol. ii. 6. § 56), a town of the Arevaci in Hispania Tarraconensis. It is probably the same town called Tepuncos and $T \in \rho-$ $\mu a v t i a ~ b y ~ A p p i a n ~(v i . ~ 76 ~ a n d ~ 99) . ~ T h e ~ i n h a b i t-~$ ants are called Ternestini in Livy (Epit. liv.) and Tacitus (Ann. is. 45 ; cf. coins in Sertini, p. 208). Termes was seated on a steep hill, and was often besiegred without success by the Komans, till at last the inhabitants, on account of their hostile disposition towards Rome, were compelled in B. c. 97 to build a new city on the plain and without walls (App. vi. 99). It lay undoubtedly on the site of the present Ermita de nuestra Señora de Termes, 9 leagues W. of Numantia.
[T. H. D.]

 of Pisidia, celebrated for its natural strength no less than for its artificial fortifications, was situated on a height of Mount Taurus, at the entrance of the defiles which are traversed by the river Catarrhactey, and formed the means of communication between Pisidia, Prmphylia, and Lycia. (Strab. xiii. p. 630, xiv p. 666 ; Ptol. v. 5. § 6, viii. 17. § 34; Pclyb. xxii. 18: Steph. B. s. v.; Dion. Per. 859.) A peak of the mountain rising above the acropolis bore the name of Solymus; and the inhabitants of the town itself were, as Strabo says, called Solymi. They were certainly not Greeks, for Arrian (i. 2i) distinctly calls them Pisidians and barbarians. Their town stood on a lofty height, precipituus on all sides; and the road running close by the place was very diticult, passing through a narrow gorge, which could be detended by a small force. Alexander the Great succeeded indeed in forcing his waty through it, but despairing of the possibility of taking Termessus, he continued his march. Strabo (xiv. p. 666) therefore seems to be mistaken in stating that Alexander conquered the place. The consul Manlius, after relieving Isionda, passed along the same road. (Liv. $x \times x$ vii. 15.) The town of Termessus continued to exist down to a late period, when it was the see of a Christian tishop, who also had the administration of two neighbouring places, Jovia and Euducia. (Hierucl. p. 680.) The site of ancient Termessus has not been difficult to discover by modern travellers, and considerable remains still exist at Karabunar Kiui, at the foot of the height on which the ancient fortress was situated. (Leake, Asia Minor, pp. 133 -135.) As to the coins of Termessus, which come down as far as the reign of the emperor Severus, see Sestini, p. 96. On some of these
 the Termessians, a circumstance which confirms the
statement of Stephanus B. that there was another town of the same name in I'isidia, which was called Lesser Termessus (T $\mathrm{T} \in \rho \mu \eta \sigma \sigma$ ós $\dot{\eta} \boldsymbol{\mu} \mu \kappa \rho \alpha \alpha_{\text {. }}$ ) [I. S.]

COIN OF TERMESSOS.
TERMETIS, a mountain of Lydia between Mounts Olympus and Timolus, is mentioned only by Pliny (v. 31).
[L. S.]
TERMILAE (Tєpminat) is said to have been the ancient name of the inhabitants of Lydia, before the name Lydi came into use. These Termilae were believed to have come from Crete; and even in the time of Herodutus the Lydians were often called Termilae by the neighbouring nations. (Herod. i. 173 , vii. 92 ; l’aus. i. 19. § 4.)
[L. S.]
TERPO'NUS (Téptovos), a town of the lapodes in Illyria, of uncertain site. (Appian, B. Illyr: 18.)

TESA (T $\eta \sigma d$, Marcian, Peripl p. 23; Teiod, Ptol. vi. 8. §8), a small town on the coast of Gedrosia, visited by the fleet of Nearchus. It is probably the same as the Táot or Tpoiot of Arrian (Ind. c. 29), and may he represented by the present Tiz. [V.]

TESEBA'RICE (Tı $\quad \eta$ bapıк̀̀, sc. хळ́pa, Peripl. Mar. Eythyr. P. 1, ap. Hudson, Geogr. Min.), is supposed to have been a portion of the district inhabited by the Troglodytes. The modern Persian name Trez-u-Bareek closely resembles the ancient one, and is said to mean, when applied to a country. " low and that," which designation would accord with the S. portion of the Regio Troglodytica in the level region of Aethiopia near the mouth of the Red Sea. (Vincent, Commerce and Narigation of the Ancients, vol. ii. p. 89. [Troglodytae.] [W.B.D.]
TFistrina. [Aborigines.]
TE'TIUS (T'́тьos, P'tol. v. 14. § 2), a river on the S. coast of Cyprus, probably the Tesis. [T. H. D.]

TETRADIUM. [Tymafns.]
TETRANAULOCHUS. [Navloches, No. 3.]
TETRAPHYLIA, a town of Athamania in Epeirus, where the rogal treasures were kept. (Liv. xxxviii. 1.)

TETRA'POLIS. 1. Of Attica. [Marathon.]
2. Of Doris. [Domis.]

TETRAPYRGIA (Tetpanupyía). 1. A town in the Cyrenaica, of uncertain site, situsted above the harbour Plynus. (Strab. xvii. p. 838; Polyb. 2xxi. 26.)
2. A town of Cappadocia in the district Garsauria (Ptol. v. 6 § 14.)
TETRICA MONS, a monntain in the central range of the Apennines, adjoining the territory of the Sabines. Virgil enumerates the "Tetricae horrentes rupes" among the localities of that people, and Silius Italicus in like manner closely associates the "Tetrica rupes" with Nursia Varro also speaks of the Montes Fiscellus and Tetrica as alwunding in wild goats. (Virg. Aen. rii. 713 ; Sil. Ital. viii. 417 ; Varr. R. R. ii. 1. § 5.) From all these passages it is evident that it was oue of the

## TEUMESSUS.

lonty and racged chain of the Central Apennines, which extend from the Monti dellu Sibilla, southwards as far as the Gran Sasso, separating Picenum from the country of the Salines: and this position is confirmed by Servius and Vibius Sequester, of whom the former calls it "Mons in Piceno axperrimus," while the latter terms it "Mons Sabinorum." (Serv. od Aen. l. c.; Vib. Seq. p. 33.) It cannot be identified with more accuracy. The two grammarians just quoted write the name "Tetricas Mons;" liut Varro, as well as Virgil and Silius, adopts the feminine form, which is not therefore one merely poetical.
[E. H. B.]
TETRISIUS [Tirizis].
TETUS (T $\hat{\eta} \tau 0 s$ ), a river on the Atlantic coast of Gallia, which Ptolerny (ii. 8. § 2) places bet ween the Stahicanus Portus and Argenus, or the outlet of the river Argenus, if that is the true reading. It is imponsible to determine what river is the Tetus. D'Anville assumes the place to be the bay of Sra, which receives the rivers See and Sélune. Others take the Tetus to be the Treguier or Trieu. (Ckert, Gallien. p. 144.)
[G. L.]
TECCERA, in North Gallia, is placed by the Table about halfway between Nemetacum (Arras) and Samarobriva (Amiens). Tierre, on the mad from Amiens to Arras, represents Teucera. (D'Anville. Notice, $f f$.)
[G. L.]
TEUCRI. [Troas.]
TELDE'RIL'M (TEUSépov), a place in the country of the Chauci Minores, on the river Amasia, in Germany (l'tol. ii. 11. § 28). Its site is commonly identified with that of the village of Lirger, near Mrppen.
[L. S.]
TEUDURCM, in North Gallia, is placed in the Antonine Itinerary on a route from Colonia Trajana [Colonia Trajana] through Juliacum (Juliers) to Colonia Agrippina (Cologne). The place is Tuddern. The distance from Tuddern to the supposed site of Coriovallum is marked viii. [Coriovallem.]
[G. L.]
TELGLUSSA (Té́y $\lambda o v \sigma \sigma a$ ), an island mentioned by Thucydides (viii. 42, where some read Tét $\lambda=\nu \sigma \sigma \alpha$ ), which, from the manner he speaks of it, must have been situated between Syme and Halicarnassus. Stephathus B also mentions the island on the authority of Thucydides, but calls it Teuthussa and an island of Ionia. There can be no doubt that the Scutluss mentioned by Pliny (v. 36) is the same as the Teuglussa or Teutlussa of Thucydides.
[L. S.]
 a village in Bueotia, situated in the plain of Thebes, upon a low rocky hill of the same naine. The name of this hill appears to have been also given to the range of mountains separating the plain of Thebes from the valley of the Asopus. [Boeotia, pp. 413. 414.] Teumessus was upon the road from Thebes to Chalcis (Paus. ix. 19. § 1), at the distance of 100 stadia from the former (Schol. ad Eurip. Phern. 1105.) It is mentioned in one of the Homeric hymns ( $/$ ynnn. in Apoll. 228) with the epithet $\lambda \in \chi \in \pi o i n$ or grass. $y$, an epithet justitied by the rich plain which surrounds the town. Teumessus is celebrated in the epic legends, especially on account of the Teumessian fox, which raxaged the territory of Thebes (I'aus. l. c.; Anton. Lib. 41; Palaeph. de Incredib. 8; see Dict. of Biogr. Vol. I. p. 667.) The only building at Teumessus mentioned by Puasanias was a temple of Athena Telchinia, withont any statue. (Besides the authorities ulready quoted, see Strab.
ix. p. 409; Aristot. Rhet. iii. 6; Plin. i.. 7. s. 12: Steph. B. 2. v.; Phot. Lex. p. 428; Leake, Nurthern Grrece, vol. ii. p. 245, seq.)

TEURIOCHAEMAE (Tevpioxaîma), a German tribe, occapying the country south of the Cherusci, on the north of Mons Sudeta, in the modern Erzgebinge and Voigtlund. (Ptol. ii. 11. § 23.) [L.S.]

TEURISCI (Tধupiakot, Ptol. iii. 8. § 5), a Dacian tribe near the sources of the Tyras. [T. H. I.]

TEU'RNIA (Teoupvia), a Celtic town in Noricum, on the left bank of the upper part of the river Drarns (Plin. iii. 27 ; Ptol. ii. 14. § 3). Its site is still marked by considerable ruins not far from the little town of Spital. (Comp. Orelli, Inscript. Nos. 498 and 5071 ; Eugippus, Vit. S. Severi, 17, 21, where it is called Tiburnia.) [L. S.]
TEUTHEA. [Dyme.]
TEUTHEAS. [Achaia, p. 14, a.]
TEUTHIS (Teîis: Eth. Teveions), a town in the centre of Arcadia, which together with Theisoa and Methydrium belonged to the confederation (cuvré$\lambda \in I a$ ) of Orchomenus. Its inhabitants were removed to Megalopolis upon the foundation of the latter. The Paleicastron of Galatís probably represents Teuthis. (l'aus. viii. 27. §§4,7,28. §4; Steph. B. s. v. ; Koss, Reisen im Peloponnes, vol. i. p. 114.)

TEUTHRANIA (Teudpavia), the name of the western part of Mysia about the river Cairus, which was believed to be derived from an ancient Mysian king Teuthras. This king is said to have adopted, as his son and successor, Telephus, a son of Heracles; and Earypylus, the son of Telephus, appears in the Odyssey as the ruler of the Ceteii. (Strab. iii. p. 615; Hom. Od. x. 520; comp. Mysia.)
In the district Teuthrania a town of the same rame is mentioned as situated between Elaea, Pitane, and Atarneus (Strab. l.c.; Steph. B. s. v.; Xenoph. Hist. Gr. iii. 1. § 6), but no other particulars are known about it.
[L. S.]
TEUTHKAS (Teí日保), the sonth-western part of Mt.Temnus in Teuthrania (Ctesias, ap.Stob. Serm. p. 213, ed. Bähr), is perhaps the mountain now called Iomacli, which the caravans proceeding from Smyrna to Brusa have to traverse. (Lucas, Trois-Voyage, i. p. 133.)
[L. S.]
TEUTHRO'NE (Tevop $\omega \nu \eta$ ), a town of Laconia, situated upon the western side of the Laconian gulf, 150 stadia from Cape Taenarum. It was said to have been founded by the Athenian Teuthras. The chief deity worshipped here was Artemis Issoria. It had a fountrin called Naia. Its ruins exist at the village of Kotrones, and its citadel occupied a small peninsula, called Skopos, Skopia or Skopópolis. The distance assigned by Pausanias of 150 stadia from Teuthrone to Cape Taenarum is, according to the French Commission, only from 8 to 10 stadia in excess. Augustus made Teuthrone one of the Eleuthero-Lacomian tuwns. (Paus. iii. 21. § 7, iii. 25. § 4 ; Ptol. iii. 16. § 9 ; Bublaye, Recherches, \&c. p. 89 ; Curtius, Peloponnesos, vol. ii. p. 276. )

TEUTIBU'RGIUM or TEUTOBURGIUM (Tevtoboupyoy), a town in Lower Pannonia, near the confluence of the Dravus and Danubius, on the road from Mura to Cornacum, was the station of the prafect of the sixth leyion and a corps of Dalmatian horsemen. (It. Ant. p. 243 ; Ptol. ii. 16. § 5 ; Notit. Imp.; Tuh. Peut., where it is miswritten Tittoburgium.) The name seems to ii:dicate that it was originally a settlement of the

Teutones, which may have been founded at the tine when they roamed over those countries, about B. c. 113. No remains are now extant, and its exact site is only matter of conjecture. (Muchar, Norihum, vol. i. p. 265.)
[L. S.]
TEUTOBERGIENSIS SALTUS, a mountain forest in Western Germany, where in A.D. 9 the Ruman legions under Varus suffered the memorable defeat, and where, six years later, their unburied remains were found by Drusus. (Tac. Ann. i. 60.) A general description of the locality without the mention of the name is found in Dion Cassius (lvi. 20, 21 ; comp. Vell. Pat. ii. 105, 118, full.). This locality has in modern times been the subject of much discussion among German antiquaries; bat the words of Tacitus seem to imply clearly that he was thinking of the range of hills between the sources of the Lupia and Ainasis; that is, the range between Lippspringe and Haustenbeck. (Giefers, Ie Alisone Castello deque Varianae Cladis Loco Commentatio. p. 47, foll )
[L. S.]
TEUTONES or TEUTONI (Teútoves), the name of a powerful German tribe, which about B. c. 113 sppeared on the frontiers of Gaul at the same time when the Cimbri, probably a Celtic people, after defeating the Komans in several battles, traversed Gaul and invaded Spain. The Teatones, however, remained behind ravaging Gaul, and were joined by the Oinbrones. At length, in r.c.102, they were defeated by C. Marius in a great battle near Aquae Sextiae, where, according to the most moderate accounts, 100,000 of thein were slain, while 80,000 or 90,010 are said to have been taken prisoners. A body of 6000 men, who survived that terrible day, are said to have established themselves in Gaul between the Maas and Schelde, where they became the ancestors of the Aduatici. (Liv. Fpit. lih. Ixvii.: Vell. Pat. ii. 12 ; Flor. iii. 3 ; Plut. Mar. 36, foll.; Oros. v. 16; Caes. B. G. ii. 4, 29.) After this great defeat, the Teutoves are for a long time not heard of in history, while during the preceding $t \cdot n$ years they are described as wandering about the Upyer Rhine, and eastward even as far as Pannonia. In later times a tribe bearing the name of Teutones is mentioned by Pomp. Mela (iii. 3), Pliny ( $x \times x$ ii. 11), and Ptolemy (ii. 11.§17) as inhabiting a district in the north-west of Germany. on the north of the river Albis, where according to Pliny, they dwelt even as early as the time of Pytheas of Massilia. The question here naturally presents itself whether these Teutones in the north of Germany were the same as those who in the time of Marius invaded Gaul in conjunction with the Cimbri, who in fact came from the same quarters. This question must be answered in the affirmative; or in other words, the Teutones who appeared in the south were a branch of those in the north-west of Germany, having been induced to migrate southward either by inundations or other calamities. The numerous body of emigrants so much reduced the number of those remaining behind, that thereafter they were a tribe of no great importance. That the name of Teutones was never employed, either by the Germans themselves or by the Rumans, as a ceneral name for the whole German nation, has already been explained in the article Geibinnia. Some writers even regard the Trutones as not Germans at all, but either as Slavonians or Celts. (Latham, Epileg. ad Tac. Germ. p. cx.) The fact that the country between the lower Elbe and the Baltic was once inhabited by the

Teutones seems to be attested by the names of Teutenrinkel，a village near Rostrich，and Teuten－ dorf，between Travemuinde and Schoartur．［L．S．］

TEUTONO＇ARI（Teutoddapoi），a German tribe mentioned by Ptolemy（ii．11．§17）in close prox－ inity to the Teutones，whence it may be inferred that they were only a branch of the Teutones． （Latham，Epileg．ad Tac．Germ．p．cxi．）［L．S．］ THABOR［ATYBARICM．］
THA＇BRACA（Өá6paка ко入ыvía，Ptol．vi． 3. $\S § 5,21,28$, viii．14．§ 3；Mela，i．7），also called Tubraca（Plin．v．3．s．2，6），a maritime city of Nu－ midia，seated at the mouth of the Tusca．It was the border city towards Zeugitana，and a Roman colony．（Ptol．，Plin．，$u$ ．cc．）The surrounding conntry was covered with thick woods．（Juv．S． x．194．）Thabraca was the scene of the death of Gildo．（Cland．Laud．Stil．i．359．）It still retains the name of Tabarka．（Cf．Itin．Ant．pp．21，495， 514 ；Aug．adv．Donat．vi．32．）［T．H．D．］

Thabrasta，a place in the Libyan Nomos （Itin．Ant．p．72），identified by Lapie with Kasr Boum Adjoubah．
［T．H．D．］
THABU＇SIUM，a fortress on the river Indus in Caria，not far from Cibyra．（Liv．xxxviii．14．）

THAGULIS（ Өaroul／s．Ptol．iv．3．§＋3），or Tagulus（Itin．Ant．p．65）．a town in Africa Pro－ pria，on the Syrtis Major，according to Lapie near Ali．Called Tagulis in Tab．Pent．［T．H．D．］

THAGURA（called Thacora in Tab．Peut．），a place in Numidia，varionsly identified with El－Guettar and El－Matnainia．（Itin．Ant．p．41．）［T．H．D．］
THAGURUM（ $\Theta$ dyoupo $\begin{aligned} & \text { bpos，Ptol．vi．16．§ 2），}\end{aligned}$ a mountain in Serica，stretching from the Ottoro－ corras in a northerly direction towards the Asmiraean mountains．It is in the S ．part of the Mongol ter－ ritory，and N．of the Hoang－ho．
［＇T．H．D．］
THALA（ ${ }^{2}$ áa，Strab．xvii．p．831），an im－ portant town of Numidia，with a treasury and arsenal．（Sall．J．75，77，80，89；Tac．Ann． iii．21；Flor．iii．1．）It is probably identical with Telepte（Teגєттウ́，Procop．de Aed．vi．6），a for－ tified town of Numidia，lying to the NW．of Capsa， and from which there was a road to Tacape on the Syrtis Minor（Itin．Ant．p．77）．Shaw（Trav．vol． i．p．288，seq．）takes Ferreanah，both from its ruins and its situation，to have been the ancient Thala or Telepte（cf．Mannert，x．2．p．321），but Lapie seeks it at Haouch－el－Khima．
［T．H．D．］
 16），a mountain in the interior of Libsa，near which dwelt a tribe of the same name（ $\Theta$ áda，Ptol． iv．6．§ 21 ）．
［T．H．D．］
THA＇LAMAE（ Өa入á aat）．1．A town of Flis， situated above Pylos on the frontiers of Achaia，and in the rocky recesses of Mount Scollis，probably near the modern village of Sandameri，at the head of a narrow valley．It was here that the Eleians took refuge with their property and flocks，when their country was invaded by Philip in B．c．219．（Xen． Hell．viii．4．§ 26 ；Polyb．iv． 75 ；Leake，Mo－ rea，vol．ii．p．204，Pelopomesiaca，p．220；Cur－ tius，Jelopminesos，vol．ii．p．38．）

2．（Also Өa入á $\mu \eta$ ，Ptol．iii．16．§ 22 ：Eth．©a－ $\lambda a \mu a ́ r a s)$ ，a town of Laconia，distant 80 stadia north of Oetylus，and 20 stadia from Pephums． （l＇aus．iii．26．SS 1，2．）Prphnis was on the coast， on the eastern side of the Blessenian culf，and Tha－ lamae was situated inland，prohably at or near Platen，upon the river IVilia，the minor Pamisus of Strabo（viii．p．361）．l＇tolemy（l．c．）also calls it
one of the inland towns of Laconia．Theopompns called Thalamae a Messenian town（Steph．B．s．r． Өaлáual），and we know that the Messenians said that their territory originaliy extended as far as the minor I＇anisus．［Laconia．p．114，b．］Thalamae was said to have been founded by Pelops，and was called in the time of Strabo the Boeotian Thalamae，as if it had received a Boeotian colony．（Strab．viii． p．360．）Thalamae is mentioned by Polybius（xvi． 16）．It was subsequently one of the Eleu：hero－ Laconian towns．（Paus．iii．21．§ 7．）In the ter－ ritory of Thalamae，on the road to Oet glus was a temple and oracle of Ino or Pasiphaie，in which the future was revealed to those that slept in the temple． Even the Spartan kings sometimes slept in the temple for this purpose．The temple probably stood upon the promontory Trachéla，where there are some ancient remains．（Pauk．iii．26．§ 1 ；Plut． Agis， 9 ；Cic．de Divin．i． 43 ；Hermann，Gothesh． Alterth．§ 41．7．）（Leake，Peloponnesiuca，p．178； Boblaye，Recherches，fec．p．92；Curtius，Pehpon－ nesos，rol．ii．p．284．）

THALIADES．［Arcadia，p．193．No．15．］
THALLI，a people of Asiatic Sarmatia，E．of the mouth of the Kha．（Plin．vi．5．s．5．）［T．H．D．］

THAMANAEI，a people in central Asia，belong－ ing to the fifteenth satrapy of Dareius Hystan pis． Their exact position is uncertain．（Herud．iii．93， 117；Steph．B．s．v．）

THAMARA（ Gauapd，Euseb．and Onom．8．u． Hazazon－Thumar；Өaцapó，l＇tol．v．16．§ 8；Tab． Peut．Tamar，Ezek．xlvii．19，xlviii．28），a town in Palestine，and one of the most southerly points in the country according to Ezekiel．According to Eusebius and Jemine it was a town and fortress one day＇s journey from Malatha on the war from Hebron to Ailah，and in their time was held by a Roman garrison．Robinson fixes it at Kurnub， the site with ruins 6 miles S．of Miih towards the pass es－Siffih．（Bibl．Res．rol．ii．p．202， 2nd ed．）

THAMBFS（ $\Theta \alpha \mu 6 \eta s, ~ \Theta \alpha \mu \mu \eta s$ ，or $\Theta \dot{\alpha} \mu \eta s$ ，Ptol． iv．3．$\$ \$ 16,25$ ）．a mountain in the eastern part of Numidia，in which the river Rubricatus has its sources．
［T．H．I）．］
THAMNA（Өá $\mu \mathrm{va}:$ Eth．Өaцvitrs），a large village of Palestine near L．ydda，on the way to Jerusalem，which gave its name to the Toparchia Thamnitica．（Ptol．v．16．§8；Jnseph．B．J．iii． 3．v．4；Plin．v．14．s． 15 ：Euseb．Onom．s．r．； Steph．B．s．v．；Pubinson，Bibl Res．vol．ii．p．239， seq．，2nd ed．）

THAMONDACANA．［Nigeir，p．418．b．］
THAMLDE＇NI（ Өanouסnvoi），a people of Arabia， dwelling upon the coast of the Arabian gulf．for more than 1000 stadia from about Moilah to Wid－ jeh．（Diod．iii． 44 ；Agatharch．p．59，Hudson． \＄92，with Miilier＇s note．）Ptolens mentious the Thamydeni（ $\Theta a \mu v \delta \eta \nu o l$ ）among the inland titurs of Arabia（vi．7．§ 21 ），but in another pasage he places them upon the coast，under the slightly ml－ tered name of Thamyditae（ $-a \mu v \delta i \tau a t$, vi． 7. § 4）． In Iliny they are called Thamudeni（vi．28．s．32）． Sipphanus B makes Thamuda（ ©auovjd）a n in h－ bour of the Nabatacans．The name is evadently the same as Thamud，a celebrated tribe in early Arabian history．

TliANA or TIIOANA（Eáva，Oodıa，Ptol．v．17． § 5；Thorma，Tibl．Peut．），a town of Arahia Petraem， probably corresponds to Jhina，a village risited by Burckhardt，on the declivity of a mountain N．of

Wady-el-Ghutceir. (Rubinson, Bibl. Res. vol. ii. p. 168, 2nd ed.)

## THAPSA. [Rugicade.]

THA'PSACUS (edquaxos), a town of considerable importance on the right bank of the Euphrates, in lat. $35^{\circ} 15^{\prime} \mathrm{N}$. It is mentioned very early in ancient history, and is almost certainly the same as the Tiphsah, of the Old Testament (1 Kings, iv. 24 ; in the LXX. written $\Theta$ á $\psi a$ a), which is mentioned as the eastern boundary of the kingdom of Solonon. There is some difference among ancient writers as to the province in which it should be included. Thus, Pliny (v. 24. s. 21) and Stephanus B. (s. v.) place it in Syria; Ptoiemy (v. 19. § 3) in Arabia Deserta. The reason of this is, that it was a frontier tuwn, and might therefore be claimed as belonging to one or more provinces. At Thapsacus was the most important passage of the Enphrates in the northern portion of that river's course. As such, we read it was used by Cyrus the younger, whose ariny forded it, the water reaching up to their breasts, there being probably at that time no bridge. (Xen. Anab. i. 4. § 11.) Sume years later Dareius crossed it to meet Alexander in Cilicia, and recrossed it in haste after his defeat at Issus. (Arrian, ii. 13.) Alexander, pursuing Dareius, crossed the river also at the same spot, as the historian especially notices, on two bridges (probably of boats), which were joined together (iii. 7). Strabo, who makes frequent mention of Thapoacus, considers it, on the authority of Eratosthenes, as distant from Babylon about 4800 stadia, and from Commagene 2100 (ii. pp. 77, 78, 81, xvi. p. 746) ; and states that it was situated jost at that spot where Mesopotamia is the widest (l.c.). There is no doubt that it derived its name from a Semitic verb, meaning to pass over (Winer, Bibl. Wörterb. s. v.) : hence another passage-place of the same name, which is mentioned in 2 Kings, xv. 16, but which is really in Palestine, has been often confounded with Tiphsah on the Euphrates. Pliny states that the name was changed by the Macedonian Greeks to Amphipolis (v. 24. 8. 21), and Stephanas calls the Amphipolis of Seleucns Tourmeda. No trace of any of these names is now found in the country (Ritter, x. p. 1114), nor any ruins that can certainly be identified with its site. It was, boweser, probably near the present Deir. [V.]

THAPSIS ( $\Theta a ́ \psi i s$, Diodor. xx. 23), a deep river of the Chersonesus Taurica, on which lay a roval castle. Ukert (iii. 2. p. 193) identities it with the Salyir. But Kïhler seeks the castle on Mount Opuk, 45 wersts south of Kertsch. (Mém. de l'Ac. de St. Petersb. ix. p. 649, seq.)
[T. H. D.]
THAPSUS ( $\Theta$ ćuos, P'tol. iv. 3. § 10), a maritime city of Byzacium, in Africa Propria. It lay on a salt lake, which, according to Shaw (Trav. p. 99), still exists, and on a point of land 80 stadia distant from the opposite island of Lopadussa. Thapsus was strongly fortified and celebrated for Caesar's victury over the Pompeians, b. c. 46. (Hirt. B. Af. 28, seq.) Shaw (l. c.) identifies it with the present Lternass, where its ruins are still visible. (Cf. Strabo, xvii, pp. 831, 834 ; Liv. xxxiii. 48 ; Plin. v. 4. s. 3, \&c.)
[T. H. D.]
THAPSUS, a river of Numidia, falling into the sea near the town of Rusicade, probably the presient Oned Resas (Vib. Sequest.)
[T. H. D.]
ThAPSUS [Syractsae.]
THARKANA, a place on the great line of road which led across the desert from the Euphrates to Hatrae (Al-Hathr). It in marked on the Tabula

Peutingeriana. It has been conjectured by Mannert (v. 2. p. 233) that the name is a mistake for Charrana, another form of Charrae; but this hypothesis seems hardly tenable. Licichard believes it is represented by the present Araban.

THARRAS (Oápsas, Ptol.: Ru. at Capo del Sevo). a city of Sardinia, mentioned only by Ptolemy (where the name is written in many MSS. and editions Tarrae or Tarras) and in the Itineraries, but which seems to have been one of the must considerable places in the island. It was situated on the W. cuast, on a projecting point of land at the N. extremity of the Gulf of Oristano, where its ruins are still visible, though half buried in sand, and numerous minor anticuities have been discovered. From its position there can be little doubt that it was a Phrellician or Carthaginian settlement; but continued to be a considerable town under the Romans, and an inscription records the repair of the road from Tharras to Cornus as late as the reign of the emperor Philip. (De la Marmora, Voy. en Sardaigme, vol. ii. pp. 359, 477.) The Antonine Itinerary correctly places it 18 miles from Cornus and 12 from Othoca (Oristano). (Jtin. Ant. p. 84; Ptol. iii. 3. § 2.)
[E. H. B.]
THALSANDALA (Oapodvסa入a), a town in Thrace, between Byzamtium and the wall of Anastasius, which was one of the numerous places fortified by Justinian. (Procop. de Aed. iv. 11. p. 305, Bonn.) According to Reichard, Ezatulcza now occupies its site.
[J. R.]
THASOS ( $\Theta$ áros, sometimes Өá $\sigma \sigma o s: E t h$. Od́otos: Thaso or Tasso), an island in the N. of the Aegaean sea, off the coast of Thrace, and distant only $3 \pm$ miles from the plain of the river Nestus or Kara-Su. It was distant half a day's sail from Amphipolis (Thuc. iv. 104), and 32 miles from Abdera. (Plin. iv. 12. s. 23.) It was also called Aeria or Aethra (l'lin. l.c.; Steph. B. s. v.) and Caryse, from its gold mines (Eustath. ad Iionys. Per. 517), which were the chief source of the prosperity of the island. The earliest known inhabitants of Thasos were the Phoenicians, who were doubtless attracted to the island by its valuable mines, but who are said to have come thither in search of Europa, five generations before the birth of the Grecian Hercules. They were led by Thasos, the son of Acenor, from whom the island derived its name. (Herod. ii. 44, vi. 47 ; Paus. v. 25. § 12; Scymn. 660; Conon, c. 37 ; Steph. B. s. v.) Thasos was afterwards colonised in Ol. 15 or 18 (b. c. 720 or 708) by settlers from Paros, led by Telesicles, the father of the pret Archilochus. (Thuc. iv. 104; Strab. ix. p. 487 ; Clem. Alex. Strum. i. p. 144 ; Euseb. Praep. Ev. vi. 7.) There also existed at that time in the isiand a Thracian tribe called Saians, with whom the Parian settlers carried on war, but not always successfully; and on one occasion Archilochus was obliged to throw away his shield. (Archiloch. Fragm. 5, ed. Schneidewin; Aristoph. Pac. 1298, with the Lehol.) The Greek colony rapidly rose in power, and obtained valuable possessions on the adjoining mainland, which contained even richer mines than those in the island. Shortly before the Persian invasion, the clear surplus revenue of the Thasians was 200 , and sometimes even 300 talents yearly ( 46,0001 ., $66,000 \mathrm{l}$.), of which scapte Hyle produced 80 talents, and the mines in the island rather less. (Herod. vi. 46.) Besides Scaptê Hylê the Thasians also possessed upon the mainland Galepsus and Oesyma (Thuc. iv.

107; Diod. xii. 68), Stryme (Herod. vii. 118: Suid. s. v. इTpúm $)$, Datuin, and at a later period Crenides. (Böckh, Publ. Econ. of Athens, p. 312, Engl. tr.) Herodotus, who visited Thasos, says that the most remarkable mines were those worked by the Phoenicians on the eastern side of the island between Aenyra and Coenyra opposite Samothrace, where a large mountain had been overturned in search of the gold. (Herod. vi. 47.) The Thasians appear to have been the only Greeks who worked the valuable mines in Thrace, till Histiseus, the Milesian, settled apon the Strymon and built the town of Myrcinus, about b. c. 511. (Herod. v. 11, 23.) After the capture of Miletus (в. c. 494), Histiacus made an unsuccessful sttempt to subdue Thasos (Herod. vi. 28), but the growing power of the Thasians excited the suspicions of Dareius, who commanded them in s. c. 492 to pull down their fortifications and remove their ships of war to Abdera, - an order which they did not venture to disobey. (Herod. vi. 46.) When Xerxes marched through Thrace on his way to Greece, the Thasians, on account of their possessions on the mainland, lasd to provide for the Persian army as it marched through their territories, the cost of which amounted to 400 talents $(92,800$ l.). (Herod. vii. 118.) After the defeat of the Persians, Thasos became a member of the confederacy of Delos; but disputes having arisen between the Thasians and Athenians respecting the mines upon the mainland, a war ensued, and the Athenians sent a powerful force against the island under the command of Cimon, s. c. 465. After defeating the Thasians at sea, the Athenians disemburked, and laid siege to the city buth by land and sea. The Thasians held out more than two years, and only surrendered in the third year. They were compelled to raze their fortificutions; to surrender their ships of war; to give up their continental possessions; and to pay an immediate contribution in money, in addition to their annual tribute. (Thuc. i. 100, 101 ; Divd. xi. 70 ; Hlut. Cim. 14.) In B.c. 411 the demucracy in Thasos was overthrown, and an oligarchical government established by Peisander and the Four Hundred at Athens ; but as soon as the oligarchy had got possession of the power they revolted from Athens, and received a Lacedaemonian garrison and harmost. (Thuc. viii. 64.) Much internal dissension followed, till at length in B. C. 408 a party of the citizens, headed by Ecphantus, expelled the Iacedaemonian harmost Eteonicus with his garrison and admitted Thrasybulus, the Athenian communder. (Xen. Hell. i. 1. §§ 12, 32, i. 4. § 9 ; Dem. c. Lept p. 474.) After the battle of Aegospotamos, Thasos passed into the hands of the Lacedacmonians; but it was subsequently again dependent upon Athens, as we see from the disputes between Philip and the Athenians. (Dem. de Halon. p. 80: Philipp. Epist. p. 159.) In the Roman wars in Greece Thasus subinitted to Philip V. (Polyb. xv. 24), but it received its freedon from the Romans afier the battle of Cynoscephidae, в. c. 197 (Pulyb. xviii. 27, 31 ; Liv. xxxiii. 30, 35), and continued to be a free (libera) town in the time of Pliny (iv. 12. s. 23).

The city of Thasos was situated in the northem part of the istand, and perisessed two parts, of which one was cloeed. (Scylax, p. 27 ; 1'wl. iii. 11. § 14.) It stood on three eminences; and several remains of the ancient walls exist, intermixed with towers built by the Venetians, who obtained possession of
the island after the capture of Constantinople by the Turks. In the neighboarhood is a large statue of Pan cut in the rocks. No remsins have been discovered of Aenyra and Coenyra; and the mines have long ceased to be worked.

Archilochus describes Thasos as an "ass's backbone overspread with wild wood " ( . . . \#ठe $\delta$ ' $\boldsymbol{\omega}^{\circ} \sigma \tau^{\prime}$ byou
 17, 18, ed. Schneidewin), a description which is still strikingly applicable to the islaid after the lapse of 2500 years, as it is composed entirely of naked or woody mountains, with only scanty patches of cultivable soil, nearly all of which are close to the sea-shore. (Grote, Hist. of Greece, vol. iv. p. 34.) The highest mountain, called Mount Ipeario, is 3428 feet above the sea, and is thickly covered with fir-trees. There is not enough corn grown in the island for its present population, which consists only of 6000 Greek inhabitants, dispersed in twelve sunall villages. Hence we are surprised to find it called by Dionysius (Perieg. 532) $\Delta \eta \mu \boldsymbol{\eta} \tau \epsilon \rho o s d_{N T h}$; but the praises of its fertility cannot have been written from personal observation, and must have ariven simply from the abundance possessed by its inhabitants in consequence of their wealth. Thasos produced marble and wine, both of which enjoyed considerable reputation in antiquity. (Athen. i. pp. 28, 32, iv. p. 129 ; Xen. Symp. 4. § 41 ; Virg. Georg. ii. 91.) The chief produce of the island at present is oil, maize, honey, and timber; the latter, which is mostly fir, is the principal article of export.

The coins of Thasus are numerous. The one figured below represents on the obverse the head of Dionysus, and on the reverse a figure of Hercules kneeling.
(Prokesch von Osten, Denkwürdigkeiten, vol. iii. p. 611, seq.; Cousinery, Voyage dans la Macodoine, vol. ii. p. 85, seq. ; Griesbach, Reise, vol. i. p. 210 seq.; Journal of Geogr. Sociely, vol. vii. p. 64.)

COLN OF THASOB.
THAUBA'SIUM (Itim. Ans. p. 171; Thanbasteum, Not. /mp.), was a frontier town of Lower Aegypt, situated on the Canopic arm of the Nile, about 8 miles $N$. of Serapeium and the Natron Lakes. In Roman times Thaubasium was the head-quarters of a company of light auxiliary troops "II Ala Ulpin Afrorum." (Orelli, Isecript no. 2552.) It is supposed to be at the molern Cheych-el-Nedy. (Champollion, [Egypte. vol. ii. p. 71.)
[W. B. D.]
THAU'MACI (Өavuaxol: Eth. Өavцaxסs), a town of Phthiotis in Thessaly, was situated on the pass called Coela, on the roud from Thermopylae and the Maliac gulf passing through Lamia. At this place, says Livy, the traveller, after traversing rugged mountains and intricate valleys, comes suddenly in sight of an immense plain like a rast sea, the extremity of which is scarcely visible From the astonishunent which it excited in the traveller, the city was supposed to have derived its name. It atood upon a lofty and precipitons rock. It mas

THAUMACIA.
besieged by Philip in 1. c. 199; but a reinforcement of Aetolians having made their way into the town, the king was obliged to abandon the siege. (Liv. xxxii. 4.) Thaumaci was taken by the consul Acilius in the war with Antiochus, b. c. 191. (Liv. xxxvi. 14 ; comp. Strab. ix. p. 434 ; Steph. B. s. v. ©aunaкia) Dhomokó occupies the site of Thaumaci, and at this place inscriptions are found containing the ancient name. Its situation and pros pect are in exact accordance with the description of Livy, who copied from Polybius, an eye-witness. Dodwell says that "the view from this place is the most wonderful and extensive he ever beheld," and Leake observes that "at the southern end of the town a rocky point, overtopping the other heights, commands a magnificent prospect of the immense plain watered by the Peneius and its branches." (Dodwell, vol. ii. p. 122 ; Leake, Northern Greece, vol. i. p. 458.)

THALMA'ClA (Өavmakla: Eth. Qavuakieús), a town of Magnesia in Thessaly, one of the four cities whose ships in the Trojan War were commanded by Philoctetes. It was said to have been founded by Thaumacus, the son of Poeas. Leake supprsises it to be represented by the palcókastro of Askiti, one of the villages on the Magnesian coast. This Thaumacia must not be confounded with Thaumaci in Phthiotis mentioned above. (Hom. Il. ii. 716; Strab. ix. p. 436; Steph. B. 8. v.; Eustath. ad Hown. p. 329. 6; Plin. iv. 9. s. 16; Leake, Northern Greece, vol. iv. p. 416.)
 a town of Caria, which Alexander placed under the juriodiction of Halicarnassus, is known as the birthplace of Philip, the historian of Caria. (Plin. v. 29: Athen. vi. p. 271 ; Steph. B. s. v.)

THEBAE (日̄̂bau, Herod. i. 182, ii. 42 ; Strab. $x$ vii. pp. 805,815, foll.; Thebe, Plin. v. 9. s. 11), the No (Ezekiel, xxx. 14) or No-ammon (Nahum, vv. 3.8) of the Hebrew Scriptures; at alater period Diospoiss the Great of the Greeks and Romans ( $\Delta$ ، $\sigma \sigma$ modss $\mu \in \gamma d \lambda \eta$, Ptol. iv. 5. § 73 ; Steph. B. s. v.), was one of the most ancient cities of Aegypt, and even, according to Diodorus (i. 50, comp. xv. 45), of the world. Its foundation, like that of Memphis, was attributed to Menes, the first mortal king of Aegypt, i. e. it went back to the mythical period of Aegyptian history. By some writers, however, Memphis was reported to have been a colony of Thebes. It was the capital of the nome formed by the city itself and its environs, though Ptolems (l. c.) describes it as pertaining to the Nome of Coptos. In all Upper Aegypt no spot is so adapted for the site of a great capital as the plain occupied by ancient Thebes. The mountain chains, the Lilyan on the western, and the Arabian on the castern, side of the Nile, sweep boldly from the river, and leave on buth banks a spacious area, whose brealth, including the river, amounts to nearly 4 leagues, and the length from $N$. to S . is nearly as much. Towards the N. the plain is again closed in by the return of the hills to the Nile; but on the S., where the western chain contiuues distant, it remains open. The ground, therefore, on which Thebes stood was large enough to contain a city of at least equal extent with ancient Kome or modern Paris; and, according to Strabo, ancient Thebes covered the entire plain. Only a portion of it, however, was available for population. An inmense area was covered with the temples and their avenues of sphinxes; and on the western side, as far as the Libyan hills, lay the monuments of the dead. On the eastern bank, therefore, the population vol. II.

THEBAE AEGYPTI.
was generally collected; and there it was pribitbly densely crowded, since ancient writers assign to Thebes an alinost incredible number of inhabitants, and Diodorus (i. 45) describes the houses as consisting of many stories. The extent of the city is very differently stated by ancient authors. Kumours of its greathess had reached the Greeks of Homer's age, who (Il. ix. 381) speaks of its "hundred gates" and its 20,000 war-chariots, just as the Arabian story-tellers speak of the glories of Bagdad or Damascus under the Caliphs. Before the Persian invasion (b.c. 525) no Greek writer had visited Thebes; and after that catastrophe its dimensions had considerably shrunk, since Cambyses is said to have burnt all such portions of Thebes as fire would destroy, i. e. all the private buildings; and under the Persian viceroys no Aegyptian city was likely to regain its original proportions. It does not appear that Herodotus ever visited Upper Egypt, and his account of Thebes is extremely vague and meagre. Diodorus, on the contrary, who saw it after its capture by Ptolemy Lathyrus, about в. c. 87 , bebeld Thebes in the second period of its decay, and after Alexandreia had diverted mach of its commerce to Berenice and the Arsinoite bay. He estimates its circuit at 140 stadia or about 17 miles. Strabo, again, who went thither with the expedition of Aelius Gallus in r.c. 24, beheld Thebes at a still lower stage of decadence, and assigns it a compass of about 10 miles. But at that time the continuity of its parts was broken up, and it was divided into certain large hamlets ( $\kappa \omega \mu \boldsymbol{\eta} \delta_{o \nu}$ ) detached from one another. Neither of these writers, accordingly, was in a position to state accurately the real dimensions of the city in its flourishing estate, i. e. between 1600 and 800 в.c. Modern travellers, again, have still further reduced its extent; for example, Sir Gardner Wilkinson supposes the area of Thebes not to have exceeded 5 $\frac{1}{2}$ English miles. As, however, during the space of 2600 sears ( 800 в.c. -1800 A.D.) there have been very material changes in the soil from the contraction of the habitable ground, partly by the depositions of the Nile, and partly by the drifting of the sands, it is scarcely possible for modern travellers to determine how far Aegyptian labour and art may once have extended their capital. An author quoted by Stephanus of Byzantiuin, probably Hecataeus, runs into the opposite extreme, and ascribes to Thebes a population $(7,000,000)$ hardly possible for the entire Nilevalley, and an extent ( 400 stadia, or 50 miles) larger than the Theban plain itself. (Steph. B. s. $\boldsymbol{v}$. $\Delta i \delta \sigma \pi 0 \lambda i s$.) The name of Thebes is formed from the Tápé of the ancient Aegyptian language, pronounced Thaba in the Memphitic dialect of Coptic, and thence easily converted into $\Theta \hat{\eta} 5 a$, , Thetee, or Thebes. In hieroglyphics it is written AP or A1Pe, with the feminine article, t-are, the meaning of which is said to be "head," Thebes being the "head" or capital of the Upper Kingdom. Its later appellation of Diospolis Magua ( $\Delta i d \sigma \pi 0 \lambda i s ~ \dot{\eta} \mu \epsilon \gamma \dot{\alpha} \lambda \eta$ ) answers also to the Aegyptian title Amunei or "abrde of Amun,"-Ammon or Zeus, the ram-headed god being the principal object of worship at Thebes. The name Tape or Thebes applied to the entire city on either bank of the Nile; but the western quarter had the distinctive name of Pathyris, or, according to Ptolemy (iv. 5. § 69), Tathyris, as being under the special protection of Athor, who is sometimes called the President of the West. The necropolis, indeed, on the Libyan side was appropriately placed under

## THEBAE AEGYPTI.

the guardianship of this deity, since she was believed to receive the sun in her arms as he sank behind the roestern hills. This quarter, again, in the age of the Ptolemies, was termed "the Libyan suburb," which was subdivided also into particular districts, such as the Memnoneia ( $\tau \mathbf{d}$ Mepvovecd, Young, Hieroglyph. Literature, pp. 69, 73) and Thynabunum, where the priests of Osiris were interred. (Wilkinson, Anc. Egyptians, vol. v. p. 387.)

The power and prosperity of Thebes arose from three sources - trade, manufactures, and religion. Its position on the Nile, near the great avenues through the Arabian hills to the Red Sea, and to the interior of Libya through the western desert, rendering it a common entrepôt for the Indian trade on the one side, and the caravan trade with the gold, ivory, and aromatic districts on the other, and its comparative vicinity to the mines which intersect the limestone borders of the Red Sea, combined to make Thebes the greatest emporium in Eastern Africa, until Alexandreia turned the stream of commerce into another channel. It was also celebrated for its linen manufacture-an important fabric in a country where a numerous priesthood was interdicted from the use of woollen garments (Plin. ix. 1. s. 4). The glass, pottery, and intaglios of Thebes were also in high repute, and generally the number and magnitude of its edifices, sacred and secular, must have attracted to the city a multitude of artisans, who were employed in constructing, decorating, or repairing them. The priests alone and their attendants doubtless constituted an enormous population, for, as regarded Aegypt, and for centuries Aethiopia also, Thebes stood in the reiation occupied by Rome in medieval Christendom, - it was the sacerdotal capital of all who worshipped Ammon from Pelusium to Axume, and from the Oases of Libya to the Red Sea.

The history of Thebes is not entirely the same with that of Aegypt itself, since the predominance of the Upper Kingdom implies a very different era in Aegyptian anuals from that of the lower, or the Delta. It may perhaps be divided into three epochs: 1. The period which preceded the occupation of Lower Aegypt by the Assyrian nomades, when it is doubtful whether Memphis or Thebes were the capital of the entire country, or whether indeed both the Thebaid and the Delta were not divided into several smaller states, such as that of Heliopolis in the N., and Abydus in the S., the rivals respectively of Memphis and Thebes. 2. The interval between the expulsion of the Assyrians by Thoutmosis, and the 21 st dynasty of Tanite kings. During all this perind, Thebes was unquestionably the capital of all the Nile-valley, from the Mediterranean to the island of Argo in lat. $13^{\circ} 31^{\prime} \mathrm{N} .3$. The period of decadence, when the government of Aegypt was centered in the Delta, and Thelies was probably little more than the head-quarters of the sacerdotal caste and the principal refuge of old Aegyptian life and manners. And this threefold division is rendered the more probable by the consideration that, until the Assyrian empire became formidable, and Phoenicia important from its maritime power, Aethiopia, rather than Arabia or Syria, was the formidable neighbour of Aegypt.

Under the Old Monarchy there is no trace of Aegyptian dominion extending beyond the peninsula of Sinai, the northern shores of the Red Sea. or the Libyan tribes adjoining the Delta. During this periud invasion was apprehended almost exclusively
from the $S$. The Aethiopians were no less warlike, and perhaps as civilised, as the Aegyptians: the Nile afforded them direct ingress to the regions north of the Cataracts, and they were then, as the Syrians and north-eastern states became afterwards, the immediate objects of war, treaties, or intermarriages with the Pharaohs of Thebes. When the Theban state was powerful enough to expel the Assyrian nomades, it must have already secured the alliance or the subjection of Aethiopia; and the attention of its rulers was thenceforward directed to the eastern frontier of the Lower Kingdom. Accordingly we find that while only one nome in the Thebaid and one in Middle Acgypt were assigned to the native militia, the bulk of the Calasirians and Hermobytians was permanently quartered in the Delta.

The greatness of Thebes commences with the 18th dynasty of the Pharanhs, and the immediate cause of it appears to have been the collective efforts of the Upper Country to expel the Assyrian shepherds from the Delta. The Thebsid and its capital were, probably, at no period occupied by these invaders; since, according to Manetho's account of the 17 th dynasty, there were then two contemporaneous kingdoms in Aegypt - the Delta governed by the Hyksos, and the Thebaid by native monarchs. Thoutmosis, king of Thebes, was the principal agent in the expulsion of the intruders, and his exploits against them are commemorated on the temples at Karnak. Memphis and the Delta, together with the lesser states, such as Xois, delivered from the invaders, thenceforward were under the dominion of the kings of Thebes. Its flourishing ern lasted nearly eight centuries, i. e. from about 1 gyo to $800 \mathrm{~B} . \mathrm{c}$.

During this period the most conspicuous monarchs were Amenophis I., who appears, from the monnments, to have received divine honours after his decease, and to have been regarded as the second founder of the monarchy. He probably carried his arins beyond the north-eastern frontier of the Delta into Syria, and his presence in Aethinpia is recorded in a grotto at Ibrim near Aboosimbel. The victories or conquests of Amenophis in the N . and S . are inferred from the circumstance that in the sculptures he is represented as destroying or leading captive Asiatic and Aethiopian tribes. Next in succession is Thothmes I., with whose reign appears to have begun the series of Theban editices which excited the wonder of the Greeks, who beheld them almost in their original magnificence, and of all subsequent travellers. The foundations, at least, of the palace of the kings were laid by this monarch. Thothmes also, like his predecessors, appears, from the monuments, to have made war with Assyria, and to have extended his dominion as bigh ap the Nile as the island of Argo in upper Nubia. Thothmes II. maintained or even enlarged the realm which be inherited, since his name has been found at Gebel-elBirkel, the Napata of the Romans, lat. $18^{\circ} 30^{\prime} \mathrm{N}$. At this period Aethiopia was apparently an appanage of the Theban kingdom, and its rulers or viceroys seem to have been of the blood royal of Aegypt, since now for the first time, and until the reign of Setei Menephthah (Rosellini, Mon. Reg.tab. xxxi.-iv.), we meet with the title of the royal son or prince of Aethiopia. The records of this reign have nearly perished; the great obelisks of Karnak, however, attest the flourishing condition of contemporary art They were erected by Nemt Amen, the sister of Thuthmes II., who appears, like the Nitocris of the

Old Monarchy, to have exercised the functions of royalty. The reign of Thothmes III. is one of the most splendid in the annals of the 18th dynasty. The frontiers of Aegypt extended S. a little bevond the second cataract, and E. nearly to Mount Sinai. Thothmes III. completed in Thebes itself many of the structures begun by his predecessors, e. g. the palace of the kings, - and generally enriched the cities of the Thebaid with sumptuous buildings. He commenced the temple at Amada, which was completed by Amunoph II. and Thothmes IV; and his name was inscribed on the monaments of Ombi, Apollinopolis Magna, and Eilithya. Thebes, however, was the centre of his architectural labours, and even the ruins of his great works there have served to adorn other capital cities. In the Hippodrome of Constantinople is a mutilated obelisk of the reign of Thothmes III., which was brought from Aegypt by one of the Byzantine emperors, and which originally adorned the central court of Karnak. Again the obelisk which Pope Sixtus V. set up in front of the charch of St. John Lateran at Rome, the loftiest and must perfect structure of its kind, was first raised in this reign, and bears its founder's titles on the central column of its hieroglyphics. The records of this reign are inscribed on two interesting monuments, - a painting in a tomb at Gourneh (Hoskins, Travels in Acthiopia, p. 437, foll.; Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 234), and the great Tablet of Karnak; which is strictly an historical and statistical document, and which, there can be little doubt, is the very Tablet which the priests of Thebes exhibited and expounded to Caesar Germanicus in A. D. 16 (Tac. Ann. ii. 60). From the paintings and the hieroglyphics, so far as the latter have been read, on these monuments, it appears that in this reign tribute was paid into the Theban treasury by nations dwelling on the borders of the Caspian sea, on the banks of the Tigris, in the kinglom of Meroe or Aethiopia, and by the more sarage tribes who wandered over the eastern flank of the great Sahara. Thirteen expeditions, indeed, of Thuthmes 1II., are distinctly registered, and the 35th year of his reign, according to Lepsius, is recorded. At this period the kingdon of Thebes mast have been the most powerful and opulent in the world. Of the son of Thothmes, Amunophis II., little is known; but he also added to the erections at Thebes, and reared other monuments in Nabia. Inscriptions found at Surabit-el-Kaalim, in the peninsula of Sinai, record his name, and at Primis (Ibrim) he appears in a speos, or excavated chapel, seated with two principal officers, and receiving the account of a great chase of wild beasts.

Next in importance, though not in succession, of the Theban kings of the 18th dynasty, is Amunoph, or Amenophis III. His name is found at Toumbos, near the third Cataract, and he permanently extended the froutiers of the Theban kingdom to Soleb, a degree further to S. than it had hitherto reached. These extensions are not only geographically, but commercialiy, important, inasmuch as the farther southward the boundaries extended. the nearer did the Aegyptians approach to the regions which produced gold, ivory, gems, and aromatics, and the more considerable, therefore, was the trade of Thebes itself. Only on the supposition that it was for many generations one of the greatest amporiums in the world can we understand the lavish exuenditure of its monarchs, and its fame among northern nations as the greatest and richest of cities.

And this consideration is the more important towards a correct estimate of the resources of the Theban kingdom, since its proper territory barely sufficed for the support of its dense prpulation, and there is no evidence of its having any remarkable traffic by sea. It is probable, indeed, that the dominions of Amenophis III. stretched to within five days' journey of Axnme on the Red Sea; for a scarabaeus inscribed with his name and that of his wife Taia mentions the land of Karoei or Kaloei, supposed to be Coloe (Rosellini, Mon. Stor. iii. 1, 261 ; Birch, Gall. Brit. Jus. p. 83). as their sonthern linit. Thebes was enriched by this monarch with two vast palaces, one on the eastern, the other on the western bank of the Nile. He also commenced and erected the greater portion of the buildings at Luxor. On the walls of their chambers Amenophis was designated "The vanquisher of the Mennahoun," an unknown people, and the " Pacificator of Aegypt." From the fragment of a monolithal granite statue now in the Lourre, it may be inferred that his victories were obtained over negro races, and consequently were the results of campaigns in the interior of Libya and the S. of Aethiopia. Amenophis has a further claim to notice, since he was probably the Meminon, son of Aurora, whom Achilles slew at the siege of Troy. Of all the Aethiopian works the Memnonian statues, from their real magnitude and from the fabulous stories related of them, have attracted the largest share of attention. By the word Memnon the Greeks understood an Aethiopian or man of dark complexion (Steph. B. s. v.; Agathem. ap. Gr. Geograph. Min.), or rather. perhaps, a darkcomplexioned warrior (comp. Eustath. ad Il. v. 639); and the term may very properly have been applied to the conqueror of the southern land, who was also hereditary prince of Aethiopia. The statues of Memnon, which now stand alone on the plain of Thebes, originally may have been the figures at the entrance of the long dromos of crio-sphinxes which led up to the Amenopheion or palace of Amenophis. Of the eastern and northern limits of the Theban kingdom under the third Amenophis, we have no evidence similar to that afforded by the tablet of Karnak; yet from the monuments of his battles we may infer that he levied tribute from the Arabians on the Ked Sea and in the peninsula of Sinai, and at one time pushed his conquests as far as Mesopotamia. According to Manetho he reigned 31 years: his tomb is the most ancient of the sepulchres in the Bab-el-Melook; and even so late as the Ptolemaic age he had divine honours puid him by a special priest-college called "The pastophori of Amenophis in the Memnoneia." (Kenrick, Ancient Aegypk, vol. ii. p. 246.)

Setei Menephthah is the next monarch of the 18th dynasty who, in connection with Thebes, deserves mention. Besides the temples which he constructed at Amada in Nubis and at Silsilis (Silseleh), he began the great palace called Menephtheion in that city, although he left it to be completed by his successors Rameses II. and III. Frum the paintings and inscriptions on the ruins at Karnak and Luxor it appears that this monarch triumphed over five Asiatic nations as well as over races whose position cannot he ascertained, but whose features and dress puint to the interior of Libya. The tomb and sarcophagus of Setei Mencphthah were discovered by Belzoni in the Bab-el-Melook. (Travels, vol. i. p. 167.) If he be the same with the Sethos of the lists, he reigred 50 or 51 years. We now come to
the name of Rameses II. and III., the latter of whom is the Sesoctris of Herodotus, and who may therefure be regarded as a clearly historical personage. There can be no doubt of the greatness of Thebes under his sceptre. In this, as in many other instances where Aegypt is concerned, the monuments of the country enable us to appronch the truth, while the credulity of the Greek travellers and historians in accepting the narrations of the Aegyptian priests - naturally eager, after their subjection by the Persians, to exalt their earlier condition - only tends to bewilder and mislead. Thus, for example, Diodorus (i. 54) was informed that Sesostris led into the field 600,000 infantry, 24,000 cavalry, and 27,000 chariots; and he appreals to the passage already cited from Homer to show that Thebes sent so many chariots out of its hundred gates. There is no evidence that the Aegyptians then possessed a fleet in the Dediterranean; yet Diodorus numbers among his conquests the Cyclades, and Dicaearchus (Schol. in Apoll. Rhod. iv. 272) Rssigns to him "the greater purt of Eumpe." The monuments, on the contrary, record nothing so incredible of this monarch; although if we may infer the extent of his conquests and the number of his victories from the space occupied on the monuments by their pictorial records, he carried the arms of Aegypt beyond any previous boundaries, and counted among his subjects races as various as those which, nearly 17 centuries later, were ruled by Trajan and the Antonines. The reign of Kameses was of 60 years' duration, that is nearly of equal length with his life, for the first of his victories-that recorded on the propylaea of the temple of Luxor, and much inore fully on those of Aboosimbel -was gained in his fifth year. We must refer to works professedly dealing with Acgyptian annals for his hisotry: here it will be sufficient to observe of Rameses or Sesostris that he added to Thebes the Ramescion, now generally admitted to be the " mosiument of Osymandyas," upon the western bank of the Nile; that he was distinguished from all his predecessors by the extent of his conquests and the wisdom of his laws; and among his subjects for his strength, comeliness, and valour. The very pre-eminence of Rameses III. has, indeed, obscured his authentic history. To bim were ascribed many works of earlier and of later monarchs, - such as the canal of the lharanhs, between the Nile and the lied Sea; the dykes and embankments which rendered the Delta habitable; the great wall, 1500 stadia in length, between Pe lusium and Heliopolis, raised as a barrier against the Syrians and Arabians; a re-partition of the land of Aegypt; the law of hereditary occupation (Aristot. Pol. vii. 10); and foreign conquests, or at least expeditions into Western Asia, which rendered tributary to him even the Colchians and the Bactrians. (Tacit. Ann. ii. 60.)

With the 21 st dynasty appear the traces of a revolution affecting the Upper Kingdom. Tanite and Bubastite Pharaohs are now lords of the Nile-valley: and these are succeeded by an Acthiopian dynasty, marking invasion and occupation of the Thebaid by $a$ foreigner. Perhaps, as Aegypt became mure involved with the athiars of Asia-a result of the conquests of the house of Rumeses-it may have proved expedient to remove the seat of government nearer to the Syrian frontier. The dynasty of Sethos, the Aethiopian, bowever, indicates a revolt of the provinces S . of the cataracts; and even after the Aethiopians had withdrawn, the Lower Kingdom re-

THEBAE AEGYPTI.
tained its pre-eminence. The Saite lharachs feared or despised the native militia, and surrounded themselves with foreign mercenaries. Greek colonies were established in the Delta; and Aegypt maintained a theet an innovation extremely prejudicial to Thebes, since it implied that the old isclation of the land was at an end, and that the seat of power was on the Syrian, and not on the Aethiopian frontier. The stages of its decline cannot be traced; but Thebes seems to have offered no oppasition, nfter the fall of Memphis, to the Perians, and certainly, after its occupation by Cambyses, never resumed its place as a metropolitan city. That Thebes was partially restored after the destruction of at least its secular buildings by the Persians, admits of no doubt, since it was strung enoush in B.c. 86 to hold out against the forces of Ptolemy Lathyrus. But although the circuit of its walls may have been undiminished, it seems never again to have been filled ns before with a dense population. The foundation of Alexandreia was more fatal to Thebes than even the violence of Cambyses; and its rebellion against the Macedonians was purhaps prompted by jealousy of Greek commerce and religion. The hand of Lathyrus lay heavy on Thebes; and from this epach probably dates the second stage of its decline. From the glimpses we gain of it through the writings of the Greeks and Komans, it appears to have remained the head-quarters of the sacerdotal order and of old Aegyptian life and manners. As a Macedonian or Roman prefecture, it took little or no part in the affairs of Aerypt ; yet it profited by the general peace of the worlid under the Caesars, and employed its wealth or latour in the repair or dreo ration of its monuments. The names of Alexander and some of the Ptolemies, of the Cacsars from Tiberius to the Antonines, are inscribed on its monuments; and even in the fourth century A. D. it was of sufficient importance to attract the notice of historians and travellers. Perhaps its final ruin was owing as much to the fanaticism of the Christians of the Thebaid, who saw in its sculptures only the abominations of idol-worship, as to its uecupation by the Blemmyes and other barbarians from Nubia and Arabia. When the Saracens, who also were iculloclasts, broke forth from Arabia, Thebes endured its final desolation, and for many centuries its name ahnost disappears: nor can its monuments be said to have gencrally attracted the notice of furopeans, until the French expedition to Aegypt once again disclosed its monuments. From that peinod, and enpecially since the labours of Belzoni, no ancient city has been more frequently visited or described.

The growth of Thebes and the additions made to it by successive monarchs or dynasties have been partly traced in the fureguing sketch of its political history. A few only of its principal remains can here be noticed, since the ruins of this city for:n the subject of many works, and even the most condensed account of them would alinost demand a volume for itself. Ancient Thebes, as has already been observed, occupied both the eastern and western banks of the Nile; and four villages, two, on each side of the river, now occupy a portion of its original area Of these villages two, Luxor and Karnuk, are on the eantern bank, and two, Gournch and Medinet-Alwo, on the western. There is some difference in the character and purpose of the structures in the opposite quarters of the city. Those on the western bunk formed part of its vast necropolis; and here are found the rock-hewn painted tombs, 一" the tombs
of the kings,"-whose sculptures so copiously illustrate the bistory, the arts, and the social life of Aegypt. On this side there are also the remains of temples, palaces, and halls of assembly or judicature, with their rast enclosure of walls and their long avenues of sphinxes. But the western quarter of Thebes was reserved prircipally for the dead, and for the service of relicion and the state, while the mass of the population was contained in the eastern. Yet the numbers who inhabited the western side of the city must have been considerable, since each temple had its own establishment of priests, and each palace or public edifice its proper officers and servants. Still we shall probably be correct in describing the eastern quarter as the civil, and the western as the royal and ecclesiastical, portion of Thebes. At present no obelisks have been discovered in the westem quarter, but, with this exception, the monuments of Gourneh and Meclinet-Aboo yield little in grandeur, beauty, or interest to those of Lucor and Karnak, and in one respect indeed are the more important of the two, since they affurd the best existing specimens of Aegyptian colossal or portrait statues.

Beginning then with the western quarter,-the Memnoneia of the Ptolemaic times, - we find at the northern limit of the plain, about three quarters of a mile from the river, the remains of a building to which Champolion has given the name of Menephtheion, because the name of Setei-Menephthah is inscribed upon its walls. It appears to have been both a temple and a palace, and was approached by a dromos of 128 feet in length. Its pillars belong to the oldest style of Aeryptian architecture, and its bas-reliefs are singularly tine.

The next remarkable ruin is the Memnoneinm of Strato (xvii. p. 723), the tomb of Osymandyas of Diodorus, now commonly called the Rameseion on the authority of its sculptures. The situation, the extent, and the beauty of this relic of Thebes are all equally striking. It occupies the first base of the hills, as they rise from the plain; and befure the allovial soil had encroached on the lower ground, it must have been even a more conspicuous object from the city than it now appears. The inequalities of the ground on which it was erected were overcome by fliphts of steps from one court to another, and the Kameseion actually stood on a succession of natural terraces improved by art. The main entrance from the city is flanked by two pyramidal towers: the first court is open to the sky, surrounded by a double colonnade, and 140 feet in length and 18 in breadth. On the left of the staircase that ascends to the second court still stands the pedestal of the statue of Rameses, the largest, according to Diodorus (i. 49), of the colossi of Aegypt. From the dimensions of its foot, parts of which still remain, it is calculated that this statue was 54 feet in beight and 22 feet 4 inches in breadth across the shoulders. The court is strewn with its fragments. How it was erected, or how overthrown in a land not liable to earthquakes, are alike subjects of wonder; since, without mechanical aids wholly bejond the reach of barbarians, it must have been almost as difficult to cast it down from its pedestal as to transport it originally from the quarries. The walls of the second court are covered with sculptares representing the wars of Rameses III., a continuation and complement of the historical groups upon the interior walls of the pylon. Diudurus (i. 47) speaks of " nonolithal figures, 16 cubits
high, supplying the place of columns," and these are probably the pillars of this second court. He also mentions the attack of a city surrounded by a river; and this group of sculpture, still extant, identifies the Memnoneium with the monument of Osymandyas. A third flight of stairs conducts from the court to a hall, which, according to Champollion was used for public assemblies. A sitting statue of Rameses flauked each side of the steps, and the head of one of them, now called the young Memnon adons the British Museum. The columns and walls of the court are covered with sculptures partly of a religious, partly of a civil character, representing the homage of the 23 sons of Rameses to their parent and his offerings to the gods. Nine smaller apartments succeed to the hall. One of these was doubtless the library or "Dispensary of the Mind" ( $\psi v \chi \hat{\eta} s$ latpeiov) of which Diodorus (i. 49) speaks, since in it are found sculptures of Thoth, the inventor of letters, and his companion Saf, the " lady of letters " and " President of the Hall of Books." This chamber had also at one time an astronomical ceiling adorned with the figures or symbols of the Aegyptian months; but it was carried off by the Persians, and the Greek travellers, Diodorus, Hecataeus \&c., knew of it only from bearsay. Of the nine original chambers, two only remain, the one just described, and a second, in which Rameses is depicted sacrificing to various divinities of the Theban lantheon. Beneath the upper portion of the Memnoneium rock-sepulchres and brick graves have been discovered, both coeval with the Rameseian dynasty (Lepsius, Kev. Arch. Jan. 1845). The entire area of the Memnoneium was enclosed by a brick wall, in the double arches of which are occasionally imbedded frayments of still more ancient structures, the remaius probably of the Thebes which the 18th dynasty of the Pharaohs enlarged and adorned. A dromos NW. of the Memnoneium, formed of not less than 200 sphinxes, and at least 1600 feet in length, led to a very ancient temple in a recess of the Libyan hills. This was probably a place of strength before the lowlands on each side of the Nile were artificially converted by drainage and masonry into the solid area upon which Thebes was built.

The next object which meets the traveller's eye is a mound of rubbish, the fragments of a building once occupying the ground. It is called by the Arabs Koum-el-Hattam, or mountain of sandstone, and is composed of the ruins of the Amenopheion, the palace or temple of Amanoph III.-the Memnon of the Greeks. About a quarter of a mile distant from the Amenopheion, and nearer to the Nile, are the two colossal statues called Tama and Chama by the natives, standing isolated on the plain and eminent above it. The most northerly of these statues is the celebrated vocal Memnon. Their present isolation, however, is probably accidental, and arises from the subsidence or destruction of an intermediate dromos, of which they formed the portals, and which led to the Amenopheion. These statues have already been described in the Dictionary of Biography, s. v. Memnon [Vol. II. p. 1028.] It may be added here that the present height of these colossal figures, inclusive of the pedestal, is 60 feet. The alluvial soil, however, rises to nearly one haif of the pedestal, and as there is an inscription of the age of Antoninus lius, A. D. 139, foll., i. e. about 1720 years old, we ubtain some measure of the amount of deposition in so many centuries. The blocks from which
the statues are formed are composed of a coarse, hard breccia, intermixed with agatised pebbles. (Russegger, Reisen, vol. ii. pt. 1. p. 410.) The village of Medinet-Aboo stands about one third of a mile SW. of Koum-el-Hattam, upon a lofty mound formed by the ruins of the most splendid structure in western Thebes. It consisted of two portions, a temple and a palace, connected with each other by a pylon and a dromos. The temple was the work of successive monarchs of the name of Thothmes, and hence has received the name of the Thothmeseion. Apparently this site found favour with the sovereigns of Aegypt in all ages, since, either on the main building or on its numerous outworks, which extend towards the river, are inscribed the names of Tirhakah the Aethiopian, of Nectanebus, the last independent king of Aegypt, of Ptolemy Soter II., and of Antoninus Pius. The original Thothmeseion comprises merely a sanctuary surrounded by galleries and eight chambers; the additions to it represent the different periods of its patrons and architects. The palace of Ramese-the southern Rameseion of Champollion-far exceeds in dimensions and the splendour of its decorations the Thothmesioion. It stands a little $\mathbf{S}$. of the temple, nearer the foot of the hills. The dromos which connects them is 265 feet in length. The sculptures on the pylon relate to the coronation of Rameses IV. and his victories over the Aethiopians. A portion of the southern Rameseion seems to have been appropriated to the private uses of the king. The mural decorations of this portion are of singular interest, inasmuch as they represent Rameses in his hours of privacy and recreation.

The walls of the southern Rameseion generally are covered both on the inside and the out with representations of battles, sacrifices, religious processions and ceremonies, relating to the 18th dynasty. A plain succeeds, bounded by sand-hills and heaps of Nile-mud. It is variously described by modern travellers as the site of a race-course, of a camp or barrack, or an artificial lake, over which, according to Sir Gardner Wilkinson, the dead were ferried to the neighbouring necropolis. Whatever may have been its purpose, this plain is of considerable extent, being somewhat less than a mile and half in length, and more than half a mile in breadth.

The contrast between the portion of Thebes once crowded with the living, and that which was equally thronged with the dead, is less striking now, when the whule city is a desert or occupied only by a few straggling villages. But ander the Plaraohs the vicinity of life and death must have been most soJemin and expressive. From Gourneh to MedinetAboo the Libyan hills, along a curve of nearly 5 miles, are honey-combed with sepulchres, and conspicuous among thein ure the Tombs of the Kings, situated in the valley of Bab-el-Melork. The Theban necropolis is excavated in the native calcarcous mock. The meaner dead were interred in the lower ground, where the limestone is of a softer grain, and more exposised to decomposition by wind and water. This purtion of the cemetery has, accordingly, fallen into decay. But the upper and harder strata of the hills are of finer and more durable texture, and here the priest-cante and nobles were interred. The tombs of the lower orders are generally without sculpture, but filled with mummies of animals arcounted sacred by the Aegyptians. A favourite companiun in death appears to have been

## THEBAE AEGYPTI.

the ape; and such numbers of this animal have bern found in one portion of the necropolis that the valley containing their mummies bears the name of the "Apes' Burial Place." Upon the graves of the upper classes painting and sculpture were lavished in a measure hardly inferior to that which marks the sepulchres of the kings. The entire rock is tunnelled by them, and by the galleries and staircases which led to the various chambers. The entrances to these tombs are rectangular, and open into passages which either pierce the rock in straight lines, or wind through it by ascending and desceuding shafts. Where the limestone is of a crumbling nature, it was supported by brick arches, and drains were provided for carrying off standing or casual water. The walls of these passages and chambers were carefully prepared for the artist. Rough or carious portions were cut out, and their place filled up with bricks and plaster. Their entire surface was then covered with stucco, on which the paintings were designed and highly coloured. The decorations are rarely in relief, but either drawn on the flat surface, or cut into the stucco. They are mostly framed in squares of chequer and arabesque work. The subjects portrayed within these frames or niches are very various.-ranging through religious ceremonies and the incidents of public or private life. The or naments of these tombs may indeed be termed the miniature painting of the Aegyptians. Within a space of between 40 and 50 feet no less than 1200 hieroglyphics are often traced, and finished with a minute delicacy unsurpassed even in buildings above ground, which were meant for the eyes of the living.

The Royal Sepulchres, bowever, form the moxt striking feature of the Theban necropolis. They stand in a lonely and barren valley, seemingly a natural chasm in the limestone, and resembling in its perpendicular sides and oblong shape a sarcophagus. At the lower end of this basin an entrance has been cut-there seems to be no natural mode of ingresein the rock. Forty-seven tombs were, at one time, known to the ancients. (Diodor. i. 46.) Of these twenty or twenty-one have been counted by modern explorers. Here reposed the Theban Pharaohs from the 18th to the 21 st dynasty. The only tombs, hitherto discovered, complete are those of Amunoph III., Kameses Meiamun, and Rameses III. To prepare a grave seems to have been one of the duties or pleasures of Aegyptian royalty; and since the longest survivor of these monarchs rests in the most sumptuous tomb, it may be inferred that the majority of them died betore they had completed their last habitation.

The queens of Aegypt were buried apart from the kings, in a spot alout three-fourthy of a mile NW. of the temple of Medinet-Aboo. Each of them bears the title of "Wife of Amun," indicating either that their consorts combined with their proper names that also of the great Theban deity, or that, after death, they were dignified by apotheosis. Twenty-four tombs have at present been discovered in this cemetery, twelve of which are ascertained to be those of the queens. The least injured of them by time or violence bears the name of Tais, wife of Amunoph III.

On the eastern bank of the Nile, the monnments are even more magnificent. The villages of Luxor and Karnak occupy a small portion only of the true Dioupolis. The ruins at Luxor stand close to the river. The ancient landing place was a jetty of stone, which
also served to break the current of the stream. The most remarkable monuments are two obelisks of Rameses III., respectively 70 and 60 feet high, one of which still remains there, while the other has been removed to the Place de la Concorde at Paris. Their unequal height was partially concealed from the spectator by the lower obelisk being placed upon the higher pedestal. Behind them were two monolithal statues of that monarch, in red Syenite granite. These are now covered from the breast downwards with rubbish and flurial deposit, but were, originally, inclading their chairs or bases, 39 feet high. Next succeeds a court, surrounded by a corridor of donble columns, 190 feet long and 170 broad. It is entered through a portal 51 feet in height, whose pyramidal wings are inscribed with the battles of Rameses. On the opposite side of the court a second portal, erected by Amunoph III., opens upon a colonnade which leads to a smaller court, and this again terminates with a portico composed of four rows of columns, eight in each row. Beyond the third portico follows a considerable number of apartments, flanking a sanctuary on the walls of which are represented the birth of Amunoph, and his presentation to Amun.

A dromos of andro-sphinxes, and various build. ings now covered with sand and dried mud, formerly connected the quarter of eastern Thebes, represented by Luxor, with that represented by Karnak. Near to the latter place a portion of the dromos still exists, and a little to the right of it a second dromos of crio-sphinxes branches off, which must have been one of the most remarkable structures in the city. It led up to the palace of the kings, and consisted of a double row of statues, sixty or seventy in number, each 11 feet distant from the next, and each having a lion's body and a ram's head. The SW. entrance of the palace is a lofty portal, followed by four spacious courts with intervening gateways.

The grandeur of the palace is, in some degree, lessened by later additions to its plan, for on the right side of the great court was a cluster of small chambers, while on its left were only two apartments. Their object is unknown, but they probably served as lodgings or offices for the royal attendants. In the first of the two main courts stand two obelisks of Thothmes I., one in fraginents, the other still erect and uninjured. In a second court to the right of the first, there were two obelisks also : the one which remains is 92 feet high. The oldest portion of the palace of Karnak appears to be a few chambers, and some polygonal columns bearing the shield of Sesortasen I. To these-the nucleus of the later structures-Thothmes III. made considerable additions; among them a chamber whose sculptures compose the great Karnak Tablet, 80 im portant a document for Aegyptian chronology.

But the Great Court is surpassed in magnificence by the Great Hall. This is 80 teet in height, and 329 feet long by 179 broad. The roof is supported by 134 columns, 12 in the centre and 122 in the aisles. The central columns are each 66 feet high, clear of their pedestals, and each 11 feet in diameter. The pedestals were 10 feet high, and the abacus crer their capitals, on which rested the architraves of the ceiling, was 4 feet in depth. The columns were each about 27 feet apart from one another. The aisle-columns stood in 7 rows, were each 41 feet high, and 9 feet in girth. Light and air were admitted into the building through apertures in the side walls. The fonnder of the palace was Setei-Menephthah, of the 18 th dynasty ; but one reign
cannot have sufficed for building so gigantic a court, and we know indeed not only that many of the historical bas-reliefs which cover the walls were contributed by his son Rameses II., but also that the latter adiled to the Great Hall, on its NW. side, a vast hypethral court, 275 feet in breadth, by 329 in length. This, like the hall, had a double row of columns down its centre, and a covered corridor round its sides. Four gateways opening to the four quarters gave admission into this court: and to the principal one which fronted the Nile an avenue of crio-sphinxes led up, headed by two granite statues of Rameses 11.

The purpose for which these spacious courts and their annexed halls and esplanades were erected was perhaps partly religious, and partly secular. Though the kings of the 18 th and succeeding dynasties had ceased to be chief-priests, they still retained many ceremonial functions, and the sacred calendar of Aegypt abounded in days of periodical meetings for religious objects. At such panegyries the priests alone were a host, and the people were not excluded. From the sculptures also it appears that the Court of Royal Palaces was the place where troops were reviewed, embassies received, captives executed or distributed, and the spoils or honours of victury apportioned. Both temples and palaces also served occasionally for the encampment of soldiers and the administration of justice. The temperature of the Thebaid rendered vast spaces indispensable for the congregation of numbers, and utility as well as pomp may have combined in giving their colossal scale to the structures of the Pharaohs.

In the Great Hall a great number of the columns are still erect. The many which have fallen have been undermined by water loosening the soil below: and they fall the more easily, because the architraves of the roof no longer hold them upright. The most costly materials were employed in some parts of the palace. Cornices of the finest marble were inlaid with ivory mouldings or sheathed with beaten gold.

These were the principal structures of the eastern moiety of Thebes: but other dromoi and gateways stand within the circuit of its walls, and by their sculptures or inscriptions attest that the Macedonian as well as the native rulers extended, renovated, or adorned the capital of the Upper Country. The eastern branch of the dromos which connects Luxor with Kurnak appears from its remains to lave been originally 500 feet in length, and composed of a double row of ram-headed lions 58 in number. The loftiest of Aegyptian portals stands at its SW. extremity. It is 64 feet high, but without the usual pyramidal propyla. It is indeed a work of the Greek era, and was raised by Ptolemy Euergetes I. Rameses IV. and Kameses VIII. added teinples and a dromos to the city. Nor was Thebes without its benefactors even so late as the era of the Roman Caesars. The name of Tiberius was inscribed on one of its temples; and Hadrian, while engaged in his general survey of the Empire, directed some repairs or additions to be made to the temple of ZeusAmmon. That Thebes, as Herodotus and Diodorus saw it, stood upon the site and incorporated the remains of a yet more ancient city, is rendered probable by its sudden expansion under the 18th dynasty of the Phariohs, as well as by extant specimens of its architecture, more in affinity with the monuments $S$. of the cataracts than with the proper Aegyptian style. It seems hardly questionable that

Thebes was indebted for its greatness originally to its being the principal centre of Ammon-worship,-a worship which, on the one hand, connected it with Meroe, and, on the other, with the islands of the Libyan desert. The strength which the Thebaid and its capital thus acquired not only enabled it to rise superior to Abydus in the earlier period, but also to expel the Assyrian invaders from the Delta. It becomes then an interesting question which quarter of Thebes was its cradle? Did it spread itself from the eastern or the western shore of the Nile? Both Diorlorus and Strabo are agreed in placing the "old town," with its Ammonian temple, on the eastern bank of the river; and this site too was the more accessible of the two, whether its population came from the left or, as it is more likely they did, from the right shore. Between Luxor and Karnak lies the claim to be considered as the site of the earliest Diospolis. Now in the former place there is no conspicuous trace of Ammon-worship, whereas the latter, in its ram-headed dromoi, abounds with symbols of it. At Karnak, every monument attests the presence of Ammon. Osiris indeed appears as his son or companion on the sculptures. and in some of the temple-legends they were represented as joint fonnders of the shrine. But Ammon was without doubt the elder of the two. We may accordingly infer that the first Thebes stood nearly on the site of the present Karnak, at a period anterior to all record: that it expanded towards the river, and was separated by the whole breailth of the stream and of the plain to the foot of the Libyan hills from the necropolis. Finally, that as its population became too large for the precincts of the eastern plain, a suburb, which grew into a second city, arose on the opposite bank of the Nile; and thus the original distinction between eastern and western Thebes partially disappeared, and the river, having thenceforward habitations on both its banks, no longer parted by a broad barrier the city of the living from the city of the dead.
(Kenrick, Ancient Aegypt under the Pharaohs, vol. i. pp. 149-178; Heeren, Historical Rescarches, Thebes and its Monuments, vol. ii. pp. 201-342; Champollion, Lettres sur $I$ Egypte; Hamilton, Aeg!ptiaca; Belzoni, Trarels, gc.)

The territory of Thebes was named Thfibais ( $\dot{\eta}$ Onsats, sc. $\chi$ wipa, or oi avw тóno, the Upper Country, Piol. iv. 5. § 62), the modern Sais or Puthrus, and was one of the three principal divisions of Acrypt. Its frontiers to the $S$. varied accordingly as Aegypt or Acthopia preponderated, the Theban Pharohs at times ruling over the region above the Cataracts as far S. as Hiera Sycamina lat. $23^{\circ} 6^{\prime} \mathrm{N}$. ; while, at others, the kiugs of Meroe planted their garrisons $N$. of Syene, and, at one periox, occupied the Thebais itself. But the ordinary limits of Upper Aegypt were Syene to S., lat. $24^{\circ} 5^{\prime}$ N., and Mermopolis Magna to N., lat. $27^{\circ} 45^{\prime}$ N. On the E. it was bounded by the Arabian, on the W. by the Libysn hills and desert. As rain seldom falls in the Thebais (Herod. iii. 10), and as its general surface is rocky or sandy, the breadth of cuitivable land depends on the allurial deposit of the Nile, and this again is regulated by the conformation of the banks on either side. For a similar cause the pupulation of the Thebais was mostly fathered into towns and large villages, both of which are often dignified by ancient writers with the appellation of cities. But numerous cities were incompatible with the physical character of this region,
and its population must have been considerably below the estimate of it by the Greeks and Romans.

The Thebais was divided into ten nomes (Strab. xvii p. 787), and consequently ten halls in the Labyrinth were appropriated to its Nonarchs. But this number apparently varied with the boundaries of Upper Aegypt, since Pliny (v. 9) enumerates eleven, und other writers mention fourteen Nomes. The physical aspect of the Thebais regnires especial notice, since it differed, both geologically and in its Fauna and Flora, from that of Lower Aegypt.

For the mast part it is a narrow valley, intersected by the river and bounded by a double line of hills, lofty and abrupt on the eastem or Arabian side, lower and interrupted by sandy plains and valleys on the Libyan or western. The desert on either side produces a stunted vecetation of shrubs and herbs, which emit a slight aromatic odoar. The cultivable soil is a narrow strip on each side of the Nile, forming, with its bright verdure, a strong contrast to the brown and arid hue of the surrounding district. The entire breadth of this valley, including the river, does not exceed 11 miles, and sometimes is contracted by the rocky banks of the Nile even to two.

Upper Aegypt belongs to Nubia rather than to the Heptanomis or the Delta. Herodotas (iii. 10) was mistaken in his statement that rain never falls in the Thebais. It is, however, of rare occurrence. Showers fall annually during four or five days in each year, and about once in eight or ten years heavy rains fill the torrent-beds of the mountains, and convert the valleys on either side of the Nile into temporary pools. That this was so even in the age of Hecataeus and Herodotus is proved by the circumstance that the lions on the cornices of the Theban temples have tubes in their mouths to let the water off.

But the fertility of the Thebais depends on the overflow of the Nile. From Syene nearly to Latopolis, lat. $25^{\circ} 17^{\prime} \mathrm{N}$. , the cultivable soil is a narrow rim of alluvial deposit, bounded by steep walls of sandstone. On the Arabian shore were the quarries from which the great temples of Upper Aegypt were constructed. At Apollinopolis Magna (Edfu) the sandstone disappears from the W. bank of the river, and on the E. it extends but a little below that city. Four miles below Eilithyn, the limestone region begins, and stretches down nearly to the apex of the Delta, descending on the Libyan side in terraces to the Mediterranean. At this point a greater breadth of land is cultivable, and in the Arabian hills deep gorges open towards the Red Sea, the most considerable of which are the valleys that run from Eilithya in a SE. direction to Bere nice, and from Coptos, past the porphyry quarries, to Cosseir on the lied Sea. The tanks and stations for the caravans which the Theban Pharaohs or the P'tolemies constructed in these valleys are still occesionally found buried in the sand. At Latopolis the Nile-valley is nearly 5 miles wide, but it is again contracted by the rocks at Gebelt in, where, owing to the precipitous character of the banks, the road quits the river and crosses the eastern desert to Hermonthis.

The next material expansion of the Nile-valley is at the plain of Thebes. At this point both chains of hills curve boldly away from the river, and leave an ares of more than 5 miles in length and 3 in breadth. At the northern extremity of this $\mu$ lain the banks again contract, and at Gournek are almost close to the Nile. He-opening again, the
borders of the stream as far as Hermopolis Magna, the northern boundary of the Thebaid, generally extend inland on the E. side about one mile and a half, on the W. about two miles. They do not indeed observe an unbruken line, but the alluvial soil, where the mouths of the collateral valleys permit, occasionally stretches much farther into the country. Canals and dykes in the Pharaonic period admitted and retained the Nile's depowit to an extent unknown either in Grecian, Roman, or modern eras.

Sin from the river the Thebaid in the flourishing periods of Aegypt, presented a wide and animated spectacle of cultivation and industry, wherever the banks admitted of room for cities or villages. Of the acenery of the Nile, its teeming population and multitudinous river-craft, mention has already been made in the article Nilus. Among many others, the fullowing objects were beheld by those who travelled from Syene to Hermopolis. At first the general appearance of the shores is barren and dreary. Koum-Ombos, the ancient Ombi, would first arrest attention by the brilliant colours of its temples, and, at certain seasons of the year, by the festivals held in honour of the crocodile-headed deity sevak. At times also, if we may credit the Koman satirist (Juvenal, Sat. xv.), the shore at Unbi was the scene of blondy frays with the crocodile exterminators from Tentyra. Sixteen miles below Ombi was the seat of the special worship of the Nile, which at this point, owing to the escarped form of its sandstone banks, admits of a narrow road only on either side, and seems to occupy the whole breadth of Aegypt. Here too, and on the eastern bank especially are the rast quarries of stone which supplied the Theban architects with their durable and beautiful materials. Various landing-places from the river gave access to those quarries: the names of successive sovereigns and princes of the xviiith dynasty, their wars and triumphs, are recorded on the rocks; and blocks of stone and monolithal shrines are still visible in their galleries. The temples of Apollinopolis Magna (Eilfu), the hypogaes of Eilithya, Thebes occupying either bank, Coptos, long the seat of Aegyptian commerce with India, the temples of Athor and Isis at Tentyra, the mouth of the ancient branch of the Nile, the canal of Jusuf at Diospolis Parca, the necropolis of Abydos, near which runs the hichroad to the greater Oasis, the linen-works and stone-masons' yards of Chemmis or Panupolis (Eidinin), the sepulchral chambers at Lycupolis, and, Enally, the superb portico of Hermopolis Magna, all evince, within a compass of about 380 miles, the wealth, enterprise, and teeming population of Upper Aegypl.

The regetation of this region announces the approach to the tropics. The productions of the desert, stunted shrubs and trees, resemble those of the Arabian and Libyan wastes. But wherever the Nile fertilises, the trees and plants belong rather to Acthiopia than to the lower country. The sycamore nearly disnppears: the Theban palm and the date-palm take its place. The lotus (Nymphaea Lotus and Nymphaea caerulea) is as abundant in the Thebais as the papyrus in the Delta. It is the symbol of the Upper Land: its blue and white cups enliven the prols and canals, and representations of thein furnished a frequent and graceful ornament to architecture. Its bulb afforded a plentiful and nutritious diet to the poorer classes. The deserts of the Thebais, which in Cliristian times swarmed with monasteries and hernitages, contained the wolf, hyaena, and
jackal: but the larger carnivorons animals of Libya were rarely seen in Aegypt. (Herod. ii. 65.) In the Pharannic times the hippopotamus was found in the Nile below the Cataracts : more recently it has seldom been found N . of them. The crocodile, being an object of worship in several of the Theban nomes, whs doubtless more abundant than it is now. From both papyri and sculptures we ki:ow that the Theban landowners possessed horned cattle and sheep in abundance, although they kept the latter for their wool and milk principally; and the chariots of Thebes attest the breeding and training of horses. From extant drawings on the monuments we know also that horticulture was a farourite occupation in Upper Aegypt.

The population of the Thebais was probably of a purer Aegyptian stamp than that of the Delta; at least its admixtures were derived from Arabia or Meroe rather than from Pboenicia or Greece. Its revolutions, too, proceeded from the south, and it was comparatively unaffected by those of the Lower Country. Even as late as the age of Tiberius, A.D. 14-37, the land was prosperous, as is proved by the extension and restoration of so many of its public monuments; and it was not until the reign of Diocletian that its ruin was consummated by the inroad of the Blemmyes, and other barbarous tribes from Nubia and the Arabian desert. [W. B. D.]

THEBAE ( $\Theta \hat{\eta} 8 a$, , orig. $\Theta \eta \xi \eta$, Dor. Oǹba: Eth. Onbaios, fem. Onbats, Thebanus, fem. Thebais), the chief city in Boeotia, was situated in the southern plain of the country, which is divided from the northern by the ridge of Onchestus. Both these plains are surrounded by mountaius, and contained for a long time two separate confederacies, of which Orchomenus in the north and Thebes in the south were the two leading cities.

## I. History.

No city in Greece possessed such long continued celebrity as Thebes. Athens and Sparta, which were the centres of Grecian political life in the historical period, were poor in mythical renown; while Argos and Mycenae, whose mythical annals are full of glorious recollections, sank into comparative insignificance in historical times, and Mycenae indeed was blotted out of the map of Greece soon after the Persian wars. But in the mythical ages Thebes shone pre-eminent, while in later times she always maintained her place as the third city of Greece; and after the battle of Leuctra was for a short period the ruling city. The most celebrated Grecian legends cluster round Thebes as their centre; and her two sieges, and the fortunes of her royal houses, were the favourite subjects of the tragic muse. It was the native city of the great seer Teiresias and of the great musician Amphion. It was the reputed birthplace of the two deities Dionysus and Hercules, whence Thebes is said by Sophocles to be "the only city where mortal women are the mo-
 ग七єoús, Fragm. ap. Dicaearch, § 17, ed. Müller; Mure, Tour in Grecce, vol. i. p. 253.)

According to the generally received tradition, Thebes was founded by Cadmus, the leader of a Phoenician colony, who called the city Cadmeia (Ka $\delta \mu \epsilon i \alpha$ ), a name which was afterwards confined to the citadel. In the Odyssey, Amphion and Zethus, the two sons of Antiope by Zeus, are represented as the first founders of Thebes and the first
builders of its walls. (Od. xi. 262.) But the logographers placed Amphion and Zethus lower down in the series, as we shall presently see. The legends connected with the foundation of the city by Cadmus are related elsewhere. [Dict. of Biogr. and M/yth. art. Cadmus.] The five Sparti, who were the only surrivors of the warriors sprung from the dragon's teeth, were the reputed ancestors of the noblest families in Thebes, which bore the name of Sparti down to the latest times. It is probable that the name of their families gave origin to the fable of the sowing of the dragon's teeth. It appears certain that the original inhabitants of Thebes were called Cadmeii (Ka $\delta \mu$ eiol, Il. iv. 388, 391, v. 807, x. 288, Od. xi. 276) or Cadmeiones (Ka $\delta \mu$ cícyes, $I l$. iv. $385, ~$ r. 804 , xxiii. 680 ), and that the southeru plain of Boeotia was originally called the Cadmeian land (Ka $\delta \mu \eta$ is $\gamma \hat{\eta}$, Thuc. i. 12). The origin of these Cadmeians has given rise to much dispute among modern scholars. K. O. Mïller considers Cadmus a god of the Tyrrhenian Pelasgians, and maintains that the Cadmeians are the same as the Tyrrbenian Pelasgians; Welcker endeavours to prove that the Cadmeians were a Cretan colony; while other writers adhere to the old traditions that the Cadmeians were Phoenicians who introduced the use of letters into Greece. (Müller, Orchomenos, p. 111, seq., 2nd ed.; Thirlwall, Hist. of Greece, vol. i. p. 111.) It is useless, however, to enter into the discussion of a subject respecting which we possess no materials for arriving at a satisfactory conclusion. It is certain that the Greeks were indebted to the Phoenicians for their alphabet; but whether the Cadmeians were a Phoenician coluny or some other race must be left uncertain.

But we must return to the legendary history of Thebes. Cadmus had one son, Polydorns, and four daughters, Ino, Semele, Autonoë, and Agave, all of whom are celebrated in the mythical annals. The tales respecting them are given in the Dict. of Biogr. and Myth., and it is only necessary to mention here that Ino became the wife of Athamas and the mother of Melicertes ; Semele was beloved by Zeus and became the mother of the god Dionysus; Autoncë was the mother of the celebrated hunter Actaeon, who was torn to pieces by the dogs of Artemis; and Agave was the mother of Pentheus, who, when Cadmus became old, succeeded him as king of Theles, and whose miserable end in attempting to resist the worship of Dionysus forms the subject of the Bacchae of Euripides. After the death of Pentheus, Cadmus retired to the Illyrians, and his son Polydorus became king of Thebes. Polydorus is succeeded by his son Labdacus, who leaves at his death an infant son Laius. The throne is usurped by Lycus, whose brother Nycteus is the father of Antiope, who becomes by Zeus the mother of the twin sons, Amphion and Zethus. Nycteus having died, Antiope is exposed to the persecutions of her uncle Lrans and his cruel wife Dirce, till at length her two sons, Amphion and Zothus, revenge ber wrongs and become kings of Thebes. Ther fortify the city; and Amphion, who had been taught by Hermes, possessed such exquisite skill on the lyre, that the stones, obedient to his strains, moved of their own accord, and formed the wall (" movit Amphion lapides canendo." Hor. Carm. iii. 11). The remainder of the legend of Amphion and Zethus need not be related; and there can be no doubt, as Mr. Grote has remiarked, that the whule stury was originally unconnected with the

Cadmeian family, as it still stands in the Odysser, and has been interwoven by the logographers into the series of the Cadmeian mytbs. In order to reconcile the Homeric account of the bailding of the city by Amphion and \%ethus with the usually received legend of its foundation by Cadmas, it was represented by later writers that, while Cadmus founded the Cadineia, Amphion and Zethus built the lower city ( $\tau \eta \nu \pi \delta \lambda \iota \nu \tau \eta \nu \nu \alpha \sigma^{2} \omega$ ), and gave to the united city the name of Thebes. (Paus. ix. 5. §§ 2, 6.)

After Amphion and Zethus, Laius became king of Thebes; and with him commences the memorablo story of Oedipus and his family, which is too well known to need repetition here. When Oedipus ras expelled from Thebes, after discovering that he had murdered his father Laius and married his mother Jocasta, his two sons Eteocles and Polynices quarrelled for their father's throne. Their disputes led to the two sieges of Thebes by the Argive Adrastus, two of the most memorable events in the legendary history of Greece. They formed the subject of the two epic poems, called the Thebair and the Epigoni, which were considered only inferior to the Iliad and the Odyssey. Polynices, having been driven out of Thebes by Etencles, retires to Argos and obtains the aid of Adrastus, the king of the city, to reinstate him in his rights. Polynices and Adrastus are joined by five other herves, making the confederacy known under the name of the "Seven against Thebes." The names of these seven chiefs were Adrastus, Amphiaräus, Capaneus, Hippomedon, Parthenopaeus, Tydeus, and Polynices; but there are discrepancies in the lists, as we shall notice more fully below: and Aeschylus (Sept. c. Theb. 461) in particular omits Adrastus, and inserts Eteocles in his place. The Seven Chiefs advanced against Thebes, and each attacked one of the celebrated gates of the city. Polynices and Eteocles fell by each other's hands; and in the general engagement which followed the combat of the two brothers, the Argives were defeated, and all their chiefs slain, with the exception of Adrastus, who was saved by the swiftness of his horse Areion, the offspring of Poseidon. A few years afterwards the sons of the Seven Chiefs undertook an expedition against Thebes, to avenge their fathers' fate, hence called the war of the Epigoni or Descendants. This expedition was also led by Adrastus, and consisted of Aegialeus, son of Adrastus, Thersander, son of Polynices, Alcmaeon and Amphilochus, sons of Amphiaräus, Diomedes, son of Tydeas, Sthenelens, son of Capanens, and Promachus, son of Parthenopaeus. The Eligoni gained a victory over the Cadmeians at the river Glisas, and drove them within their walls. Upon the advice of the seer Teiresias, the Cailmeians abandoned the city, and retired to the Illyrians under the guidance of Ladamas, son of Adrastus. (Alpillod. iii. 7. § 4; Herod. v. $57-61$; Paus. ix. 5. § 13 ; Diod. iv. 65, 66.) The Epizoni thus became masters of Thebes, and placed Thersander, son of Polynices, on the Throne. (For a full account of the legends of Thebes, see Grote, Hist. of Greece, vol. i. c. xir.) According to the mythical chronology, the war of the Seven against Thebes took place 20 years before the Trojan expedition and 30 years before the capture of Troy; and the war of the Epigoni was placed 14 years after the first experition sgainst Thebes, and consequently only 4 years befire the deprarture of the Greeks against Trog. (Cliuton, F. H. vol. i. p. 140.)

There is another important event in the mythical times of Thebey, which was not interwoven with the series of the legends already related. This is the birth of Hercules at Thebes, and the important services which he rendered to his native city by his war against Orchomenus. It was stated that the Thebans were compelled to pay tribute to Erginus, king of Orchomenus; but that they were delivered from the tribute by Hercules, who marched against Orchomenus, and greatly reduced its power (Paus. ix. 37. § 2 ; Strab. ix. p. 414 ; Diod. iv. 18). This legend has prohably arisen from the historical fact, that Orchomenus was at one time the most powerful city in Bueotia, and held even Thebes in subjection.

Thebes is frequently mentioned in Homer, who speaks of its celebrated seven gates (IL. iv. 406, Od xi. 263); but its name dues not occur in the catalogue of the Greek cities which fought against Troy, as it was probably supposed not to have recovered from its recent devastation by the Epigori. Later writers, however, related that Thersander, the son of Polynices, accompanied Agamemnon to Troy, and was slain in Mysia by Telephus, before the commencement of the siege; and that upon his death the Thebans chose Peneleos as their leader, in consequence of the tender age of Tisamenus, the son of Therxander. (Paus. ix. 5. §§ 14, 15.) In the lliad (ii. 494) Peneleos is mentioned as one of the leaders of the Boeotians, but is not otherwise connected with Thebes.

According to the chronology of Thucydides, the Cadineians continued in possession of Thebes till 60 years after the Trojan War, when they were driven out of their city and country by the Boeotians, an Aeolian tribe, who migrated from Thessaly. (Thuc. i. 12; Strab. ix. p. 401.) This seems to have been the genuine tradition; but as Homer gives the name of Boeotians to the inhabitants of the country called Buentia in later times, Thucydides endeavours to reconcile the authority of the poet with the other tradition, by the suppasition that a portion of the Aerlic Boeotians had settled in Boeotia previously. and that these were the Bueotians who suiled against Troy. According to other accounts, Thebes was taken by the Thracians and Pelascians during the Trojan War, and its inhabitants driven into exile in Thessaly, whence they returned at a later perived. (Strab. ix. p. 401 ; Diod. xix. 53.)

Pausanias gives us a list of the kings of Thebes, the successors of Tisamenus, till the kingly dignity was abolished and a republic established in its place (ix. 5. § 16). But, with the exception of one event, we know absolutely nothing of Theban history, till the dispute between Thebes and Plataea in the latter end of the sixth centary $\boldsymbol{B}$. c.

The event to which we allude is the legislation of Philolaus, the Corinthian, who was enamoured of Diocles, also a Corinthian, and the victor in the Olympian games, 8. c. 728. Both Philolaus and Diocles left their native city and settled at Thebes, where the former drew up a code of laws for the Thebans, of which one or two particulars are mentioned by Aristotle. (Pol ii. 9. §§ 6, 7.) At the time when Thebes first appears in history, we find it under an oligarchical form of government, and the head of a political confederation of some twelve or fourteen Boeotian cities. The greater cities of Brentia were members of this confederation, and the smaller towns were attached to one or other of these cities in a state of dependence. [Boeotis, p. 415.]

The affairs of the confederation were managed ty certain magistrates or generals, called Boeotarchs, of whom there were eleven at the time of the battle of Delium (в. c. 424). two being elected by Thebes, and one apparently by each of the other members of the confederation (Thuc. iv. 91). But the real authority was vested in the hands of the Thebans, who used the power of the confederation with an almost exclusive view to Theban interests, and kept the other states in virtual sulijection.

The first well-known event in Grecian history is the dispute, already mentioned, between Thebes and Plataea. The Plataeans, discontented with the supremacy of Thebe;, withdrew from the Boeotian confederation, and surrendered their city to the Athenians. This led to a war between the Thebans and Athenians, in which the Thebans were defeated and compelled to cede to the Plataeans the territory S. of the Asopus, which was made the boundary between the two states. (Herid. vi. 108; Thuc. iii. 68.) The interference of Athens upon this occasion was bitterly resented by Thebes, and was the commencement of the long enmity between the two states, which exercised an important influence upon the course of Grecian history. This event is usually placed in B.c. 519, upon the authority of Thucydides (l. c.); but Mr. Grote brings forward strong reasons for believing that it must have taken place after the expulsion of Hippias from Athens in b.c. 510. (Hist of Greece, vol. iv. p. 222.) The hatred which the Thebans felt against the Athenians was probably one of the reasons which induced them to desert the cause of Grecian liberty in the great struggle against the Persian power. But in the Peloponnesian War (B.c. 427) the Theban orator pleaded that their alliance with Persia was not the fault of the nation, but of a few individuals who then exercised despotic power. (Thuc. iii. 62.) At the battle of Plataea, however, the Thebans showed no such relactance, but fought resolutely against the Athenians, who were posted opposite to them. (Herod. ix. 67.) Eleven days atter the battle the rictorious Greeks appeared before Thebes, and compelled the inhabitants to surrender their medising leaders, who were immediately put to death, without any trial or other investigation. (Herid. ix. 87, 88.) Thebes had lost so much credit by the part she had taken in the Persian inrasion, that she was unable to assert her former supremacy over the other Boeotian towns, which were ready to enter into alliance with Athens, and would doultless have established their complete independence. had not Sparta supported the Thebans in maintaining their ascendency in the Boevtian confederation, as the only means of securing the Boeotian cities as the allies of Sparta against Athens. With this view the Spartans assisted the Thebans in strengthening the fortifications of their city, and compelled the Boeotian cities by force of arms to acknowledge the supremacy of Thebes. (Diod. xi. 81; Justin, iii. 6.) In B.c. 457 the Athenians sent an ariny into Boeotia to oppose the Lacedaemonian forces in that country, but they were defeated by the latter near Tanagra. Sixty-two days after this battle (в.c. 456), when the Lacedaemonians had returned home, the Athenians, under the command of Myronides, invaded Boeotia a second time. This time they met with the most signal success. At the battle of Oenophyta they defeated the combined forces of the Thebans and Bueotians, and obtained in consequence possession of Thebes and of
the other Boeotian towns. A democratical form of govermment was established in the different cities, and the oligarchical leaders were driven into exile. (Thuc. i. 108; Diod. xi. 81.) This state of things lasted barely ten years; the democracy established at Thebes was ill-conducted (Arist. Pol. v. 2. § 6); and in B.c. 447 the various Boentian exiles, combining their forces, made themselves masters of Orchomenus, Chaeroneia, and some other places. The Athenians sent an army into Breotia under the command of Tolmides; but this gencral was slain in battle, together with many of his men, while a still larger number were taken prisoners. To recover these prisoners, the Athenians agreed to relinquish their power over Thebes and the other Boeotian cities. The democratical governments were overthrown; the exites were restored; and Thebes again became the bitter enemy of Athens. (Thuc. i. 113, iii. 62, Diud. xii. 6.) The Thebans were indeed more antiAthenian than were the Spartans themselves, and were the first to commence the Peloponnesian War by their attempt to surprise Plataea in the night, s.c. 431. The history of this attempt, and of the subsequent siege and capture of the city, belongs to the history of Plataea. [Plataea.] Throughout the Peloponuesian War the Thebans continued the active and bitter enemies of the Athemians; and upon its close after the battle of Aegospotani they joined the Corinthians in urging the Lacedaemonians to destroy Athens, and sell its population into slavery. (Xen. Hell. ii. 2. § 19.) But soon after this event the feelings of the Thebans towards Athens became materially changed in consequence of their jealonsy of Sparta, who had refused the allies all participation in the spoils of the war, and who now openly aspired to the supremacy of Greece. (Plut. Lys. 27; Justin, vi. 10.) They consequently viewed with hostility the Thirty Tyrants at Athens as the supporters of the Spartan power, and gave a friendly welcome to the Athenian exiles. It was from Thebes that Thrasybulus and the other exiles started upon their enterprise of seizing the Peiraeeus; and they were supported upon this occasion by Ismenias and other Theban citizens. (Xen. Hell. ii. 4. § 2.) So important was the assistance rendered by the Thebans on this occasion that Thasybulus, after his success, showed his gratitude by dedicating in the temple of Hercules colos:al statues of this god and Athena. (1’aus. ix. 11. §6.)

The bostile feelings of Thebes towards Sparta continued to increase, and soon produced the most important results. When Agesilaus was crossing over into Asia in b. c. 397, in order to carry on war against the Persians, the Thebans refused to take any part in the expedition. and they rudely interrupted Agesilaus when he was in the act of offering sacrifices at Aulis, in imitation of Aga-memnon;- an insult which the Spartan king never forgave. (Xen. Hell. iii. 5. § 5; Plut. Ages. 6; Paus. iii. 9. §§ 3-5.) During the absence of Acesilaus in Asia, Tithraustes, the satrap of Asia Minor, sent an envoy to Greece to distribute large sums of money among the leading men in the Grecian cities, in order to persuade them to make war against Sparta. But before a coalition could be formed for this purpose, a separate war broke out between Thebes and Sparta, called by Diodorus (xiv. 81) the Boeotian war. A quarrel having arisen between the Opuntian Locrians and the Plocians respecting a strip of border land, the Thebans exsuused the cause of the furmer and
invaded Phocis. Thereupon the Phocians invoked the aid of the Lacedaemonians, who were delighted to have an opportunity of avenging the affronts they had received from the Thebans. (Xen. //cll. iii. 5. §§ 3-5; Paus. iii. 9. § 9.) The Lacedaeinnnians made active preparations to invade Boentia. Lysander, who had been foremost in promoting the war, was to lay siege to Haliartus, under the walls of which town Pausanias was to join him on a given day with the united Lacedaemonian and Peloponnesian forces. Thus menaced, the Thebans applied for assistance to their ancient enemies, the Athenians, who readily responded to their appeal, though their city was still undefended by walls, and they had no ships to resist the maritime power of Sparta. (Xen. Hell. iii. 5. § 16 ; Dem. de Cor. p. 2.58.) Orchomenus, however, seized the opportunity to revolt from Thebes, and joined Lysander in his attack upon Haliartus. (Xen. Hell. iii. 5. § 17 ; Plut. Lys. 28.) The death of Lysander under the walls of Haliartus, which was followed by the retreat of Pausanias from Boentia, eniboldened the enemies of Sparta: and not only Athens, but Corinth, Argos, and some of the other Grecian states joined Thebes in a league against Sparta. In the following year (B. c. 394) the war was transferred to the territory of Corinth; and so powerful were the confederates that the Lacedaemonians recalled Agesilaus from Asia. In the month of August Agesilaus reached Boeotia on his homeward march, and found the confederate army drawn up in the plain of Coroneia to oppose him. The right wing and centre of his army were victorious, but the Thebans completely defeated the Orchomenians, who formed the left wing. The victorious Thebans now faced about, in order to regain the rest of their army, which had retreated to Mount Helicon. Agresilaus advanced to meet them; and the conflict which ensued was one of the most terrible that had yet taken place in Grecian warfare. The Thebans at length succeeded in forcing their way through, but not without great loss. This was the first time that the Thebans had fought a pitched battle with the Spartans; and the valour which they showed on this occasion was a prelude to the rictories which were scon to overthrow the Spartan supremacy in Greece. (Xen. Hell. iv. 3. §§ 15-21.)

We have dwelt apon these erents somewhat at length in order to explain the rise of the Thebnn power; but the subsequent history must be related more briefly. After the battle of Coroneia the course of events appeared at first to deprive Thebes of the ascendency she had lately acquired. The peace of Antalcidas (b. c. 387), which was concluded under the influence of Sparta, guaranteed the independence of all the Grecian cities; and though the Thebans at first clamed to take the oath, not in their own behalf alone, but for the Boentian confederacy in general, they were compelled by their enemy Agesilaus to swear to the treaty for their own city alone, since otherwise they would have had to contend singlehanded with the whole power of Sparta and her allics. (Xen. Hell. v. 1. §§ 32, 33.) By this nath the Thebans virtually renounced their supremacy over the Boeotian cities; and Aresilaus hastened to exert all the Spartan power for the purpme of weakening Theles. Not only was the independence of the Bocotian cities proclaimed, and a legaloligarchy organised in each city hostile to Thebes and favourable to Sparta, but Lacciaemonian garrisons were
stationed in Orchomenas and The opias for the purpose of overawing Boeotia, and the city of Plataea was rebuilt to serve as an outpost of the Spartan power. (Paus. ix. 1. § 4). A more direct blow was aimed at the independence of Thebes in B. c. 382 by the seizure of the Cadmeia, the citadel of the city, by the Spartan commander, Phoebidas, assisted by Leontiades and a party in Thebes favourable to Sparta. Though Phoebidas appears to have acted under secret orders from the Ephors (Diod. xv. 20; Plut. Agesil 24), such was the indignation excited throughout Greece by this treacherous act in time of peace, that the Ephors found it necessary to disavow Phoebidas and to remove him from his command; but they took care to reap the fruits of his crime by retaining their garrison in the Cadmeia. (Xen. Hell. v. 2. § 25.) Many of the leading citizens at Thebes trok refuge at Athens, and were received with the same kindness which the Athenian exiles experienced at Thebes after the close of the Peloponnesian War. Thehes remained in the hands of the Spartan party for three gears; but in в. c. 379 the Spartan garrison was expelled from the Cadmeia, and the party of Lenntiades overthrown by Pelopidas and the other exiles. The history of these events is too well known to be repeated here. In the following year (в. c. 378) Thebes formed an alliance with Athens, and with the assistance of this state resisted with success the attempts of the Lacedaemonians to reduce them to subjection; but the continued increase of the power of the Thebans, and their destruction of the city of Plataea [Plastara] provoked the jealousy of the Athenians, and finally induced them to conclude a treaty of peace with Sparta, в. c. 371 . This treaty, usually called the peace of Callias from the name of the leading Athenian negotiator, included all the parties in the late war with the exception of the Thebans, who were thus left to contend single-handed with the might of Sparta. It was universally believed that Thebes was doomed to destruction; but only twenty days after the signing of the treaty all Greece was astoanded at the news that a Lacedaemonian army had been utterly defeated, and their king Cleombrotus slain, by the Thebans, under the command of F.paminondas, upon the fatal field of Leuctra (b. c. 371). This battle not only destroyed the prestige of Sparta and gave Thebes the ascendency of Greece, but it stript Sparta of her Peloponnesian allies, over whom she had exercised dominion for centuries, and led to the establishment of two new political powers in the Peloponnesus, which threatened her own independence. These were the Arcadian confederation and the restoration of the state of Messenia, both the work of Epaminondas, who conducted four expelitions into Peloponnesus, and directed the councils of Thebes for the next 10 years. It was to the abilities and genius of this extraordinary man that Thebes owed her position at the head of the Grecian states; and upon his death, at the battle of Mantineia (b. c. 362). she lost the pre-eminence she had enjoyed since the battle of Lenctra. During their supremacy in Greece, the Thebans were of counse undisputed masters of Boeotia, and they availed themselves of their power to wreak their vengeance upon Orchomenus and Thespiae, the two towns which had been the most inimical to their authority, the one in the north and the other in the sonth of Bueotia. The Orchomenians had in B. c. 395 openly joined the Spartans and fought on their side; and the Thespians had withdrawn from the

Theban army just before the battle of Leuctra, when Epanninondas gave Jermission to any Boeotians to retire who were averse to the Theban cause. (Paus. ix. 13. §8.) The Thespians were expelled from their city and Boentia soon after the battle of Leuctra [Thespiae]; and Orchomenus in b. c. 368 was burnt to the ground by the Thebans; the male inhabitants were put to the sword, and all the women and children sold into slavery. [Oвсноments.]

The jealousy which Athens had felt towards Thebes before the peace of Callias had been greatly increased by her subsequent victories; and the two states appear henceforward in their old condition of hostility till they were persuaded by Demosthenes to unite their arms for the purpose of resisting Philip of Macedon. After the battle of Mantineia their first open war was for the possession of Euboea. After the battle of Leuctra this island had passed under the supremacy of Thebes; but, in в.c. 358, discontent having arisen against Thebes in several of the cities of Eubrea, the Thebans sent a powerful force into the island. The discontented cities applied for aid to Athens, which was readily granted, and the Thebans were expelled from Eubuea (Diod. xvi. 7 : Dem. de Cherson. p. 108, de Cor. p. 259, c. Ctesiph. p. 397.) Shortly atterwards the Thebans commenced the war against the Phocians, usually known as the Sacred War, and in which almost all the leading states of Grece were eventually involved. Both Athens and Sparta supported the Phocians, as a counterpoise to Thebes, though they did not render them much effectual assistance. This war terminated, as is well known, by the intervention of Philip, who destroyed the Phocian towns, and restored to Boentia Orchomenus and the other towns which the Phocians had taken away from them, в.c. 346. The Thebans were still the allies of Philip, when the latter reized Elateia in Phocis towards the close of b.c. 339, as preparatory to a march through Boeotia against Athens. The old feeling of ill-will between Thebes and Athens still continued: Philip calcalated upon the good wishes, if not the active co-operation, of the Thebans against their old enemies ; and probably never dreant of a confederation between the two states as within the range of probability. This union, however, was brought about by the eloquence of Demosthencs, who was sent as ambessador to Thetres, and who persuaded the Thebans to form an alliance with the Athenians for the purpose of resisting the ambitions schemes of Philip. In the following year (в. c. 338) Philip defeated the combined forces of Thebes and Athens at the battle of Chaeroneia. which crushed the liberties of Greece, and made it in reality a province of the Macedonian monarchy. On this fatal field the Thebans maintained the reputation they had won in their battles with the Spartans; and their Sacred Band was cut to pieces in their ranks. The battle was followed by the surrender of Thebes, which Philip treated with great severity. Many of the leading citizens were either banished or put to death; a Macedonian garrison was stationed in the Cadmeia; and the government of the city was placed in the hands of 300 citizens, the partisans of Philip. The Thebans were also deprived of their sovereignty over the Boeotian towns, and Orchomenus and Plataea were restored, and acain filled with a population hostile to Thebes. (Divdor. xvi. 87; Justin, ix. 4; Paus. iv. 27. § 10, ix. 1. § 8.) In the year after Philip's death (b.c. 335) the Theban exiles got possession of the city,
besieged the Macedonian garrison in the Cadmeia, and invited the other Grecian states to declare their independence. But the rapidity of Alexander's movements disconcerted all their plans. Ho appeared at Onchestus in Boentia, before any intelligence had arrived of his quitting the north. He was willing to allow the Thebans an opportunity for repentance; but as his proposals of peace were rejected, be directed a general assault upon the city. The Theban troops outside the gates were driven back, and the Macedonians entered the town along with them. A dreadful carnage ensued; 6000 Thebans are said to have been slain, and 30,000 to have been taken prisoners. The doom of the conquered city was referred to the Grecian allies in his army, Orchomenians, Plataeans, Phocians, and other inveterate enemies of Thebes. Their decision must have been known beforehand. They decreed that Thebes should be razed to the ground, with the exception of the Cadmeia, which was to be held by a Macedonian garrison; that the territory of the city should be divided among the allies; and that all the inhabitants, men, women, and children should be sold as slaves. This sentence was carried into execution by Alexander, who levelled the city to the ground, with the exception of the house of Pindar (Arrian, Anab. i. 8, 9 ; Diodor. xvii. 12-14; Justin, xi. 4.) Thehes was thas blotted out of the map of Greece, and remained without inhabitants for the next 20 years. In b.c. 315, Cassander undertook the restoration of the city. He united the Theban exiles and their descendants from all parts of Greece, and was zealously assisted by the Athenians and other Grecian states in the work of restoration. The new city occupied the same area as the one destroyed by Alexander; and the Cadmeia was held by a garrison of Cassander. (Diodor. xix. 52-54, 78; Paus. ix. 7. § 4.) Thebes was twice taken by Demetrius, first in B. c. 293, and a second time in 290, but on each occasion he used his victory with moderation. (Plut. Demetr. 39, 40; Diod. xxi. p. 491. ed. Wess.)

Dicaearchus, who visited Thebes not long after its restoration by Cassander, has given a very interesting account of the city. "Thebes," he says (§ 12, seq. ed. Müller), "is situated in the centre of Boeotia, and is about 70 stadia in circumference; its site is level, its shape circular, and its appearance gloomy. The city is ancient, but it has been lately rebuilt, having been three times destroyed, as history relates*, on account of the insolence and haughtiness of its inhabitants. It is well adapted for rearing horses since it is plentifully provided with water, and abounds in green pastures and hills: it contains also better gardens than any other city in Greece. Two rivers flow through the town, and irrigate all the subjacent plain. There is also a subterraneous stream issuing frmm the Cadmeia, through pipes, said to be the work of Cadmus. Thebes is a most agreeable residence in the summer, in consequence of the abundance and coolness of the water, its large gardens, its agreeable breezes, its verdant appearance, and the quantity of summer and autumnal fruits. In the winter, however, it is a most disagreeable residence, from being destitute of fuel, and constantly exposed to floods and winds. It is then often covered wilh snow and very muddy." Although Dicaearchus

[^41]in this passage gives to Thebes a circumference of 70 stadia, he assigns in his verses (Stat. Graec. 93) a much smaller extent to it, namely $\mathbf{4 3}$ stadia. Th:e latter number is the more probable, and, being in metre was less likely to be altered; but if the number in prose is correct, it probably inclades the suburbs and gardens outside the city walls. Dicaearchus also gives an account of the character of the inhabitants, which is too long to be extracted. He represents them as noble-minded and sanguine, but insolent and proud, and always ready to settle their disputes by fighting rather than by the ordinary course of justice.

Thebes had its full share in the later calamities of Greece. After the fall of Corinth, b.c. 146. Mummius is said to have destroyed Thebes (Liv. Epit. 52), by which we are probably to understand the walls of the city. In consequence of its having sided with Mithridates in the war against the Romans, Sulla deprived it of half its territory, which he dedicated to the gods, in order to make compensation for his having plundered the temples at Olympia, Epidaurus, and Delphi. Although the Romans afterwards restored the land to the Thebans, they never recovered from this blow (Paus. ix. 7. §§5,6); and so low was it reduced in the time of Augustus and Tiberius that Strabo says that it was little more than a village (ix. p. 403). In the time of the Antonines, Pausanias found the Cadmeia alone inhabited, and the lower part of the town destroyed, with the exception of the temples (ix. 7. § 6). In the decline of the Roman Empire, Thebes became the seat of a considerable population, probably in consequence of its inland situation, which afforded its inhabitants greater security than the maritime towns from hostile attacks. In the eleventh and twelfth centuries Thebes was one of the most flourishing cities in Greece, and was celebrated for its manufactures of silk. In A. D. 1040 the Thebans took the field to oppose the Bulgarian invaders of Greece, but were defeated with great loss. (Cedren. p. 747, ed. Paris, p. 529, ed. Bonn.) In A. D. 1146 the city was plundered by the Normans of Sicily, who carried off a large amount of plunder (Nicetas, p. 50, ed. Paris., p. 98, ed. Bonn.) Benjamin of Tudela, who visi:ed Thebes about 20 years later, speaks of it as still a large city, possessing 2000 Jewish inhabitants, who were very skilful manufacturers of silk and purple cloth (i. 47, ed. Asher; Finlay, Byzantine Empire, vol. i. p. 493, vol. ii. p. 199). The silks of Theles continued to be esteemed even at a later period, and were worn by the emperors of Constantinople. (Nicetas, p. 297, ed. Paris., p. 609, ed. Bonn.) They were, however, gradually supplanted by those of Sicily and Italy; and the loss of the silk trade was followed by the rapid decline of Thebes. Under the Turks the city was again reduced, as in the time of Pansanias, to the site of the Cadmeia.

## II. Topography.

Thebes strod on one of the hills of Mount Tenmessus, which divides southern Boeotia into two distinct parts, the northern being the plain of Theles and the southern the ralley of the Asopus. The Greeks, in founding a city, tonk care to select a spot where there was an abundant supply of water, and a hill naturally defensible, which might be easily converted into an acropolis. They generally preferred a position which would command the adjacent plain, and which was neither immediately upou the coust nor
yet at a great distance from it．But as Bocotia lics between two seas，the founders of Thebes chose a spot in the centre of the country，where water was very plentiful，and where the nature of the ground was admirably adapted for defence．The hill，upon which the town stands，rises about 150 feet above the plain，and lies about 2 miles northward of the highest part of the ridge．It is bounded on the east and west by two small rivers，distant from each other about 6 or 7 stadia，and which run in such deep ravines as to form a natural defence on either side of the city．These rivers，which rise a little south of the city，and flow northward into the plain of Thebes，are the celebrated streams of Ismenus and Dirce．Between them flows a smaller stream，which divided the city into two parts，the western division containing the Cadmeia＊，and the southern the hill Ismenius and the Ampheion．This middle torrent is called Cnopus by Leake，but more correctly Stro－ phia（Callim．Hymn．in Del．76）by Forchhammer． The Cnopus is a torrent flowing from the town Cnopia，and contributing to form the Ismenus，whence it is correctly described by the Scholiast on Nicander as the same as the Ismenus．（Strab．ix．p．404； Nicand．Theriac．889，with Schol．）The three strearns of Ismenus，Dirce，and Strophia unite in the plain below the city，to which Callimachus （L c．）appears to allude：－

##  <br> 

The middle torrent is rarely mentioned by the ancient writers；and the Ismenus and Dirce are the streams alluded to when Thebes is called $\delta$ irórauos דб́入ıs．（Eurip．Suppl．622；comp．Phoen． 825. Bacch．5，Herc．Fur．5i2．）Both the Ismenus and Dirce，though so celebrated in antiquity，are nothing but torrents，which are only full of water in the winter after heary rains．The Ismenus is the eastern stream，now called Ai Iúnni，which rises from a clear and copious fountain，where the small church of St．John stands，from which the river de－ rives its name．This fountain was called in anti－ quity Melia，who was represented as the mother of Ismenns and Tenerus，the hero of the plain which the Ismenus inundates．It was sacred to Ares，who was said to have stationed a dragon to guard it． （Callimach．Hynnn．in Del．80；Spanheim，ad loc．； Pind．Pyth．xi．6；Paus．ix．10．§5；Furchhammer， Hellenica，p．113．）The Dirce is the western stream， now called Platziótissa，which rises from several fountains，and not from a single one，like the Is－ menus．A considerable quantity of the whter of the Platziotissa is now diverted to supply the fountains of the town，and it is represented as the purest of the Theban streams；and it appears to have been so regarded in antiquity likewise，judging from the epithets bestowed upon it by the poets．（＇A $\gamma \boldsymbol{r} \dot{\prime}$ च̈ठw ，সind．Isthm．vi．109，ка入入i $\beta$ 反oos，Isthm．viii．

Though the position of Thebes and of its cele－ brated streans is certain，almost every point con－ nected with its topography is more or less doubtful． In the other cities of Greece，which have been inha－ bited continuously，most of the ancient buildings

[^42]have disappeared；but nowhere has this taken place more completely than at Thebes．Not a single trace of an ancient building remains；and with the ex－ ception of a few scattered remains of architecture and sculpture，and some fragments of the ancient walls，there is nothing but the site to indicate where the ancient city stood．In the absence of all ancient monuments，there must necessarily be great uncer－ tainty；and the three writers who have investigated the subject upon the spot，differ 80 widely，that Leake places the ancient city to the south of the Cad－ meia，and Ulrichs to the north of it，while Forch－ hammer supposes both the western heights between the Strophia and the Dirce to have been in a certain sense the Cadmeia，and the lower city to have stood eastward，between the Strophia and the Ismenus． In the great difficulty of arriving at any independ－ ent judgment upon the subject without a personal inspection of the site，we have adopted the hypo－ thesis of Furchhammer，which seems consistent with the statements of the ancient writers．

The most interesting point in Theban topography is the position of the seven celebrated Theban gates．

 $O p .161$ ）；and their names are given by seven diffe－ rent authors，whose statements will be more easily compared by consulting the following table．The numeral represents the order in which the gates are mentioned by each writer．The first line gives the names of the gates，the second the names of the Ar－ give chiefs，the third the emblems upon their shields， and the fourth the names of the Theban chiefs．

Nonnus designates fire of the gates by the names of the gods and the planets，and to the other two，to which he gives the names of Electrae and Oncaea， he also adds their position．Hyginus calls the gates by the names of the daughters of Amphion；and that of Ogygia alone agrees with those in the other writers．But，dismissing the statements of Non－ nus and Hyginus，whose authority is of no value upon such a question，we find that the remaining five writers agree as to the names of all the seven gates， with two or three exceptions，which will be pointed out presently．The position of three of the gates is quite clear from the description of Pausanias alone． These are the Flectrae，Proftides，and Nei－ tak．Pausanias says that Electrae is the gate by which a traveller from Plataea enters Thebes（ix． 8．§ 6）；that there is a hill，on the right hand of the gate，sacred to Apollo，called the Ismenian，since the river Ismenus runs in this direction（ix．10．§ 2）； and that on the left hand of the gate are the ruins of a house，where it was said that Amphitryon lived， which is followed by an account of other ancient mo－ numents on the Cadmeia（ix．11．§ l）．Hence it is evident that the gate Electrae was in the south of the city，between the hills Ismenius and Cadmeia．The gate Proetides was on the north－eastern side of the city，since it led to Chalcis（ix．18．§ 1）．The gate Neitae was on the north－western side of the city，since it led to Onchestus and Delphi；and the river which Pausanias crossed，could have been no other than the Dirce（ix．25．§§ 1，3，ix．26．§ 5）．The names of these three gates are the same in all the five writers：the manuscripts of Apollodorus have the corrupt word＇ $\mathrm{O} \chi \nu \eta t \delta a s$ ，which has been sltered by the editors into＇Oyरatbas，instead of Níiras，which was the reading suggested by Porson（ad．Eurip． Phoen．1150），and adopted by Valckenaer．（See Unger，Thebana Puradoxa，vol．i．p．313．）

Of the other four gates，the Homolnides is also the same in all the five writers．Ot the remaining three Aeschylus does not mention their proper names，but specifies two by their locality，one as near the temple of Athena Ouca，and the other as the Northern gate（Boppaiaı nùal），and describes the last simply as the Seventh gate．The names of these three gates are nearly the same in the other four writers，the on near the tenple of Athena Onca being called Crenaeae，and in Statius Culmina Dircaea，the Northern cate Ogygiae，and the Seventh gate Hypsistae，－Euripides，however，also giving the name of Seventh to the last－mentioned gate．

Having described the position of the Electrac， Proetides，and Neitae，it remains to speak of the position of the other four，which we shall take in the order of Aeschylus．The fourth gate was pro－ bably situated on the western side of the city，and was called Crenaeae，becanse it was near one of the fountains of Dirce，now called Пapantorı，situated upon the right bank of the river．Near that foun－ tain was a hill，called by the Greeks $\delta \gamma$ коs，whence Athena derived the name of Onca．Accordingly Statius，in calling the fourth gate Culmina Dir－ caea，connects both the fountain and the hill．Non－ nus，who calls this gate Oncaen，describes it at the same time as situated towards the west．It is usually stated，on the authority of Hesychius，that the Oucacan gate is the same as the Oiggian；but this identification throws everything inter confusion， while the change of three letters，proposed by Furch．
hammer，brings the statement of Hesychius into accordance with the other writers．（＇Oyкas＇A日quas
 i．e．Aesch．Sept．c．Theb．486．）

The fith gate was called Ogygian from Ogygus， the most ancient king of Thebes，in whose time the deluge is said to have taken place．Now there is no part of Thebes more exposed to inundation than the north of the city between the gates Neitae and Proe－ tides，where the torrent Strophia descends into the plain．Here we may probably place the Ogygian gate，which Aeschylus calls the Northern，from its position．

The exact position of the sixth gate，called Huno－ loides，and of the serenth，deninnated by its number in Aeschylus and Euripides，but by the name of Hypsistae in the other writers，is doubtful．Forch－ hatamer maintains that these gates were in the southern part of the city，one on either side of the gate Electrae：but tone of his arcuments are con－ clusive：and the position of these gates must be left uncertain．Pausanias relates that，after the victory of the Epigoni at Gilisas，some of the Thebans fled to Homole in Thessaly：and that the gate，through which the exiles re－entered the city，when they were recalled by Thersander，was named the Homoloides， from Homole in Thessaly（ix．8．Sis 6．7）．Forch－ hammer thinks that it would have been supposed that the exiles entered the city br the same gate by which they quitted it；and as the gate learling to Glisas must have been either in the southern or
eastern side of the city, the gate Homoloides must have been on the southern side, as the Proetides lay towards the east. But this is mere conjecture; and Leake supposes, with quite as much probability, that the Homoloides was on the north-western side of the city, since the Thebans would re-enter the city in that direction on their return from Homole.

The divisions of the city, and its monuments, of which Pausanias has given a full description, must be treated more briefly. The city, as already remarked, was divided into two parts by the torrent Strophia, of which the western half between the Strophia and the Dirce was the Cadmeia, while the eastern half between the Strophia and the Ismenus

was the lower city ( $\hat{\eta}$ кd́rco ródis), said to have been added by Amphion and Zethus, (Paus. ix. 5. §§ 2, 6.) The Cadmeia is again divided by a slight depression near the fountain of Dirce and the Crenaean gate into two hills, of which the larger and the higher one to the south was the acropolis
 while the northern hill formed the agora of the acropolis ( $\tau \hat{\eta} s$ dккротó入єcos ${ }^{2} \gamma o p d$, Paus. ix. 12. § 3). The eastern half of the city was also divided between the Strophia and the Ismenus into two parts, of which the southern consisted of the hill Ismenius, and the northern of several minor eminences, known under the general name of Ampheion. ('A $\mu \phi$ ciov, Arrian, Anab. i. 8.) Aeschylus describes the tomb of Amphion as standing near the northern gate.
 'A ${ }^{\prime}$ фlovos, Sept. c. Theb. 528.) Hence Thebes consisted of four parts, two belonging to the acropolis, and two to the lower city, the former being the acropolis proper and the agora of the acropolis, and the latter being the hill Ismenius and the Ampheion.

Pausanias, leaving Potniae, entered Thebes on the south by the gate Electrue, before which he noticed the Polyandrium, or tomb of the Thebans who fell fighting against Alexander. (Paus. ix. 8. §§ 3, 4, 7, ix. 10. § 1.) The explanation of Forchhammer that Alexander laid siege to the city on the south, and that he did not return from the gate Electrae to the Proetides, as Leake supposes, seems the most probable. Accordingly the double lines of circumvallation, which the Thebans erected against the Macedonian garrison in the Cadmeia, must have been to the south of the city around the chief gates of the Cadmeia. (See Arrian, i. 7, 8.) Upon entering the city through the gate Electrae, Pausanias notices the hill Ismenius sacred to Apollo, named from the river Ismenus flowing by it (ix. 10. § 2). Upon the hill was a temple of Apollo, containing several monuments enumerated by Pausanias. This temple is likewise mentioned by Pindar and Herodotus, both of whom speak of the tripods situated in its treasury. (Pind. Pyth. xi. 7, seq.; Herod. v. 59.) Above the Ismenium, Pausanias noticed the fountain of the Ismenus, sacred to Ares, and guarded by a dragon, the name of which fountain was Melia, as we have already seen (ix. 10. §5).

Next Pausanias, beginning again from the gate Electrae, turns to the left and enters the Cadmeia (ix. 11. § 1 , seq.). He does not mention the acropolis by name, but it is evident from the list of the monuments which he gives that he was in the Cadmeia. He enumerates the house of Amphitryon, containing the bedchamber of Alcmena, said to have been the work of Trophonius and Agamedes; a monument of the children of Hercules by Megara; the stone called Sophronister; the temple of Hercules ('Hodxגetov, Arrian, Anab. i. 8); and, near it, a gymnasium and stadium, both bearing the name of this God; and above the Sophronister an altar of Apollo Spodius.

Pausanias next came to the depression between the acropolis and the agora of the Cadmeia, where he noticed an altar and statue of Athens, bearing the Phoenician surname of Onga (Orya), or Onca ("Oyka) according to other authorities, and said to have been dedicated by Cadınus (ix. 12. § 2). We know from Aeschylus that there was originally a temple of Athena Onca in this locality, which stood outside the city near one of the gates, whence the

name from a village named Onca or Oncre. (Aesch. Sept. c. Theb. 163, 487, 501, with Schol. ; Schol. in Euripid. Phoen. 1069 ; Steph. B. s. v. 'Oyкaiar; Hesych. s. v. 'Oykas ; Schol. ad Pind. OL. ii. 39, 48; Tzetzes, ad Lycophron. 1225 ; Phavurinus, s. г. Oyкau.) Sophocles also speaks of two temples of Athena at Thebes ( $\pi \rho \delta{ }^{2}$ Mad入dסos $\delta i \pi \lambda o$ is vaois, Oed. Tyr. 20), in one of which, according to the Scholiast, she was surnamed Oncaea, and in the other Ismenia. In the valley between the two hills, there are still the remains of an aqueduct, partly under and partly above ground, to which Dicaearchus
 àpavès $\delta$ id $\sigma \omega \lambda \dagger \eta \omega \nu$ à $\gamma \delta \mu \in \nu o \nu, l . c$.

In the agora of the Cadmeia the house of Cadmus is said to have stood; and in this place were shown ruins of the bedchamber of Harinonia and Semele; statues of Dionysus, of Pronomus, the celebrated musician, and of Epaminondas; a temple of Ammon; the place where Teiresias observed the flight of birds; a temple of Fortune; three wooden statues of Aphrodite, with the surnames of Urania, Pandemus, and Apostrophia; and a temple of Demeter Thesmophorus. (Paus. ix. 12. §§ 3-5, ix. 16. §§ 1-5.)

Crossing the torrent Strophia, Pausanias saw near the gate Proetides the theatre with the temple of Dionysus (ix. 16. § 6). In this part of the city, to which Forchhammer gives the name of Ampheion, the following monuments are mentioned by Pausanias (ix. 16. § 7, ix. 17. §§ 1-4): ruins of the house of Lycus and a monument of Semele; monuments of the children of Amphion ; a temple of Artemis Eucleis, and, near it, statues of Apollo Boedromius and of Hermes Agoraens; the funeral pile ( $\pi v \rho d$ ) of the children of Amphion, distant half a stadium from their tombs; two statues of Athens Zosteria; and the monument of Zethus and Amphion, being a mound of earth. As the lower city was deserted in the time of Pausanias, he does not mention the agora; but there is no doubt that it contained one, if not more, since Sophocles speaks of several agorae (Oed. Tyr. 20).

Outside the gate Proetides, on the road to Cbalcis, Pausanias names the monuments of Melanippus, Tydeus, and the sons of Oedipus, and 15 stadia beyond the latter the monument of Teiresias. Pausanias also mentious a tomb of Hector and one of Asphodicus, at the fountain Oedipodeia, which is perhaps the modern fountain of St. Theodore. On the same road was the village Teumessus. (Pans. ix. 18, ix. 19. § 1.) After describing the road to Chalcis, Pausanias returns to the gate Proetides, outside which, towards the N., was the gymnasium of Iolans, a stadiuin, the heroum of Iolaus, and, beyond the stadium, the hippodrome, containing the monument of Pindar (ix. 23. §§ 1, 2). Pausanias then comes to the road leading from the Ogygian or Northern gate, to Acraephnium, after following which he returns to the city, and enumerates the objects outside the gate Neitae. Here, between the gate and the river Dirce, were the tomb of Menoecens, the son of Creon, and a monument marking the spot where the two sons of Oedipus slew each other. The whole of this locality was called the Syrma ( iv́pua) of Anti- $^{\text {a }}$ gone, because, being unable to carry the dead body of her brother Polynices, she dragged it to the funenal pile of Eteocles. On the opposite side of the Dirce were the ruins of the house of Pindar, and a temple of Dindymene (ix. 25. §§§ 1-3). Pausanias then appears to have returned to the gate Neitee and
followed the road which ran from this gate to Onchestus. He first mentions a temple of Themis, then temples of the Fates and of Zeus Agoraeus, and, a little further, a statue of Hercules, surnamed Rhinocolustes, because he here cut off the noses of the heralds of Orchomenus. Twenty five stadia beyond was the grove of Demeter Cabeiria and Persephone, and 7 stadia further a temple of the Cabeiri, to the

COIN OF THEBES.
right of which was the Teneric plain, and to the left a road which at the end of 50 stadia conducted to Thespiae (ix. 25. § 5, ix. 26. §§ 1, 6).
(Leake, Northern Greece, vol. ii. p. 218, seq., vol. iv. p. 573, seq.; Ulrichs, Topographie von Theben, in Abhandl. der Bayer. Akad. p. 413, seq. 1841 ; Unger, Thebana Paradoxa, 1839 ; Forchhammer, Topographia Thebarum Heptapylarum, Kiliae, 1854.)

THEBAE CORSICAE. [Corsein, No. 2.]
THEBAE PHTHIO'TIDES or PHTHIAE ( $\Theta \hat{\eta}$ -
 Thebae Phthiae, Liv. xxxii. 33), an important town of Phthiotis in Thessaly, was situated in the northeastern corner of this district, near the sea, and at the distance of 300 stadia from Larissa. (Polyb. l.c.) It is not mentioned in the Iliad, but it was at a later time the most important maritime city in Thessaly, till the foundation of Demetrias, by Demetrius Poliorcetes, about B. c. 290. ("Thebas Phthias unum maritimum enporium fuisse quondam Thessalis quaestuosum et fugiferum," Liv. xxxix. 25.) It is first mentioned in B. c. 282, as the only Thessalian city, except Pelinnaeum, that did not take part in the Lamiac war. (Diod. xviii. 11.) In the war between Demetrius Poliorcetes and Cassander, in b. c 302, Thebes was one of the strongholds of Cassander. (Diod. xx. 110.) It became at a later time the chief possession of the Aetolians in northern Greece; but it was wrested from them, after an obstinate siege, by Philip, the son of Demetrius, who changed its name into Philippopolis. (Polyb. v. 99, 100; Diod. xxvi. p. 513, ed. Wesseling.) It was attacked by the consul Flamininus, previous to the battle of Cynoscephalae, в. c. 197, but without success. (Liv. xxxiii. 5; Polyb. xviii. 2.) After the defeat of Philip, the name of Philippopolis was gradually dropped, though both names are used by Livy in narrating the transactions of the year B. c. 185. (Liv. xxxix. 25.) It continued to exist under the name of Thebes in the time of the Roman Empire, and is mentioned by Hierocles in the sixth century. (" Thebae Thessalae," Plin. v. 8. s. 15; Ө̂̂6at $\Phi \theta \iota \omega-$ tioos, Ptol. iii. 13. § 17 ; Steph. B. s. v.; Hierocl. p. 642, ed. Wess.) The ruins of Thebes are situated upon a height half a mile to the north-east of $A k$ Ketjel. The entire circuit of the walls and towers, both of the town and citadel, still exist; and the circumference is between 2 and 3 miles. The theatre, of which only a small part of the exterior circular wall of the cavea remains, stood about the
centre of the city, looking towards the sea. (Leake, Northern Greece, vol. iv. p. 358.)

Thebais. [Thebae Aegypti.]
THEBE ( $\Theta \dot{\eta} 6 \eta$ ), a famous ancient town in Mysia, at the southern foot of Mount Placius, which is often mentioned by Homer as governed by Eetion, the father of Andromache (Il. i. 366, vi. 397, xxii. 479). The town is said to hare been destroyed during the Trojan War by Achilles (Il. ii. 691 ; Strab. xiii. pp. 584, 585, 612, foll.) It must have been restored after its first destruction, but it was decayed in the time of Strabo, and when Pliny (v. 32) wrote it had entirely disappeared. The belief of some of the ancient grammarians (Etym. M. s. v.; Didym. ad Hom. Il. i. 336; Diac. ad Hesiod. Scut. 49; and Eustath. ad Hom. Il. ii. 691) that Thebe was only another name for Adramyttium, is contradicted by the most express testimony of the best writers. Xenophon (Anab. vii. 8. § 7) places it between Antandrus and Adramyttium, and Strabo, perhaps more correctly, between Adramyttium and Carina, about 80 stadia to the north-east of the former. (Comp. Pomp. Mela, i. 18; Steph. B. s. v.) Although this town perished at an early period, its natne remained celebrated throughout antiquity, being attached to the neighbouring plain ( $\Theta \dot{\eta} \dot{b} \eta s \quad \pi \in \delta i v \nu$, Campus Thebanus), which was famed for its fertility, and was often ravaged and plundered by the different armies, whom the events of war bronght into this part of Asia. (Herod. vii. 42; Xenoph. l. c.; Strab. xiii. p. 588; Liv. xxxvii. 19.) Stephanus B. (s.v.) mentions another town of this name as belonging to the territory of Miletus in Asia Minor.
[L.S.]
THECHES (Өńx $\eta$ ) , one of the highest points of Mount Paryadres in Pontus, south-east of Trapezus, on the borders of the country inhabited by the Macrones. From it the Ten Thousand Greeks under Xenophon for the first time descried the distant Euxine. (Xenoph. Anab. iv. 7. § 21.) Diodorus Sicnlus (xiv. 29) calls the mountain Xinvov 8pos; but it still bears its ancient name Tekieh. (Ritter, Erdkunde, ii. p. 768.)
[L. S.]
THECOA. [TEKOAR.]
THEGANUSSA. [Messenia, p. 342, b.]
THEI'SOA ( $\epsilon \epsilon \sigma \delta \alpha$ : Eth. Өeivodirns). 1. A town of Arcadia, in the district Cynuria or Parrhasia, on the northern slope of Mt. Lycaeus, called after the nymph Theisoa, one of the nurses of Zeus. Its inhabitants were removed to Megalopolis upon the foundation of the latter city. Leake places it at the castle of St. Helen above Lavdha. Ross discovered some ancient remains N. of Andritzäna, which be conjectures may be those of Theisoa. (Paus. viii. 38. §§ 3, 9, viii. 27. § 4; Steph. B. s. v.; Leake, Morea, vol. ii. p. 315, Peloponnesiaca, p. 154; Ross, Reisen im Peloponnes, vol. i. p. 101 ; Boblaye, Recherches, p. 151.)
2. A town of Arcadia, in the territory of Orchomenus, the inhabitants of which also removed to Megalopolis. It is mentioned along with Methydrium and Teuthis as belonging to the confederation ( $\sigma v \nu \tau$ é $\boldsymbol{\lambda} \epsilon a$ ) of Orchomenos. It is probably represented by the ruins near Dimitzana. (Paus. viii. 27. §§ 4, 7, viii. 28. § 3; Ross, p. 115.)

THEIUM, a town of Athamania in Epeirus, of uncertain site. (Liv. xxxviii. 2.)
THELINE. [Arelate.]
THELPU'SA ( $\Theta$ é $\lambda \pi$ tov $\alpha$, Paus. and Coins; Tí $\lambda$ $\phi o v \sigma a$, Polyb., Diod., and Steph. B. s. v.: Eth. $\Theta \in \lambda-$ $\pi o v i \sigma l o s, \mathrm{~T} \in \lambda \phi o \dot{\sigma} t o s)$, a town in the west of Arcadia,
situated upon the left or eastern bank of the river Ladon. Its territory was bounded on the north by that of Psophis, on the south by that of Heraea, on the west by the Eleia and Tisatis, and on the east by that of Cleitor, Tripolis, and Theism. The town is said to have derived its name from a nymph, the daughter of the river Ladon, which nymph was probably the stream flowing through the lower part of the town into the Ladon. It is first mentioned in history in B. C. 352, when the Lacedaemonians were defeated in its neighbourhood by the Spartans. (Diod. xvi. 39.) In B. c. 222 it was taken by An. tigonus Doson, in the war against Cleomenes, and it is also mentioned in the campaigns of Philip. (Polyb. ii. 54, iv. 60, 73, 77 ; Steph. B. s. v. Tí $\phi$ ouva; Plin. iv. 6. s. 20.) Its coins show that it belonged to the Achaean League. (Leake, Peloponnesiaca, p. 206.) When Pausanias visited Thelpusa, the city was nearly deserted, so that the agora, which was formerly in the centre of the city, then stood at its extremity. He saw a temple of Asclepius, and another of the twelve gods, of which the latter was nearly levelled with the ground. (Paus. viii. 25 § 3.) Pansanias also mentions two temples of some celebrity in the neighbourhood of Thelpusa, one above and the other below the city. The one above was the temple of Demeter Eleusinia, containing statues of Demeter, Persephone and Dionysus, made of stone, and which probably strod at the castle opposite to Spathari (viii. $25 . \$ \S 2,3$ ). The temple below the city was also sacred to Demeter, whom the Thelpusians called Erinnys. This temple is alluded to by Lycophron (1038) and Callimachus (Fr. 107). It was situated at a place called Onceium, where Oncus. the son of Apollo, is said once to have reigned (viii. 25. § 4, seq.; Steph. B. s. v. "Oyкetov). Below this temple stood the temple of Apolio Oncseates, on the left bank of the Ladon, and on the right bank that of the boy Asclepius, with the sepulchre of Trygon, said to have been the nurse of Asclepius (viii. 25. § 11). The ruins of Thelpusa stand upon the slope of a considerable hill near the village of Vánena (Bd $\nu \in \nu \alpha$ ). There are only few traces of the walls of the city. At the ruined church of St. John, near the rivulet, are some Hellenic foundations and fragments of columns. The saint is probably the successor of Asclepius, whose temple, as we learn from Pansanias. stood longest in the city. There are likewise the remains of a Roman building, about 12 yards long and 6 wide, with the ruins of an arched roof. There are also near the Ladon some Hellenic foundations, and the lower parts of six coJumns. Below Vánena there stands upon the right bank of the Ladon the ruined church of St. Athanasius the Miraculuas, where Leake found the remains of several columns. Half a mile below this church is the village of Tumbiki, where a promontory projects into the river, upon which there is a mound apparently artificial. This mound is probably the tomb of Trygon, and Tumbtki is the site of the the temple of Asclepius.

Pausanias, in describing the route from Psophis

COIN OF THELPI'SA.

## TIIEMISCYRA.

to Thelpusa, after mentinning the bonndaries between the territories of the two states [Pgopis], first crosses the river Arsen, and then, at the distance of 25 stadia, arrives at the ruins of a village Cans and a temple of Asclepius Causius, erected upon the roadside. From this place the distance to Thelpusa was 40 stadia. (Leake, Morea, vol. ii. pp. 97, seq., 250, seq., Peloponnesiaca, pp. 205, 222. 228 ; Bublaye, Recherches, fcc. p. 152 ; Kuss, Reisen im Peloponnes. p. 111; Curtius, Peloponnesus, vol. i. p. 370, seq.)

THELUTHA, a fortress situated on an island in the Euphrates. It is mentiuned by Ammianus (xxir. 2), who states that it was used as a treasury by the Persians. It is unquestionably the same as the Thilabus of Isidorus (Stathm. Parth. 1), who gives a similar description of it, and places it at no great distance from another island in the same river, Anatho. Zosimus, speaking of the same region, notices a fortified island, which he calls $\phi$ poiptov oxvpótazov (iii. 15); probably the same place. It is doubtless represented now by an island which Colonel Chesney calls Telles, Tillus, or Anatelbes (i. p. 53 and Map.). [V.]

THEMEOTAE (Өє $\mu \epsilon \omega \bar{\omega} \alpha \iota$, Ptol. v. 9. § 17), a people of Asiatic S:armatia.
[T. H. D.]
THEMMA. [Tema].
THEMISCY'RA ( $\Theta \in \mu i \sigma \kappa v p a$ ), a plain in the north of Pontus, about the mouths of the rivers Iris and Thermodon, was a rich and beautiful district, ever verdant, and supplying food for numberless herds of oxen and horses. It also produced great abundauce of grain, especially pannick and millet; and the southern parts near the mountains furnished a rariety of fruits, such as grapes, apples, pears, and nuts in such quantities that they were suffered to waste on the trees. (Strab. ii. p. 126, xii. p. 547, foll.; Aeschyl. Prom. 722; comp. Apollod. ii. 5; Apollon. Rhod. ii. 370 ; Plin. vi. 3, xxiv. 102.) Mythology describes this plain as the native country of the Amazons.

A Greek town of the name of Themiscyra, at a little distance from the coast and near the mouth of the Thermodon, is mentioned as early as the time of Herodotus (iv. 86; comp. Scylax, p. 33; Pans. i. 2. § 1). Ptolemy (v. 6. § 3) is undoubtedly mistaken in placing it further west, midway between the Iris and Cape Heraclium. Scylax calls it a Greek town; but Diodorus (ii. 44) states that it was built by the founder of the kingdom of the Amazons. After the retreat of Mithridates from Cyzicus, Themiscyra was besieged by Lucullus. The inhabitants on that occasion defended themselves with great valour; and when their walls were undermined, they sent bears and other wild beasts, and even swarms of bees, against the workmen of Lucullus (Appian. Mithrid. 78). But notwithstanding their galiant defence, the town seems to have perished on that occasion, for Nels speaks of it as no longer existing (i. 19), and Strabo does not mention it at all. (Comp. Anon. Yeripl. P. E. p. 11 ; Steph. B. 8. v. Xaঠ̈ıбia.) Some suppose that the town of Thermeh, at the month of the Thermodon, marks the site of ancient Themiscyra; but Hamilton (Researches, i. p. 283) justly observes that it must have been situated a little further inland. Ruins of the place do not appear to exist. fur thuse which Texier regards as indicating the site of 'Themiscyra, at a distance of two days' journey from the Halys, on the borders of Galatia, cannot possibly have belonged to it, but are in all probability the remains of Tavium.
[L.S.]
 a town of Phrygia, near the burders of Pisidia, whence in later times it was regarded as a town of Pisidia. (Strab. xii. p. 576; Paus. x. 32; Ptol. v. 2. § 26 ; Steph. B. s. v. ; Plin. v. 29 ; Hierocl. p. 674 ; Geogr. Rav i. 18.) Pausanias relates that the Themisonians showed a cave, about 30 stadia from their town, in which, on the advice of Heracles, Apollo, and Hermes, they had concealed their wives and children during an invasion of the Celts, and in which afterwards they set up statnes of these divinities. According to the Peuting. Table, Themisonium was 34 miles from Laodiceia. Arundell (Discoveries, ii. p. 136), guided by a coin of the place, fixes its site on the river Azanes, and believes the ruins at Kai llissar to be those of Themisonium; but Kiepert (in Franz's Fünf Inschriften, p. 29) thinks that the ruins of Kisel Hissar, which Arundell takes to mark the site of Cibyra, are those of Themisonium.
[L. S.]
THENAE (Oeval, Callim. in Jov. 42; Steph. B. 8. $\boldsymbol{v}$. 'O $\mu \phi$ ódsov), $^{2}$ town of Crete close on the Onphalian plain, and near Cnossus. If not on the very site it must have been close to the Castello Temenos of tle Venetians, which was built A. D. 961, when the Cretans, under their Saracenic leaders, were vanquished by Nicephorus Phocas and the forces of the Byzantine emperor. (Pashley, Trarels, vol. i. p. 224: comp. Fiulay, Byzantine Empire, vol. i. p. 3 37: (Gibbon. c. lii.)
[E. B. J.]
THENAE ( $\Theta \in \nu a l$ ), a maritime city of Byzacium in Africa Proper, at the mouth of a small river which fell into the Syrtis Minor, and 216 miles SE. of Carthage. (Plin. v. 4. s. 3.) By Strabo it is called $\dot{\eta}$ Өéva (xrii. p. 831), and by Ptolemy ©aiva, or ©éaıval (i. 15. § 2, iv. 3. § 11). At a later period it became a Roman colony with the name of Aelia Augusta Mercurialis (Gruter, Inscr. p. 363; cf. Itin. Ant. p. 59, also pp. 46, 47, 48, 57). Now Thuini, or Teny.
[T. H. D.]
THEODORIAS. [Vacca.]
THEODORO POLIS ( $\Theta \epsilon \omega \delta \omega \rho \delta \pi o \lambda t s$, Procop. de Aed. iv. 6, 7), a town of Moesia Inferior, founded by the emperor Justinian.
[T. H. D.]
THEODO'SIA ( $\Theta$ eodoola, Ptol. iii. 6. § 3), a flourishing colony of the Milesians, on the coast of the Chersonesus Taurica, in European Sarmatia, with a harbour capable of containing 100 ships. (Strab. vii. 309; Arrian, Per. P. Eux. p. 20.) In the dialect of the natives, it was called Ardabda ('Apoábóa, Anon. P'er. P. E'ux. p. 5), which is said to have signitied, in the dialect of the Taurians, " seven gods" (Pallas, i. p. 416), and at a later period Kapha (Kd́фa, Const. Porphyr. de Adm. Imp. c. 53); whilst by the Geogr. Rav. (iv. 3, v. 11) we find it named Theodosiopolis. It enjoyed an extensive commerce, particularly in corn (Dem. adv. Lept. p. 255). but appears to have been ruined before the age of Arrian, in the beginning of the second century. (Arrian, l.c.) Yet it continues to be mentioned by later writers (Polyaen. v. 23; Amm. Marc. xxii. 8. § 36 ; Oros. i. 2; Steph. B. s. v. 8 c. .) Yet we should not, perhaps, allow these writers much authority; at all events the very name of the Milesian colony nppears to have vanished in the time of the emperor Constantine Porphyrogenitus, under whom the site on which it stood was already called Kation (de Adm. Imp. c. 43; cf. Neumann, Die HelLenen in Shythenlunde, p. 469.) Clarke imagined that he had discovered its ruins at Stara Crim, where there are still some magnificent remains of a

Greek city (Trav. ii. p. 154, sq.; cf. p. 150 and note); but the more general, and perhaps better founded opinion is, that it stood, near its namesake, the modern Caffa or Theodosia. (Cf. Raonl-Rochette, Ant. du Busp. Cimm. p. 30; Dubuis, v. p. 280.) Fur coins and inscriptions, see Köhler, Nov. Act. Acad. Petrop. xiv. p. 122, and Mém. de St. Petersb. ix. p. 649, sq.; Clarke, Trav. ii. 148, sq. [T.H. D.]

THEODUSIO'POLIS (also called Arri), a town in the SE. of Thrace, on the road from Cypsela to Byzantium, a short distance to the $E$. of the source of the river Melas. Ammianus (xxvii. 4. § 12) mentions it by the latter name as one of the two chief towns of Europa, the designation in his time of the SE. division of Thrace.
[J. R.]
THEODOSIO'POLIS (Өeodoalouro入is, Procop de Aed. iii. 5), a city in Armenia Major, founded by Theodosius II. to keep the Armenians in subjection It was enlarged by the emperor Anastasius, and its fortifications were much strengthened by Justinian. (Procop. B. P. i. 10.) It lay S. of the Araxes and 42 stadia $S$. of the mountain in which the Euphrates rises, the present Bingül. (Id. Ib. 17; cf. Kitter, Erdk. x. p. 79, seq.) Theodosiopolis enjoyed an extensive commerce. (Const. Porphyr. de Adm. Imp. 4.) Sime writers identify it with Arzeroum (Kitter, Ib. pp. 80, 271, seq.; Zeune. p. 431); but according to D'Anville (Geogr. Anc. ii. p. 99, sq.) it lay 3.5 miles E. of that place. (Cf. Chardin, ii. p. 173, sq.; Hamilton, Asia Minor, fc. i. p. 178; Gibbon, Decline and Fall, iv. p. 168, ed Smith.)
[T. H. D.]
THEODOSIO'POLIS, in Mysia. [1'erperena.]
THEON OCHEMA. [Libya, p. 179, b.]
THEOPHA'NIUS ( Өeoфdvios, Ptol. v. 9. § 3), a river of Asiatic Sarmatia, which fell into the Palus Mreotis, between the greater and less Rhombites. (Cf. Amm. Marc. xxii. 8. § 29.) [T. H. D.]

THEO'POLIS. This place in Gallia, with 2 pure Greek name, was near Sisteron, in the department of Basses-Alpes, on the left bank of the Druentia (Durance). An inscription cut on the slope of a rock in honsar of Dardanus, praefect of the Praetorium of Gallia in the time of Honorius, and in honour of his mother, informs us that they made a road for this town by cutting both sides of the mountains, and they gave it walls and gates. The place is still called Theoux, and there are said to be remains there. (D'Anville, Nutice, \&ce) [G. L.]

THERA (Өńpa, Ion. Өńp $\boldsymbol{\eta}$ : Eth. Onpaios: Santorin), an island in the Aegaean sea, and the chief of the Sporades, is described by Strabo as 200 stadia in circumference, opposite the Cretan island of Dia, and 700 stadia from Crete itself. (Strab. x. p. 484.) Pliny places Thera 25 Roman miles S. of Ios (iv. 12. s. 23). Thera is said to have been formed by a clod of earth thrown from the ship Argo, to have received the name of Calliste, when it first emerged from the sea, and to have been first inhabited by the Phoenicians, who were left there by Cadmus. Eight generations afterwards it was colonised by Lacedaemonians and Minyae under the guidance of the Spartan Theras, the son of Autesion, who gave his name to the island. (Herod. iv. 147, seq.; Pind. Pyth. iv. 457 ; Callin. ap. Strab. viii. p. 347, x. p. 484 ; Apoll. Rhod. iv. 1762 ; Paus. iii. 1. § 7, iii. 15. § 6, vii. 2. § 2.) Its only importance in history is owing to its being the mothercity of Cyrene in Africa, which was founded by Battus of Thera in в.c. 631. (Herod. iv. 150, seq.) At this time Thera contained seven districts
( $\chi$ ज̂pot, Herod. iv. 153.) Ptolemy (iii. 15. § 26) has preserved the names of two places, Eleusin or Eleasis, and Oea; and a third, called Melaenae, occurs in an inscription. (Böckh, Inscr. no. 2448.) Like Melos, Thera sided with the Lacelaemonians at the commencement of the Yeloponnesian War (Thuc. ii. 9), but of its subsequent history we have no information.
Thera and the surrounding islands are remarkable as having been the scene of active volcanic operations in ancient as well as in modern times. In consequence of the survey made by command of the English Admiralty, we now possess precise information respecting these islands, the result of which, with additional particulars, is given by Lieutenant Leycester in a paper published in the Journal of the Royal Geographical Society, from which the following account is chiefly taken. Thera, now called Santorin, the largest of the group, has been likened in form to a horse-shoe; but a crescent with its two points elongated towards the west would be a more exact description. The distance round the inner curve is 12 miles, and round the outer 18 , making the coast-line of the whole island 30 miles: its breadth is in no part more than 3 miles. Opposite to Thera westward is Therasia, which still bears the same name. (Strab.i. p. 57, v. p. 484 ; Steph. B. 8. v. Onpaoia; Ptol. iii. 15. § 28 ; Plin. ii. 87. s. 89, iv. 12. s. 70.) Its circuit is $7 \frac{1}{2}$ miles, its length from N . to S . about $2 \frac{1}{2}$ miles, and its breadth a mile. Abont $1 \frac{3}{8}$ mile S. of Therasia, lies Aspronisi, or White Island, only a mile in circuit, and so called from being capped with a deep layer of pozzolana : the name of this island is not mentioned by the ancient writers. These three islands, Thera, Therasia, and Aspronisi, enclose an expanse of water nearly 18 miles in circumference, which is in reality the crater of a great volcano. The islands were originally united, and were subsequently separated by the eruption of the crater. In the centre of this basin three volcanic mountains rise, known by the name of Kamméni or the Burnt, (каццérn, i. e. $\kappa a v \mu \dot{\prime} \eta \eta$ instead of кєкаúpev $)$, and distinguished as the Palaca or Old, the Niea or New, and the Mikra or Little. It was formerly asserted that the basin was unfathomable, but its depth and shape have beep clearly ascertained by the soundings of the English Survey. Supposing the basin could be drained, a gigantic bowl-shaped cavity would appear, with walls 2449 feet high in some places, and nowhere less than 1200 feet high, while the Kammenis would be seen to form in the centre a huge mountain $5 \frac{1}{2}$ miles in circumference with three summita, the Paluen Kamméni, the Nea Kammeni, and the Mikra Kamméni, rising severally from the bottom of the abyss to the height of 1606,1629 , and 1550 feet. The rim of the great crater thus exposed would appear in all parts unbroken, except at the northern point between Thera and Therasia, where there is a chasm or door into the crater about a mile in width, and 1170 feet in depth midway between the two islands. (See Map, B.) If we now suppose the waters of the Aegrean let in, the edges of the crater, forming the inner curve of Thera and Therasia, rise above the sea from the height of 500 to 1200 feet, and present frightful precipices, of the colour of iron dross, except where their summits are capped with a deep layer of pozzolana. The F'uluea Kammeni is 328 feet above the water: the Nea Kammeni 351 feet; and the Mikira К̆аmıе்ทi 222 feet.

Thera, Therasia, and Aspronisi are all composed of volcanic matter, except the southern part of Thera, which contains Mount Elias, of limestone formation, the peak of which rises 1887 feet above the level of the sea. and is the highest land in the island. This mountain must have been originally a submarine eminence in the bed of the Mediterranean before the volcanic cone was formed (Lyell, Priwciples of Geology, p. 445, 9th ed ).

The first appearance of the three Kamménis belongs to historical times, and has been narrated by several writers. The Nea Kamméni, which is the largest of the group, did not emerge till the year 1707; but the other two were thrown ap in ancient times. The exact time of their appearance, however, is differently related, and it is difficult, and in some cases impossible, to reconcile the conflicting statements of ancient writers upon the subject. It appears certain that the oldest of these islands is the most southerly one, still called the Palaea or Old Kamméni. It burst out of the sea in B. c. 197, and received the name of Hiera, a name frequently given in antiquity to volcanic mountains. This fact is stated by Eusebius, Justin, Stralo, and Plutarch. It is related by Strabo that flames burst out of the sea for four days, and that an island was formed 12 stadia or $1 \frac{1}{2}$ English mile in circumference. (Euseb. Chron. p. 144, Olymp. 145. 4; Justin, xxx. 4; Strab. i. p. 57; Plut. de Pyth. Or. 11. p. 399.) The unanimous statement of these four writers is, however, at variance with that of Pliny (ii. 87. s. 89), who says "that in the 4th year of the 135th Olympiad [B. c. 237] there arose Thera and Therasia; between these islands, 130 years later [B. c. 107], Hiera, also called Automate; and 2 stadis from the latter, 110 years [A.D. 3] afterwards, in the consulship of M. Junius Silanus and L. Balbus, on the 8th of July, Thia" In another passage be says (iv. 12. s. 23): "Thera, when it first emerged from the sea, was called Calliste. Therasia was afterwards tom away from it; between the two there presently arose Autumate, also called Hiera; and in our age Thia near Hiera". Seneca refers apparently to the events mentioned by Pliny, when he states ( $\mathrm{C}_{\mathrm{s}} \mathrm{s}$. Nat. ii. 26), upon the authority of Posidonius, that an island arose in the Aegaean sea "in the memory of our ancestors" (majorum nostrorum memorin), and that the same thing liappened a second time "in our memory" (nostra memoria) in the consulship of Valerius Asiaticus [A. D. 46]. (Comp. Qu. Nat. vi. 21.)

According to the preceding statements there would have been tive different eruptions of islands in the space of little more than 200 years. First Thera and Therasia themselves appeared in s. c. 237, according to Pliny; secondly Hiera, according to Eusebius, Justin, Strabo, and Plutarch, in e. c. 197; thirdly Hiera or Automate, according to Pling, 130 years later than the first occurrence, consequently in B. c. 107; fourthly, according to Pliny, 110 years afterwards. Thia, that is in A. D. 3; fifthly, according to Seneca and other writers, who will be mentioned presently, an island in the reign of the emperor Claudius, A. d. 46.

Now it is evident that there is some gross error in the text of Pliny, or that he has made use of his authorities with a carelessness which is not unusual with him. The most surprising thing is, that he has omitted the eruptions of the islands in B. c. 197 and A.D. 46, which are guaranteed by several authorities. His statement that Thera and Theravia first appeared in the 4 th year of the 135th Olympiad,

## THERA.

i. e. в. C. 237, is absurd, as they are mentioned by Callinus and Herodotus, and must have existed even long before the time of those writers; but if we suppose a slight error in the numerals in the text of Pliny (reading "Olympiadis cxxxxy anno quarto" instead of "Olympiadis exxxy anno quarto"), we have the very year (b.c. 197) in which Eusebius and Justin place the appearance of Hiera. There can be little doubt, therefore, that Pliny's authorities referred to this event, and that it was only through carelessness that he spoke of the appearance of Thera and Therasia in that year. Thus the first statement of Pliny may be reconciled with the accounts of Eusebius, Justin, and the other writers. The appearance of the second island, to which he falsely transfers the name of Hiera from the earlier occurrence, must be placed in b.c. 67 , according to the corrected chronology. This island no longer exists; and it must therefore either have been thrown up and disappeared again immediately, as was the case

THERA.
1159
in the eruption of 1650 , or it was simply an addition to the ancient Hiera, of which there are some instances at a later period. It is apparently to this eruption that the statement of Posidonius, quoted by Seneca, refers. The last statement of Pliny that a new island, named Thia, was thrown up 2 stadia from Thia in the consulship of M. Junius Silanus and L. Balbus, on the 8th of July, is so exact that it seems hardly possible to reject it; but here again is an error in the date. If we take the numbers as they stand, this event would have happened in A.D. 3 , or, according to the corrected numbers, in A. D. 43, whereas we know that M. Junius Silanus and L. Balbus were consuls in A.D. 19. No other writer, however, speaks of an eruption of an island in this year, which, if it actually happened, must again have disappeared. Moreover, it is strange that Pliny should have passed over the eruption of the real Thia, or Mikra Kamméni, which occurred in his lifetime, in the consulship of Valerius Asiaticus, and in

4 IE 4
the reign of Claudius, A.d. 46. This evert, with the difference of only a single year, is mentioned by several writers. (Senec. Qu. Nat. ii. 26, vi. 21 ; Dion Cass. Ix. 29; Aurel. Vict. Caes. 4, Epit. 4 ; Oros. vii. 6; Amm. Marc. xvii. 7; Georg. Cedren. i. p. 197, ed. Par.) Moreover Pliny himself, in another passage (iv. 12. s. 23), says that Thia appeared in our age ("in nostro aevo"), which can hardly apply to the consulship of Silanus and Balbus, since he was not born till A.D. 23.

In A.d. 726, during the reign of Len the Isaurian, Hiera, or the Palaea Kamméni, received an augmentation on the NE. side. (Theoph. Chronogr. p. 338, d. Paris. ; Cedren. i. p. 454, ed. Paris.; Nicephor. p. 37, ed. Pur.) There have been several eruptions in modern times, of which a full account is given by Lient. Leycester and koss. Of these one of the most important was in 1573, when the Mikra Kamméni is said to have been formed. But as we have already seen from soveral authorities that an island was formed in the reign of Claudius, A.D. 46, we must suppose either that the last-mentioned island sunk into the sea at some unknown periud, and made its appearance a second time us the Mikra Kamméni in 1573 , or that there was only an augmentation of the Milra Kammeni in this year. The latter supposition is the more probable, especially since Father Richard, who records it, was not an eye-witness, but derived his information from old people in the island. There was another terrible eruption in 1650 , which Father Richard himself saw. It broke out at an entirely different spot from all preceding eruptions, outside the gulf, off the NE. coast of Thera, about 3 $\frac{1}{2}$ miles from C. Kolumbo, in the direction of los and Anydros. This submarine outbreak lasted about three months, covering the sea with pumice, and giving rise to a shoal, which was found by the English Survey to have 10 fathoms water over it. (See map, A.) At the same time the island of Thers was violently shaken by earthquakes, in which many houses were overthrown, and a great number of persons and animals were killed by the pestilential vapours emitted from the volcano. The sea inundated the flat eastern coast of the island to the extent of two Italian miles inland. The ruins of two ancient towns at Perissa and Kamari were disinterred, the existence of which was previously anknown, and which must have been overwhelmed by some previous eruption of volcanic matter. The road also, which then existed round Cape Messa-Vouno, was sunk beneath the waters.

For the next 50 years, or a little longer, the volcanic fires slept, but in 1707 they burst forth with redoubled fury, and produced the largest of the three burut islands, the Nea Kamméni. It originally consisted of two islands. The first which rose was called the White Island, composed of a mass of pumice extremely porous. A few days afterwards there appeared a large chain of dark rocks, composed of brown trachyte, to which the name of the Black Island was given. These two islands were gradually united; and in the course of the eruptions, the black rocks became the centre of the actual island, the Nea Kamméni. The White Island was first seen on the 23 rd of May, 1707, and for a year the discharges of the volcano were incessant. After this time the eruptions were less frequent; but they continued to occur at intervals in 1710 and 1711; and it was not till 1712 that the fires of the volcano became extinct. The island is now about $2 \frac{1}{2}$ miles in circuit, and has a perfect cone at its SE. side,
which is 351 feet high. From 1712 down to the present day there has been no further eruption.

There are several thermal and mineral sprines at Thera and the surrounding islands, of which Lieut. Leycester gives an account, and which are more fully described by Landerer in the treatise entitled
 Athens, 1835. The most important are the iron springs in a bay on the SE. side of Nea Kamrneni. There are springs on the NE. side of Palaca Kammeni, likewise near Cape Exomiti in the south of Thera, and at other places. Fresh water springs are very rare at Thera, and are only found round Mount Elias springing from the limestone. The inhabitants depend for their supply of water upon the raiu which they catch in the tanks during the winter.

The principal moxiern town of the island is now called Thera, or Plisa, and is situated in the centre of the carve of the gulf. When Tournefort visited Thera, the capital stood upon the pmmontory Skaro, a little to the N . of the present capital, and immediately under the town of Merovouli. The promontory Skaro projects about one third of a mile into the sea; and upon it are the remains of a castle built by the dukes of Naxos. The chief town in the island, after the capital, is Epanomeria. on the NIW. promontory, and directly opposite to Therasia. As space is of the utmost ralue in this omall island, all the principal towns are built upon the very edge of the cliffs, and present a very singular appearance, perched in some cases more than 900 feet above the sea. Wood being very scarce, the houses are excavated in the face of the rast beds of pozzolana. In order to make approaches to the towns upon the cliffs, the inhabitants have cot zig-zae stairs or roads in the sides of the precipices. The ruad upon the summit runs along the edjre of the precipices, and, in many cases, over the habitations, which are built in the face of them. The population of the island in 1848 was about 14,000 , and, including Therasia, about 14,380 . In the time of Tournefort there were 10,000 inhabitants, so that the increase has been nearly a third in about 150 years. The island is carefully cultivated ; and the chief pmoduction is wine, which is mostly exported to the Russian ports in the Black Sea.

The antiquities of the island have been explained at length by Russ and Lieut. Leycester. There are remains of an ancient city situated on the SE. point of the island, apon the summit of Sessa-Vouno, a mountain about 1100 feet above the level of the sea. connected with Mount Elias br the ridge of the Sellada. The mountain of Messa-Vorno slopes suddenly off to the precipices on the NE. side, which rise perpendicularly 600 feet above the water and form the cape of the same name. The walls exhibit masonry of all ages, from the most ancient Cyclupean to the regular masonry of later times. The walls may still be traced, and enclose a circuit of only seven-tenths of a mile; but the houses appear to have been built terrace-fashion upon the side of the hill. Several inscriptions, fragments of sculpture, and other antiquities, have been discorered here. The name of this city has been a subject of some dispute. In an inscription found below Messa-Vouro, at Kamari, in the church of St. Nicholus, the name Oea occurs, which, as wo have already seen, is one of the two towns mentioned by Pwlemy. But in an inscription upon some steps cut out of the rock of Messa-Vouno we find Oripa rodis. Ross, huwever, does not consider this to be a proof that

Thera was the name of the city, supposing that wodas here signifies only the political community of the Theraeans. On the other hand, it was so usual for the islands of the Aegaean to possess a capital of the same name, that, taken in connection with the inscription last mentioned, it is probable, either that Ptolemy has accidentally omitted the name of the capital, or that in his time the Theraeans had removed from the lofty site at Messa- Vouno to Dea upon the sea-coast at Kamari, where submarine ruins still exist. Upon the other or S. side of the Cape MessaVouno, at Perissa, there are also so many ancient remains as to lead us to suppose that this was the site of an ancient city, but no inseription has been discovered to give a clue to its name. Upon either side of the mountain of Messa. Vouno there are numerous tombs.

South of Perissa is C. Exomiti, and a little to the N . of this cape there are the remains of an ancient city, which is probably the Eleusis of Ptolemy. Here are the ruins of a mole under water, and upon the side of the mountain many curious tombs. There are likewise some ruins and tombs at C. Kolumbo, in the NE. of the island, which Ross conjectures may be the site of Delaenae. The islund of Therasia possessed a town of the same name (Ptol. iii. 15. § 28), the ruins of which were discovered by Ross opposite Epanomeria in Thera. (Besides the earlier writers, such as Tournefort and others, the reader is particularly referred to Ross, Reisen auf den Griechischen Iuseln, vol. i. pp. 53, seq., 86, seq., 180, seq.; and Lieut. Leycester, Some Account of the Volcanic Group of Santorin or Thera, in the Journal of the Royal Geographical Suciety, vol. xx. p. 1, seq.)

THERAMBOS or THRAMBUS (Eepdu6as, Herod. vii. 123; $\Theta \rho d \mu 6 o s$, Steph. B. s. v.: $\Theta \rho a \mu 6 \eta t s$, Scylax, p. 26; Өpaubouvía סetpás, Lycophr. 1404), a town of the peninsula Pallene, in Chalcidice in Macedonia, is called a promontory by Stephanus B., and is hence supposed by Leake (Northern Greece, vol. iii. p. 156) to have oceupied a position very near the promontory Canastraeum, the most southerly point of Pallene; but from the order of the names in Scylax we would rather place it at the promontory upon the western side of the peninsula, called Posidium by Thucydides (ir. 129).

Theranda, a town of Muesia, now Trenonitza (Gengr. Rav. iv. 15; Tab. Peut.). [T. H. D.]

THERAPNAE ( $\Theta \epsilon \rho d \pi \nu a t:$ Eth. $\Theta \in \rho a \pi \nu a i o s)$, a place in the territory of Thebes, between this city and the Asopus. (Eurip. Bacch. 1029 ; Strab. ix. p. 409; Leake, Northern Greece, vol. ii. p. 369.)
therapne. [Sparta, p. 1029, b.]
THERA'SIA. [Thera.]
THERIO'DES SINUS ( $\Theta \eta \rho \iota \omega ́ \delta \eta s ~ \kappa \delta \lambda \pi o s, ~ P t o l$. rii. 3. § 2), a gulf on the coast of the Sinae, between the promontories Notium ( $\mathrm{N} \delta \mathrm{c}_{\mathrm{t}}, 0 \nu$ ), and Satyron (Earúpwr). Perhaps the gulf of Tonkin, or that between the Cape St. James and the river of Campodja.
[T. H. D.]
THERMA. [Thessalonica.]
THERMAE ( ©́ppaa, Eth. Thermitanus) was the name of two cities in Sicily, both of which derived their name from their position near hot springs.

1. The northern Thermae, sometimes called for distinction's sake Themmae Himerenses (now Termini), was situated on the N. coast of the island, in the immediate neighbourhood of the more ancient city of Himera, to the place of which it may be considered as succeeding. Hence its history is given in the article Himkra.
2. The southern Thermae, or Thermae Selinuntine (Sciacca), was situated on the SW. coast of the island, and, as its name imports, within the territory of Selinus, though at a distance of 20 miles from that city in the direction of Agrigentum. There can be no doubt that it occupied the same site as the modern town of Sciacca, about midway between the site of Selinus and the month of the river Halycus (Phatani), where there still exist sulphureous waters, which are in constant use. (Smyth's Sicily, p. 217 ; Cluver. Sicil. p. 223.) We have no account of the existence of a town on the site during the periox of the independence of Selinus, though there is little duubt that the thermal waters would always have attracted some population to the spot. Nor even under the Romans did the place attain to anything like the same importance with the northern Thermae; and there is little doubt that Pliny is mistaken in assigning the rank of a colonia to the southern instead of the northern town of the name. [Himera.] Strabo mentions the waters ( $\tau \dot{a}$ ï $\delta a \tau \alpha$ тà $\sum_{i \in \lambda ı v o u v t i a, ~ S t r a b . ~ v i . ~ p . ~ 275) ; ~ a n d ~ t h e y ~ a r e ~}^{\text {a }}$ again noticed in the Itineraries under the name of Aquae Labodes or Labrodes (Itin. Ant. p. 89 ; Tab. Peut.)
[E. H. B.]
THERMAICUS SINUS. [Thessaionica.]
THERMO'DON ( $\Theta \in \rho \mu \omega \delta \sigma \omega \nu$ : Thermeh), a river of Pontus, celebrated in the story about the Amazons, is described by Pliny (vi. 3) as having its sources in the Amazonian mountains, which are not mentioned by any other ancient writer, but are believed still to retain their ancient name in the form of Mason Dagh. (Hamilton, Researches, i. p. 283.) Strabo (xii. p. 547) places its many sources near Phanaroea, and says that many streams combine to form the Thermodon. Its course is not very long, but its breadth was nevertheless three plethra, and it was a navigable river (Xen. Anab. v. 6. § 9, vi. 2. § 1 ; Arrian, Peripl P.E. p. 16.) It discharged itself into the Euxine near the town of Themiscyra, at a distance of 400 stadia to the north-east of the mouth of the Iris. This river is very often noticed by ancient writers. See Aeschyl. Prom. 274, Suppl. 290; Herod. ix. 27 ; Scylax, p. 33; Strab. i. p. 52, vii. p. 298 ; Anon. Peripl. P. E. p. 10 ; Ptol. v. 6. § 4; Pomp. Mela. i. 19; Plin. xi. 19, $1 \times x$ vii. 37 ; Virg. Aen. xi. 659 ; Ov. ex Pont. iv. 19. 51 ; Propert. iv. 4. 71, and many other passages. [L.S.]

THERM(O'PYLAE ( $\Theta \in \rho \mu o \pi \dot{\prime} \lambda a t$ ), or simply PYLAE (חú入al), that is, the Hot Gates or the Gates, a celebrated narrow pass, leading from Thessaly into Locris, and the only mad by which an enemy can penetrate from northern into southern Greece. It lay between Mount Oeta and an inaccessible morass, forming the edge of the Maliac gulf. In consequence of the change in the course of the rivers, and in the configuration of the coast, this pass is now very different from its condition in ancient times; and it is therefore necessary first to give the statement of Herodotus and other ancient writers respecting the locality, and then to compare it with its present state. In the time of Herodotus the river Spercheius flowed into the sea in an easterly direction at the town of Anticyra, considerably W. of the pass. Twenty stadia $\mathbf{E}$. of the Spercheius was another river, called Dyras, and again, 20 stadia further, a third river, named Melas, 5 stadia from which was the city Trachis. Between the mountains where Trachis stands and the sea the plain is widest. Still further E. wus the Asopus, issuing from a rocky gorge ( $\delta$ ia $a \phi \dot{\alpha} \dot{\xi}$ ),
and E. acain is a small stream, named Phoenix, flowing into the Asopus. From the Phoeris to Thermopylae the distance, Herodotus says, is 15 stadia. (Herod. vii. 198-200.) Near the united streans of the Phoenix and the Asopus, Mt. Oeta approached so close to the morass of the gulf as to leave space for only a single carriage. In the immediate vicinity of the pass is the town of Anthela, celebrated for the temples of Amphictyon and of the Amphictyonic Demeter, containing seats for the members of the Amphicytonic council, who held here their autumnal meetings. At Anthela Mount Oeta recedes a little from the sea, learing a plain a little more than half a mile in breadth, but again contracts near Alpeni, the first town of the Locrians, where the space is again only sufficient for a single carriage. At this pass were some hot springs, which were consecrated to Hercules (Strab. ix. p. 428), and were called by the natives Chytri or the Pans, on account of the cells here prepared for the bathers. Across this pass the Phocians had in ancient times built a wall to defend their country against the attacks of the Thessalians, and had let loose the hot water, so as to render the pass impracticable. (Herod. vii. 200, 176.) It appears from this description that the proper Thermopylae was the narrow pass near the Locrian town of Alpeni; but the name was also applied in general to the whole passage from the mouth of the Asopas to Alpeni. Taking the term in this acceptation, Thermopylae consisted of the two narrow openings, with a plain between them rather more than a mile in length and about half a mile in breadth. That portion of Mt. Oeta, which rises immediately above Thermopylae is called Callidromon by Livy and Strabo, but both writers are mistaken in describing it as the lighest part of the range. Livy says that the pass is 60 stadia in breadth. (Liv. xxxvi. 15 ; Strab. ix. p. 428.)

In consequence of the accumulation of soil brought down by the Spercheius and the other rivers, three or four miles of new land have been formed, and the mountain forming the gates of Thermopylae is no longer close to the sea. Moreover, the Spercheius, instead of flowing into the sea in an easterly direction, considerably W. of Thermopylae, now continues its course parallel to the pass and at the distance of a mile from it, falling into the sea lower down, to the E. of the pass. The rivers Dyras, Melas, and Asopus, which formerly reached the sea by different mouths, now discharge their waters into the Spercheius. In addition to this there has been a copious deposit from the warm springs, and a consequent formation of new soil in the pass itself. The present condition of the pass has been described by Colonel Leake with his usual clearness and accuracy. Upon entering the western opening, Leake crossed a stream of warm mineral water, running with great rapidity towards the Spercheius, and leaving a great quantity of red deposit. This is undoubtedly the Phoenix, which probably derived its name from the colour of the sediment. After crossing a second sait-spring, which is the source of the Phnenix, and a stream of cold salt water, Leake entered upon that which Herodotus calls the plain of Anthela, which is a long triangular slope, formed of a hard gravelly soil, and covered with shrubs. There is an easy descent into this plain over the mountains, so that the western opening was of no importance in a military point of view. Upon reaching the castern pass, situated at the eod of the plain
of Anthela, the traveller reaches a white elerated soil formed by the depasit of the salt-springs of the proper Thermopylae. There are two principal sources of these springs, the upper or western being immediately at the foot of the highest part of the cliffs, and the lower or eastern being 200 yards distant. From the lower source the water is conducted in an artificial canal for a distance of $\mathbf{4 0 0}$ yards to a mill. This water emits a strong stulphureous vapour, and, as it issues from the mill, it pours out a great volume of smoke. Beyond the hill are conical heights, and in their neighbourhood are two salt ponds, containing cold water; but as this water is of the same composition as the hot springs, it is probably also hot at its issue. Leake observes that the water of these pools, like that of the principal hot source, is of a dark blue colour, thus illustrating the remark of Pausanias, that the bluest water he ever kaw was in one of the baths at Therm"pylae. (Paus.iv. 35. § 9.) The springs at this pass are much hotter, and have left a far greater deposit than those at the other end of the plain, at the opening which may be called the false Thermopyliae. Issuing from the pass are foundations of a Hellenic wall, doubtless the remains of works by which the pass was at one time fortified; and to the left is a tumulus and the foundations of a circular monument. Upwards of a mile further is a deep ravine, in which the torrents descending from Mit. Callidromon, are collected into one bed, and which afford the easiest and most direct passage to the summit of the mountain. This is probably the mountain path by which the Persians, under Hydarnes, descended in the rear of Leonidas and his companions. This path, as well as the mountain over which it leads, is called Anopaea ( ${ }^{\eta}$ 'Avónaia) by Herodotus, who does not use the name of Callidromon. He describes the path as beginning at the gorge of the Asopus, passing over the crest of the mountain, and terminating near Alpeni and the rock called Melampygus, and the seats of the Cercopes, where the road is narrowest. (Herod. vii. 216.) The history of the defence of Thermopylae by Leonidas is too well known to require to be related here. The wall of the Phocians, which Leonidas repaired, was probably built a little eastward of the western saltspring. When the Spartan king learnt that Hy darnes was descending in his rear, he adranced beyond the wall into the widest part of the pass, resolved to sell his life as dearly as possible. Upon the arrival of Hydarnes, the Greeks retired behind the wall, and touk up their position upon a hill in the pass (ко入cuós iv $\tau \hat{\eta}$ cíd $\delta \delta \varphi$ ), where a stune lion was afterwards erected in honour of Leonidas. This hill Leake identifies with the western of the two small heights already described, as nearest to the position of the Phocian wall, and the narrowest part of the pass. The other height is probably the rock Melampygus.

Thennopylae is immortalised by the heroic defence of Leomidas; but it was also the scene of some important strugcles in later times. In b. c. 279 an allied army of the Greeks assembled in the pass to oppose the Gauls under Brennus, who were marching into southern Greece with the view of pillaging the temple of Delphi. The Greeks held their ground for several days against the attacks of the Gauls, till at length the Heracleotae and Aenianes conducted the invaders across Mount Callidrumon by the saine path which Hydarnes had followed two centuries before. The Greeks, finding their position

## THERMUM.

no longer tenable, embarked on board their ships and retired without further loss. (Paus. x. 19-22.)
In B. c. 207, when the Romans were carrying on war in Greece against Philip, king of Macedonia, the Aetolians, who were then in alliance with the Romans, fortified Thermopylae with a ditch and a rampart, but Philip shortly afterwards forced his way through the pass. (Liv. xxviii. 5, 7; Polyb. x. 41.) In B. c. 181, Antiochus, who was then at war with the Romans, took up his position at Thermopylae, which he fortified with a double rampart, a ditch, and a wall; and, in order to prevent the Romans from crossing the mountains and descending upon his rear, he garrisoned with 2000 Aetolians the three summits, named Callidromum, Teichius, and Rhoduntia. The consul Acilius sent some troops against these fortresses and at the same time attacked the army of Antiochus in the pass. While

THERMUM.
1163 the battle was going on in the pass, the Roman detachment, which had succeeded in taking Callidromum, appeared upon the heights, threatening the king's rear, in consequence of which Antiochus immediately took to flight. (Liv. xxxvi. 15-19.) There are still remains of three Hellenic fortresses upon the heights above Thermopylae, which probably represent the three places mentioned by Livy. Appian (Syr. 17) speaks only of Callidromum and Teichins, but Strabo (ix. p. 428) mentions Rhoduntia also. Procopius relates that the fortifications of Thermopylae were restored by Justinian (de Aed. iv. 2).
(On the topography of Thermopylae, see the excellent account of Leake, Northern Greece, vol. ii. pp. 5, seq., 40, seq. ; there is also a treatise by Gordon, Account of two Visits to the Anopaea or the Highlands above Thermopylae, Athens, 1838, which the writer of this article has not seen.)

THERMUM, THERMUS or THERMA ( $\tau \delta$ © $\rho \cdot \rho$ -
 ©épuos, Steph. B. s.v.: Eth. ©ép $\rho$ uos: Vlokho), the chief city of Aetolia during the flourishing period of the Aetolian League, and the place where the meetings of the league were usually held and an annual festival celebrated. It possessed a celebrated temple of Apollo, in connection with which the festival was probably celebrated. It was situated in the very heart of Aetolia, N. of the lake.Trichonis, and on a height of Mt. Panaetolium (Viena). It was considered inaccessible to an army, and from the strength of its situation was regarded as a place of refuge, and, as it were, the Acropolis of all Aetolia. The road to it ran from Metapa, on the lake Trichonis, through the village of Pamphia. The city was distant 60 stadia from Metapa, and 30 from Pamphia ; and from the latter place the road was very steep and dangerous, running along a narrow crest with precipices on each side. It was, however, surprised by Philip V., king of Macedonia, in his invasion of Aetolia in B c. 218. The Aetolians,

who had never imagined that Philip would have penetrated so far into their country, had deposited here all their treasures, the whole of which now fell into the hands of the king, together with a vast quantity of arms and armour. He carried off the most valuable part of the spoil, and burnt all the rest, among which were more than 15,000 suits of armour. Not content with this, he set fire to the sacred buildings, to retaliate for the destruction of Dium and Dodona. He also defaced all the works of art, and threw down all the statues, which were not less than 2000 in number, only sparing those of the Gods. (Pol.v. 6-9, 13.) A few years afterwards, when the Aetolians had sided with the Romans, Philip again surprised Thermus (about b. c. 206), when he destroyed everything which had escaped his ravages in his first attack. (Pol. xi. 4.) We have no further details of the history of Thermum. Polybius alludes, in one or two other passages (xviii. 31, xxviii. 4), to the meetings of the league held thers. In the former of these passages Livy (xxxiii. 35) has misunderstood the words $\tau \boldsymbol{\eta} \boldsymbol{\nu}$

1164
THESPIAE.
 Thermopylae.

Polyb:us's account of Philip's first invasion of Aetolia, which resulted in the capture of Thermum, supplies us with the chief information respecting the towns in the central plain of Aetolia. Philip set out from Limnaea. on the south-eastern corner of the Ambraciot gulf, crossed the Achelous between Stratus and Conope, and marched with all speed towards Thermum, leaving on his left Stratus, Agrinium, and Thestienses ( $\Theta \in \sigma \tau l \in i s)$, and on his right Conope, Lysimachia, Trichonium, and Phoeteum. He thus arrived at Metapa, on the lake Trichonis, and from thence marched to Thermus by the raad already mentioned, passing by Pamphia in his way. He returned by the same road as far as Metapa, but from the latter place he marched in one day to a place called Acrae, where he encamped, and on the next day to Conope. After remaining a day at Conope, he marched up the Acbelous, and crussed it near Stratus.

The remains of the walls of Thermum show that the city was about $2 \frac{1}{2}$ miles in circumference. It was in the form of a triangle on the slope of a pyramidal hill, bordered on either side by a torrent flowing in a deep ravine. The only remains of a public edifice within the walls consist of a square, pyramidal, slapeless mass of stones. (Leake, Northern Greece, vol. i. p. 126, \&c.)

THERVINGI. [Gothi, p. 1009.]
 Hom. Il. ii. 498; Herod. viii. 50; Paus. ix. 26. § 6: Eth. $\Theta \in \sigma \pi \iota \epsilon \dot{u}$, Thespiensis, fem. $\Theta \in \sigma \pi$ ias, $\Theta \in \sigma \pi$ ís : Adj. Өє $\sigma \pi$ acós, Thespius, Thespiacus), an ancient city of Boeotia, situated at the fuot of Mt. Helicon, louking towards the south and the Crissuean gulf, where stoxd its port-town Creusa or Creusis. (Strab. ix. p. 409; Paus. ix. 26. § 6; Steph. B. s. v.) Thespiae was said to have derived its name from Thespia, a daughter of Asopus, or from Thespius, a son of Erechtheus, who migrated from Athens. (Paus. l. c.; Diod. iv. 29.) The city is mentioned in the catalogue of Homer. (Il. ii. 498.) Thespiae, like Ilataea, was one of the Boeotian cities inimical to Thebes, which circumstance affected its whole history. Thus Thespiae and Plataea were the only two Buentian cities that refused to give earth and water to the heralds of Xerxes. (Herod. vii. 132.) Seven hundred Thespians joined Leonidas at Thermowhe; and they reananed to perish with the 300 Spartans, when the other Greeks retired. (Herod. vii. 202, 222.) Their city was burnt by Xerxes, when ne overran Boentia, and the inhabitants withdrew to Peloponnesus (Herod. viii. 50.) The survivors, to the number of 1800 , fought at the battle of Plataea in the following year, but they were reduced to such distress that they had no Leavy armour. (Herod. ix. 30.) After the expulsion of the Persians from Greece, Thespiae was rebuilt, and the inhabitants recruited their numbers by the admission of strangers as citizens. (Herod. viii. 75.) At the battle of Delium (B. c. 424) the Thespians fought on the left wing against the Athenians, and were almost all slain at their post. (Thuc. iv. 93, seq.) In the following year (в. c. 423), the Thebans destroved the walls of Thespiae, on the charge of Atticism, the Thespians being unable to offer any resistance in consequence of the heavy loss they had sustained while fighting upon the side of the Thebans. (Thuc. iv. 133.) In b. c. 414 the democratical party at Thespiac attempted
to overthrow the existing government; but the latter receiving assistance from Thebes, many of the conspirators withdrew to Athens. (Thuc. vi. 95.) In B. C. 372 the walls of Thespiae were again destroyed by the Thebans. According to Diodorus (xv.46) and Xenophon (Hell. vi. 3.§1) Thespiae was at this time destroyed by the Thebans, and the inhabitants driven out of Boeotia; but this happened atter the battle of Leuctra, and Mr. Grote (list. of Greece, vol. x. p. 219) justly infers fron a pasisge in lsucrates that the fortifications of the city were alone demolished at this period. Pausanias expressly states that a contingent of Thespians was present in the Theban army at the time of the battle of Leuctra, and availed themselves of the permission of Epaminondas to retire before the battle. (Paus. ix. 13. § 8, ix. 14. § 1.) Shortly afterwardy the Thespians were expelled from Boeotia by the Thebans. (Paus. ix. 14. § 2.) Thespiae was afterwards rebuilt, and is mentioned in the Roman wars in Greece. (Polyb. xxvii. 1; Liv. xlii. 43.) In the time of Strabo, Thespiae and Tanagra were the only places in Boertia that deserved the name of cities. (Strib. ix. p. 410.) Pliny calls Thespiae a free town (" liberum oppidum," iv. 7. s. 12). It is also mentioned by Ptolenny (iii. 15. § 20) and in the Antonine Itinerary (p. 326. ed. Wess.), and it was still in existence in the sisth century (Hierocl. p. 645, ed. Wess.).

Eros or Love was the deity chiefly worshipped at Thespiae; and the earliest representation of the god in the form of a rude stone still existed in the city in the time of Pausanias (ix. 27. § 1). The courtesan Phryne, who was born at Thespiae, presented to her native city the celebrated statue of Love by Praxiteles, which added greatly to the prosperity of the place in consequence of the great numbers of strangers who visited the city for the purpose of seeing it. (Dicaearch. § 25, ed. Miuller; Cic. Verr. iv. 2; Strab. ix. p. 410, who erroneously calls the courtesan Glycera; Paus. ix. 27. § 3.) The story of the manner in which Phryne became possessed of this statue, and its subsequent history, are related in the life of Praxiteles. [Dict. of Biogr. Vol. III. pp. 520, 521.] In the time of Pausanias there was only an imitation of it at Thespiae by Menodorus. Among the other works of art in this city Pausanias noticed a statue of Eros by Lysippus, statues of Aphrodite and I'hryne by Praxiteles; the agora, containing a statue of Hesiod; the theatre, a temple of Aphrodite Melaenis, a temple of the Dinses, containing their figures in stone of small size, and an ancient temple of Hercules. (Paus. ix. 27.) N.xt to Eros, the Muses were specially honoured at Thespiae; and the festivals of the ' $\mathrm{E} \mu \omega \tau i \delta i a$ and Muvictia criebrated by the Thespians on Mt. Helicon, at the end of every four years, are mentioned by several ancient writers. (Paus. ix. 31. § 3; Plut. Amat. 1; Athen. xiii. p. 561 ; K. F. Hermann, Lehrbuch der gottesd. Alterth. § 63, n. 4.) Hence the Muses are frequently called Thespiades by the Latin writers. (Varr. L. L. vii. 2; Cic. Verr. ii. 4: Ov. Met. v. 310; Plin. xxxvi. 5. s. 4, § 39. ed. Sillig.)

The remains of Thespiate are situated at a plare called Lajka from a deserted village of that name near the villace of Erimokastro or Rimokastro. Unlike most other Greek cities, it stands in a plain surrounded by hills on either side, and its founders appear to have chisen the site in consequence of its abundant supply of water, the sources of the
river Kanavari rising here．Leake noticed the foundations of an oblong or oval enclosure，built of very solid masonry of a regular kind，about half a mile in circumference；but he observes that all the adjacent ground to the SE．is covered，like the interior of the fortress，with ancient foundations， squared stones，and other remains，proving that if the enclosure was the only fortified part of the city，many of the public and private edifices stood without the walls．The site of some of the ancient temples is probably marked by the churches，which contain fragments of architraves，columns，and other ancient remains（Leake，Northern Greece，vol．ii． p． 479 ，seq．；Dodwell，vol．i．p．253．）

COIN OF THESPIAE．
THESPRO＇TI，THESPRO＇TIA．［EpeIRUs．］
THESSA＇LIA（ $\Theta \in \sigma \sigma a \lambda i a$ or $\Theta \epsilon \tau \tau a \lambda i a$ ：Eth．
 Өetтa入ís，Thessalis：Adj．Өéбадıкós，Өetтa入ıkós， Thessalicus，Thessalius），the largest political divi－ sion of Greece，was in its widest extent the whole conntry lying N ．of Thermopylae as far as the Cambunian mountains，and bounded upon the W． by the range of Pindus．But the name of Thes－ saly was more speeifically applied to the great plain，by far the widest and largest in all Greece， enclosed by the four great mountain barriers of Pin－ dus，Othrys，Ossa and Pelion，and the Cambunian mountains．From Mount Pindus，－the Apennines or back－bone of Greece，－which separates Thes－ saly from Epeirus，two large arms branch off towards the eastern sea，running parallel to one another at the distance of 60 miles．The northern，called the Cambunian mountains，forms the boundary between Thessaly and Macedonia，and terminates in the sum－ mit of Olympus，which is the highest mountain in all Greece［Olympus］．The sonthern arm，named Othrys，separates the plain of Thessaly from Malis， and reaches the sea between the Malian and Paga－ saean gulfs［Othrys］．The fourth barrier is the range of mountains，first called Ossa and afterwards Pelion，which run along the coast of Thessaly upon the E．，nearly parallel to the range of Pindus［Ossa； Pelion］．The plain of Thessaly，which is thus enclosed by natural ramparts，is broken only at the NE．corner by the celebrated vale of Tempe，which separates Ossa from Olympus，and is the only way of entering Greece from the N．，except by a pass across the Cambunian mountains．This plain，which is drained by the river Peneius and its affluents，is said to have been originally a vast lake，the waters of which were afterwards carried off through the vale of Tempe by some sudden convulsion，which rent the rocks of the valley asunder．（Herod．vii． 129．）［Tкмpe．］The lakes of Nessonis and Boe－ beis，which are connected by a channel，were sup－ posed by Strabo（ix．p．430）to have been the re－ mains of this vast lake．In addition to this plain there are two other districts included under the ge－ neral name of Thessaly，of which one is the long and
narrow slip of rocky coast，called Magnesia，extending from the vale of Tempe to the gulf of Pagasae，and lying between Mounts Ossa and Pelion and the sea； while the other，known under the name of Malis， is quite distinct in its physical features from the rest of Thessaly，being a long narrow valley between Mounts Othrys and Oeta，through which the river Spercheius flows into the Maliac gulf．

The plain of Thessaly properly consists of two plains，which received in antiquity the name of Upper and Lower Thessaly；the Upper，as in similar cases，meaning the country near Mount Pindus most distant from the sea，and the Lower the country near the Thermaic gulf．（Strab．ix．pp．430，437．） These two plains are separated by a range of hills be－ tween the lakes Nessonis and Boebeis on the one hand， and the river Enipeus on the other．Lower Thes－ saly，which constituted the ancient division Pelas－ giotis，extends from Mounts Titarus and Ossa on the N．to Mount Othrys and the shores of the Pagasaean gulf on the S ．Its chief town was Larissa．Upper Thessaly，which corresponded to the ancient divi－ sions Thessaliotis and Histiaeotis，of which the chief city was Pharsalus，stretches from Aeginium in the N．to Thaumaci in the S．，a distance of at least 50 miles in a straight line．The road from Ther－ mopylae into Upper Thessaly entered the plain at Thaumaci，which was situated at the pass called Coela，where the traveller came in sight of a plain resembling a vast sea．（Liv．xxxii．4．）［THAU－ mact．］

The river Peneins，now called the Salamvria or
 NW．extremity of Thessaly，and is composed of streams collected in the valleys of Mount Pindus and the offshoots of the Cambunian mountains．At first it flows through a contracted valley till it reaches the perpendicular rocks，named the Meteora， upon the summits of which several monasteries are perched．Below this spot，and near the town of Aeginium or Stagis，the valley opens out into the vast plain of Upper Thessaly，and the river flows in a general southerly direction．At Tricca，or Trik－ kala，the Peneius makes a bend to the E．，and shortly afterwards reaches the lowest point in the plain of Upper Thessaly，where it receives within a very short space many of its tributaries．Next it passes through a valley formed by a range of hills，of which those upon the right divide the plains of Upper and Lower Thessaly．It then emerges into the plain a few miles westward of Larissa；after passing which city it makes a sadden bend to the N．，and flows through the vale of Tempe to the sea．Although the Peneius drains the greater part of Thessaly，and receives many tribu－ taries，it is in the greater part of its course a shallow and sluggish river，except after the melt－ ing of the snows，when it sometimes floods the surrounding plain．Hence on either side of the river there is frequently a wide graveliy uncultivable space，described by Strabo as потацо́клибтos（ix．p． 430；Leake，Northeria Greece，vol．i．p．420）． When the river is swollen in the spring，a channel near Larissa conducts the superfluous waters into the Karatjai＇r or Mavpo入i $\mu \nu \eta$ ，the ancient Nessonis； and when this basin is filled，another channel conveys the waters into the lake of Karla，the ancient Boebeis．（Leake，iv．p．403．）In the lower part of its course，after leaving Larissa，the Peneius flows with more rapidity，and is full of small vortices， which may have suggested to Homer the epithet
doprupodivns (Il. ii. 753); though, as Leake has remarked, the poet carrics his flattery to an extreme in comparing to silver the white hue of its turbid waters, derived entircly from the earth suspended in them. (Northern Greece, vol. iv. p. 291.)

The principal rivers of Thessaly, according to Herodotus (vii. 129), are the Pencius, Apidanus, Onochonus, Enipeus and Pamisus. The four latter rivers all fow from the S . Of these the most important is the Enipeus, now called the Fersaliti, which flows through the plain of Pharsalus, and falls into the Peneius near Piresiae in the lowest part of the plain. The Apidanus, now called Vrysia, into which the Cuarius (Sojadhitiko) falls, is a tributary of the Enipeus. [Enipeus.] The Pamisus, now called the Bliúri or Piliúri, also joins the Pencius a little to the W. of the Enipeus. The Onochonus, which is probably the same as the Onchestus, flows into the lake Boebeis and not into the Peneius. [For detsils, see Vol. II. p. 483, a.] The chief tributary of the Peneius on the N . is the Titaresius, now called Elassonitiko or Xerághi, which rises in Mt. Titarus, a part of the Cambunian range, and joins the main stream between Larissa and the vale of Tempe. Homer relates (Il. ii. 753, seq.) that the waters of the Titaresius did not mingle with those of the Peneius, but fluated upon the surface of the latter like oil upon water, whence it was regarded as a branch of the infernal river Styx. (Comp. Lacan, vi. 375.) Lcake calls attention to the fact that Strabo (ix. p. 441), probably misled by the epithet (appuposivns) applied by the poet to the Peneius, has reversed the true interpretation of the poet's comparison of the Peneius and the Titaresius, sapposing that the Peneius was the pellucid river, whereas the apparent reluctance of the Titaresius to mingle with the Peneius arises from the former being clear and the latter muddy. (Northern Greece, iii. p. 396, iv. p. 296.) The Titaresius was also called Eurotas (Strab. vii. p. 329) and Horcus or Orcus (Plin. iv. 8. s. 15).

The plain of Thessaly is the most fertile in all Greece. It produced in antiquity 2 large quantity of corn and cattle, which supported a numerous population in the towns, and especially a rich and proud aristocracy, who were at frequent feuds with one another and much given to luxury
 $\sigma \tau \eta$ dтa乡la кal גколабía, Plat. Crit. 15; Athen. xii. p. 564; Theopomp. ap. Athen. vi. p. 260; Dem. Olynth. p. 16). The Thessalian horses were the finest in Greece, and their cavalry was at all times efficient ; but we rarely read of their infantry. The nobles, such as the Aleuadae of Larissa and the Scopadae of Crannon, supplied the poorer citizens with horses; bat there was no class of free equal citizens, from which the hoplites were drawn in other Grecian states. (See Grote, Hist. of Greece, vol. ii. p. 367.) Hence the political power was generally either in the hands of these nobles or of a single man who extablished himself as despot. The numerous flocks and herds of the Scopadae at Cramnon are alluded to by Theocritus ( $I d \times x i .36$ ), and the wealth of the Thessalian nobles is frequently mentioned by the ancient writers.

Thessaly is said to have been originally known by the names of Pyrrha, Aemonia, and Aeolis. (Rhian. ap. Schol. Rhod. iii. 1089 ; Steph. B. s. v. Ainovia; Heral. rii. 176.) The two former appellations belong to mythology, but the latter refers to the time when the country was inhabited by the Aeolian

Pelasgi, who were afterwards expelled from the country by the Thessalians. This people are said to have been immigrants, who came from Thesprotia in Epeirus, and conquered the plain of the Peneius. (Herod. vii. 176, comp. i. 57 ; Strab. ix. p. 444.) The Boeotians are said to have originally dwelt at Arne, in the country afterwards called Thessaly, and to have been expelled by the Thessalian invaders 60 years after the Trojan War. (Thac. i. 12.) The expulsion of the Boeotians by the Thessalians seems to have been conceived as an immediate consequence of the immigration of the Thessalian invaders; but, however this may be, the name of Thessaly is unknown in Homer, who only speaks of the several principalities of which the country was composed. In the Homeric catalogue Pheidippus and Antiphus, who led the Greeks from Carpathus, Cos, and the neighbouring islands, are called the sons of Thessalus, the son of Hercules (Hom. 1l. ii. 676) ; and, in order to connect this name with the Thessalians of Thesprotia, it was reported that these two chiefs had, upon their return from Troy, been driven by a storm upon the coast of Epeirus, and that Thessalus, the grandson of Pheidippus, led the Thessalians across Mount Pindus and imposed his name upon the country. (Vell. Pat. i. 2, 3; Steph. B. 8. ©. $\Delta \omega$ pıov; Polyaen. viii. 44.) There are many circumstances in the historical period which make it probable that the Thessalians were a body of immigrant conquerors; though, if they came from Thesprotia, they must have gradually dropt their original language, and learnt that of the conquered people, as the Thessalian was a variety of the Aeolic dialect. There was in Thessaly a triple division of the population analogous to that in Laconia. First, there were the Thessalians proper, the rich landed proprietors of the plain. Secondly, there were the descendants of the original inhabitants of the country, who were not expelled by the Thessalian conquerors, and who were more or less dependent upon them, corresponding to the Lacedaemonian Perioeci, but, unlike the latter, retaining their original names and their seats in the Amphictyonic council. These were the l'errifakbi, who occupied the mountainous district between Mount Olympus and the lower course of the Peneius; the Magnfites, who dwelt along the eastern coast between Mounts Pelion and Ossa and the sea; the Achaeans, who inhabited the district called Plothiotis, which extended S. of the Upper Thessalian plain, from Mount Pindus on the W. to the gulf of Pagavae on the S.: the DOLOPEs, who occupied the monntainous regions of Pinduc, S. of Phthotis; and the Malians, who dwelt between Phthiotis and Thermopylae. The third class of the Thessalian population were the Penestae, serfs or dependent cultivators, corresponding to the Helots of Laconis, although their condition seems upon the whole to have been superior. They tilled the estates of the great nobles, paring them a certain proportion of the produce, and followed their masters to war upon horseback. They could not, however, be sold out of the country, and they possessed the means of acquiring property, as many of them were said to have been richer than their masters. (Archemach. ap. Athen. vi. p. 264 ; Plat. Leg. vi. p. 777 ; Aristut. Pol. ii. 6. § 3, vii. 9. § 9 ; Dionys. ii. 84.) They were probably the descendants of the original inhabitants of the country, reduced to slavery by the conquering Thesprotians; but when Theopompus states that they were the descendants of the conquered Perrhaebians and Mag-
netes (ap. Athern vi. p. 265), this can only be true of a part of these tribes, as we know that the Penestase were entirely distinct from the subject Perrhaebians, Magnetes, and Achaeans. (Aristot. Folit. ii. 6. § 3.) The Penestae, like the Laconian Helots, frequently rose in revolt against their masters.

In the Homeric poems the names of Perrhaebi, Magnetes, Achaeans, and Dolopes occur; and Achaea Phthiotis was the residence of the great hero Achilles. This district was the seat of Hellen, the founder of the Hellenic race, and contained the original Hellas, from which the Hellenes gradually spread over the rest of Greece. (Hom. Il. ii. 683; Thuc. i. 3; Strab. ix. p. 431 ; Dicaearch. p. 21, ed. Hudson; Steph. B. s. v. 'Endds). The Achaeans of Phthiotis may fairly be regarded as the same race as the Achaeans of Peloponnesus.

Thessaly Proper was divided at an early period into four districts or tetrarchies, named Thessaliotis, Pelasgiotis, Histiaeotis and Phthiotis. When this division was introduced is unknown. It was older than Hecataeus (Steph. B. e. v. Kpouvouv), and was ascribed to Aleuas, the founder of the family of the Aleuadse. (Hellenic. Fragm. 28, ed. Didot; Harpocrat. e. v. Tetpapxia; Strab. ix. p. 430.) This quadruple division continued to the latest times, and seems to have been instituted for political purposes; but respecting the internal government of each we have no precise information. The four districts were nominally united under a chief magistrate, called Tagus; but he seems to have been ouly appointed in war, and his commands were frequently disobeyed by the Thessalian cities."When Thessaly is under a Tagus," said Jason, despot of Pherae, "she can send into the field an army of 6000 cavalry and 10,000 hoplites." (Xen. Hell. vi. 1. § 8.) But Thessaly was rarely united. The different cities, upon which the smaller towns were dependent, not only administered their own affairs independent of one another, but the three must important, Larissa, Pharsalus and Pherae, were frequently at feud with one another, and at the same time torn with intestine faction. Hence they were able to offer little resistance to invaders, and never occapied that position in Grecian history to which their population and wealth would seem to have entitled them. (Respecting the Thessalians in general, see Mr. Grote's excellent remarks, Hist. of Greece, vol. ii. p. 363, seq.)

The history of Thessaly may be briefly dismissed, as the most important events are related under the separate cities. Before the Persian invasion, the Thessalians had extended their power as far as Thermopylae, and threatened to overrun Phocis and the country of the Locrians. The Phocians built a wall across the pass of Thermopylae to keep of the Thessalians; and though artive hostilities seem to have ceased before the Persian invasion, as the wall was at that time in ruins, the two nations continued to cherish bitter animosity towards one another. (Herod. vii. 176.) When Xerxes invaded Greece, the Thessalians were at first oppused to the Persians. It is true that the powerful family of the Alenadae, whom Herodotus calls (vii. 6) kings of Thessaly, had urged Xerxes to invade Greece, and had promised the early submission of their countrymen; but it is evident that their party was in the minority, and it is probable that they were themselves in exile, like the Athenian Peisistratidae. The majority of the Thessalians sent envoys to the confederate Greeks at the Isthmus, urging them to
send a force to the pass of Tempe, and promising them active co-operation in the defence. Their request was complied with, and a body of 10,000 heavy-armed infantry was despatched to Thessaly; but the Grecian commanders, upon arriving at Tempe, found that there was another pass across Mount Olympus, and believing it impossible to make any effectual resistance north of Thermopylae, retreated to their shipe and abandoned Thessaly. (Herod. vii. 172, seq.) The Thessalians, thus deserted, hastened to make their submission to Xerxes; and under the influence of the Aleuadae, who now regained the ascendency in Thessaly, they rendered zealous and effectual assistance to the Persians, After the death of Leonidas and his heroic companions at Thermopylae, the Thessalians gratified their enmity against the Phocians by directing the march of the Persians against the Phocian towns and laying their country waste with fire and sword.

From the Persian to the Peloponnesian wars the Thessalians are rarely mentioned. After the battle of Oenophyta (в. c. 456) had given the Athenians the ascendency in Boeotia, Locris, and Phocis, they endeavoured to extend their power over Thessaly. With this view they marched into Thessaly under the command of Myronides in B. c. 454, for the purpose of restoring Orestes, one of the exiled nobles or princes of Pharsalus, whom Thucydides calls son of the king of the Thessalians. The progress of Myronides was checked by the powerful Thessalian cavalry ; and though he advanced as far as Pharsalus, he was unable to accomplish ansthing against the city, and was compelled to retreat. (Thac. i. 111; Diodor. xi. 85.) In the Peloponnesian War the Thessalians took no part; but the mass of the population was friendly to the Athenians, though the oligarchical governments favoured the Spartans. With the assistance of the latter, combined with his own rapidity and address, Brasidas contrived to march through Thessaly in B. c. 424, on his way to attack the Athenian dependencies in Macedonia (Thuc. iv. 78); but when the Lacedaemonians wished to send reinforcements to Brasidas in the following year, the Thessalians positively refused them a passage through their country. (Thuc. ir. 132.) In B. c. 395 the Thessalians joined the Boeotians and their allies in the league arainst Sparta ; and when Agesilaus marched through their country in the following year, having been recalled by the Spartan government from Asia, they endeavoured to intercept him on his return; but their cavalry was defeated by the skilful manoenvres of Agesilaus. (Xen. Hell. vi. 3. § 3, seq.)

About this time or a little earlier an important change took place in the political condition and relative importance of the Thessalian cities. Almost down to the end of the Peloponnesian War the powerful families of the Aleuadae at Larissa, of the Scopadae at Crannon, and of the Creondae at Pharsalus, possessed the chief power in Thessaly. But shortly befure the close of this war Pherae rose into importance under the administration of Lycophron, and aspired to the snpreinacy of Thessaly. Lycophron overthrew the government of the nobles at Pberae, and made himself tyrant of the city. In prosecution of his ambitious schemes he attacked Larissa; and in B. c. 404 he gained a great victory over the Larissaeans and the other Thessalians who were opposed to him. (Xen. Hell. ii. 3. § 4.) In B. c. 395 Lycoohron was still engaged in a con-

## TIIESSALIA.

test with Larissa, which was then under the government of Medias, probably the head of the Aleuadae. Lycophron was supported by Sparta; and Medius accordingly applied for succour to the confederacy of Greek states which had been lately formed to resist the Lacedaemonian power. With their assistance Medius took Pharsalus, which was then occupied by a Lacedaemoniun garrison, and is said to have sold all its inhabitants as slaves. (Diod. xiv. 82.) The return of Agesilaus, and his victory over the Thessalians, probably deprived Medius and his party of their power, and Larissa no longer appears as the rival of Pherae for the supremacy of Thessaly. Pharsalus soon recovered from the blow which it had received from Medius, and became, next to Pherae, the most important city in Thessaly. The inhabitants of Pharsalas agreed to entrust the supreme power to Polydamas, one of their own citizens, in whose integrity and abilities all parties placed the greatest confidence. The acropolis and the whole management of the finances were placed in his hands, and he discharged his trust to the satisfaction of all parties. (Xen. Hell. vi. $1 . \$ \S 2,3$.)

Meantime the supreme power at Pherae had passed into the hands of Jason, a man of great energy and ability, and probably the son of Lycophron, though this is not expressly stated. He inherited the ambitious views of Lycophron, and meditated nothing less than extending his dominion over the whole of Greece, for which his central situation seemed to offer many facilities. He cherished even still more extensive projects of aggrandisement, and, once master of Greece, he looked forward to conquer the Persian empire, which the retreat of the Ten Thousand Greeks and the campaigns of Agesilaus in Asia seemed to point out as an easy enterprise. But the first step was his election as Tagus of Thessaly, and the submission of all the Thessalian cities to his authority. For this purpose it was necessary to obtain the acquiescence of Pharsalus, and although he might have gained his object by force, he preferred tn effect it by negotiation, and accordingly frankly disclosed his schemes to Polydamas, and offered him the second place in Thesssly, if he would support his views. Polydamas asked the advice of the Spartans, and finding that he could receive from them no help, he acceded to the proposals of Jason, and induced the Pharsalians to espouse his cause. Soon after this, probably in B. c. 374, Jason was elected Tagus of Thessaly, and proceeded to settle the contingent of cavalry and heavy-armed troops which the Pharsalian cities were to furnish. He now possessed a force of 8000 cavalry and more than 20,000 infantry; and Alcetas I., king of Epeirus, and Amyntas II., king of Macelonia were his allies. (Xen. Hell. vi. 1. §§ 2-19; Diod. xv. 60.) He could in effect command a greater force than any other state in Greece; and from the disanion and exhaustion of the other Grecian states, it seemed not improbable that he might be able to carry his ambitious projects into effect. He had already formed an alliance with Thebes, and after the battle of Leuctra (в. с. 3;1) he was invited by the Thebans to join them in attacking the Lacedaemonian camp. But Jason's policy was to prevent any other power from obtaining the preponderance in Greece, and accordingly upon his arrival at Leuctra he advised the Thebsens not to drive the Lacedaemonians to despair, and obtained a truce for the latter, which enabled thern to secure their safety by a retreat. (Xen. Hell. vi. 4. § 20,
seq.) In the following year he announced his ino tention of marching to Delphi at the head of a body of Thessalian troops and presiding at the Pythian festival. Great alarm was felt throughout Greece; but before the time came, he was assassinated by seven youths as he sat in public to give andience to all comers. His death was felt as a relief by Greece; and the honours paid in many of the Grecian cities to his assassins prove the general fear which his ambitious schemes had excited. (Xen. Hell. vi. 4. §ร 28-32.)

Jason had so firmly established his power that he was succeeded in the post of Tagus of Thessaly by his two brothers Polyphron and Polydorus; but they did not pessess his abilities or energy, and Thessaly again sank into political insignificance. Polyphron was assassinated by his brother Polydorus, who became sole Tagas. Polydorus exercised his anthority with great cruelty; he put to death Polydamas of Pharsalus, and killed or drove into exile many other distinguished persons of this city and of Larissa. (Xen. Hell. vi. 4. $\S \$ 33.34$.$) At the end of a gear$ be was also assassinated by Alexander, who was either his brother (Diud. xv. 61) or his nephew (Plut. Pelopid. 29.) Alexander surpassed even Polyphron in cruelty, and was guilty of gross enormities. The Aleuadne and other noble families, who were chiefly exposed to his vengeance, applied in their distress to Alexander, the youthfal king of Macedonia, who had recently succeeded his father Amyntas. Alexander invaded Thessaly, defeated the tyrant, and took possession of Larissa and Crannon, which he garrisoned with his troops. (Diodor. Iv. 61.) It would seem, however, that the necessities of his own kingdom compelled him shortly afterwards to withdraw bis troops from Thessaly; since we find the Thessalian cities opposed to the tyrant inviting the aid of the Thebans. Accordingly, about B. c. 369, Pelopidas invaded Thessaly, and took Larissa and several other cities under his protection, apparently with the sanction of Alexander of Macedonia, with whom he formed an alliance. (Diodor. xv. 67.) In the following year (b.c. 368) Pelopidas again marched into Thessaly at the head of a Theban force, to protect Larissa and the other cities against the projects of Alexander of Pherae, who had solicited aid from Athens. Aleasnder was compelled to sue for peace; and Pelopidas, after arranging the affairs of Thessaly, marched into Macedonia, where the young king had been lately assassinated. Ptolemy, the regent of the kingdom, was also compelled to enter into alliance with Pelopidas, and to give him sereral hostages, among whom was the youthful Philip, afterwards king of Macedonia. (Diod. xv. 71 ; Plut. Pelop, c. 26.) By these means the influence of Thebes was extended over the greater part of Thessaly. Two years afterwards (b.c. 366) the Thebsno obtained from the Persian court a rescript acknowledging their claims to the headship of Greece; and in the same year Pelopidas, accompanied by Ismenias, visited Thessaly with the riew of obtaining the recognition of their clain from Alexander of Pherae and the other Thessalian cities. Alexander met them at Pharsalus, but when be found that they were not supported by any armed force, be seized them as prisoners and carried them off to Pherac. The first attempt of the Thebans to rescue their countryman proved unsuccessiful ; and the army which they sent into Thessaly was only sared from destruction by the genius of Epuminondas, who was then serving as a private, and was compelled
by the soldiers to take the command. So greatly was Alexander strengthened in his power by this failure that all the Thessalian cities submitted to him, and the influence of Thebes in Thessaly was for a time destroyed. Subsequently a second expedition was sent into Thessaly under the command of Eprminondas, who compelled the tyrant to release Pelopidas and Ismenias, but without restoring Thebes to the commanding position which she had formerly held in Thessaly. (Diod. xv. 71-75; Plut. Pelip. 27-29; Cornel. Nep. Pelop. 5; Paus. ix. 15. § 1.) The continued oppressions of Alexander of Pherae became so intolerable that the Thessalian cities once more applied to Thebes for assistance. Accordingly in B. c. 364 Pelopidas was again sent into Thessaly at the head of a Theban ariny. In the first engagement Pelopidas was slain, but Alexander was defrated. (Dini. xv. 80, 81 ; Plut. Pelıp. 31, 32; Cornel. Nep. Pelıp. 5 ; respecting the different expeditions of Pelopidas into Thessaly, as to which there are discrepancie.s in the accounts, see Grote, Hist. of Grecce, vol. x. p. 361, note, p. 391, note.) The death of Pelnpidas, however, proved almost fatal to Alexander. Burning to revenge his loss, the Thebans sent a powerful army into Thessaly, which compelled him to renounce his supremacy in Thessaly, to confine himself to Pherae, and to sulmit to all the demands of Thebes. (Plut. Pelop. 35.)

After the death of Epaminondas at the battle of Mantineia (b. c. 362) the supremacy of Thebes in Thessaly was weakened, and Alexander of Pherae recosered much of his power, which he continued to exercise with his accustomed cruelty and ferocity till his assassination in b. c. 359 by his wife Thebe and her brothers. One of these brothers, Tisiphonus, succeeded to the supreme power, under the direction of Thebe; but his reign lasted only a short time, and he was followed in the government by Lycophron, another brother. (Xen. Hell. vi. 4. § 37; Diod. xvi. 14 : Plut. Pelop. 35.) Meanwhile Philip, who had ascended the throne of Macedon in B. c. 369, had been steadily extending his dominions and his influence; and the Aleuadae of Larissa now had recourse to him in preference to Thebes. Accordingly Philip marched into Thessaly in s. c. 353. Lycophron, unable to resist him, invoked the aid of Onomarchus and the Phocians; and Philip, after a severe struggle was driven out of Thessaly. (Diodor. xvi. 35.) In the following year Philip returned to Thessaly, and gained a signal victory over Onomarchus and Lycophron. Onomarchus was slain in the battle; and when Philip followed up his victory by laying siege to Pherae, Lycophron surrendered the city to him, upon being alluwed to retire to Phocis with his mercenaries. (Diodor. xvi. 37.) Thus ended the powerful dynasty of the tyrants of Pherse. Philip established a popular government at Pherae (Diod. xvi. 38), and gave nominal independence to the Thessalian cities. But at the same time he garrisoned Magnesia and the port of Pagasae with his troops, and kept steadily in view the subjugation of the whole country. An attempt made in b. c. 344 to restore the dynasty of the tyrants at Pherae gave him an opportunity of carrying his designs into effect. Not only did he garrison Pherae with his own troops, but he revived the ancient division of the country into four tetrarchies or tetradarchies, and placed at the head of each some of the chiefs of the Aleuadae, who were entirely devoted to his interests. The result of this arrangement was the entire suljection of Thessaly to Philip, vol. IL
who drew from the country a considerable addition to his revenues and to his military resources. (Harpocrat. s. v. Tєepapxia; Dem. Olynth. i. § 23; Strab. ix. p. 440; Thirlwall, Hist. of Greece, vol. vi. pp. 12-14.) Upon the death of Philip the Thessalians were the first Grecian people who promised to support Alexander in obtaining the supremacy of Greece. (Diod. xvii. 4.) After the death of Alexander the Thessalians took an active part with the wther Grecian states in attempting to throw off the Macedonian yoke, but by the victory of Antipater they were again united to the Macedonian monarchy, to which they remained subject till the defeat of Philip by the Romans at the battle of Cynoscephalae, в. c. 197. The Roman senate then declared Thessaly free (Lir. xxxiii. 32); but from this time it was virtually under the sovereignty of Rome. The government was vested in the hands of the more wealthy persons, who formed a kind of senate, which was accustomed to meet at Larissa. (Liv. xxxiv. 52, xxxvi. 8, xlii. 38.)

When Macedonia was reduced to the form of a Roman province, Thessaly was incurporated with it. (Strab. xvii. p. 840.) Under Alexander Severus it furmed a separate province governed by a procurator (Gruter, Inscr. p. 474. 4); and in the later constitution of the Empire after the time of Constantine, it also appears as a separate province under the administration of a praeses. (Not. Dig. i. p. 7 ; Böcking, i. p. 151; Marquardt, in Becker's Röm. Allerth. vol. iii. pt. i. p. 117.)

In giving an enumeration of the Thessalian tribes and cities, we will first describe the fuur tetrarchies already mentioned, and then take the other divisions of the country.

1. Hestiaeotis or Histiaeotis ('Eftiaioutis, 'Irrıatütıs), inhabited by the Hestiaeotae ('Eatıaicitai), was the northern part of Thessaly, of which the Peneius may be described in general as its southern boundary. It occupied the passes of Olympus, and extended westward as far as Pindus. (l'lin. iv. 1 ; Strab. ix. pp. 430, 437, 438.) It was the seat of the Perrhaebi ( $\Pi$ e $\dot{\rho} \overline{\mathrm{S}} .6 \mathrm{6ol}$ ), a warlike and powerful tribe, who possessed in historical times seveial towns strongly situated upon the mountains. They are mentioned by Homer (IL ii. 749) as taking part in the Trojan War, and were regarded as genuine Hellenes, being one of the Amphictyonic states (Aeschin. de Fals. Leg. p. 122). The part of Hestiaeotis inhabited by them was frequently called Perrhaebia, but it never formed a separate Thessalian province. The Perrhaebi are said at one time to have extended south of the Peneius as far as the lake Boebeis, but to have been driven out of this district by the mythical race of the Lapithae. (Strab. ix. pp. 439, 440.) It is probable that at an early period the Perrhaebioccupied the whole of Hestiaeotis, but were subsequently driven out of the plain and confined to the mountains by the Thessalian conquerors from Thesprotia. Strabo states that Hestiseotis, was formerly, according to some anthorities, called Doris (ix. p. 437), and Herodotus relates that the Dorians once dwelt in this district at the foot of Mts. Ossa and Olympus (i. 56). It is said to have derived the name of Hestiaeotis from the district of this name in Euboea, the inlabitants of which were transplanted to Thessaly by the Perrhaebi (Strab. ix. p. 437): but this is an uncertified statement, probably founded alone upon similarity of name. Homer mentions another ancient tribe in this part of Thessaly called the Acthices, who are placed by Strabo upun
the Thessalian side of Pindus near the sources of the Peneius．They are described as a barbarous tribe，living by plunder and robbery．（Hom．Il．ii． 744 ；Strab．vii．p． 327 ，ix．p． 434 ；Steph．B．s．v． Aitikía．）The towns of Hestiaeotis were：Oxyneia， Pialia，Aeginium，Mrliboea，Phaloria，Eri－ cinium，Pelinnaeum，Tricca，Oechalia，Si－ lana，Gomphi，Pheca or Phecadum，Ithome， limnaea，Phacium，Phaestus，Pharcadon， Mytae，Malloea，Cyretiae，Eritium，Oloos－ son，Azorus，Doliche，Pythium，Elone subse－ quently Leimone，Eudieru，Lapathus，Gon－ nus or Gonni，Charax，Condylon，Phalanna， Orthe，Atrax．

2．Pelasgiotis（ $\Pi \in \lambda a \sigma \gamma \iota \omega \hat{\omega} / s)$ ，inhabited by the Pelasgiotae（ $\Pi \in \lambda a \sigma \gamma: \hat{\omega} \tau a \iota)$ ，extended S．of the Pe－ neius，and along the western side of Pelion and Ossa，including the district called the Pelasgic plain． （Strab．ix．p．443．）The name shows that this dis－ trict was originally inhabited by Pelasgians；and its chief town was Larissa，a well known name of Pe－ lasgic cities．The towns of Pelasgiotis were： Elatea，Mopsium，Metropolis，Gyrton or Gyr－ tona，Argura，Larissa，Sycurium，Crannon， Amyrus，Armenium，Pherae，Cynoscephalae， Scotussa，Palaepharus．

3．Thesshliotis（ $\Theta \epsilon \sigma \sigma a \lambda t \hat{\omega} t \iota$ ），the central plain of Thessaly and the upper course of the river Peneius，so called from its having been first occu－ pied by the Thessalian conquerors from Epeirus． Its towns were：Peiresiae，Phyllus，Metropolis， Cierium，Euhydrium，Pharsalus，the most important in the district，Thetidium．

4．Phthiotis（ $\phi+t \omega \bar{\omega} / s$ ），inhabited by the Achaean Phthiotae（＇A qaioi $\Phi \theta_{i} \hat{\omega} \tau a l$ ），under which nane they are usually mentioned as members of the Amphic－ tyonic league．This district，according to Strabo， included the southern part of Thessaly，extending from the Maliac gulf on the E．to Dolopia and Mount Pindus on the W．，and stretching as far N． as Pharsalus and the Thessalian plains．（Strab．ix． p．430．）Phthiotis derived its name from the Ho － meric Phthia（ $\Phi$ Oí $\eta, I l$ ．i． 155 ，ii．683），which ap－ pears to have included in the beroic times not only Hellas and Dolopia，which is expressly called the furthest part of Phthia（Il．ix．484），but also the southern portion of the Thessalian plain，since it is probable that Phthia was also the ancient name of Pharsalus．（Leake，Northern Greece，vol．iv．p．484， seq．）The cities of Phthiotis were：Amphanaeum （Scylax，p．25），or Amphanae（＇A $\mu$ qavaí，Steph．B． s．v．），on the promontory Pyrrha and on the Paga－ saean gulf；Thebae，Ehetria，Phylace，Iton， Halus，Pteleum，Antron，Larissa，Cremaste， Prokrva，Pras，Narthacium，Thaumaci，Me－ litaea，Coroneia，Xyniae，lamia，Phalara， Echinus．

5．Magnesia（Mayvn完），inhabited by the
 slip of country between Mts．Ossa and Pelion on the W．and the sea on the E．，and extending from the mouth of the Peneius on the N．to the Pagasaean gulf on the S ．The Magnetes were members of the Amphictyonic league，and were settled in this district in the Homeric times．（Il． ii．756．）The Thessalian Magnetes are said to have founded the Asiatic cities of Magnesia on Mt．Sipylus and of Magnesia on the river Maeander． （Aristot．ap．Athen．iv．p．173；Conon，29；Strab． xiv．p．647）．The towns of Magnesia were：Cer－ cinium，Boebe，Glaphyrae，Aesonis，Pa－

## THESSALONICA．

gasae，Iolcus，Demetrlas，Nelia，Aphetar， Homole or Homolium，Eurymenae，Meli－ boea，Thaumacia，Casthanaea，Rhizus， Magnesia，Olizon，Mylae，Spalaethra，Co－ racae，Mithone．

6．Dolopia（ $\Delta o \lambda o \pi i a$ ），inhabited by the Dolopes （ $\Delta \dot{\delta} \lambda o \pi \epsilon s$ ），a mountainous district in the SW． corner of Thessaly，lying between Mt．Tymphrestus， a branch of Pindus，on the one side，and Mt．Othrys on the other．The Dolopes were，like the Magnetes， an ancient Hellenic penple，and members of the Am－ phictyonic league．They are mentioned by Homer （Il．ix．484）as included in Phthia，but were governed by a subordinate chieftain of their own． Though nominally belonging to Thessaly，they seem practically to have been independent：and their country was at a later period a constant subject of contention between the Aetolians and the kings of Macedonia．The only place in Dolopia of the slightest importance was Ctimene．

7．Oetaea（Oitaia），inhabited by the Oetaei （Oitaioc），was the mountainous district around Mt．Oeta in the upper valley of the Spercheius， and to the E．of Dolopia．The Oetaeans appear to have been the collective name of the various predatory tribes，dwelling upon the northern de－ clivities of Mt．Oeta，who are mentioned as plun－ dering both the Malians on the east，and the Dorians on the south（Thuc．iii． $92-97$ ，viii．3．）The most important of these tribes were the Aeniānes （Aiviâvєs），called Eniēnes（＇Evıทิvєs）by Homer（Il． ii．749）and Herodotus（vii．132），an ancient Hel－ lenic Amphictyonic race．（Paus．x．8．§ 2；Har－ pocrat．s．v．＇А $\mu \phi$ икт voves．）They are said to have first occupied the Dotian plain in Pelasgiotis ；after－ wards to have wandered to the borders of Epeirus， and finally to have settled in the upper valley of the Spercheius，where Hypata was their chief town． （Plut．Quaest．Gr．13．p． 294 ；Strab．i．p．61，ix． p．442．）Besides Hypata，which was the only phace of importance in Oetaea，we find mention of Sperchiae and Macra Come by Livy（xxxii．13）， and of Sosthenis（ $\Sigma \omega \sigma \theta \in \nu / s$ ），Homilae（ ${ }^{\circ} \mathrm{O} \mu \nu \lambda a_{s}$ ）， Cypaera（Kúruupa）and Phalachthia（\＄a入a才өía）by Ptolemy（iii．13．§ 45．）

8．Malis，the lower valley of the Spercheius， described in a separate article．［Malis．］

COIN OF THESSALIA．
THESSALIO＇TIS．［Thessalia．］
THESSALONI＇CA（Өєб $\sigma$ алоуікך；Өєтталорікך， Polyb．xxiii．4；Scymn．Ch．625；Өєб⿱⿰㇒土儿，\ovikeía， Strab．vii．Epit．3：Eth．©eббаa入oviкєús），a large and important city，the capital of Roman Macedonia， situated at the head of the Thermaic gulf，in the district anciently called Mygdonia．

1．Situation．－This is well described by Pliny （iv．10）as＂medio flexu litoris［sinus Thermaici］．＂ The gulf extends about 30 leagues in a NW．direc－ tion from the group of the Thessalian islands，and then turns to the NE．，forming a noble basin be－
tween Capes Vardir and Karaburnu. On the edge of this basin is the city. partly on the level shore and partly on the slope of a hill, in $40^{\circ} 38^{\prime} 47^{\prime \prime} \mathrm{N}$. lat., and $22^{\circ} 57^{\prime} 22^{\prime \prime}$ E. long. The present appearance of the city, as seen from the sea, is described by Leake, Holland, and other travellers as very inpasing. It rises in the form of a crescent up the declivity, and is surrounded by lofty whitened walls with towers at intervais. On the E. and W. sides of the city ravines ascend from the shore and converge towards the highest point, on which is the citadel called 'Exranípyoy, like that of Constantinople. (A view of Thessalonica from the sea is given by Cousinéry). The port is still convenient for large ships, and the anchorage in front of the town is goos. These circumstances in the situation of Thessalonica were evidently favourable for commanding the trade of the Macedonian sea. Its relations to the inland districts were equally advantageous. With one of the two great levels of Macedonia, viz. the plain of the "wide-flowing Axius" (Hom. Il. ii. 849), to the N. of the range of Olympus, it was immediately connected. With the other, viz. the plain of the Strymon and Lake Cercinitis, it communicated by a pass across the neck of the Chalcidic peninsula. Thus Thessalonica became the chief station on the Roman Via Egnatia, between the Hadriatic and the Hellespont. Its distance from Pella, as given by the Itineraries, is 27 miles, and from Amphipolis (with intermediate stations; see Act. Apost. xvii. 1) 67 miles. It is still the chief centre of the trade of the district. It contains a population of 60,000 , or 70,000 , and (though Adrianople may possibly be larger) it is the most important town of European Tarkey, next after Constantinople.
2. Name.-Two legendary names, which Thessalunica is said to have borne in early times, are Emathia (Zonar. Hist. xii. 26) and Halia (Steph. B. s. v.), the latter probably having reference to the maritime position of the town. During the first period of its authentic history, it was known under the name of Therma ( $\Theta \in \rho \mu \mathrm{f}$, Aesch.; Ө́́p $\boldsymbol{\eta} \boldsymbol{\eta}$, Herod., Thucyd.; Ө́́puaı, Mal. Chronog. p. 190, ed. Bonn), derived, in cominon with the designation of the gulf (Thermaicus Sinus), from the hot salt-springs, which are found on various parts of this coast, and one of which especially is described by Pococke as being at a distance of 4 English miles from the modern city. (See Scylax, p. 278, ed. Gail.) Three stories are told of the origin of the name Thessalonica. The first (and by far the most probable) is given by Strabo (vii. Epit. 10), who says that Therma was rebuilt by Cassander, and called after his wife Thessalonica, the daughter of Philip: the second is found in Steph. B. (s. v.), who says that its new name was a memorial of a victory obtained by Philip over the Thessalians (see Const. Porphyrog. De Them. ii. p. 51, ed Bonn): the third is in the Etym. Miagn. (s. v.), where it is stated that Philip himself gave the name in honour of his daughter. Whichever of these stories is true, the new name of Thessalonica, and the new eminence connected with the name, are distinctly associated with the Macedonian period, and not at all with the earlier passages of true Greek history. The name, thus given, became permanent. Through the Roman and Byzantine periods it remained unaltered. In the Middle Ages the Italians gave it the form of Salonichi or Saloniki, which is still frequent. In Latin chronicles we find Salomicia. In German poems of the thirteenth century the name appears, with a Teutonic termination,
as Salnck. The uneducated Greeks of the present day call the place Ea入ovin $\eta$, the Turks Selanik.
3. Political and Military History. Thessalonica was a place of some importance, even while it bore its earlier name of Therma. Three passages of chief interest may be mentioned in this period of its history. Xerxes rested here on his march, his land-forces being encamped on the plain between Therma and the Axius, and his ships cruising about the Thermaic gulf; and it was the view from hence of Olympus and Ossa which teinpted him to explore the course of the Peneius. (Herod. vii. 128, seqq.) A short time (в. c. 421) before the breaking out of the Peloponnesian War, Therma was occupied by the Athenians (Thucyd. i. 61); but two years later it was given up to Perdiccas (Id. ii. 29.) The third mention of Therma is in Aeschines (de Fals. Leg p. 31, ed. Bekk), where it is spoken of as one of the places taken by Pausanias.

The true history of Thessatonica begins, as we have implied above, with the decay of Greek nationality. The earliest author who mentions it under its new name is Polybius. It seems probable that it was rebuilt in the same year (8. c. 315) with Cassandreia, immediately after the fall of Pydna and the death of Olympias. [Cassanderia.] We are told by Strabo (l. c.) that Cassander incorporated in his new city the population, not only of Therma, but likewise of three smaller towns, viz. Aeneia and Cissus (which are supposed to have been on the eastern side of the gulf), and Cbalastra (which is said by Strato (vii. Epit. 9) to have been on the further side of the Axius, whence Tafel (p. xxii.) by some mistake infers that it lay between the Axius and Therma). It does not appear that these earlier cities were absolutely destroyed; nor indeed is it certain that Therna lost its separate existence. Pliny (l. c.) seems to imply that a place bearing this name was near Thessalonica; but the text is probably corrupt.

As we approach the Roman period, Thessalonica begins to be more and more mentioned. From Livy (xliv. 10) this city would appear to have been the great Macedonian naval station. It surrendered to the Romans after the battle of Pydna (Ib. sliv. 45), and was made the capital of the second of the four divisions of Macedonia (Ib. xlv. 29). Afterwards, when the whole of Macedonia was reduced to one province (Flor. ii. 14), Thessalonica was its most important city, and virtually its metropolis, though not so called till a later period. [Macedonia.] Cicero,during his exile, found a refuge here in the quaestor's house (pro Planc. 41); and on his journeys to and from his province of Cilicia he passed this way, and wrote here several of his extant letters. During the first Civil War Thessalunica was the head-quarters of the Pompeian party and the senate. (Dion Cass. xli. 20.) During the second it took the side of Octavius and Antonius (Plut. Brut. 46; Appian, B. C. iv. 118), and reaped the advantage of this course by being made a free city. (See Plin. l.c.) It is possible that the word è $\lambda \in \cup \theta \in p i a s$, with the head of Octavia, on some of the cuins of Thessalonica, has reference to this circumstance (see Eckhel, ii. p. 79) ; and some writers see in the Vardar gate, mentioned below, a monument of the victory over Brutus and Cassius.

Even before the close of the Republic Thessalonica was a city of great importance, in consequence of its position on the line of commanication
between Rome and the East．Cicero speaks of it as posita in gremio imperii nostri．It increased in size and rose in importance with the consolidation of the Empire．Strabo in the first century，and Lucian in the second，speak in strong language of the amount of its population．The supreme magistrates （apparently six in number）who ruled in Thessa－ lonica as a free city of the Empire were entitled mo八itap才al，as we learn from the remarkable co－ incidence of St．Lake＇s language（Act．Ap．xvii．6） with an inscription on the Vardär gate．（Böckh， 1967．Belley mentions another inscription con－ tuining the same term．）In Act．Ap．xvii．5，the $\delta \bar{\eta} \mu o s$ is mentioned which formed part of the con－ stitution of the city．Tafel thinks that it had a Bou入ो also．

During the first three centnries of the Christian era，Thessalonica was the capital of the whole coun－ try between the Adriatic and the Black Sea ；and even after the founding of Constantinople it re－ mained practically the metropolis of Greece，Mace－ donia，and Illyricum．In the middle of the third century，as we learn from coins，it was made a Roman colonia；perhaps with the view of strength－ ening this position against the barbarian invasions， which now became threatening．Thessalonica was the great safeguard of the Empire during the first shock of the Gothic inroads．Constantine passed some time here after his victory orer the Sarnatians； and perhaps the second arch，which is mentioned below，was a commemoration of this victory ：he is said also by Zosimus（ii．p．86，ed．Bonn）to have constructed the port，by which we are，no doubt， to understand that he repaired and improved it after a time of comparative neglect．Passing by the dreadful massacre by Theodosius（Gibbon＇s Rome，ch．$x \times x i i$. ），we cone to the Sclavonic wars， of which the Gothic wars were only the prelude， and the brunt of which was successfully borne by Thessalunica from the middle of the sixth century to the latter part of the eighth．The history of these six Sclavonic wars，and their relation to Thes－ salonica，has been elaborated with great care by Tafel．

In the course of the Middle Ages Thessalonica was three times taken ；and its history during this period is thus conveniently divided into three stages．On Sunday，July 29th，904，the Saracen fleet appeared befure the city，which was storned after a few days＇ fighting．The slaughter of the citizens was dread－ ful，and vast numbers were sold in the various slave－markets of the Levant．The story of these events is told by Jo．Cameniata，who was crozier－ bearer to the archbishop of Thessalonica．From his narrative it has been inferred that the population of the city at this time must have been 220，000．（ De Excidio Thessalonicensi，in the volume entitled Theophanes Continuatus of the Bonn ed．of the Byz． writers，1838．）The next great catastrophe of Thessalonica whs caused by a different enemy，the Normans of Sicily．The fleet of Tancred sailed round the Morea to the Thermaic gulf，while an army marched by the Via Egnatia from Dyrrhachium． Thessalonica was taken on Aug．15th，1185，and the Greeks were barbarously treated by the Latins．Their cruelties are described by Nicetas Choniates（de An－ dron．Comneno，p．388，ed．Bonn，1835）．The celebrated Eustathius was archbishop of＇Thessalonica at this time；and he wrote an account of this capture of the city，which was first pablished by Tafel（Ti． bingen，183：），and is now printed in the Boun ed．
of the Byz．writers．（De Thessolonica a Iatinis capta，in the same vol．with Leo Grammaticus， 1842．）Suon after this period follows the curious history of western fendalism in Thessalonica under Boniface，marquis of Montferrat，and his successorx， during the first half of the 13 th century．The city was again under Latin dominion（having bern sold by the Greek emperor to the Venetians）when it was finally taken by the Turks under Amurath II．，in 1430．This event also is described by a writer in the Bonn Byzantine series（Jonnnes Ana－ gnostes，de Thexsakmicensi Excidio Narratio，in the same volume with Ptranzes and Cananas，1838）．

For the medieval history of Thessalonica see Mr． Finlay＇s works，Medieval Greece（1851），pp．70，71， 135－147；Byzantine and Greek Empires，vol．i． （1853），pp．315－332，vol．ii．（1854）．pp．182，264 －266，607．For its modern condition we must refer to the travellers，especially Beaujour，Cou－ sinéry，Holland，and Leake．

4．Ecclesiabtical History．－The annals of Thessalonica are so closely connected with religion， that it is desirable to review them in this aspect． After Alexander＇s death the Jews spread rapidly in all the large cities of the provinces which had formed his empire．Hence there is no doubt that in the first century of the Christian era they were settled in considerable numbers at Thessalonica：in－ deed this circumstance contributed to the first esta－ blishment of Christianity there by St．Paul（Act． Ap．xvii．1）．It seems probable that a large com－ munity of Jews has been found in this city ever since．They are mentioned in the seventh century during the Sclavonic wars；and again in the twelfth by Eustathius and Benjamin of Tudela．The events of the fifteenth century had the effect of bringing a large number of Spanish Jews to Thes－ salonica．Panl Lucas says that in his day there were 30,000 of this nation here，with 22 syna－ gogues．More recent anthorities vary between 10,000 and 20,000 ．The present Jewish quarter is in the south－east part of the town．

Christianity，once established in Thessalonica， spread from it in various directions，in consequence of the mercantile relations of the city．（1 Thess． i．8．）During the succeeding centuries this city was the bulwark，not simply of the Byzantine Em－ pire，but of Oriental Christendom，－and was largely instrumental in the conversion of the Sclavonians and Bulgarians．Thus it received the designation of＂The Orthodox City．＂It is true that the legends of Demetrius，its patron saint（a martyr of the early part of the fourth century），disfigure the Christian history of Thessalonica；in every siege success or failure seems to have been attributed to the granting or withholding of his farour：but still this see has a distinguished place in the annals of the Church．Theodusius was baptized by its bishop； even his massacre，in consequence of the stern severity of Ambrose，is chiefly connected in our minds with ecclesiastical associations．The see of Thessalonica became almost a patriarchate after this time；and the withdrawal of the provinces sub－ ject to its jurisdiction from connection with the see of Rome，in the reign of Leo Isauricus，became one of the principal causes of the separation of East and West．Cameniata，the native historian of the cala－ mity of 904，was，as we have seen，an ecciesiastic． Eustathius，who was archbishop in 1185，was，be－ yond dispute，the most learned man of his age，and the author of an invaluable commentary on the Iliad
and Odyssey, and of theological works, which have been recently published by Tafel. A list of the Latin archbishops of Thessalonica from 1205 to 1418, when a Roman hierarchy was establi-hed along with Western feudalism, is given by Le Quien (Oriens Christianus, iii. 1089). Even to the last we find this city connected with questions of religions interest. Symeon of Thessalonica, who is a chief authority in the modern Greek Church on ritual subjects, died a few months before the fatal siege of 1430 ; and Thendore Gaza, who went to Italy sonn after this siege, and, as a Latin ecclesiastic, became the translator of Aristutle, Theophrastus, and Hippocrates, was a native of the city of Demetrins and Eustathius.
5. Remains of Antiquity. - The two monuments of greatest interest at Thessalonica are two arches connected with the line of the Via Egnatia. The course of this Roman road is undoubtedly preserved in the long street which intersects the city from east to west. At its western extremity is the Vardir gate, which is nearly in the line of the modern wall, and which has received its present name from the circunstance of its leading to the river Vardar or Axius. This is the Roman arch believed by Beaujoar, Holland, and others to have been erected by the people of Thessalonica in honour of Octavius and Antonius, and in memory of the buttle of Philippi. The arch is constructed of large blocks of marble, and is about 12 feet wide and 18 feet high; but a considerable portion of it is buried deep below the surface of the ground. On the outside face are two bas-reliefs of a Homan wearing the toga and standing befure a horse. On this arch is the abovementioned inscription containing the names of the politarchs of the city. Leake thinks from the style of the sculpture, and Tafel from the occurrence of the name Flavius in the inscription, that a later date ought to be assigned to the arch. (A drawing of it is given by Cousinéry). The other arch is near the eastern (said in Clarke's Travels, iv. p. 359, by mistake, to be near the western) extremity of the main street. (A drawing of this arch also is given by Cousinéry and an imaginary restoration by Pococke.) It is built of brick and faced with marble, and formerly consisted of three archways. The sculptured camels give an oriental aspect to the monument; and it is generally suppused to commemorate the victory of Constantine over Licinius or over the Sarmatians.

Near the line of the main street, between the two above-mentioned arches are four Corinthian columns supporting an architrave, above which are Caryatides. This monument is now part of the house of a Jew : and, from a notion that the figures were petritied by magic, it is called by the Spanish Jews Las Incantadas. The Turks call it Sureth-Muleh. (A view will be found in Cousinéry, and a mure correst one, with architectural details, in Stuart and Revett's Ather. Antiq. vol. iii. ch. 9. p. 53). This colonnade is supposed by some to have been part of the Propylaea of the Hippodrume, the position of which is believed by Beaujour and Clarke to have been in the south-eastern part of the town, between the sea and a building called the Kotunda, now a mosque, previously the church Eski-Metropoli, but formerly a temple, and in construction similar to the Pantheon at Rome. (Pococke has a ground plan of this building.) Anotber mosque in Thessalonica, called Eski-Djuma, is said by Beaujour to have been a temple consecrated to Venus Thermaea.

The city walls are of brick, and of Greek construction, resting on a much older foundation, which consists of hewn stunes of immense thickness. Everywhere are broken columns and fragments of sculpture. Many remains were taken in 1430 to Constantinople. One of the towers in the city wall is called the Tower of the statue, because it contains a colossal figure of Thessalonica, with the representation of a ship at its fcet. The castle is partly Greek and partly Venctian. Sone columns of verd an:ique, supposed to be relics of a temple of Hercules, are to be noticed there, and also a shattered triumphal arch, erected (as an inscription proves) in the reign of Marcus Aurelius, in honour of Antuninus Pius and his daughter Faustina.

In barmony with what has been noticed of its history, Thessalonica has many remains of ecclesiastical antiquity. Leake says that in this respect it surpasses any other city in Greece. The church of greatest interest (now a mosque) is that of St. Sophia, built, according to tradition, like the church of the same name at Cunstantinople, in the reign of Justinian, and after the designs of the architect Anthemius. This church is often mentioned in the records of the Middle Ages, as in the letters of Pope Innocent III. and in the account of the Norman siege. It remains very entire, and is fully described by Beaujour and Leake. The church of St. Demetrius (apparently the third on the same site, and now also a mosque) is a structure of still greater size and beauty. Tafel believes that it was erected about the end of the seventh century ; but Leake conjectures, from its architectural features, that it was built by the Latins in the thirteenth. Tufel has collected with much diligence the notices of a great number of churches which have existed in Thessalonica. Dapper says, that in his day the Greeks had the use of thirty churches. Walpole (in Clarke's Travels, iv. p. 349) gives the number as sixteen. All travellers have noticed two ancient pulpits, consisting of "single blocks of variegated marble, with small steps cut in them," which are among the most interesting ecclesiastical remains of Thessalonica.
6. Acthonities. - The travellers who have described Thessalonica are numerous. The most important are Paul Lucas, Secund Voyage, 1705 ; Pococke, Description of the East, 1743-1745; Beaujour, Tableau du Commerce de la Grice, translated into English, 1800 ; Clarke, Travels in Europe, fic. 1810-1823; Holland, Travels in the Ionian Isles fe. 1815 ; Cousinéry, Voyage dans la Macédoine, 1831 ; Leake, Northern Greece, 1835 ; Zacharia, Reise in den Orient, 1840; Grisebach, Keise durch Kumelien, 1841 ; Buren, Mount Alhos, Thessaly, and Epirus, 1852.

In the Memoires de l'Académie des Inscriptions, tom. $x \times x$ viii. Sect. hist pp. 121-146, is an essay on the subject of Thessalonica by the Abbé Belley; but the most elaborate work on the subject is that by Tafel, the first part of which was published at Tübingen in 1835. This was

COLN OF THESSALONICA.
afterwards reprinted as "Prolegomena" to the Dissertatio de Thessalonica ejusque Agro Gengraphica, Berlin, 1839. With this should be compared his work on the Via Egnatia. To these authorities we ought to add the introduction to some of the commentaries on St. Paul's Epistles to the Thessalonians, -especially those of Koch (Berlin 1849) and Lünemann (Güttingen, 1850).
[J. S. H.]
THE'STIA. [Thestiexses.]
THESTIENSES ( $\theta \in \sigma$ т $\epsilon \in$ is, Pol. v. 7), are asually called the inhabitants of a town Thestia in Aetolia. But no town of this name is mentioned by the ancient writers, and it is not improbable that the town itself was called $\Theta \in \sigma \tau L E$ is. The name occurs only in Polybius, and the exact site of the place is unknown. We only learn, from the narrative of Polybius, that it was situated in the Northern part of the upper plain of Aetolia. The name is perhaps connected with Thestius, one of the old Aetolian heroes.

THETIDIUM (Өetioiov, Strab. ix. p. 431 ; Polyb. xviii. 3, 4; $\Theta \in \tau i \delta \in i o v$, Eurip. Androm. 20; Өearíifiov, Steph. B. s. v.: Eith. Өetióús), a place in Thessaly, close to Pharsalus, where Flamininus encamped at the end of the second march from Pherae towards Scotussa, before the battle of Cynoscephalae. It derived its name from Thetis, the mother of Achilles, the national hero of the Achuean Phthiotae. Leake places it at or near Magula, on the opposite bank of the Enipeus. (Northern Greece, vol. iv. pp. 472, 473.)

THEUDO'RIA, one of the chief towns of the Athamanss in Epeirus, is identified by Leake with the modern Thodhoriana, a village situated near Mount Tzumérka in a puss which leads from the : Achelous to the Arachthus. (Liv. $1 \times x$ viii. 1; Leake, Northern Greece, vol. iv. p. 212.)

THEUMA, a town of Thessaly, near the frontiers of Dolopia (Liv. $x \times x$ ii. 13.)

THEUPROSOPON. [Phoenicia, p. 606, a.]
 portant town of Numidia, but which is only mentioned in the later writers. It was a Roman colony (Gruter, Inscr. p. 600; Itin. Ant. p. 27), and the place where many roads running in a SE. direction into the Roman province of Africa, had their commencement. (Cf: Itin. Ant. pp. 33, 46, 47, 53, 54.) It is the town of Tebessa, recently discovered by General Negrier, considerable ruins of which still exist, especially the ancient walls, the circumference of which indicates a town capable of containing 40,000 ) inhabitants. (See Letronne, in Rev. Archéol. iv. p. 360, sqq.; Sur l'Arc de Trimphe de Tereste, Ǧc., Paris, 1847; Jahn's Juherbücher, lii. p. 409.)
[T. H. D.]
THIA. [Thera.]
THIANNICE ( (Giaveikt, Arrian, Per. P. Eux p. 7), or Thianitice (Eiavitıki, Anon. Per. P. Eux. p. 14), a district of Asia in the Pontus Euxinus, which was separated from Colchis by the river Oplis. Its name probably should be Sannice, as the Sami, or Tzani, were a well-known people in this region. (Cf. Mannert, iv. p. 378, vi. pt. 2. p. 42l ; Gail, ad Arrian. p. 95.)
[T. H. D.]
THIAL, a town of the Contestani in Hispania Tarracouensis, bet ween Carthago Nova, and Hici (Itin. Ant. p. 401). Variously identified with San Gines and Orihuela, near which latter place are many ruins. (Florez, Ésp. Sagr. v. p. 30, vii. p. 124.) [T. H. D.]

THIBA (Ei6a: Eth. Gi6ios), a district in Pontus, so called from an Amazon slain there by Hercules. The inlabitants nere said to be sucters, whose
breath was poisonous, and who would not perish if thrown into the water, but would float on the surface. (Kustath. ad Dionys. Per. 828; Steph. B. s. v. Eıbats; Plot. Symp. v. 7.§ 1 ; Phylarch. ap. Plin. vii. 2. s. 2.)
THILSAPHATA (Amm. Marc. xav. 8), a fortifed town in the south of Mesopotamia, probably the present Tel el Hava, between Mosul and the Sinjar, in the neighbrurhood of the Tigris.

THILUTHA, an impregnable fortress on an island in the Euphrates, near Anatho, which defied the arms of Julian (Amm. Marc. exiv. 2). Zosimus (iii. 15) speaks of this island, and of the impregnable fortress ( $\phi$ poúpıo ̀̀ ox upótatov) oituated upon it, but without mentioning its name. It is described by Ibidorus Charax (Mans. Parth. § 1, ed. C. Mïller) as an island in the Euphrates, containing a treasury of the Parthians, and distant two schoeni from Anatho. The old editions read 'Onaboús; but the MSS. have 'Onabous, which Müller has changed into Oidaboús, and there can be little doubt of the propriety of this correction. It corresponds to the island called Tilbus by Chesney (vol. i. p. 57), and in his map Telbes or Anatelbes, containing ruins of very ancient buildings. (See Miiller, ad Isid. Char. l. c.)

THINAE ( ©ival, or Eival, Ptol. vii. 3. §6, viii. 27. § 12), or THINA (Eiva, Arrian, Per. M. Erythr. p. 36), a capital city of the Sinae, who carried on here a large commerce in silk and woollen stuffs. It appears to have been an ancient tradition that the city was surrounded with brazen walls ; but Ptolemy remarks that these did not exist there, nor anything else worthy of remark. The ancient writers differ very cousiderably as to its situation. According to the inost probable accounts it was either Nankin, or rather perhaps Thsin, Tiin, or Tein, in the prorince Schensi, where, according to the accounts of the Chinese themselves, the first kingdom of Sin, or China, was founded. (Cf. Kitter, Erdhunde, ii. p. 199.)
[T. H. D.]
 Ptol. iv. 5. § 18), a mountain of Egypt, belonging to the Libyan chain, on the S. burders of Marmarica.
[I. H. D.]
THIRMIDA, a place in Numidia, the situation of which is totally unknown. (Sill. Jug. 12.) [T. H. D.] THIS. [Abydus.]
THISBE ( $-\sigma 60 \eta$, Hom., Paus., Steph. B. s. v.; Oíabar, Strab., Xen.: Eth. Elabaios), a town of Boeotia, described by Strabo as situated at a short distance from the sea, under the southern side of Helicon, bordering upon the confines of Therpiae and Coroneia. (Strab. ix. p. 411.) Thisbe is mentioned by Homer, who says that it abounds in wild
 buth Strabo and Stephanus B. remark that this epithet was given to the city from the abundance of wild pigeons at the harbour of Thisbe. Xenophon remarks that Cleombrotus marched throush the territory of Thisbe on his way to Creusis betore the battle of Leuctra (INell. vi. 4. § 3.) The only public building at Thisbe mentioued by Pausanias (ix. 32. § 3) wes a temple of Hercules, to whom a festival was celebrated. The same writer adds that between the mountain on the sea-side and the mountain at the foot of which the town stoou, there is a plain which would be inundated by the water flowing into it, were it not for a mole or causeway constructed through the middle, by means of which the water is diverted every year into the part of the plain lying
on one side of the canseway, while that on the other is cultivated. The ruins of Thisbe are found at Kakosia. "The position is between two great summits of the mountain, now called Karanuinghi and Paleovuna, which rise majestically above the vale, clothed with trees, in the upper part, and covered with snow at the top. The modern village lies in a little hollow surrounded on all sides by low cliffs connected with the last falls of the mountain. The walls of Thisbe were about a mile in circuit, following the crest of the cliffs which surround the village; they are chiefly preserved on the side towards Dobrena and the south-east. The nasonry is for the most part of the fourth order, or faced with equal layers of large, oblong, quadrangular stones on the outside, the interior as usual being filled with loose rubble. On the principal height which lies towards the mountain, and which is an entire mass of rock, appear some reparations of a later date than the rest of the walls, and there are many Hell+nic foundations on the face of this rock towards the village. In the cliffs outside the walls, to the northwest and south, there are many sepulchral excavations." (Leake, Northern Greece, vol. ii. p. 5u6.) Leake observed the mole or causeway which Pausanias describes, and which serves for a road across the marsh to the port. The same writer remarks that, as the plain of Thisbe is completely surrounded by heights, there is no issue for the river which rises in the Ascraea and here terminates. "The river crosses the causeway into the marsh by two openings, the closing of which in the winter or spring would at any time cause the upper part of the plain to be inundater, and leave the lower fit for cultivation in the summer: but as the river is now allowed to flow constantly through them, the western side is always in a state of marsh, and the ground has become mach higher on the eastern side."

The port of Thisbe is now called Vathy. The shore is very rocky, and abounds in wild pigeons, as Strabo and Stephanus have observed; but there is also a considerable number at Kakosia it-elf. The Roman poets also allude to the pigeons of Thisbe. Hence Ovid (Met. xi. 300) speaks of the "Thisbaeae columbae," and Statius (Theb. vii. 261) describes Thisbe as "Dionaeis avibus circumsona." Thisbe is mentioned both by Pliny (iv. 7. s. 12) and Ptolemy (iii. $15 . \S 20$ ).

Thisoa. [Theison.]
ThiUs. [Megalopolis.]
THMUIS (Erovis, Heroi. ii. 168; Aristides, Aegypt. vol. iii. p. 610 ; Ptol. iv. 5. § 51 ), the modern Tmai, was a town in Lower Aerypt, situated upon a canal E. of the Nile, between its Tanite and Mendesian branches. It was the capital of the Thmuite Nome, in which the Calasirian division of the Aegyptian army possessed lands. At the time of Herodutus's risit to the Delta the Thmuite Nome had been incorporated with the Mendesian. Their incorporation was doubtless owing, partly to the superior size of the latter, and partly to their having a common object of worship in the goat Mendes (Pan), of whom Thmu was in the old Aegyptian language (Hieronym. in Isaiam, xlvi. 1) the appellation. In the reigns of Valentinian and Theodusius the Great (A.D. 375, foll.) Thmuis was a town of some consequence, governed by its own maristrates, and exempt from the jurisdiction of the Alexandrian prefect (Amm. Marc. xxii. 16. § 6). It was also an episcopal sae, and one of its bishops, Serapion, is mentioned by Heracleanus. (ap. Photium, p. 65, ed.

THORICUS

Bekker.) Remains of the ancient city are supposed to exist at Tel-etmai or 'Tmai, SW. of Mansoorah. A monolithal shrine and many sarcophagi of granite have been found there, and a factitious mound at the village of Ternay, raised above the level of the inundation, is probably an Aegyptian work. (Champoilion, Egypte sous les Pharaons, vol. ii. p. 114.) That dykes were essential to the preservation of the city appears from the description of it by Aristides (l. c.), who represents Thmuis as standing upon and surrounded by flat and marshy grounds. [W.B.D.]

THOAE. [Echinades.]
THOANA. [Thana.]
THOARIS or THOA'RIUS (Ebapis or ©odpios), a small coast river in Pontus Pulemoviacus (Arrian, Peripl. P. E. p. 16; Anon. I'eripl. P. E. p. 11), is now called Gheureh, Irmak, or perhaps more correctls Thureh Irnak. (Hamilton, Researches, i. p. 279.)
[L. S.]
THO'CNIA (Өшкvía, Өóкvєıa: Eth. Өwкขєv่s), a town of Arcadia in the district Parrhasia, situated upon a height on the river Aminius, which flows into the Helisson, a tributary of the Alpheius. The town was said to have been founded by Thocnus, the son of Lycaon, and was deserted in the time of Pausanias, as its inhabitants had been removed to Megalopolis. It is placed by Leake in the position of Vromoséla. (Paus. viii. 3. § 2, 27. § 4, 29. § 5; Steph. B. s. v.; Leake. Morea, vol. ii. p. 293.)

THOMNA. [TAMNA.]
THONITIS LACLis. [Thospitis.]
THORAE. [Attica, p. 331, a.]
THO'RICUS (Eopıós: Eth. Eopinios: Theriko), a town of Attica on the SE. coast, and about 7 or 8 miles $N$. of the promontory of Sunium, was originally one of the twelve citics into which Attica is said to have been divided before the time of Theseus, and was afterwards a demus belonging to the tribe Acamantis. (Strab. ix. p. 397.) It cuntinued to be a place of importance during the flourishing period of Athenian history, as its existing remains prove, and was hence fortified by the Athenians in the 24th year of the Peloponnesian War. (Xen. Hell. i. 2. § 1.) It was distant 60 stadia from Anaphlystus upon the western coast. (Xen. de Vect. 4.§ 43.) Thoricus is celebrated in mythology as the residence of Cephalus, whom Eus or Aurora carried off to dwell with the gods. (Apollod. ii. 4. $\S 7$; Eurip Hippol. 455.) It has been conjectured by Wordsworth, with much probability, that the idea of Thoricus was associated in the Athenian mind with such a translation to the gods, and that the "Thorician
 (Ued. Col. 1595), respecting which there has been so much doubt, probably has reference to such a migration, as the poet is describing a similar translation of Oedipus.

The fortifications of Thoricus surrounded a small plain, which terminates in the harbour of the city, now called Porto Mandri. The ruins of the walls may be traced following the crest of the hills on the northern and southern sides of the plain, and crossing it on the west. The acropolis seems to have stood upon a height rising above the sheltered creek of Frangó Limiona, which is separated only by a cape from Porto Mandri. Below this height, on the northern side, are the ruins of a theatre, of a singular form, being an irregular curve, with one of the sides longer than the other. In the plain, to the westward, are the remains of a quadrangular colonnade, with Doric columns. (Leake, Demi of Attica,
p. 68, seq. 2nd ed.; Wordsworth, A thens and Altica, p. 208, seq.)

THORNAX (Bठpva̧). 1. A monntain near the city of Hermione in Argolis, between which and Mt. Pron the road ran from Hermione to Halice. It was subsequently called Coccygium, because Zeus was said to have been here transformed into a cuckoo; and on its summit was a temple of Zeus Coccygius. (Paus. ii. 36. §§ 1, 2; Leake, Peloponnesiaca, p. 288; Curtius, Peloponnesos, vol. ii. p. 463.)
2. A mountain in Laconia, on the road from Sparta to Sellasia, upon which stood a colossal sta. tue of Apollo Pythaeus. (Herod. i. 69; Paus. iii. 10. § 8; Steph. B. s. v.; Leake, Morea, vol. ii. p. 534, Peloponnesiaca, pp. 348, 352 ; Boblaye, Rech. p. 75 ; Ross, Pelopmnes, p. 190 ; Curtius, Peloponnesos, vol. ii. pp. 237, 259.)

THO'SPIA ( $\theta \omega \sigma$ ria, Ptol. v. 13. § 19, viii. 19. § 12), the capital of the district Thospitis. [T. H.D.]
 district of Armenia Major. It lay at the northern side of the Lacus Thospites (ì Bagnitis $\lambda$ i $\mu \nu \eta$, Ptol. ib. § 7). through which the Tigris flowed (Plin. vi. 27. s. 31). It is perhaps the same lake called Thonitis or Thopitis by Strabo ( $\Theta$ whitis or $\boldsymbol{\theta}_{\text {aritis, }}$ xi. p. 529), and Priscian (Lacus Tbonitidis, Perieg. 913), the water of which is described by Strabo as nitrous and undrinkable. It is probably the modern Wan, in the district of Tosp, and hence called by the Armenians Dzow Tospai.
[T. H. D.]

 Opp̣̂: Thrax. Threx, the latter forin being chiefly, if not exclusively, employed of gladiators). a country at the south-eastern extremity of Europe, and separated from Asia only by the Propontis and its two narrow channels, the Bosporus and the Hellespont.
I. Name. - Besides its ordinary name, the country had, according to Steph. B. (s. v.). two older appellations, $\Pi \dot{e} \rho \kappa \boldsymbol{\eta}$ and 'Apia; and Gellius (siv. 6) mentions Sithon as another. Respecting the origin of these names, various conjectures have been made both in ancient and in modern times; but as none of them, with the exception to be presently mentioned, are of much value, it is not worth while to devote any space to their consideration.* The exception alluded to is the etymolngy adopted by Col. Mure (Hist. of Lang. and Lit. of Anc. Greece, i. p. 153, note), which is far more probable and satisfactory than any other that the present writer has seen, and which derives the name Thrace from the adjective tpaxcia, "rugged," by the common transfer of the a-pirate. Thus the name would indicate the geographical character of the various districts to which it is giren; for, as we shall see, it was by no means confined to the country which is the special subject of the present notice.
II. Extent. - In the earliest times, the region called Thrace had no definite boundaries, but was often regarded as comprising all that part of Europe which lies to the north of Greece. Macedonia, in the south, is spoken of by Hecataeus as belonging to it (cf. Mel. ii. 2, sub fin., where the Chalcidic peninsula is described under the title of Thrace); and

[^43]Scythia, in the north, is included in it by Steph. B. (s. v. Ekúdat: cf. Aınm. xxvii. 4. § 3). This explains the fable reported by Andron (Tzetz. ad Lycopir. 894), to the effect that Oceanus had four daughters, Asia, Libya, Europa, and Thracia; thus elevating the last-named country to the rank of one of the four quarters of the known-or rather unknown-world. But as the Greeks extended their geographical knowledge, the designation Thrace became more restricted in its application, and at length was generally given to that part of Europe which is included within the following boundaries: the Ister on the N . (Strab. ii. p. 129 ; Plin. iv. 18; Mel. ii. 2); the Euxine and the Bosporus on the E.; the Propontis, the Hellespont, the Aegesn, and the northern part of Macedonia, on the S.; the Strymon, or sulsequently, i. e. in the time of Philip II. and his son Alexander the Great, the Nestus (Strab. vii. pp. 323. 330; Pwl. iii. 11), and the countries occupied by the Illyrians, on the W., where, however, the boundary was never very settled or accurately known. (Plin. and Mel. u. cc.) These were the limite of Thrace until the Romans subdued the country, when, in the reign of Augustus, it was divided into two parts, separated by the Haemus; the portion to the south of that mountain chain retaining the name of Thrace, whilo the part between the Ister and the Haennus received the appellation of Moesia, and was constituted a Roman province. [Moesia, Vol. II. p. 367.] But even after this period both countries were sometimes included under the old name, which the Latin poets frequently used in its earliest and widest extent of meaning. (Cf. Heyne, ad Virg. Aen. xi. 659; Burman, ad Val. Flacc. iv. 280: Muncker, ad Hygim. Fab. 138; Tzschucke, ad Mel. ii. 2. p. 63.) As the little that is known about Moesis is stated in the article above referred to, the present will, as far as possible, be confined to Thrace proper, or south of the Haemus, corresponding pretty nearly to the modern Rounelia, which, however, extends somewhat more to the west than uncieut Thrace.
III. Physical Geography, Climate, Productions, \&ec. - Many circumstances might have led us to expect that the ancients would have transmitted to us full information respecting Thrace: its proximity to Greece; the numerous Greek colonics established in it; the fact that it was traversed by the highroad between Europe and Asia; and that the capital of the Eastern Empire was situated in it,-all these things seem calculated to attract attention to the country in an unusual degree, and to induce authors of various kinds to emplog their pens in recording its natural and political history. Yet the latest and most profound historian of Greece is compelled to admit that, apart from two main raads, "scarcely anything whatever is known of [the interior of] the country." (Grote, vol. xii. p. 34, note. For this various reasons may be assigned; but the principal one is the barbarous character, in all ages, of the occupants of the land, which has, at least until very recently, precluded the prossibility of its exploration by peaceful travellers.* Those who bave

* Even one of the latest travellers there, M. Viquesnel, commissioned by the French government, and countenanced by the Turkish authorities, found it impossible to induce his guides to conduct him to a certain district which be wished to visit, although he offered to take as numerous an escort as they pleased. (See Archices des Dissions scienk et litt. vul. i. p. 210.)
traversed it have been almust invariably engaged in military enterprises, and too much occapied with their immediate objects to have either opportunity or inclination, even had they possessed the necessary qualifications, to observe and describe the natural features of the country. What adds to the difficulty of the witer on the classical geography of Thrace is the unfortunate loss of the whole of that portion of the seventh book of Strabo which was deruted to the subject. Strabo, in several parts of his work, treats incidentally of Thrace: but this is a poor substitute for the more systematic account of it which has perished, and of which little more than a table of contents has been preserved in the meagre epitome which alone remains of it.

In modern times, several travellers have endearoured, with variuus degrees of success, to explore the country; and some of them have published the results of their investigations; but it is evident from their rery frequent disagreement as to the sites of the places which they attempt to identify with those mentioned in ancient writers, that as yet the necessary data have not been obtained ; and the Itineraries, instead of assisting, not seldom add to the difficulty of the task. and render its accomplishment almost hopeless. Dloreorer, the extent of country examined by these travellers was very limited. "The mountainous region of Rhodope, bounded on the west by the Strymon. on the north and east by the Hebrus, and on the south by the Aegean, is a terra incoynita, except the few Grecian colonies on the coust. Very few travellers have passed along or described the southern or king's road ; while the region in the interior, apart from the highroad, was absolutely unexplored until the visit of M. Viquesnel in 1847. (Grote, l. c.)

The results of this traveller's researches have not yet, we beliere, appeared in a complete and connected form. His reports to the French minister by whom he was commissioned are published in the work already referred to ; but most of them are mere outlines, written on the spot from brief notes. They contain much that is valuable and interesting ; but no one except their author could make full use of them ; and it is to be hoped that he may be able to empiny the materials so ably collected in the composition of a work that would dispel much of the obscurity that at present rests upon the country. M. Viquesnel was engaged little more than a year in Thrace, a period evidently insufficient for its complete expleration; accordingly he seems to have devoted his principal attention to its geolugy, especially of the the mountain systems, above all in the district of Rhudope.

According to Ami Bonés chart of the geological structure of the globe, copied in Johnston's Physical Atlas, the three principal geological formations in Thrace are: (1) the crystalline schistous, comprehending all the granitoid rocks; this occupies the W. portion of the country, and a small district on the Euxine, immediately S. of the Haemus: (2) the tertiary, extending over the basin of the Hebrus: (3) the primary stratifications, or the transition series, including the carboniferous formations; this occupies the SE. part of the country, and a region S . of the Haemus, and W. of the tertiary formation above mentioned. Near the sources of the Bourghaz, Viquesnel found volcanic rocks (p. 213).

The surface of Thrace is, on the whole, decidedly mountainous, the vast plains spoken of by Virgil (Aen. iii. 13) belonging to Moesia. From the great range of Haemus, three chains of mountains branch

THRACIA.
1177
off towards the SE., and with their various ramifications occupy nearly the entire country. The must westerly of these begins at the NW. extremity of the boundary line, and soon separates into two almost parallel ranges, the Pangaeus and Khodope, which are separated from each other by the river Nestus: the former filling up the whole space between that river and the Strymon, the latter the district E. of the Nestus and SW. of the Hebrus. Buth Pangacus and Khodope extend down to the coast of the Aegean, and the latter is continued parallel to it as far E. as the Hebrus. The central oftihoot of the Haemus branches off between the sources of the Hebrus and the Tonzus, and extends to their junction near Hadrianopolis. The most easterly chain diverges from the Haemus about 100 miles W. of the Euxine, to the W. shore of which it is nearly parallel, though it gradually approaches nearer to it from N. to S.: it extends as far as the Bosporus, and with its lateral offshoots occupies nearly the whole country between the E. tributaries of the Hebrus and the Euxine. The central and E. ranges appear to have had no general distinctive names ; at least we are not aware that any occur in ancient writers : the modern name of the most easterly is the Strandja-Dagh. A continuation of this range extends along the shore of the Propontis, and is now called the Tehir-Dagh.

The lottiest peaks, among these mountains, belong to Rhodope, and attain an elevation of about 8500 feet (Viquesnel, p. 325) ; the summits of the Strandja-Dagh, are 2600 feet high (Id. p. 314); those of the Tekir-Dagh, 2300 (Id. p. 315); the other mountains are fiom 2000 to 600 feet in height (Id. pp. 314, 315). The Haemus is not more than 4000 feet high, in that portion of it which belongs to Thrace. It is obvious from these measurements that the statements of some of the ancieuts that the summits of the Thracian mountains were covered with eternal snow ( $\Theta \rho \eta \kappa \kappa \bar{\omega} \nu \quad \ddot{\rho} \rho \in a \quad \nu \quad \phi \delta \in \nu \tau a$, Hom. Il. xiv. 227), and that from the highest peak of the Haemus the Adriatic and the Euxine could be seen, are mere fancies. Strabo (vii. pp. 313,317) points out the inaccuracy of this notion. An interesting account is given by Livy (xl. 21, 22) of the ascent of Haemus by Philip V., who shared in the popular belief in question. Livy states plainly enough his conviction that I'hilip's labour, which was far from slight, was thrown away; but he and his attendants were prudently silent upon the subject, not wishing, says Livy, to be laughed at for their pains. Yet Florus, who alludes to the same circumstance (ii. 12), but makes Perseus the mountainclimber, assumes that the king's object was accomplished, and that the bird's-ege view of his dominions, obtained from the mountain top, assisted him in forming a plan for the defence of his kingdoin. with reference to his meditated war with Rome. Mela too repeats the erroneous statement (ii. 2).

The main direction of the rivers of Thrace is from N. to S., as might be inferred from the foreguing description of its mountain system. The Strymon forms its W. boundary. In the lower part of its course, it expands to a considerable width, and was called Lake Cercinitis, into which flowed a snaller river, the Angites (Herod. vii. 113); next, towards the E., comes the Nestus; then, in succession, the Travus, which falls into Lake Bistonis, the Schoenus, the Hebrus, the principal river of Thrace, and lastly the Melas. All these rivers fall into the Aegean. Several small streams flow into the Hellespont and
the Propontis, of which we may mention Aegospotami, renowned, notwithstanding its insignificant size, the Arzus, and the Erginus. The rivers which fall into the Euxine are all small, and few of them are distinguished by name in the gengraphers, though doubtless not so unhonoured by the dwellers upon their banks: among them Pliny (iv. 18) mentions the Pira and the Orosines. The Hebrus drains at least one-half, probably nearer two-thirds, of the entire surface of Thrace ; and on its banks, or on those of its tributaries, most of the level portions of the country are situated, as well as nearly all the inland towis. Its principal atfluents are the Arda (in some maps called the Harpessus), and the Suemus on the W., the Tonzus, Artiscus, and Agrianes on the E.

The Thracian coast of the Aegean is extremely irregular in its outline, being broken up by bays which enter far into the land, yet appear to be of comparatively little depth. Most of them, indeed, are at the mouths of rivers, and have probably been tilled up by alluvial deposits. It was perhaps for this reason that several of them were called lakes, as if they had been regarded as belonging to the land rather than to the sea; e. g. Lake Cercinitis, already mentioned, which seems, indeed, to have been little more than a marsh, and in Kiepert's map its site is so represented; Lake Bistonis, east of Abdera; and Stentoris Lacus, at the mouth of the Hebrus. The gulf of Melas, formed by the northern shore of the Chersonesus and the opposite coast of what may be called the mainland, is an exception to this doscription of the Thracian bays. The coasts on the Propontis and the Euxine are comparatively unbroken, the only gulf of any extent being Portus Hellodos, near Anchialus, which is known in modem times, by the name of the bay of Bourghaz, as one of the best harbours in the Euxine, the Cihracian shore of which was regarded by the ancients as extremely dangerous. [Salaydessus.]

The principal promontories were, Ismarum, Serrheum, Sarpedonium, and Mastusium, on the southern coast; Thynias and Haemi Extrema, on the eastern.

For an account of ore of the most remarkable parts of Thrace, see Chersonesus, Vol. I. p. 608.

Off the southern coust are situated the islands of Thasos, Samothrace, and Imbros; the first is separated from the mainland by a channel about 5 miles wide; the other two are considerably more distant from the shore.

The climate of Thrace is always spoken of by the aucients as being extremely cold and rigorous: thus Athenaens (viii. p. 351) describes the year at Aenus as consinting of eight months of cold and four months of winter; but such statements are not to be taken literally, since many of them are mere poetical exaggerations, and are applied to Thrace as the representative of the north in general The Haemus was regarded as the abode of the north wind, and the countries beyond it were believed to enjoy a beautifully mild climate. (See Niebuhr, Ethnog. and Geog. i. p. 16, Eng. trans.; Soph. Antig. 985 ; Eurip. Lities. 440 ; Theophr. de Caus. v. 17 ; Virg. Gearg. iii. 350 seq. ; Ov. Pont. iv. 10. 41, ib. 7. 8; Trist. iii. 10; \&c.). Even after making full allowance for the undoubted effect of vast forests, undrained marshes, and very partial cultivation, in lowering the averspe temperature of a country, it is difficult to believe that a land, the northern boundary of which (i. e. of Thate Proper) is in the same parallel of latitude as Tuscany and the Pyrnices, and the highest monntains of which are less than 9000 feet above the
level of the sea, can have had a very severe climate. That the winter was often extremely cold, there can be no doubt. The Hebrus was sometimes frozen over: not to dwell upon the "Hebrus nivali compede vinctus " of Horace (Ep. i. 3. 3; cf. Virg. Aen. xii. 331, and the epigram, attributed by some to Caesar, beginning, "Thrax puer adstricto glacie dum ludit in Hebro"), Florus (iii. 4) relates that, in the campaign of Minucius in southern Thrace, a number of horsemen in his army were drowned while trying to cross that river on the ice. Xenophon states that the winter which he passed in Thrace, in the mountainous district of the Thyni, was so cold that even wine was frozen in the vessels, and that many Greek soldiers had their noses and ears frostbitten; the snow also lay deep upon the ground. And that this was not an exceptional season may be inferred from Xenophon's remarks on the dress of the Thracians, which seemed to him to have been devised with special reference to the climate, and to prevent such inishaps as those which befel the Greeks (Anab. vii. 4. §§ 3, 4). Tacitus ( $A \mathrm{~mm}$.iv. 51) assigns the early and severe winter of Mount Haemus among the causes which prevented Poppacus Sabinus (A. d. 26) from following up his first success over the rebellious Thracians.* Pliny (xvii. 3) says that the vines about Aenus were often injured by frosts, after the Hebrus was brought nearer to that city; the allusion probably being to the formation of the western mouth of the river, nearly opposite to Aenus, the floating ice and the cold water brought down by which would have some effect in lowering the temperature of the neighbourhood. Mela (ii. 2, init.) describes Thrace generally as agreeable neither in climate nor in soil, being, except in the parts near the sea, barren, cold, and very ill adapted for agriculture and fruit-trees of all kinds, except the vine, while the fruit even of that required to be protected from the cold by a covering of the leaves, in order to ripen. This last remart throws sonue doubt upon the accuracy of the writer; for the shading of the grapes from the direct rays of the sun is obviously more likely to prevent than to promote their arrival at maturity; and hence, as is well known, it is the practice in many parts of Europe to remove the leaves with a view to this object.

However this may be, it is certain that Thrace did produce wine, some kinds of which were famous from very early times. Homer, who bestows upou Thrace the epithet $\langle p ı 6 \hat{\omega} \lambda a \xi$ (Il. xx. 485), represents Nestor reminding Agamemnon that the Grevian ships bring to him cargues of wine from that country every day (Ib. ix. 76); and the puet celebrates the excellence of the produce of the Maroneian vineyards. (Od. ix. 197, seq.) Pliny (xiv. 6) states that this wine still maintained its reputation, and describes it as black, perfumed, and grouiliz rish with age; a description which agrees with Homer's (l.c.). Paul Lucas says that he found the Thracian wine excellent. (Voy. dans la Turquie. i. p. 25 ; see also, Athen. i. p. 31.) Thrace was fertile in corn (Plin. xvii. 3), and its wheat is placed by Pliny high in the scale of excellence as estimated by weight. It has, he says (xviii. 12), a stalk consisting of several coats (tunicae),

* M. Viquesnel states, on two occasions, that lie was compelled to change his route in consequence of heavy and continuous snow-storms. in the month of Nuvember (pp. 213, 312). The wind also was extremely viulent.
to protect it, as he supposes, from the severity of the climate; by which also he accounts for the cultivation, in some parts of the country, of the triticum trimestre and bimestre, so called because those varieties were reaped in the third and second month respectively after they were sown. Corn was exported from Thrace, and especially from the Chersonesus to Athens (Theoph. de Plantis, viii. 4; Lys. in Viogit. p. 902 ), and to Rome (Plin. l.c.). Millet was cultivated in some parts of Thrace; for Xenophon (Anab. vii. 5. § 12) states that on the march to Salmydessus, Seuthes and his allies traversed the country of the " millet-eating Thracians" (ci. Strab. vii. p. 315.$)$ The less important vegetable productions of Thrace may be briefly mentioned: a species of water-chestnut (tribulus) grew in the Strymon, the leaves of which were used by the people who lived on its banks to fatten their horses, while of its nuts they made a very sweet kind of bread. (Plin. xxi. 58, xxii. 1:.) Hoses (Rosa centifulia) grew wild on the Pangaeus, and were successfully transplanted by the natives (Id. xxi. 10). The mountains, in general, abounded in wild-thyme and a species of mint (Id. xix. 55). A sort of morel or trutfle (iton) was found in Thrace (Id. xix. 12; Athen. ii. p. 62), and a styptic plant (ischuemon), which was said to stop bleeding from even divided blood-vessels. (Theoph. de Plant. ix. 15 ; Plin. xxv. 45.) Several varieties of ivy grew in the country, and were sacred $\omega$ Dionysus. (Theoph. de Plant. iii. 16; Plin. xvi. 62.) Herodotus (iv. 74) states that the Scythians had hemp both wild and cultivated; and as he proceeds to say that the Thracians made clothing of it, we may fairly infer that it grew in Thrace also. "The Atheuians imported their timber chiefly from the country about the Strymon, for the Thracian hills abounded in oak and fir-trees." (Niehuhr, Lect. Anc. Hist. i. p. 292, Eng. trans.). M. Viquesnel states that the Strandja. ckagh is covered with forests of oak (p. 314), and that in some parts of the district of Rhudope tobdico is now cultivated ( p .320 ).

Anong the animals of Thrace, white horses are repeatedly mentioned. The famous steeds of Rhesus were "whiter than snow." (Hom. Il. x. 437; Eurip. Rhes. 304.) When Xerxes reached the banks of the Strymon in his onward march, the magi sacrificed white horses (Herod. vii. 113), which wers probably Thracian, for the same reason, whatever that was, that the human victims spoken of in the next chapter were the children of natives. Xenophon states that, during a banquet given by Seuthes, a Thracian entered, leading a white horse, which he presented to his prince, with an encomium on its fleetness (A uab vii. 3. § 26). Virgil speaks of Thracian horses with white spots (Aen. v. 565, ix. 49). Hones were no doubt plentiful in Thrace: Homer (Il. xiv. 227) calls the Thracians imлoпó入ot; and cavalry always formed a large part of their armies. Thus Thncydides (ii. 98) estimates the number of horsemen in the army with which Sitalces invalled Macedunia at about 50,000 . One of the twelve labours of Hercales was to bring to Mycenae the savage mares of Diomedes, king of the Bistones in Thruce, whof fed thein with human tlesh. ( Or . Met. ix. 194.) Herodutus (vii. 126) states that lions were found throughout the country bounded on the W. by the Achelous and on the E. by the Nestus; a statement which is repeated by Aristotle (II. A. vi. 31, viii. 28); so that the part of Tirace between the Strgmon and the Nestus must have been in-
fested, at least in early tinnes, by those formiduble animals. Herodotus says that they attacked the baggage-camels of Xerxes during the march of his army from Acanthus to Therme (vii. 125). Cattle, both great and small, were abundant, and seem io have constituted the chiet weath of a people who, like most barbarians, considered agriculture a base occupation. (Herud. v. 6.) The fertile valleys were well adapted for oxen, and the thyme-covered bills for sheep; and it is clear, from several passages in Xenophon, that even the wildest Thracian tribes were rich in this kind of weallh. (Anab. vii. $3 . \S+8$, 7. § 53.) Aristotle informs us that the Thracians had a peculiar method of fattening swine ( $H$. A. viii. 6). He attributes the smallness of their asses to the coldness of the climate (Ib.28). Cranes are often mentioned as belonging to Thrace. (Virg. Georg. i. 120; Ov. A. A. iii. 182 ; Juv. xiii. 167.) Aristolle siys that an aquatic bird of the pelican kind ( $\pi \in \lambda \in \kappa \alpha \bar{\nu} \in s$ ) migrates from the Strymon to the Ister (U. A. viii. Il); and that the people in some marshy districts of Thrace were assisted in catching water-fowl by hawks; which do not seem to have been trained for the purpose, but, thongh wild, to have been induced by a share of the game, to second the proceedings of their human assuciates (Ib. ix. 36). Eels were caught at certain seasons in the Strymon (Ib. viii. 2, ad fin.). The tunny fishery w:Ls a source of great wealth to Byzautium. (Strab. vii. p. 320.)

The principal mineral productions of Thrace were gold and silver, most of which came from the mountainous district between the Strymon and the Nestus. There, at the southern extremity of the Pangaeus, was situated Crenides, founded by the Thasians, and afterwards called l'hilippi, in a hill near which, named the hill of Dionysus (Appian, B. C. iv. 106), were the most productive gold mines of Thrace, to get possession of which was Philip's principal object in annexing the district in question to his dominions. He is said to have derived from the mines an annual income of 1000 talents. (Diod. x:i. 8 ; cf. Strab. vii. p. 323.)* Strabo (xiv. p. 680) says that the wealth of Cadmus came from the mines of the Pangaeus; and Pliny refers to the same tradition when he states (vii. 57 ) that according to some authorities, the Pangaeus was the place where Cadınus first discovered gold mines, and the art of melting their produce (conflatura). Herodotus (vii. 112) mentions silver, as well as gold, mines in the Paggaeus, which in his time were in the possession of the native tribes called Pieres, Odomanti, and Satrae. He states also (vi. 46) that the Thasians had gold mines at Scapte Hyle, near Abdera, from which they derived an (annual) revenue of about 80 talents; and that a part of the revenues of Peisistratus came from the Strymon, by which the mines on its banks are probably meant (i. 64). (See also, ix. 75 ; Eurip. Rhes. 92l; Strabu (or rather his epitomiser), vii. p. 331.) According to Pliny (xxxiii. 21) gold was found in the sands of the Hebrus; and this is confirmed by Paul Lucas (l. c.), and by Viquesnel, who states ( $p$. 204) that in rainy years the afHuents of that river are frequented by gold-finders, who wash the sands which contain gold in grains (en paillettes). Thucydides was interested in gold mines and works near Amphipolis, as he himself informs us (iv. 105). Of the other minerals of Thrace we may mention the

[^44]1180
THRACIA.
opal (paederos, Plin. xxxvii. 46); the Thracia gemma, one variety of which seems to resemble the bloodstone (ib. 68); a stone which burnt in water (Id. xxxiii. 30); and nitre, which was found near Philippi (Id. xxxi. 46). In addition to these, M. Viquesnel mentions fine marble, which is quarried from the mountains of Lidja (p. 200) ; excellent iron, manufactured at Sanukor (p. 209) ; alum, produced at Chaphané (p. 213) ; and potter's clay, in the district of Khodope, used by the Turks in the fabrication of earthenware (p. 319). He states also that Rhodope abounds in mineral waters (ib.), and that there are warm springs at Lidja (p. 212).

A few miscellaneous notes will conclude this part of our subject.

The narrow portion of Thrace between the Euxine, Bosporus and Propontis, is sometimes called the Delta ( $\tau \delta \Delta$ dé $\tau \tau a$, Xen. Anab. vii. 1. § 33, 5. § 1).

Reference is several times male to violent natural convulsions, which destroyed various Thracian cities. Thus Strabo (i. 59) says that it appeared that some cities were swallowed up by a flood in Lake Bistonis; and he (vii. p. 319), Pliny (iv. 18), and Mela (ii. 2) speak of the destruction of Bizone, on the Euxine, by earthquakes.
Livy (xl. 22) describes the region between Maedica and the Haemus as without inhabitants (solitudines).

Herodotus (vii. 109) speaks of a lake near Pistyrus (on the coast N. of Abdera), about 30 stadia in circumference, abounding in fish, and extremely salt.

Thrace possessed two highroads, "both starting from Byzantium ; the one (called the King's road, from having been in part the march of Xerxes in his invasion of Greece, Liv. xxxix. 27 ; Herod. vii. 115), crossing the Hebrus and the Nestus, touching the northern coast of the Aegean sea at Neapolis, a little south of Philippi, then crossing the Strymon at Amphipolis, and stretching through Pella across Inner Macedonia and Illyria to Dyrrhachium. The other road took a more northerly course, passing along the upper valley of the Hebrus from Adrianople to Philippopolis, then through Sardica (Sophia) and Naissus (Nisch), to the Danube near Belgrade, being the highroad now followed from Constantinople to Belgrale." (Gmte, vol. xii. p. 34, note.) Herodotus (l. c.) remarks, with evident surprise, that the King's road had not, up to his time, been destroyed by the Thracians, a circumstance which he seems to attribute to the almost religious respect with which they regarded the "great king." It may be safely inferred that penple who were considered to have done something wonderful in abstaining from breaking up a road, were not great makers or maintainers of highways; and it is clear from Livy's account of the march of Manlius (xxxviii. 40, 41) along this very road (afterwards called by the Romans, Via Egnatia, q.v.), that, although it was the principal line of communication between Europe and Axia, it was at that time (b. c. 188) in a very bad condition. From this some conception may be forned of the deplorable state in which the ruads of the interior and mountainous districts must have been, and in which, indeed, they still remain. (Viquesnel, p.312.) The Thracians no doubt were well aware that their independence would soon be lost, if there were an easy access for disciplined armies to every part of their country. Such paths as they possessed were sufficient for their own purposes of depredation, of ambush, and, when overpowered, of flight.
IV. Ethnology, Manners, Religion, etc.-

## THRACIA.

The first point to be determined here is, whether the Thracians mentioned in the ancient writers as "xtending over many parts of Greece, as far south as Attica, were ethnologically identical with thooe who in historical times occupied the country which is the subject of the present article. And before discussing the topic, it will be convenient to lay before the reader some of the principal passages in the classics which bear upon it.

It is Strabo who makey the most distinct statements on the point. He says (vii. p. 321), "Hecatnens the Milesian states that, befure the Hellenea, barbarians inhabited Peloponnesus. But in fact nearly all Greece was originally the abode of barbarians, as may be inferred from the traditions. Pelups brought a people with him into the country, to which he gave bis name, and Danaus came to the same region with followers from Egypt, at a time when the Dryopes, Caucones, Pelasgi, Leleges, and other similar races had settlements within the Isthmus; and indeed without it too, for the Thracians who accompanied Eumolpus had Attica and Tereus possessed Daulis in Phocis; the Phoenician companions of Cadmus occupied Cadmeia, the Aones, Tenmices, and Hyantes Boeotia." Strabo subsequently (ix. 401) repeats this statement respecting Boeotia, and adds that the descendants of Cadmus and his followers, being driven out of Thebes by the Thracians and Pelasgians, retired into Thessaly. They afterwards returned, and, having joined the Minyans of Orchomenos, expelled in their turn the Pelasgians and Thracians. The former went to Athens, where they settled at the foot of Hymettus, and gave the name of Pelasgicum to a part of the city (cf. Herod. vi. 137): the Thracians, on the other hand, were driven to Parnassus. Again (ix. p. 410) he says, speaking of Helicon: "The temple of the Muses, and Hippocrene, and the cave of the Leibethridan nymphs are there; from which one would conjecture that those who consecrated Helicon to the Muses were Thracians; for they dedicated Pieris, and Leibethrum, and Pimpleia to the same goddesses. These Thracians were called Pierians (niepts); but their power having declined, the Macedonians now occupy these (last named) places." This account is afterwards (x. p. 471) repeated, with the addition that " the cultivators of ancient music, Orpheus, Musaeus. Thamyris, and Eumolpus, were Thracians."

The difficulty that presents ithelf in these passages, -and they are in general agreement with the whole budy of Greek literature,-arising from the confounding under a common name of the precursors of Grecian poetry and art with a race of men desisnated as barbarous, is well stated by K. O. Müller (Hist. of Greek Liter. p. 26, seq.): "It is utterly inconceivable that, in the later historic times, when the Thracians were contemned as a barbarian race, a notion should have sprung up that the first civilisation of Greece was due to them; consequently we cannot doubt that this was a tradition handed down from a very early period. Now, if we are to understand it to mean that Eumolpus, Orpheus, Musseus, and Thamyris were the fellow-countrymen of those Edunians, Odrysians, and Odomantians, who in the historical age occupied the Thracian territory, and who spoke a barbarian language, that is, one ummtelligible to the Greeks, we must despair of being able to comprehend these accounts of the ancient Thracian minstrels, and of assiguing them a place in the histocy of Grecian civilisation; since it is
manifest that at this early period, when there was scarcely any intercourse between different nations, or knowledge of foreign tongues, poets who sang in an unintelligible language could not have had more influence on the mental development of the people than the twittering of birds."

Müller therefore concludes that the Thracians of the ante-historical era, and those of subsequent times, belonged to distinct races. "When we come to trace inore precisely the country of these Thracian bards, we find that the traditions refer to Pieria, the district to the east of the Olympus range, to the north of Thessaly, and the south of Emathia or Macedonia: in Pieria likewise was Leibethra, where the Muses are said to have sung the lament over the tonub of Orpheus : the ancient pouts, moreover, always make Pieria, not Thrace, the native place of the Muses, which last Homer clearly distinguishes from Pieria. (Il. xiv. 226.) It way not until the Pierians were pressed in their own territory by the early Macedonian princes that some of them crossed the Strymon into Thrace Proper, where Herodotus (vii. 112) mentions the castles of the Pierians at the time of the expedition of Xerxes. It is, however, quite conceivable that in early times, either on account of their close vicinity, or because all the north was comprehended under one name, the Pierians might, in Southern Greece, have been called Thracians. These Pierians, from the intellectual relations which they maintained with the Greeks, appear to be a Grecian race; which supposition is also confirmed by the Greek names of their places, rivers, fountains, \&ec., although it is probable that, situated on the limits of the Greek nation, they may have borrowed largely from neighbouring tribes. (See Müller's Dorians, vol. i. pp. 472. 488, 501.)" After referring to the accounts of the Thracians in Southern Greece, Muller adds: "From what has been said, it appears sufficiently clear that these Pierians or Thracians, dwelling about Helicon and Parnussus in the vicinity of Attica, are chiefly signitied when a Thracian origin is ascribed to the mythical bards of Attica."

Colonel Mare, after referring to the foregoing view, which he designates as "plausible," goes on as follows: "But the case admits of another, and perhaps more satisfactory explanation. It is certain that, in the mythical geography, a tract of country on the frontiers of Boeotia and Phocis, comprehend. ing Mount Parnassus and Helicon, bore the name of Thrace. [See the etymology, ante.] In this region the popular mythology also lays the scene of several of the most celebrated adventures, the heroes of which are called Thracians." The author then applies this explanation to the stories of Tereus and Procne, and of Lycurgus, " king of Thrace;" and proceeds thus: "Pausanias makes the "Thracian' bard Thamyris virtually a Phocian. He assigns him for $m$ ther a nymph of Parnassus called Argiope. His father, Philammon, is described as a native of the same region, son of Apollo, by the nymph Chione, and brother of Autolycus, its celebrated robber chieftain. The divine grandsire is obviously here but a figure of his own sacred region; the grandmother Chione, as her name bears, of its snow. Others call the latter heroine Leuconoe. The names of these heroines are all so many varied modes of typifying the same 'snow-white' Parnassus. This view of the 'Thracian' character of these sages becomes the more plausible, if it be remembered that the region of Central Greece, in which
the Hellenic Thrace was situated, is that from which first or chiefly, the seeds of elementary culture were propagated tbroughout the nation. Here tradition places the first introduction of the alphabet. Here were also the principal seats of Apollo and the Muses. In the heart of the same region was situated the Minyean Orchomenos, the temple of the Graces, rivalling Thebes herself in the splendour of her princes and zeal for the promotion of art. Among the early masters of poetry or music, not vulgarly styled Thracians, the most illustrious, Amphion and Linus, are Boeotians. Nor was this region of Central Greece less favoured in respect of its religious institutions. It was not only the favourite seat of Apollo, the Muses, and the Graces, but the native country of the Dionysiac rites, ze:al for the propagation of which is a characteristic of the Thracian sages." (Hist. of Lang. and Lit. of Ant. Greece, i. pp. 150-153; cf. Niebuhr, Lect. on Ethnog. and Geog. i. p. 287.)

In thus entirely disconnecting these early "Thracians," from those of later times, we have the authority of Thucydides (ii. 29), who, in speaking of Teres, the father of Sitalces, remarks : "This Teres had no connection whatever with Tereus, who married Procne, daughter of Pandion of Athens; they did not even belong to the same Thrace. Tereus dwelt at Daulia, a city of the country now called Phocis, and which was then occupied by the Thracians." And he proceeds to show that it was not likely that Pandion would form an alliance with any one who lived so far from Athens as the country of the Odrysse.*

The consideration of the ethnological relations of the early Thracians hardly falls within the scope of this article; but since identity of name has often caused them to be confounded with the historical inhabitants of Thrace, it may be desirable briefly to discuss the subject in this place.

The view which seems to the present writer to be best supported by the evidence, and to explain most satisfactorily the ancient authors, is that which regards the mythical Thracians as members of the widely extended race to which the name of Pelasgians is usually given. It is clear from Homer that a close connection existed between the people of Southern Thrace and the Trojans, whowere probably Pelasgians, and who are at the same time represented by hiin as agreeing, in language, religion, and other important respects, with the Greeks. Again, Homer mentions anong the auxiliaries of Prian, the Caucones, who are named along with the Pelasgians (IL. x. 429), and the Cicones ( $l l$. ii. 846). These two nanles bear so close a resemblance to each other as to suggest the prohability of the cognate origin of the tribes so designated. Now the Cicones were undoubtedly Thracians (Odys. ix. 39, seqq.) ; while as to the Caucones, Strabo (xii. p. 542) informs us that they occupied part of the coast of Bithynia, and were regarded by some as Scythians, by others as Macedonians, by others again as Pelasgians. It will be remembered that Caucones are mentioned by him (vii. p. 321) among the earliest inhabitants of Poloponnesus. Another noticeable fact is, that in the passage of Strabo already quuted (ix. p. 401), he represents the Thracians and Pelasgians as acting in

* Yet subsequent prose writers, to say nothing of pmets, fall into the error of making Tereus an inhabitant of Thrace Proper; and Pliny (iv. 18) even mentions the castle there in which the crime of Tereus was perpetrated !
concert. The same author (xiii. p. 590) points out the similarity of many Thracian names of places to those existing in the Trojan territory. Finally, the naunes of the places mentionel by Strabo (vii. p. 321) as common to Pieria and the southern Thracians, are evidently Greek (see Müiler's Dorians, i. p. 501); and, as we have seen, the name Thrace itself is in all probability a significant Greek word.

These considerations appear to us to lead to the conclusion already stated, namely, that the mythical Thracians, as well as those spoken of by Homer, were Pelasgians ; and hence that that race once occupied the northern as well as the other shores of the Aegean, until, at a comparatively late period, its continuity was broken by the irruption of the historical Thracians from the north into the country between the Strymon and the Euxine. The circumstance that the Greeks designated these barbarians by the name which had been borne by those whom they supplanted, admits of easy explanation. and history abounds in instances of a similar kind. But it may be doubted whether the Thracians had any general designation in their own language: they probably called themselves Edones, Densele:ae, Thyni, Satrae, and so on; but we have no evidence that they really were all branches of a common stock. Under these circumstances, it was inevitable that the Greeks should bestuw upon them the name of the earlier possessors of the country ; and those Thracians who were brought in contact with the more civilised race would probably adopt it. (On the furegoing question, see Niebuhr, Lect. on Anc. Hist. i. pp. 142, 212; Lect. on Ethnog. and Geog. i. p. 287 ; Wachsmuth, Hist. Ant. i. p. 44, seqq.)

Respecting the historical Thracians we have tolerably full information, but not of that kind which will enable us to arrive at any very definite conclusions as to their ethnological relations. That they belonged to an extensively diffused rice, whose early aboxies were in the far northern regions, may be regarded as sufficiently proved by the concurrent testimony of the ancient writers. Herodutus, in a well-known passage ( $\mathbf{v} .3$ ), says that the Thracian nation is the greatest in the world, after the Indians, and that its subdivisions, of which the Getae are one, have many names, according to the countries which they severally occupy. Stribo too (vii. p. 295) states that the Getae and the Mysi were Thracians (as to the Mysi, see also i. p. 6). who extended north of the Danube (vii. p. 296). In confirmation of his assertion that the Getae were ethnologically akin to the Thracians, he arlduces the identity of their language (vii. p. 303). He adds (vii. p. 305) that the Daci also spoke this language. From his remark (vii. p. 315) about the Iapodes, it would seem that he regarded the Illyrians also as nearly allied to, if not actually a branch of, the Thracians. In another passage (x. p. 471) he says that the Phrygians were colonists of the Thracians ; to which race also the Saraparae, a nation still farther towards the east, north of Armenia, were reported to belong (xi. p. 531). "The Bithyni, previously called Mysi, were so named, as is admitted by most authorities, from the Thracian Bithyni and Thyni, who emigrated to that country (i. e. Asia Minor ; cf. Herod. vii. 75). And I conjecture that the Bebryces, who settled in Mysia before the Bithyni and Mysi, were also Thracians. The Mysians themselves are said to be colonists of those Thracians who are now called Mysi. As the Mariandyni are in all respects like the Bithyni, they too are probably Thracians." (Strab. xii. pp. 541, 542.) Justin
couples the Thracians with the Illyrians and Dandani (xi. 1). In the west and south-west it is impossible to define the Thracian boundary : we have seen that Mela describes the whole of the Chalcidic peninsula as part of Thrace (cf. Thucyd. ii. 79) : and there is no doubt that they extended as far south as Olympus, though mixed up with Macedonians, who were the preponderating race in that quarter. In later times the intrusire and undoubtedly distinct races which were mingled with the Thracians near the Danube, were sometimes confounded with them. Thus Florus (iii. 4) calls the Scordisci the most savage of all the Thracians.

Of the language of the Thracians scarcely a trace exists. They were too barbarnus to have any literary or artistic memorials, so that the principal guides of the ethnologist are wanting. Strabo (rii. p. 319) states that $b r \dot{u}$, which occurs as the termination of several names of Thracian towns, signified "city" or "town." This and a few proper names constitute all that remains of their language.

The following is the account which Herolotus gives of the customs of the Thracians. They sell their children into foreign slavery. The women while unmarried enjoy perfect freedom in their intercourse with men; but after marriage they are strictly guarded. The men pay large sums of money for their wives to the parents of the latter. ${ }^{\circ}$ To be tattoved is considered an indispensable mark of noble birth. (Cf. Strab. vii. p. 315.) Idleness is mmt honourable; the cultivator of the soil is regarded as the meanest of men; to live by war and plundering is most noble. The only gods they worship are Ares, Dionysus, and Artemis. But their kings differ in this respect from their subjects; for they worship Hermes especially, and swear by him alene, from whom they say that they are descended. When a wealthy man dics, his corpse lies in state for three days: his friends then make a great feast, at which, after bewailing the departed. they slaughter victims of every kind: the body is then buried, having sometimes been previously burnt. A mound is raised abore the grave, upon which athletic games are celebrated (v. 6-8; cf. Xen. Hell. iii. 2. § 5 ). Besides these customs, which were common to all the Thracians, Herodotus mentions some which were peculiar to certain tribes; as, for instance, that which prevailed amnng the people to the north of the Crestonians. "Among them, each man has many wives. When any man dies, a great contest arises among his widows on the question as to which of them was most beloved by their husband; and in this their relations take a very active part. She in whose favour the point is decided, receires the congratulations of both men and women, and is then slain upon her husband's grave by her nearest male relation. The other widows regard themselves as extremely unfortunate, for they are considered to be dixgraced." (Ib. 5.) Herodotas here seems to speak of polygamy as contined to a certain tribe of Thracians; but Strabo (vii. p. 297) represents this custorn as general among them. In a note upon this passage, Crsaubon quotes from Heracleides Ponticus to the effect that Thracians often had as many as thirly wives, whom they employed as servants, a pructice still common in many eastern countries. Xenophon furnishes us with an illustration of the Thracian custom of purchasing wives. He states that at his first interview with Seuthes, the Thracian prince proposed to give his datughter in marriage to Xenophon; and if the Greek himself had a
danghter, offered to buy her as a wife. (Anab. vii. 2. §38; cf. Mela, ii. 2.)

The want of union among the Thracians is mentioned by Herodotus (v. 3) as the only cause of their weakness. Their tribes, like the Highland clans, seem to have been constantly engaged in petty warfare with one another, and to have been incspable of co-operating even against foreign foes, except for very brief periods, and rarely with any higher object than plunder. Until a late period (Flor. iv. 12. §17) they appear to have been destitute of discipline, and this, of course, rendered their bravery of comparatively little avail. Thus we learn from Thucydides (ii. 96, 98) that, although Sitalces was the mast powerful Thracian king that had ever reigned- (he seems indeed to have been subsequently regarded as a kind of national hero; Xen. Anab. vi. 1. © 6 ),-yet a large part of the urmy with which he invaded Macedonia consisted of mere volunteers, formidable chiefly for their numbers, and attracted to his standard by his offers of pay. or by their hope of plunder. Any one, in fact, who beld out these inducements, could easily raise an army in Thrace. Thus Clearchus no sooner received supplies of money from Cyrus the Younger, than he collected a force in the Chersonesus, which, although in great part undoubtedly Thracian, was employed by him in making war upon other Thracians, until he was required to join Cyrus in Asia Minor (Ib.i. l. § 9, 2. § 9, \&c.). So when Seuthes undertiok the expediuion against his so-called revolted subjects, his army was soon tripled by volunteers, who hastened froin other parts of Thrace to serve hin, as soon as they beard of his enterprise (Ib. vii. 4. § 21). Such soldiers could not, of course, be depended upon for one moment after a reverse. A considerable number of Thracian mercenaries in the army of Cyrus took the earliest opportunity to desert to Artaserses atter the battle of Cunaxa (Ib. ii. 2. §7).

Tacitus (Ann. iv. 46) informs us that the principal cause of the insurrection (A. D. 26) of the Thracians who dwelt in the elevated mountain districts (probably of Rhodope), was their dislike of the conscription, which, it would appear, the Romans had introduced into Thrace. This was a goke to which they could not submit; they were not accustomed to obey even their own rulers, except when it pleased them; and when they sent troops to the assistance of their princes, they used to appoint their own commanders, and to war arguinst the neighbouring tribes only. (Cf. Liv. xlii. 51 ; Xen. Anab. vii. 4. § 24,7 . § 29 , seq.)

Thra ian troops were chiefly light-armed infantry and irregular horse. (Xen. Anab.i. 2. § 9, vii. 6. § 27, Memor. iii. 9. § 2; Curt. iii. 9.) The bravest of the foot-soldiers in tise ariny of Sitalces were the free mountaineers of Rhodope, who were armed with short swords ( $\mu \alpha \chi a \iota \rho u ф \dot{\rho o r} ;$ Thucyd. ii. 98). The equipment of the Asiatic Thracians is described by Herodotus (vii. 75), and as this description agrees with what Xenophon states respecting Seuthes' forces (Anab. vii. 4. § 4), it is no doubt substantially true of the Thracians generally. They wore caps covering their ears, made of fox-skins, cloaks, and party-coloured mantles (Setpal, ?= plaids) ; their brots, which came high up the leg, were made of deer-skin; their arms were shields, javelins, and daggers (cf. Thacyd. vii. 27). The Thracians in the army of Philip V. were armed with very long rhomphaeae, a word which some trunslate javelins, others swords. (Liv. $x \leq x i .39$;

Plut. Paul. Apmil. 17.) Thracian soldiers fought with impetussity and with no lack of bravery; but they, like all barbarian and undisciplined troops were incapable of sustained efforts. Livy (xlii. 59) describes them as rushing to the attack like wild beasts long colfined in cages: they hamstrung the horses of their adversaries, or stabbed them in the belly. When the victory was gained on this occasion (the first encounter in the war between the Komans and Perseus), they returned to their camp, singing loud songs of triumph, and carrying the heads of the shain on the tops of their weapons ( $l b .60$ ). When defeated, they tled with rapility, throwing their shields upon their backs, to protect thein from the missiles of the pursuers. (Xen. Anab. vii. 4 § 17.)

About the time of the Peloponnesian War, Thrace began to be to the countries around the Aggean what Switzerland has long, to its disgrace, been to the despotic powers of modern Europe, a land where men might be procured to fight for any one who could hold out sufficient inducements in the shape of pay or plunder. (Thucyd. vii. 27, et alibi; Xen. Anub. i. pass.; Just. xi. 1 \& 9.) The chief causes of this, apart from the character of its people, appeatr to have been the want of any central government, and the difficult nature of the country, which rendered its savage independence tolerably secure; so that there was nothing to restrain those who might wish to seek their forturie in foreign warfare. During the period of Macedonian supremacy, and after its close, under the Koman power, Thracians are often mentioned as auxiliaries in Macedonian and Roman armies; but few of these, it is proballe, were volunteers. (Liv. xxxi. 39, xlii. 29, 51, et al.; Caes. B. C. iii. 4; Vell. Pat. ii. 112 ; Tac. Hist. i. 68, \&c.) Cicero (de Prov. Cons. 4) seems to imply that Thracians were sometimes hired to assassinate like the modern Italian bravis; these were perhaps gladistors, of whom great numbers were Thracians. Caligula gave the culamand of his German bodyguard to Thracians. (Suet. Calig. 55.)

Another point in which the Thracians remind us of the natives of India, is mentioned by Thucydides (ii. 97 ) in these words: "The tribute of the barbarians and of the Greek cities received by Seuthes, the successor of Sitalces, might be reckoned at 400 talents of silver, reckoning gold and silver together. The presents in gold and silver amounted to as much more. And these presents were made not onily to the king, but also to the most influential and distinguished of the Odrysae. For these people, like those of Thrace generally, differ in this respect from the Persians, that they would rather receive than give; and among them it is more shameful not to give when you are asked, than to be refused when you ask. It is true that abuses arise from this custom ; for nothing can be done without presents." (Cf. Liv. xlii. 19, xiv. 42; Tac. Germ. 15.) Xenophon ( $A n a b$. vii. 3) gives some amusing illustrations of this practice among the Thracians.

Mention is often made of the singing and dancing of the Thracians, especially of a martial kind. Xenoption (Anab. vi. 1. §5, seq.) gives an account of a dance and combat performed by some Thracians, to celebrate the conclusion of a peace between the remnant of the $\mathbf{1 0 , 0 0 0}$ Greeks and the Paphlagonians: they danced fully armed to the music of the flute, jumping up nimbly to a considerable height, and fencing with their swords: at last, one man struck another, to all aypearance mortally and he fell as if
dead, though in reality not in the least injured, His antagonist then stripped off his armour, and went out singing the praises of Sitalces, while the other man was carried out like a corpse by his comrades (cf. Ib. vii. 3. § 32, seq.; Tac. Ann. iv. 47).

Their music was rude and noisy. Strabo (x. p. 471 ) compares it to that of the Phrygians, whom, indeed, he regards as descended from the Thracians. Xenophon, in the passage last referred to, says that they played on horns and on trumpets made of raw ox-hide. Their worship of Dionysus and Cotytto was celebrated on mountain tops with loud instruments of music, shouting, and noises like the bellowing of cattle. (Strab. x. p. 470.)

Their barbarity and ferocity became proverbial. Herodotus (viii. 116) tells a story of a king of the Bisaltae, who punished his six sons for disnbeying him by putting out their eyes. Seuthes, with his own hand, transfixed some of the Thyni who had been taken prisoners (Xen. Anab. vii. 4. § 6). Rhascuporis invited his nephew to a banquet, plied him with wine, then loaded him with fetters, and afterwards put him to death. (Tac. Am. ii. 64, seqq.) Thucydides (vii. 27, seq.) gives an instance of the ferocity of the Thracians in their massacre of the inbabitants of Mycalessus.

A truly barbarian trait in the character of the Thracians was their faithlessness, even to one another. This is especially shown in their disregard of their obligations iowards the hostages whom they gave as securities for their observance of their engarements with others. Seuthes had received from the Thyni a number of old men as hostages; yet the Thyni, seeing a favourable opportunity, as they supposed, for renewing hostilities, at once seized it, apparently without a thought of the but too probable consequences of such conduct to their helpless countrymen. (Xen. Anab. vii. 4. § 21; cf. Liv. xl. 22). Sume of the tribes inhabiting the Thracian coast of the Euxine were systematic wreckers [Salmydessus]. Robbery, as we have seen, was considered honourable by them; and plunder was their chief inducement to engage in war. (Strab. vii. p. 318; Cic. Pis. 34; Liv. $x \times v i$. 25, $x \times x$ viii. 40, seq.) Strabo (iii. pp. 164, 165), Mela (ii. 2), and Tacitus (Ann. iv. 51) bear witness to the bravery of the Thracian women.

The deity most worshipped by the Thracians was Dionysus, whom they, as well as the Phrygians, called Sabazius. (Schol. Aristoph. Vesp. 9.) The mythical stories respecting Orpheus and Lycurgus are closely connected with the worship of this god, who had an oracle on Rhodope, in the country of the Satrae, bat ander the direction of the Bessi [Satrae]. Herodutus (vii. 111) states that the mode of delivering the answers of this oracle resembled that which prevailed at Delphi. He compares also the worship of Artemis (whose Thracian name was Bendis or Cotytt(), as he had seen it celebrated by Thracian and Paeonian women, with some of the ceremonies at Delos (iv. 33). These resemblances may be accounted for on the supposition that the Thracian rites were derived from the original Pelasgian population, remnants of which may have maintained themselves amid the mountain fustnesses ; as Niebulir holds (Ethnog. and Geog. i. p. 287) was the case with the Paeonians, who are mentioned by Herodotus in the passage last referred to. (On the Thracian divinities, see Strabo, x. pp. 470, 471; Soph. Antig. 955, seq.; Plin. xvi. 62; and the articles Bendis, Cotys, and Rhen, in the Dict. Bing. and $3 / y$ yth.)

## THRACIA.

It has sometimes been asserted that the Thracians were accustomed to sacritice buman victims to their divinities; but this appears to be either an incorrect generalisation, or a confounding of them with other races; for we find no reference to such a custom in any of the ancient accounts of their manners. Herodotus, it is true, states (ix. 119) that when the Persian Oeobazus fell into the hands of the Apsinthii, after the taking of Sestus by the Athenians, they sacrificed him to their local god, Pleistorus; but from the next words ( $\tau \rho \delta \pi \varphi \tau \hat{\varphi} \sigma \phi \in \tau \dot{\rho} \rho \varphi$ ) it is clear that he regarded the practice as characteristic of the Apsinthii, and not as one common to all Thracians : nor is it conceivable that he would have omitted to mention so striking a circumstance, in his general description of Thracian manners, which has been already quoted (v. 3. seqq); for the practice of slaying the favourite wife on the tomb of her deceased husband cannot with any propriety be called a sacrifice.
Whether indulgence in wine was regarded as a part of the bomage due to Dionysus, or simply as a means of sensual gratification, certain it is that it was prevalent in Thrace, and frequently attended with violent and sanguinary quarrels: "Natis in usuin laetitiae scyphis pugnare Thracum est," says Horace, and evidence is not wanting in support of the accuration. Ammianus (xxvii. 4. § 9) describes the Odrysae as so fond of bloodshed that in their banquets, after eating and drinking to satiety, they used to fall to blows with one another. Tacitus (Ann. iv. 48) relates that the Thracians serving with Poppaeus Sabinus against their fellow-countrymen, indulged to such a degree in feasting and drinking that they kept no guard at night, so that their camp was stormed by their exasperated brethren, who slew great numbers of them. Xenophon tells us that at his first interview with Seuthes, they drank horns of wine to each other's health, according to the Thracian custom (Anab. vii. $2 \S 23$ ). At the banquet which Seuthes afterwards gave to Xenophon and some other important persins the drinking seems to have been deep. Xenophon admits that he had indulged freely; and lie was evidently astonished that when Seuthes rose from the table, he manifested no signs of intuxication. (Ib. 3. § 26, seqq.) The Thracians are said to have bad a custom, which prevailed in England as late as the last century, of compelling all the guests to drink the same quantity. (Callitn. ap. Athen. x. p. 442.) The Odrysian auxiliaries of Dercyllidas poured great quantities of wine upon the graves of their slain comrades. (Xen. Hell.iii. 2 § 5.) It would appear from Mela (ii. 2), that some of the Thracians were unacquainted with wine, but practised another mode of producing intoxication: while feasting, they threw into the fires around which they were seated certain seeds, the fumes of which caused a cheerful kind of drunkenness. It is possible that these may have been the seeds of hemp, which, as we have seen, probably grew in Thrace, and contains, as is well known, a narcotic principle.

The Thracians against whom Seuthes led his forces lived in villages ( $/ 6 . \S 43$ ), the houses being fenced round with large stakes, within the inclonsure formed by which their sheep were secured (I6. 4. § 14 ; cf. Tac. Ann. iv. 49).

Pliny (vii. 41) states that the Thracians had a custom of marking their happy or unhappy days, by placing a white or a black stone in a vessel at the close of each day. On any one's death, the ressel
belonging to him was emptied, the stones were separutely counted, and his life pronounced to have been happy or the reverse, as the white or the black were more numerous.
V. History. - Thrace is one of those countries whose people, not being sufficiently civilised to establish a national government or to possess a national literature, cannot have histories of their own. We become acquainted with the Thracians at second hand, as it were, through the narrations of foreigners, who necessarily make them subordinate to their own countrymen; and therefore it is only in connection with foreign states that their history has been recorded. Hence it is fragmentary, and, consequently, often obscure; nor would its importance, indeed, repay the labour that might be employed in elucidating it, even if we possessed the requisite materials. Destitute of union, the Thracians, notwithstanding their numbers, their wide diffusion, their powers of endurance, and their contempt of death, exerted no perceptible influence upon the general course of history; but were reduced, in spite of their wild love of independence, to assist, as humble allies or subjects, in the aggrandisement of the more civilised or politic races with which they came in contact. These were the Greeks, the Persians, the Macedonians, and the Romans, with the successors of the last in the Eastern Empire. We shall now briefly state the leading points of their history, as connected with that of the nutions just mentioned; referring the reader for details, especially as to the little that is known of their purely internal affairs, to the articles in this work which relate to the Bessi, Odrysae, and other prominent Thracian tribes.

We pass over the alleged conquest of Thrace by Sesostris (Herod. ii. 103; Diod. i. 53), and that said to have been effected by the Teucri and Mysi before the Trojan War (Herod. vii. 20 ; cf. Eurip. Rhes. 406, seq.), and come at once to the strictly historical periods.

The first connection of the Greeks with Thrace was through colonies planted upon its various coasts, the original object of which seems generally to bave been of a commercial kind. Only an approximation to the date of most of these can be made, since the majority were established long before the commencement of authentic history. Byzantium and Selymbria, colonies of Megara, belong to the seventh century b. C., the year 675 в. c. being assigned for the foundation of the former. In 651 B.c. an unsuccessful attempt is said to have been made by settlers from Clazomenae to establish themselves at Abdera (Solin. x. 10); but that city was not actually founded till 560 в. c., and then by emigrants from Tens. (Herod. i. 168.) Mesembria, on the Enxine, was a colony of the Byzantians and Chalcedonians, who abandoned their cities on the approach of the Phoenician fleet, b. c. 493. (Id. vi. 33). When Dicaea, Maronea, and Aenus, all on the south coast, were established, is not known; which is the case also with Cardia and Sestas in the Chersonesus. That these settlements were generally exposed to the hostility of their Thracian neighbours, there can be no doubt, though we rarely have their infant struggles so fully recorded as in the instance of Amphipolis. The Athenians sent no less than 10,000 men (в. с. 465) to found a colony there; and they succeeded in driving off the Edonians who occupied the country; but having advanced into the interior, they
were defeated at Drabescus by the natives, and compelled to abandon the country. About thirty years afterwards, however, the Athenians returned, and this time overcame all resistance. Sometimes the relation between the Greeks and the Thracians was of a more friendly description. Thus, in the time of Peisistratus, the Dolonci, who dwelt in the Chersonesus, invited Miltiades (the elder) to rule over them, as they were unable to cope with their neighbours the Apsinthii; and this led to the Athenians obtaining a firm footing in that most important and valuable district. (Herod. vi. 34, seq.) By these various means, the Greeks had obtained possession of nearly the whole coast of Thrace, a considerable perind before the commencement of the great contest between themselves and the Persian empire. Of the interior they appear to have known scarcely anything whatever; and although in some cases the surrounding barbarians may have been brought into subjection (Byzantium is said to have reduced the Bithynian Thracians to the condition of tributary perioeci), yet this was rarely the case. On the contrary, it is clear from Thucydides (ii. 97), that the Greeks sometimes paid tribute to the native kings. The Greeks, even when dwelling among hostile strangers, showed their tendency to separation rather than to union; and hence their settlements on the Thracian coast never gained the strength which union would have conferred upon them. Each city had a government and to a great extent a history of its own; and we must therefore refer the reader for information respecting those states to the separate articles in this work devoted to them.

The first Persian expedition to Thrace was that of Darius, who crossed the Bosporus with his army about B. C. 513 (or 508, as some authorities hold). As the principal object of Darius was to chastise the Scythians for their invasion of Asia in the reign of Cyaxares, he took the shortest route through Thrace, where he met with no opposition. The Greeks whom he found there were required to follow in his train to the Danube: among them was the younger Miltiades, the destined hero of Marathon, who then ruled over the Chersonesus, as his uncle had formerly done, and who had married the daughter of a Thracian king. (Herod. vi. 39.) * Ou returning from the north, Darius directed his march to the Hellespont, and before crossing from Sestus into Asia, erected a fort at Doriscus, near the mouth of the Hebrus. (Herod. iv. 89-93, 143, 144, vii. 59.) Megabazus was left with 80,000 men to subdue the whole of Thrace, a task which be began by besieging Perinthus, which, though previously weakened by the attacks of the Paeonians, made a brave but fruitless resistance. After this, Megabazus reduced the country into subjection, though perhaps only the districts near the sea. (Herod. v. 1, 2, 10.) That his conquests extended as far as the Strymon appears from Darius's grant of a district upon that river to Histiaeus, who founded there the town of Myrcinus. (Herod. $\mathbf{\nabla}$. 11.) Megabazus soon returned to Asia; and it seems probable that he toxk with him the greater part of his army; for if the Persians had maintained

[^45]
## THRACIA.

a powerful force in Thrace, the Paponians could hardly have succeeded in making their escape from Phrygia back to the Strymon (Id. v. 98), nor could the revolted Ionians (b. c. 498) have taken Byzantium and all the other cities in that country. (Id. v. 103.) It is to this period that we must refer the invasion of the Scythians, who are said to have advanced as far as the Chersonesus, thus occasioning the temporary flight of Miltiades, who, they were aware, had assisted Darius in his attack upon their country. (Id. vi. 40.)

After the suppression of the Ionian revolt (в. c. 493), the Phoenician fleet sailed to the Hellespont, and again brought the country under the I'ersian dominion. Cardia being the only city which they were unable to take. (Id. vi. 33.) Diltiades made his escape from the Chersonesus to Athens, on hearing of the approach of the hostile fleet. (1b. 41.)

Next year Mardonius led an army across the Hellespont, and advanced as far as Macedonia; but his fleet haring been wrecked off Mount Athos, and his land forces having suffered considerably in a war with the Thracians, who then occupied the country W. of the Strymon, he retraced his steps, and transported his shattered army into Asia (Id. vi. 43, seqq.).

It was not till B. c. 480 that the vast army under the command of Xerses crossed the Hellespont by the fannous bridges which spanned the strait from Abydos to Sestus. Of his march through Thrace, Herodotus gives an interesting account (vii. 108115); but, as he met with no opposition, we need not dwell upon these circumstances.

After the disastrous battle of Salamis, Xerxes, with an escort of 60,000 men, hastened back by the same road which he had so recently trod in all the overweening confidence of despotic power: in Thrace, his miserable troops suffered greatly from bunger and consequent discase, but do not appear to have been openly attacked. (Herod. viii. 115 , seqq.)

Next year (b. c. 479) was fought the battle of Plataeae in which Thracians furmed part of the motley host arrayed against Greek freedom (Id. ix. 32). Artabazus led the 40,000 men, who alone remained of the Persian army, by forced marches through Thessaly, Macedonia, and Thrace. He struck through the interior of the latter country, probably for fear of the Greek cities on the coast; but he encountered enemies as much to be dreaded, and lost a great part of his army by hunger, fatigue, and the attacks of the Thracians, hefore he reached Byzantium.

It was now the turn of the victorious Greeks to assail their foes in their own territories. Thrace. with the exception of Doriscus, was soon cleared of the Persians. After the battle of Mycale, their fleet asiled to the Hellespont, where the Athenians laid siege to Sestus, which was taken early in the following year (b. c. 478) [Sestus]. Eion, at the mouth of the Strymon, made a desperate resistance; but at length (b. c. 476) fell into the hands of Cimon and the Athenians, after its l'ersian governor had put to death all his family, and finally himself. (Herud. vii. 107 ; cf. Thucyd. i. 98). Byzantium had treen taken by Pausanias the gear before. Thus the I'ersians were driven out of Europe, and the Greek settlements in Thrace resumed their internal freedom of action, though most of them, it is probable, were under the supremacy of Athens, as the chosen head of the great Greek confederacy.

During the administration of Pericles, 1000 Athenian citizens were settled in the Thracian Chersonesus, which was always the chief stronghold of

Athens in that quarter. Under the auspices vif the same statesman, in B. C. 437, the Athenians succeeded in founding Amphipolis, the contexts for the possession of which occupy a very prominent place in the subsequent history of Greece. [Ampiniolis, Vol. I. p. 126.]

About this time flourished the most powerful Thracian kingdon that ever existed, that of the Odrysae, for the history of which see Udrysare. Vol. II. pp. 463-465. At the commencement of the I'eloponnesian War (b.c. 431), the Athenians entered into an alliance with Sitalces, the king of the Odrysae (Thucyd. ii. 29), who, they boped, would enable them to subdue all opposition to their supremacy in the Chalcidic peninsula. In consequence of this alliance, Sitalces led (b. c. 429) a rast hoot into Macedonia, the ruler of which supported the enemies of Athens : he encountered no opposition, yet was compelled by want of supplies to return to Thrace, about a month after he had left it (Ib. 95-101). But although Sitalces was an ally of Athens, this did not prevent Brasidas from having great numbers of light-armed Thracians in his armies, while commanding the Spartan forces in the neighbourhood of Amphipolis (B. c. 422).

It would occupy too much space to relate minutely the various turns of fortune which occurred in Thrace during the Peloponnesian War. The principal struggle in this quarter was for the comman:d of the Borporus and Hellespont, so important, exper. cially to the Athenians, on account of the corn traile with the Euxine, from which Athens drew a large part of her supplies. Hence many of the most important uaval battles were fought in the Hellespont ; and the possession of Byzantium and Sestus was the prize of many a victory. The battle of Aegospotami, which terminated the long contest for supremary, took place to the S. of Sestus, B. C. 405. By the peace concluded next year, Athens gave up all her foreign possessions ; and those in the east of Thrace fell into the hands of the Spartans and Yersians. [See Byzantium, Sestcis, \&e.]

When the remnant of the 10,000 Greeks returned (B. c. 400) to Europe, they were engaged by Seuthes, an Odrysian prince, to assist him in recovering the dominions which had belonged to his father, in the south eastern part of Thrace. (Men. Anab. vii. pass.) Having thus been reinstated in his principaity, he showed his gratitude to the Greeks, by sending auxiliaries to Dercyllidas, who commanded the Spartan forces against the Persians, with whom they were now (b.c. 399) at war (Xen. Hell. iii. 2). Nicst year Dercyllidas crossed over into the Chersonesus, and erected a wall across its northern extremity, as a protection to the Greek inhabitants, who were exposed to constant attacks from their barbarous neighbours (Ib.2. §\$ 8-10). The same general successfully defended iestus from the combined furces of Conon and Pharnabazus (b. c. 394 : 1b. iv. 8. § 5, seqq.) But in в.c. 390 Thrassbulus restored Athenian influence in Thrace, by forming an alliance with two native princes, and by estabiishing democracy at Byzantium ( 16. § 25 , seqq.); and his success was confirmed by the victory of Iphicrates over Anaxibius the next year ( $i b . \S 34$ ). The prace of Antalcidas, however, released all the Greek states from their connection with Athens, and virtually gave the supremacy to Sparta (в.c. 387).

Nothing of any importance happened in Thrace after this event till the accession of Philip II. to the throne of Macedonia (8.c. 359). This able but un-
scrupulons monarch at once began his career of aggrandisement towards the east. He contrived to get possession of Amphipolis (b.c. 358), and thus obtained a secure footing from which he might extend his dominions in Thrace as opportunity offered. At this time there were three native Thracian princes, probably brothers, who seem to have ruled over most of the country. According to Justin (viii. 3), Berisades and Amadocus, two of them, chose Philip as judge of their disputes; of which position he treacherously availed himself to seize upon their dominions. Though this statement is not supported, we believe, by any other ancient author, yet it is probably true; for such conduct is highly characteristic of the Macedonian monarch; and the almost entire disappearance from history of these Thracian princes soon after Philip's nccession, would thus be accounted for. Cersobleptes, the third brother, who seems to bave had the E. portion of Thrace, maintained a long struggle against his ambitious neighbour. In b. c. 357 he ceded the Cinersonesus to the Athenians, who sent a colony to occupy it four years afterwards. [See Cersobieptes, Dict. Biog. Vol. I. p. 674 : Sestus.] Philip at various times marched into Thrace, and repeatedly defeated Cersobleptes, whom he at length (B. c. 343) completely subdued and rendered tributary. Next year he established colonies in the eastern part of Thrace, and acts of hostility occurred between him and Diopeithes, the Athenian commander in that quarter. Philip was occupied the next three years in Thrace, and laid siege to Perinthus and Byzantium, which were in alliance with Athens, whose furces, commanded by Phocion, compelled Philip to abandon the sieges; and he soon afterwards left Thrace, to advance towards the south against the confederate Greeks. On his departure Phocion recovered several of the cities in which Macedouian garrisons had been placed.
Notwithstanding these checks, Philip had broucht under his command a great part of Thrace, especially ou the south coast: he had, above all. completely incorporsted with his kingdom the district between the Strymon and the Nestus, and from the mines of the Pangaeus, which he seized in b. c. 356, he obtuined abondant supplies of the precious metals.
Philip was assassinated r.c. 336: next year his successor, Alexander the Great, marched across the Haemus to attack the Triballi; but his chief attention was bestowed upon the preparations for the Asiatic expedition, which he entered upon next year, crossing the Hellespont from Sestus.
On the death of Alexander (b. c. 323), Thrace was allotted to Lysimachus, who was soon involved in hostilities with Seuthes, a king of the Odrysae. The reader is referred to the account of Lysinachus [Dict. Biog. Vol. II. pp. 867-870] for details respecting his government of Thrace: the result of his various wars was that his sway was firmly established over all the countries south of the Danube, as far as the confines of Macedonia; the Greek cities on the Eusine were garrisoned by his troops; and though many of the native tribes, in the more inaccessible districts, no doubt retained their freedom, yet he had completely defeated all their attacks upon his power. In в. c. 309 he founded I.ysimachia, near the northern extremity of the Chersonesus and made it his capital. Having engaged in a war with Seleucus, the ruler of Syria, he advanced to meet his antagonist in Asia, and was defeated and slain at Corupedion (в. c. 281), upon which Seleucus passed
over into Europe and tonk possession of Thrace. Next year, however, he was assassinated by Ptolemy Ceraunus, who was thereupon acknowledged king: but shortly afterwards a vast horde of Celts invaded the country, and Ptolemy was slain in a battle with them. Anarchy now prevailed for some years in the country: the Celts agnin advanced to the south in B. C. 279, and under Brennus penetrated as far as Delphi, on their repulse from which they retreated northwards, and some of them settled on the coust of Thrace.

For nearly fifty years after this time little mention is made of Thrace in history; it appears to have been annexed to Macedonia; but the rulers of that kingdom were too insecure, even in their central dominions, to be able to exercise much control over such a country as Thrace, inhabited now by races differing so widely as the Thracians, the Greeks, and the Celts, and offering so many temptations to the assertion of independence. [See Antigonus Gonatas. Demetrics II., and Pyrkius, in Dict. Biog.]

About b. c. 247 , the fleet of Ptolemy Euergetes captured I. ssimachia and other important cities on the coast; and they remained for nearly half a century under the kings of Egypt. (Polyb. v. 34, 58.)

In B. c. 220 , Philip V. ascended the throne of Macedonia. Under him the Macedonian power regained something of its old prestige; and had it not been brought in colision with Rome, it might have becone as extensive as in former times. But Philip unfortunately directed his ambitious views in the first instance towards the West, and thas soon encountered the jealous Republic. It was not till b.c. 211 that Philip commenced his enterprises against Thrace: he then led an arny into the country of the Maedi, who were in the habit of making incursions into Macedonia. Their lands were laid waste, and their capital, Lamphorina, compelled to surrender. Having made peace with the Romans (b. c. 205), he invaded Thrace, and took Lysimachia. In b. c. 200, he again attacked that country, both by sea and land; and it is evident that he did not anticipate much resistance, since he took with him only 2000 infantry and 200 cavalry. Yet with this insignificant force, aided by the fleet, he made himself master of the whole of the south coast, and of the Chersonesus. He then laid sicge to Abydos, and after a desperate resistance took it (Liv. xxxi. I6). This seems to have hastened the declaration of war on the part of the Romans ; a war which lasted till B. c. 196, when Philip was reduced to procare peace by surrendering all his conquests, and withdrawing his garrisons from the Greek cities (Liv, xxxiii. 30). L. Stertinius was sent to see that these terms were complied with (ib. 35). But scarcely had the cities been evacuated by the Macedonian garrisons, when Antiochus the Great crossed the Hellespont, and took possession of the Chersonesus, which he claimed as a conquest of Seleucus (ib. 33). He refused to comply with the demand of the Romans, that he shouid withdraw his army from Europe; but left his son Seleucus to complete the restoration of Lysimachia, and to extend his influence, which seems to have been done by placing garrisons in Maroneia and Aenus.
In the war which ensued between the Romans and Antiochus (в. c. 190), Philip rendered the former good service, by providing everything necessary for their march through Thrace, and securing them from molestation by the native tribes (Liv. xxxvii. 7). Antiochus was defeated by Scifio at Magnesia, and
sued for peace, which was at length granted to him (b. c. 188) on condition of his abandoning all his dominions west of the Taurus (Liv. xxxviii. 38). The Romans gave the Chersonesus and its dependencies to their ally Eumenes (ib. 39). As indicative of the internal condition of Thrace, even along the great southern road, the account which Livy (ib. 40, seq.) gives of the march of the consul Manlius' army through the country on its return from Asia Minor, is highly interesting. The army was loaded with booty, conveyed in a long train of baggagewaggons, which presented an irresistible temptation to the predatory tribes through whose territories its route lay. They accordingly attacked the army in a defile, and were not beaten off until they had succoeded in their object of sharing in the plunder of Asia.

The possession of the Chersonesus by Eumenes sonn led to disagreements with Philip, who was charged by Eumenes (b.c. 185) with having seized upon Maroneia and Aenus, places which he coveted for himself. (Liv. Exxix. 24, 27). The Romans insisted upon the withdrawal of the Macedonian garrisons (b.c. 184), and Philip, sorely against his will, was obliged to obey. He wreaked his anger upon the defenceless citizens of Maroneia, by conniving at, if not actually commanding, the massacre of a great number of them (ib. 33, 34). In the course of the disputes about these cities, it was stated that at the end of the war with Philip, the Roman commissioner, Q. Fabius Labeo, had fixed upon the king's road, which is described as nowhere approaching the sea, as the S. boundary of Philip's possessions in Thrace; but that Philip had afterwards forned a new road, considerably to the $S$., and had thus included the cities and lands of the Maronitae in his territories (ib. 27).

In the same year, Philip undertook an expedition into the interior of Thrace, where he was fettered by no engagements with the Romans. He defeated the Thracians in a battle, and took their leader Amadocus prisoner. Before returning to Macedonia he sent envoys to the barbarians on the Danube to invite them to make an incursion into Italy (ib. 35). Again in b.c. 183, Philip marched against the Odrysae, Dentheletae and Bessi, took Philippopolis, which its inhabitants had abandoned at his approach, and placed a garrison in it, which the Odrysae, however, soon afterwards drove out (ib. 53). In b.c. 182, Philip removed nearly all the inhabitants of the coast of Macedonia into the interior, and supplied their places by Thracians and other barbarians, on whom he thought he could more safely depend in the war with the Romans, which he now saw was inevitable (Liv. xl. 3). He had done something of the same kind a few jears before (Id. $\mathbf{~ x x x i x . ~ 2 4 ) . ~}$

Philip's ascent of the Haemus, already referred to, took place in b. c. 181: on the summit he erected altars to Jupiter and the Sun. On his way back his anny plundered the Dentheletae; and in Maedica he tork a town called Petra. (Liv. xl. 21, seq.)

Philip died in s. c. 179, and his successor Perseus continued the preparations which his father had made for renewing the war with Rome, which did not begin, however, till в. c. 171 . The Romans had formed an alliance the year before with a number of independent Thracian tribes, who had sent ambassadors to Rome for the purpose, and who were likely to be formidable foes to Perseus. The Romans took care to send valuable presents to the priacipal Thracians, their ambassadors baving no
doubt impressed upon the senate the necessity for compliance with this national custom. (Liv. xlii. 19.)

The advantage of this alliance was soon seen. Cotys, king of the Odrysme, was an ally of Perseus, and marched with him to meet the Rumans in Thessaly, but with only 1000 horse and 1000 foot, a force which shows how greatly the power of the Odrysian monarchy had declined since the reign of Sitalces (ib. 51). Cotys commanded all the Thracians in Perseus's army in the first engagement with the Roman cavalry, which was defeated (ib. 57, seq.). When Perseus retreated into Macedonia a report was brought that the Thracian allies of Rome had invaded the dominions of Cotys, whom Perseus was therefore obliged to dismiss for their protection (ib. 67), and he does not seem to have personally taken any further part in the war, though he probably sent part of his forces to assist Perseus (xliv. 42). His son Bitis fell into the hands of the Romans, after the battle of Pydna (b.c. 168), which put an end to the Bacedonian kingdom. Cotys sent ambassadors to Rome to endeavour to ransom his son, and to excuse bimself for having sided with Perseus. The senate rejected his offers of money, but liberated his son, and gave a considerable sum to each of the Thracian ambassadors. The reason it assigned for this generosity was the old friendship which had existed between Rome and Cotys and his ancestors. The Romans were evidently unwilling to encrage in a war with the Thracian people at this time; and were anxious to secure friends among them for the sake of the peace of Macedonia, which, though not yet nominally made a province, was completely in their power. They sent (в. с. 167) three commissioners to conduct Bitis and the other Thraciuns home; and at the same time, no doubt, to make observations on the state of that country. (Liv. xlv. 42).

After the fall of Perseus, the sennte divided his dominions into four districts (regiones), the first of which included the territory between the Strymon and the Nestus, and all the Macedonian possessions east of the latter, except Aenus, Maroneia, and Abdera: Bisaltica and Sintice, west of the Strymon, also belonged to this district, the capital of which was Amphipolis. (lb. 29.) It is important to recollect that the Thrace spoken of by the Latin historians subsequently to this time does not include the territories here specified. which thenceforth constituted an integral part of Macedonia.

From the year b. c. 148, when the Romans andertwok the direct government of that country, they were brought into contact with the various barbarous nations on its frontiers, and were continually at war with one or another of them. For some years, however, their chief occupation was with the Scordisci, a people of Celtic origin which had settled south of the Danube, and often made devastating incursions into the more civilised regions of the south. They are sometimes called Thracians (e. g. by Florus, iii. 4 ; cf. Amm. xxvii. 4. § 4), which is the less surprising when we remember that great numbers of Celts had settled in Southern Thrace, and would soon be confounded under a common namo with the other occupants of the country. The history of all this period, up to the time of Angustus, is very obscure, owing to the loss of so great a part of Livy's work ; enough, however, appears in other writers to show that Thrace was left almost entirely to its native rulers, the Romaus rarely interfering with it except when provoked by the predatory incursions
of its people into Macedonia: they then sometimes made retaliatory expeditions into Thrace; but seem generally to have made their way back as soon as the immediate object was accomplished. The relation existing between the Romans and the Thracians, for more than a century after the conquest of Macedonia, thus bears a close resemblance to that which has long existed between our own countrymen and the Caffres.

During the years B.c. 110, 109, the Consul M. Minucius Rufus was engaged in hostilities with the Scordisci and Triballi; and, according to Florus (l.c.), laid waste the whole valley of the Hebrus (cf. Eutr. iv. 27). In b. c. 104, Calpurnius Piso penetrated into the district of Kholope (Flor. l.c.). In b.c. 92, the Maedi defeated the praetor, C. Sentius, and then ravared Macedonia (Cic. Pis. 34 ; Liv. Epit. 70). After the breaking out of the Mithridatic War (b.c. 88), mention is made in several successive years of the incursions of the Thracians into the Roman provinces, and it is probable that they were acting in concert with Mithridates, whose general Taxiles, in b. c. 86, led a vast ariny through Thrace, and Macedonia to the assistance of Archelaus. (Liv. Epit.74,76,81,82). On the final defeat of Archelaus, Sulla directel his march towards Asia through, Thrace B. C. 84, and, either to punish the people for their connection with Mithridates, or because they opposed his passage, made war upon them with complete success (Id. 83). C. Scribunius Curio defeated the Dardani, and penetrated to the Danube, being the first Roman who had ventured into that part of Earope (b. c. 75 ; Liv. Epit. 92 ; Eutr. vi. 2). Cario was succeeded as governor of Macedonia by M. Lacullus (b.a. 73), who defeated the Bessi in a pitched battle on Mount Haemus, took their capital, and ravaged the whole country between the Haemus and the Danube (Liv. EpiL. 97 ; Eutr. vi. 10). The Bessi were again conquered in B. c. 60 by Octavius, the father of Augustus (Suet. Aug. 3 ; cf. $I b$. 94 ; Freinsh. Suppl. cxxxv. 2). In the years b. c. 58, 57, Piso, so well known to us from Cicero's celebrated speech against him, was governor of Macedonia; and, if we may believe Cicero, acted in the most cruel and faithless manner towards the Bessi and other peaceable Thracian tribes. (Pis. 34, de Prov. Cons. 2, seq.). From the latter passage it appears that although Thrace was not under the government of Rome, yet the Romans claimed the right of way through it to the Hellespont; for Cicero calls the Egnatian Way " via illa nustra militaris."

In the civil war between Caesar and Pompey, several Thracian princes furnished the latter with ausiliary forces. Why they interfered in the contest, and why they preferred Pompey to Caesar, are matters of conjecture only. Pompey had been chiefly engaged all his life in the East, Caesar in the West ; and that is probably sufficient to account for the greater influence of Pompey in Thrace. (Caes. B. C. iii. 4 ; Flor. iv. 2 ; Dion Cass. xli. 51, 63, Ilvii. 25).

At the time of Caesar's death two brothers, Rhascuporis and Rascus [Dict. Biog. Vol. III. p. 647] ruled over the greater part of Thrace; and when the war broke out between the triumvirs and the republican party, Rhascuporis sided with the latter, while Rascus aided the former. By this plan they hoped to be safe, whichever party might be victorious; and it is said that their expectations were realised.

When the power of Rome was at length wielded by Augustus without a rival, the relation of Thrace
to the Roman state seems to have become in many respects like that which the native princes of India long bore to the British. The Thracian kings were generally allowed to exercise, without restraint, their authority over their own subjects, and when needful it was supported by the arms of Rome. But all disputes among the native rulers were referred to the decision of the emperors, who disposed of the country as its acknowledged lords. These subject princes were expected to defend Thrace from external and internal foes ; to assist the Rumans in the field ; to allow them to enlist troops, and in other ways to exercise the rights of sovereignty. For illustrations of these statements we must refer the reader to Tacitus, especially to the following passages : Ann. ii. 6467, iii. 38, 39, iv. 5, 46-51. The few Thracian coins which are extant afford a proof of the dependent character of the Thracian kings; they bear on the obverse the effigy of the reigning emperor, on the reverse that of the native prince. [See Dict. Biog. Vol. III. p. 653.]

The interference of the Romans in the government of Thrace was not submitted to by the nation at large without several severe struggles. The most formidable of these occurred about B. c. 14, the fullest account of which is given by Dion Cassius (lib. liv.). The leader in this insurrection was Vologaesus, a Bessian priest of Bucchus, who availed himself of his sacerdutal character to inflame the religious feelings of his countrymen. Having thus assembled a large army, he attacked, defeated, and slew Rhascuporis, a king under Roman protection; his uncle, Rhoemetalces, was next assailed and compelled to flee : the insurgents pursued him as far as the Chersonesus, where they devastated the country and captured the fortified places. Ou receiving information of these proceedings, Augustus ordered L. Piso, the governor of Pamphylia, to transport his army into Thrace, where, after a three years' war and several reverses, he at length succeeded in subduing the Bessi, who had adopted Roman arms and discipline. They soon afterwards made a second attempt to regain their independence ; but were now easily crushed. (Vell. Pat. ii. 98; Tac. Ann. vi. 10; Sen. Ep. 83; Flor. iv. 12 ; Liv. Epit. 137.)

After this war, the Romans gradually absorbed all the powers of government in the country. Germanicus visited it in A. D. 18, and introduced reforms in its administration (Tac. Ann. ii. 54). A system of conscription seems to have been imposed upon the Thracians about A. D. 26 (Ib. iv. 46). The last native prince of whom we find any mention is Rhoemetalces II., who, in A. D. 38, was made by Caligula ruler over the whole country; and at length, in the reign of Vespasian (A. d. 69-79), Thrace was reduced into the form of a province. (Suet. Vesp. 8; Eutr. vii. 19; cf. Tac. Hist. i. 11.) The date of this event has been disputed on the autbority of the Eusebian Chronicle, which states that it took place in A. D. 47, in the reigr of Claudius; but the statement of Suetonius is express on the point. It is possible that Khoemetalces II. may have died about the year last mentioned; and if Claudius refused to appoint a successor to him, this would be regarded as equivalent to incorporating the country in the Koman empire, although its formal constitution as a province was delayed; as we know was commonly the case. It is remarkable that Moesia was made a province upwards of 50 years before Thrace Proper, its first propraetor being mentioned in A. D. 15. (Tac. Ann. i. 79 ; cf. 16. ii. 66 ; Plin. iii. 26. s. 29.)

## THRONT

Thrace now shared in the general furtunes of the Roman world, on the division of which into the Fastern and Western Empires, it was attached to the former, being governed by the Vicarius Thraciarum, who was subordinate to the Praefectus Praetorio Orientis. Its situation rendered it extremely liable to the inroads of barbarians, and its history, so far as it is known, is little else than a record of war and devastation. The Goths made their first appearance there in A. D. 255; the emperor Probus, about A. D. 280, established in it 100,000 Bastarnae. In A. D. 314, and again in 323, the emperor Licinius was defeated at Hadrianople by Constantine, who, in A. D. 334, settled a multitude of Sarmatians in Thrace, which, in 376 , received another accession to its heterogeneous population, Valens having given permission to the Goths to reside in it. This gave rise to innumerable wars, the details of which are recorded by Ammianus (lib. xaxi.). In 395 the devoted country was overrun by Alaric, and in 4.47 by the more dreadful Attila. Through all these misfortunes, however, Thrace remained in connection with the Eastern Empire, the capital of which was within its boundaries, until the year 1353, when the Turks, who had crossed over into Europe in 1341, obtained possession of the Thracian fortresses. Their leader Amurath conquered the whole country, except Constantinople, and made Hadrianople his capital. At length, in 1453, Constantinople itself was taken, and the Turks have ever since been the undisputed lords of Thrace.
VI. Topography. - Under this head we shall merely collect such names as will serve to direct the reader to articles in this work, where fuller information is given.

Pliny (iv. 18: cf. Mela, ii. 2 ; Amm. xxvii. 4) enumerates the following as the principal Thracian tribes: Denseletae, Macdi, Bisaltae, Digeri, Bessi, Elethi, Diobessi, Carbilesi, Brysae, Sapaei, Odomanti, Odrysae, Cabyleti, Pyrogeri, Drugeri, Caenici, Hypsalti, Beni, Corpilli, Bottiaei, Edoni, Selletae, Priantae, Dolonci, Thyni, Cueletae. To these we may add, the Apsinthii, Bistones, Cicones, Satrae, Dii, and Trausi.

Of the towns mentioned by Pliny (l.c.), these belonged to Thrace 1'roper: 1. On the coast (i.) of the Aegean: Oesyma, Neapolis, Datum, Abdera, Tirida, Dicaea, Maronea, Zone, and Aenus; to these must be added Amphipolis, Pistyrus, Cosinthus, and Mesembria; (ii.) of the Chersonesus: Cardia, Lysimachia, Pachyta, Callipolis, Sestus, Elaeus, Coelos, Tiristasis, and Panormus; bexides these there were Alopeconnesus and Agora; (iii.) of the Propontis: Bisanthe, Perinthus, and Selymbria; (iv.) of the Bosporus: Byzantium; (v.) of the Euxine: Mesembria, Anchialus, Apollonia, Thynias, Salmydessus, and Phinopolis. 2. In the interior: P'hilippopolis, Philippi, Scotusa, Topiris, Doriscus, Cypsela, Apros, and Develton. This is a very scanty list; but many of the principal inland towns were founded after Pliny's time: their names also were often changed. The following are some of the chief towns in the interior: Hadrianopolis, Plotinopulis, Trajanopulis, Tempyra, Nicopolis, Beroea, Iamporina, and Yetra.

Besides the rivers mentioned in the consse of this article, the following occur: the Bathynias, Pydaras or Atyras, Bargus, Cussinites, Compsatus, and Xerogypsus.

As to the political divisions of Thrace, Pliny (l.c.) states that it was divided into fitty strategice; ; but be describes Muesia as part of Tbrace. According to

Ptolemy (iii. 11. § 8, seq.), its districts were Maedica, Dentheletica, Sardica, Bessica, Drosica, Bennica, Usdicesica, Selletica, Samaica, Cueletica, Sapaica, Corpiliaca, Caenica, and Astica.

Ammianus (l.c.) states that in the 4th century Thrace was divided into six prorinces, but of theso only four belonged to Thrace south of the Haemus: (i.) Thrace Proper (speciali nomine), including the W. part of the country; principal cities, Philippopolis and Beroea : (ii.) Haemimontus, i. e. the NE. district; chief towns, Hadrianopolis and Anchialus: (iii.) Europa, comprehending the SE. district; cities, Apri and Perinthus (Constantinople, being the capital of the whole Eastern Empire, was not regarded as belonging to any province): (iv.) Rhodopa, comprising the SW. region; principal cities, Maximianopolis, Maroneia, and Aenus.

The principal modern writers in whose works information will be found respecting Thrace, bave been mentioned in the course of this article. Among the other authors whom the reader may consult, we may name the following: Dapper, Beschryring der Eilanden in de Archipel, Amst. 1688, of which Latin and French translations were published at Amsterdam in 1703. Paul Lucas, Voyage dans la Turquie, TAsie, foc. 2 vols. Amst. 1720. Choiseul, Voyage Pittoresque dans $\mathbf{T E m p i r e}$ Ottoman: of this work the first volume was published at Paris in 1782, the first part of the second not till 1809: the author died in 1817. A new edition, with many corrections and additions, was published in 4 vols. 8 vo . at Paris in 1842. This work is devoted chiefly to the antiquities of the country; of which the plates contained in the illustrative Atlas which accompanies the book give many representations. Ami Boués, La Turquie dEurope, 4 vols. 8vo. Paris, 1840, is the most complete work yet written on the subject; its author, a man of great scientific acquirements, made two journeys in Turkey, in 1836, when he was accompanied by M. Viquesnel, and in 1838. The first volume contains an elaborate account of the physical geography, geology, vegetation, fauna, and meteorology of the country; but takes little or no notice of its classical geography. A map is prefixed to it, which was a vast improvement on all that had preceded it; but it is now in its turn superseded by that of Kiepert, who has empluyed in its construction the materials afforded by M. Viquesnel's reports already referred to. (Comp. Gatterer, Je Herodoti ac Thucydulis Thracia, contained in the Commentationes Sic. Reg. Gottin. vol. iv. pp. 87-112, vul. v. pp. 57-88.
[J. R.]
Thracia, in Asia. A district in Asia Minor on the coast of the Enxine, is sometimes called Thrace, and its inhabitants Thracians. (Herod. i. 28 ; Xen. Anab. vi. 2. § 14, et al.) This country is more commonly called Bithynia. [See Bithy nid, Vol. I. p. 404.]
[J. R.]
THRA'CIUS BO'SPORUS. [Bosponce.]
THRASYME'NUS LACLS [Trasimenis.]
THRAUSTUS ( ©paúatos, Xen) or THRAESTUS (Өparatos), a town in the mountainous district of Acroreia in Elis, of unknown site. (Xen. Hell. vii. 14. § 14 ; Diod. xiv. 17.)

THRIA. [ATtICA, p. 328, b.]
THROASCA (Opóaка), a place in Carmania, mentioned by Ptolemy (vi. 8. § 14). Perhsps the motern Girost.
[V.]
THRONI ( $\Theta p \delta \nu 01$ ), a town and promontory on the SE. coast of Cyprus, distant 700 stadia from the promontory Curias. On the promontory of Throu

Pococke observed an ancient tower. (Strab. xiv. p. 682: Ptol. v. 14. §§ 2.3; Encel. Ǩypros, vol. i. p. 99.)

THRO'NIUM ( $\Theta \rho o ́ v i o v: ~ E t h . ~ \Theta \rho o ́ v i o s, ~ \Theta \rho o v i t \eta s, ~$ ©povicús). 1. The chief town of the Locri Epicnemidii, situated 20 stadia from the coast and 30 stadia from Scarpheig, upon the river Boagrius, which is described by Strabo as sometimes dry, and sometimes flowing with a stream two plethra in breaith. (Strab. ix. p 436.) It is mentioned by Homer, who speaks of it as near the river Boagrius. (Il. ii. 533.) It was at one time partly destroyed by an earthquake. (Strab. i. p. 60.) At the begimning of the Peloponnesian War (b.c. 431) Thronium was taken by the Athenians. (Thuc. ii. 26; Diud. xii. 44.) In the Sacred War it was taken by Onomarchus, the Phocian general, who sold its inhabitants into slavery, and hence it is called by Scylax a Phucian city. (Diod. xvi. 33: Aesch. de Fals. Leg. p. 45, 33; Scylax. p. 23.) (Thronium is also mentioned by Polyb. ix. 41, xvii. 9; Eurip. Iph. Aul. 264; Liv. $x \times x i i .5,6$, xxsiii. 3, xxxv. 37, xxxvi. 20; Paus. v. 22. §4; Lycophr. 1148; Ptol. iii. 15. § 7 ; Plin. iv. 7. s. 12 ; Steph. B. s. v.) The site of Thronium was ascertained by Meletius who found above the village Romini, at a place named Pakejkiastro, where some remains of the city still exist, a dedicatory inscription of the council and demus of the Thronienses. (Leake, Northern Greece, vol. ii. pp. 177, 178.)
2. A town in Greek Illyria in the neighbourhood of Amantia [Amastia], said to have been founded after the Trujan War by the Abantes of Eaboea and the inhabitants of the Locrian Thronium. It was taken at an early period by the inhabitants of the neighbouring town of Apollonia, and annexed to their territory, as appears from an epigram inscribed on a dedicatory offering of the Apolloniatae at Olympia. (Paus. v. 22. sis 3, 4.)

THRYON, THRYOESSA. [Emitalium.]
THULE ( Өoui $\eta$, Ptol. ii. 6. § 32), a celebrated island in the Northern Ocean, discovered by the navigator Pytheas. Pytheas arrived at it after a voyage of six days from the Orcades, in which it may be computed that he had accomplished about 3000 stadia. (Plin. ii. 77.) According to the account of Pytheas, he reached the polar circle, so that on this island the longest day was twenty-four bours, and there was constant day during the six summer months and constant night during the six winter ones. It was deficient in animals, and even the most necessary fruits, but produced a little corn. From the time of its discovery it was regarded as the most northerly point of the known world although no further knowledge was obtained respecting it ; and this view seems to be contirmed by its name, since in Gothic Tiel or Tiule ( $\tau$ '́̇入os. goal) denoted the remotest land. (Strab. i. p. 63. ii. pp. 104, 114, iv. p. 201 ; Agath. i. 8; Prisc. Perieg. 587, sqq.; Mrla, iii. 6; Plin. iv. 16. s. 30; Tac. Agr. 10; Virg. G. i. 30; Solin. c. 22, \&c.; cf. Praetorius, de Orbe Goth. iii. 4. 3. p. 33; D'Anville, Sur la Narig. de Pytheas, p. 439; Rudbeck, Atlant. i. p. 514.) Ptoleiny is the only writer who places Thule a great deal further S., though he undoubtedly had in view the island discovered by Pytheas; and according to him it would seem to have been the largest of the Shetland islands, or the modern Mainland (see ii. 3. § 32, i. 24. §§ 4, 6, 17, 20, vi. 16. § 21 , vii. 5 . § 12 , viii. 3. § 3). Most modern geographers incline to the opinion that Pytheas meant Iceland; though according to others his

Thule is to be variously sought in Nomony: in that part called Thile or Thilemark; in Jutland, the extreme point of which is called Thy or Thylenul; or in the whole Scandinarian peninsula (MalteBrun, Geogr. Univ. i. p. 120; Ortelius, Theatr. Orb. p. 103.)
[T. H. D.]
THUMATA ( $\theta o v \mu a ́ \tau \alpha$, Ptol. vi. 7. § 33; Plin. vi. 28. s. 32; Thamatha, Not. Imp. Rom. § 22, p. 37), a town of Arabia Felix, according to Ptoleny, and described by Pliny as distant 10 days' sail from Petra, and subject to the king of the Characeni.

ThLMNA. [Tamna.]
THUNU'DROMON ( ${ }^{\circ}$ ouvoúspouov, Ptol. iv. 3. § 29), a Roman colony in Numidia. It seems to be the same place as the Tyuidrumense oppidum of Pliny (v. 4. s. 4).
[T. H. D.]
THU'RIA ( Oovpla: Eth. Өoupidrns), a town of Messenia, situated in the eastern part of the southern Messenian plain, upon the river Aris (Pidhima), and at the distance of 80 stadia from Plarae, which was about a mile from the coast (Paus. iv. 31. § 1). It was generally identified with the Homeric Antheia, though others supposed it to be Aepeia. (Paus. l.c.; Strab. viii. p. 360.) It mast have been a place of considerable importance, since the distant Messenian
 Strab. l.c.). It was also one of the chief towns of the Lacedaemonian Perioeci after the subjugation of Messenia ; and it was here that the Third Messenian War touk its rise, B. c. 464 (Thuc. i. 101). On the restoration of the Messenians by Epaminondas,Thuria, like the other towns in the country, was dependent upon the newly-founded capital Messene ; but after the capture of this city by the Achaeans in b. c. 182, Thuria, Pharae, and Abia joined the Achaean League as independent members. (Polyb. xxv. 1.) Thuria was annexed to Laconia by Augustus (Paus. l.c.); but it was restored to Messenia by Tiberius. [Messevia, p. 345, a.] Pausanias found two cities of this name. The Thuriatae had descended from the summit of the lofty hill of the upper city to dwell upon the plain ; but without abandoning altogether the upper city, where a temple of the Syrian goddess still stood within the town walls (1'aus. iv. 31. § 2). There are considerable remains of both places. Those of Upper Thuria are on the hill of the village called Paleikastro, divided from the range of mountains named Makryplai by a deep ravine and torrent, and which conmands a fine view of the plain and gulf. The remains of the walls extend half a mile along the summit of the hill. Nearly in the centre of the ruins is a quadrangular cistern, 10 or 12 feet deep, cut out of the rock at one end, and on the other side constructed of masonry. The cistern was divided into three parts by two cross walls. Its whole length is 29 paces; the breadth half as much. On the highest part of the ridge there are numerous ruins, among which are those of a small Doric temple, of a hard brown calcareous stone, in which are cockle and muscle shells, extremely perfect. In the plain at Palea Lutra are the ruins of a large Roman building, standing in the middle of fig and mulberry grounds. Leake observes that " it is in an uncommon state of preservation, part even of the roof still remaining. The walls are 17 feet high, formed of equal courses of Roman tiles and mortar. The roof is of rubble mixed with cement. The plan does not seem to be that of a bath only, as the name would imply, though there are many appearances of the building having contained baths: it seems rather to have been the palace of some Roman
governor. As there are no sources of water here, it is to be supposed that the building was supplied by an aqueduct from the neighbouring river of Púdhima." (Leake, Morea, vol. i. pp. 354. seq. 360; Boblaye, Kecherches, ofc. p. 105; Ross, Reisen im Peloponnes, p. 2; Curtius, Peliponnesos, vol. ii. p. 161.)

THU'RII ( $O o$ ópıot: Eth. ©oupivos, Thurinus), called also by some Latin writers and by Ptolemy Thurium ( ©ópiov, Ptol.), a city of Magna Graecia, situated on the Tarentine gulf, within a short distance of the site of Sybaris, of which it may be considered as having taken the place. It was one of the latest of all the Greek colomes in this part of Italy, not having been founded till nearly 70 years after the fall of Sybaris. The site of that city had remained desolate for a period of 58 years after its destruction by the Crotonials [Sybaris]; when at length, in b.c. 452 , a number of the Sybarite exiles and their descendants made an attempt to establish themselves again on the spot, under the guidance of some leaders of Thessalian origin ; and the new colnny rose so rapidly to prosperity that it excited the jealousy of the Crotoniats, who, in consequence, expelled the new settlers a little more than 5 years after the establishment of the colony. (Diod. xi. 90, xii. 10.) The fugitive Srbarites first appealed for support to Sparta, but without success: their application to the Athenians was more successful, and that people determined to send out a fresh colony, at the same time that they reinstated the settlers who had been lately expelled from thence. A body of Athenian colonists was accordingly sent out by Pericles, under the command of Lampon and Xenocritus; but the number of Athenian citizens was small, the greater part of those who took part in the colony being collected from various parts of Greece. Among them were two celebrated naines,-Herodotus the historian, and the orator Lysias, both of whom appear to have formed part of the original colony. (Diod. xii. 10; Strab. vi. p. 263; Dionys. Iys. p. 453 ; Vit. X. Orat. p. 835; Plut. Peric. 11, Nic. 5.) The new colonists at first established themselves on the site of the deserted Sybaris. but shortly afterwards removed (apparently in obedience to an oracle) to a spot at a short distance from thence, where there was a fountain named Thuria, from whence the new city derived its name of Thurii. (Diod. L.c.; Strab L.c.) The foundation of Thurii is assigned by Diodorus to the year 446 в. C.; but other authorities place it three years later, b. c. 443, and this seems to be the best authenticated date. (Clinton, F. M. vol. ii. p. 54.) The protection of the Athenian name probably secured the rising colony from the assaults of the Crotoniats, at least we hear nothing of any obstacles to its progress from that quarter; but it was early disturbed by dissensions between the descendants of the original Sybarite settlers and the new colonists, the former laying claim not only to honorary distinctions, but to the exclusive possession of important political privileges. These disputes at length ended in a revolution, and the Sybarites were finally expelled from the city. They established themselves for a short time upon the river Traens, but did not maintain their footing long, being dislodged and finally dispersed by the neighbouring barbarians. (Diod. xii. 11, 22; Arist. Pol. v. 3.) The Thurians meanwhile concluded a treaty of peace with Crotona, and the new city rose rapidly to prosperity. Fresh colonists joured in from all quarters, especially the Peloponnese; and though it continued to be generally regarded as an Athenian coluny, the Athemians in fact
formed but a small element of the population. The citizens were divided, as we learn from Diodorus, into ten tribes, the names of which sufficiently indicate their origin. They were, - the Arcadian, Achaean, Elean, Boeotian, Amphictyonic, Dorian, Ionian, Athenian, Euboean, and Nesiotic, or that of the islanders. (Diod. xii. 11.) The form of government was democratic, and the city is said to have enjoyed the advantage of a well-ordered system of laws; but the statement of Diodorus, who represents this as owing to the legislation of Charoncas, and that lawgiver himself as a citizen of Thurii, is certainly erroneous. [Dict. of Biogr. art. Charondas.] The city itself was laid out with great regularity, being divided by four broad streets or "platear." each of which was crowsed in like manner by three others. (Diod. xii. 10.)

Very shortly after its foundation, Thurii became involved in a war with Tarentum. The subject of this was the possession of the fertile district of the Siritis, about 30 miles N. of Thurii, to which the Athenians had a claim of long standing [Sikis], which was naturally taken up by their colonists. The Spartan general, Cleandridas, who had been banished from Greece some years before, and taken up his abode at Thurii, became the general of the Thurians in this war, which, after various successes, was at length terminated by a compromise, burh parties agreeing to the foundation of the new colony of Heracleia in the disputed territory. (Diod. xii. 23, 36, xiii. 106 ; Strab. vi. p. 264 ; Polymen. Strat. ii. 10.) [Heracleia.] Our knowledge of the history of Thurii is unfortunately very scanty and fragmentary. Fresh disputes arising between the Athenian citizens and the other colonists were at length allayed by the oracle of Delphi, which decided that the city had no other founder than Apolio. (Diod. xii. 35.) But the same difference appears again on occasion of the great Athenian expedition to Sicily, when the city was divided into two parties, the one desirous of favouring and supporting the Athenians, the other opposed to thern. The latter faction at first prevailed, so far that the Thurians observed the same neutrality towards the Athenian fleet under Nicias and Alcibiades as the other cities of Italy (Thuc. vi. 44); but two years afterwards (b. c. 213) the Athenian party had regained the ascendency; and when Denosthenes and Eurymedon touched at Thurii, the citizens afforded thern every assistance, and even furnished an auxiliary force of 700 hoplites and 300 dartmen. (Id. vii. 33, 35.) From this time we bear nothing of Thurii for a perind of more than 20 years, though there is reuson to believe that this was just the time of its greatest prosperity. In B. c. 390 we find that its territory was already beginning to suffer from the incursions of the Lucanians, a new and formidable enemy, for protection against whom all the cities of Magna Graecia had entered into a defensive league. But the Thurians were too inpatient to wait for the support of their allies, and issued forth with an army of 14,000 foot and 1010 horse, with which they repulsed the attacks of the Lucanians; but baving rashly fullowed them into their own territory, they were totally defeated, near Laius, and above 10,000 of them cut to pieces (Diod. xiv. 101).

This defent must have inflicted a severe blow on the prosperity of Thurii, while the continumlly increasing power of the Lucanians and Brattians, in their immediate neighbourhood would prevent them from quickly recovering from its effects. The city
continued also to be on hostile, or at least unfriendly, terms with Dionysius of Syracuse, and was in consequence chosen as a place of retirement or exile by his brother Leptines and his friend Philistus (Diod. $\mathbf{x v} .7$ ). The rise of the Bruttian people about b. c. 356 probably became the canse of the complete decline of Thurii, but the statement of Diodorus that the city was conquered by that people (xvi. 15) must be received with considerable doubt. It is certain at least that it reappears in history at a later period as an independent Greek city, though much fallen from its former greatness. No mention of it is found during the wars of Alexander of Epirus in this part of Italy; but at a later period it was so hard pressed by the Lucanians that it had recourse to the alliance of Rome; and a Roman army was sent to its relief under C. Fabricius. That general defeated the Lucanians, who had actually laid siege to the city, in a pitched battle, and by several other successes to a great extent broke their power, and thus relieved the Thurians from all immediate danger from that quarter. (Liv. Epit. xi.; Plin. xxxiv. 6. s. 15; Val. Max. i. 8. § 6.) But shortly after they were attacked on the other side by the Tarentines, who are said to have taken and plundered their city (Appian, Samn. 7. § 1); and this aggression was one of the immediate causes of the war declared by the Romans against Tarentum in B. c. 282.
Thurii now sunk completely into the condition of a dependent ally of Rome, and was protected by a Roman garrison. No mention is found of its name during the wars with Pyrrhus or the First Punic War, but it plays a considerable part in that with Hannibal. It was apparently one of the cities which revolted to the Carthaginians immediately after the battle of Cannae, though, in another passage, Livy seems to place its defection somewhat later. (Liv. xxii. 61, xxv. 1.) But in B. c. 213, the Thurians returned to their alliance with Rome, and received a Roman garrison into their city. (Id. xxv. 1.) The very next year, however, after the fall of Tarentum, they changed sides again, and betrayed the Roman troops into the hands of the Carthaginian general Hanno. (Id. xxv. 15; Appian, Hann. 34.) A few years later (в.c. 210), Hannibal, finding himself unable to protect his allies in Campania, removed the inhabitants of Atella who had survived the fall of their city to Thurii (Appian, Hann. 49); but it was not long before he was compelled to abandon the latter city also to its fate; and when he himself in B. C. 204 withdrew his forces into Bruttium, he removed to Crotona 3500 of the principal citizens of Thurii, while he gave up the city itself to the plunder of his troops. (Appian, l.c.57.) It is evident that Thurii was now sunk to the lowest state of decay; but the great fertility of its territory rendered it desirable to preserve it from utter desolation : hence in B. c. 194, it was one of the places selected for the establishment of a Roman colony with Latin rights. (Liv. xxxiv. 53; Strab. vi. p. 263.) The number of colonists was small in proportion to the extent of land to be divided among them, but they amounted to 3000 foot and 300 knights. (Liv. xxxv. 9.) Livy says merely that the colony was sent "in Thurinum agrum," and does not mention anything of a change of name; but Strabo tells us that they gave to the new colony the name of Copiaf, and this statement is confirmed both by Stephanus of Byzantium, and by the evidence of coins, on which, however, the name is written Copid. (Strab. L. c.; Steph. Byz. s. v. Goúpiot;

Eckhel, vol. i. p. 164.) But this new name did not continue long in use, and Thurii still continued to be known by its ancient appellation. It is mentioned as a municipal town on several occasions during the latter ages of the Republic. In B.c. 72 it was taken by Spartacus, and subjected to heavy contributions, bat not otherwise injured. (Appian, B. C. i. 117.) At the outbreak of the Civil Wars it was deemed by Caesar of sufficient importance to be secured with a garrison of Gaulish and Spanish horse; and it was there that M. Coelius was put to death, after a vain attempt to excite an insurrection in this part of Italy. (Caes. B. C. iii. 21, 22.) In B. c. 40 also it was attacked by Sextus Pompeius, who laid waste its territory, but was repulsed from the walls of the city. (Appian, B. C. v. $56,58$.

It is certain therefore that Thurii was at this time still a place of some importance, and it is mentioned as a still existing town by Pliny and Ptolemy, as well as Strabo. (Strab. vi. p. 263; Plin. iii. 11. s. 15; Ptol. iii. 1. § 12.) It was probably, indeed, the only place of any consideration remaining on the coast of the Tarentine gulf, between Crotona and Tarentum; both Metapontum and Heraclea having already fallen into almost complete decay. Its name is still found in the Itineraries (Itin. Ant. p. 114, where it is written "Turios;" Tab. Peut.); and it is noticed by Procopius as still existing in the 6th century. (Procop. B. G. i. 15.) The period of its final decay is uncertain; but it seems to have been abandoned during the middle ages, when the inhabitants took refuge at a place called Terranova, about 12 miles inland, on a hill on the left bank of the Crathis.

The exact site of Thurii has not yet been identified, but the neighbourhood has never been examined with proper care. It is clear, from the statements both of Diodorus and Strabo, that it occupied a site near to, but distinct from, that of Sybaris (Diod. xii. 10; Strab. l.c.): hence the position suggested by some local topographers at the foot of the hill of Terranova, is probably too far inland. It is more likely that the true site is to be sought to the N . of the Coscile (the ancient Sybaris), a few miles from the sea, where, according to Zannoni's map, ruins still exist, attributed by that geographer to Sybaris, but which are probably in reality those of Thurii. Swinburne, however, mentions Roman ruins as existing in the peninsula formed by the rivers Crathis and Sybaris near their junction, which may perhaps be those of Thurii. (Swinburne, Travels, vol. i. pp. 291, 292 ; Romanelli, vol. i. p. 236.) The whole subject is very obscure, and a careful examination of the localities is still much needed.

The coins of Thurii are of great beauty; their number and variety indeed gives us a higher idea of the opulence and prosperity of the city than

COLN OF THURL.
we should gather from the statements of ancient writers.

THU'RIUM. 「Bozotia, p. 412, b.]
THYA'MIA. [Phlius, p. 602, b.]
THY'AMIS (Өі́aцıs), a river of Epeirus, flowing into the sea near a promontory of the same name. (Ptol. iii. 14. $\S \S 4,5$. ) It formed the northern boundary of Thesprotia, which it separated from Cestrine, a district of Chaoria (Thuc. i. 46 ; Strab. vii. p. 324; Paus. i. 11. § 2; Cic. ad Att. vii. 2, de Leg. ii. 3; Plin. iv. 1.) It is now called Kalamd, apparently from the large reeds and aquatic plants which grow upon one of its principal tributaries. Its ancient name seems to have been derived from the avia or juniper, which, Leake informs us, though not abundant near the sources of the river, is common in the woody hills which border the midile of its course. The historian Phylarchus related (ap. Athen. iii. p. 73) that the Egyptian bean, which grew only in marshy places and nowhere but in Egypt, once grew for a short time upon the banks of the Thyamis. (Leake, Northern Greece, vol. i. p. 103. vol. iv. p. 97.)

THY'AMUS (Óvauos), a mountain lying to the S. of Areos Amphilochicum, identitied by Leake with Spartorumi. (Thuc. iii. 106; Leake, Northern Girece, vol. iv. p. 251.)
 a considerable city in the north of Lydia, on the river Lycus, and on the road leading from Sardes in the south to Germa in the north. It was unciently called Pelopeia, Euhippa, and Semiramis. (Plin. v. 31; Steph. B. s. v. Өuátctpa.) Strabo (xiii. p. 625) calls it a Macedonian colony, which probably means only that during the Macedonian period it was increased and embellished, for Stepharus B., admitting that it previously existed under other names, relates that Scleucus Nicator gave it the name of Thyguteira or Thyateira on being informed that a daughter ( $\Theta v$ үárnp) was born to him. But whatever we may think of this etymology, it seems clear that the place was not originally a Macedonian colony, but had existed long befure under other names, and at one periol belonged to Mysia. After the time of Anticchus Nicator, however, it became an important place, and is often noticed in history. When the two Scipios arrived in Asia on their expedition against Antiochus the Great, the latter was encamped near Thyateira, but retreated to Magnesia. (Liv. xxxvii. 8, 21, 37.) After the defeat of the Syrian king, the town surrendered to the Romans. (Liv. xxxvii. 44; Pulyb. xvi. 1, $x \times x$ ii. 25 ; comp. Appian, Syr. 30; Strab. xiii. p. 646; Plut. Sulla, 15; Ptol. v. 2. §16; It. Ant. p. 336.) In Christian times Thyateira appears as one of the seven Churches in the Apocalypoe (ii. 18); in the Acts of the Apostles (xvi. 14) mention is made of one Lydia, a purple-setler of Thyateira, and at a still later period we hear of several bishops whose see it was. In the middle ages the Turks changed the name of the town into Ahhissar, which it still bears. (Mich. Duc. p. 114.) Sir C. Fellows (Asüa

COIN OL THYATEIRA.

Min. p. 22). who calls the modern place Aken, states that it teems with relics of an ancient splendid city, although be could not discover a trace of the site of any ruin or early building. These relics consist chietly of fragments of pillars, many of which have been changed into well-tops or troughs. (Comp. Arundell, Seren Churches, p. 188, foll.; Wheeler and Spon, vol. i. p. 253; Luchs, Troisieme Voy. p. 192, \&c.; Prokesch, Denkwürdigkeiten, iii. p. 60, foll.)
[L. S.]
THYIA ( $\Theta v i \alpha$ ), a place in Phocis, where the Delphians erected an altar to the winds, derived its name from Thyia, a daughter of Cephissus or Castalius, and the mother of De!phus by Apollo. (Herod. vii. 178; Dict. of Biogr. art. Thyia.)

THYMBRA ( $Ө \dot{\prime} \mu 6 \rho \eta$ or $\Theta \dot{\mu} \mu \delta \rho a$ ), a town of Troas, in the vicinity of Ilium. (Hum. Il. x. 430; Steph. B. 8. v.; Plin. v. 33.) Strabo (xiii. p. 598) speaks of it only as a plain traversed by the river Thymbrius. The valley of Thymbra and the hill in it, called Callicolone (Hom. Il. xx. 53, 151 ; Strab. l. c.), are said still to retain their ancient names (Prokesch. Denkwürdigkeiten, i. p. 145, foll.) The town of Thymbra must have perished at an eariy period : but its name remained celebrated in religion, for Apollo, who had had a temple at Thyinbra, is frequently called Thymbraeus ( $\mathcal{C u \mu 6 p a i o s \text { ; Virg. Aen. }}$ iii. 85 ; Eurip. Rhesus, 224 ; Steph. B. s. v. ©íлepa).
[L. S.]
 not far from the small river Pactolus, at which the contingents of the Persian army furnished by the inhabitants of Asia Minor used to assemble. (Xen. Cyrop. vi. 2. § 11, vii. 1. § 45; Steph. B. 8. v.) Some are inclined to identify this place with Thybarna, mentioned by Diodorus Siculus (xiv. 80); but this latter phice could hardly be suid to be situa:ed on, or even near the Pactolus.
[L. S.]
THYMBKES, a tributary of the Sangarius in Phrycia (Liv. xxxviii. 18), is no doubt the same as the Tembrugius of Pliny (vi. 1) and the Timbrius in the Argonautica bearing the name of Orpheus (713), where the river is described as abounding in fish.
[L.S.]
THY'MBRIA (Ounfpia), a small town of Ciaria, only 4 stadia east of Myus on the banks of the Maeander; in its neighbourhood there was a sorcalled Charonium, or cave from which poisonous vapours issued. (Strab. xiv. p. 636.) [L.S.]

THY'MBRIUA ( $\Theta \dot{u} \mu$ bpiov: Eith. Thymbrianus), a town of I hrygia, at a distance of 10 parasangs io the west of Tyriacum (Xenoph. Anab. i. 2. § 13 ; Hierocl. p. 673; Conc. Conshunt. iii. p. 505.) Vibius Sequester (p. 25. ed. Oberlin) mentions a forest Thymbra in Fhrgeia, which seems to have been near the town of Thymbrium.
[L. S.]
THY'MBRIUS ( $\Theta i \mu 6 p i o s$ ), a small river of Trons in the neighbourhood of lliuin; it was a tributary of the Scamander, and on its banks stood the town of Thymbra (Strab. xiii. p. 598; Eustath. ad Hom. Il. x. 430.) There still exists in that district a small river called Timbrek, which, however, does not flow into the Scamander, but into a buy of the sea; if this be the ancient Thymbrius, the plain of Thymbra must have been at a considerable dixtance from Ilium. For this reason, Cul. Leake is in. clined to identify the Thymbrius rather with the Kamara $S u$, which still is a tributary of the Scamander or Mendere Su (Asia Minor, p. 289.) [L. S.]
 P'aphlagonia, at a distance of 90 stadia from Ac-
gialus. (Arrian, Peripl. P. E. p. 15; Annym. P'eri,l. P. E. p. 6.) I'tolemy (v. 4. § 2) mentions it under the name of Thymaena, and states that it was also called Teuthrania.
[L. S.]
THYMIATE'RION ( Өumatńpıv, Hanno, Peripl. p. 2). called by Scylax (p. 23) Evpiarnpias, the first Carthaginian colony planted by Hanno on the west coust of Mauretania, 26 miles south-west of Lixus, on the Sinus Einporicus. There is no further mentiou of it. It has been variously identified with Marmora, Larache, and Tanyikr, but perhaps most correctly with the first.
[T. H. D.]
THY'MNIAS, $a$ bay on the south-west coast of Caria, on the south-west of the bay of Schoenus, and between Capes Aphrodisium and Posidium. (Pomp Mela. i. 16: Plin. v. 29.)
[L. S.]
THYMOETADAE. [Attica, p. 325, b.]
THYNI (Plim iv. 11. s. 18, v. 32. s. 43 ; ©uvol, Herod. i. 28), a people in the SE. part of Thrace, between the Agrianes and the mountains which separate its head-waters from the Euxiue. At a very early period, a portion of the tribe, along with the related race of the Bithyni, emigrated to Asia Minor, where they occupied the district afterwards called Bithynia; but part of which seems originally to have been named more directly from the Thyni, since we find the names Өuviakो Өрq́кך (Memnon. c. 18), ©uviás (Scymn. 727, and 236), Өuvía (Steph. B. p. 315), and Thynia (Amm. xxii. 8. § 14). Respecting the Asiatic Thyni, see also Strabo, vii. p. 295, xii. p. 541 ; and the article Bithynia.

Of the Thyui who remained in Europe scarcely any notice is taken by the ancient historians. When Xenophon and the remnant of the 10.000 Greeks entered the service of Seuthes, one expedition in which they were employed had for its object the subjugation of the Thyni, who were sad to have defeated Teres, an ancestor of Seuthes (Anab. vii. 2. § 22). Xenophon gives them the sornewhat equivocal character of being the most warlike of all people, especially by night: and he had personal experience of their fondness for nocturnal fiphting; for, having encamped in their villages at the foot of the mountains, to which the Thyni had retired on the approach of Seuthes and his forces, he was attacked by them on the next night, and narrowly escaped being burnt to death in the house in which he had taken up his quarters ( 16.4 . § 14, seq.). But this attack having failed, the Thyni again fled to the mountains, and soon afterwards submitted to Seuthes. Xenophon visited the country of the Thyni in the winter (Ib. 6. § 31), which he describes as being extremely severe, there being deep show on the ground, and so low a temperature, that not only water, but even wine in the vessels was frozen; and many of the Greeks lost noses and ears through frostlite. (Ib. 4.§ 3.)
[J. R.]
THY'NIAS (Evvias), a small island in the Euxine at a distance of one mile from the coast of Thynia or Bithynia; its distance from the port of hhoe was 20 stadia, and from Calpe 40. (Plin. vi. 13; Arrian, Peripl. P. E. p. 13.) The island had onls 7 stadia in circumference, and had at first been called Apollonia from a temple of Apollo which existed in it. (Plin., Arrian, U. cc.; Apollon. Rhod. ii. 177, 675 ; Anon. Peripl. P. E. p. 3.) According to Ptolemy (v. 1. § 15) it was also called Daphnusia, and obtained its name of Thynias from the Thyni, who inhabited the opposite coast. The island had a port and a naval station belonging to Heracleia (Scylax, p. 34; Arrian, l. c.); and Mela (ii. 7)
is probably mistaken in believing that the island contained a town of the same name. (Comp. Strab. xii. p. 543, where it is called Thynia; Marcian, p. 69; Steph. B. s. v.; Orph. Argon. 717, where it bears the name Thyneis.) The modern name of the island is Kirpeh.
[L. S.]
THY'NIAS (Mela ii. 2. § 5; Plin. iv. 11. s. 18; Ouvias, Strabo vii. p. 319, xii. p. 541 : Scymn. 727; Arrian. Per. P. Eux. p. 24; Anon. Per. P. Eux. p. 15; Ptol. iii. 11 . § 4; Steph. B. s. v.) a promontory on the Thracian coast of the Euxine, N. of Salinydessus, which was probably at one time in the territories of the Thyni, although Strabo (vii. p319) speaks of the district as belonging to the people of Apollonia. Pliny (l.c.) mentions a town of the same name, which in some maps is placed a little to the south of the promontory, on the site of the modern Inada or Iniada; but which, according to Dapper (de [Archip. p. 515), is still called Thinus.
[J. R.]
THYNOS or TYNOS, a town mentioned only by Pliny (v. 22) as situated between Mopsus and Zephyrium in Cilicia.
[L. S.]
THYRAELM ( Өupaiov: Eth. Oupaios), a town of Arcadia in the district Cynuria, said to have been founded by Thyraeus, a son of Lycaon. It is placed by Leake at Íalamari. (Paus. viii. 3. § 3, 35. § 7; Steph. B. s. v.; Leake, Peloponnesiaca, p. 240.)

THiRAEUM. [Mrgaiopolis, p. 310, a.]
THY'REA, THYREA'TIS. [Crnumia.]
Thirea'tes sinus. [Cynuria, p. 227 , a] ThyREUM. [Thyrim.]
THYRGONIDAE, [Attica, p. 330, a ${ }^{2}$ ]
THYRIDES ( $\Theta u \rho i \delta \in s$ ), a promontory of Laconia, on the western coast of the Taygetic peninsula, now called Cape Grosso. It is of a semicircular form, nearly 7 miles in circumference, and rises from the sea to the height of 700 feet. There are many apertures and clefts in the rocks, the abodes of innumerable pigeons, and from the window-like form of these holes the whole promontory has received the name of Thyrides. Strabo describes it as a focidns $\kappa \rho \eta \mu \nu \partial s$, "a precipitous cape beaten by the winds," distant 130 stadia from Taenarum (reckoning from the northern puint of Thyrides) ; Pausaniss, as a promontory (弓крa), situated $\mathbf{7 0}$ stadia from Taenarum (reckoning from the southern point of the promontory). Pausanias likewise calls it a promontory of Taenarum, using the latter word in its widest sense, to signify the whole peninsula of Mani. According to Strabo, the Messenian gulf tenninated at this promontory. Pliny (iv. 12. s. 56) mentions three islands of the name of Thyrides in the Asinaean gulf. (Paus. iii. 25. § 9; Strab. viii. pp. 360, 362; Leake, Morea, vol. i. p. 302, seq.; Boblaye, Recherches, flc. p. 91; Curtius, Peloponnesos, vol. ii. p. 281.)

THY'RIUM, or THY'REUM ( $\Theta$ v́piov, Pol. iv. 25; Oúpeov, Pol. iv. 6: Ooúpıov, Pol. xxviii. 5; Өúp $\beta$ єьov, Anth. Graec. ix. 553 : Eth. Өuplé́s, Thyriensis), a city in Acarnania, the exact site of which is unknown. It placed by Pouqueville in the interior near the sources of the Anapus; and his authority is followed by K. O. Mïller and others. This, however, is evidently a mistake. Cicero tells us (ad Fam. xvi. 5) that in saiiing from Alyzin to Leucas, he touched at Tbyrium, where he remained two hours; and from this statement, as well as from the history of the events in which Thyrium is mentioned, we may infer that it was situated on or near the Ionian sea, and that it was the first town on the coast S. of the canal
which separated Leucas from the mainland. It is placed by Leake in the plain of Zavérdha, but no ruins of it have heen discovered. Its name does not occur in Strabo. Thyriam is first mentioned in s. c. 373 , when its territory was invaded by Iphicrates. (Xen. Hell. vi. 2. § 37.) Xenophon describes it as a place of importance; and it appears as one of the chief cities of Acarnania at the time of the Roman wars in Greece, when its name frequently occurs. At this period Thyrium was one of the places at which the meetings of the Acarnanian League were usually held. [Acarnania.] It was one of the many towns whose ruin was occasioned by the foundation of Nicopolis, to which its inhabitants were removed by order of Augustus. (Pol. iv. 6, 25, xvii. 10, xxii. 12, xxviii. 5; Liv. xxxvi. 11, 12. xxxviii. 9, xliii. 17; Anth. Graec. L.c.; Leake, Northern Greece, vol. iv. p. 16.)

COIN OF THYRIUM.
THYRSUS or TYRSUS (Өúpбos жотauós, Ptol.: $\Theta \delta \rho \sigma o s$, Paus.: Tirso), the most considerable river of Sardinia, which still retains its ancient name almost unaltered. It has its sources in the mountains in the NE. corner of the island, and flows into the Gulf of Oristano on the W. coast, after a course of above $\mathbf{7 5}$ miles. About 20 miles from its mouth it flowed past Forum Trajani, the ruins of which are still visible at Fordungianus ; and about 36 miles higher up are the Bagni di Benetutti, supposed to be the Aquae Lesitanae of Ptolemy. The Itineraries give a station "ad Caput Tyrsi" (Itin. Ant. p. 81), which was 40 M.P. from Oibia by a rugged mountain road: it must have been near the village of Bulusò. (De la Marmora, Voy. en Sardaigne, vol. ii. p. 445.) Pausanias tells us that in early times the Thyrsus was the boundary between the part of the island occupied by the Greeks and Trojans and that which still remained in the hands of the native barbarians. (Paus. x. 17. §6.) [E. H. B.]

THYSDRUS ( $\Theta \dot{\sim} \sigma \delta p o s$, Ptol. iv. 3. § 39), the oppidum Tusdritanum or Thysdritanum of Pliny ( v . 4. s. 4), a city of Byzacium, in the Roman province of Africa, lying midway between Thenae and Thapsus, and west of the promontory Brachodes. It was here that the emperor Gordianus first set up the standard of rebellion against Maximin (Herodian. vii. 4, seq.; Capitol. Gord. c. 7, seq.), and it was from him, probally, that it derived its title of a Koman colony. We find the name variously written, as Tusdra, by Hirtins or whoever was the author of the history of the African War (B. Afr. 26, 27, \&c.), and Tusdrus, in the Itin. Ant. (p. 59). Now El Jemme or Legem, with extensive ruins, especially of a fine amphitheatre in a tolerably perfect state. (Shaw. Travels, vol. i. p. 220, sqq.) [T. H. D.]

THYSSA'GETAE (Evaбayítal, Herod. iv. 22), a numerous people of Asiatic Sarmatia, living principally by the chase. They dwelt to the north-east of a great desert of 7 days' journey, which lay between them and the Budini. Stephanus B. (s. v.) erroneously places them on the Maeotis, apparently from misunderstanding Herodotus. They are called

Thassagetae by Mela (i. 19) and Pliny (ir. 12 5. 26), and Thrssagetae by Valerins Flaccus (vi. 140).
[T. H. D.]
THYSSUS (Eívoos), a town of Chakcidice in Macedonia, situated on the W. or S. side of the peninsula of Acte or Mt. Athos. Its exact prosition is ancertain, but it appears that Thyssus and Cleonse occupied the central part of the W. or S. coast of the peninsula, and that one of them may be placed at Zografw or Dhokhiári, and the other at Xeropotami. (Herod. vii. 22; Thuc. iv. 109, v. 35; Scrlax. p. 26; Strab. vii. p. 331 ; Plin. iv. 10. s. 17 ; Leake, Northern Greece, vol. iv. pp. 149-152.)

TIARANTUS (Tiapaveds, Herod. iv. 48), a river in Scythia, flowing into the Ister from the N. Mannert identifies it with the Syl (iv. p. 105; cf. Ukert, iii. 2. p. 184).
[T. H. D.]

## tiarivlia. [Trari Julienses.]

TIASA. [Laconla, p. 110, a.]
TIASUM (Tiáov or Tiaनбov, Ptol. iii. 8. § 9), a town in Dacia, in the neighbourbood of the modiern Fokschani.
[T. H. D.]
TIBARANI, a tribe of Cilicia, about Mount Amanus and in the vicinity of Pindenissus, which was subdued by Cicero during his proconsular administration of that country, but is otherwise unknown. (Cic. ad Fam. xv. 4.)
[L. S.]
TIBARE'NI (Tibapmpot), a tribe on the const of Pontus, occupying the country between the Chalybes and the Mosynoeci, on the east of the river Iris. They are mentioned as early as the time of Herodotus (iii. 94), and were believed to be of Scythian origin. (Schol. ad Apoll. Rhod. ii. 378, 1010; Xen. Anab. v. 5. § 2; Scylax, p. 33; Steph. B. s. v. Tibapquia.) Strabo (xi. p. 527) describes them as inhabiting the mountains branching off from the Montes Moschici and Colchici. and mentions $\mathrm{Co}^{-}$ tyara as their principal town. (Comp. Xen. l.c.; Plin. vi. 4.) They appear to have been a harmless and happy people, who performed all their duties in a joyous manner. (Schol. ad Apoll. Rhod. Lc.; Steph. B. l. c.; Anon. Peripl P. E. p. 12; Pomp Mela, i. 19.) Their arms consisted of wooden helmets, small shields, and short spears with long points. (Herod. vii. 78.) Xenophon and his Greeks spent three days in travelling through their conntry. (Xen. l. c., vii. 8. § 25 ; Diod. Sic. xiv. 30; Dionys. Per. 767; Pomp. Mela, i. 2; Vul. Flace v. 149; Strab. ii. p. 129, vii. p. 309, xi. p. 549, xii. p. 555.)
[L. S.]
TIBERIACUM, in North Gallia, is placed in the Antonine Itin. between Juliacum (Juliers) and Colonia Agrippina (Colomne), viii. from Jaliacam and x. from Colonia. D'Anville and others fix Tiberiacum at Berghem, at the passage of the river Erfft, which flows between Juliers and Cologme. Others place Tiberiacum at Tarren, south of Berghem, where the bridge is. D'Anville adds "that a place situated in the direction between Juliers and Berghem is called Sein-Stras, that is to say, Lapidea Strata (Stone Street), just as in our provinces they say Chemin Perré." (D'Anville, Notice, ge.; Ukert, Gallien, p. 544.)
[G. L.]
TIBE'RIAS (Tibepids, Joseph. Ant. xviii. 3, B. J. ii. 8, iii. 16; Steph. B. s. e.; Ptol. viii. 20. § 16), the principal town of Galilaea, on the SW. bant of the sea of Tiberias or Gennesareth. It was situated in the most beautiful and fraitful part of that state (Joseph. Ant. xviii. 2. § 3), and was adorned with a royal palace and stadium. (Joseph. Vit 12, 13, 64.) It was built by the

Tiberias mare．
tetrarch Hirodes Antipas，in honour of the Roman emperur Tiberius，from whom it derived its name． （Joseph．l．c．）It is stated to have been 30 stadia from Hippo， 60 from Gudara，and 120 from Scytho－ polis（Joseph．Vit．65）；distances which are not much at variance with that of Joliffe，who states that it is 20 miles English from Nazureth and 90 from Jerusalem．（Travels，p．40．）

From the time of Herodes Antipas to that of the reivn of Agrippa II．，Tiberias was probably the capital of the province（Joseph．Vit．9），and it was one of the four cities which Nero added to the kingdom of Agripps．（Joseph．Ant．xx．8．§ 4．） In the last Jewish War，Tiberias，from its great strength，played an important part（Joseph．B．J．ii． 20）；as，after Sepphoris，it was held to be the largest place in Galilaea（Joseph，Vit．65），and was very strongly fortitied．（B．J．iii．10．§ 1．）The inliabitants derived their sustenance in great mea－ sure from their fisheries in the adjoining sea． （Joneph．Vit．12．）On the destruction of Jeru－ salem，and for several centuries subsequently， Tiberias was famous for its academy of learned Jews．（Lightfort，Hor．Hebr．p．140．）
In the immediate ueighbourhond of Tiberias were the celebrated hot springs of Emmaus（Joseph． B．J．ii．21，Ant．xviii．2．）［Emmaus．］It is not certain whether Tiberias occupied the site of Chin－ nereth，though Hieronymus thinks so（Onom．s．v． Chinnereth）；it seems more likely that this place belonged to the tribe of Naphthali．（Josh．xix． 35；Reland，Palnest．p．161．）Nor is there any better rewson for identifying it，as some have done，with Chanmath（Joseph．xix．35）or Rakkah，which was the Rabbinical notion．（Cf．Hieron．Megil．fol． 701 ； Lightfoot，Chorograph．Cent．cap．72－74．）The modern name of Tiberias is Tabarieh：it is not， however，built actually on the site of the old town， though close to its ruins．When Joliffe was there，it had a population of 11,000 （Travels，pp．48－58．） It was nearly destroyed by an earthquake on New Year＇s Day，1837，since which time it has never been completely rebuil．（Russegger，iii．p．132； Strauss．p． 356 ；Robinson．iii．p．500．）［V．］

TIBE＇RIAS MARE（ $\boldsymbol{\lambda} i \mu \nu \eta$ Tifepias，Pausan．v．
 B．J．iv．26），the principal lake or sea of Palestine in the province of Galiluea．It was bordered on the W．side by the tribes of Issachar and Zabulon，and on the E．by the half－tribe of Manasseh．The waters were fresh（Juseph．B．J．iii．35）and full of fish（Joseph．B．J．iv． 26 ；Matth．iv． 18 ；Luke，v．1，\＆cc．），and its size is variously stated，by Josephus（l．c．），to have been 140 stadia long by 40 broad，and by Pliny，to have been 16 M．P． long and 6 M．P．broad（v．15）．It was traversed in a direction NW．and SE．by the river Jordan． ［Jordanes；Palaestina．］This sea is known by many different names in the Bible and profane history．Its earliest title would seem to have been Chinnereth（Nunb．xxxiv．11；Josh．xiii．27；LXX． Xevpepé日．）From this form has probably arisen its second appellation of Gennesareth（ $\dot{\eta} \lambda / \mu \nu \eta \Gamma \in \nu-$
 Maccab．ii．67：$\dot{\eta} \lambda(\mu \nu \eta$ Г $\epsilon \nu \nu \eta \sigma$ àp，Joseph．B．J． ทे 入ímp $\Gamma \in \nu \nu \in \sigma a p i t ı s$, Joseph．Ant．xviii．3；Strab． xvi．p．755；Genasara，Plin．v．15．）A third appeilation it has derived from the province with which it was most nearly zonnected，viz．the sea of

TIBERIS．
1197
 in describing the same localities，speaks of a town called Tarichaea，from whence also he says the adjoining lake was sometimes named（l．c．；cf． also Strab．xvi．p．764）．The present name is Buhr－al－Tabarieh．（Pococke，ii．p．103；Thevenot． p． 387 ；Haselquist，i．p． 181 ；Rubinson，iii．pp． 499 －509，\＆c．）
［V．］
TIBERIO＇POLIS（Ti6epioútodis），a town in Phrygia Major，in the neighbourbood of Eumenia． （Ptol．v．2．§ 25；Socrat．Hist．Eccles．vii．46．） Its site is vet uncertain，but Kiepert（in Franz， Funf Inschriften，p．33）is disposed to regard the extensive ruins near Suleiman as the remnants of Tiberiopolis．Hamilton（Researches，i．p．127，foll．）， protably more correctly，regards them as the ruins of Blaundos．（Comp．Arundell，Discoveries，i．p． 81，foll．）
［L．S．］
TI＇Bl：RIS（ $\delta$ Tibepis：Tevere，Tiber ：the furms Tibris，Tybris，and Thybris are chietly poetical，as is Oímbis also in Greek：the Latin prets use also Tiberinus as an adjective form，as Tiberinus pater， Tiberinum flumen，\＆c．，and thence sometimes Ti－ berinus by itself as the name of the river），one of the most important rivers of Central Italy．It has its sources in the Apeunines above Tifernum，bat in the territory of Arretiuin（Plin．iii．5．5．9），on the confines of Etruria and Umbria，and flows at first in a sontherly direction，passing by the walls of Tifer－ num，which derived from it the name of Tiberinum （Città di Castello），and arterwards within a few miles of Perusia on the E．，and within a still shorter distance to the W．of Tuder（Todi）．From thence it still pre－ serves a general S．direction，notwithstanding consi－ derable windings，till it receives the waters of the Anio（Teverone），a few miles from the walls of Rome，trom which point it has a general SW．course to the sea at Ostia．Pliny estimates the apper part of its course at 150 miles，to which must be added about 35 more for the lower part，giving as a total 185 miles（1＇lin．l．c ；Strab．v．p．218）；but this es－ timate is below the truth，the whole course of the river being about 180 geogr．or 22.5 Ruman miles． During the whole of its course from Tifernum to the sea the Tiber formed in ancient times the eastern boundary of Etruria，separating that country from Umbria in the upper part of its course，afterwards from the territory of the Sabines，and，in the lower part，from the mouth of the Anio downwards，divid－ ing it from Latium．（Strab．v．p．219；Plin．l．c．） It receives numerous confluents or tributaries，of which the most important are，the Tinia，an incon－ siderable stream which joins it from the E．a little below Perusia，bringing with it the waters of the more celebrated Clitumnus；the Cuanis，which falls into it from the right bank，descending from the marshy tract near Clusium；the Nar，a much more considerable stream，which is joined by the Velinus a few miles above Interamna，and dis－ charges their combined waters into the Tiber，a few miles abore Ocriculum；and the Anio，which falls into the Tiber at Antemnae， 3 miles above Rome． These are the only affluents of the Tiber of any geo－ graphical importance，but among its minor tributa－ ries，the Allia on its left bank，a few miles above the Adio，and the Cremera on the right，are names of historical celebrity，though very trifling streams， the identification of which is by no means certain． ［See the respective articles．］Two other streams of less note，which descend from the land of the Sabines and fall into the Tiber between Ocriculum and Ere－
tum, are, the Himelila ( $A \dot{\boldsymbol{u}}$ ) and the Farfarus or Fibaris (Farfa).
The Tiber is unquestionably, in a merely geographical point of view, the most important river of Central Italy, but its great celebrity is derived from its flowing under the walls of Rome, or rather through the heart of the city, after this had sttained to its full extension. The detailed account of the river in this part of its course must be sought in the article Roma: we need here only mention that after flowing under the Milvian Bridge [Pons Milvius or Mulvius] the river makes a considerable bend to the W. so as to approach the foot of the Vatican hills, and leave, on the other side, between its left bank and the nearest ridge of hills, a broad tract of plain, early known as the Campus Martius, the whole of which was eventually included within the imperial city. A short distance lower down, but still within the walls of the city, its stream was divided into two by an island known as the Insclan Tiberina, and reported by tradition to have been formed by alluvial accumulations within the period of Roman history. It is remarkable that this is the only island of any consideration in the whole course of the river, with the exception of that called the Insula Sacra, at its mouth, formed by the two arms of the river, and which is undoubtedly of late growth, and in great part of artificial formation.

The Tiker was at all times, like most rivers which are supplied principally by mountain streams, a turbid, rapid, and irregular river, that must always have presented considerable difficulties to navigation. The yellow and muddy hue of its turbid waters is repeatedly alluded to by the Roman poets ("flavum Tiberim," Hor. Carm.i. 2.13; " suo cum gurgite flavo," Virg. Aen. ix. 816; \&c.), and the truth of Virgil's description. "Vorticibus rapidis et multa flavus arena," (Acn. vii. 31), must be familiar to every one who has visited Rome. In the upper part of its course, as we learn from Pliny, the river was with difficulty navigable, even for small boats; nor did its first tributaries, the Tinia and Clanis contribute much to its facilities in this respect, though their waters were artificially dammed up, and let off from time to time in order to augment the main stream. (Plin. iii. 5. s. 9.) But from the point of its junction with the Nar, the Tiber became navigable for larger vessels, and even from an early period extensive supplies of rarions kinds were brought down the river to Rome. (Liv. ii. 34, v. 54; Cic. de Rep. ii. 5; Scc.) In the more flourishing period of the city the narigation of the Tiber was of course enormously increased ; and vast supplies of timber, stone, and other materials for building, as well as corn and provisions, were continually introduced by means of the river and its tributaries. (Strab. v. p. 235.) Corn was brought down the Tiber even from the neighbourhood of Tifernum, when the npper part of the stream was navigable. (Plin. Ep. v. 6.) It seems also to have been used as an ordinary mode of travelling, as we are told that in A. D. 20, Piso, the murderer of Germanicus, proceeded from Narnia to Rome by descending the Nar and the Tiber. (Tac. Ann. iii. 9.) At the present day the river is narigated by boats of large size as far as the confluence of the Nera, and small steamers ascend as far as Borghetto, a few miles from Otricoli.

But it was from Rome itself to the sea, a distance of 27 miles by the river (Strab. v. p. 232), that the navigation of the Tiber wis the most important. Pliny speaks of it as in this part of its course na-

## TIBERIS.

rigable for the largest vessels (" quamlilet magnarum navium ex Italo mari capax "), and as becoming the receptacle of merchandise from every part of the world. The latter statement may be readily admitted; but the former is calculated to astonish any one acquainted with the river in its present condition yet it is partly confirmed by the distinct statement of Strabo (v. p. 232), that the larger clacs of merchant ressels used to ride at anchor in the open sea off the mouth of the river, until they had been lightened of a part of their cargoes, which they discharged into barges, and afterwards procieded up the river to Rome. Dionysius gives the same account, with the exception that vessels which exceeded 3000 amphorae in burden were unable to enter the river at all, and furced to send their cargoes up by barges. (Dionys. iii. 44.) But all kinds of rowing vessels, not excepting the largeat ships of war, were able to ascend the river (Ib.); atad thus we find the younger Cato on his return from Cypras proceeding at once in his galley to the Navalia within the walls of Rome. (Flut. Cat. Jfin. 39.) We learn also from Liry that the ships of war which had been taken from Perseus king of Macedonia, though of unusual size ("inusitatae ante magnitudinis"). were carried up the river as far as the Campus Martius (Liv. xir. 42); and even the gigantic vessel constructed for the purpuse of bringing the obelisk that was set up in the Circus Maximus, was able to ascend as far as the Vicus Alexandri, within three miles of Rome (Ammian. xrii. 4. § 14). The chief difficulties that impeded the navigation of the river in the time of Strabo were caused by its own accumulations at its mouth, which had destroyed the port of Ostia. These were afterwards in great measure removed by the construction of an artificial port, calical the Portus Acgusti, conmenced by Claudius, and enlarged by Trajan, which communicated by an artificial canal or arin with the main stream of the river. (The history of these works, and the changes which the mouths of the Tiber underwent in consequence, are fully given in the article Ostia.) The importance of the navigation of the Tiber led to the formation of distinct bodies or corporations in connection with it, called Naricularii and Lennncularii, both of which are frequently mentioned in inscriptions of imperial times (Preller, p. 147).

Another disadventage under which the Tiber laboured, in common with most rivers of inountain origin, arose from the frequent inundations to which it was sulject. These appear to have occorred in all ages of the Roman history; but the carliest recorded is in b. c. 241, immediately after the close of the first Punic War (Oros. iv. 11), which is said to have swept away all the houses and buildings at Rome in the lower part of the city. Similar inundations, which did more or less damage to the city are recorded by Livy in b. c. 215, 202, 193, and again in 192 and 189 (Liv. xxiv. 9, xxx. 38, xxxr. 9, 21, xxxviii. 28) and there is little doubt that it is only from the loss of the detailed annals that we do not hear again of the occurrence of similar catastrophes till near the close of the Republic. Thus we find a great inundation of the Tiber noticed as taking place in b.c. 54 (Dion Cans. xxaix. 61), which is alluded to by Cicero (ad Q. Fr. iii. I); and several similar inundations are known to have occurred in the time of Augustus, in в.c. 27, 23 and 22, of which the first is probably that alluded to by Horace in a weil known ode. (Hor. Carm. i. 2. 13; Orell. Excurs. ad l. a; Dion Cass. liii. 20,

33, liv. 1.) Great attention was bestowed by Augustus upon the subject, and he first instituted magistrates with the title of Curatores Tiberis, whose special duty was to endeavour to restrain the river within due bounds, to preserve the embankments, \&c. (Suet. Oct. 37.) These officers received increased powers under Tiberius, and continued down to the close of the Empire. We frequently meet with mention in inscriptions of the " Curatures alvei Tiberis et riparum," and the office seems to have been regarded as one of the most bonourable in the state. (Dion Cass. Ivii. 14; Orell. Inscr. 1172, 2284, \&c.; Gruter, Inscr. pp. 197, 198.) But it is evident that all their efforts were ineffectual. In the reign of Tiberius so serious was the mischief caused by an inundation in A. D. 15 that it was proposed in the senate to diminish the bulk of the waters by diverting some of the chief tributaries of the stream, such as the Nar, Velinus and Clanis. (Tac. Ann. i. 76 ; Dion Cass. Ivii. 14.) This plan was, however, abandoned as impracticable; and in A. D. 69 another inundation took place, which appears to have caused still more damage than any that had preceded it (Tac. Hist. i. 86). It is strange that in face of there facts Pliny should assert that the Tiber was so confined within artificial banks as to have very little power of outbreak, and that its inundations were rather subjects of superstitious alarm than formidable in themselves. (Plin. iii. 5. s. 9.) During the later ages of the Empire indeed we hear but little of such outbreaks of the Tiber, but this is very probably owing only to the scanty nature of our records. One great inundation is, however, recorded as doing great mischief in the reign of Trajan, another in that of Macrinus, and a third in that of Valerian. (Dion Cass. Ixxviii. 25; Vict. Caes. 34, Epit. 13.) One of the most destructive of all is said to have been that of A. D. 590, which added to the various calamities that at that time almost overwhelmed the city. (list. Miscell. xviii. p. 583; Greg. Turon. x. 1.) At the present day the lower parts of Rome are still frequently flooded by the river, for though the soil of these parts of the cily has unquestionably been raised, in some places many feet, the bed of the Tiber has undoubtedly been also elerated, though probably in a less degree. The whole subject of the inundations and navigation of the Tiber, and the measures taken in ancient times in connection with them, is fally illustrated by Preller in an article entitled Kum und der Tiber in the Berichte der Sächsischen Gesellschaft for 1848 and 1849.

The Tiber appears to have been in ancient times occasionally frozen, at least partially; a circumstance to which the Latin poets repeatedly allude. But we must not construe their rhetorical expressions too strictly; and it is clear from the terms in which Livy notices its being frozen over in the extraordinary winter of B.c. 398 , that such an occurrence was of extreme rarity. ("Insignis annus hieme gelida ac nivosa fuit, adeo ut viae clausae, Tiberis innavigabilis fuerit, Liv. v. 13.) St. Augustin also alludes to such a winter (apparently the same noticed by Livy), "ut Tiberis quaque glacie duraretur," as a thing unheard of in his times. (Augustin, Civ. Dei, iii. 17.)

It was a tradition generally received among the Romans that the Tiber had been originally called Albula; and that it changed its name in consequence of Tiberinus, one of the fabulous kings of Alba, having been drowned in its waters. (Liv. i. 3; Dionys.
i. 71 ; Vict. Orig. G. Rom. 18.) Virgil, however, who calls the king Thybris, assigns him to an earlier period, prior to the landing of Aeneas (Aen. viii. 330). Hence the river is not urfrequently called by the Roman poets Albula. (Sil. Ital. vi. 391, viii. $455,8 \mathrm{c}$.) It had naturally its tutelary dirinity or river-god, who, as we learn from Cicero, was regularly invoked in their prayers by the augurs under the name of Tiberinus (Cic. de N. D. iii. 20). He is frequently introduced by the Roman poets as "pater Tiberinus" (Enn. Ann. i. p. 43: Virg. Aen. viii. 31, 22 ; \&c.)
[E. H. B.]
TIBIGENSE OPPIDUM, a town in Africa Propria, apparently the Thigiba (Erzi6a) of Ptolemy (iv. 3. § $29 ;$ Plin. v. 4. s. 4). [T. H. D.]

TIBILIS, a town in the interior of Numidia, 54 miles from Cirta, having hot mineral springs (Aquae Tibilitanae) (August. Ep. 128 ; Itin. Ant. p. 42), commonly identified with Hammam Meshu-' tin in the mountains near the river Seibonse; but, according to D'Avezac and the map of the province of Constantine (l'ar. 1837), it is Hammam-ebBerda. somewhat more to the N.
[T. H. D.]
TIBISCLM (Tifarnov, Ptol. iii. 8. § 10), a town of Dacia, on the river Tibiscus. By the Geogr. Mav. it is called Tibis (iv. 14), and in the Tab. Peut. Tiviscum. Its ruins exist at Kavaran. at the junction of the Temesz (Tibiscus) and Bistra (cf. Ukert, iii. 2. p. 616).
[T. H. I).]
TIBISCUS (Tibıккоs, Ptol.iii. 8. § 1), a tributary river of the Danube in Dacia. We also find it called Tibissus (Inscr. Grut. p. 448.3) and Tibisia (Geugr. Rav. iv. 14). Several authors identify it with the Tisianus or Tysia (the modern Theiss), with which, indeed, Ptolemy seems to have confounded it, as he does not mention the latter (Mannert, iv. p. 203; Sickler, i. p. 196; cf. Ukert, iii. 2. p. 603). But Forbiger, after Reichard, identifies it with the Temesz; his grounds for that opinion being that Jornandes (Get. c. 34) and the Gengrapher of Ravenna (l. c.) mention the Tysia and Tibisia as two distinct rivers, and that the site of the ancient town of Ti biscum appears to point to the Domesz (Handb. $d$. alt. Geogr. iii. p. 1103, note). It is probable that the Pathissus of Pliny (iv. 12. s. 25) and Parthiscus of Ammianus Marcellinus (xvii. 13. § 4) are the same river, though some identify them with the Tisianus.
[T. H. D.]
TIBISIS (Tibiots). a large river of Scythia, which Herodotas describes as rising in Mt. Haemus, and flowing into the Maris (iv. 49). It is identified by some with the Kara Low.

TIBULA (Tigouna, Ptol.), a town of Sardinia, near the N. extremity of the island, which appears to have been the customary landing-place for travellers coning from Corsica; for which reason the Itinerar:es give no less than four lines of route, taking their departure from Tibula as a starting-point. (Itin. Ant. pp. 78-83.) It is very unfortunate therefore that its position is a matter of great uncertainty. That assigned to it by Ptolemy would place it on the site of Ciastel Sardo on the N. coast of the island, and only about 18 miles from Porto Torres, but this is wholly incompatible with the statements of the Itineraries, and must certainly be erroneous. Indeed Ptoleny himself places the Tibulates, or Tibulatii (Tibov入árioc), who must. have been closely connected with the town of that name, in the extreme N. of the island (I'tol. iii. 3. §6), and all the data derived from the Itineraries concur in the same result. The most probable posi-
tion is, therefore, that assigned it by De la Marmora, who fixes it on the port or small bay cailed Porto di Lungo Sardo, almost close to the northernmost point of the island, the Errebantium Prom. of Ptolemy. (De la Marmora, Voy. en Sardaigne, vol. ii. pp. 421-432, where the whole question is fully examined and discussed.)
[E. H. B.]
TIBUR (ì Tiboupivwy or Tibouphyove mbits, Polyb. vi. 14 ; тd TíGoupa, Strab. v. p. 238; т̀े TıGoúp, Ptol. iii. 1. § 58; 方 Tibupıs, Steph. B. p. 564: Eth. Tiburs, Liv. vii. 9 ; Virg. Aen. xi. 757; Hor. S. i. 6. 108; Tac. Ann. xiv. 22, \&c.; Tiburtinus, Cic. Phil. v. 7; Prop. iv. 7. 85; Plin. Ep. vii. 29, \&c.; Tiburnus, Stat. Silv. i. 3. 74; Prop. iii. 22, 23: now Tivoli), an ancient and celebrated town of Latiam, seated on the Anio, to the NE. of Rome, from which it was distant 20 Roman miles (Itin. Ant. p. 309; cf. Mart. iv. 57; Procop. B. G. ii. 4). 'Tibar lies on an offshoot or spar thrown out from the northern side of what is now called Monte Ripoli, at a level of between 800 and 900 feet above the sea. This ledge extends across the bed of the Anio to Monte Catillo on its north bank, thus forming a natural barrier over which the river leaps into the valley below, from a height of about 80 feet, and forms the celebrated waterfall so frequently mentioned by the ancient writers (Strab. l. c.; Dionys. H. v. 37 ; Hor. Od. i. 7. 13, \&c.). The town lay principally on the cliff on the left or southern bank, where it is half encircled by the Anio. It is probable that at a remote period the waterfall was lower down the river than it is al present, since there are tokens that the stream once washed the substructions of the terrace on which the round temple is built; especially a broken wheel embedded in the cliff at a height of 150 feet above the abyss called the Grotto of Neptune. The awful catastrophe in A. D. 105 recorded by the younger Pliny (E.p. viii. 17), when the Anio burst its banks and carried away whole masses of rock - montes he calls them - with the groves and buildings upon them, must have produced a remarkable change in the character of the fall. We may gather, from some descriptions in Propertius (iii. 16. 4) and Statius (Silv. i. 3. 73), that previously to that event the Anio leaped indeed from a high rock, but that its fall was broken towards its lower part by projecting jedges, which caused it to form small lakes or pools. From the time of Pliny the cataract probably remained much in the same state down to the year 1826, when the river again swept away a number of houses on the left bank, and threatened so much danger to the rest that it was found necessary to divert its course by forming a tunnel for its waters through Monte Catillo on the right bank. This alteration spoiled the romantic points of view on the side of the grottoes of Neptune and the Sirens; but the fall is still a very fue one. Scarcely inferior to it in picturesque beauty are the numerous small cascades, called Cascatelle, on the western side of the town. These are formed by water diverted from the Anio for the supply of various manufactories, which, after passing through the town, seeks its former channel by precipitating itself over the rock in several small streams near what is commonly called the villa of Maecenas. Nothing can be finer than the view of these cascades from the declivities of Monte Peschiavatore, whence the eve ranges over the whole of the Campagna, with Iome in the distant background.

The country around Tibur was not very fertile
in grain; but it was celebrated for its frait-trees and orchards ("pomosi Tiburis arva," Col. R.R.x. p. 347, ed. Lugd 1548 ; cf. Propert. ir. 7. 81 : "Pomosis Anio qua spumifer incubat arvis"), and especially for its grapes and figs (Plin. xiv. 4. s. 7, xv. 19). Its stone, now called travertino, was much used at Rome for building, whither it was easily convejed by means of the Anio, which became navigable at Tibur (Strab. l.c.). Vast remains of ancient quarries may still be seen on the banks of that river (Nibby, Viaggio Ant. i. 112). Of this material were constructed two of the largest edifices in the world, the Colosseum and the Basilica of St. Peter. The air of Tibur was healthy and bracing, and this was one of the recommendations, together with its beautiful scenery, which made it a favourite retirement of the wealthy Rormans. Besides its salubrity, the air was said to possess the peculiar property of bleaching ivory (Sil. It. xii. 229; Mart. viii. 28. 12). Tibur was also famed for its pottery (Sen. Ep. 119).

The foundation of Tibur was long anterior to that of Rome (Plin. xri. 87). According to Dionykius of Halicarnassus (i. 16), it was one of the cities founded by the Siculi when they had possession of Italy; in proof of which statement be adduces the fact that in his own time part of the town was still called Sicelion; a name which would also indicate its having been one of the chief cities of that people. Another legend affirmed that the Siculi were expelled by Tiburtus, Coras and Catillus II., sons of Catillus I. The last was the son of Amphiaraus, the celebrated Theban king and prophet, who tloarished about a century before the Trojan War. Catillus migrated to Italy in consequence of a ver sacrum. Tiburtus, or Tiburnus, the eldest of his three sons, became the eponymous hero of the newly founded city; for such it may be called, since the Siculi dwelt only in unwalled towns, which were subsequently fortified by the Greek colonists of It:ily. According to Cato's version of the legend, libur was founded by Catillus, an officer of Evander (Solin. i. 2). From these accounts we may at all events infer the high antiquity of Tibur. The story of its Greek origin was very generally adopted by the Roman poets, whence we find it designated as the " moenia Catili" by Horace (Od. i. 18. 2; cf. Ib. ii. 6. 5; Virg. Aen. vii. 670; Ov. Fast. iv. 71, Amor. iii. 6. 45; Stat. Silv. i. 3. 74 : Sil. It. iv. 225, viii. 364). Tibur possessed a small surrounding territory, the liinits of which, however, we are unable to fix, all that we know respecting it being that the towns of Empulum and Sassula, besides one or two others, at one time belonged to it. Both these places lay in what is called the Valle di Sicilinno, to the NE. of the town, the name of which is probably connected with the Sicelion of Dionysius. Empulum is identified with the present Ampiglione, a place about 4 miles distant from Tibur. Sassula probably lay 2 or 3 miles beyond Empulum, in the same direction. The boundary between the Tibartine territory and that of the Sabines was very uncertain. Augastus adopted the Anio as the limit: yet considerable uncertainty seems to have prevailed even subsequently to the assumption of that boundary. Thas according to Tacitus (Ams. xiv. 22), the territory of Tibur extended besond the Allio, and included Sublaqueum, the modern Subiaco, which is commonly assigned to the Aequi. Originally Tibur with its territory seems to have belonged to the Sabines. Pliny enumerates Tibnr among the Sabins towns (iii. 12. 8. 17).

We know nothing of the history of Tibur except in connection with that of Rome. The first occasion on which we find it mentioned is in the time of the decemvirate, B. C. 446, when M. Claudius, the infamons tool of the decemvir Appius, went into exile there (Liv. iii. 58). It does not appear, however, as taking any active part in affairs till b. c. 357; in which year the Tiburtines shut their gates against the Roman consuls C. Sulpicius and C. Licinius Calvus, who were returning from a successful expedition against the Hernici. There appear to have been previous disputes and complaints between the Tiburtines and Romans, and the latter seized the opportunity to declare war (Liv. vii. 9). But hostilities were suspended for a time by an incursion of the Gauls, who crossed the Anio and advanced to within 3 miles of Rome. This invasion of the Gauls was assisted by the Tiburtines; and therefore, after the barbarians had been repulsed by the prodigious valour of Manlius Torquatus, the consul C. Poetelius was sent against them with an army in the following year. But the Gauls returned to the assistance of the Tiburtines; and, to meet this emergency, Q. Servilius Ahala was nained dictator. The Gauls again advanced close to the walls of Rome, and a great battle was fought just outside the Porta Collina, in the sight of all the citizens. After a desperate conflict, the barbarians were defeated and fled to Tibur for refuge. Here they were intercepted by the consul Puetelius, who drove them into the city, as well as the Tiburtines who had come to their aid. For this achievement a triumph was awarded to Puetelius, which we find recorded in the Fasti Capitolini as well as by Livy. This triumph, however, excited the ridicule of the Tiburtines, who denied that the Romans had ever met them in a fair and open field: and in order to wipe out this affront, they made, in the following year, a nocturnal attempt upon Rome itself. But when day dawned and two armies, led by the two consuls, marched out against them from different gates, they were scarcely able to sustain the first charge of the Romans (Liv. vii. 11, 12). Yet the war continued for several years. In b. c. 350, the consul M. Popilius Laenas devastated their territnry (ib.17), and in the following year Valerius Poplicola took Empulum, one of their dependent cities (ib. 18; cf. Empulum). Sassula also yielded in 348 to the arms of M. Fabius Ambustus; and the Tiburtines would have lost all the rest of their territory had they not laid down their arms and submitted to the Roman consul. The triumph of Fabius is recorded in the Fasti and by Livy (ib. 19). Yet a few years later we find the Tiburtines joining the Latin leagne against the Romans; and even after the overthrow of the Latins they allied themselves with the Praenestini and Veliterni to defend Pedum (Id. viii. 12). In B. c. 335, the consul L. Furius Camillus, attacked and completely defeated them onder the walls of that place, in spite of a sortie of the inhabitatits, and then took the town by escalade. All Latium was now subdued, and we do not again hear of the Tiburtines taking up arms against Rome (ib. 13). For this exploit Camillus not only obtained a triumph, but also an equestrian statue in the forum, a rare honour in that age. In the Senatusconsultum subsequently drawn up for tie settlement of Latiom, Tibur and Praeneste were treated with more severity than the other cities, except Velitrae. They were deprived of part of their territory, and were not admitted to the VGI. II.

Roman franchise like the rest. The cause of this severity was not their recent insurrection, the guilt of which they shared with the rest of the Latin cities, but their having formerly joined their arms with those of the Gauls (ib. 14). Thus Tibur remained nominally free and independent, so that Roman exiles might resort to it (Polyb. vi. 14). Hence we find the tibiciues taking refuge there when they fled from the rigour of the censors (в. с. 310), who had deprived them of the good dinners which they were accustomed to enjoy in the temple of Jupiter; an event more important than at first sight it might seem to be, since, without the tibicines, neither sacrifices, nor several other important ceremonies, could be performed at Rome. On this occasion the rights of the Tiburtines were respected. The senators sent ambassadors to them as to an independent city, to request their assistance in procuring the return of the fugitives. The Tiburtines, like able diplomatists, took the pipers by their weak side. They invited them to dinner and made them drunk, and during the night carted them in waggons to Rome, so that when they awoke in the morning sober, they found themselves in the Forum (Liv. ix. 30). The story is also told by Ovid with his usual felicity (Fast. vi. 665, sqq.). Other instances might be adduced in which Tibur enjoyed the privilege of affording an asylum. That of M. Claudius, before alluded to, was of course previous to the conquest of Latium by the Romans; but we find Cinna taking refuge at Tibur after the murder of Caesar (App. B. C. i. 65) : and Ovid (ex Ponto, i. 3, $81, \mathrm{sq}$.) notes it as the most distant land of exile among the ancient Romans.

It was at Tibur that Syphax, king of Numidia, expired, in в. c. 201, two years after being captured in Africa. He had been brought thither from Alba, and was destined to adorn the triumph of Scipio; a humiliation which he escaped by his death (Liv. xxx. 45). Some centuries later Tibur received a more interesting captive, the beautiful and accomplished Zenobia. The former queen of the East resided near the villa of Hadrian, in the anostentatious manner of a Roman matron; and at the time when Trebellius Pollio wrote her history, the estate still bore her name. (Poll. XXX. Tyr. 26.)

In the Barberini palace at Rome is preserved a bronze tablet on which is engraved the following fragment of a Senatusconsultum: Propterea . qrod. scibamus . ea . vos . merito . nostro . facere . non . potuisse . neque . vos . dignos . esse . quei. faceretis . neque .id . vobeis . neque. rei . poplicae. vostrase . oitile . esse. facere. This monument, first acquired by Fulvio Orsini, and left by him to Cardinal Farnese, is published by Gruter (Inscr. ccecxcix. 12). The tenuur seems to show that the Tiburtines had been accused of some grave offence from which they succeeded in exculpating themselves; but, as there is nothing to tix the date of the inscription, various opinions have been entertained respecting the occasion of it. As the style seems to belong to about the middle of the 7 th century ot Rome, Nibby (Dintorni, iii. p. 172) is of opinion that the document refers to the social war; that the Tiburtines had cleared themselves from the charge of taking part in that league, and were in consequence admitted to the Roman franchise, at the same time with many other Latin and Etruscan cities. This conjecture is by no means improbable. If, however, Tibur received the franchise before the civil wars of Marius and Sulla, the latter must have taken 4 H

## TIBUR.

it away when he deprived the rest of the municipal cities of it, with the exception of Anagnia (Cic. pro Dom. 30), but it was probably recained on the abdication of the dictator. The treasure deposited at Tibur in the temple of Hercules was appropriated by Octavian during his war against Lucius Antonius, when so many other temples were plundered at Rome and in its neighbourhood. (App. B. C. v. 24.) From this period we have no notices of Tibur till the time of the Gothic war in the 6 th century of our era. During the siege of Rome by Vitiges, Belisarius placed 500 men in it, and afterwards garrisoned it with Issurians. (Procop. B. G. ii. 4.) But under his successor Totila a party of the Tiburtines having introduced the Goths by night into the city, the Isaurians fled, and the Goths murdered many of the inhabitants with circumstances of great cruelty ( 16 . iii. 10.) Great part of the city must have been destroyed on this occavion, since it appears further on (c. 24) that Totila having retired to Tivoli, after a vain attempt upon Rome, rebuilt the fortress.

At present there are but few traces of the boundaries of the ancient city; yet there are certain points which, according to Nibby (i)intorni, iii. p. 186 , seq.), enable us to determine the course of the walls with some degree of accuracy, and thus to estimate its circumference, at all events during the time of its subjection to the Romans. These points are determined partly by the nature of the ground, partly by existing remains, and partly by positive testimony. The nature of the ledge upon which the town is built shows that the walls must have traversed the edge of it towards the N. and E.: and this assumption is confirmed by some remains. The two temples commonly known as those of the Sibyl and of Drusilla in the quarter called Castro Vetere, and the evident pains taken to isolate this part, indicate it to have been the ancient acropolis or arx, and probably the Sicelion of Dionysius. On the W. the boundary is marked by some remains of the walls and of the gate opening on the road to Rome. On investigating this track, we find that it inclined inwards towards the church of the Annunziata, leaving out all that part now occupied by the Villa $d$ Este and its appurtenances. Froin that church it proceeded towards the modern gate of Sunta Croce and the citadel built by Pope Pius II. on the site of the ancient amphitheatre. Thence to the Anio two points serve to fix the direction of the walls: first, the church of $S$. Clemente, which was certainly outside of them, since, according to the testimony of Marzi, some sepulchral stones were discovered there; second, the church of S. Vincenzo, which was certainly within them, as vestiges of ancient baths may still be seen at that spot. From the fortress of Pius II. the wall seems to have proceeded in an almost direct line to the Anio between the charch of $S$. Bartolommeo and the modern gate of S. Giovanni. It did not extend to the opposite bank, as a small sepulchre of the imperial times has recently been discovered there, at the spot where the tunnel for diverting the Anio was opened; where also were fuund remains of an ancient bridge. Thus the plan of the city, with the abatement of some irregularities, formed two trapeziums joined together at their smallest sides. The arx also formed a trapezium completely isolated, and was connected with the town by a bridge on the same rite as the present one of $S$. Martino. The circumference of the city, including the arx, was about

8000 Roman feet, or $1 \frac{1}{2}$ miles. The remains of the wall which still exist are of three different epuchs. The rarest and most ancient consist of trapezoidal masses. Others, near the Porta Romana or del Colle, are of opus incertum, and belong to the time of Sulla. The gate itself, though compmed of quadrilateral masses, is of the style of the gates of home of the age of Justinian. From the nature of the place and the direction of the ancient roads, Tibur must have had five gates; namely, three towards the W., one towards tlie S., and one towards the E., without counting that which communicated with the citadel; but with the exception of the Reatina, where the aqueduct called Anio Vetus began, their names are unknown, and even with regard to that the reading is doubtful. (Front. Aq. p. 30.)

The ancient remains existing at 7 icoli, to call them by the names under which they commonily pass, are, the temple and portico of Hercules, the temples of Vesta and Sibylla, the thermae or thaths, the two bridges and the little tomb recently discovered, the temple of Tussis, the villas of Maecenas, of Varus, \&c.

Tibur was famed for the worship of Hercules, and hence the epithet of Herculean, so frequently applied to it by the Roman poets (Prop. ii. 32. 5; Sil. It. iv. 224; Mart. i. 13. 1, \&c.; ef. Stat. Silr. iii. 1. 183.) The temple of that demigod at Tibur way with the exception of the vast temple of Fortune at Prseneste, the most remarkable presented by any city in the neigbourhood of Rome. Thus Strabo (l.c.) mentions the Heracleum and the waterfall as the distinguishing features of Tibur, just as be alludes to the temple of Fortune as the principal object at Praeneste. And Juvenal (xiv. 86. seig.) censures the extravagance of Cetronius in building by saying that his villas at Tibur and Praenesie outdid the fanes of Hercules and Fortune at thone places. The name of Heracleum used by Strabos of the former, as well as the term tépevos applied to it by Stephanus Byzantinus, show that it embraced a large tract of ground, and as Augustus is said to have frequently administered justice in its particoes (Suet. Oct. 72), they must have been of considerable size. It possessed a library, which, however, in the time of the Antonines appears to have fallen into decay. (A. Gell. N. A. xix. 5.) We have already seen that it had a treasury. There was also an oracle, which, like that at Praeneste, gave responses by means of sortes. (Stat. Silv. i. 3. 79.) Sone antiquaries seek this vast temple behind the tribune of the present cathedral, where there are some remains of a circular cella composed of materials of a riomboidal shape, thus marking the transition in the mode of building which took place about the age of Augustus from the opus incertum to the opas reticulatum. But it would be difficult to regand these vestiges as forming part of a temple 150 feet in circumference; nor was it asual to erect the principal Christian church on the foundstions of a heathen temple. Nibby therefore (Dintorni, iii. p. 193), after a careful investigation, and a comparinon of the remains at Palestrina with those of the socalled villa of Daecenas at Tiroli, is inclined to regard the latter, which will be described further on, as belonging to the celebrated temple of Hercules. It is probable, however, that there were several temples to that deity at libur, just as there were at Rome. The principal one was doubtless that dedicated to Hercules Vietor Tiburs; but there was also oue of Hercules Sazanus, which will be descrited by
and by; and the remains at the cathedral mav have belonged to a third. It is pretty certain, however, that the Forum of Tibur was near the cathedral, and occupied the site of the present Piazza dell Ormo and its environs, as appears from a Bull of Pope Benedict VII. in the year 978, referred to by Ughelli in his Italia Sacra (t. i. p. 1306). and copied by Marini (Papiri Diplomatici p. 316). In this Bull, the object of which was to determine the rights and jurisdiction of the bishop of Ticoli, many places in the town are mentioned by their ancient names; as the Forum, the Vicus Patricius, the Euripus, the Porta Major, the Porta Obscura, the walls, the postern of Vesta, the district of Castrum Vetus, \&c. The round temple at the cathedral befonged therefore to the Forum, as well as the crypto-porticus, now called Porto di Ercole in the street del Puggio. The exterior of this presents ten closed arches abnat 200 feet in length, which still retain traces of the red plaster with which they were covered. Each arch has three loopholes to serve as windows. The interior is divided into two apartments or halls, by a row of twenty-eight slender pillars. Traces of arabesque painting on a black ground may still be seen. The mode of building shows it to be of the same period as the circular remains.

In that part of the city called Castro Veterc, which Nibby identifies with the arx, are two temples, one round, the other oblong, both of which have been varionsly identified. The round one, a charming relic of antiquity, is commonly regarded as the temple of the Sibyl. We know that the tenth and last of the Sibyls, whose name was Albunea, was worshipped at Tibur (Varro, ap. Lactant. de Falsa
 vala, Suid. p. 3:302 Gaisf.); and Horace evidently alludes to her when he speaks of the "domus Albuneae resonantis" at that place. (Od.i.7.12.) It can scarcely be doubted therefore that she had a fane at Tibur. But Nibby is of opinion that the epithet of " resonantis," which alludes to the noise of the waterfall, is inapplicable to the situation of the round temple on the cliff; for though it immediately overhang the fall, before the recent diversion of the stream, the cataract, as before shown, must in the time of Horace have been lower down the river. This objection however, may perhaps be considered as pressing a poetical epithet rather too closely; nor is there anything to show how far the fall may have been remored by the catastrophe described by the younger Pliny. Some writers have ascribed the temple to Vesta, an opinion which has two circumstances in its favour: first, we know that Vesta was worshipped at Tibur, from inscriptions recording the Vestal virgins of the Tiburtini; secondly, the temples of Vesta were round, like the celebrated one near the Roman forum. Unfortunately, however, for this hypothesis, the Bull of Pope Benedict before referred to shows that the district of Vesta was on the oppasite side of the river. Hence Nibby (I)intorni, iii. p. 205) regards the building in question as the temple of Hercules Saxanus. We know that round temples were sometimes erected to that deity, as in the Forum Boarium at Rome; and the epithet of Saxinus is applicable to the one in question, from its being seated on a rock. It may be observed, however, that Saxanus is not a usual derivative form from Saxum; and on the whole it may perhaps be as satisfactory to follow the ancient tradition which ascribes the temple to the Sibyl. It is of the style called peripteral, or hav-
ing columns all round. These were originally eighteen in number, hut only ten now remain, of which seven are isolated and three are built into the wall of a modern structure: but in such a manner that the sides towards the cell are visible. The columns are of travertino, of the Corinthian order, and channelled: hence the temple bears considerable resemblance to that in the Forum Boarium at Rome. According to the Bull before quoted, it was, in the loth century, a church dedicated to the Virgin Mary.

The same was the case with the adjoining temple, which was dedicated to $\mathbf{S}$. George. This building is also principally of travertino. It has four columns in front, now bidden by modern houses, and six at each side, five of which are built into the walls of the cella to the extent of two-thirds of their circumference. Hence it was of the style called prostylos tetrastylos pseudo-peripteros. The columns are of the Ionic orler. From an inscription found near it, some writers have inferred that the temple was dedicated to the worship of Drusilla, the sister of Caligula : but the style of building is considerably earlier, and belongs to the age of Sulla. Others have called it the temple of the Sibyl. Professor Nibby (Dintorni, iii. p. 210) started a novel hypothesis, and regarded it as the temple of Tiburtus, or Tiburnns. It is certain that the eponymons founder of the city enjoged divine honours in it, as we see from Horace ("Tiburni lucus," Od. i. 7. 13) and Statius (" illa recubat Tibumus in umbra," Silv. i. 3. 74). But these expressions refer to a sacred grove or $\tau \epsilon \in \epsilon \nu 0 s$, probably with a shrine, or perhaps merely an altar, and therefore situated, in all likelihood, in the outskirts of the town, and not in a narrow crowded place like the arx. And we must here point out a little inconsistency into which the learned professor has fallen: for whilst he objects to the nund temple being called that of Vesta, on the ground that it was not within hearing of the waterfall, when that was in its ancient state, yet he regards the square one, which immediately adjoins it, as the temple of Tiburnus, because it was close to the cataract. On the whole, therefore, we must for the present content ourselves with one of the ancient names for this building, or else, which may perhaps be the safer course, leave it altogether unidentified.

The catastrophe of 1826 brought to light the remains of a bridge ; and another still more perfect one was discovered in 1832, in the progress of the works for diverting the course of the river. At the same time the workmen came upon a small tomb, between the Via Valeria and the banks of the river, containing several skeletons and monumental stones. Among these was a cenotaph to Senecio, who was consul for the fourth time A. D. 107, and several inscriptions. Under this tomb was an ancient aqueduct, intended to distribute the waters of the Anio among the adjacent villas.

There are no other remains in the town except some fine opus reticulatum et lateritium, near the church of S. Andrea. At this spot were discovered, in 1778, some large and handsome columns with Corinthian capitals, and also the pedestal of a statue to Fur. Maecius Graccus, with an inscription connecting it with some embellishment of the baths. Hence we may conclude that the thermae were sitnated here:

Outside the city, on the Via Constantiana, is the building known as the temple of Tussis, for which appellation, however, no authority exists. Externally it is of an octagon form, but mund inside.

4 H 2

Nibby holds that it is not anterior to the 4th century of our era, its construction resembling that of the villa of Maxentius on the Via Appia. There are traces of painting of the 13th century, showing that then, if not previously, it was a Christian church. A little further on we come to an inscription which records the levelling of the Clivus Tiburtinus in the time of Constantius and Constans. The name of the latter is purposely effaced, no doubt by the order of Magnentius. This monument was discovered in 1736, and re-erected by order of the magistrates of Tibur at the same spot where it was found.

The delightful country in the vicinity of Tibur caused many villas to be erected there during the latter period of the Republic and under the first Cuesars, as we see from the writings of Catullus, Horace, Propertius, Statius, and other puets. Of these villas, however, of which we shall mention only the more interesting, there are but few remains, and scarcely any that can be identified with certuinty. The most striking are those conmonly called the villa of Maecenas on the SW. side of the town, near the Cascatelle. Ligorio was the first who called this building the villa of Maecenas; but there is no anthority for the assumption. It was probably founded on a wrong conception of a passage in Horace (Od. iii. 29. 6, seq.), which is also quoted by Mr. Cramer (Italy, vol. ii. p. 60) under a misapprehension that it contains an allusion to a residence possessed by Maecenas at Tibur, instead of to his town-house on the Esquiline. The plan of this building published by Marquez and Uggeri is correct. It was founded on gigantic substructions, the magnitude of which may be best observed on the N. side, or that towards the valley of the Anio. It is an immense quadrilateral edifice, $637 \frac{1}{2}$ feet long, and 4.50 broad, surrounded on three sides by sumptuous porticoes. The fourth side, or that which looks towards Rome, which is one of the long sides, had a theatre in the middle of it, with a hall or saloon on each side. The porticoes are arched, and adorned on the side towards the area with half columns of the Ioric order. Behind is a series of chambers. An oblong tumulus now marks the site of the honse, or, according to Nibhy, who regards it as the temple of Hercules, of the Cella. The pillars were of travertine, and of a beautiful Ionic order. One of them still existed on the ruins as late as $\mathbf{1 8 1 2}$. This immense building intercepted the ancient road, for which, as appears from an inscription preserved in the Vatican, a vault or tunnel was constructed, part of which is still extant. Hence it gave name to the P'rria Scura, or Obscura, mentioned in the Bull of Benedict, which it continued to bear at least as late as the 15 th century.

To our apprehension, the plan here laid down is rather that of a palace or villa, than of a temple, nor do we perceive the resemblance, insisted on by Nibby, to the temple of Fortune at Praeneste. It is not probable that the chief fane of Hercules, the patron deity of Tibur, should have been erected outside the town, nor would it have been a convenient spot for Augustus to administer justice, as we have mentioned that he did in bis frequent retirements to Tibur, in the porticoes of the temple of Hercules. The precincts of the Forum would have been more adapted to such a parpose. But if that emperor so rouch frequented Tibur, evidently the favourite among all his country retreats (Suet. l.c.), he must have Lad a suitable residence for his reception. Might
not this villa have been his palace? Nibby hinerlf observes that the style of building is of the Augustan, or transition, period; and a subject would scarcely have ventured to occupy the highroad with his substructions. But we offer this notion as a mere conjecture in favour of which we can adduce nothing but its probability.

Catullus had a paternal estate in the neighbourhood of Tibur; and the pretended site of his house is still pointed out in the valley by Monte Catillo. It is evident, however, from his address to his farm (Carm. 42), that it was more distant from the town, and lay at a point where the boundary between the Sabine and the Tiburtine territory was uncertain. He himself wished it to be considered as in the latter, probably as the more fashionable and aristocratic situation ; but his ill-wishers persisted in asserting that it was Sabine. Horace had also 2 residence at Tibur, besides his Sabine farm; and, according to his biographer, it was situated near the grove of Tiburnus (Suet. Vit. Hor.); but whether it was at the spot now pointed out, near the hernitage of S. Antonio, on the road from Tivoli to the Cascatelle, is very problematical, the remains there being, according to Nibby (Dintorni, iii. p. 221). of a perivd anterior to that of Horace. Nibby would identify them as belonging to the vills of Sallust, who, if we may trust the Declamatio in Sallustivm (c. 7) falsely ascribed to Cicero, had a residence at Tibur. But this is mere conjecture. Equally ancertain is the site of the villa of Vopiscus, a poet of the age of Domitian, of which Statius has left us a pretty description (Silv. i. 3). The grounds seem to have extend d on both sides of the river, and from certain particulars in the description, Nibby (Dintorni, iii. p. 216) imagines that he has discovered the spot near the place commonly assigned to the villa of Catullus and the grove of Tiburnus, in the valley between M. Catillo and M. Peschiaratore. The Cynthia of Propertius, whose real name was Hostia (Appul. Apol. ii. p. 405, ed. Bosscha), lived and died at Tibur (Prop. iii. 30, iv. 7. 85, \&ce.); so that scarcely any place was more associated with the domestic life of the Romian poets. The situation of the villa of Qnintilius Varus, a little further on the same road, is rather better supported than most of the others. Horace alludes to the estate of Varus at Tibur, which appears to have lain close to the town (Od. i. 18. 2). A tract on the declivity of Monte Peschiacatore, opposite to the Cascatelle, bore the name of Quintiliolo as far back as the 10 th century, and the little church at this spot is called La Madonna di Quintiliolo, an appellation which may possibly have been derived from the family name of Varus. Here are the remains of a magnificent villa, in which marble parements, columns, capitals, statues, consular coins, \&c., have been discovered, and especially, in 1820, two beautiful marble Fauns, now in the Vatican. Just below this villa is the Ponte Acquoria, which, as well as the surrounding district, takes its name, literally "the golden water," from a beautifully clear spring which rises near it. This bridge was traversed by the primitive Via Tiburtina. One arch of it still remains, constructed of large blocks of travertine. Near it is another bridge of bricks of the imperial times, as well as a modern one of the 15 th century, but none of these are at present in use. On the other side of the river, which is crossed by a rode wooden bridge, the mad ascends the Clivus Tiburtinus in returning towards the town. Portions of
the pavement are in complete preservation. Under a rock on the right is an ancient artificial cave, called by the local antiquaries Il Tempio del Mondo, but which was probably either a sepulchre, or one of those caves consecrated by the ancients to the rustic tutelary deities. This road joins the Via Constantia before mentioned, leading up to the ruins of the so-called villa of Maecenas.

Outside the Porta S. Croce is a district called Carciano, a corruption of the name of Cassianum which it bore in the 10th century, derived from a magnificent villa of the gens Cassia which was situated in it. In the time of Zappi, in the 16th centary, a great part of this building was extant. The splendour of this residence is attested by the numerous beantiful statues found there, many of which were acquired by Pope Pins VI. and now adorn the Vatican. In the neighbourhood of Tibur are also the remains of several aqueducts, as the Anio Vetus, the Aqua Marcia, and the Aqua Clandia. The ruins of the sumptuous villa of Hadrian lie about 2 miles S . of the town. A description of it would be too long for this place, and it will suffice to say that, in a circuit of about 8 miles, it embraced, besides the imperial palace and a barracks for the guard, a Lyceum, an Academy, a fac-simile of the Poecile at Athens and of the Serapeum at Alexandria, a vale of Tempe, a Tartarus, a tract called the Elysian Fields, a stream called the Euripus, numerous temples, \&c. (Cf. Nibby, Viaggio Antiquario, vol. i.; Analisi della Carta dé Dintorni di Koma, v. viii.; Gell, Topography of Rome and its vicinity, ed. Bunbury ; Ant. del Ré, Antichità Tiburtine; Cabrale and F. del Ré, Delln V'illa e de' Monumenti antichi della Cittlis e del Territurio di Tivoli; Santo Viola, Storia di Tivoli; Keller, De vetere cum novo Tibure comparato : concerning the villa of Hadrian, Piero Ligorio, Pianta della Villa Tiburtinu; Fea, ap. Winckelmann ii. p. 379.)
[T. H. D.]
Tibures or Tiburi (Tetboupay in gen., Ptol. ii. 6. § 37), a branch of the Astures in Hispanis Tarraconensis, whose principal town was Nemetobriga.
[T. H. D.]
TICHIS (Tech), a river of Gallia Narbonensis, placed by Mela (ii. 5) in the "Ora Sardonum" [Sardones]. The Tichis is the Tecum of Pliny (iii. 4). The Tet and the Tech, two small rivers, cross the territory of Roussillon from west to east. The Tichis is named Illiberis or Illeris by other writers. [Illiberis.]
[G. L.]
TICHIUM. [Tкichium.]
TICHIUSSA (Teixıoū $\sigma a$ ), is mentioned twice by Thucydides (viii. 26, 28) as a fortified place in Caria in the territory of Miletus. Stephanus B. speaks of it under the name of Teixióco $\alpha$, and Athenaeus knew it under the name of Teixious (viii. p. 351.) It seems to have been situated on the north coast of the bay of Iassus.

## TICHOS or TEICHOS. [Dyme.]

TICINUM (Tínvov: Eth Ticinensis: Pavia), a city of Gallia Transpadana, situated on the river Ticinus, from which it derived its name, about 5 miles above the junction of that stream with the Padus. According to Pliny it was founded by the two tribes of the Laevi and Marici, at the period of the first Gaulish immigrations into this part of Italy. (Plin. iii. 17. s. 21.) But it is remarkable that no mention is found of any town on the site during the operations of P. Scipio against Hannibal in b.c. 218, though he must have crossed the Ticinus in the immediate neighbourhood of the spot where the
