1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

With approval, students may select alternate electives.

3

EPBI 5500 requires prior approval.

**Minimum Grade to be Earned for All Required Courses: B-**

### Culminating Event:

#### Thesis:

The master's thesis documents the student's independent research and demonstrates mastery of their primary area of interest. Thesis research is conducted under the direct supervision of an academic advisor. The specific topic for research should be of current interest in the professional community. After a research topic is selected, the student performs preliminary background research. A thesis proposal is then submitted describing the plan for further steps toward completion of the proposed research. The student may continue the research only after the proposal is approved by the committee. Presentation of methods and study results is performed upon completion of the thesis.

## Epidemiology PhD

COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Philosophy in Epidemiology.

## About the Program

The dynamic and quantitatively oriented doctoral program in Epidemiology provides advanced training in epidemiological and biologic methods. The program develops strong academic researchers in the field of Epidemiology, with a clear understanding of the patterns, causes and effects of diseases in the population, who are well-prepared to design, implement, analyze and interpret research studies investigating key epidemiological questions with the ultimate goal of improving overall population health. Working closely with faculty in the Department of Epidemiology and Biostatistics, students gain expertise in collecting data, designing instruments and research protocols, directing and conducting sophisticated and multilevel statistical analyses, interpreting data, and communicating research findings to both lay and professional audiences. All students in the Epidemiology PhD program complete common core public health course requirements, which include foundational courses in Biostatistics, Epidemiology, grantsmanship and research design. Beyond these core courses, students master specialized courses in advanced epidemiological and biostatistical methods and engage in research and scholarly productivity with faculty members in the Department of Epidemiology and Biostatistics and throughout the College.

In addition to in-depth, didactic training in epidemiological and quantitative concepts and methods, the PhD in Epidemiology program aims to foster in students the development of a public health professional identity and values. Professional development exercises are infused in didactic courses and available in other program-sponsored activities (e.g., conference attendance, departmental colloquia and brown-bag presentations, journal clubs, and professional development workshops). Doctoral trainees in Epidemiology are encouraged to take advantage of these professional development opportunities offered at various public health centers and laboratories throughout the College of Public Health and Temple University. As the next generation of academic researchers, PhD in Epidemiology students work closely with faculty mentors throughout the program and particularly during the dissertation phase on formalizing grant-writing skills, teaching in higher education, and writing papers for publications.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is required.

**Interdisciplinary Study:** Students are encouraged to develop a program of research that is interdisciplinary in nature, involving coursework and research across departments, schools and colleges that is quantitative and methodological in focus. Research in affiliated units is encouraged.

**Affiliation(s):** A number of centers and laboratories exist within the Department of Epidemiology and Biostatistics, the College of Public Health, and Temple University that are designed to study, develop and evaluate interventions aimed at resolving significant public health problems (e.g., ethnic and racial disparities in cancer, inadequate disaster preparedness, maternal and child health, obesity, tobacco exposure, violence). These centers and labs offer opportunities for research placements for doctoral students to assist students in developing research and papers for publication and presentation at conferences; provide professional socialization; help students meet and work with faculty to define dissertation projects using existing funded research studies; and may provide some funding in the form of Research Assistantships.

Specific centers and labs include the Health Behavior Research Clinic, the Maternal and Child Health Wellness Laboratory, the Risk Communication Laboratory, and the Social and Behavioral Health Intervention Laboratory. Faculty and doctoral students also are involved in research with affiliates in the Department of Nursing, Fox Chase Cancer Center, Fox School of Business and Management, Institute on Aging, Institute on Disabilities, Lew Klein School of Media and Communication, Lewis Katz School of Medicine, and School of Podiatric Medicine. Additional research opportunities at Temple University include the Institute for Survey Research, Office of Institutional Research and Assessment, and Social Science Data Library.

**Accreditation:** The program is accredited by the Council on Education for Public Health (CEPH).

**Areas of Specialization:** Areas of specialization can be dictated through the area of concentration pursued by the student in their dissertation research.

**Job Prospects:** Graduates of the PhD in Epidemiology program are prepared to become empirical quantitative researchers in academic units, nonprofit organizations, government agencies or the private sector, including pharmaceutical companies or health systems. Graduates are well trained to identify the etiology of major public health issues; conduct and analyze survey, surveillance, longitudinal, case-control and experimental data using comprehensive and complex statistical techniques; and develop their own methodologically rigorous research studies.

**Non-Matriculated Student Policy:** Non-matriculated students may take PhD courses only with the permission of the instructor. Further, 8000-level courses are not open to non-matriculated students. Completion of coursework does not ensure admission into the program.

**Financing Opportunities:** Full-time PhD students generally receive financial support through a combination of fellowships and assistantships. Research Assistants (RAs) perform supervised research activities. Teaching Assistants (TAs) may be assigned to assist in the teaching of courses, including grading examinations and papers or teaching laboratory sections. Some TAs independently teach undergraduate courses. TAs and RAs provide 20 hours of service per week. Both assistantships carry a stipend and tuition remission for up to 9 credits per term. Applications for assistantships are available from the Department of Epidemiology and Biostatistics and must be submitted by January 10 for the following Fall term. The RA/TA application requires a statement of previous teaching and/or research experience, areas of interest, and future goals; unofficial copies of transcripts; and a curriculum vitae. The department makes offers of assistantships following admission to the program.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* January 5

All applicants to the PhD in Epidemiology program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liasoncas.com/>.

All application materials must be received by the deadline in order to be reviewed by the PhD Admissions Committee. Admission is competitive, and students are admitted only once a year. An important component of the admissions decision is the fit between the applicant's goals,

experiences, and interests and the expertise of the faculty in the PhD program. Therefore, it is highly recommended that applicants contact the Department of Epidemiology and Biostatistics at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-8726 to discuss their areas of interest and opportunities for mentored research before applying.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's academic abilities and talents, as well as comment on the applicant's aptitude for doctoral-level study and research. Recommendations from college/university faculty members are preferred.

**Coursework Required for Admission Consideration:** Applicants are expected to have completed coursework in epidemiology, data analysis, research methods and statistics. Courses in natural, social or behavioral sciences related to health are desirable.

**Master's Degree in Discipline/Related Discipline:** A master's degree is generally required, and preference is given to applicants who have a master's degree in epidemiology, statistics or the health sciences, including behavioral medicine, environmental health, medicine or a public health discipline.

Applicants without a master's degree must meet the following minimum qualifications to be considered:

- Hold a bachelor's degree in a field related to epidemiology, statistics, biology or the health sciences;
- Have earned a GPA >3.5 in math and statistics courses; and
- Present quantitative and verbal GRE scores greater than the 75th percentile and a written score of 4.0 or higher.

Students accepted without a master's degree are required to complete foundational courses in public health, epidemiology, and biostatistics prior to beginning doctoral coursework.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required, although it need not be in public health. Preference is given to applicants who have a background in epidemiology, statistics and the health sciences, including behavioral medicine, environmental health, medicine or a public health discipline.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** In no more than 750 words:

- describe important academic and research achievements and interests, and
- specify how your research interests relate to your ultimate career goals in the field of Epidemiology and to ongoing work by faculty members affiliated with the PhD in Epidemiology program.

The match between faculty and student interests is important in the admissions decision. Be sure to articulate clearly the linkages among your training goals, the expertise of our faculty, and the training emphasis

of the PhD program. For a description of faculty interests, visit the Epidemiology and Biostatistics Faculty webpage.

**Standardized Test Scores:**

GRE: Required. Scores above the 75th percentile on both the verbal and quantitative sections of the test are desired. Official GRE scores should be sent to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume required.

**Writing Sample:** Scholarly articles, technical reports or academic professional papers of which the applicant is the first author are preferred. Unless it is a published work, the writing sample should be no more than 10 pages.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Advanced Standing:** A student enrolled in the PhD in Epidemiology program may apply for advanced standing credits for graduate coursework graded "B" or better from an accredited institution. Credits for courses taken as part of a master's degree are considered. Credits for thesis work, fieldwork, clinical practice or directed projects/readings cannot be used for advanced standing credit. To be approved for advanced standing, the courses must be deemed appropriate as part of the student's training in the PhD program. For the maximum number of advanced standing credits awarded, consult the program's Senior Graduate Advisor.

## Program Requirements

**General Program Requirements:**

EPBI 9998	Dissertation Proposal Research	2
EPBI 9999	Dissertation Research	3
<b>Total Credit Hours</b>		<b>45</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Students may select from these courses to fulfill general electives requirements if they are not taken as an epidemiology or biostatistics methods course. Other courses may be used to fulfill the methods course requirements with approval.

3

Students select electives with advisement from a faculty mentor or the program director. With approval, other electives from outside of the department can be taken. There are elective options not listed that can be chosen based on advisement and availability.

4

The Graduate School requires that students complete a minimum of 6 credits that include EPBI 9994, EPBI 9998, and EPBI 9999. Of the 6 credits, at least 2 credits must be earned in EPBI 9999.

#### Minimum Grade to be Earned for All Required Courses: B-

#### Culminating Events:

##### *Area Paper:*

Prior to sitting for the preliminary examinations, students must write a published or publishable paper in their chosen area. The purpose of the paper requirement is to demonstrate critical and interpretive knowledge in epidemiology, as well as a high proficiency in written communication and a capacity to contribute to generalizable knowledge in the field. The paper can be written in one of a variety of formats, including a systematic review, an empirical paper, or a theoretical piece relevant to the field.

The student must be the lead or sole author. The paper can be a peer-reviewed published or in-press article. Papers that are of publishable quality but have not yet been submitted or are under review for publication are also acceptable. A committee of departmental faculty members, exclusive of the student's advisor, determines if the published paper meets the writing requirement. The committee evaluates the paper and votes on whether the student has passed or failed. Students who fail the paper requirement are allowed to submit a revision by the end of the next term.

A student cannot advance to the preliminary examinations without passing the paper requirement. Failure to satisfactorily complete the area paper requirement within one term after initial submission can result in dismissal from the PhD program. Students who are entering the PhD program and have already published a peer-reviewed paper related to epidemiology can request to waive this requirement by completing a waiver application and submitting it along with the published document to the Graduate Program Director.

##### *Preliminary Examinations:*

In the term prior to taking the preliminary examinations, students should review their progress with their faculty advisor. When eligibility has been confirmed, students contact the Assistant Director of Administration and request to be registered for EPBI 9994 Preliminary Examinations in the subsequent academic term with the faculty advisor or Director of Graduate Studies.

In order to advance to doctoral candidacy, the student must pass both a written preliminary examination on methods, biostatistics, and substantive

coursework and a take-home exam, as well as an oral dissertation proposal. The written preliminary examination is given to students prior to initiating the third academic year in the program. It is largely based on material covered in required coursework and its application to theoretical and practical problems. Students meet with the Graduate Program Director in January of their second year to discuss the exam. It is suggested that students form a study group and study at least one day per week during the term prior to the examinations.

The preliminary exam is offered in the Summer term and covers the core components of students' training in epidemiology and biostatistics, as well as the specific area of concentration. The examinations consist of the following components:

- **Morning Session on Methods and Biostatistics:** Epidemiological methods and all materials in core epidemiological courses are covered. Biostatistical methods are also included, covering materials in required biostatistics courses.
- **Afternoon Session on the Substantive Area:** The student's faculty advisor writes the substantive area section of the exam, which is approved by the Director of Graduate Studies. This section covers advanced/specialty topics and related methods aligned with the student's area of interest.
- **Take-Home Exam:** Each student is provided questions and a data set from which the student needs to analyze data to provide answers to the questions provided. As such, the take-home exam represents an applied portion of the preliminary examination. The objectives of the take-home exam are to test a student's knowledge and logic in thinking through a problem and to ensure that the student is prepared to move on to the next phase in the program. The take-home exam is due approximately one week after completion of the methods, biostatistics, and substantive on-site exam.

Occasionally, a student chooses to take a course after or concurrent with the preliminary examinations. The student's faculty advisor and the Graduate Program Director must approve such an exception in advance in writing.

The Graduate Program Director coordinates the grading of the preliminary examinations. A committee of departmental faculty members review and score the examinations.

Students who fail these exams may have one opportunity to take the examinations again. A second failure results in automatic dismissal from the PhD program.

*Dissertation Proposal:*

After passing the preliminary examinations, students may enroll in EPBI 9998 Dissertation Proposal Research. When eligibility has been confirmed, students contact the Assistant Director of Administration and request to be registered for the course.

All students must form a Doctoral Advisory Committee (DAC) with the approval of the Graduate Program Director. The DAC is composed of at least three Graduate Faculty members: two members, including the Chair, must be from the PhD program faculty of the Department of Epidemiology and Biostatistics. The DAC Chair must be approved as Doctoral Graduate Faculty by the Dean of the College of Public Health and by the Graduate School. The chair is responsible for overseeing and guiding the student's progress; coordinating the responses of the committee members; and informing the student and the Graduate Program Director annually of the student's academic progress. The student should plan for an additional external reader at the time of the

final dissertation defense (see DEC below). The external reader is not present at the defense of the proposal.

To fulfill the requirements of EPBI 9998, students must submit a dissertation proposal, successfully defend it orally before their committee, apply for Institutional Review Board (IRB) approval for the proposed research, and submit the proposal to the Graduate School. Students have a maximum of one year from the time of completing their preliminary examinations to develop and defend their dissertation proposal. Thus, students may enroll in EPBI 9998 for only two terms without permission. Students needing more time may, with the support of their faculty advisor, formally petition the Graduate Program Director for an extension, although an extension is not guaranteed. Failure to meet these requirements can result in dismissal from the program.

*Dissertation:*

When eligibility has been confirmed, students contact the Assistant Director of Administration and request to be registered for EPBI 9999 Dissertation Research.

The doctoral dissertation is an original theory-based research study that makes a significant contribution to the fields of public health and epidemiology. It should expand existing knowledge and demonstrate the student's mastery of research design methods and advanced statistical techniques, particularly within the field of epidemiology. The research should be rigorous, while upholding the ethics and standards of the field. It is expected that the study will result in publication and presentation to professional audiences.

To fulfill the dissertation requirement, students must prepare and orally defend the final dissertation in a public meeting. Students present their plans for publishing their dissertation as part of their defense. Students must be enrolled continuously in EPBI 9999 until their dissertation is successfully defended. The Graduate School requires a minimum of 2 credits for the dissertation experience. Students must be enrolled in the term that they graduate.

The Dissertation Examining Committee (DEC) consists of the DAC plus at least one additional external reviewer. The external reviewer must be doctorally prepared. If this person is not a member of the Temple University Graduate Faculty, they must be approved by the Director of Graduate Studies, the Dean of the College, and the Graduate School to take part in the final dissertation examination. The DEC evaluates the student's written dissertation and oral defense, including the student's ability to articulate orally the research question; methodological approach; primary findings; interpretation of the findings; and implications for theory, research and practice. The DEC votes to pass or fail the dissertation and the defense at the conclusion of the public presentation.

If a student needs to change a member of a committee, the new member must be approved by the Graduate Program Director and registered with the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their DEC and work with the department coordinator for the Department of Epidemiology and Biostatistics to secure a room. This should be done at least one month in advance of the proposed date. The department coordinator arranges the time, date and room within two working days. After the time, date and room are secured, the student must send to the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms." This must be submitted at least 10 working

days before the defense. The department posts flyers announcing the defense, and the Graduate School lists the defense on its website.

## Health Informatics MS

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Science in Health Informatics.

### About the Program

Health Informatics is the intersection of healthcare, information science and computer science. The MS in Health Informatics (MSHI) is an innovative, interdisciplinary, applied graduate degree program that addresses the intersection of healthcare and information technology to develop efficient systems, processes and uses of health data across the continuum of healthcare delivery to improve patient care and advance individual and population health outcomes. The MSHI is focused on the resources, devices and methods to optimize healthcare delivery. The program helps students develop the competencies and acquire the practical tools to succeed in today's digital healthcare environment. Current students include physicians, nurses, therapists, data analysts, and information technology and allied health professionals. The degree is also well suited for individuals with no prior healthcare or information technology experience.

The MSHI is available in both in-person and online formats that are designed for professionals and individuals located both within and outside the metropolitan Philadelphia region or who travel extensively for professional reasons. Course formats include in-person and hybrid courses for the in-person format, and a mix of asynchronous and synchronous courses with online synchronous sessions meeting via online conferencing and face-to-face tools for the online format. The program is offered across traditional semesters as well as two seven-week terms (six weeks in two summer sessions). For seven-week terms, students enroll in one course per six- or seven-week term and complete two courses in the length of a traditional semester.

For those interested in studying health informatics who cannot commit to pursuing a master's degree, a graduate certificate in Health Informatics (p. 872) that runs for a shorter course of seven-week terms is also offered by the College of Public Health. Coursework completed for the certificate may later be applied to the MSHI.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main and Online

**Full-Time/Part-Time Status:** The degree can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The degree program is interdisciplinary in nature with a focus on inquiry, insight and innovation. The program builds an awareness of both clinical and technical challenges in the field.

**Accreditation:** The curriculum meets the curricular requirements of the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM®), which is the accrediting body of the American Health Information Management Association (AHIMA®).

**Areas of Specialization:** For the MSHI program, students choose between two tracks:

1. The Project Track requires completion of HIM 5114 and HIM 9995.
2. The Thesis Track requires completion of HIM 8016 and HIM 9996.

**Job Prospects:** Graduates of the program obtain positions in a variety of healthcare institutions or vendor settings in a wide range of positions such as electronic health record system implementation specialist, health data analyst and project manager. A number of external organizations, including AHIMA®, the American Medical Informatics Association (AMIA®), and the Healthcare Information and Management Systems Society (HIMSS), conduct annual surveys of job prospects.

**Non-Matriculated Student Policy:** Non-matriculated students may take a maximum of 9 graduate-level credits. Upon completion of the credits, a student's academic performance is reviewed.

**Transfer Credit:** Graduate-level credits earned at another accredited institution may be evaluated during the application process. The maximum number of graduate credits a student may transfer is 6.

**Financing Opportunities:** Students in the MSHI program are generally working professionals. Therefore, funding for assistantships and academic internships is limited.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* March 1

Spring: November 1

The application process requires submission through the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liasoncas.com/>.

**Letters of Reference:**

Number Required: 3

*From Whom:* Recommendations should be obtained from faculty and/or professionals familiar with the applicant's academic competence and/or professional work experience.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** Demonstrate your professional writing ability as you describe your interest in obtaining the MSHI degree. Your statement should address the impact of informatics on health and healthcare as well as the effect a graduate degree can have on one's career.

**Standardized Test Scores:**

GRE: Optional, although applicants who believe GRE scores would complement their application are encouraged to submit scores. If submitted, quantitative and verbal scores are expected to be in the 50th percentile or above. Official GRE scores should be sent to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

HIM 8016	Principles and Practices of Health Informatics Research <sup>3</sup>	
HIM 9996	Health Informatics Thesis	
<b>Total Credit Hours</b>		<b>36</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Five electives are taken from the list of Advanced Electives. With approval from the Program Director, other graduate courses, with the exception of HIM 5114 and HIM 8016, may be substituted as an advanced elective.

3

HIM 5114 and HIM 8016 can only count once. These courses may not be substituted as an advanced elective.

## Full-Time On-Campus or Online MSHI

## Health Informatics PhD

COLLEGE OF PUBLIC HEALTH

[Learn more about the Doctor of Philosophy in Health Informatics.](#)

### About the Program

The Health Informatics PhD program prepares graduates for leadership roles in academic health systems, as well as in the pharmaceutical, payer and public health fields. Given the the College of Public Health's diverse resources, this program incorporates interprofessional education, team science, global health, research, education, translational science and public health components into the curriculum and learner experience. Graduates are prepared for such roles as data scientist, informatics analyst, informatics director and academic faculty. Through in-person and hybrid courses, learners have access to faculty mentors; hands-on laboratory and technology infrastructure; and immersion in translational, interprofessional real-world projects.

The PhD program in Health Informatics follows the foundational domains for knowledge, skills and abilities of the American Medical Informatics Association (AMIA), while also allowing learners to collaborate with other disciplines across both the college and university to supplement their skills outside of health informatics. Core foundational concepts include informatics, tools for manipulating health data, research methods, project management, and implementation science and translation. This program includes course topics that cover electronic health records, health data exchange, standards and terminology, clinical decision support, clinical data mining, and natural language processing.

For those interested in studying health informatics who cannot commit to pursuing a doctoral degree, an MS in Health Informatics and a graduate certificate in Health Informatics (p. 872) that runs for a shorter course of seven-week terms are offered by the College of Public Health. Coursework completed for the certificate may be applied to the master's or doctoral degree.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is required unless permission is received from the PhD Program Director.

**Interdisciplinary Study:** Students are encouraged to develop programs of study that are interdisciplinary in nature, involving coursework across departments, schools and colleges. Research in affiliated units is encouraged and facilitated by the Program Director.

**Affiliation(s):** A number of centers and programs exist within the College of Public Health, Temple University, and the Temple University Health System that are designed to study, develop and evaluate interventions

aimed at resolving significant public health problems (e.g., addiction, chronic disease care, ethnic and racial disparities in cancer, obesity, tobacco exposure, violence). These offer opportunities for research placements for doctoral students; assist students in developing papers for publication and presentation at conferences; provide professional socialization; help students define dissertation projects using existing funded studies; and may provide some funding in the form of Research Assistantships.

Faculty and doctoral students also are involved in research with affiliates in the Fox Chase Cancer Center, Fox School of Business and Management, Institute on Aging, Institute on Disabilities, Lew Klein College of Media and Communication, Lewis Katz School of Medicine, Public Health Law Research Program in the Beasley School of Law, School of Podiatric Medicine, and Temple University Health System.

**Accreditation:** The Health Informatics PhD program is fully accredited by the Council on Education for Public Health (CEPH).

**Job Prospects:** Graduates of the PhD program are prepared to become faculty members or researchers in colleges and universities or to hold positions related to health informatics in a wide range of organizations, including health foundations, health systems, pharmaceutical companies, and public health departments.

**Financing Opportunities:** Full-time PhD students generally receive financial support through fellowships or assistantships. Information on university-wide support opportunities can be found at <https://grad.temple.edu/admissions/costs-financial-aid-more/university-financial-support>.

Graduate assistantships are sponsored by the College of Public Health:

- Research Assistants (RAs) perform supervised research activities. Research assistantships are frequently supported by faculty grant funding, and it is anticipated the RAs will work with faculty members on new and continuing grant proposals and develop both research and grant-writing competencies.
- Teaching Assistants (TAs) may be assigned to assist in the teaching of courses, with activities that include grading examinations/papers or teaching laboratory sections. Some TAs independently teach undergraduate courses. The purpose, however, is to develop competencies in current pedagogies that prepare students for academic teaching careers.

RAs and TAs provide 20 hours of service per week. Both assistantships carry a stipend and tuition remission up to 9 credits per academic term within the prescribed course of study for the degree. Consideration for admission with an assistantship requires a description of research and teaching experience; statement of research and teaching goals; and identification of areas of interest, including identification of potential faculty mentors and articulation of career goals consistent with the mission and purpose of the Health Informatics PhD program.

Offers of admission are generally accompanied by a fellowship or assistantship offer. Students with full funding from another source (e.g., government funding or employer tuition remission) are given full consideration in the admission process. Self-funding is highly discouraged.

## Admission Requirements and Deadlines

**Application Deadline:**

Fall: January 3

All applicants to the Health Informatics PhD program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

All application materials must be received by the deadline in order to be reviewed by the PhD Admissions Committee. Admission is competitive, and students are admitted only once a year for fall matriculation. Applications are evaluated together after the deadline has passed. Applications that are completed after the deadline are held for review the following year. An important component of the admissions decision is the fit between the applicant's goals, experiences, and interests and the expertise of the faculty in the PhD program.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

#### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's academic abilities and talents, as well as comment on the applicant's aptitude for doctoral-level study and research. Recommendations from college/university faculty members are preferred.

**Coursework Required for Admission Consideration:** Applicants are expected to have completed coursework in health informatics. The following prerequisites, which do not count toward the PhD, must be satisfied, either through an MS degree or course equivalency:

Code	Title	Credit Hours
HIM 5101	Fundamentals of Health Informatics	3
HIM 5102	Applications of Computer Programming in Health Informatics	3
HIM 5129 or EPBI 5002	Health Data Analysis Biostatistics	3

Alternately, students may test out of the prerequisites or demonstrate completion of other equivalent graduate coursework. For more information, contact the PhD Program Director.

**Master's Degree in Discipline/Related Discipline:** Nearly all students admitted to the program have a master's degree. Although a master's degree specifically in Health Informatics is not required, preference is given to applicants who have a background in the health informatics discipline.

Students accepted without a master's degree are required to complete foundational courses in health informatics prior to beginning doctoral coursework.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required, although it need not be in Health Informatics. Preference is given to applicants who have a background in health informatics.

**Statement of Goals:** In no more than 750 words:

- identify Health Informatics as the program for which you wish to be considered and why;
- describe important academic and research achievements and interests; and
- specify how your research interests relate to your ultimate career goals and to ongoing work by faculty members affiliated with the Health Informatics PhD program.

The match between faculty and student interests is important in the admissions decision. Be sure to articulate clearly the linkages among your training goals, the expertise of our faculty, and the training emphasis of the PhD program. For a description of faculty interests, visit the Health Services Administration and Policy Faculty webpage.

#### Standardized Test Scores:

GRE: Required. The median score of recently admitted applicants is 156 verbal and 149 quantitative. Official GRE scores should be sent to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current CV required.

**Writing Sample:** Scholarly articles, technical reports or academic professional papers are desirable. Unless it is a published work, the writing sample should be no more than 10 pages.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Advanced Standing:** A student enrolled in the Health Informatics PhD program may apply for advanced standing credits for graduate coursework graded "B" or better from an accredited institution. Credits for courses taken as part of a master's degree are considered. Credits for thesis, fieldwork, clinical practice or directed projects/readings cannot be used for advanced standing credit. To be approved for advanced standing, the courses must be deemed appropriate as part of the student's training in the Health Informatics PhD program. The maximum number of advanced standing credits awarded is 9.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 45

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
HIM 5212	Application Development in Public Health	3
HIM 5299	Introduction to Language Processing and Text Mining for Health Professionals	3
HIM 8112	Advanced Clinical Decision Support Systems	3
HIM 8129	Advanced Health Data Analytics	3
HIM 8216	Applications of Machine Learning for Health Informatics	3
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>1</sup>	0
<b>Research Methods Courses</b>

SBS 8001	Research Methods in Public Health	
<b>Research Courses<sup>3</sup></b>		<b>6</b>
HIM 9994		
HIM 9998	Dissertation Proposal Research for Health Informatics	
HIM 9999 <sup>4</sup>		
<b>Total Credit Hours</b>		<b>45</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Students select electives in consultation with the faculty advisor or PhD Program Director. With approval, electives from outside of the department can be taken.

3

The Graduate School requires that students complete a minimum of 6 credits that include HIM 9994, HIM 9998, and HIM 9999. Of the 6 credits, at least 2 credits must be earned in HIM 9999.

4

Students enroll in HIM 9999 after their proposal is approved, taking at least 1 credit each term until the dissertation is defended and filed with the Graduate School. A minimum of 2 credits of HIM 9999 must be earned.

## Proposed Plan of Study Outlined by Year and Term

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

In consultation with the faculty advisor or PhD Program Director, students select five approved electives within Health Informatics, Health Policy and/or Research Methods, as identified above. With approval, electives from outside of the department can be taken.

3

The Graduate School requires that students complete a minimum of 6 credits that include HIM 9994, HIM 9998, and HIM 9999. Of the 6 credits, at least 2 credits must be earned in HIM 9999.

4

Students enroll in HIM 9999 after their proposal is approved, taking at least 1 credit each term until the dissertation is defended and filed with the Graduate School. A minimum of 2 credits of HIM 9999 must be earned.

#### **Minimum Grade to be Earned for All Required Courses: B-**

#### **Culminating Events:**

##### *Area Paper:*

Prior to sitting for the preliminary examinations, students must have successfully published or written a publishable paper in their chosen area of research interest. The purpose of the paper requirement is to demonstrate critical and interpretive knowledge in health informatics, as well as a high proficiency in written communication and a capacity to contribute to generalizable knowledge in the field. The student must be the lead or sole author.

The paper can be written in any of a variety of formats, including a systematic review, an empirical paper, or a theoretical piece relevant to the field. The paper can be a peer-reviewed published or in-press article. Papers that are of publishable quality but have not yet been submitted or are under review for publication are also acceptable. A committee of departmental faculty members, exclusive of the student's advisor, determines if the published paper meets the writing requirement. The committee evaluates the paper and votes on whether the student has passed or failed. Students who fail the paper requirement are allowed to submit a revision by the end of the next term.

A student cannot advance to the preliminary examinations without passing the paper requirement. Failure to satisfactorily complete the area paper requirement within one term after initial submission can result in dismissal from the PhD program. Students entering the PhD program who have already published a peer-reviewed paper can request to waive this requirement by completing a waiver application and submitting it along with the published document to the PhD Program Director.

##### *Preliminary Examinations:*

After completing the paper requirement, students are required to take the preliminary examinations. Students meet with the PhD Program Director in January of their second year to discuss the exams. It is suggested that students form a study group that meets at least one day per week during the term prior to the examinations. The exams are offered in the Summer term and cover the core components of students' training in health informatics.

The preliminary examinations should be taken prior to initiating the third academic year in the program and within one term of completing all coursework. Students are required to meet with their faculty advisor to establish eligibility before the beginning of the term in which they plan to take the examinations. When eligibility has been confirmed, students request to be registered for HIM 9994 in the subsequent academic term with the faculty advisor or PhD Program Director.

In order to advance to doctoral candidacy, the student must pass a written preliminary examination based on the required coursework in the Health Informatics PhD program and its application to theoretical and practical problems. The examination is set by a group of faculty members who are familiar with the content of the core courses and critical review of Health Informatics research. The student has five days to complete the review after receiving the research topics. An oral exam, based on the student's response to the written exam and any material from the core courses, occurs after the student successfully passes the written exam and critical review.

The PhD Program Director coordinates the grading of the preliminary examinations. A committee of departmental faculty members review and score the examinations. Students who fail these exams may have one opportunity to take the examinations again. A second failure results in automatic dismissal from the PhD program.

##### *Dissertation Proposal:*

After passing the preliminary examinations, students may enroll in HIM 9998. Students must be enrolled for 1 credit of HIM 9998 each term until they file their dissertation proposal with the Graduate School.

All students must form a Doctoral Advisory Committee (DAC) with the approval of the Director of Graduate Studies. The DAC is composed of at least three Graduate Faculty members: two members, including the chair, must be from the PhD program faculty of the Department of Health Services Administration and Policy. The DAC Chair must be approved as doctoral graduate faculty by the Dean of the College of Public Health and by the Graduate School. The Chair is responsible for overseeing and guiding the student's progress; coordinating the responses of the Committee members; and informing the student and the Director of Graduate Studies annually of the student's academic progress.

To fulfill the requirements of HIM 9998, students must submit a dissertation proposal, successfully defend it orally before their Committee, apply for Institutional Review Board (IRB) approval for the proposed research, and submit the proposal to the Graduate School. Students may enroll in HIM 9998 for only two terms without permission. Students needing more time may, with the support of

their advisor, formally petition the Director of Graduate Studies for an extension, although an extension is not guaranteed. Failure to meet these requirements can result in dismissal from the program.

Once the proposal is defended, the student is elevated to candidacy and eligible to register for dissertation credits.

#### *Dissertation:*

The doctoral dissertation is an original theory-based research study that makes a significant contribution to the field of Health Informatics. It should expand existing knowledge and demonstrate the student's mastery of theory and research methods, particularly within a concentration or specialty area. The research should be rigorous, while upholding the ethics and standards of the field. Students are expected to submit their dissertation study for publication and presentation to professional audiences.

To fulfill the dissertation requirement, students must prepare and orally defend the final dissertation in a public meeting. Students must be enrolled continuously in HIM 9999 until their dissertation is successfully defended. The Graduate School requires a minimum of 2 credits of HIM 9999. Students must be enrolled in the term that they graduate.

The Dissertation Examining Committee (DEC) consists of the DAC plus at least one additional external reviewer. The external reviewer must be doctorally prepared. If this person is not a member of the Temple University Graduate Faculty, they must be approved by the Director of Graduate Studies, the Dean of the College, and the Graduate School to take part in the final dissertation examination. The DEC evaluates the student's written dissertation and oral defense, including the student's ability to articulate orally the research question; methodological approach; primary findings; interpretation of the findings; and implications for theory, research and practice. The DEC votes to pass or fail the dissertation and the defense at the conclusion of the public presentation.

If a student needs to change a member of a committee, the new member must be approved by the Director of Graduate Studies and registered with the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their DEC and work with their department's administrative assistant to secure a room. This should be done at least one month in advance of the proposed date. The administrative assistant arranges the time, date and room within two working days. After the time, date and room are secured, the student must send to the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms." This must be submitted at least 10 working days before the defense. The department posts flyers announcing the defense, and the Graduate School lists the defense on its website.

# Health Policy and Health Services Research PhD

## COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Philosophy in Health Policy and Health Services Research.

## About the Program

The PhD program in Health Policy and Health Services Research is administered by the Department of Health Services Administration and Policy. This program is unique in that it provides students with an opportunity to develop mixed methods research to investigate the development of health policy and its impact on population health, access to care and health services utilization, and reduction in health disparities. The program trains students in the use of qualitative and quantitative research methods using primary data collection and secondary data sets to research the development, implementation and impact of health policy and health services initiatives.

The PhD program in Health Policy and Health Services Research emphasizes health services, economics and outcomes research as well as healthcare administration and leadership in investigating health disparities, public health interventions, and clinical outcomes as the basis to inform health policy. The program trains students to develop, evaluate and implement health policy at multiple levels (i.e., local, state, national, global) and in both private and public institutional settings. The PhD program:

- provides training and experiences that support interdisciplinary learning;
- promotes critical and theory-based problem-solving skills to address public health problems; and
- fosters the development of public health professional values and ethics.

All students in the Health Policy and Health Services Research PhD program complete common core course requirements that include foundational courses in comparative health policy, economics, legal

issues and theories of health policymaking, and are introduced to critical public health research methods and statistical techniques. Beyond these core courses, students take specialized courses in their chosen subdiscipline and engage in research and scholarly productivity with faculty members. Students in the program work closely with faculty members to explore key public health issues such as improving the quality and outcomes of healthcare services; examining healthcare costs; addressing health disparities; and developing policy initiatives targeting areas of population health, including aging, chronic disease, mental health, risk behaviors, substance use and violence/injury prevention.

In addition to in-depth didactic training in cross-disciplinary concepts and methods, the PhD program aims to foster the development of public health professional identities and values in its students. Professional development exercises include conference attendance, departmental colloquia and brown-bag presentations, journal clubs, and professional development workshops. Doctoral trainees are also encouraged to take advantage of professional development opportunities offered by the College of Public Health and Temple University broadly, including Dean's seminars, special workshops and seminars on grant writing, methods and teaching. Finally, students learn by working closely with faculty on research and writing papers for publications.

The student experience at Temple University is unique in that opportunities are available to improve community health and reduce public health disparities in one of the largest urban settings in the United States. Many doctoral students collaborate with community-based and healthcare-delivery organizations in Philadelphia while they conduct research projects for their dissertations. The in-person format of the Health Policy and Health Services Research PhD program allows students to work closely with faculty and peers to collaborate on research studies, meet potential mentors and collaborators, develop collegial bonds, and prepare for a future health policy career.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is required unless permission is received from the PhD Program Director.

### Application Deadline:

*Fall:* January 3

All applicants to the Health Policy and Health Services Research PhD program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

All application materials must be received by the deadline in order to be reviewed by the PhD Admissions Committee. Admission is competitive, and students are admitted only once a year for fall matriculation. Applications are evaluated together after the deadline has passed. Applications that are completed after the deadline are held for review the

following year. An important component of the admissions decision is the fit between the applicant's goals, experiences, and interests and the expertise of the faculty in the PhD program.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

#### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's academic abilities and talents, as well as comment on the applicant's aptitude for doctoral-level study and research. Recommendations from college/university faculty members are preferred.

**Coursework Required for Admission Consideration:** Applicants are expected to have completed coursework in the behavioral, natural or social sciences related to health. A course each in statistics and in research methods are also highly preferred. The following prerequisites, which do not count toward the PhD, must also be satisfied, either through an MPH degree or course equivalency:

Code	Title	Credit Hours
EPBI 5002	Biostatistics	3
EPBI 5101	Fundamentals of Epidemiology	3
HPM 5006	Political and Economic Aspects of Health	3
SBS 5102	Theoretical Foundations of Health Behavior	3

**Master's Degree in Discipline/Related Discipline:** Nearly all students admitted to the program have a master's degree. Although a master's degree specifically in Public Health is not required, preference is given to applicants who have a background in the health sciences, including behavioral medicine, environmental health, epidemiology, health communication, health psychology, medicine or a public health discipline.

Students accepted without a master's degree are required to complete foundational courses in public health, epidemiology, and biostatistics prior to beginning doctoral coursework.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required, although it need not be in Public Health. Preference is given to applicants who have a background in the health sciences, including behavioral medicine, environmental health, epidemiology, health communication, health psychology, medicine or a public health discipline.

**Statement of Goals:** In no more than 750 words:

- identify Health Policy and Health Services Research (HP) as the program for which you wish to be considered and why;
- describe important academic and research achievements and interests; and
- specify how your research interests relate to your ultimate career goals and to ongoing work by faculty members affiliated with the Health Policy and Health Services Research PhD program.

The match between faculty and student interests is important in the admissions decision. Be sure to articulate clearly the linkages among your training goals, the expertise of our faculty, and the training emphasis

of the PhD program. For a description of faculty interests, visit the Health Services Administration and Policy Faculty webpage.

#### Standardized Test Scores:

GRE: Required. The median score of recently admitted applicants is 156 verbal and 149 quantitative. Official GRE scores should be sent to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current CV required.

**Writing Sample:** Scholarly articles, technical reports or academic professional papers are desirable. Unless it is a published work, the writing sample should be no more than 10 pages.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Advanced Standing:** A student enrolled in the Health Policy and Health Services Research PhD program may apply for advanced standing credits for graduate coursework graded "B" or better from an accredited institution. Credits for courses taken as part of a master's degree are considered. Credits for thesis, fieldwork, clinical practice or directed projects/readings cannot be used for advanced standing credit. To be approved for advanced standing, the courses must be deemed appropriate as part of the student's training in the Health Policy and Health Services Research PhD program. The maximum number of advanced standing credits awarded is 9.

## Program Requirements

#### General Program Requirements:

*Number of Credits Required to Earn the Degree:* 45

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
HPM 8005	Theor Hlth Policy Making	3
HPM 8008	Health Economics	3
HPM 8014	Comparative Health Policy	3
HPM 8015	Public Health Policy and Legal Issues	3
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>1</sup>	0
<b>Research Methods Courses</b>		
EPBI 8012	Multivariable Biostatistics	3
EPBI 8212	Grantsmanship in Health Research	3

<b>Electives<sup>2</sup></b>		<b>18</b>
Select electives in Health Policy Theory:		
HPM 5016	Public Health Advocacy	
HPM 5500	Seminar in Current Issues in Public Health	
POLS 8103	Legislative Behavior	
Select electives in Research Methods:		
EPBI 8201	Structural Equation Modeling	
EPBI 8204	Multilev Mod in Int Res	
EPBI 8208	Data Management and Analysis	
POLS 8002	Qualitative Research Methods	
POLS 8112	Research in State Politics	
SBS 8001	Research Methods in Public Health	
Econometric Methods for Health Services Research course		
<b>Research Courses<sup>3</sup></b>		<b>6</b>
HPM 9994	Preliminary Examinations	
HPM 9998	Dissertation Proposal Research	
HPM 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>45</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

With approval from the faculty advisor, students may select alternate electives.

3

The Graduate School requires that students complete a minimum of 6 credits that include HPM 9994, HPM 9998, and HPM 9999. Of the 6 credits, at least 2 credits must be earned in HPM 9999.

#### Minimum Grade to be Earned for All Required Courses: B-

#### Culminating Events:

##### Area Paper:

Prior to sitting for the preliminary examinations, students must have successfully published or written a publishable paper in their chosen area of research interest. The purpose of the paper requirement is to demonstrate critical and interpretive knowledge in specialized areas of one's chosen program, as well as a high proficiency in written communication and a capacity to contribute to generalizable knowledge in the field. The student must be the lead or sole author. For students

who enter the program without already having published a first-authored, peer-reviewed article, they typically initiate efforts toward this requirement during their first term of residency.

A student cannot advance to the preliminary examinations without passing the paper requirement. Failure to satisfactorily complete the area paper requirement within the specified time frame can result in dismissal from the PhD program. Students entering the PhD program who have already published a peer-reviewed paper related to their programmatic discipline can submit the published document to the Director of Graduate Studies for approval.

##### Preliminary Examinations:

Students typically take their preliminary examinations during their third year of residency in the program, after completing the paper requirement. All students are required to take the preliminary examinations prior to completing and defending their dissertation research proposal. The exams should be taken within one term of completing all coursework. Students are required to meet with their mentor and Director of Graduate Studies before the beginning of the term in which they plan to take the examinations to establish eligibility.

The preliminary examinations are designed to test fundamental core competencies of the students' training. The student must register for 1 credit of HPM 9994 in the term in which the examinations are taken. To register for HPM 9994, the student must have completed all coursework or be enrolled in final courses in the term in which the examinations are taken. Note that all Incomplete and/or "NR" grades must have been removed, and the area paper requirement must have been satisfied. Special authorization is required to register.

The preliminary examinations consist of the following components:

- A comprehensive one-week take-home written examination, with an emphasis on the student's concentration, about the scientific foundations as well as social and behavioral sciences underpinnings of public health;
- A methods exam, which is a four-hour in-class examination on research methods and statistics; and
- A two-hour oral examination to give a 30-minute scientific presentation and answer any questions from the Examination Committee. The Committee may also ask the student any questions related to the two written exams.

Students who fail these exams may have one opportunity to take the examinations again. A second failure results in automatic dismissal from the PhD program.

##### Dissertation Proposal:

After passing the preliminary examinations, students may enroll in HPM 9998. Students must be enrolled for 1 credit of HPM 9998 each term until they file their dissertation proposal with the Graduate School.

All students must form a Doctoral Advisory Committee (DAC) with the approval of the Director of Graduate Studies. The DAC is composed of at least three Graduate Faculty members: two members, including the chair, must be from the PhD program faculty of the Department of Health Services Administration and Policy. The DAC Chair must be approved as Doctoral Graduate Faculty by the Dean of the College of Public Health and by the Graduate School. The Chair is responsible for overseeing and guiding the student's progress; coordinating the responses of the Committee members; and informing the student and the Director of Graduate Studies annually of the student's academic progress.

To fulfill the requirements of HPM 9998, students must submit a dissertation proposal, successfully defend it orally before their Committee, apply for Institutional Review Board (IRB) approval for the proposed research, and submit the proposal to the Graduate School. Students may enroll in HPM 9998 for only two terms without permission. Students needing more time may, with the support of their advisor, formally petition the Director of Graduate Studies for an extension, although an extension is not guaranteed. Failure to meet these requirements can result in dismissal from the program.

Once the proposal is defended, the student is elevated to candidacy and eligible to register for dissertation credits.

#### *Dissertation:*

The doctoral dissertation is an original theory-based research study that makes a significant contribution to the field of Health Policy and Health Services Research. It should expand existing knowledge and demonstrate the student's mastery of theory and research methods, particularly within a concentration or specialty area. The research should be rigorous, while upholding the ethics and standards of the field. Students are expected to submit their dissertation study for publication and presentation to professional audiences.

To fulfill the dissertation requirement, students must prepare and orally defend the final dissertation in a public meeting. Students must be enrolled continuously in HPM 9999 until their dissertation is successfully defended. The Graduate School requires a minimum of 2 credits of HPM 9999. Students must be enrolled in the term that they graduate.

The Dissertation Examining Committee (DEC) consists of the DAC plus at least one additional external reviewer. The external reviewer must be doctorally prepared. If this person is not a member of the Temple University Graduate Faculty, they must be approved by the Director of Graduate Studies, the Dean of the College, and the Graduate School to take part in the final dissertation examination. The DEC evaluates the student's written dissertation and oral defense, including the student's ability to articulate orally the research question; methodological approach; primary findings; interpretation of the findings; and implications for theory, research and practice. The DEC votes to pass or fail the dissertation and the defense at the conclusion of the public presentation.

If a student needs to change a member of a committee, the new member must be approved by the Director of Graduate Studies and registered with the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their DEC and work with their department's administrative assistant to secure a room. This should be done at least one month in advance of the proposed date. The administrative assistant arranges the time, date and room within two working days. After the time, date and room are secured, the student must send to the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms." This must be submitted at least 10 working days before the defense. The department posts flyers announcing the defense, and the Graduate School lists the defense on its website.

# Health Policy and Management MPH

## COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Public Health in Health Policy and Management.

## About the Program

The Master of Public Health in Health Policy and Management (MPH-HPM) is a terminal, professional degree designed to develop practitioners in the field of public health and health services delivery who have a clear understanding of health policy, management and health-related services and programs. Students are trained to think about the competing demands of how to manage the health of the population, improve the patient experience, and reduce system costs with a systems lens. In addition, students learn about the health policymaking process and how to evaluate the impact of policy on population health.

Applicants to the MPH-HPM program can choose between our on-campus and online programs, both of which adhere to the same competency-based curriculum and content. Only the delivery formats differ:

- The on-campus format is designed for students who prefer live interaction with instructors and fellow students; access to campus activities; and the opportunity to choose local Philadelphia fieldwork placements with the assistance of our fieldwork coordinator. Students can enroll full-time or part-time. While some courses may be offered online or in hybrid formats, most of the coursework is delivered in person over a full 16-week academic term during evening hours.

- The online format is designed for working professionals interested in a part-time program. Coursework is structured to include synchronous classes held via Zoom and asynchronous activities. A fieldwork coordinator works with students to find appropriate placement in their preferred geographic location.

For more information about the on-campus or online MPH program, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main for in-person instruction or Online

**Full-Time/Part-Time Status:** Full-time students usually complete the program within two academic years, while part-time students usually take three to four years to complete their degree.

**Interdisciplinary Study:** Interdisciplinary MPH-HPM coursework, research and interactions with students and faculty in other departments are encouraged to give students as broad a perspective as possible to excel in the complex, diverse and dynamic state of public health. Through associations with the Center for Obesity Research and Education, Center for Women's Health, and others, students have access to over 100 faculty at Temple University and additional regional scholars who are actively involved in programs, research and teaching in public health. Further, as with other MPH degree programs offered by the College of Public Health, the MPH in Health Policy and Management can be undertaken as part of these dual MPH degree programs:

- DMD/MPH with Temple University's Kornberg School of Dentistry
- JD/MPH with Temple University's Beasley School of Law
- MD/MPH with the Lewis Katz School of Medicine at Temple University
- MHA/MPH with Temple University's Fox School of Business and Management
- MPP/MPH with Temple University's College of Liberal Arts
- MS Health Informatics/MPH within the Temple University College of Public Health
- MSW/MPH with the Temple University School of Social Work

For more information, visit <https://www.temple.edu/academics/dual-degree-programs> or contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Affiliation(s):** Locally, the program has long-standing research affiliations with Children's Hospital of Philadelphia, The Food Trust, Fox Chase Cancer Center, Health Federation of Philadelphia, Health Promotion Council, Maternity Care Coalition, Mazzone Center, Philadelphia Department of Behavioral Health and Intellectual disAbility Services, Philadelphia Department of Public Health, Prevention Point, Public Health Management Corporation (PHMC), School District of Philadelphia, Temple University Health System, and numerous other community health agencies. These partnerships allow us to offer students a wide range of fieldwork opportunities to translate skills learned in the classroom to actual practice in the community.

**Study Abroad:** Short-term intensive study abroad courses are offered as part of the MPH program of study. These courses are offered during the Summer and are open to both undergraduate and graduate students.

**Accreditation:** The MPH is fully accredited by the Council on Education for Public Health (CEPH). Achieving accreditation in 1985, Temple's MPH

program is one of the longest established accredited MPH programs in the country.

**Areas of Specialization:** The MPH degree program is offered in six specialty fields of study:

- Applied Biostatistics (APBIO)
- Environmental Health (EH)
- Epidemiology (EPI)
- Health Policy and Management (HPM)
- Nutrition (NUTR)
- Social and Behavioral Sciences (SBS)

Students in the Health Policy and Management MPH program may complete transcripted College of Public Health certificate programs by taking their 9 credits of electives in the relevant coursework. For questions about certificates, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Job Prospects:** Graduates with an MPH-HPM degree hold positions in a wide range of health-related settings, including clinics, community-based organizations, federally qualified health centers, health insurers, hospitals and health systems, pharmaceutical companies, public health-related work sites, schools, state and local public health departments, and voluntary health agencies. Graduates are prepared to assume leadership positions in a variety of health services and public health organizations as environmental health specialists, evaluation specialists, healthcare administrators, HIV/AIDS coordinators, infection control coordinators, marketing specialists, prevention specialists, project directors, research directors, senior health educators and consultants. Virtually all full-time students are placed within three to six months of graduation.

**Licensure/Certification:** Students who complete an MPH at Temple University are eligible to sit for the Certified in Public Health (CPH) exam offered by the National Board of Public Health Examiners and the Certified Health Education Specialist (CHES®) exam offered by the National Commission for Health Education Credentialing, Inc. (NCHEC). For more information about credentialing in public health, visit <https://www.nche.org/>. Graduates may also be eligible for certification and advancement in a number of health professional associations such as the American College of Healthcare Executives (ACHE).

**Non-Matriculated Student Policy:** Non-matriculated students are required to speak with an advisor before registering for classes and to obtain the permission of the professor, whether the coursework is taken in the on-campus or online format. If accepted to the program, a maximum of three courses (9 credits) may be applied toward the degree program. Exceptions to this policy relate to formal certificate programs.

**Financing Opportunities:** Limited Teaching and Research Assistantships are available in the College of Public Health. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Individuals interested in a Teaching Assistant or Research Assistant position may inquire of the admissions staff. Upon admissions, interested students are sent an application for both types of positions.

The College of Public Health and the Department of Health Services Administration and Policy offer a limited number of tuition scholarships to highly qualified applicants. Other available scholarships are listed at <https://cph.temple.edu/admissions/scholarships>. Students may also

be eligible for financial support through the Office of Student Financial Services.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

All applicants to the MPH program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with academic competence. If the applicant has been out of school for an extended period of time, ensure that letters are provided by professional colleagues who can discuss your relevant academic skills, including critical thinking, research and writing.

**Coursework Required for Admission Consideration:** Applicants' files are reviewed for undergraduate coursework in mathematics and/or statistics, social sciences and writing. Applicants who completed prior graduate coursework or earned a graduate degree are expected to submit such documentations as this will be considered in the application review.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0.

**Statement of Goals:** In 500 to 1,000 words, address the following questions:

- Why are you pursuing the MPH in Health Policy and Management, and what are your particular areas of interest in the field?
- What are your future career goals, and what have you done either academically or professionally to guide your interest in public health and to begin preparation toward your career goals?
- What is your leadership philosophy? How effective are you at working on interdisciplinary teams?
- Are there any exceptional circumstances related to previous academic performance that you would like the Admissions Committee to consider?

### Standardized Test Scores:

GRE: Optional. While the program takes a portfolio approach to admissions, standardized tests provide important insight into quantitative and verbal abilities. If submitted, minimum scores of 153 Verbal and 144 Quantitative are desired. Official GRE scores should be sent to SOPHAS using code 0151.

Standardized tests considered in lieu of the GRE for the MPH-HPM include DAT, GMAT, LSAT, MCAT, OAT and PCAT.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Test Waivers:** Graduates with a terminal degree from a U.S. medical school, foreign-trained physicians who have obtained licensure to practice in the United States, and those with a PhD or with an excellent undergraduate record and 7 to 10 years or more of public health or healthcare professional experience may have the GRE requirement waived. To request a waiver or if you have other questions, contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an MPH program accredited by the Council on Education for Public Health (CEPH) may be transferred into the MPH. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The MPH program director approves the transfer of credits based on a review of course materials provided by the student. The maximum number of credits a student may transfer is 9.

**Clearances:** The MPH program requires students to complete fieldwork education. In the MPH program, it is the fieldwork site that determines the clearances, such as criminal background check and FBI fingerprinting, needed by a student. The results of these clearances determine whether a student may be onboarded at a respective site.

## Program Requirements

### General Program Requirements:

**Minimum Grade to be Earned for All Required Courses: B-**

#### **Culminating Events:**

##### *Fieldwork Practicum:*

Students are required to synthesize and integrate the knowledge acquired in coursework and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice through an internship or practicum experience with a public health agency, health services organization, or under the supervision of a faculty preceptor. The MPH fieldwork experience serves as the applied practice experience as required by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health, for completion of the Master of Public Health degree. In addition, this applied practice experience provides the student with the opportunity to develop expertise in a topic area and to contribute original and independent observations to a body of knowledge.

##### *Evaluative Paper:*

For the applied practice experience to fulfill the requirements of HPM 9289 and HPM 9389, MPH in Health Policy and Management students are expected to complete a fieldwork experience. The required deliverable for the MPH fieldwork requirement is a final evaluative paper. Students must demonstrate their proficiency and the application of theory and principles in the paper.

## **Neuromotor Science MS**

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Science in Neuromotor Science.

### **About the Program**

The study of human movement, both as an outcome of health and functioning and as a means to understand the mechanisms underlying neuromotor system integration and behavior, is foundational to many health professions. The skills needed to be successful in fields of related study require fluency across the disciplines of engineering, movement science, neuroscience and rehabilitation. The need exists for rigorously trained scientists with interdisciplinary training in neurobiology and biomechanics of the sensorimotor system, with a focus on how human movement is impacted by health conditions, disease, disability and development.

Our Neuromotor Science (NMS) program trains students to advance the science of neuromotor control and biomechanics of human posture and movement in individuals across the lifespan and spectrum of health and disability levels. The MS in Neuromotor Science (MS-NMS) program is designed for individuals in the fields of engineering, exercise science, kinesiology, occupational therapy, physical therapy, rehabilitation science and the like, preparing them to:

- advance the science and understanding of neuromotor processes, including assessment and evaluation of human movement, neuromotor function and integration, and how they are impacted by age, health, functioning and disability; and
- contribute to the development of interventions to improve human movement, particularly posture and locomotor control, and function across the lifespan.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main, Health Sciences Center

**Full-Time/Part-Time Status:** While full-time study is encouraged at the master's level, this research-focused degree program can be completed in 2 years with full-time study (9 credits per term) or 3 to 4 years if enrolled part-time.

MS-NMS students are initially advised by the NMS Program Director during admission and in the first term if an academic advisor has not been identified. Within two terms of matriculation, students are assigned

an academic advisor from the core program faculty or an available Graduate Faculty member with expertise in the student's cognate area, as approved by the NMS Program Director. Students develop an "Individualized Development Plan of Graduate Studies," which is reviewed with their advisor every term, and by the NMS Program Director and/or the Program Advisory Committee on an annual basis.

**Interdisciplinary Study:** Students may use their elective coursework to pursue interdisciplinary study throughout the University. The MS-NMS program participates in the interdisciplinary program in Neuroscience at Temple University.

**Areas of Specialization:** All students complete the same core course requirements, but may focus their elective coursework and research experiences on preparing them for future work in areas related to their specific interests.

**Job Prospects:** Graduates of the MS-NMS degree program are prepared for employment in clinical research, as faculty in professional programs, or in industry positions. In addition, the MS degree provides a strong foundation for students to continue their studies at the PhD level.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in up to three graduate courses with permission from the NMS Program Director.

**Financing Opportunities:** Assistantship packages consisting of a stipend, tuition remission, and subsidized health benefits are available. Admission to the MS-NMS program does not, however, guarantee financial support. Research and Teaching Assistantships are highly competitive, with awards varying based on faculty-funded areas of research and the teaching needs of the College. Please contact the NMS Program Director for additional information.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: March 1  
Spring: November 1

All applicants to the MS in Neuromotor Science program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

### Letters of Reference:

Number Required: 3

*From Whom:* Letters of recommendation should be obtained from individuals who can speak to the applicant's potential for graduate study. At least one should be from a faculty member who is familiar with the applicant's academic abilities.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of a baccalaureate degree at Temple University.

A WES course-by-course transcript evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** In a one-page statement, articulate why you want to enroll in the MS-NMS program at Temple. State your career goals and research interests.

### Standardized Test Scores:

GRE: Scores from a test taken within the last 5 years must be at or above the 50th percentile in the verbal and quantitative components, with a score of 4 or higher on the writing component. Official scores should be sent directly to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Interview:** Students may be invited to interview with the program faculty. An interview may take place in person or through technology if cost prohibits travel to Temple.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 30

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>1</sup>	0
NMS 9621	Neuromotor Science 1: Neural Factors	3
NMS 9622	Neuromotor Science: Instrumentation	3
NMS 9623	Neuromotor Science: Programming	3
NMS 9624	Neuromotor Science 2: Mechanics and Models	3
NMS 9627	Neuromotor Science 3: Cognition and Learning	3
	Statistics and Research Design Course	3
	<b>Electives <sup>1</sup></b>	<b>9</b>
	<b>Research Experience</b>	

NMS 9654	Neuromotor Science: Laboratory Rotation and Seminar	3
----------	---	---

---

<b>Total Credit Hours</b>		<b>30</b>
---------------------------	--	-----------

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Electives are chosen from existing 5000-, 8000-, or higher-level courses to provide a cognate area based on the student's interest in, for example, engineering, kinesiology, neuroscience, psychology, public health, rehabilitation science, or teaching in higher education. *Not all courses listed in the course descriptions for this program are available to MS-NMS students.* The NMS Program Director and faculty advise on and approve the selection of electives.

**Minimum Grade to be Earned for All Required Courses:** B-

**Culminating Event:** Successful completion of coursework constitutes the culminating event for the Neuromotor Science MS.

## Neuromotor Science PhD

COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Philosophy in Neuromotor Science.

## About the Program

The study of human movement, both as an outcome of health and functioning and as a means to understand the mechanisms underlying neuromotor system integration and behavior, is foundational to many health professions. The skills needed to be successful in fields of related study require fluency across the disciplines of engineering, movement science, neuroscience and rehabilitation. The need exists for rigorously trained scientists with interdisciplinary training in neurobiology and biomechanics of the sensorimotor system, with a focus on how human movement is impacted by health conditions, disease, disability and development.

Our Neuromotor Science (NMS) program trains students to advance the science of neuromotor control and biomechanics of human posture and movement in individuals across the lifespan and spectrum of health and disability levels. The PhD in Neuromotor Science (PhD-NMS) program is designed for individuals in the fields of engineering, exercise science, kinesiology, occupational therapy, physical therapy, rehabilitation science and the like, preparing them to:

- advance the science and understanding of neuromotor processes, including assessment and evaluation of human movement, neuromotor function and integration, and how they are impacted by age, health, functioning and disability; and
- contribute to the development of interventions to improve human movement, particularly posture and locomotor control, and function across the lifespan.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main, Health Sciences Center

**Full-Time/Part-Time Status:** Full-time study is expected. This research-focused doctoral degree program requires 4 to 7 years of full-time study post-baccalaureate or 2 to 3 years of full-time study after completion of the MS in Neuromotor Science degree.

PhD-NMS students are initially advised by the NMS Program Director during admission and in the first term if an academic advisor has not been identified. Within two terms of matriculation, students are assigned an academic advisor from the core program faculty or an available Graduate Faculty member with expertise in the student's cognate area, as approved by the NMS Program Director. Students develop an "Individualized Development Plan of Graduate Studies," which is reviewed with their advisor every term, and by the NMS Program Director and/or the Program Advisory Committee on an annual basis.

**Interdisciplinary Study:** Students may use their elective coursework to pursue interdisciplinary study throughout the University. The PhD-NMS program participates in the interdisciplinary program in Neuroscience at Temple University.

**Areas of Specialization:** All students complete the same core course requirements, but may focus their elective coursework and research experiences on preparing them for future work in areas related to their specific interests.

**Job Prospects:** Graduates of the PhD-NMS degree program are prepared for research or teaching/research positions at Carnegie Research I institutions. They are also prepared for employment as faculty members in other academic settings, in clinical research settings, or in industry positions.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in up to three graduate courses with permission from the NMS Program Director.

**Financing Opportunities:** Assistantship packages consisting of a stipend, tuition remission, and subsidized health benefits are available. Admission to the PhD-NMS program does not, however, guarantee financial support. Research and Teaching Assistantships are highly competitive, with awards varying based on faculty-funded areas of research and the teaching needs of the College. Please contact the NMS Program Director for additional information.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 5

*Spring:* November 1

All applicants to the PhD in Neuromotor Science program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liasoncas.com/>. Applications received after the stated deadlines will be reviewed as space and funding allow.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from individuals who can speak to the applicant's potential for graduate study. At least one should be from a faculty member who is familiar with the applicant's academic abilities.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of a baccalaureate degree at Temple University.

A WES course-by-course transcript evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** In a one-page statement, articulate why you want to enroll in the PhD-NMS program at Temple. State your career goals and research interests.

### Standardized Test Scores:

GRE: Required. Scores from a test taken within the last 5 years must be at or above the 50th percentile in the verbal and quantitative components, with a score of 4 or higher on the writing component. Official scores should be sent directly to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5

- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Interview:** Students may be invited to interview with the program faculty. An interview may take place in person or through technology if cost prohibits travel to Temple.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

## Program Requirements

### General Program Requirements:

*Number of Credits Required to Earn the Degree:* 45

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>1</sup>	0
HRPR 5999	Research Experience in Health Professions (work on publishable paper for two terms)	0
NMS 9621	Neuromotor Science 1: Neural Factors	3
NMS 9622	Neuromotor Science: Instrumentation	3
NMS 9623	Neuromotor Science: Programming	3
NMS 9624	Neuromotor Science 2: Mechanics and Models	3
NMS 9627	Neuromotor Science 3: Cognition and Learning	3
NMS 9653	Grantsmanship	3
Statistics and Research Design courses		9
Teaching Practicum <sup>2</sup>		0
<b>Electives<sup>3</sup></b>		<b>12</b>
<b>Research Courses</b>		
NMS 9994	Doctoral Preliminary Exams	1
NMS 9998	Dissertation Proposal	2
NMS 9999	Dissertation Research	3
<b>Total Credit Hours</b>		<b>45</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Each student serves as a Teaching Assistant for one academic term during the degree program. Students who select the Teaching in Higher Education Seminar as one of the required electives can then use the Teaching Practicum to complete the Teaching in Higher Education certificate.

3

Electives are chosen from existing 5000-, 8000-, or higher-level courses to provide a cognate area based on the student's interest in, for example, engineering, kinesiology, neuroscience, psychology, public health, rehabilitation science, or teaching in higher education. The NMS Program Director and faculty advise on and approve the selection of electives.

**Minimum Grade to be Earned for All Required Courses: B-**

**Culminating Events:**

In addition to completing the required coursework, students are expected to complete an area paper, a preliminary written and oral examination, and a dissertation research proposal prepared in the form of a grant proposal. Students are also expected to write and submit an abstract for their research and present that research at a scientific or professional meeting. The dissertation must include a publishable article.

*Area Paper:*

Prior to the preliminary examination, students must write a paper of publishable quality in their chosen area. Students could enroll in an elective course, a laboratory rotation, or independent study to complete this paper. The paper can be a report of research completed with a faculty member, a systematic review of literature related to the projected area of dissertation work, or a representation of theoretical work. In each instance, the student is expected to be the lead or sole author. Students are encouraged to select and submit the paper for peer review to an appropriate journal, but the publishable quality of the paper will be determined by faculty members with sufficient background in the area to judge the quality of the work. Students who have published a peer-reviewed paper in a journal as lead author prior to entry into the doctoral program can request a waiver of this requirement.

*Preliminary Examination:*

All students must pass a preliminary examination (NMS 9994) prior to defending their dissertation research proposal. This qualifying examination consists of assessment of both didactic knowledge and research skills in neuromotor science. The didactic knowledge portion of the exam consists of a written examination followed by an oral examination of core concepts taught within the core neuromotor science courses. The research skill portion of the exam consists of skills acquired in a research lab presented in a lab practicum format.

*Dissertation Proposal and Defense:*

In conjunction with the academic advisor and with the approval of the NMS Program Director, each student is expected to identify a Doctoral Advisory Committee. The committee shall be comprised of at least three members. Two of the members shall be from within the Department of Health and Rehabilitation Sciences, and at least one shall be from outside the department. At least two of the three members must hold full Graduate Faculty status.

Students are required to prepare and submit a dissertation proposal and successfully defend it orally in front of their committee. As appropriate, they must obtain Institutional Review Board (IRB) approval for their proposed research and submit a copy of the dissertation proposal to the Graduate School. Students are expected to have developed and

defended their dissertation proposal within one year of successfully completing their preliminary examination.

Any student who does not adhere to this timeline must petition the Program Advisory Committee for an exception to this requirement. Extensions are not guaranteed. The case of any student who did not receive an extension will be considered at the time of the Annual Review of Progress toward the degree. Failure to pass NMS 9998 within one year can result in dismissal from the program.

*Dissertation Research:*

Students are required to complete and orally defend their dissertation research. Students must be enrolled continuously in NMS 9999 until their dissertation is successfully defended. The Graduate School requires at least 6 credits of dissertation research coursework. Students must be enrolled in the term that they graduate.

The dissertation must be successfully defended in a public oral defense as determined by the student's Dissertation Examining Committee. This committee evaluates the student's ability to express verbally their research question, methodological approach, primary findings and implications. The Dissertation Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation.

Students who are preparing to defend their dissertation must confirm a time and date for the oral defense with their Dissertation Examining Committee at least 15 days before the desired defense date. After the student and department have arranged the time, date and room for the defense, the student must provide the official announcement to the Graduate School at least two weeks before the defense.

# Nursing DNP

## COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Nursing Practice.

## About the Program

Graduate nursing education strongly reflects the values and goals of nursing and the broad mission of Temple University. The DNP program prepares graduates to provide primary care for individuals, families and communities grounded in evidence-based practice and research. Embedded in the program is the social context of health systems, health policy, and health economics and their impact on the individual, family and community. Students are prepared to provide direct primary care to individuals across diverse settings and indirect administration of systems of care, as well as to participate in the development and implementation of health policy. The DNP program expands students' scope of practice while maintaining a clinical primary care focus. Through integration of the educator, clinician and research roles, faculty work with DNP students to cultivate the value of evidence-based clinical practice and its potential impact on individuals, groups and communities.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Health Sciences Center

**Full-Time/Part-Time Status:** Both full-time and part-time schedules are available to DNP students. Classes may be offered between 8:00 a.m. and 9:30 p.m. on Wednesdays and other evenings throughout the year. Summer courses are included as a part of the curriculum.

**Accreditation:** The Doctor of Nursing Practice degree at Temple University is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, 202-887-6791.

**Areas of Specialization:** Three concentrations are offered:

- Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP), which can be completed in 3-4 years.
- Family and Individual Across the Lifespan Nurse Practitioner (FNP), which can be completed in 3-4 years.
- Health Systems Leadership (HSL), which can be completed in 2 years. It is designed specifically as a post-master's program for nurses who hold a master's degree and desire knowledge and advancement in the business and administrative ranks of a health system.

**Job Prospects:** Graduates of the program are employed in a variety of advanced practice nursing positions.

**Licensure/Certification:** Professional Nurse Licensure (RN) is required in Pennsylvania and either New Jersey or Delaware for both post-BSN and post-master's applicants. Additional licenses may be obtained in states in which clinical work is to be done. For more information about licensure, see <https://www.ncsbn.org/contact-bon.htm>.

Nurse practitioner graduates of the AGPCNP and FNP concentrations are suited to sit for national board certifications with the American Nurses Credentialing Center (AANC) and the American Academy of Nurse Practitioners (AANP). The HSL concentration does not lead to national

licensure nor certification. The DNP program remains in compliance with the Pennsylvania State Board of Nursing.

**Non-Matriculated Student Policy:** Non-matriculated students can take a total of 9 graduate credits prior to matriculation. Only the following courses may be taken while a non-matriculated student:

Code	Title	Credit Hours
EPBI 5001	Biostatistics for Health Professions	3
NURS 5103		
NURS 5105		

**Financing Opportunities:** Funds are available to matriculated students. Students are required to complete a FAFSA application annually to be eligible for funding.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* April 15

All applicants to the DNP in Nursing program must apply via the Centralized Application Service for Nursing Programs (NursingCAS). The system can be accessed at <https://www.nursingcas.org/>.

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should assess the applicant's ability to work independently, academic and scholarly performance, analytical thinking and aptitude for advanced study, commitment to urban health, communication skills, and professional contributions. Authors should be supervisors or academics and indicate how long they have known the applicant and in what capacity.

**Coursework Required for Admission Consideration:** Two admission options are offered for the DNP program:

- Direct entry from the BSN – Post-baccalaureate applicants choose between two concentrations: Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) and Family and Individual Across the Lifespan Nurse Practitioner (FNP). Candidates who apply for post-BSN entry must have earned a baccalaureate degree in Nursing. All transcripts of applicants will be reviewed by the graduate faculty. Offers of acceptance will be made based on their recommendations. The program reserves the right to request that an applicant take the GRE exam based on a review of the transcript.
- Post-Master's – Applicants to the post-master's DNP program may elect to pursue a concentration in AGPCNP, in FNP, or in Health Systems Leadership (HSL). All applicants must have an earned master's in Nursing and are required to complete a total of 1,000 clinical practicum hours. Students may apply up to 500 hours earned during their master's program toward the 1,000-hours requirement. Hours required for national certification may also be applied. Prior to an applicant's formal admission to the program, clinical practicum hours must be evaluated and verified via a gap analysis process.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of a baccalaureate degree at Temple University. Official transcripts for all undergraduate and graduate institutions attended must be submitted.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through NursingCAS.

**Statement of Goals:** In a 500- to 1,000-word statement of purpose, describe your background, academic and professional goals, and how your interests relate to the DNP program at Temple.

**Standardized Test Scores:**

GRE/MAT: Optional, although applicants who believe GRE scores would complement their application are encouraged to submit scores directly to NursingCAS using code 4033. If submitted, scores are expected to be at or above the 50th percentile.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to NursingCAS using the NursingCAS-specific TOEFL code B506)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current professional resume required.

**Interview:** An interview conducted by the Nursing Graduate Faculty is scheduled when all required materials have been submitted by the applicant.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** With departmental approval, DNP students may satisfy a maximum of 20% of their coursework requirement through transfer credit. This equates to 9 credits, external to Temple University's Department of Nursing, for a post-baccalaureate DNP applicant and 6 credits, external to Temple University's Department of Nursing, for a post-master's DNP applicant. A transferred course must be equivalent to coursework offered at Temple, and the grade must be a "B" or better to transfer. The decision is made by the Director of Graduate Programs in conjunction with the appropriate faculty member and forwarded to the Associate Dean for Academic Affairs for final approval. Students must provide the syllabus for the course(s) being considered for transfer credits.

**Clearances:** The Nursing DNP program requires students to complete clinical/field education experiences at facilities both on and off Temple University's campuses. Placements require a Pennsylvania state

criminal background check, Pennsylvania state child abuse clearance, FBI fingerprinting clearance, and a drug screen. Negative results may limit or eliminate placement options for the student, resulting in their inability to meet admission/graduation requirements. Conviction of a misdemeanor, felony, or felonious or illegal act may prevent an individual from becoming licensed and/or obtaining Advanced Practice Nursing approval. Students need a physical examination, proof of required immunizations, Quantiferon testing, CPR certification and personal health insurance. Students who do not comply with the required health and immunization requirements will not be permitted to attend clinical and may be dismissed from the Nursing program.

**Other:** Copies of the applicant's current nursing licenses must be provided with the application. Note that students who hold advanced practice licenses must maintain licensure throughout enrollment in the DNP program.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required to Earn the Degree: 77*, including 43 required credits and 34 practicum credits for the Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) and for the Family and Individual Across the Lifespan Nurse Practitioner (FNP) concentrations; 49-55, including 41 required credits and 8-14 practicum credits for the Health Systems Leadership (HSL) concentration

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
EPBI 5001	Biostatistics for Health Professions	3
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions	0
HRPR 8984		1
NURS 5101	Translation of Evidence in Healthcare	3
NURS 5102		3
NURS 5103		3
NURS 5104	<sup>1</sup>	2

1

Course is taken only by students in the Adult-Gerontology Primary Care Nurse Practitioner Concentration (AGPCNP) and the Family and Individual Across the Lifespan Nurse Practitioner Concentration (FNP) concentration.

2

Course is taken only by students in the Health Systems Leadership Concentration (HSL) concentration.

3

Course is taken by students in the Health Systems Leadership Concentration (HSL) concentration for 2 credits.

4

Course is taken by students in the Health Systems Leadership Concentration (HSL) concentration for 3 credits.

Additional course requirements for each of the three concentrations are identified in the following course grids:

### Practicum Courses for the Adult-Gerontology Primary Care Nurse Practitioner Concentration (AGPCNP)

Code	Title	Credit Hours
<b>Practica Sequence</b>		
NURS 9378		3
NURS 9385		5

<b>Credit Hours</b>		<b>7-10</b>
<b>Total Credit Hours</b>		<b>49-55</b>

1

A plan of study for part-time enrollment is available from the Program Director.

2

The number of credits required for each practicum is determined by a gap analysis of previous clinical hours completed.

**Minimum Grade to be Earned for All Required Courses: B-**

#### **Culminating Event:**

*Clinical Practice Project:*

Over the course of completing NURS 8101 DNP Project Development I, NURS 8102 DNP Project Development II, and NURS 8103 DNP Project Implementation, the student develops an evidence-based clinical practice project in consultation with a committee composed of faculty and site mentor.

## Nutrition MPH

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Public Health in Nutrition.

### About the Program

The Master of Public Health in Nutrition, offered by the Department of Kinesiology, is a terminal professional dietetics degree. The program prepares future public health dietitians to identify and assess population needs; plan, implement and evaluate programs to address those needs; and ensure the needs of diverse populations are met to improve their overall health status, particularly their nutritional/dietary needs. The MPH in Nutrition program has a strong focus on addressing the environmental, social and cultural factors related to individual and population nutrition and associated health disparities over the life course. Our graduates will serve individuals and communities promoting and sustaining healthy lives.

The MPH in Nutrition is a full-time, two-year on-campus program. While some courses may be offered online or in hybrid formats, most of the coursework is delivered in person over 16-week academic terms. Throughout the program of study, students engage in guaranteed placements at our clinical, foodservice and public health supervised experiential learning sites.

For more information about the on-campus MPH in Nutrition program, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main, with some instruction online

**Full-Time/Part-Time Status:** Full-time study is required.

**Affiliation(s):** The MPH in Nutrition maintains dozens of affiliation agreements with community partners in clinical, foodservice and public health nutrition. The program has long-standing research and fieldwork affiliations with The Food Trust; Fox Chase Cancer Center; Health Federation of Philadelphia; NORTH, INC.; Philadelphia Department of Public Health; School District of Philadelphia; and many other community health agencies. These partnerships allow us to offer students a wide range of fieldwork opportunities to translate skills learned in the classroom to actual practice in the community.

The MPH in Nutrition program director and clinical coordinator assist students in finding appropriate placements throughout the Greater Philadelphia region.

**Accreditation:** The MPH in Nutrition program is fully accredited by the Council on Education for Public Health (CEPH) and the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Achieving accreditation in 1985, Temple's MPH program is a well-established accredited MPH program in community health.

**Areas of Specialization:** The MPH degree program is offered in six specialty fields of study:

- Applied Biostatistics (APBIO)
- Environmental Health (EH)
- Epidemiology (EPI)
- Health Policy and Management (HPM)
- Nutrition (NUTR)
- Social and Behavioral Sciences (SBS)

**Job Prospects:** Graduates with an MPH in Nutrition degree have a multitude of job options working in clinical, foodservice or public health nutrition settings. Clinical dietitians work with other health professionals treating individuals in hospitals and outpatient clinics. Foodservice dietitians work in hospitals, school foodservice, restaurants and food stores, such as supermarkets and convenience stores, selling fresh food and overseeing the large-scale production of food. Public health dietitians work in a wide range of nutrition settings, including emergency food, food delivery, nutrition education and school foods programs. Additionally, as an MPH graduate, students have a variety of job opportunities open to them within the whole of public health.

**Licensure/Certification:** Graduates are eligible to take the exam offered by the Commission on Dietetic Registration to become a Registered Dietitian Nutritionist (RDN). Students who complete the MPH in Nutrition at Temple University may also be eligible to sit for the Certified in Public Health (CPH) exam offered by the National Board of Public Health Examiners and the Certified Health Education Specialist (CHES®) exam offered by the National Commission for Health Education Credentialing, Inc. (NCHEC). For more information about credentialing in public health, visit <https://www.nchec.org/>.

**Non-Matriculated Student Policy:** Non-matriculated students are required to speak with an advisor before registering for classes and to obtain the permission of the course instructor. If accepted to the program, a maximum of three courses (9 credits) may be applied toward the degree program. Exceptions to this policy relate to formal certificate programs.

**Financing Opportunities:** Limited Teaching and Research Assistantships are available in the College of Public Health and are assigned on a competitive basis among students who academically excel. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Students whose Fall applications are complete prior to the application deadline are eligible for a Teaching Assistant (TA) position. TAs are required to work 20 hours per week in any combination of teaching assignments made by the department and must meet the English Language Proficiency standards set by the University and the College. Students who hold Teaching or Research Assistantships are not permitted to hold other employment without the written prior approval of their advisor, the Director of Graduate Programs, and the Graduate School. To be considered for a Teaching or Research Assistantship, students must complete an application form that is sent to them upon admission to the MPH program.

The College of Public Health awards a limited number of partial scholarships on a competitive basis to students with an outstanding academic record. No separate application is needed for these awards as outstanding applicants are automatically considered following submission of their application. Other available scholarships are listed at <https://cph.temple.edu/admissions/scholarships>. Students may also be eligible

for financial support through the Office of Student Financial Services. For more information on assistantships, scholarships and financial aid, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

All applicants to the MPH program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Deposit Deadline for Admitted Applicants:

*Fall:* Within 3 weeks of receiving admissions decision

Applicants who are accepted to the program must pay a \$500 deposit to secure their enrollment in the MPH in Nutrition program. For questions about the deposit and payment process or to request an extension, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with the applicant's academic background and achievements. Applicants who have been out of school for an extended period of time should ensure that letters are provided by supervising employers or professional colleagues who can discuss their relevant academic skills, including critical thinking, research and writing.

**Coursework Required for Admission Consideration:** Applicants' files are reviewed for undergraduate coursework in mathematics and/or statistics, social sciences and writing. Applicants who completed prior graduate coursework or earned a graduate degree are expected to submit documentation for consideration in the application review process.

To be eligible for acceptance into the MPH in Nutrition program, applicants are required to have completed:

- Anatomy and Physiology (3 credits)
- Biochemistry (3 credits)
- Biology (6 credits)
- Chemistry (6 credits)
- Organic Chemistry (3 credits)
- At least one introductory Nutrition course (3 credits)

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0.

**Statement of Goals:** As part of your application, address the following questions in 1,000 words or less:

- Why are you pursuing admission to the MPH in Nutrition program?
- What are your particular areas of interest in public health nutrition?
- What academic or professional experiences demonstrate your commitment to public health nutrition?
- What exceptional circumstances related to your previous academic performance would you like the Admissions Committee to note?

#### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an MPH program accredited by CEPH may be transferred into the MPH in Nutrition program. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The Director of Graduate Studies approves the transfer of credits based on a review of course materials provided by the student. The maximum number of credits a student may transfer is 9.

**Clearances:** The MPH in Nutrition program requires students to complete fieldwork education. As part of the MPH program, the fieldwork sites determine students' required clearances, including criminal background check and FBI fingerprinting. The results of these clearances determine whether a student may be onboarded at a respective site.

## Program Requirements

#### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 48

*Required Courses:*

Code	Title	Credit Hours
<b>College Core Course</b>		
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions	0

NUTR 5815	Cultural and Community Nutrition	3
NUTR 5835	Nutrition Through the Lifecycle	3
<b>Credit Hours</b>		<b>9</b>
<b>Total Credit Hours</b>		<b>48</b>

**Minimum Grade to be Earned for All Required Courses: B-**

#### Culminating Events:

##### *Supervised Experiential Learning:*

Students have the opportunity to synthesize and integrate the knowledge and skills acquired in coursework through Supervised Experiential Learning (SEL) that includes 280 hours in clinical, 140 hours in foodservice and 500 hours in public health settings. SEL counts toward the hours required by ACEND and CEPH, the accrediting bodies for dietetics and public health.

During the clinical and foodservice SEL, students develop skills and judgment needed by practicing RDNs. During the public health SEL, students have a rich public health experience, taking a deep dive into the population needs and assets, community context, and environmental influences. The public health SEL provides students with the opportunity to develop expertise in a specific area of public health nutrition and to contribute to the public health nutrition body of knowledge.

##### *Evaluative Paper:*

As part of the public health SEL, students work with their preceptor and instructor for Fieldwork I and II (SBS 9289 and SBS 9389) to develop a nutrition intervention or program evaluation. This is an exciting opportunity to build on existing knowledge, develop unique public health nutrition skills, and practice as a public health nutritionist.

## Occupational Therapy OTD

COLLEGE OF PUBLIC HEALTH

Learn more about the Doctorate of Occupational Therapy.

### About the Program

The Doctorate of Occupational Therapy (OTD) is an entry-level professional doctorate in occupational therapy. Students entering the OTD program must hold a bachelor's degree prior to the start of the program. As decreed by the American Occupational Therapy Association (AOTA), occupational therapists may enter the profession at the master's or doctoral level. Although a doctoral degree is not mandatory, it is believed that the profession will eventually move to the single point of entry doctorate degree as many healthcare disciplines have done. This program is forward thinking, preparing students now at the doctoral level.

**Time Limit for Degree Completion:** 3 years, with coursework completed lockstep in 10 semesters as part of a cohort

**Campus Location:** Main for in-person instruction, with the majority of learning/instruction online. Experiential-learning labs and fieldwork are done at off-campus clinical and community sites.

**Full-Time/Part-Time Status:** The degree program must be completed on a full-time basis.

**Affiliation(s):** Students complete field studies and capstones in various settings depending on the nature of the study.

**Ranking:** In 2020, according to *U.S. News & World Report*, Temple University's program ranks as the 23rd best occupational therapy program out of 198.

**Accreditation:** The entry-level occupational therapy doctoral degree program has applied for accreditation and has been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number is 301-652-AOTA, and its web address is <https://acoteonline.org>.

The program must have a pre-accreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification

in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Students must complete 24 weeks of Level II fieldwork as well as an individual 14-week capstone experience within 18 months following completion of the didactic portion of the program. The doctoral capstone experience must be started after completion of all coursework and Level II fieldwork as well as completion of preparatory activities defined in 2018 ACOTE OTD Standard D.1.3.

**Job Prospects:** As of 2020, the U.S. Bureau of Labor Statistics projects a 17% growth in occupational therapy until 2030. This is more than double the 8% growth projected for all jobs.

**Licensure/Certification:** Graduates of the OTD program are eligible to take the National Board for Certification in Occupational Therapy (NBCOT) examination leading to the designation of Occupational Therapist, Registered (OTR). Additionally, practitioners must abide by specific licensure requirements as determined by individual states. For more information about state licensure, visit the AOTA state licensure webpage.

**Non-Matriculated Student Policy:** OTD coursework is available only to matriculated students.

**Financing Opportunities:** Financial aid is available to students. For information on financial aid, please contact Student Financial Services at 215-707-2667.

## Admission Requirements and Deadlines

### Application Deadline:

*Summer II:* February 1

All applicants to the OTD program must apply via the Occupational Therapist Centralized Application Service (OTCAS). The system can be accessed at <https://otcas.liasoncas.com/>. Applications are processed throughout the year as they are received. Admission to the OTD program is a rolling process such that, beginning in the Fall, applications are reviewed and offers of admission are extended, continuing until the cohort is filled. Thus, it is in the applicant's best interest to apply early to this highly competitive degree program.

Without exception, the February 1 deadline for OTCAS transcript and course verification must be met. If you have questions regarding transcript and course verification, contact OTCAS directly.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from evaluators, typically college/university faculty or an immediate work supervisor, who can provide insight into the applicant's aptitude for graduate study. These letters are to be submitted electronically at <https://otcas.liasoncas.com/>.

**Coursework Required for Admission Consideration:** Required coursework includes:

- Introduction to Psychology
- Introduction to Sociology or Cultural Anthropology (1000-level course, not a 2000- or 3000-level course)
- Anatomy with lab and Physiology (1000-level course, not 2000- or 3000-level course), which can be taken separately or as a combined sequence (e.g., Anatomy and Physiology I with Anatomy lab, or Anatomy and Physiology II). The lab must include human muscular and skeletal anatomy.
- Abnormal Psychology or Psychopathology
- Developmental Psychology or Lifespan Development, which must include a lifespan perspective of development. Two developmental psychology courses in two different life phases are accepted (either child/youth or adult/older adult).
- Physics
- Statistics, Biostatistics or Research Methods

Without exception, grades earned in prerequisite courses must be a "B-" or better for consideration in an application. Prerequisites are not required to have been taken while an undergraduate. The courses may be completed at a local community college or any accredited institution of higher education. AP or CLEP courses are not accepted for prerequisites, except for Introduction to Psychology with a score of 4 or higher. Science courses must be 4 credits. Prerequisites may be in progress at the time of the initial application, but must be completed and verified on one's OTCAS application by February 1 of the year for which application is made.

**Bachelor's Degree in Discipline/Related Discipline:** Completion of a baccalaureate degree in any discipline is not only required but also acceptable for applying to Temple University's Occupational Therapy program as long as the required prerequisites are successfully completed with a grade of "B-" or better. No particular undergraduate program of study is required for occupational therapy.

**Statement of Goals:** The education and practice of occupational therapists demand a great deal of mental flexibility, creativity, teamwork and service to others. Temple OT has a curriculum specifically designed to integrate these aspects into our surrounding community to support student learning and service to our community. Your statement, which is submitted at <https://otcas.liasoncas.com/>, should reflect your interest in this type of curriculum and your capacity to successfully engage in the demands of this type of professional graduate occupational therapy education and practice.

### Standardized Test Scores:

MAT or GRE: Not required.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68
- Duolingo: 110

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and

physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Clearances:** The Occupational Therapy OTD program requires students to complete clinical/field education experiences at facilities both on and off Temple University's campuses. These placements require a physical examination, immunization records, criminal background checks, Act 33/34 clearances, DHS fingerprinting, Healthcare Provider CPR certification, proof of personal health insurance, an annual influenza vaccine, and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options for the student, thus resulting in their inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent the individual from becoming credentialed and/or licensed to practice occupational therapy.

## Program Requirements

### General Program Requirements:

*Number of Credits Required to Earn the Degree:* 116

#### Required Courses:

<b>Year 1</b>		
<b>Summer II</b>		<b>Credit Hours</b>
OTHR 5002	Theoretical Perspectives of Occupation	2
OTHR 5005	Neuroscience Perspectives in Occupational Therapy	4
OTHR 8002	Clinical Skills I: Perspectives in Occupational Therapy	2
<b>Credit Hours</b>		<b>8</b>
<b>Fall</b>		
OTHR 5001	Developmental Perspectives in Occupational Therapy	2
OTHR 5008	Kinesiology Perspectives in Occupational Therapy	4
OTHR 5013	Medical Perspectives in Occupational Therapy	3
OTHR 5014	Person-Environment Dynamics in Occupation	1
OTHR 5019	Theoretical Perspectives in Occupational Therapy	2
OTHR 5151	Research I: Evidence-Based Practice in Occupational Therapy	3
OTHR 8003	Clinical Skills II: Fundamentals of Practice	2
<b>Credit Hours</b>		<b>17</b>
<b>Spring</b>		
OTHR 5003	Group Dynamics in Occupational Therapy	3
OTHR 5105	Occupational Therapy Practice: Children & Youth	5
OTHR 5152	Research II: Design and Methodologies in Occupational Therapy	2
OTHR 5185	Occupational Therapy Practice: Fieldwork IA	1

OTHR 5222	Occupational Therapy Practice: Adults and Older Adults	5
<b>Credit Hours</b>		<b>16</b>
<b>Year 2</b>		
<b>Summer I</b>		
OTHR 5161	Occupational Therapy Service Delivery & Management	3
OTHR 5219	Occupational Therapy Practice: Community and Social Participation	3
OTHR 5285	Occupational Therapy Practice: Fieldwork IB	1
<b>Credit Hours</b>		<b>7</b>
<b>Fall</b>		
HRPR 8985	Teaching in Higher Education: Health Professions	3
OTHR 5104	Occupational Therapy Practice: Mental Health	5
OTHR 5221	Health & Wellness in the Community	3

OTHR 8206	Clinical Skills V: Clinical Leadership	2
OTHR 8208		3
OTHR 8291		3
<b>Credit Hours</b>		<b>8</b>
<b>Total Credit Hours</b>		<b>116</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

**Minimum Grade to be Earned for All Required Courses:** B-

**Culminating Events:**

*Intensive Fieldwork Practica:*

Students may be required to travel up to 90 minutes from their place of residence to a Level I or II clinical site.

Level I: Students participate in a variety of Level I fieldwork experiences that are largely local. However, opportunities do exist for international Level I field experiences.

Level II: Two 12-week supervised full-time fieldwork experiences are required for degree completion. Level II fieldwork must be completed within 24 months of successful completion of all academic courses. Students are assigned to Level II fieldwork either locally or in another state. No international Level II fieldwork experiences are available.

*Doctoral Capstone Project and Experience:*

The doctoral capstone series is interwoven throughout the curriculum to ensure students build foundational knowledge in the critical consumption of evidence and research, understanding of translation and production of research, and the importance of assessment and dissemination of outcomes. Through the capstone course series, students learn to develop, implement and assess a culminating project that encourages further development of clinical practice skills, research skills, administration, leadership, program policy and development, advocacy or education.

The capstone is designed to ensure students attain in-depth knowledge and skill in their interest area while supporting Temple's clinical and community partners throughout the 14-week experience.

## Occupational Therapy Transitional Program OTD

COLLEGE OF PUBLIC HEALTH

Learn more about the Clinical Doctorate in Occupational Therapy Transitional Program.

### About the Program

The post-professional transitional Clinical Doctorate in Occupational Therapy (OTD) is designed to attract recent Master of Occupational Therapy (MOT) program graduates, as well as licensed occupational therapists already working in the field and seeking to enhance their careers and advance to leadership positions in clinical and academic environments. This 21-credit doctoral program is offered fully online and designed to meet the needs of the working student.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Online

**Full-Time/Part-Time Status:** The degree program must be completed on a full-time basis.

**Ranking:** In 2020, according to *U.S. News & World Report*, Temple University's OT program ranks as the 23rd best occupational therapy program out of 198.

**Accreditation:** Temple University is accredited by the Middle States Commission on Higher Education, which is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation.

**Job Prospects:** As of 2020, the U.S. Bureau of Labor Statistics projects a 17% growth in occupational therapy until 2030, much higher than average for all jobs.

**Licensure/Certification:** Applicants to the OTD program must be certified and licensed occupational therapists.

**Non-Matriculated Student Policy:** OTD coursework is available only to matriculated students.

**Financing Opportunities:** Financial aid is available to students. For information on financial aid, please contact the Office of Student Financial Services at 215-707-2667.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* August 1

To apply for the tOTD program, the applicant must be a licensed Occupational Therapist.

All applicants apply via the Occupational Therapist Centralized Application Service (OTCAS). The system can be accessed at <https://>

otcas.liasoncas.com/. All application materials listed below are required and should be sent directly to OTCAS:

1. **Official academic transcripts** from all undergraduate and graduate institutions attended.
2. **Three letters of recommendation** from individuals who can speak to your potential for graduate study. Recommenders can be faculty members or immediate work supervisors.
3. **Statement of goals** that is a minimum of one page reflecting on your aptitude for rigorous graduate study and practice in occupational therapy, including the mental flexibility, teamwork and service to others required for success. It should include a description of an area of interest you want to pursue through doctoral studies, explaining connections between this topic and the expertise of the department's faculty members. This is key since you will be working closely with a professor on your capstone research experience.
4. Professional **writing sample**. You may submit either a previously published article or an academic paper from previous coursework.
5. Current **resume**.
6. **Copy of your current state OT license**.
7. Standardized test scores:
  - **GRE scores** are only required if your master's GPA is lower than 3.0. If needed, your score should be in the top 50th percentile on both the verbal and quantitative sections.
  - For applicants whose native language is not English, **TOEFL or Duolingo scores** must be reported. The acceptable minimum is 79 iBT for the TOEFL and 110 for Duolingo.

Questions about the application process should be directed to Occupational Therapy Admissions at otadmissions@temple.edu or 215-204-7213. International students are advised to first visit <https://grad.temple.edu/admissions/international-applicants> for general information about applying to Temple University.

**Master's Degree in Discipline/Related Discipline:** A master's degree in Occupational Therapy is required. Graduates of Temple's 80-credit MOT, in particular, are prepared for the research rigor of the tOTD.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must have earned a baccalaureate degree.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Clearances:** The Occupational Therapy program requires students to complete clinical/field education experiences at facilities both on and off Temple University's campus. These placements require criminal background checks, Act 33/34 clearances, and perhaps a drug screen.

The results of these requirements may limit and potentially eliminate placement options for the student, which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent the student from becoming credentialed and/or licensed to practice occupational therapy.

## Program Requirements

### General Program Requirements:

*Number of Credits Required to Earn the Degree: 21*

#### Required Courses:

Code	Title	Credit Hours
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions	0
OTHR 8509	Leadership in the Health Professions: The Art and Science of Influence	3
OTHR 8511	Clinical Education and Fieldwork Supervision	3
OTHR 8512	Studies in Outcome Measures and Analysis	3
OTHR 8513	Evidence-Based Practice and Clinical Research	3
OTHR 8514	Occupational Based Theories and Participation	3
OTHR 8902	Capstone Project Inquiry	1
OTHR 8904	Capstone Project Proposal and Implementation	1
OTHR 8905	Capstone Project	1
OTHR 9089	Field Study and Professional Portfolios	3
<b>Total Credit Hours</b>		<b>21</b>

### Minimum Grade to be Earned for All Required Courses: B-

#### Culminating Event:

##### Capstone Project:

OTHR 9089 Field Study and Professional Portfolios is a field study experience that offers students an ideal opportunity to collect data for their capstone research projects; gain hands-on experience with data collection, management and analysis; and participate in mentored clinical experiences that support the central commitment of their doctoral capstone project. The course is offered in the Spring term to allow students the time needed to complete data analysis from the experience and incorporate the findings into their terminal capstone project, which is finalized during the Summer semester.

Students are assigned a faculty advisor to guide the capstone experience over a series of coursework: OTHR 8902 Capstone Project Inquiry, OTHR 8904 Capstone Project Proposal and Implementation, and OTHR 8905 Capstone Project. Outcomes from the capstone project are expected to be disseminated through presentations or publications and/or to be incorporated into clinical practice.

## Physical Therapy DPT

COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Physical Therapy.

## About the Program

Physical therapy is a healthcare profession with a purpose to promote human health and function by applying evidence to identify, assess, remediate or prevent human movement dysfunction. Physical therapists are concerned with the physical well-being of their clients and patients. They recognize the need to understand and respond to the sociocultural beliefs of the person and family receiving physical therapy services. And they accept full responsibility for the patients or clients in their care and for the development of their profession.

The mission of the Doctor of Physical Therapy (DPT) program at Temple University is to prepare graduates to be leaders in the profession, healthcare and society. The mission is accomplished by providing contemporary education, research and service to people, persons and populations.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** All required courses in the Doctor of Physical Therapy program are offered weekdays on a full-time basis.

**Accreditation:** The DPT program is accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE) through 2025.

**Job Prospects:** Graduates with the DPT degree are poised to meet the demand for physical therapy services for an increasingly diverse population in acute care centers, independent outpatient orthopedic clinics, rehabilitation centers and clinics, skilled care facilities, and sports medicine clinics.

**Licensure/Certification:** For more information about state licensure, see <https://www.fsbpt.org/Free-Resources/Licensing-Authorities-Contact-Information>.

**Non-Matriculated Student Policy:** Only matriculated students may enroll in DPT coursework.

**Financing Opportunities:** Contact the Doctor of Physical Therapy program for information.

## Admission Requirements and Deadlines

### Application Deadline:

*Summer I:*

- June 15 - Application Cycle Opens
- November 1 - Application Cycle Ends

All applicants to the DPT program must apply via the Physical Therapy Centralized Application System (PTCAS). The system can be accessed at <https://ptcas.liaisoncas.com/>. It is recommended that the PTCAS application be completed by early October so PTCAS has ample time to fully verify the application, which must be done prior to review by Temple University.

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from individuals who can judge the applicant's ability to succeed in a professional graduate program in Physical Therapy. Individuals typically positioned to provide such assessment include university faculty members, physical therapy clinicians, and employers. One reference must be from a physical therapist who can provide perspective on your ability as a student and future physical therapist. The second letter of reference must be from an academic professor who can provide an assessment of your ability to succeed with the academic rigor of a doctoral-level program. Notify the references to expect an online reference form from PTCAS once you begin the application process.

**Coursework Required for Admission Consideration:** Applicants must complete 10 prerequisite courses totaling 37 credits with a minimum cumulative GPA of 3.0 and no grades below a "C" (2.0). An applicant is permitted to apply with 6 of the 10 required prerequisite courses completed. If outstanding coursework exists, the admitted student must provide proof that sufficient grades were earned in all courses upon completion. Pass/fail for prerequisite courses is acceptable on a case-by-case basis due to COVID-19. Laboratories for science-based courses should not be online, but rather in-person traditional laboratories. Online lecture components are acceptable.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must possess a completed baccalaureate degree in any discipline with a minimum GPA of 3.0 on a 4.0 scale or be designated as matriculating in an internal articulation agreement (i.e., Temple 3+3 applicant) between approved undergraduate departments at Temple University and the Doctor of Physical Therapy program.

**Statement of Goals:** Three essay opportunities are presented within the PTCAS application for the applicant to respond to program and profession-specific questions.

### Standardized Test Scores:

GRE: Not required.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Interview:** Qualified applicants are invited to interview with faculty and students of the DPT program. In-person interviews are preferred, and virtual interviews are available in certain cases.

**Physical Therapy Observation Hours/Experience:** In the interview process, applicants are expected to demonstrate physical therapy professional experience/knowledge either through unpaid volunteerism or a paid clinical position. It is recommended that an applicant seek out service and leadership opportunities and have completed observation/volunteer hours in a variety of physical therapy settings. No minimum number of hours is required, but it is recommended that applicants consider a sufficient number of hours to ensure they have an understanding of that area of the profession.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Clearances:** The Physical Therapy DPT program requires students to complete clinical/field education experiences at facilities both on and off Temple University's campuses. These placements require FBI and state criminal background checks, child abuse history clearance, and a drug screen. Proof of adequate immunization and updated Tuberculin Skin Test (PPD) records are requirements for clinical rotations. Details can be found here: <https://studenthealth.temple.edu/hsc-cph-students/prematriculation-immunizations>. Students are required to follow Temple University policies for vaccination against COVID-19 (<https://www.temple.edu/coronavirus/vaccines>). Placements also require the student to maintain personal health insurance. The results of these requirements may limit and potentially eliminate placement options for the student, thus resulting in their inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent the individual from becoming credentialed and/or licensed to practice physical therapy.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Bachelor's:* 117, excluding any prerequisite coursework

*Required Courses:*

Year 1		Credit Hours
<b>Summer I</b>		
PHTH 8101	Introduction to Physical Therapy <sup>1</sup>	1

<b>Credit Hours</b>		<b>12</b>
<b>Total Credit Hours</b>		<b>117</b>

1

Courses are taken for 12 weeks, spanning the Summer I and II terms.

2

PHTH 9185 is taken for 12 weeks, spanning the Summer I term ending Year 2 and the Summer II term beginning Year 3.

3

Six weeks of clinical education (PHTH 9285) follows ten weeks of the coursework identified above.

4

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

5

Begun in the Fall term of Year 3, PHTH 9285 extends into the Spring term for six additional weeks.

6

Immediately following conclusion of PHTH 9285 Clinical Experience 2, PHTH 9385 is taken for the remaining 12 weeks of the Spring term.

**Minimum Grade for All Required Courses: B-**

#### **Culminating Events:**

##### *Clinical Experiences:*

Three full-time clinical experiences are required over the course of the degree program. Additionally, beginning in the Fall term of Year 1 and

throughout Year 2, five part-time clinical experiences allow students to practice and apply current didactic skills with a variety of patient populations.

The full-time clinical experiences include:

- PHTH 9185 Clinical Experience 1, taken for 8 credits over 12 weeks in the Summer term between Years 2 and 3.
- PHTH 9285 Clinical Experience 2, taken for 8 credits over 12 weeks beginning in the Fall term of Year 3 and extending into the Spring term of that same academic year.
- PHTH 9385 Clinical Experience 3, taken for 8 credits over 12 weeks immediately following completion of PHTH 9285 Clinical Experience 2.

#### *Practice Project and Comprehensive Patient Evaluation:*

Several didactic and psychomotor assessments are offered throughout the curriculum to ensure student preparedness and clinical readiness. In the Fall term of Year 3, each student participates in a mentored evidence-based practice project and completes a comprehensive practical evaluation.

# Public Health Data Science MS

## COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Science in Public Health Data Science.

## About the Program

The Public Health Data Science (MS PHDS) master's degree program focuses on the intersection of biostatistics, computational biostatistics, epidemiology and public health fundamentals. It is responsive to the national call to address the shortage in data science in the United States. This 36-credit MS is designed to equip graduates to meet the growing demand for public health data scientists who have an in-depth understanding of biostatistical methods and excellent data analytical skills to improve health care and population health. Students learn to conceptualize health problems and use state-of-the-art biostatistical and data-analytical tools and techniques to design, manage and analyze health and health-related data to produce value-adding analytic insights. They also learn how to effectively combine and communicate these insights to inform evidence-based public health decision-making.

The MS PHDS program builds on a strong biostatistical and programming foundation with specialized biostatistics courses aimed to build mastery in targeted data analyses while addressing statistical uncertainty. Our curriculum focuses on specialized data analysis courses such as those arising in randomized or nonrandomized (i.e., observational) studies, inferential investigation of large datasets such as electronic health records, and statistical modeling in the context of public health. Students have a unique opportunity to learn practical data analytical techniques and gain the ability to comfortably use complex data structures in efficient computational fashion while addressing important biostatistical complexities such as sampling design and correlated data in public health and health sciences. They also gain an understanding of the substantive contexts informing statistical analyses with varying challenges.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The program is designed to accommodate both full- and part-time students. Full-time students can earn their degree within 2 years, while part-time students typically complete the degree in 3 years.

**Accreditation:** The MS in Public Health Data Science is a graduate program in Temple's College of Public Health, which is accredited by the Council on Education for Public Health (CEPH).

**Job Prospects:** Graduates of the MS PHDS program are qualified to work as biostatisticians or data scientists in public health, pharmaceutical and research institutions, as well as many government organizations. Demand for data scientists with the ability to infer conclusions at the population level and make recommendations for public health and medicine currently exceeds supply by 50-60%. Job growth in the discipline is also projected to have a much faster rate of growth than average at 33% annually.

**Non-Matriculated Student Policy:** Non-matriculated students are required to speak with an advisor before registering for classes and to obtain the permission of the professor, whether the coursework is taken in the on-campus or online format. If accepted to the program, a maximum of three courses (9 credits) may be applied toward the degree program. Course selection should be made in consultation with

an advisor, and students should be aware that completion of coursework does not ensure admission into the program.

**Financing Opportunities:** Limited Teaching and Research Assistantships are available in the College of Public Health. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Students whose Fall applications are complete prior to or at the application deadline are reviewed for eligibility for Teaching Assistant (TA) positions. TAs can work 5 to 20 hours per week in any combination of teaching assignments made by the department and must meet the English Language Proficiency standards set by the University and the College. Students who hold Teaching or Research Assistantships are not permitted to hold other employment without the written prior approval of their advisor, the Director of Graduate Programs, and the Graduate School. Both assistantships carry a minimum stipend and full tuition remission for up to 9 credits per term. To be considered for a Teaching or Research Assistantship, complete an application form that is sent to students upon admission to the program. The completed application must be returned to [publichealth@temple.edu](mailto:publichealth@temple.edu) to be considered.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

All applicants to the MS PHDS program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200. ([annemarie@temple.edu](mailto:annemarie@temple.edu))

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with the applicant's academic competence and, if appropriate, research supervisors or mentors.

**Coursework Required for Admission Consideration:** Proficiency in statistical programming and a minimum of 6 credits of undergraduate quantitative and/or analytical methods (statistics, research design, etc.) are required.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** Write a well-considered 500- to 1,000-word statement of purpose that articulates your interests in public health and our program in particular. Craft your statement to specifically address the following questions:

- Why are you pursuing this master's degree program, and what are your particular areas of interest in public health?

- How does the MS PHDS within Temple's Department of Epidemiology and Biostatistics best fit your public health interests?
- What are your career goals, and how will this degree help you to achieve these goals?
- What are your plans in the first few years after graduation?

#### Standardized Test Scores:

GRE: Required. While the program takes a portfolio approach to admissions, standardized tests provide important insight into quantitative and verbal abilities. Scores above the 75th percentile on both the verbal and quantitative sections of the test are desired. Official GRE scores should be sent to SOPHAS using code 0151.

Standardized tests considered in lieu of the GRE include DAT, GMAT, MCAT, OAT and PCAT.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Interview:** An interview may be required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an accredited institution are considered for transfer into the MS PHDS degree program. Such courses are reviewed by the MS Graduate Program Director to determine whether they are equivalent to coursework offered at Temple and fulfill any degree requirements. The grade must be a "B" or better in order to transfer and have been earned within five years of applying to the program. The maximum number of credits that may be transferred into the MS program is 6.

## Program Requirements

#### General Program Requirements:

*Number of Credits Required to Earn the Degree: 36*

*Required Courses:*

Code	Title	Credit Hours
<b>College Core Courses</b>		
EPBI 5201	Epidemiological Research Methods I	3
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions	0
<b>Public Health Data Science Core Courses</b>		
EPBI 5002	Biostatistics	3
EPBI 8012	Multivariable Biostatistics	3
EPBI 8208	Data Management and Analysis	3
STAT 8001	Probability and Statistics Theory I	3
STAT 8002	Probability and Statistics Theory II	3
Select one from the following programming courses:		3
HIM 5102	Applications of Computer Programming in Health Informatics	
HIM 5190	Special Topics <sup>1</sup>	
HIM 5299	Introduction to Language Processing and Text Mining for Health Professionals	
<b>Public Health Data Science Electives</b>		
Select four from the following:		12
EPBI 8201	Structural Equation Modeling	
EPBI 8204	Multilevel Mod in Int Res	
EPBI 8302	Behavioral Measurement	
EPBI 8304	Applied Statistical Methods for Incomplete Data Analysis	
EPBI 8305		
EPBI 8306		
EPBI 8403	Applied Concepts and Methods in Health Research	
GUS 5069	GIS for Health Data Analysis	
<b>Consulting Practicum</b>		
EPBI 9187	Biostat Cnslt Practicum	3
<b>Total Credit Hours</b>		<b>36</b>

1

Students are expected to take "Applications of Computer Programming in Health Informatics" as the HIM 5190 Special Topics course.

**Minimum Grade to be Earned for All Required Courses: B-**

#### Culminating Event:

*Biostatistics Practicum:*

Biostatistics is a field concerned with research subjects motivated by real data and problems in public health, biology and medicine. Through our Biostatistics Core, students gain critical hands-on experience in collaborative projects. EPBI 9187 Biostat Cnslt Practicum is a project-based course that prepares students to collaborate effectively as biostatisticians in the workforce. Emphasis is on providing hands-on experience using statistical techniques on real-life applications and developing communication and problem-solving skills. This course is designed for graduate students to achieve fluency in widely used statistical software, such as R and SAS, for the analyses of data from observational and/or interventional research studies.

## Recreational Therapy MS

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Science in Recreational Therapy.

### About the Program

The 36-credit online MS in Recreational Therapy is designed for individuals who want to advance their knowledge and skills related to evidence-based practice within healthcare and human services. The curriculum teaches from a conceptual model of health promotion and rehabilitation and maintains a lifespan perspective in three core areas: health, disability and leisure. The primary focus of academic and clinical preparation is on training recreational therapists to use play, recreation and leisure to achieve and maintain goals related to health promotion, rehabilitation and full participation in an active, meaningful life. Specialization coursework can be used to meet advanced certification.

The faculty utilize contemporary educational and learning technologies to impart the most current cutting-edge practitioner and leadership skills central to today's healthcare and human service provision. This is done while maintaining the timeless concepts of health, recreation and leisure as that is what drives the human spirit. The online MS in Recreational Therapy program is designed for those who strive to be leaders in recreational therapy and share a drive to improve the lives of others while harnessing the value inherent in, and benefits derived from, recreational activities.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Online, with a combination of asynchronous components (discussion boards and other assignments completed by students on their own time) and synchronous components (web conference-based live class discussions, chat rooms and video meetings)

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** Interdisciplinary study is encouraged and may be geared toward the student's personal interests (e.g., counseling, exercise science, special education). The diversity of departments and programs in the College of Public Health presents abundant opportunities for cross-disciplinary learning. Additionally, part of the academic experience in the Department of Health and Rehabilitation Sciences involves inter-professional education.

**Affiliation(s):** Numerous healthcare and human service agencies in Philadelphia and the surrounding Delaware Valley region cooperate with the Department of Health and Rehabilitation Sciences and offer opportunities for student training and research. These include nationally recognized rehabilitation facilities such as Children's Hospital of Philadelphia, Magee Rehabilitation Hospital, MossRehab, the Princeton Medical Center, Shriner's Hospital, the Temple University Hospital and Health System, and the Variety Club Camp and Developmental Center.

Additionally, graduate students are encouraged and supported to complete internships/clinical practicums in an extensive network of agencies cultivated by the program over the years. These include placements across the country, including California, Colorado, Florida, Georgia, Illinois, Montana and Virginia.

**Ranking:** The faculty and the program are nationally recognized for excellence and have received numerous national and state awards for their contributions. Graduates of the program consistently perform well on the national credentialing examination for certified recreational therapists.

**Accreditation:** The academic program meets or exceeds all current curriculum standards issued by the National Council for Therapeutic Recreation Certification (NCTRC) and other professional organizations.

**Areas of Specialization:** Faculty members specialize and offer learning opportunities in adapted sport and inclusive recreation, behavioral health, geriatrics, health promotion and rehabilitation, pediatrics and physical rehabilitation.

**Job Prospects:** Graduates of the program are highly sought for advanced clinical/management positions in adult day programs, assisted living facilities, community settings providing specialized services to individuals with disabilities, hospitals, nursing homes and pediatric facilities. Graduates who use the degree to enter this field are also highly sought after to begin practicing as recreational therapists.

**Licensure/Certification:** A license is required to practice recreational therapy in the following states: New Hampshire, New Jersey, North Carolina, Oklahoma and Utah. The National Council for Therapeutic Recreation Certification (NCTRC) administers an examination that students must pass in order to become a Certified Therapeutic Recreation Specialist (CTRS). Graduates from Temple's Master of Science in Recreational Therapy program meet the educational eligibility requirements to sit for the NCTRC exam. For more information, visit <https://www.atra-online.com/page/CertandLicense>.

**Non-Matriculated Student Policy:** Students are allowed to take up to 9 credits of graduate coursework before matriculation. Selection of courses must be made in conjunction with the Graduate Program Director in the Department of Health and Rehabilitation Sciences.

**Financing Opportunities:** Limited funding opportunities are sometimes available in the form of teaching or research assistantships or externships:

- Assistants are expected to devote up to 20 hours per week to teaching or research obligations. Availability depends on courses offered or whether faculty have externally funded research grants. Assignments vary depending on the nature of the grant. Assistantships carry a stipend and partial or full tuition remission.
- Graduate Externs are hired by other divisions of the university, which make offers directly. For example, Campus Recreation hires externs to conduct student recreation events, and the Institute on Disabilities hires externs to assist with various projects. Externs do not receive tuition remission.

Applying for a position as a Teaching or Research Assistant or Graduate Extern is done online and involves outlining relevant qualifications and experience. Students are notified as opportunities become available.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

All applicants to the MS in Recreational Therapy program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

### Letters of Reference:

*Number Required:* 3

*From Whom:* One letter of recommendation should be written by a faculty member who can comment on your academic ability. The others can be from professional references who can speak to your work-related competencies.

**Coursework Required for Admission Consideration:** If admitted, students lacking NCTRC national credentialing are required to take leveling and supportive undergraduate courses, in addition to the MS degree requirements, prior to completion of 15 credits in the program.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree from an accredited institution is required. All undergraduate majors are considered. A GPA of 3.0 or higher on a 4.0 scale is required, but applicants with a GPA below 3.0 may be considered for admission based on scores at or above the 65th percentile on the Graduate Record

Exam (GRE) or Miller Analogy Test (MAT) or a GPA of 3.25 in 9 credits of graduate-level coursework.

**Statement of Goals:** Write an essay of approximately 1,000 words that responds to these questions:

- How have your recreation and leisure experiences contributed to your health and personal growth? Consider different areas of wellness and how these components have interacted and influenced each other in your life.
- What, if any, experience do you have in working with individuals with disabilities?
- What are your interests in and career goals related to recreational therapy?

Your essay is evaluated on the quality of your writing and synthesis of ideas, which are expected to be of a certain standard at the master's level. It benefits your application if you highlight relevant active volunteerism, work experience(s) that developed relevant skills, and/or past leadership experience. The essay allows the department to determine your fit with the program.

### Standardized Test Scores:

GRE/MAT: Optional, although applicants who believe GRE scores would complement their application are encouraged to submit scores to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current professional resume required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an accredited institution are considered for transfer into the MS in Recreational Therapy degree program. Such courses are reviewed by the MS Program Coordinator to determine whether they are equivalent to coursework offered at Temple and fulfill any degree requirements. The grade must be a "B" or better in order to transfer and have been earned within five years of applying to

the program. The maximum number of credits that may be transferred into the MS program is 6.

**Clearances:** The Recreational Therapy MS program requires students to complete clinical/field education experiences at various facilities. These placements require criminal background checks, Act 33/34 clearances, and perhaps a drug screen. Placements may also require the student to maintain personal health insurance and/or to submit proof of a physical and immunization records. The results of these requirements may limit and potentially eliminate placement options for the student, thus resulting in their inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent the individual from becoming credentialed and/or licensed to practice in the field of therapeutic recreation.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:*

- 36 for those who hold NCTRC national certification (see Course Sequence A).
- 36 plus 3 credits of Recreational Therapy-specific leveling coursework for those without NCTRC national certification (see Course Sequence B). Note that other supportive coursework may be required to sit for the national credentialing examination for therapeutic recreation specialist certification. Specialization electives can be used to meet advanced certification from NCTRC after one year of full-time employment as a recreational therapist.

*Required Courses:*

### Course Sequence A (for those with NCTRC national certification)

Code	Title	Credit Hours
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>1</sup>	0

#### A1: Required Core Graduate Courses

RCTH 5001	Graduate Research I in Recreational Therapy	3

RCTH 5314	Leisure-time Physical Activity and Community Engagement in Recreational Therapy
RCTH 5315	Social Engagement and Community Participation in Recreational Therapy
RCTH 5316	Measuring Health and Disability: The ICF Model
RCTH 5382	Independent Study

**Total Credit Hours** **36**

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Depending on one's undergraduate major, some requirements may have already been completed. These credits do not count toward the MS credit totals, but are needed in order to be eligible to sit for the NCTRC certification exam (see <https://www.nctrc.org/>). The MS Program Coordinator reviews official transcript(s) and identifies any coursework needed. Any uncompleted requirements may be taken at an institution other than Temple University, with approval of the MS Program Coordinator. All required leveling/supportive undergraduate coursework must be completed by the time the student has accrued 15 credits in the MS program at Temple University.

3

RCTH 5787 Recreational Therapy Practicum is a 600-hour field placement experience under the supervision of a full-time Certified Therapeutic Recreation Specialist (CTRS) at an approved agency site. The student works with a faculty advisor in the selection of a site for this experience. RCTH 5787 is designed to meet NCTRC internship requirements for eligibility to sit for the NCTRC certification exam.

**Minimum Grade to be Earned for All Required Courses: B-**

**Culminating Event:** Successful completion of coursework constitutes the culminating event for the MS in Recreational Therapy.

## Social and Behavioral Sciences MPH

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Public Health in Social and Behavioral Sciences.

### About the Program

The Department of Social and Behavioral Sciences offers the Master of Public Health in Social and Behavioral Sciences (MPH-SBS). The MPH in SBS is a terminal, professional degree that prepares students to design, implement and evaluate interventions directed toward public health problems in communities, within the lens of inclusive practice. This program aims to prepare public health practitioners to identify and assess the needs of populations; plan, implement and evaluate programs to address those needs; and ensure that the needs of diverse populations are met to improve overall health status and outcomes. The program has a strong focus on addressing the behavioral, social and cultural factors related to individual and population health and health disparities over the life course, as well as the social and behavioral aspects of community health, health communication, program implementation and evaluation, and health education. Research and practice in this area contribute to the development, administration and evaluation of programs in public health, which promote and sustain healthy lives for individuals and communities.

Applicants to the MPH in Social and Behavioral Sciences can choose between our on-campus and online programs, both of which adhere to the same competency-based curriculum and content. Only the delivery formats differ:

- The on-campus format is designed for students who prefer live interaction with instructors and fellow students, access to campus activities, and the opportunity to choose regional Philadelphia fieldwork placements with the assistance of our fieldwork coordinator. Students can enroll full-time or part-time. While some courses may be offered online or in hybrid formats, most of the coursework is delivered in person over a full 16-week academic term during evening hours.
- The online format is designed for working professionals interested in completing their degree remotely with courses that include synchronous classes held via Zoom and asynchronous activities. Students can enroll full-time or part-time. A fieldwork coordinator

works with students to find appropriate placement in their preferred geographic location.

For more information about the on-campus or online MPH program, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main for in-person instruction or Online

**Full-Time/Part-Time Status:** Full-time students usually complete the program within two academic years, while part-time students usually take three to four years to complete their degree.

**Interdisciplinary Study:** Interdisciplinary MPH coursework, research and interactions with students and faculty in other departments are encouraged to give students as broad a perspective as possible to excel in the complex, diverse and dynamic state of public health. Through associations with research laboratories in the Department of Social and Behavioral Sciences, such as the Center for Obesity Research and Education, the Health Behavior Research Clinic, the Health Disparities Research Lab, the Risk Communication Laboratory, and the Social and Behavioral Health Interventions Laboratory, as well as other laboratories throughout the College, students have access to over 100 faculty at Temple University and additional regional scholars who are actively involved in programs, research and teaching in public health. Further, as with other MPH degree programs offered by the College of Public Health, the MPH in Social and Behavioral Sciences can be undertaken as part of these dual MPH degree programs:

- MD/MPH with the Lewis Katz School of Medicine at Temple University
- MS Health Informatics/MPH within the Temple University College of Public Health
- MSW/MPH with the Temple University School of Social Work

For more information, visit <https://www.temple.edu/academics/dual-degree-programs> or contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu).

**Affiliation(s):** The MPH-SBS maintains dozens of affiliation agreements with community partners relevant to public health professionals studying and applying social and behavioral interventions to address public and community health priorities. MPH students choose community agency fieldwork placement from this array of options throughout the Philadelphia region and beyond. For example, the program has long-standing research and fieldwork affiliations with The Food Trust; Fox Chase Cancer Center; Health Federation of Philadelphia; Maternity Care Coalition; NORTH, INC.; Philadelphia Department of Public Health; Public Health Management Corporation (PHMC) and its subsidiaries; the School District of Philadelphia; and many other community health agencies. These partnerships allow us to offer students a wide range of fieldwork opportunities to translate skills learned in the classroom to actual practice in the community.

The MPH fieldwork coordinator assists online students in finding appropriate placement in their preferred geographic region.

**Study Abroad:** Depending on faculty availability, study abroad opportunities may be offered during the summer and are open to both undergraduate and graduate students.

**Accreditation:** The MPH is fully accredited by the Council on Education for Public Health (CEPH). Achieving accreditation in 1985, Temple's MPH program is one of the longest established accredited MPH programs in the country.

**Areas of Specialization:** The MPH degree program is offered in six specialty fields of study:

- Applied Biostatistics (APBIO)
- Environmental Health (EH)
- Epidemiology (EPI)
- Health Policy and Management (HPM)
- Nutrition (NUTR)
- Social and Behavioral Sciences (SBS)

Students in the Social and Behavioral Sciences MPH program may complete transcripted College of Public Health certificate programs by taking their 9 credits of electives in the relevant coursework. For questions about certificates, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Job Prospects:** Graduates with an MPH in Social and Behavioral Sciences have positions in a wide range of health-related settings, including state and local public health departments, community-based organizations, voluntary health agencies, health maintenance organizations, hospitals, clinics, schools and public health-related work sites. Graduates are employed as health educators and counselors, evaluation specialists, marketing specialists, prevention specialists, project directors, research and community health program managers, HIV/AIDS coordinators, infection control coordinators, adjunct faculty and consultants. Virtually all students are placed within three to six months of graduation.

**Licensure/Certification:** Students who complete an MPH at Temple University are eligible to sit for the Certified in Public Health (CPH) exam offered by the National Board of Public Health Examiners and the Certified Health Education Specialist (CHES®) exam offered by the National Commission for Health Education Credentialing, Inc. (NCHCEC). For more information about credentialing in public health, visit <https://www.nchec.org/>.

**Non-Matriculated Student Policy:** Non-matriculated students are required to speak with an advisor before registering for classes and to obtain the permission of the professor, whether the coursework is taken in the on-campus or online format. If accepted to the program, a maximum of three courses (9 credits) may be applied toward the degree program.

**Financing Opportunities:** Limited Teaching and Research Assistantships are available in the College of Public Health and are assigned on a competitive basis among students who academically excel. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Students whose Fall applications are complete prior to or at the application deadline are reviewed for eligibility for Teaching Assistant (TA) positions. TAs can work 5 to 20 hours per week in any combination of teaching assignments made by the department and must meet the English Language Proficiency standards set by the University and the College. Students who hold Teaching or Research Assistantships are not permitted to hold other employment without the written prior approval of their advisor, the Director of Graduate Programs and the Graduate School. To be considered for a Teaching or Research Assistantship,

complete an application form that is sent to students upon admission to the MPH program.

In both the Fall and Spring terms, the College of Public Health and Department of Social and Behavioral Sciences award a limited number of partial scholarships on a competitive basis to students with an outstanding academic record. No separate application is needed for these awards as outstanding applicants are automatically considered following submission of their application. Other available scholarships are listed at <https://cph.temple.edu/admissions/scholarships>. Students may also be eligible for financial support through the Office of Student Financial Services. For more information, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

All applicants to the MPH program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Deposit Deadline for Admitted Applicants:

*Fall:* April 30  
*Spring:* December 15

Applicants who are accepted to the program must pay a \$500 deposit to secure their enrollment. For questions about the deposit and payment process or to request an extension, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with academic competence. If the applicant has been out of school for an extended period of time, ensure that letters are provided by supervising employers or professional colleagues who can discuss your relevant academic skills, including critical thinking, research and writing.

**Coursework Required for Admission Consideration:** Applicants' files are reviewed for undergraduate coursework in mathematics and/or statistics, social sciences and writing. Applicants who completed prior graduate coursework or earned a graduate or professional degree are expected to submit such documentation as this will be considered in the application review.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0.

**Statement of Goals:** In 500 to 1,000 words, address the following questions:

- Why are you pursuing the MPH in Social and Behavioral Sciences, and what are your particular areas of interest in the field?
- What are your future career goals, and what have you done either academically or professionally to guide your interest in public health and to begin preparation toward your career goals?
- Are there any exceptional circumstances related to previous academic performance that you would like the Admissions Committee to consider?

### Standardized Test Scores:

GRE: Optional. While the program takes a portfolio approach to admissions, standardized tests provide important insight into quantitative and verbal abilities. If submitted, scores above the 50th percentile on both the verbal and quantitative sections of the test are desired. Official GRE scores should be sent to SOPHAS using code 0151.

Standardized tests considered in lieu of the GRE include DAT, GMAT, LSAT, MCAT, OAT and PCAT.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an MPH program accredited by the Council on Education for Public Health (CEPH) may be transferred into the MPH. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The MPH program director approves the transfer of credits based on a review of course materials provided by the student. The maximum number of credits a student may transfer is 9.

**Clearances:** The MPH program requires students to complete fieldwork education. In the MPH program, it is the fieldwork site that determines the clearances, such as criminal background check and FBI fingerprinting, needed by a student. The results of these clearances determine whether a student may be onboarded at a respective site.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 42

Required Courses:

Code	Title	Credit Hours
<b>College Core Course</b>		
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions	0
<b>Public Health Core Courses</b>		
ENVH 5004	Environmental Health	1.5
EPBI 5006	Biostatistics and Applied Analysis of Health	4.5
EPBI 5101	Fundamentals of Epidemiology	3
HPM 5006	Political and Economic Aspects of Health	3
SBS 5001	Fundamentals of Public Health	3
SBS 5002	Program Planning, Theory, and Practice	3
<b>Social and Behavioral Sciences Core Courses</b>		
SBS 8001	Research Methods in Public Health	3
SBS 8009	Health Psychology	3
SBS 8105	Health Communication	3
<b>Social and Behavioral Sciences Electives <sup>1</sup></b>		<b>9</b>
Select three from the following:		
SBS 5004	Understanding Stress and Change	
SBS 5105	Maternal and Child Health	
SBS 8005	Health Promotion in Vulnerable Populations	
SBS 8006	Addictions and Dependencies	
SBS 8018	Obesity: From Genes to Junk Food	
<b>MPH Fieldwork Experience</b>		
SBS 9289	MPH Fieldwork I	3
SBS 9389	MPH Fieldwork II	3
<b>Total Credit Hours</b>		<b>42</b>

1

Students may select as electives any of the courses listed or, with approval, other graduate courses offered by the College of Public Health.

### On-Campus Full-Time MPH-SBS

Year 1		Credit Hours

**Minimum Grade to be Earned for All Required Courses: B-**

#### **Culminating Events:**

##### *Fieldwork Practicum:*

Students are required to synthesize and integrate the knowledge acquired in coursework and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice through an internship or practicum experience with a public health agency, health services organization, or under the supervision of a faculty preceptor. The MPH fieldwork experience serves as the applied practice experience as required by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health, for completion of the Master of Public Health degree. In addition, this applied practice experience provides the student with the opportunity to develop expertise in a topic area and to contribute original and independent observations to a body of knowledge.

##### *Evaluative Paper:*

For the applied practice experience to fulfill the requirements of SBS 9289 and SBS 9389, MPH in Social and Behavioral Sciences students are expected to complete a fieldwork experience. The required deliverable for the MPH fieldwork requirement is a final evaluative paper. Students must demonstrate their proficiency and the application of theory and principles in the paper.

## **Social and Behavioral Sciences PhD**

COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Philosophy in Social and Behavioral Sciences.

### **About the Program**

The Department of Social and Behavioral Sciences administers the PhD in Social and Behavioral Sciences (PhD-SBS). This program provides advanced training in theory, methods and research related to social and behavioral influences on population health that prepares students for advanced research and scholarship. The program provides experiences that support interdisciplinary learning; promote critical and theory-based problem-solving skills to address public health threats; and foster the development of professional values and ethics. Heavy emphasis is placed on scientific foundations, research methods and statistics as well as hands-on research experience.

Coursework and experiential learning emphasize the dynamic interaction of individual difference characteristics, social circumstances and situational factors influencing health-promoting and health-damaging behavior and behavior change. Required research courses, structured research experiences each academic term, departmental professional development seminar presentations, and coursework in teaching and grant writing expand students' knowledge and application of research methods and analytic techniques while facilitating professional development and scholarship. Students choose advanced training opportunities in concentration electives in close consultation with a faculty mentor to ensure proper breadth and depth of training in their emerging areas of expertise. Typically, courses in the PhD program are delivered on campus, but some courses may be offered in an online or hybrid format.

Students' active engagement in faculty-mentored scholarly activities outside of coursework is expected throughout program residency. These efforts facilitate students' development of an independent research focus that will lead to their dissertation project, research presentations and scientific journal article submissions. For example, a publishable first-authored paper is required within the first two years of residency (i.e., prior to sitting for the preliminary examinations) to facilitate students' focus on scholarship leading to their culminating dissertation research project.

Many opportunities lie in the Department of Social and Behavioral Sciences for research mentorship with internationally renowned faculty affiliated with dynamic research laboratories and centers, including the Center for Obesity Research and Education, Collaborative on Community Inclusion, Health Behavior and Research Clinic, Health Disparities Research Laboratory, Health Psychology Research Group, Mental Health Services Research Lab, Risk Communication Laboratory, Shared Decision Making Lab, Siminoff Research Group, and Social and Behavioral Health Interventions Laboratory. Collectively, centers and labs in the Department of Social and Behavioral Sciences develop, test and evaluate interventions aimed at resolving significant public health problems in high-risk and vulnerable populations. Examples of research content areas in which department faculty are actively involved include cancer control (e.g., smoking cessation); cancer prevention and

decision-making (e.g., early detection and screening); cancer survivorship (e.g., online and live support groups); ethnic and racial disparities in cancer and obesity; health communication; healthcare decision-making (e.g., genetic testing, organ transplant, vaccinations); health systems research; obesity prevention and treatment; and violence. Research mentors in these labs offer opportunities for research placements and developing papers for publication and presentation at conferences; provide professional socialization; help define dissertation projects using existing funded studies; and may provide some funding in the form of Research Assistantships.

Students in the PhD-SBS program also are expected to actively engage and collaborate within the academic culture of the department and college. This includes participation in the monthly SBS graduate student seminar series, as well as journal clubs, colloquia and brown-bag research presentations.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is preferred.

**Interdisciplinary Study:** Students are encouraged to develop programs of study that are interdisciplinary in nature, involving coursework or scholarly activities across departments, schools and colleges.

**Affiliation(s):** Students are expected to work in close collaboration with their faculty research mentor in the Department of Social and Behavioral Sciences. In addition, students can consider collaborative research projects across affiliated units within the College of Public Health in coordination with their developing line of research and with approval of their research mentor and the PhD Program Director. A list of active research centers can be found on the College of Public Health website at <https://cph.temple.edu/departments-research/research-centers>.

Faculty and doctoral students also are involved in research with affiliates across the University, including the Fox Chase Cancer Center, the Fox School of Business and Management, the Institute on Aging, the Institute on Disabilities, the Lewis Katz School of Medicine, the Lew Klein College of Media and Communication, and the School of Podiatric Medicine. Additional research opportunities at Temple University include the Institute for Survey Research, the Office of Institutional Research and Assessment, and the Social Science Data Library.

**Job Prospects:** Students in the program develop public health content expertise and skills in research, scholarship, teaching and grant writing. Therefore, graduates of the PhD-SBS program are prepared to become faculty members or researchers in colleges and universities or to hold research-related positions in a wide range of organizations, such as agencies promoting community and public health, consulting firms, foundations, healthcare systems, nonprofits and research centers. Graduates are employed in health systems, hospitals and clinics, public health departments, public health and other healthcare and human service agencies, and universities.

**Non-Matriculated Student Policy:** Doctoral coursework is open only to students enrolled in the program.

**Financing Opportunities:** Full-time PhD students generally receive financial support through University fellowships or teaching and research assistantships with department faculty that provide partial to full tuition remission plus a stipend related to hours worked. Typically, University fellowships have provided tuition remission and a stipend for up to

four years of residency. For students without fellowships, funding is not guaranteed, but the majority of our students have secured funding through a combination of teaching assistantships, graduate research assistantships, and scholarship support. Twenty hours per week is considered a full-time assistantship.

*College of Public Health Graduate Assistantships:*

Graduate assistantships are sponsored by the College of Public Health:

- Graduate Research Assistants (RAs) perform supervised research activities. Research assistantships are frequently supported, in part, by a faculty mentor's grant funding for their research. Thus, RA availability can vary from academic year to academic year.
- Teaching Assistants (TAs) support faculty in the teaching of courses, with activities that include grading examinations/papers or teaching occasional lecture sections. Students develop competencies in current pedagogies that prepare them for academic teaching careers.

Consideration for admission with an assistantship requires a description of research and teaching experience; a statement of research and teaching goals; and identification of areas of interest, including identification of potential faculty mentors and articulation of career goals consistent with the mission and purpose of the PhD-SBS program.

Offers of admission are generally accompanied by a fellowship offer or information about assistantship support. Students with full funding from another source (e.g., government funding) are given full consideration in the admission process. The Graduate School website details the types of graduate student support.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* January 2

Admission into the PhD program is highly competitive. Not only must applicants display an exemplary academic record and potential for scholarship, but their research interests and area of emerging expertise must match those of Graduate Faculty who are available to take a new student. All applicants to the PhD-SBS program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

All application materials must be received by the deadline in order to be reviewed by the PhD Admissions Committee. Admission is competitive, and students are admitted only once a year. Applications are evaluated together after the deadline has passed. Applications that are completed after the deadline are held for review the following year. An important component of the admissions decision is the fit between the applicant's goals, experiences, and interests and the expertise of the faculty in the PhD program who are designated as "Graduate Faculty" and available to mentor an incoming student.

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's academic and research experiences and talents, as well as comment on the applicant's aptitude for doctoral-level study and research. Recommendations from college/university faculty members are preferred.

**Coursework Required for Admission Consideration:** Applicants are expected to have completed coursework in the natural, social or

behavioral sciences related to health. Coursework in statistics and research methods is desirable. The following prerequisites, which do not count toward the PhD, must also be satisfied, either through an MPH degree or course equivalency:

Code	Title	Credit Hours
EPBI 5002	Biostatistics	3
EPBI 5101	Fundamentals of Epidemiology	3
HPM 5006	Political and Economic Aspects of Health	3
SBS 5002	Program Planning, Theory, and Practice	3

**Master's Degree in Discipline/Related Discipline:** Nearly all students admitted to the program have a master's degree. Although a master's degree specifically in Public Health is not required, preference is given to applicants who have a background in the health sciences, including behavioral medicine, environmental health, epidemiology, health communication, health psychology, medicine or a public health discipline.

Students accepted without a master's degree are required to complete foundational courses in public health, epidemiology, and biostatistics prior to beginning doctoral coursework.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required, although it need not be in Public Health. Preference is given to applicants who have a background in the health sciences, including behavioral medicine, environmental health, epidemiology, health communication, health psychology, medicine or a public health discipline.

**Statement of Goals:** In no more than 750 words:

- identify the Social and Behavioral Sciences doctorate as the program for which you wish to be considered and why;
- describe important academic and research achievements and interests; and
- specify how your research interests relate to your ultimate career goals and to ongoing work by faculty members affiliated with the PhD-SBS program.

The match between faculty and student interests is important in the admissions decision. Be sure to articulate clearly the linkages among your training goals, the expertise of our faculty, and the training emphasis of the PhD program. For a description of faculty interests and active research, visit the Social and Behavioral Sciences Faculty webpage.

#### Standardized Test Scores:

GRE: Required. The median score of recently admitted applicants is above the 50th percentile on the verbal and quantitative subscales. Official GRE scores should be sent to SOPHAS using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current CV required.

**Writing Sample:** Scholarly articles, technical reports or academic papers are preferred. Unless it is a published work (e.g., a book chapter or peer-reviewed journal article), the writing sample should be no more than 10 pages.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Advanced Standing:** A student enrolled in the PhD-SBS program may apply for advanced standing credits for graduate coursework graded "B" or better from an accredited institution. Credits for courses taken as part of a master's degree are considered. Credits for thesis, fieldwork, clinical practice or directed projects/readings cannot be used for advanced standing credit. To be approved for advanced standing, the courses must be deemed appropriate as part of the student's training in the PhD-SBS program. The maximum number of advanced standing credits awarded is 9.

SBS 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>45</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Students may select an alternate advanced statistics course with the approval of the faculty mentor.

3

Students discuss gaps in their training or areas for scholarship development with their faculty mentor prior to completing the first four academic terms in the program. Based on this planning, students engage in a project with a research mentor, as approved by the Director of Graduate Studies.

4

With approval from the faculty mentor or PhD Program Director, students may select alternate electives from within the College and across the University. Advising helps students coordinate courses for additional methods training or to satisfy requirements for available certificates, such as the Interdisciplinary Health Communication graduate certificate.

5

If selected, SBS 9083 must be taken for 3 credits.

6

The Graduate School requires that students complete a minimum of 6 credits that include SBS 9994, SBS 9998, and SBS 9999. Of the 6 credits, at least 2 credits must be earned in SBS 9999.

7

Prior to enrolling in SBS 9994, a paper requirement must be fulfilled by the student who, under the advisement of the primary mentor, submits for review a publishable research article to a peer-reviewed journal.

#### Minimum Grade to be Earned for All Required Courses: B-

#### Culminating Events:

##### Area Paper:

Prior to sitting for the preliminary examinations, students must have successfully published or written a publishable paper in their chosen area of research interest. The purpose of the paper requirement is to demonstrate critical and interpretive knowledge in specialized areas of one's chosen program, as well as a high proficiency in written communication and a capacity to contribute to generalizable knowledge in the field. The student must be the lead or sole author. For students who enter the program without already having published a first-authored,

peer-reviewed article, they typically initiate efforts toward this requirement during their first term of residency.

A student cannot advance to the preliminary examinations without passing the paper requirement. Failure to satisfactorily complete the area paper requirement within the specified time frame can result in dismissal from the PhD program. Students who are entering the PhD program and have already published a peer-reviewed paper related to their programmatic subdiscipline can request to waive this requirement by completing a waiver application and submitting it along with the published document to the Director of Graduate Studies.

#### Preliminary Examinations:

Students typically take their preliminary examinations during their third year of residency in the program, after completing the paper requirement. All students are required to take the preliminary examinations prior to completing and defending their dissertation research proposal. The exams should be taken within one term of completing all coursework. Students are required to meet with their mentor and Director of Graduate Studies before the beginning of the term in which they plan to take the examinations to establish eligibility.

The preliminary examinations are designed to test fundamental core competencies of the students' training. The student must register for 1 credit of SBS 9994 in the term in which the examinations are taken. To register for SBS 9994, the student must have completed all coursework or be enrolled in final courses in the term in which the examinations are taken. Note that all Incomplete and/or "NR" grades must have been removed, and the area paper requirement must have been satisfied. Special authorization is required to register.

The preliminary examinations consist of the following components:

- A comprehensive one-week take-home written examination, with an emphasis on the student's concentration, about the scientific foundations as well as social and behavioral sciences underpinnings of public health; and
- A methods exam, which is a four-hour in-class examination on research methods and statistics.

Students who fail these exams may have one opportunity to take the examinations again. A second failure results in automatic dismissal from the PhD program.

#### Dissertation Proposal:

After passing the preliminary examinations, students may enroll in SBS 9998. Students must be enrolled for 1 credit of SBS 9998 each term until they file their dissertation proposal with the Graduate School.

All students must form a Doctoral Advisory Committee (DAC) with the approval of the Director of Graduate Studies. The DAC is composed of at least three Graduate Faculty members: two members, including the chair, must be from the PhD program faculty of the Department of Social and Behavioral Sciences. The DAC Chair must be approved as Doctoral Graduate Faculty by the Dean of the College of Public Health and by the Graduate School. The chair is responsible for overseeing and guiding the student's progress; coordinating the responses of the Committee members; and informing the student and the Director of Graduate Studies annually of the student's academic progress. A fourth, external reader is also required at the time of the final dissertation defense. This person must be a member of the Graduate Faculty at Temple or approved by the Dean of the College to take part in the final dissertation examination.

This fourth member is not required to be present at the defense of the proposal.

To fulfill the requirements of SBS 9998, students must submit a dissertation proposal, successfully defend it orally before their Committee, apply for Institutional Review Board (IRB) approval for the proposed research, and submit the proposal to the Graduate School. Students have a maximum of one year from the time of completing their preliminary examinations to develop and defend their dissertation proposal. Thus, students may enroll in SBS 9998 for only two terms without permission. Students needing more time may, with the support of their mentor, formally petition the Director of Graduate Studies for an extension, although an extension is not guaranteed. Failure to meet these requirements can result in dismissal from the program.

*Dissertation:*

The doctoral dissertation is an original theory-based research study that makes a significant contribution to the field of Public Health. It should expand existing knowledge and demonstrate the student's mastery of theory and research methods, particularly within a concentration or specialty area. The research should be rigorous, while upholding the ethics and standards of the field. Students are expected to submit their dissertation study for publication and presentation to professional audiences.

To fulfill the dissertation requirement, students must prepare and orally defend the final dissertation in a public meeting. Students should present their plans for publishing their dissertation as part of their defense. Students must be enrolled continuously in SBS 9999 until their dissertation is successfully defended. The Graduate School requires a minimum of 2 credits of SBS 9999. Students must be enrolled in the course in the term that they graduate.

The Dissertation Examining Committee (DEC) consists of the DAC plus at least one additional external reviewer. The external reviewer must be doctorally prepared. If this person is not a member of the Temple University Graduate Faculty, they must be approved by the Director of Graduate Studies, the Dean of the College, and the Graduate School to take part in the final dissertation examination. The DEC evaluates the student's written dissertation and oral defense, including the student's ability to articulate orally the research question; methodological approach; primary findings; interpretation of the findings; and implications for theory, research and practice. The DEC votes to pass or fail the dissertation and the defense at the conclusion of the public presentation.

If a student needs to change a member of a committee, the new member must be approved by the Director of Graduate Studies and registered with the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their DEC and work with their department's administrative assistant to secure a room. This should be done at least one month in advance of the proposed date. The administrative assistant arranges the time, date and room within two working days. After the time, date and room are secured, the student must send to the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms." This must be submitted at least 10 working days before the defense. The Department of Social and Behavioral Sciences posts flyers announcing the defense, and the Graduate School lists the defense on its website.

## Social Work MSW

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Social Work.

### About the Program

The School of Social Work is dedicated to the pursuit of societal transformations that eliminate social, political and economic injustices for systemically and structurally oppressed and marginalized populations and advance the quality of life for all through:

- education emphasizing the discovery of knowledge, use of critical inquiry, and application of professional ethics to effect social change among social workers in front-line, supervisory, managerial and leadership positions;
- research and scholarship that advances applied knowledge and generates evidence-based strategies to resolve problems between people and their social environments at the local, state, national and global levels;
- public service that aids in the dissemination of knowledge and evidence-based strategies;
- collaborations and partnerships with communities, agencies and organizations in response to the needs of constituents; and

- trauma-informed modalities used to support mental, physical, physiological, social and overall wellness of individuals and communities.

Flexible programming is offered for the MSW and includes:

**Regular Entry** — Applicants with a bachelor's degree may apply for the 60-credit MSW degree, which has been accredited by the Council on Social Work Education (CSWE):

- Full-time students pursue a degree (15 credits per term) for 2 years, excluding summers. Admission for full-time study is in the Fall term only.
- Part-time students pursue their degree (6 then 9 credits per term) over a 3-year period, including summers. Admission for part-time study is in the Fall and Spring terms.

**Advanced Standing** — Applicants must have earned a BSW degree within the last 5 years from a CSWE-accredited school of social work and be selected for advanced standing status:

- Full-time students begin in Summer I and finish in 12 months, taking 4.5 credits during the Summer term and 15 credits, per term, in the Fall and Spring terms.
- Part-time students begin in Summer I and finish in 18 months, taking 6 or 9 credits in their first Fall, Spring, Summer and final Fall terms. Admission is in the Summer term only.

Students who are accepted for Advanced Standing have 25.5 credits from the BSW program applied to the MSW program. They fulfill the requirements for the 60-credit MSW program by completing 34.5 credits in Temple University's CSWE-accredited MSW program.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main (full- and part-time) and Online (part-time). Most courses are offered in an in-person format for campus-based students, although to increase choice, some courses are offered only in an online format.

**Full-Time/Part-Time Status:** Course times are structured to offer a broad range of flexible options for students, many of whom are employed while engaged in their program of study at Temple. Students who are employed full-time are strongly advised to pursue the part-time program.

**Interdisciplinary Study:** The College of Public Health offers a dual master's degree in Social Work and Public Health. The MSW can be undertaken with any of these MPH programs:

- Applied Biostatistics
- Environmental Health
- Epidemiology
- Health Policy and Management
- Nutrition
- Social and Behavioral Sciences

Interested applicants complete one application that is reviewed by both Social Work and Public Health faculty for admissions consideration.

In partnership with the Beasley School of Law, the School of Social Work offers a dual degree JD-MSW program. Interested applicants apply to the JD and MSW programs separately. In each application, students note their interest in the dual degree JD-MSW program. The first year

of coursework is composed entirely of JD courses. The second through fourth years of coursework include a mixture of JD and MSW classes.

Interested applicants can find additional information at <https://www.temple.edu/academics/dual-degree-programs>.

The School of Social Work is currently working to provide additional dual degree options for students.

**Study Abroad:** Students are permitted to complete up to 6 credits in elective courses abroad. They should consult with their advisor about the timing of degree requirements.

**Ranking:** The School of Social Work at Temple University's College of Public Health is ranked No. 46 among the nation's schools and programs of social work in the 2023 edition of *U.S. News & World Report*, climbing 13 spots since the previous ranking. With 298 schools and programs ranked, Temple University's School of Social Work is in the top 20% nationwide.

**Accreditation:** The MSW degree program is accredited by the Council on Social Work Education (CSWE).

**Areas of Specialization:** Faculty are engaged in a number of research and service projects pertaining to child welfare, family and community violence, gender identity and sexual orientation, HIV-AIDS, homelessness, intimate partner violence (IPV), involvement of fathers in families, mental and physical health, obesity, older adults, people with disabilities, political social work, poverty, racial equity and inclusion, organizational change theories, multiracial identity development, rural community engagement, social capital development, and substance use and recovery.

**Job Prospects:** Graduates of the MSW program find employment in public and private social service agencies, as well as in profit and nonprofit organizations. Their work encompasses a broad range of responsibilities, including community organizing, counseling, management, program design and implementation, supervision and training. Graduates are also employed in many different fields of practice, such as adoption support, aging, child protection, community organizing, criminal justice, developmental disabilities, employment-based social work, HIV/AIDS, hospice care, medical social work, mental health counseling, political social work, school social work and substance use.

**Licensure/Certification:** States vary in their requirements for a license to practice social work, with many also offering different levels of licensing. Certain jobs in the field of social work require licensing. Graduates should contact their local chapter of the National Association of Social Workers (NASW) and their advisor for information on the specific requirements for licensing in their state.

The Association of Social Work Boards (ASWB) administers a licensure examination that is required to practice as a licensed social worker with an MSW in the following states: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Delaware, Florida, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin and Wyoming. For more information about state licensure, visit <https://www.aswb.org/licenses/how-to-get-a-license/>.

Because Temple University's Master of Social Work program is accredited by the Council on Social Work Education (CSWE), completion of Temple University's MSW program qualifies students to sit for the ASWB licensure examination.

**Non-Matriculated Student Policy:** Students must apply for admission to the MSW program and be offered the non-matriculated student option. This option is for students who are ultimately seeking the MSW but do not fully meet the admissions requirements.

**Financing Opportunities:** The School of Social Work awards some aid each year to assist meritorious applicants and continuing students in meeting the cost of their educational program. Awards include partial scholarships and stipends provided by local public and voluntary agencies. Awards are made on the basis of academic merit and the overall promise shown by an applicant for contributing to the School and to the profession. Additional considerations include interest in particular areas of practice and the School's commitment to maintaining diversity in the student body. Some awards are granted at program admission, while others are designed to support our advanced year, continuing students.

Awards made by the School of Social Work ordinarily meet only part of the student's total educational expenses. All students are, therefore, expected to make use of other resources as well as federal grant, loan and work-study assistance to help meet the cost of their education. Temple University's Office of Student Financial Services provides assistance with the federal grant/loan/work-study application process.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Regular Entry Admission:* March 1

Early application is encouraged. The School of Social Work has a limited number of scholarships to award, and these scholarships are awarded on a rolling basis.

*Spring Regular Entry Admission:* November 1

*Summer Advanced Standing Admission:* April 1

Early application is encouraged. The School of Social Work has a limited number of scholarships to award, and these scholarships are awarded on a rolling basis. Students who are completing BSW coursework are encouraged to apply in January after their Fall grades have posted to their transcript.

All applicants to the MSW program must apply via the Sophas Express System at <https://sophasexpress.liasoncas.com/applicant-ux/>. Admission to Temple's MSW program is competitive, so applicants are advised to apply early and to ensure that all supporting documents are received by the Sophas Express System before the deadline.

### Letters of Reference:

*Number Required:* 3, with submission made at SOPHAS Express

*From Whom:* For regular entry, letters of recommendation should be obtained from faculty and professionals familiar with the applicant's academic competence and/or professional work experience. Applicants who have graduated from college within the last five years should submit at least one reference from a professor or an official of the degree-granting institution. Those with employment experience in the social services or a related field should submit at least one reference from a supervisor or administrator at their place of employment.

If seeking advanced standing, applicants should obtain three references, one of which should be prepared by the BSW Program Director, Senior Practice Seminar Course Instructor, Field Instructor or Field Coordinator. The letter should indicate the applicant's readiness for advanced standing.

**Coursework Required for Admission Consideration:** Social Work education draws heavily from the rich and broad foundation provided by a liberal arts curriculum. All applicants are expected to have completed an undergraduate course of study reflecting this liberal arts foundation.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA for regular entry applicants is 3.0 on a 4.0 scale or 3.5 in the last 2 years of study (i.e., 60 credits of the bachelor's degree). In addition, an applicant who has completed at least 9 credits of graduate coursework with a cumulative GPA of 3.25 may be considered for admission.

A bachelor's degree in Social Work (BSW) is required for Advanced Standing applicants. Applicants for advanced standing must have achieved an undergraduate GPA of 3.25 in all undergraduate coursework and at least 3.25 in their junior/senior years. For detailed information, visit <https://cph.temple.edu/ssa/degrees-offered-master-social-work/msw-admissions>.

**Statement of Goals:** A statement of professional plans and goals is an important component of the admissions application in Social Work. It provides an opportunity for applicants to show their motivation for pursuing graduate study in the field of Social Work, relevant personal and professional experiences, and knowledge of diversity and social justice. This essay is evaluated on the basis of the applicant's ability to reflect on and summarize significant and relevant experiences, to conceptualize and think critically, and to write proficiently. Please respond to the specific question prompts listed on SOPHAS Express. All applicants should submit their essay at SOPHAS Express.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current professional resume required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are

reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Advanced Standing:** Applicants from a BSW program accredited by the Council on Social Work Education (CSWE) may be eligible for advanced standing. This enables students, after a required summer critical thinking course that begins in June, to start the second year of study at the advanced curriculum level. To be considered for advanced standing, students must, in addition to meeting minimum requirements, have:

- earned the BSW no more than five years prior to applying;
- achieved an overall undergraduate GPA of 3.25, in addition to a 3.25 GPA in their junior and senior years; and
- received no more than one "C" grade in Social Work courses; that is, all other Social Work grades must be "B" or better.

Applicants for advanced standing must also submit:

- Three references, preferably one from the Senior Practice Seminar Course Instructor, one from the applicant's Field Instructor for the senior practicum, and the third from the BSW Program Director or another academic source.
- A copy of the Field Instructor's evaluation form from the undergraduate placement.

Students who have completed their foundation year at another graduate school of social work may also be eligible to transfer in their foundation year credits if they meet the criteria.

**Clearances:** The Social Work MSW program requires students to complete clinical/field education experiences at facilities both on and off Temple University's campuses. These placements require criminal background checks, Act 33/34 clearances, and perhaps a drug screen. Placements may also require the student to maintain personal health insurance. The results of these requirements may limit and potentially eliminate placement options for the student, thus resulting in their inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent the student from becoming credentialed and/or licensed to practice social work.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 60, including 30 in foundation coursework and 30 in advanced-level study

#### Required Courses:

Students are exposed to multiple methods of intervention through foundation coursework. The courses are generalist in nature, allowing students to become familiar with the breadth of social work. Courses cover content in social justice, social welfare policy, research methods, human behavior in the social environment, and social work practice.

Students then select from a range of advanced-level coursework that allows them to examine in greater depth a practice modality, i.e., a concentration. Each concentration requires 9 credits of practice/program evaluation courses and an advanced field placement. Two concentrations are offered:

- Clinical Practice
- Macro Practice

Code	Title	Credit Hours
<b>Foundation Courses</b> <sup>1</sup>		
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>2</sup>	0
SSWG 5003	Foundations in Social Work Research	3
SSWG 5005	Social Welfare Policies and Services I	3
SSWG 5006	Social Welfare Policies and Services II	3
SSWG 5007	Deconstructing White Supremacy in Social Work	3
SSWG 5101	Theory-Informed Direct Practice I: Individuals, Families, and Groups	3
SSWG 5102	Theory-Informed Direct Practice II: Individuals, Families, and Groups	3
SSWG 5103	Theory-Informed Macro Practice I: Groups, Organizations, and Communities	3
SSWG 5104	Theory-Informed Macro Practice II: Groups, Organizations, and Communities	3
SSWG 5187	Foundation Field Practicum I	3
SSWG 5188	Foundation Field Practicum II	3
<b>Advanced Courses</b> <sup>3</sup>		
SSWG 8505	Advanced Social Justice: Anti-Oppressive Social Work	3
Select one advanced policy course from the following: <sup>4</sup>		3
SSWG 8307	Health/Mental Health Policy	
SSWG 8407	Policy on Families and Children	
SSWG 8607	Advanced Policy - Gender and Sexuality	
Select courses for one concentration from the following:		9
Clinical Practice Concentration, which requires these three 3-credit courses:		
SSWG 8101	Clinical Practice with Individuals, Families, and Groups I	
SSWG 8102	Clinical Practice with Individuals, Families, and Groups II	
SSWG 8205	Evaluation of Clinical Practice	
Macro Concentration, which requires these two 3-credit courses and a choice of three 1-credit practice courses:		
SSWG 8107	Macro Practice in Organizational, Community and Policy Arenas	
SSWG 8207	Social Work Research: Communities and Policy Arenas and Management/Planning	
Choose three of the following 1-credit Macro practice courses:		
SSWG 8108		
SSWG 8109	Social Innovation and Entrepreneurship	
SSWG 8111	Legislative Advocacy	
SSWG 8112	Coalitions and Partnerships	
SSWG 8113	Resource and Grant Development for Human Services	
SSWG 8114	Supervision, Staff Management, and Staff Development in Human Service Organizations	
SSWG 8115	Leadership in Human Service and Social Change Organizations	
SSWG 8116	Grassroots Mobilization: In the US and Internationally	
<b>Electives</b> <sup>5</sup>		<b>9</b>
<b>Field Practica</b>		

SSWG 8187	Advanced Field Practicum I	3
SSWG 8188	Advanced Field Practicum II	3
<b>Total Credit Hours</b>		<b>60</b>

1

During the first week of the term of their initial entry into the MSW program, all incoming regular entry students have the opportunity to complete a test-out exam for the following courses: SSWG 5003, SSWG 5005, and SSWG 5006. Students who earn a score of 80% or higher on a test-out exam are not required to complete the associated required course, but are required to successfully complete 3 credits of electives in place of each required course. That is to say, all regular entry MSW students are required to successfully complete 60 credits of coursework, even if they test out of any required course(s), to earn the degree.

2

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

3

Unless transfer credits fulfill them, 30 credits of advanced-level courses are required. A portion of these 30 credits are earned in the advanced field practicum experiences described under "Internship" below.

4

With advanced review and approval from the MSW Program Director, students may take an advanced policy course outside of the School of Social Work.

5

With advanced review and approval from the MSW Program Director, students may take electives outside of the School of Social Work and/or independent study courses to fulfill the electives requirement.

**Minimum Grade to be Earned for All Required Courses: B-**

### **Culminating Event:**

#### *Internship:*

Two internships are required in the form of a field practicum, which is an essential part of Social Work studies and is deliberately linked in an integral way with classroom learning. The practicum occurs concurrently with Social Work practice courses or can be taken as a block placement in the Summer sessions. (At this time, block placements are available only to campus-based students, not online students.) In order to ensure a quality learning experience for students, the Office of Field Education is responsible for working with students to arrange and oversee field practica. Students employed in social service settings may undertake their practica at their place of employment, but field placement activities must be substantially different than job duties. Because of accreditation and MSW curriculum requirements, students must have appropriate learning experiences and supervision; therefore, they should plan on allocating at least one full day during the regular work week to the practica.

The first field practicum, taken as part of the foundation curriculum, focuses on developing proficiency in generalist practice/basic Social Work skills. This includes learning to engage and assess a range of clients, including individuals, families, groups, organizations and communities. Students learn to identify issues, needs, resources and strengths. They also acquire skills in planning, communication, supervision and consultation as well as intervention, cultural competence,

evidence-based practice and evaluation. This two-term practicum requires a minimum of 450 hours (usually 2.5 days per week).

With the second field practicum, taken as part of the advanced curriculum, students develop expertise in their chosen concentration. This practicum allows for in-depth development of skills and application of theory and concepts, exploration of ethical challenges, and continued cultural competency. This two-term practicum requires a minimum of 600 hours (usually three days per week).

## **Speech, Language and Hearing Science MA**

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Arts in Speech, Language and Hearing Science.

## About the Program

The MA program in Speech, Language and Hearing Science (MA-SLH) is committed to the education of high-quality clinical professionals who work creatively with the broadest possible range of populations, settings and speech-language-swallowing disorders. The program provides students with a rich variety of supervised clinical experiences at its own Temple University Speech-Language-Hearing Center (TUSLHC) on Main campus and at more than 80 field affiliate settings throughout the Delaware Valley. In addition, the Department of Communication Sciences and Disorders maintains strong connections with faculty members and practitioners at Temple University Health System and other departments in the College of Public Health. Graduates of the program have consistently gone on to significant careers throughout the United States and abroad. Opportunities exist for pursuing research interests under faculty guidance through independent study courses or the writing of a master's thesis.

**Time Limit for Degree Completion:** 2 years (six terms, including required enrollment in two summer sessions) with a bachelor's degree in Communication Sciences and Disorders; 3 years (eight or nine terms, including required enrollment in two or three summer sessions) without a bachelor's degree in Communication Sciences and Disorders

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through full-time enrollment.

**Interdisciplinary Study:** The faculty itself is interdisciplinary with representation from Audiology, Cognitive and Neuropsychology, Linguistics, Speech Motor Control and Speech-Language Pathology. A proseminar presentation series includes speakers from within and outside the Department of Communication Sciences and Disorders and Temple University.

**Affiliation(s):** The program has research collaborations with the following:

- Åbo Akademi University (Finland)
- Boston Children's Hospital
- Boston University
- British Columbia Early Hearing Program
- Children's Hospital of Philadelphia
- The College of New Jersey
- Ewha Womans University (South Korea)
- Gallaudet University
- International Christian University (Japan)
- Johns Hopkins University
- Kansas Language Assessment Program
- Marquette University
- Maternity Care Coalition
- Moss Rehabilitation Research Institute
- Newcastle University (United Kingdom)
- Northeastern University
- Northwestern University
- Portland State University
- Purdue University
- Rutgers University - Camden
- Syracuse University

- Temple University Hospital
- University of Barcelona
- University of California - Irvine
- University of Connecticut
- University of North Carolina
- University of Oregon
- University of Pennsylvania
- The University of Sydney (Australia)
- University of Tartu (Estonia)
- University of Wisconsin – Madison
- Vanderbilt University
- Washington University in St. Louis

The tri-state area around Philadelphia offers a culturally diverse setting with urban, suburban and even rural areas, affording a variety of opportunities for students to engage in clinical practice in over 80 affiliated clinical sites that include schools, preschools, acute care and rehabilitation hospitals, skilled nursing facilities, private practice and early intervention agencies.

**Ranking:** In 2020, according to *U.S. News & World Report*, Temple University's Speech, Language and Hearing Science program ranks 25 out of 261 ASHA-certified programs.

**Accreditation:** The MA in Speech, Language and Hearing Science program at Temple University is accredited by the Council on Academic Accreditation in Audiology and Speech Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, 800-498-2071 or 301-296-5700.

**Areas of Specialization:** Students completing the master's program are generalists with expertise in a wide variety of disorders and population types. Courses and supervised diagnostic and therapeutic experiences involve both children and adults, and encompass a range of disorders, including dysfluency, dysphagia, hearing disorders, language disorders, motor speech disorders, phonological disorders and voice disorders. Faculty conduct supervised research in such areas as language disorders in monolingual and bilingual children, motor speech disorders, adult aphasia and dementia, voice disorders, communication in aging individuals, and hearing.

**Job Prospects:** Graduates are employed in hospitals, rehabilitation centers, schools, private practices and universities.

**Licensure/Certification:** The Certificate of Clinical Competence (CCC) validates and provides assurance to consumers and clients, other healthcare professionals, employers, state licensure boards and third-party payers that they can be confident certificate holders, through participation in continuous professional development activities, are keeping up with rapid changes in the profession's scopes of practice. To complete the process for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) from the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) of the American Speech-Language-Hearing Association, graduates must pass the national *Praxis*® examination in Speech-Language Pathology (5331) and must complete a Clinical Fellow experience after graduation.

Graduates of the program are eligible to apply for the Instructional I Certificate through the Pennsylvania Department of Education upon successful completion of the *Praxis*® examination in Speech-Language Pathology (5331) and the *Praxis*® Fundamental Subjects: Content

Knowledge (5511) examination. Additional state-mandated requirements may apply for graduates employed in the public schools in states other than Pennsylvania. Each state has its own licensing procedures in addition to those of the CCC-SLP. For more information, visit <https://www.asha.org/advocacy/state/>.

**Non-Matriculated Student Policy:** Non-matriculated students must have departmental permission to enroll in graduate courses. No more than 6 credits of Temple University graduate coursework with an earned grade of "B" or higher taken as a non-matriculated student may be counted toward the degree. In order to enroll in courses as a non-matriculated student, individuals must supply the Department of Communication Sciences and Disorders with an official transcript from their undergraduate institution and syllabi from the courses that satisfy the prerequisite requirements for the graduate-level courses the student is requesting to take. A grade of "B-" or better must have been attained in the prerequisite classes, and an overall undergraduate GPA greater than 3.0 must have been earned. If these requirements are met, non-matriculated students, with the department's permission, are permitted to take up to three of the following four courses:

Code	Title	Credit Hours
CSCD 5521	Foundations in Child Language Disorders (Fall)	3
CSCD 5522	Foundations and Management in Phonological Disorders (Fall)	3
CSCD 5525	Foundations and Management in Fluency (Summer)	3
CSCD 8726	Management of Child Language Disorders (Spring)	3

For more information, contact Lauren Burrows ([lauren.burrows@temple.edu](mailto:lauren.burrows@temple.edu)).

**Financing Opportunities:** For information on financial aid, please contact the Office of Student Financial Services.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 15

All applicants to the MA program in Speech, Language and Hearing Science must apply via the Communication Sciences and Disorders Centralized Application Service (CSDCAS) by January 15. The system can be accessed at <https://csdcas.liasoncas.com/>.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Recommendations should be obtained from college instructors, clinical supervisors, or others who can speak to the applicant's academic or clinical abilities and personal integrity. Two of the recommendations must be academic in nature.

**Coursework Required for Admission Consideration:** Prerequisite courses taken as an undergraduate or prior to matriculation to the MA-SLH program require a grade of "C" or higher (not "C-"). Students need to retake prerequisite courses if completed more than 10 years prior to matriculation. Any prerequisite courses not completed prior to matriculation must be completed at Temple University with an earned grade of "B-" or higher. Prerequisites to graduate study may also be taken during the first year of graduate study, with an earned grade of "B-"

or higher, if not completed previously. These include the following subject areas:

- Anatomy and Physiology of Speech and Hearing Mechanisms
- Audiology
- Aural Rehabilitation
- Clinical Methods (i.e., Diagnostics and Treatment in Speech-Language Pathology)
- Hearing Science
- Human Neuroscience
- Phonetics
- Psycholinguistics (or Introduction to Linguistics or Introduction to Syntax)
- Speech and Language Development
- Speech Science

The American Speech-Language-Hearing Association (ASHA) requires coursework in the following content areas: behavioral and social sciences, biological sciences, physical sciences (i.e., physics or chemistry), and statistics. ASHA-required content area courses taken as an undergraduate or prior to matriculation to the MA-SLH program require a grade of "C" or higher (not "C-"). Any ASHA-required content area coursework not completed prior to matriculation requires an earned grade of "B-" or higher. All prerequisite coursework is subject to review upon matriculation to the MA-SLH program.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

**Statement of Goals:** One writing sample is required. It should address your goals and the prompts outlined on the CSDCAS application.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** On the recommendation of the student's advisor, the Department of Communication Sciences and Disorders may accept transfer of graduate credits from an accredited institution. Grades must be "B" or better. The maximum number of credits a student may transfer is 6.

**Clearances:** The Speech, Language and Hearing Science MA program requires students to complete clinical/field education experiences at facilities both on and off Temple University's campuses. These placements require medical clearances, criminal background checks, Act 33/34 clearances (for working with children and vulnerable populations), and often a drug screen and CPR certification. The results of these requirements may limit and potentially eliminate placement options for the student, thus resulting in their inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent the student from becoming credentialed and/or licensed to practice as a Speech Language Pathologist.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 54-59, including 39 credits of academic coursework and 15-20 credits of clinical coursework

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
CSCD 5521	Foundations in Child Language Disorders	3
CSCD 5522	Foundations and Management in Phonological Disorders	3
CSCD 5524	Foundations and Management of Motor Speech Disorders	3
CSCD 5525	Foundations and Management in Fluency	3
CSCD 5527	Foundations and Rehabilitation of Language and Cognitive Disorders in Aphasia	3
CSCD 5528	Voice Disorders: Theory and Analysis	3
CSCD 5531	Applications in Audiology	1
CSCD 5546	Research Methods in Communication Sciences and Disorders (Research Methods in Communication Sciences)	3

<b>Total Credit Hours</b>	<b>54-59</b>

1

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

2

Students who elect to complete a thesis should select CSCD 9996 Thesis Seminar as their elective.

3

Students enroll in 18 to 20 credits of supervised clinical practicum in the evaluation and treatment of speech, language, and swallowing disorders to achieve the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) in accordance with the standards of the American Speech-Language-Hearing Association (ASHA). Up to 3 credits may be waived if students have achieved the full range of required competencies and experiences.

## Proposed Plan of Study Outlined by Year and Term

Year 1		
Fall		Credit Hours
CSCD 5521	Foundations in Child Language Disorders	3
CSCD 5522	Foundations and Management in Phonological Disorders	3
CSCD 5527	Foundations and Rehabilitation of Language and Cognitive Disorders in Aphasia	3
CSCD 5531	Applications in Audiology	1
CSCD 8187	Basic Practicum in Diagnostic Processes <sup>1</sup>	1
CSCD 8287	Basic Practicum in Therapy Processes <sup>1</sup>	1
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>2</sup>	0
<b>Credit Hours</b>		<b>12</b>
Spring		
CSCD 5528	Voice Disorders: Theory and Analysis	3
CSCD 5546	Research Methods in Communication Sciences and Disorders (Research Methods in Communication Sciences)	3
CSCD 8187	Basic Practicum in Diagnostic Processes <sup>1</sup>	1
CSCD 8287	Basic Practicum in Therapy Processes <sup>1</sup>	2
CSCD 8726	Management of Child Language Disorders	3
<b>Credit Hours</b>		<b>12</b>
Summer		
CSCD 5525	Foundations and Management in Fluency	3

CSCD 8187	Basic Practicum in Diagnostic Processes <sup>1</sup>	1
CSCD 8722	Foundations and Management in Dysphagia	3
CSCD 9587	Advanced Practicum in Aphasia	2
<b>Credit Hours</b>		<b>9</b>
<b>Year 2</b>		
<b>Fall</b>		
CSCD 5524	Foundations and Management of Motor Speech Disorders	3
CSCD 8727	Written Language Development and Disorders	2
CSCD 8830	Seminar In CSD	1
CSCD 9287	Advanced Practicum in Fluency	1
CSCD 9387	Advanced Field Practicum in Speech Language Pathology - Child	3
<b>Credit Hours</b>		<b>10</b>
<b>Spring</b>		
CSCD 8729	Neurocognitive Language Disorders	3
CSCD 8824	Assessment and Treatment of Diverse Populations	2
CSCD 9187	Advanced Practicum in Voice	1
CSCD 9387	Advanced Field Practicum in Speech Language Pathology - Child	3
Elective <sup>3</sup>		3
<b>Credit Hours</b>		<b>12</b>
<b>Summer</b>		
CSCD 8147	Basic Practicum in Audiology	1
Select one Field Practicum in Speech Language Pathology (Pediatric or Adult) course from the following:		3
CSCD 9388	Capstone Field Practicum in Speech Language Pathology - Pediatric	
CSCD 9487	Advanced Field Practicum in Speech Language Pathology - Adult	
CSCD 9488	Capstone Field Practicum in Speech Language Pathology - Adult	
<b>Credit Hours</b>		<b>4</b>
<b>Total Credit Hours</b>		<b>59</b>

1

Students typically enroll in CSCD 8187 and CSCD 8287 over multiple academic terms in Year 1.

2

This common College Core course is required of all incoming graduate students in the College of Public Health. It is available completely online and designed such that students can complete the modules at their own pace over the course of their degree program.

3

Students who elect to complete a thesis should select CSCD 9996 Thesis Seminar as their elective.

**Minimum Grade to be Earned for All Required Courses: B-**

**Standards of Scholarship:** A graduate student in the MA program is expected to perform in accordance with the standards of scholarship of the Temple University Graduate School and of the Department of Communication Sciences and Disorders, including the following:

1. At the time of graduation, the student must have a grade point average of at least 3.0 (equivalent at Temple to the grade of "B").

2. The student's grades will be averaged after the student has completed 15 graduate credits. Unless their average is "B" or better, the student will have one additional term to achieve a total grade average of "B" or better. Any time from the end of that term forward that their total grade average falls below a "B," they will be dropped from the program.
3. A student who earns more than two grades below "B-" or more than one grade of "F" is dismissed for failure to maintain satisfactory grades. Although grades of "C+," "C," and "C-" carry academic credit, receipt of such grades indicates that the student is performing at a substandard level. Additionally, ASHA hours are not accumulated in Clinical Courses (Practicum) with earned grades below a "B-."
4. A student may not graduate without completing all coursework and thus removing any outstanding grades of "I" (Incomplete).
5. An MA student in the program may apply no more than 6 graduate credits earned at another institution toward the degree.
6. Grades in prerequisite courses taken at Temple or elsewhere, while matriculated in the graduate program, will be counted in determining whether a student has satisfied standards of scholarship described in 1-4 above, but prerequisite credits will not count toward the number of credits required for the master's degree.

**Culminating Event:** Students choose between two options: completion of the comprehensive examination or preparation and defense of a master's thesis.

#### *Comprehensive Examination:*

The purpose of the comprehensive examination is to demonstrate the application of accumulated knowledge to the basic science and clinical domains. It is typically taken in the final term of study.

#### *Master's Thesis:*

The thesis option is intended to provide an opportunity for students interested in research to conduct a study of greater scope and rigor than is generally possible in the context of a one-term seminar or independent study. Students electing the thesis option enroll for up to 3 credits of CSCD 9996 Thesis Seminar, typically in the Spring of Year 2.

The thesis involves descriptive and/or experimental research and is supervised by a faculty member selected by the student. Students develop a prospectus (i.e., proposal of research to be conducted) in conjunction with their MA committee, which consists of the thesis advisor and two other faculty members. A final presentation is given orally to a symposium of faculty and students. The thesis document is submitted to the Graduate School in accordance with its guidelines.

# Graduate Certificate: Clinical Health Services Research

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Clinical Health Services Research.

## About the Certificate

The Clinical Health Services Research (HSR) certificate is a 12-credit graduate certificate program designed to provide a foundation for clinicians and other healthcare professionals in this multidisciplinary field that studies how social factors, financing systems, organizational structures and processes, health technologies and personal behaviors affect access to healthcare, quality of care and costs. Knowledge of health services research allows healthcare professionals to develop both better understandings of population-based outcomes and skills to participate in population-based research. The certificate program gives students a grounding in health services research, including study design, methods and interpretation of results. Successful completion of the Clinical HSR certificate program enables graduates to:

- illustrate understanding of health services research theory and concepts by comparing alternative models for population health issues;
- formulate innovative and important health service research questions informed by systematic reviews of the literature, stakeholder needs, and relevant theoretical and conceptual models;
- select appropriate study designs to address specific health services research questions;
- develop expertise in collecting primary health and healthcare data and in assembling secondary data from existing sources;
- use appropriate analytical methods to assess associations between variables; and
- apply knowledge of the structures, performance, quality, policy and context of health and healthcare to formulate solutions for health policy problems.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Main, with certain courses also offered at Temple University Center City (TUCC)

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis. NOTE: International students may not be eligible to

apply for a student visa based on admission to the certificate program. Please contact the CPH Office of Admissions for more information.

**Non-Matriculated Student Policy:** The certificate program is open to non-matriculated graduate students.

## Admission Requirements and Deadlines

### Application Deadline:

Fall, Spring, and Summer admissions are on a rolling basis. Interested students should contact the College of Public Health for permission to enroll in coursework.

Apply at <https://sophasexpress.liaisoncas.com/>.

For questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a baccalaureate degree. Official transcripts must be submitted for all postsecondary institutions attended.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours

## Graduate Certificate: Global Health

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Global Health.

### About the Certificate

Through the College of Public Health's graduate certificate in Global Health, students develop the core skills and theoretical foundations they need to address complex public health issues that are prevalent in low- and middle-income, as well as high-income countries. These issues include access to basic preventive care; emergency disaster relief; maternal and child health; and water, sanitation and hygiene.

This academic certificate is open to all students who are currently completing graduate degrees in the College of Public Health and wish to supplement their degree. It cannot be taken independently outside of the College of Public Health. Courses in the Global Health certificate program provide a global health perspective on the student's existing area of graduate study and a foundation for an international career in public health or health services.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis.

**Non-Matriculated Student Policy:** The certificate program is currently not open to non-matriculated graduate students. It is structured to be completed by graduate students currently enrolled in MPH and public health-related doctoral programs or in other graduate programs at Temple. Students are permitted to take up to 9 credits of certificate coursework before applying. Those who are accepted into the certificate program may then apply the coursework completed prior to matriculation toward the certificate requirements. Matriculation is required to earn the certificate.

### Admission Requirements and Deadlines

#### Application Deadline:

*Fall and Spring* admissions are on a rolling basis. Students who are currently enrolled in a graduate program in Temple University's College of Public Health or in another Temple school or college are welcome to apply to the Global Health graduate certificate program. For more information on how to apply, interested applicants should contact Natasha Benoit, Senior Academic Advisor, at [nbenoit@temple.edu](mailto:nbenoit@temple.edu) or 215-204-5105.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

### Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
<b>Public Health Core Course</b>		
SBS 5001	Fundamentals of Public Health	3
<b>Global Health Core Course</b>		
Select one from the following:		3
ENVH 5013	Global Environmental Health	
HPM 5132	Comparative Health Systems: Local, National, and Global Perspectives	
SBS 5008	Global Health: People, Planet, Place	
<b>Global Health Electives</b>		
Select two from the following: <sup>1</sup>		6
ENVH 5309	Water, Sanitation and Public Health	
EPBI 5301	<sup>2</sup>	
EPBI 8206	Infectious Disease Epidemiology	

EPBI 8209	Epidemiology of HIV/AIDS
EPBI 8213	Cancer Epidemiology

## Graduate Certificate: Health Informatics

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Health Informatics.

### About the Certificate

The Health Informatics (HI) certificate is a 12-credit graduate certificate program designed to provide students with the skills and competencies needed to embark on or advance a career in health informatics. The certificate program provides hands-on skills taught by industry leaders. The program is designed to expand students' understanding of privacy and security requirements, the role of standards and data exchange, and fundamentals associated with managing health information technology. In addition, approximately 50 hours of training and assignments are conducted in an educational electronic health record (EHR) setting, providing the student with hands-on skills.

Courses taken in the certificate program count toward the MS in Health Informatics, if the student continues in the master's program.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis.

**Non-Matriculated Student Policy:** The certificate program is not open to non-matriculated graduate students.

### Admission Requirements and Deadlines

#### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Apply at <https://sophasexpress.liaisoncas.com/>.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a baccalaureate degree, having earned a cumulative GPA of 3.0 on a 4.0 scale, from an accredited college or university. Transcripts from all postsecondary institutions attended must be uploaded at SOPHAS Express.

#### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and

physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

## Graduate Certificate: Interdisciplinary Health Communication

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Interdisciplinary Health Communication.

### About the Certificate

Addressing many public health priority problems requires a solid foundation of training in public health-related program planning, evaluation and research methods as well as effective and responsible communication strategies. Health communication strategies can facilitate dissemination of information about health risks, improve underserved populations' access to services and navigation of healthcare systems, enhance the quality of patient care, improve healthcare decision-making, and influence adoption of healthier lifestyles in populations with elevated risk of chronic disease.

The graduate certificate in Interdisciplinary Health Communication (IHComm) is a 12-credit certificate program administered by the College of Public Health's Department of Social and Behavioral Sciences (SBS) in collaboration with the Law Klein College of Media and Communication to create opportunities for interdisciplinary training of their graduate students. The certificate program's name emphasizes the interdisciplinary structure of the curriculum and its instructors drawn from the College of Public Health and the Klein College of Media and Communication. The curriculum is designed to facilitate advanced knowledge and training in critical evaluation of public health problems and how to address them using health communication methods, applying key concepts and theories germane to public health and health communication interventions, and accessing research as guided by the Council on Education in Public Health (CEPH). Faculty within the certificate program have training and expertise across a dozen public health- and media-related disciplines, including advertising; communication; ecology; health communication; health psychology; health education and health promotion research; health systems research; media studies; public health program planning and evaluation; public relations; research methods in social, behavioral and communication sciences; and theories of communication and health behavior change.

The IHComm certificate is structured to enable its completion by existing graduate students enrolled in MPH and public health-related doctoral programs as well as Klein College's Media and Communication PhD and Communication for Development and Social Change MS programs. In addition to MPH and Klein graduate students, the certificate is open for enrollment by graduate students in other programs throughout Temple University as well as non-matriculated, non-degree-seeking students as a continuing education certificate.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Main and Online

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the CPH Office of Admissions for more information.

**Non-Matriculated Student Policy:** The certificate program is open to non-matriculated graduate students.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring* admissions are on a rolling basis.

For the Interdisciplinary Health Communication certificate, all applicants — whether currently enrolled graduate students or non-matriculated students — must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Letters of Reference:

*Number Required Only of Non-Matriculating Applicants: 2*

*From Whom:* At least one letter of recommendation should be obtained from a college/university instructor, preferably at the graduate level.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a baccalaureate degree and provide transcripts as indicated:

- Applicants currently enrolled in a Temple graduate program must demonstrate a minimum cumulative GPA of 3.0 in completed coursework.
- Non-matriculating applicants must present a transcript demonstrating successful completion of the baccalaureate degree with a minimum cumulative GPA of 3.5 OR a transcript demonstrating successful completion of a graduate degree with a minimum GPA of 3.0.

**Statement of Goals:** State your career goals and describe how the certificate is relevant to those goals.

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

# Graduate Certificate: Maternal and Child Health

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Maternal and Child Health.

## About the Certificate

The need for training public health students in maternal and child health (MCH) is undeniable. The U.S. ranks poorly with stark racial disparities on many MCH health indicators. For example, the maternal mortality ratio reached 42.4 in non-Hispanic Black women in 2017, among the highest in the developed world. Nearly 50% of pregnancies are unplanned. Chronic disease and opioid use in women are increasing and, thereby, contributing to low mortality rates. In addition, child and youth health concerns include obesity at 19% and 8% for asthma. Overall, 30.7% of Philadelphia mothers receive inadequate prenatal care; the infant mortality rate is 8.24 per 100,000 live births, with a rate of 13.3 in North Philadelphia; 10.4% of infants are preterm; and child asthma hospitalization rates are 727.3/100,000. Local teen births are double U.S. rates. Other pressing concerns are housing conditions, violence and sexually transmitted infection rates in youth.

The Maternal and Child Health (MCH) graduate certificate is poised to make a significant impact. Jointly administered by the Departments of Social and Behavioral Sciences (SBS) and Epidemiology and Biostatistics (EPBI), the MCH certificate program promotes interdisciplinary training of graduate students, with a curriculum that is designed to draw graduate students largely from MPH and MSW training programs. The certificate curriculum includes two three-credit core courses, one in SBS and one in EPBI, and two additional three-credit electives. The curriculum facilitates advanced knowledge, training and skills to enter the MCH workforce and support Title V programs, as guided by the Council on Education for Public Health (CEPH).

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Main and Online

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the CPH Office of Admissions for more information.

**Job Prospects:** Demand is growing for public health professionals who have taken advanced coursework in maternal and child health and can demonstrate specialized knowledge and skills. Graduates are sought by:

- Local, state, federal and international public health agencies;
- Hospitals, clinics, and rehabilitation and hospice-care facilities;
- Community-based organizations and nonprofits;
- Schools and educational institutions; and
- Healthcare continuing education and training centers.

Graduates with advanced training in maternal and child health are prepared for employment as a community health worker, health educator, MCH epidemiologist, program evaluation specialist, program manager/coordinator, public health policy analyst, public health researcher, and youth and family advocate. Pursuit of an advanced degree is also an option.

**Non-Matriculated Student Policy:** The certificate program is currently not open to non-matriculated graduate students. It is structured to be completed by graduate students currently enrolled in MPH and public health-related doctoral programs or in other graduate programs at Temple. Students are permitted to take up to 9 credits of certificate coursework before applying. Those who are accepted into the certificate program may then apply the coursework completed prior to matriculation toward the certificate requirements. Matriculation is required to earn the certificate.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Students who are currently enrolled in a graduate program in Temple University's College of Public Health or other graduate programs at Temple are welcome to apply to the graduate certificate program in Maternal and Child Health. For more information on how to apply, interested applicants should contact Natasha Benoit, Senior Academic Advisor, at [nbenoit@temple.edu](mailto:nbenoit@temple.edu) or 215-204-5105.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
EPBI 8207	Reproductive and Perinatal Epidemiology	3
SBS 5105	Maternal and Child Health	3
Select one from the following:		
EPBI 5101	Fundamentals of Epidemiology	3
EPBI 5201	Epidemiological Research Methods I	3
<b>Electives</b>		
Select one from the following:		
ENVH 8207	Environmental Epidemiology	3
EPBI 8213	Cancer Epidemiology	3
RCTH 5212	Play and Pediatric Development	3
SBS 8005	Health Promotion in Vulnerable Populations	3
SSWG 8403	Children and Families in the Social Environment	3
SSWG 8407	Policy on Families and Children	3

SSWG 8607 Advanced Policy - Gender and Sexuality

**Total Credit Hours**

12

**GPA Required to be Awarded the Certificate:** 2.67 minimum. All four courses chosen toward completion of the MCH graduate certificate must be completed with at least a "B-" or better to receive the certificate. Students must also maintain good academic standing.

**Graduate Certificate: Nutrition**

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Nutrition.

**About the Certificate**

The graduate certificate in Nutrition is a 12-credit certificate program that provides competency-based public health nutrition training to existing MPH students or non-matriculating students. Current public health students can earn an MPH and a certificate in nutrition. In conjunction with the MPH, graduates become more competitive candidates for public

health nutrition jobs. Non-matriculating students earn a certificate in nutrition and are well positioned to continue studying in the College of Public Health and complete an MPH degree or use the knowledge and skills in their existing profession.

Upon completion of the certificate, students are able to:

- apply knowledge of nutritional health promotion and disease prevention for individuals, groups and populations;
- utilize a foundational knowledge on public and global health issues and nutritional needs;
- implement or coordinate nutritional interventions for individuals, group, or populations;
- apply current research and evidence-informed practice to services;
- discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels; and
- apply awareness of cultural values and practices to the design or implementation of public health policies and programs.

Nutrition certification has value for healthcare professionals, particularly registered dietitians. Many RDs who do not hold a graduate degree will likely want to earn a master's degree to remain competitive in the workforce. The Nutrition certificate offers an opportunity for these professionals to take courses as non-matriculating students without committing to a master's degree, but the transition to a degree student would be seamless. In addition, all MPH courses are offered in the evening or online, which makes the program ideal for working professionals.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the CPH Office of Admissions for more information.

**Non-Matriculated Student Policy:** The certificate program is open to non-matriculated graduate students.

**Admission Requirements and Deadlines****Application Deadline:**

*Fall and Spring* admissions are on a rolling basis.

For the Nutrition certificate, all applicants — whether currently enrolled graduate students or non-matriculated students — must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liasoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at cph@temple.edu or 215-204-5200.

**Letters of Reference:**

*Number Required Only of Non-Matriculating Applicants:* 2

*From Whom:* At least one letter of recommendation should be obtained from a college/university instructor, preferably at the graduate level.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a baccalaureate degree and provide transcripts as indicated:

- Applicants currently enrolled in a Temple graduate program must demonstrate a minimum cumulative GPA of 3.0 in completed coursework.
- Non-matriculating applicants must present a transcript demonstrating successful completion of the baccalaureate degree with a minimum cumulative GPA of 3.5 OR a transcript demonstrating successful completion of a graduate degree with a minimum GPA of 3.0.

**Statement of Goals:** State your career goals and describe how the certificate is relevant to those goals.

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

## Graduate Certificate: Public Health Law Research

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Public Health Law Research.

### About the Certificate

Students interested in the role law and policy may play on health, well-being and equity can pursue the Public Health Law Research graduate certificate. This interdisciplinary certificate focuses on providing foundational training in public health law practice and research methods. This field of research generates evidence that can inform policy initiatives to advance health and well-being.

To advance health through policy initiatives, it is important that there be sound evidence on which to act. Students who complete the certificate program can demonstrate the integration of behavioral and organizational theory with a law or policy; describe the mechanism behind a law or policy; and systematically evaluate the law or policy at the level of individual provisions, rather than just a holistic view.

The transcribed Public Health Law Research graduate certificate is offered in a fully online format advancing the goals of current graduate and doctoral students both within and outside Temple University in a variety of disciplines, from lawyers and public health practitioners to criminologists, historians, sociologists and others that value health, well-being and equity. The certificate requires four courses taught in partnership nationally by faculty at the Beasley School of Law and the College of Public Health.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis.

**Non-Matriculated Student Policy:** The certificate program is not open to non-matriculated graduate students.

## Admission Requirements and Deadlines

### Application Deadline:

Fall, Spring and Summer admissions are on a rolling basis. Interested students should contact the College of Public Health for permission to enroll in coursework.

All applicants to the Public Health Law Research certificate must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liasoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

## Graduate Certificate: Public Health Preparedness and Response

COLLEGE OF PUBLIC HEALTH

Learn more about the graduate certificate in Public Health Preparedness and Response.

### About the Certificate

Public health and emergency preparedness are considered central concepts in regional, national and global public health and emergency management agencies and systems. To prevent and respond to future public health emergencies, including outbreaks, epidemics and pandemics, the number of public health professionals with training in public health preparedness and emergency response needs to increase. To prepare students for employment in this field, the College of Public Health's graduate certificate in Public Health Preparedness and Response (PHPR) provides students with training in bioethics, cultural sensitivity, emergency preparedness, health equity, outbreak response, public health surveillance and vulnerable populations. Students learn to identify and respond to public health threats with a focus on outbreaks and epidemics and leave the program with the skills required to work with public health agencies to make effective decisions in responding to emergencies and mitigating risk. Courses in the PHPR certificate program provide a risk-assessment and decision-making framework for

students' graduate study and a foundation for a career in public health leadership.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online

**Full-Time/Part-Time Status:** The graduate certificate may be completed on a part-time basis.

**Non-Matriculated Student Policy:** The certificate program is currently not open to non-matriculated graduate students. It is structured to be completed by graduate students currently enrolled in MPH and public health-related doctoral programs or in other graduate programs at Temple. Students are permitted to take up to 9 credits of certificate coursework before applying. Those who are accepted into the certificate program may then apply the coursework completed prior to matriculation toward the certificate requirements. Matriculation is required to earn the certificate.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Students who are currently enrolled in a graduate program in Temple University's College of Public Health or in another Temple school or college are welcome to apply to the PPHR graduate certificate program. For more information on how to apply, interested applicants should contact Natasha Benoit, Senior Academic Advisor, at [nbenoit@temple.edu](mailto:nbenoit@temple.edu) or 215-204-5105.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. ## College of Science and Technology

With more than 4,000 students, the College of Science and Technology (CST) is one of Temple University's fastest growing schools. Students work side-by-side with experienced faculty researchers in the laboratory, field and classroom. Since 2007, external funding for advanced research has more than doubled, creating new opportunities for CST's more than 200 world-class faculty members. Excellence begins with faculty members who inspire and challenge every student.

A cornerstone of CST's graduate programs is research with a focus on advancing knowledge and finding solutions to today's toughest challenges. This real-world, hands-on approach is ideal for preparing students for careers in academia and industry — or as entrepreneurs in the computer, science and technological fields. Students work closely with world-class researchers to understand the science, hone their investigation skills, and ask pertinent and important questions. Professors create an environment that encourages inquiry and rewards hard work.

CST's efforts to advance the quality of research, education and engagement with the world are greatly enhanced by its state-of-the-art Science Education and Research Center (SERC). As of Fall 2014, SERC is home to advanced laboratories and classrooms designed to attract talented students and scholars and foster interdisciplinary research. It is one of the most advanced facilities of its kind on the East Coast.

### Graduate Faculty

*Shohreh Amini*, Professor, Department of Biology, College of Science and Technology; PhD, University of Pennsylvania.

*Darius Balciunas*, Associate Professor, Department of Biology, College of Science and Technology; PhD, Uppsala University.

*Jocelyn Behm*, Assistant Professor, Department of Biology, College of Science and Technology; PhD, University of Wisconsin-Madison.

*Richard Beigel*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Stanford University.

*Shiferaw S. Berhanu*, Professor, Department of Mathematics, College of Science and Technology; PhD, Rutgers University.

*Eric U. Borguet*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Pennsylvania.

*Ilya V. Buynovich*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Boston University.

*Vincenzo Carnevale*, Associate Professor, Department of Biology, College of Science and Technology; PhD, International School for Advanced Studies, Trieste.

*Steven M. Chemtob*, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, California Institute of Technology.

*Yuzhou Chen*, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Princeton University.

*Martha Constantinou*, Selma Lee Bloch Brown Associate Professor in Physics, Department of Physics, College of Science and Technology; PhD, University of Cyprus.

*Erik Cordes*, Professor, Department of Biology, College of Science and Technology; PhD, The Pennsylvania State University.

*Hai-Lung Dai*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of California Berkeley.

*Boris A. Datskovsky*, Professor, Department of Mathematics, College of Science and Technology; PhD, Harvard University.

*Alexandra Krull Davatzes*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Stanford University.

*Nicholas Davatzes*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Stanford University.

*Franklin A. Davis*, Professor Emeritus, Department of Chemistry, College of Science and Technology; PhD, Syracuse University.

*Graham Dobreiner*, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry, College of Science and Technology; PhD, Yale University.

*Vasily Dolgushev*, Professor, Department of Mathematics, College of Science and Technology; PhD, Massachusetts Institute of Technology.

*Eduard Dragut*, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Illinois at Chicago.

*Ananias A. Escalante*, Professor, Department of Biology, College of Science and Technology; PhD, University of California Irvine.

*Mark A. Feitelson*, Professor, Department of Biology, College of Science and Technology; PhD, University of California Los Angeles.

*Amy Freestone*, Associate Professor, Department of Biology, College of Science and Technology; PhD, University of California Davis.

*David Futer*, Professor, Department of Mathematics, College of Science and Technology; PhD, Stanford University.

*Hongchang Gao*, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pittsburgh.

*Antonio Giordano*, Professor, Department of Biology, College of Science and Technology; PhD, University of Trieste.

*Yury Grabovsky*, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University.

*David E. Grandstaff*, Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Princeton University.

*Alexander Gray*, Associate Professor, Department of Physics, College of Science and Technology; PhD, Lawrence Berkeley National Laboratory and University of California, Davis.

*Cristian E. Gutiérrez*, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Buenos Aires.

*Raymond Habas*, Professor, Department of Biology, College of Science and Technology; PhD, State University of New York at Stony Brook.

*Xubin He*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Rhode Island.

*Stephen Blair Hedges*, Laura H. Carnell Professor, Department of Biology, College of Science and Technology; PhD, University of Maryland.

*Matthew Richard Helmus*, Assistant Professor, Department of Biology, College of Science and Technology; PhD, University of Wisconsin-Madison.

*Emanuel B. Hey*, Professor, Department of Biology, College of Science and Technology; PhD, State University of New York at Stony Brook.

*Tonia Hsieh*, Associate Professor, Department of Biology, College of Science and Technology; PhD, Harvard University.

*Maria Iavarone*, Professor, Department of Physics, College of Science and Technology; PhD, University of Napoli Federico II.

*Mihaela Ignatova*, Selma Lee Bloch Brown Assistant Professor in Mathematics, Department of Mathematics, College of Science and Technology; PhD, University of Southern California.

*Susan A. Jansen-Varnum*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Missouri-St. Louis.

*Krishna Kant*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Texas at Dallas.

*Bojeong Kim*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Cornell University.

*Daniel Kim*, Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, University of California.

*Isaac Klapper*, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University Courant Institute of Mathematical Sciences.

*Michael L. Klein*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Bristol.

*James F. Korsh*, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pennsylvania.

*Rob J. Kulathinal*, Associate Professor, Department of Biology, College of Science and Technology; PhD, McMaster University.

*Sudhir Kumar*, Laura H. Carnell Professor, Department of Biology, College of Science and Technology; PhD, The Pennsylvania State University.

*Eugene Kwatny*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Drexel University.

*Paul S. LaFollette Jr.*, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; MD, Temple University.

*Jaclyn Lang*, Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, University of California Los Angeles.

*Longin Jan Latecki*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Hamburg.

*Edward S. Letzter*, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Washington.

*Robert J. Levis*, Professor, Department of Chemistry, College of Science and Technology; PhD, The Pennsylvania State University.

*Ronald M. Levy*, Laura H. Carnell Professor, Department of Chemistry, College of Science and Technology; PhD, Harvard University.

*David A. Liberles*, Professor, Department of Biology, College of Science and Technology; PhD, California Institute of Technology.

*Chyanlong Lin*, Associate Professor, Department of Physics, College of Science and Technology; PhD, Temple University.

*Martin W. Lorenz*, Professor, Department of Mathematics, College of Science and Technology; PhD, Universität Giessen.

*A. Marjatta Lyyra*, Professor, Department of Physics, College of Science and Technology; PhD, University of Stockholm.

*Stephen MacNeil*, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of North Carolina at Charlotte.

*Carol M. Manhart*, Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, University of Colorado Boulder.

*C. Jeffrey Martoff*, Professor, Department of Physics, College of Science and Technology; PhD, University of California Berkeley.

*Spiridoula Matsika*, Professor, Department of Chemistry, College of Science and Technology; PhD, The Ohio State University.

*Gerardo A. Mendoza*, Professor, Department of Mathematics, College of Science and Technology; PhD, Massachusetts Institute of Technology.

*Andreas Metz*, Professor, Department of Physics, College of Science and Technology; PhD, Institut Für Kernphysik Universität Mainz.

*Irina Mitrea*, Laura H. Carnell Professor, Department of Mathematics, College of Science and Technology; PhD, University of Minnesota.

*Anna Moore*, Assistant Professor, Department of Biology, College of Science and Technology; PhD, University of Connecticut Health Center.

*Atsuhiko Muto*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Colorado.

*James Napolitano*, Professor, Department of Physics, College of Science and Technology; PhD, Stanford University.

*Allen W. Nicholson*, Professor, Department of Biology, College of Science and Technology; PhD, University of Pennsylvania.

*Jonathan Nyquist*, Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Wisconsin.

*Zoran Obradovic*, Laura H. Carnell Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, The Pennsylvania State University.

*Karen B. Palter*, Associate Professor Emerita, Department of Biology, College of Science and Technology; PhD, Princeton University.

*Jamie Payton*, Professor, Department of Computer and Information Sciences, College of Science and Technology; DSc, Washington University.

*John P. Perdew*, Laura H. Carnell Professor, Department of Physics, College of Science and Technology; PhD, Cornell University.

*Sergei L. Kosakovsky Pond*, Professor, Department of Biology, College of Science and Technology; PhD, University of Arizona.

*Sean Gillian Queisser*, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, Ruprecht-Karls University of Heidelberg.

*Sujith Ravi*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Virginia.

*Brian Rider*, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University Courant Institute of Mathematical Sciences.

*Peter S. Riseborough*, Professor, Department of Physics, College of Science and Technology; PhD, Imperial College London.

*Igor Rivin*, Professor, Department of Mathematics, College of Science and Technology; PhD, Princeton University.

*Adrienn Ruzsinszky Perdew*, Associate Professor, Department of Physics, College of Science and Technology; PhD, Budapest University of Technology and Economics.

*Robert W. Sanders*, Professor, Department of Biology, College of Science and Technology; PhD, University of Georgia.

*Christian E. Schafmeister*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of California San Francisco.

*Benjamin Seibold*, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Kaiserslautern.

*Brent Sewall*, Associate Professor, Department of Biology, College of Science and Technology; PhD, University of California Davis.

*Joel B. Sheffield*, Professor Emeritus, Department of Biology, College of Science and Technology; PhD, University of Chicago.

*Xinghua Mindy Shi*, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Chicago.

*Yuan Justin Shi*, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pennsylvania.

*Scott M. Sieburth*, Professor Emeritus, Department of Chemistry, College of Science and Technology; PhD, Harvard University.

*Richard Souvenir*, Professor, Department of Computer and Information Sciences, College of Science and Technology; DSc, Washington University.

*Francis C. Spano*, Professor, Department of Chemistry, College of Science and Technology; PhD, Princeton University.

*Nikolaos Sparveris*, Associate Professor, Department of Physics, College of Science and Technology; PhD, University of Athens.

*Rachel Spigler*, Associate Professor, Department of Biology, College of Science and Technology; PhD, University of Georgia.

*Robert J. Stanley*, Professor, Department of Chemistry, College of Science and Technology; PhD, The Pennsylvania State University.

*Matthew Stover*, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, University of Texas at Austin.

*Daniel R. Strongin*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of California Berkeley.

*Yugang Sun*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Science and Technology of China.

*Bernd Surrow*, Professor, Department of Physics, College of Science and Technology; PhD, University of Hamburg.

*Daniel B. Szyld*, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University.

*Chiu Chiang Tan*, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, College of William and Mary.

*Rongjia Tao*, Professor, Department of Physics, College of Science and Technology; PhD, Columbia University.

*Samuel J. Taylor*, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, University of Texas at Austin.

*Dennis O. Terry Jr.*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Nebraska.

*Laura Toran*, Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Wisconsin.

*Darius H. Torchinsky*, Assistant Professor, Department of Physics, College of Science and Technology; PhD, Massachusetts Institute of Technology.

*Allison Tumarkin-Deratzian*, Professor of Instruction, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Pennsylvania.

*Ann M. Valentine*, Professor, Department of Chemistry, College of Science and Technology; PhD, Massachusetts Institute of Technology.

*Vincent Voelz*, Associate Professor, Department of Chemistry, College of Science and Technology; PhD, University of California San Francisco.

*Slobodan Vucetic*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Washington State University.

*Anduo Wang*, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pennsylvania.

*Pei Wang*, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Indiana University.

*Rongsheng Wang*, Associate Professor, Department of Chemistry, College of Science and Technology; PhD, Washington University in St. Louis.

*Yan Wang*, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Stevens Institute of Technology.

*Yu Wang*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Illinois Institute of Technology.

*Richard B. Waring*, Associate Professor, Department of Biology, College of Science and Technology; PhD, Essex University.

*Sarah Elizabeth Wengryniuk*, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry, College of Science and Technology; PhD, Duke University.

*Katherine A. Willets*, Professor, Department of Chemistry, College of Science and Technology; PhD, Stanford University.

*Jie Wu*, Laura H. Carnell Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Florida Atlantic University.

*Xifan Wu*, Professor, Department of Physics, College of Science and Technology; PhD, Rutgers University.

*Stephanie L. Wunder*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Massachusetts.

*Xiaoxing Xi*, Laura H. Carnell Professor, Department of Physics, College of Science and Technology; PhD, Peking University and Institute of Physics.

*Wei-Shih Yang*, Professor, Department of Mathematics, College of Science and Technology; PhD, Cornell University.

*Weidong Yang*, Professor, Department of Biology, College of Science and Technology; PhD, Fudan University.

*Atilla Yilmaz*, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, New York University.

*Tan Yuen*, Associate Professor, Department of Physics, College of Science and Technology; PhD, Temple University.

*Michael J. Zdilla*, Professor, Department of Chemistry, College of Science and Technology; PhD, Princeton University.

*Kai Zhang*, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Hong Kong University of Science and Technology.

## Bioinformatics PhD

### COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Doctor of Philosophy in Bioinformatics.

### About the Program

Bioinformatics is a field of study that lies primarily at the intersection of the biological and computational sciences and includes significant elements of biochemistry, mathematics and statistics. The shared theme of this broad discipline is the application of sophisticated computing technologies to address questions on typically massive amounts of biological data.

The Bioinformatics PhD program is a joint venture between the Departments of Biology, Chemistry, and Computer and Information Sciences, pulling together the exceptional breadth and depth of teaching and research faculty in the College of Science and Technology. The program offers strong doctoral candidates an alternative to the Biology

PhD program for those interested in studying computational genomics in the research labs of faculty in biology, chemistry and computer science. Students gain rigorous advanced training in this expanding field through broad preparation in coursework related to the major research areas in bioinformatics.

While the program is administered through the Department of Biology, faculty from several departments in the College of Science and Technology teach coursework. Thus, a student's primary advisor may be faculty in a department other than Biology.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program itself is explicitly interdisciplinary, with students needing to be versatile in a wealth of computational and data-science contexts. Students are expected to develop specialized knowledge in one or more areas of the life sciences, as well as develop expertise in computational approaches to analyzing large amounts of data.

**Areas of Specialization:** Students focus on one of four main areas of concentration:

- Biological Data Analysis
- Evolutionary Genomics
- Evolutionary Medicine
- Structural Bioinformatics

**Job Prospects:** This program produces well-trained bioinformaticians who can be employed across a broad range of informatics fields, including the health professions, pharmaceutical and biotechnology, governmental agencies, as well as academia.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the department.

**Financing Opportunities:** Temple University offers a limited number of fellowships to support outstanding students in the doctoral program. Fellowships typically provide support, including a stipend and tuition, for two years.

Additional support is available in the form of Teaching and Research Assistantships. The principal duties of a Teaching Assistant include assisting faculty in the classroom; offering field and laboratory instruction; preparing materials for demonstration; conducting tutorials and laboratory sessions; and grading labs, quizzes and tests. Attendance at weekly laboratory preparation sessions is required. The duties of a Research Assistant vary depending on the faculty member or principal investigator who is directing a specific research project. The appropriate project(s) are determined by consultation between the student and the student's academic and research advisors. Research Assistants are expected to devote 20 hours per week to research obligations. Both Teaching and Research Assistantships typically provide a nine-month academic-year stipend and full tuition remission (up to 9 credits per term), but are generally awarded on a per term basis. Summer stipends are also available. Assistantships are awarded competitively.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 5

To be considered for a University fellowship, applications must be completed by January 5. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty whose research and teaching are in relevant areas, and who are familiar with the applicant's academic and/or research or computational abilities.

**Coursework Required for Admission Consideration:** Applicants should have a solid background in Biology or Biochemistry, and have had significant experience in computer programming. Alternately, a student may have a solid background in computer science and significant exposure to the life sciences, particularly genomics or structural biochemistry. Other backgrounds are considered if the applicant has broad experience across two or more STEM fields.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in a STEM field is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's program, computational background, research goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Required, with combined minimum score of 305 on the quantitative and verbal reasoning sections.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Bioinformatics program. The credits must be equivalent to coursework offered by the College of Science and Technology at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The Bioinformatics Steering Committee makes recommendations to the Biology Department Chair for transferring credits on an individual basis. The maximum number of credits a student may transfer is 6.

**Advanced Standing:** Students who enter the PhD program with a master's degree may be considered for advanced standing. The Steering Committee recommends the awarding of advanced standing on a case-by-case basis. The credits must be equivalent to coursework offered at Temple, with a grade of "B" or better having been earned in the course(s). The maximum number of advanced standing credits awarded is 15.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 36*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
BIOL 5131	Topics in Bioinformatics	3
Three BIOL or CHEM courses at the 5000 level or higher		9
<b>Advanced Study Courses</b>		
Four courses at the 5000 level or higher <sup>1</sup>		12
<b>Research Courses</b>		
<b>12</b>		
BIOL 9994	Preliminary Examination Preparation	
BIOL 9998	Pre-Dissertation Research / Elevation to Candidacy	
BIOL 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>36</b>

1

With the approval of the advisor and Program Coordinator, students select graduate courses in their area of interest within the bioinformatics field. No more than two courses may be taken outside of the College of Science and Technology.

### Additional Requirements:

All graduate-level courses must be passed with a "B-" or better.

All PhD candidates must have experience teaching at Temple University. A minimum teaching requirement of one term may be satisfied by serving as a Teaching Assistant in a Bioinformatics-affiliated department.

Attendance at scheduled departmental colloquia is required.

### Culminating Events:

*Preliminary Examination:*

The student independently prepares a written proposal and submits it to the Graduate Committee by April 1 of the student's fourth term. The proposal should follow the general format of a postdoctoral proposal to a federal granting agency (e.g., NIH). It should include background surrounding a particular research problem, including literature related to the problem, and a detailed methodological plan for investigating the problem. The sections of the written proposal should include Title; Abstract (not to exceed 300 words); Specific Aims; Background and Significance; Preliminary Data; Experimental Design (including Rationale, Specific Methods, Interpretation of Possible Results, and Pitfalls and Alternative Strategies); and References. The preliminary exam proposal should be 15 to 20 pages in length. The research advisor is not to make direct contributions.

The Area Committee has two weeks in which to review the written proposal, and the student is allowed only one re-write. If the proposal

is not accepted after the first re-write, the student is considered to have failed the exam. If the written proposal is accepted, an oral examination is scheduled through the department and held within two weeks. The oral examination tests the student's understanding of the background and substance of the research proposal and understanding of the area of specialization in which the research is embedded.

The preliminary examination is administered by the Preliminary Examination Committee. The student's primary research advisor is allowed to attend but must remain silent unless called upon by the Committee for clarification or advice. A minimum of three examiners serve on the Preliminary Examination Committee. The full exam, both written and oral, is graded by the Preliminary Examination Committee, and one of the following grades is assigned: Pass or Fail. The evaluators look for a breadth and depth of understanding of specific research areas, a critical application of that knowledge to specific biological phenomena, and an ability to write a proposal in a manner consistent with scientists in the student's specialization. The student is notified of the grade the day the exam is taken. A passing grade requires a 2/3 majority of the Preliminary Examination Committee. Students who receive a grade of Fail may retake the exam one additional time. Examinations that are to be retaken must be completed before October 1 of the following academic year.

*Dissertation:*

The doctoral dissertation is an original bioinformatics study that demonstrates the student's knowledge of research methods and mastery of their primary area of research.

The Doctoral Advisory Committee includes a minimum of four members: three from the list of CST faculty affiliated with the Bioinformatics PhD program, including the advisor, and one from outside the College of Science and Technology. Departmental/affiliated faculty members must be Graduate Faculty or equivalent research faculty and are chosen by the student and advisor. The Doctoral Advisory Committee is to be formed within two to three months after successful completion of the preliminary examination, with the exception of the outside member who may be chosen just prior to the dissertation defense. The student may petition the Biology Department Graduate Committee to change an advisor or committee member.

The Doctoral Examination is to consist of a formal departmental colloquium open to the public, but conducted by the Doctoral Advisory Committee. The student then meets with the Dissertation Examining Committee after the colloquium for the dissertation defense. The penultimate version of the dissertation must be approved by the Doctoral Advisory Committee at least two weeks before the Graduate School deadline for submission of final copies.

The scheduling of the dissertation defense is to be arranged by the dissertation advisor. The Graduate School must be notified at least ten working days in advance. Announcements of the dissertation defense are posted around the Biology Department and the host department as well as advertised via e-mail or listserv.

# Bioinformatics and Biological Data Science PSM

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Professional Science Master's in Bioinformatics and Biological Data Science.

## About the Program

Bioinformatics and Biological Data Science are the disciplines of science wherein computers are joined with the latest discoveries in genomics, biochemistry and biophysics. These rapidly growing fields bring together elements of biology, chemistry, computer science, physics and statistics. The Bioinformatics and Biological Data Science degree at Temple University, a leader in the field, is a two-year Professional Science Master's (PSM) degree that features:

- an interdisciplinary approach involving scientists from across Temple University;
- classes taught by esteemed tenure and tenure-track faculty, as well as by our industry and government partners;
- hands-on training in professional and management skills;
- partnerships with industry and government leaders, including a diverse and active External Advisory Board;
- access to real-world independent research projects; and
- an applied focus on responsibility and ethics in research and policy.

**Time Limit for Degree Completion:** 2 years

## Campus Location: Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Most of the classes are offered in the evenings or on weekends to enable full-time working professionals to be enrolled in the program. International students are required to register as full-time students.

**Interdisciplinary Study:** Students in the Temple University Bioinformatics and Biological Data Science master's degree program benefit from an advanced curriculum developed by leading Temple faculty in the Departments of Biology, Chemistry, and Computer and Information Sciences. The program has been designed to provide students with extensive skills in computer programming as well as deep knowledge in genomics and structural biology. All three areas are required in this challenging and exciting field. Because the degree is a Professional Science Master's, the program also offers:

- professional skills through courses in professional development;
- a research internship in a biotech company or other research center; and
- connections to key employers in the Philadelphia area.

**Accreditation:** Temple University is fully accredited by the Middle States Commission on Higher Education.

**Areas of Specialization:** The PSM degree program offers concentrations in:

- Bioinformatics
- Biological Data Science

Students selecting a concentration are required to take the two courses (6 credits) listed under the chosen concentration on the Program Requirements grid. Students may also opt to take one course from each concentration and thereby complete the requirements for the degree without a transcribed concentration.

**Job Prospects:** Official job placement is not offered, but Bioinformatics and Biological Data Science are areas of rapid job growth and have become essential parts of healthcare research and the biotechnology and pharmaceutical industries. Graduates of PSM programs are in high demand, underscoring the PSM as an attractive career path for those who do not wish to become academic researchers or pursue a doctorate.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the Biology Department.

**Financing Opportunities:** Financial assistance in the form of Research or Teaching Assistantships is not offered at this time.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1; December 15 international

Applications submitted after the priority deadline will be considered for admission on a rolling basis.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters should be obtained from college/university faculty or faculty who are familiar with the applicant's competency. If the applicant has an established career in a related field, the applicant's immediate supervisor should provide one of the letters.

**Coursework Required for Admission Consideration:** Applicants should have a strong background in one or more STEM fields: Science, Technology, Engineering and Mathematics.

**Bachelor's Degree in Discipline/Related Discipline:** The Bioinformatics and Biological Data Science PSM program has been designed for recent graduates and professionals who have a bachelor's degree or equivalent in a STEM field.

**Statement of Goals:** In approximately 500 to 1,000 words, specify your interest in the Bioinformatics and Biological Data Science PSM program, career goals, and academic and professional achievements.

#### Standardized Test Scores:

GRE: Required. A combined minimum score of 305 on the quantitative and verbal reasoning sections is expected.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Interview:** An in-person or Skype interview is required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Bioinformatics and Biological Data Science PSM program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The PSM in Bioinformatics and Biological Data Science Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
BIOL 5312	Biostatistics	3
BIOL 5403	Genomics	3
BIOL 5411	Structural Bioinformatics I	3
BIOL 5506	Professional Development Seminar for PSM in Biotechnology	1
BIOL 5511	Ethics in Bioinformatics	2

BIOL 5514	Biological Models in Python	3
-----------	-----------------------------	---

### Concentration Core Courses

Select two courses from the following: <sup>1,2</sup> 6

<b>Bioinformatics</b>		
BIOL 5509	Computational Genomics	
CHEM 5412	Structural Bioinformatics II	
<b>Biological Data Science</b>		
BIOL 5323	Global Change Science: Analytics with R	
CIS 5528	Predictive Modeling in Biomedicine	

**Electives** <sup>3</sup> 6

### Capstone Course

BIOL 9995	Capstone Project	3
-----------	------------------	---

**Total Credit Hours** 30

1

Students who elect to earn a transcribed concentration are required to take the two courses (6 credits) listed under the chosen concentration. Students may also opt to take one course from each field of study and thereby complete the requirements for the degree without a transcribed concentration.

2

With the Advisor's permission, any one Bioinformatics concentration course may be replaced with a graduate-level Bioinformatics course to complete the Bioinformatics concentration. Similarly, any one Biological Data Science concentration course may be replaced with a graduate-level Biological Data Science course to complete the Biological Data Science concentration.

3

In consultation with and approval from the Advisor, students may take any two graduate-level courses based on their optional concentration, specific research and career interests.

## Proposed Plan of Study Outlined by Year and Term

<b>Year 1</b>		
<b>Fall</b>		<b>Credit Hours</b>
BIOL 5403	Genomics	3
BIOL 5514	Biological Models in Python	3
Select one from the following:		3
BIOL 5312	Biostatistics <sup>1</sup>	
BIOL 5411	Structural Bioinformatics I <sup>1</sup>	
<b>Credit Hours</b>		<b>9</b>
<b>Spring</b>		
Elective		3
Select two from the following:		6
BIOL 5323	Global Change Science: Analytics with R <sup>2</sup>	
BIOL 5509	Computational Genomics <sup>3</sup>	
CHEM 5412	Structural Bioinformatics II <sup>3</sup>	
CIS 5528	Predictive Modeling in Biomedicine <sup>2</sup>	
<b>Credit Hours</b>		<b>9</b>

<b>Year 2</b>		
<b>Summer I</b>		
BIOL 5506	Professional Development Seminar for PSM in Biotechnology	1
<b>Credit Hours</b>		<b>1</b>
<b>Fall</b>		
BIOL 5511	Ethics in Bioinformatics	2
BIOL 9995	Capstone Project	1
Select one from the following:		3
BIOL 5312	Biostatistics <sup>1</sup>	
BIOL 5411	Structural Bioinformatics I <sup>1</sup>	
<b>Credit Hours</b>		<b>6</b>
<b>Spring</b>		
BIOL 9995	Capstone Project	2
Elective		3
<b>Credit Hours</b>		<b>5</b>
<b>Total Credit Hours</b>		<b>30</b>

1

All students should take BIOL 5411 in Year 1 and BIOL 5312 in Year 2, except for those opting for the Biological Data Science concentration. Students who choose the Biological Data Science concentration should start with BIOL 5312 in Year 1 and take BIOL 5411 in Year 2.

2

Students opting for a transcribed concentration in Biological Data Science select BIOL 5323 and CIS 5528.

3

Students opting for a transcribed concentration in Bioinformatics select BIOL 5509 and CHEM 5412.

**Culminating Event:***Capstone Project:*

BIOL 9995 Capstone Project constitutes a culminating event of the Bioinformatics and Biological Data Science PSM and requires the submission of a written project and oral presentation of the results. Capstone research may be completed in any laboratory at Temple University at the invitation of the Principal Investigator (PI) or through an internship/co-op/full-time job in the field of Bioinformatics or Biological Data Science in industry, the healthcare system, or a government agency. Since all Bioinformatics and Biological Data Science PSM classes are offered in the evening, students can avail themselves of these opportunities during the day. The process of locating internships is facilitated by the Bioinformatics and Biological Data Sciences PSM program based on the choice of optional concentration, specific research and career interests of the individual student.

**Bioinnovation PSM**

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Professional Science Master's in Bioinnovation.

**About the Program**

Bioinnovation entails identification, commercialization and dissemination of novel biological technologies, concepts and models. The primary objective of the Professional Science Master's (PSM) program in Bioinnovation is to develop a portfolio of knowledge and experience that allows individuals with a background in science, business, communication, law, and policy and regulation to pursue careers in such fast-growing fields as bioinformation, the environment, global health, pharmaceuticals and biotechnology, technology transfer and trade. The program offers:

- extensive biotechnology and biomedical background to challenge and complement traditional thinking and applications;
- review of the translational nature of biodiscoveries through classroom instruction and direct interaction with different bioindustry professionals, including scientists, lawyers, journalists and others; and
- development of team and matrix work routines and effective communication skills.

The Bioinnovation PSM program draws on the strengths of Temple faculty in the College of Science and Technology and the Fox School of Business and Management. Program development and implementation are executed by the PSM in Bioinnovation Steering Committee, which partners with Internal and External Advisory Board members and the Temple University Graduate School.

**Time Limit for Degree Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Most of the classes are offered in the evenings or on weekends to enable full-time working professionals to be enrolled in the program. International students are required to register as full-time students.

**Interdisciplinary Study:** The two-year program consists of a series of multi- and interdisciplinary core courses related to application of systems biology; dissemination of biodiscoveries; epigenetic and genetic applications in drug design and drug response; ethics, regulation and policy; feasibility assessment of innovative business ideas; innovation in biomodels and concepts; management and marketing for technologists; and research and commercialization of biomarkers and biotargets.

Many of the courses are writing intensive and also provide students with opportunities to sharpen their oral presentation skills. All student research projects are developed with the cooperation of Temple faculty and members of our External Advisory Board under the guidance of the PSM in Bioinnovation Steering Committee.

**Accreditation:** Temple University is fully accredited by the Middle States Commission on Higher Education.

**Areas of Specialization:** Three areas of concentration are offered:

- Bioinnovation in Environment and Society
- Current Topics in Bioinnovation
- Implementation of Biodiscoveries in Health and Other Industries

**Job Prospects:** Official job placement is not offered, but prospects are good. The program is designed to help recent graduates obtain relevant employment as well as accelerate career advancement and/or allow career shift of currently employed professionals. Graduates of PSM programs are in high demand, which underscores the PSM as an attractive career path for those who do not wish to become academic researchers or pursue a doctorate.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the Biology Department.

**Financing Opportunities:** Financial assistance in the form of Research or Teaching Assistantships is not offered at this time.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall Priority Deadline:* March 1; December 15 international

*Spring Priority Deadline:* October 30

Applications submitted after the priority deadline will be considered for admission on a rolling basis. Applications are processed on a continual basis. Ordinarily, the applicant is informed of an admissions decision within four to six weeks of receipt of all supporting application documents.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters should be obtained from college/university faculty or faculty who are familiar with the applicant's competency. If the applicant has an established career in a related field, the applicant's immediate supervisor should provide one of the letters.

**Coursework Required for Admission Consideration:** Applicants should have a solid background in one or more of the following fields: science, business, communication, law, and policy and regulation. The PSM in Bioinnovation Steering Committee may allow departures from course requirements upon review.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Biology, Chemistry, Business or Communication, or a Juris Doctor in Law (or foreign equivalent), is required. Non-STEM graduates are required to enroll in at least two Biology foundation courses, as recommended by the PSM in Bioinnovation Steering Committee, on a non-matriculated basis.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in the Bioinnovation PSM program, career goals, and academic and professional achievements.

**Standardized Test Scores:**

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Interview:** In-person or video interview required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Bioinnovation PSM program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The PSM in Bioinnovation Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*

BIOL 9995	Capstone Project <sup>2</sup>	3
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup>

With advisor approval, any recommended graduate-level introductory course offered by the Fox School of Business and Management may be substituted for SGM 5136.

2

A total of 3 credits of BIOL 9995 is required for the PSM in Bioinnovation program. Students may start their capstone research project at any time with approval from their advisor.

## Proposed Progressive Coursework Outlined by Year:

Year 1		
Fall		Credit Hours
BIOL 5226	Innovative Biomodels and Concepts	3
BIOL 5227	Biomarkers and Biotargets: Research and Commercialization	3
SGM 5136	Principles of Strategy and Management <sup>1</sup>	3
<b>Credit Hours</b>		<b>9</b>
Spring		
BIOL 5228	Epigenetics, Genetics: Applications in Drug Design and Drug Response	3
BIOL 5229	Systems Biology: Principles and Applications	3
BIOL 5239	Dissemination of Biodiscoveries and Virtual Reality in Medicine	3
Elective <sup>2,3</sup>		3
<b>Credit Hours</b>		<b>12</b>
Year 2		
Summer I		
BIOL 9995	Capstone Project <sup>4</sup>	1
<b>Credit Hours</b>		<b>1</b>
Fall		
BIOL 5505	Ethics Regulation and Policy in Biotechnology	3
BIOL 9995	Capstone Project <sup>4</sup>	1
Elective <sup>2,3</sup>		3
<b>Credit Hours</b>		<b>7</b>
Spring		
BIOL 9995	Capstone Project <sup>4</sup>	1
<b>Credit Hours</b>		<b>1</b>
<b>Total Credit Hours</b>		<b>30</b>

1

With advisor approval, any recommended graduate-level introductory course offered by the Fox School of Business and Management may be substituted for SGM 5136.

2

Students are required to take 6 credits of electives. These can be selected from the program's approved list of electives; any graduate course offered by the Fox School of Business and Management; or any other Temple University graduate-level course that aligns with the students' career goals.

3

Electives are shown in the plan of study as 3-credit courses taken in two academic terms. If students choose to take electives that are fewer than 3 credits and additional time is needed to complete elective coursework, it is recommended that those elective credits be taken in the Spring term of Year 2.

4

A total of 3 credits of BIOL 9995 is required for the PSM in Bioinnovation program. Students may start their capstone research project at any time with approval from their advisor. These credits are shown in the plan of study as 1 credit taken in each of three academic terms. Students may elect to distribute the 3 required credits over one, two or three terms, as their schedule allows.

## Approved Electives:

Code	Title	Credit Hours
BIOL 5234	Bioinnovation Seminar	1.5
BIOL 5235	Milestones in Clinical Translation of Biodiscoveries	1.5
BIOL 5236	Bioadvanced Screening in Health Disparity	1.5
SGM 5137	Entrepreneurial Thinking and New Venture Creation	3
SGM 5138	Global Innovation Strategy: Creating Agile, Innovative, Globally-Competitive Organizations	3
SGM 5139	Lean Entrepreneurship / Innovation: Fast & Frugal Methods to Launch Startups & Test Innovative Ideas	3
SGM 5142	Business Model Innovation	3
SGM 5144	Creativity Unleashed: Harnessing Creativity to Solve Real-World Innovation Challenges	3
SGM 5148	Open Innovation and Managing Strategic Alliances	3

Or any other graduate course offered by the Fox School of Business and Management or Temple University graduate-level course that aligns with the student's career goals

### Culminating Event:

#### Capstone Project:

BIOL 9995 constitutes the capstone experience for the Bioinnovation PSM and requires the submission of a written project and oral presentation of the results.

## Biology MA

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Arts in Biology.

### About the Program

The MA in Biology emphasizes contemporary coursework for students to gain advanced understanding within the field of modern biology. The Biology MA degree program is designed for students seeking graduate studies in the biological sciences without experimental research in labs. In comparison with the Biology MS (p. 893), the MA in Biology program focuses primarily on coursework and independent research, which helps the student form expertise in one or more areas of biology. Students develop the analytical thinking skills necessary for biological research and literature review.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Many classes are offered in the evening to enable full-time working professionals to be enrolled in the program. International students are required to register as full-time students.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework in Biochemistry, Chemistry, Computer Science, Environmental Science, Engineering, Mathematics and Physics. Special interdisciplinary programs in which faculty from the Biology Department participate include the Center for Biotechnology, Center for Computational Genetics and Genomics, the Institute for Computational Molecular Science, the Institute for Genomics and Evolutionary Medicine, and the Environmental Studies and Neuroscience Programs.

**Areas of Specialization:** Faculty members specialize in the areas of aquatic and terrestrial ecology, biochemistry, biophysics, cell biology, computational genomics, developmental biology, evolutionary and organismal biology, genetics, molecular biology, molecular evolution, neurobiology and virology.

**Job Prospects:** Graduates are prepared for professional schools or careers in fields related to the biological sciences, including academia, biotechnology, government, health professions and pharmaceuticals.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the department.

**Financing Opportunities:** University Fellowships, Graduate Assistantships, and Academic Internships are normally reserved for PhD students.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* October 30

Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters should be obtained from college/university faculty, whenever possible.

**Coursework Required for Admission Consideration:** Applicants should have a solid background in Biology and should have taken at least eight undergraduate Biology courses and one year each of Calculus, Chemistry and Physics. The Biology Department Graduate Committee may allow exceptions to these course requirements after review.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in a science field is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's program, academic achievements and research goals, and provide the names of up to three faculty with whom you would like to conduct your capstone master's research thesis.

### Standardized Test Scores:

GRE: Not required. If submitted, a combined minimum score of 300 on the quantitative and verbal reasoning sections is expected.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Biology program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The Biology Department Graduate Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

## Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
BIOL 8003	Introduction to Graduate Research	3
Two 8000-level Graduate Seminar courses <sup>1</sup>		6
<b>Electives</b>		
Select courses from the following to total a minimum of 15 credits: <sup>2</sup>		15
BIOL 5101	Evolution	
BIOL 5111	Genomics in Medicine	
BIOL 5112	Fundamentals of Genomic Evolutionary Medicine	
BIOL 5114	Evolutionary Ecology	
BIOL 5128	Genomics and Infectious Disease Dynamics	
BIOL 5241	Genomics and Evolutionary Biology of Parasites and Other Dependent Species	
BIOL 5254	Animal Behavior	
BIOL 5275	Ecology of Invasive Species	
BIOL 5301	Cell Biology	
BIOL 5307	Conservation Biology	
BIOL 5312	Biostatistics	
BIOL 5321	Plant Community Ecology	
BIOL 5325	Research Techniques in Molecular Biology	
BIOL 5358	Cellular/Molecular Neuroscience	
BIOL 5403	Genomics	
BIOL 5411	Structural Bioinformatics I	
BIOL 5416	Tropical Marine Biology: Belize	
BIOL 5428	Virology	
BIOL 5429	Developmental Genetics	
BIOL 5433	Advanced Techniques in Microscopy	
BIOL 5436	Freshwater Ecology	
BIOL 5452	Systems Neuroscience	
BIOL 5454	Neurological Basis of Animal Behavior	
BIOL 5456	Organization and Development of the Nervous System	
BIOL 5465	Mammalian Development	
BIOL 5466	Contemporary Biology	
BIOL 5469	Molecular Biology	
BIOL 5471	Cell Proliferation	
BIOL 5474	Physical Biochemistry	
BIOL 5475	General Biochemistry I	
BIOL 5476	General Biochemistry II	
BIOL 5479	Biotechnology	
BIOL 5501	Analytical Biotechnology	
BIOL 5502	Microbial Biotechnology	
BIOL 5505	Ethics Regulation and Policy in Biotechnology	
BIOL 5506	Professional Development Seminar for PSM in Biotechnology	
BIOL 5509	Computational Genomics	
BIOL 5511	Ethics in Bioinformatics	
BIOL 8985	Teaching in Higher Education: Life Sciences <sup>3</sup>	

**Capstone Course**

BIOL 9995	Capstone Project <sup>4</sup>	6
<b>Total Credit Hours</b>		<b>30</b>

1

One 5000-level course that emphasizes writing and communication may be substituted for one 3-credit 8000-level seminar. The 5000-level course need not be a Biology course but must be approved by the student's advisor and the Graduate Chair.

2

Electives may include BIOL 5000-level courses from the Professional Science Master's programs. Up to 9 credits may also be taken in non-biology graduate courses in related fields such as chemistry, computer science, education and psychology. All non-biology electives must be approved by the student's advisor and the Graduate Chair.

3

This course may only be taken for 3 credits.

4

This course requirement may be satisfied by completing a library thesis.

**Additional Requirement:** All graduate-level courses must be passed with a "B-" or better.

**Culminating Event:***Capstone Project:*

The capstone project, BIOL 9995, is typically completed by conducting an MA library thesis. This is an original study that demonstrates the student's knowledge of the literature, mastery of their primary area of interest, and an advanced knowledge of research methods. The thesis should be limited to a specific problem in the biological sciences and investigated under the direct supervision of a major advisor. The thesis is evaluated by the student's advisor and one other graduate faculty member.

## Biology MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Biology.

### About the Program

The MS in Biology offers students rigorous advanced study of the Biological Sciences. Broad preparation is offered in major research areas in Biology through a variety of formal courses and advanced seminars. Students are encouraged to take courses in related sciences. Preparation for both research and teaching is important.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is required.

**Interdisciplinary Study:** The program encourages interdisciplinary research and coursework in Biochemistry, Chemistry, Computer Science, Environmental Science, Engineering, Mathematics and Physics. Special interdisciplinary programs in which faculty from the Biology Department participate include the Center for Biotechnology, Center for Computational Genetics and Genomics, the Institute for Computational Molecular Science, the Institute for Genomics and Evolutionary Medicine, and the Environmental Studies and Neuroscience Programs.

**Areas of Specialization:** Faculty members specialize in the areas of aquatic and terrestrial ecology, biochemistry, biophysics, cell biology, computational genomics, developmental biology, evolutionary and organismal biology, genetics, molecular biology, molecular evolution, neurobiology and virology.

**Job Prospects:** The department produces well-trained biologists who find work in the biotechnology, health professions and pharmaceutical fields, or in academia or government.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the department.

**Financing Opportunities:** University Fellowships, Graduate Assistantships, and Academic Internships are normally reserved for PhD students.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* March 1

*Spring:* October 15; August 1 international

Matriculation in the Fall is recommended. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters should be obtained from college/university faculty, preferably those in laboratory science areas, who are familiar with the applicant's academic and/or research abilities.

**Coursework Required for Admission Consideration:** Applicants should have a solid background in Biology and should have taken at least eight undergraduate Biology courses and one year each of Calculus, Chemistry and Physics. The Biology Department Graduate Committee may allow exceptions to these course requirements after review.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in a science field is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's program, academic achievements and research goals, and provide the names of up to three faculty with whom you would like to conduct your master's research thesis.

**Standardized Test Scores:**

GRE: Not required. If submitted, a combined minimum score of 300 on the quantitative and verbal reasoning sections is expected.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Biology program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The Biology Department Graduate Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

### Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
BIOL 8003	Introduction to Graduate Research	3
	Two 8000-level Biology seminars <sup>1</sup>	6
	Three 5000-level Biology electives	9

Three didactic or research Biology courses <sup>2</sup>	9
<b>Research Course</b>	
BIOL 9996      Master's Thesis Research	3
<b>Total Credit Hours</b>	<b>30</b>

1

One 3-credit 8000-level seminar may be replaced with three 1-credit 8000-level seminars. Also, one 5000-level course that emphasizes writing and communication may be substituted for one 3-credit 8000-level seminar. The 5000-level course need not be a Biology course, but approval from the student's advisor and the Graduate Chair is required.

2

With approval from the student's advisor and the Graduate Chair, relevant courses from departments other than Biology may be taken.

**Additional Requirements:**

All graduate-level courses, including Biochemistry, must be passed with a "B-" or better.

Attendance at scheduled departmental colloquia is required.

**Culminating Event:***Thesis:*

The master's thesis is an original empirical study that demonstrates the student's knowledge of research methods and mastery of their primary area of interest. The thesis should be limited to a specific problem in the biological sciences and investigated under the direct supervision of a major advisor.

A student preparing to defend a master's thesis should confirm a date and time with their committee, composed of both the major advisor and another member of the Graduate Faculty. The student should then register with the department. After the date, time and room are approved, the Biology Department posts flyers announcing the defense.

The student's committee is responsible for evaluating the thesis and its oral defense in a public presentation. The committee votes to pass or fail the thesis and defense at the end of the public presentation. If revisions are required, the committee must approve the changes.

## Biology PhD

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Doctor of Philosophy in Biology.

### About the Program

The PhD in Biology offers students rigorous advanced study of the biological sciences. Broad preparation is offered in major research areas in Biology through a variety of formal courses and advanced seminars. Students are encouraged to take courses in related sciences. Preparation for both research and teaching is important.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is required.

**Interdisciplinary Study:** The program encourages interdisciplinary research and coursework in Biochemistry, Chemistry, Computer Science, Environmental Science, Engineering, Mathematics and Physics. Special interdisciplinary programs in which faculty from the Biology Department participate include the Center for Biotechnology, Center for Computational Genetics and Genomics, the Institute for Computational Molecular Science, the Institute for Genomics and Evolutionary Medicine (see <http://igem.temple.edu/education/overview>), and the Environmental Studies and Neuroscience Programs.

**Areas of Specialization:** Faculty members specialize in the areas of aquatic and terrestrial ecology, biochemistry, biophysics, cell biology, computational genomics, developmental biology, evolutionary and organismal biology, genetics, molecular biology, molecular evolution, neurobiology and virology.

**Job Prospects:** The department produces well-trained biologists who find work in the biotechnology, health professions and pharmaceutical fields, or in academia or government.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the department.

**Financing Opportunities:** Temple University offers a limited number of fellowships to support outstanding students in the doctoral program.

Fellowships typically provide support, including a stipend and tuition, for two years.

Additional support is available in the form of Teaching and Research Assistantships. The principal duties of a Teaching Assistant include assisting faculty in the classroom; offering field and laboratory instruction; preparing materials for demonstration; conducting tutorials and laboratory sessions; and grading labs, quizzes and tests. Attendance at weekly laboratory preparation sessions is required. The duties of a Research Assistant vary depending on the faculty member or principal investigator who is directing a specific research project. The appropriate project(s) are determined by consultation between the student and the student's academic and research advisors. Research Assistants are expected to devote 20 hours per week to research obligations. Both Teaching and Research Assistantships typically provide a nine-month academic-year stipend and full tuition remission (up to 9 credits per term), but are generally awarded on a per term basis. Summer stipends are also available. Assistantships are awarded competitively.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* December 15

*Spring:* October 15; August 1 international

To be considered for a University fellowship, applicants should have an essentially complete application on file by January 5.

Matriculation in the Fall is highly recommended. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters should be obtained from college/university faculty, preferably those in laboratory science areas, who are familiar with the applicant's academic and/or research abilities.

**Coursework Required for Admission Consideration:** Applicants should have a solid background in Biology and should have taken at least eight undergraduate Biology courses and one year each of Calculus, Chemistry and Physics. The Biology Department Graduate Committee may allow exceptions to these course requirements after review.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Biology or another science field is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's program, research goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Recommended, but not required. Submitting scores could be advantageous for applicants seeking to be awarded a university fellowship. Applicants are encouraged to contact prospective advisors or the chair of the graduate program for more information.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S.

institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Biology program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The Biology Department Graduate Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

**Advanced Standing:** A student who has completed a master's degree or started a PhD program at another institution may apply for advanced standing. Students are awarded varying numbers of credit of advanced standing, up to a maximum of 21, on a case-by-case basis. The credits must be equivalent to coursework offered at Temple, with a grade of "B" or better having been earned in the course(s).

## Program Requirements

### General Program Requirements:

BIOL 5501	Analytical Biotechnology
BIOL 5502	Microbial Biotechnology
EES 5011	Remote Sensing and GIS
<b>Research Courses</b> <sup>4</sup>	<b>6</b>
BIOL 9994	Preliminary Examination Preparation
BIOL 9998	Pre-Dissertation Research / Elevation to Candidacy
BIOL 9999	Dissertation Research
<b>Total Credit Hours</b>	<b>36</b>

1

Students take 1 credit of BIOL 8220 in the Fall and 2 credits of BIOL 8220 in the Spring.

2

One 3-credit seminar may be replaced with three 1-credit seminars.

3

Additional courses are selected from 8000-level seminars or from 5000-level Biology courses. With approval from the student's advisor and the Graduate Chair, two non-Biology graduate-level courses that align with the student's career goals may be taken.

4

A minimum of 2 credits of BIOL 9999 must be taken.

**Additional Requirements:**

All graduate-level courses must be passed with a "B-" or better.

All PhD candidates must have experience teaching at Temple University. A minimum teaching requirement of two terms may be satisfied by serving as a Teaching Assistant in the Biology Department.

Attendance at scheduled departmental colloquia is required.

**Culminating Events:***Preliminary Examination:*

The student independently prepares a written proposal and submits it to the Graduate Committee by April 1 of the student's fourth term. The proposal should follow the general format of a postdoctoral proposal to a federal granting agency (e.g., NIH). It should include background surrounding a particular research problem, including literature related to the problem and a detailed methodological plan for investigating the problem. The sections of the written proposal should include Title; Abstract (not to exceed 300 words); Specific Aims; Background and Significance; Preliminary Data; Experimental Design (including Rationale, Specific Methods, Interpretation of Possible Results, and Pitfalls and Alternative Strategies); and References in PNAS format. The preliminary exam proposal should be 15 to 20 pages in length. The research advisor is not to make direct contributions to the brief.

The Area Committee has two weeks in which to review the written proposal, and the student is allowed only one re-write. If the proposal is not accepted after the first re-write, the student is considered to have failed the exam. If the written proposal is accepted, an oral examination is scheduled through the department and held within two weeks. The oral examination tests the student's understanding of the background and substance of the research proposal and understanding of the area of specialization in which the research is embedded.

The preliminary examination is administered by the Preliminary Examination Committee in the absence of the research advisor. A minimum of three examiners serve on the Preliminary Examination Committee. The full exam, both written and oral, is graded by the Preliminary Examination Committee, and one of the following grades is assigned: Fail, Promising, Pass, High Pass, or Pass with Distinction. The evaluators look for a breadth and depth of understanding of specific research areas; a critical application of that knowledge to specific biological phenomena; and an ability to write a proposal in a manner consistent with scientists in the student's specialization. The student is notified of the grade the day the exam is taken. A passing grade requires a 2/3 majority of the Preliminary Examination Committee. The grade of Promising denotes that an exam must be retaken. Examinations that are to be retaken must be completed before October 1 of the following academic year.

*Dissertation:*

The doctoral dissertation is an original empirical study that demonstrates the student's knowledge of research methods and mastery of their primary area of research.

The Doctoral Advisory Committee includes a minimum of four members: three from the department, including the advisor, and one from outside the department. Departmental members must be Graduate Faculty or equivalent research faculty and are chosen by the student and advisor. The Doctoral Advisory Committee is to be formed within two to three months after successful completion of the preliminary examination, with the exception of the outside member who may be chosen at a later date. The student may petition the Biology Department Graduate Committee to change an advisor or committee member if needed.

The Doctoral Defense is to consist of a formal departmental colloquium open to the public. It is conducted by the Doctoral Advisory Committee, with the outside examiner present. The Graduate School must be notified at least 10 working days in advance. Announcements of the dissertation defense are posted around the Biology Department and sent via e-mail or listserv.

The penultimate version of the dissertation must be approved by the Doctoral Advisory Committee at least two weeks before the Graduate School deadline for submission of final copies.

## Biotechnology PSM

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Professional Science Master's in Biotechnology.

### About the Program

The Professional Science Master's (PSM) program in Biotechnology is a two-year degree program hosted by the Department of Biology, with coursework taught by diverse faculty from Temple University, industry and government. Students work directly with our research faculty on real-world projects, gaining hands-on skills necessary to solve emerging problems. The program culminates in an independent research project based at Temple or one of its industry and government partners in Philadelphia.

**Time Limit for Degree Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Most of the classes are offered in the evenings or on weekends to enable full-time working professionals to be enrolled in the program. International students are required to register as full-time students.

**Interdisciplinary Study:** The two-year program consists of a series of multidisciplinary and interdisciplinary core courses that include current topics in biotechnology, analytical biotechnology, bioethics/policy, bioinformatics, environmental biotechnology and microbial biotechnology. Many of the courses are writing intensive and also provide students with opportunities to sharpen their oral presentation skills. All student research projects are developed with the cooperation of Temple faculty and members of our External Advisory Board under the guidance of the PSM Steering Committee.

**Accreditation:** Temple University is fully accredited by the Middle States Commission on Higher Education.

**Areas of Specialization:** Three areas of concentration are offered:

- Bioinformatics in Biotechnology, which entails decision-making based on data accession, as well as manipulation and analysis over a broad range of fields
- Biotechnology in Biomedicine and Drug Discovery, including target identification of disease to drug design, discovery and optimization
- Biotechnology in Industrial and Environmental Engineering, in partnership with the College of Engineering

**Job Prospects:** Official job placement is not offered, but prospects are good. Philadelphia and the surrounding Delaware Valley constitute a primary hub for integrative biotechnology since the area is a major center for pharmaceutical companies, chemical industries and the health sciences. Philadelphia has also exhibited an increasing leadership presence in the emerging Green City movement. Given recent growth in the Biotechnology sector, the demand for a highly trained workforce with a strong science background has soared.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the Biology Department.

**Financing Opportunities:** Financial assistance in the form of Research or Teaching Assistantships is not offered.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall Priority Deadline:* March 1; December 15 international

*Spring Priority Deadline:* October 30

Applications submitted after the priority deadline will be considered for admission on a rolling basis.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 2

*From Whom:* Letters should be obtained from college/university faculty, preferably those in laboratory science areas, who are familiar with the applicant's academic and/or research abilities.

**Coursework Required for Admission Consideration:** Applicants should have a solid background in Biology, Chemistry, Engineering or Physics. The Biology Department's Graduate Committee may allow departures from course requirements upon review.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in a science or engineering field is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's program, research goals, and academic and research achievements.

**Standardized Test Scores:**

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Biotechnology PSM program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The Biology Department Graduate Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

**General Program Requirements:**

*Number of Required Beyond the Baccalaureate: 30*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
BIOL 5479	Biotechnology	3
BIOL 5501	Analytical Biotechnology	1.5
BIOL 5502	Microbial Biotechnology	3
BIOL 5503	Biotechnology Laboratory I	3
BIOL 5504	Biotechnology Laboratory II	3
BIOL 5505	Ethics Regulation and Policy in Biotechnology	3
BIOL 5506	Professional Development Seminar for PSM in Biotechnology	1
BIOL 5521	Nucleic Acid Technologies	1.5
Any Bioinformatics or Genomics 5000-level course		3
<b>Electives</b> <sup>1</sup>		<b>6</b>
<b>Capstone Course</b>		

BIOL 9995 Capstone Project 2

**Total Credit Hours** 30

1

Students may elect to take any course relevant to their area of specialization, including coursework offered by the School of Pharmacy's RAQA program. Approval from the PSM Steering Committee is required.

**Culminating Event:**

*Independent Research Project:*

The Biotechnology PSM offers technical and leadership training to address environmental priorities and human health. In this vein, students select an independent research project (BIOL 9995 Capstone Project) by the end of their first year with mentors at Temple and/or approved co-mentors at any off-campus sites, including pharmaceutical companies and government agencies.

Project proposals, which are approved by the PSM Steering Committee, foster technical and intellectual skill building. At the end of the program, the project is presented in written and oral formats to further develop communication skills. These features provide graduates with knowledge and leadership skills to help tackle real-world problems using biotechnology.

## Chemistry MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Chemistry.

## About the Program

The Chemistry graduate program is designed to provide a solid background in the chosen area of specialization. It emphasizes the acquisition of skills that enable students to gain further knowledge in their research and professional careers. For this reason, the Chemistry graduate degree program is research oriented, and seminar attendance and familiarization with the chemical literature are considered integral. The course requirements are comparatively light, although a wide variety of intermediate and advanced courses in related areas are offered. Students are encouraged to take courses, according to their research interests, in related areas such as Biology, Computer Science and Physics.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** A Chemical Physics program is offered jointly with the Department of Physics.

**Areas of Specialization:** The Department of Chemistry offers programs leading to the MS and PhD degrees in Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry and Physical Chemistry. Areas of specialization include environmental chemistry, materials and polymers, medicinal, nanoscience, photonics and surface science. For the master's program, three options are offered:

- Thesis Track, which is designed for students who are not full-time. Students cannot receive financial support from the Chemistry Department when completing this option. Any student wanting to pursue this option must receive prior approval from the Chemistry Graduate Committee.
- Coursework Track, which is designed for students who already have extensive experience in the laboratory and are currently employed in the local chemical industry. Students must obtain permission from the Graduate Committee to pursue this option.
- Research Track, which facilitates earning a master's degree by PhD students who have passed their candidacy exam upon successful defense of their Original Research Proposal or who have completed sufficient coursework commensurate with a master's degree. This track is available to students in the PhD program with approvals from their research advisor and the Graduate Committee.

**Job Prospects:** The majority of students find employment in the chemical industry. Some go on to academic positions or positions in government laboratories.

**Non-Matriculated Student Policy:** Non-matriculated students are allowed to take up to 9 credits before admission into a degree program must be sought.

**Financing Opportunities:** The duties of a Teaching Assistant typically involve leading recitation sections and/or overseeing laboratories, as well as grading lab assignments, tests and quizzes, when applicable. After their first year, most students are supported by a research assistantship.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall Priority Deadline:* March 1

*Spring Priority Deadline:* October 30

Applications submitted after the priority deadline will be considered for admission on a rolling basis. Note that Spring admission is rare as coursework is designed to start in the Fall.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from faculty or people in industry who are familiar with the academic and/or research aptitude of the candidate.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required. Typically, the undergraduate degree has been earned in Chemistry, Biochemistry or a related field.

**Statement of Goals:** Identify your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

**Standardized Test Scores:**

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 88
- IELTS Academic: 6.5
- PTE Academic: 60
- Duolingo: 110

Regardless of score, all international students are required to take a SPEAK test upon arrival at Temple.

**Resume:** Current resume required.

**Transfer Credit:** All graduate credits earned by a student prior to matriculation in the Chemistry graduate program are subject to evaluation and approval by the Chemistry Graduate Committee. A "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms," must be completed. It must be supplemented with an official transcript, sent directly by the Registrar of the institution where the credits were earned. All transfer credits must be "B" or higher and must be from an accredited institution. The maximum number of credits a student may transfer is 6.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

### Thesis Track <sup>1</sup>

Code	Title	Credit Hours
	Six formal lecture courses	18
	Literature seminar	2

One approved graduate course and/or research course	4
CHEM 9996 Master's Thesis Research	6
<b>Total Credit Hours</b>	<b>30</b>

## Coursework Track <sup>1</sup>

Code	Title	Credit Hours
Ten formal lecture courses		30
<b>Total Credit Hours</b>		<b>30</b>

## Research Track <sup>1,2</sup>

Code	Title	Credit Hours
Six or more formal lecture courses		18-21
CHEM 9900 Seminar		2
CHEM 9901 Original Research Proposal Preparation		6-10
or CHEM 9991 Graduate Research Projects		
<b>Total Credit Hours</b>		<b>30</b>

1

In consultation with an academic advisor, students select coursework from the following approved courses: CHEM 5001-9800 (excluding CHEM 5901), and may include BCMS 5003 Fundamentals of Biochemistry or MEDS 5003 Fundamentals of Biochem, BMSC 8702 Enzymes and Proteins, EES 5625 Electron Optical Techniques, MEE 5205 Microscopy and Microanalysis of Materials, and/or PHYS 5000 Topical Seminar. Additional course substitutions may be made with approval of the Graduate Committee.

2

Selecting the Research Track requires approval from the student's research advisor and the Chemistry Graduate Committee.

**Culminating Events:** In addition to successful completion of coursework, the Thesis Track and Coursework Track require the following:

### *Thesis:*

The MS thesis is the culminating event for the Thesis Track. The thesis should be an original piece of research. Often, but not always, the research described in the MS thesis can be published in a peer-reviewed journal. The student coordinates the time for the defense with their Graduate Advisory Committee, which is responsible for evaluating the thesis and its defense. No thesis should go to defense unless it is ready for public scrutiny.

### *Master's Examination:*

The master's examination is usually the last requirement to be fulfilled by students in the Coursework Track. Its purpose is to demonstrate a breadth and depth of knowledge in the core concepts of Chemistry. The exam is based on the student's major track in Chemistry. Faculty members in the student's track write the questions for the master's exam. The faculty members who write the questions grade the exam. Students schedule the exam with the department.

## Chemistry PhD

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Doctor of Philosophy in Chemistry.

## About the Program

The Chemistry graduate program is designed to provide a solid background in the chosen area of specialization. It emphasizes the acquisition of skills that enable students to gain further knowledge in their research and professional careers. For this reason, the Chemistry graduate degree program is research oriented, and seminar attendance and familiarization with the chemical literature are considered integral. The course requirements are comparatively light, although a wide variety of intermediate and advanced courses in related areas are offered. Students are encouraged to take courses, according to their research interests, in related areas such as Biology, Computer Science and Physics.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** A Chemical Physics program is offered jointly with the Department of Physics.

**Areas of Specialization:** The Department of Chemistry offers programs leading to the MA and PhD degrees in Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry and Physical Chemistry. Areas of specialization include environmental chemistry, materials and polymers, medicinal, nanoscience, photonics and surface science.

**Job Prospects:** The majority of students find employment in the chemical industry. Some go on to academic positions or positions in government laboratories.

**Non-Matriculated Student Policy:** Non-matriculated students are allowed to take up to 9 credits before admission into a degree program must be sought.

**Financing Opportunities:** The duties of a Teaching Assistant typically involve leading recitation sections and/or overseeing laboratories, as well as grading lab assignments, tests and quizzes, when applicable. After their first year, most students are supported by a research assistantship.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* December 15

*Spring:* September 15

For Fall admissions, priority is given to applications submitted by December 15. Applications submitted after December 15 will be considered on a case-by-case basis for admissions and financial assistance.

Applications for Spring admission should be received by September 15. Note, however, that Spring admission is rare as coursework is designed to start in the Fall.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from faculty or people in industry who are familiar with the academic and/or research aptitude of the candidate.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required for admission into the PhD program.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required. Typically, the undergraduate degree has been earned in Chemistry, Biochemistry or a related field.

**Statement of Goals:** Identify your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 88
- IELTS Academic: 6.5
- PTE Academic: 60
- Duolingo: 110

Regardless of score, all international students are required to take a SPEAK test upon arrival at Temple.

**Resume:** Current resume required.

**Writing Sample:** Submission of research papers with the applicant as a co-author or any other material associated with the applicant's research aptitude is recommended.

**Advanced Standing:** Students who enter the PhD program, whether with or without a master's degree in Chemistry or a closely related field, may be considered for advanced standing. The Graduate Committee recommends the awarding of advanced standing on a case-by-case basis based on a review of graduate coursework completed at another institution. The credits must be equivalent to graduate chemistry coursework offered at Temple, and the student must have completed the course(s) with a grade of "B" or better. The maximum number of advanced standing credits awarded is 18.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 36

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
CHEM 5901	Responsibility and Ethics in Chemical Research	1
CHEM 8985	Teaching in Higher Ed:Phys Sci <sup>1</sup>	1
CHEM 9900	Seminar	2
CHEM 9901	Original Research Proposal Preparation	1
<b>Core Courses by Area of Study <sup>2</sup></b>		<b>9</b>
<b>Chemistry Electives <sup>3</sup></b>		<b>9</b>
<b>Research Courses</b>		<b>13</b>
CHEM 9991	Graduate Research Projects	
CHEM 9994	Preliminary Examination Preparation	
CHEM 9998	Pre-Dissertation Research / Elevation to Candidacy	
CHEM 9999	Dissertation Research <sup>4</sup>	
<b>Total Credit Hours</b>		<b>36</b>

1

Students seeking a career in an academic setting are encouraged to take CHEM 8985 for 3 credits so they can earn the Teaching in Higher Education graduate certificate offered by the Center for the Advancement of Teaching at Temple University. Those who choose this option take two fewer credits of CHEM 9991 or CHEM 9994. Part-time students and students not on assistantship are exempted from the requirement to take CHEM 8985, and may instead take an additional credit of CHEM 9991 or CHEM 9994.

2

Areas of study include Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry and Physical Chemistry. See the course grid below for the core courses offered in each area.

3

Chemistry electives may include any courses numbered CHEM 5001-9800 (excluding CHEM 5901 and CHEM 8985), and may include BCMS 5003 Fundamentals of Biochemistry or MEDS 5003 Fundamentals of Biochem, BMSC 8702 Enzymes and Proteins, EES 5625 Electron Optical Techniques, MEE 5205 Microscopy and Microanalysis of Materials, and/or PHYS 5000 Topical Seminar. Additional course substitutions may be made with approval of the Graduate Committee.

4

Students must complete a minimum of 2 credits of CHEM 9999.

## Core Courses by Area of Study

Code	Title	Credit Hours
<b>Analytical Chemistry</b>		<b>9</b>
CHEM 5305	Chemical Kinetics	
Select two courses from the following:		
CHEM 5201	Physical Methods in Organic Chemistry	
CHEM 8310	Special Topics in Analytical Chemistry (Mass Spectroscopy)	
CHEM 8601	Analytical Separations	
EES 5625	Electron Optical Techniques	
<b>Biochemistry</b>		<b>9</b>
CHEM 5401	Biochemistry I	
Select two courses from the following:		
BCMS 5003	Fundamentals of Biochemistry or MEDS 5003 Fundamentals of Biochem	
BMSC 8702	Enzymes and Proteins	
CHEM 8400	Special Topics in Biochemistry (Nucleic Acids)	
CHEM 8401	Bioinorganic Chemistry	
<b>Inorganic Chemistry</b>		<b>9</b>
CHEM 5001	Advanced Inorganic Chemistry I	
CHEM 5201	Physical Methods in Organic Chemistry	
CHEM 8401	Bioinorganic Chemistry	
<b>Organic Chemistry</b>		<b>9</b>
CHEM 5201	Physical Methods in Organic Chemistry	
CHEM 5202	Organic Reaction Mechanisms	
CHEM 5205	Organic Syntheses	
<b>Physical Chemistry</b>		<b>9</b>
CHEM 5301	Quantum Chemistry	
CHEM 5302	Statistical Thermodynamics	
CHEM 5305	Chemical Kinetics	

### Culminating Events:

#### Literature Seminar:

The PhD student makes the presentation of one departmental seminar on a current literature topic or their research, as approved by the seminar professor. The seminar is 30 minutes in length and should include any background material needed to allow the audience to appreciate the topic(s) discussed.

#### Cumulative Examinations:

Cumulative examinations are a major part of the preliminary examinations. Written by the Graduate Faculty, cumulative examinations are offered seven times a year. Each cumulative examination is

evaluated by at least two Graduate Faculty members. Students must pass a total of five "cumes" within the first two years of matriculation.

#### Original Research Proposal:

To obtain PhD candidacy, the student is required to write, present and defend an Original Research Proposal (ORP). The topic of the ORP can be related to the student's research, but must still be original. The proposal is an opportunity for the student to use their scientific knowledge to demonstrate their ability to formulate experiments, calculations, theory and the like to address an important scientific problem. The ORP should also contain a description of the actual research that the student will pursue for their PhD.

The student must consult with their research advisor for guidance prior to writing the ORP. It is understood by writing this document that a general experience in research will help evolve new chemistry through observations made during the course of an ongoing research problem. The ORP needs to be defended within 30 months of matriculation.

#### Dissertation:

The doctoral dissertation is an original study that makes a significant contribution to the field of Chemistry. It should expand the existing knowledge and demonstrate the student's knowledge of research methods and a mastery of their primary area of interest. The dissertation should be rigorously investigated; uphold the ethics and standard of the field of Chemistry; demonstrate an understanding of the relationship between the primary area of interest and the broader field of Chemistry; and be prepared for publication in a professional journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the Chemistry Department. Committee compositions must be approved by the Graduate Committee. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the Committee members, and informing the student of their academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense. This committee is comprised of the Doctoral Advisory Committee and at least one additional Graduate Faculty member from outside the Chemistry Department. The Outside Examiner should be identified no later than the beginning of the academic term in which the student will defend the dissertation. The Dissertation Examining Committee evaluates the student's ability to express verbally their research question, methodological approach, primary findings and implications. The Committee votes to pass or fail the dissertation and the defense.

If a student needs to change a member of a Committee, the new member must be approved by the department's Graduate Committee and registered with the department and the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Dissertation Examining Committee and register with the department at least 15 days before the defense is to be scheduled. The time, date and room are arranged within two working days, and the appropriate forms are forwarded to the student. After the defense has been scheduled, the student is required to send the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 days before the defense. The student posts flyers announcing the defense.

## Computational Data Science MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Computational Data Science.

### About the Program

Data science is a multifaceted, interdisciplinary field that employs techniques and theories drawn from the broad areas of computer and information science, mathematics and statistics, and applies them to a wide range of data-rich domains such as biomedical science, business, education, engineering, geoscience, physical science and social science. The MS in Computational Data Science is designed for students interested in developing expertise in data science with a specialization in computational analytics. The goal is to enable students to analyze large quantities of data to discover new knowledge and facilitate decision-making. To accomplish this, the program provides students with a strong foundation in big data management and analysis; algorithmic, computational and statistical thinking; and an understanding of computer systems.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered after 4:30 p.m. The degree program can be completed on a full- or part-time basis.

**Areas of Specialization:** Research interests of faculty include:

- Analysis of algorithms
- Artificial intelligence
- Communication and networks
- Computer architecture
- Data analytics
- Digital forensics
- Expert systems
- Flexible and intelligent manufacturing systems
- Graphics
- High-performance computing
- Information security and assurance
- Intelligent CAI systems
- Management information and database systems
- Natural language processing
- Network security
- Parallel and distributive processing and operating systems
- Programming languages
- Sensory and image processing
- Software engineering
- Theory of automata and computation
- Wired and wireless networks

**Job Prospects:** Graduates gain the necessary skills to find positions in the data science field requiring a mix of data analysis skills, the ability to deal with large quantities of data, and a strong foundation in computer science. Graduates are also prepared to undertake doctoral studies, either to deepen their overall data science expertise or learn how to better use their analytics skills in a particular data-rich domain.

**Non-Matriculated Student Policy:** Non-matriculated students are permitted to take a maximum of two graduate-level CIS courses.

**Financing Opportunities:** Assistantships provide a stipend and full-time tuition to qualified students, but are typically reserved for doctoral students.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1; December 15 international  
*Spring Priority Deadline:* October 30; August 1 international

Applications submitted after the priority deadline will be considered for admission on a rolling basis. Applications are reviewed as they are received.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from Computer Science faculty and professionals.

**Coursework Required for Admission Consideration:** A minimum of one year of programming and data structures using the C++ or Java programming language and one year of theoretical calculus are required. This includes coursework equivalent to CIS 1068 Program Design and

Abstraction, CIS 2168 Data Structures, MATH 1041 Calculus I, and MATH 1042 Calculus II.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Computer Science is required. Applicants who have insufficient undergraduate coursework in Computer Science will need to take undergraduate courses to address any deficiencies. Students without a Computer Science degree are typically required to take the following courses, which cannot be counted for credit toward the MS degree:

Code	Title	Credit Hours
CIS 2107	Computer Systems and Low-Level Programming	4
CIS 2166	Mathematical Concepts in Computing II	4
CIS 2168	Data Structures	4
CIS 3207	Introduction to Systems Programming and Operating Systems	3-4
or CIS 5012	System Software and Operating Systems	
CIS 3223	Data Structures and Algorithms	3
or CIS 5011	Programming and Data Structure	

**Statement of Goals:** In approximately 500 to 1,000 words, describe your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

#### Standardized Test Scores:

GRE: Required. Scores should be in the 75th percentile on the quantitative section and 25th percentile on the verbal section. Most students submit scores far above the minimums.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate-level Computer Science coursework completed no more than five years prior to the student's matriculation in the graduate program may be transferred into the Computational Data Science MS program. The student must have earned an "A" in the course, and must submit a rationale for applying the credits to the current graduate program. The maximum number of credits a student may transfer is 6.

## Program Requirements

#### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
CIS 5511	Programming Techniques	3

CIS 5515	Design and Analysis of Algorithms	3
CIS 5526	Machine Learning	3
Select one from the following:		3

CIS 5512	Operating Systems	
CIS 5516	Principles of Data Management	
CIS 5642	Computer Architecture	

#### Electives 15-12

Select at most three Big Data courses from the following:

CIS 5512	Operating Systems <sup>1</sup>	
CIS 5516	Principles of Data Management <sup>1</sup>	
CIS 5517	Data-Intensive and Cloud Computing	
CIS 5590	Topics in Computer Science <sup>2</sup>	
CIS 5642	Computer Architecture <sup>1</sup>	
CIS 5643	Emerging Storage Systems and Technologies	
CIS 5644	Distributed Systems	
CIS 9665	Advanced Topics in Data Base Systems	

Select at most three Data Analysis courses from the following:

CIS 5523	Knowledge Discovery and Data Mining	
CIS 5524	Analysis and Modeling of Social and Information Networks	
CIS 5525	Neural Computation	
CIS 5535	Probabilistic Graph Models	
CIS 5538	Text Mining and Language Processing	
CIS 5543	Computer Vision	
CIS 5603	Artificial Intelligence	

Select at most two Statistics and domain-related courses <sup>2</sup>

Select at most one CIS course numbered less than 5500 <sup>2</sup>

Select at most three credits of Independent Study:

CIS 9282	Independent Study <sup>2</sup>	
----------	--------------------------------	--

#### Capstone Course

CIS 9995	Capstone Project	3-6
or CIS 9996	Master's Thesis Research	

**Total Credit Hours 30**

1

Course may be selected as an elective if not taken as a core course above.

2

Selection of any of these courses requires approval from the student's advisor.

#### Culminating Event:

*Capstone Project:*

Under the close supervision of CIS graduate faculty, students complete a capstone project as the culminating event. CIS 9995 Capstone Project is taken for only 3 credits. Students who choose to complete a master's thesis must take 6 credits of CIS 9996 Master's Thesis Research for the capstone.

# Computer and Information Science PhD

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Doctor of Philosophy in Computer and Information Science.

## About the Program

The Computer and Information Science PhD program prepares a student to undertake independent research leading to science and engineering advances in computer and information sciences. The program is structured around the PhD dissertation, with coursework and seminars designed to attain the requisite quality of the dissertation. An important criterion for the dissertation is that it be publishable in a recognized journal and presentable at international conferences.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered after 4:30 p.m. The degree program can be completed on a full- or part-time basis.

**Areas of Specialization:** The PhD program focuses on four research tracks:

1. Artificial Intelligence and Applications, which is concerned with systems that exhibit intelligent behavior.
2. Computer and Network Systems, which covers systems programming, operating systems, and system architectures, including networks and distributed systems.
3. Information Systems, which focuses on systems that provide information to improve the performance of organizations.
4. Software Systems, which is dedicated to the creation of software and its associated methodologies.

**Job Prospects:** Graduates typically find employment in universities, industry or government agencies.

**Non-Matriculated Student Policy:** Non-matriculated students are permitted to take a maximum of two graduate-level CIS courses.

**Financing Opportunities:** Teaching Assistants teach two undergraduate laboratory sections each term under the direction of a faculty lecturer. Assistantships provide a stipend and full-time tuition.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 15

*Spring:* November 1; August 1 international

Applications are reviewed as they are received. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from Computer Science faculty and professionals.

**Coursework Required for Admission Consideration:** The applicant is required to have a solid background in Computer and Information Science and related disciplines. In addition, acceptance by a PhD Graduate Faculty member in at least one open track is required. To find a faculty advisor, prospective students should contact Graduate Faculty whose research interests are similar to their own. The list of faculty can be found at <https://cis.temple.edu/people/faculty>.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Computer Science, Information Science, Mathematics, Science or Engineering is required. The applicant's undergraduate program must include a considerable amount of coursework in Computer and Information Science.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Required. Scores should minimally be in the 75th percentile on the quantitative section and 25th percentile on the verbal section for a combined total score of at least 297.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

A score of 45 or greater on the Test of Spoken English (TSE) or a score of 28 or greater on the TOEFL iBT Speaking section is required for international applicants who wish to be considered for a Teaching Assistantship.

**Resume:** Current resume required.

**Advanced Standing:** Students who enter the PhD program with graduate credits in Computer Science or a closely related field may be considered for advanced standing. The CIS Graduate Committee recommends the awarding of advanced standing on a case-by-case basis. The credits must be equivalent to coursework offered at Temple, with a grade of "B" or better having been earned in the course(s). The maximum number of advanced standing credits awarded is 24.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 36*

*Required Courses:*

Code	Title	Credit Hours
<b>Track-Specific Courses</b> <sup>1</sup>		<b>24</b>
<b>Research Preparation Courses</b>		
Select 6 credits from the following:		6
CIS 9182	Independent Study	
CIS 9282	Independent Study	
Graduate-level course aligned with the student's research area <sup>2</sup>		
<b>Research Courses</b>		<b>6</b>
CIS 9994	Preliminary Examination Preparation	
CIS 9998	Pre-Dissertation Research / Elevation to Candidacy	
CIS 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>36</b>

<sup>1</sup>

Required and elective courses are identified in the course lists below for each of the four tracks: Artificial Intelligence and Applications, Computer and Network Systems, Information Systems, and Software Systems.

<sup>2</sup>

Course selection requires approval from the faculty advisor and Graduate Committee.

## Artificial Intelligence and Applications Track

Code	Title	Credit Hours
<b>Core Courses</b>		
CIS 5511	Programming Techniques	3
CIS 5526	Machine Learning	3
CIS 5603	Artificial Intelligence	3
<b>Additional Track-Specific Courses</b>		
Select five courses from the following:		15
CIS 5513	Automata and Formal Languages	
CIS 5515	Design and Analysis of Algorithms	
CIS 5523	Knowledge Discovery and Data Mining	
CIS 5525	Neural Computation	
CIS 5527	Data Warehousing, Filtering and Mining	
CIS 5538	Text Mining and Language Processing	
CIS 5543	Computer Vision	
CIS 5617	Computer Networking and Communication	
CIS 9590	Seminar in Advanced Topics in Computer Science	
CIS 9601	Computer Graphics and Image Processing	
CIS 9618	Web Applications Development	
CIS 9651	Artificial Intelligence, Heuristic Models, and Education	
CIS 9665	Advanced Topics in Data Base Systems	
<b>Total Credit Hours</b>		<b>24</b>

## Computer and Network Systems Track

Code	Title	Credit Hours
<b>Core Courses</b>		
Select at least two courses from the following:		6
CIS 5511	Programming Techniques	
CIS 5512	Operating Systems	
CIS 5513	Automata and Formal Languages	
CIS 5617	Computer Networking and Communication	
CIS 5642	Computer Architecture	
<b>Additional Track-Specific Courses</b>		
Select at most six courses from the following:		18
CIS 5515	Design and Analysis of Algorithms	
CIS 5523	Knowledge Discovery and Data Mining	
CIS 5526	Machine Learning	
CIS 5603	Artificial Intelligence	
CIS 5636	Ad Hoc Networks	
CIS 5637	Network & Information Security	
CIS 5639	Wireless Network and Communication	
CIS 5644	Distributed Systems	
CIS 9618	Web Applications Development	
CIS 9665	Advanced Topics in Data Base Systems	
CIS 9666	Advanced Networks and Client-Server Computing	
CIS 9669	Distributed and Parallel Computer Systems	
<b>Total Credit Hours</b>		<b>24</b>

## Information Systems Track

Code	Title	Credit Hours
Select a minimum of one and up to three theory courses from the following:		
CIS 5511	Programming Techniques	
CIS 5515	Design and Analysis of Algorithms	
STAT 8003	Statistical Methods and Concepts	
Select a minimum of one and up to three systems courses from the following:		
CIS 5512	Operating Systems	
CIS 5516	Principles of Data Management	
CIS 5617	Computer Networking and Communication	
CIS 5644	Distributed Systems	
CIS 9666	Advanced Networks and Client-Server Computing	
Select a minimum of two and up to four track-specific courses from the following:		
CIS 5525	Neural Computation	
CIS 5526	Machine Learning	
CIS 5527	Data Warehousing, Filtering and Mining	
CIS 5603	Artificial Intelligence	
CIS 9590	Seminar in Advanced Topics in Computer Science	
CIS 9618	Web Applications Development	
CIS 9665	Advanced Topics in Data Base Systems	
CIS 9668	Design and Development of E-Commerce Systems	
<b>Total Credit Hours</b>		<b>24</b>

## Software Systems Track

Code	Title	Credit Hours
<b>Core Courses</b>		
CIS 5511	Programming Techniques	3
CIS 5512	Operating Systems	3
CIS 5513	Automata and Formal Languages	3
CIS 5515	Design and Analysis of Algorithms	3
CIS 5516	Principles of Data Management	3
CIS 5617	Computer Networking and Communication	3
CIS 9618	Web Applications Development	3
<b>Elective</b> <sup>1</sup>		<b>3</b>
<b>Total Credit Hours</b>		<b>24</b>

1

Selection of the elective requires approval of the Software Systems Track Chair.

### Additional Requirement:

#### *PhD Qualifying Examination:*

The Qualifying Examination tests the student on the fundamentals of Computer and Information Science and the basic body of knowledge in a track. It consists of a written exam on theory and algorithms, systems, and track-specific material. The Qualifying Exam is offered twice a year, usually in late January and late June.

### Culminating Events:

#### *Preliminary Examinations:*

The goal of the preliminary examinations is to test the research skills and knowledge of the student and the appropriateness and feasibility of the proposed research. The exams are completed in two stages:

- Prelim I consists of written and oral components testing advanced track knowledge and in-depth knowledge of the research area. It includes a literature review of the area. This preliminary exam is used to determine whether the student needs to take additional courses in order to support research in the chosen area. Prelim I is open only to the Doctoral Advisory Committee and members of the department. It is to be taken within one year of passing the PhD Qualifying Examination.
- Prelim II consists of written and oral components to assess the appropriateness of the research, including approach and methodology. It is designed to ensure that the selected research problem is of reasonable scope and significance and that the proposed dissertation is feasible. The written portion of Prelim II should be of sufficient quality to be publishable as a department technical report. This exam is open to the public.

The Doctoral Advisory Committee evaluates the preliminary examinations. Each member votes to pass or fail the student. In order to pass, a majority of the committee members must agree that the exam has been satisfactorily completed. Successful completion of the preliminary examinations produces a written understanding among the student, faculty advisor and Doctoral Advisory Committee, specifying the work to be done to obtain final approval of the dissertation.

Students who are preparing to do their preliminary examinations should confirm a time and date with the Chair of their Doctoral Advisory Committee and register with the Administrative Coordinator one month prior to the date. The student and Chair receive confirmation of the time, date and room of the examination.

#### *Dissertation Proposal:*

The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of:

1. the context and background surrounding a particular research problem;
2. an exhaustive survey and review of literature related to the problem; and
3. a detailed methodological plan for investigating the problem.

The proposal should be finished and approved no more than one year after completing coursework. Upon approval, a timeline for completing the investigation and writing process are established.

#### *Dissertation:*

The doctoral dissertation is an original empirical study that makes a significant contribution to the field of Computer and Information Science. It should expand the existing knowledge and demonstrate the student's knowledge of research methods and a mastery of their primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standards of the Computer and Information Science field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of Computer and Information Science; and be prepared for publication in a professional journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the Department of Computer and Information Sciences. Committee

compositions must be approved by the CIS Graduate Committee. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of their academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense. This committee is comprised of the Doctoral Advisory Committee and at least one additional Graduate Faculty member from outside the Department of Computer and Information Sciences. The Outside Examiner should be identified no later than the beginning of the term in which the student will defend the dissertation. The committee evaluates the student's ability to express verbally their research question, methodological approach, primary findings and implications. The committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation.

If a student needs to change a member of a committee, the new member must be approved by the CIS Graduate Committee and registered with the Administrative Coordinator and the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Doctoral Advisory Committee and register with the Administrative Coordinator at least 30 days before the defense is to be scheduled. The student and Chair receive confirmation of the time, date and room for the examination.

The Administrative Coordinator sends the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 days before the defense. The department posts flyers announcing the defense.

## Computer Science MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Computer Science.

### About the Program

The MS in Computer Science emphasizes a general approach to the study of computing, including courses in artificial intelligence, collaborative systems, computer architecture, database systems, graphics and image processing, networking and communications, operating systems, software engineering and theoretical areas. The curriculum is not oriented toward any specific applications area of computing but emphasizes general graduate-level studies in computing, preparing students for careers in systems analysis, teaching and research.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered after 4:30 p.m. The degree program can be completed on a full- or part-time basis.

**Areas of Specialization:** Research interests of faculty include:

- Analysis of algorithms
- Artificial intelligence
- Communication and networks
- Computer architecture
- Data analytics
- Digital forensics
- Expert systems
- Flexible and intelligent manufacturing systems
- Graphics
- High-performance computing
- Information security and assurance
- Intelligent CAI systems
- Management information and database systems
- Natural language processing

- Network security
- Parallel and distributive processing and operating systems
- Programming languages
- Sensory and image processing
- Software engineering
- Theory of automata and computation
- Wired and wireless networks

**Job Prospects:** Graduates often find employment as data analysis consultants, product designers, researchers and software developers. Alternatively, many become involved in the design and implementation of new applications software or the planning and evaluation of computer-based systems. Prospective employers include the government or industrial firms that utilize computers for research and/or production purposes.

**Non-Matriculated Student Policy:** Non-matriculated students are permitted to take a maximum of two graduate-level CIS courses.

**Financing Opportunities:** Assistantships provide a stipend and full-time tuition to qualified students, but are typically reserved for doctoral students.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1

*Spring Priority Deadline:* October 30; August 1 international

Applications submitted after the priority deadline will be considered for admission on a rolling basis. Applications are reviewed as they are received.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from Computer Science faculty and professionals.

**Coursework Required for Admission Consideration:** A minimum of one year of programming and data structures using the C++ or Java programming language and one year of theoretical calculus are required. This includes coursework equivalent to CIS 1068 Program Design and Abstraction, CIS 2168 Data Structures, MATH 1041 Calculus I, and MATH 1042 Calculus II.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Computer Science is required. Applicants who have insufficient undergraduate coursework in Computer Science will need to take undergraduate courses to address any deficiencies. Students without a Computer Science degree are typically required to take the following courses, which cannot be counted for credit toward the MS degree:

Code	Title	Credit Hours
CIS 2107	Computer Systems and Low-Level Programming	4
CIS 2166	Mathematical Concepts in Computing II	4
CIS 2168	Data Structures	4
CIS 3207	Introduction to Systems Programming and Operating Systems	3-4

or CIS 5012	System Software and Operating Systems	
CIS 3223	Data Structures and Algorithms	3
or CIS 5011	Programming and Data Structure	

**Statement of Goals:** In approximately 500 to 1,000 words, describe your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Required. Scores should be in the 75th percentile on the quantitative section and 25th percentile on the verbal section. Most students submit scores far above the minimums.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate-level Computer Science coursework obtained no more than five years prior to the student's matriculation in the graduate program may be transferred into the Computer Science MS program. The student must have earned an "A" in the course, and must submit a rationale for applying the credits to the current graduate program. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
CIS 5511	Programming Techniques	3
CIS 5512	Operating Systems	3
CIS 5515	Design and Analysis of Algorithms	3
<b>Electives</b>		<b>18-15</b>
<b>Capstone Course</b>		
CIS 9995	Capstone Project	3-6
or CIS 9996	Master's Thesis Research	
<b>Total Credit Hours</b>		<b>30</b>

### Culminating Event:

*Capstone Project:*

Under the close supervision of CIS graduate faculty, students complete a capstone project as the culminating event. CIS 9995 Capstone Project is taken for only 3 credits. Students who choose to complete a master's thesis must take 6 credits of CIS 9996 Master's Thesis Research for the capstone.

## Cyber Defense and Information Assurance PSM

### COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Professional Science Master's in Cyber Defense and Information Assurance.

### About the Program

As our physical and digital worlds become more deeply interwoven, a web of interdependence is increasingly fading away the distinction between physical and cyberspace infrastructures. One consequence is that citizens are rendered extremely vulnerable to threats against our cyberinfrastructure by cybercriminals who can inflict crippling blows to pockets of society or even the entire nation. With the dearth of a global information security workforce at a staggering 2.72 million in 2021, the federal government has expressed its support to meet this urgent need.

In designing the Professional Science Master's (PSM) program in Cyber Defense and Information Assurance (CyberDIA), the dynamic and cross-cutting nature of the current and continuously evolving cyberspace and

the barrage of ever-increasing and never-ceasing threats it faces were addressed. The program is designed for aspiring technical professionals at all career levels — entry-level, mid-career and senior executives — who want to equip themselves with skills necessary to protect their organization and the nation from increasing cyberthreats. The multidisciplinary program design borrows knowledge, skills and expertise from different academic disciplines, including business, computer and information sciences, electrical and computer engineering, and law. The key focus is on a holistic cybersecurity framework, i.e., one that is built around the core principles of preventive, detective and corrective security mechanisms. While the CyberDIA curriculum is technology intensive, focusing on network security and digital forensics, it also bridges the ever-increasing gap between cybersecurity technology and cybersecurity policies.

**Time Limit for Degree Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Most of the classes are offered in the evenings or on weekends to enable full-time working professionals to be enrolled in the program. International students are required to register as full-time students.

**Interdisciplinary Study:** The CyberDIA curriculum addresses four core knowledge areas:

- Technology (60%)
- Laws, regulations, and governance (15%)
- Policies, procedures, and compliance (15%)
- Leadership and ethics (10%)

**Accreditation:** Temple University is fully accredited by the Middle States Commission on Higher Education.

**Job Prospects:** Official job placement is not offered, but prospects are excellent given the dearth in "Infosec" professionals. Positions include:

- Computer Security Forensic Investigator
- Cybersecurity Systems Engineer
- Information Security Officer
- IT Network Security Penetration Tester
- Security Analyst/Cybersecurity Analyst

**Licensure/Certification:** Successful completion of the CyberDIA PSM program equips students with the necessary knowledge, skills and tools to appear for the following professional certifications:

- Certified Ethical Hacker (CEH) offered by EC-Council
- Certified Information Systems Security Professional (CISSP®) offered by (ISC)<sup>2</sup>
- Computer Hacking Forensic Investigator (CHFI) offered by EC-Council

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the Department of Computer and Information Sciences.

**Financing Opportunities:** Financial assistance in the form of Research or Teaching Assistantships is not offered.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1

*Spring Priority Deadline:* October 30

Applications submitted after the priority deadline will be considered for admission on a rolling basis.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters should be obtained from college/university faculty or faculty who are familiar with the applicant's competency. If the applicant has an established career in the field, the applicant's immediate supervisor should provide one of the letters.

**Coursework Required for Admission Consideration:** Applicants should have a strong background in one or more STEM fields: science, technology, engineering and mathematics. The following prerequisites must also be met:

- a course in data structures, such as Temple's CIS 2168, and
- a course in computer architecture, operating systems and networking, such as Temple's CIS 2229.

**Bachelor's Degree in Discipline/Related Discipline:** The CyberDIA PSM program has been designed for recent graduates and professionals who have a bachelor's degree or equivalent in a STEM field.

**Statement of Goals:** In approximately 250 to 500 words, describe your interest in Temple's program, research goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

**Resume:** Current resume required.

**Interview:** An in-person or Skype interview with the Program Director or members of the CyberDIA PSM Steering Committee is required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the CyberDIA PSM program. The credits must be equivalent to coursework offered by the Department of Computer and Information Sciences at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The CyberDIA PSM Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
CIS 5017	Operating Systems and Architecture <sup>1</sup>	3
	or CIS 5512 Operating Systems	
CIS 5107	Computer Systems Security and Privacy	3
CIS 5405	Introduction to Digital Forensics <sup>2</sup>	3
CIS 5415	Ethical Hacking and Intrusion Forensics <sup>2</sup>	3
<b>Electives</b>		<b>15</b>
<b>Capstone Course</b>		
CIS 9995	Capstone Project	3
<b>Total Credit Hours</b>		<b>30</b>

1

With advisor recommendation and approval, students take CIS 5017 or CIS 5512.

2

With advisor approval, students who have taken "Introduction to Digital Forensics" and/or "Ethical Hacking and Intrusion Forensics" at the undergraduate level may take an alternate approved course(s) at the master's level.

**Additional Requirement:** All graduate-level courses must be passed with a "B-" or better.

### Culminating Event:

*Capstone Project:*

Each student is given a real security problem. Phase 1 relates to compliance: identifying how the security problem affects the organization and which regulations/standards are to be considered. Phase 2 is the technical piece: identifying network and application vulnerabilities; performing forensics (chain of custody); and documenting findings. In Phase 3, all findings from Phases 1 and 2 are presented to the executive body of the affected organization and the faculty mentor(s).

## Environmental Geoscience MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Environmental Geoscience.

### About the Program

The Department of Earth and Environmental Science offers a two-year MS program in Environmental Geoscience that provides integrated study of the fundamental biological, chemical and physical processes that form the environment. Adopting a holistic view of Earth's systems, its inhabitants and how their interactions facilitate the understanding necessary to develop strategies for a sustainable and prosperous society. Toward that end, environmental scientists use a wide variety of methods such as chemical and structural analyses, description, fieldwork and mapping, geophysical techniques, environmental monitoring and remote sensing, and numerical modeling and physical experiments.

Environmental geoscience studies Earth's natural processes on its surface and in its oceans and atmosphere as well as their interaction with complex societal needs. The Environmental Geoscience MS program includes graduate coursework in Earth science, environmental research, weekly graduate seminars, and research proposal defense leading to completion of a master's thesis. The focus on research in environmental problems produces graduates with a breadth of knowledge in Earth science, skill in conducting scientific research, and excellence in scientific writing and communication so they can address the challenges in the food-water-energy nexus and surficial processes that impact the environment.

During their first term in the Environmental Geoscience MS program, students must confirm a primary research advisor and tentative research project. Profiles of the faculty and their research, as well as links to their personal webpages, are found on the department's website. Students successfully advance through the program by completing geoscience coursework, submitting and defending a research proposal during the second academic term, satisfying a progress report in the third term, and writing and defending a thesis.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time status is expected.

**Areas of Specialization:** Advanced courses and research opportunities are available in:

- Climate science
- Ecohydrology
- Energy resources
- Environmental geochemistry
- Environmental remediation
- Geophysics and remote sensing
- Polar climate and glaciology
- Urban hydrology

**Job Prospects:** Graduates are accepted into doctoral programs and secure positions in education, industry and government. Students have also used their scientific expertise in environmental law, environmental policy, and community and nonprofit work focused on sustainable and resilient communities.

**Licensure/Certification:** Licensure is recommended after a minimum of three years of on-the-job training. The Pennsylvania Professional Geologist Licensing Examination is administered by the National Association of State Boards of Geology (ASBOG®), which is the regulatory body for 31 states and Puerto Rico. Iowa and Michigan currently require only the Fundamentals of Geology examination, and 17 states are non-regulatory. For more information, visit [https://asbog.org/state\\_boards.html](https://asbog.org/state_boards.html).

**Non-Matriculated Student Policy:** Non-matriculated students are allowed to take up to 9 credits before applying to the program.

**Financial Opportunities:** Students are supported by a combination of Teaching and Research Assistantships, which typically provide a minimum nine-month academic-year stipend and full tuition remission. Summer stipends are also available. Teaching and Research Assistants are expected to devote 20 hours per week to their duties. Teaching Assistants teach labs for non-science, geology and environmental science majors. The duties for Research Assistants are determined by the primary research advisor. Both Teaching and Research Assistantships are awarded competitively. Funding after two years is not guaranteed.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 15  
*Spring:* October 15

For full consideration, applications must be submitted by the deadline. Late applications may be considered on a case-by-case basis. Applicants should target Fall entry as Spring admission is rare.

Program admissions are limited and competitive. Applicants are expected to contact the faculty in their area of interest prior to submitting an application.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence or supervisors familiar with their experience in the field.

**Coursework Required for Admission Consideration:** Applicants are required to have taken at least two courses in Geology or Environmental Science and one year of college-level Chemistry, Calculus, Computer Science, Physics or Biology to prepare for graduate-level classes and instructing undergraduate majors. Other coursework may be considered on a case-by-case basis through consultation with the prospective advisor.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree, whether a BA or a BS, with a major in Data Science, Environmental Science, Geology, Geoscience, Mathematics, or the natural sciences is required. Given that Environmental Geoscience is an inherently cross-disciplinary field, other preparation may be considered on a case-by-case basis.

**Statement of Goals:** Identify your specific interest in Temple's MS program, research goals, future career goals, and academic and research achievements.

**Standardized Test Scores:**

GRE: Optional. Scores may be submitted if available.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*<sup>1</sup>

Code	Title	Credit Hours
Select seven 3-4 credit courses at the 5000 level or higher		21-28
Select 1-2 credit courses at the 5000 level or higher as needed		7-0
EES 9996	Master's Thesis Research	2
<b>Total Credit Hours</b>		<b>30</b>

1

The program of study must be designed in coordination with an Earth and Environmental Science faculty advisor, and only one course may be taken outside of the Department of Earth and Environmental Science.

**Culminating Event:**

*Thesis:*

The Department of Earth and Environmental Science requires an original research thesis as the culminating project to earn its master's degree. The thesis is evaluated for both scientific content and writing style by a

committee of two faculty members and the thesis advisor. Students are required to defend their theses publicly before the academic community.

## Forensic Chemistry PSM

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Professional Science Master's in Forensic Chemistry.

### About the Program

The primary objective of the Forensic Chemistry PSM is for students to develop a portfolio of knowledge and experiences through a strong background in analytical methodologies that will enable them to tackle problems in forensic, environmental and other areas of chemistry. Other objectives include providing:

- a theoretical understanding of major concepts in forensic chemistry,
- a range of practical skills in forensic chemistry, and
- knowledge and skills applicable to academia, industry and government.

The goal of the program is the successful placement of graduates into relevant jobs and to enable career advancement for chemists already employed.

The program includes core requirements in current topics in forensic chemistry; applied biopharmaceutics; data analysis; law, ethics and policy; and toxicology. Attendance is required at annual symposia where leaders in the field of forensic science present on current topics and developments in the field of forensics and forensic chemistry. Many courses in the program are conducted as hands-on training in a modular, forensic chemistry laboratory. An independent project is assigned that will generate knowledge with the goal of developing advanced forensic skills, enabling program graduates to effectively work in and be leaders of the discipline of forensic chemistry. All students are required to complete a forensic chemistry internship.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main, Ft. Washington, and the Center for Forensic Science Education in Willow Grove, PA

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Most of the classes are offered in the evenings or on weekends to enable full-time working professionals to be enrolled in the program. International students are required to register as full-time students.

**Interdisciplinary Study:** The two-year program consists of courses in forensic and analytical chemistry as well as data analysis, law and ethics. Student research projects are developed with the cooperation of Temple faculty and members of our External Advisory Board under the guidance of the PSM in Forensic Chemistry Steering Committee.

**Accreditation:** Temple University is fully accredited by the Middle States Commission on Higher Education.

**Job Prospects:** Official job placement is not offered, but prospects are good. The program is designed to help recent graduates obtain relevant employment as well as accelerate career advancement and/or allow career shift of currently employed professionals. Graduates of PSM programs are in high demand, which underscores the PSM as an attractive career path for those who do not wish to become academic researchers or pursue a doctorate.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the Chemistry Department.

**Financing Opportunities:** Financial assistance in the form of Research or Teaching Assistantships is not offered at this time.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1; December 15 international  
*Spring Priority Deadline:* October 30

Applications submitted after the priority deadline will be considered for admission on a rolling basis. Applications are processed on a continual basis. Ordinarily, the applicant is informed of an admissions decision within three weeks of receipt of all supporting application documents.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters should be obtained from college/university faculty or faculty who are familiar with the applicant's competency. If the applicant

has an established career in a related field, the applicant's immediate supervisor should provide one of the letters.

**Coursework Required for Admission Consideration:** An undergraduate degree in Chemistry or a closely related field is required. Candidates not holding a degree in Chemistry should contact the Program Director for guidance.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Chemistry or a closely related field is required.

**Statement of Goals:** Optional. If submitted, describe in 500 to 1,000 words your interest in the Forensic Chemistry PSM program, career goals, and academic and professional achievements.

### Standardized Test Scores:

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Forensic Chemistry PSM program. The credits must be equivalent to coursework offered by the Chemistry Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The PSM in Forensic Chemistry Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 32

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
CHEM 5102	Data Analysis and Evidence	2
CHEM 5108	Investigative Chemistry	4
CHEM 8001	Leadership, Law and Ethics in Forensic Science	3
CHEM 8007	Biotransformation of Drugs and Xenobiotics	3
CHEM 8107	Advanced Forensic Chemistry	3
CHEM 8111	Forensic Toxicology	3
CHEM 8601	Analytical Separations	3
CHEM 9800	Seminar in Forensic Chemistry (2 terms)	2
<b>Electives</b> <sup>1</sup>		<b>6</b>
<b>Capstone Course</b>		

CHEM 9995	Capstone Project	3
<b>Total Credit Hours</b>		<b>32</b>

1

With advisor approval, students may elect to take CHEM 8310 Special Topics in Analytical Chemistry or any two graduate-level courses. If CHEM 8310 is taken twice, different topics must be studied each term.

#### **Culminating Events:**

##### *Capstone Project:*

The internship involves a significant project completed in an approved forensic laboratory. As part of the culminating event of the Forensic Chemistry PSM, students present their project results at the final Seminar in Forensic Chemistry (CHEM 9800).

## **Geology MS**

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Geology.

### **About the Program**

The Department of Earth and Environmental Science offers a two-year MS program in Geology that entails the study of the Earth and other terrestrial planets. Geologists work to understand earth structure; materials such as minerals, rock, water and other fluids; history; and the processes that can alter planets. Toward that end, they use a wide variety of methods such as chemical analyses, description, fieldwork and mapping, geophysical techniques, numerical modeling and physical experiments.

The Geology MS program includes graduate coursework in Earth and planetary sciences, research, weekly graduate seminars, and research proposal defense leading to completion of a master's thesis. The program's focus on basic understanding of geological processes

produces graduates with a breadth of knowledge in the field and skill in conducting scientific research.

During their first term in the Geology MS program, students must confirm a primary research advisor and tentative research project. Profiles of the faculty and their research, as well as links to their personal webpages, are found on the department's website. Students successfully advance through the program by completing geoscience coursework, submitting and defending a research proposal during the second academic term, satisfying a progress report in the third term, and writing and defending a thesis.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time status is expected.

**Areas of Specialization:** Advanced courses and research opportunities are available in:

- Environmental geology, including ecohydrology, energy and land degradation, environmental geophysics, groundwater modeling, ice sheet stability and climate change, Karst hydrology, nanomineralogy and urban hydrology.
- Geochemistry, including nanomineralogy, paleontology-fossil provenance, planetary geology, and weathering and diagenesis.
- Sedimentary geology and paleontology, including coastal and aeolian dynamics, ichnology, paleontology-fossil provenance, paleopedology and modern soils, planetary geology and impact studies, and Precambrian geology.
- Structural geology, including geothermal energy and geomechanics.

**Job Prospects:** Graduates secure positions in industry, education and government, and are accepted into doctoral programs.

**Licensure/Certification:** Licensure is recommended after three years of on-the-job training. The Pennsylvania Professional Geologist Licensing Examination is administered by the National Association of State Boards of Geology (ASBOG®).

**Non-Matriculated Student Policy:** Non-matriculated students are allowed to take up to 9 credits before applying to the program.

**Financing Opportunities:** Students are supported by a combination of Teaching and Research Assistantships, which typically provide a nine-month academic-year stipend and full tuition remission. Summer stipends are also available. Teaching and Research Assistants are expected to devote 20 hours per week to their duties. Teaching Assistants teach labs for non-science and geology majors. The duties for Research Assistants are determined by the primary research advisor. Both Teaching and Research Assistantships are awarded competitively. Funding after two years is not guaranteed.

## **Admission Requirements and Deadlines**

### **Application Deadline:**

*Fall:* January 15  
*Spring:* October 15

For full consideration, applications must be submitted by the deadline. Late applications may be considered on a case-by-case basis. Applicants should target Fall entry as Spring admission is rare.

Program admissions are limited and competitive. Applicants are expected to contact the faculty in their area of interest prior to submitting an application.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence.

**Coursework Required for Admission Consideration:** Applicants are required to have taken at least five courses in Geology and one year of college-level Chemistry, Calculus, and either Physics or Biology to prepare for graduate-level classes and instructing undergraduate majors.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree, whether a BA or a BS, with a major in Geology or a related program in Science or Mathematics is required.

**Statement of Goals:** Identify your specific interest in Temple's MS program, research goals, future career goals, and academic and research achievements.

**Standardized Test Scores:**

GRE: Optional. Scores are typically in the 50th percentile or higher in the quantitative and verbal areas.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

**Resume:** Current resume required.

## Geoscience PhD

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Doctor of Philosophy in Geoscience.

### About the Program

The Department of Earth and Environmental Science offers a PhD program that includes graduate courses in the geosciences, weekly graduate seminars, qualifying exams, and research leading to a doctoral dissertation.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time status is expected.

**Areas of Specialization:** Advanced courses and research opportunities are available in:

- Environmental geology, including ecohydrology, energy and land degradation, environmental geophysics, groundwater modeling, ice sheet stability and climate change, Karst hydrology, nanomineralogy and urban hydrology.
- Geochemistry, including nanomineralogy, paleontology-fossil provenance, planetary geology, and weathering and diagenesis.
- Sedimentary geology and paleontology, including coastal and aeolian dynamics, ichnology, paleontology-fossil provenance, paleopedology and modern soils, planetary geology and impact studies, and Precambrian geology.
- Structural geology, including geothermal energy and geomechanics.

**Job Prospects:** Graduates secure positions in academia, industry and government.

**Licensure/Certification:** For careers in industry, licensure is recommended after three years of on-the-job training. The Pennsylvania Professional Geologist Licensing Examination is administered by the National Association of State Boards of Geology (ASBOG®).

**Non-Matriculated Student Policy:** Doctoral courses are open only to matriculated students.

**Financing Opportunities:** Students are supported by a combination of Teaching and Research Assistantships, which typically provide a nine-month academic-year stipend and full tuition remission. Summer stipends are also available. Teaching and Research Assistants are expected to devote 20 hours per week to their duties. Teaching Assistants teach introductory geology labs and labs for majors. The duties for Research Assistants are determined by the primary research advisor. Both Teaching and Research Assistantships are awarded competitively. Funding after four years is not guaranteed.

Temple University also offers a limited number of two-year fellowships to support outstanding doctoral students.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 15

*Spring:* October 15

For full consideration, applications must be submitted by the deadline. Late applications may be considered on a case-by-case basis. Applicants should target Fall entry as Spring admission is rare.

Program admissions are limited and competitive. Applicants are expected to contact the faculty in their area of interest prior to submitting an application.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence.

**Coursework Required for Admission Consideration:** Applicants are required to have taken courses in Geology to prepare them for graduate-level classes and instructing undergraduate majors. In addition, at least

one year of college-level Chemistry, Calculus, and either Physics or Biology is expected.

**Master's Degree in Discipline/Related Discipline:** A master's degree is recommended, but undergraduate research experience is also considered in evaluating applicants.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree, whether a BA or a BS, with a major in Geology or a related program in Science or Mathematics is required.

**Statement of Goals:** Identify your specific interest in Temple's Geoscience PhD program and the faculty member with whom you would like to work, and report on your research goal, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Optional. Scores above the 50th percentile in the quantitative and verbal sections are expected, but higher scores are more competitive.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

**Resume:** Current resume required.

**Writing Sample:** Applicants are required to submit a writing sample directly to the Graduate Chair of Earth and Environmental Science. Acceptable materials include the undergraduate thesis or research paper, master's thesis, and published journal articles in which the applicant is first author.

**Advanced Standing:** For students who enter the program with a subject-appropriate master's degree, coursework may be counted for advanced standing. Requests for advanced standing are evaluated on a case-by-case basis for appropriateness of the coursework and performance. Up to a maximum of 30 credits of formal graduate courses completed with a grade of "B" or better may be accepted.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 37, including 7 courses required in the Department of Earth and Environmental Science, with one additional course taken outside of the department, if desired

*Number of Credits Required Beyond the Master's:* 18, including 3 courses required in the Department of Earth and Environmental Science, with one additional course taken outside of the department, if desired

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
Select courses from the following to total 28 credits: <sup>1</sup>		28
EES 5011	Remote Sensing and GIS	

EES 5042	Coastal Processes	
EES 5101	Structural Geology (Graduate)	
EES 5401	Analytical Methods in Mineralogy	
EES 5402	X-ray Crystallography	
EES 5406	Nanoscience and the Environment	
EES 5434	Ecohydrology	
EES 5454	Introduction to Geophysics	
EES 5461	Low-Temperature Geochemistry	
EES 5462	Advanced Low-Temperature Geochemistry	
EES 5502	Ice and Global Climate	
EES 5601	Vertebrate Paleontology and Taphonomy	
EES 5625	Electron Optical Techniques	
EES 5702	Sedimentary Petrology	
EES 5725	Soils and Paleosols	
EES 5801	Quantitative Structural Geo	
EES 5802	Tectonics	
EES 5811	Planetary Geology	
EES 8000	Geology Seminar	
EES 8200	Graduate Geology Seminar	
EES 8411	Advanced Hydrogeology	
EES 8421	Groundwater Modeling	
<b>Elective</b> <sup>2</sup>		<b>3</b>
<b>Research Courses</b>		<b>6</b>
EES 9994	Preliminary Examination Preparation	
EES 9998	Pre-Dissertation Research / Elevation to Candidacy	
EES 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>37</b>

1

Select three of the courses if entering the PhD program with a master's degree.

2

The elective is selected in consultation with an advisor.

#### Culminating Events:

##### *Candidacy Assessment:*

Qualifying for PhD candidacy includes completion of coursework within the Department of Earth and Environmental Science, as well as demonstrations of subject area knowledge, skill and the ability to conduct research to define and investigate new questions. The assessment for candidacy consists of four parts:

1. Completion of a minimum of three departmental graduate courses in good standing
2. Successfully passing the written and oral components of the Preliminary Examination
3. Submission and acceptance of an NSF-style research proposal
4. Oral defense of the research proposal

##### *Dissertation:*

The Department of Earth and Environmental Science requires an original research dissertation as the culminating project in its PhD program.

## High-Performance Computing for Scientific Applications PSM

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Professional Science Master's in High-Performance Computing for Scientific Applications.

### About the Program

Computation, in tandem with theory and experiment, is highly regarded in the advance of scientific knowledge and engineering practice. In recognition of a growing need for experts cross-trained in relevant computational sciences, applied mathematics, statistics and traditional scientific fields such as chemistry and physics, the Professional Science Master's (PSM) program in High-Performance Computing for Scientific Applications is targeted toward STEM graduates seeking to use high-performance computation as their primary research instrument in the physical sciences, life sciences and engineering.

The core curriculum for the High-Performance Computing for Scientific Applications PSM introduces students to the architecture of high-performance computing systems, mathematical techniques employed in high-performance computing, the software tools used in parallel calculations, and computational methods used in the sciences and engineering. A distinguishing feature of the program is its paired

emphasis on the algorithms and technology of high-performance computing in applications to problems in science and engineering. Cross-disciplinary techniques are emphasized, and learning through applications and individually designed projects are prioritized over theory.

**Time Limit for Degree Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Most of the classes are offered in the evenings or on weekends to enable full-time working professionals to enroll in the program. International students are required to register as full-time students.

**Interdisciplinary Study:** The program is interdisciplinary by nature.

**Accreditation:** Temple University is fully accredited by the Middle States Commission on Higher Education.

**Job Prospects:** Students in the program are connected to internships in industry and government laboratories by the PSM Scientific Advisory Committee. Graduates are then well prepared to compete for high-quality positions in industry, government laboratories and academia.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the Department of Mathematics.

**Financing Opportunities:** Financial assistance in the form of Research or Teaching Assistantships is not offered.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1; December 15 international  
*Spring Priority Deadline:* October 30, but open only to non-matriculated students who successfully completed PSM coursework in the Fall term

Applications submitted after the priority deadline will be considered for admission on a rolling basis.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters should be obtained from college/university faculty or faculty who are familiar with the applicant's competency. If the applicant has an established career in the field, the applicant's immediate supervisor should provide one of the letters.

**Coursework Required for Admission Consideration:** Applicants should have a strong background in one or more STEM fields: science, technology, engineering and mathematics.

**Bachelor's Degree in Discipline/Related Discipline:** The PSM program has been designed for recent graduates and professionals who have a bachelor's degree or equivalent in a STEM field.

**Statement of Goals:** In approximately 250 to 500 words, describe your interest in Temple's program, research goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58
- Duolingo: 110

**Resume:** Current resume required.

**Interview:** An in-person or Skype interview with the Program Director or members of the PSM Steering Committee is required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the PSM program. The credits must be equivalent to coursework offered by the Department of Mathematics at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The PSM Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MATH 5003	Professional Development Seminar <sup>1</sup>	1
MATH 5005	Ethics in Computing <sup>2</sup>	2
MATH 5061	Fundamentals of Computer Programming for Scientists and Engineers	4
MATH 5062	High Performance Computer Programming for Scientific Modeling	3
MATH 5063	Introduction to High-Performance Computing Technology for Scientists	4
MATH 5066	Mathematical Methods for High Performance Computing	3
<b>Electives</b>		<b>9</b>
Select three from the following: <sup>3</sup>		
BIOL 5411	Structural Bioinformatics I	
CHEM 5301	Quantum Chemistry	
CHEM 5302	Statistical Thermodynamics	
CIS 5524	Analysis and Modeling of Social and Information Networks	
CIS 5525	Neural Computation	
CIS 5526	Machine Learning	
CIS 9669	Distributed and Parallel Computer Systems	
MATH 8013	Numerical Linear Algebra I	
MATH 8014	Numerical Linear Algebra II	
MATH 8023	Numerical Differential Equations I	
MATH 8024	Numerical Differential Equations II	

MATH 8107	Mathematical Modeling for Science, Engineering, and Industry	
MATH 8700	Topics Computer Program	
MATH 8710	Topics Computer Program	
MATH 9200	Topics in Numerical Analysis	
MATH 9210	Topics in Numerical Analysis	
PHYS 5001	Introduction to Quantum Computing	
PHYS 8102	Statistical Mechanics	
<b>Capstone Course</b>		
MATH 9995	Capstone Project <sup>4</sup>	4
<b>Total Credit Hours</b>		<b>30</b>

1

BIOL 5506 Professional Development Seminar for PSM in Biotechnology serves as an approved alternative to MATH 5003.

2

BIOL 5511 Ethics in Bioinformatics serves as an approved alternative for MATH 5005.

3

Alternately, other elective courses may be taken at the 5000 level or higher, as approved by the program director.

4

With approval from their academic advisor, students may complete capstone credits over multiple academic terms.

**Culminating Event:***Capstone Research Project:*

The capstone research project (MATH 9995) provides students with the opportunity to develop, apply and demonstrate their skills in a professional high-performance computing environment. The project must be approved in advance by the PSM Steering Committee and requires a supervisor from either the Temple faculty or the PSM Scientific Advisory Committee. Students can undertake their research projects in whole or in part during student internships.

## Information Science and Technology MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Information Science and Technology.

### About the Program

The MS in Information Science and Technology (IS&T) program is designed for students without a background in programming and/or computer science to gain the skills to be prepared for careers in computing and information technology. This program allows students with undergraduate degrees from non-computing fields to add technical expertise in order to pursue the interdisciplinary career paths of the future. Students learn skills applicable to computer networking, database management, information security, mobile app development, software engineering, software testing and quality assurance, and web development. As preparation for studying these advanced topics, fast-paced, rigorous, introductory classes with a strong foundation in algorithms, data structures and programming are offered to MS in IS&T students.

Applicants to the MS in IS&T can choose between the on-campus and online programs, both of which follow the same curriculum and content. However, the delivery formats differ, as described below:

- The on-campus format is designed for students who prefer access to campus activities and live interaction with instructors and fellow students. Students can enroll full-time or part-time. While some courses may be offered online, most of the coursework is delivered in person over a full 16-week academic term during evening hours.
- The online format is designed for students who prefer the flexibility of online learning. Students can enroll full-time or part-time. Most courses are structured to include asynchronous assignments plus a once-a-week synchronous online class meeting.

The MS in IS&T program is designed for applicants with limited or no past experience in computer science. Candidates with some preparation and/or an undergraduate major in Computer Science or a closely related field should apply to the MS in Computer Science (p. 908) or MS in Computational Data Science (p. 903) programs.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main and Online

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** Students may take up to three graduate IS&T-related courses in other departments. All such course clusters require prior approval of the MS in IS&T Program Director.

**Areas of Specialization:** Research interests of faculty include:

- Communication and networks
- Data warehousing, filtering and mining
- Enterprise system development and resource management
- Ethics and social issues related to technology
- Knowledge management
- Management information and database systems
- Security and privacy
- Software engineering
- System development and process management
- Usability engineering

**Job Prospects:** Graduates often find employment in computer networking, database management, information security, mobile app development, software engineering, software testing and quality assurance, and web development. Many become involved in the design and implementation of new applications software or the planning and evaluation of computer-based systems. Prospective employers include the government, universities and colleges, and nonprofit agencies, as well as information technology organizations, computer centers or computer manufacturers in industry.

**Non-Matriculated Student Policy:** Non-matriculated students are permitted to take a maximum of two graduate-level CIS courses.

**Financing Opportunities:** Assistantships provide a stipend and full-time tuition to qualified students, but are typically reserved for doctoral students.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1; December 15 international  
*Spring Priority Deadline:* October 30; August 1 international

Applications submitted after the priority deadline will be considered for admission on a rolling basis. Applications are reviewed as they are received.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with academic competence. If out of school for an extended period of time, the applicant should request letters from supervising employers or professional colleagues who can speak to academic abilities, communication skills and/or professional competence.

**Coursework Required for Admission Consideration:** Applicants are expected to have some interest in and exposure to programming (e.g., through free online coding tutorials in C/C++, Java and/or Python).

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Not required.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate-level IS&T coursework completed no more than five years prior to the student's matriculation in the graduate program may be transferred into the MS in IS&T program. The student must have earned an "A" in the course, and must submit a rationale for applying the credits to the current graduate program. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
Select three from the following:		9
CIS 5002	Database Design & Programming	
CIS 5015	Scripting for Sciences and Business	
CIS 5016	Data Structures and Objects	
CIS 5017	Operating Systems and Architecture	
<b>Electives</b>		21
Select seven from the following: <sup>1</sup>		
CIS 5107	Computer Systems Security and Privacy	
CIS 5208	Knowledge Management	
CIS 5210	Seminar in Information Science and Technology	
CIS 5221	Introduction to Mobile Application Development	
CIS 5274	Software Quality Assurance and Testing	
CIS 5275	Software Project Management	
CIS 5301	Advanced Database Management Systems	
CIS 5303	Usability Engineering	
CIS 5304	Network Technologies	
CIS 5306	Software Engineering	
CIS 5405	Introduction to Digital Forensics	
CIS 5410	Advanced Seminar in Information Science and Technology	

CIS 5590 Topics in Computer Science

**Total Credit Hours** 30

1

Seven electives are typically selected from the identified CIS elective courses. Alternately, the core course not taken above may be completed or other graduate-level CIS courses or courses outside the department are taken with the approval of the MS in IS&T Program Director. Note that a maximum of three courses may be taken from other departments.

**Culminating Event:** Students satisfactorily complete coursework to earn the MS in IS&T degree.

## Mathematics MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Mathematics.

### About the Program

The Department of Mathematics offers graduate work leading to the Master of Science degree. The aim of the MS program is to provide students with a foundation sufficient to pursue careers in mathematics in

industry, government or education. The program offers opportunities to conduct original research under the supervision of a faculty member.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered before 4:30 p.m. The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and interactions among faculty and students with interest in computer and information sciences, physical and life sciences, statistics and engineering.

**Affiliation(s):** The Mathematics program at Temple University is affiliated with the American Mathematical Society and the Mathematical Association of America.

**Study Abroad:** Department faculty are active internationally and sometimes travel overseas for conferences and extended research visits. In some cases, students may participate in these activities.

**Accreditation:** This program adheres to accepted professional standards of mathematics education and research.

**Areas of Specialization:** The department has approximately 25 faculty members actively involved in research and graduate education. With a graduate student body of less than 40, we are a program of moderate size with a high faculty/student ratio. Thus, we provide students with unique opportunities for flexible program design and ample interaction with faculty. Classes are small and are held in an informal atmosphere enabling students and faculty to work closely together.

The department offers a great variety of choices for areas of specialization. A strong research presence exists in the following areas: algebra, computational mathematics, differential geometry and topology, geometric group theory, global geometry, harmonic analysis, invariant theory, mathematical biology, mathematical physics, mathematics of materials, numerical analysis, partial differential equations, probability, representation theory and several complex variables. Both prospective and matriculated students are encouraged to browse faculty webpages and contact faculty directly for more detailed information regarding areas of specialization and opportunities for further research.

**Job Prospects:** Graduates either continue advanced educational programs or pursue employment in industry, education, or government laboratories and agencies.

**Non-Matriculated Student Policy:** Non-matriculated students must coordinate coursework with the Graduate Chair.

**Financing Opportunities:** Teaching Assistants teach basic undergraduate mathematics courses, ranging from remedial courses through calculus. The standard teaching load is 20 hours per term. In determining the load, credit is given for more difficult and challenging teaching assignments. Research Assistantships are sometimes available, typically through special projects and grants. Support generally includes a stipend and tuition of up to 9 credits per term.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall Priority Deadline:* March 1

Applications submitted after the priority deadline will be considered for admission on a rolling basis.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from individuals who are well acquainted with the applicant's abilities and achievements in mathematics and related areas, particularly former instructors of mathematics courses and projects. Letters from instructors in related areas such as computation or the physical and life sciences are also appropriate. In certain cases, letters from employment supervisors or project leaders may be appropriate as well.

**Coursework Required for Admission Consideration:** Applicants must have completed fundamental undergraduate mathematics courses.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must hold a baccalaureate degree from an accredited college or university.

**Statement of Goals:** Describe your strengths and motivation, the purpose for applying to a graduate program in mathematics, and why you are interested in the intended degree. This forum should be used to make your strongest case for admission and, thus, should be well written.

**Standardized Test Scores:**

GRE General Test or GRE Subject Test in Mathematics: The GRE General Test is not required and will not be considered. The GRE Subject Test in Mathematics is optional.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Test Waivers:** An applicant who wants to have certain admission requirements waived must contact the department directly. Requests are considered by the department on a case-by-case basis. In some cases, an additional appeal to the Graduate School may be required. In such a case, the department makes a preliminary determination for the applicant and, if positive, issues a supporting letter to the Graduate School on the applicant's behalf.

**Resume:** Current resume required.

**Transfer Credit:** Students who have taken graduate courses at other institutions or at Temple University prior to matriculation may apply for transfer credit. All applications for transfer credit are reviewed by the Graduate Committee, which has the option to deny credit if the courses involved are deemed substantially inferior to similar courses offered by the Department of Mathematics. The credits must be equivalent to coursework offered at Temple, with a grade of "B" or better having been earned in the course(s). No course completed more than five years before the date of application will be awarded credit, nor will

courses substantially similar to courses taken since matriculation earn transfer credit. Transfer credit is only available for graduate-level courses in mathematics or those in related fields that have a substantial mathematical content. Applications for transfer credit are not considered until the student has completed at least three graduate courses totaling at least 9 credits. The maximum number of transfer credits awarded is 6.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

The Master of Science degree requires 10 graduate courses at the 5000 level or higher. The program of study must be designed in coordination with a Mathematics faculty advisor and approved by the departmental Graduate Committee. With the approval of the faculty advisor and Graduate Committee, relevant courses from departments other than Mathematics may be included.

The MS degree is offered with an optional concentration in Applied and Computational Mathematics. The concentration is designed for students interested in incorporating advanced study in mathematical and computational methods into the Master of Science program. Students pursuing this concentration complete at least 15 credits of coursework in applied and computational mathematics within their 30-credit degree program.

**Culminating Events:**

After satisfying the 30-credit course requirement, students may choose between the following three options as the culminating event for the MS degree:

- Master's Thesis
- Master's Comprehensive Examination
- Master's Pass on the PhD Comprehensive Examination

*Master's Thesis:*

Students who choose to submit a master's thesis must select a faculty advisor and a thesis advisory committee. These arrangements are subject to the approval of the Mathematics Graduate Committee. The date, time and location of a thesis defense are set by the Graduate Chair in consultation with the student's advisory committee.

*Master's Comprehensive Examination:*

For students selecting this option, a written Master's Comprehensive Examination is composed by at least two departmental Graduate Faculty. The topics covered should correspond to the student's program of study as approved by the Graduate Committee. The exam is graded by at least two Mathematics faculty members, with grades of either Pass or Fail. Students interested in taking the Master's Comprehensive Examination are required to make a written request to the Graduate Chair at least four weeks in advance. If the examination is failed, it may be taken again once, or the student may attempt a master's pass on the PhD Comprehensive Examination.

*Master's Pass on the PhD Comprehensive Examination:*

Students choosing this option must take three of the separate 25-point sections of the written PhD Comprehensive Examination. A student who achieves a total score of at least 40 on the three sections of the examination, with no individual section score below 8, obtains a master's pass on the exam and has fulfilled the examination requirement for the MS degree. If one of the individual exam scores falls below 8 points, that exam may be repeated once, or the exam in a different topic may be

attempted once, or the student may take the Master's Comprehensive Examination described above. Such arrangements are subject to approval by the Graduate Committee. The case of a student failing the comprehensive exam by a small margin is discussed by the department's Graduate Committee, which takes the student's whole academic record into account in its decision.

## Mathematics PhD

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Doctor of Philosophy in Mathematics.

### About the Program

The PhD program in Mathematics prepares students for careers that depend on advanced mathematics. These include broad directions such as advanced research and development, education, government, industry and national laboratories. For new students, the program offers a repertoire of coursework and research opportunities that eases the transition from undergraduate to advanced graduate studies. Courses provide a sound mathematical background while helping beginning students to mature mathematically. Naturally, individuals with enough maturity and knowledge need not take these more basic courses.

In the Mathematics Department, our philosophy is to participate actively in our students' development as future professionals whose work involves advanced mathematics. We take pride in caring for our students. Our faculty are accessible and willing to talk mathematics with any inquiring student. It is this attitude that most distinguishes our program from other mathematics graduate programs. While requiring excellence, we work hard at providing the environment to achieve it.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered before 4:30 p.m. The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and interactions among faculty and students with interest in computer and information sciences, physical and life sciences, statistics and engineering.

**Affiliation(s):** The Mathematics program at Temple University is affiliated with the American Mathematical Society and the Mathematical Association of America.

**Study Abroad:** Department faculty are active internationally and sometimes travel overseas for conferences and extended research visits. In some cases, students may participate in these activities.

**Ranking:** The PhD program is designed to provide opportunities for education and research that are commensurate with national standards. Faculty are active in professional meetings and initiatives organized by the American Mathematical Society and the Mathematical Association of America.

**Accreditation:** This program adheres to accepted professional standards of mathematics education and research.

**Areas of Specialization:** The department offers a great variety of choices for areas of specialization, with a strong research presence in the following areas:

- Algebra
- Algebraic and analytic number theory
- Combinatorics
- Computational mathematics
- Differential and computational geometry and topology
- Global geometry
- Harmonic analysis
- Mathematical physics
- Mathematics of materials
- Numerical analysis
- Partial differential equations
- Related probability and mathematical statistics
- Several complex variables

Both prospective and matriculated students are encouraged to browse faculty webpages and contact faculty directly for more detailed information regarding areas of specialization and opportunities for further research.

**Job Prospects:** Graduates either continue advanced educational programs or pursue employment in industry, education, or government laboratories and agencies.

**Non-Matriculated Student Policy:** Non-matriculated students must coordinate coursework with the Graduate Chair.

**Financing Opportunities:** Teaching Assistants teach basic undergraduate mathematics courses, ranging from remedial courses through calculus. The standard teaching load is 20 hours per term. In

determining the load, credit is given for more difficult and challenging teaching assignments. Research Assistantships are sometimes available, typically through special projects and grants. Support generally includes a stipend and tuition of up to 9 credits per term.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* December 15

For full consideration, applications must be submitted by the deadline. Late applications may be considered on a case-by-case basis.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from individuals who are well acquainted with the applicant's abilities and achievements in mathematics and related areas, particularly former instructors of mathematics courses and projects. Letters from instructors in related areas such as computation or the physical and life sciences are also appropriate. In certain cases, letters from employment supervisors or project leaders may be appropriate as well.

**Coursework Required for Admission Consideration:** Applicants must have completed fundamental undergraduate mathematics courses. Prospective students are encouraged to contact the department to discuss their background.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must hold a baccalaureate degree from an accredited college or university.

**Statement of Goals:** Describe your strengths and motivation, the purpose for applying to a graduate program in mathematics, and why you are interested in the intended degree. This forum should be used to make your strongest case for admission and, thus, should be well written.

### Standardized Test Scores:

GRE General Test or GRE Subject Test in Mathematics: The GRE General Test is not required and will not be considered. The GRE Subject Test in Mathematics is optional.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Test Waivers:** An applicant who wishes to have certain admission requirements waived must contact the department directly. Requests are considered by the department on a case-by-case basis. In some cases, an additional appeal to the Graduate School may be required. In such a case, the department makes a preliminary determination for the applicant

and, if positive, issues a supporting letter to the Graduate School on the applicant's behalf.

**Resume:** Current resume required.

**Advanced Standing:** Students who have taken graduate courses at other institutions or at Temple University prior to matriculation may apply for advanced standing credit. All applications for advanced standing credit are reviewed by the Graduate Committee, which has the option to deny credit if the courses involved are deemed substantially inferior to similar courses offered by the Department of Mathematics. The credits must be equivalent to coursework offered at Temple, with a grade of "B" or better having been earned in the course(s). No course completed more than five years before the date of application will be awarded credit, nor will courses substantially similar to courses taken since matriculation earn advanced standing credit. Advanced standing credit is only available for graduate-level courses in mathematics or those in related fields that have a substantial mathematical content. Applications for advanced standing credit are not considered until the student has completed at least three graduate courses totaling at least 9 credits. The maximum number of advanced standing credits awarded is 30.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 54

### Required Courses:

Students are required to take at least 16 graduate courses, which are chosen with the advice and consent of the student's advisor. These courses should be taken during the first three years of graduate study and include foundational 8000-level courses for the topics in which the student plans to take the PhD Comprehensive Examination. Students who have had graduate courses in these subjects prior to admission may omit some or all of the courses with the consent of their advisor and the Graduate Committee.

Students also take six additional credit hours of:

Code	Title	Credit Hours
MATH 9994	Preliminary Examination Preparation	1-6
MATH 9998	Pre-Dissertation Research / Elevation to Candidacy	1-6
MATH 9999	Dissertation Research	2
		minimum

### Culminating Events:

#### *Written Comprehensive Examination:*

The PhD Comprehensive Examination is a written exam comprised of three separate sections selected from the following areas:

- Algebra
- Applied Mathematics
- Complex Analysis
- Differential Geometry and Topology
- Partial Differential Equations
- Real Analysis

Students can choose any three of these sections for their examination. After exams in three different topics have been attempted, an exam in a fourth topic can only be taken under exceptional circumstances, and

only after specific approval by the Graduate Committee. Each section is a three-hour test based primarily on the corresponding two-term 8000-level graduate course sequence. The separate section tests are given on different days, during one two-week period, twice a year: once in August just before the beginning of the Fall term, and once in January during the two weeks prior to the beginning of the Spring term. Students do not have to take all three of the section tests during the same two-week period. Each section test may be repeated once to obtain a higher grade.

Each of the three-hour section tests is further divided into two parts. Part I contains four questions, of which the student is asked to answer three. These questions are designed to test mastery of the facts of the subject. Part II contains three questions, of which two are to be answered. These questions test the ability to solve in-depth problems in the subject.

Students should begin taking the components of the Comprehensive Exam as soon as possible after finishing the corresponding coursework. Students are expected to complete and pass the Comprehensive Examination by August of their second year of study. While some delay in this schedule may be permitted, under exceptional circumstances, students not making good progress toward completing and passing their Comprehensive Examination in a timely fashion will be asked to leave the PhD program.

Incoming students may, with approval of the Graduate Chair, take up to three of the written PhD Comprehensive Examination sections once prior to their first term of enrollment. Upon request by the student, any of these pre-enrollment attempts can be removed from the student's record.

Each section is graded independently by two faculty members, using a scale of 0 to 25. The grades are compared and reconciled in the event of a discrepancy. A total score of at least 60, with a score on each individual section test of at least 13, is required to pass. If a student falls slightly short of this standard, the Graduate Faculty may, at their discretion, recommend a grade of pass based on the whole of the student's academic record.

A student who achieves a total score of at least 40 on the three sections of the PhD Comprehensive Examination, with no individual section score below 8, has obtained a master's pass on the examination and has fulfilled the examination requirement for the MS degree. If one of the individual exam scores falls below 8 points, that exam may be repeated once, or the exam in a different topic may be attempted once, or the student may take the Master's Comprehensive Examination. Such arrangements are subject to approval by the Graduate Committee, and if a student falls slightly short of the required standards, then the Graduate Faculty may, at their discretion, recommend a grade of pass, basing their decision on the student's entire academic record.

#### *Preliminary Examination:*

The preliminary examination is a two-hour oral exam. It should be taken by the end of the sixth term and must be passed by the end of the seventh term. The PhD preliminary examination can be repeated, in whole or in part, only once. No student is permitted to take the preliminary examination before passing the written PhD Comprehensive Examination and satisfying the foreign language requirement.

The student chooses a chief examiner with the advice and consent of the Mathematics Graduate Committee and with the consent of the proposed chief examiner. The chief examiner, in accepting their assignment, implicitly offers to be the student's dissertation supervisor if the examination is passed. Approximately one-half of the preliminary examination is conducted by the chief examiner, who asks questions in the area that the student has chosen as a specialty. The other half of

the examination is devoted to questions asked by other faculty members on two or more elementary topics related to the area of specialization. The exact description of the elementary topics to be included in the examination is determined by the chief examiner, who is also responsible for assigning examiners to cover the topics. The examination committee consists of the chief examiner, the examiners for the elementary topics, and any other faculty who choose to attend. All faculty in attendance may vote on the outcome of the examination. The examination is considered passed if the chief examiner and at least one-half of the other faculty present vote in favor of passing.

Students who are preparing to write their preliminary examination should confirm a time and date with the chair of their Doctoral Advisory Committee and register with the department. The student and chair receive confirmation of the time, date, room and proctor for the examination.

#### *Dissertation:*

The candidate's dissertation must be a distinctive and original contribution to research in mathematics. It must be an individual work, with only one author. Previously published work by the candidate may be included, if it represents research done while the student was enrolled in the PhD program in Mathematics at Temple University and was not used to obtain any other degree. Joint work that cannot be attributed to the candidate alone must not be included in the body of the dissertation, but may be attached as an appendix. All previously published work must be logically connected and integrated into the dissertation, with a common introduction, conclusion and bibliography. Existing copyrights must not be violated.

Preparation of the dissertation is supervised by the student's Doctoral Advisory Committee (DAC). This committee must include at least three Temple graduate faculty, two of whom must be in the Mathematics Department. The chair of the committee must be a member of the Temple University Mathematics Department. The DAC may include members of other Temple University departments. It is also possible for faculty from other universities or expert advisors employed in non-university settings to be included in the DAC.

The first step in preparing the dissertation is to write a dissertation proposal, which must be approved by the candidate's DAC. The proposal is kept on file, and if it becomes necessary to alter the proposal, the changes should be approved by the DAC and filed with the proposal.

The dissertation defense may be attended by faculty and graduate students from Temple University or other institutions, as well as mathematicians or scientists employed in a non-academic setting. The candidate's Dissertation Examining Committee (DEC) must attend the defense. This committee includes the candidate's DAC and at least one additional member, who must be faculty of some Temple University department other than Mathematics or faculty at another university. The DEC meets at the conclusion of the dissertation defense and decides, by majority vote, if the candidate was successful.

If a student needs to change a member of a committee, the new member must be approved by the Mathematics Graduate Committee and registered with the department and the Graduate School.

When the dissertation is deemed complete by the candidate and the DAC, a defense is scheduled. Students who are preparing to defend their dissertation should confirm a date and time with their DAC and register with the department at least 20 days before the defense is to be

scheduled. The Graduate Chair arranges the date, time and room. The appropriate forms are forwarded to the student.

This dissertation defense must be announced in writing at least 10 days in advance of its occurrence. Copies of the announcement must be directed to each member of the candidate's DEC, each faculty member of the Mathematics Department, the Dean of the College of Science and Technology, and the Graduate School. Copies of the announcement are to be posted at the Department Office, the College Office, and on the Graduate School website.

## Physics MS

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Master of Science in Physics.

### About the Program

The objective of the MS degree program in Physics is to provide advanced training in Physics sufficiently broad to permit the graduate to pursue a range of technical careers. Students choose to pursue the Coursework Track or Thesis Track to complete the MS degree.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Job Prospects:** The program is dedicated to producing well-trained scientists prepared for careers as high school science teachers, technical writers, or members of a technical support staff.

**Non-Matriculated Student Policy:** Non-matriculated students are restricted to taking the following courses:

Code	Title	Credit Hours
PHYS 5101	Analytical Mechanics	
PHYS 5301	Electromagnetic Theory	
PHYS 5501	Mathematical Physics	

If the student applies to and is accepted into the program, the courses taken, up to 9 credits, may be applied toward the degree requirements.

**Financing Opportunities:** Financial aid in the form of Teaching Assistantships, Research Assistantships, and Temple University Fellowships is reserved largely for PhD students. Applicants with a bachelor's degree who wish to earn a doctorate should apply to the PhD program, not the MS program. Students in the PhD program normally complete all of the requirements for the MS in their first two years and may request the MS degree at that time while continuing in the PhD program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1; December 15 international  
*Spring Priority Deadline:* October 30; August 15 international

Applications submitted after the priority deadline will be considered for admission on a rolling basis.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty members or scientists familiar with the applicant's academic and scientific capabilities.

**Coursework Required for Admission Consideration:** Applicants should have successfully completed coursework typically required for a bachelor's degree in Physics.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Physics is typically required. A certified transcript is required from each institution previously attended by the applicant.

**Statement of Goals:** In one to two pages, address your specific interest in Temple's program, research and career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: General Test required. Subject Test in Physics strongly recommended, but not required.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S.

institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the program. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The Graduate Program Committee must approve all requests for transfer credit. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

### Thesis Track

Code	Title	Credit Hours
<b>Core Courses</b>		
PHYS 5101	Analytical Mechanics	3
PHYS 5301	Electromagnetic Theory	3
PHYS 5501	Mathematical Physics	3
PHYS 5701	Quantum Mechanics I	3
PHYS 5702	Quantum Mechanics II	3
PHYS 8102	Statistical Mechanics	3
PHYS 8702	Solid State Physics	3
PHYS 8703	Nuclear and Elementary Particle Physics	3
<b>Research Courses</b>		
PHYS 9996	Master's Thesis Research	3
Select 3 credits of additional coursework from the following:		3
PHYS 8004	Problems in Experimental Physics	
PHYS 8005	Problems in Theoretical Physics	
PHYS 9996	Master's Thesis Research	
<b>Total Credit Hours</b>		<b>30</b>

### Coursework Track

Code	Title	Credit Hours
<b>Core Courses</b>		
PHYS 5101	Analytical Mechanics	3
PHYS 5301	Electromagnetic Theory	3
PHYS 5501	Mathematical Physics	3
PHYS 5701	Quantum Mechanics I	3
PHYS 5702	Quantum Mechanics II	3
PHYS 8102	Statistical Mechanics	3
PHYS 8702	Solid State Physics	3
PHYS 8703	Nuclear and Elementary Particle Physics	3

<b>Additional Coursework</b> <sup>1</sup>	<b>6</b>
<b>Total Credit Hours</b>	<b>30</b>

1

The balance of coursework is identified in consultation with the graduate advisor and subject to the approval of the Graduate Program Committee. No more than 3 credits may be taken in these independent study courses: PHYS 8004 Problems in Experimental Physics; PHYS 8005 Problems in Theoretical Physics; or PHYS 9998 Pre-Dissertation Research / Elevation to Candidacy.

### Culminating Events:

*Thesis:*

A master's thesis is required for students in the Thesis Track, but not for students in the Coursework Track. The thesis is based on the student's research and approved in accordance with the policies of the Department of Physics and the Graduate School.

*Comprehensive Examination:*

The MS comprehensive examination is required for students in the Coursework Track, but not for students in the Thesis Track. The exam, which tests the student's mastery of undergraduate and beginning graduate physics, consists of a three-part written exam and an oral exam. General subject areas covered by the examination include classical electromagnetic theory, classical mechanics, mathematical physics, modern physics, quantum mechanics, statistical mechanics and thermodynamics.

MS students in the Coursework Track are required to take the comprehensive examination in the summer at the end of their first year of full-time graduate study. They are tested on the subject matter in six core courses: PHYS 5101, PHYS 5301, PHYS 5501, PHYS 5701, PHYS 5702, and PHYS 8102. In the event of failure, the exam may be retaken once. Any student who fails a second time is dropped from the graduate program.

## Physics PhD

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Doctor of Philosophy in Physics.

### About the Program

The objective of the PhD program in Physics is to provide both a broad understanding of foundational areas of Physics and intensive training and experience in an important area of current research. A primary requirement for the degree is an original and significant research contribution, which is presented in the PhD dissertation.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Job Prospects:** The program is intended to produce well-trained physicists, who are qualified for careers as research scientists in government and industrial laboratories or as university faculty members.

**Non-Matriculated Student Policy:** Non-matriculated students are restricted to taking the following courses:

Code	Title	Credit Hours
PHYS 5101	Analytical Mechanics	
PHYS 5301	Electromagnetic Theory	
PHYS 5501	Mathematical Physics	

If the student applies to and is accepted into the program, the courses taken, up to 9 credits, may be applied toward the degree requirements.

**Financing Opportunities:** Financial aid is available in the form of Teaching and Research Assistantships. The principal duties of a Teaching Assistant include laboratory instruction, grading of lab reports, and tutoring of students enrolled in introductory physics courses. Research Assistants are assigned to a faculty member, typically the thesis advisor, who is engaged in an externally funded research project and who determines the students' duties. Both Teaching and Research Assistantships provide tuition, a stipend for living expenses, and health insurance.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* January 15; December 15 international  
*Spring:* September 15; August 15 international

For full consideration, applications must be submitted by the deadline. Late applications may be considered in exceptional cases.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty members or scientists familiar with the applicant's academic and scientific capabilities.

**Coursework Required for Admission Consideration:** Applicants should have successfully completed coursework typically required for a bachelor's degree in Physics.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Physics is typically required. A certified transcript is required from each institution previously attended by the applicant.

**Statement of Goals:** In one to two pages, address your specific interest in Temple's program, research and career goals, and academic and research achievements.

**Standardized Test Scores:**

GRE: General Test required. Subject Test in Physics strongly recommended, but not required.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the program. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The Graduate Program Committee must approve all requests for transfer credit. The maximum number of credits a student may transfer is 6.

**Advanced Standing:** Students who enter the PhD program in Physics with a master's degree in Physics or a closely related field may be considered for advanced standing. The Graduate Program Committee recommends the awarding of advanced standing on a case-by-case basis. The maximum number of advanced standing credits awarded is 33.

### Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 38

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
PHYS 5002	Physics Research and Ethics	1
PHYS 5101	Analytical Mechanics	3
PHYS 5301	Electromagnetic Theory	3
PHYS 5501	Mathematical Physics	3
PHYS 5701	Quantum Mechanics I	3
PHYS 5702	Quantum Mechanics II	3
PHYS 8102	Statistical Mechanics	3
PHYS 8702	Solid State Physics	3
PHYS 8703	Nuclear and Elementary Particle Physics	3
<b>Electives</b>		<b>6</b>
Select two from the following:		
PHYS 5302	Advanced Electromagnetic Theory	
PHYS 5502	Computational and Mathematical Physics	
PHYS 8020	Topical Seminar I	
PHYS 8701	Quantum Field Theory	
PHYS 8704	Many Electron Theory	
PHYS 8705	Advanced Topics in Nuclear and Particle Physics or any new course designated as PHYS 870X	
<b>Research Courses</b> <sup>1</sup>		<b>7</b>
PHYS 9994	Preliminary Examination Preparation <sup>2</sup>	
PHYS 9998	Pre-Dissertation Research / Elevation to Candidacy	
PHYS 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>38</b>

1

The combined number of credits of PHYS 9994, PHYS 9998, and PHYS 9999 must be at least 7, with a minimum of 1 credit of PHYS 9994 and a minimum of 2 credits of PHYS 9999 required.

2

Students typically take PHYS 9994 in the fourth academic term of full-time graduate study.

#### Culminating Events:

##### *Preliminary Examination:*

For elevation to candidacy for the PhD degree, the student must pass a written and oral preliminary examination covering undergraduate- and master's-level physics. The written part of the exam is typically taken at the end of the summer of the first year of study on information from six core courses: PHYS 5101, PHYS 5301, PHYS 5501, PHYS 5701, PHYS 5702, and PHYS 8102. The oral part, also known as the Early Research Progress Exam, is given by the student's research committee at the end of the fifth term of study. In the event of failure, the exam may be retaken once six months later. The Department or Graduate Chair is present for the second attempt. Any student who fails a second time is dropped from the graduate program.

##### *Dissertation:*

A topic for the PhD dissertation is selected in consultation with a faculty member who agrees to serve as the dissertation supervisor. For elevation to candidacy, the student must submit a dissertation proposal that meets the approval of the Graduate Program Committee and the Graduate School. The completed dissertation is submitted to the department before

the final examination, in which the dissertation is presented and defended by the candidate in an oral examination.

## Scientific Writing PSM

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the Professional Science Master's in Scientific Writing.

### About the Program

In science, the ability to write clearly and succinctly is a skill in demand by organizations as diverse as nonprofit organizations, pharmaceutical companies and news outlets. The primary objective of the PSM in Scientific Writing program is to enable students with diverse backgrounds in science, technology, engineering and mathematics (STEM) to develop the expertise to pursue medical and scientific writing jobs in the STEM fields. In addition, individuals currently employed in STEM areas are offered the opportunity to enhance and broaden their skills for their professional advancement.

The Scientific Writing PSM program offers specific and focused instruction in a wide range of scientific writing genres, as well as enables students to develop their communication skills. Students also experience scientific writing in practice, both through classroom instruction and an internship that provides an opportunity for direct training by directors of regulatory affairs in pharmaceutical companies, medical writers,

practicing scientists, professionals working for scientific/medical journals, publishers and the like.

The program is a collaborative effort of Temple faculty in the College of Science and Technology and the Lew Klein College of Media and Communication. Students may satisfy the degree requirements by also taking electives in Engineering, English, Health Policy and Management, Marketing, Pharmacy Quality Assurance, Philosophy and Statistics.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The degree program is inherently interdisciplinary in commingling science coursework with writing coursework.

**Accreditation:** Temple University is fully accredited by the Middle States Commission on Higher Education.

**Areas of Specialization:** The Scientific Writing PSM program offers two concentrations:

- Marketing/Regulatory Writing
- Popular Scientific Writing

**Job Prospects:** Recent data from the United States Labor Department, Bureau of Labor Statistics, shows that technical writer jobs are growing at a faster rate than medical scientist jobs. Graduates of the Scientific Writing PSM program are prepared to use scientific writing skills in all relevant areas, including the STEM disciplines, Contract Research Organizations (CRO), public health and policy, and science communications.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in a total of three courses (9 credits) with permission of the instructor and the Biology Department.

**Financing Opportunities:** Financial assistance in the form of Research or Teaching Assistantships is not offered at this time.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall Priority Deadline:* March 1; December 15 international  
*Spring Priority Deadline:* October 30; September 1 international

Applications submitted after the priority deadline will be considered for admission on a rolling basis. Applications are processed on a continual basis. Ordinarily, the applicant is informed of an admissions decision within four to six weeks of receipt of all supporting application documents.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters should be obtained from college/university faculty or faculty who are familiar with the applicant's competency. If the applicant has an established career in a related field, the applicant's immediate supervisor should provide one of the letters.

**Coursework Required for Admission Consideration:** Applicants should have a strong background in one or more STEM fields: science, technology, engineering and mathematics.

**Bachelor's Degree in Discipline/Related Discipline:** The Scientific Writing PSM program has been designed for professionals who have a bachelor's degree or equivalent in a STEM field.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in the Scientific Writing PSM program, career goals, and academic and professional achievements.

### Standardized Test Scores:

GRE: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61
- Duolingo: 110

**Resume:** Current resume required.

**Interview:** An in-person or Skype interview is required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Scientific Writing PSM program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The PSM in Scientific Writing Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
BIOL 5505	Ethics Regulation and Policy in Biotechnology <sup>1</sup>	3
BIOL 5522	Introduction to Scientific and Regulatory Writing <sup>1</sup>	3
BIOL 5532	Introduction to Grant Writing <sup>1</sup>	3
BIOL 5533	Communicating Science to a Broader Audience / Non-Scientists <sup>1</sup>	3
JRN 5710	Seminars in Communication <sup>1,2</sup>	4
<b>Electives<sup>3</sup></b>		<b>12</b>
<b>Capstone Course</b>		
BIOL 9995	Capstone Project	2
<b>Total Credit Hours</b>		<b>30</b>

1

With approval from the advisor, students may request to waive any one core course and replace it with an alternate course that aligns with the goals of the degree program.

2

With approval from the advisor, students may take a graduate-level Journalism course other than JRN 5710.

3

Electives are selected in one of two areas of concentration, as delineated below. Students are required to take two STEM courses in the concentration of their choice and may take up to two non-STEM courses that align with their interests. The coursework allows students to choose from a wide range of topics within Marketing/Regulatory Writing or Popular Scientific Writing in alignment with their professional interests. The breadth of electives ensures that students are presented with the diverse scientific writing genres in science. Listed electives for each concentration serve as a guide. Thus, students are not restricted to the listed electives and may, in consultation with the program advisor, take other graduate-level courses as electives.

## Marketing/Regulatory Writing Concentration

Code	Title	Credit Hours
Select four from the following: <sup>1</sup> 12		
QARA 5502	Regulation of Medical Devices: Submissions	
QARA 5533	Requirements for Product Labeling and Advertising	
QARA 5534	Regulatory Aspects of Biomedical/Technical Communication	
QARA 5545	Post Approval Changes (PAC)	
QARA 5548	Risk Management of Pharmaceutical and Medical Devices	
QARA 5592	Food and Drug Law	
QARA 5594	Regulation of Dietary Supplements and Functional Foods	
QARA 5596	Food Labeling and Regulatory Affairs	
QARA 5611	Regulation of Advertising and Promotions	
<b>Total Credit Hours</b>		<b>12</b>

1

Students in the Marketing/Regulatory Writing concentration must take two QARA courses, but may elect to replace two courses with any two graduate-level courses offered at Temple that align with the Marketing/Regulatory Writing concentration.

## Popular Scientific Writing Concentration

Code	Title	Credit Hours
Select four from the following: <sup>1</sup> 12		
BIOL 5111	Genomics in Medicine	
BIOL 5312	Biostatistics	
BIOL 82X0	Seminar in Genomics Analytics	
CHEM 8201	The Chemistry of Natural Products	
ENG 9400	Seminar in Rhetoric and Composition	
HPM 8008	Health Economics	

JRN 5005	Communication Law
JRN 5012	
JRN 5013	
JRN 5212	The Entrepreneurial Journalist
MSP 8741	Emergent Media Production
PHIL 5216	Philosophy of Science
PHIL 5249	Ethics in Medicine
STAT 5001	Quantitative Methods for Business
<b>Total Credit Hours</b>	<b>12</b>

1

Students in the Popular Scientific Writing concentration may take any two STEM courses and any two non-STEM graduate-level courses offered at Temple that align with their interests. The list below serves as a guide for electives within the Popular Scientific Writing concentration.

## Approved Electives for the Popular Scientific Writing Concentration <sup>1</sup>

Code	Title	Credit Hours
ENG 8706	Advanced Study in Rhetoric and Composition	3
EPBI 5101	Fundamentals of Epidemiology	3
HPM 8013	Research Methods in Health Policy	3
HRPR 8101	Bioethics and Ethical Decision-Making	3
MKTG 5001	Marketing Management/Strategy	3

1

With approval from the advisor, students may take one of these approved electives or any other graduate-level course as an elective to replace one course for the Popular Scientific Writing concentration.

### Culminating Event:

#### Capstone Project:

BIOL 9995 Capstone Project constitutes a culminating event of the Scientific Writing PSM and requires the submission of a detailed technical paper and oral presentation. In the summer following the first year of study, students are expected to complete an internship, which becomes part of their capstone project. The internship must take place in a workplace approved by the PSM Steering Committee, which includes faculty from the College of Science and Technology, Lew Klein College of Media and Communication, and the Provost's Office. Workplaces may include a patent law office specializing in chemical, engineering and scientific innovation; a practicing scientist; a publishing company; or any other relevant workplace on or off Temple's campus.

## Graduate Certificate: Bioinformatics

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Bioinformatics.

### About the Certificate

Bioinformatics is the science that happens when computers are joined with the latest discoveries in biochemistry, biophysics and genomics. It is a rapidly growing field that brings together elements of biology, chemistry, computer science, physics and statistics. Bioinformatics is an area of rapid job growth and has become an essential part of healthcare research and the biotechnology and pharmaceutical industries. Bioinformatics specialists are employed to process and analyze the high volume of genomic and proteomic data generated from large-scale sequencing and related efforts that form the foundation of personalized medicine.

With only 12 credits of core coursework required, the Bioinformatics graduate certificate program provides a mechanism to obtain a certificate in the field in one or two academic terms. The classes are taught by the same faculty as those for the Bioinformatics and Biological Data Science PSM program. Certificate students take the same core courses as PSM students but without committing to a capstone project or the full 30 credits needed to earn a graduate degree. The Bioinformatics graduate certificate program credentials students in the field through a curriculum chosen according to the student's interest or gap in knowledge.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The certificate program can be completed on a full- or part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the PSM program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

Applications are processed on a continual basis. Ordinarily, the applicant is informed of an admissions decision within four to six weeks of receipt of all supporting application documents. Late applications may be considered for admission.

International students should note that the certificate does not fulfill the F-1 visa requirement for full-time coursework. International students already enrolled in a PSM or other graduate program at Temple may enroll in the certificate program, in addition to their current program, with approval from their program's graduate advisor.

*APPLY ONLINE to this certificate program.*

**Coursework Required for Admission Consideration:** Applicants should have a strong background in one or more science, technology, engineering or mathematics (STEM) fields.

**Bachelor's Degree in Discipline/Related Discipline:** The Bioinformatics graduate certificate has been designed for recent graduates and professionals who have a bachelor's degree or equivalent in a STEM field.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in the Bioinformatics certificate, career goals, and academic and professional achievements.

**Interview:** An in-person or Skype interview is required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Bioinformatics graduate certificate program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The PSM in Bioinformatics Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
Select four from the following:		
BIOL 5312	Biostatistics	12
BIOL 5403	Genomics	
BIOL 5411	Structural Bioinformatics I	
BIOL 5509	Computational Genomics	
BIOL 5514	Biological Models in Python	
CHEM 5412	Structural Bioinformatics II	

**Total Credit Hours** 12

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Bioinnovation

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Bioinnovation.

### About the Certificate

The primary objective of the Bioinnovation graduate certificate program is to develop a portfolio of knowledge and experience that allows individuals with a background in science, business, communication, law, and policy and regulation to pursue careers in such fast-growing fields as bioinformation, the environment, global health, pharmaceuticals and biotechnology, technology transfer and trade. The certificate program provides:

- extensive biotechnology and biomedical background to challenge and complement traditional thinking and applications;
- review of the translational nature of biodiscoveries through classroom instruction and direct interaction with different bioindustry professionals, including scientists, lawyers, journalists and others; and
- development of team and matrix work routines and effective communication skills.

The Bioinnovation certificate program is designed to help recent graduates obtain relevant employment or to accelerate career advancement and/or allow a career shift for currently employed professionals. The certificate is a shorter, transcripted program taken from the core requirements of the Bioinnovation PSM program. Certificate

students take the same core courses as PSM students but without committing to a capstone project or the full 30 credits needed to earn a graduate degree. The classes are taught by the same faculty as those for the Bioinnovation PSM program.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The certificate program can be completed on a full- or part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the assistant director for PSM programs for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

Applications are processed on a continual basis. Ordinarily, the applicant is informed of an admissions decision within four to six weeks of receipt of all supporting application documents. Late applications may be considered for admission.

International students should note that the certificate does not fulfill the F-1 visa requirement for full-time coursework. International students already enrolled in a PSM or other graduate program at Temple may enroll in the certificate program, in addition to their current program, with approval from their program's graduate advisor.

*APPLY ONLINE to this certificate program.*

**Coursework Required for Admission Consideration:** Applicants should have a strong background in one or more of the following fields: science, business, communication, law, or policy and regulation. Upon review, the PSM in Bioinnovation Steering Committee may allow departures from course requirements.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Biology, Chemistry, Business or Communication, or a Juris Doctor in Law (or foreign equivalent), is required. Non-STEM graduates are required to enroll in at least two Biology foundation courses, as recommended by the PSM in Bioinnovation Steering Committee, on a non-matriculated basis.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in the Bioinnovation certificate, career goals, and academic and professional achievements.

**Interview:** An in-person or Skype interview is required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the Bioinnovation graduate certificate program. The credits must be equivalent to coursework offered by the Biology Department at Temple University. A grade of "B" or better must have been earned for the credits to transfer. The PSM in Bioinnovation Steering Committee makes recommendations to the Department Chair for transferring credit on an individual basis. The maximum number of credits a student may transfer is 6.

## Certificate Requirements

Number of Credits Required to Complete the Certificate: 12

Required Courses:

## Graduate Certificate: Biotechnology

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Biotechnology.

### About the Certificate

Biotechnology is, at its simplest, technology based on biology. It harnesses cellular and biomolecular processes to develop technologies and products that help improve our lives and the health of our planet. Modern biotechnology provides breakthrough products and technologies to combat debilitating and rare diseases; reduce our environmental footprint; feed the hungry; use less and cleaner energy; and have safer, cleaner and more efficient industrial manufacturing processes. Recent advances in biotechnology are helping us prepare for and meet society's most pressing challenges.

With only 12 credits of core coursework required, the Biotechnology graduate certificate program provides a mechanism to obtain a certificate in the field in one or two academic terms. The classes are taught by the same faculty as those for the Biotechnology PSM program. Certificate students take the same core courses as PSM students but without committing to a capstone project or the full 30 credits needed to earn a graduate degree. The Biotechnology graduate certificate program credentials future leaders in the field through a curriculum chosen according to the student's interest.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The certificate program can be completed on a full- or part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the assistant program director for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* March 1

Applications are processed on a continual basis. Ordinarily, the applicant is informed of an admissions decision within four to six weeks of receipt of all supporting application documents. Late applications may be considered for admission.

International students should note that the certificate does not fulfill the F-1 visa requirement for full-time coursework. International students already enrolled in a PSM or other graduate program at Temple may enroll in the certificate program, in addition to their current program, with approval from their program's graduate advisor.

*APPLY ONLINE to this graduate program.*

**Coursework Required for Admission Consideration:** Applicants should have a strong background in Biology, Chemistry, Engineering or

Physics. Upon review, the Biology Department's Graduate Committee may allow departures from course requirements.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in a science or engineering field is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in the Biotechnology certificate, research goals, and academic and professional achievements.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
Select four or five courses, as appropriate, from the following: <sup>1</sup> 12		
BIOL 5479	Biotechnology	
BIOL 5501	Analytical Biotechnology	
BIOL 5502	Microbial Biotechnology	
BIOL 5503	Biotechnology Laboratory I	
BIOL 5504	Biotechnology Laboratory II	
BIOL 5505	Ethics Regulation and Policy in Biotechnology	
BIOL 5521	Nucleic Acid Technologies	
<b>Total Credit Hours</b>		<b>12</b>

1

Four courses are required if all courses are taken for 3 credits. These include BIOL 5479, BIOL 5502, BIOL 5503, BIOL 5504, and BIOL 5505. Five courses are taken if BIOL 5501 Analytical Biotechnology (1.5 s.h.) and BIOL 5521 Nucleic Acid Technologies (1.5 s.h.) are selected.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Computer Science

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Computer Science.

### About the Certificate

The graduate certificate in Computer Science is designed to meet the professional needs of individuals in the workforce who require advanced training and advanced competencies in computer science. Students who complete the certificate program have the option of enrolling in the Computer Science MS (p. 908) program and having their coursework in which they earned a grade of "B" or higher count toward the master's degree.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The certificate program can be completed on a full- or part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the graduate administrative coordinator for more information.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Computer Science by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

### Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

### Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
CIS 5511	Programming Techniques	3
Three additional courses at or above CIS 5500		9
<b>Total Credit Hours</b>		<b>12</b>

## Graduate Certificate: Computer Science Instruction

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Computer Science Instruction.

## About the Certificate

The graduate certificate in Computer Science Instruction is intended to provide a pathway for in-service mathematics and science teachers to quickly develop the necessary skill set to teach computer science at the secondary level. This certificate consists of four courses that can be completed in four continuous academic terms. The content covered in the courses aligns with the Program Design and Development and the Programming Language sections of the *Praxis*® Computer Science (5652) Subject Test.

Upon successful completion of the certificate, students are able to demonstrate knowledge of the foundational ideas of computer science as part of a creative and/or problem-solving process. In addition, teachers are equipped with knowledge of pedagogical strategies for broadening participation of underrepresented groups in computer science and have developed a portfolio of instructional materials that can be used to teach computer science concepts in secondary education classrooms. Teachers who are already certified to teach in secondary education are prepared to take the *Praxis*® Computer Science (5652) Subject Test

required by the Pennsylvania Department of Education for certification to teach Computer Science in Pennsylvania public schools.

No course in the certificate program can be taken for credit toward any graduate program offered by the Department of Computer and Information Sciences.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate is completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the graduate administrative coordinator for more information.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Computer Science Instruction by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University. The certificate program is not open, however, to applicants who have completed a bachelor's degree in computer science, information science and technology, or related majors.

**Other Requirement:** Applicants must be certified by the Commonwealth of Pennsylvania in secondary education or must obtain the permission of the program director to enroll.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
CIS 5701	Introduction to Teaching Computer Science Principles	3
CIS 5702	Teaching Advanced Computer Science Principles	3
CIS 5703	Teaching Networked Computing Systems	3
CIS 5704	Teaching the Use of Data, Algorithms, and Creativity for Problem Solving	3
<b>Total Credit Hours</b>		<b>12</b>

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Graduate Certificate: Cyber Defense and Information Assurance

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Cyber Defense and Information Assurance.

## About the Certificate

The graduate certificate program in Cyber Defense and Information Assurance (CyberDIA) is designed for aspiring technical professionals at all career levels—entry-level, mid-career and senior executives—who want to equip themselves with skills necessary to protect their organization and the nation from increasing cyber threats. The multidisciplinary program design borrows knowledge, skills and expertise from different academic disciplines, including business, computer and information sciences, electrical and computer engineering, and law. The key focus is on a holistic cybersecurity framework, i.e., one that is built around the core principles of preventive, detective and corrective security mechanisms. While the CyberDIA curriculum is technology intensive, focusing on network security and digital forensics, it also bridges the ever-increasing gap between cybersecurity technology and cybersecurity policies. Students take 12 credits of the core curricular classes of the CyberDIA MS program to complete the certificate.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program.

Please contact the graduate administrative coordinator for more information.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Cyber Defense and Information Assurance by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
CIS 5017	Operating Systems and Architecture <sup>1</sup>	3
or CIS 5512	Operating Systems	
CIS 5107	Computer Systems Security and Privacy	3
CIS 5405	Introduction to Digital Forensics <sup>2</sup>	3
CIS 5415	Ethical Hacking and Intrusion Forensics <sup>2</sup>	3
<b>Total Credit Hours</b>		<b>12</b>

1

With advisor recommendation and approval, students take CIS 5017 or CIS 5512.

2

With advisor approval, students who have taken "Introduction to Digital Forensics" and/or "Ethical Hacking and Intrusion Forensics" at the undergraduate level may take an alternate approved course(s) at the master's level.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Graduate Certificate: Forensic Chemistry

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Forensic Chemistry.

## About the Certificate

The graduate certificate in Forensic Chemistry provides advanced academic credentials for the working professional seeking training beyond the baccalaureate degree. The certificate program is designed to introduce students to a portfolio of knowledge and experience that enables them to tackle problems in forensic, environmental and other areas of chemistry. Other objectives include providing:

- a theoretical understanding of major concepts in forensic chemistry;
- a range of practical skills in forensic chemistry; and
- knowledge and skills applicable to academia, industry and government.

The certificate program in Forensic Chemistry includes core requirements in current topics in data analysis; forensic chemistry; and law, ethics and policy. Annual symposia are held wherein leaders in the field of forensic science present on current topics and developments in the field of forensics and forensic chemistry. Courses may be conducted as hands-on training in a modular forensic chemistry laboratory.

**Campus Location:** Main, Ambler

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the program director for more information.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Forensic Chemistry by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for

Certificate Program," found in TUportal under the Tools tab within "University Forms."

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 13

*Required Courses:*

Code	Title	Credit Hours
CHEM 5108	Investigative Chemistry	4
CHEM 8001	Leadership, Law and Ethics in Forensic Science	3
Select two from the following: <sup>1</sup>		6
CHEM 8007	Biotransformation of Drugs and Xenobiotics	
CHEM 8107	Advanced Forensic Chemistry	
CHEM 8111	Forensic Toxicology	
CHEM 8310	Special Topics in Analytical Chemistry	
CHEM 8601	Analytical Separations	
<b>Total Credit Hours</b>		<b>13</b>

<sup>1</sup>

With advisor approval, students may substitute an alternate graduate-level course for one of the five courses listed.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: High-Performance Computing for Scientific Applications

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in High-Performance Computing for Scientific Applications.

### About the Certificate

The graduate certificate in High-Performance Computing for Scientific Applications is designed to serve working professionals who need academic credentials for career advancement. Students are introduced to a portfolio of knowledge and experience that enables them to tackle problems using high-performance computing by:

- obtaining a fundamental understanding of the mathematical foundations and structure of numerical methods and parallel computing;
- becoming proficient in using hardware, algorithms and programming;
- effectively applying high-performance computing to a variety of real-world problems, across multiple application fields; and
- gaining knowledge and skills applicable to academia, industry and government.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the graduate chairperson for more information.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in High-Performance Computing for Scientific Applications by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

### Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

### Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 13-14<sup>1</sup>

*Required Courses:*

Code	Title	Credit Hours
MATH 5061	Fundamentals of Computer Programming for Scientists and Engineers	4
MATH 5062	High Performance Computer Programming for Scientific Modeling	3
MATH 5063	Introduction to High-Performance Computing Technology for Scientists	4

MATH 5066	Mathematical Methods for High Performance Computing	3
-----------	---	---

**Total Credit Hours** 14

1

Students may replace any *one* course on the list with a graduate-level course approved by the advisor. If a 3-credit graduate course is substituted for a 4-credit core course, then the certificate may be completed in 13 credits.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Mathematics for Teaching

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Mathematics for Teaching.

## About the Certificate

Mathematics forms the base for all areas of science. However, there is a shortage of qualified mathematics teachers in Pennsylvania and nationwide. The U.S. Department of Education Office of Postsecondary Education documents a shortage of both middle- and secondary-level mathematics teachers in Pennsylvania. See <https://www2.ed.gov/about/offices/list/ope/pol/bteachershortageareasreport201718.pdf>.

The Mathematics Department offers a graduate certificate in mathematics education for teachers to help those with undergraduate degrees in related fields develop their mathematical knowledge and expertise in order to better equip them to teach in a middle or secondary mathematics or science classroom. The content covered in the 12-credit program aligns with the Standards for Mathematical Practice set forth in the Common Core State Standards Initiative. At the completion of the program, students have a better understanding of the theory beneath the topics they will teach their future students.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the graduate chairperson for more information.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Mathematics

for Teaching by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
Select four from the following:		12
MATH 5011	Algebra and Functions for Teaching	
MATH 5012	Introduction to Mathematical Modeling for Teaching	
MATH 5013	Geometry for Teaching	
MATH 5014	Probability Theory and Applications for Teaching	
MATH 5017	Number Theory and Proof for Teaching	
<b>Total Credit Hours</b>		<b>12</b>

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Graduate Certificate: Scientific Writing

COLLEGE OF SCIENCE AND TECHNOLOGY

Learn more about the graduate certificate in Scientific Writing.

## About the Certificate

In science, the ability to write clearly and succinctly is a skill in demand by organizations as diverse as nonprofit organizations, pharmaceutical companies and news outlets. The graduate certificate in Scientific Writing enables students with diverse backgrounds in science, technology, engineering and mathematics (STEM) currently employed in those areas to enhance and broaden their skills for their professional advancement. The certificate is a collaborative effort of the College of Science and Technology and the Lew Klein College of Media and Communication.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the program director for more information.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Scientific Writing by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12 or 13

*Required Courses:*

Code	Title	Credit Hours
Select four from the following:		12-13
BIOL 5505	Ethics Regulation and Policy in Biotechnology <sup>1</sup>	
BIOL 5522	Introduction to Scientific and Regulatory Writing <sup>1</sup>	
BIOL 5532	Introduction to Grant Writing <sup>1</sup>	
BIOL 5533	Communicating Science to a Broader Audience / Non-Scientists <sup>1</sup>	
JRN 5710	Seminars in Communication <sup>1,2</sup>	
<b>Total Credit Hours</b>		<b>12-13</b>

1

With approval from the advisor, students may request to waive any one core course and replace it with an alternate course that aligns with the goals of the certificate.

2

With approval from the advisor, students may take a graduate-level Journalism course other than JRN 5710.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## School of Sport, Tourism and Hospitality Management

Our industries are rooted in deep professional networks, first-class service and access to opportunities. So are we, the School of Sport, Tourism and Hospitality Management (STHM) at Temple University. STHM is the largest provider of tourism, hospitality, sport and recreation management education in the Philadelphia region and an international model for innovative teaching and research. Through classroom instruction, experiential learning and executive education, we prepare talented professionals and scholars for rewarding careers.

Temple University began its long and distinguished record of professional preparation in the fields of recreation, sport, tourism and hospitality in 1908, when courses were offered in playground supervision through its Physical Education program. By the 1950s, Temple was offering programs in recreation education at both the undergraduate and graduate levels. In 1973, a curriculum in Recreation and Leisure Studies was established. The bachelor's degree in Sport and Recreation Management was first accredited in 1978 by the Council on Accreditation of Parks, Recreation, Tourism and Related Professions (COAPRT). As a result, Temple University was one of the first to have its programs accredited through the National Recreation and Park Association (NRPA).

STHM is ideally located in Philadelphia, one of the nation's largest cities and a living laboratory for the sport, recreation, tourism and hospitality industries. As a premier destination for visitors from around the world, Philadelphia is home to 14,000 Center City hotel rooms; more than 6,000 restaurants; a thriving and growing casino and gaming scene; the Pennsylvania Convention Center; and countless attractions such as Independence Hall, the Liberty Bell, the National Constitution Center, the Philadelphia Museum of Art, and the Philadelphia Zoo. The city provides innumerable opportunities for applied learning with access to all five major sports through the Eagles, Flyers, Phillies, Sixers, and Union, as well as a host of major national and international sporting events such as the Army-Navy game, March Madness basketball, U.S. Olympic trials, and the X-Games. Philadelphia also has one of the country's most active parks and recreation departments and the world's largest urban park in Fairmount Park.

The mission of STHM is to:

- enrich the tourism, hospitality, recreation and sport industries by fostering diversity and inclusion;
- meet the leadership needs of the tourism, hospitality, recreation and sport industries by providing quality, student-centered, professional preparation programs;
- advance knowledge in tourism, hospitality, recreation and sport by conducting high-level research;
- enhance the tourism, hospitality, recreation and sport management professions by offering quality service to relevant organizations; and
- educate the Temple University community about the significance of tourism, hospitality, recreation and sport in today's multicultural society by offering courses in general education, collaborating with other faculty on joint research projects, and serving on relevant committees.

## Graduate Programs and Certificates

- Hospitality Management MS (p. 945)
- Sport Business MS (p. 945)

- Sport Business Executive Program MS (p. 947)
- Travel and Tourism MS (p. 947)
- Graduate Certificate: Destination Management (p. 947)

- Graduate Certificate: Service Excellence (p. 949)
- Graduate Certificate: Tourism Analytics (p. 950)

## Graduate Faculty

*Bradley J. Baker*, Assistant Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, Temple University.

*Daniel C. Funk*, Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, The Ohio State University.

*Gareth J. Jones*, Assistant Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, North Carolina State University.

*Jeremy S. Jordan*, Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, The Ohio State University.

*R. Aubrey Kent*, Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, The Ohio State University.

*Thilo Kunkel*, Associate Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, Griffith University.

*Lindsey Lee*, Assistant Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, University of Houston.

*Xiang Li*, Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, Texas A and M University.

*Lu Lu*, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, University of Washington.

*Joseph Mahan III*, Associate Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, University of Maryland College Park.

*Chihyung Michael Ok*, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, Kansas State University.

*Wesley S. Roehl*, Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, Texas A and M University.

*Elizabeth Taylor*, Assistant Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, University of Tennessee.

*Luorong Wu*, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, The Pennsylvania State University.

*Yang Yang*, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, University of Florida.

## Hospitality Management MS

SCHOOL OF SPORT, TOURISM AND HOSPITALITY MANAGEMENT

### About the Program

This program is not accepting applications for the 2023-2024 academic year.

## Sport Business MS

SCHOOL OF SPORT, TOURISM AND HOSPITALITY MANAGEMENT

Learn more about the Master of Science in Sport Business.

### About the Program

The goal of the Master of Science in Sport Business program is to prepare future leaders in the areas of policymaking, management, supervision, education and research. The program provides for the analysis of current trends, problems and policies that affect sport and leisure services. Designed to provide a multifaceted approach to the study of sport business, the program is structured to prepare students for a wide range of career opportunities in athletic administration, marketing and promotions, recreation and event management, and sport analytics.

Students interested in studying at the doctoral level should refer to the PhD program in Business Administration with a concentration in Tourism and Sport offered by Fox School of Business and Management.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main and Online

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Study Abroad:** Students who wish to do their internships abroad work closely with the Center for Student Professional Development, which assists with the necessary contacts and supervision.

**Areas of Specialization:** Four areas of concentration are offered:

- Athletics Administration
- Recreation and Event Management
- Sport Analytics
- Sport Marketing and Promotions

**Job Prospects:** Students typically find placement in campus recreation, college athletics, parks and recreation, professional sports, sport governing bodies, stadium and arena management, and youth sport.

**Financing Opportunities:** Students are automatically considered for merit scholarships from the School of Sport, Tourism and Hospitality Management (STHM) at the time of admission. Scholarships are awarded on the basis of a student's academic history and professional experience.

Teaching and Research Assistantships within STHM are reserved for students who are capable of teaching undergraduate classes in specialized academic areas or assisting in faculty research. Graduate Externships are also available in a variety of areas around the university. Only admitted students may be awarded assistantships and externships.

Teaching Assistants (TAs), Research Assistants (RAs), and Graduate Externs (GEs) are expected to provide between 5 and 20 hours per week of service throughout the academic year. A nine-month stipend and partial or full (up to 9 credits) tuition remission for the Fall and Spring terms are offered for TAs and RAs, depending on the number of hours worked. GEs receive a stipend only. Applications for assistantships and externships are not evaluated until a Graduate School application and all appropriate materials have been received. The evaluation of applicants for Teaching and Research Assistantships and Graduate Externships begins by March and continues until all positions have been filled.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:*

- December 15 – Early Admissions Deadline
- March 1 – Priority Scholarship Deadline and International Deadline
- June 30 – Final Application Deadline

Applications are processed as they arrive through the deadline. Late applications may be considered for admission if space is available.

APPLY ONLINE to this STHM graduate program.

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with academic competence and/or past or current work supervisors.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

**Statement of Goals:** In 500 words or less, describe your short-term and long-term professional goals. Explain how this program will help you attain those goals.

### Standardized Test Scores:

GRE/GMAT: Required. Individuals may qualify for a GRE/GMAT waiver based on academic or professional history. Consult an admissions advisor with any questions.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- Duolingo: 110
- PTE Academic: 68

**Resume:** Current resume or CV required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the program. The credits must be equivalent to coursework offered in the Master of Science in Sport Business and cannot have been used to complete another degree either at Temple University or another institution. The grade must be a "B" (3.0 GPA) or better in order to transfer. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 36

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
SRM 5201	Sport Finance	3
SRM 5202	Sport Economics	3
SRM 5212	Legal Issues in Sport and Recreation	3
SRM 5215	Sport Marketing	3
SRM 5216	Strategic Management in Sport and Recreation	3
SRM 5218	Equity, Inclusion, and Ethics in Sport Business	3
STHM 5111	Applied Research	3
Select courses from the following totaling 9-12 credits: <sup>1</sup>		9-12
Athletics Administration Concentration		
SRM 5217	Sport Facility Management	
SRM 5225	Sport Sponsorship and Sales	
SRM 5231	Compliance in Intercollegiate Athletics	
SRM 5232	Fundraising and Development	
SRM 5233	Governance and Policy in Intercollegiate Athletics	
SRM 5234	Student-Athlete Affairs in Intercollegiate Athletics	
Any SRM or STHM Elective <sup>2</sup>		
Recreation and Event Management Concentration		
SRM 5217	Sport Facility Management	
SRM 5232	Fundraising and Development	
SRM 5235	The Business of Recreation	
SRM 5241	Evaluation of Programs and Events	
SRM 5242	Business of Non-Profit Organizations	
SRM 5243	Event Management	
SRM 5252	Sport for Development	
Any SRM or STHM Elective <sup>2</sup>		
Sport Analytics Concentration		
SRM 5251	Introduction to Sport Analytics	
SRM 5253	Applied Sport Analytics	
SRM 5254	Advanced Sport Data Analysis and Visualization	
SRM 5256	Professional Portfolio in Sport Analytics	
Any SRM or STHM Elective <sup>2</sup>		
Sport Marketing and Promotions Concentration		
SRM 5225	Sport Sponsorship and Sales	
SRM 5226	Consumer Behavior in Sport and Recreation	
SRM 5227	Sport Media and Communication	
Any SRM or STHM Elective <sup>2</sup>		

### Capstone Course

Select courses from the following totaling 3-6 credits: <sup>3</sup>		6-3
SRM 5285	Graduate Internship in Sport and Recreation	
STHM 9995	Master's Project	
STHM 9996	Master's Thesis	

**Total Credit Hours** **36**

1

Students electing to earn an optional concentration must complete 12 credits in any combination from the concentration courses identified for that concentration. To have a concentration designated on their transcript, students must declare the concentration with the Manager of Graduate Student Services.

2

Any SRM or STHM course at the 5000 level or higher is considered an elective.

3

Students who choose to take 6 credits of capstone courses take 9 credits of electives. Students who take 3 credits of capstone courses are required to complete 12 credits of electives.

### Culminating Event:

#### Capstone Course:

Students select a capstone course to complete the MS in Sport Business. As best fits their individualized program, they choose from SRM 5285 Graduate Internship in Sport and Recreation, STHM 9995 Master's Project and STHM 9996 Master's Thesis:

- SRM 5285 utilizes a field placement with emphasis on acquisition and application of practical skills. The student completes a total of 180 contact hours in cooperation with an agency and under supervision of both the University internship coordinator and the agency-designated supervisor.
- STHM 9995 is an option for students who do not need to undertake an internship. Students currently working in the field who seek a master's degree to gain a promotion should not be required to find additional work outside their active employment to complete an internship. Instead, such students can complete a project related to their specific field of interest.
- STHM 9996 is also offered as an option for any student who may opt to write a thesis, for example, in anticipation of pursuit of a doctoral degree.

## Graduate Certificate: Service Excellence

SCHOOL OF SPORT, TOURISM AND HOSPITALITY MANAGEMENT

Learn more about the graduate certificate in Service Excellence.

## About the Certificate

Great service is not merely a customer benefit: it is a competitive differentiator in any industry. The courses in the Service Excellence graduate certificate program leverage today's leading customer service strategies to prepare the student to establish a culture of service excellence that raises the standard of service for an organization, business unit, division or team.

Through the Service Excellence graduate certificate program, students learn to assess the market needs for the service provided by their organization and develop the leadership competencies required to create a consistent culture of empowerment and continuous improvement that will inspire exceptional service every time, everywhere.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate is completed on a part-time basis. **Graduate Certificate: Tourism Analytics**

SCHOOL OF SPORT, TOURISM AND HOSPITALITY MANAGEMENT

Learn more about the graduate certificate in Tourism Analytics.

**About the Certificate**

The graduate certificate in Tourism Analytics is designed for those who enjoy looking at the details and are driven by a desire to extrapolate the value of the tourism industry.

**Campus Location:** Online

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis.

**Admission Requirements and Deadlines**

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Apply for this certificate program at <https://apply.temple.edu/FOX/Account/Create>.

**Certificate Requirements**

*Number of Credits Required to Complete the Certificate:* 9

*Required Courses:*

Code	Title	Credit Hours
STAT 5001	Quantitative Methods for Business	3
THM 5321	Tourism Analytics	3
THM 5328	Tourism Economics and Policy	3
<b>Total Credit Hours</b>		<b>9</b>

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Academic Programs

Temple University's Board of Trustees meets regularly to consider recommendations to establish, terminate or change academic programs. To see the full list of academic programs by school and college, including programs that have been terminated, please read Temple's Policy on Establishing, Restructuring and Terminating Academic Programs.

The following Academic Programs Chart lists Temple University's active degrees, majors, minors and certificates alphabetically, along with the school or college that grants each degree, major, minor and certificate.

Students should be aware that, while all programs cannot be completed on all campuses, courses in many programs are offered on multiple campuses. To learn what specific courses are offered on which campuses in a given semester, refer to the Class Schedule.

Major	A cohesive combination of courses including introductory, intermediate, and advanced coursework that designates a student's primary area of study. Academic programs may include required or optional concentrations. An undergraduate major is typically 36-76 credit hours of the total degree. Majors are designated on university transcripts when the degree is awarded.
Minor	A designated combination of courses in a discipline or area of study. Like the major, it is expected to have coherence and increasing sophistication. A minor is typically 18-24 credit hours (or approximately half of the major) and is outside of, but may complement, the discipline of a student's major. A school/college can determine if a minor is restricted to students in specific schools, colleges or majors and can include rules as to how certain courses can be used to meet requirements. Minors are designated on university transcripts when the degree is awarded.
Concentration	A coordinated grouping of courses, typically 18-24 credits in an undergraduate program of study and 6-12 credits in a graduate program, representing a sub-specialization or emphasis within a major field available for students majoring in that discipline. Concentrations may be offered at the undergraduate, graduate, or professional level and can be required or optional. Concentrations are designated on university transcripts when the degree is awarded.
Certificate	A designated combination of courses in an area of study, typically requiring 9-15 credits. A certificate is outside of, but may complement, the discipline of a student's major. It may also be offered to non-degree seeking students. Certificates can be established at the undergraduate, graduate or professional level. A school/college can determine if a certificate is restricted to students in specific schools, colleges or majors and can include rules as to how certain courses can be used to meet requirements. For matriculated undergraduates, a certificate is designated on university transcripts when the degree is awarded. For graduate students, a certificate may be conferred upon completion and prior to degree conferral. For nonmatriculated students, the certificate is designated on university transcripts and conferred upon completion.

## Academic Programs Chart: Degrees, Majors, Minors, Certificates

Asterisks (\*) and carets (^) denote multiple option areas (emphasis/concentration) within a program.

Degree Programs (emphasis)	Undergraduate	Graduate	Professional	School/College
Accomplished Teaching		MSEd (p. 187)		ED
Accountancy		MAcc (p. 87)		BU
Accounting	BBA, Minor			BU
Accounting (Data Analytics)	BBA			BU
Accounting and Financial Management		MS (p. 90)		BU
Acting	Cert.			CA
Actuarial Science	BBA	MS (p. 90)		BU
Adult and Organizational Development	BA, Minor			ED
Advanced Biotherapeutics: Manufacturing and Regulatory Affairs		MS (p. 730)		PH
Advanced Core Science Studies	Postbacc. Cert.			ST
Advanced Education in General Dentistry			Cert. (p. 168)	DN
Advanced Manufacturing and Robotics		Cert. (p. 324)		EN

Advanced Regulatory Affairs and Quality Assurance		Post-Master's Cert. (p. 769)	PH

Ancient Mediterranean Studies	Minor		LA
Anthropology	BA, Minor	MA (not currently accepting applications) (p. 368), PhD (not currently accepting applications) (p. 368)	LA
Applied Behavior Analysis	Cert.	MSEd (p. 191), Cert. (p. 265)	ED
Applied Biostatistics		MPH (p. 789)	HP
Applied Epidemiology	Minor		HP
Applied Mathematics	BS		ST
Applied Physical Activity and Health Promotion		MS (not currently accepting applications) (p. 792)	HP
Applied Research and Evaluation		PSM (p. 192)	ED
Applied Sociology		PSM (not currently accepting applications) (p. 368)	LA
Arabic	Cert., Minor		LA
Architecture (Advanced Technologies and Design*, Health and Design*, Urban Ecologies and Design*)	BSArch	MArch (p. 39), MS* (p. 43)	TA
Art	BA (active in Japan), Minor		TA
Art Education	BSEd	MEd (p. 46)	TA
Art History	BA, Minor	MA (p. 48), PhD (p. 51)	TA
Art Therapy	BA		TA
Asian Business and Society	Cert.		LA
Asian Law		LLM (p. 333)	LW

Asian Studies	BA, Minor		LA
Astrophysics	Cert., Minor		ST
Athletic Training		MSAT (p. 792), DAT (p. 795)	HP
Audio and Live Entertainment	BA		CO
Autism Endorsement		Cert. (p. 267)	ED
Basic Core Science Studies	Postbacc. Cert.		ST
Basic Pharmaceutical Development		Cert. (p. 756)	PH
Biochemistry	BS		ST
Bioengineering		MSBioe (p. 286), PhD (p. 290)	EN
Bioengineering (Cellular Engineering)	BSBioe		EN
Bioengineering (Engineering Devices)	BSBioe		EN
Bioengineering (Pre-Health)	BSBioe		EN
Bioinformatics		PhD (p. 883), Cert. (p. 933)	ST
Bioinformatics and Biological Data Science (Bioinformatics, Biological Data Science)		PSM (p. 886)	ST
Bioinnovation		PSM (p. 888), Cert. (p. 934)	ST
Biologics and Biosimilars Manufacturing		Cert. (p. 756), Post-Master's Cert. (p. 771)	PH
Biologics and Biosimilars: Regulatory Aspects		Cert. (p. 758), Post-Master's Cert. (p. 772)	PH
Biology	BA, BS, Minor	MA (p. 891), MS (p. 893), PhD (p. 894)	ST
Biology with Teaching	BS		ST
Biology/Neuroscience		PhD	ST
Biomedical Anthropology	Minor		LA
Biomedical Sciences (Cancer Biology and Genetics*, General Biomedical Sciences^, Infectious Disease and Immunity*, Molecular and Cellular Biosciences*, Neuroscience*, Organ Systems and Translational Medicine*)		MS (thesis)* (p. 457), MS (non-thesis)^ (p. 457), PhD* (p. 460)	ME
Biopharmaceutical Manufacturing and Regulatory Affairs		Cert. (p. 759), Post-Master's Cert. (p. 773)	PH
Biophysics	BS		ST
Biotechnology		PSM (p. 897), Cert. (p. 935)	ST
Business	Minor		BU

Business Administration (Business Analytics [STEM]*, Finance [STEM]*, Health Sector Management*, Human Resource Management*, Information Systems and Digital Innovation*, Information Technology Management [STEM]*, Innovation Management and Entrepreneurship*, Marketing Management*, Sport Business*, Strategic Management*		MBA* (p. 92), Cert. (not currently open for enrollment) (p. 151)	BU
Business Administration Executive Program		MBA (p. 117), DBA (p. 119)	BU
Business Administration/ Accounting		PhD (p. 97)	BU
Business Administration/ Entrepreneurship		PhD (not currently accepting applications) (p. 98)	BU
Business Administration/ Finance		PhD (p. 99)	BU
Business Administration/ Human Resource Management and Organizational Behavior		PhD (p. 100)	BU
Business Administration/ Interdisciplinary Study		PhD (not currently accepting applications) (p. 102)	BU
Business Administration/ International Business Administration		PhD (p. 102)	BU
Business Administration/ Management Information Systems		PhD (p. 104)	BU
Business Administration/ Marketing		PhD (p. 106)	BU
Business Administration/ Operations and Supply Chain Management		PhD (p. 108)	BU
Business Administration/Risk Management and Insurance		PhD (p. 111)	BU
Business Administration/ Strategic Management		PhD (p. 113)	BU
Business Administration/ Tourism and Sport		PhD (p. 115)	BU
Business Analytics	Minor	MS* (p. 121), Cert. (p. 151)	BU
Business Basics	Cert.		BU
Business Economics		MA (applications to first be accepted for Fall 2025 admission) (p. 368)	LA
Business Law		Juris Doctor Cert. (p. 351)	LW
Business Management	BBA		BU
Business Plus	Cert.		BU
Business Research		MS (p. 123)	BU
Career and Technical Education	BSEd	MEd (p. 194), MSEd (p. 197)	ED

Career and Technical Education/Business, Computer and Information Technology Education	BSEd		ED
Career and Technical Education/K-12		Cert. (not currently open for enrollment)	ED
Career and Technical Education/Marketing Education	BSEd		ED
Ceramics (Art Education*)	BFA, Conc.*	MFA (p. 54)	TA
Ceramics with Entrepreneurial Studies	BFA		TA
Chamber Music	Cert.		BC
Chemistry	BA, BS, BS/MS (5 year), Minor	MS (p. 898), PhD (p. 900)	ST
Chemistry with Teaching	BS		ST
Children's Media	Cert.		CO
Chinese	BA, Cert., Minor		LA
Choral Conducting		MM (p. 475)	BC
City and Regional Planning (Sustainable Community Planning*, Transportation Planning*)	Minor	MS* (p. 56)	TA
Civil Engineering	BSCE	MSCE (p. 293), PhD (p. 297)	EN
Civil Engineering (Cooperative Education Program)	BSCE		EN
Civil Engineering (Environmental Engineering with Cooperative Education Program)	BSCE		EN
Civil Engineering (Environmental Engineering)	BSCE		EN

Landscape Architecture (Horticulture*)	BS, Conc.*	MLArch (p. 66)	TA
Landscape Plants	Cert.		TA
Landscape Studies	Minor		TA
Language and Cross-Cultural Communication	Cert.		LA
Latin American Studies	BA, Minor, Cert.		LA
Law		JD (p. 336), SJD (p. 339)	LW
Leadership	Minor		CO
Leadership and Military Science	Cert.		ED
Leadership in Instructional Technology for Higher Education		Cert. (p. 278)	ED
Legal Education		LLM (not currently open for enrollment) (p. 341)	LW
Legal Studies	BBA, Minor		BU
Lesbian, Gay, Bisexual and Transgender Studies	Minor		LA
Liberal Arts		MLA (p. 395)	LA
Liberal Studies	BA		LA
Linguistics	Cert.		HP
Management (TU Japan)		MiM (p. 144)	BU
Management Career	Cert.		LA
Management Consulting		Cert. (not currently open for enrollment) (p. 158)	BU
Management Information Systems	BBA, Minor, Cert.	MS (not currently accepting applications) (p. 145)	BU
Marketing	BBA, Minor		BU
Marketing Research and Analytics		MS (not currently accepting applications) (p. 145)	BU
Materials Science	BS		ST
Maternal and Child Health		Cert. (p. 875)	HP
Mathematical Economics (CLA)	BA		LA

Mathematical Economics (CST)	BA		ST
Mathematics (Applied and Computational Mathematics*)	BA, BS, BA/MS (5 year), BS/MS (5 year), Minor	MS* (p. 922), PhD (p. 924)	ST
Mathematics Education/7-12		Cert. (not currently open for enrollment)	ED
Mathematics and Computer Science	BS		ST
Mathematics and Computer Science with Teaching	BS		ST
Mathematics and Physics	BS		ST
Mathematics and Technology with Teaching	BS		ST
Mathematics for Teaching		Cert. (p. 941)	ST
Mathematics with Teaching	BS		ST
Mechanical Engineering	BSME	MSME (p. 318), PhD (p. 321)	EN
Mechanical Engineering (Cooperative Education Program)	BSME		EN
Mechanical Engineering Technology	BSMET		EN
Media Arts	Cert.		CA
Media Studies and Production		MA (p. 445)	CO
Media Studies and Production (Media Analysis, International Communication*)	BA, Conc.*		CO
Media Studies and Production (Media Business, International Communication*)	BA, Conc.*		CO
Media Studies and Production (Media Production, International Communication*)	BA, Conc.*		CO
Media and Communication		PhD (p. 443)	CO
MediaXarts: Cinema for New Technologies and Environments		MA (p. 713)	CA
Medical Device		Cert. (p. 764), Post-Master's Cert. (p. 778)	PH
Medicine		MD (p. 463)	ME
Medicine Combination		PhD/MD	ME
Metals/Jewelry/CAD-CAM (Art Education*)	BFA, Conc.*	MFA (p. 70)	TA
Metals/Jewelry/CAD-CAM with Entrepreneurial Studies	BFA		TA
Middle Grades Education/4-8		Cert. (not currently open for enrollment)	ED
Middle Grades Education/ Language Arts	BSEd	MEd (p. 223)	ED
Middle Grades Education/ Mathematics	BSEd	MEd (p. 225)	ED
Middle Grades Education/ Mathematics and Language Arts	BSEd	MEd (p. 227)	ED

Middle Grades Education/ Mathematics and Science	BSEd	MEd (p. 229)	ED
Middle Grades Education/ Science	BSEd	MEd (p. 231)	ED
Middle Grades Education/ Science and Language Arts	BSEd	MEd (p. 233)	ED
Middle Grades Education/ Social Studies	BSEd	MEd (p. 235)	ED
Middle Grades Education/ Social Studies and Language Arts		MEd (p. 237)	ED
Middle Grades Education/ Social Studies and Mathematics		MEd (p. 239)	ED
Middle Grades Education/ Social Studies and Science		MEd (p. 241)	ED
Mobile Application Development	Cert.		ST
Music (Composition*, Music Studies*, Music Theory*, Musicology*)	BS, Minor, Cert.	MA (p. 497), MS (p. 499), PhD* (p. 501)	BC
Music Composition	BM, Cert.	MM (p. 506)	BC
Music Education (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM*	MM (p. 509), PhD (p. 512)	BC
Music Education/Jazz (Bassoon, Cello, Clarinet, Double Bass, Euphonium, Flute, French Horn, Guitar, Harp, Oboe, Percussion, Piano, Saxophone, Trombone, Trumpet, Tuba, Viola, Violin, Voice)	BM		BC
Music History (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM*, Cert.	MM (p. 516)	BC
Music Performance (Bassoon, Cello, Clarinet, Classical Guitar, Double Bass, Euphonium, Flute, French Horn, Harp, Harpsichord, Oboe, Percussion, Piano, Saxophone, Trombone, Trumpet, Tuba, Viola, Violin, Voice)	BM, Cert., Diploma		BC

Music Performance (Classical BM Guitar)			BC
Music Performance (Harpichord)	BM		BC
Music Performance (Piano)	BM		BC
Music Performance (Voice)	BM		BC
Music Performance/Bassoon		MM (p. 519), DMA (p. 585)	BC
Music Performance/Cello		MM (p. 522), DMA (p. 590)	BC
Music Performance/Clarinet		MM (p. 525), DMA (p. 594)	BC
Music Performance/Classical Guitar		MM (p. 529)	BC
Music Performance/Double Bass		MM (p. 532), DMA (p. 599)	BC
Music Performance/Euphonium		MM (p. 535), DMA (p. 603)	BC
Music Performance/Flute		MM (p. 539), DMA (p. 608)	BC
Music Performance/French Horn		MM (p. 542), DMA (p. 612)	BC
Music Performance/Harp		MM (p. 545), DMA (p. 616)	BC
Music Performance/Harpichord		MM (p. 548)	BC
Music Performance/Historical Keyboard		DMA (p. 621)	BC
Music Performance/Oboe		MM (p. 552), DMA (p. 625)	BC
Music Performance/Percussion		MM (p. 555), DMA (p. 630)	BC
Music Performance/Piano		MM (p. 559), DMA (p. 634)	BC
Music Performance/Saxophone		MM (p. 562)	BC
Music Performance/Trombone		MM (p. 566), DMA (p. 638)	BC
Music Performance/Trumpet		MM (p. 569), DMA (p. 643)	BC
Music Performance/Tuba		MM (p. 572), DMA (p. 647)	BC
Music Performance/Viola		MM (p. 575), DMA (p. 652)	BC
Music Performance/Violin		MM (p. 579), DMA (p. 656)	BC
Music Performance/Voice		MM (p. 582), DMA (p. 661)	BC
Music Teaching		Cert. (p. 701)	BC
Music Technology	BS, Cert.	MS (p. 665)	BC
Music Technology (Interdisciplinary Studies)	BS		BC
Music Theory (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM*	MM (p. 668)	BC
Music Theory (Jazz)	Cert.		BC
Music Theory (Traditional)	Cert.		BC

Music Therapy (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM*	MMT (p. 671), PhD (p. 675)	BC
Music Therapy/Jazz (Bassoon, Cello, Clarinet, Double Bass, Euphonium, Flute, French Horn, Guitar, Oboe, Percussion, Piano, Saxophone, Trombone, Trumpet, Tuba, Viola, Violin, Voice)	BM		BC
Musical Theater	BFA		CA
Musical Theater Collaboration (Bookwriting, Composing/Lyricist, Directing)		MFA (applications accepted every 3 years with next admission for Fall 2025) (p. 715)	CA
Narrative Medicine		Cert. (p. 470)	ME
Native Perennial Garden Design	Cert.		TA
Natural Sciences	Minor		ST
Natural Sciences (Biology)	BA, BS		ST
Natural Sciences (Chemistry)	BA, BS		ST
Natural Sciences (Earth and Environmental Sciences)	BA, BS		ST
Natural Sciences (Physics)	BA, BS		ST
Neuromotor Science		MS (p. 828), PhD (p. 830)	HP
Neuroscience		Cert. (p. 430)	LA
Neuroscience Research	Minor		LA
Neuroscience: Cellular and Molecular	BS		ST
Neuroscience: Systems, Behavior and Plasticity	BS	MS (p. 397)	LA
New Product Development		Cert. (p. 327)	EN
Non-Profit Management		Cert. (p. 431)	LA
Nursing (Adult-Gerontology Primary Care Nurse Practitioner*, Family and Individual Across the Lifespan Nurse Practitioner*, Health Systems Leadership*)	BSN	DNP* (p. 833)	HP
Nutrition	Minor	MPH (p. 837), Cert. (p. 876)	HP
Occupational Therapy		OTD (p. 840)	HP
Occupational Therapy Transitional Program		OTD (p. 843)	HP
Opera		MM (p. 678)	BC
Oral Health Sciences		MS (p. 164)	DN
Oral and Maxillofacial Surgery		Cert. (p. 174)	DN
Orchestral Music	Cert.		BC
Organizational Leadership	Minor	Cert. (p. 158)	BU
Orthodontics		Cert. (p. 176)	DN

Painting (Art Education*)	BFA, Conc.*	MFA (p. 71)	TA
Painting with Entrepreneurial Studies	BFA		TA
Performing Arts	Cert.		BC
Periodontics		Cert. (p. 179)	DN
Pharmaceutical Labeling, Advertising and Promotions		Cert. (p. 765), Post-Master's Cert. (p. 779)	PH
Pharmaceutical Manufacturing: Process Development and Analysis		Cert. (p. 766), Post-Master's Cert. (p. 780)	PH
Pharmaceutical Regulatory Sciences		MS (p. 734)	PH
Pharmaceutical Sciences	BS		ST
Pharmaceutical Sciences/Medicinal Chemistry		MS (p. 735), PhD (p. 741)	PH
Pharmaceutical Sciences/Pharmaceutics		MS (p. 737), PhD (p. 743)	PH
Pharmaceutical Sciences/Pharmacodynamics		MS (p. 739), PhD (p. 746)	PH
Pharmaceutical Sciences/Regulatory Affairs and Quality Assurance		PhD (p. 748)	PH
Pharmacy		PharmD (p. 751)	PH
Philosophy	BA, Minor	MA (p. 398), PhD (p. 399)	LA
Photography (Art Education*)	BFA, Conc.*	MFA (p. 73)	TA
Photography with Entrepreneurial Studies	BFA		TA
Physical Therapy		DPT (p. 845)	HP
Physician Assistant		MMS (p. 465)	ME
Physics	BA, BS, BA/MS, BS/MS, Minor	MS (p. 927), PhD (p. 929)	ST
Physics with Teaching	BS		ST
Piano Pedagogy	BM (not currently open for enrollment)	MM (p. 681)	BC
Piano Performance and Music Theory		MM (p. 684)	BC
Piano Performance/Collaborative Piano and Chamber Music		MM (p. 688)	BC
Piano Performance/Piano Pedagogy		MM (p. 692)	BC
Play Therapy		Cert.	UC
Podiatric Medicine		DPM (p. 784)	PM
Police Leadership		Cert. (not currently open for enrollment) (p. 432)	LA
Policy and Organizational Studies (Adult and Organizational Development, Higher Education, Urban Education)		PhD (p. 243)	ED
Political Economy	Cert.		LA
Political Science	BA, Minor	MA (p. 402), PhD (p. 403)	LA
Portuguese	Minor		LA
Printmaking (Art Education*)	BFA, Conc.*	MFA (p. 75)	TA
Printmaking with Entrepreneurial Studies	BFA		TA

Professional Health Education (The Scholarship of Teaching and Learning in Health-Based Instruction*)		MSEd* (p. 245), Cert. (p. 279)	ED
Professional Studies (Brass, Cello, Classical Guitar, Double Bass, Historical Keyboard Instruments, Opera, Percussion, Piano, Viola, Violin, Voice, Woodwinds)		Cert. (p. 704)	BC
Professional Writing	Cert.		LA
Prosthodontics		Cert. (p. 181)	DN
Psychological Research		MS (p. 407)	LA
Psychological Studies (active in Japan)	BA, Minor		LA
Psychology (Quantitative Methods*)	BA, Minor	MA (not open for direct admission) (p. 409), PhD* (p. 409)	LA
Psychology/Neuroscience		PhD	LA
Public Health	BS, Minor		HP
Public Health Data Science		MS (p. 848)	HP
Public Health Law Research		Cert. (p. 877)	HP
Public Health Preparedness and Response		Cert. (p. 878)	HP
Public Policy	Minor	MPP (p. 412), Cert. (p. 432)	LA
Public Relations (International Communication*)	BA, Conc.*, Minor	Cert. (p. 451)	CO
Quantitative Finance and Risk Management		MS (p. 145)	BU
Real Estate	BBA, Minor	MS (not currently accepting applications) (p. 148), Cert. (not currently open for enrollment) (p. 159)	BU
Recreational Therapy	BS	MS (p. 850)	HP
Regulatory Affairs and Quality Assurance		MS (p. 754)	PH
Religion	BA, Minor	MA (p. 414), PhD (not currently accepting applications) (p. 416)	LA
Risk Management and Insurance (Healthcare Risk Management)	BBA		BU
Risk Management and Insurance (Human Capital Risk)	BBA	MS (not currently accepting applications) (p. 148)	BU
Risk Management and Insurance (Managing Corporate Risk)	BBA		BU
Sales	Minor		BU
School Psychology		MEd (not open for direct admission) (p. 247), EdS (p. 248), PhD (p. 249)	ED
Science Education/7-12		Cert. (not currently open for enrollment)	ED

Science and Technology Writing	Cert.		ST
Scientific Writing		PSM (p. 930), Cert. (p. 942)	ST
Screen Studies	Cert., Minor		CA
Sculpture (Art Education*)	BFA, Conc.*	MFA (p. 77)	TA
Sculpture with Entrepreneurial Studies	BFA		TA
Secondary Education/English Education	BSEd	MEd (p. 252)	ED
Secondary Education/Mathematics Education	BSEd	MEd (p. 254)	ED
Secondary Education/Science Education		MEd (p. 256)	ED
Secondary Education/Social Studies Education	BSEd	MEd (p. 258)	ED
Secondary Education/World Languages Education	BSEd		ED
Secondary Education/World/Foreign Languages Education		MEd (p. 259)	ED
Service Excellence		Cert. (p. 949)	TH
Social Science Research	Cert.		LA
Social Studies Education/7-12		Cert. (not currently open for enrollment)	ED
Social Work	BSW	MSW (p. 861)	SW
Social and Behavioral Sciences		MPH (p. 853), PhD (p. 857)	HP
Sociology	BA, Minor	MA (p. 418), PhD (p. 420)	LA
Sociology of Health	Minor		LA
Spanish	BA, Minor, Cert.	MA (p. 423), PhD (p. 424)	LA
Spanish and Latin American Studies for Business	Cert.		LA
Spanish and Latinx Studies for Health and Human Services Professions	Cert.		LA
Spanish for Health Professions		Cert. (p. 434)	LA
Special Education		MEd (p. 261)	ED
Special Education (Pre-K-12)	BSEd		ED
Specialized Studies in Science and Mathematics	Post-Secondary Cert.		UC
Speech, Language and Hearing Science	BA	MA (p. 865)	HP
Sport Business (Athletics Administration, Recreation and Event Management, Sport Analytics, Sport Marketing and Promotions)		MS (p. 945)	TH
Sport Business Executive Program		MS (not currently accepting applications) (p. 947)	TH
Sport Management	Cert., Minor		TH
Sport Marketing	Cert.		TH

Sport and Recreation Management (Esports*, Event Management*, Governance and Policy*, Sport and Recreation Promotion*)	BS*		TH
Sports Media	Cert.		CO
Sports and Society	Cert.		LA
Stage Management	Cert.		CA
Statistical Science and Data Analytics	BS, Minor		BU
Statistics		MS (not open for direct admission) (p. 148), PhD (p. 148)	BU
Statistics and Data Science		MS (not currently accepting applications) (p. 151)	BU
Sterile Process Manufacturing		Cert. (p. 767), Post-Master's Cert. (p. 781)	PH
Stormwater Management		Cert. (p. 327)	EN
Strategic Communication and Cross-Cultural Leadership		Cert. (p. 452)	CO
String Pedagogy		MM (p. 696)	BC
Student Affairs Leadership		Cert. (p. 280)	ED
Superintendency		Cert. (p. 281)	ED
Supply Chain Management	BBA, Minor		BU
Sustainability	Cert.		UC
Sustainable Community Planning		Cert. (p. 79)	TA
Sustainable Food Systems	Cert., Minor		TA
Taxation		MS (p. 342) LLM (p. 341)	LW
Teaching Art Education		Post-Master's Cert. (p. 81)	TA
Teaching English to Speakers of Other Languages		MSEd (p. 264)	ED
Teaching in Higher Education		Cert. (p. 281)	ED
Teaching in Higher Education for the Creative Disciplines		Cert. (p. 282)	ED
Technical Production and Management	BFA		CA
Theater (Acting*, Design and Production*, Directing*)	BA*, Minor		CA
Theater Education	Cert.		CA
Theater Instruction		MA (p. 724), Cert. (p. 727)	CA
Theater and Community Engagement	Cert.		CA
Theater/Acting		MFA (applications accepted every 3 years with next admission for Fall 2025) (p. 718)	CA
Theater/Design		MFA (p. 719)	CA
Theater/Directing		MFA (applications accepted every 3 years with next admission for Fall 2025) (p. 721)	CA

Theater/Playwriting		MFA (applications accepted every 3 years with next admission for Fall 2025) (p. 723)	CA
Tourism Analytics		Cert. (p. 950)	TH
Tourism and Hospitality Management (2+2 program, active in Japan)	BS		TH
Tourism and Hospitality Management (Destination Management*, Event Management*, Hospitality Operations*)	BS*, Cert., Minor		TH
Transnational Law		LLM (p. 343)	LW
Transportation Planning		Cert. (p. 80)	TA
Travel and Tourism		MS (not currently accepting applications) (p. 947)	TH
Trial Advocacy		LLM (p. 344)	LW
Trial Advocacy and Litigation		Juris Doctor Cert. (p. 353)	LW
Urban Bioethics		MA (p. 468), Cert. (p. 471)	ME
Urban Education		Cert. (p. 283)	ED
Validation Sciences		Cert. (p. 768), Post-Master's Cert. (p. 782)	PH
Virtual Media Management	BA		CO
Visual Anthropology	Minor		LA
Visual Studies	BA		TA
Vocal Arts		MM (p. 698)	BC
Voice and Speech for the Actor	Cert.		CA
World/Foreign Languages Education/K-12		Cert. (not currently open for enrollment)	ED

## Key for Schools and Colleges

BC	Esther Boyer College of Music & Dance in the Center for the Performing & Cinematic Arts
BU	Fox School of Business & Management
CA	School of Theater, Film & Media Arts in the Center for the Performing & Cinematic Arts
CO	Lew Klein College of Media & Communication
DN	Maurice H. Kornberg School of Dentistry
ED	College of Education & Human Development
EN	College of Engineering
HP	College of Public Health
LA	College of Liberal Arts
LW	Beasley School of Law
ME	Lewis Katz School of Medicine
PH	School of Pharmacy
PM	School of Podiatric Medicine
ST	College of Science & Technology
SW	School of Social Work
TA	Tyler School of Art & Architecture
TH	School of Sport, Tourism & Hospitality Management
UC	University College
US	University Studies

## Degree Symbols and Classifications

AA	Associate in Arts
AS	Associate in Science
BA	Bachelor of Arts
BA/MA	Five-year Bachelor's and Master's Program
BA/MS	Five-year Bachelor's and Master's Program
BBA	Bachelor of Business Administration
BFA	Bachelor of Fine Arts
BGS	Bachelor of General Studies
BM	Bachelor of Music
BS	Bachelor of Science
BS/MA	Five-year Bachelor's and Master's Program
BS/MS	Five-year Bachelor's and Master's Program
BSArch	Bachelor of Science in Architecture
BSBioe	Bachelor of Science in Bioengineering
BSCE	Bachelor of Science in Civil Engineering
BSCET	Bachelor of Science in Construction Engineering Technology
BSEng	Bachelor of Science in Engineering
BSEd	Bachelor of Science in Education
BSEnvE	Bachelor of Science in Environmental Engineering
BSEE	Bachelor of Science in Electrical Engineering
BSET	Bachelor of Science in Engineering Technology
BSHIM	Bachelor of Science in Health Information Management
BSISE	Bachelor of Science in Industrial and Systems Engineering
BSME	Bachelor of Science in Mechanical Engineering
BSMET	Bachelor of Science in Mechanical Engineering Technology
BSN	Bachelor of Science in Nursing
BSW	Bachelor of Science in Social Work
DAT	Doctor of Athletic Training
DBA	Doctor of Business Administration
DMA	Doctor of Musical Arts
DMD	Doctor of Dental Medicine
DNP	Doctor of Nursing Practice
DPM	Doctor of Podiatric Medicine
DPT	Doctor of Physical Therapy
DS	Doctor of Science
EdD	Doctor of Education
EdS	Education Specialist
JD	Juris Doctor (first professional degree for law)
LLM	Master of Laws (further specialization after J.D. degree)
MA	Master of Arts
MAcc	Master of Accountancy
MArch	Master of Architecture
MBA	Master of Business Administration
MD	Doctor of Medicine
MEd	Master of Education
MEng	Master of Engineering
METM	Master of Engineering Technology Management
MFA	Master of Fine Arts
MHA	Master of Health Administration
MiM	Master in Management
MJ	Master of Journalism

MLA	Master of Liberal Arts
MLArch	Master of Landscape Architecture
MM	Master of Music
MMS	Master of Medical Science
MMT	Master of Music Therapy
MOT	Master of Occupational Therapy
MPH	Master of Public Health
MPP	Master of Public Policy
MS	Master of Science
MSAT	Master of Science in Athletic Training
MSBioe	Master of Science in Bioengineering
MSCE	Master of Science in Civil Engineering
MSEd	Master of Science in Education
MSEE	Master of Science in Electrical Engineering
MSEnvE	Master of Science in Environmental Engineering
MSME	Master of Science in Mechanical Engineering
MSW	Master of Social Work
MTHM	Master of Tourism and Hospitality Management
OTD	Clinical Doctorate in Occupational Therapy
PhD	Doctor of Philosophy
PharmD	Doctor of Pharmacy
PSM	Professional Science Master's
SJD	Doctor of Juridical Science

# Course Descriptions

---

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

- Accounting (ACCT) (p. 977)
- Actuarial Science (AS) (p. 984)
- Adult and Organizational Development (AOD) (p. 987)
- Advanced Core Medical Science (ACMS) (p. 990)
- Advanced Education (ADVE) (p. 991)
- Advertising (ADV) (p. 992)
- Africology and African American Studies (AAAS) (p. 993)
- Anatomy & Cell Biology (Medical School) (ANAT) (p. 998)
- Anesthesiology (ANES) (p. 999)
- Anthropology (ANTH) (p. 999)
- Applied Behavior Analysis (ABA) (p. 1008)
- Architecture (ARCH) (p. 1010)
- Art (ART) (p. 1021)
- Art - Japan Campus (ARTU) (p. 1031)
- Art Education (ARTE) (p. 1031)
- Art History (ARTH) (p. 1034)
- Art Therapy (ARTT) (p. 1041)
- Athletic Training (ATHT) (p. 1042)
- Basic Core Medical Science (BCMS) (p. 1046)
- Bioengineering (BIOE) (p. 1046)
- Biology (BIOL) (p. 1051)
- Biomedical Sciences (Medicine) (BMSC) (p. 1065)
- Biomedical Studies (PBMS) (p. 1073)
- Business Administration (BA) (p. 1074)
- Business Education (BSED) (p. 1088)
- Career and Technical Education (CTE) (p. 1089)
- Chemistry (CHEM) (p. 1093)
- City and Regional Planning (CTRP) (p. 1099)
- Civil Engineering (CEE) (p. 1108)
- Clinical Sciences and Health Informatics (CSHI) (p. 1119)
- College of Liberal Arts (CLA) (p. 1119)
- College of Public Health & School of Social Work (CHP) (p. 1120)
- College of Science and Technology (SCTC) (p. 1120)
- Communication Management (CMGT) (p. 1121)
- Communication Sciences and Disorders (CSCD) (p. 1124)
- Community Arts (CART) (p. 1130)
- Community Health and Aging (PCHA) (p. 1131)
- Computer and Information Science (CIS) (p. 1132)
- Conflict and Communication (CNCM) (p. 1146)
- Counseling Psychology (CPSY) (p. 1147)
- Criminal Justice (CJ) (p. 1152)
- Dance (DANC) (p. 1158)
- Dental Public Health Sciences (DPHS) (p. 1170)
- Dermatology (DERM) (p. 1172)
- Disability Studies (DSST) (p. 1172)
- Distributive Education (DSED) (p. 1174)
- Early Childhood Education (ECED) (p. 1174)
- Earth and Environmental Science (EES) (p. 1175)
- Economics (ECON) (p. 1181)
- Education (EDUC) (p. 1189)
- Educational Administration (EDAD) (p. 1203)
- Educational Psychology (EPSY) (p. 1213)
- Electrical Engineering (ECE) (p. 1217)
- Elementary Education (ELED) (p. 1228)
- Emergency Medicine (EMMD) (p. 1229)
- Engineering (ENGR) (p. 1230)
- Engineering Management (EMGT) (p. 1234)
- English (ENG) (p. 1237)
- English Education (Elementary) (ENEE) (p. 1244)
- English Education (Secondary) (ENES) (p. 1244)
- Environmental Health (ENVH) (p. 1246)
- Epidemiology and Biostatistics (EPBI) (p. 1248)
- Family & Community Medicine (FAMP) (p. 1256)
- Film and Media Arts (FMA) (p. 1257)
- Finance (FIN) (p. 1267)
- Foreign Language Education (Secondary) (FLED) (p. 1278)
- Gender, Sexuality and Women's Studies (GSWS) (p. 1279)
- Geography and Urban Studies (GUS) (p. 1280)
- Globalization and Development Communication (GDC) (p. 1292)
- Graduate Advanced Education and General Dentistry (ADVG) (p. 1293)
- Graduate Endodontic (ENDG) (p. 1293)
- Graduate Orthodontics (ORTG) (p. 1296)
- Graduate Periodontics (PERG) (p. 1301)
- Graphic Arts and Design (GAD) (p. 1304)
- Health Information Management (HIM) (p. 1312)
- Health Policy and Management (HPM) (p. 1317)
- Health Related Professions (HRPR) (p. 1322)
- Healthcare Management (HCM) (p. 1325)
- Higher Education (HIED) (p. 1330)
- History (HIST) (p. 1335)
- Horticulture (HORT) (p. 1344)
- Human Resource Management (HRM) (p. 1345)
- Human Services (HS) (p. 1350)
- Instructional Learning Technology (ILT) (p. 1351)
- Internal Medicine (INTM) (p. 1352)
- International Business Administration (IB) (p. 1358)
- International Teaching Assistants (ITA) (p. 1359)
- Journalism (JRN) (p. 1360)
- Juridical Science (JUSI) (p. 1365)

## Accounting (ACCT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ACCT 5001. Accounting for Managerial and Investment Analysis and Planning. 3 Credit Hours.**

This course presents the concepts of financial and managerial accounting with a "user" (investor or manager) orientation. The course has three parts. The first part provides the accounting cycle and the reporting process, with an emphasis on the valuation bases and structure of the financial statements. The second part focuses on the interpretation and analyses of the financial statements, including analyses of cash flows and cross-sectional and time-series trends in financial ratios. The role of managerial accounting choices in determining the nature of financial reporting and quality of earnings is also examined. The third part examines the role of accounting information for managerial planning and control. Costing for inventory and pricing, cost-volume-profit analyses, and budgeting issues are covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5003. Financial Accounting. 3 Credit Hours.**

This is an introductory course, and there is no expectation that students should possess prior accounting knowledge. The course will introduce you to the fundamental concepts of financial accounting. Financial accounting information is produced, in accordance with generally accepted accounting principles (GAAP), to report the operations of an entity to external users, for example, suppliers, customers, and investors. We will focus on the accounting cycle, the structure of the financial statements, and profitability analysis. In addition, we will discuss recent changes in the reporting environment and contemporary reporting issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5004. Managerial Decision Making Using Accounting Information. 1 to 3 Credit Hour.**

You will learn how to do the following: measure and evaluate performance so as to design incentive mechanisms; estimate the profitability of your branches, products, and customers; make capital investment decisions; design budgets and identify what went wrong or right; and synthesize business strategy with accounting information systems. The focus is on understanding how to use accounting data, rather than how to generate it.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ACCT 5003.

**ACCT 5101. Financial Accounting Theory. 3 to 4 Credit Hours.**

This course provides intensive study of financial accounting theory and generally accepted accounting principles. Areas emphasized are income measurement, valuation of tangible and intangible assets, and accounting for liabilities and shareholders' equity. Proper financial statement presentation and disclosure are covered in detail. This course is also designed to reinforce fundamental concepts in recording business transactions and representing them in financial reports for external constituents and internal managers. It also includes an understanding of financial ratios and other tools to analyze financial statements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302)

**ACCT 5102. Advanced Financial Accounting. 3 Credit Hours.**

This course continues the study of financial accounting begun in Acct 5101. Topics include: income tax allocation, pensions, leases, statement of changes in financial position, inflation accounting, foreign currency translation. Approximately one-half of course devoted to business combinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302)

**ACCT 5107. Accounting for Third Party Reimbursements. 3 Credit Hours.**

Concepts and structure of third-party payment environments are examined for their implications on healthcare institutions. Cost finding and analysis techniques for management application are emphasized. Relationships between rate setting and payment are also studied.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302) and HCM 5101.

**ACCT 5108. Acct in an ERP Environment. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5111. Concepts and Analysis of Financial Statements. 3 Credit Hours.**

Analysis of business enterprise through financial statements, concepts, and analysis of related data. Emphasis on the user's point of view. Structured to maximize student's ability to use and analyze financial statements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302)

**ACCT 5112. Federal Taxation. 2 to 3 Credit Hours.**

This course provides an introduction to the concepts and logic underlying federal income tax law. Emphasis is on the determination of income and allowable deductions for business entities (corporations, partnerships, sole proprietorships) and individuals. The course introduces tax planning concepts and includes the study of how taxation impacts business and personal decision making. The course also integrates some financial accounting and finance theory with federal tax law.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302)

**ACCT 5121. Budgeting, Planning and Forecasting. 3 Credit Hours.**

Successful enterprises utilize strategic planning to achieve short, intermediate and long-term goals. This course will focus on budgeting concepts and methodologies. Fixed budgets, flexible budgets, manufacturing budgets and variance analysis will be significant components of this course. Forecasting techniques, such as analysis of the factors that affect planning and achieving strategic goals will also be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5123. Auditing Theory and Practice. 3 Credit Hours.**

In this course, students study professional auditing standards and ethics, internal control, gathering and documentation of audit evidence, a detailed analysis of auditing procedures applied to major balance sheet and income statement accounts, and the preparation of the auditor's report. Statistical sampling and EDP concepts as they relate to auditing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ACCT 5101.

**ACCT 5125. Applied Data Driven Decision Making. 3 Credit Hours.**

A wide variety of data warehouse appliances are available for analyzing business data. This course will provide a hands-on experience with one or more industry popular software packages including the use of advanced Excel modeling techniques. It will provide an understanding of the principal characteristics and functions of accounting information systems and gains an appreciation of the IT controls that should be in place for the major areas of business activity. The impact of the Sarbanes-Oxley and the necessary controls for various IT systems are examined in detail. Basic concepts of business intelligence and data analytics in a contemporary business environment are examined. The course also provides an introduction to data visualization and design principles for creating meaningful displays of quantitative and qualitative data to facilitate managerial decision-making. Students will work on case studies built on the Excel suite - Power BI, Power Query, DAX. Visualization (Tableau) and SQL students will take a hands-on, case-based approach to learning. Students will discuss and work with current tools and techniques appropriate for use in the following areas: big data, data visualization, robotic process automation, artificial intelligence and other emerging technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5126. Strat Use Equity Comp. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5127. International Financial Reporting Standards (IFRS). 1 to 3 Credit Hour.**

In this course students will develop an understanding of international accounting and International Financial Reporting Standards (IFRS). Students will describe and apply accounting and reporting for significant differences between U.S. GAAP and IFRS. The course will enhance and apply critical thinking skills to key IFRS reporting standards as compared to U.S. GAAP.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5170. Special Topics. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302)

**ACCT 5180. Special Topics. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302)

**ACCT 5182. Independent Study. 1 to 6 Credit Hour.**

Study in particular aspects of accounting under the direct supervision of a graduate faculty member. No more than six semester hours of independent study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 5190. Special Topics - Accounting. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 5201. Advanced Studies in Financial Reporting. 3 Credit Hours.**

This course covers generally accepted accounting principles for business enterprises and governmental and nonprofit organizations. It will cover the concepts and standards for financial statements. Pedagogy will include extensive use of accounting case studies. Typical items to be discussed will include recognition, measurement, valuation, and presentation of various elements in financial statements in conformity with GAAP.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5202. Enterprise Systems and Data Analytics. 3 Credit Hours.**

This course provides an understanding of the principal characteristics and functions of accounting information systems and gains an appreciation of the IT controls that should be in place for the major areas of business activity. The impact of the Sarbanes-Oxley and the necessary controls for various IT systems are examined in detail. Basic concepts of business intelligence and data analytics in a contemporary business environment are examined. The course also provides an introduction to data visualization and design principles for creating meaningful displays of quantitative and qualitative data to facilitate managerial decision-making.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5203. Professional Skills Development. 1 to 4 Credit Hour.**

This course is designed to impart important communication and professional skills. Students will focus on personal development of specific abilities that are instrumental for effective communication in professional positions. Students will focus on the development of specific skills, such as communication (written and oral), team building, and leadership, technology and Excel proficiency.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5204. Advanced Auditing and Assurance Services. 3 Credit Hours.**

This course is designed to prepare students to successfully plan and perform various attestation services. This course will cover the generally accepted auditing standards and procedures, forensic accounting and fraud and include contemporary issues in auditing. Pedagogy will include extensive use of case studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5205. Advanced Federal Taxation. 3 Credit Hours.**

This course focuses on advanced topics in the income taxation of corporations and flow-through business entities (partnerships, subchapter S corporations, limited partnerships, etc.) including formation, allocations, distributions, redemptions, reorganizations and terminations. Additional advanced topics covered include: the personal holding company tax, issues related to brother-sister corporations, penalties for improper accumulation of surplus and consolidated tax returns. The course will develop skills in identifying and researching issues in taxation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5206. Law Ethics & Regulations. 3 Credit Hours.**

This course provides an introduction to the legal and regulatory framework in which businesses and individuals operate. The course covers the basics of business law (agency, contracts, debtors, creditors, etc.) and the general business environment (business structures, management rights and responsibilities, the requirements of the Sarbanes-Oxley Act, etc.).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5207. Concepts and Analysis of Financial Statements. 3 Credit Hours.**

This course focuses on how users of financial statements incorporate accounting data into their financial evaluation. The course will use ratios and other tools to measure profitability and risk. The course will also examine techniques for forecasting future earnings performance as inputs in models of equity valuation. Students will analyze a major US corporation in parallel with class material and will achieve an awareness of current financial reporting issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5208. Strategic Technology and Performance Management. 3 Credit Hours.**

This course provides an overview of the key concepts necessary to understand the role of information technology in business, the impact of economy-wide changes on financial performance, the analysis and implementation of competitive strategy, and systems to control and enhance performance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5209. Taxes & Business Strategy. 2 Credit Hours.**

This course examines tax strategies associated with business decisions. The material focuses on a conceptual framework for integrating tax planning into the decision-making process and applying tax planning tools and techniques to business and investment activities, including savings vehicles, business entity choice, financial statement analysis, executive compensation, capital structure, mergers and acquisitions, and international tax planning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5211. Advanced Data Analytics and Innovation in Accounting. 3 Credit Hours.**

This course investigates advanced topics in data analytics and innovation in accounting technology. Students will take a hands-on, case-based approach to learning. Students will discuss and work with current tools and techniques appropriate for use in the following areas: big data, data visualization, robotic process automation, artificial intelligence and other emerging technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ACCT 5202.

**ACCT 5282. Independent Study. 1 to 3 Credit Hour.**

Study in particular aspects of accounting under the direct supervision of a graduate faculty member. No more than six semester hours of independent study may be counted toward degree requirements

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in (ACCT 5004, ACCT 5402, or ACCT 5302)

**ACCT 5287. Colloquium on Current Issues in Accounting Practice. 1 to 3 Credit Hour.**

Students attend and participate in forums, seminars and conferences on current issues in accounting practice. Professionals from public accounting and industry will speak on topics of current interest in accounting, auditing and income taxes. The Colloquia will be spread throughout the three semesters of the MAcc program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 5411. Financial and Managerial Accounting in Decision Making. 3 Credit Hours.**

This course introduces students to the fundamentals of financial accounting and managerial accounting in the context of decision making. Financial accounting provides an organization's investors and creditor's information they need to make decisions. Financial accounting information is produced, in accordance with generally accepted accounting principles (GAAP). Managerial accounting information is produced in response to specific management needs. Managerial accounting reports the results of operations of an entity consistent with the needs of internal users (managers, supervisors, etc.). The first part of this course focuses on the financial information reported in the financial statements, and basic financial statement analysis. The second part of the course focuses on decision making based on accounting data, and learning basic accounting tools.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5601. Identifying and Managing Cross-Enterprise Risks. 3 Credit Hours.**

Enterprise Risk Management (ERM) is an integrated process of identifying, assessing, and managing the overall risks of an organization. It leverages integrated governance practices, internal controls, and measurement and reporting systems to manage risk while maximizing shareholder value. This course will explore ERM elements used to identify, assess, manage, and monitor key risks including articulating risk appetites, developing policies and procedures, conducting risk assessments, implementing internal controls, and reporting to management and the board. Students will use case assignments to examine risk assessment and management practices at various organizations and apply risk management tools and techniques to evaluate and make recommendations. Topics will include business aspects (strategic disrupters), control mechanisms (COSO ERM standards), government considerations (statutory and regulatory concerns), and ethical frameworks IMA, AICPA, ACCA).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5611. Applied Management Accounting I. 1.5 Credit Hour.**

This course explores Part One of the standardized CMA exam. Topics include, but are not limited to Financial Planning, Performance and Analytics and the candidate's Body of Knowledge pertaining to external financial reporting decisions, planning, budgeting and forecasting, performance management, cost management, internal controls, technology and analytics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5612. Applied Management Accounting II. 1.5 Credit Hour.**

This course explores Part Two of the standardized CMA exam. Topics include, but are not limited to Financial Management topics and test a candidate's body of knowledge with regard to: financial statement analysis, corporate finance, decision analysis, risk management, investment decisions, professional ethics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5801. Fin Info Reporting & Analysis. 3 Credit Hours.**

This course helps you solidify your knowledge of accounting systems and financial information reporting procedures. You'll increase your comprehension of financial reports and of the practical applications of accounting theories and concepts through in-depth discussion of real-world situations, involving revenue recognition, inventory valuation, intangible assets and reporting for leases.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5802. Strategic Cost Analysis for Enterprise Management. 3 Credit Hours.**

Enterprise performance management, analyzing actual financial results against the master budget, is a critical component for providing feedback. The course will focus on cost and variance measures, responsibility centers and reporting segments and performance measures. Additionally, the course will cover cost management considerations including the triple bottom line, balanced scorecard, measurement concepts, costing systems, overhead costs (and allocation), supply chain management concerns and business process improvement. You will advance your ability to use accounting principles and concepts to make better day-to-day business decisions as you examine cost behavior, variable margin, cost-volume-profit relationships, budgeting, break-even and incremental analysis. You will also learn to use capital budgeting and discounted cash flows to determine the acceptability of investment alternatives from a cost/resource perspective.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACCT 5882. Independent Study. 1 to 6 Credit Hour.**

Study in particular aspects of accounting under the direct supervision of a graduate faculty member. No more than six semester hours of independent study may be counted toward degree requirements

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in ACCT 5801.

**ACCT 5890. Special Topics. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 9001. Interdisciplinary Accounting Research. 3 Credit Hours.**

The seminar will focus on research methods in contemporary auditing research including the role of corporate governance. It may also include other areas such as not for profit or taxation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 9002. Seminar in Financial Accounting Theory. 3 Credit Hours.**

The seminar focuses on current methodological issues in financial accounting research. In-depth analysis of empirical tests of financial accounting theories. Implications for future research are emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 9003. Seminar in Research Methods - Accounting. 3 Credit Hours.**

The seminar focuses on research methods in areas such as Auditing, Managerial Accounting, or Taxation, and may also include behavioral studies in these areas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 9011. Proseminar in Accounting. 1 to 3 Credit Hour.**

This course is designed to investigate a variety of research methods in accounting. Students become familiar with critically reading and analyzing research methodologies used in different papers presented at the department workshops. Through this process, students learn to use what they had learned in previous course(s) and critically read and evaluate empirical research papers in theoretical and empirical areas.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Business Administration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 9090. Seminar - Special Topics in Accounting. 1 to 6 Credit Hour.**

This course is designed to investigate a variety of research methods in accounting. Students become familiar with critically reading and analyzing research methodologies used in different papers presented at the department workshops. Through this process, students learn to use what they had learned in previous course(s) and critically read and evaluate empirical research papers in theoretical and empirical areas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACCT 9183. Directed Study in Accounting. 1 to 6 Credit Hour.**

Supervised individual reading and research projects. Often associated with a seminar in which papers on a variety of topics are presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Actuarial Science (AS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**AS 5001. Actuarial Probability. 3 Credit Hours.**

The course discusses probability theory and its application to insurance and risk management problems. Topics covered include: probability laws, combinatorics, conditional probability and independence, Bayes' Theorem, discrete and continuous random variables, common discrete and continuous distributions and their applications, multivariate discrete random variables, distribution of order statistics, linear combinations of independent random variables, and basic insurance concepts of deductibles, coinsurance, benefit limits, and inflation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5015. Introduction to Actuarial Spreadsheets and Programming. 1 Credit Hour.**

The course introduces students to the use of spreadsheets and to the fundamentals of programming, as these skills are becoming crucial for entry-level actuarial positions. Topics covered include managing workbooks, preparing workbooks for collaboration, cell filling, formatting, data validation, advanced conditional formatting and filtering, logical operations in formulas, advanced lookups, advanced date and time functions, data analysis through what-if analysis and forecasting, formula troubleshooting, advanced charting, Pivot Tables, Pivot Charts, create and modify macros, and an introduction to programming concepts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5022. Actuarial Statistics. 3 Credit Hours.**

The course covers advanced probability concepts and the fundamentals of mathematical statistics, as well as their insurance applications. Topics include multivariate continuous distribution, sampling and central limit theorem, estimation methods, construction of confidence interval, hypothesis testing, analysis of variance, and analysis of categorical data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5101. Theory of Interest. 3 Credit Hours.**

This course covers one of the foundational concepts of actuarial science: the time value of money. Students learn about simple, compound, and effective interest rates, and use them to calculate present values and future values of all forms of deterministic cash flows, both discrete and continuous. These techniques are then applied to value annuities, loans, stocks, and bonds. The course also includes a thorough discussion of interest rate risk, how it can be measured, and how insurers can mitigate this risk through asset-liability management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5102. Long-Term Actuarial Modeling. 3 Credit Hours.**

The heart of the traditional actuarial science curriculum, this course examines the pricing of life insurance products by integrating concepts from probability and interest theory. It introduces random variables measuring the future lifetime of a person - from distributions or life tables - and the present values of life insurance and life annuity products, in both discrete-time and continuous-time settings. Students learn to calculate and interpret the mean, variance, and probability functions for these random variables. In addition, students learn to determine actuarially fair premiums and reserves for long-term insurance products. Prior to fall 2022, the course title was "Actuarial Modeling I."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in AS 5101 (may be taken concurrently)

**AS 5103. Advanced Long-Term Actuarial Modeling. 3 Credit Hours.**

The course introduces Markov Chains to extend the pricing and reserving concepts of AS 5102 to multiple lives (e.g. life insurance for a married couple or business partners) and multiple decrements (e.g. modeling different health statuses). The course also includes actuarial applications to pension valuation and profit testing, as well as embedded options in life insurance and annuity products. Prior to fall 2022, the course title was "Actuarial Modeling II."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in AS 5102.

**AS 5104. Short-Term Actuarial Modeling. 3 Credit Hours.**

Focusing on short-term actuarial modeling, the course introduces a variety of frequency, severity, and aggregate loss models. Students learn to select suitable models for a given data set, to parameterize the models to the data, to assess the predictive quality of the models through various measures of confidence, and to estimate losses using credibility theory. Pricing and reserving techniques for short-term insurance products will also be discussed. Prior to fall 2022, the course title was "Actuarial Modeling III."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5105. Actuarial Economics. 3 Credit Hours.**

This course develops the conceptual framework of microeconomics and macroeconomics with some applications in actuarial science. Topics in microeconomics include interaction between supply and demand, consumer behavior, production choices, different types of competition, factor markets, and market failure. Topics in macroeconomics include business cycles, inflation, unemployment, monetary and fiscal policy, balance of payments, international economics, and economic growth.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5106. Actuarial Corporate Finance. 2 Credit Hours.**

This course introduces students to the fundamental principles of accounting and corporate finance, from an actuarial perspective. It covers basic accounting principles and regulations, financial statements, investment decision making, the risk-return trade-off, capital structure, long-term financing and investment risk. This provides students with an understanding of how (insurance) companies and financial markets function. The course develops the conceptual framework for corporate finance from an actuarial perspective. Topics include capital budgeting, project analysis, efficient market hypothesis, capital asset pricing model, cost of capital, behavioral finance, capital structure, equity financing and debt financing. Prior to fall 2022, the course title was "Corporate Finance for Actuarial Science."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in AS 5101 (may be taken concurrently)

**AS 5108. Actuarial Analytics. 3 Credit Hours.**

Predictive analytics is a key component of actuarial work. It helps improve solutions to traditional actuarial problems such as forecasting mortality, setting loss reserves, predicting policyholder behavior, and establishing classification ratemaking schemes. Actuaries also use these techniques for improving insurance operations through data-driven decision-making. This course introduces students to statistical learning and linear models, with a focus on applying these tools to actuarial business decisions in an insurance or consulting environment. Topics covered include types of modeling problems, methods of assessing model accuracy, exploratory data analysis, exponential family of distributions, parameter estimation, diagnostic tests of model fit and assumptions, model selection and interpretation, calculation of predicted values and confidence/prediction intervals in the context of ordinary least squares regression, k-nearest neighbors, and generalized linear models. In addition, the course aims to enhance students' programming skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5114. Advanced Short-Term Actuarial Modeling. 3 Credit Hours.**

Building on AS 5104, the course continues the discussion of short-term actuarial modeling. It introduces students to advanced frequency, severity, and aggregate claim models, as well as concepts of pricing and reserving. Topics covered include commonly used severity, frequency distributions, aggregate risk models, coverage modifications, construction and selection of parametric models, estimate losses using advanced credibility procedures, and pricing and reserving methods for short-term insurance contracts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in AS 5104.

**AS 5116. Financial Reporting for Actuaries. 1 Credit Hour.**

This course introduces students to the fundamental principles of accounting and financial reporting from an actuarial perspective. Topics covered include basic accounting concepts and principles, financial statements, and corporate taxation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AS 5118. Advanced Actuarial Analytics. 3 Credit Hours.**

This course continues the discussion of AS 5108. Statistical analysis has become part of the modern actuary's day-to-day responsibilities as they help improve solutions to traditional actuarial problems and quantify insurance operations and business processes that have traditionally relied largely on managers' judgment. Topics to be covered include ridge regression, LASSO regression, weighted/partial least squares models, KNN regression, stochastic time series processes, common time series models including predictions, confidence intervals, and interpretation, principal components analysis, decision trees, including classification trees, bagging, boosting, and random forests, k-means and hierarchical clustering, and simulation. The course will further develop students' programming skills in data analytics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in AS 5108.

**AS 5126. Option Pricing. 1 Credit Hour.**

Financial options are a part of many modern life insurance products. In this course, students learn the fundamentals of option pricing and their risk management. Topics covered include basic call and put options, option strategies, put-call parity, Binomial trees, the Black-Scholes model, and Delta hedging, along with their applications to insurance products.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in AS 5101 (may be taken concurrently)

**AS 5170. Special Topics. 3 Credit Hours.**

Special Topics. Content varies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AS 5180. Special Topics. 3 Credit Hours.**

Special Topics. Content varies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AS 5182. Independent Study. 1 to 6 Credit Hour.**

Special study in a particular aspect of actuarial science under faculty supervision. Maximum of six hours may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AS 5190. Special Topics in Actuarial Science. 3 Credit Hours.**

Special Topics - Actuarial Science. Content varies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AS 5191. Mentored Research. 1 to 6 Credit Hour.**

The student conducts research - broadly related to actuarial science or insurance economics - under the supervision of a faculty member. A maximum of six hours may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AS 5282. Independent Study. 1 to 3 Credit Hour.**

Independent Study. Focus to be determined by instructor and student.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AS 5685. Actuarial Internship. 1 to 3 Credit Hour.**

The student participates in an actuarial internship to gain relevant practical work experience. The internship must be for at least 240 work hours over the course of one semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Adult and Organizational Development (AOD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**AOD 5301. People-Centered Community Development. 3 Credit Hours.**

People-Centered Community Development offers a broad perspective on community development (CD), focused on the United States of America. The course covers many of the major considerations of CD. We will analyze CD from different standpoints: bureaucratic; research; historical; theoretical; ethnographic; grassroots; activist; policy maker; and, funder. The course emphasizes people-centered, participatory, and holistic approaches to CD. We will explore how intervention strategies, available resources, gender, race, inequity, and competing development ideologies play out in community development. A framework that stresses holism, dialogue, field research, and the emic perspective inspires the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5302. Introduction to Mission-Driven Organizations: Theory and Practice. 3 Credit Hours.**

This course is a graduate-level introduction to theory and practice of the non-profit sector and for-profit organizations focused on social, cultural and environmental change, with a heavy emphasis on practical application. This course will provide an introduction to some of the special management and leadership issues facing these mission-driven organizations. Course readings and discussions will include topics such as writing and fulfilling mission statements, facilitating governance, designing effective fundraising tactics, and engaging in advocacy or lobbying. We will also cover the formation of the nonprofit sector and its differences from public and for-profit sectors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5401. System Dynamics. 3 Credit Hours.**

Frameworks for understanding dynamic social systems that form the bases for research, assessment, planning, intervention, and evaluation of social entities are explored. Linear and nonlinear theories are examined, especially as they may be applied to group and organizational training and development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5402. Negotiating Conflict. 3 Credit Hours.**

The course examines the role of communication in setting where there is an attempt to manage conflict among individuals or groups. The course provides: an overview of social science theory on conflict processes; an understanding of the major forces that influence conflict interaction; an increased ability to negotiate and intervene in difficult conflicts; and an increased awareness of one's own conflict style and personal responses in various conflict settings. In this course, you will have the opportunity to develop more self awareness and to improve your negotiation skills, including: identifying the difference between needs and positions, applying appropriate negotiation and conflict resolution strategies, developing an appreciation for how bias, perception, power, and culture impact dialogue, learning to deal with anger and other behaviors in conflict situations, and gaining a better understanding of your role in these conflict situations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5403. Facilitating Adult Learning. 3 Credit Hours.**

This course examines teaching and learning transactions in adult educational settings and the methods and techniques appropriate for facilitating adult learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5404. Organizational Development. 3 Credit Hours.**

This course integrates psychological theory with tools and methods for understanding organizations, dealing with human capital problems in organizations and for making organizations more effective and more satisfying as places to work. During this course, students will explore evidence-based practice with regard to recruiting and training the best employees, ensuring they are high performers, dealing with performance issues, and ensuring your personnel and management practices conform to various regulations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5515. Conflict Resolution in Education. 3 Credit Hours.**

Educators need to know how to develop safe and constructive learning environments. Effective management of conflict in educational settings and the creation of conflict competence in students and staff are key. This course provides an overview of proven programs in conflict resolution education in K-12 contexts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5516. Negotiation Processes. 3 Credit Hours.**

Negotiation is a critical skill in any professional or personal context. This course teaches students to engage effectively in cooperative and competitive orientations as a means to negotiate dyadic and multiparty situations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5518. Third-Party Conflict Intervention. 3 Credit Hours.**

This course examines the various ideologies and roles that third parties adopt as they intervene in conflict in interpersonal, group, organizational, or cross-cultural settings. Students learn the fundamentals of various third-party roles, including mediators, arbitrators, ombudspersons, and facilitators. Emphasis is placed on how conflict interveners' purpose drives their practice as they work toward transforming difficult conflicts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5522. Interpersonal Skills Training. 3 Credit Hours.**

This course examines training methods to develop interpersonal and team effectiveness in the workplace. Skills included are understanding others, clear communication, asserting needs, exchanging feedback, influencing, resolving conflict, collaborating, and shifting gears.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5524. Sociocultural Dynamics. 3 Credit Hours.**

This course examines contending frameworks for understanding conditions and dynamics of sociocultural diversity and scenarios for preferred outcomes. Contemporary and evolving issues of human diversity in our global, local, and personal contexts are explored, especially as these relate to professional practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5527. Training Design and Delivery. 3 Credit Hours.**

This course examines the design of training programs in public and private sector organizations. Students learn to design active, experientially based training programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5532. Leadership and Management. 3 Credit Hours.**

This course addresses the theoretical understandings that guide appropriate implementation of professional managerial and facilitative roles in adult and organizational development. Students gain increased clarity regarding contextually appropriate practice of both management and leadership.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5533. Team Development. 3 Credit Hours.**

This course blends academic inquiry and experiential learning in exploring the nature and dimensions of teams. We focus on: Characteristics of teams; Processes of teamwork; Issues teams face; and Organizational context of teams.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5534. Group Facilitation and Consultation. 3 Credit Hours.**

This course focuses on the skills needed to assist groups and teams in their decision-making processes. Students learn both voting and consensus processes and develop the skills needed to facilitate either approach to decision-making. The course also covers a range of specialized formats for assisting group decision-making such as brainstorming, nominal group technique, problem solving, incrementalism, and mixed scanning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5535. Organizational Assessment, Design and Strategy. 3 Credit Hours.**

This course explores applied research and evaluation in organizations. It highlights methods such as surveys, interviews, focus groups, administrative data analysts, and "tests" used for organizational purposes such as employee selection, performance appraisal and employee motivation/satisfaction. Students are expected to explore a relevant organizational research/assessment proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 5540. Current Topics in AOD. 1 to 3 Credit Hour.**

The topics of this course vary. Its inclusion in the curriculum allows faculty and students to explore emerging issues in the field.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AOD 8101. Training and Organizational Development: Theory and Research. 3 Credit Hours.**

This course is a doctoral level graduate seminar that focuses on critical conceptual and empirical issues facing the field of training and development. The course is structured around major training themes such as training needs assessment, design, evaluation and transfer. The course is not specifically designed to "train" trainers but to give participants an appreciation for the critical research issues that must be addressed in the training literature. To appreciate these issues, participants will also be involved in projects designed to simulate the practical issues and constraints in designing a training program. Thus, the course is based on the principles of action learning and learner control of the learning process.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AOD 9187. Practicum in Adult and Organizational Development. 3 Credit Hours.**

This course provides students with the opportunity to translate adult and organizational theory into practice by gaining experience working in contexts in which change and learning are being fostered. Students work under the auspices of the Training and Development Center and are placed in a variety of contexts. This course should be taken near the end of the student's program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AOD 9231. Proseminar in AOD. 3 Credit Hours.**

This capstone course provides students with the opportunity to design and complete a culminating project that applies the principles of AOD theory and practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## **Advanced Core Medical Science (ACMS)**

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ACMS 5003. Fundamentals of Biochemistry. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACMS 5004. Fundamentals of Physiology. 4 Credit Hours.**

Fundamentals of Physiology addresses important topics including membranes and membrane transport, excitation and contraction of skeletal, smooth and cardiac muscle, the heart and blood flow, renal physiology and lung physiology. Important medically related examples will be discussed. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACMS 5006. Microbiology and Immunology. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACMS 5007. Human Anatomy. 4 Credit Hours.**

Human Anatomy provides instruction in gross anatomy for postbac students. Important medically related examples will be discussed. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACMS 5008. Medical Pharmacology. 4 Credit Hours.**

Medical Pharmacology provides instruction in pharmacology for postbac students. Important medically related examples will be discussed. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ACMS 5010. Special Topics in Medicine. 2 to 3 Credit Hours.**

Special Topics in Medicine discusses important topics in medicine including translational research and evidence based medicine for postbac students. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ACMS 5011. Case-based Clinical Problem Solving. 1 Credit Hour.**

A crucial component in training pre-medical students to become effective physicians is developing interactive skills, specifically meaningful patient history taking. This course provides students at the Lewis Katz School of Medicine the opportunity to interact with and receive feedback from standardized patients. Furthermore, the encounter permits the design of learning experiences that integrate the students' understanding of basic science principles with clinical reasoning. This course consists of two parts. The first part provides students with the basic tools for interviewing patients and taking their history. This is accomplished by use of self-study, lectures and one on one interaction with standardized patients. During the second part of the course, students working in teams on specially designed clinical cases reason through and present their diagnosis and reasoning to the class. Included in the clinical case is a session with the simulation mannequins who will be programmed with the appropriate disease characteristics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

## Advanced Education (ADVE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ADVE D012. Adv Educ P/T Res. 6 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**ADVE D013. Adv Educ P/T Non Res. 6 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**ADVE D020. Summer Clinic I - Res. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**ADVE D021. Summer Clinic I - Non-Res. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## Advertising (ADV)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ADV 5501. Advertising Research and Strategy. 3 Credit Hours.**

This course provides an overview of the process for developing and evaluating advertising strategy that is grounded in theoretical principles and supported by research. In particular, the course examines concepts and techniques that are useful for identifying consumer insights and social trends affecting communication strategy in the developmental phase and then measuring the effectiveness of those strategies in the evaluative stage. The course will review best practices in both qualitative and quantitative research techniques including attention to ethical considerations that are fundamental to consumer research. The aim of this course is to provide students with a better understanding of the role of theoretical principals and research in campaign development and evaluation while familiarizing students with the types and methods of research that are used in advertising practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ADV 5502. Media Planning and Analysis. 3 Credit Hours.**

The focus of this course will be on the art and science of crafting a paid presence for large budget brands competing in today's complex media environment. Students explore the conceptual foundations of media planning with an eye towards effectively engaging a target audience, which has more control over media consumption than any prior generation. Coursework will explore how shifts from mass media to personalized content affect the opportunity to place branded messages and how socially active audiences can magnify a message for better or worse through their own personal networks. In-class discussion will explore the future of paid media placement, audience tolerances for ad-supported content and the economic implications of a shift from ad-supported to "free" content.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ADV 5503. Persuasion and the Marketplace. 3 Credit Hours.**

This course explores the strategic use of communication to facilitate change. Theoretical frameworks will be taught and their applications explored. Discussion topics include behavior and attitude change in the contexts of health, social, and consumer behaviors. We will focus on moral and ethical issues in the marketplace as they relate to the fundamentals of persuasion theories. Additional topics for in-class discussion will focus on the moral and legal implications of advertising language, disclosure and transparency in a socially connected world. By the end of the course students will propose a strategic plan that utilizes persuasive theory to change the health, social, or consumer behavior of a hard to reach audience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ADV 5504. Visual Communication and Branding. 3 Credit Hours.**

"Visual branding" isn't just a buzz-phrase; it's a crucial part of every company's marketing strategy. Brand identity fuels recognition, increases differentiation, and symbolizes core values. Identity expresses itself in visual systems that shape audience perception. The course will examine how the disciplined process of branding can build awareness and extend loyalty in an audience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ADV 5505. User Experience Design and Strategy. 3 Credit Hours.**

User Experience Design and Strategy are practices that, when conducted empirically, will help ensure a successful digital experience. UX Design and Strategy seeks continuous customer feedback and validation that the brand or campaign is addressing customers' needs. This course is a combination of contemporary methodologies culled from several disciplines including user research, product design, and business strategy. Topics will include: competitive analysis and identification of marketplace opportunities, value innovation, rapid prototyping, customer discovery, and designing for conversion using metrics. By the conclusion of the course, each student should be equipped with a strategic method to quickly and effectively launch a product or service online. This course introduces the latest techniques for conducting user research, creating personas, and refining and optimizing particular user experiences. Topics include conducting user research, developing user personas and scenarios, information architecture, system and user interface design, prototype creation, and usability testing and analysis. Students develop and present a single comprehensive project for their portfolio that includes usability research and a working prototype.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ADV 5506. Advanced Strategies in SEO and SEM. 3 Credit Hours.**

Search has become an indispensable utility. Search engines are a gateway to the world's collected knowledge and, most important to marketers, their use is a reflex action in response to curiosity. The Internet has rewired our decision process and forever changed how consumers buy. This course will explore what Google has coined the "Zero Moment of Truth", that crucial moment when the consumer researches their options prior to purchase. After completion of this course, students will understand how to evaluate brand positioning via various search engines, the tactics available to improve their visibility and how consumer behavior is continuing to change as search itself evolves.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ADV 9082. Directed Projects. 1 to 8 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ADV 9083. Directed Readings. 1 to 4 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Africology and African American Studies (AAAS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**AAAS 5010. Special Topics in African Languages. 3 Credit Hours.**

Languages vary by semester. Please consult with the instructor and/or check the course schedule for specific topic.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AAAS 8001. Proseminar in Graduate Work in African American Studies. 3 Credit Hours.**

An introduction to the intellectual and professional foundations of the field. It examines the historical origins of African American Studies in the United States and Africa, as well as the context of classic creative, analytical, and autobiographical works.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8002. African Civilizations. 3 Credit Hours.**

An intensive investigation into the origins of several major African civilizations. Civilizations and periods chosen may vary at the discretion of the instructor but will normally include the classic cultures of Nubia, Kemet, Axum, Songhay, Mali, Ghana, Monomotapa, Yoruba, and Asante.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8003. Research Methods in African American Studies. 3 Credit Hours.**

An introduction to the basic research methods used in African American Studies. It examines historical, anthropological, behavioral, and critical methods, as well as the methodological foundations of the Afrocentric method.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8004. Theories and Methods in African American Studies. 3 Credit Hours.**

An intensive critique of African studies within the context of evolving theoretical and methodological issues. Topics include boundaries of particularism, frames of reference, etymology, historical cleavages, and the idea of the African voice. Students will write major research papers analyzing the various perspectives advanced by scholars within the field of African studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8005. African Literature. 3 Credit Hours.**

Examines African literature from 4000 B.C. to the 20th century. Special attention will be paid to the early sacred works, and didactic oral traditions, poetry, drama, the advent and literary aesthetics of Western-writers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8006. African American Literature. 3 Credit Hours.**

Deals with the social context of African American literary development from enslavement to the present. Students are introduced to the cultural patterns and historical experiences that produced the early autobiographies, narratives, poetry, and essays as well as the 20th century novels, plays, and poetry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8007. African Aesthetics. 3 Credit Hours.**

Examines the interrelationship of the creative process with cultural and philosophical motifs in African history by studying mythology, the generative and productive force of the spoken word and the power and significance of a wide variety of aesthetic concepts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8008. Ethnographic Methods. 3 Credit Hours.**

Examines the various classic and contemporary methods for collecting field data on African cultural and social behaviors. Emphasis on the use of audio and video data gathering methods, and participant observation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8009. The Afrocentric Paradigm. 3 Credit Hours.**

In this intensive critique of African studies we discover the processes by which those working in the discipline of Africology develop their arguments about and/or interpretations of the African world experience transnationally and trans-generationally. Although this course naturally emphasizes theories and methodologies in Africana Studies, our readings and discussions will move beyond the rote acquisition of a list of thinkers and their ideas. Since our main objective is to finish the course with a broader, deeper view of the discipline, our dialogue must intentionally sharpen our skills as critics, theoreticians and researchers, and give us the confidence to examine the agency of African people in any phenomena. Thus, students will explore the historical and intellectual roots of Afrocentricity, as well the main tenets of the most prominent paradigm in the discipline. It is expected, that by the end of the semester, students should be well versed in Afrocentric theories and be able to apply it to their own research interests.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8415. Ancient Egyptian Language I. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8416. Ancient Egyptian Language II. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8432. African-American Family. 3 Credit Hours.**

Contemporary theories and research on the African American family. Includes assessment of family behavior, the role of children, sex roles, perceptual changes within the context of society, demographic factors, impact of unemployment and underemployment, and income distribution.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8435. Ebonics: African American Language. 3 Credit Hours.**

Examines variations of African American languages found throughout the Americas. Special attention to the Gullah prototype from South Carolina and Georgia. Presents the major theoretical arguments about the development of the languages.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8441. African Philosophical Thought. 3 Credit Hours.**

An analytical and historical overview of the ideas that have made the African culture, with particular emphasis on the resurrection idea, the concept of rule, harmony and balance, divination systems, dual-gender responsibility, and relationship between human beings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8442. African Religions. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8446. Cheikh Anta Diop. 3 Credit Hours.**

A critical examination of the portions of Diop's corpus on the African origin of civilization with special inquiry into the nature of his evidences. Students will present papers analyzing Diop's Afrocentric perspective and his impact on African scholarship around the world.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8449. Pan Africanism. 3 Credit Hours.**

A survey of the major currents of Pan African Thought from the early Pan African Congresses to the events of the Sixth Pan African Congress of Dar Es Salaam. Opposing critiques will be presented and discussed, especially the Marxist critique of Pan Africanism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8455. Caribbean Culture and Politics. 3 Credit Hours.**

An investigation of the roles of culture and politics in the development of the Caribbean basin. Particular emphasis will be placed on the ways that African cultural survivals, creolism, syncretism, and political struggle have acted to create the unique Caribbean outlook.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8464. Literature of the Harlem Renaissance. 3 Credit Hours.**

A study of the African-American realization of literary revivals between the two great 20th Century European wars. Special emphasis on Harlem as a venue and symbol of the emergence of modern African American literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8465. Literature of the Black Power Revolution. 3 Credit Hours.**

An overview of the major African American literary developments of the 1960's and 1970's in the United States. Looks at the works of Amiri Baraka, James Baldwin, Sonia Sanchez, Nikki Giovanni, Haki Madhubuti, and others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8468. Major African Writers. 3 Credit Hours.**

Examines the 20th Century prose, fiction, and poetry, of major writers of the African world. Students analyze writers in accordance with the protocols of literary innovations, Afrocentric motifs, symbolic functionalism and political themes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8521. Readings in African History. 3 Credit Hours.**

Survey of the major developments in Africa through written and oral records with discrete emphasis on the analysis of perspectives both external and internal to Africa. Collected traditions, colonial and neocolonial scholarship, liberal and feminist writings, Marxist and neo-Marxist treatises as well as Africanist and afrocentrist literature will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8542. Readings in African American Social Thought. 3 Credit Hours.**

An intensive reading of the works of Frederick Douglass, Martin Delany, Frances Harper, W.E.B. Du Bois, Marcus Garvey, Edward Blyden, Booker T. Washington, E. Franklin Frazier, Ida B. Wells, Anna Julia Cooper, and others. Looks at the intellectual roots of the ideas of significant contemporary thinkers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8547. Readings in 1960's Protests. 3 Credit Hours.**

Close reading of documentary evidences in African American political, historical, and social thought during the turbulent sixties. Students prepare papers from primary documents.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8561. African American Theatre. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 8566. African American Music. 3 Credit Hours.**

A survey of the rich musical tradition of African Americans from the emergence of the field hollers and work songs to contemporary music. Attention given to spirituals, jazz, blues and rock as major genres.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9001. Seminar in African Aesthetics. 3 Credit Hours.**

Examines the philosophical foundations of African aesthetics by concentrating on the cosmology, ritual religions, oral traditions, and proverbs of African people. Examines the question of what constitutes African standards of beauty, or art, or good, or culture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9002. Teaching African American Studies. 1 to 3 Credit Hour.**

Required of all graduate teaching assistants prior to the assumption of teaching duties. Designed to teach communication and organizational skills. Supervision of teaching is required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9614. African American Diaspora. 3 Credit Hours.**

Using primary source material and with special attention to the United States, students will examine the African experience in the Americas from the 14th century to the present. Movements, periods, events and people that represent the major social, economic and political African American thought will be surveyed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9615. Seminar in African American Psychology. 3 Credit Hours.**

An examination of theory and research pertaining to African American psychology. A selected discussion of various theoretical perspectives on African American personality and socialization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9625. Nile Valley Civilization. 3 Credit Hours.**

A critical examination of selected topics in the civilizations of Kemet, Nubia and Axum. Detailed analysis and discussion on the primacy of Kemet in African civilization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9641. Sem Life & Work Malcom X. 3 Credit Hours.**

Examines the life and work of Malcolm X from the standpoint of his impact on social, political, and economic movements in the United States. The moral force of Malcolm X as seen in the growth of various urban religious and spiritual groups will be assessed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9642. Seminar in African American Social Philosophy. 3 Credit Hours.**

An intensive seminar in the writings and activities of major social philosophers such as Edward Blyden, Ida B. Wells, Paul Cuffee, Martin Delany, David Walker, Malcolm X, Harold Cruse, and Angela Davis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9643. Research and Writings of W.E.B. DuBois. 3 Credit Hours.**

An intensive examination of selected topics in the autobiographical works of Du Bois, historical, sociological, and creative works.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9645. Seminar in the African American Woman. 3 Credit Hours.**

An exhaustive treatment of theories relating to the role of the African American woman. Topics will include gender bias within the African American community, feminism and the black woman, sexism, classism, and racism, and the future of the black woman in America.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9662. Seminar in the African American Novel. 3 Credit Hours.**

A seminar in the African American novel which may focus on one or several principal figures or examine a single theme during a particular historical period, i.e., the novel after 1945.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9761. Seminar in African American Studies: Social Behavior. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**AAAS 9982. Individual Research in African American Studies. 1 to 6 Credit Hour.**

Individual Research In African American Studies while still in the coursework phase of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AAAS 9993. Master's Comprehensive Examination. 1 to 6 Credit Hour.**

Preparation for master's comprehensive exam.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AAAS 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

Preliminary Exam Preparation. Following coursework completion, registration in AAS 9994 is required to prepare for Preliminary Exams.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AAAS 9996. Master's Thesis. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AAAS 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Pre-Dissertation Research. After having passed the Preliminary exams, registration is appropriate for students working on the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**AAAS 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is intended only for those students who have achieved Ph.D. Candidacy status. A minimum of 6 semester hours is required for graduation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## **Anatomy & Cell Biology (Medical School) (ANAT)**

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ANAT M495. Teaching Assistant - Fundamentals I: Human Structure. 0 Credit Hours.**

This elective is designed to allow students to serve as teaching assistants in block 1, Teaching Assistant - Fundamentals I: Human Structure. Students will be expected to assist in cadaver dissection (lab sessions), facilitate peer teaching (cross-teach sessions) and participate in flipped classroom, small group conferences where anatomical knowledge is applied in case-based presentations. Students will also have the opportunity to prospect selected regions of the body under faculty supervision to prepare for teaching sessions and to increase their knowledge of relevant anatomic structure.

**Repeatability:** This course may not be repeated for additional credits.

**ANAT M630. Eat to Live Not Live to Eat. 0 Credit Hours.**

This elective will have five teaching venues: (1) hands-on counseling of patients, (2) online learning at <http://www.nutritioninmedicine.org/portal/>, (3) case study discussions, (4) student presentations, (5) cooking to appreciate cultural and socioeconomic diversity.

**Repeatability:** This course may not be repeated for additional credits.

**ANAT M832. Advanced Clinical Anatomy Elective. 0 Credit Hours.**

This elective will be advantageous for individuals interested in various clinical specialties/subspecialties, including (but not limited to) internal medicine, radiology, surgery, pediatrics, obstetrics and gynecology, urology, gastroenterology, cardiology, oncology, pathology, otolaryngology, orthopaedics and emergency medicine.

**Course Attributes:** M2

**Repeatability:** This course may be repeated for additional credit.

## Anesthesiology (ANES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ANES M294. Intro to Anesthesiology. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**ANES M310. Career Exploration of Anesthesiology. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**ANES M400. Vacation. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**ANES M410. Anesthesiology. 0 Credit Hours.**

**Course Attributes:** M2

**ANES M415. Pain Management. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**ANES M425. Advanced Anesthesia. 0 Credit Hours.**

The student will be given access to more advanced areas of anesthesia practice not available in the basic rotation. This will also involve experiencing being on-call.

**Repeatability:** This course may be repeated for additional credit.

## Anthropology (ANTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ANTH 5006. Quantitative Analysis of Anthropological Data. 3 Credit Hours.**

The primary goal of this course is to provide students with a solid grounding in basic statistical techniques/methods as applied to anthropological data.

Such data is highly variable in form due, in part, to the diversity of research questions being asked and to the methods of collection. The ultimate goal of this course is to bring together various data sets and methods so that students might better assess the results/interpretations presented in the anthropological literature. New quantitative concepts will be presented each week along with examples/applications of the concepts and practice problems. The problems associated with the main course text will be solved using a hand calculator; more complex data sets and problems will require the use of computer statistical software [i.e., SPSS (available on all University machines)].

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5170. Methods in Archaeology. 3 Credit Hours.**

Methods and procedures used in the practice of archaeology with topical foci varying by semester. Semester long topics include: cultural resource management; sediments, soils, and geomorphology in archaeology; pottery analysis; and lithic analysis. As an example, the lithic analysis focus provides hands-on experience in analyzing lithic assemblages through experimental replication of stone tools, experimental use of stone tools, microscopic analysis of experimental and archaeological specimens, and classification of lithic assemblages. The first half of the course consists of laboratory exercises in making, using, and analyzing stone tools and flaking debris. The second half of the course is devoted to the conducting of independent research projects by class members on some aspect of lithic analysis. Because topics change, 5170 may be taken more than once.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 5171. Comparative Early Civilizations. 3 Credit Hours.**

This comparative analysis of the rise of early civilizations uses archaeological and historical information to examine the development of ancient societies. It focuses on problems of the Neolithic revolution and the autochthonous transformation of kin-based communities into stratified societies and the subsequent formation and development of archaic states.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5172. Seminar in Northeastern Prehistory. 3 Credit Hours.**

The archaeology and prehistory of the native peoples of the Middle Atlantic Region are examined in detail, and in the broader context of cultural developments in the Northeast and Eastern Woodlands of the United States. Although the seminar employs cultural historical periods as a way to present information, cultural diversity across time and space are emphasized. Basic descriptive data dealing with prehistoric cultures are presented, as well as the variety of interpretations of native lifeways upon which they are based. Included in the course is information derived from cultural resource management studies, the results of which are infrequently published.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5177. Approaches to Historic Sites in Archaeology. 3 Credit Hours.**

Students examine the central questions, values, and goals of historical archaeology, gaining a working knowledge of its basic concepts and methods. A material culture approach is used as archaeological objects are presented in sites where they express a series of concepts related to our understanding of status, wealth, self identity, consumerism, and symbolism. A holistic framework is used to present material evidence together with documentary, oral, and other data. A variety of sites will be examined in order to introduce many important subfields of historical archaeology such as landscape archaeology, urban archaeology, industrial archaeology, and underwater archaeology. The course also will demonstrate how such evidence illuminates the modern world and its relevance to our own time and place.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5180. Historic Sites in Archaeology. 3 Credit Hours.**

A seminar on the archaeology of sites dating from the colonial period and later periods in American history. Topical focus varies; contact the instructor for details.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 5189. Field Session in Archaeology. 6 Credit Hours.**

Techniques and concepts of field archaeology, including survey and excavation. Students will be expected to spend the greatest part of the session in the field during the excavation of a prehistoric or historic occupation site. The location of field projects shifts from year to year. Previous locations have included coastal Maryland, the New Jersey Pine Barrens, the Middle and Upper Delaware Valley, and Valley Forge.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 5310. Theories and Methods in Cultural Anthropology. 3 Credit Hours.**

This course examines anthropological approaches to visual and material consumption in social life. Through readings in both classic social theory and contemporary theory and ethnography, we will investigate how images and things acquire meaning, organize social life, and constitute identities through different consumptive processes. Questions to be addressed include: How do people create social identities, hierarchies, or senses of collective belonging through consumption practices? How do images and objects acquire value or significance in different consumption contexts - from gift exchange to internet surfing to shopping? What is the relationship between images, objects, money, and morality in different societies? How can we understand the commodity form ethnographically? What can consumption reveal about processes of state formation and globalization - from the creation of imagined communities to the creation of inequalities? What are the differences between the consumption of visual media versus material objects?

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 5322. Anthropology and Development. 3 Credit Hours.**

Economic Anthropology is the study of how economic systems articulate with culture on a variety of scales. This class examines basic paradigms of study in economic anthropology, theories of money and value, and ethnographies of exchange. We will look at how the commodification, production and/or sale of goods in formal, informal and black markets affect people in very different ways. We think through the role of the state, of religion, power struggles and advertising in shaping these markets.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5325. Culture, History, and Power. 3 Credit Hours.**

This course examines how both western and non-western societies have defined the domain of "politics." While looking at a range of ethnographies on different forms of politics, we will also attempt to understand how anthropologists historically have studied politics, and how anthropological notions of politics have changed through time.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5326. Problems in the Anthropological Study of Religion. 3 Credit Hours.**

This course examines some of the major themes, methods, and intellectual traditions of the study of religion in anthropology. Considered as a comparative study of religious practice, this course seeks to understand thought and behavior in worship, iconography, pilgrimage, domestic and congregational performance, mythology and cosmology, trance, dance, sacrifice, ritual experience and other dimensions of religious life as well as the way that these facets of religious culture interrelate. The study of religion in a historically complex circumstance will provide the means to examine the processes of accommodation and tension that exist in a multi-religious environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5328. Seminar in Social Organization. 3 Credit Hours.**

This seminar focuses on anthropological analysis of social structures, including kinship, families and households, social networks, voluntary organizations, and bureaucracies

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5332. Medical Anthropology. 3 Credit Hours.**

Examines biocultural and sociocultural approaches to the understanding of multiplex human experiences of health, disease, and affliction. Introduction to the major theoretical schools and critical issues of contemporary medical anthropology. Explores six topical areas: biocultural perspectives on disease and health; ethnomedicine; medical pluralism; medicine and social control; international health development; and the relationships between culture/society and scientific biomedical representations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5335. Anthropology and Social Policy. 3 Credit Hours.**

Examines "applied" domain and different ways of "using" anthropological knowledge, ranging from critiques of international and federal social policies as products of the state and private interests to participative anthropology that moves toward political action and empowerment, to working for the state and private corporate centers as a way to make a living. Evaluates the efficacy of different types of work for progressive social change and examines the possibilities of how to make our research matter more in relation to major public issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5355. Anthropology of Sexuality and Gender. 3 Credit Hours.**

Explores anthropological literature on gender as a means of exposing the hidden assumptions about power, language, and gender that inform anthropological theory. Theoretical critiques of this literature will be used to reassess anthropology and to generate a systematic approach to the study of gender. (Prior to fall 2015, the course title was Gender Theory.)

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5358. Race and Class in North America. 3 Credit Hours.**

American Culture: Conformity and Diversity. This course focuses on North American ethnographies and their role in the development of North Americanist anthropology. This includes examining dominant debates about the cultural and structural intersection of race, class, gender, and other axes of difference. Other topics include the global spread of North American power, expertise in science and technology, and cultural forms in the twentieth century.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5366. Contemporary Perspectives in Urban Anthropology. 3 Credit Hours.**

Examines the development of urban anthropology from the early debates of the 1970s to redefinitions in the 1980s. The emerging paradigm of intensive studies of local social processes within larger macrostructural contexts is the focus.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5389. Fieldwork in Ethnography. 3 Credit Hours.**

This class encourages students to explore the world around them from an ethnographer's perspective; that is, to observe, hear and listen to people and the settings around them with attention to history and the social, political, economic, and ideological structures that provide the context for actors' agency. We will conduct short fieldwork exercises, write fieldnotes and an analytic paper, and conduct an oral history interview. We will also consider what ethical issues fieldworkers encounter as they pursue their research, read classic and more recent examples of ethnographic writing, and engage in debate about different forms of anthropological methods and writing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5396. History of Anthropological Theory. 3 Credit Hours.**

Clarifies various intellectual currents in contemporary anthropology, their relationships to intellectual and social developments, and debates in the broader society. Concerned with the development of anthropological thought as it has been shaped by Western society and the emergence of various intellectual tendencies. Surveys the antecedents of anthropology in the major intellectual currents of the early modern era and its crystallization during the Age of Revolution. Focuses in detail on what happened after the social sciences were professionalized in the late 19th century.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5428. Theory and Methods in Culture and Communication. 3 Credit Hours.**

This course explores the history and development of visual culture. Considered are: the history of perception and how mechanical and digital reproduction have had an impact on the sensuousness of the gaze-in-culture; how various intellectual movements in the 20th century effected visual reproduction. The course provides a solid historical foundation with which students can enhance their comprehension of contemporary visual culture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5434. Anthropology in Feature Films. 3 Credit Hours.**

Students will critically review a series of feature films that include topics, themes, and subject matter often treated within anthropology and related human sciences. It is clear that American feature films usually thought of as 'Hollywood films' can be very influential in establishing or reinforcing social and cultural stereotypes of 'states of knowledge' about peoples living in various parts of the world. Viewership of these materials, either as films shown in movie theaters or as their videotape counterparts seen on home television screens, certainly exceeds the size of audiences in introductory anthropology courses in the U.S. The potential for influence and false senses of familiarity is enormous.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5438. Anthropology of Mass Media. 3 Credit Hours.**

This course examines the relationships between various types of media (film, radio, television, Internet, newspaper, telephone, performance) and power relations, control, and cultural representation. We will look at reception studies, and social construction of "news watching," the construction of "others" and the maintenance of "otherness" in media, as well as the international politics of media messages and the power of media in influencing our opinions about the world.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5439. Anthropology and Photography. 3 Credit Hours.**

A critical examination of an anthropological approach to photography. Special attention will be given to a socio-cultural history of photography in the U.S. Examples from documentary, fine art, and commercial photographic genres will be shown, discussed, and compared to ethnographic studies. Field methods, models of analysis, and ethical issues will also be included. Required readings, active class participation. No exams. Students keep a journal and write several short essays. Note: Knowledge of camera technology and darkroom procedures is helpful but not required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5444. Anthropological Problems in Visual Production. 3 Credit Hours.**

The introduction of visual recording techniques to a sample of problems in the anthropology of visual communication. Discussions will include ways anthropologists construct problems, develop observational strategies, select appropriate image-making technology, work in field conditions, among others. Strategies of representation connected to the integration of cultural and film theories will be explored in conjunction with a wide range of film examples. Students will be introduced to the department's production facilities and do short exercises in image making, viewing, and interpretation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5458. Anthropology of Public Culture. 3 Credit Hours.**

Explores museums, exhibitions, galleries, and festivals as a form of public culture. Activities include critical reading of relevant literature and an examination of films, CD-ROM's, Internet web sites as well as field trips to local institutions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5501. Language, Power, and Agency. 3 Credit Hours.**

This seminar examines the varied ways in which individuals and groups use language in constituting, maintaining, resisting, challenging, subverting, and transforming power relations. These issues are considered at multiple levels of analysis, from face-to-face interactions to performances to the production and circulation of media at national and global levels. A central goal is to develop critical perspectives on the place of language and communicative practice in contemporary social theory.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5504. Language as Social Action. 3 Credit Hours.**

This seminar examines language use and other communicative practices as forms of action through which individuals and groups create, sustain, and transform their lifeworlds. Drawing largely on ethnographic materials, it considers a broad range of the semiotically, culturally, politically, ideologically, and discursively mediated activities that, taken together, constitute human sociality. The seminar emphasizes the collection, analysis, and presentation of original ethnographic data. Toward these ends, each seminar participant develops an independent research project involving participant observation and naturalistic audio-video recording of communicative practices (both verbal and non-verbal) in local settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5509. Language Socialization and Cultural Reproduction. 3 Credit Hours.**

Language socialization research is concerned with the processes whereby children and other novices, through interactions with older or otherwise more experienced persons, acquire the knowledge, orientations, skills, and practices that enable them to function as (and crucially, to be regarded as) competent members of their communities. This seminar examines language socialization and cultural reproduction as both universal and culturally specific phenomena. Topics explored include theoretical and methodological approaches to socialization; cross-cultural variations in ways of teaching and learning; socialization of children and of other novices; the agency of learners; the socialization of identities, roles, and statuses; and socialization processes as a site of innovation and change. Using the resources of the Linguistic Anthropology Teaching Laboratory, seminar participants collect, analyze, and present ethnographic audio-video data from various local settings (schools, churches, community organizations, workplaces, etc.) in which socialization can be observed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5510. Methods in Linguistic Anthropology. 3 Credit Hours.**

Survey of methods and problems in linguistic anthropology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 5770. Methods in Physical Anthropology. 3 Credit Hours.**

Methodological training for graduate students in physical anthropology and the Biocultural adaptation program. Topics include population genetics and demography, osteology, energy flow models, and human physiology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 5796. Biocultural Adaptation of Human Populations. 3 Credit Hours.**

This course explores the manner in which the adaptation concept has been used in cultural and biological anthropology. Evaluations of optimization models, thermodynamic models, evolutionary stable strategy theory, cultural materialism and selection models are conducted in a seminar format. Discussions will focus on the extent to which the behavioral and biological characteristics of human populations can be explained in an "adaptive" context. Students will critique specific models and the way they have been applied to groups living in stressful environments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5797. Reproductive Biology of Human Populations. 3 Credit Hours.**

A survey of physiological and biochemical variability in human populations examined as a function of environmental adaptation. Emphasis on the responses of different populations to discernible environmental stresses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 5798. Seminar in Evolutionary Biology. 3 Credit Hours.**

In-depth review of the synthetic theory of evolution, and special topics in evolutionary theory. Emphasis placed on the history of evolutionary thinking, the sources of variation in human populations, evolutionary processes, behavioral ecology, the levels of selection and problems in phylogenetic reconstruction. Anthropologically relevant models will be used throughout the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8001. Mobility and Global Inequality. 3 Credit Hours.**

Mobility and inequality endure as fundamental realities of human life, and underlie myriad social processes and institutions through which, on the one hand, people organize and make sense of the world around them and, on the other hand, seek to change the conditions and circumstances of their lives. They are at once complementary and oppositional, and examining some of the dynamics between them provides perspective into a variety of anthropological questions both old and new: how do people negotiate unevenly distributed resources? why do people move to new places? in what circumstances is social egalitarianism possible, and in which do hierarchy or even tyranny prevail? as people move, what is lost and what is retained? what effects will large-scale human migration have on prevailing political and economic systems? is radical social change possible under capitalism? Such questions lead us inevitably towards the problem of power and governance, both in today's world and the series of regimes and orders that have preceded and shaped it. How and why people move, or are forced to move, is always bound up with projects of control, exploitation, rebellion, oppression, allegiance, and resistance. This course focuses on mobility and inequality as grounded, embodied processes and experiences, by focusing on ethnographic descriptions of people who are both stuck and on the move, subjugated and liberated, in order to introduce students to a range of foundational concepts and questions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8002. Evolution, Human Environments, and the Culture Niche. 3 Credit Hours.**

Contemporary research in anthropology has become increasingly interdisciplinary and integrative across the 4 traditional subfields. This reflects both expanded theory and emerging themes of inquiry. One important perspective on the human condition is to recall our evolutionary history and the unusual, biologically-based capacity of humans to create our own socioecological niche. The expansion of evolutionary theory in recent years to embrace the importance and relevance of niche construction is a central question in the discipline. This course begins by examining the paleontological and primatological evidence for human uniqueness, particularly the capacity for language and the importance of social learning. Then, through the lens of Evolutionary Biology we introduce, critique and consider the value of an adaptationist perspective to explain Culture. Anthropology has long appealed to the concept of bio-cultural evolution and to the idea that Culture is an adaptation (in the evolutionary sense of the word). This course builds on that history to explore the nature, impact and importance of the culture niche. Several influential approaches to understanding variation in cultural practices and human behaviors are compared: Optimality Theory, Human Behavioral Ecology, Evolutionary Ethnobiology, Cultural Ecology, Dual-Inheritance Theory. The course concludes with a series of Case Studies and consideration of the Culture Niche concept in Applied Anthropology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8003. Approaches in Cultural Anthropology. 3 Credit Hours.**

Examination of the major theoretical debates that have informed cultural anthropology by analyzing how these perspectives have shaped the development of the ethnographic form. Topics include: structural-functionalism, professional and symbolic approaches, political economy, gender theory and post-structuralism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8004. Approaches in Linguistic Anthropology. 3 Credit Hours.**

Linguistic anthropology is concerned with the dynamic inter-relationships among language, culture, and society. This course provides an overview of theoretical and methodological approaches through which language can be studied in its social and cultural contexts as a means of communication as well as a medium of power, a means of production, and a commodity of value. Language is regarded as a cultural resource, and communicative practices are treated as forms of social action that vary significantly from one place and time to another. The role of language in sociocultural processes of reproduction and change are examined, revealing that communicative practices and their social organization are not just reflections of pre-existing social structures and cultural patterns, but are in fact constitutive of society and culture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8005. Approaches in Physical Anthropology. 3 Credit Hours.**

Survey of theories and methodologies used in physical anthropology. Development of physical anthropological theory and practice, genetics, hominid evolution, human population variation, primate history and ethnology, ecology, demography, and physiological anthropology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8006. Approaches in Archaeology. 3 Credit Hours.**

Examines the methods and theories used in archaeological research and provides an overview of human history that has been revealed by archaeological research. Topics covered include the historical development of archaeology, the nature of archaeological evidence, measuring and organizing time, analyzing spatial relationships, interpreting material culture, explanations in archaeology, hunter-gatherers in prehistory, agricultural origins, origins of complex societies, historical archaeology, and current trends in archaeology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8011. Teaching of Anthropology. 3 Credit Hours.**

This course is a workshop on issues in the teaching of anthropology in general and, more specifically, on the teaching of introductory courses in Temple's Department of Anthropology. Weekly meetings will cover general pedagogical issues such as writing a syllabus, evaluating student writing, constructing class assignments, grading and similar matters. Sample syllabi will be collected and reviewed, along with the textbooks that have been used for various introductory classes. Students will interview those who have experience in teaching introductory courses and will create a syllabus of their own for a course relevant to their individual subfield in anthropology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8012. Ethical Considerations in Anthropology Research. 3 Credit Hours.**

This course is designed to introduce graduate students to a large variety of ethical considerations in the field of Anthropology. Because anthropologists work with various aspects of the study of humankind, significant time must be taken to protect all aspects of research including living people, deceased people, descendant communities, model animals, and representations of people, language, and material aspects of culture. This course will challenge graduate students to consider difficult circumstances in anthropological research and encourage them to develop personal, peer group, and professional understandings of their responsibilities as anthropology researchers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8110. Problems in Archaeology. 3 Credit Hours.**

Consideration of special theoretical and methodological problems in archaeology. Topical and area emphasis varies by semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 8310. Problems in Socio-Cultural Anthropology. 3 Credit Hours.**

A seminar oriented to specific research issues. Topics vary from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 8315. Writing for Anthropologists. 3 Credit Hours.**

Reading and analysis of key ethnographic texts. Major topics include: development of ethnography as a genre in the twentieth century; regional patterns in ethnographic data and their relation to theory formation; postmodern critiques of ethnography; the influence of ethnography on other disciplines; and the use of ethnographies in teaching anthropology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8320. Problems in Ethnology. 3 Credit Hours.**

Reading and analysis of key ethnographic texts. Major topics include: development of ethnography as a genre in the 20th-century; regional patterns in ethnographic data and their relation to theory formation; postmodern critiques of ethnography; the influence of ethnography on other disciplines; and the use of ethnographics in teaching anthropology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 8330. Funding and Grant Writing in Anthropology. 3 Credit Hours.**

A seminar in research design and grant writing for graduate students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 8340. Advanced Seminar in Social Anthropology. 3 Credit Hours.**

Oriented to specific research issues. Topics vary by semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 8344. Seminar in Expressive Culture. 3 Credit Hours.**

This course explores the major anthropological approaches to the relationship between objects and social life, with a particular focus on art as especially illuminating. Using examples from Africa, the Middle East, Oceania, Europe, and the United States, the following themes are analyzed: how and why are objects categorized (e.g., as art objects, ritual objects, or ethnographic objects); the debate over the cross-cultural applicability of "art" and "aesthetics"; the ideologies of the "artist" in different societies; the ways that different objects are used to define groups of people (e.g., according to clan, race, gender, class, nationality); the relationship between the exchange/circulation of objects and social relations between different groups; the commoditization of objects; the international trade in tourist objects and art; and the role of museums and anthropologists in representing cultures through objects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8366. Violence: An Anthropological Approach. 3 Credit Hours.**

In this course, we will develop an anthropological approach to violence, querying the experience of violence and the ways in which it is generative and destructive of social structures and cultural meaning. We will consider violence's relationship to morality, politics, and inequality, as well as the ways in which violence is affirmed or denied as part of collective experience. Throughout the semester, our work will be grounded in political and anthropological theory and ethnographic material from the United States and elsewhere, as well as students' independent research and analyses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8408. Approaches in the Anthropology of Visual Communication I. 3 Credit Hours.**

The course has a survey approach; the theoretical overview is grounded in a perspective that applies concepts of culture to processes of visual communication.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8409. Approaches in the Anthropology of Visual Communication II. 3 Credit Hours.**

Examination of an anthropological approach to the study of the uses of the body, space, and the built environment, film, photographic, and television theories of construction and reception, art and aesthetics, cyberspace, and museums.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8429. Problems in the Anthropology of Visual Communication. 3 Credit Hours.**

Advanced seminar devoted to problematic aspects of visual media, research, fieldwork, production, exposition of issues central to relationships of anthropology, media, and visual communication. Topics vary by semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8435. Seminar in Visual Anthropology and the Arts. 3 Credit Hours.**

A seminar oriented to specific research issues, with topics varying from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ANTH 8550. Current Issues in Linguistic Anthropology. 3 Credit Hours.**

A themed seminar devoted to key areas of contemporary research in linguistic anthropology and allied fields of study. The seminar theme varies according to the instructor's areas of expertise, students' areas of interest, and curricular needs. Contact the instructor for details.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 9082. Independent Study. 1 to 12 Credit Hour.**

Special study on a particular aspect of anthropology under the supervision of an appropriate faculty member. No more than six semester hours can be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 9982. Independent Study. 1 to 12 Credit Hour.**

Specialized study and research under the supervision of a faculty member while in the coursework phase of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

Registration required each semester while preparing for the Preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 9996. Master's Essay. 1 to 12 Credit Hour.**

Students who are doing research and writing for their M.A. thesis should register for this class. Credit does not count toward either the 24 s.h. requirement for MA or the 48 s.h. requirement for the Ph.D.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Intended for students who have completed their qualifying and comprehensive exams and are preparing the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ANTH 9999. Dissertation Research. 1 to 6 Credit Hour.**

Only students elevated to candidacy and writing the dissertation should register for this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Applied Behavior Analysis (ABA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ABA 5302. Effective Teaching Strategies and Academic Interventions. 3 Credit Hours.**

This course overviews assessment and intervention strategies for learners with skill deficits. Learners with a diverse set of needs will be discussed in the course (e.g., neurotypical, autism, intellectual disability, emotional and behavioral disturbance, among others). The link between assessment and intervention will be emphasized throughout the course, with attention to effective practices for learners with diverse needs. Students enrolled in the course will learn how to select, administer, score, interpret, and report results for a variety of behavioral assessment methods that will be related to selecting interventions, monitoring student progress, and making decisions based upon data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 5303. Ethical and Legal Issues. 3 Credit Hours.**

This course is designed to introduce students to the ethical codes relevant to their discipline for students studying ABA (Behavior Analyst Certification Board Professional and Ethical Compliance Code), School Psychology (American Psychological Association Ethical Principles of Psychologists and Code of Conduct; National Association of School Psychologists Principles for Professional Ethics), and Counseling (American Psychological Association Ethical Principles of Psychologists and Code of Conduct; American Counseling Association Code of Ethics). Students will explore common ethical and legal issues such as boundaries of competence, multiple relationships, confidentiality, research, client/student rights, effective treatment, etc. Students will begin to develop a professional decision making framework for resolving ethical conflicts around such issues. Students will also become conversant with current legislation and regulations relevant to their practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 5304. Concepts and Principles of Behavior Analysis. 3 Credit Hours.**

This course provides the student with an introduction to the concepts and principles of behavior analysis. Core concepts including motivation, reinforcement, punishment, extinction, and rule governed and verbal behavior will be covered, along with examples of behavior change techniques that employ these concepts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 5305. Single Subject Research Design. 3 Credit Hours.**

This course provides an overview of strategies for designing and conducting single-subject research in special education. Competencies include selection of independent and dependent variables for research, measurement tactics, research design, establishing generality of results, and ensuring the integrity of research procedures. The methods discussed are not specific to any disability or age level; rather, they are a general set of methods for conducting and interpreting single-subject research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 5306. Organizational Behavior Management - OBM. 3 Credit Hours.**

This course is an introduction to Organizational Behavior Management, a rapidly growing field that applies the principles, methods, and empirical generalizations of Behavior Analysis to improving human performance in organizations. Working from a theoretical basis, students will learn how to diagnose performance discrepancies in organizational settings, design and evaluate appropriate behavior-based solutions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 5307. Experimental Analysis of Behavior - EAB. 3 Credit Hours.**

This course will review basic research (animal research and human operant research) in learning and behavior analysis. Students will become familiar with the basic principles of learning and behavior analysis by reading and discussing original laboratory research that lead to basic learning theories.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 5676. Applied Behavior Analysis. 3 Credit Hours.**

Introduction to the functional analysis of behavior of children in the school setting. Includes behavior theory, assessment, interaction, and evaluation. A behavior-change program is conducted.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 8787. Seminar on Verbal Behavior. 3 Credit Hours.**

Advanced course in applied behavior analysis with an emphasis on verbal behavior. Designed to provide students with an overview of verbal behavior (as defined in the field of applied behavior analysis) and an overview of its practical application in teaching language to children with diagnosed language delays.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ABA 9387. Practicum in Applied Behavior Analysis. 3 to 9 Credit Hours.**

This course is one of two required 150-hour practica within the ABA Program (6 course credits total). The goals of the practica are to: 1) Broaden your range of competencies in the field of ABA in real-life settings under the tutelage of seasoned ABA clinical or research supervisors. The range of competencies upon which you will be evaluated by your site supervisor (not this instructor) can be found at the online ABA Practicum Evaluation link: <https://education.temple.edu/aba/practicum-student-evaluation>; 2) Use practical experience to develop 3 research questions for possible exploration for your Master's Research Project, submitted through Canvas; 3) Develop ABA written presentation skills through a case presentation, submitted through Canvas; 4) Complete short discussion board assignments; 5) Build networks for future employment in our field. To this end students are encouraged to complete their practica in settings other than those in which they are presently employed. Students petitioning for an exception should first consult their advisor to provide a rationale for the exception, complete the exception form located in the master's program handbook, and then provide a plan to ensure that the practica experiences will be distinguished from their compensated duties.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ABA 9991. Applied Research Experience. 3 Credit Hours.**

This course is designed to aid students in the M.S.Ed. in Applied Behavior Analysis and other similar research-oriented programs to complete an applied research project. Students will select a research project and participate in supervised research activities including some or all of the following: developing a research question, conducting a literature review, designing a research study, conducting research sessions, developing and/or following a research protocol, collecting and/or analyzing data, reporting research results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Architecture (ARCH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ARCH 5011. Graduate Representation Intensive 1. 3 Credit Hours.**

This course focuses on the development of visual literacy, graphic techniques, and 3D formal exploration. Through projects supported by research, graphically-based exercises, and formal investigations, students will be exposed to the process of representation in architecture. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5012. Graduate Representation Intensive 2. 3 Credit Hours.**

This course focuses on the development of visual literacy, graphical techniques, and 3D formal exploration. Through projects supported by research, graphically-based exercises, and formal investigations, students will be exposed to the process of representation in architecture. Methods of 2D and 3D analog and digital representation will be addressed. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5013. Facilities for Health Workshop 1. 3 Credit Hours.**

The workshop uses interdisciplinary and collaborative approaches to address innovation in health design and facilities. The workshop focuses on human factors and dimensions, habits, and motions of the human body and human bodies as the initiator of design. As such, the workshop looks at issues such as movement, tactility, human engagement, mobility, and related factors as they relate to space and organization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5014. Facilities for Health Workshop 2. 3 Credit Hours.**

The workshop uses interdisciplinary and collaborative approaches to promote innovation in health design and facilities. The workshop focuses on the spatial and procedural functions of healthcare facilities. As such, the workshop explores relationships between small and large user-groups, equipment, and various architectural configurations within healthcare facilities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ARCH 5013.

**ARCH 5015. Facilities for the Arts Workshop 1. 3 Credit Hours.**

The workshop uses interdisciplinary and collaborative approaches to address innovation in arts facilities design and planning. The workshop focuses on human factors and dimensions, habits, and motions of the human body and human bodies as the initiator of design. As such, the workshop looks at issues such as movement, tactility, human engagement, mobility, and related factors as they relate to space and organization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5016. Facilities for the Arts Workshop 2. 3 Credit Hours.**

The workshop uses interdisciplinary and collaborative approaches to address innovation in arts facilities design and planning. The workshop focuses on the spatial and procedural functions of arts facilities. As such, the workshop explores relationships between small and large user-groups, equipment, and various architectural configurations within arts facilities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ARCH 5015.

**ARCH 5017. Facilities Workshop 1. 3 Credit Hours.**

The workshop uses interdisciplinary and collaborative approaches to address innovation in facilities design and planning. The workshop focuses on human factors and dimensions, habits, and motions of the human body and human bodies as the initiator of design. As such, the workshop looks at issues such as movement, tactility, human engagement, mobility, and related factors as they relate to space and organization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5018. Facilities Workshop 2. 3 Credit Hours.**

The workshop uses interdisciplinary and collaborative approaches to address innovation in facilities design and planning. The workshop focuses on the spatial and procedural functions of facilities. As such, the workshop explores relationships between small and large user-groups, equipment, and various architectural configurations within facilities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ARCH 5017.

**ARCH 5033. Project Planning and Programming. 3 Credit Hours.**

A course covering the general processes related to the planning, programming, design, construction and occupancy of facilities, including long range, strategic and tactical planning, the relationship between facility planning and business planning, organization of sites, buildings and interiors. Also covered are specific tools and techniques for these functions, including design and construction documentation and contracts, facility inventories, space planning and relocation management, construction and installation specifications, value engineering, post-occupancy evaluation, contract management and cost estimating techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5096. Health Facilities Practice and Management. 3 Credit Hours.**

The course exposes students to the history, development and current status of the health facilities management profession and develops understandings of the trends and dynamics of contemporary health facilities management practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ARCH 5131.

**ARCH 5122. Graduate Design Foundation Intensive. 6 Credit Hours.**

Students in this course will develop rigorous design thinking through making and the integration of material, craft, tectonic and visual practice. Development of the design crit plus methods of communicating design objectives. Scale: artifact, body and spatial envelope. Development of individual portfolio of design and graphic work as required for the M Arch degree.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5131. Form and Function in Health and Environments. 3 Credit Hours.**

The course examines the relationship of form, space, and function in healthcare facilities and environments. Using case studies of current facilities, the course looks at the role of design and particular needs for healthcare. The course examines the role of an interdisciplinary approach, where health experts, facilities and design experts, and other related professionals work together to develop state of the art healthcare facilities and environments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5132. Current Topics in Health Facilities Planning and Design. 1 Credit Hour.**

The course examines trends and best practices in health facilities planning and design. Industry experts will present and discuss their work and share relevant case studies of leading projects in healthcare design and facilities. Topics include design processes and solutions, integrated strategic planning, client and community relationships, long-term projections for facilities, and post-occupancy evaluation. Note: This course may be taken up to three times provided that there is a different instructor each time. For further information, check with your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**ARCH 5133. Current Topics in Healthy Communities and Design. 1 Credit Hour.**

The course examines the role of design for human well-being, including physical, mental, and social health. Industry experts will present and discuss their work and share relevant case studies that explore the challenges, opportunities and successful strategies to create communities that encourage healthy practices. Topics include healthy buildings; social equity; healthy transportation networks; innovative urban design; active communities and public space; food access; high performance affordable housing; air quality; secure communities; and mobility and accessibility. Note: This course may be taken up to three times provided that there is a different instructor each time. For further information, check with your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**ARCH 5134. Current Topics in Resilience and Design. 1 Credit Hour.**

The course examines trends and best practices in how to design buildings, plan communities, and construct infrastructure that persist and thrive amid predicted and unforeseen disruptions. Industry experts will present and discuss their work and share relevant case studies in the purposeful design of buildings, communities, and regions capable of maintaining livable conditions when faced with an interruption of normal services. Topics include adaptation to a wide range of impacts as a result of climate change, such as increased intensity of storms, higher precipitation, coastal and inland flooding, increased severity of droughts, wildfires, warming temperatures, power outages, and thawing permafrost. Note: This course may be taken up to three times provided that there is a different instructor each time. For further information, check with your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**Course Attributes:** SI

**ARCH 5135. Current Topics in Energy and Performance. 1 Credit Hour.**

The course examines innovative practices used to predict and measure energy usage in buildings. Industry experts will present and discuss their work and share relevant case studies that explore the challenges, opportunities and successful strategies to design energy efficient, high performance buildings. Topics include energy modeling and simulations; energy-efficient building operations; energy-related problems in buildings; and metrics of energy flows in buildings. Note: This course may be taken up to three times provided that there is a different instructor each time. For further information, check with your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**ARCH 5136. Current Topics in Fabrication and Making. 1 Credit Hour.**

The course examines innovative design and fabrication techniques. Industry experts will present and discuss their work and share relevant case studies that explore tools, processes, and techniques by which products, components, and buildings are made. Topics include digital and analog fabrication; robotics; prefabrication; prototyping; and mass production. Note: This course may be taken up to three times provided that there is a different instructor each time. For further information, check with your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**ARCH 5137. Current Topics in Visualization. 1 Credit Hour.**

The course examines innovative practices used for the visualization, representation, and documentation of objects, buildings, and environments. Industry experts will present and discuss their work and share examples of the current tools and techniques. Topics include still image production such as rendering and collage; building information modeling; augmented and virtual reality; and animation. Note: This course may be taken up to three times provided that there is a different instructor each time. For further information, check with your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**ARCH 5138. Current Topics in Materials and Design. 1 Credit Hour.**

The course examines innovative materials and their applications and use in design. Industry experts will present and discuss their work and share relevant case studies. Topics will address a range of issues related to sustainable and advanced materials include traditional and novel materials and uses; responsive materials; smart materials; haptic technologies; manufacturing innovations. Note: This course may be taken up to three times provided that there is a different instructor each time. For further information, check with your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Art Architecture, Tyler School.

**Course Attributes:** SI

**ARCH 5141. Architectural History 1: Ancient through Renaissance. 3 Credit Hours.**

Traces the history of Western architecture from the ancient world to the high renaissance and mannerism of the late 16th century. The evolution of architectural thought, various formal languages (styles) and theoretical concepts are studied through the examination of selected buildings within their specific political, social, economic, and cultural milieu. Emphasis on the analysis of the ancient temple and the Christian church. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5142. Architectural History 2: Renaissance through 20th Century. 3 Credit Hours.**

Traces the history of Western architecture from the 17th century through the 20th century. The evolution of architectural thought, various languages (styles) and theoretical concepts studied through the examination of selected buildings within their specific political, social, economic, and cultural milieu. Analysis of the significant buildings of the baroque and rococo, the neo-classic and the romantic, modernist, and post-modernism periods. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5152. Materials and Methods of Construction. 3 Credit Hours.**

Introduction to construction materials, fundamentals of building construction, methods of assembling building systems in an integrated manner, and costing. Introduces specific regulatory issues dealing with zoning regulations, building codes, and barrier-free access requirements within the context of contemporary building techniques. Methods of construction in wood, masonry, concrete, and steel are described in detail and issues of enclosure, roofing, insulation, and finishes are presented. The course carries technical drawing requirements. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5231. Graduate Design Studio 1. 6 Credit Hours.**

The house as essential site of architecture. Consideration of relationships between program, culture, society and form making at a domestic scale; consideration of structure, space, shelter and place making; methods of construction, tectonics and detailing as design concerns; introduction to precedent study as research technique. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ARCH 5122.

**ARCH 5232. Graduate Design Studio 2. 6 Credit Hours.**

Studio with environmental sustainability focus - energy and resource use, hydrology, sustainable materials, infrastructure and building methods, recycling, environmental performance and quality; emphasis on systems and details (very large and very small); development of techniques for environmental analysis (observation, data analysis etc.); development of ecological and environmentally responsive design proposals; program development; introduction to design collaboration. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ARCH 5122 and ARCH 5231)

**ARCH 5251. Structural Analysis for Architects. 3 Credit Hours.**

This course covers loadings determination and evaluation, resolution and equilibrium of force systems, truss analysis, centroids, moments of inertia, shear and bending moment diagrams, basic beam, column, and system design. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5252. Str Des for Architects 1. 3 Credit Hours.**

Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in steel and wood of simple buildings. Flexural theory including elastic and plastic design is taught. Students will be familiarized with current building design codes as they relate to the structural design of building elements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5253. Str Des for Architects 2. 3 Credit Hours.**

Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in concrete and masonry of simple buildings. Students will be familiarized with current building design codes as they relate to the structural design of building elements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5296. Movements in Modern Architecture. 3 Credit Hours.**

History and theories of the architecture and urbanism of the modern period, from the beginning of the 19th century until the 1960's. Key ideas, texts and iconic buildings from the USA, Europe and other sites of the modernist diaspora are discussed. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5351. Env Control Systems 1. 3 Credit Hours.**

This course discusses the thermal and environmental processes that affect buildings and develops techniques for designers to respond to and manipulate thermal environments in ways that are integral with other building systems. Mechanical, electrical, and plumbing systems, heating, ventilation, and air-conditioning (HVAC) equipment, vertical transportation, communication, security, and fire protection systems and introduced. These are discussed against a backdrop of the principles of sustainability and environmental responsibility.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5411. Career Preparation. 1 Credit Hour.**

In this course, students will learn essential strategies for professional career advancement including strong communication, salary negotiation, presentation, and networking skills. It will provide skills for career advancement, enabling students to increase their marketability as prospective employees.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5412. Portfolio Design and Career Preparation. 3 Credit Hours.**

This seminar will assist students in the creation of a unique and successful professional portfolio for use in job placement and career advancement. The course will provide an overview of design presentation tools necessary for effective communication. Students will also learn essential strategies for professional career advancement including strong communication, salary negotiation, presentation, and networking skills, enabling them to increase their marketability as prospective employees.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 5596. Seminar in Architectural Theory. 3 Credit Hours.**

Theories of architecture and urbanism during the modern and contemporary periods; participation in critical theoretical discussions and the development of a research paper in response to critical feedback. The course serves to lay the ground for the theoretical development of thesis ideas. Development of individual portfolio of design work, a requirement for graduate students in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8000. Spec Top Sem in Practice. 3 Credit Hours.**

Graduate level seminar to familiarize and engage students in issues of Integrated Practice. The course centers on a discussion of major impacts of practice, and the ethical issues and responsibilities that we are faced with in the current era where BIM has the potential to change the roles in built environment disciplines, and impacts of globalization and sustainability drive our needs. The course addresses changes brought on in technology and practice management. Discussion and research can span a range of issues that affect practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Course Attributes:** SF

**Repeatability:** This course may be repeated for additional credit.

**ARCH 8011. Advanced Architecture Design Studio 1. 6 Credit Hours.**

Design studio focused on civic architecture that addresses the relationship and integration of building and site. The studio introduces ideas of comprehensive design that will be addressed more fully in ARCH 8013. The studio addresses the relationship of conceptual ideas and how they are addressed through understanding natural phenomena (ex. light and air, tactility) and building tectonics. The course requires students to consider the relationship of precedent studies and design development. Students will be required to develop and advance representation and visualization techniques appropriate to the project, peer critique and self-evaluation skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8012. Elect Arch Des Studio. 6 Credit Hours.**

Advanced architectural design studio. The topic of the studio varies in accordance with faculty expertise and research focus. This might include, but not be limited to an area of architectural, spatial, social, cultural or political practice, an interdisciplinary intersection such as architecture + biology / geology / war / the media / gender or business; research into materials, energy, structure, scripting, fabrication or other computational technologies. The course develops observational techniques and data collection, management and visualization appropriate to the topic of the studio. It requires spatio / temporal / material development, resolution and representation of an architectural design strategy at appropriate scales. Collaboration with aligned fields or disciplines may be undertaken if it is appropriate to the topic of the studio. Peer critique and evaluation are utilized as learning techniques and the capacity for independent work is developed. The course must be taken once, but may be taken up to three times for required credits as long as the topic covered is substantially different each time.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 8013. Comprehensive Architecture Design Studio. 6 Credit Hours.**

Comprehensive Design Studio: the integration of structural and environmental systems, programming, tectonics and detailing into architectural design and expression in holistic and environmentally sustainable ways; comprehensive representation of design; development of time management skills, peer critique and self evaluation; interaction with consultants.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Co-requisites:** ARCH 8352.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in ARCH 5351.

**ARCH 8014. Architectural Design for Health. 6 Credit Hours.**

Advanced architectural design studio focused on design for health and health facilities. This will include understanding of human factors, equipment needs and trends, health design guidelines, design for well-being, etc. The course develops observational techniques and data collection, management and visualization appropriate to the topic of the studio. It requires spatio / temporal / material development, resolution and representation of an architectural design strategy at appropriate scales. Collaboration with aligned fields or disciplines may be undertaken if it is appropriate to the topic of the studio. Peer critique and evaluation are utilized as learning techniques and the capacity for independent and collaborative design work is developed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8015. Urban Ecologies and Design. 6 Credit Hours.**

Advanced architectural design studio focused on urban design. This will include understanding of human and community well-being in urban environments, environmental design trends, urban design guidelines, etc. The course develops observational techniques and data collection, management and visualization appropriate to the topic of the studio. It requires spatio / temporal / material development, resolution and representation of an architectural design strategy at appropriate scales. Collaboration with aligned fields or disciplines may be undertaken if it is appropriate to the topic of the studio. Peer critique and evaluation are utilized as learning techniques and the capacity for independent and collaborative design work is developed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8016. Advanced Technologies and Design. 6 Credit Hours.**

Advanced architectural design studio focused on advanced technologies in architectural design. This can include the range of current and emerging technologies in design process and implementation, visualization, etc. The course develops observational techniques and data collection, management and visualization appropriate to the topic of the studio. It requires spatio / temporal / material development, resolution and representation of an architectural design strategy at appropriate scales. Collaboration with aligned fields or disciplines may be undertaken if it is appropriate to the topic of the studio. Peer critique and evaluation are utilized as learning techniques and the capacity for independent and collaborative design work is developed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8096. Professional Practice. 3 Credit Hours.**

The course is required for internship in the architectural profession. It exposes students to the history, development and current status of the architectural profession and professional education and develops understandings of the trends and dynamics of contemporary architectural practice. It discusses what is required to properly serve clients and the common good; how to pursue, win, negotiate and prepare agreements and contracts; how to organize, manage, design, control costs, produce and administer contracts for the construction of architectural projects and how to organize, build and maintain architectural firms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8100. Spec Top Case St in Arch. 3 Credit Hours.**

Graduate level seminar that centers on comprehensive case studies in architecture as a form of primary research. The seminar discussion and research will focus on architectural works with the aim of learning about important aspects and overlaps that make architecture. In each case, the topics that drive the research and analysis will vary. Topics and issues will be guided by class discussion and the nature, scale and context of the architectural works. The course will address methods of analysis and techniques for visualization and presentation. It requires active participation in class discussions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 8131. Arch Research Seminar 1. 3 Credit Hours.**

Graduate level research seminar to familiarize and engage students in an area of contemporary urban research, its history, networks, strategies and techniques. It will develop methods and skills for the research and analysis of urban systems, economies, structures, infrastructures, spaces and / or cultures and techniques to visualize data and present research findings. The topic of the seminar varies in accordance with faculty expertise and research focus and might include, but not be limited to, approaches to sustainable urban development, ludic urban design strategies, advocacy based urbanism, user generated cities, computational urbanism, etc. The course takes a seminar format and requires active participation in class discussions. The course is required to be taken once in conjunction with ARCH 8011, but may be taken again for elective credit provided that the topic covered is different each time.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Course Attributes:** SI

**Repeatability:** This course may be repeated for additional credit.

**ARCH 8132. Arch Research Seminar 2. 3 Credit Hours.**

Graduate level seminar to familiarize and engage students in an area of contemporary architectural research, its history, networks, strategies, techniques. The topic of the seminar varies in accordance with faculty expertise and research focus. This might include, though not be limited to, questions about research as architectural practice, about architectural design as research, about architectural history, about architecture as spatial or political practice, or engage in any one of the interdisciplinary intersections currently re-energizing architecture - architecture + biology / war / media studies / post-colonial studies / gender studies / business etc. The course will develop methods and skills for architectural research and analysis and techniques for data visualization and research presentation. The course takes a seminar format and requires active participation in class discussions. The course is required to be taken once, but may be taken again for elective credit provided that the topic covered is different each time

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 8133. Arch Research Seminar 3. 3 Credit Hours.**

Graduate level seminar to familiarize and engage students in contemporary research in an area of architectural technology, its history, networks, strategies and techniques. The topic of the seminar varies in accordance with faculty expertise and research focus. This might include, though not be limited to materials research, energy research, structural research, fabrication, computational technologies, etc. The course will examine the history of the field, develop methods and skills for research and analysis and techniques for data visualization and research presentation. The course takes a seminar format and requires active participation in class discussions. The course is required to be taken once, but may be taken again for elective credit provided that the topic covered is different each time.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 8134. Architecture Research Seminar 4 - Urban Innovations: Technology, Environment and Health in Society. 3 Credit Hours.**

Graduate level research seminar to familiarize and engage students in an area of current and future trends and innovations in the urban context with a focus on technology, environment, and health. It will develop methods and skills for the research and analysis of urban systems, economies, structures, infrastructures, spaces and / or cultures and techniques to visualize data and present research findings. The topic of the seminar includes approaches to innovation and the integration of technology, natural and designed systems, strategies for a holistic approach to sustainability and healthy cities, human and environmental health and well-being. The course takes a seminar format and requires active participation in class discussions. The course is required to be taken by students in the Architecture for Health concentration of the MS Architecture degree and is an elective for other students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8146. Graduate Field Work Report. 1 Credit Hour.**

This course requires that students prepare an independent report of their study abroad, field work, or internship experience in a format that is agreed upon with the course coordinator.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 8233. Arch Des St Tokyo (G). 6 Credit Hours.**

A complex design investigation incorporating analysis of urban systems, observational research, data collection and analysis and the study of architectural precedents. The course immerses students in a foreign urban and architectural culture and asks them to engage in a complex design investigation, whose topic and scale is variable. Course may be used as equivalent of ARCH 8012 but may only be taken once.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8234. Arch Des Studio Rome (G). 6 Credit Hours.**

A complex design investigation incorporating analysis of urban systems, observational research, data collection and analysis and the study of architectural precedents. The course immerses students in a heritage urban and architectural locale and asks them to engage in a complex design investigation, whose topic and scale is variable. Course may be used as equivalent of ARCH 8012 but may only be taken once.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8241. Seminar: Analysis Urb Str (G). 3 Credit Hours.**

Research on urban systems and forms that have marked the development of Italian and Roman architecture from the 15th to the 18th century and that are now a reference point in every Western city: the piazza, the Roman palazzo, the theatre, the garden. The course is intended as a theoretical and analytical complement to the graduate architecture design studio in Rome. It fulfils the requirements of ARCH 8132.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8242. Urban Seminar Tokyo (G). 3 Credit Hours.**

This course provides students an overview of architecture and urbanization in historic and contemporary Japan. Economic, socio- political and technological forces that have shaped the built environment and architecture are discussed and the work of contemporary Japanese architects are studied and analyzed. The course is a theoretical and analytical complement to the Architecture Design Studio. It fulfils the requirements of ARCH 8132.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may not be repeated for additional credits.

**ARCH 8352. Environmental Control Systems 2. 3 Credit Hours.**

This course covers visual and audio environmental stimuli and architectural design responses to them. In addition, it discusses and introduces techniques for measuring the design of building systems for improved environmental performance, in terms of the efficiency of systems, environmental impact and capital and operational costs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Co-requisites:** ARCH 8013.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in ARCH 5351.

**ARCH 9182. Independent Study in Architecture. 1 to 3 Credit Hour.**

Graduate level independent study carried out by students interested in research that focuses on the various subdisciplines in architecture. Students must submit a proposal to a faculty member for review and approval that follows departmental guidelines for independent study. Topics and issues that guide the independent study can vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9280. Special Topics in Communication. 1 to 3 Credit Hour.**

Graduate level course that addresses current topics in graphic and visual communication in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9285. Architecture Internship. 1 to 3 Credit Hour.**

This course expands students' knowledge and professional experience through internships in architectural and other built environment firms. Students will be exposed to methods of practice and design thinking. The course requires that the student prepare a report in a format agreed upon with the course coordinator.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9380. Special Topics in History or Culture. 1 to 3 Credit Hour.**

Graduate level course that addresses current topics related to architectural history and/or cultural studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9480. Special Topics in Technology. 1 to 3 Credit Hour.**

Graduate level course that addresses current topics in digital or building technology in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9580. Special Topics in Site and Context. 1 to 3 Credit Hour.**

Graduate level course that addresses current topics in site and context in architecture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9682. Independent Research. 1 to 3 Credit Hour.**

Graduate level independent research in architecture. Students work with a faculty member according to an agreed upon syllabus and schedule. Topics and issues that guide the course work will vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9991. Directed Research. 3 Credit Hours.**

The development of a self motivated architectural design inquiry under the guidance of a faculty co-coordinator. This includes design research, the development of a design program, site investigation, analytical and speculative design investigations and / or experimentation with advanced visualization techniques. The course is seminar based and engages students in critical dialogue with their own and other students' work. It prepares students for undertaking an architectural design thesis the following semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may be repeated for additional credit.

**ARCH 9996. Architecture Design Thesis. 1 to 6 Credit Hour.**

Self directed architectural design thesis that follows on the research and design inquiries conducted in the fall semester. The course requires that students demonstrate the ability to undertake design research, develop a design program, conduct analytical and speculative design investigations and utilize advanced visualization techniques in the representation of their work. It culminates in a formal juried presentation and a textual document of a publishable standard of a graduate level design thesis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Architecture.

**Repeatability:** This course may be repeated for additional credit.

## Art (ART)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ART 5010. Special Topics in Art. 3 Credit Hours.**

In this studio art course, approaches to making and understanding images, objects and experiences in various media will be addressed. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5082. Independent Study. 1 to 3 Credit Hour.**

Self-directed study and research for graduate students in art developed in conjunction with, and supervised by, a full-time faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5110. Special Topics in Ceramics. 3 Credit Hours.**

Selected topics in ceramics. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5161. Graduate Photo Workshop: Digital Photography. 3 Credit Hours.**

State of the art technology merges with new issues related to digital imaging.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5203. Crash Course in Fibers and Material Studies. 3 Credit Hours.**

Offered to any Graduate Students at Temple, this class introduces interdisciplinary students to the Fibers studio. This course will review the tools and materials at the students' disposal, tailored to their practice, and access the studios.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ART 5210. Special Topics in Fibers and Material Studies. 3 Credit Hours.**

Selected topics in fibers and material studies. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5310. Special Topics in Glass. 3 Credit Hours.**

Selected topics in glass. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5401. Metals Workshop. 3 Credit Hours.**

A study of the work of internationally recognized metalsmiths leads to discussions of the philosophical bases of contemporary metalwork.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ART 5410. Special Topics in Metals and Jewelry. 3 Credit Hours.**

Selected topics in metals and jewelry. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5510. Special Topics in Painting. 3 Credit Hours.**

Selected topics in painting. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5604. Photographic Lighting. 3 Credit Hours.**

At the core of any commercial or fine art photographer's practice is an in-depth understanding of lighting. Light is the fundamental element that makes a photograph possible, and every successful photographer's control over light is the key to their success. This course will not only focus on allowing you to gain a thorough understanding of artificial lighting techniques, but also how to approach natural light situations better, and beyond that, to an understanding of how the two work in conjunction. By revisiting the fundamentals of the large format view camera, and developing an understanding of environmental and situational lighting techniques, you will learn different commercial and fine art approaches to working in a studio setting. You will also learn lighting techniques with digital and medium formats, as well as develop an understanding regarding the differences between digital capture and negative film. In addition this course will cover advanced exposure control, lighting on location, and product lighting. Note: This course is repeatable for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5606. Digital Projects. 3 Credit Hours.**

The emphasis of this course will be on creating a professional digital portfolio. Throughout the semester, students will learn a series of multimedia software applications and develop interactive presentations that will promote themselves as artists with contemporary and professional portfolios. Note: The course is limited to seniors and graduate students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5607. Contemporary Photography. 3 Credit Hours.**

We live in an extraordinary moment in the history of photography, a moment much hoped for and anticipated by many champions of the medium. Finally one can say without qualification that photography is a medium fully embraced by the contemporary art world. While there has always been a movement to look at and discuss photography as art, photography has never played a more central, critical and vital role in contemporary art than it does now. This course will look at both the role that photography plays in contemporary art and the role that contemporary art plays in photography. By surveying contemporary trends in photography, students in this class will develop an understanding of what exactly photography is now. At the same time the class will attempt to answer questions about what it means to be contemporary, about what the relationship between the contemporary and the historical is, and why this might be important. Through these problems students will be encouraged to develop personal work that addresses themes and ideas discussed in the class. Note: Open to Junior/Seniors. Special authorization required for non-majors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5610. Special Topics in Photography. 3 Credit Hours.**

Selected topics in photography. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5612. Graduate Photo Process Workshop. 3 Credit Hours.**

Survey of experimental techniques, including hand applied, light-sensitive emulsions, ortho film making, photographic book arts, and 19th- and 20th-century processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5710. Special Topics in Printmaking. 3 Credit Hours.**

Selected topics in printmaking. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 5810. Special Topics in Sculpture. 3 Credit Hours.**

Selected topics in sculpture. Each topic will be addressed through contextual, procedural, material and critical lenses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8001. Graduate Professional Practices. 3 Credit Hours.**

This course provides MFA students with insight into professional studio practices and the transition to post-MFA endeavors. It may include preparation and submission of materials for the MFA thesis exhibition, developing and refining an artist's statement, and other strategies that students can use to present their work and ideas to external audiences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ART 8004. Critique and Critical Discourse I. 3 Credit Hours.**

Presenting work from their major area of study, students will engage in a critical dialogue regarding the development of their studio practice with peers from across the MFA degree programs. This presents the opportunity to develop skills in articulating the direction of their work, practice responding to questions in an extemporaneous manner, and contextualize their work in history, culture, and society. Conversely, students will be active participants in providing feedback and assessment of their peers in the class. Both scenarios will enhance the students' ability to observe, feel, evaluate, and reflect on artistic practice, and develop the written and verbal communication skills to share that information with others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ART 8005. Critique and Critical Discourse II. 3 Credit Hours.**

Presenting work from their major area of study, students will engage in a critical dialogue regarding the development of their studio practice with peers from across the MFA degree programs. This presents the opportunity to develop skills in articulating the direction of their work, practice responding to questions in an extemporaneous manner, and contextualize their work in history, culture, and society. Conversely, students will be active participants in providing feedback and assessment of their peers in the class. Both scenarios will enhance the students' ability to observe, feel, evaluate, and reflect on artistic practice, and develop the written and verbal communication skills to share that information with others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ART 8083. Graduate Projects: Painting and Sculpture. 3 to 6 Credit Hours.**

Creative studies for the master's degree candidate whose progress is reviewed in individual and group critiques. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8084. Graduate Projects: Painting and Sculpture II. 3 to 6 Credit Hours.**

Creative studies for the master's degree candidate whose progress is reviewed in individual and group critiques. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8101. Graduate Projects: Ceramics I. 3 to 6 Credit Hours.**

Creative studies in ceramics for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8102. Graduate Projects: Ceramics II. 3 to 6 Credit Hours.**

Creative studies in ceramics for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8201. Graduate Projects: Fibers I. 3 to 6 Credit Hours.**

Creative studies in fibers for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8202. Graduate Projects: Fibers II. 3 to 6 Credit Hours.**

Creative studies in fibers for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8301. Graduate Seminar, Ceramics/Glass/Fibers. 3 Credit Hours.**

Creative studies and discussions related to career concerns in these fields. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8302. Graduate Seminar, Ceramics/Glass/Fibers II. 3 Credit Hours.**

Creative studies and discussions related to career concerns in these fields. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8303. Graduate Projects: Glass I. 3 to 6 Credit Hours.**

Creative studies in glass for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8304. Graduate Projects: Glass II. 3 to 6 Credit Hours.**

Creative studies in glass for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8401. Graduate Seminar, Metals. 1 to 3 Credit Hour.**

A study of the work of internationally recognized metalsmiths leads to discussions of the philosophical bases of contemporary metalwork. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8402. Graduate Seminar, Metals II. 1 to 3 Credit Hour.**

A study of the work of internationally recognized metalsmiths leads to discussions of the philosophical bases of contemporary metalwork. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8403. Graduate Projects: Metals I. 3 to 6 Credit Hours.**

Creative studies in the areas of Metals, Jewelry and CAD/CAM for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8404. Graduate Projects: Metals II. 3 to 6 Credit Hours.**

Creative studies in the areas of Metals, Jewelry and CAD/CAM for the master's degree candidate. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8501. Graduate Drawing. 3 Credit Hours.**

Exploration of individualized approaches to materials and ideas as they pertain to contemporary issues in drawing. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8502. Graduate Drawing II. 3 Credit Hours.**

Exploration of individualized approaches to materials and ideas as they pertain to contemporary issues in drawing. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8506. Theories of Visual Representation. 3 Credit Hours.**

Various readings in contemporary art issues or art theory are studied and discussed. Students are encouraged to bring up topics of personal interest.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8507. Graduate Seminar. 3 to 6 Credit Hours.**

Various readings in contemporary art issues or art theory are studied and discussed. Students are encouraged to bring up topics of personal interest. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8508. Graduate Seminar: Painting. 3 Credit Hours.**

Creative studies for the master's degree candidate whose progress is reviewed in individual and group critiques. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8509. Graduate Seminar II. 3 to 6 Credit Hours.**

Various readings in contemporary art issues or art theory are studied and discussed. Students are encouraged to bring up topics of personal interest. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8511. Graduate Painting Seminar II. 3 Credit Hours.**

Creative studies for the master's degree candidate whose progress is reviewed in individual and group critiques. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8583. Graduate Projects: Painting I. 3 to 6 Credit Hours.**

Creative studies for the master's degree candidate whose progress is reviewed in individual and group critiques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8584. Graduate Projects: Painting II. 3 to 6 Credit Hours.**

Creative studies for the master's degree candidate whose progress is reviewed in individual and group critiques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8601. Graduate Seminar in Photography. 3 Credit Hours.**

A seminar emphasizing individual research and group discussion of contemporary issues in photography. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8602. Graduate Seminar in Photography II. 3 Credit Hours.**

A seminar emphasizing individual research and group discussion of contemporary issues in photography. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8683. Graduate Projects: Photography I. 1 to 12 Credit Hour.**

Individual conferences and group seminars. Emphasis on mastery of conceptual and technical practices with lens-based media.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8684. Graduate Projects: Photography II. 1 to 12 Credit Hour.**

Individual conferences and group seminars. Emphasis on mastery of conceptual and technical practices with lens-based media.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8701. Graduate Seminar in Printmaking. 3 Credit Hours.**

Philosophy and theory of contemporary printmaking practices. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8702. Graduate Seminar in Printmaking II. 3 Credit Hours.**

Philosophy and theory of contemporary printmaking practices. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8783. Graduate Projects: Printmaking I. 3 to 12 Credit Hours.**

Individual conferences and group seminars. Emphasis on diversity of command in several printmaking media. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8784. Graduate Projects: Printmaking II. 3 to 12 Credit Hours.**

Individual conferences and group seminars. Emphasis on diversity of command in several printmaking media. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8801. Graduate Seminar: Sculpture. 3 to 6 Credit Hours.**

This class gives the graduate student a chance to formally meet with their peers in a group critique situation to discuss their own work or that of their classmates. Individual meetings with the instructor are another component. The class also makes visits to emerging artists' studios in New York and Philadelphia. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8802. Graduate Sculpture Seminar II. 3 to 6 Credit Hours.**

This class gives the graduate student a chance to formally meet with their peers in a group critique situation to discuss their own work or that of their classmates. Individual meetings with the instructor are another component. The class also makes visits to emerging artists' studios in New York and Philadelphia. Note: This course can only be taken twice for credit.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Painting, Sculpture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8883. Graduate Projects: Sculpture I. 3 to 6 Credit Hours.**

This class gives the graduate student a chance to formally meet with their peers in a group critique situation to discuss their own work or that of their classmates. Individual meetings with the instructor are another component. The class also makes visits to emerging artists' studios in New York and Philadelphia. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8884. Graduate Projects: Sculpture II. 3 to 6 Credit Hours.**

This class gives the graduate student a chance to formally meet with their peers in a group critique situation to discuss their own work or that of their classmates. Individual meetings with the instructor are another component. The class also makes visits to emerging artists' studios in New York and Philadelphia. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 8985. Teaching in Higher Education. 3 Credit Hours.**

This course enhances knowledge of how people learn and encourages participants to expand and diversify teaching methods. The course requires class discussion of readings and activities, provides individualized feedback on assignments, and opportunities for self-reflection along with reflection from the learning community of colleagues. The course will also address discipline-specific considerations of teaching studio art and design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ART 8986. Teaching Effectively in the Creative Disciplines. 3 Credit Hours.**

In this course, we will focus specifically on the particular needs of the creative arts classrooms and studios, and how our pedagogical choices can lead our students to develop as professionals in our creative fields. Building on the tools we have gained in the first course of the certificate, we will think deeply about how to develop students' creative process and product, as well as their ability to articulate their vision and evaluate others' work in an informed manner. This course will help teachers employ strategies that explore motivation, encourage reflection and criticality, and help their students build a context for the creative and design lessons they undertake.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in EPSY 8985 and EPSY 8960 (may be taken concurrently)

**ART 9184. Graduate Thesis Exhibition: Clay. 3 Credit Hours.**

The culminating visual presentation of the candidates' creative research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 9195. Graduate Thesis Research: Ceramics and Glass. 3 Credit Hours.**

Research projects in the areas of teaching or technology are developed in consultation with the candidates' professor and advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 9202. Graduate Thesis Research: Fibers. 3 Credit Hours.**

Research projects in the areas of teaching or technology are developed in consultation with the candidates' professor and advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 9284. Graduate Thesis Exhibition: Fibers. 3 Credit Hours.**

For graduate students in the Fibers area, working toward their M.F.A. degree. This course is required in the fourth semester of their residency. The work in this course is to culminate in the thesis exhibition.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B in ART 9202 and minimum GPA of 3 in: courses numbered 5000 to 9999.

**ART 9384. Graduate Thesis Exhibition: Glass. 3 Credit Hours.**

The culminating visual presentation of the candidates' creative research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 9401. Graduate Thesis Research: Metals. 3 Credit Hours.**

Research projects in the areas of teaching, history, or technology are developed in consultation with the candidates' professor and advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 9484. Graduate Thesis Exhibition: Metals. 1 to 3 Credit Hour.**

The culminating visual presentation of the candidates' creative research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ART 9991. Directed Studio Practice. 3 Credit Hours.**

In conjunction with Graduate Projects, Directed Studio Practice forms the core studio practice and research components of the MFA degree program in the studio arts. The course is driven by independent study and research, under the mentorship of a faculty member in your core studio discipline.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**ART 9995. Master of Fine Arts Thesis. 1 to 3 Credit Hour.**

In conjunction with Graduate Projects, Master of Fine Arts Thesis is the culmination of the core studio practice and research components of the MFA degree program in the studio arts. The course is driven by independent study and research, under the mentorship of a faculty member in your core studio discipline, culminating in the Thesis Exhibition in the final semester of study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

## Art - Japan Campus (ARTU)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ARTU 5301. Introduction to Relief Painting. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTU 5601. Introduction to Computer Imaging. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTU 5605. Introduction to Internet Imaging. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTU 5801. Basic Photography Black and White I. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTU 5811. Introduction to Digital Photography. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Art Education (ARTE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ARTE 5003. Inclusive Art Education K-12 Students in the Art Room. 3 Credit Hours.**

Learn about the scope of different disabilities that may present themselves in the art room including intellectual, learning, and physical disabilities; and visual, hearing, emotional, and behavior disorders. Effective instructional strategies for inclusive practices to meet the unique, diverse learning and special educational needs of K-12 students in the art room, including methods of assessment and accommodations are explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Co-requisites:** ARTE 5888.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ARTE 9187.

**ARTE 5082. Independent Study. 1 to 3 Credit Hour.**

Self-directed study and research initiated by a graduate student with an independent study contract developed in conjunction with, and supervised by, a faculty member in the art education and community arts practices department.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTE 5100. Special Topics. 3 Credit Hours.**

A selected topic in the field of art, art education, art therapy or community arts will be examined. NOTE: Field trips may be required for this class.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTE 5202. Teaching Artists. 3 Credit Hours.**

This course offers graduate students from all arts and culture fields an overview of the teaching artist profession. Teaching artists work in art centers, community-based arts programs, health facilities, senior centers, prisons, museums, in-school and out-of-school sites. Direct fieldwork and site-specific research will examine the intersections of one's personal art practices and community-based art education. The experiential component will be accompanied by scholarly inquiry into the role and relevance of artistic engagement in public life. Course material will encompass the history of the teaching artist profession, theory and practice with emphasis on pedagogical approaches, survey of settings and practical applications. The course will equip students with tools that can be used in developing and marketing arts residencies in multiple settings. Guest presentations by teaching artists and community arts administrators will be included in this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**ARTE 5888. Student Teaching. 6 Credit Hours.**

Students assume responsibility for direction of classes and lesson planning in both elementary and secondary schools. The practical experience is enriched through seminar discussions focusing on the enterprise of teaching. NOTE: Application Materials must be submitted during pre-registration the semester prior to taking the course. Meeting with the Art Education advisor is recommended.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Co-requisites:** ARTE 5003.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in ARTE 9187.

**ARTE 8001. Contemporary Issues in Art Education. 3 Credit Hours.**

A seminar designed to examine some of the current literature in the field of Art Education together with its problems and the fundamental concepts derived from related disciplines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTE 8002. History of Art Education. 3 Credit Hours.**

A historical and philosophical overview of art teaching traditions and beliefs in American schools, with special emphasis on the late nineteenth and early twentieth centuries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTE 8003. Art Education Research. 3 Credit Hours.**

Sessions arranged through consultation with the advisor. Examination of the traditional and current designs related to descriptive, empirical, and experimental studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTE 8004. Introduction to Art Therapy. 3 Credit Hours.**

This course is designed to offer students a didactic and experiential introductory overview of the field of art therapy. Material covered will include history, theory, and practice of art therapy processes and approaches as well as a survey of populations, settings, and applications. Lectures, readings, discussion, audiovisual presentations, experiential exercises, and guest presentations comprise the structure of this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTE 8011. Interdisciplinary Seminar in Community Arts. 3 Credit Hours.**

An introduction to the field of Community Arts, focusing on history and theory, and bringing students into contact with established community arts projects in Philadelphia through site visits and guest lectures. Issues of aesthetics, race and social class are an implicit part of community-based arts practices and are a focal point of the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTE 8087. Research and Project Planning Seminar in Community Arts. 3 Credit Hours.**

Working with faculty artists in a particular community, students engage in community data collection using methodologies of personal interviews, observation, and background cultural research with a focus on relationship building. Research findings are integrated to address emerging themes through conceptual design of an art project in a research paper outlining key community themes/issues and proposed art projects. Students will document community knowledge and oral histories and share stories with members of community. Stories will be incorporated into artworks that reflect community traditions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in ARTE 8011.

**ARTE 8187. Field Work in Community Arts. 3 Credit Hours.**

Students work with artists in partnership with local community arts programs, organizations, and families, collaborating in the creation of a community arts production. In the weekly seminar, students reflect on their practice, receive supervision and conduct team research to develop their contributions to community arts projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in ARTE 8011 and ARTE 8087.

**ARTE 8287. Evaluation and Documentation Seminar in Community Arts. 3 Credit Hours.**

In this course students will learn and apply methods for evaluation and ongoing work in the phase of Community Arts projects which follows public exhibition/performance, including assessment of artistic process, product, and community impact; approaches to continuing community involvement, and transitioning of project ownership to the community. The course offers students a variety of media for documenting and assisting community members to document Community Arts projects that may take the form of of scholarly articles, video and audio documentary, community feedback and personal essays/journals that contribute knowledge to the field of Community Arts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in ARTE 8011, ARTE 8087, and ARTE 8187.

**ARTE 9187. Graduate Materials and Methods in Art. 3 Credit Hours.**

Aims of art education as related to elementary and secondary curricula. A weekly school assignment in which the student both observes an art class and serves as an aide to the teacher.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B in EPSY 5541 and EPSY 5531.

**ARTE 9991. Directed Research. 1 to 3 Credit Hour.**

Directed Research while still in the coursework phase of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTE 9995. Master's Thesis Research & Writing. 1 Credit Hour.**

In this course, Master's students in Art Education will work closely with a faculty member on research and writing of the Master's Thesis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B in (ARTE 8001, ARTE 8002, and ARTE 8003)

## Art History (ARTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ARTH 5097. Graduate Design: Graduate Design Theory. 3 Credit Hours.**

This course will introduce students to contemporary design theories and discourse. It will examine the theoretical aspects of artifacts through their making, reading, and dissemination. Graphic design and communication theories will be compared to those in literature and architecture. Students will use discussion, writing, presentations, and design to investigate contemporary design issues. Emphasis will be placed on forming and articulating an individual point of view in discussion and writing. Based on the semester-long discussion about how we visually communicate, all students will draw a revised diagram of the Communication Model developed by Meredith Davis in 2012. Students will also write a 1000-word reflection on the factors that have influenced this eight-year evolution.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 5350. Topics in Arts Administration. 3 Credit Hours.**

Selected topics in arts administration, focusing on contemporary arts of interest, such as mission, values and community; philanthropy in arts administration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5351. Introduction to Arts Management Practice: Mission, Values and Community. 3 Credit Hours.**

Arts Administration describes a vibrant scope of thought and activity that kindles and advances creativity, connects artists and audiences, and creates programs and policies that enhance intellectual and civic life. This course provides an introduction to institutional (and anti-institutional) models, and skills that support creation, exhibition, public education and community building through art including: museums, exhibition spaces, collectives, philanthropies, community arts centers and residencies. The aesthetic, demographic and political dynamics shaping the current cultural moment challenge the field to reexamine its history, practices, foundational assumptions, operations and programs and the ways in which leadership is expressed. Therefore, our exploration of the fundamentals of budgeting, finance, governance, policy, the role of philanthropy, management and operations will be framed by current questions of mission, institutional ethics, cultural equity, access and service. The focus will be on non-profit cultural models, both traditional and emerging, but the course will also touch on characteristics shared with "for-profit" creative enterprises and how cultural trends influence relationships between the commercial and non-profit sectors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 5360. Topics in Latin American Art. 3 Credit Hours.**

A selected topic on Latin American, Caribbean, and U.S. Latinx art and visual culture will be examined. Topics can range from colonial and post-Independence to modern and contemporary art with a focus on the intersections of race, gender, ethnicity, and class.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5370. Topics in Contemporary Art. 3 Credit Hours.**

A selected topic on contemporary art and visual culture will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5380. Topics in Global Art. 3 Credit Hours.**

A selected topic on global art and visual culture will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5390. Topics in Islamic Art. 3 Credit Hours.**

This course provides students with an introduction to the art and architecture of the Mediterranean and Middle East during the first centuries of Islam, ca. 650-1250 - a vibrant period that witnessed the emergence of one of the world's most wide-spread and enduring faith traditions. Through the investigation of key objects and architectural monuments, students will be trained to analyze how aspects of visual culture and the built environment relate to the social and political contexts in which they were produced. Particular emphasis will be placed on the establishment of new spatial and visual vocabularies, the legacies of earlier artistic traditions in the formation of Islamic art, as well as cross-cultural exchange between the Islamic world and its neighbors (particularly Western Europe and East Asia). We will also address the importance of modern interpretations of early Islamic art, especially the politics of collecting and museum display. In addition to lectures, students will meet with the instructor for an additional hour every week to discuss advanced readings. They will also be asked to take a midterm and final exam, which will account for 30% of their final grade. The remaining portion of their grade will be dedicated to developing a research paper (ca. 20 pages), the topic of which will be determined in consultation with the instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5400. Topics in Art History. 3 Credit Hours.**

Selected topics in art history. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5403. History of Modern Crafts and Design. 3 Credit Hours.**

This course will examine the interwoven histories of craft and design in the 20th and 21st centuries, looking in particular at how craft and design both mirror the various artistic, cultural, political, social, and technological contexts in which they are created, and have the capacity to critique and change those contexts. Taking a thematic approach, students will not only gain familiarity with influential objects, makers, materials, and movements from around the world, but also explore relevant topics and frameworks including production and consumerism, sustainability, popular culture, activism and reform, intersectionality, and accessibility via craft and design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 5405. History of Photography. 3 Credit Hours.**

Examination of key developments in the history of modern photography.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 5408. The History of Printmaking and Print Culture. 3 Credit Hours.**

The invention of the printing press in western Europe in the 1400s contributed to important and lasting changes about how people thought about images and image-making. In addition to gaining an understanding of the technical processes involved in the production of books, woodcuts, engravings, etchings, and lithographs, students will focus on the social and economic facets of print communication as an aesthetic and as a compelling component of visual culture. The course is designed chronologically but also according to themes and major artists, with the aim of relating the history of print and book culture to some of the broader cultural and artistic concerns of the period. Some of the central issues we shall discuss are the relationship between manuscript and early book production; the nature of the 'original' vs. the 'copy'; the space of prints as a realm for experimentation and new subject matter; the role of collaboration and also individual graphic virtuosity; and the modern 'print revivals' of the 19th and 20th centuries. We also shall reevaluate certain myths about the so-called printing revolution, poised as we are in a new digital age defined as another kind of explosion of images. Major figures we will study in terms of graphic virtuosity are Andrea Mantegna, Albrecht Dürer, Jacques Callot, Hendrick Goltzius, Rembrandt van Rijn, Giovanni Battista Piranesi, Francisco Goya, Edouard Manet, James Abbott McNeill Whistler, Mary Cassatt, Edvard Munch, and Käthe Kollwitz.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 5460. Topics in Contemporary Art. 3 Credit Hours.**

Selected topics in contemporary art will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5470. Topics in the Arts of the African Diaspora. 3 Credit Hours.**

A selected topic in the arts of the African diaspora. Topics can range from the early modern period to contemporary art.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Master of Education, Master of Fine Arts, Doctor of Philosophy.

**ARTH 5500. Topics in Art History II. 3 Credit Hours.**

Selected topics in art history. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5510. Topics in Ancient Art. 3 Credit Hours.**

Selected topics in ancient art. Recent topics have included Greek Vase Painting, Greek Architecture, Minoan and Mycenaen Art, Hellenistic and Roman Sculpture, Greek and Roman Monumental Painting, and Curating an Exhibition on the History of Archaeological Illustration. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5520. Topics in Medieval Art. 3 Credit Hours.**

A select specialized topic in the visual culture of the Middle Ages will be explored. Field Trips are mandatory for this class.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5530. Topics in Renaissance Art. 3 Credit Hours.**

Recent or planned topics include Artistic Exchange between Italy and Northern Europe; Mannerism Redefined; Color and Meaning in Painting; Renaissance Architecture; Bernini, Caravaggio, and Velasquez; Michelangelo; and The Sacred Image in the Renaissance: Crisis and Resolution. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5540. Topics in Early Modern Art. 3 Credit Hours.**

Selected topics in the art of the early modern period. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 5550. Topics in 19th-Century Art. 3 Credit Hours.**

Recent and planned topics include Manet and 19th century French Criticism; Impressionism and Post-Impressionism; Pre-Raphaelite Painting; Symbolism; Depicting Race; and American Cosmopolitans: Art and Modernity in the Gilded Age, 1870-1913. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5560. Topics in 20th-Century Art. 3 Credit Hours.**

Recent and planned topics include Art since 1945; Dada and Surrealism; Futurist Art and Theory; and Picasso, Matisse, Duchamp, and Brancusi. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5601. Historiography of Art History. 3 Credit Hours.**

Study of key methods and critical approaches in art history.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 5621. Archeological Program. 3 Credit Hours.**

Study in Ancient Art and Archaeology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5630. Topics in Renaissance Art II. 3 Credit Hours.**

Recent or planned topics include Artistic Exchange between Italy and Northern Europe; Mannerism Redefined; Color and Meaning in Painting; Renaissance Architecture; Bernini, Caravaggio, and Velasquez; Michelangelo; and The Sacred Image in the Renaissance: Crisis and Resolution. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5660. Topics in Modern and Contemporary Art. 3 Credit Hours.**

Selected topics in modern and contemporary art will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 5665. Modern and Contemporary Art in Latin America. 3 Credit Hours.**

This course examines art in Latin America from 1900 to the present. Covering a period of tumultuous societal change in the region, from revolutions to economic booms and military dictatorships, discussions will focus on understanding the distinct contexts of artistic production in various Latin American centers, with particular attention to the artists and artistic movements of Brazil and Mexico and including consideration of major architectural projects. We will examine how artists conceived of their work in relationship to local and international aesthetic and political debates. Students will read criticism and artists' writing from the period as well as recent theory and historical analysis and attention will be placed on developing skills to analyze a range of media and styles, including figurative and abstract practices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 5670. Topics in Contemporary Art. 3 Credit Hours.**

A selected topic on contemporary art and visual culture will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 8401. Text + Image: Framing the Modern Illustrated Book. 3 Credit Hours.**

Text or Image? Art or Craft? Page or Book? Essential or Ancillary? As these pairings propose, illustration engages the viewer in complex interrelated processes and hence functions very differently than other art forms. Image and text operate both independently and in combination as signifiers. Perhaps that is partially why we lack a critical framework with which to assess illustrated books. In this online course, we will use digital tools and collaborative technologies to develop evaluative criteria for the illustrated book and then apply this critical framework to an individually-selected case study. The seminar will also assess relevant factors impacting the development of illustrated books, such as cultural diffusion and interchange; patterns of literacy and education; production markets and aesthetic value of craft. Additionally, in the last part of the course, the focus will shift to book illustration in the period after 1850, addressing publishing technologies as well as noteworthy avant-garde exemplars. This has been created as an online course, which allows for a greater flexibility in the student's schedule; it may be adjusted for full classroom or hybrid. NOTE: Designed especially for current students enrolled in the MFA programs, in particular students of Graphic Design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 8402. Introduction to Critical Thinking and Practice. 3 Credit Hours.**

Students will explore major critical theories in the context of globalism, ethics, race/class, environment, and history of art. Students will obtain a basic familiarity with major critical theorists, authors, and thinkers, learning how to put the ideas from these thinkers in historical, economic, and political contexts. They will apply critical theory to creative practices, including their own. The course is partly lecture-based and partly discussion-based, and is intended to be taken by all first-year MFA students in order to provide them with a strong base for their own work and their evaluation of the work of other artists, both past and present. This class will only be offered in the Fall semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 8404. The History, Theory, and Practice of Printmaking. 3 Credit Hours.**

In this course we will examine the proliferation of printed images, particularly in western Europe and the Americas, beginning around 1450. Note that we will hold at least half of our weekly classes in the Print Study Room of the Philadelphia Museum of Art and on site at other collections, spending time studying the objects themselves. In addition to gaining an understanding of the processes involved in the making of woodcuts, engravings, etchings, and lithography, students will focus on the conceptual, social, political, and economic aspects of the art of the print. The course is designed chronologically but also according to themes and major artists, with the aim of showing that printmaking has its own history and at the same time relates to the broader cultural and artistic concerns of the period. Major figures we will study in terms of graphic virtuosity include Albrecht Dürer, Marcantonio Raimondi, Jacques Callot, Hendrick Goltzius, Rembrandt van Rijn, Giovanni Battista Piranesi, Francisco Goya, Mary Cassatt, James Abbott McNeil Whistler, and Otto Dix, among others. Students will have the opportunity to develop papers that dovetail with their own fields and interests, as well as with additional strengths of the museum collection, including Japanese, and modern American and Mexican prints.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 8450. Special Projects. 3 to 6 Credit Hours.**

Selected topics in art theory and criticism. Content varies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Education, Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 8460. Seminar in Contemporary Art. 3 Credit Hours.**

Selected topics in contemporary art. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8470. Seminar in Modern Art. 3 Credit Hours.**

Selected topics in modern art. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8475. Seminar in 19th-Century Art. 3 Credit Hours.**

Selected topics in 19th-century art will be examined. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8480. Seminar in Early Modern Art. 3 Credit Hours.**

Selected topics in the early modern period will be examined. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8500. Seminar in Arts Management. 3 Credit Hours.**

This course will explore a variety of topics in Arts Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 8560. Seminar in Modern and Contemporary Art. 3 Credit Hours.**

Selected topics in modern and contemporary art will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 8610. Seminar in Ancient Art. 3 Credit Hours.**

Selected topics in ancient art. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8620. Seminar in Medieval Art. 3 Credit Hours.**

Selected topics in medieval art. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8630. Problems in Renaissance Art. 3 Credit Hours.**

Recent or planned topics include Michelangelo and His Times; After Raphael: Painting in Central Italy; Michelangelo's Last Judgment; Beyond Florence: Artistic Centers in the 15th Century; Palladio and His Legacy; and Titian, Tintoretto, and Veronese. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 8635. Problems in Northern Renaissance Art. 3 Credit Hours.**

This course is a focused graduate seminar on a topic relating to an aspect of Northern Renaissance Art, ca. 1400-1575. Recent or planned topics include Reconsidering the German Renaissance; Dürer and His World; The Disintegration of the Northern Altarpiece; The Renaissance Print; Northern Realisms; Pieter Bruegel and the Invention of Painted Genres; Art, the Reformation, and Iconoclasms; and Early Modern Trade and the Global Renaissance. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8640. Seminar in Global Baroque Art. 3 Credit Hours.**

Selected topics in Baroque art. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8660. Seminar in 20th-Century Art. 3 Credit Hours.**

Selected topics in the art of the 20th century will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 8665. Seminar in 21st-Century Art. 3 Credit Hours.**

This course is a focused graduate seminar on a topic relating to an aspect of contemporary and/or 21st-century art. Note: This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8675. Seminar: Arts of the African Diaspora. 3 Credit Hours.**

This course is a focused graduate seminar on a topic related to an aspect of the arts of the African diaspora within the early modern to contemporary period. This course can only be taken twice for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Master of Education, Master of Fine Arts, Doctor of Philosophy.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ARTH 8690. Problems in Islamic Art. 3 Credit Hours.**

Selected topics in Islamic art. Future topics include Orientalism/Occidentalism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 8872. Arts Management Capstone. 3 Credit Hours.**

This is the capstone course for students in the MA in Art History Arts Management Track.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ARTH 9183. Archaeological Program. 3 Credit Hours.**

Seminar study in Ancient Art and Archaeology as directed by advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9585. Internship Seminar. 3 to 6 Credit Hours.**

For students in the fine arts administration track. Placement in a local museum or gallery (e.g., Temple University Gallery in Center City, Philadelphia) or other appropriate institutions. To be arranged with the graduate director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9586. Internship Seminar. 3 to 6 Credit Hours.**

For students in the fine arts administration track. Placement in a local museum or gallery (e.g., Temple University Gallery in Center City, Philadelphia) or other appropriate institutions. To be arranged with the graduate director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9891. Directed Research. 1 to 3 Credit Hour.**

Faculty-directed research on a specific topic. To be arranged with faculty sponsor and graduate director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9991. Directed Research. 1 to 3 Credit Hour.**

Faculty-directed research on a specific topic. Directed Research while still in the coursework phase of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9993. Comps Study. 1 to 3 Credit Hour.**

Preparation for comprehensive examinations. Masters students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

Preparation for preliminary examinations. Doctoral students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9995. Research for Qualifying Paper. 1 to 3 Credit Hour.**

Research and writing of the qualifying paper. Restricted to Master's-level students only, after course work has been completed. Enrollment in this course will qualify the student for full-time status.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9996. Thesis Research. 1 to 3 Credit Hour.**

Research and writing of the master's thesis. Masters students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Research of dissertation proposal. Doctoral students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ARTH 9999. Dissertation Research. 1 to 6 Credit Hour.**

Restricted to Doctoral students elevated to candidacy writing the dissertation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Art Therapy (ARTT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ARTT 8004. Introduction to Art Therapy. 3 Credit Hours.**

This course is designed to offer students a didactic and experiential introductory overview of the field of art therapy. Material covered will include history, theory, and practice of art therapy processes and approaches as well as a survey of populations, settings, and applications. Lectures, readings, discussion, audiovisual presentations, experiential exercises, and guest presentations comprise the structure of this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Athletic Training (ATHT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ATHT 5142. Foundations of Athletic Training. 4 Credit Hours.**

Through lecture and laboratory exercises, the student will obtain both didactic information and practical application of athletic training skills, including basic taping and bracing techniques, acute and emergency management, stretching, and equipment fitting and removal. Additionally, legal and ethical issues will be addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 5143. Orthopedic Assessment I. 3 Credit Hours.**

This required course will focus on the key concepts of evaluation, diagnosis, and management of lower extremity sports-related injuries. Students will be able to use an evidence-based approach to identify, explain, and assess pathologies of musculoskeletal injuries in the lower extremity and apply these concepts in real-life athletic training scenarios.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 5182. Independent Study in Athletic Training. 1 to 3 Credit Hour.**

This course offers individual investigation in athletic training practice or research under the guidance of a mentor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**ATHT 5244. Orthopedic Assessment II. 3 Credit Hours.**

This is a required three credit hour course that will focus on the key concepts of evaluation, diagnosis, and management of upper-extremity and axial skeleton sports-related injuries. Students will be able to use an evidence-based approach to identify, explain, and assess pathologies of musculoskeletal injuries in the upper extremity and axial skeleton and apply these concepts in real-life scenarios.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5143 or KINS 5143)

**ATHT 5245. General Medical Conditions in Athletic Training. 4 Credit Hours.**

This course will focus on the key concepts of evaluation, diagnosis, and management of general medical conditions commonly seen in the athlete. Students will be able to use an evidence-based approach to identify, explain, and assess pathologies and apply these concepts in real-life scenarios.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5142 or KINS 5142)

**ATHT 5247. Leadership for the Entry-Level Athletic Trainer. 1 Credit Hour.**

This 1 credit hour course will focus on the history of athletic training and its continued growth as a healthcare profession. Students will determine their leadership style and practice conflict resolution skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 5287. Practicum in Athletic Training I. 3 Credit Hours.**

This course accompanies the first clinical experience in the athletic training curriculum in order to further develop and enhance the practical skills and knowledge necessary for clinical practice. Students will review and demonstrate lower extremity injury evaluations, foundational athletic training skills, and emergency management techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5142 or KINS 5142) and (ATHT 5143 or KINS 5143)

**ATHT 5443. Organization and Administration in Athletic Training. 3 Credit Hours.**

This three-credit hour lecture/seminar course will focus on the aspects of professional management and administrative issues in athletic training, including program management, human resources, insurance, risk management, ethics, pre-participation examinations and facility design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5247 or KINS 5247)

**ATHT 5444. Therapeutic Interventions in Athletic Training. 5 Credit Hours.**

This lecture and laboratory course provides current evidence and best practices for the implementation of therapeutic interventions and modalities targeted for the physically active population from the time of injury to the return to participation in sports and activities. Students will gain knowledge and experience in the theory and application of therapeutic interventions throughout the injury management spectrum. Upon completion of the 5-credit course, students will be able to apply evidence-based therapeutic guidelines to create a comprehensive treatment and rehabilitation protocol.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Sci in Athletic Train.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5244 or KINS 5244)

**ATHT 5445. Considerations for Healing. 4 Credit Hours.**

Through lecture and laboratory exercise, the student will examine the body's response to injury and pain, within the framework of the Disablement Model. Students will explore pathology, histology, nutrition, behavioral therapies, and pharmacological interventions as they are directed through the continuum of care. Upon completion of this 4-credit course, students will be able to implement a patient-centered plan of care across a spectrum of injuries and illnesses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5244 or KINS 5244), (ATHT 5245 or KINS 5245), and (ATHT 5287 or KINS 5287)

**ATHT 5487. Practicum in Athletic Training II. 3 Credit Hours.**

This 3-credit course is designed to accompany the second clinical experience in the athletic training curriculum to further develop and enhance the practical skills and knowledge necessary for clinical practice. Students will review and demonstrate upper extremity and postural evaluations, general medical assessments, and leadership skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Sci in Athletic Train.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5244 or KINS 5244), (ATHT 5245 or KINS 5245), and (ATHT 5287 or KINS 5287)

**ATHT 5644. Applied Research in Athletic Training. 3 Credit Hours.**

This three-credit course will introduce the fundamentals of research design and interpretation, including basic statistical analysis. Students will read, summarize, and interpret current literature related to athletic training and determine how it applies to clinical practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5487 or KINS 5487)

**ATHT 5645. Board of Certification Examination Preparation. 2 Credit Hours.**

This 2-credit course will focus on the directed study for the Board of Certification (BOC) examination. Through the use of self-assessments, students will identify areas of strengths and weaknesses, create tailored study plans, and complete practice examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5487 or KINS 5487), (ATHT 5444 or KINS 5444), and (ATHT 5445 or KINS 5445)

**ATHT 5687. Practicum in Athletic Training III. 2 Credit Hours.**

This two-credit course is designed to accompany the fourth clinical experience in the athletic training curriculum to further develop and enhance the practical skills and knowledge necessary for clinical practice. Students will review and demonstrate therapeutic exercise and modality applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5487 or KINS 5487), (ATHT 5444 or KINS 5444), and (ATHT 5445 or KINS 5445)

**ATHT 5808. Advanced Sport Concussion. 3 Credit Hours.**

This online course is designed to provide students information about sport concussion. It is geared towards graduate students seeking to augment their concussion education. It is open to all students, but also serves to supplement specific student learning objectives for graduate Athletic Training Education students. Graduate students will receive targeted course lectures, readings, and online resources on topics such as concussion pathomechanics, pathophysiology, recognition, assessment, management, and return to play guidelines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 5851. Current Trends in Athletic Training. 3 Credit Hours.**

Through the use of current literature and content experts in the field, this three-credit course will provide advanced information regarding clinically relevant topics related to athletic training and sports medicine practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5443 or KINS 5443)

**ATHT 5852. Transition to Athletic Training Clinical Practice. 3 Credit Hours.**

This three-credit course will serve as the students' capstone experience and focus on preparing students to transition from the classroom to clinical practice. Students will submit a portfolio that includes completed competencies, resume, cover letter, and professional development units.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5645 or KINS 5645)

**ATHT 5888. Immersive Clinical Practice in Athletic Training. 1 Credit Hour.**

Immersive Clinical Practice in Athletic Training is designed to provide athletic training students with a clinical experience opportunity to further develop, enhance, and practice skills and knowledge necessary for clinical practice and the continuum of patient care. This course will be completed in the Early-Term Start period, allowing the student to be with their assigned preceptor full-time for the duration of the course. Students must complete between 75 and 100 supervised hours, record patient-encounters, create a plan of care, and complete a final reflection of their experience. Background checks, CPR certification, and medical requirements must be current.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Sci in Athletic Train.

**Repeatability:** This course may be repeated for a total of 2 credit.

**Pre-requisites:** Minimum grade of B- in (ATHT 5487 or KINS 5487), (ATHT 5444 or KINS 5444), and (ATHT 5445 or KINS 5445)

**ATHT 5988. Advanced Immersive Clinical Practice in Athletic Training. 2 Credit Hours.**

Advanced Immersive Clinical Practice in Athletic Training is designed to provide athletic training students with a clinical experience opportunity to further develop, enhance, and practice skills and knowledge necessary for clinical practice, the continuum of patient care, and organizational and administrative duties. This course will be completed in the final semester within the MSAT program, allowing the student to be with their assigned preceptor full-time for the duration of the course. Students must complete between 250 and 300 supervised hours, record patient-encounters, create a plan of care, critique current site policy and procedures, and complete a final reflection of their experience. Background checks, CPR certification, and medical requirements must be current throughout duration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 5687 or KINS 5687) and (ATHT 5443 or KINS 5443)

**ATHT 8300. Seminar in Athletic Training/Sport Medicine. 1 to 3 Credit Hour.**

This course is designed to provide the student with analytical skills and practical experiences relative to research as it applies to sports-related injuries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may be repeated for additional credit.

**ATHT 8343. Advanced Topics in Athletic Training. 3 Credit Hours.**

Through the use of current literature and content experts in the field, this three-credit course will provide advanced information regarding clinically relevant topics related to athletic training and sports medicine practice, geared towards the practicing clinician.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 8344. Rehabilitation Methods and Techniques for Sports-Related Injuries. 3 Credit Hours.**

This course is designed to provide the student with both the theoretical cases and some practical experience relative to rehabilitation therapy as it applies to sports-related injuries. Topics to be covered include manual muscle testing, goniometry, theories of pain and its management, and various therapeutic exercise modalities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 8348. Laboratory Techniques in Athletic Training. 3 Credit Hours.**

This is a 3-credit course specifically designed for students currently enrolled in the graduate Athletic Training program. This course will provide students with knowledge and application of selected laboratory instrumentation utilized in the athletic training division of the Biokinetics Research Laboratory. Topics include, but are not limited to, instrumentation used in testing of the following areas: pain threshold, strength, motion analysis, electromyography, postural control, and protein assays.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 8349. Cadaver Anatomy. 3 Credit Hours.**

This course is designed for students currently enrolled in the graduate Athletic Training Education program. The course will provide students with knowledge and application of gross human anatomy, injury pathomechanics, and evaluation. Topics include, but are not limited to, laboratory experiences in the following areas: skeletal, muscular, nervous, cardiovascular, and respiratory systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 8601. Research Appraisal and Clinical Application. 3 Credit Hours.**

This 3-credit hour online course will focus on critically reading current research related to the field of athletic training. Students will learn common research design and statistical methods, and be able to critically appraise current literature. Students will be able to identify and analyze trends in clinical practice with the goal of improving patient outcomes. This course will prepare students for their capstone experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Athletic Training.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 8602. Clinical Grand Rounds I: Lower Extremity. 3 Credit Hours.**

This online course will consist of clinical cases from the students and guest lecturers in the medical field. An evidence-based approach will be utilized to determine best practices and ways to improve patient outcomes for lower extremity athletic injuries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 8603. Clinical Grand Rounds II: Upper Extremity. 3 Credit Hours.**

This online course will consist of clinical cases from the students and guest lecturers in the medical field. An evidence-based approach will be utilized to determine best practices and ways to improve patient outcomes for upper extremity athletic injuries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 8602 or KINS 8602)

**ATHT 8604. Evidence Based Decision Making in Athletic Training. 3 Credit Hours.**

This 3 credit hour online course will consist of defining evidence-based practice, including concepts of reliability, accuracy, predictive validity of clinical procedures, and outcome measures. Students will have the opportunity to apply evidence-based decisions to case-based scenarios, and critically evaluate decisions of peers. Students will be required to create an online clinical evidence-based continuing education course proposal according to the Board of Certification guidelines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Athletic Training.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 8601 or KINS 8601)

**ATHT 8611. Leadership and Cultural Considerations in Athletic Training. 3 Credit Hours.**

This 3 credit hour online course is an interdisciplinary course that utilizes case scenarios to discuss issues involving leadership, cultural competence, and ethical decision-making by health care team members.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ATHT 9601. Capstone in Athletic Training. 6 Credit Hours.**

The 6 credit hour capstone project is the culminating experience for the Doctor of Athletic Training program. It is completed under the mentorship of a research committee and integrates knowledge, skills, and abilities accrued throughout the program. The project will be founded in evidence-based practice and integrate current peer-reviewed research, patient population characteristics, and interdisciplinary provider expertise. The results of this project (e.g., literature review and critically appraised topics papers) will be submitted for presentation and/or publication.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ATHT 8343 or KINS 8343)

## Basic Core Medical Science (BCMS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**BCMS 5003. Fundamentals of Biochemistry. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Bioengineering (BIOE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**BIOE 5278. Cardiac Devices. 3 Credit Hours.**

This course will describe the structure, function and control of the cardiovascular system and its quantitative modeling. We will cover the functional organization of main elements within cardiovascular system including and interfacing systems, such as renal and respiratory systems. We will go through the major electrical signals, neurological and endocrine controls, which regulate function of the cardiovascular systems. Students will learn about pacing signals generated naturally in the heart and synthesized by electronics. Design considerations and indications for use of various devices to directly or indirectly affect heart function.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5301. Biosignals. 3 Credit Hours.**

This course offers a deep overview of the signals in the Biomedical fields. Signals are studied in several modalities, including time frame, frequency frame, and statistical frame. A deep analysis of filters and analysis tools is included together with some basic techniques of storing and pattern interpretation techniques. Furthermore, the course gives to the student the necessary knowledge to realize a complete Data Acquisition, Analysis and Logging using LabView as a tool. The laboratory activities include the development of a complete system to do acquisition, analysis, report and logging of data incoming from sensors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5311. The Entrepreneurial Bioengineer. 3 Credit Hours.**

This course provides a practical overview of all stages of development of medical devices in regenerative medicine, from idea to launch of a company and commercialization of the product into international markets to address unmet medical needs. We will review the initial idea, based on an unmet medical need, review issues of intellectual property creation, determination of target markets, pre-clinical and clinical development, and different regulatory pathways leading to product approval and market introduction. We will discuss issues of company formation, financing and management, as well as target markets and avenues towards revenue generation. Note: Prior to fall 2017, the course title was "Entrepreneurial Studies in Regenerative Medicine - From Idea to Medical Practice".

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5321. Biosensors. 3 Credit Hours.**

This course offers an in-depth overview of several sensors used in the Biomedical Fields. The sensors are analyzed from an engineering point of view going from the physical principles to the necessary filtering and linearization studying the characteristics of output signals. The course also gives the student the necessary basis for Data Acquisition using LabView as a tool. The laboratory activities include the connection of sensors, the study of amplification, linearization and interpretation of data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5333. Applied Biospectroscopy. 3 Credit Hours.**

This course introduces the basics of light propagation in tissue and other turbid media, vibrational spectroscopy, absorption and fluorescence, and emerging spectroscopic applications. Emphasis is on applications for assessment of biomolecules, engineered tissues and clinically-relevant analyses including musculoskeletal disease and cancer diagnosis. Multivariate analyses for complex spectral data sets will also be introduced.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5421. Capstone Elective: Bionanotechnology. 3 Credit Hours.**

This course is intended for graduate students interested in acquiring knowledge involving nanometer-sized objects frequently utilized within the biomedical sciences and engineering areas. The aim of the class is to introduce fundamental concepts critical in the design, preparation, analysis, and usage of bionanotechnology (or nanobiotechnology) and its multiple bottom-up and top-down approaches. Multiple nanomaterials categories, such as nanoparticles, nanotubes, biomacromolecules, synthetic polymers, and self-assembled structures, will be covered in detail along with their applications.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Bioengineering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5431. Neuroengineering. 3 Credit Hours.**

This course will teach students how signals are generated and propagated in neurons and neuronal circuits, and how this knowledge can be utilized to engineer devices to assist people with neurologic disease or injury. The functions of neurons as discrete elements and as parts of neuronal assemblies will be examined; generator and action potentials; conduction in nerve fibers and across synaptic junctions; analysis of sensory and neuromuscular systems; EEG and EKG waveforms. At the completion of the course, students will have gained a fundamental understanding of neural interface/prosthetics design parameters from basic neural physiology to models of neural mechanisms. We will also review advanced neural interfaces currently being developed. The course will end with coverage of selected frontiers of neuroscience, including neurogenetic techniques, viral methods, and optogenetics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5441. Biomechanics. 3 Credit Hours.**

This course will provide an integrative and multi-scale understanding of biomechanics that spans from tissues, to organs, to the dynamics of an intact, running body. Foundational topics will include muscle mechanics, skeletal mechanics, gait and whole body dynamics. The course will then move on to cover selected topics at the forefront of applied biomechanics including clinical biomechanics and the design and optimization of prosthetic limbs. Finally, frontiers in neural-interfacing for prostheses and rehabilitation, including optogenetics and other emerging areas affecting biomechanics, including robotics and robotic exoskeletons, will be covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Engineering.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5451. Biomedical Imaging. 3 Credit Hours.**

This course focuses on principles of diagnostic radiological imaging physics, including X-ray, computed tomography, and nuclear medicine, as well as optical imaging, ultrasound and magnetic resonance imaging modalities. The interaction of these modalities with tissues and detectors to produce useful image contrast will be presented, and students will gain an understanding of the basic physics of image acquisition and algorithms for image generation. Signal and noise characteristics, image quality and image reconstruction algorithms will also be covered. Image processing through MATLAB programming will be covered in class and in assignments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5461. Principles of Tissue Engineering. 3 Credit Hours.**

This course will introduce fundamental concepts of tissue engineering and regenerative medicine, focusing biomaterials used for scaffolds, mechanisms of cell-biomaterial interactions, biocompatibility and foreign body response, cellular engineering, and tissue biomechanics. Principles of cell/developmental and stem cell biology will be introduced, which will enable the students to apply a multidisciplinary approach to engineering select tissues and organs, such as the musculoskeletal system, cardiovascular tissues, the nervous system, and to design artificial organs. These topics will also be discussed in the context of scale-up, manufacturing, ethical and regulatory concerns. Note: Prior to fall 2017, the course title was "Principles of Tissue and Regenerative Engineering."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5471. Mechanobiology. 3 Credit Hours.**

Mechanobiology is an emerging interdisciplinary field that focuses on the role of mechanical cues in governing cellular behavior. This course will address how a cell utilizes its adhesions to neighboring cells and to the surrounding extracellular matrix to sense external forces and furthermore, how these forces are transduced within the cell to alter cellular behavior and regulate tissue architecture. This course will also discuss how the extracellular matrix influences cellular behavior during development, health, and disease. Additionally, this course will also discuss the various tools and techniques developed to probe cytoskeletal structures, molecular motors, plasma membranes, cellular adhesion structures, and matrix proteins that pushed the field of mechanobiology forward. This course will culminate in integrating all new foundational knowledge in mechanobiology to propose new studies manipulating molecular, cellular, or tissue-level behavior for applications in diverse fields such as regenerative engineering, wound healing, or cancer diagnostics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BIOE 5721 (may be taken concurrently)

**BIOE 5500. Special Topics in Bioengineering. 3 Credit Hours.**

An emerging or advanced area of bioengineering research will be covered. Topics vary by semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 5501. Regenerative Engineering. 3 Credit Hours.**

This course is a continuation of fundamental concepts introduced in Principles of Tissue and Regenerative Engineering focusing on developmental biology used in tissue engineering and regenerative medicine. Principles of cell development/biology, cell-cell interactions, signal transduction, and stem cell biology will be discussed with applications to regenerative medicine. These topics will also be discussed in the context of scale-up, manufacturing, ethical and regulatory concerns.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Bioengineering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BIOE 5461 and BIOE 5721.

**BIOE 5555. Biophotonics: Seeing is Believing. 3 Credit Hours.**

Only a small portion of the world around us is visible to the human eye. With revolutionary microscopy developments, nowadays there are ways to visualize drug effects, forces, viral infection or cancer metastasis, or use light to control biological processes. Once we see biology happen, the result is not just a pretty image. We can use machine learning and artificial intelligence (AI) to improve resolution and quantify the imaging data. In this course students will learn how light can be used to visualize and manipulate biomaterials at molecular, cellular and tissue scale. The first part of the course will provide a review of light and optics. We will cover typical hardware used for imaging in biology, such as light sources, objectives and detectors used to generate images. The second part of the course will include hands-on fluorescent microscopy, the main tool for imaging in life sciences, and it will include imaging of cell cultures in 2D and 3D and tissue sections. We will use typical image processing tools, including Fiji, Matlab and selected Python plugins, and learn how to implement AI tools to improve images and imaging data. Final sessions will include presentations on specialized techniques by students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5600. Bioengineering Graduate Seminar. 0 Credit Hours.**

Required seminar for bioengineering graduate students. These seminars include speakers from academic and professional backgrounds for both scientific development and professional development. Students will be graded on participation of at least 70% of the bi-weekly seminars throughout the duration of the semester.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Bioengineering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 5719. Introduction to Bioengineering. 3 Credit Hours.**

This course offers an introduction to biomedical engineering, a diverse and evolving field that integrates engineering principles, life sciences, clinical medicine, research and engineering design, with the overall goal of improving health care and quality of life. Professors with expertise in specific fields of biomedical engineering will present lectures and discussions on a broad range of topics, including tissue engineering and regenerative medicine, biomaterials, biomechanics, bioinstrumentation, biomedical imaging and optics, and signal processing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5721. Cell Biology for Engineers. 3 Credit Hours.**

This course introduces biological concepts in modern cellular and molecular biology to engineering students. Topics will include the chemical composition of cells, bioenergetics and metabolism, structure and function of the plasma membrane, transport across membranes, the cytoplasmic membrane system, the extracellular matrix, interactions between cells and their environment, the cytoskeleton and cell motility, sensory systems, and cell signaling. In addition, an introduction to basic anatomy and physiology of vertebrates will include the skeletal system, muscle system, cardiovascular system, and nervous system.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5737. Systems Physiology for Engineers. 3 Credit Hours.**

Systems Physiology is designed for graduate students majoring in engineering and for others interested in studying physiological processes from the molecular level to the organ/systems level. Among the topics covered are: scaling, respiration, circulation, cardiac process, renal function, muscle function, neuromuscular junction, neural processes, and temperature regulation. The course stresses the application of energetic and informational principles to the study of the body.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5741. Biomaterials for Engineers. 3 Credit Hours.**

This course introduces engineering students to materials as they interact with biological systems, primarily in medicine. Topics will include a review of properties of materials, the classes of materials, tissues that come into contact with materials, the degradation of materials in the biological environment, the application of materials for specific uses, tissue engineering, and biomaterials standards and regulations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 5999. Research Experience in Bioengineering. 0 Credit Hours.**

Research Experience provides graduate students laboratory experiences/research practices prior to undertaking independent, directed, master project, master's thesis, or dissertation research. This course allows graduate students the opportunity to learn to use laboratory equipment, designing and carrying out an experiment(s), collecting preliminary data, field experiences, and participation in laboratory meeting, etc. with faculty which may lead to identifying a faculty mentor. The course will be graded as Pass or Fail. The Research Experience is a non-repeatable course. After the completion of this Research Experience course, students will need to be enrolled in independent study, directed research, master's research, master's thesis, dissertation proposal, or dissertation if they continue in an active research program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOE 9182. Independent Study. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 9282. Independent Study II. 3 Credit Hours.**

Special study in a particular aspect of engineering under the direct supervision of a graduate faculty member. May be taken once by Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 9991. Directed Research. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 9994. BioEngineering Preliminary Examination Preparation. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 9995. BioEngineering Project Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 9996. BioEngineering Thesis Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 9998. Bioengineering Pre-Dissertation Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOE 9999. BioEngineering Dissertation Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Biology (BIOL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**BIOL 5101. Evolution. 3 Credit Hours.**

A lecture and discussion course for upper-level science majors and graduate students. Topics covered include Darwinism and neo-Darwinian theory, including adaptation, natural selection, sexual selection, and speciation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5111. Genomics in Medicine. 3 Credit Hours.**

The completion of the Human Genome Project in 2003 began a revolution in the treatment of human disease. More than 10 years later, the promise of personalized genome-guided medical treatment is becoming reality. This course will explore how genomic information has enhanced our understanding of human genetic variation and disease susceptibility. Students will develop familiarity with main areas in genomic medicine through lectures from intra- and extramural experts, and they will be involved in classroom discussions. Students at the graduate level will complete an independent project focused on a particular disease topic, integrating literature review with new analyses of published data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5112. Fundamentals of Genomic Evolutionary Medicine. 3 Credit Hours.**

Modern evolutionary theory offers a conceptual framework for understanding human health and disease. In this course we will examine human disease in evolutionary contexts with a focus on modern techniques and genome-scale datasets. We ask: What can evolution teach us about human populations? How can we understand disease from molecular evolutionary perspectives? What are the relative roles of negative and positive selection in disease? How do we apply evolutionary principles in diagnosing diseases and developing better treatments? Students will conduct case studies of a variety of diseases and phenotypes in a group setting. Students at the graduate level will complete an independent research project and assume leadership roles in group presentations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Engineering, College of Public Health, Medicine, Lewis Katz School, Science & Technology.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5114. Evolutionary Ecology. 3 Credit Hours.**

In this course we will explore the interface of ecology and evolution. The field of evolutionary ecology deals broadly with questions such as: What are the ecological causes of evolution? How do ecological interactions shape the evolution of traits and origination (or extinction) of species? How does evolutionary history shape species interactions and community structure? How might evolution influence community or ecosystem processes? The class will cover fundamental theories and approaches used to address questions in evolutionary ecology, including molecular tools, modeling, manipulative field studies, and laboratory- or field-based common garden studies. Students will be engaged through a combination of lectures, inquiry-based activities, and small group discussions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5128. Genomics and Infectious Disease Dynamics. 3 Credit Hours.**

Events such as the emergence of avian flu have increased public awareness about the need for incorporating ecology and evolution in decision-making processes that involve infectious diseases. It is evident for the public health community that molecular information, together with concepts from ecology and evolutionary biology, allows for testing of hypotheses and exploration of scenarios that otherwise could not be investigated by traditional epidemiological approaches. Understanding the ecological and evolutionary dynamics of infectious diseases requires the integration of information across organizational levels at various temporal and/or spatial scales. This requirement, together with novel molecular evolution, genomics, and mathematical modeling approaches, has positioned research on Genomics and Infectious Diseases Dynamics at the forefront of Public Health Genomics. The goal of this class is to discuss some of the biological processes leading to the emergence and re-emergence of infectious diseases stressing on evolutionary concepts within an epidemiological context. Basic concepts will be provided by the instructor as part of formal lectures. Our general objective (integrating evolutionary biology into epidemiology) will be fulfilled by discussing research articles. Such discussions will take place during the second half of the semester. "Emerging" perspectives such as One Health and Public Health Genomics will be integrated into the lectures and discussions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5131. Topics in Bioinformatics. 3 Credit Hours.**

This course will be a keystone required course for all incoming students in a Bioinformatics Ph.D. program. Bioinformatics is a rapidly expanding research area at the intersections of biology, chemistry, mathematics/statistics, and computer science. The shared theme of this broad discipline is the application of sophisticated computing technologies to address questions on typically massive amounts of biological data. Because of the dynamic and broad nature of the field, a course is needed that will introduce new students to the breadth of the field while at the same time introducing topics at a level of depth and rigor appropriate for a Ph.D. program. This will be a team taught course, with one coordinator and up to seven research-active instructors. The course would consist of seven modules, each two weeks in length. Every year, the coordinator will identify faculty and topics so as to present a diverse cross-section of cutting-edge Bioinformatics. An important goal of this course is that it will introduce students to a broad sample of the faculty who are active in the Bioinformatics Ph.D. program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Science & Technology.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5225. Evolutionary Genetics Genomics. 3 Credit Hours.**

This class covers fundamental principles of population and comparative genetics with special attention given to recent advances in genomics. The scope of the class ranges from understanding variation at the population level to addressing species-level questions. Topics covered include classical population genetics, quantitative genetics, comparative genomics, phylogenomics and speciation. Lectures, assignments and discussions will explore theoretical and recent empirical advances.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5226. Innovative Biomodels and Concepts. 3 Credit Hours.**

The aim of this course is to familiarize students with current concepts, models, and cutting-edge technologies applicable in different bioindustries. The scope of topics ranges from the implementation of discoveries stemming from molecular genetics, cell biology and nanotechnology in different industries to integration of omics techniques in personalized medicine, drug discovery and pharmacovigilance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5227. Biomarkers and Biotargets: Research and Commercialization. 3 Credit Hours.**

This course focuses on the evolution of biomarker and biotarget research, with emphasis on biomarker validation and biotarget druggability. The students will analyze real-life examples of biomarkers and biotargets in medicine, drug development, and environmental science. The formation of therapeutic target databases and development of multi-target agents will be critically evaluated.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5228. Epigenetics, Genetics: Applications in Drug Design and Drug Response. 3 Credit Hours.**

This course focuses on applications of current epigenetics knowledge in health industries. Special emphasis is on epigenetic and genetic testing in clinical settings, epigenetic and genetic determinants of drug response as well as drug- and environment-induced modulation of epigenetic status.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5229. Systems Biology: Principles and Applications. 3 Credit Hours.**

This course provides an overview of Systems Biology technologies and the scientific challenges in applicability of system biology paradigms in the analysis of biological processes. Topics covered include the use of genome-scale in silico models and dissecting transcriptional control networks. By successfully completing this course, the students will obtain background on theoretical and modeling techniques, and software platforms for Systems Biology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5232. Behavioral Genetics. 3 Credit Hours.**

This course is an introduction to the interdisciplinary field - behavioral genetics - that combines behavioral sciences and genetics and unifies the long-standing debate on what underlies complex human behavior: "nurture" or "nature." This course will discuss the genetic approaches used to dissect out the genetic determinant of complex human traits. For example, students will learn about genes that influence learning and memory, intelligence (IQ), cognitive disabilities, personality disorders, psychopathology, antisocial behavior, substance abuse, and sexual orientation. In addition, the interplay of environment and genetic factors that create individual differences in behavior will be explored. Because this field represents the intersection between what is known and what might be known in the future about complex and potentially controversial behaviors and characteristics, students will be encouraged to discuss contemporary ethical issues regarding human behavior in realm of the scientific evidence presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5233. Effective Dissemination of Bio-discoveries through Traditional and New Media. 1.5 Credit Hour.**

The students will learn contemporary methods of effective dissemination of research findings and concepts to professional and lay audiences. Current real-life findings will be presented through slide and video development, press releases, and the use of social media. In addition, the students will learn the ways to communicate scientific data through abstracts, posters, and papers and will critically analyze the content and style of selected scientific material. Furthermore, different types of funding proposals will be reviewed and grant development will be practiced.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5234. Bioinnovation Seminar. 1.5 Credit Hour.**

This course includes lectures and seminars on current topics in bioinnovation presented by experts in different disciplines and it will include seminars at the Fox School of Business and Management. By successfully completing this course, the students will obtain up-to-date knowledge of bioinnovative models.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5235. Milestones in Clinical Translation of Biodiscoveries. 1.5 Credit Hour.**

The goal of this course is to familiarize the students with clinical trial design and principles of pharmacovigilance. Topics will include clinical trial phases and examples of clinical trial design for selected biologic drugs. Case studies of drug safety-driven FDA decisions will also be evaluated. The comparison between regulatory requirements of the U.S. and international agencies will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5236. Bioadvanced Screening in Health Disparity. 1.5 Credit Hour.**

This course focuses on the effects of nutrients, bioactive food components and environment on public health, medical treatments and applications for improving human health.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5237. Virtual Reality in Bioindustry and Medicine. 1.5 Credit Hour.**

The goal of this course is to provide the students with a background on Virtual Reality and its applications in medicine, laboratory research, training and education in bioindustry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5239. Dissemination of Biodiscoveries and Virtual Reality in Medicine. 3 Credit Hours.**

The students will learn contemporary methods of effective dissemination of research findings and concepts to professional and lay audiences. Current real-life findings will be presented through slide and video development, press releases, and the use of social media. Furthermore, this course will provide the students with a background on Virtual Reality and its applications in medicine, laboratory research, training and education in bioindustry.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5241. Genomics and Evolutionary Biology of Parasites and Other Dependent Species. 3 Credit Hours.**

All known multicellular organisms harbor diverse assemblages of dependent species, many of which are considered parasites or pathogens. Yet, in spite of a growing awareness of the importance of dependent species in biodiversity and medicine, many studies are limited to assessing the consequences to their hosts. The goal of this seminar is to discuss some of the biological processes leading to the diversity of dependent species and their functional/evolutionary relationships with their hosts. This general objective will be fulfilled by discussing research articles on the genomics and evolution of dependent species, many of them considered parasites or pathogens. Students are also expected to gain proficiency in writing scientific review papers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5254. Animal Behavior. 3 Credit Hours.**

This course will examine how animals behave, and investigate the proximate (neurological and developmental) and ultimate (functional and evolutionary) explanations for these behaviors. The ecological and evolutionary processes that shape animal behavior will be examined through the study of classic theories and major principles of animal behavior, including a weighing of the experimental and observational evidence for each idea. Concepts will be illustrated with examples from a wide range of taxonomic groups of animals in diverse ecosystems, and emerging theories in animal behavior will be discussed. We will conclude with applications of animal behavior for conservation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5275. Ecology of Invasive Species. 3 Credit Hours.**

Species that are transported by humans from their native range and successfully establish and spread in a new environment are called invasive species. Invasive species can cause significant ecological and economic impacts and are a growing threat to native species and ecosystems across the globe. Recognition of this problem has led to a recent surge in research on invasive species and a better understanding of the ecology of invasions and approaches for improved prevention and control. Yet many challenges still hinder scientific and applied advancements in this emerging field. In this course we will investigate these challenges and the science of invasive species using interactive activities and student-driven projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5301. Cell Biology. 3 Credit Hours.**

Advanced knowledge in cell biology will be discussed. Topics include macromolecules, cell structure, cell motility, bio-membrane, endo- and exocytosis, nucleocytoplasmic transport, visualizing cells and macromolecules with advanced microscopy imaging. Current journal articles reporting recent developments in modern cell biology will be also covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5307. Conservation Biology. 3 Credit Hours.**

The Earth harbors an incredible diversity of species and communities, most still poorly understood by science. This biodiversity is essential to the functioning of natural ecosystems and provides a wide array of priceless services to people today and a treasure of benefits for the future. Yet human threats to biodiversity have led us to the brink of the sixth major extinction event in Earth's history. Which populations, species, communities, and ecoregions are most diverse? Which are most threatened, and by which human activities? What is the contribution of biodiversity to human livelihoods? What does the science suggest is needed to conserve biodiversity? How might this best be done given social, economic, and political realities? These questions and more will be examined in this course, focusing on the key principles of conservation biology and the application of those principles to local, national, and international examples.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5311. Herpetology. 4 Credit Hours.**

Herpetology Reptiles and amphibians comprise nearly 7,400 species and can be found on every major and minor landmass in the world except Antarctica. This course will provide a broad, evolutionary survey of the major groups of reptiles and amphibians ("herps"). We will cover topics about their basic biology, including anatomy, physiology, ecology, behavior, and conservation. The laboratory will emphasize taxonomic characters and identification of living and preserved specimens, with emphasis on species found in North America. Additionally several field trips (conducted during lab hours and spring break) will reinforce course material through hands-on experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5312. Biostatistics. 3 Credit Hours.**

Biostatistics is an important part of the research activities related to biological and medical issues. Statistics is used to analyze phenomena with random properties and is often essential to draw the right conclusions based on a data set. The course will be designed to cover different statistical methods for data analysis mainly applied to medical and biological problems. Advanced undergraduate and graduate students with interests in medicine and biomedical research will benefit most from the course. However statistical methods that can be applied to behavioral science and ecology will also be covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5321. Plant Community Ecology. 3 Credit Hours.**

This class focuses on fundamental principles in community ecology as they relate to plant systems. The scope of the class ranges from plant-environment interactions and species interactions, to the relationship among communities at larger spatial scales. Lectures and small group discussions will also highlight theoretical and empirical advances made in ecology through classic and contemporary studies of plant communities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5322. Biology of Plants. 3 Credit Hours.**

This course examines current knowledge of higher plants, with an emphasis on Arabidopsis and maize. Topics include plant reproduction, self-incompatibility, polyploidy in plants, sex chromosomes in plants, chloroplast structure and function, light and dark reaction of photosynthesis, nitrogen fixation, phytochromes, DNA and histone methylation and epigenetics, embryonic pattern formation in plants, chemical signaling in plants, leaf morphogenesis, flower development, and stem cell populations in plants.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5323. Global Change Science: Analytics with R. 3 Credit Hours.**

Learn how researchers use data to tackle global problems such as climate change, mass extinction, pandemics, and poverty. Explore interdisciplinary data, from economics to public health, and learn a marketable skill: R, an intuitive computer language. The course is project based, no prior coding experience is necessary, and no tests are given. Instead, student assessment is on project progress and communication of a global change problem of their choice. The most successful students leave class with the quantitative skills to go out and solve our most pressing problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5325. Research Techniques in Molecular Biology. 3 Credit Hours.**

Instruction in the techniques used in modern molecular biology and molecular genetics. This course takes a problem-oriented approach toward teaching the methods of DNA and RNA analysis that are used in determining the structure and function of genes. Practical experience in the preparation of DNA, modern cloning methods, restriction enzyme mapping, hybridization analysis, DNA sequencing, and PCR techniques will be provided. Students will carry out a research project during the course. NOTE: Biology 3324 is highly recommended, but not required. Also note: Prior to Spring 2017, the course title was "Recombinant DNA Techniques."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5335. Polar Biology - Life at the Extremes. 3 Credit Hours.**

"Polar Biology - Life at the Extremes" is an introduction to polar environments and the biology of aquatic and terrestrial organisms adapted to live in the Arctic and Antarctic. Similarities and differences between the poles as well as anthropogenic impacts on these remote environments will be addressed. Comparisons to other extreme environments will be included.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5337. Comparative Biomechanics. 3 Credit Hours.**

An overview of biomechanics with emphasis on locomotion. Students gain a working knowledge of the breadth of biomechanical study ranging across organismal and environmental scales.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5338. Epigenetics. 3 Credit Hours.**

The term "epigenetics" describes a heritable effect on chromosome or gene function that is not accompanied by a change in DNA sequence. Recent findings suggest an important role of epigenetics in both normal development and cancer. This course provides an overview of the field and examines selected phenomena in several eukaryotes, mechanisms regulating these effects, and their phenotypic consequences when normal regulation is lost. Topics include gene regulation through chromatin modification (acetylation, methylation), genomic imprinting, mechanisms of silencing (including small interfering RNAs), and the role of epigenetics in human diseases and cancer.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5358. Cellular/Molecular Neuroscience. 3 Credit Hours.**

The course will focus on the molecular and cellular basis of neurological processing. The fundamentals of action potential generation, synaptic and receptor potentials generation and neuron-neuron communication will be discussed. The contemporary understanding of sensory processing will be covered in great detail with a particular focus on molecular sensors of light, sound, odorants, taste and touch and the signal transduction pathways that underlie the five senses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5361. Molecular Neuropharmacology. 3 Credit Hours.**

In this course we will examine how drugs interact with the nervous system. We will focus specifically on the cellular and molecular actions of drugs on synaptic transmission, as a mechanism for understanding the structure and function of the synapse. In addition, we will discuss how toxins and venoms affect synaptic transmission in nature as well as how they have been (and continue to be) used as research tools. We will study the neural substrates of drug action and the sequence of events from how a drug binds initially to its molecular target(s), the resulting changes in the function of its target, the influence of these changes on biochemical networks in neurons, the subsequent alterations in neuronal output, and in the circuit, including non-neuronal cells. Students will be able to appreciate the progress in the discovery of drugs used to treat in the clinic complex behaviors as well as major neural disorders (neuroinflammation, pain, migraine, sleep, neurodegeneration, addictive disorders, schizophrenia, etc.). In addition, we will learn about the process of drug approval (preclinical, clinical trials, drug monitoring, and FDA's role).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5366. Stem Cell Biology. 3 Credit Hours.**

The purpose of this course is two-fold. The first is to present the developmental biology of stem cells, with an overview of the various types of stem cells that exist and an emphasis on embryonic stem cells. The overview will include the important functional differences between embryonic, hematopoietic, and adult stem cells as well as the differences in their biomedical potentials. Techniques such as somatic cell nuclear transfer (SCNT) and other methods for the derivation of stem cell lines will be outlined so that differences that may seem subtle at first glance are clarified. The second purpose is to look into the larger debate on human embryonic stem cell research while continually drawing connections to the established fields of bioethics, politics, and philosophy. The course will ground the issues by looking at the history of the debate over the embryo, with careful attention paid to the language used in arguments. An exploration of important social, ethical, political, and economic issues and how they arose with respect to the stem cell debate will round out the remainder of the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5389. Field Research in Community Ecology. 3 Credit Hours.**

Many fundamental advances in community ecology have emerged from creative, well-designed field studies in natural ecosystems. Field research is therefore a cornerstone of contemporary community ecology. Through this course taught at Temple's Ambler Campus, students will gain hands-on experience designing and conducting field study research in community ecology. While some activities will be in a classroom, most field study activities will be held outdoors, in the natural environments around Ambler Campus.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5403. Genomics. 3 Credit Hours.**

This course will cover the process of gene inheritance and descriptions of genome structure, as well as a discussion of gene content and function across lineages. Students will learn about genome-related technologies, including genome sequencing. They will also learn about how genomes vary across species, as well as the forces driving these evolutionary changes. Students will complete quizzes and exams to demonstrate understanding of the information present in genomes and the processes that drove it.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5411. Structural Bioinformatics I. 3 Credit Hours.**

This course will cover the basic concepts of protein structure analysis, with focus on database searching and molecular modeling techniques. A broad qualitative overview of macromolecular structure and protein folding will be provided before addressing the issues of sequence alignment, secondary structure calculation, and tertiary structure prediction. The course will also cover few selected advanced topics such as prediction of quaternary structure, Hidden Markov Models, and other approaches for building probabilistic models of sequence ensembles. Computer-based activities will allow students to develop a strong familiarity with molecular visualization software and web-based tools.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5416. Tropical Marine Biology: Belize. 4 Credit Hours.**

An introduction to the largest coral barrier reef in the Atlantic Ocean. Course lectures begin at Temple (approximately Dec 29-Jan 31; holidays excluded) followed by a week of lectures, field trips and field or laboratory projects in Belize. Lectures include coral biology, reef geology and ecology, coral reef microbiota, food chains and nutrient transfer in coral reefs, reef community organization, the biology of reef fishes, commensal and symbiotic interactions of reef organisms, and other appropriate topics. Group student team projects and lectures are required. Note: Additional requirements include cost of air travel to a foreign country between fall and spring semesters, a current passport, and snorkeling equipment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5427. Immunology. 3 Credit Hours.**

The purpose of the Immunology course is to provide a comprehensive overview of the immune system that in its normal function protects each of us from the harmful effects of microbial invaders. The lectures will describe the general properties and development of immunity, the condition of being protected from infection by microorganisms or the effects of foreign molecules. They will provide systemic coverage of immune responses to viruses, bacteria, protozoa and roundworms as well as the practical aspects of vaccine development. Additional lectures will include a description of various types of primary immunodeficiencies, most prevalent autoimmune disease and cancer.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5428. Virology. 3 Credit Hours.**

The role of viruses in human diseases, and their potential as tools for research and clinical interventions. The course will focus on virus-induced diseases in man including polio, rabies, hepatitis, herpes, and influenza; recently discovered viruses such as HIV and HTLV-1 will also be studied. Virus-host interactions and the mechanisms involved in disease progression, therapeutic strategies, and vaccines, strategies for viral entry, evasion of the immune system, transmission, and the subversion of host-cell machinery will be emphasized. Potential uses of viruses as vector for gene therapy of genetic disorders, cancers, and infectious diseases will also be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5429. Developmental Genetics. 3 Credit Hours.**

The role of genes in the determination and differentiation of eukaryotes. Emphasis on the regulation of gene function and on the genetic and molecular interactions which control the processes of development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5433. Advanced Techniques in Microscopy. 3 Credit Hours.**

This course will provide a survey of modern techniques in microscopy. Students will acquire a thorough grounding in general principles of optics and conventional microscopy, and learn the theory of many methods current in biology and medicine, fluorescence, confocal microscopy, video microscopy, and digital image processing and analysis. Note: This course includes extensive laboratory experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5436. Freshwater Ecology. 4 Credit Hours.**

The interrelationships between biological, chemical, and physical factors in freshwater environments. Lectures and laboratories address general ecological principles (population dynamics, community structure, energy flow, and nutrient cycling) as they apply to plants and animals in lakes, ponds, streams and wetlands. Note: Students are required to participate in up to two field trips, one of which includes weekend travel.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5452. Systems Neuroscience. 3 Credit Hours.**

A comparative survey of vertebrate and invertebrate nervous systems intended to acquaint the student with their structure, function and development at several levels of complexity.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5454. Neurological Basis of Animal Behavior. 3 Credit Hours.**

An exploration of the relationship of neural activity and connectivity to behavior. Topics include motor control, object recognition and learning. Examples from both vertebrate and invertebrate species. Analytic and synthetic approaches.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5456. Organization and Development of the Nervous System. 3 Credit Hours.**

This course covers developmental, anatomical and integrative aspects of the nervous system. The relationship of form to function will be studied in a variety of systems both invertebrate and vertebrate. The course is intended to complement Neurobiology 352/452 so that students will have a perspective on neuroscience ranging from the molecular to the systems level.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5464. Biochemistry of Embryogenesis. 3 Credit Hours.**

This course will compare and contrast key biochemical mechanisms of embryonic development in a variety of model organisms ranging from humans to plants. We will examine the roles of enzymes, peptides, small RNA molecules and chromatin structure during embryogenesis. Topics will include micro RNAs, modification of DNA structure, and effects of mutation on enzyme activity. These basic principles will then be applied to subjects such as cell communication, stem cells, and cloning. Course material will be drawn from the experimental literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5465. Mammalian Development. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5466. Contemporary Biology. 3 Credit Hours.**

This course is typically offered in Fall and Spring.  
Advanced discussion of selected topics.

This course is repeatable for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 5467. Endocrinology. 3 Credit Hours.**

Broad coverage of "chemical messengers", occurrence, biochemistry, and physiology. Vertebrate endocrinology with minor treatment of invertebrates and plants.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5469. Molecular Biology. 3 Credit Hours.**

A background knowledge of biochemistry and basic genetics at the undergraduate level is desirable. Structure, function and interaction of proteins and nucleic acids; building macromolecular complexes; techniques in molecular biology; introduction to molecular genetics and genomics; DNA replication and repair; transcription at the level of both genes and genomes; role of chromatin in gene regulation; non-coding RNAs; RNA processing; RNA interference; protein synthesis and its regulation; introduction to proteomics; transposons; regulatory proteins in eukaryotes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5471. Cell Proliferation. 3 Credit Hours.**

Discussion of cell proliferation and its control; assay systems, comparisons of proliferating cells with nonproliferating cells, controls of cell division and how that control is modified in proliferative diseases such as cancer, the relationships between proliferation and differentiation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5474. Physical Biochemistry. 3 Credit Hours.**

The course covers those aspects of computer simulation of molecular dynamics, quantum mechanics, and statistical mechanics of use to biochemist and biologist interested in molecular modeling. The course is intended to be computer intensive.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5475. General Biochemistry I. 3 Credit Hours.**

Properties of water (pH and buffers); metabolism of carbohydrates, amino acids, fatty acids, and phospholipids properties of biomacromolecules proteins, and nucleic acids; DNA structure and replication; protein synthesis; energy generation; catalysis and control of enzymatic activity and interrelationships among the metabolic pathways.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5476. General Biochemistry II. 3 Credit Hours.**

Emphasis on the biochemical reactions in various metabolic pathways. Biosynthesis and degradation of carbohydrates, lipids, proteins and amino acids. Regulation and integration of metabolic pathways. Bioenergetics and oxidative phosphorylation. Signal transduction. Transcription, translation and their control.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5479. Biotechnology. 3 Credit Hours.**

This course is designed to survey current issues in technologies including therapeutics and diagnostics, and to examine consequences of developments in this area. The course is designed in a Problem Based Learning format, where students research critical areas and provide oral and written reports for other members in the class. The course is organized by topics including Concepts in Genetics, Cloning and Ethics, Gene Therapy, Prenatal Diagnosis, Gene Therapy for Cancer, Cell Replacement Therapy, Genomics and Proteomics, Vaccines, Forensics, Plant Biotechnology, and Instrumentation. At the end of the course, each student makes a formal presentation on a specific advance in biotechnology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5501. Analytical Biotechnology. 1.5 Credit Hour.**

This course provides a comprehensive survey of current techniques of biomolecule measurement and analysis using biochemical testing as the basis of measurement in a biotechnology laboratory. The detection, purification, and characterization of biomolecules (proteins, nucleic acids, carbohydrates, and lipids) are major goals in biotechnological research and development. Specific biomolecules serve as markers for the accurate and sensitive diagnosis of disease, and afford drug targets for disease treatment. Biomolecules also can be indicators of harmful (or beneficial) environmental agents and conditions. New, highly sensitive and accurate analytical methods are now available for the detection of diverse biomolecules. Note: Biochemistry Majors who have completed CHEM 4375 or CHEM 4404 with a minimum grade of C may register for BIOL 5501 with permission from instructor.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5502. Microbial Biotechnology. 3 Credit Hours.**

Course covers use of microorganisms in biotechnology. Includes recombinant DNA methodology and application of these approaches to production of medicines and for environmental remediation. Synthetic biology and metabolic engineering will also be covered (theory and concepts).

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Engineering, Medicine, Lewis Katz School, Pharmacy, Science & Technology.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5503. Biotechnology Laboratory I. 3 Credit Hours.**

The biotechnology laboratory course is designed for students in the Professional Science Master's Program in Biotechnology. Students in the program will be recruited from Science, Technology, Engineering and Math (STEM) undergraduate majors and this hands-on course is designed with this understanding. The course will introduce students to some of the basic laboratory approaches used in the analysis of biologically-active environmental contaminants and in the synthesis of new and existing drugs. The first part of the course will emphasize molecular biological tools useful in drug design and contaminant analysis. The second part of the course will emphasize the chemical analysis of biologically-active compounds. The course will be problem-oriented with small team participation. The course will prepare students for a research project as part of the requirements for completion of the Professional Science Master's in Biotechnology.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5504. Biotechnology Laboratory II. 3 Credit Hours.**

The biotechnology laboratory course is designed for students in the Professional Science Master's Program in Biotechnology. Students in the program will be recruited from Science, Technology, Engineering and Math (STEM) undergraduate majors and this hands-on course is designed with this understanding. The first part of the course will introduce students to microorganisms relevant to human and environmental health, for example pathogenic organisms as well as antibiotic-producing organisms. The second part of the course will focus on genomic and proteomic techniques and the use of bioinformatics in drug design, bioremediation and related challenges. The course will be problem-oriented with small team participation. The course will prepare students for a research project as part of the requirements for completion of the Professional Science Master's in Biotechnology.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5505. Ethics Regulation and Policy in Biotechnology. 3 Credit Hours.**

The Bioethics, Policy and Regulation course is designed for students in the Professional Science Master's Program in Biotechnology. This course will provide an understanding of ethical decisions, governmental regulations and policies in biotechnology. A case study approach will be used to provide a framework for discussions of policy and ethical decision making. Guest speakers will provide insights from legal and governmental perspectives on emerging and current biotechnology applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5506. Professional Development Seminar for PSM in Biotechnology. 1 Credit Hour.**

The PSM program prepares graduates for careers in biotechnology-related fields with a strong emphasis on skill areas that include management, policy and regulation in addition to scientific discovery. This course will provide students with career exposure through interviews with professionals in government and industry and will assist students in developing a career plan. Students will develop a white paper on the current state of Biotechnology based on new advances and challenges in the past year. Members of the advisory board will participate in facilitating the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BIOL 5501, BIOL 5503, and BIOL 5505.

**BIOL 5509. Computational Genomics. 3 Credit Hours.**

This is a course on the application of genome-related concepts to genome sequence data. Students will gain familiarity with both existing software and with basic programming (scripting) skills for problems in genomics. Further, students will come to understand the connections between standard computational and statistical approaches and their underpinnings in those fields increasingly dominated by genomic approaches. These include the fields of molecular evolution, population genetics, molecular genetics, molecular biology, and biochemistry. The course will be a hands-on computational lab course, with students working on problems and assignments in class using their laptop computers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BIOL 5403.

**BIOL 5511. Ethics in Bioinformatics. 2 Credit Hours.**

This course will examine the social, legal, and privacy issues of applying computational approaches to large datasets including those from personal genome projects. The class will expose students to variation-based approaches in genomics, policies and strategies to share genomic data, database management and security, open-access and open-source philosophies, the ethics of collecting, storing, and disseminating human data, and HIPAA, FDA, and IRB regulatory policies for health care professionals and bioinformaticians. Students will be given the opportunity to discuss contemporary case studies, in addition to NIH-sanctioned online training modules (Responsible Conduct in Research).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5514. Biological Models in Python. 3 Credit Hours.**

This course provides an introduction to the field of computational biology by implementing biological models in the Python programming language. In addition to coverage of the basics of the Python language, topics will include: phylogenetic tree models, implementation of Markov models for biological problems, data structures and algorithms for the analysis of biological sequences, and the use of popular Python modules relevant for biological modeling. Prior basic knowledge of evolutionary theory and of genetics/genomics is expected. Some prior scripting experience is helpful, but students are not required to have an extensive coding background. This is a hands-on computational lab course, with students working on problems in class using their laptop computers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5521. Nucleic Acid Technologies. 1.5 Credit Hour.**

This course provides a focused examination and analysis of the basic structures and properties of RNA and DNA; the enzymes that synthesize or modify these biomolecules; and biotechnological applications. The synthesis and purification of DNA and RNA will be reviewed along with detection methodologies, including enzymatic amplification, array analysis, and amplification-free (direct) approaches. Nucleic acid sequencing technologies, including the analysis of ancient or degraded DNA and emerging nanopore-based sequencing approaches, will be surveyed. Finally, the course will examine how the inherent ability of DNA and RNA to self-assemble can be harnessed to provide novel nanostructures with complex architectures, and that show promise in biomedical and biotechnological applications. Note: Biochemistry Majors who have completed CHEM 4375 or CHEM 4404 or BIOL 5501 with a minimum grade of C may register for BIOL 5521 with permission from instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5522. Introduction to Scientific and Regulatory Writing. 3 Credit Hours.**

This course introduces students to the two primary types of medical writing done by/for pharmaceutical and biotech companies. Specifically, students will learn how to research and write abstracts, posters, clinical reports and other research manuscripts, patient education materials, and slide kits. In addition, students will be introduced to the basics of strategic planning and consulting, including the creation of publication plans and meeting planning from a marketing perspective. Students will also learn the fundamentals of regulatory writing. Topics will include overviews of U.S. and international regulatory agencies, product life cycles, the conduct of clinical trials and reporting clinical trial results, and activities and documentation involved with submissions for marketing approval of treatments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5532. Introduction to Grant Writing. 3 Credit Hours.**

This course is designed for students who plan to enter professional careers requiring knowledge of grant writing. The course will teach students the mechanics of proposal writing and the political and social aspects of "grantsmanship" as they develop their skills in identifying sources of grant funding, doing useful research to support their applications, and tailoring their proposals to specific audience interests. There will be several short writing assignments, an exam, and an independent project. Students may also be asked to engage in a collaborative grant project to help build their skills in collaboration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5533. Communicating Science to a Broader Audience / Non-Scientists. 3 Credit Hours.**

This writing intensive course will be developed as a hybrid class with online and in-class components, with instructor/s interacting with students by editing multiple drafts of a paper requiring the students to communicate a science topic to readers with either no science background or backgrounds in other STEM fields. The learning goal of this course will be emphasizing the communication of scientific theory and concepts to wide-ranging audiences, especially non-scientists. The class will require students to demonstrate the ability to break down complex science into accurate, yet understandable explanations, by writing an article in the style of the New York Times science section, or a science report in a newspaper such as the Philadelphia Inquirer.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 5582. Graduate Independent Study. 1 to 3 Credit Hour.**

Explorative study or research initiated by a graduate student with faculty sponsorship and an approved independent study contract.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8001. Teaching of Biology. 2 Credit Hours.**

Required of all first-year teaching assistants. Instruction in the art of teaching laboratories and recitations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 8002. Teaching of Biology. 2 Credit Hours.**

Required of all first-year teaching assistants. Instruction in the art of teaching laboratories and recitations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8003. Introduction to Graduate Research. 3 Credit Hours.**

This course will provide entering doctoral students in Biology with a broad perspective on philosophical and scientific reasoning, introduce overarching principles in both bioethics and biostatistics, and initiate student development through exercises that emphasize both written and oral communication skills necessary for a successful career in the sciences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 8210. Seminar. 1 Credit Hour.**

Seminar. Topics will vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8220. Seminar. 1 to 4 Credit Hour.**

Required Laboratory Research Rotation for all first year graduate students

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8250. Seminar. 3 Credit Hours.**

Seminar. Topics will vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8260. Seminar. 2 to 4 Credit Hours.**

Seminar. Topics will vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8450. Seminar. 3 Credit Hours.**

Seminar. Topics will vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8510. Seminar in Neuroscience. 3 Credit Hours.**

A discussion of recent advances in the clinical and experimental Neurosciences using original research papers or reviews. Particular topics are selected on the basis of student interests and background.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 8802. Research Techniques. 4 Credit Hours.**

Laboratory instruction in the biochemical and biophysical techniques used to investigate biological problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BIOL 8985. Teaching in Higher Education: Life Sciences. 1 to 3 Credit Hour.**

This course focuses on the research on how people learn and best teaching practices, with the aim of preparing students for effective higher education life science teaching.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 9283. Directed Readings. 1 to 9 Credit Hour.**

Directed study and discussion of the current research literature

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 9991. Graduate Research Projects. 1 to 6 Credit Hour.**

Short-term, limited research project or laboratory project in the field. The course is for doctoral or master's students, including PSM, MA or MS. This class will not confer full time program status unless nine credits are taken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is required for students who are preparing for the preliminary or candidacy examination. Students should enroll after coursework is completed or when preparing for the candidacy exam until the time that the preliminary or candidacy examination is completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. All students must complete a minimum of one credit of this course. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 9995. Capstone Project. 1 to 6 Credit Hour.**

Capstone project for master's students including students in PSM, MA or MS. This class will provide full-time status. Students in PSM programs need to register for at least one credit of this course to fulfill program requirements. Additional credits may be required for specific programs. Students in the MA program may satisfy this course requirement by completing a library thesis. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 9996. Master's Thesis Research. 1 to 6 Credit Hour.**

Course for master's thesis research. Only intended for students in thesis bearing master's programs. A minimum of one credit is required. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 9998. Pre-Dissertation Research / Elevation to Candidacy. 1 to 6 Credit Hour.**

This course is intended for students who are performing research prior to candidacy. Students can register for this course after required courses are completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must be registered for this course during the semester that they are to be elevated to candidacy examination. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BIOL 9999. Dissertation Research. 1 to 6 Credit Hour.**

The course is for Ph.D. students who have been elevated to candidacy. During the course of their candidacy students must complete a minimum of two credits of dissertation research. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Biomedical Sciences (Medicine) (BMSC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**BMSC 8001. Introduction to Biochemistry and Molecular Biology. 3 Credit Hours.**

Graduate level course that describes fundamentals of biochemistry and molecular biology. Topics include proteins, enzymes, ligand binding, energy metabolism, carbohydrate, lipid and amino acid metabolism, structure of RNA and DNA, chromosomes and genes, DNA replication and repair, RNA transcription, and protein translation, degradation, trafficking.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8002. Introduction to Cell Biology and Immunology. 3 Credit Hours.**

Graduate level course that describes fundamentals of cell biology and immunology. Topics include prokaryotic and eukaryotic cell biology, mitosis and meiosis, cell cycle control, membranes and membrane channels/transporters, cytoskeleton, cell differentiation, apoptosis, principles of immunology, antigens, cells of the immune system, humoral immune responses, autoimmunity, hypersensitivity and allergies, and host-pathogen interactions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8003. Introduction to Molecular and Cell Biology. 3 Credit Hours.**

Graduate level course that describes fundamentals of molecular biology, genetics and cell biology. Topics include structure of DNA and RNA, chromosomes and genes, DNA replication and RNA, RNA transcription, protein translation, protein degradation and trafficking, prokaryotic and eukaryotic cell biology, mitosis and meiosis, cell cycle control, membranes and membrane channels/transporters, cytoskeleton, cell differentiation and apoptosis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8101. Molecules to Cells. 6 Credit Hours.**

Graduate level course that describes fundamentals of biochemistry, molecular biology, cell biology and immunology. Biochemistry, molecular biology and cell biology will consider both prokaryotic and eukaryotic organisms. Immunology will include principles of immunology and host-pathogen interactions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8102. Experimental Design and Biostatistics. 1 Credit Hour.**

This is a one-credit course designed to provide first year Biomedical Science graduate students basic information concerning experimental design and biostatistics. The emphasis of this course will be to provide practical information pertaining to the design of biomedical experiments and their analysis using a variety of statistical approaches.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8103. Scientific Integrity and Bioethics. 1 Credit Hour.**

This is a one-credit graduate course to provide Biomedical Science graduate students with instruction in ethical conduct of research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8104. Introduction to Laboratory Research I. 1 Credit Hour.**

This is a one-credit graduate course to provide Biomedical Science graduate students with exposure to the research opportunities in the five Biomedical Science research clusters and to obtain supervised research experience in the laboratory.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8201. Organ Systems: Function, Dysfunction and Therapeutics. 4 Credit Hours.**

This graduate level course provides instruction in the physiological, pathophysiological and pharmacological aspects of various organ systems. Organ systems will include cardiovascular, pulmonary, renal, endocrine, musculoskeletal and neurological.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8202. Scientific Communications. 1 Credit Hour.**

This course will provide instruction in both written and oral scientific communications. Students will be guided in the preparation of power point presentations, abstracts and full manuscripts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8203. Introduction to Bioinformatic Tools and Applications. 1 Credit Hour.**

This is a one-credit course to provide instruction in bioinformatic approaches to the conduct of biomedical research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8204. Introduction to Laboratory Research II. 1 Credit Hour.**

This is a one-credit course to provide Biomedical Science graduate students with supervised research experiences within laboratories.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8205. Cell Structure & Function. 2 Credit Hours.**

The goal of this course is to learn the structure and function of basic tissues in the body. Emphasis will be on the study of the structure of different cell types in the body and how this relates to their function.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8206. Molecular, Cellular and Systems Signal Transduction. 2 Credit Hours.**

This course will discuss basic mechanisms of cell signaling in a variety of different cell types.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8207. Molecular Approaches to Research. 2 Credit Hours.**

The goal of the course is to give students an understanding of basic and novel molecular approaches to biomedical research. The following major issues are addressed: (i) what are the molecular approaches most frequently used in biomedical research; (ii) why a particular approach fits a specific question asked in the course of research, and how to select the most suitable approach; and (iii) what is the molecular basis of these experimental approaches, i.e. how and why the techniques used in the lab work. Areas of instruction will include methods for the study of DNA, RNA and protein, optical approaches, transgenic animals and other animal models of human disease and single-cell analysis using flow cytometry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8401. Scientific Grant Writing. 1 Credit Hour.**

The overall purpose of this course is to provide training to Biomedical Science graduate students in the preparation of a successful grant application.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8500. Cancer Biology and Genetics Student Seminar and Journal Club. 1 Credit Hour.**

This course will require that the student participate in two separate activities: (i) attend and participate in the student seminar series of the Cancer Biology and Genetics cluster and present a literature based seminar on a topic within this field of study, and (ii) attend and participate in a specialized journal club in an area of interest. The course director will provide students with detailed course/grading policies, schedules, and a list of journal clubs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8502. Cancer Biology. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Cancer Biology and Genetics Cluster of the Biomedical Sciences Graduate Program. It is an interdisciplinary course taught by faculty from the School of Medicine and the Fox Chase Cancer Center. The goals of the course are 1) to provide students with a comprehensive background of cancer, from the patient to the transformed cell, 2) to provide a molecular understanding of the difference between normal and cancer cells and 3) to provide an understanding of the origins, treatments and prevention of cancer. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8503. Genetics and Epigenetics. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Cancer Biology and Genetics Cluster of the Biomedical Sciences Graduate Program. The focus of this course is on Hereditary Mechanisms and Epigenetics. Mendelian diseases and complex phenotypes will be reviewed. The major focus will be on mechanisms of Epigenetic modifications and heritability, including its role in development and disease. Experimental approaches to epigenetics studies will be presented and papers from the literature will be the backbone of the course. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8510. Special Topics in Cancer Biology and Genetics. 2 Credit Hours.**

This course is based on the breaking research findings in the area of Cancer Biology and Genetics and the interests of the faculty and students within this cluster. Topics will vary year to year. The course director will provide students with detailed course/grading policies, schedules and reading lists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8600. Infectious Disease and Immunity Student Seminar and Journal Club. 1 Credit Hour.**

This course will require that the student participate in two separate activities: (i) attend and participate in the student seminar series of the Infectious Disease and Immunity cluster and present a literature based seminar on a topic within this field of study, and (ii) attend and participate in a specialized journal club in an area of interest. The course director will provide students with detailed course/grading policies, schedules and a list of journal clubs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8602. The Biology of the Immune Response. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Infectious Disease and Immunity Cluster. The focus of this course is the study of the components of the immune system, their development and function, and their roles in various pathological processes. Readings are from the primary literature including landmark papers and recently published work. The successful completion of this course will allow the application of evidence based knowledge to the graduate student's own research project. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8603. Molecular Genetics of Human Viruses. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Infectious Disease and Immunity Cluster. This course aims to provide graduate students with the opportunity to gain knowledge of human viruses and viruses of zoonotic origins. The research methods used in medical virology relevant to elucidating viral replication and pathogenesis will be covered. In addition, the ways for which viruses are used in genetic engineering, cancer treatment and basic research will be discussed. The course covers materials from seminal papers and latest published work. The successful completion of this course will allow the application of evidence based knowledge to the graduate student's own research. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8604. Cellular and Molecular Basis of Host-Microbe Interactions. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Infectious Disease and Immunity Cluster. The focus of this course is to understand the cellular and molecular mechanisms of microbial pathogenesis and the host response to the pathogen. Selected model organisms will be used for in depth exploration of host-pathogen interactions. In addition, certain general strategies of microbial survival and penetration, and of host recognition and response to danger signals, will be covered. Lectures present evidence for current concepts and theories from the primary literature and review articles. Conference hours cover recent relevant research papers. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8610. Special Topics in Infectious Disease and Immunity. 2 Credit Hours.**

This course is based on the breaking research findings in the area of Infectious Disease and Immunity and the interests of the faculty and students within this cluster. Topics will vary year to year. The course director will provide students with detailed course/grading policies, schedules and reading lists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8700. Molecular and Cellular Biosciences Student Seminar and Journal Club. 1 Credit Hour.**

This course will require that the student participate in two separate activities: (i) attend and participate in the student seminar series of the Molecular and Cellular Biosciences cluster and present a literature based seminar on a topic within this field of study, and (ii) attend and participate in a specialized journal club in an area of interest. The course director will provide students with detailed course/grading policies, schedules and a list of journal clubs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8702. Enzymes and Proteins. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Molecular and Cellular Biosciences Cluster. The overall goal of this course is to enable students to understand protein structural and catalytic aspects of contemporary biochemistry. The student who completes this course will be able to engage in dialog about protein structure and function. The student will be able to understand, visualize, reshape, present and discuss data from original sources. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8703. RNA and its Role in Gene Expression. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Molecular and Cellular Biosciences Cluster. The focus of this course is on the study of RNA and its multiple roles in gene expression. The structure, synthesis, processing and function including protein translation of both classic RNA molecules (mRNA, tRNA and rRNA) and nontraditional RNA molecules (such as miRNAs, long noncoding RNAs, RNAs with enzymatic activity) are discussed. Both single molecule based approaches and genomic approaches are discussed. Readings are from the primary literature including landmark papers and recently published work. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8704. Molecular Physiology of Ion Signaling. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Molecular and Cellular Biosciences Cluster. The overall focus of this course is on ion channels and their function in biological systems. Part 1 of the course focuses on ion balance, channel classes and channel structures. Part 2 focuses on the biological impact of ionic control of cytosolic Ca<sup>2+</sup> concentration. Part 3 focuses on the impact of these changes on physiology and disease in multiple organ systems. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8705. Biophysical Approaches to Research. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Molecular and Cellular Biosciences Cluster. Students will learn to appreciate how biophysical principles can be used to understand and measure properties of biomolecules and cells. The areas covered in the course emphasize how to generate, analyze and interpret quantitative information about biological molecules or systems. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8706. Structure and Dynamics of Biomolecules and Assemblies. 2 Credit Hours.**

This is an advanced topics course offered for students in the second year of study in the Biomedical Sciences Graduate Program. The course will focus on understanding structure and behavior of biomolecules and assemblies, including the chemical basis for molecular interactions and techniques for studying macromolecular structure.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8710. Special Topics in Molecular and Cellular Biosciences. 2 Credit Hours.**

This course is based on the breaking research findings in the area of Molecular and Cellular Biosciences and the interests of the faculty and students within this cluster. Topics will vary year to year. The course director will provide students with detailed course/grading policies, schedules and reading lists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8800. Neuroscience Student Seminar and Journal Club. 1 Credit Hour.**

This course will require that the student participate in two separate activities: (i) attend and participate in the student seminar series of the Neuroscience cluster and present a literature based seminar on a topic within this field of study, and (ii) attend and participate in a specialized journal club in an area of interest. The course director will provide students with detailed course/grading policies, schedules and a list of journal clubs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8802. Essentials of Neuroscience. 2 Credit Hours.**

This is a REQUIRED Cluster-based Advanced Course offered by the Neuroscience Cluster of the Biomedical Sciences Graduate Program. This course is open to all graduate students in all disciplines with an interest in learning basic neuroscience. This course focuses on the basic neurophysiological and neuroanatomical aspects of the organization of the nervous system. Neuroanatomical structures and their function will be covered using a system based approach. Sensory, motor and special sensory systems will be included. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8803. Molecular and Cellular Neuroscience. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Neuroscience Cluster. The overall goal of this course is to provide an integrated approach to the understanding of the structure and function of neurons and glia. Topics include the cellular structure of neurons and glia, molecular mechanisms for neural transmission and plasticity, new concepts on neurogenesis and cell fate decisions, signaling pathways for neuronal polarization and neuritogenesis, molecular biology and function of glia, neuron-glia interactions, glial cell pathophysiology, neuroinflammation and the role of glia in the development and progression of various neurological disorders and diseases. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8804. Neuropharmacology. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Neuroscience Cluster. The overall goal of this course is to provide the basic aspects of neuropharmacology by investigating mechanism by which drugs influence and/or modulate different neural system activities and functions. The molecular, cellular and biochemistry characteristics of several classes of drugs with implications for human pathologies will be discussed. Four areas of emphasis will include: structure and function of the nervous system, neurotransmitters and neuromodulators, neuroinflammation and neurodegeneration. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8805. Pharmacology of Drugs of Abuse. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Neuroscience Cluster. The focus of this course is on the pharmacology of drugs of abuse. Topics include historical perspectives of drug abuse, cellular responses to acute and chronic exposure to drugs of abuse, effects of drugs of abuse on the immune system, and medical treatment of drug dependence. Specific drug classes that are covered include opioids, cocaine, amphetamines, spice and bath salts, club drugs, LSD and PCP, alcohol, caffeine, nicotine, benzodiazepines and sedatives, and cannabinoids. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8806. Translational Science of Nervous System Diseases. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Neuroscience Cluster. Students will gain knowledge of translational science regarding the molecular basis of various nervous system diseases, current treatments and rehabilitation, and advances in animal modeling of disease that address prevention and improved treatment modalities. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8807. Developmental Neurobiology. 2 Credit Hours.**

This course will focus on the molecular and cellular mechanisms that govern development of the mammalian central nervous system. Topics include but are not limited to: Development of the Cerebral Cortex, Retinal Development, Glial Development, White Matter Maturation, Neuroprogenitors Cells, Axonogenesis and Dendritogenesis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8810. Special Topics in Neuroscience. 2 Credit Hours.**

This course is based on the breaking research findings in the area of Neuroscience and the interests of the faculty and students within this cluster. Topics will vary year to year. The course director will provide students with detailed course/grading policies, schedules and reading lists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8900. Organ Systems and Translational Medicine Student Seminar and Journal Club. 1 Credit Hour.**

This course will require that the student participate in two separate activities: (i) attend and participate in the student seminar series of the Organ Systems and Translational Medicine cluster and present a literature based seminar on a topic within this field of study, and (ii) attend and participate in a specialized journal club in an area of interest. The course director will provide students with detailed course/grading policies, schedules and a list of journal clubs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 8902. Mechanisms of Cardiovascular Pathophysiology. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Organ Systems and Translational Medicine Cluster. The overall goal of this team-taught course is to introduce graduate students to the cellular and molecular mechanisms of multiple cardiovascular diseases, with a focus on experimental approaches. The approach will combine didactic presentation with relevant important scientific literature. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8903. Hemostasis and Thrombosis. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Organ Systems and Translational Medicine Cluster. Selected areas of Hemostasis and Thrombosis will be addressed from a historical perspective to state of the art technology and knowledge. This course will study molecular mechanisms and signal transduction events that regulate hemostasis through coagulation cascades and platelet function. The implications of treatments of bleeding disorders, thrombosis, and the therapeutics will be discussed. Students are expected to read seminal papers and participate in class by contributing to discussion. Each topic will have discrete study objectives. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8904. Translational Pulmonary Physiology - Experimental Basis. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Organ Systems and Translational Medicine Cluster. Selected areas of pulmonary physiology will be addressed from application, experimental, and historical perspectives. This course will study mechanisms that underlie major pulmonary diseases such as acute respiratory distress syndrome, chronic obstructive pulmonary disease, asthma, and ventilator induced lung injury. How these diseases modify the function of the pulmonary system, the mechanical, circulatory and inflammatory profiles of the lung, and interventions to attenuate dysfunction will be discussed. Students are expected to read seminal papers and participate in class by contributing to discussion. Each topic will have discrete study objectives. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8905. Advanced Pharmacology and Translational Medicine. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Organ Systems and Translational Medicine Cluster. Pharmacology is the study of biochemical and physiological processes mediated through exogenous or endogenous substances that interact with living systems. Translational medicine aims to use pharmacological discoveries to develop novel therapies in treatment of human disease. The overall goal of this course is to introduce students to the subject of advanced pharmacology and then to focus on recent advances in methodologies used to develop new therapeutics with an emphasis on experimental approaches. The approach will combine didactic presentation with a combination of informal discussion of important scientific literature. Course materials will be handouts/lecture slides provided by each instructor, and selected research papers from the literature. Each lecture will provide a solid foundation for students to understand the methods and techniques used in experimental pharmacology and translational medicine in addition to the concepts. Student participation in the form of questions and discussion is encouraged. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8906. Development, Function and Diseases of the Musculoskeletal System. 2 Credit Hours.**

This is a Cluster-based Advanced Elective Course offered by the Organ Systems and Translational Medicine Cluster. Lecture topics will include: musculoskeletal histology, development of limbs, muscle, bone and joints, diagnostic imaging of musculoskeletal system and cartilage repair/fracture, cell biology of osteoblasts and osteoclasts, biomechanics of musculoskeletal system, skeletal pathologies and central nervous system/bone interactions. Course syllabus is provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8907. Organ Metabolism - Molecular Pathology and Experimental Models. 2 Credit Hours.**

This is an advanced topics course offered to students in the second year of study in the Biomedical Science Graduate Program. The overall goal of this course is to introduce students to the subject of systemic metabolism and organ metabolism and relate this to various key organ pathologies and diseases. Emphasis will be placed on recent advances in molecular pathways along with the experimental models and methodologies used to develop new therapeutics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BMSC 8910. Special Topics in Organ Systems and Translational Medicine. 2 Credit Hours.**

This course is based on the breaking research findings in the area of Organ Systems and Translational Medicine and the interests of the faculty and students within this cluster. Topics will vary year to year. The course director will provide students with detailed course/grading policies, schedules and reading lists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 9991. Biomedical Science Research. 1 to 6 Credit Hour.**

Students will perform supervised laboratory research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 9994. Preliminary Exam Preparation. 1 to 6 Credit Hour.**

Biomedical Science students will enroll in this course when they are preparing for the PhD Preliminary Examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 9995. Master's Project. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 9996. Master's Thesis. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 9998. Postcandidacy Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BMSC 9999. Dissertation Writing. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

# Biomedical Studies (PBMS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

## **PBMS P100. Histology. 6.25 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## **PBMS P102. General Anatomy. 7 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## **PBMS P103. Lower Extremity Anatomy. 7.7 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## **PBMS P104. Neurophysiology. 2.5 Credit Hours.**

Upon successful completion of this course, the student will: Understand the development of the nervous system and how it relates to anatomy in the adult; Understand the function of electrically excitable cells, the diversity, distribution and action of chemical synapses, the cellular basis of information transmission in the nervous system, and the function of simple neural circuits, particularly spinal reflexes; Understand the principles of sensory transduction and the coding of sensory information in the nervous system; Know the nervous pathways associated with sensory systems, including those conveying cutaneous, proprioceptive, and pain information, as well as the special sense of vision, olfaction, audition and balance, and understand the basic functioning of these systems; Understand the physiology of muscle, and how the nervous system controls muscles to achieve desired movements, especially in relation to posture and gait; Know the nervous pathways associated with motor systems, including organization of the spinal cord, descending pathways, the basal ganglia and the cerebellum, and understand the basic functioning of these systems; Know the circuitry and understand the feedback pathways associated with nervous control of body homeostasis; Understand the structural bases of arousal, higher cortical functions, memory and emotion; Be familiar with hereditary, metabolic and mechanically induced pathologies, especially with respect to peripheral sensation and motor function; Understand the structural bases of neurological examination, and develop an appreciation of the clinical tests used to evaluate nervous system function, especially for the lower extremity.

**Class Restrictions:** Must be enrolled in one of the following Classes: First Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

## **PBMS P105. Neuroanatomy. 2 Credit Hours.**

The course involves the study of the structure and function of the central nervous system through an understanding of the principal neural pathways involved in the transmission of information. These pathways include those mediating motor and sensory functions, as well as those serving higher cortical functions such as cognition. The neuroanatomic basis of the neurological examination of a patient and the implications of damage to these pathways will be emphasized. The course will be presented primarily through lectures. In addition there will be one lab session and several sessions for the discussion of case studies.

**Class Restrictions:** Must be enrolled in one of the following Classes: First Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

## **PBMS P109. Biomechanics. 2 Credit Hours.**

The course reviews skeletal and muscular anatomy and discusses those processes necessary to allow posture and locomotion. The students will identify skeletal features through palpation and use these references for segment measurement and evaluation of joint range and quality of motion. Instrumented measurements will supplement clinical measurements. The course provides normal joint ranges of motion in the lower extremities in mature and pediatric individuals; introduces single plane and triplane motions in the open and closed kinetic chains; describes muscle action with respect to joint axes; prepares the student for clinical biomechanical examination and gait analysis; provides a basis for understanding biomechanical pathology; introduces terminology describing segmental deviations from normal structure and function; introduces the student to biomechanical evaluation of diagnostic imaging; and compares clinical measurement with radiological and instrumented findings for an individual.

**Class Restrictions:** Must be enrolled in one of the following Classes: First Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

## **PBMS P110. Biochemistry. 6 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## **PBMS P111. Physiology. 5 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P120. Microbiology. 6.8 Credit Hours.**

The etiology, control, immunology, and pathogenesis of infectious disease related to medical bacteriology, virology, mycology and parasitology. An understanding of the principles of Microbiology and Immunology. A knowledge of microorganisms, their identification and relationship to disease with an emphasis on those microbes of particular interest to the practicing podiatrist. The maintenance of a sanitary environment with an understanding of sources of infection, contagion, and practice of microbial control. A well-rounded scientific approach to the infectious problems of the patient with an appreciation of the contributing medical disciplines. An epidemiological awareness of the responsibility of the podiatrist to the patient. An understanding of microbiologic clinical laboratory services, their reporting systems and their value to clinical practice.

**Class Restrictions:** Must be enrolled in one of the following Classes: First Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P201. Advanced Dissection. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P210. Pharmacology. 5.25 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P220. Microbiology. 13 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P221. Pathology. 9 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P222. Pathophysiology. 3 Credit Hours.**

Pathophysiology is the integrated study of the basic medical sciences. Usage of case studies and clinical vignettes taught in a comprehensive medical team approach will serve to help students better understand basic tenants of the medical sciences which will then help them achieve greater success on boards, rotations and clinical practice in the future.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P301. Advanced Dissection. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P401. Advanced Dissection. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PBMS P504. Lower Extremity Anatomy. 1.5 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

## Business Administration (BA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**BA 5001. Industrial Organization for Business Strategy. 1 to 3 Credit Hour.**

The course is an applied managerial economics course; industrial organization serves as a foundation for business management and strategy. The course provides the framework within which to study market equilibrium, firm and consumer behavior, and strategic interactions through the lens of firm and firm management. The tools of managerial economics are applied to study problems involving business strategy, industry evolution and dynamics, pricing methodologies, dealing with competitors, managing under uncertainty, asymmetric information, price discrimination, antitrust, auctions, and externalities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5002. Socioeconomic Context of Business. 3 Credit Hours.**

Today's business environment is full of challenges in the form of global competition, regulatory change, rapid technological change and domestic and international market instability. In this context, knowledge of both micro- and macro-economics is becoming an increasingly important tool for solving real world problems. This course is divided into two modules. In the first module, we delve into the microeconomics foundations of business. In the second module, we focus on domestic and global macroeconomics. Economics is a basic underpinning of firm strategy. Economics focuses on the role of markets, the economic behavior of consumers and enterprises, market efficiency, the role of the public sector, firm behavior and the organization of industry. We will discuss important ways in which markets fail, and the challenges and opportunities these market failures create for entrepreneurs and existing businesses. Macroeconomics involves the study of the performance of national economies and the policies that governments use to try to improve economic performance. In this section of the course, we will discuss key economic concepts and data such as GDP, employment, interest rates, inflation, business cycles, and exchange rates to better understand the meaning and significance of these data and their impact on the business environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5003. Legal and Ethical Foundations of Business. 3 Credit Hours.**

Business leader's face values conflicts. This course analyzes economic and moral theories people use to assess whether proposed actions are right or wrong, good or bad, just or unjust. While moral theories can guide our thinking, we explore why they do not always guide our behavior. That brings us to the law. Laws constitute socially imposed incentives and disincentives to encourage people to do what society deems "right". In that way, law represents substantive decisions by the state that are values-based and do not necessarily yield just results. In this course, we come to understand that our laws are not without moral import and that ethics must inform the law because the law in and of itself does little work in informing what should be. It mostly speaks to what is.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5051. Enterprise Management Consulting Experience (EMC) I. 3 Credit Hours.**

The EMC Practicum is an innovative hands-on learning experience involving faculty and students. During their practicum, cross-cultural student teams will assist firms or divisions on a live consulting project. MBA student teams will integrate course work, business experience, and primary and secondary research into highly professional market entry strategies or business plans.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5052. Enterprise Management Consulting Experience (EMC) II. 3 Credit Hours.**

The EMC Practicum is an innovative hands-on learning experience involving faculty and students. During their practicum, cross-cultural student teams will assist firms or divisions on a live consulting project. MBA student teams will integrate course work, business experience, and primary and secondary research into highly professional market entry strategies or business plans.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5087. Leadership and Professional Development Practicum. .5 to 1.5 Credit Hours.**

This academic content provides students with an understanding of human behavior in organizations and the means through which managers can influence that behavior. Specifically, the class considers key situations where the effective exercise of leadership can materially contribute to the achievement of strategic organizational objectives. Emphasis is placed on identifying and developing the personal skills and perspectives necessary to establish and maintain a leadership position, e.g., self-awareness and abilities in such areas as communication, decision-making, problem solving, and behavioral management. These skills are then applied through a carefully crafted practicum to facilitate acquisition of competencies through professional and career development opportunities and planned opportunities to exercise leadership with the context of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**BA 5088. Ethical Decision Making in Business and Professional Development Practicum. .5 to 1.5 Credit Hours.**

This academic content looks at business in the context of its various stakeholders, including shareholders, management, employees, customers, suppliers, government regulators, and local/national/global communities. It explores a range of issues from the role of business in society at large to the ethical dimensions of ordinary business decision-making. Emphasis is placed on identifying and developing the personal skills and perspectives necessary to engage in ethical decision making and leadership e.g., personal ethical behavior, facing ethical dilemmas, whistle blowing and ethical responses to unethical corporate practices. These skills are then applied through a professional development practicum to facilitate acquisition of competencies through professional and career development opportunities and planned opportunities to exercise ethical decision making within the context of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**BA 5111. Globalization. 1.5 Credit Hour.**

Gives students an understanding of the nature and complexity of the dynamic global environment that serves as the external context for the operations of international companies and that is an integral part of understanding international business. Explores the phenomena of globalization and the interdependence of nation states as they impact companies and industries throughout the world.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5112. Managing Risk. 1.5 Credit Hour.**

Examines in detail the holistic risk management process from the perspective of an international corporation and defines what risk management is and why organizations have risk managers. Class discussion topics include ethical risk and insurance management practices, as well as administrative and strategic aspects of global corporate risk management such as drafting risk management policy statements, setting risk management goals, and examining how a risk manager operates within a complex international organization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5113. The Valuation of Firms. 1.5 Credit Hour.**

Introduces the use of accounting numbers for valuation for both external purposes, including investor models of firm value and credit risk assessment, as well as internal purposes, including project assessment and performance evaluation. Focuses specifically on an accounting review of fundamentals, firm valuation, cash flows, earnings, modeling financial distress, and using residual income to evaluate performance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5114. Entrepreneurial Thinking and Innovation. 1.5 Credit Hour.**

Examines issues relevant for entrepreneurs engaged in start-up or early stage ventures as well as those important to managers and stakeholders of new ventures within established organizations, including concepts, skills, know-how, information, attitudes and alternatives. Focuses on two key success factors in new enterprise formation: the entrepreneur and his/her ability to create and recognize opportunities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5115. Law and Ethics in Business. 1.5 Credit Hour.**

Imparts a sense of when and how the legal system may affect business, particularly in the areas of contract, tort, and government regulation. Develops an appreciation of the fact that law and ethics seem many times in business to converge, while in other instances what is legal may not be ethically correct. Explores through discussion of business ethics case studies how such situations arise and how they might be resolved or prevented. Includes training for online research, especially in legal areas using Lexis-Nexis database, and practice in the art of making well-reasoned written and oral arguments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5116. Information Technology Perspectives. 1.5 Credit Hour.**

Provides through discussions of technological and organizational issues an overview of the basic concepts underlying the development and implementation of emerging information technologies that are reshaping businesses and business practices. Culminates in a case study development project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5117. Managing People and Organizations. 3 Credit Hours.**

Focuses on basic issues concerning the management of organizations and human resources, with major emphasis on critical analysis, problem solving and performance evaluation. Provides opportunities to improve managerial and leadership skills through verbal presentations, group work, and specific case analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5118. Strategic Performance Management. 3 Credit Hours.**

This course has been designed to emphasize two fundamental issues in contemporary management practice: strategic cost analysis and management control. Strategic cost analysis deals with how managers' actions affect costs and revenues in a competitive context, and how financial and nonfinancial information can support decisions that enhance the value of the firm. Management control pertains to a study of systems designed for performance measurement and evaluation, rewarding and motivating employees, and coordinating business operations. The emphasis will be on transformational systems such as activity based costing and balanced scorecard.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5119. Real World Problems and Cases for Managers: An Interdisciplinary Approach. 3 Credit Hours.**

The ability to analyze and respond quickly to pressing and often complicated problems is a critical skill set for successful managers and corporate leaders. This interdisciplinary course is designed to increase student confidence and competence in "casing" to prepare for business problems likely to be faced in job interviews and future employment. The focus will be on honing analytical techniques and skills necessary to identify, develop, and implement solutions to significant business problems. Students will analyze several cases and a live business project. The course expands upon knowledge and skills offered in MBA core courses to further enhance student ability to address complex, real world situations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5170. Special Topics. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**BA 5180. Special Topics. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5182. Independent Study. 1 to 6 Credit Hour.**

Study in particular aspects of business administration under the direct supervision of a graduate faculty member. No more than six semester hours of independent study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5187. IMBA Practicum: Corporate Visits and Mentoring. 1 to 6 Credit Hour.**

This practicum consists of selected visits to a variety of multinational corporations in Europe, Asia and Philadelphia. Students are exposed to senior officials who outline the factors that go into their international strategic decision making. These interactive sessions, which include question and answer periods, are designed to provide real world insights to corporate behavior and to highlight factors that are important in the international arena. In addition, students may engage in team projects during their summer practicum in Asia.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5190. Special Topics. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5282. Independent Study. 1 to 3 Credit Hour.**

Study in particular aspects of business administration under the direct supervision of a graduate faculty member. No more than six semester hours of independent study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5287. Fox MBA Capstone Experience. 3 Credit Hours.**

The capstone experience for the Fox MBA is designed to integrate and apply concepts and skills learned across the entire MBA program. In the capstone, students combine theory, evidence and experience to analyze and solve a strategic challenge in a rigorous, thoughtful way. This course helps learners structure unstructured strategic challenges; develop the ability to recognize and assess strategic opportunities; conduct top-notch market, industry and competitive analysis; foresee strategic implementation issues; support strategic recommendations with financial decision models; manage teams; and lead change by generating support for recommendations. Note: Prior to Summer 2023, the course was titled "Fox Management Consulting Practicum."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Business Admin.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5389. Global Immersion Experience. 1 to 6 Credit Hour.**

This course provides field experience in an emerging market economy that allows students an immersive experience in which they observe firms and participate in short term projects to provide a much greater understanding of the application of MBA coursework in assessing the strategic landscape of the destination country.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Business Admin.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**BA 5411. Business Fundamentals I. 3 Credit Hours.**

A two-week, intensive course prepares new students for the Fall semester by giving an overview of critical business practices - namely ethical behavior and influential communication - as well as addressing current business issues with industry professionals. In addition to laying a foundation for the coursework in the program, this course will explore fundamental issues that permeate all course content, such as ethics and legal compliance, persuasive organizational communication, and current events impacting the domestic and global economy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5412. Business Fundamentals II. 3 Credit Hours.**

This course is an overview of industry, allowing students to develop a business vocabulary conducive to discussion of critical issues facing businesses in today's global economy. Business is explored by examining its place within a national and global system, and the typical structures that influence commerce. Students will be exposed to current issues associated with the central management functions of marketing, strategy, finance, accounting, human resources, information systems, and operations. In addition, students will discuss ethical and social issues with regards to their impact on businesses. Underpinning these discussions will be an understanding of basic macro and micro economic concepts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Co-requisites:** BA 5411.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5486. Capstone Experience: Internship. 1 to 3 Credit Hour.**

The MiM internship is a practical work experience that will typically lead to full-time employment. The experience comes at the end of the program, such that the student has the opportunity to apply classroom learning in a workplace setting related to their desired career field. Students use models of critical and reflective thinking to merge classroom theory with their practical experience. This course will provide you with opportunities important to your future. Over the course of the semester, you will gain firsthand, real-world experience that will help you enhance your skills and knowledge, build your professional network, and explore potential career paths.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Pre-requisites:** Minimum grade of C in FIN 5411 and SGM 5411.

**BA 5487. Capstone Project. 3 Credit Hours.**

The MiM project course may be chosen as a substitute for Internship (BA 5486). The course integrates all previous MiM classwork and applies that integrated knowledge to solving a strategic problem in an evidence-based and theoretically informed way. The primary focus of the course is to enable practical application of all previously learned MiM concepts through student teams engaging with actual clients or industry experts to solve real world challenges. This course is designed to help you develop your ability to recognize and assess strategic opportunities; conduct top-notch market, industry and competitive analysis; foresee strategic implementation issues; and lead change by generating support for your recommendations. This course is also designed to produce useful results for coping with both very real strategic problems and noteworthy uncertainties.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in FIN 5411 and SGM 5411.

**BA 5651. Business Analytics Capstone. 3 Credit Hours.**

The course is designed as the capstone experience for the MS in Business Analytics program and, as such, synthesizes all of the learning from previous coursework in this program. Student groups are paired with firms and work as consultants to provide data analytic solutions. This will allow students a first-hand perspective on decision making by management and understanding the organizational implications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**BA 5685. Internship or Externship in Business. 1 to 3 Credit Hour.**

This course is an independent study in which students will apply their business knowledge in a "real-world" context such as an internship or externship as part of a project for an employer. Therefore, this course presents the opportunity to reinforce and augment what students have learned in the classroom. This course is a hands-on experience aimed at preparing the student for work in a business-oriented career. As an individualized experience, the particular skills and concepts upon which students will draw will differ depending on the particular project and company.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**BA 5687. Advanced Professional Development Strategies. 0 Credit Hours.**

Advanced Professional Development Strategies is designed to help graduate students connect past education, current education, and professional experience to rewarding career opportunities. Because the personal stakes associated with managing one's career are high, the topics in this course involve more than "intellectual" comprehension. Accordingly, this course will focus on selected aspects of 1) career exploration, 2) the internship and job search, and 3) the "unwritten rules of engagement" in the professional work environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5751. Multinational Management and Policy. 3 Credit Hours.**

Enhance the diagnostic and problem solving capabilities of decision-makers when confronted with a variety of strategic and/or operational problems in a diverse set of domestic and international environments and situations. Integrate material from functional and general management courses and apply it in the diagnosis and solution of problems that require an integrated company-wide approach. Relies heavily on the case study approach and builds on the Fall course of Management Processes in Global Corporations. Note: Enrollment limited to students in the IMBA program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5800. Special Topics. 3 Credit Hours.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5801. Industrial Organization and Corporate Strategy. 3 Credit Hours.**

Today's executives face an array of commercial problems, a need to develop winning corporate strategies, and the capability to seek practical solutions to critical business issues. The primary focus of this course is on the application of principles of industrial organization to the development and evaluation of corporate strategy. The course will be taught from the perspective of a current executive. In this course, you will examine market function, consumer and firm behavior, and implications for market efficiencies. You will examine how knowledge of markets can be used to establish competitive position. You will use national accounting data to analyze the influences of governmental fiscal, monetary, and trade policies, employment, interest rates and economic growth (or decline) on the executive's options in making key strategic decisions. Realistic short business case study examples are provided demonstrating the power of combining the knowledge of economics with analytical tools that yield valuable insights to solve an array of specific internal commercial problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5804. Global Enterprise Mgt. 3 Credit Hours.**

Learn about multinational business firms and the strategies used to gain competitive advantage in international markets. Develop analytical techniques for studying problems facing multinational firms and designing systems for managing multinational enterprise.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5851. Strategy Formulation and Administration. 3 to 4 Credit Hours.**

Participate in an interactive learning experience while examining the functions, role and skills of top-level executives. Knowledge gained and analytical methods used, in prior courses will be used in analyzing cases from the perspective of the chief executive. Implementation of strategies will be a primary focus. Enrollment limited to students in the Executive M.B.A. program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 5882. Independent Study. 1 to 6 Credit Hour.**

Study in particular aspects of business administration under the direct supervision of a graduate faculty member. No more than six semester hours of independent study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5890. Special Topics. 1 to 6 Credit Hour.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 5955. Policy Formulation and Administration. 3 Credit Hours.**

Policy and strategy decision-making roles of top-level managers. Total enterprise problems involving integration of organization objectives, relationships between organization objectives and societal values, policy formulation, corporate strategy, and implementation of top management decisions. Limited to students admitted to MBA program prior to Fall 2005. Note: Intended to be taken in the final semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 8100. Translational Business Research. .5 to 3 Credit Hours.**

Translational Business Research is designed to facilitate research projects focused on translating research findings into management impact for business leaders and policy makers. Students work with research faculty guides to carry out a thematic series of research projects, learning new methods as needed. They learn also to communicate the results and implications effectively to leaders in positions to implement the research insights. Note: The course is open to graduates of the Temple University Doctor of Business Administration program (or equivalent) who have 1) identified a theme for ongoing business research and 2) secured a commitment from a member of the Fox School of Business graduate research faculty to act as research guide and co-author. The course is open to other students who have a graduate degree in business or a related field, with faculty permission. Faculty commitment must be reaffirmed before a student can register for another semester of the course.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**BA 8985. Teaching in Higher Education: Business. 3 Credit Hours.**

This course is required for any student seeking Temple University's Teaching in Higher Education Certificate. The course focuses on the research on how people learn best teaching practices, with the aim of preparing students for effective higher education teaching. All educational topics are considered through the lens of teaching in particularly scholarly areas or disciplines. Course instructors will model innovative teaching methods and uses of technology throughout the semester, providing an experiential component to the learning. The course specifically focuses on the application of the course content to the teaching of courses in business and management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9001. Organizations and Management Theory. 3 Credit Hours.**

This course acquaints students with classic works, current representative theories, and empirical research in the fields of organization behavior and management. Material is grouped into twelve perspectives/topic areas: bureaucracy, scientific management, human relations, contingency theory, lean & quality management, transaction cost theory, network approach, national culture, human resource development, power & politics, labor process, and complexity/chaos theory. Emphasis is on understanding the range of approaches in these fields and developing critical analysis skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9002. Scientific Inquiry-Management Research. 3 Credit Hours.**

This course examines the nature and logic of empirical science, with particular attention to theoretical and applied business research. Topics include: the scientific method, positivism, paradigms, interpretive approaches, postmodernism, and critical research. The course also introduces a range of methods and techniques current in business research, including "grounded theory," measurement, interviewing, survey design, case studies, causal modeling, longitudinal and historical analysis, experiments, and research ethics. Students are asked to apply each of the course topics to the design of research on a topic of their own choosing. There is also a laboratory session in the use of the SPSS statistical package to analyze quantitative data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9003. Seminar in Organizational Behavior. 3 Credit Hours.**

The purpose of the course is to provide foundation knowledge in Organizational Behavior, including classic and contemporary theories, ongoing controversies, and ground-breaking empirical studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9090. Special Topics in Business Administration. 1 to 6 Credit Hour.**

Content varies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9101. Getting Your Hands Dirty: The Craft of Data Management and Analysis. 3 Credit Hours.**

This methods course launches doctoral students into the craft of empirical research, enhancing proficiency in research work and nurturing ambitious research projects. The course introduces students to computational approaches to data management and analysis. Students will gain foundational skills in using Python for data collection and manipulation, as well as for constructing novel variables with text analysis, network analysis, and machine learning. The end result will be an original dataset ready for statistical analysis, corresponding to the student's research interests.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9102. Professional Communication Skills for Graduate Students. 0 Credit Hours.**

The PhD Professional Communication course consists of two skill level-based tracks focused on learning professional communication skills and writing intensive skills. The first 7 weeks are for intermediate level students (recommended for first and second year students), and the second 7 weeks are for advanced level students (recommended third year or higher). Students will be instructed in verbal skills, clarity in speaking, the formal elements of live and virtual presentations, professional presence, and academic and industry appropriate writing instruction to supplement their existing knowledge. The goal is to develop students' professional communication skills, both academically and professionally. Students will attend synchronous (live) sessions once a week with other students and the instructor. The course will also deliver high-quality video content that students can use independently and with which they can supplement their coursework. Each week students will submit a deliverable and receive individual feedback and additional guidance. The course aligns closely with the Ph.D. Communication Initiative to evaluate students' current competencies and ensure they have the resources needed to stay competitive at the global level. The asynchronous components are customized for PhD and DBA students, and are made available to doctoral students at both the Fox School and to doctoral students across Temple University's various colleges. Additionally, a repository of resources (e.g., videos, practice materials, and references) will be available for students to draw from throughout their Temple education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9103. Econ Theory of Choice. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9104. Game Theory. 3 Credit Hours.**

In this course, we will cover strategic behavior. Strategic in the sense that agents take into account other agents' choices in their decisions. We will discuss dominance, backward induction, Nash equilibrium, commitment, credibility, asymmetric information, and signaling. We will apply these notions to firm behavior, oligopoly models, strategic thinking and consider their implications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BA 9103.

**BA 9105. Business Econometrics I. 3 Credit Hours.**

This course introduces students to the basic concepts of modern econometrics. It provides a broad overview of statistical and econometric techniques used in business research with a focus on the linear regression model. Students will learn how to conduct as well as critique empirical studies in various business disciplines. The main ideas will be illustrated by real-world examples. Students will also get a hands-on experience in data analysis using Stata.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9106. Business Econometrics II. 3 Credit Hours.**

BA 9106 is the second course in the Econometrics series for doctoral students. It covers general principles of econometric estimation and inference and provides theoretical background for standard econometric techniques commonly used in empirical business research. The course primarily focuses on linear models and their estimators such as OLS, GLS, and 2SLS. Economic and business applications of the introduced econometric models will be discussed throughout the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9107. Advanced Topics of AI and Machine Learning for Business Decisions. 3 Credit Hours.**

This is a seminar-based class designed to introduce doctoral students to the advanced AIML methods. This class addresses a host of AIML models such as machine learning for unstructured text/audio/image/link/video data, Deep neural net, Bayesian NN Natural Language Processing, CNN RNN LSTM, Multimodal model, Deep factorization machine, Autoencoders, GANS, Transformers BERT, Graph CN, Deep reinforcement learning, AI chatbots/textbots, and others. It is a continuing class after the AIML 1 class (BA 9101). These advanced AIML tools are applicable for students who majored in Marketing, Management, MIS, Accounting, Finance, Operations, Statistics, Sport, Tourism and Hospitality Management, and other fields with structured and unstructured data analyses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BA 9101 and BA 9106.

**BA 9108. Capital Markets Research. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BA 9103.

**BA 9183. Directed Study in Business. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**BA 9201. Quant Methods in Bus Res. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8002.

**BA 9202. Qualitative Research Methods. 3 Credit Hours.**

Methods constitute the "lenses" through which scholars view their empirical phenomena. And different methods afford clearer views of different phenomena. Qualitative methods in particular have produced some of the most influential scholarly works within several domains of business research. As consumers, producers, and reviewers of such research, it is therefore important that doctoral students develop greater facility with these methods. The intents of this seminar are thus to help participants add a qualitative lens to their scholarly toolkits -- and to identify the empirical phenomena within their domain of study that are most clearly seen through qualitative methods. At the end of this seminar, participants should expect to have a sophisticated understanding of qualitative research and the resources needed to conduct and publish high-quality scholarship. This seminar is relevant to any doctoral student seeking to better understand human behavior in complex systems, but focuses primarily on organizational contexts. Thus, although the methods being taught are widely applicable, the exemplar articles and best practices for data analysis and publication will be most relevant to business administration students. Participants should expect wide exposure to business administration phenomena, with readings drawn from domains such as organizational behavior, strategy, management information systems, marketing, international business, hospitality, tourism, accounting, and finance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9203. Financial Economics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9205. Information Economics. 3 Credit Hours.**

This is a theory course that studies how we can use optimal contracting to solve problems arising from asymmetric information and conflicts of interests. We will discuss mainly three types of such problems: adverse selection (hidden information), moral hazard (hidden action), and non-verifiability, and their interactions. Solutions to such problems involve screening and signaling. Thus this course can be called several names: information economics, incentive economics, or contract theory. Basic knowledge in calculus, statistics, and micro-economics is required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BA 9103 and STAT 8112.

**BA 9207. Quantitative Research Methods II. 3 Credit Hours.**

This course provides an overview of intermediate quantitative research methods used in the social sciences. Topics include theory of measurement, types of measures, measurement validation, power analysis, experimental designs and analysis of experimental data, survey design and analysis of survey data, and collection and analysis of archival data. The course includes a project that focuses on the design, development, and testing of theoretical models using experimental, survey, or archival data. The project includes an important research topic, a set of testable hypotheses, the empirical method to be used, data collection, data analysis, and interpretation of the results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 8112 or PSY 8011)

**BA 9208. Quantitative Research Methods III. 3 Credit Hours.**

This course aims to provide an overview of advanced quantitative research methods that are used in the social sciences. Topics include structural equation modeling (SEM), longitudinal modeling, multi-level modeling, causal modeling, polynomial regression models with response surface methodology, and emerging methods and tools for configuration theories.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (BA 9105 or PSY 8011)

**BA 9209. Business Econometrics III. 3 Credit Hours.**

BA 9209 is the third course in the econometrics series for doctoral students. It focuses on non-linear models and covers multiple practical situations in which classic linear methods are inappropriate. In particular, topics include sample selection and attrition models, treatment evaluation, duration analysis, and count data models. Also, several advanced estimation techniques such as GMM, bootstrap, and kernel regression will be discussed. Although the majority of lectures will be devoted to cross-sectional methods, the basics of time series analysis will also be covered. The assigned problem sets will include the analysis of practical situations requiring advanced econometric techniques as well as empirical exercises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BA 9106.

**BA 9212. Seminar in Global Finance and Governance. 3 Credit Hours.**

The course introduces students to the basic academic literature in global finance and governance at a doctoral level and to selected advanced topics in this area. The aim is to prepare students to read the literature critically, to strengthen their independent skills, and to help them be ready to select topic in global finance and governance and related areas. Topics will be flexible to class needs but include corporate exchange risk management, international investments, global corporate governance, firm boundaries, financial and strategic issues of multinational firms, and others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9683. Research Project I. 1 to 3 Credit Hour.**

Research Project I is a Directed Reading/Study course in the Executive DBA program. Research Project I is part of a series of research projects. The objective is to develop a draft research paper proposal that demonstrates progress in the student's research capabilities and provides a foundation for the student's dissertation research. The series of research projects focus on applying the concepts, theories and methods learned in the foundation and methods courses. The research projects provide students with a mentored, structured approach to developing the critical skills required to prepare their dissertation proposal and the dissertation. Students will engage in research under the supervision of an Executive DBA faculty member. At the end of the term, the research project will be reviewed and assessed according to DBA program standards for quality, relevance, and potential impact. During the term, students may be expected to present their work and provide feedback on the work of others in the program. This course is typically offered in the summer after the first year but may also be offered in other terms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9783. Research Project II. 1 to 3 Credit Hour.**

Research Project II is a Directed Reading/Study course in the Executive DBA program. Research Project II is part of a series of research projects. The objective is to develop a research paper proposal that includes methodology details and may include pilot or preliminary data analysis and results. The series of research projects focus on applying the concepts, theories and methods learned in the foundation and methods courses. The research projects provide students with a mentored, structured approach to developing the critical skills required to prepare their dissertation proposal and the dissertation. Students will engage in research under the supervision of an Executive DBA faculty member. At the end of the term, the research project will be reviewed and assessed according to DBA program standards for quality, relevance, and potential impact. During the term, students are expected to present their work and provide feedback on the work of others in the program. This course is typically offered in the fall term but may also be offered in other terms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9801. Understanding the Firm through Management and Organizational Theory. 3 Credit Hours.**

Understanding the shifts in business and their implications for organizations is essential to identifying new areas of study for the modern organization. Firms must adapt to their changing environments by adopting new strategies through analysis and understanding of internal and external contexts. This enhances organizational capability, which is required in order to maintain effectiveness and competitiveness in national, regional and global markets. This course examines the dynamics of complex, global organizations through the lens of foundational theory in management and organizational behavior, including: strategic management; theory of organizations and industries; and behavior of individuals, groups, and organizations in global settings. Students will learn to build on this foundational research by formulating new research questions that address emerging issues and challenges for the modern organization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Business Admin.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**BA 9802. Scientific Inquiry through Applied Research. 3 Credit Hours.**

What is research and how is it done? What is theory? What makes a study both practically relevant and of high-quality? This course addresses these questions through an exploration of the philosophy of science and applied scholarly research. It introduces the philosophy of scientific inquiry, common research approaches (e.g., quantitative and qualitative) and common perspectives (e.g., positivistic, interpretative, and critical). Students will learn the basic principles of theory development and testing as well as how to build a conceptual research model. This course takes an "engaged scholarship" perspective, with the aim to influence management practice through rigorous, applied study. Topics include identifying a research topic, forming theoretically-grounded research questions, conducting a literature review, and developing a plan for field work and data collection. This course enables students to identify and foster their personal research interests through a research proposal developed iteratively throughout the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Business Admin.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**BA 9803. Navigating the Global Marketplace. 3 Credit Hours.**

Global structures and institutions drive the strategic behavior underlying their business decisions. The reality of business today requires understanding and working within an industry's multifirm global value chain. Firms operating in the global marketplace must be responsive to and understand differences in political, legal, and economic systems between countries. This course explores the state-of-the-art research surrounding the contemporary global organization and serves as the foundation for applied research into the dynamics of strategy and competition within a global context. Topics include critical elements of global strategic operations including international trade, location of the multinational enterprise, innovation in emerging economies, market entry, and knowledge flows within the firm.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9806. Integrative Perspectives on Business Knowledge. 3 Credit Hours.**

Conceptualizing the organization as a system of integrated, co-dependent elements facilitates new solutions that help an organization achieve its goals. To do this, business leaders must view issues from multiple disciplinary and functional perspectives. Through an integrated, systems-thinking approach, students will learn to address unstructured problems, decision-making under complexity, and organizational change management and strategy. This course integrates contemporary research across the major functional areas of business, including: accounting, finance, human resources, international business, marketing, management information systems, risk and actual science, strategic management, and operations and supply management. Students will learn how to approach organizational issues in new ways and discover novel research opportunities by making connections across multiple disciplines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Business Admin.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**BA 9812. Innovation and Entrepreneurship in the New Economy. 3 Credit Hours.**

In an increasingly competitive global market, leaders must develop new business models and approaches. However, building this competency within an organization can be challenging. This course examines how executives can apply best practices in innovation and entrepreneurship by designing novel products, services, processes, organizational structures, business models, and industry ecosystems. Special emphasis is placed on how executives can anticipate and shape global technological, economic, social, and political factors that facilitate innovation and entrepreneurship within an organizational context.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9813. Problem Solving using Quantitative Research Methods. 3 Credit Hours.**

Quantitative research applies statistical techniques to test new theory and hypotheses. This course teaches students how to investigate problems through the design and execution of quantitative research as it applies to experiments, surveys and the analysis of secondary data. Students will learn to apply and evaluate these methods through examples of theoretical and applied research papers that employ quantitative methods. Students will learn the fundamental statistical techniques to develop and test research hypotheses, such as the t-test, correlation analysis and regression. Students will prepare data for analysis and understand how to interpret the results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Business Admin.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**BA 9814. Advanced Quantitative Research Methods. 3 Credit Hours.**

This course explores advanced concepts and topics in quantitative research methods. Students will learn to select and apply statistical techniques to new problems and data. It will cover analysis of variance and the design of experiments, multivariate regression, and logistic regression. It will also enable students to identify and address problems in real-world data sets, including: normality violations, multi-collinearity, and missing data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9815. Problem Solving using Qualitative Research Methods. 3 Credit Hours.**

Qualitative research is the exploration of phenomena in their natural setting that seeks to make sense of underlying mechanisms and processes. This course compares a variety of qualitative techniques, such as case studies, ethnography, action research, grounded theory building and content analysis. Students will review contemporary and classic studies that employ qualitative methods in both theoretical and applied contexts, providing examples of how to use each approach in practice. It will also cover interviewing and observation techniques, coding semi-structured and structured interview data, and building hypotheses based on qualitative data. The course weighs the advantages and disadvantages of different approaches to qualitative research, including positivist, interpretivist, and critical methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Business Admin.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**BA 9816. Creation and Dissemination of Business Knowledge. 3 Credit Hours.**

A fundamental tenet of evidence-based management is that firms will function more effectively if they adopt a theoretically-driven, methodologically-sound approach to decision-making. Building on the basic tenets of theory and knowledge development, this course explores the tools and techniques needed for creating and disseminating knowledge. Drawing on business research literature, students learn advanced issues in theory building, model validation and empirical testing. The course provides practical guidelines for building new theories that are informed by managerial practice and also extend current theoretical models. Participants are challenged to develop cross-disciplinary, evidence-based management practices through applied research that will effectively influence future management practice. Also covered is the process of preparing one's work for publication and successfully navigating the peer review process. Students will study journal selection and how to craft a response to reviewers. These include hands-on application to each student's individual program of research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9817. Applied Qualitative Methods. 3 Credit Hours.**

This course provides a hands-on approach to understanding qualitative research methodologies and how they can be applied to problem investigation, problem solving, and outcome evaluation in business administration and other related fields. Qualitative research utilizes methods such as observation, interview, focus group, case study, and the analysis of documents and archival data. Major topics include: qualitative research design; principles and practices of data collection; analyzing and interpreting qualitative data; and effective methods for writing and disseminating research findings. Other possible topics include the epistemological foundations of qualitative research, the role of theory in guiding and informing research design, and ethical considerations in human subjects research. Through lecture, small group work, and hands-on experience, the course focuses on training in data collection and analytic techniques commonly used in qualitative research. Students will learn to apply a variety of qualitative methods to research topics, and to choose the most appropriate methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BA 9883. Research Project III. 1 to 3 Credit Hour.**

Research Project III is a Directed Reading/Study course in the Executive DBA program. Research Project III is part of a series of research projects. The objective is to develop a research paper at the level of a manuscript that could be submitted to a conference or a journal. The series of research projects focus on applying the concepts, theories and methods learned in the foundation and methods courses. The research projects provide students with a mentored, structured approach to developing the critical skills required to prepare their dissertation proposal and the dissertation. Students will engage in research under the supervision of an Executive DBA faculty member. At the end of the term, the research project will be reviewed and assessed according to DBA program standards for quality, relevance, and potential impact. During the term, students are expected to present their work and provide feedback on the work of others in the program. This course is typically offered in the spring term but may also be offered in other terms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9890. Special Topics in Business Research. 3 Credit Hours.**

This course will feature a rotating set of topics based on the cutting-edge research conducted by the Executive DBA faculty. Potential topics include executive leadership, emerging markets, social media, data analytics and design thinking.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

Registration required each semester while preparing for the Preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Registration required each semester after Preliminary Examinations while researching the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BA 9999. Dissertation Research. 1 to 6 Credit Hour.**

Registration each semester required for students elevated to candidacy and undertaking dissertation research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Business Education (BSED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**BSED 5241. Methods of Teaching Business, Computer, and Information Technology and Marketing Education. 3 Credit Hours.**

Instructional strategies in the teaching of Business, Computers, and Information Technology and Marketing are analyzed and demonstrated. Students are required to prepare lesson plans, teach demonstration lessons, develop a unit plan, participate in our profession, and complete the Intermediate Performance Assessment (IPA; if not completed before). The high expectations of this course will be met by all students to include English language learners and special education students. Lessons will integrate appropriate PA Standards for Business, Computers, and Information Technology or comparable standards, such as those for the National Business Education Association and the Temple College of Education Standards for Effective Teaching. Emphasis is placed on professionalism, and planning and skillful teaching that meet the needs of all students, including those with special needs, diverse, socio-cultural backgrounds, and English language learners. Demonstration lessons will be integrated with the course work to encourage developing teaching competency through a series of presentations appropriate to the student's certification interests.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BSED 5251. Current Trends & Developments in Business, Computer and Information Technology & Marketing Education. 3 Credit Hours.**

This course provides business and marketing professionals with the knowledge to understand the concept and trends in the rapidly growing new and emerging information technologies in today's organizations. Learners will explore the research and latest trends in business and marketing technology integration and understand how these trends affect curriculum and instruction in the classroom. This course presents students with insights that will improve their understanding of teaching/learning and identifies strategies for developing a framework for the business, computer and information technology and marketing education programs in the K-12 educational system.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**BSED 5513. Methods of Teaching BCIT. 1 to 3 Credit Hour.**

Primarily geared for teachers who will use the computer as an educational tool

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**BSED 5514. Cur Dev & Trends in BCIT. 3 Credit Hours.**

Analysis of the literature on trends in business education as they relate to business and economic education

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Career and Technical Education (CTE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CTE 5401. Current Problems in Career and Technical Education. 1 to 6 Credit Hour.**

This seminar covers selected school and training topics, including workforce development, training, managing information systems, diversity issues, school-industry partnerships, and performance evaluation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTE 5411. Evaluation in Career and Technical Education. 3 Credit Hours.**

Students learn how to develop and use a variety of evaluation methods to monitor student academic and occupational achievement as well as teaching effectiveness. Special emphasis is placed on relating evaluations to occupational curricula and instruction. Students learn about standardized tests and other diagnostic tools frequently encountered and/or used by classroom teachers. Particular attention is given to adapting assessments to meet the needs of all students. Contemporary issues related to testing, grading, evaluation, and accountability are addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 5423. Leadership in Career and Technical Education. 3 Credit Hours.**

This course provides an overview of school leadership and the principles of leading in a career and technical education setting, examining them with specific reference to the roles of the administrative director and comprehensive supervisor. These particular roles are analyzed with an emphasis on inspiring staff to improve students' academic and technical achievement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 5425. Advanced Concepts and Practices in Career and Technical Education. 3 Credit Hours.**

Designed as a survey course, this offering will focus on advanced topics relating to classroom assessment, career and technical education curriculum development, and continuous professional development. The topics selected for inclusion have been identified as skills that serve as solid predictors of a successful classroom educator. The successful educator is one who examines and places clear focus on their students' performance in and out of the classroom. Activities and strategies performed by the educator are certainly important but unless these actions result in raised performance levels and identified learning by the students then these efforts can be classified as having no educational value. The topics included in this course, if utilized by the educator, will provide significant information and assist the educator in making better educational decisions on improving student performance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 5426. Professionalism and Staff Development. 3 Credit Hours.**

This course focuses on teacher professionalism and staff development and how schools can build capacity to maintain these systems. The course deals with the national standards for professional development; the process, content, and context of staff development; and the development of reflective practices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 5431. Concepts in Career and Technical Education Programs. 3 Credit Hours.**

This course aligns with Temple University's standards for caring and skillful teaching and professionalism. This course is a requirement for intern teachers employed in a secondary career and technical education setting and is designed to develop an understanding of effective teaching theories and practices. This course is designed for students to develop an understanding of effective curriculum concepts and practices related to developing, implementing, and evaluating curriculum in career and technical education areas. Topics include the development of project and/or problem based learning and laboratory based experiences for students. Emphasis is placed on defining all aspects of diversity and providing accommodations and curriculum to meet the learning needs of a broad spectrum of diverse students. Additionally, the role and integration of student organizations into the curriculum is examined. Note: To enroll in this course, students must be admitted to the CTE certification program. The course is a field-based course which means candidates are required to apply all competencies with students in an actual teaching situation. Candidates are full-time "Intern" teachers employed by a local school district or Career and Technical Education Center (CTC). The course, thereby, satisfies the PA Department of Education's (PDE) field experience requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 5605. Models of Teaching. 3 Credit Hours.**

This course aligns with Temple University's standards for caring and skillful teaching and professionalism. This course is a requirement for intern teachers employed in a secondary career and technical education setting and is designed to develop an understanding of effective teaching theories and practices. Students will examine concepts and practices related to curriculum and instructional strategies and develop the knowledge and skills for effective teaching. Emphasis is placed on how federal, state, and industry standards and community and individual needs are used for program and instructional development, and how "best practices" might be employed to deliver coherent instruction that is designed to promote critical thinking in real world contexts. Note: To enroll in this course, students must be admitted to the CTE certification program. The course is a field-based course which means candidates are required to apply all competencies with students in an actual teaching situation. Candidates are full-time "Intern" teachers employed by a local school district or Career and Technical Education Center (CTC). The course, thereby, satisfies the PA Department of Education's (PDE) field experience requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 5669. Project-Based Learning. 3 Credit Hours.**

The course is designed to help educators plan and apply learning theory and principles of project-based learning to the development of business-related instruction in the elementary school classroom.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 5887. Pedagogical Competence. 3 to 15 Credit Hours.**

Prospective career and technical teachers/technical trainees are placed in supervised public school/industrial experiences and assisted in developing specialized teaching strategies through individualized instruction and seminar activities. (This constitutes an alternative delivery system equivalent to the professional requirement.)

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTE 8324. Coordination Methods for Work-Based Learning. 3 Credit Hours.**

The history, development, and operation of cooperative education programs are covered. Also explored are the development and promotion of a workplace-learning program, the development of workplace-learning partnerships, workplace-learning sites, safety considerations for students in the workplace, and connecting work-based and school-based learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8331. Instructional Methods for Work-Based Learning. 3 Credit Hours.**

This course covers the role of the teacher-coordinator in conducting and teaching procedures and activities necessary for providing successful supervised field experiences for students in the workplace. Also covered are methods of establishing contact with students, employers, teachers, parents, and community leaders; career and technical student organizations; and students with special needs. The course also explores developing and understanding labor laws and other legal requirements affecting student workers/interns.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8501. Curriculum Development for Programs of Study in Career and Technical Education. 3 Credit Hours.**

Students study and analyze curriculum theories and the practical application of a systems approach in the analysis, design, development, implementation, and evaluation of technical education and training programs. Students learn about back-to-front design, performance and standards-based education, standards-aligned curriculum systems, and curriculum frameworks associated with program articulation, including "programs of study."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8507. The Role of Career and Technical Education in Workforce and Economic Development. 3 Credit Hours.**

This course explores the range of activities covered by state and federal career and technical (vocational) education laws; career and technical education as an integral part of the public school and workforce development systems; and the development of a point of view regarding the role of career and technical education in economic development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8521. Collaborative Processes for Effective Career and Technical Education Programs. 3 Credit Hours.**

This course focuses on the role of collaboration with both internal and external stakeholders of the CTE enterprise, including relationships with staff, parents, business and industry, government, professional associations and media groups. Students will learn the importance of partnerships and will examine ways to expand and enhance these partnerships for the ultimate purpose of improving student performance. The course is taught in a context of ethical leadership and decision making.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8527. Program Planning, Evaluation, and Systems Alignment in Career and Technical Education. 3 Credit Hours.**

Students study the factors used to determine the vocational training needs of labor market areas, including local industrial expansion, recession, unemployment, aging workforce, and emerging technologies. Students also consider the organization, academic and skills standards, curriculum and instruction alignment, physical facilities, post-secondary connections and articulation, and scope and sequence of career and technical education programs. The course also focuses on conducting formative and summative program evaluations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8528. Creating a Culture of Teaching and Learning in Career and Technical Education Programs. 3 Credit Hours.**

This course is designed to prepare CTE leaders to empower and support professional staff to improve students' academic and technical performance. Candidates will learn how to implement clinical supervision, peer coaching, and apply formative and summative personnel evaluation methods in workforce education programs. In addition, school reform initiatives and best practices will be addressed that frame staff development as a system for continuous learning and improvement of the CTE curriculum and students' learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8589. Managing Resources and Data Driven Decision Making in Career and Technical Education. 3 Credit Hours.**

CTE facilities are unique to education. They include industry-standard equipment and utilities that are not typically found in academic high schools. Prospective CTE leaders must understand and know how to apply systems to secure, maintain, and replace facility related items for technical curricula. These systems ensure the health and safety of students while providing the required resources to effectively prepare them for a variety of technical careers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTE 8690. Problems in CTE. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTE 8890. Special Topics/Problems in Career and Technical Education. 3 Credit Hours.**

The course focuses on contemporary issues and/or problems in workforce education. Enrollment is limited to master's degree students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTE 9389. Supervised Work Experience. 1 to 3 Credit Hour.**

Technical work experience in business and industry designed for all fields of career and technical education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTE 9482. Directed Independent Study. 1 to 6 Credit Hour.**

Problem-based topics related to vocational education or technical training are investigated.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTE 9685. Internship in Career and Technical Education. 3 to 6 Credit Hours.**

Credit is given for a supervised internship within a specified field of CTE/technical training to provide the student with leadership development experiences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTE 9885. Internship in Career and Technical Education. 3 to 12 Credit Hours.**

This supervised internship in a CTE setting provides the student, who is a candidate for system leader, with education leadership experiences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Chemistry (CHEM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CHEM 5001. Advanced Inorganic Chemistry I. 3 Credit Hours.**

Group theory and its applications to chemical systems. Molecular orbital theory and spectroscopy. Descriptive chemistry of transition metal and organometallic compounds.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5005. Organometallic Chemistry. 3 Credit Hours.**

A survey of the chemistry of organic compounds of the main and transition elements, with emphasis on their reactions and applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5102. Data Analysis and Evidence. 2 Credit Hours.**

Forensic chemistry involves the forensic application of analytical chemistry theories, techniques and instrumentation to the analysis of controlled substances, fire debris evidence, explosives, and other trace evidence/chemical unknown materials. This course will cover those concepts relevant to the field of forensic chemistry including chain of custody, the theory and practical applications of the uncertainty of measurement and propagation of error. Students will also learn the classifications and unique physical and chemical characteristics of forensic chemistry evidence and investigate the physical and chemical characteristics of this evidence through the use of chemical, microscopic and instrumental techniques. The chemical characteristics of explosive materials as well as the analytical techniques used to analyze these samples will also be covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5103. Advanced Instrumental Methods. 3 Credit Hours.**

Recent developments in electrochemical and electroanalytical techniques, including voltammetric and potentiostatic procedures and the basics of instrumental design. Applications to organic chemistry, trace analysis, chromatographic detectors, and electrokinetics discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5107. Drug Analysis. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5108. Investigative Chemistry. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5201. Physical Methods in Organic Chemistry. 3 Credit Hours.**

Principles and applications of important physical and spectroscopic methods; IR, UV, NMR, MS, ESR, ORD, and CD in structure determination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5202. Organic Reaction Mechanisms. 3 Credit Hours.**

This course is an introductory overview of organic structure and most common organic reaction mechanisms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5205. Organic Syntheses. 3 Credit Hours.**

Scope and limitations of modern synthetic methods, including silicon reagents, organometallic and radical chemistry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5301. Quantum Chemistry. 3 Credit Hours.**

Introduction to quantum mechanics and its application to chemical systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5302. Statistical Thermodynamics. 3 Credit Hours.**

The basic concept of statistical mechanical ensembles and their application.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5304. Nanomaterials Chemistry and Physics. 3 Credit Hours.**

This course will cover the key chemical/physical properties of nanomaterials as well as nanomaterials characterization and synthesis for graduate students. The goal of this class is to help students get familiar to the important concepts associated with the confined dimensionality in nanomaterials and apply these concepts to understand unique electronic/optical properties of nanomaterials and the thermodynamics/kinetics of forming nanomaterials. The course is organized with four modules: 1) Introduction to Nanoscience - Physical and Chemical Concepts, 2) Characterization of Materials at Nanoscale, 3) Fabrication of Nanostructures and Nanomaterials, and 4) Case Study of Specific Nanomaterials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5305. Chemical Kinetics. 3 Credit Hours.**

A study of the dynamics of chemical reactions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5358. Cellular/Molecular Neuroscience. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5401. Biochemistry I. 3 Credit Hours.**

A survey of the biological macromolecules (proteins, nucleic acids, carbohydrates, and lipids) correlating their structures with their chemical properties and biological functions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5402. Chemical Biology. 3 Credit Hours.**

This course will focus on the interactions between chemicals and biomolecules, with an eye on how to search, create, and modify molecules that can be either probes to understand, or therapeutic drugs to treat human diseases. Modern medicinal chemistry and biotechnologies will be covered to elucidate how chemistry can be used to perturb the biomolecules' structure and function, topics not typically studied in an undergraduate organic chemistry or biochemistry course. An advanced level of study in chemical biology can only be attained by a critical reading of scientific literature, and this course will consist of both lectures and student presentations of literature research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5412. Structural Bioinformatics II. 3 Credit Hours.**

This course provides an introduction to structural bioinformatics, with focus on understanding three dimensional structures of biological macromolecules. Topics covered include: an overview of macromolecular structure determination, introduction to molecular modeling theory and the application of computational modelling in structure based drug design. The course also offers practical training on the application of molecular modelling methods for understanding structural biology and in rational drug discovery.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in BIOL 5411.

**CHEM 5505. Advanced Polymer Structure and Properties. 3 Credit Hours.**

Polymers are ubiquitous in many new (scaffolds for tissue engineering, hip replacements) and old (textiles, engineering resins, flocculants) applications, and are often used in composites with inorganic materials. In order to better understand the use and novel developments of polymers, this course will provide the fundamentals of synthesis, polymer structure/property relationships, and characterization methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5701. Teaching of Chemistry. 0 to 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 5901. Responsibility and Ethics in Chemical Research. 1 Credit Hour.**

The primary goal of this course is to educate graduate students in the ethical and responsible practices of scientific research. The course is designed to meet the requirements of both the NIH and NSF for training in responsible conduct of research (RCR). As an independent scientific researcher it is critical to have an understanding on what constitutes ethical scientific practices both in the laboratory and in professional interactions with colleagues. This course will be based on student-led presentations and case study discussions in order to understand the real world applications of these issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8000. Special Topics in Inorganic Chemistry. 3 Credit Hours.**

A survey of a topic chosen by the instructor. Topics could include bioinorganic chemistry, organometallic chemistry, solid state and materials chemistry, and catalysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 8001. Leadership, Law and Ethics in Forensic Science. 3 Credit Hours.**

This course will provide the students with an introduction to the American criminal justice system, explain the role of the forensic scientist in the criminal justice system, and discuss theoretical and practical applications of forensic science laboratory management. Students will learn successful leadership styles and discuss topics relating to ethical behavior, quality measures including quality control and quality assurance, communication and privacy issues relating to forensic science as well as resource management. Through discussion and analysis of the U.S. Constitution, the Pennsylvania Constitution, Federal (and State) Rules of Criminal Procedure, and Federal (and State) Rules of Evidence with particular emphasis on case law, students will develop a practical understanding of modern criminal jurisprudence. Special emphasis and consideration will be given to the ethical obligations of criminal justice practitioners, including judges, prosecutors, defense attorneys, law enforcement officers and expert witnesses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8002. Practical X-Ray Diffraction. 3 Credit Hours.**

Students will learn the theory and practice of crystal structure determination by the method of single-crystal X-ray diffraction. Students will become independently competent in each stage of the crystal structure data collection, solution, and refinement processes, and will understand the theory behind each stage, as well as how to overcome common pitfalls. The course features expanded topics over the undergraduate version of the course (CHEM 4004), including how to treat common crystallographic pitfalls in solution structure and refinement. These include disorder, twinning, space group ambiguity, and misplaced origin errors. Mode: 3 hours of lecture and/or lab per week.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8007. Biotransformation of Drugs and Xenobiotics. 3 Credit Hours.**

Drug Metabolism is an essential component of forensic sciences. This course is important for a thorough understanding of the basic concepts of absorption, distribution, elimination, excretion, and in particular xenobiotic disposition. The discipline of biotransformation continues to evolve as it adapts to new scientific discoveries bringing new opportunities for forensic science research. This course is designed to teach the advances in drug metabolism.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8107. Advanced Forensic Chemistry. 3 Credit Hours.**

Forensic chemistry involves the forensic application of analytical chemistry theories, techniques and instrumentation to the analysis of controlled substances, fire debris evidence, explosives, and other trace evidence/chemical unknown materials. This course will cover those concepts relevant to the field of forensic chemistry including chain of custody, the theory and practical applications of the uncertainty of measurement and propagation of error. Students will also learn the classifications and unique physical and chemical characteristics of forensic chemistry evidence and investigate the physical and chemical characteristics of this evidence through the use of chemical, microscopic and instrumental techniques. The chemical characteristics of explosive materials as well as the analytical techniques used to analyze these samples will also be covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B+ in CHEM 5102.

**CHEM 8111. Forensic Toxicology. 3 Credit Hours.**

Students in this class learn to apply fundamental principles of toxicology (e.g., dose response, toxicokinetics, pharmacodynamics, route of exposure) to understand common drugs and chemical exposures that often are involved in forensic cases. The course teaches toxicology from three different but overlapping approaches: Common Drugs and chemical toxicants (e.g., alcohol, cannabis, opioids, other drugs of abuse, metals, gases), Mechanisms of Toxicity (e.g., oxidative stress, cell death) and Organ System Toxicity (e.g., neurotoxicity, liver toxicity, etc.). The course makes use of real world case examples thereby allowing students to apply theory to practice.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8200. Special Topics in Organic Chemistry. 3 Credit Hours.**

Advanced lecture course; subject matter varies from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 8201. The Chemistry of Natural Products. 3 Credit Hours.**

Biogenetic classification, classical and modern synthetic approaches to polyketides, steroids, terpenes, and alkaloids.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8205. Heterocyclic Chemistry. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8210. Special Topics in Organic Chemistry. 3 Credit Hours.**

Advanced lecture course; subject matter varies from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 8300. Special Topics in Physical Chemistry. 3 Credit Hours.**

Advanced lecture course, subject matter varies from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 8301. Molecular Spectroscopy. 3 Credit Hours.**

Absorption, emission and scattering of light by molecular system. Discussion of basic principles and experimental techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8302. Computational Chemistry. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8303. Modern Meth in Exp Chem. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8310. Special Topics in Analytical Chemistry. 3 Credit Hours.**

Advanced lecture course, subject matter varies from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 8400. Special Topics in Biochemistry. 3 Credit Hours.**

Advanced lecture course; subject matter varies from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 8401. Bioinorganic Chemistry. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8501. High Polymer Chemistry. 3 Credit Hours.**

Introduction to the important theoretical and practical aspects of high polymer chemistry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8601. Analytical Separations. 3 Credit Hours.**

Theory and practice of modern separation methods with emphasis on chromatographic and electrophoretic techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CHEM 8985. Teaching in Higher Ed:Phys Sci. 1 to 3 Credit Hour.**

Teaching in Higher Education: Physical Sciences. This course focuses on learning theory and the best teaching practices, with the aim of preparing students for effective higher education teaching.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9300. Seminar in Physical Chemistry. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9800. Seminar in Forensic Chemistry. 1 Credit Hour.**

Wide-ranging introduction to key areas and "hot topics" in forensic science, as presented by a series of guest lectures by leading practitioners in the field.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9900. Seminar. 2 Credit Hours.**

Formal presentation of research topics by graduate students. Regular attendance required of all graduate students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9901. Original Research Proposal Preparation. 1 Credit Hour.**

This class affords guidance on developing the original research proposal, a required component for advancing to PhD candidacy in the Department of Chemistry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CHEM 9900.

**CHEM 9991. Graduate Research Projects. 1 to 6 Credit Hour.**

Short-term, limited research project or laboratory project in the field. The course is for doctoral or master's students, including PSM, MA or MS. This class will not confer full-time program status unless nine credits are taken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is required for students who are preparing for the preliminary or candidacy examination. Students should enroll after coursework is completed or when preparing for the candidacy exam until the time that the preliminary or candidacy examination is completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. All students must complete a minimum of one credit of this course. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9995. Capstone Project. 1 to 6 Credit Hour.**

Capstone project for master's students including students in PSM, MA or MS. This class will provide full-time status. Students in PSM programs need to register for at least one credit of this course to fulfill program requirements. Additional credits may be required for specific programs. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Master of Science, Prof Science Masters.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9996. Master's Thesis Research. 1 to 6 Credit Hour.**

Course for master's thesis research. Only intended for students in thesis bearing master's programs. A minimum of one credit is required. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9998. Pre-Dissertation Research / Elevation to Candidacy. 1 to 6 Credit Hour.**

This course is intended for students who are performing research prior to candidacy. Students can register for this course after required courses are completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must be registered for this course during the semester that they are to be elevated to candidacy examination. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Chemistry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Science & Technology.

**Repeatability:** This course may be repeated for additional credit.

**CHEM 9999. Dissertation Research. 1 to 6 Credit Hour.**

The course is for Ph.D. students who have been elevated to candidacy. During the course of their candidacy students must complete a minimum of two credits of dissertation research. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## City and Regional Planning (CTRP)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CTRP 5013. Planning History and Theory. 3 Credit Hours.**

Coursework focuses on examining important trends in planning theory and placing them in a historic context. This approach facilitates an understanding of the relationship between the theoretical conceptualizations of urban form and the functional manifestations of those conceptualizations, which are key to relating planning theory to planning practice. The course strives to identify practicable as opposed to heuristic planning theory. These distinctions are extensively explored. A review of the contribution of "planning pioneers" provides a synthesis to contemporary planning problems and issues. A concluding examination of ecology and planning theory offers a direction for planning theory and practice in the 21st Century.

**Cohort Restrictions:** Must be enrolled in one of the following Cohorts: XMSCR.P.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5014. Planning Politics and Administration. 3 Credit Hours.**

This course outlines the political and administrative environment of planning, including the influences of pluralism and federalism on planning in the United States. It introduces students to various agencies and organizations that conduct or impact planning, including public agencies, authorities, consulting firms, and non-profit organizations. Coursework explores policy implementation, including legislation, regulation, negotiation, and incentives, and the role of organizations and planners as professionals with respect to the current literature on organizational theory and development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5113. Nonprofit Management. 3 Credit Hours.**

The course provides an overview of management of nonprofit organizations, including issues pertinent for nonprofit managers and leaders faced with changing organizational environments. Most community development activities are centered within a nonprofit organization or work closely with these community-based organizations. Students are introduced to the major aspects of nonprofits and voluntary organizations that distinguish them from public and private organizations: mission/vision; legal definitions/IRS rulings; voluntary governance structures; and a social change agenda. Topics covered include the history and scope of the nonprofit sector, variations within the sector, contemporary theories of nonprofit enterprise, growth in the international nonprofit sector, management issues which pertain to nonprofits, financial management, accountability, human resources management, strategic planning, collaborative partnerships, leadership, advocacy, and the future of the sector.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5157. Community-based Organizations in Planning. 3 Credit Hours.**

Examines the forty year history of community-based organizations (CBOs) and the important role they play in the housing, economic and social development in low-income communities. CBOs strive to build community leadership and empower low-income people to take charge of their own future. Understanding the role of such organizations is crucial in being an effective planner. Profiles a select number of the over five hundred CBOs in Philadelphia to learn about land trusts, housing development, Neighborhood Advisory Committees, resident associations, service districts, tenant councils and faith-based programs. Field trips to a number of community-based organizations to supplement classroom discussions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5251. Sustainable Food Systems Planning. 3 Credit Hours.**

Planners are paying attention to the notion of food system planning: farm land preservation and environmental stewardship; economic development including distribution, processing, employment and globalization; and food security, involving access to affordable, healthy foods. There are also issues of public health, food cultures, consumer spending patterns, and education. This course explores all of these concerns. Guest speakers and field trips provide a focus on regionally based food systems initiatives. Course readings and lectures address work that is underway elsewhere in North America. Students develop an appreciation for the ways in which a food systems perspective can enrich community planning efforts and create more sustainable and vital places in which to live and flourish.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5256. Sustainable Community Design and Development. 3 Credit Hours.**

Introduction to the evolution, theory, and practice of planning for sustainable communities. Students evaluate recent conceptions of sustainable development, building an understanding of characteristics that define sustainable communities, implementation strategies, local-regional-global relationships, and constraints to achieving more sustainable communities. Recent climate change reports and policies are examined as well as their impacts on sustainable community planning and development in the United States. The course includes lectures, class discussion, guest lecturers, outside lectures, and case studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5313. Community Development Finance. 3 Credit Hours.**

The course examines the history and practice of community development finance in the United States. Low-income communities face particular challenges in meeting their credit needs through the traditional financial sector. Over the past 100 years, various institutions have developed to both advocate for change and to cover this gap. The course explores strategies for developing assets for low-income families and low-income communities. Different types of community development finance projects are discussed, including affordable housing, charter schools, community facility, small business lending, and nonprofit real estate projects. The course concludes with an examination of continuing challenges to meet the depository and credit needs of low-income communities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5413. Planning Communications. 3 Credit Hours.**

Planning in public, private, and non-profit organizations depends on effective communication among planners, employees of public agencies, elected officials, media representatives, and the public. The professional planner plays a key role in organizing, facilitating, and participating in conversations about the future of communities of all types. Strong communication skills are essential in most aspects of planners' work and are the focus of this course. Topics include the relationship between planning analysis and communication; interpersonal communication; and graphics, written, and public presentation skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5455. Community Engagement and Empowerment. 3 Credit Hours.**

This class explores the theory and practice of involving citizens in agency-led and community-based planning processes. Readings, class discussions, case studies, and guest lectures emphasize building knowledge and skills necessary to develop open and inclusive processes using a continuum of civic engagement practices such as community organizing, outreach and education, interactive tools and technologies, charrettes and full empowerment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5513. Planning Analysis. 3 Credit Hours.**

This course introduces a set of analytical tools that are widely used in community and regional planning practice. The course explores both conceptual and operational understandings of a broad range of analytical methods and techniques. Students learn to obtain data; select and use the most appropriate analytical methods (with an emphasis on computer applications, such as Microsoft Excel); and present their results effectively. Topics covered include data sources and collection, application of statistics to planning practice, demographic models, population projections and forecasts, regional economic analysis, and other methods common to planning analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5524. Spatial Analysis Techniques/Geographic Information Systems. 3 Credit Hours.**

Introduction to basic principles and techniques of Geographic Information Systems (GIS), a computer-based tool using spatial (geographic) data to analyze and solve real-world problems. Applications are from community and regional planning and other related disciplines. Lab exercises emphasize spatial data collection, entry, storage, analysis, and output using the software "ArcGIS." Students are introduced to GIS datasets used by the Center for Sustainable Communities, a research center in the Department of Planning and Community Development. Some lab assignments are based on planning issues in Southeastern Pennsylvania.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 5525. Advanced Techniques in Geographic Information Systems (GIS). 3 Credit Hours.**

This course explores ArcGIS extensions, including Spatial Analyst, 3D Analyst, Network Analyst, and Image Analyst, and their uses in the field of community and regional planning. It introduces data collection methods, using GPS and Aero-Triangulation; the GIS-based concepts and applications of land suitability analysis; and Planning Support Systems software (such as CommunityViz and Index) for land-use forecasting and planning. Students work on real-world environmental planning projects in a studio setting using local and regional data sets. Guest lectures are offered by GIS practitioners.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in (CTRP 5524 or CRP 5524)

**CTRP 8013. Planning History and Theory. 3 Credit Hours.**

Coursework focuses on examining important trends in planning theory and placing them in an historic context. This approach facilitates an understanding of the relationship between the theoretical conceptualizations of urban form and the functional manifestations of those conceptualizations, which are key to relating planning theory to planning practice. The course strives to identify practicable as opposed to heuristic planning theory. These distinctions are extensively explored. A review of the contribution of "planning pioneers" provides a synthesis to contemporary planning problems and issues. A concluding examination of ecology and planning theory offers a direction for planning theory and practice in the 21st Century.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8016. Planning Law. 3 Credit Hours.**

Coursework addresses selected aspects of the field of law of planning and urban development, including constitutional, property, nuisance law, administrative law, state and local government law, and zoning and subdivision regulation. It seeks to impart an understanding of the nature of law and the structure and processes of the judicial system by using urban land-use control law as the vehicle. It explores the relationships between the courts and the legislatures, especially the municipal legislative bodies that have primary responsibility for regulating land development and land use. Students learn legal research methods and are exposed to the wealth of trenchantly written, up-to-date materials that are available on the web and in the law library.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8056. Public Budgeting and Finance. 3 Credit Hours.**

Knowledge of budget concepts and financial management is required for the successful operation of government, nonprofit, and for-profit organizations. The course addresses the basics of public budgeting for those with little or no experience and presents more advanced concepts for those who have some experience in budgeting and finance. Discussion of the entire budget process, including budget formulation and execution, program development, cost and revenue estimation, internal controls and audits, budget strategies and tactics, capital budgeting and debt management. Uses case studies, in class discussions, and guest speakers involved in the development of state and local budgets to provide a broad understanding of the practical and political aspects of public budgeting.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8114. Urban Form and Design. 3 Credit Hours.**

This course examines the many elements that contribute to the aesthetic and human quality of communities of all sizes. It analyzes the nature of public spaces, streets and boulevards, landscaping, water, materials, light, scale, mass, and time. The roles of unity, harmony, symbolism, and cultural values are explored. The course has both historical and current references. Students participate in design projects, visual design analyses, and presentations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8155. Ecological Planning and Development. 3 Credit Hours.**

The fundamentals of the ecological planning method developed by landscape architect and regional planner, Ian McHarg, establish a basis to plan and develop both individual projects and entire communities that can be enduring/sustainable. Students examine both theory and practice in the relationship between ecological planning and actual development. Case studies, field trips, and guest presenters highlight specific examples of the successful implementation of ecological planning by the private development sector.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8156. Neighborhoods, Cities, and Regions. 3 Credit Hours.**

More than 80% of the U.S. population now lives in urbanized areas. This course examines the history of the development of urban (and suburban) form, together with some of the environmental, physical, social, and economic factors that created or influenced those forms. Emphasis is on the development of the European and North American city, from Athens to imperial Rome, to the 19th- and 20th-century industrial metropolis, and its suburbs. (Other great cities of the ancient world may be discussed.) The course looks at the late 20th-century unraveling of the urban fabric and the de-concentration of cities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8165. Placemaking: Revitalizing Urban Communities. 3 Credit Hours.**

The term placemaking, often used interchangeably with creative placemaking, refers to a particular approach to community building and revitalization that has gained popularity in recent years. Through readings, lectures, exercises, and tours students will explore placemaking practices focused on asset based, bottom up approaches that seek to enhance the social fabric while improving physical places. This includes local economic development and revitalization practices that value community identity as expressed in local cultural historic and natural resources, but also includes other types of practices that simply seek to create a sense of "place" in some otherwise under-used or ill-defined space. Students will assess place-making practices and identify opportunities for placemaking in Philadelphia's neighborhoods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8166. Land-Use Planning. 3 Credit Hours.**

At the heart and soul of community and regional planning is land use. How we use land and the institutional and legal basis by which we establish and implement land-use goals are key elements in how our communities and regions are shaped. This course examines the foundations of land-use planning, which begins with an understanding of attitudinal, value, and ethical perspectives of how land resources are used. The range of land-use implementation approaches - regulatory, fiscal, incentives, and public investment - is also evaluated. The course additionally discusses the importance of ecological planning and design as prospects for contemporary land-use planning to create sustainable communities and regions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8175. Gentrification and Equitable Development. 3 Credit Hours.**

With the recent revitalization of cities, gentrification has become a real, complex and highly contested issue that represents progress for some and displacement or its threat for others. This course investigates gentrification and interventions aimed at limiting its negative effects. Through analyzing academic literature, current events and case studies, we consider: the process, forms, agents and impacts (positive and negative) of gentrification; examine the roles of policy, planning and community development in the gentrification process; and investigate programs and strategies that practitioners could implement to foster equitable development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8213. Environmental Planning. 3 Credit Hours.**

Environmental issues and concepts faced by planners and the methods used to address them are the focus of this course. It further applies principles of natural science disciplines to the analysis of man's physical environment and the synthesis of plans that respect and incorporate those principles. The constraints and opportunities presented by the natural and man-made physical environment evaluated in the context of planning at both site-specific and regional scales are discussed. The goal of the course is not to produce environmental scientists, but rather to make planners aware of the environmental questions that should be asked and of whom. Lectures, case studies, and roundtable discussions are utilized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8255. Sustainability in Suburban Communities. 3 Credit Hours.**

The physical forms of suburban communities and the social and economic patterns that shape residents' lives make achieving sustainability in suburbia challenging and problematic. Distances between homes, businesses, and worksites are long; transportation choices are few; infrastructure needs are extensive and costly; and impacts on ecological systems can be severe. Many argue that higher-density, urban living holds our best promise for an environmentally sustainable future in the United States, but half of all Americans live in suburbia and finding sustainable solutions for them and their communities must be part of the solution. Lectures, readings, and discussions in this course address sustainability in suburban communities by covering the history of the American suburb and processes of suburbanization; architecture and housing; landscape and community design; transportation and infrastructure; built and natural environments and ecological systems; and planning, administration, and regionalism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8257. Environmental Policy. 3 Credit Hours.**

This course identifies the complexities associated with environmental politics and management from both national and international perspectives. The first part of the course discusses the basics of natural environmental processes and the difficulties of environmental policy formulation and implementation including risk assessment, watershed resource management, and public lands management. The second part describes and evaluates command and control processes, primarily focusing on air, water, and solid waste abatement. The final part examines large-scale global issues such as climate change and sustainable development and assesses the implications of energy use and the future of environmental management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8266. Sustainable Business Practices. 3 Credit Hours.**

Environmental issues and their impact on business, communities, institutions, and the general public are comprehensively explored. The course examines the need for companies to effectively manage environmental issues in light of increased public demand for businesses to take a stewardship role over natural resources and environmental protection. It provides students with a broad and practical understanding of environmental sustainability concepts, and examines how challenges associated with sustainable development are multifaceted, involving economic, social, and environmental concerns. The course explores how these concerns alter business strategies and practices and lead to new opportunities. Case studies and lectures are used to build technical proficiencies. Lectures are offered by guest experts. Note: Cross-listed with Strategic Management 5191.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8267. Water Resources Planning and Management. 3 Credit Hours.**

Water is one of the earth's most important resources. Without it we cannot survive. Yet its management is complicated and highly contentious. This course evaluates various aspects of water resources, including water quality, flooding, and water supply and allocation, and how global warming will influence the quality and quantity of future supplies. Various forms of management are evaluated, ranging from fragmented management to more integrated forms such as multi-jurisdictional river basin management and ecosystem management. Water resources planning and management is also evaluated from multiple perspectives: local, state, national and international. The course evaluates numerous case studies and includes guest speakers with national and international expertise.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8276. Regional Development. 3 Credit Hours.**

Coursework provides the fundamentals for understanding regional development and examines the theories that explain why cities and regions grow, as well as the spatial patterns of urban and regional development. In addition to theory, students are introduced to the key analytical methods that have been developed to characterize regional development patterns and predict future regional growth. By the end of the course, students have the requisite skills to complete a local development plan and have a clear understanding of the literature and tools of regional development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8355. Environmental Infrastructure Planning and Management. 3 Credit Hours.**

Introduces students to the practice of planning and managing municipal and regional environmental infrastructure programs that typically fall under the realm of a local or county department of public works or environmental planning. Covers the historical development, governing regulations, current status and innovative trends with respect to comprehensive solid waste management, wastewater treatment, drinking water supply, stormwater management, district heating/cooling systems and green energy, and multi-purpose greenways. Infrastructure finance such as capital budget, operations and maintenance, and funding are discussed. Guest speakers present case studies to complement class discussions and student-lead case study research. Open to students from all disciplines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8455. Planning Processes and Project Management. 3 Credit Hours.**

Emphasizes the integration of planning and project management and stresses the fundamentals of project management as essential for a successful planning process. Provides the student with an understanding of the framework of an effective planning process, while developing skills in project management. Topics include: creating a vision for the planning process; managing resources and costs; integrating interest groups into the planning process; measuring outcomes; and communicating results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8476. Collaborative Planning. 3 Credit Hours.**

Students examine the theories, principles, and practices of collaborative planning with a special emphasis on resolving conflicts over land-use planning issues and planning for complex environmental systems. The course emphasizes a range of collaborative planning modes, including negotiation, facilitation, and partnerships. Students engage in a series of hands-on simulations involving communicating complex concepts and building consensus with the goal of developing student skills for effective leadership of collaborative planning and management endeavors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8555. Internet and Digital Technologies for Community Engagement. 3 Credit Hours.**

Emerging technologies are directly influencing the planning and management of our urban areas in very profound and pervasive ways. Planning and related professionals increasingly are adopting new technologies to develop plans, communicate ideas and concepts, and engage citizens in the decision making process. The course introduces many fundamental technology concepts, including e-Planning and e-Government; Cybercities; e-Commerce and Economic Development; Web 1.0, 2.0, 3.x, Web Conferencing Tools; Online Project Collaboration Methods; IT Project Management; Section 508 Accessibility; Planning in Virtual Worlds; Municipal Wireless Networks and Public Spaces; and Digital Divide. Through a series of labs and assignments, students gain hands-on experience with each of these technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8655. Transportation Planning. 3 Credit Hours.**

The course presents an overview of the history of transportation in the United States and the fundamentals of present-day transportation planning and policies. It explores the influences of urban form on modal choice; accessibility and mobility of various population subsets (such as the economically and physically disadvantaged); regional and local travel demand; and the operational efficiency of different types of transportation systems (transit, highways, bicycle, and pedestrian). Coursework covers the impact of transportation investments on land use and regional population growth, and on environmental, community, and economic sustainability. It introduces students to currently used transportation planning methodologies, legal requirements, and decision-making processes. By studying actual transportation projects, students develop a plan for an assigned project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8656. Integrated Transportation and Land-Use Planning: Context-Sensitive Design Solutions. 3 Credit Hours.**

Context-sensitive design seeks to blend transportation functions with other human activities and land-use characteristics. Often transportation and land-use decisions have worked at cross-purposes due to the inconsistency of scales, the traditional focus of transportation project planning on functional and engineering concerns, and development decisions made without adequate regard to traffic impacts. This course covers basic operational and safety requirements of various transportation systems, with special emphasis on bicycle and pedestrian travel, and appropriate designs for different types of development and policy objectives, such as downtown revitalization or decreasing reliance on the automobile. The latter part of the course is devoted to a studio design project in which students apply design principles to solve a transportation and/or land-use problem.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8657. Non-motorized Transportation Planning. 3 Credit Hours.**

Transportation planning in the United States has long focused on improving conditions for motorized travel, primarily by personal cars and light duty trucks. The effects of an over-emphasis on motorized travel on energy consumption, traffic congestion, and the physical form of our communities, however, have led to the promotion of non-motorized transportation - that is, travel on foot and bicycle. This course is designed to develop an appreciation of the role of non-motorized transportation in the United States; to understand the conflicts and opportunities for compatibility between different modes of transportation; and to gain skills in planning for safer, more convenient, and more appealing walking and bicycling conditions in American cities and suburbs. Class sessions consist of a mix of lectures, discussions, and individual and group exercises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8666. Travel Demand Modeling. 3 Credit Hours.**

This course provides an overview of regional transportation planning, emphasizing hands-on experience with travel demand modeling. It addresses the transportation management and planning process in support of policy development, environmental and system management, improvement programming, and impact analysis. The role of travel estimation is explored as it relates to the key stages of these undertakings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in CTRP 8655 (may be taken concurrently)

**CTRP 8755. Introduction to Emergency Management Planning. 3 Credit Hours.**

This course provides a fundamental understanding of the emergency planning process, the phases of emergency management, and the roles and responsibilities of all parties involved. Students work in a classroom environment, interacting with others on various assignments, projects, and presentations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8756. After the Disaster: Effective Planning for Continuity, Recovery and Restoration. 3 Credit Hours.**

Provides the student with the skills necessary to develop a plan for continuing operation during and immediately following a disaster or emergency situation. Addresses the planning necessary to quickly recover and eventually restore operations to a normal status. Using various disaster and emergency scenarios, the concepts of command and control, communications protocols and decision making will be applied to the process of continuing and suspending operations. Assessment techniques, table top exercises, and guest lecturers will provide the student with hands-on experience in disaster recovery.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CTRP 8840. Topics in Community and Regional Planning. 1 to 3 Credit Hour.**

Variable offerings are made from semester to semester on selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. Note: A description of the current course offering can be obtained at the department office and in the schedule of classes. This course may be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTRP 8850. Topics in Community and Regional Planning. 3 Credit Hours.**

Variable offerings are made from semester to semester on selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current topic in the field of planning. Note: A description of the current course offering can be obtained at the department office and in the schedule of classes. This course may be repeated for credit. Past courses include Suburbia: Issues and Trends; Redevelopment and Revitalization; Environmentally Sensitive Development; Issues in Local and Regional Economic Development; Community-Based Organizations and Planning; Emergency Management Planning; Urban and Regional Development; Community-Based Organizations and Planning; and Planning Processes and Project Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTRP 8860. Topics in Community and Regional Planning. 1 to 3 Credit Hour.**

Variable offerings are made from semester to semester on selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. Note: A description of the current course offering can be obtained at the department office and in the schedule of classes. This course may be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTRP 8870. Special Topics. 1 to 3 Credit Hour.**

Variable offerings are made from semester to semester on selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. Note: A description of the current course offering can be obtained at the department office and in the schedule of classes. This course may be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTRP 8889. Planning Studio I. 3 Credit Hours.**

The studio involves undertaking a planning project in cooperation with a local or regional client. Working in small groups, students synthesize the knowledge gained from previous courses in the development of an integrated approach that is appropriate to their project. The groups prepare professional-level plans and policy reports based on relevant data collection; site analysis; evaluation of location, market, transportation, environmental, financial, and schedule opportunities and constraints; and the assessment of stakeholder interests.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in (CTRP 5524 or CRP 5524), (CTRP 5513, CRP 5513, or CRP 8513), and (12 credits in CTRP courses numbered 5000 to 8888 or 12 credits in CRP courses numbered 5000 to 8888)

**CTRP 9883. Directed Reading/Study. 1 to 3 Credit Hour.**

Advanced reading/study tutorial is arranged between the student and a faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CTRP 9885. Internship in Planning. 3 or 6 Credit Hours.**

All students in the Master of Science in City and Regional Planning are required to fulfill 180 hours of work experience in the field of planning as an extracurricular activity or as a three-credit elective by registering for CTRP 9885 Internship in Planning. Approved internships must focus on the acquisition and application of practical skills in planning. Internship placements are at public agencies, non-profit institutions, and private firms. Internships must be approved by the City and Regional Planning program head prior to a start date. Internships require interim reports and must culminate in a report regarding the experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in (24 credits in CTRP courses numbered 5000 to 9000 or 24 credits in CRP courses numbered 5000 to 9000)

**CTRP 9889. Planning Studio. 6 Credit Hours.**

The studio involves undertaking a planning project in cooperation with a local or regional client. Working in small groups, students synthesize the knowledge gained from previous courses in the development of an integrated approach that is appropriate to their project. The groups prepare professional-level plans and policy reports based on relevant data collection; site analysis; evaluation of location, market, transportation, environmental, financial, and schedule opportunities and constraints; and the assessment of stakeholder interests.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in (CTRP 5014, CRP 5014, or CRP 8014), (CTRP 5413, CRP 5413, or CRP 8413), (CTRP 5513, CRP 5513, or CRP 8513), CTRP 8013, CTRP 8016, and CTRP 8213.

**CTRP 9995. Thesis in Planning. 1 to 6 Credit Hour.**

Undertaking a master's thesis provides the student an opportunity to develop evidence of mastery of the field. Under the guidance and supervision of the course instructor and Thesis Committee, the student will develop an appropriate research question, methodology and process. The master's thesis is substantial in length and follows a knowledge-enhancement model, based on planning theory, methodology, or history. The thesis is subject to a public defense. Note: Open only to students matriculated in the MS in City and Regional Planning program who have completed the first full year equivalent of the master's program. Registration requires approval of the department chair. Students may register for one to six credits of CTRP 9995. This course may be repeated for credit, but no more than six credits of CTRP 9995 may be used as an elective for the MS in CTRP.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in (18 credits in CTRP courses numbered 5000 to 9999 or 18 credits in CRP courses numbered 5000 to 9999)

## Civil Engineering (CEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CEE 5048. Probability and Statistics in Engineering. 3 Credit Hours.**

This course is designed to build a conceptual background in probability, statistics, and stochastic analysis. It prepares the graduate student for research in uncertainty analysis and stochastic models in engineering. It begins by building a solid integrated background on the subjects that conform uncertainty analysis in engineering: probability, statistics, and stochastic modeling. The theory is complemented with numerous exercises of application in engineering uncertainty analysis, and with computer simulations using modern computer algebra software, such as MAPLE. Students are gradually taken to more advanced subjects and eventually to the analysis of differential equations subject to random initial conditions, random forcing terms, and random parameters. Partial differential equations and nonlinear stochastic equations are treated.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5058. Probability Statistics in Engineering. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5110. Special Topics. 3 Credit Hours.**

Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 5201. Transportation Systems Management. 3 Credit Hours.**

This course covers cost-effective techniques for the rebuilding of deteriorated transportation systems; pavement management and traffic systems management; extensive use of advanced computer software packages.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5202. Transportation Engineering. 3 Credit Hours.**

This course focuses on the principal modes of transportation, including highway, rail, and air; analysis of elements of transport technology; and transportation system development, planning, design, construction, and maintenance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5203. Structural Design of Pavements. 3 Credit Hours.**

This course covers basic characteristics of different pavement structures; various modes of failure and design of pavement structures; identification and analysis of stresses; strains and deflections in flexible and rigid pavements; computation of traffic loading and volume for the structural design of pavements; engineering properties of pavement materials; pavement performance and distress; and empirical and mechanistic-empirical approaches.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5211. Bridge Design. 3 Credit Hours.**

The course covers bridge design in structural steel and reinforced concrete; application of AASHTO bridge design specifications; and analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5212. Transportation Engineering Materials. 3 Credit Hours.**

Topics include physical properties of asphalt, aggregates, portland cement, portland cement concrete, and their combinations; advanced techniques in material characterization in the lab and the field; material variability, sampling, and statistical techniques; and the impact of these properties on their characterization of the design, construction, rehabilitation, and management of transportation facilities, including portland cement concrete pavements with steel reinforcement; construction methodologies, recycling, and energy consideration; and application of the state-of-the-art computer software packages.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5221. Intelligent Transportation Systems. 3 Credit Hours.**

Coverage embraces the multidimensional upgrades needed for highway and vehicles for developing intelligent transportation systems. Contributions from important related fields such as telecommunications, safety, management, urban and regional planning, and economics where they interface with transport are included. Several case studies constitute an integral part of the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5231. Airport Engineering. 3 Credit Hours.**

This course deals with the various aspects of airport engineering, planning, design and development of 21st century airports. The course covers airport master and system planning, airside layout, landside access design, passenger and cargo facilities, terminal design, drainage and pavement design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5241. Pavement Management and Traffic Systems Management. 3 Credit Hours.**

The course covers development of management methods for analysis, planning, design, construction, maintenance, and rehabilitation of pavements and traffic systems. The objective functions include creation of more efficient use of existing facilities through improved management and operation of vehicles and roadway.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5244. Introduction to Geosynthetics. 3 Credit Hours.**

This course will enhance your critical understanding of Geosynthetic Materials used in civil engineering applications and develop the knowledge and skills required for designing and applying geosynthetic materials in civil engineering and environmental applications. Geosynthetics properties, testing of properties, design of geotextile, geogrids, geonets, and geomembranes for applications in separation, pavement design, embankment and retaining wall reinforcement, soil stabilization, filtration, drainage and liquid barrier, construction guidelines and case histories. The module will also develop critical understanding of the processes and materials used for the manufacture of geosynthetic materials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5251. Pavement Rehabilitation and Maintenance. 3 Credit Hours.**

The course covers fundamental behavior of materials used in building pavements. These materials include aggregate mixtures, asphalt binders and mixtures, and Portland cement concrete. The course covers methods of field construction and quality control of materials and their impact on long term performance. The course helps students understand the role of material properties in design of pavements including cost analysis. Students will learn testing methods, selection criteria, and standard specifications. Finally, the students will use accumulated knowledge through the course to understand strategies of pavement rehabilitation and maintenance. Principles of asset management will be introduced in the course to optimize maintenance and rehabilitation interventions for improving longevity.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5301. Construction Administration. 3 Credit Hours.**

The course focuses on the engineering and construction industry; the basis of construction contracting; organizational structure and its functions; management structure and its functions; office administration, employment practices, and labor relations; organizational financing and accounting; and safety practices, risk management, and industrial insurance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5302. Engineering Project Management. 3 Credit Hours.**

This course provides an overview of the basic principles underlying all methods of project management, including project estimating, planning and scheduling, budgeting, cost accounting and cost control, project documentation, tracking and resource leveling. It also focuses on utilization of project management software packages for selected civil engineering projects; different types of projects; organizing the project management functions; setting up the project team; starting up and managing engineering projects; and ensuring the effective completion of the project on time, within budget, and meeting specifications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5303. Construction Financial Management. 3 Credit Hours.**

Coverage includes project development in construction, project budgeting and job costing approaches, cost management and financing alternatives, evaluation of financial and accounting objectives required with each project, forecasting cash needs and profit, and financial reporting procedures.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5312. Construction Equipment Management. 3 Credit Hours.**

This course focuses on the concepts and theories of construction equipment operation, ownership costs, and their relationship to production systems; analysis of depreciation and fixed costs for equipment pricing on construction projects; selection and use of construction equipment; and equipment economics and financing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5321. Geotechnical Engineering. 3 Credit Hours.**

This course deals with soil testing, site investigation, design of shallow and deep foundations, earth retaining structures, and advanced topics in soil behavior and stability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5411. Structural CADD Systems. 3 Credit Hours.**

Topics include behavior and analysis of simple and complex structures subjected to dynamic loads; using exact and approximate analytical techniques; determination of free response and force response using modal superposition and numerical integration; review of the characteristics of earthquakes with consideration of site and structural parameters on the response of buildings; and application of analysis and design procedures required to achieve earthquake-resistant structures in accordance with building code specifications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5421. Structural Dynamics. 3 Credit Hours.**

This design course addresses developments in theory and practice of earthquake engineering. It familiarizes students with new techniques of analysis and seismic design. Students learn advanced concepts in applied mathematics, especially structural dynamics and application of seismic building and bridge codes. Familiarity with differential equations, matrix methods of analysis, non-linear equations, eigenvalue solutions, and finite elements modeling are required. Students are instructed to learn and apply new software for dynamic analysis. Laboratory work includes the study of experimental models such as for bridge piers (frames, walls, and hammerhead columns) using an MTS machine for applying dynamic loads.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5431. Behavior and Design of Steel Structures. 3 Credit Hours.**

The course's design objective is to develop within the student an awareness of the fundamentals required to produce safe, functional, and economical steel structures, which are in conformance with national building codes and industry specifications and standards. This is an advanced course in structural engineering intended to develop professional-level competence in the design of steel-framed buildings, utilizing the most up-to-date design code.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5432. Structural Mechanics. 3 Credit Hours.**

Topics include principles of mechanics and stress and strain at a point; analysis of statically determinate and indeterminate structures with static and moving loads using energy methods and force and deformation methods; beam theory, shear center, unsymmetrical bending, introduction to numerical methods, and computer techniques; and introduction to the use of the GT-STRUDAL and ANSYS computer programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5433. Behavior and Design of Masonry Structures. 3 Credit Hours.**

Coverage includes the fundamental principles of masonry behavior and design. In this course, up-to-date information about material testing, research methodology in the area of masonry structures, and codes are presented. The first part of the course presents the fundamental behavior and characteristics of masonry materials and masonry assemblages, the deformational characteristics of brick and block masonry, performance of load-bearing wall systems and shear wall system, the design of unreinforced and reinforced masonry elements, and the construction details of masonry structures. The second part of the course concentrates on the seismic resistance of masonry structures, prestressed masonry, and applied design of low and high-rise buildings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5434. Behavior and Design of Reinforced Concrete Structures. 3 Credit Hours.**

Behavior, analysis, and design of advanced reinforced concrete structures and components including columns subjected to flexure in one or two direction, slender columns, floor systems including two-way slabs, and analysis, design application using modern software.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5445. Earthquake Engineering and Seismic Design. 3 Credit Hours.**

Basic knowledge of and introduction to earthquake engineering, seismic design and analysis methods, and seismic design based on International Building Code (IBS), ASCE 7 - Minimum Design Loads for buildings and other structures, introduction of material specific design requirement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5446. Advanced Concrete Technology. 3 Credit Hours.**

This course focuses on theoretical and practical aspects of concrete technology. It covers the principles of cement and concrete production, concrete mixture design, strength and durability requirements (i.e., performance engineered mixture design), and environmental effect. It introduces concepts of construction with green cementitious materials (e.g., supplementary and alternative cementitious materials). Specific concepts include understanding the mechanisms, test methods, and evaluation procedures of main durability and sustainability issues in concrete infrastructure. Concrete related guidelines and specifications will be introduced.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5531. Life Cycle Assessment and Carbon Footprinting. 3 Credit Hours.**

Life Cycle Assessment (LCA) examines the environmental impacts of products, processes and policies beyond their direct production. Cradle to grave analysis in this manner provides the full picture that is needed to understand the true impact. This course provides an overview of Life Cycle Assessment principles and practice in relation to environmental and energy concerns. Regulatory and economic decision support tools and software analysis packages will be included. The course is structured such that students will start an LCA from the beginning of the course and progress on it as topics are covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Engineering.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5621. Engineering Hydrology. 3 Credit Hours.**

Quantifying water flow in watersheds is a crucial step in the design of environmental facilities, such as drinking water treatment plants, and in delineating floodplains. This course deals with the water cycle over watersheds by addressing the motion of water masses in the atmosphere and in surface and subsurface systems. Students who successfully pass this class are able to deal with most hydrology problems treated in the industry sector.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5622. Fate of Pollutants in Subsurface Environments. 3 Credit Hours.**

This course focuses on integrated chemical, physical, and microbiological principles of contaminant fate and transport processes necessary in the use of engineered approaches toward selecting and implementing subsurface cleanup options. It also covers abiotic processes, biotic processes, empirical models, and vulnerability mapping.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5623. Contaminant Dynamics in Urban Streams. 3 Credit Hours.**

This course will focus on environmental systems near the air:water and water:sediment interfaces. These systems are by definition boundary or edge systems and are therefore exceptionally important to aquatic ecosystem functioning. After briefly discussing the air:water interface in rivers and lakes, the course will focus on the water:sediment interface. It is here that steep gradients in chemical concentration can be found and significant nutrient cycling occurs. In addition, studies have shown that significant ecosystem productivity and respiration occurs within the bed sediments of flowing water. The course will discuss the concept of transient storage and hyporheic exchange; issues surrounding modeling of transient storage and hyporheic exchange; phosphorus and nitrogen biogeochemistry within the hyporheic zone; and biotic/abiotic nutrient cycling.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5631. Environmental Hydrology. 3 Credit Hours.**

Topics include the physics of surface and subsurface circulation and storage of water and the transport of contaminants in watersheds, soils, aquifers, rivers, the ocean, and the atmosphere, as well as the laws and equations that govern the recharge, flow, storage, and discharge of water in natural environments. Emphasis is given to qualitative analysis and quantitative evaluation methods of the different hydrologic processes with potential applications in surface and groundwater resources engineering, and environmental analysis. Analytical and numerical procedures to solve the arising equations are presented, along with the most commonly used models to solve water resources problems. Also studied are engineering methods for the sustainable use of water resources; engineering methods for the containment and treatment of surface and groundwater pollution; and the restoration of aquifers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5641. Urban Streams and Stormwater Management. 3 Credit Hours.**

Stormwater management has become a significant issue in recent years. In the past, the typical thinking was "get it out of my town," which resulted in downstream communities suffering the brunt of poor or inadequate management. In fact, only the rate of runoff was addressed, not the volume nor the quality of that runoff. In urban areas, the volume of runoff increases significantly due to additional impervious cover (e.g., pavement and rooftops), and urban stormwater runoff causes water quality degradation due to excess amounts of nutrients, metals, bacteria, and sediment. This course addresses the impact of improperly controlled runoff on urban streams and how the rate, volume, and quality of urban stormwater runoff can be properly controlled through appropriate Best Management Practice (BMP) implementation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5701. Physical Principals of Environmental Systems. 3 Credit Hours.**

Basic principles of process engineering as they relate to pollution control are studied, including heat and mass transfer; mixing, chemical, and biological reactions; and reaction and kinetics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5702. Chemical Principles of Environmental Systems. 3 Credit Hours.**

This course focuses on the essential chemical principles necessary to understand the nature of commonly occurring pollution problems and engineering approaches to their solutions; thermodynamics, chemical equilibria, acid-base chemistry, carbonate system, Redox chemistry, and adsorption/desorption phenomena.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5703. Mathematical Modeling. 3 Credit Hours.**

This introductory graduate course focuses on numerical modeling of engineering systems. It covers standard mathematical techniques, such as interpolation, numerical integration, numerical solutions of ordinary and partial differential equations, parameter estimation, and optimization. Students will have to use an algorithmic programming language, such as Matlab, Fortran, or C++.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5711. Air Pollution Control. 3 Credit Hours.**

Topics include theory and principles of the design and operation of the major categories of air pollution control equipment, and an introduction to dispersion modeling. An extensive design problem is a major course component.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5721. Weather Monitoring and Forecasting. 3 Credit Hours.**

This online course will offer a basic understanding of measurements of the atmosphere used for weather analysis and forecasting. Data from instruments such as weather balloons, radar, lightning mapping arrays, and satellites will be included. Special emphasis will be on interpreting satellite imagery and use in weather forecasting and warnings. Students will have the opportunity to learn to interpret real-time data online, and to make their own weather forecasts. The course will be taught primarily online, though one or two on-campus meetings may be required during the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5731. Solid Wastes Engineering. 3 Credit Hours.**

Coverage includes engineering principles of solid waste generation, characterization, collection and transport, separation, source reduction and recycling, and physical chemical and biological treatment strategies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5751. Water and Wastewater Treatment. 3 Credit Hours.**

This course covers the design and analysis of common unit operations at water and wastewater treatment plants such as type I-IV sedimentation, coagulation and flocculation; filtration; disinfection, and biological processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5761. Environmental Chemistry. 3 Credit Hours.**

This is an advanced course focusing on examination of processes that affect the behavior and fate of anthropogenic organic contaminants in aquatic environments. The lectures will begin with intermolecular interactions and thermodynamic principles governing the kinetics of some of the important chemical and physicochemical transformation reactions of organic contaminants. From this class, students will learn to predict chemical properties and to apply the knowledge of chemical properties and transformation reactions to assess the environmental fate of organic contaminants.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5762. Environmental Organic Chemistry. 3 Credit Hours.**

This is an advanced course focusing on examination of processes that affect the behavior and date of anthropogenic organic contaminants in aquatic environments. The lectures will focus on intermolecular interactions and thermodynamic principles governing the kinetics of some of the important chemical and physiochemical transformation reactions of organic contaminants.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5771. Chemistry for Environmentally Sustainable Engineering. 3 Credit Hours.**

This course is a survey of environmental chemistry as it relates to the development of environmentally sustainable engineered systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5772. Sustainable Development and Industrial Ecology. 3 Credit Hours.**

As an introduction to the concepts of industrial ecology and sustainability, the course focuses on an interdisciplinary framework for the design and operation of industrial systems as living systems interdependent with natural systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5773. Sustainability Aspects of Water Supply and Wastewater Treatment. 3 Credit Hours.**

Major environmental, economic and social trends are influencing the application of sustainability principles within the engineering profession. This course will examine the sustainability principles that will transform future engineering practice regarding drinking water supply and the treatment of wastewater. The term, wastewater, will be replaced by one more representative of the fact that 'wastewater' is in fact a largely untapped source of raw materials. It is in the areas of energy recovery, small molecule harvesting, and the water energy nexus where the next generation of environmental engineers will have a major impact on meeting societal needs regarding the provision of adequate drinking water as well as industrial requirements for this increasingly scarce resource. The course will introduce the underlying principles of sustainability directly relevant to meeting this need. Case studies will evaluate the above mentioned principles and the applicable areas of energy, chemical intermediates, and reclamation of previously used water, with a focus on dealing with emerging microconstituents in the water environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5774. Membrane Separation in Wastewater Treatment. 3 Credit Hours.**

The course describes in detail membrane separation technology for a wide range of applications including water treatment and desalination. The course covers: global water shortages and need for membrane technology, microfiltration, ultrafiltration, nanofiltration and reverse osmosis membrane processes and current applications in water treatment, operational and energy issues, limitations, fouling and membranes processes coupled with biological treatment. The course is valuable as a prerequisite to more advanced research in environmental engineering, as a technical education to stimulate graduate students' interest in environmental sustainability, and as an introduction to environmental constraints that are increasingly important to other engineering disciplines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5792. Biological Principles of Environmental Systems. 3 Credit Hours.**

Applications of biological processes in environmental engineering are historic and eminently modern, from traditional ones like activated sludge and anaerobic digestion to emerging applications like detoxification of hazardous chemical and biofiltration of drinking water. This course is designed to identify the biological principles essential for the understanding and designing of biological processes used for environmental protection and improvement. While many biological processes are being employed and developed by environmental engineers, there is no place in the standard civil engineering curriculum for detailed discussion on the underlining principles and their applications. This course emphasizes the comprehension of theoretical concepts and their application in a variety of situations. It covers the fundamental biological principles by their practical applications in engineered and natural environments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5793. Environmental Biotechnology. 3 Credit Hours.**

Biotechnology plays a central role in environmental science and engineering, including wastewater treatment, pathogen control, and biodegradation. The objective of the course is to provide environmental engineers and scientists with advanced concepts and quantitative tools that are necessary for understanding environmental processes and designing environmental protection systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5794. Advanced Biological Wastewater Treatment. 3 Credit Hours.**

Biological processes play a central role in wastewater treatment and are used in every wastewater treatment plant to remove organic compounds, nutrients, and other compounds from the water before discharging it back to the environment. The objective of the course is to provide environmental engineers and scientists with advanced concepts and quantitative tools necessary for understanding environmental processes and designing environmental treatment systems related to wastewater including advanced aerobic and anaerobic processes. The course integrates the use of microbiological principles into engineering wastewater treatment process. The course will provide a better understanding of interesting and complex environmental topics related to sustainable environmental remediation and protection. The course is valuable as a prerequisite to more advanced research in environmental engineering, as a technical education to stimulate graduate students' interest in environmental sustainability, and as an introduction to environmental constraints that are increasingly important to other engineering disciplines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5795. Aquatic Toxicology in Environmental Engineering. 3 Credit Hours.**

This course provides an introduction to the basic concepts of toxicology necessary to understand the effects of contaminants in the water environment. Specific topics include sources and classes on aquatic contaminants, environmental chemistry that influences behavior in the aquatic environment, the disposition and metabolism of these substances that affect their toxicity, and the physiological response of exposure in aquatic species and humans. The course will provide an overview of aquatic toxicity testing methods and application of toxicity data in the risk assessment of aquatic exposures to emerging contaminants, such as pesticides, pharmaceuticals, and natural products. Case studies will cover historical and contemporary examples of contaminant-driven effects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5799. Environmental Engineering. 3 Credit Hours.**

This course focuses on the generation, transport, effects, and control of environmental pollution within and across media, as well as problem analysis and control design. Theoretical development is augmented with applications of state-of-the-art software packages. Students complete a term project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5811. Advanced Soil Mechanics. 3 Credit Hours.**

Advanced concepts related to behavior of soil as an engineering material. Topics include consolidation magnitude and time rate, evaluation of secondary compression, mitigation of consolidation of settlements, shear strength of soils and other geologic materials, principles of critical state soil mechanics, and normalization of undrained shear strength.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5821. Foundation Engineering. 3 Credit Hours.**

Principles of foundation engineering and design. Topics include soil stress distributions, bearing capacity of shallow (footings, mats) and deep foundations (driven piles, drilled shafts), tolerable settlements, construction techniques, and field quality control.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5822. Earth Retaining Systems. 3 Credit Hours.**

Principles related to design of earth retaining systems and stability of earth slopes. Topics include lateral earth pressure theory, temporary and permanent retaining structures, in-situ reinforcement, and braced excavations. Shear strength of cohesive and granular soils and slope stability analysis using limited equilibrium, design charts and numerical methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 5823. Geotechnical Earthquake Engineering. 3 Credit Hours.**

An introduction to seismology and earthquake hazards in geotechnical engineering. Topics include plate tectonics and earthquake faulting, strong ground motions, dynamic soil properties, and characterization of design ground motions based on deterministic and probabilistic seismic hazard analysis. Analysis of earthquake-induced ground failures, seismic design of earth retaining systems and slopes, and effects of soil-structure interaction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 8302. Advanced Project Management. 3 Credit Hours.**

This course covers analysis of project control, job budgeting and costing, safety and risk management, bidding strategies and management, construction information management, and case studies of construction projects and company profiles.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CEE 8701. Advanced Physical/Chemical Treatment Processes. 3 Credit Hours.**

There are numerous sites in the environment where surface water, ground water or soil is contaminated with toxic chemicals. In addition, many industrial wastewater and air emissions contain toxic chemicals which required treatment. Due to the chemical toxicity, we rely on physical and chemical processes for the decontamination of the fluid stream. Some of the commonly used treatment technologies are carbon absorption, air stripping and scrubbing. Of late, advanced oxidations processes have been examined and implemented as well. These processes are also used to produce high quality drinking water. The course deals with the analysis and design of some commonly used advanced physical/chemical processes for treatment of contaminated water and air. This course complements, and builds upon the fundamental science discussed in other courses in the curriculum on physical and chemical principles. In this course, emphasis will be placed on understanding the basic science, and the engineering design principles. Treatment of water, wastewater and air using processes such as air stripping, scrubbing, carbon absorption and advanced oxidation processes will be discussed, and design of the treatment systems will be conducted.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 8702. Advanced Chemical Principles of Environmental Systems. 3 Credit Hours.**

This is an advanced course focusing on examination of processes that affect the behavior and fate of anthropogenic organic contaminants in aquatic environments. The lectures will focus on intermolecular interactions and thermodynamic principles governing the kinetics of some of the important chemical and physiochemical transformation reactions of organic contaminants.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 8703. Computer Modeling of Environmental Transport. 3 Credit Hours.**

Topics include theory and computer modeling of transport and diffusion within and across media; and application of models to problems of air, water, and soil pollution with case studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CEE 9182. Independent Study I. 3 Credit Hours.**

Special study in a particular aspect of engineering under the direct supervision of a graduate faculty member. May be taken once by MS/MSE students and once by Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 9282. Independent Study II. 3 Credit Hours.**

Special study in a particular aspect of engineering under the direct supervision of a graduate faculty member. May be taken once by Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 9991. Directed Research. 1 to 6 Credit Hour.**

Under the guidance of a faculty member, the student conducts independent research on a selected topic in engineering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is intended for Ph.D. students who have completed their coursework but who have not yet passed both the Ph.D. Preliminary Examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 9995. Project. 1 to 3 Credit Hour.**

A project is assigned with the approval of the Civil and Environmental Engineering Graduate Committee and conducted under the supervision of a graduate faculty advisor. An oral presentation in an open seminar and a written report are required to complete the independent project. Projects related to industrial applications are encouraged. For non-thesis students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 9996. Thesis. 1 to 3 Credit Hour.**

Master's thesis. May be taken twice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

This course is intended for Ph.D. students who have passed both the Preliminary and Qualifying Examinations but who have not been elevated to candidacy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CEE 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is intended only for those students who have achieved Ph.D. Candidacy status. A minimum of 6 semester hours is required for graduation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Clinical Sciences and Health Informatics (CSHI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CSHI 5201. Clinical Data and Analytics. 3 Credit Hours.**

This course is designed to train students in the fundamentals of manipulating and conducting analyses of clinical data. Basic statistical principles and big data analytics will be discussed briefly, though the main focus of this course is understanding and working with "raw" clinical and administrative data sources to develop structured data sets suitable for analysis by more advanced techniques. Students will gain insight into the unique idiosyncrasies of the healthcare setting that impact the interpretation of analyses of clinical data. This class will explore in detail an anonymized patient data set including demographics, clinical encounters, diagnoses, medications, and laboratory results. The class will analyze clinical data sets with special focus on medication management, patient adherence, healthcare disparities, trends in health utilization, disease management, and quality measurement. Challenging issues in dealing with "dirty data" will be addressed. The course will also explore the impact of data modeling decisions and clinical ontology choices on the conclusions that can be drawn from clinical analytics. Through the course, students will learn the many assumptions that are incorporated into even seemingly straightforward queries, and the impact of these assumptions on the interpretation of results. Students also will be able to test the generalizability of their knowledge through analyses of additional publicly available clinical data sets.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSHI 5202. Applications of Data Science to Clinical Medicine and Medical Research. 2 Credit Hours.**

Data science, at the intersection of statistics and computer science, provides cutting edge tools for analyzing large data sets to provide predictive and causal models. These tools have been used extensively in the fields of econometrics and advertising (e.g. Google and Facebook); the application of data science to medicine is in its infancy, however, with the increasing availability of large clinical data sets, the opportunity to mine these sets for information has never been greater. While software engineers and applied mathematicians have the skills to use and develop these tools, they lack the content expertise needed to apply this knowledge to medicine. The purpose of this course is to provide graduate student/researchers in biomedical sciences and clinical research staff an opportunity to develop sufficient skills in modern data science to carry out research using large databases. It is assumed that the student has no training beyond introductory courses in statistics and/or epidemiology; no significant programming experience is required.

**Field of Study Restrictions:** May not be enrolled in one of the following Fields of study: Health Informatics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## College of Liberal Arts (CLA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CLA 5001. Language Study for Graduate Students. 2 to 4 Credit Hours.**

Language Study for Graduate Students introduces students to the elements of grammar, syntax, style, and translation of languages necessary for graduate work in a variety of fields. Instruction is tailored to students' needs, and may include elementary grammatical study, reading comprehension of scholarly and literary texts in the target language, conversation, and prose and oral composition. This course is designed to assist graduate students who need further preparation for their required language exams, but it will not be used for credits towards degree requirements. Students must consult department chair/program director for proper language placement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CLA 5019. Introduction to Cultural Analytics. 3 Credit Hours.**

This course introduces students to research methods used to study cultural objects in digital form. The shift from print to digital materials, and from museum-based artifacts to digital reproductions, has profound implications for research in human culture. It creates new possibilities for research questions by making it possible to employ computational research methods for the first time. This course teaches students to understand the strengths and limitations of each method. Using techniques like textual analysis, network analysis, GIS, 3D-modeling, virtual reality, and critical making, researchers can investigate different aspects of their materials and discover patterns that are imperceptible without computational analysis. It provides students an overview of research methods in cultural analytics and gives them the opportunity to explore the possibilities and limitations implicit in working with cultural objects in digital form. By the end of the semester, students will understand the range of data types used in cultural analysis, the different tool types available to work with them, and the major theoretical implications inherent in these new processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CLA 5999. Research Experience. 0 Credit Hours.**

Research Experience provides graduate students laboratory experiences/research practices prior to undertaking independent, directed, master project, master's thesis, or dissertation research. This course allows graduate students the opportunity to learn to use laboratory equipment, designing and carrying out an experiment(s), collecting preliminary data, field experiences, and participation in laboratory meeting, etc. with faculty which may lead to identifying a faculty mentor. The course will be graded as Pass or Fail. The Research Experience is a non-repeatable course. After the completion of this Research Experience course, students will need to be enrolled in independent study, directed research, master's research, master's thesis, dissertation proposal, or dissertation if they continue in an active research program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CLA 8985. Teaching in Higher Education: Liberal Arts. 1 to 3 Credit Hour.**

This course is required for any student seeking Temple's Teaching in Higher Education Certificate. The course introduces current research on learning and human development, best teaching practices, and reflective approaches to teaching. It includes experiential components, including peer review of teaching and syllabus creation. All topics are considered through the lens of teaching in the Liberal Arts. Students may enroll without prior teaching experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 3 credit.

## College of Public Health & School of Social Work (CHP)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CHP 5001. Grad Research I. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## College of Science and Technology (SCTC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SCTC 5100. Special Topics. 1 to 4 Credit Hour.**

This course will allow the College of Science and Technology to offer a variety of graduate courses that are broad and not discipline specific examples include courses in integrated science or technology or STEM education. This course may also be used for a variety of topics that serve CST programs that offer teacher professional development focused on STEM disciplinary knowledge.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Communication Management (CMGT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CMGT 5001. Communicating Organizational Leadership. 3 Credit Hours.**

This course focuses on reaching your leadership potential by assessing personal leadership styles and strengthening them through effective communication. You will understand how subtleties in communication and relationship management may have a huge impact on how an organization is run, defined and perceived. We will examine the forms of power and influence and how to become a trusted advisor with senior executives. This course is designed to help you shape a better future for yourself and the communities you serve.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5002. Leadership in Crises and Conflict Management. 3 Credit Hours.**

Crisis and conflict can sharpen the thinking of your teammates, spark creativity and galvanize a virtual dispersed team. Or it can leave teammates speechless, defensive, squabbling and discouraged. Your leadership can make the difference. This course will show you how to step in, reach out and take charge of contentious issues, whether they surface in live meetings, e-mail volleys or teleconferences. It will equip you to surface the "real issues" that need to be faced and resolved, before they create a crisis. It will show you how to bridge cultural, personality, age, gender and professional differences to get the best of each other's thinking. And do all of this in a way that increases your credibility and advances your career.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5003. Leading Diverse Teams. 3 Credit Hours.**

This program consists of 7 sessions designed to prepare individuals to both lead with pragmatic skills and, in addition, develop a theoretical understanding of the cultural, social, and communication dynamics at play within a highly diverse teamwork environment. The program will provide a rigorous theoretical framework for understanding how to work with a dynamic and diverse cross section of people who are brought together with specific skills and expertise to design and implement major organizational initiatives. Further, participants will be exposed to specific organizing structures that are used, including employees working together in multi-function, cross-geography and cross time zone teams.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5004. Cross-Cultural Leadership. 3 Credit Hours.**

This course takes a communication approach to addressing the challenges and opportunities created by local and global leaders in fostering cross-cultural perspectives: providing a framework for looking at culture and leadership from a communication perspective; looking at the role of leadership in developing the needed competencies among organizational members for successful cross-cultural communication; and, proposing strategies for developing and maintaining cross-cultural communications for successful global undertakings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5101. Conflict Management Processes in the Workplace. 3 Credit Hours.**

This course provides a communication perspective on major third party intervention processes that are involved in organizational and workplace dispute systems and conflict management. Specifically, the course focuses on looking at the discursive processes that create meaning and resolve conflict through a third party involvement in ongoing conflict. Third party interventions for interest-based, rights-based and power-based approaches to dispute resolution are included. Specific attention is given to interest-based intervention processes including facilitated negotiation, conflict coaching, mediation, and facilitation. For these processes narrative theory foundations of these interventions are emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5102. Designing Workplace Dispute Systems. 3 Credit Hours.**

This course introduces the theory and research on designing dispute resolution systems for complex organizations and the role of the conflict specialist in designing and assessing these systems. The course includes an analysis of organizational conflict dynamics so that dispute systems are designed to fit the workplace context and the conflict challenges in that workplace. Public sector and private sector organizations are considered, with emphasis on dispute systems for US organizations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5201. Consulting and Consultation in Public Relations. 3 Credit Hours.**

Whether operating externally or internally, and because of their unique position of viewing organizational environments and contexts among a wide range of stakeholders, communicators who wish to advance in their careers need to understand the role of a communications consultant to senior managers and executives. This course is designed to equip students with the knowledge and skills to hone their consultative abilities and become a valued and trusted voice to help executive decision making. This course will review the history and rise of consulting within organizations starting in the first-third of the 20th century, theories of effective influence and persuasion, what senior executives want and expect from their communication consultants, to the knowledge and skills communication consultants need to have so their counsel is taken seriously and valued by their clients and organizations. The course will consist of readings, discussions, simulations, and assignments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5202. Storytelling through Innovation. 3 Credit Hours.**

Storytelling through Innovation examines how technological advancement is impacting the field and communication with publics. Specifically, the course will focus on two ongoing areas of potential significant change in the way public relations professionals create messaging and storytelling to influence attitudes and behaviors: artificial intelligence and deep fake technology, and the ethical issues surrounding them that professional communicators should be dealing with. The concept of purpose will also be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5203. Law and Ethics in Public Relations. 3 Credit Hours.**

Law and ethics are crucial components of strategic communication practice. This course explores and supplies you with critical knowledge of these areas through theoretical perspectives; examination of essential and relevant law impacting professional communicators; analyses of ethical issues confronted by strategic communication professionals, organizational leaders, and community influencers; exploration of guidelines for legal compliance; discussions and case studies of ethical reasoning and practical, philosophical, and theoretical concerns affecting everyday matters of moral choice and of moral judgment; and current trends on these topics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 5583. Directed Readings in Communication Management. 1 to 3 Credit Hour.**

This course provides study in particular aspects of communication management under the direct supervision of a full time graduate faculty member. No more than three semester hours of directed study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 3 credit.

**CMGT 8101. Data Driven Insights. 3 Credit Hours.**

Some of the most critical skills in modern communication management include a strong understanding of research methods, digital analytics, data driven insights, and performance evaluation. This course introduces you to these concepts, key metrics and their meaning. You will learn how to connect communications data to corporate goals, analyze digital metrics, find data driven insights, and present the data story in a compelling way. This course provides students with the basics of digital tools and the key metrics analyzed for communication disciplines. Students will learn some of the most common digital measuring and analytical tools in the industry and become better prepared for the modern communication world.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 8103. Organizational Communication. 3 Credit Hours.**

An organization is only as effective as its communication. Poor communication dynamics impact everyone within an organization, from the Chief Executive Officer (CEO) to the evening maintenance staff. This course will approach organizational communication from three lenses: Power, networks of association, and ethical standards. It will offer an overview of a diverse range of communicative acts engaged within an organization at the individual, dyadic (i.e. two people), small group, and meso (i.e. organizational) levels. Students will also focus on how communication is enacted within and between these levels, and how these dynamics impact an organization achieving its goals. The digital, social, and mobile communication revolutions have not only created new opportunities for an organization to improve its communication effectiveness, but present a variety of challenges as well. This course will expose students to the risks and rewards provided by emerging technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 8105. Social Responsibility in Corporations and Not-for-Profit Organizations. 3 Credit Hours.**

Corporate Social Responsibility (CSR) refers to a company's commitment to allocate resources to benefit society and the environment. The contributions may come in the form of financial support, employee time or socially beneficial business practices. At the heart of the matter are competing loyalties. Companies may have loyalties to their communities and the natural environment, but they must also be loyal to their shareholders and employees who rely on them to remain profitable. Ethically balancing loyalties in a company's relationships with publics as diverse as environmentalists, government agencies, unions, employees, stockholders, consumers and critics and advocates is a significant responsibility for public relations practitioners, and can have long-term impact on a company's financial performance, employee moral and productivity, and image, identity and reputation. This course introduces students to theories behind the concept of corporate social responsibility, and involves an examination of whether organizations should expand their focus from serving stockholders to also considering the impact of the firm's activities on diverse stakeholders. Practicing CSR requires a corporation meld business goals with societal expectations. To do so means addressing complex questions such as: What obligations do businesses have to the societies in which they operate? Can the interests of corporations and their outside stakeholders be aligned, or are they in inherent conflict? This course examines these and other questions without prescribing simple solutions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 8106. Communication Theory for Professionals. 3 Credit Hours.**

This course introduces students to the concepts and principles of significant theories in the field of communication. The theories covered in this class are specifically chosen to enhance a student's understanding of the contemporary professional workplace experience. This course focuses on the social contexts and social dynamics that shape the modern organization. These contexts and social dynamics include interpersonal, organizational, group communication, mass media as well as persuasion, culture, and social media. An emphasis is placed on integrating these theories into the student's daily communication practices, areas of interest, and/or professional development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CMGT 8109. Final Project. 1 Credit Hour.**

In this final project, each student will draw upon what s/he has learned in the M.S. in Communication Management program and apply it to a real-world situation. The final project will utilize specific skills, information, and concepts to solve a critical communication problem (structural and/or procedural) affecting an organization's ability to communicate efficiently or effectively at internal and/or external levels. In solving a problem, your strategic management plan needs to account for organizational employees, stakeholders, and customers. The format is a 20 minute video-recorded PowerPoint oral presentation to be submitted to the Department of Communication and Social Influence project evaluation committee.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Communication Sciences and Disorders (CSCD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **CSCD 5411. Psycholinguistics. 3 Credit Hours.**

This course presents information about the processing and use of language including language acquisition, lexical retrieval, syntactic parsing, and language production in children and adults with normal and disordered communication systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **CSCD 5505. Issues in Linguistics. 3 Credit Hours.**

This course critically investigates major intellectual trends in the recent history of linguistics and their relationship to contemporary issues in philosophy, psychology, and anthropology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **CSCD 5511. Bilingualism: A Lifespan Perspective. 1 Credit Hour.**

In the field of speech and language pathology, culturally and linguistically diverse (CLD) children have a higher rate of misdiagnosis than monolingual Mainstream American English (MAE) speaking children of the same age, due to biased standardized assessments and the need for more culturally-competent clinicians to evaluate and treat these populations. This course is designed to provide students with a survey of the typical bilingual experience across the lifespan. Students will learn how bilingualism is understood across contexts, including different language parameters (i.e., semantics, phonology, syntax), as well as acquisition, disorder and typical aging. Content will be presented from clinical, developmental, neurolinguistic and sociolinguistic perspectives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **CSCD 5521. Foundations in Child Language Disorders. 3 Credit Hours.**

This course reviews theory, research and clinical issues concerning disorders of language in young children. Major categories of language disorder such as emotional disturbance, mental retardation, hearing loss, and specific language impairment are considered. Treatment and assessment techniques are reviewed and evaluated.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

#### **Pre-requisites:**

CSCD 3301|Minimum Grade of C|May not be taken concurrently.

### **CSCD 5522. Foundations and Management in Phonological Disorders. 3 Credit Hours.**

This course presents information and experiences to prepare students to assess and treat individuals with phonological disorders.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **CSCD 5524. Foundations and Management of Motor Speech Disorders. 3 Credit Hours.**

This course covers assessment, diagnosis, and management of motor speech disorders such as dysarthria and apraxia of speech in children and adults.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CSCD 5522.

**CSCD 5525. Foundations and Management in Fluency. 3 Credit Hours.**

This course surveys the characteristics and theories on the nature of stuttering and reviews the principles and practices of assessment and intervention strategies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:**

CSCD 3233|Minimum Grade of C|May not be taken concurrently.

**CSCD 5527. Foundations and Rehabilitation of Language and Cognitive Disorders in Aphasia. 3 Credit Hours.**

This course provides an overview of acquired neurogenic language disorders and the ways in which these disorders have historically been described and explained. Approaches to diagnosis and treatment of adult language disorders and the evolution from neuroanatomical to cognitive and social models are discussed. The course begins with a review of the etiology and neuroanatomy underlying aphasic syndromes. The classical, neuroanatomical view of acquired language disorder is described, followed by an overview of syndrome classification. This is followed by a detailed review of cognitive-psycholinguistic models of language and communication disorders as well as the life participation approach to rehabilitation of communication disorders. The remainder of the course provides a review of specific language disorders associated with neurological etiologies (especially stroke-based aphasia), their effects on comprehension and production of oral and written language and specific intervention approaches. The course also offers a review of current research that focuses on impairments of cognitive processes that support language processing such as short-term memory (STM) and executive processing.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 5528. Voice Disorders: Theory and Analysis. 3 Credit Hours.**

This course acquaints the student with the symptomatology and disorder complexes related to phonation and with the philosophies and methods used in the treatment of voice disorders, including cleft palate and alaryngeal voice.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:**

(CSCD 3233|Minimum Grade of C|May not be taken concurrently  
AND CSCD 3235|Minimum Grade of C|May not be taken concurrently)

**CSCD 5531. Applications in Audiology. 1 Credit Hour.**

Practical labwork with audiometric equipment, test procedures, administration interpretation, and principles of case management and report writing.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:**

CSCD 4301|Minimum Grade of C|May not be taken concurrently.

**CSCD 5532. Foundations and Management in Hearing Disorders. 3 Credit Hours.**

This course reviews basic communication sciences and their role in the development of (re)habilitative strategies for use with both adults and children with hearing impairment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:**

CSCD 4301|Minimum Grade of C|May not be taken concurrently.

**CSCD 5533. Principles of Audiology. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 5534. American Sign Language I. 3 Credit Hours.**

This introductory course provides the necessary skills for basic communication in American Sign Language (ASL). The relationship between manual and oral systems and the implications of deafness on communication are considered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 5546. Research Methods in Communication Sciences and Disorders. 3 Credit Hours.**

Science and clinical practice require the ability to review, analyze, understand, evaluate, and synthesize information from the scientific literature. The purpose of this course is to introduce you to the scientific process and research methods used in speech, language, and hearing sciences. The major goal of this course is to prepare you to be a critical consumer of the research literature and become familiar with evidence-based practice in communication sciences and disorders. The course will focus on the types of research, research designs, and research methods that are commonly used to investigate normal and disordered human communication.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 5634. American Sign Language II. 3 Credit Hours.**

This course continues the basic introduction to American Sign Language (ASL) through exploration of the language used by Deaf people in America, including the syntax, grammar, and vocabulary necessary in ASL. In addition various aspects of Deaf culture will also be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CSCD 5534.

**CSCD 5729. Language and Deafness. 3 Credit Hours.**

This introduction to deaf studies explores the linguistic structure of American Sign Language, how modality of production-perception shapes language organization (comparisons of signed and spoken languages), deaf culture, deafness and minority cultures, deafness and child development, issues and options in deaf education, deafness in old age.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 5730. Topics in Speech, Language and Hearing. 1 to 3 Credit Hour.**

Special topics in the area of Speech Language Pathology which change from semester to semester are presented. Topics and instructors for a specific semester are announced by the department and posted on the CSCD Department's listserv and web site.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 8147. Basic Practicum in Audiology. 1 Credit Hour.**

Basic practicum in audiology at Temple University Speech and Language Center or one of the field placements with emphasis on basic audiologic testing and interpretation.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8187. Basic Practicum in Diagnostic Processes. 1 to 3 Credit Hour.**

This course introduces assessment of speech-language disorder, emphasizing assessment tools, procedures, rationales, and interpretation.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:**

CSCD 4396|Minimum Grade of C|May not be taken concurrently.

**CSCD 8287. Basic Practicum in Therapy Processes. 1 to 3 Credit Hour.**

This is an introduction to remediation of speech-language disorders, emphasizing therapy methodologies and techniques, procedures, and rationales based on evidence-based practice, and analysis and interpretation of therapy outcomes.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:**

CSCD 4396|Minimum Grade of C|May not be taken concurrently.

**CSCD 8601. Advanced Syntax. 3 Credit Hours.**

This course studies recent advances in syntactic theory, focusing on the tension between universal grammar and the properties of particular languages.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8721. Foundations and Management in Augmentative and Alternative Communication. 1 Credit Hour.**

This course provides information on the identification of individuals who would benefit from Augmentative and Alternative Communication, on assessment of functional communication needs across environments, and on current regulations and documentation to obtain funding for a speech-generating device.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8722. Foundations and Management in Dysphagia. 3 Credit Hours.**

An overview of swallowing processes and disorders specific to the adult and pediatric populations. Assessment and treatment will be discussed.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8723. Seminar in Speech Language Hearing. 1 to 3 Credit Hour.**

This course provides students with in-depth and advanced information and experiences in a variety of topics in Speech, Language, Hearing. Students will review the foundation of anatomy, physiology or function of speech, language or hearing, its etiologies, and have hands on practice with professions in the field. Topics change from semester to semester and are presented in an intensive seminar format over a weekend (Friday half day and Saturday all day).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 8725. Disorders of Articulation and Phonology: Special Populations. 2 Credit Hours.**

This course presents information and experiences to prepare the speech and language specialist to assess, diagnose and treat persons with articulation disorders associated with cleft palate, apraxia, dysarthria and oral myofunctional disorders.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8726. Management of Child Language Disorders. 3 Credit Hours.**

This course presents information and specific skills to prepare the speech and language specialist to function in the educational setting in a variety of roles.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CSCD 5521.

**CSCD 8727. Written Language Development and Disorders. 2 Credit Hours.**

This course focuses on the developmental processes of written language acquisition and written language disorders (dyslexia). Special attention to phonological awareness and the cognitive processes underlying this awareness.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (CSCD 5521, CSCD 5522, and CSCD 8726)

**CSCD 8728. Voice Disorders: Spec Pop. 2 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8729. Neurocognitive Language Disorders. 3 Credit Hours.**

This course will provide a broad introduction to neurocognitive deficits of language in dementia, traumatic brain injury, and right hemisphere damage. We will review neural substrates of human memory and executive functioning and examine how brain damage compromises language and cognition. We will examine assessments of language and memory and cover contemporary theories of neuropsychological rehabilitation.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8738. Proj in Spch Lang Hear. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8824. Assessment and Treatment of Diverse Populations. 2 Credit Hours.**

This course offers concentrated study of language development and disorders in culturally and linguistically diverse populations. Less biased assessment and intervention approaches are discussed.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CSCD 8830. Seminar In CSD. 1 Credit Hour.**

This course focuses on preparing students to work with children from birth through six years in an interdisciplinary environment.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Class Restrictions:** May not be enrolled in one of the following Classes: Graduate 0 to 17 Credits.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 9087. Practicum in Hearing. 1 Credit Hour.**

This basic-level practicum exposes students to the problems and therapeutic measures experienced by and available for hearing impaired individuals from childhood through adulthood in various habilitative/rehabilitative settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 9187. Advanced Practicum in Voice. 1 Credit Hour.**

This advanced-level practicum at a field affiliation or at Temple University Speech and Hearing Center (stuttering and voice disorders) focuses on in-depth diagnosis and treatment of a specific disordered population, e.g., L.D., M.R., post-CVA, stuttering, voice, and hearing impairment.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C in CSCD 5528.

**CSCD 9287. Advanced Practicum in Fluency. 1 Credit Hour.**

This advanced-level practicum offers an in-depth focus on assessing and treating persons who stutter.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C in CSCD 5525.

**CSCD 9387. Advanced Field Practicum in Speech Language Pathology - Child. 3 Credit Hours.**

This advanced-level practicum at a field affiliation focuses on in-depth diagnosis and treatment of communication and/or swallowing disorders in a specific disordered child population, i.e., SLL, L.D., M.R., stuttering, voice, hearing impairment, etc. On-site for three days or more.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C in CSCD 8726.

**CSCD 9388. Capstone Field Practicum in Speech Language Pathology - Pediatric. 3 Credit Hours.**

This capstone-level practicum at a field affiliated site focuses on in-depth diagnosis and treatment of communication and/or swallowing disorders in a specific disordered pediatric population, i.e., LD, MR, post CVA, stuttering, voice, hearing impairment, etc. Students can plan to be on-site for at least three days per week.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in (CSCD 9387 or CSCD 9487)

**CSCD 9487. Advanced Field Practicum in Speech Language Pathology - Adult. 3 Credit Hours.**

Advanced level practicum at a field affiliation with focus on in-depth diagnoses and treatment of communication and/or swallowing disorders in a specific disordered adult population, e.g., L.D., M.R., post-CVA, stuttering, voice, and hearing impairment. The practicum takes place on-site for three days or more.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C in CSCD 5527 and CSCD 8729.

**CSCD 9488. Capstone Field Practicum in Speech Language Pathology - Adult. 3 Credit Hours.**

This capstone-level practicum at a field affiliated site focuses on in-depth diagnosis and treatment of communication and/or swallowing disorders in a specific disordered adult population, i.e., LD, MR, post CVA, stuttering, voice, hearing impairment, etc. Students can expect to be on site for at least three days/week.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in (CSCD 9387 or CSCD 9487)

**CSCD 9582. Independent Study - Communication Sciences. 1 to 6 Credit Hour.**

Qualified students are permitted to conduct investigations and/or in-depth study under supervision of department faculty.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 9587. Advanced Practicum in Aphasia. 2 Credit Hours.**

This advanced-level practicum focuses on in-depth assessment and treatment of persons with aphasia and/or cognitive-linguistic deficits.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Co-requisites:** CSCD 5527.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C in CSCD 4396.

**CSCD 9980. Dissertation Seminar. 1 to 6 Credit Hour.**

Current topics in speech-language-hearing research are explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course guides study for exams preliminary to a dissertation. Prior to enrollment, students must have completed all required coursework for the Ph.D. and obtain the approval of the Ph.D. Program Director. Students must be enrolled to take the required preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 9996. Thesis Seminar. 1 to 6 Credit Hour.**

The preparation of a master's thesis is the goal of this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CSCD 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Development of a dissertation proposal is undertaken. Registration is required each semester after preliminary examination while a student is researching the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in CSCD 9994.

**CSCD 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is limited to Ph.D. candidates who have completed and defended a dissertation proposal that is filed with the Graduate School by the last day to add a course in the semester. Continuous registration in 9999 fall and spring is required until the dissertation is successfully defended.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in CSCD 9998.

## Community Arts (CART)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CART 8004. Creative Engagement. 3 Credit Hours.**

This graduate course focuses on engagement as a creative tool for artmaking, focusing on strategies of collaboration, ethics, project design and implementation, that can serve as a blueprint for one's own creative practice. Students develop skills of negotiation, project management and leadership, and identify strategies of engagement with diverse audiences, adapting these to their personal creative methodology. A topics course, students will develop proposals and projects that will serve as case studies in class, and presented to guest speakers. Invited speakers will include artists, community members, and non-arts professionals whose lives and practices straddle diverse walks of life.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CART 8011. Interdisciplinary Seminar in Community Arts. 3 Credit Hours.**

An introduction to the field of Community Arts, focusing on history and theory, and bringing students into contact with established community arts projects in Philadelphia through site visits and guest lectures. Issues of aesthetics, race and social class are an implicit part of community-based arts practices and are a focal point of the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CART 8087. Research and Project Planning Seminar in Community Arts. 3 Credit Hours.**

Working with faculty artists in a particular community, students engage in community data collection using methodologies of personal interviews, observation, and background cultural research with a focus on relationship building. Research findings are integrated to address emerging themes through conceptual design of an art project in a research paper outlining key community themes/issues and proposed art projects. Students will document community knowledge and oral histories and share stories with members of community. Stories will be incorporated into artworks that reflect community traditions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (ARTE 8011 or CART 8011)

**CART 8187. Field Work in Community Arts. 3 Credit Hours.**

Students work with artists in partnership with local community arts programs, organizations, and families, collaborating in the creation of a community arts production. In the weekly seminar, students reflect on their practice, receive supervision and conduct team research to develop their contributions to community arts projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (ARTE 8011 or CART 8011) and (ARTE 8087 or CART 8087)

**CART 8287. Evaluation and Documentation Seminar in Community Arts. 3 Credit Hours.**

In this course students will learn and apply methods for evaluation and ongoing work in the phase of Community Arts projects which follows public exhibition/performance, including assessment of artistic process, product, and community impact; approaches to continuing community involvement, and transitioning of project ownership to the community. The course offers students a variety of media for documenting and assisting community members to document Community Arts projects that may take the form of scholarly articles, video and audio documentary, community feedback and personal essays/journals that contribute knowledge to the field of Community Arts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (ARTE 8011 or CART 8011), (ARTE 8087 or CART 8087), and (ARTE 8187 or CART 8187)

## Community Health and Aging (PCHA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PCHA P261. Law and Podiatric Medicine. 1.8 Credit Hour.**

This course involves the study of basic legal concepts as they affect the podiatrist, including governmental and statutory control of the profession, contracts, torts, crimes, and the relationship of professional ethics and the law. Students will gain an understanding of the basic legal concepts as they affect the podiatrist and will demonstrate this objective through a written examination.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PCHA P360. Community Health. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PCHA P361. Law & Podiatric Medicine. 1.8 Credit Hour.**

This course involves the study of basic legal concepts as they affect the podiatrist, including governmental and statutory control of the profession, contracts, torts, crimes, and the relationship of professional ethics and law. Students will gain an understanding of the basic legal concepts as they affect the podiatrist and will demonstrate this objective through a written examination.

**Repeatability:** This course may not be repeated for additional credits.

**PCHA P362. Professional Administration and Development. 2 Credit Hours.**

Professional Administration and Development is the study of the art and science of the many facets of podiatric medical practice. The course addresses the practical application of previously learned didactic information so as to enable the student to make intelligent decisions as to practice type, location, finances, third party interrelationship, staffing and the myriad of factors involved in growing a medical practice. Topics will include motivational introspection, practical guidance, and current crucial issues affecting the business of medicine. Emphasis will also be placed on record keeping, governmental financial obligations, computerization, and other topics based on student needs.

**Class Restrictions:** Must be enrolled in one of the following Classes: Third Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PCHA P382. Law and Community Health. 1 Credit Hour.**

This course provides a comprehensive and in-depth review of issues pertaining to Public Health, Epidemiology, and Biostatistics. Topics of discussion will include but are not limited to the varying health care models utilized in the United States and abroad, quality assurance, risk management, various models of health care, basic statistics, research development, epidemics, pandemics and law in medicine. Note: Successful completion of the second year is required to take the course.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

## Computer and Information Science (CIS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CIS 5001. Comp-Based Appl Prog. 3 Credit Hours.**

The course emphasizes component-based application programming using the Microsoft Visual Studio Integrated Development Environment (IDE). Students will learn (and practice using) the VB .NET programming language, object-oriented software design techniques, and the principles of good user interface design. Topics include building quality software, including user interfaces to databases (using ADO.NET), sequential files, and graphics tools. Object-oriented concepts such as inheritance, polymorphism, static and dynamic binding, and interface (abstract class) components will be covered. The use of ASP.NET for client-server systems development is also elaborated. Note: Graduate credit will not apply for CIS MS/PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5002. Database Design & Programming. 3 Credit Hours.**

This course provides an in-depth understanding of the modeling, design and implementation of database systems. Students develop an appreciation of the role of data, files and databases in information systems, gain an understanding of database development activities as part of the System Development Life Cycle (SDLC), and become familiar with data modeling concepts. Students are expected to be able to create databases and pose complex SQL queries of relational databases using Oracle and Microsoft Access. Topics include the relational model, E-R and Class Diagrams, normalization, advanced SQL, Oracle Enterprise system transaction processing, concurrency control, and recovery. Also covered are aspects of database administration, data integrity, security and authorization, stored procedures and triggers, the embedding of SQL in procedural languages and scripting languages, multi-tiered architectures, middleware, ODBC web-based databases, and web application integration. Students work in teams to implement large scale information system using a DBMS. CASE tools are used for data modeling. Note: Graduate credit will not apply for CIS MS/PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5003. Networking & Operating Systems. 3 Credit Hours.**

This course covers the essentials of operating systems and computer networks. Topics include: the processor, data and program representation, computer memory systems, software system support for I/O including support for networking, and a thorough introduction to the TCP/IP protocol suite. Note: Graduate credit will not apply for CIS MS/PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5011. Programming and Data Structure. 3 Credit Hours.**

Preparatory course for CIS graduate students who have an insufficient background in data structures, and need a stronger foundation before taking the required core course, Programming Techniques 5511 (formerly 8511). Note: Graduate credit will not apply for CIS MS/PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5012. System Software and Operating Systems. 3 Credit Hours.**

Preparatory course for CIS graduate students who have an insufficient background in operating systems, and need a stronger foundation before taking the required core course, Operating Systems 5512. Note: Graduate credit will not apply for CIS MS/PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5013. Discrete Structure of Computer Science. 3 Credit Hours.**

Preparatory course for CIS graduate students who have an insufficient background in discrete structures, and need a stronger foundation before taking the required core course, Automata & Formal Languages 5513. Note: Graduate credit will not apply for CIS MS/PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5015. Scripting for Sciences and Business. 3 Credit Hours.**

Focus on three scripting languages and multiple operating environments for scientific computing and for business, practical scientific computing projects, and integration of numerical computation with experimental results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5016. Data Structures and Objects. 3 Credit Hours.**

Data structures are the fundamental building blocks for organizing data. This course teaches how to build data structures and what can be done with them, as well as fundamental object oriented concepts. Topics include object oriented programming, lists, stacks, queues, trees, heaps, hash tables, graphs, sorting, and recursion. Note: Students may not receive credit for both CIS 2168 and CIS 5016. Graduate credit will not apply for CS/CDS MS and CIS PHD programs without approval from CIS department.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5017. Operating Systems and Architecture. 3 Credit Hours.**

This course provides an introduction to computer architecture and operating systems concepts to students without a background in computer systems. The objectives are to introduce the basic concepts for understanding and evaluating operating systems and the most important computer architecture issues impacting operating system design, implementation and selection. Note: Students may not receive credit for both CIS 2229 and CIS 5017. Graduate credit will not apply for CS/CDS MS and CIS PHD programs without approval from CIS department.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5105. IT Process Management. 3 Credit Hours.**

An introduction to essential techniques for successfully creating, organizing and managing IT projects. The course provides the foundation for more advanced studies in process management and software engineering. Enterprise-wide requirements, long-range planning and managing all aspects of the development process will be emphasized. The course will stress the use of appropriate software tools and process modeling throughout the development lifecycle. Quality assurance techniques are introduced at the outset to guide IT processes and decision making. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5106. System Development Processes. 3 Credit Hours.**

Methods and tools for the technical development of IT systems are presented and used in case projects. The course follows the normal development lifecycle, starting with the recognition and justification of the need for either a new system or an upgrade to an existing system. It then proceeds through analysis, specification, design, implementation, testing (quality assurance), client training and turnover, and maintenance. The importance of each development stage will be taught within the framework of systems reliability, effectiveness, security, scalability, and development cost. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5107. Computer Systems Security and Privacy. 3 Credit Hours.**

Computer systems security and information privacy has become a critical area of computer science development and research. This course involves an analysis of the technical difficulties of producing secure computer information systems that provide guaranteed controlled sharing and privacy. Emphasis is on software modeling and design to better ensure the protection of resources (including data and programs) from accidental or malicious modification, destruction, or disclosure. Current systems and methods will be examined and critiqued. The possible certification of such systems will also be investigated. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5108. Emerging Technologies. 3 Credit Hours.**

The purpose of this course is to provide students with an understanding of maturing and emerging technologies and their likely impact on the networked information paradigm and enterprise management. Both hardware and software technologies will be covered. Students will be introduced to advanced software tools that demonstrate how agency enterprises make use of vast information flows and interconnectivity. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5208. Knowledge Management. 3 Credit Hours.**

Principles of knowledge management (KM) and their use in locating, evaluating, disseminating, and using information and knowledge. Application of these principles and techniques. Knowledge management incorporates data acquisition, information integrity, and management of knowledge and is crucial to everyone working in any field where information is stored, processed, and used. It places a premium on an IT-intensive organization to invest, cultivate, and fully utilize the intellect and knowledge of all staff. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5210. Seminar in Information Science and Technology. 3 Credit Hours.**

An intermediate level graduate special topics course in current and emerging developments in information systems and technology. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs. This course is repeatable for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 5221. Introduction to Mobile Application Development. 3 Credit Hours.**

This course will introduce students to concepts in application development for mobile devices. Students will learn how to address challenges in hardware and user interfaces by incorporating software design and user-interaction design principles. Additionally, students will learn about mobile-centric concerns such as software and data distribution models, leveraging third party software, and managing data locally and remotely. Students should have prior experience in building applications that involve Object Oriented Development principles, such as inheritance, interfaces, encapsulation, and polymorphism. Additionally it would be good to have had a major role in working on a non-trivial software development project, such as a transactional system with CRUD (create, read, update, delete) operations, or a systems level program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5274. Software Quality Assurance and Testing. 3 Credit Hours.**

Software quality assurance consists of a means of monitoring the software engineering processes and methods used to ensure quality. The overarching goal of this class is to develop practical skills to help achieve software quality. The main objectives of this class are to understand the quality assurance process and to learn how to use testing techniques to achieve software quality. Students will learn 1) fundamental concepts in software testing, including software testing objectives, process, criteria, strategies, and methods; 2) various software testing techniques, including automated testing techniques, to support various levels of software testing: unit, integration, regression, and systems testing; 3) techniques and skills on how to use modern software testing tools to support software testing projects; 4) how to plan a test project, design test cases and data, conduct testing operations, manage software problems and defects, and generate a testing report; and 5) basic techniques in usability, performance, and security testing. Note: Students may not receive credit for both CIS 3374 and CIS 5274. Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5275. Software Project Management. 3 Credit Hours.**

Project management knowledge and skills are critical to the success of every Information Technology (IT) project. This course will use IT project case studies to examine basic components of time, scope and resources within the project management processes defined by the Project Management Institute. At the completion of this course, students will be able to create project plans for software development projects as well as for IT infrastructure projects. They will know how to manage a team, how to write effective status reports, and make compelling presentations to management. This course exposes students to practical examples and tools that are used in typical IT projects in industry today. Note: Students may not receive credit for both CIS 3775 and CIS 5275. Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5301. Advanced Database Management Systems. 3 Credit Hours.**

This course provides an in-depth understanding of the modeling, design and implementation of database systems. Topics include the relational model, E-R Diagramming and Class Diagrams, normalization, advanced SQL, Oracle Enterprise system transaction processing, concurrency control, and recovery. Also covered are aspects of database administration, security and authorization, stored procedures and triggers, the embedding of SQL in procedural languages and scripting languages, multi-tiered architectures, middleware, ODBC web-based databases, and web application integration. Students work in teams to implement large scale information system using a DBMS. CASE tools are used for data modeling. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5303. Usability Engineering. 3 Credit Hours.**

This course focuses on the principles of usability engineering to design effective interfaces. In parallel with functional specification development, usability engineering identifies the usability specifications of the system, which includes information and interface design. In some modern day information systems, usability can be paramount and require as much or more effort and programming as functional requirements, i.e., information systems may provide relevant functionality, but if the system is not easy to learn and use, it may fail. Using theories and principles from software engineering and psychology, students learn to analyze usability requirements to improve user interface development. Note: Students may not receive credit for both CIS 3603 and CIS 5303. Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5304. Network Technologies. 3 Credit Hours.**

Focuses on the design, construction and use of modern networks and inter-networks, including Internet, intranet, firewalls, VPN, e-mail, and wireless technologies. Prepares students to successfully create and operate modern secure networks. Key concepts and technologies include LAN design and construction, Internet architecture, internetworking (with an emphasis on the Internet), WAN connectivity, firewalls, Application Layer protocols, virtual private networks, wireless and network operation in real-world environments. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5306. Software Engineering. 3 Credit Hours.**

A project-based course focusing on current methodologies employed in software design and development. The core material covers the key components of software engineering, including requirements analysis, specification development, detailed design, program development, quality control (verification and validation), configuration management, testing, and post-development maintenance. Emerging software development techniques - security engineering, service-oriented architecture (SOA), and aspect-oriented development are also introduced. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5405. Introduction to Digital Forensics. 3 Credit Hours.**

This course is a broad introduction to the field of Digital Forensics. It covers various fundamental topics necessary for digital forensics investigation. The course begins with foundations of electronic evidence including cyber-crime laws, the 4th amendment, compliance and requirements, collection and handling, analysis, and reporting. The course also covers fundamentals of file systems with specific details pertaining to Microsoft FAT file systems. Students will learn two important forensics techniques - file recovery and file carving - among other things. Finally, forensics artifacts relevant to Windows Systems and Networks are discussed with relevant lab activities and students are also introduced to Antiforensics. Hands-on lab activities familiarize students with several relevant investigation techniques and the use of open source forensics tools. Students who have completed an equivalent course at Temple or another institution will take an elective as recommended by the program advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CIS 5017.

**CIS 5410. Advanced Seminar in Information Science and Technology. 3 Credit Hours.**

An advanced level graduate special topics course in current and emerging developments in the field of information systems and technology. Note: Graduate credit will not apply for CS/CDS MS and CIS PHD programs. This course is repeatable for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 5413. Introduction to Privacy and Security for Internet-of-Things. 3 Credit Hours.**

The Internet-of-Things (IoT) is an emerging field that embeds computing and communication capabilities into everyday objects to make them "smarter." From smart cities to smart power grids, from autonomous vehicles to AI-powered decision systems, this new Internet-of Things (IoT) world brings with it many new security and privacy challenges. The objective of this course is to introduce students to the new cyber-security and privacy issues in these emerging systems, as well as the latest research on defending against these threats. Some of the topics that will be covered include security of wireless protocols such as Bluetooth, Zigbee, etc.; security and privacy issues in various application domains such as smart homes, public safety, healthcare, and wearable systems; and the security of backend cloud computing used in IoT systems. Graduate credit will not apply for CS/CDS MS and CIS PHD programs. Note: Students must meet the course prerequisites or have the consent of the PSM director to enroll in this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in CIS 5405.

**CIS 5415. Ethical Hacking and Intrusion Forensics. 3 Credit Hours.**

This class will introduce students to the field of hacking with the primary focus being the difference between White-hat Hacking (a.k.a Ethical Hacking) and Black-hat Hacking. The course will enable students to understand how to use hacking techniques to perform a hack within legal confines. The course will focus on both technical and social aspects of security, ranging from cryptography and biometrics to risk mitigation and disaster recovery aspects of organizational security. Of specific focus will be the following broad concepts - Reconnaissance, Scanning, enumeration, and Sniffing and Evasion. Based on the ethical concepts built during the first half of the semester, students will learn the process involved with forensics investigations of intrusion attack.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CIS 5017 and CIS 5107.

**CIS 5418. Blockchain Application Development. 3 Credit Hours.**

Blockchain technology is a fast-growing sector in the tech industry. There is a shortage of blockchain developers. Learning blockchain technology will expand students' choices in starting their IT career and increase their employability. This course covers both the technical knowledge and hands-on skill relevant to this technology but emphasizes more on hands-on skill. It includes technical fundamentals, such as cryptography, blockchain, distributed consensus, peer-to-peer network, smart contract, and decentralized application. Students are introduced to some advanced topics, such as scalability, security, privacy, and interoperability. Blockchain applications in different sectors are presented. In addition, the course covers hands-on coding using Solidity programming language and decentralized application development IDE tools. The course focuses on public blockchains and uses the two largest blockchains by market cap, Bitcoin and Ethereum, as examples of such blockchains.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (CIS 5015 or CIS 5016)

**CIS 5425. Audit and Compliance for Security and Digital Forensics. 3 Credit Hours.**

Information Systems' audit and assurance professionals are faced with different requirements and different types of audit and assurance. This course will provide students with a basic understanding of enterprise IT security and the need for audit and compliance. Students will learn about IT Security Terminology, Governance, and the Security audit practice that has matured into given sets of frameworks, methodologies, approaches, and models with certain sets of underlying assumptions such as COBIT, SOX, DoD, FIPS 100/200, FISMA, NIST, HSPD, OMB. Students will be exposed to various governance standards and federal compliance requirements - ISO27000, SAS, GAAP. Students will also learn some fundamentals such as differences between policy, process and procedure and the purpose of policy, process and procedure. Students who have completed an equivalent course at Temple or another institution will take an elective as recommended by the program advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5511. Programming Techniques. 3 Credit Hours.**

*Prerequisites: CIS 2168 and CIS 3223.*

A more formalized view of data structures. Stacks, trees, tables, lists, multilinked structures, strings and files are considered. These are viewed in terms of their general usefulness in the construction of algorithms and in their efficient implementation. Both theoretical results and programming techniques will be stressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5512. Operating Systems. 3 Credit Hours.**

*Prerequisites:* CIS 3207 and CIS 3223.

Basic principles of operating systems; multi-tasking systems; control and coordination of tasks; deadlocks; synchronization, mutual exclusion, sharing; memory management, virtual memories, segmentation, paging; protection; file systems; resource management; evaluation and prediction of performance; design and implementation of operating systems in high-level languages.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5513. Automata and Formal Languages. 3 Credit Hours.**

*Prerequisites:* CIS 2166 and CIS 3242.

Types of grammars. Finite automata and regular languages. Kleene's Theorem. Closure properties and decidable problems of regular languages. Derivation trees. Normal forms of context-free grammar. The self-embedding properties, closure properties and decidable problems of context-free languages. Methods of syntax analysis for context-free languages. Context-sensitive languages and linear bounded automata. Turing machines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5515. Design and Analysis of Algorithms. 3 Credit Hours.**

The course objective is to provide students with an understanding of the principles and techniques used in the design and analysis of efficient algorithms. The main topics cover Greedy Algorithms, Divide and Conquer, Dynamic Programming, Network Flow, and Approximation Algorithms. Theoretical results related to NP-completeness will also be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CIS 5511.

**CIS 5516. Principles of Data Management. 3 Credit Hours.**

*Prerequisites:* CIS 5511 (or 8511).

This course covers fundamental concepts in constructing database management systems, including relational query languages, such as SQL and relational algebra, file organizations, storage management, system architectures, query processing, query optimization, transaction management, recovery, and concurrency control. Additional topics may include distributed databases, NoSQL databases and data integration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5517. Data-Intensive and Cloud Computing. 3 Credit Hours.**

*Prerequisites:* CIS 2168 and (CIS 2166 or MATH 2101 or ENGR 2011 or MATH 3045).

This course will expose students to recently emerged and fast moving technology of big data and cloud computing. It will cover a spectrum of topics from core techniques in data management and analysis to highly-scalable data processing using parallel database systems. Students will be introduced to big data ecosystems such as Hadoop, Spark, Storm and MapReduce; cloud technologies such as Amazon EC2, Microsoft Azure and Google Cloud; data management tailored to cloud and big data such as No SQL, Google Big Table/Apache HBase, and introductory applications to Big Data and cloud environment. Students will work directly with a selected set of these platforms, compare and contrast their relative strengths and weaknesses, and characterize the problems they are designed to solve. Note: Students may not receive credit for both CIS 5517 and CIS 4517.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5523. Knowledge Discovery and Data Mining. 3 Credit Hours.**

*Prerequisites:* MATH 2043 and (CIS 2166 or MATH 2101 or ENGR 2011) and (MATH 3031 or ECE 3522 or STAT 2103 or BIOL 3312) and (CIS 1051 or CIS 1057 or CIS 1068).

Basic concepts and techniques for the automated extraction of interesting patterns in large databases. Topics covered include: association-rule mining, sequence mining, web and text mining, data warehousing, information filtering, classification and clustering analysis, Bayesian and neural networks, classification and regression trees, hypotheses evaluation, feature extraction, dimensionality reduction, singular value decomposition, data compression and reconstruction, visualization of large data sets, fractals in databases, and indexing methods that support efficient data mining and queries by content. Special emphasis is given in multimedia, business, scientific, and medical databases. Note: Students may not receive credit for both CIS 5523 and CIS 4523.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5524. Analysis and Modeling of Social and Information Networks. 3 Credit Hours.**

*Prerequisites:* MATH 2043 and (CIS 2166 or MATH 2101 or ENGR 2011) and (MATH 3031 or ECE 3522 or STAT 2103 or BIOL 3312) and (CIS 1051 or CIS 1057 or CIS 1068).

This course will include methods for analyzing and modeling the following aspects of social networks: the small-world network models, centralized and decentralized social network search algorithms, power-laws and preferential attachment, diffusion and information propagation in social networks, influence maximization in social networks, community detection in social networks, models of network cascades, models of evolving social networks, links and attributes prediction. Note: Students may not receive credit for both CIS 5524 and CIS 4524.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5525. Neural Computation. 3 Credit Hours.**

*Prerequisites:* STAT 8003/8103 and undergraduate-level understanding of probability, statistics, and linear algebra.

Neural networks provide powerful techniques to model and control nonlinear and complex systems. The course is designed to provide an introduction to this interdisciplinary topic. The course is structured such that students from computer science, engineering, physics, mathematics, statistics, cognitive sciences, and other disciplines learn the main principles of this area as well as have an opportunity to explore promising research topics through hands-on experience with neural network simulators applied to classification and prediction problems ranging from biomedical sciences to finance and business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5526. Machine Learning. 3 Credit Hours.**

*Prerequisites:* MATH 2043 and (CIS 2166 or MATH 2101 or ENGR 2011) and (MATH 3031 or ECE 3522 or STAT 2103 or BIOL 3312) and (CIS 1051 or CIS 1057 or CIS 1068).

The goal of the field of machine learning is to build computer systems that learn from experience and are able to adapt to their environments. This introductory machine learning course will present modern machine learning algorithms for supervised and unsupervised learning. It will provide the basic intuition behind the algorithms as well as a more formal understanding of how and why they work. Students will learn how to apply machine learning algorithms on a range of real-life problems and how to evaluate their performance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5527. Data Warehousing, Filtering and Mining. 3 Credit Hours.**

*Prerequisites:* CIS 5511 (or CIS 8511) and an undergraduate course in databases.

The course is devoted to information system environments enabling efficient indexing and advanced analyses of current and historical data for strategic use in decision making. Data management will be discussed in the content of data warehouses/data marts; Internet databases; Geographic Information Systems, mobile databases, temporal and sequence databases. Constructs aimed at an efficient online analytic processing (OLAP) and those developed for nontrivial exploratory analysis of current and historical data will be discussed in detail. The theory will be complemented by hands-on applied studies of problems in such fields as financial engineering, e-commerce, geosciences, and bioinformatics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5528. Predictive Modeling in Biomedicine. 3 Credit Hours.**

Biomedical data science has emerged as analytics frontiers in reaping the benefits of statistical and machine learning toward advanced modeling of massive biological and medical data. This course introduces classical and state-of-the-art methodology development in machine learning applied to bioinformatics and biomedical data science. Topics include classical and emerging algorithms in predictive modeling that are particularly useful in biomedical data analytics. By the end of the class, students will have gained the knowledge of diverse statistical and machine learning methods and evaluate relevant scientific publications, as well as the capability of developing open-source programs to analyze and interpret biological and biomedical data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5535. Probabilistic Graph Models. 3 Credit Hours.**

*Prerequisites: CIS 2033 and CIS 3223.*

Probabilistic graphical models are very important machine learning tools for knowledge representation and reasoning under uncertainty. They have been widely used in machine learning and related fields, such as computer vision, natural language processing, data mining, bioinformatics and even computer network research. This course aims to make a comprehensive introduction over the most important theories, algorithms, and applications of probabilistic graphical models, and facilitate the advanced research within the computer & information sciences department and related disciplines outside.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5538. Text Mining and Language Processing. 3 Credit Hours.**

*Prerequisites: CIS 2033.*

This course will cover a broad overview of problems and techniques in text mining and natural language processing. It will also provide in-depth coverage of the latest natural language processing research in selected topics. The in-depth part of the course will focus on the latest research in unsupervised information extraction. This part of the course will cover such techniques as pointwise mutual information, pattern-matching, bootstrapping, Hidden Markov Models, Conditional Random Fields, and language modeling techniques, among others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5543. Computer Vision. 3 Credit Hours.**

*Prerequisites: CIS 2033 and CIS 3219 and CIS 3223.*

The objective of the course is to introduce the theory and application of computer vision. The theoretic part introduces the analysis of visual patterns and the generative models behind them. The application part uses real world tasks to help students to learn practical computer vision technologies. The course covers the following topics: image formation (camera model, color space, illumination model, etc.), low level vision processing (edge detection, intensity based segmentation, etc.), popular research tools in computer vision, visual matching and registration, visual recognition, image and category classification, scene understanding, object detection, visual tracking, activity and action analysis, and selected advanced topics. In addition to course lectures, the course uses homework assignments, in-class discussions and course projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5590. Topics in Computer Science. 3 Credit Hours.**

*Prerequisites: Special authorization required.*

Current topics and issues in Computer Sciences are covered. This course is repeatable for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 5603. Artificial Intelligence. 3 Credit Hours.**

Artificial intelligence encompasses the algorithms and representations used to design computers and agents for problem-solving and learning. This course covers the classic and modern methods that support technology such as game-playing agents, autonomous vehicles, and virtual assistants. The topics covered include: search, reasoning, knowledge representation, and learning. The course is intended to prepare graduate students for further study in machine learning, data mining, robotics, and computer vision.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5617. Computer Networking and Communication. 3 Credit Hours.**

*Prerequisites:* CIS 5511 (or 8511) and CIS 5512 (or 8512).

Introduction to the design and analysis of computer networks and communications systems, including the Physical, Data Link, Network, Transport and Application layers. The Internet (TCP/IP) model will be emphasized and compared and contrasted with other current technologies. Major themes include the distinction between service and protocol, performance metrics, analysis techniques, and fundamental performance tradeoffs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5618. Energy Management in Data Centers and Beyond. 3 Credit Hours.**

Students are expected to have a background in data structures and algorithms as well as computer architecture and operating systems. Comprehensive coverage of energy management in data centers: essential concepts in data center architecture, including the computing core, data center network, and storage systems; energy management in computing elements, caches, "in-the-box" interconnects, primary memory, storage systems, and data center network; data center level issues including power, thermal, and cooling management at data center level and interaction of data centers with smart grid. Other issues covered include design of energy efficient software, virtualization and energy management of VMs, energy issues in cloud computing, and modeling of energy-performance interplay.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5635. Security in Cyber-Physical Systems. 3 Credit Hours.**

*Prerequisites:* CIS 3207 and CIS 3223.

Cyber-Physical Systems (CPS) augment physical systems with monitoring, communication and control capabilities to enhance their efficiency, flexibility, safety, and resilience. The course will start with an overview of these opportunities and challenges and then gradually explore a few physical systems including their monitoring, communications, control, safety, and security requirements, as well as potential attack vectors and solutions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5636. Ad Hoc Networks. 3 Credit Hours.**

*Prerequisites:* CIS 3223, and CIS 4319 or 4329.

A comprehensive approach to fundamentals of ad hoc networks including media access protocols, routing protocols, implementation and communication performance analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5637. Network & Information Security. 3 Credit Hours.**

*Prerequisites:* CIS 3329 or CIS 4319 or CIS 5003.

This course introduces fundamental knowledge of cryptography and its applications to network and information security.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5639. Wireless Network and Communication. 3 Credit Hours.**

*Prerequisites:* CIS 3207 and CIS 3223.

This course introduces the fundamental design and performance issues of wireless networks and communications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5642. Computer Architecture. 3 Credit Hours.***Prerequisites: CIS 2168 and CIS 3207.*

Since 1951, there have been thousands of new computers using a wide range of technologies and having widely varying capabilities. Dramatic changes that have occurred in just over 50 years. After adjusting for inflation, price/performance has improved by almost 100 billion in 55 years, or about 58% per year. Another way to say it is we've seen a factor of 10,000 improvement in cost and a factor of 10,000,000 improvement in performance. This course covers the recent developments in modern computer architectures and the emerging design methods for high performance computing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5643. Emerging Storage Systems and Technologies. 3 Credit Hours.***Prerequisite: CIS 3207.*

Storage systems are of increasing importance because of ever-growing volume, velocity, and heterogeneity of data produced by a wide variety of computer systems. This course will provide a comprehensive coverage of storage and file systems that underlie bigdata systems with respect to both technological and application related challenges.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5644. Distributed Systems. 3 Credit Hours.***Prerequisites: CIS 2166 and CIS 2168 and CIS 5512 (or 8512).*

We consider a distributed computer system that consists of multiple autonomous processors that do not share primary memory but cooperate by sending messages over a communication network. Discussion of special problems related to distributed control such as election and mutual exclusion, routing, data management Byzantine agreement, and deadlock handling.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 5701. Introduction to Teaching Computer Science Principles. 3 Credit Hours.**

This course provides students with a foundation in the concepts and computational thinking practices central to the discipline of computer science. The content in this course is organized around ideas that are foundational to the study of computer science: creativity, abstraction, data and information, algorithms, programming, and the global impact of computing. By the end of the course, students will be able to apply creative processes and computational thinking skills to develop a computer program in order to solve a problem. In addition, students will engage in pedagogical content related to equitable and inclusive teaching of computer science principles in secondary education. This course assumes no prior knowledge of computing. It is designed to support K12 teachers who are new to the computer science discipline and want to integrate computational thinking and computer science principles into their classroom teaching activities. This course cannot be taken for credit towards any other graduate programs offered by CIS.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in MATH 1021.

**CIS 5702. Teaching Advanced Computer Science Principles. 3 Credit Hours.**

Creating computer programs that solve problems is facilitated by the use of abstractions. Building on the computational thinking concepts and practices learned in the previous course, this course will extend students' knowledge of computational thinking, problem solving, and programming abstractions. Students will extend their knowledge and practice the use of simple algorithms as part of a computer program. In addition, students will extend their knowledge of basic types used to represent data in programming languages, including primitive data types, strings, classes, arrays, and streams. Students will also be introduced to more advanced programming language concepts (e.g., parameter passing techniques) and basic object-oriented programming abstractions (e.g., classes, objects, inheritance, and polymorphism). Searching and sorting algorithms will be covered, with a focus on exposing students to different algorithm design strategies (iterative vs. recursive). Finally, students will apply pedagogical principles related to equitable and inclusive teaching of computer science principles in secondary education to begin developing a portfolio of teaching materials that they can use in their own classrooms. This course cannot be taken for credit towards any other graduate programs offered by CIS.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CIS 5701.

**CIS 5703. Teaching Networked Computing Systems. 3 Credit Hours.**

This course provides an introduction to computer networks with a strong focus on the Internet. Topics introduced include the layered network architecture, types of connectivity, addressing, packet switching, routing, reliable data transmission, and network security. The course will include discussions regarding Internet security, privacy, modern networked applications, and social implications and ethics. It will also build on knowledge of algorithms and data structures, introducing queues, graphs, trees, and related algorithms used in the function of network protocols and the Internet. In addition, students will engage in pedagogical content related to equitable and inclusive teaching of networked computer systems concepts in secondary education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CIS 5702.

**CIS 5704. Teaching the Use of Data, Algorithms, and Creativity for Problem Solving. 3 Credit Hours.**

In this course, students will advance their understanding of computer science principles through the development of a creative computational artifact that can be demonstrated and used for teaching purposes in secondary education classrooms. Through this experience, students will develop knowledge about how to represent and store data as well as how to appropriately select and apply algorithms to solve problems. Students will also explore user interaction and user experience design choices and their impact on populations of users. An essential learning objective is to understand the impact of the choice of data type and algorithm on the quality attributes of programs. Searching and sorting algorithms will be covered, with a focus on exposing students to different algorithm design strategies (iterative vs. recursive). In addition, students will develop, compile, present, and evaluate portfolios of pedagogical content related to equitable and inclusive teaching of computer science in secondary education, with a focus on strategies to increase student engagement and broaden participation of underrepresented groups in computing. This course cannot be taken for credit towards any other graduate programs offered by CIS.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in CIS 5702.

**CIS 9182. Independent Study. 1 to 6 Credit Hour.**

Independent research supervised by a Computer and Information Sciences faculty member. NOTE: Only six credits of independent study can be counted towards any MS degree.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9190. Seminars in Computer and Information Science. 1 Credit Hour.**

Throughout the semester, various guest lecturers will discuss their area of research. Students are required to attend at least five lectures and submit five short papers on the topics presented. This course counts in the same category as independent study when it comes to program requirements (MS and/or PhD degree). This course is recommended for PhD students who have passed the qualifying exam, to broaden their research interests. This course is recommended for MS students who are interested in CIS research and want to take 10 credits per semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Science & Technology.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9282. Independent Study. 1 to 6 Credit Hour.**

Independent research supervised by a Computer and Information Sciences faculty member. NOTE: Only six credits of independent study can be counted towards any MS degree.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9590. Seminar in Advanced Topics in Computer Science. 3 Credit Hours.**

*Prerequisites: Permission of instructor.*

Topics to be decided individually.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9601. Computer Graphics and Image Processing. 3 Credit Hours.***Prerequisites: CIS 5511 or 8511.*

An analysis of techniques used in computer manipulation of two- and three-dimensional images. Although elements of computer graphics are covered (e.g., two- and three-dimensional transforms), the main focus is on image processing techniques. We will also gain insight into basic techniques in computer vision. Topics covered include image filters, image segmentation, similarity of images, object detection, object recognition, and shape representation and similarity. Nowadays it is an easy task to transfer visual input of a camera to a computer's memory. However, image and video understanding belong still to unsolved problems of computer science. The main objective of the course is to convey basic intuitions behind the unsolved and solved problems and to introduce some of the techniques that provided solutions to some of the problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9602. User Interface Design and Systems Integration. 3 Credit Hours.***Prerequisites: CIS 5511 or 8511.*

This course focuses on the principles of usability engineering to design effective interfaces and as the basis for integrating existing systems to form new systems. The course builds on knowledge of networking, databases, and programming. The course outline is partly based on the recommendations of the ACM Special Interest Group on Computer-Human Interaction for an introductory graduate course on user interface design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9618. Web Applications Development. 3 Credit Hours.***Prerequisites: CIS 5511 (or 8511) and CIS 5512 (or 8512).*

This course takes a technology-based approach to software engineering of networked application systems design and programming. It draws on new Microsoft .NET technology, together with former object-oriented design and programming, for its theoretical, architectural, and system design foundations. The course bridges software engineering principles in their most abstract and conceptual sense, with programming technique in its most concrete and pragmatic sense. It demonstrates how to optimize productivity of the software engineer, integrate the best that open technologies have to offer, and build large-scale systems that operate most efficiently on the internet. The course is divided into three parts: 1) theory that flows from .NET and object-oriented methodologies, including Application System Architectures, Design Methodologies, Quality Assurance, Scalability, and Security; 2) development of a working skill set in two .NET languages: ASP.NET and VB.NET and its major development tool, VS.NET; and 3) design and programming of a small but complete web-deployed application.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9651. Artificial Intelligence, Heuristic Models, and Education. 3 Credit Hours.***Prerequisites: CIS 5603 or 8603.*

Introduction to how artificial intelligence and heuristic models are used to build better computer-based educational systems. Current as well as past models are explored (e.g. PROUST, GUIDON, SOAR, etc.). Key issues to be examined include student models, interfaces, pedagogical expertise, domain expertise, and collaborative learning systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9665. Advanced Topics in Data Base Systems. 3 Credit Hours.***Prerequisites: CIS 5516 or 9616.*

Survey of recent developments in database systems with an emphasis on object-oriented databases (OODB's). Prototype and operational OODB systems will be analyzed. Applications of OODB's to computer-aided software engineering (CASE) environments, integrated application development environments, and geographical information systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9666. Advanced Networks and Client-Server Computing. 3 Credit Hours.**

*Prerequisites:* CIS 5617 or 9617.

Computer networks, network technology, protocols, routing algorithms, reliability and design issues. Data transmission and transmission media, data communications fundamentals, transmission efficiency, wide-area networks, local area networks, wireless networks, TCP/IP and other protocol architectures, client/server computing, network management, and network security.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9668. Design and Development of E-Commerce Systems. 3 Credit Hours.**

*Prerequisites:* CIS 9618.

This course teaches the technical aspects of developing a commercial website, including the business-to-consumer and business-to-business models. This process combines a number of integrated technologies: Web page and style sheet design; dynamic web pages that access data from relational and XML databases; server side transaction processing; client/server and distributed processing; principles of internet security, scalability, and database reliability; and .NET programming. Students develop a site as a course project using custom coding using .NET and Microsoft's web site development system Commerce Server 2000. Other tools to be used are Dreamweaver or FrontPage for web design, VS for .NET program development, and the Microsoft Enterprise Manager for the management of SQL Server databases.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9669. Distributed and Parallel Computer Systems. 3 Credit Hours.**

*Prerequisites:* CIS 5617 or 9617.

Intended for students interested in the advances of scalable parallel computing systems. The main goal is to apply distributed and parallel computing theories to practical scalable parallel application development and new parallel programming tool construction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CIS 9991. Master's Research Projects. 1 to 6 Credit Hour.**

Short-term, limited research project or laboratory project in the field. This course is not the capstone project course, nor can it be used for thesis based research. The course is for master's students only, including PSM, MA or MS. This class will not confer full-time program status unless nine credits are taken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is required for students who are preparing for the preliminary or candidacy examination. Students should enroll after coursework is completed or when preparing for the candidacy exam until the time that the preliminary or candidacy examination is completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. All students must complete a minimum of one credit of this course. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9995. Capstone Project. 1 to 6 Credit Hour.**

Capstone project for master's students including students in PSM, MA or MS. This class will provide full-time status. Students in PSM programs need to register for at least one credit of this course to fulfill program requirements. Additional credits may be required for specific programs. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9996. Master's Thesis Research. 1 to 6 Credit Hour.**

Course for master's thesis research. Only intended for students in thesis bearing master's programs. A minimum of one credit is required. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9998. Pre-Dissertation Research / Elevation to Candidacy. 1 to 6 Credit Hour.**

This course is intended for students who are performing research prior to candidacy. Students can register for this course after required courses are completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must be registered for this course during the semester that they are to be elevated to candidacy examination. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CIS 9999. Dissertation Research. 1 to 6 Credit Hour.**

The course is for Ph.D. students who have been elevated to candidacy. During the course of their candidacy students must complete a minimum of two credits of dissertation research. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## **Conflict and Communication (CNCM)**

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CNCM 5000. Conflict and Communication Colloquium. 1 Credit Hour.**

In a one-hour colloquium, on a weekly basis throughout the first year of the masters program, this course introduces students to the academic field of conflict and communication by exploring current problems and opportunities in this field of study through discussions and presentations of current research and through presentations by scholars and practitioners of conflict and communication research and practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**CNCM 5101. Conflict and Communication Theory. 3 Credit Hours.**

The course examines the role of communication theories in settings where there is an attempt to manage conflict among individuals or groups. The course is organized around the major theoretical perspectives that have been used to study conflict. These perspectives describe, explain and sometimes predict the route that conflict often takes. These perspectives are drawn from diverse academic disciplines, but each contributes in unique ways to our understanding of conflict processes and each sheds light on the way communication unfolds in difficult conflict situations. Students will enhance their understanding of the nature of theoretical perspectives in general, as well as study specific conflict theories that have been created with each perspective. This focus enables students to understand and draw from current and future theory and research on conflict. The goal is to develop astute practitioners who know the research and theory on conflict and can use it and apply it in professional and personal settings. A significant emphasis is placed in the course on communication processes in conflict. This emphasis on conflict interaction allows for many practical insights about how to understand and change conflict dynamics. Although this course is not a training course, it provides a foundation for those who want to teach conflict skills and conflict intervention methods to people in workplace, community and family settings. Knowledge of communication processes provides a solid foundation for such work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CNCM 5102. Media and Social Conflict. 3 Credit Hours.**

In today's media environment, social, political, and cultural conflicts play out in news, social media, and interpersonal media (i.e. text). This class explores the role media play in creating conflict, as well as facilitating inter- and intra-personal discussions regarding such conflicts. This will be explored at the family, group, community, and mass social levels. The positive and negative influences of media in creating, negotiating, and resolving conflict will be explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CNCM 5202. Methods for Conflict and Communication Research. 3 Credit Hours.**

This course is designed to prepare graduate students to engage in social science research in conflict and communication. Students will learn to design their own research studies as well as critique existing research based on credibility, validity, and reliability of design and methods. By the end of this course students will have designed and be prepared to execute an individual theory-driven research project, be able to evaluate conflict research, and be able to present a conference quality research paper. This course is designed to challenge students to not only be able to read and critique research but prepare them to conduct their own research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CNCM 5203. Data Analysis for Conflict and Communication Research. 3 Credit Hours.**

This course is designed to prepare graduate students to engage in social science research in conflict and communication. Students will learn to apply basic quantitative analysis skills to their own research studies as well as critique existing research based on credibility, validity, and reliability of analytic methods. By the end of this course students will be prepared to conduct basic statistical analysis of original and secondary data, use data tools such as Qualtrics and SPSS, and understand which statistical test is appropriate for different types of research questions. This course is designed not only to challenge students to be able to read and critique data analysis, but also to prepare them to conduct their own research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CNCM 5204. Advanced Data Analysis for Conflict and Communication Research. 3 Credit Hours.**

This course is designed to prepare graduate students to engage in social science research in conflict and communication. This course builds on the basic data analysis course (CNCM 5203) and helps develop advanced analytical techniques. Students will learn to apply advanced quantitative analysis skills to their own research studies as well as critique existing research based on credibility, validity, and reliability of analytic methods. By the end of this course students will be prepared to conduct advanced statistical analysis of original and secondary data, use data tools such as PROCESS, R, and SPSS, and understand which statistical test is appropriate for different types of research questions and hypotheses. This course is designed not only to challenge students to be able to read and critique data analysis, but also to prepare them to conduct their own research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in CNCM 5203.

**CNCM 5301. Cross-Cultural Negotiation. 3 Credit Hours.**

Research on the influence of culture on negotiation processes has grown extensively over the past twenty years across disciplines that include communication, management, political science, and psychology. Studies focus on negotiation in a wide variety of cross-cultural and intercultural contexts such as international diplomacy and multinational corporations. This course examines current theoretical issues related to the study of negotiation in intercultural contexts and explores insights gained from studying both culture and negotiation within these contexts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CNCM 9996. Conflict and Communication Thesis Research. 1 to 3 Credit Hour.**

This course is designed to aid students in their final thesis project. The course will provide a writers' workshop environment, including active peer and faculty feedback. Students will have opportunities to develop theoretical and written perspectives in a supportive group environment. Students will also have the opportunity to receive ample feedback and guidance on their final required thesis for the CNCM program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Counseling Psychology (CPSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CPSY 5492. Theories of Counseling Psychology. 3 Credit Hours.**

This course explores the function and essential elements of counseling theories and examines the student's philosophical beliefs as they apply to counseling.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5511. Counseling in the Schools. 3 Credit Hours.**

First course for those concentrating in school counseling. The nature, techniques, and problems of school counseling are explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5519. Group Counseling. 3 Credit Hours.**

An exploration of the functions of group counseling in meeting client/student needs. Emphasis on theory and principles of group process and on the development of group skills by participation in an experiential group counseling situation. Attention to the practice of effective group leadership skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5526. Multicultural Counseling. 3 Credit Hours.**

This course is designed to prepare culturally competent mental health counselors who demonstrate knowledge, self-awareness, and skills in working with individuals, groups, and communities who represent various cultural and personal backgrounds and characteristics. The class introduces major concepts, models, theories, and research from the multicultural counseling psychology literature. Through the provided material students will be exposed to both the art and science of multicultural counseling competence. This course represents the starting point to the ongoing process of multicultural counseling competence and students are expected to continue developing and learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5564. Addiction, Counseling, and Biological Bases of Behavior. 3 Credit Hours.**

Students will learn about the biological bases of behavior and their relations to human functioning, including the basic structure and function of the nervous system, normative neurological development and the biological functions implicated in common diagnoses, and the mechanisms by which common psychotropic medications affect the nervous system and behavior. Students will then explore the issues pertaining to the assessment, treatment, and prevention of addictions with the overall purpose of increasing our scientific and clinical expertise in working with individuals in counseling.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5565. Educational Specialists Coordinating Community Resources for Diverse Learners. 3 Credit Hours.**

The purpose of this course is to support the development of students' school counselor identities. This course is designed to build off of previous school counseling coursework and further expand the knowledge and skills needed to address contemporary professional issues in school counseling K-12.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5566. Professional Issues in Mental Health Counseling. 3 Credit Hours.**

This core course is designed to introduce graduate students to the field of counseling so that you will be prepared to meet the professional challenges in your practicum and internship placements. As such, this course is similar to a survey course, in that you will be exposed to the breadth of the field; yet it is more, in that we will be covering some topics in more depth. For example, you will be reviewing professional identity issues, PA licensure requirements, needs of special populations, and counseling in special settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5571. Introduction to Counseling Psychology. 3 Credit Hours.**

For students not majoring in counseling psychology. A lecture-laboratory course focusing on the nature, history, philosophy, techniques, and problems of counseling psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5572. Interviewing Techniques. 3 Credit Hours.**

For students not majoring in counseling psychology. The theory and techniques of interviewing especially as they apply to problems of educational, vocational, personal and social counseling, rehabilitation, and employment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5579. Introduction to Couples and Family Counseling. 3 Credit Hours.**

An introductory course on theoretical and therapeutic components of major schools of thought within marital and family therapy using videotapes, training films, guest lecturers, simulations, and observation of family sessions to explore specific therapeutic behaviors that differentiate schools of thought. Focusing on perceptual, conceptual, and clinical skills of family therapists provides a foundation for future training in this area.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5591. Legal and Ethical Issues in Counseling Psychology. 3 Credit Hours.**

To familiarize students and mental health professionals with the history and development of professional ethics and standards and their legal implications in the areas of counseling and psychotherapy. Topics include: privileged communication, confidentiality, rights of the client and agency, civil commitment, and licensure and mental health laws.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5593. Career Counseling and Development. 3 Credit Hours.**

Theories, strategies, and techniques of career counseling are described and illustrated. Research and theories in career development and decision-making are explored and related to lives of workers. Instruction is given in the work personality, history, and future of work, and needs of special populations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5668. Sem Counseling: Dev Psych. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5691. Diagnosis in Counseling Psychology. 3 Credit Hours.**

Course content focuses on historical perspectives related to psychopathology and diagnoses, diagnostic biases, and understanding the symptoms and treatment of major mental illnesses as they are expressed in a culturally diverse society. Pedagogical techniques include lectures, role-plays, and criterion-related exercises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5694. Introduction to Assessment. 3 Credit Hours.**

Training of students in interpretation and use of various methods of assessment and diagnosis in schools and agencies. Lectures and laboratory procedures are employed to integrate theory and practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5698. Fundamental Counseling Techniques. 3 Credit Hours.**

The purpose of this course is to develop the basic skills students will need in order to conduct successful client-counselor interactions. We accomplish this through the practice and development of counseling microskills in an experiential format. Students will have an opportunity to begin to develop mastery of these skills through in class role-playing, mock interviews, and videotaped counseling session role-plays.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 5699. Crisis Prevention, Intervention, and Consultation. 3 Credit Hours.**

The purpose of this course is to provide students with both an understanding of the theoretical concepts of counseling as well as practice in further developing your clinical skills. Using the foundation of Fundamental Counseling Techniques, more advanced areas (such as crisis counseling) will be explored in preparation for practicum and internship placement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8701. Seminar in Counseling Supervision and Consultation. 3 to 12 Credit Hours.**

Focuses on the significance, structure, and techniques of supervision and consultation in the work of counselors. First-hand experience offered through supervising counselors-in-training. For advanced students in counseling.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8764. Seminar in Counseling and Psycho-pathology. 3 Credit Hours.**

The objectives of this course are for doctoral students to develop an understanding of the etiologies, diagnoses, and treatment approaches of the major psychopathological disorders within a multi-cultural context, become versed in the application and use of the DSM, apply the scientist/practitioner approach to diagnosis and treatment issues, and develop process skills which will enable students to adapt to future changes in the area of psychopathology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8789. Seminar in Race, Culture, and Gender in Psychotherapy. 3 Credit Hours.**

The course focuses on the issues raised by diversity in the practice of psychotherapy. Students examine the literature and research related to this issue as well as their own perspectives and feelings. The attitudes, history, and culture of different groups in our society are reviewed. The objective is to assist students in integrating their knowledge of different groups and psychology with their self-awareness so they understand the demands of the transcultural therapist in a society with complex diversity.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8790. Seminar in Counseling. 3 to 12 Credit Hours.**

Taught on a rotating basis by the graduate faculty in counseling. Current trends, research, issues, and professional problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CPSY 8791. Seminar in Learning Theory and Behavior Therapy. 3 Credit Hours.**

The history, philosophy, and theoretical perspectives of learning theory and behavior therapy are examined. Learning theory as the foundation for behavior therapy is explored. Techniques of therapy such as cognitive therapy, relaxation training, systematic desensitization, contingency management, and flooding are reviewed. Additionally, concepts related to behavioral humanism are introduced, particularly as they relate to marriage and family therapy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8792. Seminar in Theories and Systems of Psychology and Counseling. 3 Credit Hours.**

The course reviews and evaluates the theories and systems of psychology and counseling. Students explore how these theories and systems form the foundation for the current practices of behavior change and psychotherapy. Evaluative research related to the practices of psychotherapy and behavior change are examined. Students are expected to clarify their beliefs and theories about the therapeutic change process.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8793. Seminar in Assessment. 3 Credit Hours.**

Emphasis on the knowledge, skills and methods in comprehensive psychological assessment in counseling psychology. Practice in diagnostic interviewing, comprehensive assessment, integration of data, and reporting results. Instruction in assessing different individual dimensions, disorders and populations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8794. Seminar in Group Counseling and Group Therapy. 3 Credit Hours.**

A didactic-experiential course focusing on selected theories of group counseling and psychotherapy, leadership training, research, and critical issues of the therapeutic management and/or facilitation of a counseling or therapy group.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8795. Seminar in Family Psychology. 3 Credit Hours.**

Taught from a scientist-practitioner perspective, the course covers the development of family psychology, and as a part of this movement, the conceptual and clinical foundations of family therapy, including integrative approaches.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8796. Seminar in Neuropsychology. 3 Credit Hours.**

The course focuses on the theories and research related to neuropsychology. The physiology of the brain and its interconnection with the psychology of the brain are explored. Further, the parameters and methods of neuropsychological assessment and remediation are reviewed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8797. Seminar in Legal and Ethical Issues in Counseling and Psychotherapy. 3 Credit Hours.**

To familiarize students and mental health professionals with the history and development of professional ethics and standards and their legal implications in the areas of counseling and psychotherapy. Topics may include: privileged communication, confidentiality, rights of the client and agency, civil commitment, and licensure and mental health laws.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 8799. Community Counseling Clinic. 3 to 12 Credit Hours.**

Clinical training with clients presenting vocational, educational, and personal problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CPSY 9085. Advanced Counseling Techniques. 3 Credit Hours.**

Provides counseling training experience that improves counseling skills and processes, while developing documentation and report writing skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CPSY 9185. Master's Internship in Counseling Psychology. 3 Credit Hours.**

First-hand experience in doing the work of the counselor through placement in one or more appropriate settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CPSY 9285. Master's Internship in Counseling Psychology. 3 Credit Hours.**

First-hand experience in doing the work of the counselor through placement in one or more appropriate settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CPSY 9385. Internship in Counseling Psychology. 1 to 6 Credit Hour.**

This course is a one-year full-time experience working on the staff of an approved agency where counseling psychologists typically are employed. Placements are tailored to satisfy the professional training needs and interest of students. Emphasis is on advanced skill development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CPSY 9387. Practicum in Counseling Psychology I & II. 3 to 12 Credit Hours.**

This is a two-sequence course that provides students with exposure to the professional environments that they plan to be employed in the future (i.e., agencies or schools). Students will be involved in a variety of supervised activities at their program-approved sites (i.e., individual, couples, group, family counseling; various administrative and professional development activities).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CPSY 9982. Independent Study in Counseling. 1 to 12 Credit Hour.**

Intended to meet the needs of students who desire to carry on an individual investigation. For advanced students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CPSY 9999. Doctoral Dissertation in Counseling Psychology. 1 to 6 Credit Hour.**

Registration limited to candidates for the Ph.D. program who have successfully completed the preliminary examination and the minimum hours of course work required for the degree. Continuous registration during the fall and spring semesters is required until the dissertation has been completed and accepted by the Graduate Board.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Criminal Justice (CJ)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**CJ 5001. Evidence-Based Policing. 3 Credit Hours.**

The aim of this course is to introduce police professionals to the growing body of research and knowledge about their job, and develop a desire to merge evidence-based practice into their professional life. Evidence-based practice is about making decisions through the conscientious, explicit and judicious use of the best available evidence from multiple sources by asking an answerable question, acquiring evidence, critically appraising the trustworthiness and relevance of the evidence, aggregating the evidence together, applying the evidence into the decision-making process, and assessing the outcome. The course is also designed to help practitioners understand what is necessary to develop their own evidence about work practices. On successful completion of the course, students will be able to contrast the evidence-based approach to opinion, expertise and experience; summarize influential studies in policing; and systematically gather, collate, assess and weigh evidence on a topic from various sources.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 5012. Crime Science Tools and Techniques. 3 Credit Hours.**

The aim of this course is to provide a structure and framework for the development of skills in crime science, and the evaluation of crime prevention strategies. Course components will include structuring projects for evaluation, the appreciation of crime prevention mechanisms, data preparation, process and outcome evaluation, time series analysis, and the use of spatio-temporal techniques such as the weighted displacement quotient. On successful completion, students will be able to set up crime prevention projects, monitor ongoing implementation, and assess any crime reduction outcomes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 5021. Ethical Governance. 3 Credit Hours.**

Ethical governance refers to organizational practices designed to achieve value-driven policing across the ranks. It strives to align everyday policing operations (both internally and externally) with enduring democratic values, including policing by consent, access to justice, equality, equity and respect for human rights. In a democratic society, such values must be sustained both within police organizations as well as externally, through relationships with citizens. Police leaders, policy-makers and scholars are looking afresh at mechanisms for enhancing ethical governance, particularly in light of recent threats to police legitimacy. In order to balance evidence-based policing with core organizational values, police leaders must cultivate and develop officers that perform with the highest levels of community commitment, integrity, and innovation. This course canvasses important concepts, debates, visions and practices in ethical governance, providing students with the tools to critically examine challenges and opportunities in their own organizational environments. The aim of this course is to identify and critically examine the ethical dimensions of leadership in a democratic society, and to explore ways of aligning police operations and administration with enduring organizational values.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 5022. Developmental Leadership. 3 Credit Hours.**

This course will help graduate policing students develop an appreciation for formal and informal leadership roles and how best to influence differing groups of followers. In light of increasing public and media scrutiny of police interactions with minority group members, understanding leadership in tense or in extremis situations is invaluable. Understanding detractors from effective leadership such as bias and the potential for dehumanization are important to understanding the common reactions when in the role of police officer. Students will consider the need for flexibility across the various environments and activities encountered by police.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 5023. Seminar in Executive Management. 3 Credit Hours.**

The aim of this executive seminar program is to ask students to reflect on their core values, and those of their agency and to think more critically about how these interact with the competing core values of other branches of city government, other police departments and aspects of the judicial system, and stakeholders from outside of government, such as private industry, the media, community and protest groups. In a seminar setting alongside the course instructor as moderator and an invited guest, each week provides an opportunity to meet leaders from outside of policing, identify areas of common ground, and cultivate a deeper, more critical understanding of the student's role leading one of the major arms of government. Students will emerge with a clearer sense of their role in directing and forming the vision, culture and ethos of their organization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8101. Decision Making in Criminal Justice. 3 Credit Hours.**

Core Course. Conceptualizes criminal justice as a series of interrelated decision stages. Examines organizational, legal and research issues related to each decision stage.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8102. Research Methods in Criminal Justice. 3 Credit Hours.**

Core course. Assumes prior familiarity with basic methodology and statistics. Prepares students to conduct criminal justice research and evaluation. Covers topics of causality, reliability, validity, and quasi-experimental methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8104. Law and Social Order. 3 Credit Hours.**

Core Course. Examines moral, practical, legal, and constitutional limitations of law as a means of securing social order. Classes and readings are designed to promote critical analysis of primary (constitutions, statutes, cases) and secondary (legal, philosophical, social science literature) sources of law, with special focus on the role of the Supreme Court in balancing state vs. individual interests and on rules and standards by which the Court's discretion and decision-making can be assessed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8105. Statistical Issues and Analysis of Criminal Justice Data. 3 Credit Hours.**

Core Course. Introduces criminal justice graduate students to simple and multiple regression analyses in criminal justice research. Extended treatment of the detection of non-normal data through the use of graphical and statistical techniques, and the statistical implications of highly non-normal data that are encountered in many areas of criminal justice. Clarifies relations between statistical assumptions, results, and use of results for decision making purposes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8106. Theories of Crime and Deviance. 3 Credit Hours.**

Core Course. The goal of the course is to provide an appraisal of the foundations for understanding criminal behavior. Students read major current and classic works couched at different levels of analyses about the origins of criminal behavior including not only violent and property crime but also delinquency, white collar crime and regulatory violations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8202. Corrections. 3 Credit Hours.**

Analyzes the theory, practices and policies of the American correctional system, covering the nature and administration of both institutional and community sanctions and agencies. Students explore competing penal theories and review evidence on the effectiveness of correctional practices. The course investigates the historical development and evolution of imprisonment, trends in the use of confinement, and the effects of incarceration on offenders, families and communities. Students analyze the characteristics of correctional populations and debate the causes and implications of race, class and gender differences. The course identifies significant current issues and reviews the ethical, legal and practical dimensions of proposals for reform. Note: Prior to fall 2016, the course title was "Correctional Philosophy and Administration."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8203. Issues in Law Enforcement. 3 Credit Hours.**

This course focuses on conceptual models of policing and how they affect operational priorities and resource decisions in law enforcement. Topics include community policing, problem-oriented policing and intelligence-led policing, among others. This is a wide-ranging course that explores policing from an international perspective and through the lens of the varying contentious issues of the day.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8204. Policy and Practice in Juvenile Justice. 3 Credit Hours.**

This course is designed to increase the student's understanding of the purposes, structure and processes of this distinctly American invention, the juvenile justice system. Together, we explore its recent development and current policy initiatives that are reshaping its role in our society. We also look at the target of this system: delinquent kids. We examine the juvenile justice system in terms of its underlying aims, its historical foundations, and its sociopolitical contexts, explanations of delinquency, theories of child development, case law, legislation, changes now occurring with respect to its goals, and recent initiatives to increase dependency on scientific evidence of effectiveness. In doing so, we seek to understand the system's limitations, contradictions and strengths. At the same time, we examine the role that research plays in shaping the policies and programs that constitute this system.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8205. Aggression and Violence. 3 Credit Hours.**

Students will learn about different types of violence in the United States, including homicide, assault, robbery, family violence, youth violence, drug related violence, and gun-related violence. A three-part, interdisciplinary perspective guides this inquiry: (1) examination of patterns and trends, (2) examination of correlates and causes, including biological, psychological and sociological theories, and (3) investigation of different policy responses to violence. At the conclusion of the course, students should be able to do two things: (1) critically discuss major explanations that have been offered for different kinds of violent behavior, and (2) critically evaluate policies for preventing and controlling specific types of violence.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8222. Simulation Modeling. 3 Credit Hours.**

Social organization involves complicated systems, such as organizations, institutions and families - and their component parts. The components of systems frequently interact in a complex fashion. Simulation models offer a useful approach to understanding this complexity. Simulation models allow for the creation of theoretically informed representations of complex dynamic systems. These representations can be used to conduct virtual experiments with the goal of strengthening theories and developing better designs for empirical research. The course covers different types of simulation modeling, but focuses on applications of Agent-Based Modeling. Students will gain experience developing conceptual models and programming simple simulation models.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8223. Risk, Prediction and Classification. 3 Credit Hours.**

This course focuses on issues surrounding prediction and classification in criminal justice. We examine different perspectives on risk and danger, risk assessment models, the possibilities of accurate predictions, and the implications (practical, social, ethical) of prediction and classification in criminal justice. These include career criminal models and their repercussions in criminal justice policy, the role of risk assessment instruments in community corrections, inmate classification and release, and others. In addition to these practical applications, we will consider the implications of the increasing salience of the notion of "risk" in public and policy discourse.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8224. Drugs, Crime and Justice. 3 Credit Hours.**

This advanced graduate course considers the problems of drug abuse, crime and the justice system's response to drug-related crime. A multidisciplinary perspective is used to analytically and critically explore these issues from social, legal, political, public health, enforcement, and criminological perspectives. Specific topics covered include theoretical explanations for drug abuse, drug legalization and decriminalization, drugs and violence, treatment alternatives to incarceration, public health effects, and mandatory sentencing laws for drug offenders. Readings, papers, and in-class discussions and formal debates are used to further students' understanding of the connections between drug abuse and crime, effective criminal justice responses to drug-related crime, and drug policies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8225. Rehabilitation, Reentry and Recidivism. 3 Credit Hours.**

Numerous prison- and community-based approaches have been developed in recent years to help ex-offenders successfully reintegrate into the community. Promising in-prison approaches include comprehensive risk/needs assessment, drug treatment, cognitive behavioral treatment, vocational and basic education, prison industries, and prerelease planning. Community-based approaches include a wide range of options that provide reintegration assistance and linkages to community social services. In this class, we examine theoretical models of rehabilitation (e.g., principles of effective correctional intervention) and recidivism (e.g., life course and reintegration perspectives), including related research, and we investigate current re-entry initiatives at the national, state, and local levels.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8226. Transnational and Global Crime. 3 Credit Hours.**

Global criminology is an emerging field covering international and transnational crimes that have not traditionally been the focus of mainstream criminology or criminal justice. This course will examine the diverse dimensions of global and transnational crime. Students will examine and discuss historical and contemporary patterns, modus operandi, capabilities, and vulnerabilities of global and transnational criminals and organizations. Course content includes an introduction to global and transnational crime, a discussion of the "problem" of global and transnational crime, a review of illicit activities of criminal organizations, an examination of the link between transnational crime and harms, and a review of contemporary approaches to combating global and transnational crime. The seminar will include a review of organized crime, corporate crime, cybercrime, and terrorism and war in Europe, Russia, the Middle East, Asia, Africa and The Americas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8227. Contemporary Issues in Youth Crime: Gangs. 3 Credit Hours.**

This course explores the modern urban street gang by investigating the extensive history of theory and research on street gangs. The first half of the course will attempt to answer such questions as: Why do youth and young adults join gangs? Why do they leave? Are street gangs similar to other deviant groups, delinquent networks and/or pro-social groups such as fraternities? The second half of the course will focus on the community response to gangs with a heavy emphasis on comparing and contrasting a variety of "evidence-based" models of gang prevention and intervention. By the end of the semester students will have an in-depth understanding of why the problems of gangs and gang violence remain so intractable today, and will be able to identify a number of areas where theory, research and practice have failed to connect.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8228. Race, Crime, and Justice. 3 Credit Hours.**

The strong connection between race and crime in the United States occupies the discourse of media, policy-makers, and scholars, alike. This course considers the examination of race as a central concern for scholars of criminal justice especially in an era of mass incarceration. Specifically, we engage in the following questions: How large are racial and ethnic differences in criminal involvement? How do we theoretically construct and measure race and how do these measurements impact how we understand racial categories and crime? What are the implications of these "facts" on the popular understanding of the race-crime connection? What role do criminal justice apparatuses (police, courts, jails, for instance) play in reproducing and amplifying ideas about race and crime? Using various interdisciplinary theoretical approaches, we examine the complex ways in which race-crime-criminal justice is both a product of societal forces and an "engine" reproducing racial arrangements and power relationships in society.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8232. Crime Mapping. 3 Credit Hours.**

Spatial distribution of crime and criminals is examined in relation to the geographic processes that influence this distribution. This course involves half seminar and half lab work. Seminars include the structure of geographic information and spatial analysis techniques, alongside spatial theories of crime and how these theories can explain crime patterns. Lab work instructs students in the use of GIS to map and analyze crime events, from the national level down to the city level. The GIS and crime mapping component assumes no prior knowledge of GIS, uses the latest ArcGIS software, and concentrates on crime in the City of Philadelphia. Note: Prior to fall 2016, the course title was "Geographical Perspectives of Crime."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8233. Communities and Crime. 3 Credit Hours.**

This course addresses the connections between features of community, and crime, fear and disorder, at various levels of analysis ranging from the community to the street block. It covers varying theoretical perspectives on these connections, with the aim of educating students in the relative strengths and weakness of these various perspectives. Students learn to apply these various perspectives and tools to case studies and actual locations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8234. Criminal Victimization and Criminal Justice. 3 Credit Hours.**

This course explores the problem of victimization [general vs. criminal], the types of victims [direct vs. indirect; individual vs. collective, etc.], and the harms involved [financial vs. physical vs. mental]. It also examines the fairness and efficacy of a wide variety of preventive, remedial, extra-legal and legal [civil, criminal] responses by society and by the criminal justice system. Emphasis is upon data sets and research studies shedding light upon the levels, correlates, dynamics, and consequences of major forms of victimization, as a basis for critical analysis of victimization theory and existing and potential laws, policies, programs, practices, and technologies for reducing its incidence and impact.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8236. Organized Crime. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8237. Program Planning and Evaluation in Criminal Justice. 3 Credit Hours.**

Program evaluation is the systematic acquisition and assessment of information to provide useful feedback about a program. In other words, program evaluation facilitates improvements in program performance and outcomes. Evaluation also enables policy makers and funding agencies make decisions about continued support of a program or program replication. Students in this course will develop the capacity to develop and produce useful feedback. They will gain a thorough knowledge of the methods of program evaluation, from the point of framing the goals of the evaluation to communicating findings. Topics will include: assessing the evaluability of the program, logic models and theories of change, formative and summative evaluations, experimental and quasi-experimental designs, data sources and data collection, analyzing and interpreting data, reporting findings, the utilization of results, and synthesizing findings across evaluation studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8302. Advanced Methods and Issues in Criminal Justice Research. 3 Credit Hours.**

Course involves students in hands-on activities allowing them to learn how to conduct and evaluate different types of research approaches commonly used in criminal justice. Course assumes a solid grounding in graduate-level research methods, and strong multivariate quantitative skills. These "learning by doing" activities, ideally organized around a single topic and conducted for a specific client, are complemented by high level discussions of and readings about key ongoing philosophical, pragmatic, and policy related research issues, and how those issues apply to and play out in the fields of criminal justice and criminology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8305. Advanced Statistical Issues in Criminal Justice Data. 3 Credit Hours.**

Focuses on multivariate statistical techniques particularly important in criminal justice research questions. Course may cover multilevel modeling, or other techniques important to the discipline such as time series, clustering, and automatic interaction detection.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**CJ 8310. Special Topics Seminar. 3 Credit Hours.**

Special topics in criminal justice research are examined. Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 8320. Seminar in Criminal Justice Policy. 3 Credit Hours.**

Special topics in current criminal justice policy are explored. Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 8330. Seminar - Advanced Research Topics. 3 Credit Hours.**

Advanced topics in criminal justice and criminological research are explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 9082. Independent Study. 1 to 3 Credit Hour.**

Permits individualized study of a specific topic in consultation with a faculty member. Not intended as a substitute for any required course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 9083. Directed Readings. 1 to 9 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 9991. Directed Research. 1 to 9 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 9996. Thesis Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Registration required each semester after Preliminary Examinations while researching the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**CJ 9999. Doctoral Dissertation Research. 1 to 6 Credit Hour.**

Restricted to students who have passed the Preliminary exams and filed an approved proposal with the Graduate School.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Dance (DANC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**DANC 8801. Dance Techniques. 1 Credit Hour.**

This course provides insight to the choreographic process of a master choreographer through learning and performing a major work.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8803. Rhythm: Analysis, Performance and Composition. 3 Credit Hours.**

This course offers students the opportunity to engage in a comprehensive study of rhythm as a dance-related discipline at the graduate level. It focuses on the basic elements of rhythm and movement, and how these develop the student's understanding of motion as a sequence of effort and rest. Capacities for analysis and performance of rhythm within dance and musical contexts will be cultivated.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8804. Dance and the Child. 3 Credit Hours.**

This course addresses theories of child development and learning as they relate to the teaching of dance in K-12 education. Content is organized around a series of questions that a dance teacher might have regarding how their students are experiencing dance in a school setting. Topics include developmental milestones and their impact on dance curriculum, integration of dance into the broader school curriculum, and cultural issues in dance education. Students gain hands-on experience in a peer teaching setting and begin to build concrete resources for teaching dance in K-12 settings. This course satisfies the elementary education coursework requirement for the K-12 Dance Teacher Certification through the Bureau of Career and Technical Education.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8805. The Dancer and the Dance Medium. 1 Credit Hour.**

A core course required of all entering graduate students. Participants engage in independent and collaborative inquiry to elucidate individual values and understandings of dance in a social learning context. Class projects include development and performance of personal dance histories and peer presentations based on areas of student expertise or interest. Emphasis is on clarification of personal voice as an important source of goal setting in graduate dance education.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8806. The Creative Process and the Dance Symbol. 3 Credit Hours.**

This core course deals with sources and processes for creative transformation. The class examines the individual as an artist and explores various influences, congruencies, symbols and meanings affecting the art form today. It is a studio course with assignments ranging from reading and writing to choreographing and performing.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8808. Corporeal Improvisation. 1 to 2 Credit Hour.**

This course lays the groundwork for dance improvisation as technique, as inquiry, and as performance. Exercises to develop and deepen an experiential understanding of anatomy and physical laws serve to expand physical range and imagination. Practice of improvisational directives and personal experimentation of movement concepts and the elements of dance increase awareness of individual stylistic and movement preferences and strengths, as well as areas of weakness.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8809. Graduate Repertory. 2 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8812. Performance Environments I: Dance Production. 2 Credit Hours.**

Students master basic technical theater skills, and encounter design theory and practice, with emphasis on preparing them to serve as stage managers, and expose them to the vocabulary and objectives in costume, lighting, set design, theater make-up, the use of projections, and specifications for creating theater in non-theatrical spaces.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8815. Performance Environments II: Producing Dance. 2 Credit Hours.**

A professional and practical course emphasizing the development of tools and skills necessary for realizing individual goals, vehicles, and processes for change in the various fields of dance and related arts within our society.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8821. Modern Dance Technique I B. 1 to 2 Credit Hour.**

This course addresses the development of basic movement skills and concepts as a means toward effective performance.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8822. Modern Dance Technique II A. 1 to 2 Credit Hour.**

This course addresses the development of basic movement skills and concepts as a means toward effective performance.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in DANC 8821.

**DANC 8823. Modern Dance Technique II B. 1 to 2 Credit Hour.**

This course addresses the extension of range, control, and clarity of performance for more complex dance sequences.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in DANC 8821.

**DANC 8824. Modern Dance Technique III A. 1 to 2 Credit Hour.**

This course addresses the extension of range, control, and clarity of performance for more complex dance sequences.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in DANC 8823.

**DANC 8825. Modern Dance Technique III B. 1 to 2 Credit Hour.**

This course addresses increased technical accuracy, sensitivity, and versatility of performance. The dance material offered covers a wide range of spatial, dynamic, and rhythmic qualities.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in DANC 8824.

**DANC 8826. Modern Dance Technique IV A. 1 to 2 Credit Hour.**

This course addresses increased technical accuracy, sensitivity, and versatility of performance. The dance material offered covers a wide range of spatial, dynamic, and rhythmic qualities.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C- in DANC 8825.

**DANC 8827. Modern Dance Technique IV B. 1 to 2 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8828. African I. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8829. African II. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8831. Intro Laban Movement Analysis. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8832. Ballet Technique II. 1 Credit Hour.**

This course provides further skills in basic classical ballet vocabulary and preparation for professional study at the intermediate level.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8833. Ballet Technique III. 1 Credit Hour.**

This course addresses advanced vocabulary and skills for increasing demands of more complex combinations and sequences.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in DANC 8832.

**DANC 8834. Ballet Technique IV. 1 Credit Hour.**

This course provides movement experience to develop confidence and skill for an authoritative and expressive performance. The full range of classical ballet vocabulary is used.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in DANC 8834.

**DANC 8835. Dance on Video. 3 Credit Hours.**

A hands-on course exploring the practical and aesthetic considerations in recording dance. Video equipment and recording techniques will be introduced, with a survey of selected dance video works.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8836. Pointe I. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8837. Pilates: Body Condition. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8838. Pilates II: Applications. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8839. Movement Theater Workshop. 3 Credit Hours.**

This course is designed to provide intensive experience exploring the whole body as a medium for theatrical expression, and developing group collaborative processes.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8841. Apprenticeship in Dance. 1 to 6 Credit Hour.**

Designed to allow the student to practice, challenge, and expand artistic skills in a professional environment, and under the guidance of a mentor. Credit will not be awarded retroactively.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8842. Graduate Jazz Dance Level II. 1 Credit Hour.**

This course provides a more sophisticated approach to jazz dance vocabularies and sensitivities used in contemporary dance and theater.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8843. Graduate Jazz Dance Level III. 1 Credit Hour.**

This course provides a complete integration of the approach to jazz dance vocabularies and sensitivities used in contemporary dance and theater.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in DANC 8843.

**DANC 8845. Sound and Movement Partnerships. 3 Credit Hours.**

With its basis in 20th-century or modern performing arts, this course offers both a practical and a philosophical perspective on essential topics of sound and movement partnership in an effort to train the eye and ear to perceive dynamic relationships between sound and movement. Critical to this class are the investigation of performance and composition skills and the critical discussion of choreographic issues. This class in music and dance composition challenges student choreographers to discover inventive sound and movement partnerships for the creation of new work.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8847. Choreographing Philadelphia. 3 Credit Hours.**

This intensive course addresses the city of Philadelphia - its history, geography, architecture, infrastructure, people, and dancing communities - as subject and site for the creation of choreography. Working solo and in teams students explore a variety of approaches to creating work in and about the city.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8848. Modal Practice, Structure and Performance. 3 Credit Hours.**

This intensive studio course explores the practice and application of uni-focal creative research methodologies for training the body, movement invention aligned to conceptual intent, and creating choreography that elicits meaningful and personally invested performance.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8849. Studio Research. 1 Credit Hour.**

This course takes place every semester and it operates as an opportunity for students to engage in independent studio practice (both through dance technique and composition) within a mentored framework. This course is conceived as a 'practice laboratory' in which students will be required to maintain and reflect upon their embodied learning and to pursue new lines of choreographic enquiry.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8851. Choreographic Projects. 1 to 6 Credit Hour.**

Graduate students develop original work with the guidance of dance faculty. The course culminates in the performance of the new work developed in the class in a final showing with modest technical elements.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 8852. Non-Western Dance Traditions. 3 Credit Hours.**

This course is an overview of dance traditions outside North America with the exception of selected Native American traditions. The course includes movements from Asian, African, South American, and Pacific Rim traditions. The goal is to increase the student's knowledge of dance traditions; further their understanding of spatial, religious, and social restrictions on the dances; and inform their choreographic processes by exposure to different ways of constructing movements. This is primarily a studio course with assignments geared to choreographic inquiries that extend the student's aesthetic parameters in terms of movement vocabulary and structure.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8853. Lighting Design for Dance. 2 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8859. Dancing the City. 3 Credit Hours.**

In Dancing the City students explore the research methods of two powerful modes of inquiry - oral history and dance ethnography - in order to study the dance companies, communities of practice, and artists who interact in the unique spaces and dynamic social patterns of the city. Students theorize and think critically about the concepts of "space" and "the city," as they conduct individual research studies on dance in its various socio-cultural manifestations in the city. NOTE: Prior to fall 2015, the course title was "Writing the City."

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8861. Dancing Self in Community. 3 Credit Hours.**

This course provides a site for autobiographical and community practice research. It enables a diverse entering body of graduate students to retrieve, situate, and articulate their personal histories in dance, including clarification of aesthetic values, both tacit and theorized, and to contribute their individual voices to a community performance project.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8862. Embodied Craft. 3 Credit Hours.**

This is a studio course that also uses readings, group discussion, contemplative practices and writing to inform students' choices about all the elements necessary to craft dance including movement invention, spatial considerations, sound, music, silence, choreographic devices, performance arenas and dancers.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8865. Dance Science & Somatics. 3 Credit Hours.**

Somatic exploration and conceptual comparison of three systems of movement awareness and transformation/rehabilitation: ideokinetic facilitation (Sweigard), body mobilization in space (Bartenieff), and traditional sports/dance medicine. Six themes are interwoven through the course: physiological bases of dance training; conditioning to address individual needs in dance training; the causes, pathology, care, rehabilitation, and prevention of dance injuries; dancers and wellness; application of motor learning and control to dance pedagogy; and mental imagery to enhance performance.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8866. The Body Politic. 3 Credit Hours.**

The course will conduct a multi-site exploration of "the body politic" as an everyday expression, as the creative formation of modern experience and personhood, as stimulation, as geography, as historical memory and as transcultural signification. This course will focus on introducing students to selected core theories of dance culture and cultural studies as it relates to the body politic.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8867. Educational Inquiry in Dance. 3 Credit Hours.**

Students in the MA, MFA and PhD Dance programs design, implement, and evaluate an exploratory/pilot study in a selected area of dance education. The study may involve action research/fieldwork, curriculum design, advocacy, educational internship, or other form of inquiry relevant to education in and through dance.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8868. Graduate Seminar. 2 Credit Hours.**

This course provides an overview of methods and materials for producing choreographic work and securing teaching employment in an evolving field. Emphasis will be placed on developing materials that reflect each student's personal mission statement and career objectives.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8869. Dance Teaching Seminar. 2 Credit Hours.**

This course assists graduate students in developing a sound basis for their continued growth and effectiveness as dance educators. Grounded in theories of holistic education, critical pedagogy, and reflective practice, the course integrates studio experiences, observation, theoretical inquiry, and teaching practice to examine key values adhering to the noble profession of "dance teacher."

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8871. Apprenticeship in Teaching Dance. 1 to 3 Credit Hour.**

This course provides a supervised internship in teaching dance supported by video assessment, one-to-one mentoring, and peer discussion groups.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8872. Educating Dance. 3 Credit Hours.**

This course addresses philosophical, historical, and contemporary perspectives in dance education. Topics include: history of education and arts/dance education, philosophical foundations of dance as a mode of learning, critical and feminist pedagogies in dance, social issues in dance teaching and learning (gender, sexuality, race, ethnicity, culture, ability, age), and recent developments in cognitive neuroscience (embodied cognition) and technology.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8873. Concepts of Culture. 3 Credit Hours.**

"Concepts of Culture" is a graduate course that seeks to show how dance practice is shaped through cultural production and how the moving body has the capacity to maintain, negotiate or re-imagine the social context in which it exists. It explores the meanings and values of "culture" and conceives culture as a site of contested power relations through which dominant structures are both maintained and challenged.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8874. Foundations of Cultural Studies. 3 Credit Hours.**

This course examines performance structures, social paradigms, and dominant themes. The course is taught from a comprehensive, comparative perspective of intersecting identities, including race, gender, class, and sexuality by examining and discussing major theorists in the field and analyzing performances based on those theorists. This course also traces the intellectual heritage of cultural studies vis-a-vis scholars, artists, educators, activists, workers, and community members. The lectures, readings, video viewings, discussions, and movement experiences attempt to examine the diversity and similarities in cultures.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8875. Arts Advocacy. 3 Credit Hours.**

This course provides information, models and practical design experience in advocacy for dance in various settings. Emphasis is on pertinent literature, current trends, and practice guided by student professional goals.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8876. Dance as a Mode of Learning. 3 Credit Hours.**

This course integrates philosophical/historical perspectives of dance as a mode of learning with critical analysis of existing curriculum frameworks and a curriculum design project.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8877. Dance Administration. 2 Credit Hours.**

This course studies and analyzes historical, philosophical, and practical aspects of arts and dance administration. Emphasis is on practical skills, including curricular, administrative, and fiscal design and structures.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8878. Graduate Dance Composition. 2 Credit Hours.**

A course designed to confront the elements of dance composition through improvisation, short movement studies, and dances that are presented, discussed, and reworked in class. A final composition demonstrates skills, sensitivities, and understandings acquired.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 8879. Prof Portfolio Evaluation. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9800. Special Topics in Dance. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9801. Research Methods in Dance. 3 Credit Hours.**

The course provides a foundational introduction to theories, methodologies, questions, and themes in contemporary dance research and fosters the capacity for students to develop a critical and analytical voice, as well as independent research skills. Students will immerse themselves in key texts (verbal, audio-visual, and kinesthetic) that illuminate epistemological foundations, historical trends, current practice, and future directions of dance as a mode of human inquiry.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9804. Neoclassicism and the Baroque Revival in Twentieth-Century Dance and Culture. 3 Credit Hours.**

This seminar explores tensions in the field of neoclassical ballet and the baroque dance and music revival - both significant aspects of modernism and postmodernism - in the critical context of tradition vs. classicism, and the early twentieth-century phenomenon of the rediscovery of seventeenth-century French culture. We examine the imbrication of these questions with the rise of fascism in the early twentieth century and the return of the baroque since the 1950s and 1960s, which reached an apogee in the 1980s in both Western Europe and the United States.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9806. Somatic Theater. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9831. Moving Across Genres. 3 Credit Hours.**

This is a three (3) credit course in which we examine performance genres, social parameters, and discourse language. In this course we will investigate problematizing language in dance genres. Ballet as a lingua-franca, the specific language of selected Indian dances, hip-hop language and divisions such as old school, new school, traditional and neo-traditional, classical and neo contemporary and modern and contemporary dance will be discussed in relation to their relevance and viability to dance studies.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9841. Experience, Engagement and Multi-Sensory Inquiry. 3 Credit Hours.**

This course focuses on theories and methods that view human experience and embodiment as the ground of knowledge and meaning making. The course is informed by diverse sources including life experience, dance, phenomenology, existentialism, humanistic sociology, psychoanalytic theory, cognitive neuroscience, and aesthetics, particularly the emerging field of bio-aesthetics.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9851. Black Performance. 3 Credit Hours.**

Using a chronological and geographical approach, this course traces performance trends in dance, music, and theater from West Africa to the Caribbean to the U.S. Examples of commonality and continuity are explored in selections from Yoruba, Akan, Vodun, and African genres.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9852. Dancing the Popular. 3 Credit Hours.**

Dancing the Popular is a doctoral course that seeks to examine "popular dance" within its multiple contexts of production, circulation, consumption and participation. It takes as its starting point the notion of "the popular" as a contested and value-laden category and explores how historically-located definitions conceive "popular culture" in a variety of ways.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9861. Dance and the Gendered Body: Historical Perspectives. 3 Credit Hours.**

Students learn ways of analyzing representations of women, men, people of color, sexualities, and class distinctions in dance performance situated in different historical periods, cultural contexts, and performance venues. Students learn how to write historical narratives by locating primary sources and discovering the different voices/perspectives involved in a particular dance production, genre, ritual, performance, and practice. The course culminates in an ensemble performance based on individual research projects and reflexive understanding of how the researcher's identity intersects with the research. The emphasis is on research as performance and performance as research.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9862. Bodies, Texts, History. 3 Credit Hours.**

Using an approach that intertwines a historical mode of inquiry of dance productions/ performances/practices with gender theory/queer theory, this course explores historically and culturally specific topics in dance. In other words, the approach to dance history will be topical rather than chronological, and guided by the diversity of student research agendas.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9875. Meaning in Dance. 3 Credit Hours.**

This course focuses on methodologies for dance research that start with human experience (phenomenology, autobiography, autoethnography, and humanistic sociology) as the generative ground of meaning making. Students engage with multiple perspectives and layered practices to illuminate "lived experience" in dance. In a guided seminar setting, each student completes an annotated bibliography, a critical review of the literature, and/or a research study related to a topic of individual interest. Students present their work, at various phases of development, to their peers for critical review.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9883. Dir Study in Dance Research. 1 to 4 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9889. Dance Field Experience. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9951. Aesthetic and Philosophical Inquiry. 3 Credit Hours.**

Designed to introduce, analyze, and teach students to employ aesthetic and philosophic methods of inquiry to dance. Selected written and performance texts demonstrate various pathways research might travel to unveil the philosophic bases of dance.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9956. Research Structure: Dance Ethnography. 3 Credit Hours.**

This course covers a range of methods, techniques, and ethical concerns in dance research, including ethnographic methods and techniques of oral interview. In a guided seminar setting, each student develops an original research plan of design and presents it to her/his peers for critical evaluation.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may not be repeated for additional credits.

**DANC 9984. Master's Concert in Dance. 1 to 6 Credit Hour.**

Limited to those who plan to earn the master's degree by completing a major choreographic work. Normally not taken before the fifth or sixth semester of study and after the completion of a minimum 42 credits, including all required coursework in choreographic skills and resources and stage managing, as well as comprehensive exam requirements.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9991. Directed Research-Dance. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9994. Preliminary Examination Preparation. 1 to 3 Credit Hour.**

The student demonstrates the ability to complete independent academic projects by preparing a course proposal and an article judged to be of sufficient quality to be published in a professional journal.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9995. Master's Project in Dance. 1 to 6 Credit Hour.**

Limited to those who plan to earn the master's degree by completing a project. The final project option for Ed.M. candidates who register for 3 s.h. Also available to M.F.A. candidates for a 6 s.h. final project if decided in advisement with major curriculum advisor.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9996. Master's Thesis in Dance. 1 to 6 Credit Hour.**

Limited to those who plan to complete the master's degree by writing a thesis. Note: This option is available only to those who have successfully completed DANCE 9951: Aesthetic and Philosophical Inquiry. Registration is done in advisement with major advisor.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9998. Pre-Dissertation Research. 1 to 3 Credit Hour.**

The student prepares a proposal for dissertation research with guidance from the major advisor. The proposal is formally presented before the Sponsoring Committee and, if approved, passes on to the Graduate School, where it must be approved before the student can be advanced to candidacy. Student must have passed preliminary examinations to enroll.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Repeatability:** This course may be repeated for additional credit.

**DANC 9999. Doctoral Dissertation. 1 to 9 Credit Hour.**

The dissertation is advised by the major advisor and the two additional faculty members of the Sponsoring Committee. At the time of defense, one or two faculty members are added, comprising and examining committee of at least four members.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Dance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Dental Public Health Sciences (DPHS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**DPHS 5089. Planning and Evaluation of Field Experience in Dental Public Health. 5 to 8 Credit Hours.**

The overall goal of this course is to provide students with practical experience in the planning, development and/or conduct of an oral health program/project/study. This course will require a statement of objectives and planned procedures prior to the field placement in a selected affiliation site. This will be prepared by the student, working in concert with the advisor and field supervisor. The student will also be required to present a formal evaluation report of the field experience to his or her advisor after its completion. The field supervisor will be asked to complete an evaluation form on the resident's performance. This evaluation will then become part of the resident's file, and a permanent record that the field experience was completed satisfactorily.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may be repeated for additional credit.

**DPHS 8001. Foundations of Dental Public Health. 3 Credit Hours.**

This course is the dental public health student's introduction to the discipline. It presents a social and historical context for dental public health, and provides a basis for the more detailed examination of other aspects of the discipline which are covered in other courses. Students will learn about the public agencies and professional organizations involved in dental public health activities, and will have the opportunity to compare and contrast the structure of public health dentistry in the U.S. with that in other countries. Recent activities, projects, and publications in dental public health will be discussed. Practitioners in dental public health need to be able to locate information efficiently, to appraise its value, and to use that information in writing and speaking. They need to be confident in their ability to write clearly and to speak assertively in public. This course aims to provide students with the necessary skills and knowledge needed to locate information, judge its quality, and present critical summaries using written and oral communication. The course also allows students to develop confidence in their writing and public speaking.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DPHS 8002. Administration in Dental Public Health. 2 Credit Hours.**

This course is designed to address the following topics: Models of public organization, administrative decision-making, patterns of administrative communications, role and function of administrative leadership, nature and function of public personnel and fiscal management systems, planning, operating, and evaluating dental public health programs, quality assurance, budgeting, legislative issues and environmental hazards in the dental office.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DPHS 8003. Epidemiology and Prevention of Oral Diseases. 3 Credit Hours.**

This is a comprehensive course in the philosophy, principles, and methods of study in the epidemiology and prevention of oral diseases and their interrelationships between oral and systemic health. Topics related to the epidemiology of oral diseases include measurement techniques, casualty, risk factor identification, study designs, sampling concepts, and the distribution of oral diseases and conditions in populations. The scientific basis for procedures and programs to prevent oral diseases is also examined, with emphasis on public health applications. Topics related to the prevention of oral diseases include water fluoridation, other fluoride programs, pit-and-fissure sealants, diet, nutrition, oral hygiene, chemotherapeutics, and screening programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DPHS 8004. The Role of Behavioral Science in Dental Public Health. 1 Credit Hour.**

This is a seminar course on the principles and methods of study in behavioral sciences and the application to dental public health. Topics will include behavioral science research methods, basic principles of human behavior, behavioral science strategies and interventions aimed at promoting oral health. Motivational interviewing as an intervention to promote oral health will be reviewed. The topics will be presented with an emphasis on public health applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DPHS 8005. Provision and Financing of Dental Public Health. 2 Credit Hours.**

This course will cover topics such as: Overview of fee-for-service private practice and salaried practice, detailed examination of traditional insurance in general health and dental plans, managed care in general and dental plans, HMOs, Medicaid, evolution of current plans and some projections into the future developments, types of dental personnel and social, economic, and political factors determining their supply and deployment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**DPHS 8007. Analysis of Oral Dental Health Data. 1 Credit Hour.**

The overall goal of this course is to provide students with a practical knowledge and understanding of the design and conduct of oral epidemiological research projects, data analysis, interpretation, and reporting of the results. The students will apply the knowledge learned from foundation courses to define research questions and hypotheses, select study design, develop or select measurement tools, collect and manage data, conduct statistical analysis, and report the findings. The course will focus on analysis of oral health related measurements and the statistical analysis of dental data which are usually clustered because of the presence of multiple sites within a mouth. Analysis of complex health data (e.g., multiple and correlated data such as dental caries) and data from complex sample design will also be discussed. Ethical conduct of research will be reviewed and discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may be repeated for a total of 2 credit.

**DPHS 8009. Applied Statistical Analysis of Oral Health Data. 1 Credit Hour.**

The overall goal of this course is to provide students with practical knowledge and understanding of dental caries data and opportunities to conduct oral epidemiological research projects using dental caries data. Students will learn about various caries measurement systems and foundational analytic skills to examine properties of data elements and develop summary measures. In particular, the course will cover essential statistical theories and analytic approaches for correlated count data (e.g., dental caries counts clustered within a mouth). Analysis of complex sample data will be also discussed in order to make inferences about a target population.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may be repeated for additional credit.

**DPHS 9991. Research in Dental Public Health. 1 to 9 Credit Hour.**

The overall goal of this course is provide students with the knowledge and understanding related to the principles and methods used in epidemiologic study of dental diseases. Philosophy of the science, study designs, strengths and limitations of different designs. IRB protocol development, consent, design, methods, conduct and analysis of a research project will be developed within this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Dentistry, Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Dermatology (DERM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**DERM M300. Dermatology Elective. 0 Credit Hours.**

This course will enable students to develop a basic understanding of the fund of knowledge and types of medical problems seen in this specialty; to develop a basic understanding of the medical decision making process involved in the practice; and to develop an understanding of and practice of medical interpersonal communication and professionalism.

**Repeatability:** This course may be repeated for additional credit.

**DERM M355. Career Exploration of Dermatology. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**DERM M455. Dermatology. 0 Credit Hours.**

**Course Attributes:** M2

**DERM M456. Surgical Dermatology, Mohs Micrographic Surgery. 0 Credit Hours.**

The FCCC dermatology rotation is a surgical dermatology elective with a focus on Mohs micrographic surgery (MMS) for cutaneous malignancies. After this course, students will be able to understand the indications for MMS and other dermatologic procedures such as standard excisions, nail biopsies, intralesional triamcinolone and other intralesional treatments. They will develop an understanding of how the procedures are performed. Additionally, they will develop an understanding of the post-operative course for these procedures, and how to manage any complications that may arise.

**Repeatability:** This course may be repeated for additional credit.

## Disability Studies (DSST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**DSST 5401. Disability Rights and Culture. 1 to 3 Credit Hour.**

This course provides a socio-historical survey of the political, economic, social and cultural relations between disabled and non-disabled society in America. Topics such as the social construction of disability and the changing experiences of persons with disabilities are discussed in the context of other civil rights movements and the broader evolution of social policy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**DSST 5402. Action Modes of Research. 3 Credit Hours.**

This course explores the foundations of collaborative and action research. There will be a strong focus on the sets of beliefs that lead to and underlay action research, and how these beliefs are different from traditional paradigms. Students will also work on the practical means by which those affected by research are included in its design. Readings and discussion will focus particularly on disabilities, but will also include considerations of gender, race, class and sexual orientation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DSST 5403. Disability and Social Policy. 1 to 3 Credit Hour.**

This course examines public policy in the U.S.; particularly the influence of recent Congressional actions and judicial decisions in the areas of education, health care, human development, rehabilitation and employment of individuals with disabilities. Will examine the origins, goals and target populations for these policies and the extent to which policies are consistent with each other, and will assess the effectiveness of policies and the impact they have on people's real lives, including people with disabilities, family members and professionals. Note: Cross-listed as SOC ADMIN 0654.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**DSST 5404. Health and Wellness for Persons with Disabilities. 3 Credit Hours.**

This course is designed to introduce students to the meaning of health and wellness for individuals with disabilities. A biopsychosocial model will be used to examine the various dimensions of health. Students will examine the role(s) that theoretical understandings of health behaviors, societal values and systems, and demographic factors have in facilitating or inhibiting wellness. The course will also explore the supports people with disabilities may require in order to achieve and maintain health and wellness. Note: Cross-listed as THER REC 0521.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**DSST 5405. Disability Studies in the Humanities. 1 to 3 Credit Hour.**

Interest in Disability Studies is exploding in the humanities disciplines. The focus and content of this course will depend upon the interests of faculty and graduate students. Possibilities include: Health and Disability in American History; Disability and Performance Studies; Disability in American Literature; Imaging Bodies World Film' Cross-Cultural Disability Studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DSST 5501. Introduction to Disability Studies. 1 to 3 Credit Hour.**

Only available to students who are research assistants and externs of the Institute on Disabilities. Special authorization required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DSST 9489. Field Work in Disability Studies. 1 to 3 Credit Hour.**

This course provides experiential learning in the experiences of persons with disabilities. Students are assigned to work with and be mentored by persons with disabilities and their families. Sites will be selected in collaboration with each student's development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Distributive Education (DSED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**DSED 5422. Methods of Teach Mkt Edu. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**DSED 5522. Trends in Distribution. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Early Childhood Education (ECED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ECED 5106. Early Literacy and Language Development: Birth-Kindergarten. 3 Credit Hours.**

The aim of this course is to provide students with foundational knowledge about the development of early language and literacy skills, their role in later reading and academic success, and the instructional practices that best support them. Students will develop essential practices for building early language and literacy competence in diverse classroom settings. This course includes 20 hours of stages 1, 2, and 3 field experience competencies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECED 5107. Mathematics Education for the Early Years: PreK-4. 3 Credit Hours.**

The aim of this course is to provide preservice teachers (PTs) with essential mathematical knowledge for teaching early mathematics based on an integration of research and practice. In particular, PTs will obtain deep content understanding of the key mathematical topics, relevant knowledge of children's mathematical thinking, and pedagogical design ability such as task analysis and lesson planning. In addition, PTs will develop critical thinking skills that allow them to critically analyze the existing learning environment (e.g., textbooks and instruction) and essential practices for building early mathematics competence in diverse classroom settings. This course includes 20 hours of stages 1, 2, and 3 field experience competencies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECED 5108. Social Studies Education for the Early Years: PreK-4. 3 Credit Hours.**

The focus of this course is the development of social skills in young children and how they lay a critical foundation for citizenship in an evolving democracy. The course will include theories of social education and the developmental learning processes of civics, economics, history, and geography in young children in K-4 educational settings. Diversity and culture are central aspects of the course as they relate to ways that children, families, schools, communities and teachers view and interact in shared communities of learning. This course includes 20 hours of stages 1, 2, and 3 field experiences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECED 5109. Science Education for the Early Years: PreK to 4. 3 Credit Hours.**

This course will draw on science practices, instructional technology (e.g., video vignettes of classroom activities and science websites), and collaborative lab-based activities to explore current issues of teaching and learning science in the pre-K and early elementary school classroom. This course includes 20 hours of stages 1, 2, and 3 field experience competencies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECED 5206. Literacy Foundations for the Primary Grades: First through Fourth. 3 Credit Hours.**

The main focus of this course is to develop knowledge of the theories, methods, and materials that can be used to teach reading and writing concepts and skills in the elementary classroom (from late kindergarten through fourth grade). There will be an emphasis on conceptual knowledge as well as specific procedural knowledge needed to implement effective, research-based practices. Furthermore, policy issues affecting literacy instruction and practices will also be addressed. This course includes 20 hours of stages 1, 2, and 3 field experience competencies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECED 5370. Sem Early Child Lit Edu. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECED 5502. Cognitive Development. 3 Credit Hours.**

Understanding how people learn is a critical part of understanding how best to teach. This course will address theories of cognition and learning and provide practice in weaving key ideas into the design, implementation, and assessment of classroom instruction. This class is not a methods class; rather, it provides the conceptual basis of teaching approaches that explains why some approaches work better than others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Earth and Environmental Science (EES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**EES 5011. Remote Sensing and GIS. 4 Credit Hours.**

The focus of this class is on remote sensing technologies and geographic information systems. Remote sensing is a dynamic field; new, high-resolution satellites are coming on line almost daily, and there has been an exponential growth in applications of remote sensing data during the past decade, including: mineral exploration, precision agriculture, watershed management, land use classification, military intelligence, and climate monitoring. By the end of the semester you will have a fundamental understanding of the uses and limitations of remote sensing data for environmental applications, and a thorough familiarity with geographic information systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**EES 5015. Drone Shortcourse. 1 Credit Hour.**

Drones are everywhere. This course offers a short introduction to use of drones, otherwise known as unmanned aerial vehicles (UAVs). Students will be taught use of drones in research and other societal applications, basics of flight and operation of drones, and regulations applicable to drone usage. This course does not provide certification to become a drone pilot, but the steps to certification will be reviewed. Flying experience will be provided through labs conducted at the Ambler campus. Students will complete a project involving video or photography using a drone. This course is typically offered in Spring Semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5042. Coastal Processes. 4 Credit Hours.**

The course will apply a process geomorphological approach to understanding coastal behavior, including global distribution of coasts, wave and tidal hydrodynamics, nearshore and aeolian sediment transport, and morphological signatures of extreme events.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**EES 5101. Structural Geology (Graduate). 4 Credit Hours.**

The purpose of this course is to train students in the concepts and techniques of structural geology. Students will learn how to collect, analyze, and interpret geologic data drawn from a variety of disciplines pertinent to structural geology and present a cohesive analysis and interpretation of these results. Results are presented as maps, reports, and computer models. A hypothesis driven term project will be conducted by the graduate student on a topic in structural geology. NOTE: This course differs from the undergraduate version EES 4101 through graduate specific laboratory and exam questions, readings, and the term project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5401. Analytical Methods in Mineralogy. 4 Credit Hours.**

An introduction to the theory and application of X-ray diffraction and spectroscopic techniques for analysis of mineralogical samples. Students will learn the theory underpinning these methods, acquire skills in instrument operation, and apply these skills to research-relevant problems such as phase identification, site occupancy, chemical analysis, and planetary surface studies. Techniques discussed include powder X-ray diffraction, visible, Raman, and infrared spectroscopy, and synchrotron-based X-ray spectroscopic and scattering techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5402. X-ray Crystallography. 4 Credit Hours.**

Generation and use of x-rays for diffraction analysis; Analysis of clays and related minerals by x-ray diffraction; Crystal structure patterns and biogeochemical groups.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5406. Nanoscience and the Environment. 4 Credit Hours.**

Nanotechnology has developed rapidly in the past decade, yet our knowledge of its environmental impact, particularly regarding the fate and behavior of nanomaterials in the environment, lags far behind. This course will cover a range of topics concerning nanomaterials in the environment, ranging from the unique size-dependent properties of nanomaterials to their applications in environmental remediation. The lab component of this course will include nanomaterial synthesis and characterization; nanomaterial transport, aggregation, deposition, transformation, and persistence in natural settings; environmental applications of nanomaterials; and nanomaterial characterization techniques, particularly electron microscopy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**EES 5434. Ecohydrology. 3 Credit Hours.**

Hydrological and ecological processes are tightly interrelated, with vegetation affecting the hydrological cycle, and hydrologic partitioning of the water budget affecting vegetation dynamics. This course builds on perspectives from ecology, hydrology, and soil science to focus on the emerging, interdisciplinary area of ecohydrology - the science that studies mutual interaction between the hydrological cycle and ecosystems. The first part of the course will deal with fundamental processes controlling the flow of water in the biosphere (in land, atmosphere, soil and plants) and the interactions with ecological processes and human dimensions at different scales. The second part will deal with the implications of ecohydrological feedbacks, covering a broad range of issues including global environmental change, land use change, global desertification/land degradation, urbanization, soil erosion, and the food-energy-water nexus. The concepts and principles discussed in the class will have broad applications ranging from finding innovative solutions to ecosystem degradation and food security, and designing global change responses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**EES 5454. Introduction to Geophysics. 4 Credit Hours.**

An introduction to gravity, magnetic, electromagnetic, and seismic exploration methods. Applications include environmental characterization, oil and mineral exploration, geotechnical engineering, and archeology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5461. Low-Temperature Geochemistry. 4 Credit Hours.**

Principles of aqueous geochemistry discussed within the framework of geologic processes. One or two field trips.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5462. Advanced Low-Temperature Geochemistry. 3 Credit Hours.**

Study and discussion of topics in aqueous and sedimentary geochemistry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**EES 5502. Ice and Global Climate. 4 Credit Hours.**

We live in a time of rapid global warming and are faced with adverse effects on human society. Ice, in its various forms from snow to ice sheets, play an important role in the global climate system by, for example, modulating the solar-energy flux and global sea level. Ice also provides a unique archive of past climate history that contributed to our understanding of global warming today. This course will provide an overview of different forms of ice and their role in Earth's climate system, and foundations in physical understanding of how ice behaves at and near Earth's surface. In addition, contemporary techniques in observations of different forms of ice will be explored with examples in processing and interpretation of publicly available datasets. Prior to Fall 2023, the course title was "Glaciology."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SE, SF

**Repeatability:** This course may not be repeated for additional credits.

**EES 5506. Observing and Modeling Climate Change. 3 Credit Hours.**

There is no scientific doubt that human activity has been influencing the climate system since the industrial era due to emissions of greenhouse gases and causing a rise in global mean temperature (i.e., global warming). While Earth's climate and temperature has fluctuated naturally in the past, the rate of current warming in response to human activity is unprecedented and is having a large impact on the climate system and living organisms on our planet. We are experiencing the effects of climate change today in the form of melting of sea ice, glaciers, and ice sheets, sea level rise, increases in the intensity of heat waves, change in frequency and intensity of droughts, extreme rainfall events, and wildfires. The results of climate model simulations suggest that the effects of climate change will worsen throughout the 21st century and beyond if we continue to emit greenhouse gases. In this course we will gain a foundational understanding of anthropogenic climate change and explore the evidence directly through hands-on analysis and visualization of real-world observational datasets. After investigating observational evidence, we will build an understanding of climate models, the experiments performed including climate projections, and how to access, analyze, and visualize publicly available model output. Along the way, students will gain experience in the tools that scientists use to analyze and visualize observational datasets and climate model output. While no prior computational knowledge is assumed, students will be introduced to aspects of the Python programming language, the command line interface, and GitHub. Course content and assignments will be centered around the use of Jupyter Notebooks. This course will be hands-on and assignment and project oriented, with in-class periods geared toward learning to analyze and visualize climate datasets.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5601. Vertebrate Paleontology and Taphonomy. 3 Credit Hours.**

This course examines vertebrate fossils and their importance for interpreting and reconstructing terrestrial ecosystems. Students will learn the basics of vertebrate skeletal anatomy, interpret transport and depositional histories of skeletal elements and assemblages, and combine this information with geologic data to reconstruct paleoenvironmental settings and paleocommunity associations. Several class sessions will meet off-campus at local museums; one weekend field trip is required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5625. Electron Optical Techniques. 4 Credit Hours.**

This course will introduce the microanalytical and imaging methods of electron optical instruments such as the Electron Probe Microanalyzer (EPMA) and the Scanning Electron Microscope (SEM). The theory and operation of the instruments will be covered as will the interpretation of images and analytical results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5702. Sedimentary Petrology. 4 Credit Hours.**

This course explores the basic composition and texture of sedimentary rocks in order to understand depositional environment and provenance. This course focuses on sedimentation mechanics, petrography, and diagenesis. Includes a lab.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5725. Soils and Paleosols. 4 Credit Hours.**

The course is divided into two parts: modern soils and paleosols. The goals of this course are to teach students the fundamentals of modern soil genesis and classification in order to interpret ancient soils preserved in the rock record (paleosols), and to incorporate models of soil genesis into the traditional geology paradigm. Students will be exposed to a combination of laboratory methods and field work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5801. Quantitative Structural Geo. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5802. Tectonics. 3 Credit Hours.**

Plate tectonic theory. Structure and geometry of lithospheric plates; mechanisms of divergent, transform and convergent boundaries; subduction; obduction; mantle plumes; large igneous provinces; large sedimentary basins and Phanerozoic orogenic belts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 5811. Planetary Geology. 4 Credit Hours.**

This course explores the modern and ancient geologic processes on other planets and discusses how studies of other planets can aid us in a better understanding of our Earth. The course will also cover topics such as planetary exploration and astrobiology. Includes a lab.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 8000. Geology Seminar. 1 Credit Hour.**

Required of M.A. students. Visiting specialists in a wide variety of geologic fields will lecture and discuss their research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EES 8082. Independent Study Program. 1 to 3 Credit Hour.**

Limited to Geology graduate students with permission from the department.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EES 8200. Graduate Geology Seminar. 3 to 6 Credit Hours.**

Advanced seminar course; subject matter varies from semester to semester. The educational objectives of the course are to focus on current issues at the interfaces of geological processes through advanced technological methods of analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EES 8411. Advanced Hydrogeology. 3 to 4 Credit Hours.**

This course is typically offered in Spring.

This course covers water resources with an emphasis on groundwater. Topics include quantifying groundwater flow, groundwater-surface water interactions, contaminant transport, and a brief introduction to modeling. Problem sets and labs are used to develop specific skills, including field techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 8421. Groundwater Modeling. 3 Credit Hours.**

This course offers students a chance to construct models using well known codes such as MODFLOW and other practical tools. The goals of this course are: learn tools for groundwater flow modeling, be able to recognize how to judge models and compare them with reality, and gain computer skills that can be used with a wide variety tools.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**EES 8701. High Temperature Reactions. 4 Credit Hours.**

Thermodynamic laws and theory are used to discuss igneous and metamorphic processes. Exact field relationships are combined with thermodynamics to solve applied petrologic problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 8706. Regional Geology. 3 Credit Hours.**

Discussion of the geologic history and tectonics of selected regions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 8711. Economics of Geo Ore Deposits. 3 Credit Hours.**

Study of the geology, origin, distribution, economics and extraction methods of major classes of ore deposits.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 8911. Teaching of Geology. 0 to 1 Credit Hours.**

Required of all teaching assistants in their first semester of teaching. Instruction and evaluation of teaching laboratory, or discussion sections.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EES 9991. Master's Research Projects. 1 to 6 Credit Hour.**

Short-term, limited research project or laboratory project in the field. This course is not the capstone project course, nor can it be used for thesis based research. The course is for master's students only, including PSM, MA or MS. This class will not confer full-time program status unless nine credits are taken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Master of Science, Prof Science Masters.

**Repeatability:** This course may be repeated for additional credit.

**EES 9993. Comprehensive Examination Prep. 1 Credit Hour.**

This 1-credit seminar is designed to prepare students for the MS Comprehensive Exam given at the end of this course, ensuring a fundamental grounding in Earth Science. Students will study material covered in the exam including hydrogeology, geophysics, sedimentology/stratigraphy, earth history, geomorphology, structural geology, GIS, geochemistry, mineralogy and petrology. MS students will take this course in the Spring semester of their first year.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EES 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is required for students who are preparing for the preliminary or candidacy examination. Students should enroll after coursework is completed or when preparing for the candidacy exam until the time that the preliminary or candidacy examination is completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. All students must complete a minimum of one credit of this course. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may be repeated for additional credit.

**EES 9995. Capstone Project. 1 to 6 Credit Hour.**

Capstone project for master's students including students in PSM, MA or MS. This class will provide full-time status. Students in PSM programs need to register for at least one credit of this course to fulfill program requirements. Additional credits may be required for specific programs. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Master of Science, Prof Science Masters.

**Repeatability:** This course may be repeated for additional credit.

**EES 9996. Master's Thesis Research. 1 to 6 Credit Hour.**

Course for master's thesis research. Only intended for students in thesis bearing master's programs. A minimum of one credit is required. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EES 9998. Pre-Dissertation Research / Elevation to Candidacy. 1 to 6 Credit Hour.**

This course is intended for students who are performing research prior to candidacy. Students can register for this course after required courses are completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must be registered for this course during the semester that they are to be elevated to candidacy examination. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may be repeated for additional credit.

**EES 9999. Dissertation Research. 1 to 6 Credit Hour.**

The course is for Ph.D. students who have been elevated to candidacy. During the course of their candidacy students must complete a minimum of two credits of dissertation research. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Economics (ECON)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ECON 5001. Managerial Economics. 3 Credit Hours.**

This course examines the applications of economic theory to problems confronting managers, including pricing under different market structures, cost and technology, strategic decision making, theory of demand, and the economics of less than perfect information.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 5011. Quantitative Methods in Economics. 3 Credit Hours.**

This course provides students with the mathematical and statistical tools they will need to succeed in the M.A. in Business Economics. The course provides a hands-on introduction to the calculus of one and several variables and shows how calculus helps answer economic questions. It then introduces students to basic tools of statistical analysis in economics and the use of the R statistical package. It pays particular attention to hypothesis testing and basic regression techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 5102. Economic Decisions and Public Policy. 3 Credit Hours.**

The purpose of this course is to give Master of Public Policy students a working understanding of basic economic theory and how it applies to public policy analysis and decision making.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 5112. Public Finance. 3 Credit Hours.**

This course covers theory and evidence on the economics of the public sector. Topics include public goods, externalities, optimal tax theory, and the effect of taxation on economic decision making.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 5113. Data Analytics for Economists. 3 Credit Hours.**

This course builds upon basic econometric theory by emphasizing computational skills, especially the use of programs such as R, to manipulate and analyze real-world data sets. The course pays particular attention to the use of large data sets and imperfect data sets that require "cleaning." In addition to data analysis, the course emphasizes data visualization techniques and machine learning to illustrate and investigate economic problems. Students should have previous course in econometrics prior to enrolling in this class.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5011.

**ECON 5182. Independent Study. 1 to 6 Credit Hour.**

Supervised individual reading and research projects for master's and Ph.D. students. Depending on the type of project, work experience or curricular practical training may be required. No more than six semester hours of independent study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECON 5190. Special Topics in Economics. 3 Credit Hours.**

A one-semester course on a topic in a particular field of economics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECON 5201. Microeconomic Theory. 3 Credit Hours.**

This course provides a mathematical view of microeconomic theory and applications. The analysis makes frequent use of calculus and other mathematical tools. Topics include consumer behavior, production, costs, perfect competition, imperfect competition, factor markets, public goods, and market failure.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5011.

**ECON 5202. Macroeconomic Theory with Calculus. 3 Credit Hours.**

This course provides a mathematical view of macroeconomic theory and applications. The analysis makes frequent use of calculus and other mathematical tools. Topics include consumer behavior, production, costs, perfect competition, imperfect competition, factor markets, public goods, and market failure.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5011.

**ECON 5203. Introduction to Econometrics. 3 Credit Hours.**

An introduction to econometric theory. This course covers regression analysis, hypothesis testing, panel data, limited dependent variable models, instrumental variables, causal effects, and derives the properties of each of these estimators in substantial detail. This course is designed for students who enter the M.A. in Business Economics who have not taken an undergraduate course in econometrics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5011.

**ECON 5501. Survey of Internatl Econ. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 5538. Economic Operations and Strategy. 3 Credit Hours.**

This course builds on Economics 5201 by examining firm behavior and strategy in detail. Students study the actions of firms in perfectly competitive and imperfectly competitive settings. It pays particular attention to strategic behavior both internally, such as through the design of incentive mechanisms and externally, such as the response the threat of entry by competing firms. This course is required for students who plan to take the exam to become a Certified Business Economist.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5201.

**ECON 5545. Economics of Labor Markets. 3 Credit Hours.**

This course applies economic theory to the analysis of labor markets. The course covers a variety of topics, including labor supply and labor demand, human capital, the impact of different compensation mechanisms, and macroeconomic labor policy. The course makes ample use of current econometric techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5201.

**ECON 5551. Urban Economics. 3 Credit Hours.**

This course uses economic theory and econometric techniques to study cities and regions and their relationships with each other. The course will shed light on questions like: Why are buildings usually tallest at the city center? Why are most jewelry stores located at the vicinity of 9th and Sansom, rather than spread across the city like grocery stores or movie theaters? Why are some cities very dense while others are spread out?

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5201.

**ECON 5557. Health Economics. 3 Credit Hours.**

This course uses economic theory and econometric techniques to analyze both the marketplace for health care and the implications of health policy. It also analyzes the socioeconomic implications of current health crises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5201.

**ECON 5801. The Economic Environment. 3 Credit Hours.**

The student's proficiency and confidence in solving real-world business problems increase as a deeper understanding of micro- and macroeconomic issues is developed. This course examines foundations of the economic behavior of enterprises and consumers in different market environments, such as open market, monopoly, and oligopoly. Also analyzed is the impact of government fiscal, monetary, and trade policies on business decisions and on economic measures such as GNP, employment, interest rates, and exchange rates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 5901. Masters Writing Seminar. 3 Credit Hours.**

This course provides a summative experience in the Business Economics MA. Students demonstrate their mastery of the material they have learned in the program by performing original economic analysis of a current business or public policy problem. They also formally present their findings to the class and faculty.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C+ in ECON 5201, ECON 5202, and ECON 5113.

**ECON 8001. Microeconomic Analysis. 3 Credit Hours.**

Microeconomic theory for graduate students with little preparation in economics. This course offers detailed analysis of the behavior of households and firms in a variety of market settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8002. Macroeconomic Analysis. 3 Credit Hours.**

Macroeconomic theory for graduate students with little preparation in economics. This course is a survey of theories and evidence bearing on growth and cycles in output, employment, interest rates, and prices. The course includes sector details and considers the scope for control of cycles.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8003. Mathematics for Economics I. 3 Credit Hours.**

An overview of elementary calculus, linear algebra, and the theory of Lagrange multipliers for graduate students in economics and related fields.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8005. Microeconomic Theory I. 3 Credit Hours.**

This course covers demand analysis; the theory of the firm; the theory of markets; and theories of wages, rent, interest, and profits.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8001 and ECON 8003)

**ECON 8007. Macroeconomic Theory I. 3 Credit Hours.**

This course covers macroeconomic concepts relating to the determination of output, employment, and price level.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8002, ECON 8003, and ECON 8001)

**ECON 8009. Econometrics I. 3 Credit Hours.**

This course is the first in a two-semester sequence. The materials begin with the classical linear regression model, including hypothesis testing. Such traditional topics as multicollinearity, heteroscedasticity, and autocorrelation are included. Problems of pooled data and simultaneous equations are also considered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8104. Labor Economics. 3 Credit Hours.**

This course provides a theoretical framework for analyzing the operation of the labor market. The role of the labor market in the determination of employment, wages, prices, and production is central to this analysis. Labor supply, labor demand, human capital, labor unions, migration, and discrimination are among the topics discussed. Particular attention is paid to the role of public policy and to the design of theoretical and empirical models.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 5001.

**ECON 8105. Regulations and Antitrust Policy. 3 Credit Hours.**

The focus is on analysis of the impact of regulatory processes, including antitrust, upon industry. Special emphasis is given to public policy toward monopoly, resource utilization, and pricing processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 5001.

**ECON 8106. Microeconomic Theory II. 3 Credit Hours.**

Topics covered include general equilibrium analysis, game theory, introduction to public choice and welfare economics, and imperfect information analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8005 and ECON 9101)

**ECON 8108. Macroeconomic Theory II. 3 Credit Hours.**

This course presents advanced topics in macroeconomics and empirical testing of national income components, mainly in a dynamic setting.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8007, ECON 8009, and ECON 9101)

**ECON 8109. Theory of Economic Development. 3 Credit Hours.**

The major part is an introduction to applied theory of economic growth. The roles of human capital, investment, and natural resources are analyzed. Issues of sectoral development, policies of the public sector, finance, and international trade are discussed. Practical projections of economic growth and ease studies are stressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8009 and ECON 8007)

**ECON 8114. Advanced Labor Economics. 3 Credit Hours.**

This course examines the microeconomic foundations of macroeconomic phenomena in the labor market. Questions surrounding the nature of employment and its causes are explored. This course includes economic models of unions, contracting and agency models, efficiency wages, insider/outsider models, implicit contracts, and job searches. Specific articles in these areas form the basis of the material covered. Particular attention is paid to the mathematics behind many of the theoretical models covered in the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8005, ECON 8009, and ECON 8104)

**ECON 8115. Theory of Industrial Organizations. 3 Credit Hours.**

The course offers a microeconomic analysis of the relationship between the structure of industry markets and the conduct and performance of business enterprise. Emphasis is on the modern theory of oligopoly, including dynamic pricing, contestable markets, and game theory. Specific dimensions of firm conduct include pricing, product differentiation, mergers, and research and development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 8005.

**ECON 8116. Mathematical Economics. 3 Credit Hours.**

This course covers mathematical techniques and theorems of current importance in economic theory, with applications. Topics include game theory, social choice, general equilibrium analysis, and dynamic economics. The course concentrates on one of these topics, as warranted by developments in contemporary economic theory.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8005, ECON 8007, and ECON 9101)

**ECON 8119. Econometrics II. 3 Credit Hours.**

This is the second in a two-semester sequence of courses. The topics include nonlinear regression, the analysis of economic time series, and models with discrete or limited dependent variables.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 8009.

**ECON 8121. Development of Less Developed Economies. 3 Credit Hours.**

Examination of development efforts of less developed economies is undertaken. Selected domestic and international issues, policies, institutions, and reform are targeted.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8122. Economics of the Public Sector. 3 Credit Hours.**

Analysis of the economics of the public sector is covered. Topics include theories of public goods and optimal taxation, revenues, public expenditures, and incidence problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8123. Economics of Sports. 3 Credit Hours.**

This course covers the application to professional and amateur sports of theory of industrial organization; anti-trust issues; public finance involving the relationship between cities and franchises; and labor issues of reward systems, unions, and discrimination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8009 and ECON 8114)

**ECON 8124. International Trade: Theory and Policy. 3 Credit Hours.**

This course offers an intensive study of pure theory of international trade, welfare impacts of international trade, the theory and practice of commercial policy, and international factor movements. Special topics include the transfer problem; trade under uncertainty; and the relations between trade, growth, and development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ECON 8009, ECON 8106, and ECON 9101)

**ECON 8125. Theory of Public Finance. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8129. Time Series Econometrics. 3 Credit Hours.**

This course is designed to teach students advanced econometric techniques necessary to conduct original empirical research in macroeconomics. The course focuses on techniques appropriate for the analysis of time-series data. Students will learn the theoretical underpinnings of such topics as stationarity, ARMA processes, and vector autoregression (VAR) models and how to apply this theory to economic data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 8009 and ECON 8119.

**ECON 8134. Intern Monetary Econ. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 8139. Panel Data Econometrics. 3 Credit Hours.**

This course is designed to teach students advanced econometric techniques necessary to conduct original empirical research using micro-level data. The course focuses on techniques appropriate for the analysis of cross-section and panel data. Students will learn the theoretical underpinnings of such topics as instrumental variables, selection bias, and regression discontinuity, and quantile regression. We will pay particular attention to how to apply these techniques to economic data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 8009 and ECON 8119.

**ECON 8149. Computational Methods in Economics. 3 Credit Hours.**

This course is designed to teach you a broad set of methods commonly used in economics research. Because of advances in computing power and the availability of large data sets, knowledge of numerical methods is a required element of your toolkit as an economist, irrespective of your area of research. At the end of the course you should be able to solve otherwise intractable problems in economics using the methods taught in this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECON 8005 and ECON 8119.

**ECON 8159. Econometric Estimation of Structural Models. 3 Credit Hours.**

Students estimate econometric models, combining economic theory and econometric methods. The models apply to a variety of areas in economics, such as labor economics, IO, financial economics, and macroeconomics. By the end of the semester, students will be able to write down a dynamic economic model and estimate it using such methods as maximum likelihood and simulation method of moments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECON 8005 and ECON 8119.

**ECON 8190. Special Topics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECON 8204. Health Economics. 3 Credit Hours.**

This course is designed to teach students advanced econometric techniques necessary to conduct original empirical research using micro-level data. The course focuses on techniques appropriate for the analysis of cross-section and panel data. Students will learn the theoretical underpinnings of such topics as instrumental variables, selection bias, and regression discontinuity, and quantile regression. We will pay particular attention to how to apply these techniques to economic data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 8009 and ECON 8119.

**ECON 9001. Foundations in Managerial Economics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECON 9101. Mathematics for Economists II. 3 Credit Hours.**

Mathematical techniques and theorems are presented and used in economic applications. Proofs are presented in formal mathematical language to introduce the students to the vernacular of current economics research papers. Topics covered include advanced topics in linear algebra; the implicit function theorem in multivariate calculus and its application to comparative statistics; the Karush-Kuhn-Tucker theorem and applications to linear and nonlinear optimization theory; and differential and difference equations with elements of stability analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECON 8003.

**ECON 9183. Directed Study. 1 to 6 Credit Hour.**

This course is designed for doctoral students who need specialization in topics related to their dissertation work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECON 9994. Field Examination/Dissertation Proposal Research. 1 to 6 Credit Hour.**

This course is designed for students who have finished required coursework and are preparing a master's thesis or for preliminary and qualifying examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECON 9996. Master of Arts Thesis. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECON 9998. Dissertation Proposal Research. 1 to 6 Credit Hour.**

This course is designed for students who have passed the theory preliminary and qualifying examinations but do not have an accepted proposal. The course may be taken for up to 3 semester hours.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECON 9999. Doctoral Thesis Research. 1 to 6 Credit Hour.**

This course is designed for students who have an accepted proposal and are in the research/writing stage of the thesis. Students living in the Philadelphia metropolitan area are required to attend the seminar and fulfill its requirements. Those living outside the area are required to fulfill its written requirements each semester and to make at least one presentation of their doctoral research in the seminar or elsewhere during the period they are working on their dissertation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Education (EDUC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **EDUC 5010. Special Topics in Education. 1 to 4 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

### **EDUC 5011. Entrepreneur Thinking-Ed. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **EDUC 5101. Critical Understanding of Social Science Research. 3 Credit Hours.**

This is an introductory course in understanding research for graduate students who will primarily be consumers of research, such as Masters and Specialist students. It will also serve as an introduction to research for doctoral students in applied fields (EdD and PsyD), who may go on to do applied research and take other research courses such as Program Evaluation or Single-Subject Research. It introduces students to the principles of social scientific research and the components of the research process. We also discuss the ethical issues inherent within any research involving human subjects. Conceptual, procedural, and analysis issues from quantitative, qualitative, and mixed methods research traditions will be covered, ranging from clinical trials and experimental designs to ethnographies in real-life settings. Because the scope of the course is quite broad, it will not be possible to cover all of the details of every design and method used in educational research. Nevertheless, by the end of the course you should be aware of a range of procedures that may be applied to different types of educational studies. You will also be aware of the guidelines that should be used in selecting a set of appropriate research methods and in evaluating research. You will also learn about the role of theory in educational research and how theoretical and conceptual frameworks inform research questions and the choice of data and methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **EDUC 5115. The Context of Education. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **EDUC 5203. Effective Teaching: Theory and Practice. 3 Credit Hours.**

Provides theoretical and research basis for effective teaching strategies and affords the opportunity to practice the skills in simulated classroom conditions. Emphasizes the mastery of each skill. Exposure to a variety of teaching procedures and to a choice of the most appropriate strategy in a given educational situation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **EDUC 5204. Literacy N-6. 3 Credit Hours.**

Examines theoretical models in reading and language arts and their applications to early childhood/elementary and classroom practices, K-6. Provides opportunities for students to focus on developmental and application issues in literacy learning, the integration of reading and language arts, and alternative assessment techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **EDUC 5205. Numeracy N-12. 3 Credit Hours.**

A study of how numeric concepts and computational logic contribute to science, social studies, English language arts, and other subject areas. Students in various disciplines learn how to apply these concepts and logic to their own classrooms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5207. Early Childhood/Elementary Environments and Learning. 3 Credit Hours.**

Guides students as prospective early childhood/elementary teachers in establishing and maintaining learning environments for children. Research based principles for effective teaching and developmentally appropriate curriculum practices are presented and supported with authentic classroom based examples. Helps students utilize proven systematic approaches that will enable them to organize, conduct, and evaluate instructional practices in preschool and elementary settings. Guided by two beliefs: (1) that students need to engage actively with the concepts presented in the course outline, and (2) that students should be exposed first hand to the realities of teaching in urban settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5211. Creating a High School Learning Community. 3 Credit Hours.**

Utilizes the natural and social sciences jointly as the vehicle to exemplify to the student (1) the processes associated with stimulating the learners' integration of thinking skills toward higher order problem resolution, and (2) the strategies aimed at socialization of the learners into a learning community

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5212. Curriculum, Instruction, and Technology in Education. 3 Credit Hours.**

This 3 semester hour graduate course provides an introduction to the concepts, theories, and practices that address the linkages between the curriculum, instruction and technology. In particular, this course focuses on the implementation, management, and administration of technology infrastructure (hardware and software) at the building, school, and district levels.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5215. Standards & Tchg Pract. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5221. English for Foreign Students. 3 Credit Hours.**

The focus of this course is on English skills needed for instructional purposes. The course offers students opportunities to develop communicative skills necessary for successful teaching and information about teaching in U.S. institutions of higher education (e.g., syllabi, instructional formats, and legal issues, such as sexual harassment and plagiarism). Note: This course is for ITA students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5229. Crit Thk Val Clar & Inq. 1 to 3 Credit Hour.**

This course examines the tension that exists between curriculum requirements (especially as measured by high stakes testing) and the need to teach students critical thinking and responsibility. Participants will incorporate classroom climate techniques (character education, anti-bullying programs, etc.) into their curriculum development and their instructional planning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5231. Col Studies AT2 (CSAT 2). 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5232. Col Studies AT3 (CSAT 3). 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5241. Comp Rdg Instruction. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5242. Lit for Mid Level Learnr. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5243. Col Studies AT1 (CSAT1). 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5244. Class Discourse. 3 Credit Hours.**

The purpose of this course is to provide doctoral students with the theory and framework to study classroom discourses. According to Gee (1989), discourse "integrates words, acts, values, beliefs, attitudes, and social identities as well as gestures, glances, body positions, and clothes" (p. 7). In this broad context, we will examine student discourses in reading/language arts, mathematics and science in both in school and out-of school contexts. We use vignettes from Courtney Cazden's text as a model to critique classroom discourses among teachers and students. We also examine transcribed texts to find linguistic patterns in reading, mathematics and science classrooms. Finally, we use rubrics to judge the quality of classroom discourses to illustrate content knowledge.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5254. Characteristics of Computer-Based Instruction. 3 Credit Hours.**

Application of computer technology in instructional programs. Discusses prospects and problems of the uses of computers and other technologies (e.g., interactive whiteboards) in support of direct instruction, management, and testing. Hands-on experience is included.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5255. Tech in Classrooms: TPCK. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5257. Elem Sch Rdg Instr. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5258. Second Sch Read Inst. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5259. Tch Rdg & Lang to Spec. 3 Credit Hours.**

This course focuses on understanding a) reading, b) reading problems, c) assessment strategies, and d) effective, research-based, teaching practices for students with special needs. "Students with special needs" includes but is not limited to those with poor reading, writing, and speaking skills, learning disabilities, and cultural, economic, and language differences. The goal of the course is provide each student with first-hand knowledge, skills, and solutions to address children's reading problems. Questions that guide this course include: What are the causes of low language and literacy abilities among students? How do we assess students with poor reading and writing skills? What reading and language arts strategies are most effective with students with special needs? What education and psychology of reading theories inform these practices? How can we practice inclusion during reading and language art lessons? What additional services are available to support all children's success in the classroom?

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5261. Beginning Rdg Instructn. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5262. Introduction to Qualitative Research. 3 Credit Hours.**

Several qualitative research designs will be reviewed, including discussions of phenomenology, grounded theory, interpretive paradigm, narratives, histories, and ethnography. Research strategies/methods will be critiqued, including interviewing, participant-observation, and textual/content analysis. Important concepts for this course are appropriate research questions, study design, data collection methods, data management, managing the study, data analysis, interpretation of results, and presenting the study to peers. Qualitative data analysis will be introduced, but the emphasis is on research design and data collection. Combining qualitative and quantitative data will also be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5272. Instl Pract Middle Class. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5275. Seminar in Supervised Teaching. 3 Credit Hours.**

Describes basic principles of human behavior in relation to managing classrooms and the teaching of academic skills. Examples of successful applications of the principles are provided. Students required to use the principles and procedures in their classrooms and to report the outcomes to the participants in the class.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5287. Practicum in Teaching. 3 Credit Hours.**

Introduces students to the process of teaching children in an elementary or high school environment. Under the direction of a Temple University faculty member, the student observes elementary or high school students in a variety of situations. Classroom discussions are held in conjunction with observed events and suggestions are made as to how to deal with a variety of management and academic problems. The course is a prerequisite to ED 406 and 412, and is taken in conjunction with ED 403 at the start of the student's program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 5321. Instructional Innovation and Entrepreneurship. 3 Credit Hours.**

This course in advanced teaching methods will focus on cutting edge pedagogy and new trends in teaching and learning. The course will be inquiry-based so that teachers across grade levels and disciplines can research and report on promising new methods, including but not limited to methods that take advantage of new technologies. Each student will create a unit of instruction using innovative new pedagogy and present that unit to the class. The course will encourage and nurture innovative and entrepreneurial thinking, creating a model for teacher innovation and entrepreneurship. It will also focus on creative strategies for enabling all students to meet learning goals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5325. Introduction to Statistics and Research. 3 Credit Hours.**

An introductory course which focuses on basic research and statistical concepts. The course will cover both descriptive and inferential statistics from the perspective of an informed consumer of empirical research. There are no prerequisites for the course. The purpose of this course is to enable students to interpret and use a variety of descriptive and inferential statistical procedures that are commonly used in education and the social sciences. Topics covered in the course include an introduction to research design, sampling, descriptive statistics, t-test, Pearson correlation, univariate analysis of variance, and non-parametric statistical tests. Emphasis will be on the proper use and interpretation of these statistical procedures. The course does not emphasize the calculation of statistics, and mathematical sophistication is not assumed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5327. Teacher Leadership and the Teaching Profession: A Guide for Action. 3 Credit Hours.**

This course provides an historical perspective on the teaching profession as well as a close look at the status of teaching today, including the development of associations and teacher unions, content-based organizations of teachers like the National Council of Teachers of English, the formation of teacher networks, and national organizations like the National Board for Professional Teaching Standards. It will look at all aspects of teaching including teacher preparation, teacher professional development, teacher advocacy, and the future of the teaching profession. In this context, the course will raise questions about the role and status of teachers in contemporary American society, how teaching fares in public policy debates, and the assumptions about teaching that underlie new federal and state requirements for teacher preparation and professional development. We will examine recent proposals to assess teachers using various frameworks and to include student test scores as a measure of teacher quality and teacher success. Designed for teacher leaders, school leaders, and other education professionals, this course will place teaching and teacher quality at the center of any discussion about the goals of education, student achievement, and school success. It will focus on the conditions necessary for good teaching and learning to occur and how teachers can help to create those conditions in their own classrooms and in collaboration with their peers and administrators.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5401. Intro to Middle School. 3 Credit Hours.**

This course will introduce you to the middle school concept. Characteristics of middle schools will be discussed, including teaming, interdisciplinary units, and literacy across the content areas. Important aspects of the middle school environment, such as collaborating with specialists and creating a learning environment in the classroom, will be emphasized. Field experiences will be in the form of focused observations and interviews.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5402. Child and Adol Develop. 3 Credit Hours.**

This course will focus on issues of child and adolescent development that are relevant for educators. Development (e.g., physical, cognitive, social) and learning theories will be examined through discussions of theory and research. Particular attention will be paid to the early adolescent. Field-based experiences, in the form of focused observations and interviews, will support these discussions. Group and individual differences will be emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5403. Diverse Lrns in Class. 3 Credit Hours.**

Through this course, students will gain expertise in applying best practices to ensure access, equity, and quality education for all students. This course will introduce you to the characteristics and special needs of students having disabilities and of students who are culturally and linguistically diverse. The complex and critical issues surrounding inclusive and heterogeneous schooling will be examined along with the establishment of collaborative relationships with fellow colleagues, members of the school community and families. This course provides an overview of theory, research and practice in teaching culturally and linguistically diverse students in the middle grades. Students will learn about the socio cultural characteristics of ELLS and how the process of acquiring multiple languages and literacy skills affects students' learning of academic content. Students will be introduced to approaches for adapting science and math content for English language learners.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5406. Teach Math Middle Gr II. 3 Credit Hours.**

This course is part of a sequence of courses within the e=mc<sup>2</sup> Transition to Teaching graduate certification program. This course will be taught in the third semester for those in the mathematics track. This course will focus on geometry, measurement, and data, as appropriate for the middle grades. This continuation course will again focus on the particular mathematical and pedagogical knowledge needed for teaching, including issues of planning, instruction, and assessment. Field experience will be in the form of student teaching, and this course will allow for reflection on this experience. Support will be provided for student motivation, classroom management, and other realities of teaching.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5407. Teach Sci Middle Gr II. 3 Credit Hours.**

This course is part of a sequence of courses within the e=mc<sup>2</sup> Transition to Teaching graduate certification program. This course will be taught in the third semester for those in the science track. This continuation course will again focus on the particular pedagogical knowledge needed for teaching including issues of planning, instruction, and assessment. Field experience will be in the form of student teaching and this course will allow for reflection this experience. Support will be provided for student motivation, classroom management, and other realities of teaching. Whereas the first methods course was focused on the big ideas in the various disciplines in science, this course will focus on the cross-cutting themes in science as identified in the National Science Education Standards: systems, order, and organization; evidence, models, and a explanation; change, constancy, and measurement; evolution and equilibrium; form and function.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5409. Research Methods and Induction Capstone. 3 Credit Hours.**

This course will provide a vehicle to synthesize learning, reflect on experiences throughout the program, and consider issues related to the first year of teaching. Special topics include behavior problems, teacher stress, first year of teaching, professional development, and action research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5488. St Tchg in Middle Grade. 3 Credit Hours.**

This field experience involves 9 weeks of full-time student teaching. Prospective teachers will be placed in a middle grades mathematics or science classroom, where they will work under the guidance of a mentor teacher. Experiences include observing, assisting, and delivering whole class instruction. NOTE: All coursework must be completed before taking this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Cohort Restrictions:** Must be enrolled in one of the following Cohorts: EDCNDCY.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 5501. Fundamental Interpersonal Techniques for Healthcare Professionals. 3 Credit Hours.**

The purpose of this course is to develop the fundamental interpersonal skills healthcare professionals will need to provide successful healthcare services to patients and their supervisees. We accomplish this through the practice and development of micro-skills in an experiential format. Students will have an opportunity to begin to develop mastery of these skills through in class role-playing, mock interviews, and videotaped interpersonal communication session role-plays.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5502. Case-Based Instruction and Learning. 3 Credit Hours.**

This 3-credit course is designed to explore and familiarize students with similarities and differences between case-based learning (or patient-based learning) and other traditional teaching and learning methods used in professional health care education. Case-based instruction and learning is grounded in constructivism where students form new meanings by interacting with prior knowledge and a case presented. Students develop critical thinking skills related to clinical practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in AOD 5403.

**EDUC 5503. Professional Issues in Healthcare Education. 1 Credit Hour.**

This 1-credit seminar is designed to explore and familiarize students with the essence of the topics to be studied through this masters program and how they relate to their individual health care fields.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5504. Professional Health Education Capstone. 3 Credit Hours.**

Supervised work experience in an applied research and evaluation capacity in healthcare settings. Analysis of the work experience in light of the skills and abilities obtained in students' prior coursework in the Professional Health Education program. Upon completion of this course, students will be able to: apply evidence-based health care principles to teaching future professionals in their field of study, apply adult learning theories in both the didactic and clinical teaching of future professionals in their field of study, develop a viable study of teaching within their field of study, conduct a capstone project and present the capstone project. Students will be assessed in each course individually, but the capstone course will be one course in which all core content will be used to implement the study designed in the practicum course. The study is expected to be a viable study of teaching and learning in their field of study. In this capstone course, students will conduct that study, write an analysis of outcomes, and present the results to all students and faculty of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in EDUC 5587.

**EDUC 5587. Professional Health Education Practicum. 3 Credit Hours.**

Students will complete a practicum within the healthcare profession one day per week. The placement of this practicum must be approved by the program before it begins. Your supervisor must be approved by your instructor and be a healthcare professional holding a doctorate and the appropriate credentialing to practice in your setting, with at least 3 years of experience in the field. You should plan to be at your site one day per week (6 to 8 hours), for a total of at least 100 hours across the entire school year. The monthly class will include group supervision and discussion of cases.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5605. Models of Teaching. 3 Credit Hours.**

Models of teaching are studied to better understand their goals and strategies, and to support new teachers in developing broader perspectives regarding teaching practice and their implications for student learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5801. Residency Practicum Capstone. 1.5 Credit Hour.**

This seminar is designed to help you make connections between the practicum teaching experiences you will have this semester and what you will be learning concurrent with your university coursework. The course will help you bridge theory and practice and provide you with a framework of support and guidance as you prepare to take charge of your own classroom. It will also provide you with tools to reflect on your experience and learn from it, which will facilitate your successful entry into the teaching profession. To accomplish this, we will engage in discussions and activities that center on your core beliefs about teaching, the context for your teaching (where you teach), your pedagogical practices (how you teach), the content you teach (what you teach), and the needs of your students (whom you teach). We will also examine how theory informs classroom practice and come to understand how instructional management strategies are inherently linked to good pedagogy. We will examine and discuss how both formal and informal student assessments work as tools for reflection and improvement. This course will prepare you for making the transition from pre-service teacher to teaching professional by beginning a teaching portfolio that you will further develop the following semester as your culminating performance assessment. The portfolio review is an invaluable assessment activity intended to help you reflect and grow as a teacher as well as prepare you for conversations about your teaching and student learning as you transition to professional practice. Your portfolio will be rooted in Temple's six teaching standards, which together comprise our definition of good teaching. You will be using the standards as a means of evaluating your teaching and your students' learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5802. Residency Student Teaching Capstone. 1.5 Credit Hour.**

This capstone class is designed to help you make connections between the teaching experiences you will have this semester as residents and what you have learned in your university classes. The course will help you bridge theory and practice and provide you with a framework of support and guidance as you prepare to take charge of your own classroom. It will also provide you with tools to reflect on your experience and learn from it, which will facilitate your successful entry into the teaching profession. To accomplish this, we will engage in discussions and activities that center on your core beliefs about teaching, the context for your teaching (where you teach), your pedagogical practices (how you teach), the content you teach (what you teach), and the needs of your students (whom you teach). We will also examine how theory informs classroom practice and come to understand how instructional management strategies are inherently linked to good pedagogy. We will also examine and discuss how both formal and informal student assessments work as tools for reflection and improvement. This course will also prepare you for making the transition from pre-service teacher to teaching professional by creating a teaching portfolio and successfully passing the College's culminating performance assessment. The portfolio review is an invaluable assessment activity intended to help you reflect and grow as a teacher as well as prepare you for conversations about your teaching and student learning as you transition to professional practice. Your portfolio will be rooted in Temple's six teaching standards, which together comprise our definition of good teaching. You will be using the standards as a means of evaluating your teaching and your students' learning during the student teaching semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in EDUC 5801.

**EDUC 5887. Residency Practicum. 1 Credit Hour.**

As a teacher candidate in a Residency program, you will engage in a year-long transformative experience in your preparation as an urban middle or secondary grades teacher. The first half of this experience we will refer to as the "Residency Practicum." During the Practicum, you will begin to enact in your classroom the teaching theories, strategies, and standards you will learn in your core courses. To help you in your development as a highly-qualified educator, you will share the classroom with an experienced professional who will impart to you his or her knowledge of best practices and the wisdom acquired from years of experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 5888. Supervised Teaching. 1 to 4 Credit Hour.**

Involves full-time placement in an elementary or secondary school for the entire semester. Students with paid teaching positions may use the school site; others are placed in a school and work with a cooperating teacher. All students supervised by Temple University faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 8102. Ethnographic Research Methods. 3 Credit Hours.**

This class will use an in-depth study of ethnographic methods to develop qualitative data collection skills. Ethnography is one type of qualitative research. It uses the study of people in their natural settings to attempt to understand their social world, culture, and the meanings they make of their experiences in social contexts. According to LeCompte and Schensul, "ethnography takes the position that human behavior and the ways in which people construct and make meaning of their worlds and their lives are highly variable and locally specific...[Thus,] ethnographic researchers learn through systematic observation in the 'field,' by interviewing and carefully recording what they see, hear, and observe people doing, while also learning the meanings that people attribute to what they do and the things they make" (LeCompte and Schensul, pp. 1-2). Because ethnographic research is intensive and involves a variety of data collection techniques - observations, interviews, and document analysis - learning ethnography is a good way to explore all of these techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8103. Contemporary Trends in Educational Research. 3 Credit Hours.**

The purpose of the course is to provide a fundamental step in the development of a research orientation of educational phenomena through introducing students to the domain of educational research and to the kind of research questions asked by educational researchers when assuming disciplinary as well as interdisciplinary perspectives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8104. Epistemology and Method in Educational Research. 3 Credit Hours.**

The purpose of the course is to provide a fundamental step in the development of a research orientation of educational phenomena through introducing students to the epistemological foundations and research methods of educational research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8232. Technology, Teaching, and Learning. 3 Credit Hours.**

Focuses on educational technologies and the ability of technology to enhance both program administration and teaching and learning for youth and adults in school and non-school settings. The ethical, social, and scientific ramifications of technological developments in education and how these developments affect the teaching and learning process are discussed. Application of instructional technologies in education, business, and industry presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8251. Teacher Development: The Reflective Teacher. 3 Credit Hours.**

Designed for practitioners interested in enhancing their skills of reflection with an eye on improving classroom practice. The fundamental components of teaching and learning will provide the foci for discussion, inquiry and reflection. The course will be largely experiential, providing participant's ample opportunity to participate directly in activities designed to provoke introspection and critical analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8252. Cultural Diversity. 3 Credit Hours.**

This course rests on three premises: (1) Because differences among learners affect learning, those differences should inform teaching, (2) Master teachers make informed judgments about learners' needs and interests, and (3) Master teachers use both these judgments and student performance data to inform instruction. This course aims to encourage teachers to consider the usefulness of these three premises for improving student performance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8253. Accom Tchr: Nbpts Process. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8271. Program Planning and Evaluation. 3 Credit Hours.**

Program planning and evaluation are viewed and discussed from a lifespan perspective that incorporates program planning and evaluation for school, post-secondary and higher education, continuing education, community-based, and training and development settings. Students are encouraged to apply program planning content and processes in real educational settings, which may be school or community based.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8272. Adv Classroom Mgt. 3 Credit Hours.**

Students will study many of the teacher-controlled environmental variables which influence learning in the classroom. Particular emphasis will be placed on discovering and assessing practical and theoretical instructional strategies related to behavior management, classroom organization, differentiated and adapted teaching techniques, lesson design, motivation, and assessment. Techniques used will include teacher presentations, discovery learning, panel discussions, cooperative learning structures, group and individual projects. Assessment will be based on course participation and a summative portfolio.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8273. Adv Coop Learning. 3 Credit Hours.**

Through readings, lectures, class discussion and instructor-led activities, students enrolled in this course will be able to (1) describe research-based outcomes achievable through cooperative learning and (2) design and implement a number of practical, cooperative learning models for achieving specific learning objectives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8274. Currt Issu/Curr & Instruc. 2 to 3 Credit Hours.**

This course invites students to thoughtfully review what is currently considered best instructional practices. Special emphasis will be given to the organization, management, and evaluation of instruction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8275. Research Design in CITE. 3 Credit Hours.**

Students are provided with practical experience in formulating research problems and designing appropriate methods to address those problems within a lifelong perspective of education and learning. An overview of various research designs, including both qualitative and quantitative designs are conducted. Students are expected to learn how to design research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8276. International Ed Seminar. 1 to 9 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8278. Found Theor Res Reading. 3 Credit Hours.**

This course will examine influential theories and research that address the psychological, cognitive, sociocultural, literary and linguistic foundations of reading. During the first part of the course we will consider how leading and often competing reading theories developed over time as well as how seminal research studies were conducted and considered by scholars, practitioners and policy makers. From there we will then focus on research propelling current conversations in the literacy field in

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8279. Found Theor Res Writing. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8289. Capstone Seminar Cur Iss. 3 Credit Hours.**

This course, taken near the end of the program, will focus on current educational issues and the research surrounding them. In addition, it will include an experiential activity that will form a bridge between the student's career and the coursework of this program, especially the student's specialization or focus.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8401. Philosophical Foundations of Educational Research. 3 Credit Hours.**

This course asks students to grapple with a questions that will be foundational to their development as scholars in the field of education. At the most basic level, the course asks, "Why do we conduct research in education?" To help students answer these questions, the course surveys the broad variety of philosophical and scholarly traditions underlying educational research. Each of these traditions makes fundamental assumptions about the nature of knowledge and knowing, the role of education in society and human life, and the purposes and consequences of educational research. Throughout the course, students will explore these fundamental assumptions and determine their connection to various research agendas in education. In addition, students will grapple with their own reasons for conducting educational research, the impact they hope to have, and the connections between these and the College's commitment to equity and social justice. We will give special consideration to the philosophical assumptions inherent within various disciplines and debate the merits of each for conducting well-designed investigations that have the potential to improve the lives of others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8402. Policy Analysis. 3 Credit Hours.**

Should we get rid of neighborhood schools and allow a system of full choice? Should higher education be free for all students? Should the government expand access to subsidized housing? These are but a small set of the complex and important questions facing government today. This course is designed to help you learn how to identify underlying causes and explore potential solutions to problems facing public schools, institutes of higher education, and other complex organizations. Using the tools of policy analysis, our focus will be on understanding the problems these policies are trying to solve, the success of existing policies, and the potential alternative policies that might be available to solve them. Throughout the semester you will learn to evaluate the evidence for and against various policies and develop concise reports of your findings and recommendations. While it is impossible to provide an in-depth analysis of such a broad topic as "policy", we will cover many of the major current initiatives including market-based reforms of K-12 education. While the content for the first four sessions is set, specific topics for the remaining sessions will be determined at the beginning of the semester to reflect the interests of enrolled students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8403. Understanding Social Science. 3 Credit Hours.**

The purpose of the course is to provide a foundation in the core ideas of social science research of a research orientation through introducing students to epistemological foundations and research methods in educational research. More specifically, we will be working together to promote the following major goals: Understand and grapple with the types of questions that are addressed by social science researchers, particularly in the field of education; Review the major concepts, theoretical perspectives, and practical lenses of sociology and their application in an educational context; Explore relationships among the questions social science researchers ask, the methods they employ, the epistemologies they invoke, and the conclusions they draw; Collaborate with students from other concentrations to understand how different questions, methodologies, and epistemologies play out in different fields of study; Consider our own questions, interests, methodological preferences, and epistemological beliefs and the implications of these assumptions for our emerging research questions and design choices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8404. Quantitative Analysis, Part I. 3 Credit Hours.**

Student attitudes toward statistics run the gamut from extreme interest to apathy to dread. You will learn in this course that it is possible to improve your thinking and make better decisions when you are facile in some fundamental statistical concepts and skills. When you "mathematize" your professional and personal world, you can reduce uncertainty, make better predictions, and understand the difference between (a) real and illusory differences among people and (b) real and illusory correlations (e.g., gender and depression; gender and risk-taking). This is true regardless of whether you are training to be a researcher, training to be a counselor, and learning stats for a variety of other fields. All methods for improving the lives of children and adults rely on research; major organizations (e.g., AERA, APA, ACA, AMA, etc.) emphasize evidence-based decision-making or choosing techniques that have been shown to be effective. Understanding statistics is a key component of evidence-based decision-making. One reason people hate or fear statistics is that their prior mathematics instructors were so bad that they became turned off to any kind of math or even doubted their math ability. Another reason is that some stats professors think that the mathematical (computational) aspect of stats is the only and most important thing rather than viewing computations as a means to an end, and aid in making decisions or drawing conclusions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8405. Quantitative Analysis, Part II. 3 Credit Hours.**

The world is a complex place, particularly in the arena of education. Rarely are phenomena related to developing, learning, teaching, remembering, or forgetting rooted in a single source or explained by a lone cause. This course is designed to train future educational researchers to untangle these complex, multifaceted interconnections between predictor(s) and outcome(s) through multivariate statistics. The emphasis for this course is on understanding and using educational statistics, not on memorization. Particular attention is dedicated to mastering when and why particular techniques would be useful, and what specific windows into reality they offer relative to other analytic strategies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8501. Motivation in Education. 3 Credit Hours.**

The purpose of the course is to provide students the opportunity to develop deep, critical, and personally relevant understanding of theoretical concepts and processes, methodological considerations, and practical implications of contemporary motivation theories as they are applied in educational settings. Particularly, the course aims to help students develop knowledge and skills that would allow the critical and constructive application of motivational theory to designing investigations of educational phenomena of interest.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8502. Social Contexts of Learning. 3 Credit Hours.**

This three-credit hour course examines research from both social cognitive and sociocultural perspectives on learning in education in classrooms, schools, and informal contexts. We will investigate research on students' everyday practices and its connection to learning various subjects in schools; the relationships between culture, language, teaching and learning; and issues of race, social class, ability, and gender in education. Finally, we will examine how national, state, and local policies influence the social contexts of teaching and learning, with particular attention placed on issues of equity and access in classrooms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8503. Learning to Read. 3 Credit Hours.**

The purpose of this course is to provide students with the opportunity to learn about the most current research and practices of how children learn to read. We will discuss the importance of early language and literacy experiences and discuss techniques used to teach phonics and reading comprehension. Each topic will focus on an issue in learning to read and how it impacts special populations and English Learners (ELs). The course will take a developmental approach and discuss how foundational skills begin from birth and are developed through four grade. The class will discuss how foundational language and emergent literacy skills impact learning to read. We will then discuss how beginning readers and writers need to develop an understanding of the alphabetic principle (in order to decode words) and begin to use their knowledge of how letters represent sounds and how those letters and sounds make up words. We will also learn how children transition from learning to read to reading to learn as children begin to develop comprehension strategies. In each class, we will discuss how each topic relates to children who are having difficulty learning and children who are English Learners.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8504. Problem Solving and Reasoning in STEM Education. 3 Credit Hours.**

This course will introduce you to a subset of major research lines in reasoning and problem solving, with specific contexts in science, technology, engineering and mathematics (STEM) education. We will use research literature to explore conceptualizations of rationality and critical thinking, how students use these skills to understanding mathematics and science, and how educators teacher use these skills in mathematics and science classrooms, as well as teaching these skills to students. In addition to these topics, this course will continue building and developing the skills that doctoral students will need in order to be successful in their graduate programs and in their professional lives. In particular, this course will focus on developing skills related to analyzing, synthesizing, and reviewing educational research literature, and to write a research proposal relevant to reasoning and problem solving in STEM Education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8505. Assessment and Evaluation of Students. 3 Credit Hours.**

This course is designed to provide students an opportunity to examine the literature related to major issues in the assessment of students with learning problems, including students with disabilities (SWD) and English Language Learners (ELL). It is assumed that students enrolling in this seminar will bring an understanding of psychometrics and knowledge of the methods used to assess these populations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8506. Cognition and Learning in Education. 3 Credit Hours.**

This course is designed to stimulate graduate students' thinking about how learning occurs in a variety of domains, and what aspects of cognition influence the ability to learn in those domains. We will read and discuss relevant review chapters and empirical articles and share findings from related articles of interest from fields such as cognitive and developmental psychology, education, and the learning sciences. Focal questions for the course include: What are the current cognitive perspectives on how learning occurs in a variety of academic domains? How might this knowledge impact instructional design in those domains? How can we study and assess learning in different settings? We will think about and discuss learning across a wide range of age groups (from early childhood through adult years), individual differences (e.g., native language, special education status), academic domains (e.g., reading, mathematics, etc.), and learning environments (e.g., classroom, out-of-school, informal learning, computer-based learning environments).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8545. Social Cntxt Math Sci Ed. 3 Credit Hours.**

This course examines research from a socio-cultural perspective on mathematics and science education. We will investigate research on students' everyday mathematics and science and its relationship to learning these subjects in schools; the relationship between culture, language, and mathematics teaching and learning; and issues of race, social class, and gender in mathematics and science education. Finally, we will examine how national, state, and local policies influence mathematics and science teaching and learning, with particular attention placed on issues of equity and access.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8727. Foundations Math Sci Ed. 3 Credit Hours.**

This course will introduce students to the foundations of math and science education. It will examine trends in the history of math and science education, consider major philosophical arguments about learning math and science, and analyze the portrayal of math and science in the K-12 classroom. Simultaneously, we will focus on what it means to do math and science and on understanding the practices and habits of minds of mathematicians and scientists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 8730. Res Topics Sci Ed. 3 Credit Hours.**

This doctoral level course will explore current research in science education. Key questions will be explored and current literature on that topic will be read and critiqued. Faculty in the program area will alternate teaching this course and the topics will vary from year to year. As a result, this course can be taken up to 3 times. Topics that this course will explore are demonstrations in the classroom, scientific inquiry, professional development, classroom-based research, technology in the science classroom among other topics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 8731. Psych of Learning Math. 3 Credit Hours.**

This doctoral seminar will focus on psychological theory and research relating to the learning and teaching of mathematics. The main emphasis will be on developing solid conceptions of what it means to know and understand mathematics from a psychological perspective.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 9185. Applied Research and Evaluation Internship. 3 Credit Hours.**

Supervised work experience in an applied research and evaluation capacity in schools, business, government, or private agency. Analysis of the work experience in light of the skills and abilities obtained in student's prior coursework in AOD.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9255. Research Seminar in Science, Mathematics, and Educational Technology. 3 Credit Hours.**

This course will introduce you to a subset of major research lines emerging in the fields of mathematics and science education as well as educational technology. We will examine the research literature to understand some of the "hot topics" currently in debate in the fields of mathematics, education and educational technology research. Although the course will be focused around topics that intersect three fields, readings will help us understand how these topics are being conceptualized in the individual areas of mathematics education, science education and educational technology. In addition to these topics, this course will continue building and developing the skills that doctoral students will need in order to be successful in their graduate programs and in their professional lives. In particular, this course will focus on developing skills related to writing a literature review or research proposal. This paper could facilitate exploration of research questions that interest you and/or build a foundation for your dissertation study. This course will be guided by questions such as: What do we know? How do we know it? What don't we know? How do scholars build on previous work in the field? How do scholars critique previous work in the field? What methods are they using to collect and analyze their data?

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDUC 9257. Problems in Education. 1 to 6 Credit Hour.**

Limited to matriculated doctoral students and those with permission of instructor. Specified problems, research, and practice in education. May be repeated for credit when approved by the instructor. Specific offering changes from semester to semester; contact advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9282. Graduate Independent Study in Curriculum, Instruction, and Technology. 1 to 6 Credit Hour.**

Limited to matriculated doctoral students and those with permission of instructor. A course intended to meet the needs of students who desire to carry on individual investigation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9287. Practicum Corr Remed. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9288. Instr. Pract: Corr/Remed. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9289. Fieldwork Disabilities Sty. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9487. Pract: Program Supv.. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9489. Field Exp & Practicum. 3 to 6 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9587. Prac Intro to Diagnosis. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9987. Teaching Apprenticeship. 3 Credit Hours.**

This course is designed to provide graduate students with hands-on teaching experience in higher education under the mentorship of a full-time faculty member. The purpose of the Teaching Apprenticeship is to prepare students for independent teaching that is central to academic careers and that will be required for many funding opportunities during graduate school. Because students' interests and expertise and the needs of the college vary, placements for the Teaching Apprenticeship will differ from student to student.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9991. Research Apprenticeship. 1 to 3 Credit Hour.**

Working under the close mentorship of a faculty member, students actively engage in research and produce a scholarly product such as a submission to an academic conference, an article or chapter or a grant proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9993. Master's Comprehensive Examination. 1 to 6 Credit Hour.**

This course is for the Master's comprehensive examination in the College of Education. You should register for the section specific to your advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9996. Thesis Credits: Masters. 1 to 6 Credit Hour.**

Students complete a thesis or project under the supervision of their advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9998. Dissertation Proposal Design. 1 to 3 Credit Hour.**

Proposal writing. Limited to those who have passed the Preliminary Exams. Repeatable.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDUC 9999. Doctor of Education Dissertation. 1 to 6 Credit Hour.**

Dissertation research. Limited to those elevated to candidacy/class 9.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Educational Administration (EDAD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**EDAD 5027. Research-Based Practices. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5063. Educational Reform. 3 Credit Hours.**

This course identifies current education reform interventions that are provoking change. Additionally, the federal legislation targeting school reform and the implementation of federal programs locally, as well as the politics of federalism in education, are examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5201. Action and Collaborative Research Seminar. 3 Credit Hours.**

Action research techniques for the classroom/educational setting. The focus of the action research is problem-driven rather than method-driven. Collaborative research efforts are encouraged.

This course is a seminar intended to facilitate the development of reflective practitioners and participatory researchers - educators who perceive classrooms and schools as sites of inquiry. The course is designed to help students develop understandings and skills needed to accomplish the following: (1) identify problems in classrooms and/or schools that can be addressed via research; (2) locate appropriate action and/or teacher research studies for their educational needs; (3) interpret the results of action and/or teacher investigations; and (4) know how to carry out aspects of teacher and/or action research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5300. Intro Issues Sch Ldshp. 3 Credit Hours.**

This course introduces students to the program's goals and theoretical foundations to help them assess and reflect on their own learning needs as they continue through the program. The course surveys the effective leaders, leadership styles, organizational theory, and decision-making literature(s) from across disciplines to orient students to the school context and examine the role and potential of the individual school leader. Particular attention will be paid to the impact of the leader's values, knowledge, skills, and behaviors on teaching and learning for adults and children within the school and school community.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDAD 5301. Leadership for Learning. 3 Credit Hours.**

This course allows students the opportunity to engage in rigorous work designed to challenge traditional paradigms of school leadership and to explore values and beliefs underlying leadership needed for school reform in pre K-12 schools today. Students will be exposed to concepts from current research in developing professional learning communities, collegiality, instructional leadership, data driven decisions and assessment. Coursework includes interactive case studies, team projects, and guest speakers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5302. Contexts for Sch Reform. 3 Credit Hours.**

This course will focus attention on schools foundation within a distinctly American cultural, constitutional, and legal framework, particularly the internal system-based and external legal, policy, and political environments that affect school policy and practice. TA survey of milestones in contemporary education history/reform, with specific attention to the education of diverse groups provides historical context. Students will examine and apply to practical cases 1) federal, state, and local laws, policies, and regulations and the implications of these for school leadership; 2) literature and case studies on education reform efforts at both the district and school levels, including the forces that influence the outcomes of education reform historically and at the present time; and 3) the school and district as complex systems, as well as strategies used to manage change across system levels.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5303. Ldshp in Diverse Context. 3 Credit Hours.**

This course will examine the issue of diversity in schools in all its dimensions to better understand the challenges of creating schools that ensure the fair and equitable treatment, opportunity, and successful educational outcomes for all students. The course will survey the history and current policy and practice contexts for serving historically under-served/under-performing student populations (e.g. high-poverty students, minorities, English-language learners, and students with disabilities). The range of issues presented by diverse student populations and their impacts on the role of the school leader will serve as the foundation of this course. Emphasis will be on better identifying and addressing the needs of particular students through the use of assessment, research, and data; accessing a variety of available resources (e.g. research, technical assistance); identifying models of effectiveness; and leading school change to meet the needs of all children and close the achievement gap(s) so that all children achieve at high levels.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5304. Sch Operations, Mgmt, Tech. 3 Credit Hours.**

Effective school leaders must effectively lead all aspects of the internal and external school environment. This course provides an introduction to the various operations responsibilities of the principal-plant, budget, human resource, technology, labor and public relations management-and strategies for better aligning school resources (e.g. time, space, teachers, materials) to the vision for improvement. The course will review relevant laws, policies, and standards of practice and progress monitoring in each area. Across topics, students will be supported in developing a data-driven lens that will help them to reflect on and critically assess factors related to implementation progress, particularly the extent to which people and/or processes are affect improvement work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5305. Knowledge Sch Improve. 3 Credit Hours.**

Availability of considerable amounts and types of research and data does not guarantee accurate interpretation or use. This course will help students to become skillful users of information to enabling them to make intelligent, timely decisions-to be effective and creative problem solvers. In particular, the course will help students to organize and use data to identify those aspects of their school's performance most critical in helping them to reach state standards; sense and diagnose problems and their root causes before they measurably impact performance; read and interpret education research to identify reliable, actionable information on effective programs in support of school progress toward those standards; thoughtfully plan for and implement applications of research with fidelity to the model(s); continuously monitor progress and evaluate outcomes of specific strategies; and intelligently marshal resources based on these assessments and articulated goals. In addition to the development of specific functional/technical skills, the program will help participants to develop specific habits of mind-orientation toward inquiry; reflection; quality problem solving; and performance-focused, continuous improvement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5306. Change Leadership. 3 Credit Hours.**

A required set of skills for tomorrow's educational leaders is the ability to initiate and sustain continuous improvement and results. This course will explore a variety of literature, research-based practices, and case studies to help students to recognize conditions/variables (e.g. resources, culture, organizational dynamics and changes) in school and community contexts, and how to effectively and strategically navigate the landscape towards school improvement. Particular emphasis will be on helping students develop as reflective, ethical leaders.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5307. Clin Exp in Sch Ldship. 3 Credit Hours.**

This course is designed to fulfill the internship requirements for a person seeking the Pennsylvania Administrative I certificate (school principal, K-12). In order to be recommended for the Pennsylvania Administrative I certificate, the student must complete both Educational Administration courses 9189 and 9289 (3 semester hours each). This course is designed to meet all of the PIL Standards. This year long internship along with a 20 hour internship in each course in the principal certification program will give a university student a total of 360 hours of field experience. The internship serves as a bridge between university coursework and the world of professional practice in the school community. It helps aspiring leaders translate what they study into effective practices in an authentic work setting. The student engages in administrative work under the direction of an on-site mentor (an administrator or supervisor) in a school district either where the student is employed or in another district.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5308. Clinical Experiences in School Leadership 2. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5402. Action and Collaborative Research Seminar. 3 Credit Hours.**

Action research techniques for the classroom/educational setting. The focus of the action research is problem-driven rather than method-driven. Collaborative research efforts are encouraged.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5403. Economics of Education. 3 Credit Hours.**

Education plays a central role in the economy through its effects on the labor force, distribution of income, and individuals' earnings and quality of life. This course will provide an introduction to the concepts of economics and how these can be applied to education. Topics to be discussed include education markets and financing (both K-12 and higher education), education production, teacher labor markets, school choice, and school accountability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5404. Federal Policy and Local Impact. 3 Credit Hours.**

This course is designed to expand graduate students' understanding of education policy, specifically federal policy and its impact on a local level (i.e., state, district, school). The course will focus on understanding politics and policy making processes, research impact on policy development, and the impact of epistemologies (e.g., feminism, critical race theory, critical theory, etc.). This course will develop student understanding through exploration of major educational policies (e.g., Title 1 - school improvement, School Desegregation, Bilingual Education, High School Reform, Special Education, Teacher Quality and Effectiveness, and Assessments and School Accountability). Each policy review will include a historical policy overview (i.e., policy development and epistemology), its considerations of social problems (i.e., poverty, racism, disparate educational and social outcomes, poorly managed schools, etc.), the policy making process, and the process of policy implementation (i.e., state and local regulations and guidance). Graduate students will be exposed to developing policy briefs on 2-3 educational policy areas, and (re)develop one education policy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5503. The Principalship. 3 Credit Hours.**

The principal's responsibilities in the organization and administration of a school are examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5505. Introduction to Educational Administration and Supervision. 3 Credit Hours.**

An overview of educational administration is provided. This is a required first course for educational administration majors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5513. Fostering Professional Development: Coaching and Mentoring. 3 Credit Hours.**

Schools and school systems are locations of constant change. Especially in the post-Internet world, teachers, school leaders, and other education professionals are continually expected to update their practice and adapt to evolving standards and ongoing pressure to narrow the achievement gap and improve student performance. This course is designed to assist supervisors, coaches and mentors in their efforts to respond to and manage the continuous improvement environment common in schools today. Learning goals include enhanced communications skills, the ability to assess teacher practice and provide useful feedback, and the ability to model good practice, set goals and develop growth plans. The course will emphasize best practices in adult learning and professional development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5517. Emotions, Diversity and Democratic Leadership. 3 Credit Hours.**

This course introduces students to relevant literature on emotional intelligence, leadership and diversity and to the practice of leading diverse groups. Students learn foundational capacities in emotional intelligence, uncovering common motivations for collaboration, and developing trust in a diverse group. The course also focuses on factors that support and prevent collaboration in various educational settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5531. The School Superintendent: Chief Educator and Chief Executive I. 3 Credit Hours.**

This is a year-long course. Semester I enables the candidate to know; Semester II enables the candidate to be able to do. This is the first of a two-part course and a prerequisite for Part II. A school system is a human organization whose mission is the education of children and youth. The system is composed of a series of interdependent parts, including the formal organization, informal organization, people, status and role-expectancy pattern, and the physical environment. The dynamic forces of the systems concept is integrative. At its core is a goal structure around which the organization is designed, and to which the separate but interrelated components are functionally and operationally united to serve the purpose for which it exists. In a school system, the systems approach focuses upon the transforming of human and nonhuman resources into educational programs and services through the interaction of human and related system elements. Leadership and Administration in a contemporary educational environment is a social process that takes place within the context of a standards aligned system. This process can be viewed through three points of view. Structurally, leadership and administration is seen as relationships among levels of responsibility within the system. Functionally, these relationships are the locus for allocating and integrating roles and resources in order to achieve the goals of the system. Operationally, the administrative process takes effect in situations involving person-to-person interactions. The ways in which the total system is designed and implemented, from the subsystems to the integrated whole, can affect the willingness of system members to cooperate in achieving organizational goals. Specific focus on budgeting, resource allocation, technology, and policy development are addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5532. The School Superintendent: Chief Educator and Chief Executive II. 3 Credit Hours.**

This is a year-long course. Semester I enables the candidate to know; Semester II enables the candidate to be able to do. The prerequisite is EDAD 5531: The School Superintendent: Chief Educator and Chief Executive I. A school system is a human organization whose mission is the education of children and youth. The system is composed of a series of interdependent parts, including the formal organization, informal organization, people, status and role-expectancy pattern, and the physical environment. The dynamic forces of the systems concept is integrative. At its core is a goal structure around which the organization is designed, and to which the separate but interrelated components are functionally and operationally united to serve the purpose for which it exists. In a school system, the systems approach focuses upon the transforming of human and nonhuman resources into educational programs and services through the interaction of human and related system elements. Leadership and Administration in a contemporary educational environment is a social process that takes place within the context of a standards aligned system. This process can be viewed through three points of view. Structurally, leadership and administration is seen as relationships among levels of responsibility within the system. Functionally, these relationships are the locus for allocating and integrating roles and resources in order to achieve the goals of the system. Operationally, the administrative process takes effect in situations involving person-to-person interactions. The ways in which the total system is designed and implemented, from the subsystems to the integrated whole, can affect the willingness of system members to cooperate in achieving organizational goals. Specific focus on budgeting, resource allocation, technology, and policy development are addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in EDAD 5531.

**EDAD 5552. Issues in Higher Education. 3 Credit Hours.**

The purpose of this seminar is to provide an introduction to the theory and practice of student affairs in American colleges and universities. This course looks at the responsive and adaptive nature of institutions of higher education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5601. The Two Year College. 3 Credit Hours.**

This course provides a critical analysis of the characteristics, scope, public policy issues, and impact of two-year colleges in the United States.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5615. Gender Issues in Education. 3 Credit Hours.**

This course is a graduate-level seminar intended to place gender at the center of the discussion of education, in general, and educational leadership, in particular. Although gender is at the heart of this course, considerable emphasis is also placed on the intersection of race and social class in education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5641. Finance and Business Management. 3 Credit Hours.**

Basic principles of finance and administration with an emphasis on practical implications for the workplace constitute the framework for this course. Simulation of budgets and finance problems enhance understanding.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5651. School Plant. 3 Credit Hours.**

The planning, construction, operation, and maintenance of the school plant is discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5652. Educational Policy: Decision Making. 3 Credit Hours.**

This blended policy course focuses on public policymaking and its impact on K-16 institutions. Discussions of contemporary decision-making theories guide this course. Practical applications to education policy and decision making are detailed utilizing decision-making practices in budgeting, public administration, drug trafficking, and information systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5653. Educational Leadership as Civic Leadership. 3 Credit Hours.**

This course aims to instill sensitivity in the students to the importance of civic leadership and an understanding of the potential for education leaders to engage systematically and productively with their various "publics" to promote the common good.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Educational Administration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5654. Leadership in Higher Education. 3 Credit Hours.**

While many Educational Administration classes on leadership focus on the functional roles and hierarchical structures of leaders within the educational institutions, this class will focus on the development and expression of individual leadership qualities.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Educational Administration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5655. Higher Education Economics and Finance. 3 Credit Hours.**

This course provides aspiring administrators and academics, interested in research and teaching in higher education, with a basic overview of economics and finance in higher education.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Educational Administration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5661. Personnel Administration. 3 Credit Hours.**

This course examines the principles, policies, and processes of personnel administration in school systems. It may satisfy an elective in programs leading to the Master of Education degree, principal's certification or central certification in Pennsylvania, and the Doctor of Education degree.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5671. Public Relations. 3 Credit Hours.**

This course provides an introduction to school public relations, policies, and practices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5711. Politics of Education. 3 Credit Hours.**

This course draws its intellectual base from research and theory in political science and public policy. Additionally, these disciplines provide the frameworks used to interpret the political dynamics among actors in schools, universities, governmental agencies, and other organizations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5715. Instructional Leadership. 3 Credit Hours.**

This course focuses on the principles and practices directed toward the improvement of the relationship between the individual and the organization, as well as the development of a positive organizational climate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5742. Pro-Seminar in Ed Policy. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5746. Management of School Fiscal Affairs. 3 Credit Hours.**

The focus is on basic accounting principles, records, and reports appropriate for school fund financial management and bond accounting, cash management, and encumbrance systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5771. School Law. 3 Credit Hours.**

This course focuses on the legal principles within which public education functions. Court cases and school codes are analyzed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5772. Law and the Administration of Higher Education. 3 Credit Hours.**

This course emphasizes the legal principles within which higher education functions, with emphasis on structure, personnel, programs, property, and finance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 5895. School Violence: Risk Prevention. 3 Credit Hours.**

This seminar provides descriptive analyses reflective of the differing perspectives of students, teachers, principals, and parents, and various concerns and issues. This interactive class examines successful school violence prevention programs, how they are influenced by school policy, and how they are administered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8067. Case Study Research Approaches. 3 Credit Hours.**

Case study methods for clinical investigations and field studies in school are presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8093. Administration Research Seminar. 3 Credit Hours.**

This course is intended to assist students in the dissertation proposal process. It focuses on the dissertation topic and key questions; the literature review for the proposal; the methodological plan for the research; and a timeline for moving toward the proposal defense.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8461. Ethical Leadership. 3 Credit Hours.**

This course focuses on ethics, primarily from an analytical perspective. It is designed to explore the moral and ethical dimensions of the work of educational leaders, in particular, school superintendents and special education practitioners dealing with an over-representation of diverse learners. The hope is to assist these leaders to resolve ethical dilemmas in more reflective, intelligent, and principled ways.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8553. Democratic, Equitable, and Ethical Leadership. 3 Credit Hours.**

This course is designed to be a research project in spirit and function. Specifically, we seek to answer this question: What are the underlying qualities that make an individual a democratic, ethical leader? While some answers have been reported in the field, the case is hardly closed because the problem is far from a simple one. Rather than employing a didactic and deductive process of imposing a definition upon students, our approach will follow an inductive process patterned after Bruner's (1974) concept attainment model. Using a wide cross-section of women and men from the US and around the world, both in our own time and from time past, the class will consider the common qualities these leaders demonstrate as they faced their greatest personal and professional challenge. Some will come directly from the field of education. Others are identified with different professions. These have had a major impact on society and have, therefore, shaped education. The class will consider this inductive study of leaders and construct a vibrant and organic definition of democratic ethical leadership that will inform the practice of class members.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8635. Education Policy Analysis. 3 Credit Hours.**

This course will focus on current issues in education policy, with an emphasis on identifying underlying causes and exploring potential solutions to problems facing public schools. Although the primary focus will be on education policies, we will also consider social policies that shape educational opportunity and schooling. Throughout the semester we will evaluate the evidence for and against various policies, using the tools of policy analysis. Using the tools of policy analysis, our focus will be on understanding the problems these policies are trying to solve, the success of existing policies, and the potential alternative policies that might be available to solve them. While it is impossible to provide an in-depth analysis of such a broad topic, we will cover many of the major initiatives including school finance reforms, market-based reforms, accountability, and teacher recruitment and evaluation. While the content for the first four sessions is set, specific topics for the remaining sessions will be determined at the beginning of the semester to reflect the interests of enrolled students. Note: Prior to summer 2, 2017, the course title was "Current Issues in Educational Policy."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8636. Research for Change. 3 Credit Hours.**

Educational leaders, particularly superintendents, are increasingly being held accountable for student performance and achievement, but also for how data are collected, presented and used to monitor students' progress and to inform other decision-making in school districts. The purpose of this course is to help participants acquire the abilities to critically consume, evaluate and produce research and evaluation information that leads to change in leadership. This course focuses on developing skill sets to critique research and to conceptualize, design and conduct practitioner-based research projects specifically related to the practice of educational leadership. Emphasis will be placed on understanding how educational research contributes to knowledge about effective professional practices related to student performance and achievement. Research design, data collection and analysis procedures, coupled using data to inform leadership decision will be explored through lecture, class discussion, readings, small work group activities and individual/team projects. Individual and team projects are the primary vehicles for applying analytical tools and research procedures for change in leadership. In addition, the course addresses professional and ethical standards for best practice in developing, implementing and using research information. The framework and content for this course are based on standards developed by the Pennsylvania Inspired Leadership program. Ideally, research helps educational leaders question, explore, analyze, and summarize problems of interest. Methods, designs and data analysis procedures are selected to match a specific research topic, question or context. In order to make these choices wisely, educational leaders should have exposure to and knowledge of a variety of tools and procedures. In general, this course examines the logic and procedures of research and evaluation of educational issues with a heavy emphasis on application (i.e., use of data sources, sub-group analysis for decision making). This course (structured in a research workshop format) offers a doctoral-level survey of research and evaluation methods in education focused on decision-making. The course will cover both the theory and practice of research for change in educational leadership settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8653. Civic Leadership. 3 Credit Hours.**

This course is designed to introduce participants to the research on and practice of civic leadership. We will discuss the basic concepts, theories, and practices related to this dimension of leadership, specifically in regard to our own roles as educational leaders.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8755. Organizational Dynamics. 3 Credit Hours.**

Educators who wish to exercise leadership need to understand their organizations in sophisticated ways. In an era marked by turbulence, rapid change and a rising chorus of seemingly confused perspectives, this may appear to be an elusive goal. Yet, those are the conditions in which we find ourselves. If we faced a simple task, it might do to use one point of view. But how do we know that others share our particular way of looking at things? How do we know that we have the clearest way of understanding our organization? Is there even one possible best way? It seems most appropriate and wise to try to see organizations from several vantage points and through the theoretical thinking of many scholars. The purpose of this course is to help you understand organizations in newer, more complex ways and to further your ability to use this enhanced perspective to move your organization along.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8775. Understanding Organizational Dynamics in Educational Settings. 3 Credit Hours.**

Educators who wish to exercise leadership need to understand their organizations in sophisticated ways. In an era marked by turbulence, rapid change and a rising chorus of seemingly conflicting perspectives, this may appear to be an elusive goal. Yet, those are the conditions in which we find ourselves. If we faced a simple task, it might do to use one point of view. But how do we know that others share our particular way of looking at things? How do we know that we have the clearest way of understanding our organization? Is there even one possible best way? It seems most appropriate and wise to try to see organizations from several vantage points and through the theoretical thinking of many scholars. The purpose of this course is to help you understand organizations in newer, more complex ways and to further your ability to use this enhanced perspective to move your organization along.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8785. Collective Negotiations. 3 Credit Hours.**

The negotiations process in relation to the chief school administrator's responsibilities is discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8787. Administration of Higher Education. 3 Credit Hours.**

The development and scope of higher education, the principal organizational components of colleges, and contemporary problem areas are emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8905. Advanced Seminar I. 3 Credit Hours.**

Intensive group work on selected administrative topics is undertaken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8935. Values, Ideology & Education. 3 Credit Hours.**

This course assists students in identifying the cultural forces, institutional features, policy network activities, and interest groups influencing education policy decision making in governmental arenas and other organizations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 8941. Planning in Higher Education. 3 Credit Hours.**

The planning process in the college and university context is presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EDAD 9189. Field Experience. 3 Credit Hours.**

Practical administrative experience in one's own school system is undertaken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDAD 9285. Internship in Administration (Part I). 3 Credit Hours.**

This course is designed to fulfill the internship requirements for a person seeking the Pennsylvania Letter of Eligibility certificate (school superintendent, K-12), the New Jersey certification, and for others seeking similar practical experiences. The internship serves as a bridge between university coursework and the world of professional practice in the school community. It helps aspiring leaders translate what they study into effective practices in an authentic work setting. The student engages in administrative work under the direction of an on-site mentor (an administrator or supervisor) in a school district either where the student is employed or in another district.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDAD 9286. Internship in Administration (Part II). 3 Credit Hours.**

This course is designed to fulfill the internship requirements for a person seeking the Pennsylvania Letter of Eligibility certificate (school superintendent, K-12), the New Jersey certification, and for others seeking similar practical experiences. PA requires 360 hours of field experience. In order to be recommended for the Letter of Eligibility certificate, the student must complete two semesters of an Internship. During each semester the candidate should spend 120 hours beyond their regularly scheduled duties for a total of 240 hours (EDAD 9285 and EDAD 9286). These are each 3 semester hours. The remainder of the experience hours are found in the other courses and add up to an additional 120 hours. The internship serves as a bridge between university coursework and the world of professional practice in the school community. It helps aspiring leaders translate what they study into effective practices in an authentic work setting. The student engages in administrative work under the direction of an on-site mentor (an administrator or supervisor) in a school district either where the student is employed or in another district.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDAD 9289. Secondary Field Experience. 1 to 6 Credit Hour.**

Practical administrative experience in one's own school system is undertaken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDAD 9982. Independent Study. 1 to 6 Credit Hour.**

Coursework is conducted on an individual basis with approval of the advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EDAD 9999. Doctor of Education Dissertation. 1 to 6 Credit Hour.**

Candidates who have successfully completed the preliminary examination must register continuously during the Fall and Spring terms until the dissertation has been accepted.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Educational Psychology (EPSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**EPSY 5499. ILT: Instructional Technology and Learning. 3 Credit Hours.**

Introduces characteristics and applications of basic instructional and computer technology in the teaching-learning process. Students will gain hands-on experience in the use of computer and adaptive and/or augmentative hardware and software.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5501. ILT: Multimedia Learning. 3 Credit Hours.**

Provides conceptual discussion and hands-on exploration of technology applications including graphic, photographic, multimedia, audio, and video materials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5502. ILT: Desktop Publishing and Web Design. 3 Credit Hours.**

Presents elements of effective design characteristics for written and web pages will be discussed. Web page maintenance will also be presented. Students will create documents and web pages using appropriate software applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5505. ILT: Authoring Systems. 3 Credit Hours.**

Students explore capabilities of various authoring software. Based on instructional design principles, students will develop an interactive learning environment that includes various elements of sound, graphics and motion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5523. Introduction to Educational Psychology. 3 Credit Hours.**

The application of psychological theories to the learning processes and development of children and adolescents including the principles and procedures of assessment and evaluation as they relate to academic achievement and to teaching-learning activities. The primary objective is to facilitate a clear understanding of the complex and dynamic processes of learning and development as they related to the principles of learning and teaching.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5529. Tests and Measurements. 3 Credit Hours.**

An introduction to tests and measurements. Reliability, validity, interpretation of standardized test manuals. Survey of standardized aptitude, achievement, and personality tests. Students learn how to construct valid classroom tests.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5531. Learning Theories and Education. 3 Credit Hours.**

This survey course covers the nature of theory, the epistemological foundations of learning, and major theories of learning. Focusing on application in educational settings, the course includes associationist, behaviorist, cognitive information processing, and constructivist learning theories.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5541. Concepts in Human Development. 3 Credit Hours.**

Covers the major theoretical orientations and methodological approaches to human development. Uses a life-span approach to cognitive, social, and physical development, genetic influences, parental influences, language and perceptual development, intelligence, peer influences, parenting practices, moral development, and the development of gender identity among other issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5551. Introduction to Program Evaluation. 3 Credit Hours.**

Methods and approaches to evaluation; planning and conducting evaluations; problems confronting the evaluator; professional issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 5561. Development and Learning Over the Lifespan. 3 Credit Hours.**

This course is intended for master's and doctoral students seeking an introductory survey of how humans develop and learn in several key areas across the lifespan. To this end, the course addresses typical trajectories of development and learning in three major domains: cognition, social competence and interaction, and physical and motor skills. We will examine both domain-general theories of development and learning that guide thinking across all three domains of interest, as well as essential domain-specific theories and recent empirical research relevant to just one or two domains.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8625. Intermediate Educational Statistics. 3 Credit Hours.**

Survey of issues, problems, and approaches involved in using ANOVA, correlational, and nonparametric procedures. Emphasizes guidelines for selecting statistical tests, computer-aided computation, and interpretation of results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8627. Introduction to Research Design and Methods. 3 Credit Hours.**

The primary goals of this survey course are to help students understand (a) how to make optimal decisions with respect to their own research, (b) evaluate the decision-making and research practices of other researchers, and (c) that there is no one "best" method (i.e., the best method depends on a researcher's goals; avoid mismatching goals and methods). To be an effective decision-maker, a researcher has to coordinate multiple goals and develop a set of effective options for meeting these goals. The present course is designed to help students identify their goals, develop a set of plausible options (i.e., possible research methods), and evaluate the pros and cons of these options. It is also hoped that students will gain increased insight into the ethics of research and how to write effective journal articles and research proposals. Ideally this course should be taken early in one's program and in conjunction with an epistemology of research course. It is hoped that the one-class introduction to a specific methodology (e.g., ethnography or meta-analysis) will prompt a student to take a follow-up course that spends the entire semester on that method.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8629. Test Construction and Validation. 3 Credit Hours.**

Students will plan, develop, construct, revise, and validate an instrument. Methods for assessing reliability and validity (especially construct validity) are emphasized. Item analysis techniques are included. Basic approach and components of Item Response Theory (IRT), including introduction to the Rasch models.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8638. Seminar in Instructional Theories. 3 Credit Hours.**

Examines contemporary instructional theories and models. Includes consideration of various conceptions of the learner and the instructional process.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8639. Instructional Design and Development. 3 Credit Hours.**

Covers strategies and techniques for creating or modifying instructional resources. Emphasis will be given to instructional design models for the systematic design of instruction, including adaptive and/or augmentative technology. Students will employ a specific instructional design model and apply select instructional theories in the design of an instructional unit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8735. Proseminar in Learning. 3 Credit Hours.**

Extended treatment of selected topics in educational psychology concentrating on issues dealing with learning and instruction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8741. Proseminar in Human Development. 3 Credit Hours.**

Extended treatment of selected topics in human growth and development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8825. Advanced Data Analysis. 3 Credit Hours.**

A survey of statistical techniques involving both between groups and correlational analyses. Students use SPSS to analyze data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8826. Multivariate Research Methods. 3 Credit Hours.**

A survey of multivariate data analysis procedures, with a focus on parametric techniques. Students use computer library programs (SPSS) to analyze data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8827. Experimental Design. 3 Credit Hours.**

Emphasizes parametric analyses of variance and covariance, and their nonparametric analogs. Students use computer library programs (SPSS) to analyze data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8960. Seminar Series: Problems in Educational Psychology. 3 Credit Hours.**

Specified problems, research, and practice in educational psychology. May be repeated for credit Specific offerings change from semester to semester; contact Department for current offerings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPSY 8970. Seminar Series: Problems in Educational Psychology. 3 Credit Hours.**

Specified problems, research, and practice in educational psychology. May be repeated for credit when approved by the instructor. Specific offerings change from semester to semester; contact Department for current offerings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPSY 8980. Seminar Series: Problems in Educational Psychology. 3 Credit Hours.**

Specified problems, research, and practice in educational psychology. May be repeated for credit when approved by the instructor. Specific offerings change from semester to semester; contact Department for current offerings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPSY 8985. Teaching in Higher Education. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 8986. Proseminar in Educational Psychology. 3 Credit Hours.**

The main purpose of the Proseminar in Educational Psychology is to advance students' professional development in the domain of educational psychology. The course aims to contribute to the development of knowledge of the field of educational psychology and simultaneously to students' exploration of their career goals in the field.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 9287. ILT: Practicum in Instructional Technology. 3 Credit Hours.**

Provides for one hundred hours of hands-on experiences working in a professional organization consistent with the student's goals and objectives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPSY 9982. Independent Study in Educational Psychology. 1 to 6 Credit Hour.**

A course intended to meet the needs of students who desire to carry on individual investigation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPSY 9991. Directed Res & Teach Pse. 1 to 12 Credit Hour.**

Supervised apprenticeship in an educational activity central to educational psychology. Examples of possible apprenticeships are: research apprenticeship, educational program evaluation apprenticeship, educational product development apprenticeship, and teaching apprenticeship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPSY 9995. Master's Capstone in Educational Psychology. 3 Credit Hours.**

In this course, students completing a master's degree in educational psychology will work with an advisor to construct a capstone project. Drawing on the program's core ideas in human learning and development, as well as psychological principles in education, students will complete a summative project in which they apply these ideas to a real-world problem in the field. The final product for the course will include a written document summarizing this work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPSY 9996. Master's Thesis in Educational Psychology. 1 to 6 Credit Hour.**

Limited to those who plan to complete the master's degree by writing a thesis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPSY 9999. Dissertation in Educational Psychology. 1 to 6 Credit Hour.**

Dissertation research limited to doctoral candidates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Electrical Engineering (ECE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ECE 5022. Engineering Analysis and Applications. 3 Credit Hours.**

Vector space, basis, projection, null space, function space, L2 and space of continuous functions, Hilbert space, orthogonality, generalized Fourier series, linear transformation, adjoint transformation, eigenvalue problem, linear functional, Gateaux and Frechet differential, constrained optimization, infinite dimensional systems, complex analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5033. Probability and Random Processes. 3 Credit Hours.**

Sets and events, Random variables, Distribution and density functions, Functions of multiple random variables, Moments and conditional statistics, Information entropy, stochastic processes, wide-sense stationary process, ergodicity, correlation, and power spectrum of stationary processes. Applications to sampling theory and signal modulation and detection.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5110. Special Topics in Electrical and Computer Engineering. 3 Credit Hours.**

Selected topics on current technologies in various research areas under electrical and computer engineering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 5116. Spacecraft Systems Engineering. 3 Credit Hours.**

The concept of systems engineering is introduced using a satellite application. Systems engineering is a top-down approach to the design, implementation, testing, and deployment of large-scale systems to meet the needs of users. The topics will include systems engineering methodology, dynamics of spacecraft, and celestial mechanics. This course will also introduce the notion of invention and innovation, and how they are related to the intellectual property issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5314. Microelectronics. 3 Credit Hours.**

Advanced study of electronic devices and their applications to linear, non-linear, and digital circuits; transistors, FET's, amplifiers, digital integrated circuits, and VLSI's; Software design emphasized. A term project will be assigned. NOTE: Students cannot earn credit for both ECE 4312 and ECE 5314.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5324. VLSI System Design and Testing. 3 Credit Hours.**

An introduction to a hierarchical design methodology of VLSI; study of basic logic elements and design methods in nMOS and CMOS; development of testable designs; the physics of MOS devices and fabrications processes; design rules and computation of circuit parameters from layout; system level design techniques; circuit structures with built-in self-test, design-for-test and self-checking features. NOTE: Students cannot earn credit for both ECE 4322 and ECE 5324.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 5314.

**ECE 5344. Fundamentals of Bio-MEMS and Biomedical Microdevices. 3 Credit Hours.**

The course introduces the basic concepts for design and principle of bio-micro-electro-mechanical systems (BioMEMS) and biomedical micro-integrated systems. Wireless communication in context to biomedical devices are described. Microelectronics process modules used in the design and fabrication of MEMS and micro-integrated systems are presented. Applications of these systems in a variety of sensors and transducers are considered. Recent advances in biomedical applications of MEMS are discussed in detail.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5412. Control System Analysis. 3 Credit Hours.**

Review of control concepts and application; state space representation of dynamical systems; controllability, observability; time invariant and time varying systems, design of full state feedback and output feedback systems; eigenstructure assignment; the linear quadratic regulator; Kalman filter; estimation and filtering; robust control via eigenstructure design, Kharitonov theorem, application examples.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5432. Game Theory and Applications in Engineering. 3 Credit Hours.**

The course covers the basic framework for strategic games and its various manifestations. Topics include matrix games, extensive form games, mixed strategies, repeated games, Bayesian games, and cooperative games. The course continues with various applications of game theory in engineering systems. The course also covers applications of game theory as a design tool for engineering multi-agent systems, i.e., systems that are comprised of a collection of programmable decision-making components.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5442. Engineering Optimization: Methods and Applications. 3 Credit Hours.**

Optimization aims at maximizing or minimizing an objective in the presence of complicating constraints. This course will cover fundamental concepts and methods in optimization and their applications in engineering systems. The focus will be on linear and nonlinear system of equations, unconstrained optimization, equality-constrained optimization, and inequality-constrained optimization, with applications in electrical engineering systems. Topics include, but are not limited to, formulation of nonlinear optimization problems, optimality conditions for convex optimization, review of classical optimization techniques, and illustrative examples from electric power systems. Numerous applications from various fields of engineering are presented. The goal is to maintain a balance between theory, numerical computation, problem setup for solution by optimization software, and applications to engineering systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5512. Introduction to Digital Communications. 3 Credit Hours.**

Baseband pulse, digital, and passband communications systems; properties and bandwidth of signals and noise; detection of signals in noise; signal-to-noise ratio (SNR); distortionless transmission and intersymbol interference; pulse code modulation; amplitude, phase and frequency modulation and demodulation; simulation of communication systems. NOTE: Students cannot earn credit for both ECE 4512 and ECE 5512.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5514. Digital Signal Processing Analysis. 3 Credit Hours.**

Topics covered are: various types of digital signal processing (DSP) techniques such as convolution, correlation, and filtering, as well as Finite Impulse Response (FIR) and Infinite Impulse Response (IIR) all pass and comb digital filters, the Discrete Fourier Transform, and the use of MATLAB as a tool for DSP software tasks. A term project will be assigned. NOTE: Students cannot earn credit for both ECE 4522 and ECE 5514.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5516. Introduction to Communication Networks. 3 Credit Hours.**

Introduction to Internet and TCP and IP protocols, telephone networks, Local Area Networks, packet switching, ATM, and other related topics. NOTE: Students cannot earn credit for both ECE 4532 and ECE 5516.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5526. Engineering Principles of Computer Intrusion and Detection. 3 Credit Hours.**

This course provides an introduction of computer intrusion and detection techniques. It gives theoretical and practical foundations necessary to continue further learning of computer security. We will study and analyze critical security vulnerabilities of software design and network and information systems. The learned skills are widely used by IT security analysts in industries. At the end of the class the students will be able to understand basic concepts of intrusion detection and traffic analysis from a practical point of view. This course will provide the tools and knowledge necessary to continue further learning in computer security and advance further in the profession.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECE 5516.

**ECE 5528. Introduction to Cryptography and Information Security. 3 Credit Hours.**

This course covers the theory and practice of computer communications security. Topics include symmetric encryption, public and private key cryptography, message digests, digital signatures, secure email, and various types of authentication methods. We will review various cryptographic primitives, algorithms, intrusion attacks, and security protocols.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5538. Hardware and Industrial Control System Security. 3 Credit Hours.**

This course covers the theory and practice of hardware and control system security. Topics include digital system security, side channel attacks on cryptographic systems, industrial control system security, and intellectual property protection. We will review hardware implementation of cryptographic primitives, secure hardware design, and security protocols. Note: Credits of this course will not apply to MSEE and PhD (EE) degree programs unless preapproved.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECE 5528.

**ECE 5541. Hardware Security Lab. 3 Credit Hours.**

This laboratory includes a university version of wired (with internet protocol suite of packets and layers) and wireless (with IEEE802.11 layers) equipment and physical network along with open source network security software. Depending on the application, the lab provides students flexibility to fully analyze protocols and security vulnerability with respect to the network, Programmable Logic Controller (PLC), and power grid, etc. Students gain hands-on experience from role-playing both as a black-hat hacker by instigating attacks and a white-hat hacker by performing digital forensics and penetration tests. Note: Credits of this course will not apply to MSEE and PhD (EE) degree programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5548. Secure Computer Memory Architecture and Intrusion Prevention Methodologies. 3 Credit Hours.**

This course covers physical computer memory organization and areas of vulnerability such as susceptibility to buffer overflow and Direct Memory Access (DMA) attacks. An overflow attack happens when the data written to a physical memory exceeds its allocated buffer size, which is in violation of memory safety rules. DMA happens when a data transfer is done via direct physical memory access, thus bypassing operating system's supervision. Such a "back door" access is intended to increase the hardware performance throughput but inadvertently creates a major hole in system security. This course analyzes physical memory design methodologies to prevent such intrusions. Note; Credits of this course will not apply to MSEE and PhD (EE) degree programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5558. Reverse Engineering. 3 Credit Hours.**

This course covers methodologies, equipment and software tools used to extract information and build knowledge from sophisticated modern-era hardware and software systems for reverse engineering purposes. Some systems require invasive and destructive technique to get to the source of the information, while for others, non-invasive monitoring and fault injection are sufficient methods. Reverse engineering equipment and tools include but are not limited to debuggers, disassemblers, logic analyzers, oscilloscopes, and simulators. Note: Credits of this course will not apply to MSEE and PhD (EE) degree programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5562. Wireless Communications Engineering. 3 Credit Hours.**

This course provides a comprehensive introduction of physical-layer wireless communications, including: Cellular concepts; Wireless channel modeling; Modulation techniques; Multiple access techniques; Channel coding and wireless system capacity; Receiver diversity; Transmit diversity and multiple-input multiple-output (MIMO) technology; Equalization; Orthogonal frequency division multiplexing (OFDM); Wireless systems and standards, and latest developments in wireless technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5564. Cloud Computing Security. 3 Credit Hours.**

This course first introduces students to the essentials of a cloud computing environment: technologies, infrastructure, platforms, and application software. Students then build a cloud computing system to monitor its vulnerability, build security measures, and attack it to further refine the security solution. OpenNebula Systems, an open source cloud computing management toolkit and a commercial cloud computing service, will be used for the exercises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5566. Forensics for Cyber Physical Systems Security. 3 Credit Hours.**

This course first introduces students to the construct of today's cyber physical system, which is an integration of software and hardware (cyber and physical), built upon an infrastructure of communications network. Cyber physical systems are an integral part of our daily lives that must deliver ultimate safety, security, and reliability, such as in automotive, medical, transportation, power, water, and nuclear energy systems. Therefore, an attack on any such system can be catastrophic. We will analyze hardware components and structure and study their vulnerability to exact forensic artifacts, and why it is important to have trust-worthy hardware, starting from secure integrated circuit design and manufacturing as a baseline. Tools will be used in investigation and forensic analysis. Advanced topics go beyond identification of the attack vector and region, and root causes by researching on self-monitoring, self-repair and self-healing hardware.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5568. Engineering Project Quality and Risk Management, and ISO Standards. 3 Credit Hours.**

This course covers quality and risk management which are under the umbrella of project management, both go hand-in-hand to ensure best practices for engineering for products. Four components of quality management are quality planning, quality assurance, quality control and quality improvement. Also covered is ISO9001, quality management systems standards. Risk management includes enterprise risk management strategy, risk assessment, risk responses, risk communication and awareness training, and risk acceptance. Also covered is ISO 27001 and 2 on information security standards and best practices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5572. Certificate Preparation - (ISC)2/CISSP-Information Systems Security. 3 Credit Hours.**

The International Information Systems Security Certification Consortium (ISC)2 is a non-profit organization that specializes in information security certifications, which demonstrate certificate owners' competence in the subject matter. (ISC)2 is known as the "world's largest IT security organization" and among its certificates, Certified Information Systems Security Professional (CISSP) is the most widely valued. This course covers preparation for the CISSP-ISSEP certification, where ISSEP (Information System Security Engineering Professional) focuses on engineering aspects of the CISSP. The ISSEP exam focuses on four areas of information security: (1) Systems Security Engineering, (2) Certification and Accreditation (C&A) / Risk Management Framework (RMF), (3) Technical Management, and (4) United States Government Information Assurance Related Policies and Issuances. Note: Credits of this course will not apply to MSEE and PhD (EE) degree programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5574. Certificate Preparation - Cisco Networking Academy. 3 Credit Hours.**

This course uses Cisco Networking Academy material to cover various Cisco Certified Network Security topics concentrating on network security principals, tools, and configurations, and includes a hands-on lab equipped with Cisco networking equipment. Note: Credits of this course will not apply to MSEE and PhD (EE) degree programs

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5575. Capstone Project. 3 Credit Hours.**

A Capstone Project is a work-study project where a student with support from his/her sponsoring entity works on a current or emerging challenge on cybersecurity. Engineering Resilient Systems (ERS) is an example of a DoD sponsored Capstone Project. Through Capstone Project, a student will develop tools and procedures to produce a complete and robust product requirement, make efficient and effective engineering decisions, consider manufacturability of a system design, and establish a baseline resiliency including Tactics, Techniques, and Procedures (TTP) against threats. Note: Credits of this course will not apply to MSEE and PhD (EE) degree programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5600. Graduate Seminar. 0 Credit Hours.**

Required seminar for graduate students in Electrical and Computer Engineering for scientific and professional development. Speakers for these seminars include prominent researchers from academic and professional backgrounds. Students will be graded on participation of at least 70% of the bi-weekly seminars during the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 5612. Advanced Processor Systems. 3 Credit Hours.**

Hardware description language (Verilog) design of processor systems for digital signal processing and data communication. Projects will be assigned in simulation and synthesis of dataflow and processor architectures targeting field programmable gate arrays (FPGA). NOTE: Students cannot earn credit for both ECE 4612 and ECE 5612.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5622. Introduction to Computer Architecture. 3 Credit Hours.**

Instruction set architectures, Register Transfer Level hardware description. Data-path design. Controller design. Caches and memory systems. Addressing. Microprogramming. Computer arithmetic. Survey of current computers and microprocessors. Projects will include Verilog/VHDL implementation of data-path components and testing them on FPGAs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5712. Power Systems Engineering. 3 Credit Hours.**

This course introduces the modern power systems and its changing landscape. The course covers the basics of power generation and transformers, and an introduction to power electronic devices, AC transmission and distribution, power flow, economic dispatch, transient and stability analysis, short circuit analysis, and HVDC systems, power system protection, power market deregulation. NOTE: Students cannot earn credit for both ECE 4712 and ECE 5712.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5714. Introduction to Intelligent Systems Engineering. 3 Credit Hours.**

Introduction of the use of artificial intelligence techniques to develop intelligent systems. The course gives the student 1) an overview of what artificial intelligence is and its current state; 2) an overview of intelligent systems --what they are and their possible future role in society; 3) a practical and theoretical knowledge of expert systems, their development, implementation and maintenance and 4) an introduction to intelligent tutoring systems and to provide a perspective about the potential impact of these systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5716. Power System Economics. 3 Credit Hours.**

This course aims at enriching course offerings for graduate students who would like to have a focus on electric energy. We will discuss major problems in power system economics, such as: optimization formulations and solutions; competition; bidding strategies; locational marginal prices; ancillary services; and investment decisions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in ECE 5712.

**ECE 5722. Power Electronic Devices and Systems. 3 Credit Hours.**

This course introduces power electronic devices and circuits, and their applications in modern power systems. Topics include DC-DC converters in buck and boost topologies, and their modeling and feedback control; AC-DC rectification and control; DC-AC inverters, modeling, and voltage and frequency control; Three-phase inverters, and HVDC transmission. This course will use Matlab/Simulink simulation for student projects and homework. NOTE: Students cannot earn credit for both ECE 4722 and ECE 5722.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5732. Electric Machines and Drives. 3 Credit Hours.**

Fundamentals of electromechanical energy conversion, electric drives and systems. Transformers, DC machines, synchronous machines, induction motors, dq-transformation, vector control of induction motors, reluctance motors, single phase motors, brushless dc motor. Introduction to power electronics and their applications in power drives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 5742. Power Converter Modeling and Control. 3 Credit Hours.**

This course introduces modeling and control methodologies of modern power electronic systems and their applications. The course covers modeling of DC-DC, DC-AC, AC-DC and AC-DC-AC power electronic converters, conventional and advanced control diagram design of power converters, interactions among multiple converters in power electronics dominated systems. Also industrial and grid-level applications of these technologies will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (ECE 5722 or ECE 4722)

**ECE 5752. Power Electronics Design and Testing. 3 Credit Hours.**

This course focuses on the design and testing perspectives of power electronics technologies. Particularly, the course introduces the popular software environment for power electronics testing and introduces the detailed steps and procedures of power electronics simulation model development. The course emphasizes topology, modulation, and control of power electronic converters, and also highlights some selected applications for simulation testing. Lab sessions will also be arranged for hardware testing of power electronics technologies. The major goal of this course is to let the students know how power electronic converters are used and tested in real-world applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in ECE 5722.

**ECE 5826. Information Theory. 3 Credit Hours.**

Information Theory is a field that has been central to the development of modern communications and computing technologies. The goal of this course is to provide the student with a thorough understanding of the concepts of entropy and information, and how to apply these to real world problems such as speech recognition, language engineering, signal compression, and financial modeling. A secondary goal is to develop a mathematically rigorous understanding of methods for measuring and manipulating various measures of information in signals and systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECE 3522.

**ECE 5999. Research Experience in Electrical Engineering. 0 Credit Hours.**

Research Experience provides graduate students laboratory experiences/research practices prior to undertaking independent, directed, master project, master's thesis, or dissertation research. This course allows graduate students the opportunity to learn the use of laboratory equipment, designing and carrying out an experiment(s), collecting preliminary data, field experiences, and participation in laboratory meeting, etc. with faculty which may lead to identifying a faculty mentor. The course will be graded Pass (P) or Fail (F). The Research Experience is a non-repeatable course. After the completion of ECE 5999 - Research Experience in ECE, students will need to be enrolled in independent study, directed research, master's research, master's thesis, dissertation proposal, or dissertation if they continue in an active research program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 8110. Special Topics in Electrical and Computer Engineering. 3 Credit Hours.**

Selected advanced topics in various major research areas under electrical and computer engineering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 8324. Mixed Signal VLSI Design. 3 Credit Hours.**

Basic MOS device physics, single state amplifiers, frequency response, op amps, switched capacitor circuits, short-channel effects, amplifier design for wireless communication, low power static RAM architectures, layout and packaging.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 5324.

**ECE 8334. Nano Applications, MEMS & NEMS. 3 Credit Hours.**

Nano challenges, quantum mechanics, nano materials, nanolithography, optics, carbon nanotubes, GaNa nanotechnology, MEMS and NEMS Architectures, Mathematical Model of MEMS and NEMS, Applications of Nanotechnology: Bio-Medical applications, Optical Devices, Sensors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 5324.

**ECE 8412. Optimal and Robust Control. 3 Credit Hours.**

Concept of optimality, calculus of variations, Euler-Lagrange equation, Pontryagin's minimum principle, Bellman's equation, Kalman filter, uncertainties in physical systems; structured and unstructured uncertainties; application of the Lyapunov method to robust control problems; robust optimal control; state space design for finite and infinite horizon problems; H-infinity design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 5412.

**ECE 8414. Adaptive Control. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 8512. Signal Processing and Communication Theory. 3 Credit Hours.**

Coherent and non-coherent detection of binary and M-ary signals in noise; waveform coding, linear block coding; convolutional, cyclic and turbo codes; error probability and bandwidth-efficiency plane in the design of digital communications systems; multipath and fading channels; simulation of communication systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (ECE 5512 and ENGR 5033)

**ECE 8514. Applications in Digital Signal Processing. 3 Credit Hours.**

FIR and IIR digital filter design, finite word length effects, filter banks, multirate signal processing, spectral analysis (classical, modern, parametric and nonparametric techniques), adaptive filtering (Wiener filter theory) and speech production, analysis, and processing tools and speech coding. Computer experiments using MATLAB will be an integral part of the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 5033.

**ECE 8516. Design and Performance of Communication Networks. 3 Credit Hours.**

An overview of the technologies, architectures and protocols used to build high-speed communication networks. Design and performance analysis techniques for computer communication networks. Topics will include: design and performance analysis of wired and wireless local networks, sensor networks, and Internet. Projects will include developing stochastic models, queuing analysis, and simulations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 8524. Speech Signal Processing. 3 Credit Hours.**

Spectral analysis of non-stationary signals, short-time Fourier transform, homomorphic filtering and filter bank, Speech compression, and synthesis techniques. Weiner filtering for speech enhancement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 8514.

**ECE 8525. Fundamentals of Speech Recognition. 3 Credit Hours.**

This course introduces students to the theory and implementation of modern day speech recognition systems. We begin with a review of pattern recognition and machine learning, including topics such as Gaussian mixture models and Bayesian models. We then discuss the three main components of a speech recognition system: feature extraction, acoustic modeling and language modeling. We conclude the course with an overview of state of the art systems. Students will learn how to simulate and evaluate complex machine learning algorithms such as hidden Markov models and neural networks. Data-driven methodologies will be emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ENGR 5022 and ENGR 5033.

**ECE 8526. Information Theory. 3 Credit Hours.**

Information Theory is a field that has been central to the development of modern communications and computing technologies. The goal of this course is to provide the student with a thorough understanding of the concepts of entropy and information, and how to apply these to real world problems such as speech recognition, language engineering, signal compression, and financial modeling. A secondary goal is to develop a mathematically rigorous understanding of methods for measuring and manipulating various measures of information in signals and systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ENGR 5022 and ENGR 5033.

**ECE 8527. Introduction to Machine Learning and Pattern Recognition. 3 Credit Hours.**

Pattern recognition theory and practice is concerned with the design, analysis, and development of methods for the classification or description of patterns, objects, signals, and processes. At the heart of this discipline is our ability to infer the statistical behavior of data from limited data sets, and to assign data to classes based on generalized notions of distances in a probabilistic space. Many commercial applications of pattern recognition exist today, including voice recognition, fingerprint classification, and retinal scanners. Recent developments in statistical modeling using Bayesian techniques, neural networks, decision trees, fuzzy logic, and syntactic structures have accelerated the growth of pattern recognition applications. The objective of this course is to introduce fundamental methods of pattern recognition, both statistical and neural, with examples from several application areas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ENGR 5022 and ENGR 5033.

**ECE 8528. Advanced Topics in Statistical Modeling for Engineering Applications. 3 Credit Hours.**

This course builds on a basic knowledge of machine learning and reviews recent advances in the field. It is a research-oriented course intended to complement a student's thesis or dissertation research. The course will focus on a selection of emerging machine learning algorithms and analyze contemporary publications on these techniques. The emphasis will be on algorithms suited to large, complex data sets. Both supervised and unsupervised learning methodologies will be discussed. Applications will be drawn from several signal processing disciplines including speech, image and bioengineering applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ENGR 5022, ENGR 5033, and ECE 8527.

**ECE 8529. Fundamentals of EEG Processing. 3 Credit Hours.**

Electroencephalography (EEG) records electrical activity along the scalp, measuring spontaneous electrical activity of the brain. The signals measured along the scalp can be correlated with brain activity, which makes it a primary tool for diagnosis of brain-related illnesses. EEG specialists review these waveforms and develop a diagnosis. EEGs traditionally have been used to diagnose epilepsy and strokes. Other common clinical uses have been for diagnoses of coma, encephalopathies, brain death and sleep disorders. EEGs are increasingly being used to diagnose head-related trauma injuries and Alzheimer's disease. Hence, there is a growing need for expertise to interpret EEGs and, equally important, to understand how these conditions manifest themselves in the EEG signal. In this course we will discuss the techniques neurologists use to manually interpret EEGs. A vast archive of clinical EEG recordings will be studied. Since EEG signals are very low-level electrical signals, we will then discuss digital signal processing that is used to convert the raw electrical signals into visualizations that can be readily interpreted. We will also introduce machine learning techniques that are used to automatically interpret and transcribe these signals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ECE 8622. Advanced Computer Architecture. 3 Credit Hours.**

Advanced course in the design and analysis of computer architecture. Topics will include instruction level parallelism, digital signal processors, network processors and multi-microprocessors. Projects will focus on the design, design analysis and FPGA implementations of computing systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 5322.

**ECE 8712. Power Systems Operation and Control. 3 Credit Hours.**

The emphasis of this course is on computational issues that arise in the analysis and solution of the large-scale operations and control problems in actual power systems. Topics include power flow analysis, contingency analysis, security analysis, load forecasting, economic dispatch, unit commitment, optimal power flow, state estimation, and bad data detection, etc. Additional topics for real time control of power system include substation automation, EMS system architecture, distribution management system (DMS), RTU's and PMU's, and situational awareness and visualization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECE 5712.

**ECE 8722. Applications of Advanced Power Electronics Technologies. 3 Credit Hours.**

In this course, we will start from the basic components and operation principle of power electronic converters and their advanced applications in modern power systems. In particular, the following topics will be included: converter topologies used for grid applications, converter control approaches, AC and DC microgrids, converter interfaced energy storage systems, smart inverters in distribution automation, etc. Applications of power electronic devices and systems used in modern power systems will be presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ECE 5722.

**ECE 8742. Power System Stability. 3 Credit Hours.**

This course introduces advanced concepts on stability and control of power systems. State space concepts of stability and control of dynamic systems are reviewed. Mathematical models of synchronous and induction machines are developed using Park's transformation. The method is extended to modeling converters, inverters, multimachine power grid, and AC/DC microgrid. Power system stability concept is introduced starting with the swing equation and extended to the analysis of multimachine systems. Advanced control methods of induction motors using vector control are discussed. The course includes extensive Matlab simulation studies of power grid and its components.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in ECE 5412 and ECE 5712.

**ECE 9182. Independent Study I. 3 Credit Hours.**

Special study in a particular aspect of engineering under the direct supervision of a graduate faculty member. May be taken once by MS/MSE students and once by Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 9282. Independent Study II. 3 Credit Hours.**

Special study in a particular aspect of engineering under the direct supervision of a graduate faculty member. May be taken once by Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 9324. VLSI Physical Design. 3 Credit Hours.**

This course provides a comprehensive background in the principles and algorithms of VLSI physical design. The algorithms are presented in an intuitive manner so that the student can concentrate on the basic idea of the algorithms. The students are provided enough details to implement the algorithms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 8324 and ECE 5324.

**ECE 9412. Nonlinear Control System. 3 Credit Hours.**

Modeling of nonlinear systems, types of nonlinearity; Phase Plane Analysis, construction of phase portrait, limit cycle, saddle point; Existence and uniqueness of solutions, sensitivity; Lyapunov Stability, region of attraction, construction of Lyapunov functions; Perturbation Analysis variation of parameters, Method of averaging, Describing Functions, frequency domain analysis; Sliding Mode Control, sliding surface; Feedback Linearization, Lie algebra, state and output linearization, applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 8412.

**ECE 9512. Detection, Estimation, and Modulation Theory. 3 Credit Hours.**

Signal detection and estimation in white and non-white noise, MAP estimation, applications in data and telecommunications. Wiener and Kalman-Bucy filters, linear and non-linear modulation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ENGR 5033.

**ECE 9514. Adaptive Signal Processing. 3 Credit Hours.**

Adaptive filter techniques such as Weiner filter, Linear Prediction, Least-Mean-Square, Recursive Least-Squares, Kalman Filtering algorithms. Introduction to the application of adaptive filters to communications, control, and speech processing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (ECE 5514 and ECE 8514)

**ECE 9524. Digital Image Processing. 3 Credit Hours.**

P2D digital filters, digital image edge detection and segmentation, feature extraction, deblurring, wavelet transforms, JPEG image compression, Fourier optics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 8514.

**ECE 9622. Parallel Processing Architectures. 3 Credit Hours.**

This course provides an in-depth study of the design, engineering, and evaluation of modern parallel computers. Design issues covered include: naming, replication, synchronization, latency, overhead, and bandwidth. Other topics include scalable multiprocessors and interconnection network design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in ECE 8612.

**ECE 9991. Directed Research. 1 to 6 Credit Hour.**

Under the guidance of a faculty member, students will select a topic in electro-technology to be researched using at least five references. An extensive research paper must be submitted which will be reviewed by two faculty members. The project report must also be presented at an open seminar. Projects related to industrial applications are encouraged. For non-thesis students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is intended for Ph.D. students who have completed their coursework but who have not yet passed both the Ph.D. Preliminary Examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 9995. Project. 1 to 3 Credit Hour.**

Under the guidance of a faculty member, students will select a topic in electro-technology to be researched using at least five references. Student present the research at an open seminar, and submits an extensive research paper, which will be reviewed by two faculty members. Projects related to industrial applications are encouraged. For non-thesis students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 9996. Thesis. 1 to 3 Credit Hour.**

Under the guidance of a faculty member, students will select a topic in electro-technology, and conduct research leading to submission and oral presentation of a thesis proposal and the final defense of the thesis. For thesis students only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

This course is intended for Ph.D. students who have passed both the Preliminary and Qualifying Examinations but who have not been elevated to candidacy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ECE 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is intended only for those students who have achieved Ph.D. Candidacy status. A minimum of 6 semester hours is required for graduation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Elementary Education (ELED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ELED 9789. Field Experience in Supervision. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Emergency Medicine (EMMD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**EMMD M175. Introduction to Clinical Reasoning. 0 Credit Hours.**

This elective will allow students to practice their clinical reasoning skills by working through difficult cases gathered from the instructors' clinical experience as well as cases from popular TV shows and other types of media. We will go through the process of building a differential diagnosis and practice using online resources to find the answer to difficult questions. Special emphasis will be put on Emergency and Critical Care cases, but we will also discuss different clinical reasoning strategies for a variety of clinical situations. During this course, we will also be working together to solve real patient cases through CrowdMed, an online database for unsolved medical mysteries. This website allows patients with unsolved medical problems to present their own cases and ask for help from the medical community. You will become a "Medical Detective" and submit possible diagnoses to help patients get answers about their medical problems that have stumped their own physicians. We will break students up into teams, each led by one of the resident facilitators, to see who can help the most patients by solving their cases!

**Repeatability:** This course may be repeated for additional credit.

**EMMD M190. Intro to Emergency Medicine. 0 Credit Hours.**

**Course Attributes:** M5

**EMMD M191. Wilderness Medicine. 0 Credit Hours.**

We would like to provide the opportunity at LKSOM for students to explore the field of Wilderness Medicine (WM) early in their medical education in the form of a structured elective. This elective is designed for 1st and 2nd year medical students, with a goal of providing an introduction to the field of WM and environmental medicine while gaining hands-on experience and exposure to skills required for expedition planning, rescue, and wilderness survival. We will create an interactive learning environment where students can learn and practice under the supervision of faculty with experience and training in WM. The Wilderness Medical Society, a CME-accredited resource for academic WM, offers course materials for student electives that we will utilize in the design of this elective.

**Repeatability:** This course may be repeated for additional credit.

**EMMD M199. Point of Care Ultrasound. 0 Credit Hours.**

Point of Care Ultrasound has become an indispensable skill in the evaluation and treatment of patients across the broad spectrum of medicine. Its utilization allows for timely diagnoses, as well as safe and effective treatment. This elective will introduce the fundamentals of ultrasound and the basics scans over seven sessions throughout the semester. The format will include an initial lecture followed by hands-on ultrasound training in the simulation lab.

**Repeatability:** This course may be repeated for additional credit.

**EMMD M401. Emergency Medicine Teaching Elective. 0 Credit Hours.**

Students will help with the summer work-study students. They will be involved with organizing their schedules, assisting them in the ED, developing cases, giving lectures. This will enhance their teaching abilities, as well as their communication skills in working with other students and healthcare workers.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in EMMD M403.

**EMMD M402. Emergency Medical Services. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**EMMD M403. Emergency Medicine. 0 Credit Hours.**

**Course Attributes:** M2

**EMMD M404. Advanced Emergency Medicine. 0 Credit Hours.**

This elective is for 4th-year students only. It is a 4-week elective during which students will be expected to perform at the sub-internship level. They will be responsible for evaluating and managing the undifferentiated and acutely ill patients that present to the emergency department (ED). Working alongside senior residents and attendings, students will take primary responsibility for their patients. They will be expected to perform a focused history and physical exam, develop a differential diagnosis, and create/implement a treatment plan. They will assist in procedures, as well as consultations and the dispositioning of their patients. The students will complete 10-12 clinical shifts while also participating in specialized days where they are introduced to the various fellowship opportunities in the field of Emergency Medicine. These sessions will include a day of focused ultrasound training, EMS operations, and toxicology care. The students will also participate in simulation sessions and procedure labs throughout the rotation. At the closure of the elective, the students will give a 15-minute oral presentation on an interesting case from a patient encounter during their time in the ED. The presentation will include at least two educational pearls regarding that topic. They will receive mid-rotation and end-of-rotation feedback. The standard end-of-shift evaluation EM card will be utilized to assess daily progress and grading. This course will be graded Honors, High Pass, Pass, Fail.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in EMMD M403.

**EMMD M413. Emergency Medicine Health Equity Elective. 0 Credit Hours.**

Students will build their skills, experience and understanding of issues related to health equity and their manifestations in the emergency department. Students will explore social and structural determinants of health, health disparities, and the various levels of intervention to address them. They will acquire new vocabulary to describe the challenges faced by historically marginalized communities. Students will spend clinical time in the emergency department with a focus on how issues of health equity impact patient care. They will also spend time in alternate care settings, including the addiction medicine service, the Begin the Turn mobile unit, and at local community organizations to better understand the role of various stakeholders invested in addressing the challenges and opportunities in North Philadelphia. Students will attend didactic and interactive presentations given by Temple emergency medicine residents and faculty on social emergency medicine topics, and complete asynchronous work and an independent presentation on a related topic of their choice.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in EMMD M403.

**EMMD M424. Bedside Ultrasonography. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**EMMD M433. Medical Toxicology. 0 Credit Hours.**

Rotation may be two or four weeks, depending on rotator preference and residency requirement. Vacations may not be taken during two-week rotations. All rotators to be available M-F 8a-5p to see all patients with attending at bedside or via telemedicine. At least two additional calls per week 5p-9p and one full weekend day per rotation. Bedside consultations occur only at Bethlehem, Anderson, Allentown, and Warren. Rotators will be conferenced into calls with toxicologist when on call. Telemedicine is available at the toxicologist's discretion for any campus and rotator will be expected to have Microsoft Teams app downloaded to computer or phone in order to participate. Consultation notes to be written by resident on Bethlehem and Allentown patients seen at the bedside using template: toxadultconsult.

**Repeatability:** This course may be repeated for additional credit.

## Engineering (ENGR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ENGR 5011. Engineering Mathematics I. 3 Credit Hours.**

This is a survey course in essential mathematics for first-year graduate students in engineering and physical sciences. Topics include analytic methods in ordinary differential equations, complex-variable theory, the laplace transform and its inversion, and initial-value problems and boundary-value problems. Matlab, numerical methods, and introductory numerical algorithm design are introduced.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5012. Engineering Mathematics II. 3 Credit Hours.**

This is a survey course in classical numerical and analytical methods for partial differential equations, for first-year masters and doctoral students in engineering and physical sciences. Topics include analytic methods and numerical methods for partial differential equations in cartesian and non-cartesian coordinate systems, and an introduction to perturbation theory. The course will emphasize quantitative analysis, and assignments will entail computational algorithm design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5022. Engineering Analysis and Applications. 3 Credit Hours.**

Vector space, basis, projection, null space, function space, L2 and space of continuous functions, Hilbert space, orthogonality, generalized Fourier series, linear transformation, adjoint transformation, eigenvalue problem, linear functional, Gateaux and Frechet differential, constrained optimization, infinite dimensional systems, complex analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5031. Engr Prob Stats Stoc Met. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5032. Probability, Statistics, and Stochastic Methods. 3 Credit Hours.**

A balanced approach to probability, statistics, stochastic models, and stochastic differential equations with special emphasis on engineering applications. Random variables, probability distributions, Monte Carlo simulations models, statistical inference theory, design of engineering experiments, reliability and risk assessment, fitting data to probability distributions, ANOVA, stochastic processes, Brownian motion, white noise, random walk, colored noise processes. Differential equations subject to random initial conditions, random forcing functions, and random parameters. Partial differential equations subject to stochastic boundary conditions. New techniques for non-linear differential equations. Computer simulation with MAPLE and other symbolic algebra software.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5033. Probability and Random Processes. 3 Credit Hours.**

Sets and events, Random variables, Distribution and density functions, Functions of multiple random variables, Moments and conditional statistics, Information entropy, stochastic processes, wide-sense stationary process, ergodicity, correlation, and power spectrum of stationary processes. Applications to sampling theory and signal modulation and detection.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5110. Special Topics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 5116. Spacecraft Systems Engineering. 3 Credit Hours.**

The concept of systems engineering is introduced using a satellite application. Systems engineering is a top-down approach to the design, implementation, testing, and deployment of large-scale systems to meet the needs of users. The topics will include systems engineering methodology, dynamics of spacecraft, and celestial mechanics. This course will also introduce the notion of invention and innovation, and how they are related to the intellectual property issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5117. Experimental Methods. 3 Credit Hours.**

Application and design of experimental techniques and measurement systems used in engineering laboratories. Introduction to the DMM, digital scope, and computer-based data acquisition systems for measurements of force, motion, pressure, temperature, and flow in steady and unsteady systems. Data transmission, data analysis and presentation, and computer interfacing techniques. Statistical methods and uncertainty analysis. Hands-on experience with state-of-the-art instrumentation systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5121. Design of Experiments. 3 Credit Hours.**

The practice of modern science and engineering is synonymous with the ability to plan, design and conduct experiments efficiently and effectively, and analyze the resulting data to obtain objective conclusions in applications ranging from new product design and development to phenomenological/basic science studies. In this course we will focus primarily on methodological and design issues in planning experiments rather than on statistical analysis of the data. Nevertheless, we will briefly review various statistical analysis approaches required for fully designed experiment. Case studies involving single factor experiments, factorial designs, manipulation checks, etc. will be used to develop hands on skills for designing your own experiments. The course will have a focus on engineering approach to design of experiments with a particular emphasis on problem definition, system identification, data collection, statistical analysis, and hypothesis testing. For the final project, you will prepare a fellowship or grant (e.g. NSF GRFP or AHA Predoctoral) application ready for submission to a funding agency.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5201. Multiscale Design of Materials and Structures. 3 Credit Hours.**

All materials and structures have a multiscale nature spanning from atoms to molecules, microstructures, and finally to structures with real-world functionality and applications. This course is important for a comprehensive and project-based understanding of computational techniques that enable high-fidelity, simulation-driven design across multiple length scales. Students will learn the theory and practice of several computational techniques including molecular dynamics, micromechanics, and structural optimization. Students will apply computational tools to extract material properties based on atomic structures or microstructures, design atomic structures or microstructures of materials to achieve desired properties, and optimize engineering structures based on material properties fed from lower-scale calculations. Students will become independently competent in atomistic modeling and simulation of fluids and solids, microstructural analysis and design of hybrid composites and structured materials, and the optimal design of engineering structures for maximum performance and weight savings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5314. Continuum Mechanics. 3 Credit Hours.**

This course covers tensors, kinematics of a continuum, stress, integral formulations, linear isotropic elastic solid, and an introduction to Newtonian Fluid (CLO 3).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5334. Dynamical Systems. 3 Credit Hours.**

This course focuses on the algebraic and differential equations governing the static and dynamic 3D motion of 3D bodies, including vectors, vector differentiation, and dyads. The equations of motion for multibody systems will be derived using Newton-Euler, Lagrange, and Kane's methods. Computational tools for 3D force and motion analysis will be used to simulate physical systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5511. Fluid Dynamics. 3 Credit Hours.**

Navier-Stoke's equation, Laminar and turbulent flow, boundary layer phenomena, compressible fluid flow including isotropic flow, shock waves, friction flow, and flow with heat transfer.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 5576. Computational Fluid Dynamics. 3 Credit Hours.**

This course introduces the fundamentals of numerical solution methods for thermal and fluid dynamics applications. Focus is placed on the development of explicit and implicit methods for solving linear and nonlinear partial differential equations for heat conduction, wave propagation, and potential flow. Important topics pertaining to the use of commercial and research grade CFD software are included. As a final course objective, students will develop a solution method for 2D incompressible flow using MATLAB or a similar programming environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENGR 8110. Special Topics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9182. Independent Study I. 3 Credit Hours.**

Special study in a particular aspect of engineering under the direct supervision of a graduate faculty member. May be taken once by MS/MSE students and once by Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9185. Experience in Engineering Profession I. 1 to 3 Credit Hour.**

This course involves work experience in industry on current industrial practices of advanced engineering concepts under the supervision of a faculty advisor and an industrial mentor. At the end of the internship period, the student submits a technical report that is suitable for general public release. The report is graded by the faculty advisor in consultation with the industrial mentor. Students already employed in the industry are not eligible to register for this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9282. Independent Study II. 3 Credit Hours.**

Special study in a particular aspect of engineering under the direct supervision of a graduate faculty member. May be taken once by Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9285. Exper Engineer Prof II. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9990. Engineering Seminar. 1 to 3 Credit Hour.**

Students present their research results at an open seminar. The seminars may be arranged on a biweekly basis over the semester. Active participation of all graduate students is expected.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9991. Directed Research. 1 to 6 Credit Hour.**

Under the guidance of a faculty member, the student will conduct independent research on a selected topic in engineering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is intended for Ph.D. students who have completed their coursework but who have not yet passed both the Ph.D. Preliminary Examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9995. Project. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9996. Thesis. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

This course is intended for Ph.D. students who have passed both the Preliminary and Qualifying Examinations but who have not been elevated to candidacy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENGR 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is intended only for those students who have achieved Ph.D. Candidacy status. A minimum of 6 semester hours is required for graduation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Engineering Management (EMGT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**EMGT 5631. Design Thinking. 1.5 Credit Hour.**

Many technologists view design as a function that takes place after the product or solution has been developed. Design thinking offers an alternative, customer driven approach to the commercialization of technological innovation, which embeds potential customer usage patterns into the development from the outset. Design thinking is thus a radical approach to the design process that enables much higher levels of innovation (and therefore commercial success) into the design process, especially in comparison with the traditional view of design that tends to foster incremental thinking. In this course we will share case studies of successful and unsuccessful product design, and provide participants with a series of tools to help them understand and deploy a design thinking process. In the course we will share frameworks for identifying market and technology trends that can stimulate opportunities for radical designs based on user engagement. With an improved understanding of the design thinking process participants will be better prepared for commercial success, whether they work in a large company deploying new solutions, or are interested in starting their own venture. The course will place particular emphasis on the importance and role of experimentation and learning from failure, as well as provide access to a series of tools that can help an organization decide whether, or not, to continue with a specific development process. In this course, students learn theories and practices for innovation, tools and methods for design inquiry, and characteristics of "design attitude." The course emphasizes hands-on project and studio-style project works.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5632. Intrapreneurship: Managing the New Product Development Process. 3 Credit Hours.**

The course is designed to give technology students insights into the market and commercial factors that should be considered when developing new products or technologies. This course offers students the chance to understand and apply a number of analytical, decision making, and planning tools that can be used to guide the development of new products (and services) from idea to the marketplace (invoice). The course highlights critical issues associated with linking business objectives to technology development, and how each influences the other. Specific topics addressed include: the development of new product strategy and policy, selection of product market strategies, deployment and application of new product development processes, portfolio management, product development tools and metrics, market research, and importantly the people and organizational issues associated with the product development process. Participants in the course will learn to appreciate the advantages of introducing more formal new product development processes that break down the overall process into stages, and understand how and why the consideration of different strategic, technical and financial issues at each stage improve the likelihood of long-term commercial success. Not only will the course prepare participants for an active role in the product development process in a large organization or to participate in the technology development process in a new venture, they will also be prepared to obtain a certificate as a New Product Development Professional (NPDP) Certification offered by the PDMA.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5633. Management Principles for Innovators, Engineers and Technologists. 3 Credit Hours.**

This is an introductory course for engineers and technologists who have no formal business training. It includes an introduction to the theory of the firm and the principles of management. It includes looking at the evolution of management, and the new roles for leaders and managers in innovative organizations. The course also gives a basic overview of corporate finance, and explains the various components of balance sheets, profit and loss and cash flow statements. Finally, the course deals with basic human resource and people management issues in the contexts of large organizations trying to adapt to rapid changes in the market.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5634. Project Management Overview and Project Management Essentials. 1.5 Credit Hour.**

This course is designed for individuals working in both large and small organizations who are often faced with the challenges of managing multiple priorities and projects with limited resources. Whether these projects include a research and development project, the opening of a new production line, or the construction of a new facility, individuals are accountable for their on-time and on-budget performance. This course is an introduction course and follows a life-cycle approach to managing projects, beginning with project initiation concerns and ending with project termination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5635. Financial Management for Technologists. 1.5 Credit Hour.**

This course provides students with a real world understanding of what the key financial reports of a company actually mean and what is really important as a manager. It focuses on understanding profit and loss statements, budgets and cash flows. Also, it examines various methods for calculating financial return, and provides tools to help participants better budget, track project costs and decide between project alternatives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5636. Lean Six Sigma and the Science of Improvement. 3 Credit Hours.**

The discipline of quality management is increasingly recognized as an essential element in the management of any company. Quality management provides a number of approaches and tools to help individuals in both large and small organizations ensure that products and solutions consistently meet and exceed customer expectations, while ensuring that the company's processes maximize operational efficiency. In this course we will introduce a number of quality management tools: Six-Sigma, kaizen and TQM, that participants will be expected to deploy on actual cases. In addition, students will be provided with an overview of statistical tools that are essential when deploying a quality management system (i.e. Pareto Analysis, correlations and regression). The course will also focus on developing appropriate measurement systems, in order to use quantitative as well as qualitative tools to help identify specific areas that need attention. This will help quantify the magnitude of identified problems, prioritize the sequence in which each is going to be addressed, and then measure improvements made. The course is essential to those operating in larger companies, but the tools deployed will be useful to anyone looking to improve the effectiveness and efficiency of a smaller business, including those running their own ventures.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5637. Marketing Technological Products and Services. 1.5 Credit Hour.**

This course applies the theories and constructs of marketing to the challenges of marketing technological products and services to organizational buyers. A firm's marketing initiatives can directly impact firm revenues (and costs), and ultimately firm value. It is therefore essential that managers understand the process of developing and managing marketing strategy (target market selection and customer value proposition). This course provides insight into marketing programs (product, promotion, place, and pricing), and describes how those programs can be integrated to yield a superior customer value proposition. A focus on technological products and business-to-business customers will be maintained throughout the course. Various pedagogical methods are utilized, including lectures, case studies, in-class presentations, and group projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5638. Executive Engineering Leadership. 1.5 Credit Hour.**

This is an eclectic, interactive course aimed at facilitating technology professionals for the development of a deeper understanding of selected topics that contribute to heightened self-awareness as the foundation for a higher level of personal and executive development and effectiveness. The course examines the inter-relatedness between leadership and management, cognitive and affective aspects of executive behavior and managerial decision-making. It includes topics such as individual self-analysis of leadership style, communications skills, personal goals and values, interpersonal skills, team-building, negotiation skills, conflict management and group dynamics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EMGT 5633 (may be taken concurrently)

**EMGT 5639. Advanced Financial Management for Technologists. 1.5 Credit Hour.**

This course is a continuation of EMGT 5635 and studies problems in planning, controlling, and directing engineering through the perspective of financial analysis. The course will exam the constructs of profitability, liquidity, and the organizational structure of the engineering function using financial analysis and forecasting. Financial techniques will be applied to adjust engineering operations to meet the organization's total financial position and goals. Various pedagogical methods are utilized, including lectures, homework and quiz assignments, exams, and a team financial analysis project of technology based organization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EMGT 5635 (may be taken concurrently)

**EMGT 5642. Project Management - Project Planning, Implementation and Case Study. 1.5 Credit Hour.**

This course follows EMGT 5634 and includes project planning and scheduling which are given the most emphasis, making use of the PERT and CPM approaches. A course project is required. This course is designed to provide simple project management tools to help participants define project scope, agree on project milestones and track project performance. For individuals with multiple projects, learning these project management techniques is both an essential way of assigning priorities and increasing the likelihood of good performance, and in communicating with project participants and other stakeholders to allocate responsibilities and monitor outcomes. This course will provide participants with a number of project management tools and the opportunity to deploy them on case studies, in order for them to learn which tools are most appropriate for a specific application. In addition, the experience of using project management tools will help them to make sure they establish the groundwork for success when taking on new projects. Participants in this course may also gain credits for certification from the Project Management Institute (PMI).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in EMGT 5634 (may be taken concurrently)

**EMGT 5645. Fundamentals of Interpersonal Leadership for Technologists. 1.5 Credit Hour.**

This is an introductory course for engineers and technologists who have no formal business training. The course deals with basic human resource and people management issues in the context of large organizations trying to adapt to rapid changes in the market.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EMGT 5646. Fundamentals of Team Leadership. 1.5 Credit Hour.**

This is an introductory course for engineers and technologists who have no formal business training. The course deals with the formation and leadership of teams in the contexts of large organizations trying to adapt to rapid changes in the market.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in EMGT 5645 (may be taken concurrently)

**EMGT 8110. Special Topics in Engineering Management. 1.5 to 3 Credit Hour.**

Selected topics in Engineering Management. Please consult with instructor for detailed description.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EMGT 9682. Independent Study in Engineering Management. 3 Credit Hours.**

The Independent Study course will allow students to work on a relevant project in the field of Engineering Management under the direct supervision of faculty.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EMGT 9995. Capstone for Engineering Management. 3 Credit Hours.**

The Capstone course will allow students to complete final projects in their Engineering Management program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## English (ENG)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ENG 5001. Introduction to Graduate Study in English. 3 Credit Hours.**

This course offers practice in a variety of written genres vital to professional life in higher education: the abstract, the proposal, the conference paper, the review, and the writing sample. It also requires students to learn (and intervene in) at least one critical debate. The course is designed to help professionalize graduate students who wish to pursue an academic job by teaching the tools and methods of literary scholarship, including library/database skills, archival research, historical research, critical theory, and textual editing. However, as a history and study of the profession, it should also be helpful to those wishing to learn how institutions of higher education operate and better understand the stakes and stakeholders who are committed to continuing humanities education. In addition to the writing assignments already mentioned, students will be asked to complete several shorter assignments, including an archive report, an institution report, interviews, and an annotated bibliography.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENG 5011. Early British Literature. 3 Credit Hours.**

Topical readings that emphasize pre-Renaissance literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5012. Early American Literature. 3 Credit Hours.**

Topical readings that emphasize American literature and criticism prior to 1800. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5014. 16th and 17th Century British Literature. 3 Credit Hours.**

Topical readings that emphasize Renaissance and/or Restoration literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5016. 18th Century British Literature. 3 Credit Hours.**

This course surveys major literary figures and representative literary forms of the 18th Century. We will consider literature's relation to political, social, and cultural developments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5018. 19th Century British Literature. 3 Credit Hours.**

Topical readings that emphasize Romantic and/or Victorian literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5021. 19th Century American Literature. 3 Credit Hours.**

Topical readings that emphasize nineteenth-century American literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5022. 20th and 21st Century British Literature. 3 Credit Hours.**

Topical readings that emphasize British literature and criticism since about 1900. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5024. 20th and 21st Century American Literature. 3 Credit Hours.**

Topical readings that emphasize American literature and criticism since about 1900. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5026. Anglophone Literatures. 3 Credit Hours.**

Topical readings that emphasize writing in English from African, Australia, the Caribbean, India, and other places besides Britain and America. Readings may include material from any time period. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5028. Literatures in Translation. 3 Credit Hours.**

Introductory readings that emphasize world literature and criticism from any time period. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5031. Translation Study. 3 Credit Hours.**

An introduction to the theory and practice of translation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5032. Book History. 3 Credit Hours.**

An introduction to the theory and practice of book history.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5100. Topics - Literary Genres. 3 Credit Hours.**

An introduction to the characteristics and problems of genre. Readings may emphasize poetry, non-fiction prose, the novel, drama, biography, autobiography, or other topics related to genre. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5200. Topics - Literature and Culture. 3 Credit Hours.**

Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5300. Topics - Cinema and Media Arts. 3 Credit Hours.**

An introduction to cinema and media history and theory. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5301. Methods in Cinema and Media Studies. 3 Credit Hours.**

An introduction to ways of reading, writing on, and teaching film. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5401. Introduction to Digital Text Methods. 3 Credit Hours.**

This course introduces students to the technical and theoretical aspects of working with digital texts. Classes will consider the conceptual differences between digital and print forms of textuality, the relationship between methods of quantitative computational analysis and the discipline's historic focus on qualitative analysis, the logic of specific analytical tools, the history of computer-assisted textual analysis, and other theoretical problems inherent in thinking about digital texts. Typical topics may also include current text encoding methods, such as TEI; current textual data formatting for digital editions using XML; textual transformations, using XSLT or other programming languages; and specific computational methods of textual analysis, such as topic modeling, network analysis, and stylometry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**ENG 5500. Topics - Critical Theory. 3 Credit Hours.**

Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5501. History of Critical Theory. 3 Credit Hours.**

An introduction to critical schools from classical antiquity to the present.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5502. Current Directions in Critical Theory. 3 Credit Hours.**

An introduction to recent and/or contemporary critical theory.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5600. Special Topics in Creative Writing. 3 Credit Hours.**

A required course for MFA creative writing students. Special Topics in Creative Writing has both critical and creative writing components. The topic varies from year to year.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5601. Poetry Workshop. 3 Credit Hours.**

Open only to students in the Creative Writing MFA program. Intensive discussion of student poetry and the work of established poets whose concerns are related to those of the students. Frequent individual conferences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5602. Fiction Workshop. 3 Credit Hours.**

Open only to students in the Creative Writing MFA program. Intensive discussion of student fiction and the work of established fiction writers whose concerns are related to those of the students. Frequent individual conferences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5603. Craft in Creative Writing. 3 Credit Hours.**

Focuses on craft elements of fiction or poetry. Content varies according to instructor and genre. Required course for M.F.A. candidates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5701. Composition Research Methods. 3 Credit Hours.**

An overview of current work in rhetoric and composition, and concentrated study in such areas as history of rhetoric, analyzing student texts, and evaluation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5702. Historical Studies in Language and Rhetoric. 3 Credit Hours.**

An introduction to historical study in language and/or rhetoric from classical antiquity to the present.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5710. Topics - Literacy and Language. 3 Credit Hours.**

Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5720. Topics - Rhetoric and Composition. 3 Credit Hours.**

Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 5811. Creative Nonfiction. 3 Credit Hours.**

An introduction to the study and practice of creative nonfiction in its various forms, including memoir, narrative journalism, arts and cultural criticism, and hybrid works. Students will read widely across the genre and respond critically to published texts, while also producing their own creative works and offering feedback on the work of their classmates. Students will discuss issues of craft - voice, style, structure, argument, etc. - but also the larger ethical and political questions raised by works in the genre. What should the relationship be, for instance, between creative nonfiction and various notions of truth? And how does the still-emerging genre of creative nonfiction define itself both within and against other established artistic forms? A final portfolio will be a mix of creative and critical work, developed and significantly revised over the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENG 5821. Literary Editing and Publishing. 3 Credit Hours.**

Students in this course will gain practical, hands-on editorial experience by collaborating to produce a literary publication. The specific publication project will vary from semester to semester, depending on the instructor and the availability of partner presses/publications, but may include: editing a special issue of an existing literary journal; editing a literary anthology for an established small press; managing the design and production process for a single-author book or chapbook; reading submissions and making editorial decisions for a literary contest. In addition to this central project, the class will be engaged in a study of the contemporary landscape for literary publishing. Students will read and write about literary journals and small presses, learning about the various communities these publications serve and how they work to connect writers and readers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENG 8101. Advanced Study - Early English Literature. 3 Credit Hours.**

Advanced study of topics in pre-Renaissance literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8102. Advanced Study - Early American Literature. 3 Credit Hours.**

Advanced study of topics in American literature and criticism prior to 1800. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8104. Advanced Study - 16th and 17th Century British Literature. 3 Credit Hours.**

Advanced study of topics in Renaissance and/or Restoration literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8106. Advanced Study - 18th Century British Literature. 3 Credit Hours.**

Advanced study of topics in Restoration and/or eighteenth-century British literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8108. Advanced Study - 19th Century British Literature. 3 Credit Hours.**

Advanced study of topics in Romantic and/or Victorian literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8109. Advanced Study - 19th Century American Literature. 3 Credit Hours.**

Advanced study of topics in nineteenth-century American literature and criticism. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8202. Advanced Study - 20th and 21st Century British Literature. 3 Credit Hours.**

Advanced study of topics in British literature and criticism since about 1900. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8204. Advanced Study - 20th and 21st Century American Literature. 3 Credit Hours.**

Advanced study of topics in American literature and criticism since about 1900. Readings may include material from other periods as well. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8205. Advanced Study - Anglophone Literature. 3 Credit Hours.**

Advanced study of topics in writing in English from African, Australia, the Caribbean, India, and other places besides Britain and America. Readings may include material from any time period. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8301. Advanced Study in Translation. 3 Credit Hours.**

Advanced study of topics in the theory and practice of translation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8302. Advanced Study in Book History. 3 Credit Hours.**

Advanced study of topics in the theory and practice of book history.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8304. Advanced Study in Genre. 3 Credit Hours.**

Advanced study of topics in genre. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8402. Advanced Study in Cinema and Media. 3 Credit Hours.**

Advanced study of topics in cinema and media history, criticism, and theory. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8501. Advanced Study in Critical Theory. 3 Credit Hours.**

Advanced study of topics in critical theory. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8704. Advanced Study in Literacy and Language. 3 Credit Hours.**

Advanced study of topics in literacy and language. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8706. Advanced Study in Rhetoric and Composition. 3 Credit Hours.**

Advanced study of topics in rhetoric and composition. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8900. Advanced Study in Literature and Culture. 3 Credit Hours.**

Advanced study of topics in literary and cultural studies. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 8904. TU/Penn Exchange Poetics. 3 Credit Hours.**

One student a year is permitted to register for one course in poetics at the University of Pennsylvania. Any student admitted to the graduate program in English can apply to participate in the exchange program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENG 8985. Teaching in Higher Education: Writing. 3 Credit Hours.**

An introduction to the theory and practice of writing instruction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENG 9082. Independent Study. 1 to 6 Credit Hour.**

Independent study. By arrangement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9083. Master's Manuscript Tutorial. 3 Credit Hours.**

For Creative Writing majors. A tutorial in which the creative manuscript required for graduation is developed. Related readings. Weekly conferences. Two semesters are required.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: English.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9089. Rome Seminar in Art and Culture. 6 Credit Hours.**

For advanced undergraduate, graduate and post-doctoral students in fields such as literature, film studies, philosophy, art, and social theory. Graduate credit available. Summer session I.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9100. Seminar in Literary and Cultural Studies. 3 Credit Hours.**

Intensive reading and study of literary and cultural studies in a small class setting. Content varies. May be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9200. Seminar in Cinema and Media Studies. 3 Credit Hours.**

A seminar devoted to an exploration of a topic in media studies, such as a film or television genre, a national cinema, the work of a particular director or a critical and theoretical issue of current debate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9300. Seminar in Critical Theory. 3 Credit Hours.**

Intensive reading and study of critical theory in a small class setting. Content varies. Can be taken for more than one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9400. Seminar in Rhetoric and Composition. 3 Credit Hours.**

Intensive reading and study of rhetorical and/or composition in a small class setting. Content varies. Can be taken more than once for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

Advanced seminar for doctoral candidates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9995. Master's Project. 1 to 6 Credit Hour.**

Creative thesis for M.F.A. candidates. Required for graduation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9996. Master's Essay. 1 to 6 Credit Hour.**

For doctoral candidates who select the M.A. option.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Registration required each semester after Preliminary Examinations while researching the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENG 9999. Dissertation Research. 1 to 6 Credit Hour.**

Dissertation research seminar for doctoral candidates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

**ENES 5641. Tchg Composition Sec Sch. 3 Credit Hours.**

Looks at four major aspects of teaching writing: writing as a cognitive process, the development of writing abilities, approaches to the teaching of writing, and evaluating writing. Attends both to writing reader-based prose such as exposition, argumentation, and persuasion and writer-based prose such as creative and journal writing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENES 5642. Tchg Literature Sec Sch. 3 Credit Hours.**

Designed for junior and senior high school teachers, the course focuses on theoretical framework, selection and organization of units of instruction, methods and materials appropriate for teaching literature. Attends to relating literature to learner needs, interests, and reading level.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENES 8623. Applied Ling for Eng Tch. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENES 8624. Tch New Grammars-Sec Sch. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENES 8641. Sem in Tchg Reading N-12. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENES 8744. Current Issues Lang Educ. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENES 9782. Special Projects Eng Ed. 1 to 12 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENES 9882. Grad Ind Study Eng Ed-S. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENES 9887. Seminar Pract in Commun. 3 to 6 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**ENES 9987. Seminar Pract in Commun. 3 to 6 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## **Environmental Health (ENVH)**

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**ENVH 5004. Environmental Health. 1.5 Credit Hour.**

ENVH 5004 is a required foundational, introductory course for the MPH degree programs, and as such serves as an introduction to the various aspects of the Environmental Health field. The course incorporates not only the common concepts associated with environmental exposures (air, water, soil, food, etc.) but also legacy and emerging issues associated with environmental threats to human health, including the potential impacts of emerging contaminants on human health. The emphasis is on biological, chemical, and physical sources of exposures, their salient characteristics, potential effects on human and ecological health, and the modern responses (methods, actions, and policies) for limiting exposures and effects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENVH 5013. Global Environmental Health. 3 Credit Hours.**

This is an intermediate-level graduate course for those interested in environmental health and global health. Other graduate students may attend the course with the instructor's permission, provided they meet the course prerequisites. This course does not meet the core requirement for environmental health in the MPH program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ENVH 5004 (may be taken concurrently), ENVH 5103, or PBHL 5103)

**ENVH 5305. Environmental Toxicology. 3 Credit Hours.**

This course reviews the absorption, distribution, metabolism, and excretion of environmental toxicants. Methods used to measure acute and chronic toxicity, including carcinogenesis, are explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**ENVH 5309. Water, Sanitation and Public Health. 3 Credit Hours.**

This is an intermediate-level graduate course for those interested in water, sanitation and hygiene and the implications on public health. Graduate students from the College of Public Health or from Engineering, Environmental Sciences or other related fields may attend the course with the instructor's permission. The course explores the importance of water, sanitation and hygiene on public health. The course is designed for the students to get hands-on learning about selecting and designing appropriate water and sanitation interventions as well as selecting methods for evaluating the public health impact of these interventions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**ENVH 8016. Human Health Risk Analysis. 3 Credit Hours.**

This course is an introduction to the use of stochastic modeling to identify, assess, and manage environmental health hazards, risk assessment, and analysis through the lens of public health. Students will develop an understanding of the underlying sciences and mathematics that fall within exposure science and use Markov chain method to build exposure models.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (EPBI 5002 (may be taken concurrently) or PBHL 5002 (may be taken concurrently))

**ENVH 8019. Environmental Policy and Regulation. 3 Credit Hours.**

This is an upper-level graduate course that focuses on the concepts of policy and regulatory systems meant for the protection and management of the environment in the United States, including the evolution of the regulatory systems and policy making process to address both legacy and emerging environmental issues and the factors that shape these policies and regulations. Emphasis will be placed on the development of the standards, enforcement, and compliance of selected federal environmental regulations and their equivalent enforcements at the state and local levels, and ultimately, how those regulations influence public health. The course might be of interest to those interested in understanding environmental policy and regulation in the U.S., identifying means to facilitate changes in environmental policy for human health and environmental protection, and how it provides foundation for other international policies and laws pertaining to environmental management and sustainability. Students may find this as an applied policy- and decision-making course. The course will bring in other experts, either in the form of team teaching or guest speakers, who will offer relevant and timely perspectives on topics of significant interest.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (PBHL 5005, SBS 5005, or HPM 5005) and (PBHL 5103 or ENVH 5103)

**ENVH 8207. Environmental Epidemiology. 3 Credit Hours.**

This intermediate course will cover selected topics in occupational and environmental epidemiology through a focus on specific health outcomes, such as non-malignant respiratory diseases, cancer, and musculoskeletal disorders, within the context of particular study designs or exposures. Students will have the opportunity to critically examine the current literature and to study contemporary issues in research. Exposure assessment, biomarkers, and emerging diseases within the context of the workplace and the environment will be addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ENVH 5004 or ENVH 5103) and (EPBI 5201, PBHL 5201, EPBI 5101, or PBHL 5101)

**ENVH 8309. Exposure Assessment. 3 Credit Hours.**

Exposure assessment is the multidisciplinary field that identifies and characterizes exposure to environmental agents; develops estimates of exposure for epidemiology, exposure-response, trend and surveillance, and risk assessment studies; and evaluates the significance of exposure of effectiveness of intervention strategies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**ENVH 9289. MPH Fieldwork I. 3 Credit Hours.**

This course entails a fieldwork project or internship in a public health agency. It includes seminars, oral and written reports of progress, and joint supervision by a preceptor and faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EPBI 5201, EPBI 5002, EPBI 5005, HPM 5006, SBS 5001, and EPBI 8012 (may be taken concurrently)

**ENVH 9389. MPH Fieldwork II. 3 Credit Hours.**

This course is an evaluation of the fieldwork project or internship using a full range of research methodologies. Data are collected, analyzed, and reported in a comprehensive final report. Oral and/or poster presentations are presented to public health organizations. The course includes a final oral defense of the project or internship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Epidemiology and Biostatistics (EPBI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**EPBI 5001. Biostatistics for Health Professions. 3 Credit Hours.**

This course is for graduate students in nursing and other health-related professions and is meant to teach students the common biostatistical tools used to analyze, present and interpret health-related data. The course will cover topics including data summary and visualization, descriptive statistics, sampling and confidence intervals, hypothesis testing, diagnostic tests, and inference related to t-test, ANOVA, simple and multiple regression, nonparametric tests and measurement agreements. Statistical processing through the program SPSS will be integrated into the program and used in tandem with critical principles needed for effective statistical decision making. At the conclusion of the course, students will be able to analyze real data sets and provide quantitative evidence to support scientific conclusions.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5002. Biostatistics. 3 Credit Hours.**

Students will review fundamentals of descriptive statistics, estimation, and hypothesis testing. More advanced influential methods will be introduced, including, but not limited to, regression and correlation and analysis of variance. At the conclusion of the course, students will be able to analyze real data sets and provide quantitative evidence to support scientific conclusions. The emphasis is on "doing" statistics utilizing sound statistical theory and relying on validated statistical software (SAS/SPSS) to produce descriptive statistics and inferential analyses, and interpret the results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5003. Spatial Analysis in Public Health. 3 Credit Hours.**

This course will create a methodological framework for approaching public health issues within the context of spatial investigations of health and disease, both internally via perceptual mapping, and externally via geographic information systems (GIS). This integrative discipline provides the opportunity for students to draw upon the concepts and techniques of sound public health and add a spatial perspective to their analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5005. Applied Analysis of Health. 1.5 Credit Hour.**

This lab course will focus on integrating concepts from biostatistics, epidemiology, environmental health, health policy, and social and behavioral health through hands-on data analysis and presentation techniques using SAS statistical software. Modules will also include SPSS and qualitative software. Labs will immerse students in applied exercises so they more fully understand the statistical principles presented in the co-requisite lecture course (EPBI 5002) as well become comfortable assessing available data and producing data-driven public health materials for various audiences. Each lab session includes exercises to help students more fully understand the statistical and analytic principles. It also re-enforces material covered in EPBI 5101, EPBI 5201, and EPBI 5002.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Co-requisites:** EPBI 5002.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101 (may be taken concurrently) or EPBI 5201 (may be taken concurrently))

**EPBI 5006. Biostatistics and Applied Analysis of Health. 4.5 Credit Hours.**

EPBI 5006 is an integrated course with a lecture component focused on the fundamentals of biostatistics and a lab component where students learn and apply statistical computing skills related to the fundamentals of biostatistics, which are necessary for public health practice and research. Lecture: Students will review descriptive statistics, estimation, and hypothesis testing, as well as regression, correlation, and analysis of variance. At the conclusion of the course, students will be able to analyze real data sets and provide quantitative evidence to support scientific conclusions. The emphasis is on "doing" statistics utilizing sound statistical theory and relying on validated statistical software (SAS) to produce descriptive statistics and inferential analyses, and interpret the results. Lab: The lab will focus on integrating concepts from biostatistics, epidemiology, environmental health, health policy, and social and behavioral health through hands-on data analysis and presentation techniques using SAS statistical software. Modules will also include qualitative software. Labs will immerse students in applied exercises, so they more fully understand the statistical principles presented in the lecture component.

This course does assume an understanding of basic mathematical concepts and terminology. It is expected that students have access to SAS outside of class, either on a laptop or home computer. Non-matriculated and 4+1 students must obtain instructor permission to register.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101 (may be taken concurrently) or EPBI 5201 (may be taken concurrently))

**EPBI 5101. Fundamentals of Epidemiology. 3 Credit Hours.**

The main purpose of this course is to provide an understanding of the basic methods and tools used by epidemiologists to study the health of populations. This course provides a graduate-level introduction to the fundamental concepts and methods used in epidemiology, the basic science of public health and prevention. This course covers terminology used in epidemiology; basic measures of frequency of disease occurrence; concepts of exposure, outcome, and association; epidemiologic study designs; epidemiologic criteria for causality; potential sources of bias and controlling for bias; and the role of epidemiology in public health policy. Applications related to a broad range of current epidemiologic studies are discussed. Students will calculate basic statistics used in epidemiologic studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5201. Epidemiological Research Methods I. 3 Credit Hours.**

This course provides an introduction to the fundamentals of conducting epidemiologic research and protocol development. It covers definitions of epidemiology; measures of disease frequency and risk assessment; measures of effect and association; epidemiologic study designs, including randomized clinical trials, cohort, case-control studies, and cross-sectional surveys; assessment of screening programs; an overview of the role of bias and confounding in epidemiologic study results; and analytic techniques, including modeling using multiple variables, survival analysis, and issues related to quality assurance. Note: This course is the introductory epidemiology course for students in the M.S. in Epidemiology or related Public Health degree programs that require advanced quantitative methods. May be taken in place of EPBI/PBHL 5101 for students in the M.P.H., M.S. in Environmental Health and Ph.D. programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5204. Mental Health Epidemiology. 3 Credit Hours.**

Epidemiology of psychiatric disturbances is explored, including alcohol and other drug dependencies, psychosocial aspects of health and illness. The emphasis is on epidemiologic methods and theories in psychosocial and mental health research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5205. Surveillance, Epidemics and Outbreaks. 3 Credit Hours.**

This course will introduce the tools used by infectious disease epidemiologists to monitor disease trends and will cover the methods used to detect, investigate, and respond to outbreaks and epidemics. We will also look more closely at a few recent outbreaks both in the US and across the globe. Issues relating to ethics and health disparities will be interwoven throughout the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5206. Risk Assessment and Preparedness Decision Making. 3 Credit Hours.**

In the US and abroad, we are faced with public health challenges and emergencies that require data-driven, creative approaches for planning. This course will use an interdisciplinary case-study approach of risk-based public health issues and assist students with developing practical response competencies. Students will apply their skills in the risk sciences (risk assessment, risk management, and risk communication) to evaluate information and make decisions for preparedness and response in the face of imperfect and incomplete information and limited resources. Lastly, students will understand the importance of working with various agencies and community partners for emergency planning and response.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5208. Data Management and Analysis. 3 Credit Hours.**

In this course, students will develop their R and SAS programming skills relevant to public health, with an emphasis on procedures and functions relevant to data management and analysis. Basic statistical procedures as well as data management and manipulation techniques will be covered. Additionally, students will be exposed to advanced data visualization techniques and logic underlying the relevant programming codes. Topics will be covered through a mixture of a lecture, demonstrations, and hands-on R and SAS programming exercises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 5500. Seminar in Current Issues in Public Health. 3 Credit Hours.**

Seminar topics rotate to address current issues in public health research, policy and practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may be repeated for additional credit.

**EPBI 8002. Research Seminar in Public Health. 3 Credit Hours.**

This is a research seminar on linkages between theory and research in social and behavioral health studies. It is required for Ph.D. students prior to taking the preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 8011. Social Epidemiology. 3 Credit Hours.**

The purpose of this course is to provide an introduction for graduate students to the key social factors that are thought to influence health. These social factors include constructs such as gender, race, socioeconomic status, and social support. Understanding these social factors is important for public health research and practice. These factors can be considered "fundamental causes" of health outcomes insofar as they may cause or modify other factors that are known to influence health, such as individual behaviors or genetics. The course will focus on the conceptual and theoretical basis of these social factors, how these social factors are measured in epidemiologic research, and the mechanisms by which these social factors are thought to affect health. Students will have the opportunity to improve their skills in critically evaluating empirical data about the association between these social factors and health.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101, PBHL 5101, EPBI 5201, or PBHL 5201)

**EPBI 8012. Multivariable Biostatistics. 3 Credit Hours.**

The objective of the course is to provide basic theory and application of regression models, analysis of variance, nonparametric statistics, and survival analysis applied to the analysis of population-based data. The emphasis will be on generating and interpreting results and health related applications rather than on statistical theory. The course is designed for graduate students in public health who are already familiar with basic statistical concepts, including descriptive statistics, the components of statistical inference (p-values, hypothesis tests, confidence intervals, etc.), as well as concepts of confounding and effect modification.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5006, EPBI 5002, or PBHL 5002)

**EPBI 8201. Structural Equation Modeling. 3 Credit Hours.**

An extremely rapid pace of change in statistics and methodology in the field of developmental processes and family systems requires that graduate students (and newly minted PhDs in academic and applied settings) be well versed in current data analytic techniques and able to keep abreast of emergent techniques by being aware of contemporary methodological literature. This course will illustrate the uses of structural equation models for cross-sectional, longitudinal, and family data analysis. The course is organized to take participants through each of the cumulative steps in the analysis: deciding which type of model is appropriate, setting up the data file and coding variables, interpreting and displaying empirical findings, and presenting results in both verbal and written form. Class time will be devoted primarily to lectures, examples, group discussions, and hands-on application of course material.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 8202. Epidemiological Research Methods II. 3 Credit Hours.**

The content of this course illustrates statistical concepts, methods, and strategies used in epidemiologic studies, beyond the principles discussed in EPBI/PBHL 5201 (Epidemiological Research Methods 1). Topics include a review of basic study designs, analysis of prospective and retrospective data, assessment of bias, confounding, effect modification/interaction, statistical methods of stratification and adjustment, sample size/power calculations, importance of quality control and data monitoring in randomized clinical trials, critical determination of causality, and the comprehensive analyses, reporting and presentation of epidemiologic results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5201 or PBHL 5201)

**EPBI 8204. Multilev Mod in Int Res. 3 Credit Hours.**

Interdisciplinary research nearly always involves data with a nested, hierarchical, or multilevel structure. Such data violate the standard statistical assumption of independence of observations. As well, the most important interdisciplinary research questions often involve understanding effects of one level of this structure on characteristics of another level of structure. Within the intervention contexts, individuals often serve as their own context as events unfold over chronological time. This course provides a broad and comprehensive introduction to analysis of multilevel data with an emphasis on questions which bridge disciplines. Participants should be familiar with the general linear model (analysis of variance, regression) prior to enrolling in this course, but no previous familiarity with mixed models (other than repeated measures ANOVA) is assumed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 8205. Chronic Disease Epidemiology. 3 Credit Hours.**

This intermediate course will cover selected topics in chronic disease epidemiology through critical examination of the current literature. Students will have the opportunity to study methodological issues, strategies for prevention, and contemporary issues in research. Coronary heart disease, cancer, diabetes, musculoskeletal disorders, chronic lung diseases and others will be addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (SBS 5102, PBHL 5102, EPBI 5101, EPBI 5201, or PBHL 5201)

**EPBI 8206. Infectious Disease Epidemiology. 3 Credit Hours.**

This course provides the basis for understanding infectious diseases, disease transmission, risk factors, outbreak investigation and study designs, surveillance methods, and current infection-control strategies and mechanisms. The purpose of this course is to expose students to the principles and practices of infectious disease epidemiology and how communicable diseases and their control affect public health locally, nationally, and internationally.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101, PBHL 5101, EPBI 5201, or PBHL 5201)

**EPBI 8207. Reproductive and Perinatal Epidemiology. 3 Credit Hours.**

This course presents the epidemiology of major reproductive and perinatal outcomes and offers an overview of human reproduction. The course will be divided into two parts. Part one covers the basic principles of reproductive biology and physiology. The second part will focus on outcomes in reproductive and perinatal research including fertility and fecundity, reproductive disorders, birth defects, preterm birth, fetal growth, miscarriage, stillbirth, and preeclampsia. The course will discuss unique methodological issues and novel study designs in reproductive and perinatal epidemiology. An emphasis of the course will be the evaluation of the current literature related to reproductive and perinatal complications as well as the design of a reproductive or perinatal epidemiologic study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101 or EPBI 5201)

**EPBI 8208. Data Management and Analysis. 3 Credit Hours.**

The content of this course will illustrate practical concepts, methods, and strategies used in the development, management and analysis of large data sets through in-class and homework exercises, quizzes, and a final project. Each class session will be a mixture of a lecture, demonstration and hands-on SAS programming exercises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5002 or EPBI 8012)

**EPBI 8209. Epidemiology of HIV/AIDS. 3 Credit Hours.**

The epidemiology of HIV/AIDS is the subject of this course. Application of epidemiological principles and concepts in infectious disease epidemiology with emphasis on surveillance, research, prevention, and control are covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101, PBHL 5101, EPBI 5201, or PBHL 5201)

**EPBI 8212. Grantsmanship in Health Research. 3 Credit Hours.**

This course will provide students with applied advanced epidemiologic research methods to critically assess gaps in current knowledge and to develop a competitive grant proposal application. Students will apply the epidemiologic methods and knowledge from prior courses and gain expertise in assessing gaps in knowledge, innovative thinking, grant conception, development and writing, study implementation and approach, budget preparation, and grant critiques. In the first half of the course, students will be introduced to the concepts of significance and innovation, identifying gaps in knowledge, choosing an epidemiologic research topic, identifying a funding agency and developing a set of specific aims, significance and innovation statements. In the second half of the course, the grant proposal will be written in the format of an NIH pre-doctoral epidemiology research grant following NIH grant application guidelines including a developed research plan, identified research team, and NIH biosketch and human subject protection plans. Students will be introduced to the concepts of power, sample size and effect size and will calculate necessary power and sample size requirements in the finalized grant proposal. Students will also participate in a mock grant review session. Students will use this opportunity to develop and submit an application for an NIH or foundation pre-doctoral award to support their dissertation work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 8213. Cancer Epidemiology. 3 Credit Hours.**

This course covers general principles of carcinogenesis and genetics of cancer, domestic and international patterns in cancer incidence and mortality, cancer surveillance and screening, cancer prevention and control, as well as epidemiologic characteristics and risk factors for most prevalent cancers among adults, children/young adults, and public health implications of cancer. In addition, there is a focus throughout the course on critical evaluation of different methodological approaches used in cancer research, potential biases inherent given study designs, and practical solutions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EPBI 5002 and (EPBI 5101 or EPBI 5201)

**EPBI 8301. Clinical Research Methods in Public Health. 3 Credit Hours.**

This course provides an introduction to the core topics in clinical research. Beginning with practical issues in starting and advancing in a career in clinical investigation, the course proceeds to cover diagnosis and treatment studies, research on prognostic and casual risk factors, special types of study design and analyses, principles of measurement in human subjects, studies using secondary databases, and outcomes research. This course will be an elective class for all students enrolled in the Master of Science in Epidemiology, Clinical Research and Translational Medicine, as well as the Doctor of Philosophy in Epidemiology programs. This graduate level course is principally aimed at health care professionals, not limited to the field of public health, usually with graduate courses relevant to their clinical discipline, who desire advanced knowledge and skills in evaluating, designing and implementing clinical research studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5002 or EPBI 5006)

**EPBI 8302. Behavioral Measurement. 3 Credit Hours.**

This course will cover the classical and modern test theories and their applications to solve measurement problems in practice. This course will educate students on measurement concepts including test standardization, validity, reliability, operational definitions, scaling and latent variables in social and behavioral sciences. Issues surrounding validity and reliability of measures will be discussed in detail. Students will be given an opportunity to critically evaluate existing measures and to propose how a new measure can be developed and evaluated.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5006, EPBI 5002, or EPBI 8012)

**EPBI 8303. Behavioral Epidemiology. 3 Credit Hours.**

This course covers behavioral epidemiology and its role in public health. Students will be able to identify and explain the appropriate methods for measuring health-related behaviors/outcomes and related psychosocial constructs; critically analyze the appropriateness of methods used within published studies on health-related behaviors as well as determine appropriate methods for behavior-related research questions. In addition, students will use a behavioral theory/model as a framework and apply their skills in the development and assessment of a behavioral intervention to address a current public health problem of their choice including, but not limited to, intervention development, implementation planning, and evaluation/analyses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5006 or EPBI 5002), (EPBI 5101 or EPBI 5201), and SBS 5002.

**EPBI 8304. Applied Statistical Methods for Incomplete Data Analysis. 3 Credit Hours.**

Inevitable existence of missing data is often a complicating factor in statistical analyses as most standard statistical methods are not designed to handle missing values. Given that almost all data have missingness, advanced statistical computation techniques and methods for analyzing incomplete data have developed tremendously since the 1980s. These methods have been increasingly applied in many settings including highly relevant survey data in public health (e.g., National Health and Nutrition Examination Survey) as well as in many other settings including clinical trials, administrative datasets (e.g., cancer registries) and observational studies. Statistical literature has repeatedly shown that if no action is taken about the missing data, all inferences can be grossly misleading. This course aims to teach and employ principled methods of incomplete data analysis to arrive at objective inferences using highly accessible software tools in SAS as well as R.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EPBI 8012.

**EPBI 8307. Systematic Reviews. 3 Credit Hours.**

Systematic reviews are essential tools for health care workers, researchers, consumers, and policymakers who need to keep abreast of the accumulation of knowledge within their field. Systematic reviews provide more objective evaluation of the evidence than has been possible with traditional narrative reviews, and so can help resolve uncertainty and point toward promising future directions in research and practice. When appropriate, meta-analyses can help increase the precision of estimates regarding treatment effects and way to improve treatments. For example, identification of subgroups of individuals most (or least) likely to benefit from treatment can generate new questions to be addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 8401. Concepts and Methods in Epidemiologic Research. 3 Credit Hours.**

The doctoral course is designed to be the first in a series of doctoral level epidemiologic research courses and will focus on providing an in-depth conceptual framework of key research concepts and techniques. The course will enhance knowledge of research methods and encourage critical thinking to successfully develop research questions and design research studies. Students will demonstrate mastery in the fundamental skills that enable them to apply epidemiologic research methods to the design, analysis and interpretation of public health data. Specifically, the course will provide didactic and hands-on training in causality and association, study design, bias, error, confounding, causal diagrams, interaction, and effect modification. By the end of this course, students will have the foundational knowledge to begin to apply these methods to their own research. The course is intended for doctoral students in epidemiology or related fields. Students must be enrolled in a doctoral program in the College of Public Health or by permission from instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 8402. Intermediate Concepts and Methods in Health Research. 3 Credit Hours.**

This intermediate level research methods course will solidify student competencies in modern design of population health studies and provide methodological training beyond traditional approaches. This course is designed for doctoral students who have completed EPBI 8401 or a similar graduate level research methods course (as approved by Instructor) that provided a foundation for the understanding of epidemiologic concepts in population based studies. The course will include in-depth instruction through hands-on learning and didactic training that will develop the skills needed for students to design studies that preemptively address threats to validity and data analysis plans for both traditional and novel complex study designs. In addition to focus on the core concepts of study design, students will focus on understanding advanced topics such as causal inference and bias analysis. Students will also understand commonly encountered study issues such as competing risks, confounding, error, bias, and missing data. By the end of this course, students will move beyond understanding conceptual methods learned in entry-level research methods courses and will advance to applying traditional and advanced concepts to study design and data analysis planning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 8401 or EPBI 8202)

**EPBI 8403. Applied Concepts and Methods in Health Research. 3 Credit Hours.**

This laboratory-based class will focus on analytic exercises to analyze and interpret data from cross-sectional, case-control, cohort, longitudinal and nested studies. Concepts will include traditional regression modeling as well as multilevel/hierarchical modeling, bias analysis, and Bayesian statistics. Students will learn how to apply key epidemiologic concepts to the analysis of data. By the end of this course, students will have developed the practical skills needed to analyze and interpret epidemiologic data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may not be repeated for additional credits.

**EPBI 9083. Readings and Conference in Public Health. 1 to 3 Credit Hour.**

This is an advanced tutorial in public health with an appropriate faculty member. Note: Registration requires a written contract with the supervising faculty member and approval of the student's advisor and of the Director of Graduate Programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPBI 9187. Biostat Cnslt Practicum. 3 Credit Hours.**

The objective of this course is to prepare students to collaborate effectively as biostatistics support consultants in the health professions. The emphasis will be to refresh statistical techniques and develop communication and problem solving skills. This course is designed for graduate students in public health who can use well-validated commercial statistical software, such as SAS, for the analyses of data from observational and/or interventional research studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPBI 9289. MPH Fieldwork I. 3 Credit Hours.**

This course entails a fieldwork project or internship in a public health agency. It includes seminars, oral and written reports of progress, and joint supervision by a preceptor and faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EPBI 5201, ((EPBI 5002 and EPBI 5005) or EPBI 5006), HPM 5006, SBS 5001, and EPBI 8012 (may be taken concurrently)

**EPBI 9389. MPH Fieldwork II. 3 Credit Hours.**

This course is an evaluation of the fieldwork project or internship using a full range of research methodologies. Data are collected, analyzed, and reported in a comprehensive final report. Oral and/or poster presentations are presented to public health organizations. The course includes a final oral defense of the project or internship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EPBI 9289, EPBI 8012, and EPBI 8202 (may be taken concurrently)

**EPBI 9991. Public Health Research Project. 1 to 3 Credit Hour.**

Under the direction of an appropriate graduate faculty member, students tie together their coursework in a project that poses a problem, gathers data to help analyze the problem, and provides a solution. Note: Enrollment must be approved by the student's advisor and the Director of Graduate Programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPBI 9994. Preliminary Examinations. 1 Credit Hour.**

This course supports preparation for taking the preliminary examinations in the Health Policy and Social and Behavioral Sciences Ph.D. programs. To enroll, students must have completed all required coursework for the Ph.D. and obtain the approval of the Ph.D. Program Director. Students must be enrolled to take the required preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may be repeated for additional credit.

**EPBI 9996. Masters Res in Pub Hlth. 3 Credit Hours.**

This course is limited to students who have chosen to fulfill the master's degree by writing a thesis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**EPBI 9998. Dissertation Proposal Research. 1 to 2 Credit Hour.**

This course supports preparation of the dissertation proposal. The course is required for students who have passed the preliminary examinations for their PhD program and who have not yet defended the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in EPBI 9994.

**EPBI 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is limited to Ph.D. candidates who have completed and defended a dissertation proposal that is filed with the Graduate School by the last day to add a course in the semester. Continuous registration in 9999 fall and spring is required until the dissertation is successfully defended.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Family & Community Medicine (FAMP)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**FAMP M150. Intro to Public Health. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M151. Primary Care Scholars Continuity Clinic. 0 Credit Hours.**

It is well established that as the US population ages and live with an increasing number of chronic diseases, access to primary care will become increasingly critical. Despite the steady (and growing) demand, a relatively small percentage of students here at Temple choose to pursue primary care specialties following graduation. We have heard from our students that a variety of factors influence their decision; however, early and consistent access to primary care faculty, mentorship support in career planning and visibility of the wide range of options available within the spectrum of primary care are all areas we can easily address today.

**Repeatability:** This course may be repeated for additional credit.

**FAMP M300. Career Exploration of Sports Medicine. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**FAMP M360. Family Medicine. 0 Credit Hours.**

**Course Attributes:** M7

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M420. Urban Community Medicine. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M421. Case Management. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M430. Indian Health Service. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M436. Sports Medicine. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M440. Family Medicine Private Practi. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M441. Family Practice Resident Sites. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M879. Family Medicine Subinternship. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**FAMP M994. Correctional Health Care. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

## Film and Media Arts (FMA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**FMA 5241. Cinematography Workshop. 4 Credit Hours.**

The art, theory, and technology of film production with special attention paid to location lighting, location sound, cinematic composition, and film structure. This is a dual level course, intended for both the experienced filmmaker and the media-aware but inexperienced graduate student ready for intensive, accelerated study in the design and solution of cinematographic problems. Note: This course is required for the fall semester of the first year of the MFA program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5242. Videography. 4 Credit Hours.**

Lectures, demonstrations and practical exercises in the art, theory, and technology of video and electronic media production. Note: This course is recommended for the spring semester of the first year of the MFA program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5243. Audio Production and Aesthetics. 4 Credit Hours.**

A production workshop on audio as a form of aesthetic expression. Students will explore theoretical concepts as they use digital audio recording and editing systems to complete projects. Lectures, demonstrations, hands-on instruction, exercises, critiques and discussions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5244. Lighting for Film & Video. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5248. Introduction to 3D Modeling. 4 Credit Hours.**

This course introduces the concepts and techniques of three-dimensional digital graphics, using Lightwave3D software. The first half of the semester introduces a broad palette of techniques and formal ideas, while the second half is spent on a major project of your own design. Previous experience with graphics or animation software is not required. The course offers a unique skill set and formal perspective.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Film and Media Arts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5249. Introduction to 3D: Animation. 4 Credit Hours.**

This course introduces the concepts and techniques of three-dimensional digital imagery and motion graphics, using Lightwave3D software. The first half of the semester introduces a broad palette of techniques and formal ideas, while the second half is spent on a major project of your own design. The course offers a unique skill set and formal perspective for upper level students. Open to juniors and seniors, including non-majors and upper-level students from other colleges, with the specific aim of fostering an interdisciplinary, collaborative workshop environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5341. Scene Analysis for Writers and Directors. 4 Credit Hours.**

Analysis and exercises dealing with the conventional language of mainstream narrative film, including how this language, traditionally presented as the only way to organize narrative films, actually serves to circumscribe the kinds of stories that may be told.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5344. Adaptation and Docudrama: Screen and Television Writing from Pre-Existing Source Material. 4 Credit Hours.**

This will be an exercise course leading to a final written project. It will focus on screenplays for film and television based on literature, drama and historical events. Because the material pre-exists, the course will be able to focus on the nuances of translation to screen including the visual representation of internal life, time, levels of reality, "voice," historical context, and social change.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5361. Writing for Media I. 4 Credit Hours.**

A seminar and workshop exploring various approaches to screenwriting, including documentary treatment, experimental appropriation, performative conceptions, and narrative screenplays. Through weekly exercises and a final project, each student will begin to develop a personal integration of these approaches leading to a "voice" of his/her own. Note: This course is required for the fall semester of the first year of the MFA program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5362. Serial Writing. 4 Credit Hours.**

This is a writing workshop focusing on dramatic serial writing in which students learn to work in close collaboration with other class members. In preparation for the class, students will be required to read or view several dramatic serials as well as read several pilot scripts. The class itself will hear "pitches" for a serial, select one story, and then begin to develop it.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in FMA 5361.

**FMA 5440. Topics in Production. 4 Credit Hours.**

A workshop in film, video, audio, or emerging new technologies. The course will address a particular production issue (an aspect of technology or an aesthetic approach) each time it is offered, such as color correction, 3-D computer animation, special effects, digital audio applications, and multimedia.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Film and Media Arts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**FMA 5451. Animation Workshop. 4 Credit Hours.**

A creative workshop exploring the concepts, aesthetics, and techniques of independent animation in a number of media from cards and cels to digital design and manipulation. Note: Offered summer only.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5452. Digital Animation, Compositing and Modeling. 4 Credit Hours.**

Animation, image compositing and object modeling have facilitated the crossover between animation and photographic imaging, mingling the fictive and the realistic image in digital film and videomaking. This workshop explores the techniques and effects of processing and layering the moving image within film/video language and within non-linear structures. Primary focus is on 2D animation and compositing using Adobe AfterEffects with other software packages introduced as time permits.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Film and Media Arts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5453. Interactive Design Workshop. 3 to 4 Credit Hours.**

This workshop explores the use of interactive media for the public exhibition of historical and artistic materials in libraries, museums, or other cultural institutions. Students have direct access to an archival museum collection, and will be guided in elaborating the themes, cultural significance, and aesthetic value of these historical materials, with the challenge of transforming them for the real, online and virtual spaces that are accessible to contemporary audiences. The course will teach interactive applications such as video motion tracking, projection design, interactive VR environments, and mobile Augmented Reality. Thematically, the course will explore the challenges of cultural visibility and access and aim for critical forms of public engagement with cultural production and presentation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5462. Video Game Theory and Writing. 4 Credit Hours.**

This course will look at both the critical literature that has developed around video games and other interactive environments, as well as the practice of writing video games. Student's work will combine critical essays and written game or interactive creation that explores some of the theories addressed in the course. The course will look at some of the major issues in video game studies, such as simulation, representation, play, narrative, the ergotic, cut-scenes, and interactive space and time, as well as considering how video games may engage some long-standing aesthetic and philosophic questions that predate these games themselves.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5468. Art-Culture-Technology Seminar. 4 Credit Hours.**

This seminar introduces a broad array of theories and critical perspectives on cinematic arts and alternative media. The course explores how the emergence of differing media technologies such as cinema, video and computing have shaped paradigms of cultural and political organization as well as personal, physical and cognitive self-understanding. Topics include spectatorship and viewer participation, the gaze and identity construction/deconstruction, transmedia documentary, rhizomatic narrative, multiple screen installations, video art, sound art, interactivity, spatiality and new urbanisms, networked and geolocated media, net art and hacktivism, user-generated media, virtual worlds, and game theory. The course explores interdisciplinary approaches to scholarly and creative inquiry, with research and readings traversing fields of the arts, humanities and sciences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in FMA 5674.

**FMA 5471. Media Arts Projects at the Kimmel: The Virtual City. 4 Credit Hours.**

Graduate and undergraduate students will work with Prof. Roderick Coover and visiting artists at the Kimmel Center to create works using emerging cinematic technologies including virtual reality (VR). The course aims to produce highly experimental and collaborative media arts works oriented around themes of the city. The course will take place at main campus, center city campus and at the Kimmel Center. This course is open to students from across the arts and it encourages interdisciplinary and cross-genre collaborations of image, sound, movement and performance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**FMA 5473. Moving Camera Workshop. 4 Credit Hours.**

Moving Camera Workshop is a graduate level workshop course that explores the art and practice of moving camera media production. The course covers the range of techniques including hand-held, dolly, jib, virtual/motion sensors and Steadicam operation. Class time will be spent on group discussions/exercises, lectures/screenings, lab instruction and critiquing work. Through a series of production projects, students will work through the aesthetics of moving camera and gain the technical and physical expertise necessary for successful projects. This course will also explore the theory and history of camera movement as well as blocking and directing techniques. Locative and mobile media projects extend the work outside the classroom. Research on new camera movement technologies is used to move toward innovative student media projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in FMA 5242.

**FMA 5553. Color Correction. 4 Credit Hours.**

Advanced Color Correction is a graduate level workshop that explores the aesthetic considerations and technical aspects of color in modern postproduction and cinematography. Color has a subconscious influence on emotion in storytelling. With the advent of modern digital cinema, every film and television production undergoes some level of color grading. Cinematographers must understand the process to maintain creative control of the images they produce. Editors must understand the process to perform basic color correction on low budget productions. This class is a combination of lecture and workshop with each student striving to efficiently navigate the art and practice of color correction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (FMA 5241 or FMA 5242)

**FMA 5670. M.F.A. Colloquium. 1 Credit Hour.**

Wide variety of discussions, screenings, and lectures from guest image makers, exploring and integrating a range of theoretical, conceptual, and pedagogical aspects of film and video production. This course must be taken a second time for fulfillment of the MFA degree in FMA. Note: This course is required for the fall semester of the first year of the MFA program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**FMA 5671. Film Theory Seminar. 3 Credit Hours.**

This seminar explores major theoretical approaches to the study of cinema and related media arts. Readings will present key debates and concepts for understanding the aesthetics, meaning, ideology, and cultural role of the medium. Note: Prior to Fall 2023, the course title was "Film History and Theory."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5672. History of Documentary Film. 4 Credit Hours.**

An international, historical survey of the factual film, including creative documentary, anthropological film, television news film, direct cinema, and cinema verite.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5673. Time-Image Arts/Cinema Praxis. 4 Credit Hours.**

This screenings-oriented seminar examines how writers such as Deleuze, Taussig, and Robbe-Grillet and media makers such as Antonioni, Frampton, and Viola expand our ideas about time-based images and the production of space in a globalizing technological era. Students respond to readings and screenings through short biweekly papers that launch seminar discussions. Students conclude the course with a paper (M.A./Ph.D. students) or project (M.F.A. students) and a cross-disciplinary critique of each other's works. Note: Cross-listed with Philosophy and Art History.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5674. Media Arts Thry-Practice. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5676. Anthropological Film/Media. 3 Credit Hours.**

Anthropological perspectives on media studies in terms of both cultural organization and anthropological research tools; includes anthropological and communication theory, history of ethnography, and research methods with special emphasis on visual recording modes.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Film and Media Arts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5680. Topics in Film Study. 4 Credit Hours.**

Lectures and screenings on a special topic arranged each semester. Topics may include: Advanced Film Theory, Third Cinema, Soundtracks, Exile Cinema, The Idea of Art Cinema, Hollywood Cinematographers, Hybrid Cinema, Gender and Sexuality. Please consult with the instructor.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Film and Media Arts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**FMA 5770. Topics in Producing. 3 Credit Hours.**

A workshop in film and media art producing. The course will address a particular producing issue each time it is offered, such as budgeting, scheduling, project development, or entertainment law.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**Repeatability:** This course may be repeated for additional credit.

**FMA 5771. Producing. 4 Credit Hours.**

An overview of the processes of financing, managing, promoting, and distributing a documentary, fiction, or experimental production. Emphasis is on projects produced independently, outside the commercial mainstream, and without institutional sponsorship or governance. Students will produce a comprehensive proposal for a viable film or videotape project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5772. Fundraising for Independent Media. 3 Credit Hours.**

This course is a workshop class where students must come prepared with a project around which they will create a fundraising campaign. During the course of the semester students will be exposed to information on grant writing, non-profit and for-profit media entities and the legalities of media producing. At the conclusion of the course, students will have a full funding proposal ready for dissemination to various funding sources.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 5773. Entertainment Industry Perspectives. 4 Credit Hours.**

This course explores career paths and current trends in the entertainment industry through weekly guest lecturers who are working professionals in a variety of related fields. Students also study and learn professional skills and industry conventions relevant to their future careers. Writing assignments will include critical responses to trade journal articles about the student's chosen field as well as a series of student-conducted case studies of and interviews with practitioners in the student's area of focus. NOTE: Student must be a graduate participant in the FMA LA-Away program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 8240. Special Problems in Film and Media Arts. 1 to 4 Credit Hour.**

Special seminars typically taught by distinguished visiting faculty. Inquire at departmental offices for details, since these seminars often are scheduled on short notice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**FMA 8241. Advanced Cinematography. 4 Credit Hours.**

Advanced theory and practice in the making of films with personal vision and crewing each other's productions in Super 16mm, 35mm or High Definition 24P digital video, along with technical and aesthetic exercises deconstructing cinematographic/videographic moviemaking.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**FMA 8242. Experimental Media Wksp. 4 Credit Hours.**
