This course is an advanced pediatric outpatient experience. The student will work with the house staff in caring for outpatients and has responsibility for participating in the management of these patients.

**Repeatability:** This course may be repeated for additional credit.

**PEDI M860. Pediatrics Subinternship. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may be repeated for additional credit.

## Pharmaceutical Sciences (PS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **PS 5451. Statistical Quality Control. 3 Credit Hours.**

An introduction to statistical concepts, this course reviews control charts for variables, probability theory, control charts for attributes, and acceptance sampling systems. Class discussions include application to quality control of pharmaceutical manufacturing. Note: Not open to students who have taken the former PHARMACEUTICS 451.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **PS 5471. Biotechnology:Bioprocess Basic. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **PS 5477. Good Manufacturing Practices. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **PS 5478. High Purity Water System. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **PS 5492. Production of Sterile Products. 3 Credit Hours.**

This course reviews the theory and practice involved in the preparation of sterile, injectable products, covering formulation, manufacturing, facility requirements, validation and regulatory issues. Upon completion of the course, students will develop an understanding of the routes of administration of injectable drugs and the types of injections, current formulation methods, aseptic manufacturing processes, requirements for sterile manufacturing facilities, and validation, compliance and regulatory issues. Note: Not open to students who have taken the former PHARMACEUTICS 492. Also note that prior to fall 2016, the title of PS 5492 was "Production of Sterile Parenterals."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **PS 5493. Sterilization Processes. 3 Credit Hours.**

This course surveys sterilization processes used in the pharmaceutical, medical device, in-vitro diagnostic, and biotech industries. Current methods of sterilization are discussed, including thermal, gaseous, radiation, filtration, and aseptic processing. Students learn basic aspects of sterilization science as well as design, review, and audit sterilization validations and processes according to industry practices. Note: Not open to students who have taken the former PHARMACEUTICS 493.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **PS 5499. Pharmaceutical Drug Dosage Forms. 3 Credit Hours.**

Through an overview of drug dosage form design and manufacturing technology, principles of pharmaceutical processing and pharmaceutical dosage form design (including preformulation and biopharmaceutics) are discussed, including dosage forms such as tablets, capsules, modified dosage forms, semi-solid products, and transdermal delivery systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 5501. Development of Sterile Products. 3 Credit Hours.**

A study of the theory and practice in the development of parenteral products; dosage form design, formulation, solubility/physical pharmacy, excipients, assays, stability, physicochemical properties of biomolecules, delivery systems for controlled/sustained release and manufacturing methods. Note: Not open to students who have taken the former PHARMACEUTICS 501. Also note that prior to fall 2016, the title of PS 5501 was Development - Parenterals."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 5575. Regulatory Sciences. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8000. Topics in Pharmaceutical Sciences. 1 to 3 Credit Hour.**

Topics vary; specific topic(s) announced prior to the start of the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PS 8001. Principles of Drug Action/Pharmacokinetics. 3 Credit Hours.**

This course presents the fundamental principles of pharmacology, medicinal chemistry, and pharmacokinetics needed to understand their application in drug discovery and developmental processes. The material, presented in an integrated manner, includes the molecular mechanisms of drug action, structure-activity relationships, and the time-course of drug absorption and disposition.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8002. Pharmaceutical Analysis. 3 Credit Hours.**

Application of chemical analysis as it relates to pharmaceuticals and pharmaceutical manufacturing. Classical separation methods including GC, HPLC, and NMR as well as, hyphenated techniques (GC-MS & HPLC-MC) will be explored. The student will also be introduced to immunologic antibody based procedures and emerging technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8003. Pharmaceutical Manufacturing I: Preformulation/Formulation. 3 Credit Hours.**

Presents techniques relevant to all aspects of preformulation and formulation phases, as well as principles and mechanisms of incompatibility and stability testing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8004. Solid Dosage Forms - Small Molecules. 3 Credit Hours.**

This course focuses on the various solid dosage forms of pharmaceutical products, touching upon the various unit operations involved in their manufacture. Topics will include particle science and technology (mixing, powder flow) and dosage form design and manufacture. This course will provide one with a basic understanding of formulation development and unit operations. The focus will be on solid dosage forms, but semisolids and liquids (including suspensions and emulsions) will be covered as time allows.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8005. Pharmaceutical Biotechnology. 3 Credit Hours.**

This course will introduce students to pharmaceutical biotechnology, biophysical and chemical aspects of biotech products, and their pharmaceutical formulations and clinical applications. Amino acids, proteins, peptides, and nucleotides are of particular interest. The principles of pharmaceutical formulations and physicochemical evaluation of formulations will be discussed. Pharmacokinetics of biologics and current analytical methods used in pharmaceutical biotechnology are included. In addition, the course provides an introduction to biopharmaceuticals that encompass a variety of technologies ranging from products derived from natural sources, peptides, therapeutic proteins/monoclonal antibodies, oligonucleotide therapeutics (e.g. antisense, ribozymes, aptamers, siRNA), gene therapy and special issues in drug delivery. The course will begin with a review of the molecular, biochemical, pharmaceutical underpinnings that support each of the technologies and will move into a more detailed discussion of each therapeutic technology. Preclinical and clinical development, safety, efficacy and manufacturing issues will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8006. Physical Pharmacy I. 3 Credit Hours.**

The emphasis of this course is to form bridge between the concepts of physical pharmacy and the application of pharmaceutical sciences. Students will understand basic aspects of intermolecular forces, physical properties of solutions, ionic equilibria, buffers and isotonic solutions, solubility and partition phenomena, complexation and protein binding, reaction kinetics, mass transport, dissolution phenomena, interfacial phenomena, and rheology. Pharmaceutical applications based on the basic principles will be discussed as well. Students will be expected to be able to apply the basic concepts from this course to typical formulation and stability issues of pharmaceutical dosage forms. A previous course is physical chemistry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8007. Applied Biopharmaceutics. 3 Credit Hours.**

Presents the interrelationships of the physicochemical properties of the drug and the dosage form, to the route of administration and to the rate and extent of systemic absorption. Drug absorption mechanisms, physiological and GIT constraints on dosage form transit and bioavailability, effect of formulation parameters, dissolution methodologies, in-vitro/in-vivo correlation of drug product performance as well as SUPAC, ICH and FDA guidelines on development and approval process will be covered. Formulation strategies for optimum therapeutic outcome via application of pharmaceutical sciences to the design of drug delivery systems is provided.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8008. Advanced Principles of Pharmacokinetics. 3 Credit Hours.**

An advanced course in the theory and application of pharmacokinetics and pharmacodynamics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8009. Advanced Medicinal Chemistry I. 3 Credit Hours.**

Discussions of the organic chemistry of drug action and drug design. Current topics in the field are discussed using examples from the recent literature. The design, synthesis and structure activity relationships for major therapeutic drug classes are discussed in detail.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8011. Advanced Medicinal Chemistry II. 3 Credit Hours.**

Continued discussions of the organic chemistry of drug action and drug design with current topics discussed using examples from the recent literature. Students review the current literature, give presentations and write research proposals based on their readings and class materials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8012. Radioisotope Methodology. 3 Credit Hours.**

Introductory discussion of the characteristics and properties of ionizing radiation, methods of detection (gas ionization, scintillation, both liquid and solid spectroscopy), radiation standards for safety and protection, and basic evaluation of biological hazards and effects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8051. Seminar in Pharm Science. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PS 8111. Introduction to Toxicology. 3 Credit Hours.**

Toxicology is a multi-disciplinary science focused on the adverse effects of chemicals, drugs and environmental agents. In the first part of this course the basic principles of toxicology will be covered, including dose response relationships, mechanisms of toxicity and exposure. In the second part, target organs of toxicity will be presented with an overview of anatomy and physiology of different target organs (e.g. liver, kidney), as well as organ-specific response to toxic insult. In the final segment of the course, students will be exposed to a variety of areas of applied toxicology, including risk assessment, clinical & forensic toxicology, chemical carcinogenesis, reproductive toxicology and the role of toxicology in drug development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**PS 8121. Department of Pharmaceutical Sciences Seminar Series. 1 Credit Hour.**

The goal of the course is to expose graduate students in the Department of Pharmaceutical Sciences to the faculty research in our department. Students will be presented with a number of research topics, including pharmaceuticals, pharmacokinetics, medicinal chemistry, biotransformation, pharmacology, and physiology. In addition to the presentations by faculty members, several guest speakers will present their research topics and discuss their opinions on science careers outside of academia (i.e., industry, medical writing, medical science liaison, etc.). Through exposure to these diverse research topics, students will become more well-rounded scientists and become more aware of career opportunities that are available to them.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8122. Writing and Publishing a Review Article. 1 Credit Hour.**

The purpose of this course is to research, write and submit a manuscript (review article) in English for publication in a refereed scientific journal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8123. Bioinformatic Genes Drug. 1 Credit Hour.**

The course is a one semester Research project focused on inherited factors that modulate drug response. The use of Web-based computer software for data mining, genetic variability in humans, detection and prediction of pharmacologically relevant genetic polymorphisms will be presented. The course is an introductory level course for students involved in research on Pharmacogenomics and Pharmacogenetics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8125. Journ Club/Pharmacodynam. 1 Credit Hour.**

Course aims to keep participants up-to-date on current literature in the field. Participants will present the background, content, and implications of a paper of their choosing to the class. In addition, Temple researchers may present their ongoing research and/or review the current literature in the field. The goals of the course are to: 1) facilitate the sharing of knowledge and discussion of current information and 2) to aid students in the critical interpretation of the literature, and the presentation of the results to their colleagues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8126. Laboratory Experience in Pharmaceutical Sciences. 1 Credit Hour.**

Students enrolled in this course will be mentored by a member of the graduate faculty in the department in order to become familiar with the research area of the instructor and the everyday workings of the laboratory. The techniques, instrumentation, and procedures covered during the semester will vary depending on the concentration of interest and may include medicinal chemistry/drug discovery, pharmaceuticals/pharmacokinetics or pharmacodynamics/pharmacogenomics. Students will be exposed to a wide variety of experimental techniques and analytical instrumentation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PS 8127. Pharmacokinetics. 3 Credit Hours.**

The objective of this course is to present the fundamental principles of pharmacokinetics (PK). The topics will include PK data analysis, dosage regimen design, and the determinants of drug absorption, distribution, metabolism, and excretion. Pharmacodynamics, the study of drug concentration - response relationships, will also be presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8128. Principles in Drug Discovery. 3 Credit Hours.**

In this course, students will receive an introduction to the fundamental principles of drug discovery and development, beginning with an historical overview of drug discovery.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8129. Bioethics in Research. 2 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8131. Principles of Biochemistry. 4 Credit Hours.**

The course provides students with information regarding the chemical and physical properties of biomolecules. Moreover, the interrelated roles of these molecules in a functioning biological system are emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8132. Topics in Pharmaceutical Biotechnology. 2 Credit Hours.**

This is a seminar course in which students will research and give oral presentations on topics of their choice within the broad subject of pharmaceutical biotechnology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8133. Introduction to Translational Molecular Technology. 2 Credit Hours.**

This is a survey course that will introduce graduate students to important topics in the area of translational research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8134. Neuroscience of Pain. 2 Credit Hours.**

This is a neuroscience course that covers the anatomical and physiologic basis for different forms of pain.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8402. Pharmacodynamics. 3 Credit Hours.**

This course covers the theoretical underpinnings and practical aspects of quantitative pharmacology. A key feature of the course is its concentration on the integrated study of a drug's pharmacokinetics (transport to its site of action: including absorption, distribution, biotransformation, and excretion) and its mechanism of action at the site of action. Emphasis is placed on the mathematical foundations of such topics as drug-receptor theory, Schild analysis, Furchgott's method, radioligand binding studies, PK/PD modeling, and isobolographic analysis of drug combinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8403. Advanced Pharmacogenomics. 2 Credit Hours.**

The course is a one semester course focused on inherited factors that modulate drug response. Special problems of genetic variability in humans, detection and prediction of pharmacologically relevant genetic polymorphisms will be discussed. The course will integrate current mechanistic knowledge of drugs, human genetics, data mining, and analytical tools to tailor drug administration for a specific genetic background.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in PS 8131.

**PS 8404. Pharmaceutical Sciences Literature Review. 2 Credit Hours.**

This course is to expose graduate students to the current literature in Pharmaceutics, Pharmacodynamics and Drug Delivery. The goal of the course is to expose the student to a variety of literature articles pertaining to the physical, biologic, and formulation of pharmaceutical dosage forms. At the end of the course the student should be able to compare and critique articles from several journals common to the area of pharmaceutics, analyze literature articles as to the relevancy the results to the discussion, propose new research based on the current literature article, and be able to write an abstract for a review article based on several publications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8464. Abuses of Drugs and Chemicals. 3 Credit Hours.**

Pharmacology of drugs of abuse and related chemicals, the extent of drug abuse, factors fostering drug abuse, and treatment methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8478. Modified Release Dosage Forms. 3 Credit Hours.**

The fundamentals involved in various extended release dosage forms and their modification for use in particular dosage formulations. Biopharmaceutical and pharmacokinetic aspects of extended-release dosage forms are discussed as well. Overview of polymeric excipients used in the formulation of extended-release dosage forms. Current commercial products under development will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8502. Advanced Pharmacokinetic Modeling I. 2 Credit Hours.**

This course will cover drug transport in biological systems and advanced topics in pharmacokinetics and pharmacodynamics. Course will also involve computer methods to derive models and discussion of current literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8582. Physical Pharmacy II. 3 Credit Hours.**

The rheological behavior of polymer systems will be discussed. The physical chemical properties of proteins and peptides will be presented with formulation applications. This is an advanced course. Physical Pharmacy I is a prerequisite.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8583. Chemical Surfaces & Interfaces. 3 Credit Hours.**

Topics: types and structure of surfactant molecules; properties of aqueous and non-aqueous surfactant solutions; foaming; micelle formation and solubilization. Binary systems; ternary systems; surfactant-water-amphiphile. Stabilization of emulsions and of solid/liquid dispersions. Biological applications.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8584. Advanced Drug and Gene Delivery Systems. 3 Credit Hours.**

The application of nanometer to micrometer delivery systems for disease management has made tremendous advances in recent years. Products of nanotechnology are expected to revolutionize modern medicine due to their versatility in targeting tissues and controlling the release of drugs. Global initiatives are in place to support nanotechnology and nanomedicine. In this interactive course, students will learn the basic principles of advanced drug and gene delivery and its major biomedical applications. The methods or strategies of preparation and evaluation of the commonly used drug and gene delivery systems will be discussed. In addition, students will present selected focused topics on the novel drug and gene delivery systems under the instructors' guidance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8592. Food and Drug Law. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8603. Dermatopharmaceutics. 3 Credit Hours.**

Study of the physiology, biochemistry, immunology, skin permeability, and penetration enhancers as well as role of growth factors in healing after injuries. Semi-solid products, influence of formulation variables and their overall drug release capacities in-vitro and in-vivo will be evaluated. Transdermal, iontophoresis, sonophoresis topics, and bioequivalence/bioavailability of topical preparation will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 8985. Teaching in Higher Educ. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PS 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course fulfills the continuous enrollment requirement after coursework completion while preparing for the Preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PS 9996. Master's Research. 1 to 6 Credit Hour.**

Master's Research course appropriate for students finished with coursework and working with a faculty member on the thesis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PS 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

This course is appropriate for students finished with coursework and working on their dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PS 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is limited to, and required of, students who have achieved candidacy and are now doing dissertation research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

**PS P151. Medicinal Chemistry I. 4 Credit Hours.**

The course provides students with information regarding the chemical and physical properties of biomolecules. Moreover, the interrelated roles of these molecules in a functioning biological system are emphasized. As we progress through the course, study with the following goals in mind: Learn to speak the language of medicinal chemistry and comprehend the meaning, significance, and origin of terms; Understand the physical, chemical and biological context in which each biomolecule, reaction, or pathway operates; Focus on major themes, especially those relating to regulation, thermodynamics, and the relationship between structure and function; Know the most important techniques that have brought us to our current understanding of biochemistry/medicinal chemistry; Make connections between pathways and identify gaps in our knowledge that promise to challenge future generations of scientists. Upon course completion you should be able to: Understand the fundamental relationships between biochemistry, medicinal chemistry and pharmacology; Describe the metabolic pathways responsible for normal and abnormal human physiology; Identify the biochemical impact of diseases and some of the drugs used to treat these conditions.

**Repeatability:** This course may not be repeated for additional credits.

**PS P152. Medicinal Chemistry II. 4 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P155. Principles of Infectious Diseases. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P157. Anatomy/Physiology. 5 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P158. Ant. Infective Agents. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P161. Pharmaceutics I. 3 Credit Hours.**

Upon the conclusion of this course students will have been introduced to biopharmaceutical aspects of a variety of dosage forms. They will become familiar with the format of prescriptions and the organization and contents of monographs and their appendices. The application of mathematics to the preparation of prescriptions and drug products will be introduced. The design, preparation, properties, and evaluation of solution dosage forms including incompatibilities will be introduced. Pertinent physical and chemical principles involving solubility, pH effects, selection of excipients (e.g., color, flavor, buffers, preservatives) and their effect on the performance and quality of these dosage forms will be examined. Students will become familiar with Oral solutions, ophthalmic solutions and colligative properties. Pharmaceutical Calculations will be emphasized during this course. Students must show mastery of pharmaceutical calculations at the completion of this course.

**Repeatability:** This course may not be repeated for additional credits.

**PS P162. Pharmaceutics II. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P164. Pharmacology. 4 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P171. Pharmacy Lab I. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P172. Pharmacy Lab II. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P251. Medicinal Chemistry III and Natural Products. 4 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P261. Concepts in Pharmacogenomics. 3 Credit Hours.**

The goal of this course is to present the contemporary pharmacogenetic principles applied to the latest innovations in medication therapy. In accordance with this goal, the course overviews genetic factors contributing to drug metabolism and drug response. Here, the emphasis is made on how the genetic makeup of individuals defines the reaction of a human body to drug therapy, with the accent on the relationship between genetic variability and adverse effects of drug therapy. Topics in the course provide a good background to bring together the disciplines of drug metabolism, pharmacogenomics, and clinical pharmacy practice. Basic procedures in pharmacogenetic evaluation of patients will be addressed during the lab exercise. As future pharmacists, it is your primary responsibility to provide pharmaceutical care and have knowledge of therapeutic effects as well as side effects of drugs. You are expected to understand and be able to disseminate/communicate new knowledge about human genome and genetic variability to patients, health professionals, and public health. We hope that students will appreciate the importance of genetic considerations in drug therapy for their future profession.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PS P262. Pharmacokinetics. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P265. Pharmacology II. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P271. Pharmacy Lab III. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P272. Pharmacy Lab IV. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P310. Psych/Clin Sub Abuse. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P381. Emerging Therapeutic Iss. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P382. Practical Chromatography. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P383. Natural Product Analysis. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P384. Writing/Pub Review Artic. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P386. Adv. Clinical Toxicology. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P387. Veterinary Pharmacy. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PS P389. Research. 1 to 3 Credit Hour.**

**Repeatability:** This course may be repeated for additional credit.

## Pharmacy Practice (PP)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PP P012. Eff Comm/Pharmacist I. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P013. Eff Comm/Pharmacist II. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P136. IPPE 1. 1 to 3 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P140. Professional Practice. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P142. Soc & Econ Aspcts/Hlthcare. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P145. Immunology/Biotechnology. 3 Credit Hours.**

This course provides foundational knowledge of the functions of the immune system at the molecular, cellular, and anatomical levels. The first part of the course describes the innate and adaptive immune systems, their cells and anatomical structures, their intricate methods of cell-cell communication, and how immune responses can be mounted against a virtually unlimited array of pathogens while minimizing collateral damage to the host. Next, we will consider natural immunity and vaccination against specific pathogens, immune responses in cancer and transplantation, and the unwanted consequences of immune responses in inflammation, hypersensitivity, and autoimmune diseases, and the drugs and vaccines to treat those conditions. The last part of the course will introduce the biotechnologies that are fueling the rapid discovery and development of vaccines and immunotherapeutic agents for a wide variety of diseases.

**Repeatability:** This course may not be repeated for additional credits.

**PP P146. Drug Information. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P148. Introduction to Pharmacy Care. 2 Credit Hours.**

This course is designed to provide a bridge between the pharmaceutical science courses and the clinical courses in the curriculum. During the first part of this course, students will learn how to select relevant data to assess in order to determine if a drug related problem (DLP) exists or could potentially occur. You will learn how to assess the history, physical exam findings and clinical laboratory tests to monitor the efficacy and safety of the patient's drug regimen. Students will also learn how to calculate the patient's creatinine clearance in order to accurately dose medications excreted by the kidney. The second part of the course has been designed to provide students with information and practice identifying and managing adverse drug reactions; and common problems that you will see in your IPPEs including pain management, anemia immunization schedules and selected OTC topics.

**Repeatability:** This course may not be repeated for additional credits.

**PP P231. Intr/Pharmaceutical Care. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P233. Path/Ther Cardiopulm I. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P234. Path/Ther Cardiopulm II. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P235. Pathophysiology/Therapeutics: Pediatrics. 1 Credit Hour.**

This course is designed to help students develop an understanding of the appropriate therapeutic management of common pediatric disease states.

**Repeatability:** This course may not be repeated for additional credits.

**PP P236. IPPE 2. 1 to 3 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P237. Path/Ther Endocr/Meta Di. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P239. Pharm Care Rec I. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P246. Pharm Care Rec II. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P248. Communication Skills. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P250. Economics of Pharm Pract. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P254. Bio Stat/Med Lit Eval. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P260. Contemporary Pharmacy. 2 Credit Hours.**

**Course Attributes:** WI

**Repeatability:** This course may not be repeated for additional credits.

**PP P270. Path/Ther Gastro-Nutri. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P280. Pharmacist Directed Care. 3 Credit Hours.**

This course will introduce students to concepts used in assisting people who seek advice about self-care for health maintenance or common health related problems in ambulatory pharmacy settings. Identifying conditions amenable for self-care and providing individuals with a pharmaceutical care plan containing recommendations for various OTC products, homeopathic remedies, and dietary supplements will be emphasized.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P310. Managed Care. 2 Credit Hours.**

The information presented in the course deals with the predominant method of health insurance for the residents of the United States in the early 21st century. The course builds on and adds to the curricular material provided in two Temple University courses: "Social and Economic Aspects of Health Care" and "Economics of Pharmacy Practice." This elective course will incorporate new educational material in various aspects of managed care including, but not limited to: principles of insurance design, history and development of managed care, financial aspects, modeling and projections in disease prevalence and incidence, the marketplace and competition, negotiations with providers and the concepts of gatekeepers in primary care, reinsurance and practitioner "report cards." Pertinent current events issues will be briefly discussed as appropriate and as time permits. There will be two written assignments in the form of case studies to be solved during the semester.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P312. ADRS Organ Systems Appr. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P313. Clin Pharmacokinetics. 1 to 3 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P314. Practical Public Health for Pharmacists. 3 Credit Hours.**

There is a growing need for pharmacists to be trained in public health. This course will focus on the practical aspects of the 5 public health foundation disciplines: health services, epidemiology, biostatistics, social/behavior health, and environmental health. Although the public health role of the pharmacists has yet to be clearly defined, the pharmacist provides a wealth of health information as well as services and activities that are often public health related. The Accreditation Standards and Guidelines for the Professional Program in Pharmacy Leading to the Doctor of Pharmacy Degree across the United States stated that graduates should be competent to "promote the availability of effective health and disease prevention services and health policy through the ability to apply population-specific data, quality improvement strategies, informatics, and research processes to identify and solve public health problems and to help develop health policy." Furthermore, the American Association of Colleges of Pharmacy (AACP) in 2004 emphasized the importance of public health in the role of pharmacists in its Center for Excellence in Pharmacy Education (CAPE) Educational Outcomes. Included in these outcomes is the "promotion of health improvement, wellness, and disease prevention in cooperation with patients, communities, and at-risk populations" through the availability of "effective, quality health and disease prevention services" and advancement of public health policy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P315. Adv Clinical Practice I. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P316. Adv Clinical Practice II. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P317. The Pharmacists in Transitional Care. 2 Credit Hours.**

This course is designed to give students an opportunity to examine the role of the pharmacist in patient care during times of transition in the healthcare system. The student will become aware of the challenges and disparities that may present at key points in the transition of care and learn optimal ways to improve the care process.

**Repeatability:** This course may not be repeated for additional credits.

**PP P318. Palliative Care. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P319. Independent Community Pharmacy Ownership. 2 Credit Hours.**

Provide current and up-to-date information on how to establish, operate and manage an independent community retail pharmacy that includes the application process with the city, state and the DEA and how to produce a comprehensive business and financial plan. Provide the study of different locations and their demographics. Discuss how to manage the construction phase and the development of a Pharmacy retail store. Discuss how to negotiate contracts with PBMs and drug suppliers. Discuss how to hire new employees and how to manage the Pharmacy business operation and workflow. Discuss customer service best practices. Discuss how to manage dispensing system, cash flow, accounting, advertising and public relations. Discuss daily legal matters, rules, regulations and inspections. Understand and manage Profit and Loss statements.

**Repeatability:** This course may not be repeated for additional credits.

**PP P321. Pathophysiology/Therapeutics Neurology/Psychiatry. 3 Credit Hours.**

This course will assist students in applying the pathophysiologic and therapeutic principles of selected neuropsychiatric conditions. Cases will be discussed to provide students with the opportunity to identify key subjective/objective information and to develop appropriate, evidence-based, drug related assessments and care plans. Emphasis will be placed on the students' ability to interpret pertinent data, to identify drug related problems, and to develop therapeutic plans with goals, monitoring parameters and counseling points.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P323. Pathophysiology/Therapeutics of Oncology and Immunology. 3 Credit Hours.**

The pathophysiology and clinical manifestations of selected immunologic and oncologic disorders will be presented as a basis for the discussion of evidence-based drug therapy for these diseases. The rational use of supportive therapy in the management of patients receiving chemotherapy will be covered. Monitoring therapeutic outcomes will be emphasized.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P325. Pathophysiology/Therapeutics - Infectious Diseases. 3 Credit Hours.**

This course is designed to increase the students understanding of the pathophysiology and appropriate therapy of common infectious diseases. The students will be expected to use pathophysiologic information and drug therapy characteristics to develop and support a pharmacotherapeutic plan to treat each disease state. Emphasis will be placed on a systematic approach that can be applied to the treatment of most infectious diseases.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P330. Path/Ther Gastro-Nutritn. 1 or 2 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P332. Path/Ther Imm/Derm/Ophth. 1 to 3 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P334. Path/Ther cardiopulm III. 1 to 3 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P336. IPPE 3. 1 to 3 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P338. Pathophysiology/Therapeutics - Gastroenterology/Nutrition and Renal Disorders. 3 Credit Hours.**

The pathophysiology and clinical manifestations of selected gastrointestinal; hepatic; and acute and chronic renal disorders will be presented as a basis for the discussion of evidence-based drug therapy for diseases affecting these organ systems. The effect of liver and renal disease on drug disposition and elimination will be emphasized. Principles of fluid and electrolyte therapy; enteral and parenteral nutrition will be covered. Monitoring therapeutic outcomes is also emphasized.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P340. Case Stud/Infectious Dis. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P341. Pharmacy Law. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P342. Prin & Prac Evid Based Med. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P344. Advanced Diabetes Management. 2 Credit Hours.**

The purpose of this course is for students to further advance their comprehensive knowledge of the pharmaceutical care of patients with diabetes mellitus. Students will participate in lectures and investigative assignments to fully understand the complexity of diabetes care. These advanced topics and assignments will expose students to experiences in which they will gain an appreciation for the intricacies involved with diabetes management, develop empathy for patients with diabetes, construct evidence-based treatment plans, and enhance oral and written communication skills. This course will build on principles learned in their 2nd year and will serve as a platform for shaping future pharmacists to provide excellent care for patients with diabetes.

**Repeatability:** This course may not be repeated for additional credits.

**PP P346. Pract Politics & Pharm. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P347. Pharm Care Rec III. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P348. Pharm Care Rec IV. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P350. Adv Radiopharmaceuticals. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P352. Economics of Pharm Pract. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P353. Pharmacoeconomics. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P354. Pharm Care/Ambulatory Pr. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P355. Drug Interactions: Mechanisms, Analysis, Clinical Applications. 2 Credit Hours.**

This course is designed to review the detailed mechanisms of drug interactions focusing on analysis of the clinical significance of each interaction. Students will learn how to develop evidence-based, patient specific pharmacy care plans to manage drug interactions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Pharmacy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P356. Spec Topic in Oncology. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P357. Clinical Nutrition. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P358. Marketing Health Care Serv. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P359. Prin of Clin Immunology. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P360. App/Educational Methods. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P361. Phar Pract/Geriatric Pat. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P362. Selected Top:Inf Disease. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P363. Food & Drug Law. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P364. Food & Drug Law II. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P365. Outcomes, Diver Phar Prof. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P366. Seminar I. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P367. Seminar II. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P368. Intro to Nuclear Pharm. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P369. Managed Care Pharmacy. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P370. Sem/Pharmaceutical Ethic. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P371. Drugs, Devices & Consumers. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P372. Curr Issues Med Errors. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P373. Home Infusion Therapy. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P374. Pediatric Therapeutics. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P375. Sur/Radiopharmaceuticals. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P376. Women's Health Care. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P377. Curr Prob-Pharmacotherapy. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P378. Therap Issues Crit Care. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P379. Cont Cncpts/Parentarels. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P380. Case Studies ADRS. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P381. Clin Drug Development. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P382. Prin/Pract Clin Research. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P383. Good Clinical Practices. 3 Credit Hours.**

The focus of this course on current good clinical research practices for the development of eventual marketing to the health care community will be on quality and integrity in the conduct of a clinical trial through compliance with existing regulatory standards.

**Repeatability:** This course may not be repeated for additional credits.

**PP P384. Med Error Sar & Contrl Pln. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P385. Introduction to Medical Writing. 2 Credit Hours.**

In this course, students will be introduced to the field of medical writing. Students will learn and practice researching and writing different deliverables, including abstracts, manuscripts, slide decks, and posters. Students will have the opportunity to learn the essentials of AMA (American Medical Association) Style and to hone their writing skills by writing weekly reflections in addition to several assigned written projects and presentations.

**Class Restrictions:** Must be enrolled in one of the following Classes: Third Year Pharmacy.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P386. Pharmacoepidemiology. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P387. Veterinary Pharmacy. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P388. Clinical Trial Mgt. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P389. Research in Clin Pharm. 1 to 3 Credit Hour.**

**Repeatability:** This course may be repeated for additional credit.

**PP P390. Spec Problems/Clin Pharm. 1 to 3 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PP P391. Community Pharmacy Practice. 2 Credit Hours.**

This course will review common topics in community pharmacy that will enhance the students' skills and proficiency when working in community pharmacy. The course will focus on non-dispensing (enhanced patient care) services and it will prepare students with the skills to be able to develop and lead the implementation of enhanced patient care services in the community.

**Class Restrictions:** Must be enrolled in one of the following Classes: Third Year Pharmacy.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Pharmacy.

**Repeatability:** This course may not be repeated for additional credits.

**PP P406. APPE-In-Patient. 5 to 6 Credit Hours.**

The Clinical Inpatient APPE is a 4th year rotation that exposes students to inpatient pharmacy practice. Students will work directly alongside faculty members in various inpatient clinical settings and will be involved in all aspects of patient care, including developing and implementing therapeutic plans, patient counseling, and education. Students will work collaboratively with other professions to optimize drug therapy, with an emphasis on acute disease management. Students will receive individualized coaching to improve their clinical skills. Students will also participate in topic discussions on relevant clinical issues and present an inservice and journal club.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Pharmacy.

**Repeatability:** This course may be repeated for additional credit.

**PP P407. APPE-Ambulatory. 5 to 6 Credit Hours.**

The Clinical Ambulatory Care APPE is a 4th year rotation that exposes students to ambulatory care pharmacy practice. Students will work directly alongside faculty members in various outpatient clinical settings and will be involved in all aspects of patient care, including developing and implementing therapeutic plans, patient counseling, and education. Students will work collaboratively with other professions to optimize drug therapy, with an emphasis on chronic disease management. Students will receive individualized coaching to improve their clinical skills. Students will also participate in topic discussions on relevant clinical issues and present an inservice and journal club.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Pharmacy.

**Repeatability:** This course may be repeated for additional credit.

**PP P408. APPE-Community. 5 to 6 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**PP P409. APPE-Institutional. 5 to 6 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**PP P410. APPE-Elective. 5 to 6 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**PP P411. APPE-Elective. 5 to 6 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**PP P412. APPE-Elective. 5 to 6 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## Pharmacy Quality Assurance (QARA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**QARA 5000. Special Topics in Regulatory Affairs and Quality Assurance. 1 to 4 Credit Hour.**

Topics vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**QARA 5401. Fundamentals of Pharmacology and Pharmacokinetics. 3 Credit Hours.**

This introductory course to general pharmacology includes discussions of the mechanisms of action of selected drug classes. It covers pharmacokinetics, including clearance, bioavailability, compartment models, extravascular dosing, nonlinear pharmacokinetics and pharmacodynamics as they apply to the drug development process. Note: Not open to students who have taken the former PHARMACEUTICS 400 or those in the Non-Thesis M.S. program who have taken PHARMACEUTICS 5401.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5408. Pharmacoeconomics. 3 Credit Hours.**

The economic methodologies used to evaluate the cost effectiveness of drug therapy are reviewed. Cost effectiveness is examined in terms of outcome assessment and quality of life measurements. The course explores the dynamic environment of health care and the process of drug product selection in managed care. Not open to students who completed QARA 0480.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5451. Statistical Quality Control. 3 Credit Hours.**

An introduction to statistical concepts, this course reviews control charts for variables, probability theory, control charts for attributes, and acceptance sampling systems. Class discussions include application to quality control of pharmaceutical manufacturing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5458. Global Biopharmaceutical Industry. 3 Credit Hours.**

What social and economic factors contributed to the development of innovator and generic pharmaceutical companies, and what are their current and future trends? This course introduces students to the basic structure of the pharmaceutical industry, examining the growth and relationships among various sectors, including the fully-integrated companies of big pharma, the generic and biotech industry, and specialty and service companies, such as CROs and CMOs. Social, political, demographic, economic, and technological influences will be examined not only in the US domestic market, but also across major world economies, including the differences between national health and single-payer systems. A segment of the course focuses on the impact of the Waxman-Hatch Act on drug price competition and patent term restoration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5459. Drug Development. 3 Credit Hours.**

This course studies the drug development process from discovery through FDA marketing approval. It reviews the process of development and the interrelationships linking the various disciplines, introducing students to regulations governing the process, including the interactions with FDA, ICH, and other regulatory agencies. Note: This course is required for the M.S. in RA and QA, the Drug Development Certificate, and the Certificate in Clinical Trial Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5468. Validation of Facilities, Utilities and Equipment (FUE). 3 Credit Hours.**

The production of FDA regulated products (pharmaceutical, medical device, food, etc.) is highly dependent on both the initial qualification of facilities, utilities, and equipment (FUE) along with the ongoing efforts to maintain the qualified/validated state meeting current user and regulatory needs. This course focuses on the key validation elements specific to qualifying and validating facilities, utilities, and equipment. In practice, validation of these items is also a prerequisite for other validation efforts including process, cleaning and test method. The class will examine the key concepts of FUE qualification/validation as well as the life-cycle through retirement of the FUE.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in QARA 5477.

**QARA 5469. Pharmaceutical Laboratory Quality Systems and Operations. 3 Credit Hours.**

The laboratory plays a key role in the manufacture and release of pharmaceuticals. An effective QC lab assures the integrity of the data generated to enable the release of raw materials, in-process, and finished products and also meets production schedules. In addition, production-related responsibilities must meet with compliance standards. This course covers these responsibilities in detail while providing insight on how to meet internal and regulatory requirements for lab operations. Why labs fail and what actions must be taken to prevent failure are covered in depth.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5471. Biotechnology: Bioprocess Basics. 3 Credit Hours.**

This course emphasizes regulatory and control aspects of biologics manufacturing as well as Quality by Design principles. It provides students with a basic understanding of the major steps involved in the manufacture of biologics/biopharmaceuticals, including preparation of media, fermentation, harvesting/recovery, purification, and formulation. Included is a review of basic bioscience topics (e.g., microbiology, biochemistry, and molecular biology) with particular relevance to the study of bioprocessing techniques. Note: Not open to students who have taken the former PHARMACEUTICS 481 or those in the Non-Thesis M.S. program who have taken PHARMACEUTICS 475 or PHARMACEUTICS 5471.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5472. Pharmaceutical Marketing. 3 Credit Hours.**

This course describes the marketing dynamics of the healthcare industry and the ways in which pharmaceutical companies can better meet the changing needs of patients and managed care. Focusing on individual marketing techniques, it stresses the development of multidisciplinary marketing teams. The product attributes discussed in the selling process are efficacy, safety, cost effectiveness, compliance, and treatment outcomes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5473. Generic Drug Regulation (ANDAs). 3 Credit Hours.**

By examining specific case studies of Abbreviated New Drug Applications (ANDAs) which document the bioequivalence of generics to an original product, this course gives students an overview of regulatory requirements for generics, introducing problems unique to this segment of the industry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5474. Process Validation. 3 Credit Hours.**

Since the concept of "validation" originally appeared in GMP regulations, it has extended to every step in product manufacturing from building the plant to the methods used for testing and releasing its products. The course exposes students to all aspects of validation. FDA Guides and Guidelines, as well as the current emphasis on validation concerns by FDA (as identified in 483 and Warning Letter observations), will be incorporated. Students develop acceptable validation protocols and learn what constitutes an acceptable validation report.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5476. Good Laboratory Practices. 3 Credit Hours.**

This course explores the regulatory and quality assurance issues pertinent to pre-clinical safety research. Research study design and processes will be analyzed by pharmacologic and toxicologic methods and for carcinogenicity and reproductive toxicology. Some time is devoted to mutagenicity and pharmacokinetics, discussed in the context of developing a safety profile and determining the potential risk to humans in subsequent clinical trials. Note: This course fulfills the GxP requirement for M.S. in RA and QA students and for the Drug Development Certificate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5477. Good Manufacturing Practices. 3 Credit Hours.**

This course provides an introduction to cGMP (current good manufacturing practices). Regulations for drugs under the Food, Drug and Cosmetic Act (21 CFR 210 and 211) and their implication for personnel, buildings, equipment, and records will be thoroughly reviewed and studied. It includes a study of pertinent legal decisions and regulatory actions based on non-compliance. Note: This course fulfills the GxP requirement for RA and QA MS students and for the Drug Development Certificate. Students with extensive manufacturing experience in GMPs may petition the School to allow them to replace the basic GMP class with Advanced GMPs. To do so, students must have at least five years of GMP experience and submit a resume to the RA and QA Office for final approval.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5478. High Purity Water Systems. 3 Credit Hours.**

This course examines high purity water systems from the Quality Function perspective, covering basic aspects of system design and operation. Special attention is paid to unit operations, sanitization procedures, and routine monitoring programs. Students learn to plan validations and establish routine monitoring programs to assess ongoing quality. Domestic (NFDWR/NSDWR) requirements and international standards and regulatory expectations are discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5479. Advanced Good Manufacturing Practices - Defining "c". 3 Credit Hours.**

This course brings students from the basic GMP concepts presented in QARA 5477 to a fuller understanding of the concepts of current good manufacturing practices. Discussions include how to evaluate FDA 483s and Warning Letters, the routine review of periodicals, including the Pink Sheet, Gold Sheet, and other GMP-oriented documents, and how to evaluate information provided by the FDA. Recalls are discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5491. Pre-Approval Inspections. 3 Credit Hours.**

This course provides a detailed overview of Pre-Approval Inspections and how to conduct audits of facilities based on the responsibilities delineated in a pending drug application, including NDAs, ANDAs and NADAs. Emphasis is placed on reviewing the Pre-approval audit process, Pre-Approval laboratory issues (including analytical and microbiological), technology transfer, case studies involving various dosage forms, and outsourcing issues. This course stresses key areas for Pre-Approval inspection audits. Case studies help prepare students for issues arising during a Pre-Approval inspection. The history and evolution of the Pre-Approval program are discussed. Note: Not open to students who have taken the former PHARMACEUTICS 490.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5492. Production of Sterile Parenterals. 3 Credit Hours.**

This course reviews the theory and practice involved in the preparation of sterile, injectable products, covering formulation, manufacturing, facility requirements, validation and regulatory issues. Upon completion of the course, students will develop an understanding of the routes of administration of injectable drugs and the types of injections, current formulation methods, aseptic manufacturing processes, requirements for sterile manufacturing facilities, and validation, compliance and regulatory issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5493. Sterilization Processes. 3 Credit Hours.**

A study of the theory and application of sterilization processes in the preparation of sterile pharmaceutical products. The course will cover basic principles and current sterilization technology. The course will focus on moist heat sterilization using autoclaves which is the predominant sterilization method employed in the production of pharmaceuticals. A case study will be used in the course demonstrating the specification, installation, qualification and regulatory approval of a new autoclave facility. An overview of gas and radiation sterilization will be provided. Specific pharmaceutical product examples using radiation and gas sterilization will be reviewed in detail. Not open to students who have completed QARA 0493.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5494. Quality Audit. 3 Credit Hours.**

This course covers topics in quality assurance principles, audit techniques, audit types, audit presentation and reports, auditing procedures for GMPs, GCPs, and GLPs. Note: This course is required for the MS in RA and QA; however, students interested in RA may substitute IND/NDA Submissions. Not open to students who have completed QARA 0494.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (QARA 5476, QARA 5477, QARA 5479, or QARA 5536)

**QARA 5495. Investigational New Drug/New Drug Application Submissions. 3 Credit Hours.**

This course covers the development of Investigational New Drug (IND) and New Drug Application (NDA) submissions for FDA review. The major emphasis is directed toward developing an understanding of the philosophies and requirements FDA imposes on data submitted to support INDs and NDAs. It covers the process of producing INDs and NDAs (managing the teams, producing the submission, using electronic media) and emphasizes how to work with FDA to gain approval of a submission. FDA meetings, advisory panel hearings, appeals, strategies for review and approval of NDAs, use of Orphan drug status, and the various avenues of expedited review are discussed. Note: This course is required for the MS in RA and QA; however, students interested in QA may substitute Quality Audit. Not open to students who have completed QARA 0495.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (QARA 5459 or QARA 5592)

**QARA 5496. Regulation of Medical Devices: Compliance. 3 Credit Hours.**

This course examines the broad scope of the medical device industry and its quality assurance practices, covering the preclinical, clinical, manufacturing, postmarket reporting, and device-tracking compliance regulations in the U.S. and other major world markets.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5497. Statistics for Clinical Trials. 3 Credit Hours.**

Assuming no previous courses in statistics, this introductory course reviews topics of interest in statistical evaluation of clinical trials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5498. Computerized System Validation. 3 Credit Hours.**

This course studies the regulatory history and background for computerized system validation (CSV). The current FDA and global CSV relevant regulations including the predicate rules will be discussed. The course will also address compliance with 21 CFR Part 11. The course will introduce students to software development methods and deliverables as they relate to CSV. A wide range of computerized systems typically employed in regulated environments will be examined and their unique challenges will be discussed. Students will have the opportunity for hands-on practice in the development of key validation deliverables and will complete an assigned project. Software development experience is not needed, but a better than average understanding of technology and the systems used in Life Sciences is expected. Not open to students who have taken QARA 0498.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5499. Drug Dosage Forms. 3 Credit Hours.**

Through an overview of drug dosage form design and manufacturing technology, principles of pharmaceutical processing and pharmaceutical dosage form design (including preformulation and biopharmaceutics) are discussed, including dosage forms such as tablets, capsules, modified dosage forms, semi-solid products, and transdermal delivery systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5502. Regulation of Medical Devices: Submissions. 3 Credit Hours.**

This course provides an overview of medical device submissions. The course begins with a review of laws specific to medical devices such as the requirement for pre-market submissions. Specific topics include device classification, investigational device exemption (IDE) applications, pre-market notification submissions [510(k)s], pre-market approval applications (PMAs), humanitarian device exemptions (HDEs), product development protocols (PDPs), STED and an overview of Global Harmonization Task Force recommendations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5503. Design Controls for Medical Devices and Combination Products. 3 Credit Hours.**

This course focuses on design control requirements and practices in the medical device and combination products industry. Class discussions will include design control requirements as they apply to medical devices and combination products. Current regulations and practices will be discussed and utilized to provide students with experience in executing design control activities for a range of products.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5505. Global Regulation of Medical Devices. 3 Credit Hours.**

This course provides an overview of international medical device regulations. Beginning with a discussion of the similarity of global requirements (including both voluntary and mandatory standards and directives and progressing to in-depth analyses of market specific requirements), the course provides students with resources to meet the regulatory requirements for the largest world markets. The Medical Device Directive, the In Vitro Diagnostic Directive and the Active Implantable Medical Device Directive will be discussed, as well as initiatives by the Global Harmonization Task Force related to the classification, development, and complaint handling for medical devices. As part of this course, the student will learn the quality system requirements of ISO13485, risk management according to ISO14971 and how to CE mark their product. Country-specific regulatory requirements for Canada, EU, Australia and Japan are included.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5506. Environmental Law and Regulation (EPA). 3 Credit Hours.**

The mission of the Environmental Protection Agency (EPA) is to protect human health and the environment. This course will provide an understanding of basic environmental laws and regulations and EPA's enforcement activities. Students will learn how to find, analyze and apply the significant laws that EPA administers, such as: the Clean Water Act (CWA), the Clean Air Act (CAA), the Endangered Species Act (ESA), Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), Occupational Safety and Health Act (OSHA), Toxic Substances Control Act (TSCA) and others, in addition to gaining a working familiarity with environmental regulations (40 CFR). Not open to students who have completed QARA 0510.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5507. Regulation of Non-Prescription Healthcare Products. 3 Credit Hours.**

This course examines non-prescription healthcare products in the U.S., including their legal status (both past and present). Starting with discussions of how non-prescription healthcare products are classified, the course will focus on the Food and Drug Administration's OTC Monograph system and the OTC Monograph User Fee (OMUFA). Students will learn how non-prescription labeling evolved (including discussions on Drug Facts Labeling) and examine cases where prescription products were switched to OTC, including the impact of FDA's NSURE Initiative, a draft guidance that will facilitate Rx-to-OTC switches. A brief overview of Non-Prescription classifications outside the U.S. will also be included.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in QARA 5592.

**QARA 5508. Good Pharmacovigilance Operations. 3 Credit Hours.**

This course provides a solid foundation for understanding/managing the complexities of the lifecycle of an individual case safety report (ICSR). It reviews the process from receipt of the ICSR to reporting to regulatory authorities (both as an expedited ICSR and within a periodic safety update report). It compares US and EU regulations and ICH guidances in this area. It also covers the requirements for a validated safety database to process ICSR and Quality Systems in a Pv department. The course discusses the management of a Pv department and the business decisions required to manage the volume of cases received. Also discussed is the role of Pv agreements and preparation for a Pv inspection.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5509. Pediatric and Orphan Drug Regulations. 3 Credit Hours.**

This course introduces students to pediatric and orphan disease drug development, which includes defining these two populations, discussing where they overlap, and the historical and current challenges in developing therapeutic products for them. Biopharmaceutical medications and aspects of medical device development for these populations will also be included. Discussions focus on legislative changes and the importance of legislative advocacy during the past three decades for pediatric and orphan disease drug development, as well as incentives to make drug development in these areas profitable. While the primary focus of the course will be on the United States and the FDA, the course will include similar activities in the European Medicine Agency (EMA) and other relevant regulatory agencies around the world. Specific examples of successful pediatric and orphan drug development programs are included as well as guest lecturers presenting current issues and trends in these areas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5511. Advanced Audit Workshop of Quality Systems. 3 Credit Hours.**

This course, which is a continuation of Quality Audit, discusses the components of a quality system in greater depth and detail, including control systems, procedures, and documentation. Students design and audit a quality system; they also audit and critique quality systems presented by the faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5512. Microbiological Concepts in Pharmaceutical Manufacturing. 3 Credit Hours.**

This course addresses essential microbiology concepts and contamination control of manufacturing and quality control that form the basis of Good Manufacturing Practices (GMPs) for both sterile and non-sterile pharmaceuticals. Emphasis is placed on a review of the following from a microbiological perspective: basic microbiology and microbial awareness, cleanroom design and microbiology, cleaning and disinfection, aseptic techniques, microbial identification, objectionable microorganisms, environmental monitoring, importance of risk assessment, manufacturing technologies and techniques, building quality into processes and contamination control strategy, influence of raw material quality on finished product, microbial deviation investigations and key microbiological tests performed at in-process and finished product stages. The course stresses practical matters and includes case studies to prepare students for daily issues arising in industry. Not open to students who have taken QARA 0512.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5513. Active Pharmaceutical Ingredients (APIs). 3 Credit Hours.**

This course provides a working background on Active Pharmaceutical Ingredients (APIs) used in pharmaceutical dosage forms with focus on the development, manufacture and global regulations that impact successful marketing approval of products. The primary focus is on small molecule synthetic APIs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in QARA 5459.

**QARA 5514. Regulatory eSubmissions. 3 Credit Hours.**

This course will explore the evolution of global regulatory submissions from the original paper format to the current electronic common technical document (eCTD) and non-eCTD electronic submissions (NeeS). This course will primarily focus on current regulations, tools, and specifications associated with electronic submissions and electronic requirements of included documentation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in QARA 5459.

**QARA 5515. Biologics/Biosimilars: A Regulatory Overview. 3 Credit Hours.**

Since the first biopharmaceutical product approval in 1982 (recombinant human insulin), the biotechnology derived product market has been rapidly growing with introduction of a number of promising advances in medicine such as therapeutic monoclonal antibodies, cancer vaccines, cytokines, antisense technology, interference RNA, and growth factors. As with traditional drugs (small molecules), the regulatory framework for approval of a biotechnology derived product (biologics) is complicated. In addition, there has been much debate about the introduction of biosimilars using an abbreviated approval process. An overall biologics-based process map beginning with pre-clinical through the post-marketing stage will be discussed.

Topics such as therapeutic proteins/peptides, gene therapy, stem cells, vaccines, interference RNAs, PK-PD, world-wide regulatory filings, pre-clinical IND-enabling studies, BLA/CTD filing, biosimilars/follow-on-biologics, selected case studies, immunogenicity, comparability studies, manufacturing challenges, clinical trials, market exclusivity, and related regulatory guidelines will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5516. Cleaning Validation. 3 Credit Hours.**

This course will review the different aspects of a pharmaceutical cleaning validation program and the criteria for each. The course will go from protocol to final report with emphasis on the regulatory risks and consequences. FDA and other regulatory agency observations will be highlighted to reinforce class material.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5518. Regulatory Issues in Pharmacogenomics. 3 Credit Hours.**

Pharmacogenetics (PGt) is the study of genetic causes of variability in drug metabolism (pharmacokinetics) and responses to drugs, including adverse events (AEs) and desired pharmacological effects (pharmacodynamics). Variability can be attributed to variations in DNA, such as polymorphisms, or sequences that influence an enzyme or a receptor activity. Pharmacogenomics (PGx) is the science involving pharmacology and genomics which studies how genetic differences within a population affect body's response to a drug. After the completion of the Human Genome Project, PGx has become an attractive tool in the attempt to develop personalized medicine that can be adapted to each person's own genetic makeup and lead to a higher therapeutic efficacy. The FDA (and other regulatory agencies) is requesting that sponsors conducting such programs consider providing pharmacogenomic data to the Agency voluntarily, when such data are not otherwise required under the regulations. Such voluntary submissions would facilitate the drug approval process and help identify patients who need dose adjustments or are prone to certain toxic effects (reflected in the drug's label).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5532. Global Labeling Regulation: Principles and Practices. 3 Credit Hours.**

Provides a detailed analysis of corporate labeling practices in the U.S. and E.U., comparing and contrasting FDA, EU, and International Congress on Harmonization regulations. Special focus is devoted to new FDA guidelines and pharmacovigilance guidelines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5533. Requirements for Product Labeling and Advertising. 3 Credit Hours.**

This course examines strategies for creating drug labeling during new product development, for updating existing product labeling, and for creating "harmonized" core data sheets for products marketed globally. Students gain insight and awareness of current trends in advertising and promotional regulation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5534. Regulatory Aspects of Biomedical/Technical Communication. 3 Credit Hours.**

This course reviews regulatory requirements of biomedical/technical writing in the pharmaceutical industry. Students research, summarize, and organize typical scientific data. Issues of content (relevancy, accuracy, balance, and currency), organization, and style (e.g., American medical Association Manual of Style and current FDA and ICH guidelines) are addressed. Writing exercises include topics such as the Physician's Desk Reference, developing product label package inserts, and summarizing studies in pharmacokinetics, pharmacodynamics, efficacy and safety, product development, and stability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5535. Advanced Topics in Labeling Development. 3 Credit Hours.**

This course reviews the regulatory and legal fundamentals of labeling FDA-regulated products, specifically, prescription pharmaceuticals, emphasizing the direct application of the regulations to actual practice. It analyzes case studies and current practices, providing an overview of legal, regulatory, and marketing concepts affecting labeling. It discusses the application of current knowledge and explores new trends in the legal and regulatory framework surrounding the development and implementation of drug labeling. As a class project, students are assigned to drug development teams (Regulatory Affairs, Marketing and Clinical) and provided with the known data of their compounds. Teams determine what information is needed to complete the draft labeling for NDA submission, and develop a final label; they hold mock negotiations (internal and with the Agency) and propose changes to labeling in response to post-marketing surveillance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5536. Good Clinical Practices. 3 Credit Hours.**

This course examines the federal regulatory requirements and processes necessary to conduct valid drug trials on human volunteers. Emphasis is placed on managing the clinical drug study and auditing its processes and generated data. The course also addresses ethical issues and volunteer informed consent. Note: This course fulfills the GxP requirement for the M.S. in RA and QA students and for the Drug Development Certificate. It is required for the Certificate in Clinical Trial Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5537. Clinical Trial Management. 3 Credit Hours.**

This course is designed to help the clinical research department member and those familiar with the industry working in related fields become more effective members of the clinical research team, whether at a company or an investigator's office. This course covers the day-to-day operations of a clinical trial, from site and investigator selection through monitoring and data retrieval. It covers key topics such as budgeting, protocol preparation, site and investigator selection, monitoring, document and file creation and maintenance, and the participation of key members of the principal investigator's team. Note: This course is required for the Certificate in Clinical Trial Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5538. Clinical Drug Safety and Pharmacovigilance. 3 Credit Hours.**

This course provides students with an in-depth understanding of what pre-marketing Clinical Safety and Risk Management (CSRM) means in the context of both American (FDA) and international (ICH-E2C) regulatory requirements. Beginning with an historical overview of IND and international safety requirements, it examines the processes and systems in place to support compliance and the strategic documentation required for applications. It also looks at the role of risk management and epidemiological methods used to identify the signals used to quantify, assess, and communicate adverse drug reactions (ADR). Topics include clinical trial policy, the roles of the investigator, patient, and IRBs, privacy issues, informed consent, DSMB, and other related matters. Note: This course may be substituted in place of Clinical Data Management in the Certificate in Clinical Trial Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5539. Global Clinical Drug Development. 3 Credit Hours.**

This course focuses on the specific regulatory requirements of clinical development in the European Union, Eastern Europe, Latin America, Canada, India, China and Japan. It will review the efforts of the International Conference on Harmonization (ICH) to unify Good Clinical Practices (GCPs) in these global areas, exploring the differences between cultures, races, and societies and the impact of socialized medicine. Upon successful completion of this course, students will: gain an overview of multinational clinical drug development; gain a basic understanding of cultural differences towards GCPs in various regions of the world; understand key regulatory bodies and concepts governing clinical development in various global markets; and become familiar with the ICH and its legal requirements for global clinical development. Note: This course may be substituted in place of Clinical Trial Management in the CTM certificate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5541. Pharmaceutical Packaging: Technology and Regulation. 3 Credit Hours.**

This course focuses on the complexities of packaging for the pharmaceutical industry, covering commonly used packaging systems (bottle/blister packaging for Oral solids) as well as niche applications (such as sterile/parenteral, inhalation, and nasal systems). In addition to the container/closure systems, some of the packaging processing methods will be covered. A review of the applicable regulatory environment and the submission requirements for drug products will be included. The submission needs will be covered, with a focus on the needs of the newly implemented Common Technical Document (CTD). A visit to a manufacturing facility of one of the industry's suppliers will be required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5542. Pharmacopoeia Compliance: Understanding the Global Impact on RAQA. 3 Credit Hours.**

Compliance with requirements published by pharmacopoeias around the world is a legal and regulatory requirement in those countries and regions in which the pharmacopoeia is applicable. This fundamental (and often misunderstood) principle is an important consideration throughout the drug product life cycle across the bio/pharmaceutical industry. This course provides an in-depth look at the interplay of pharmacopoeias, quality assurance, and regulatory affairs to assist companies in establishing effective processes, partnerships, and tools to maintain appropriate and timely compliance. Topics include why pharmacopoeia compliance is necessary and why it is difficult; a history of pharmacopoeias and harmonization efforts; the revision process for global and national pharmacopoeias and the associated surveillance process used by industry to identify pharmacopoeia changes; the process for monograph development including real-world case studies; and new topics that are on the horizon as the pharmacopoeias continue to evolve. Additionally, the course provides compendial touchpoints during each stage of product development and its importance to regulatory decision making throughout a development program and lifecycle management of a therapeutic product, including innovator, generic, virtual, OTC, and start-up companies who discover, develop, manufacture, and distribute small-molecule drug products, biotherapeutic products, and vaccines, as well as the drug substances and excipients used in these products. Class discussion and hands-on exercises will provide insights on the complexity encountered and possible solutions that companies face every day. The class will focus on small molecule drugs and biotherapeutics and will not include an in-depth overview of herbals or dietary supplements. Note: Science background required. Suggested prerequisites (but not required): Drug Development (5459), Good Manufacturing Practices (5477), and Generic Drug Regulation: ANDAs (5473).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5543. Good Distribution Practices. 3 Credit Hours.**

Students will study the organizational, managerial and technology issues related to the supply chain, logistics, and distribution functions of the pharmaceutical industry, particularly generic pharmaceuticals. They will be introduced to the tools and technologies that companies use to optimize their supply chain, logistics, and distribution functions, with specific emphasis on how generic companies configure and operate these aspects. Topics include: supply chain operations; integration with distributors, wholesalers, and other channels; WHO/FDA regulations and guidelines; supply chain security (counterfeiting, RFIDs, etc.); inventory considerations (management, turns, cost); demand and capacity planning; lean operations; postponement; supply constraints; and technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5544. Regulatory Intelligence. 3 Credit Hours.**

This course examines the fundamentals of Regulatory Intelligence, including what it is, how it is conducted, and how it is used to influence regulatory decision making throughout the development and lifecycle management of a therapeutic product. Students will learn to monitor the legislative and regulatory landscape by assessing accessible information data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (QARA 5459 and QARA 5592)

**QARA 5545. Post Approval Changes (PAC). 3 Credit Hours.**

This course reviews SUPAC guidelines developed by CDER to maintain product safety, efficacy, and quality while giving manufacturers substantial regulatory relief and flexibility. A basic review of formulation development of various dosage forms provides a complete understanding of the guidelines and of regulatory strategies for formulation development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5546. Global Pharmaceutical Excipient Regulation. 3 Credit Hours.**

An integral part of almost all pharmaceutical dosage forms, excipients play an important role in drug development. This course discusses the function of excipients, providing an in-depth examination of their unique yet globally diverse regulatory requirements in major world markets. Excipient selection, assessment, and supplier qualifications will be discussed, as well as Adverse Events (AEs) related to excipient quality. This course stresses how global pharmaceutical excipient regulation is critical in developing formulations that have the potential for international approvals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5547. Project Management for Clinical Trials. 3 Credit Hours.**

Creation of clinical development plans to better lead, manage and operate clinical trials. Combines basic project management methodology and drug development best practices needed for leading and managing a clinical trial time.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (QARA 5459 or QARA 5536)

**QARA 5548. Risk Management of Pharmaceutical and Medical Devices. 3 Credit Hours.**

This course focuses on risk management requirements and practices in the pharmaceutical, medical device, and biotech industries. Current regulations and risk management tools will be discussed and utilized to provide students with experience in executing risk assessments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5571. Post-Marketing Safety Surveillance. 3 Credit Hours.**

This course provides an in-depth understanding of post-marketing safety surveillance (PMSS) in the context of both American (FDA) and international (ICH-E2C) regulatory requirements. It begins with a historical overview of PMSS and then reviews the role of epidemiological methods in identifying signals and quantifying, assessing, and preventing adverse drug reactions (ADR). Medical/legal issues, benefits and limitations of safety surveillance systems, labeling changes, the ability to refute false signals, and social and ethical obligations inherent in the conduct of PMSS are discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5572. Vaccines: Regulatory Affairs and Quality Assurance Issues. 3 Credit Hours.**

This course addresses the history, research and development, manufacture, marketing, and medical impact of vaccines. Various public policy, regulatory, ethical, and legal issues in this area are discussed as they pertain to the U.S. and, to some extent, international markets. Beginning with the eradication of smallpox, this course covers the development of widely used vaccines against once common diseases (e.g., polio, mumps, varicella, etc.), to the development of vaccines against HIV, anthrax, and certain types of cancer.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5573. Pharmacoepidemiology. 3 Credit Hours.**

This course introduces students to principles of study design, concepts of causal inference, and major types of epidemiological studies. These principles are applied to the distribution and determination of the effects (expected and unintended, beneficial and adverse) of pharmaceuticals on human populations. Risk-benefit analyses, cost-benefit assessments, regulatory issues, and legal and public health concerns are discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5574. Pharmaceutical Quality Management Systems. 3 Credit Hours.**

This course presents a comprehensive Quality Management Systems approach to the pharmaceutical industry based on Q10 regulations. SOPs, Deviation/Non-conformance, Corrective and Preventative Action, Supplier Management, Change Management, Validation, and Process controls via Key Performance Indicators are explored. Focus is placed on the key areas for inspection readiness and robust Quality Systems development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**QARA 5575. Regulatory Sciences: Managing the Guidelines to Quality. 3 Credit Hours.**

The International Conference on Harmonization (ICH) has revolutionized the format and content of global regulatory filings with the Common Technical Document (CTD). Recent FDA draft guidelines have incorporated and expanded upon concepts described by the ICH. As the term "guideline" implies, such documents should not be generally viewed as regulations, but as "recommendations" to consider when developing the body of scientific information. Proper interpretation of the guidelines based on sound scientific principles is essential to optimize both the quality and quantity of information submitted to global regulatory agencies. Consequently, review of various ICH and FDA Quality guidelines will be supplemented by a discussion of the basic scientific principles that may influence implementation. After completing this course, students should understand the basic expectations set forth in various ICH and FDA Quality Guidelines. They should also realize that the guidelines are subject to interpretation and not definitive regulations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5576. Global CMC Issues and Regulatory Dossier. 3 Credit Hours.**

The course provides students with an in-depth knowledge of the major chemistry, manufacturing, and controls (CMC) issues facing the global pharmaceutical industry. Students learn the practical and theoretical skills necessary to develop successful CMC dossiers from the initial clinical application through marketing and post-marketing support. The class emphasizes long range CMC planning to combine technical and regulatory knowledge with strategic thinking. The class is designed for regulatory professionals, managers, and scientists with significant responsibility for CMC dossiers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5577. Global CMC Regulatory Compliance for Biopharmaceuticals and Other Biologics. 3 Credit Hours.**

This course provides an introduction to the chemistry, manufacturing and controls (CMC) topics involved in the development and licensure of biologic products (biopharmaceuticals, vaccines) in the US, Europe and other highly regulated world regions. Topics will be discussed from the perspective of Regulatory and QA requirements and expectations. Basic microbiology, cell biology and chemistry concepts will be reviewed with an emphasis on their practical application to product development and RA/QA. The class orients RA/QA professionals, managers and scientists responsible for biopharmaceutical CMC development and preparation of dossiers to the CMC content matter and technical issues that must be addressed in biologic product development and registration globally. Topics include adventitious agents testing, cell and seed bank testing methods and requirements, drug substance production via cell culture, protein and virus purification methods, control and analysis of process impurities, analytical methods and potency testing for characterization and release, strategy for specification setting for release and stability, comparability studies for biologics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in QARA 5459.

**QARA 5578. Benefit Risk Management and Safety Signaling of Healthcare Products. 3 Credit Hours.**

This course provides students with a basic understanding of the principles involved in developing, negotiating, and implementing Benefit-Risk Management Plans. While the focus will be on risk management plans intended for the EU and USA markets, the general principles are applicable across most regulatory jurisdictions in the world.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (QARA 5571 or QARA 5538)

**QARA 5579. Regulatory and Legal Basis of Pharmacovigilance. 3 Credit Hours.**

This course reviews key regulations and the regulatory framework that influence the development and management of a pharmacovigilance system. While the main emphasis is on ICH regions, systems in emerging countries are also included, including the impact of the changing regulatory landscape on both manufacturers and regulators. Discussions include partnership agreements, pharmacovigilance aspects of due diligence, licensing and acquisitions, and product liability issues. In addition, students learn key aspects of drug safety and pharmacovigilance; FDA and EMA guidances that shape pharmacovigilance practices; the merits and deficiencies in the U.S. AERS database system in comparison to the European Eudravigilance data base; differences between the U.S. periodic reports (including periodic safety update reports, development safety update reports, and others as mandated); the impact of key regulatory reforms on pharmacovigilance (Brexit and GDPR); and product liability issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5591. Global Regulatory Affairs. 3 Credit Hours.**

This course provides a detailed analysis of the regulatory processes for new drug approvals outside of North America. Students gain experience in comparing the European and Japanese registration trends with those of the United States. Future regulatory structures in the major world markets are explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5592. Food and Drug Law. 3 Credit Hours.**

This course studies the governance of intra- and interstate commerce in foods, drugs, cosmetics, and medical devices and the effects of the Federal Food, Drug and Cosmetic Act upon research, manufacture, marketing, and distribution of drugs. Note: This course is required for the M.S. in RA and QA and for the Drug Development Certificate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5594. Regulation of Dietary Supplements and Functional Foods. 3 Credit Hours.**

Functional foods and dietary supplements have been a fast growing segment of the food market for the last half a decade owing to the aging demographics and scientific research demonstrating their effect on health. Regulation and judicial decisions have been influential for dietary supplement companies in producing and marketing their products. An understanding of how these regulation work and what influence they have on dietary supplement regulatory policy is critical. This course will provide information on the history of the regulation in the US and an in-depth look at the current regulatory outlook for these products in the US and in other select countries/regions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5595. Food Law. 3 Credit Hours.**

While Food and Drug Law (QARA 5592) briefly touches on food law, this course examines the major federal statutes and regulations applicable to food in more detail through class discussion and workshops. While emphasis is placed on the role, policies, and regulations of FDA, the practical working relationships and obligations between the food industry, the USDA, and other government agencies at the state and local level are also examined. Pertinent landmark judicial decisions and concepts are presented relating to regulation of food and enforcement action against adulterated food. The Food Safety Modernization Act (FSMA), the most sweeping reform of U.S. food safety laws in more than 70 years, is studied, including new enforcement tools granted to FDA. Preventive Controls for Human and Animal Food, which are revolutionizing food safety programs across the globe, are extensively studied and illustrated. The student project focuses on conducting a Hazard Analysis for a particular food product.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5596. Food Labeling and Regulatory Affairs. 3 Credit Hours.**

This course provides students with an in-depth understanding about how food in the U.S. must be labeled. Students learn about the food label and its mandatory components, as well as problems associated with incorrect or deceptive labeling. Rules issued under the Food Safety Modernization Act (FSMA), such as Sanitary Transportation, Protection Against Intentional Adulteration, Produce Safety, Foreign Supplier Verification Program, and Accredited Third Party Certification are thoroughly studied. The course describes regulatory affairs functions in the food industry, including food facility registration, importing, FDA inspections, record keeping, reporting and recalls. Workshops throughout the course illustrate important labeling and FSMA concepts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (QARA 5592 or QARA 5595)

**QARA 5597. Food Good Manufacturing Processes. 3 Credit Hours.**

This course covers FDA-enforced cGMPs (current Good Manufacturing Practices) through class discussion and workshops. Food safety regulations under the Food, Drug, and Cosmetic Act are covered as well as their impact on personnel, facilities, equipment, and production. Major foodborne pathogens are discussed, followed by control strategies, such as formulation and thermal processing. Emphasis is placed on preventing foodborne hazards via an understanding of sanitation measures, allergen control, acidification and low-acid canning. A risk-based approach to controlling hazards is presented using HACCP (Hazard Analysis and Critical Control Points) principles, from which new Preventive Controls regulations were derived. The student project focuses on evaluating food safety concerns when an FDA inspection reveals a total quality failure.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5598. Regulatory and Safety Requirements for Developing New Innovative Food Ingredients. 3 Credit Hours.**

Many innovative and new food ingredients are being introduced for use in the food industry. Each new ingredient must meet current regulatory and safety requirements. This course provides an overview of the regulatory and safety evaluation of food ingredients, including the regulatory approval processes. Topics include the requirements and submission process for innovative ingredients in the U.S., Canada, EU and other global regions. Discussions include global strategies for food ingredient approval, including petition procedures for JECFA and the Codex Alimentarius Commission. The course emphasizes the U.S. Generally Recognized as Safe (GRAS) system, exploring the controversial issues associated with this unique regulatory process. Self-regulatory schemes for ingredients such as flavors and enzymes will also be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5599. Clinical Aspects of Pharmaceutical Medicine. 3 Credit Hours.**

This course offers students a basic understanding of the disease processes most prevalent in Western culture. Students gain an appreciation for the epidemiology and demographic patterns of disease and their societal and economic impact. In addition, students gain a basic understanding of the etiology and the pathophysiology underlying the disease processes and the role of pharmacologic intervention.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5601. Industry Interactions with FDA/Health Authorities. 3 Credit Hours.**

Presenting a global perspective by reviewing the drug approval process in the European Union (EU), this course introduces students to the importance of establishing liaisons with officials with the U.S. FDA and other world health authorities. The rapport developed with health authorities frequently lessens the time it takes to get a new drug to market. How a firm presents its data can contribute as much to the successful relationship with health authorities as the quality of data presented. Areas include: FDA organization, average workload analysis with FDA, FDA review and drug approval process, national versus mutual recognition versus centralized approval process in the EU, user fees, company "personalities," FDA/Industry meetings, inspections, Advisory Committees, IND/NDA classification system, FDA initiatives to speed drug approval including electronic submissions, and notable internet regulatory addresses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5605. Advanced Topics in Food and Drug Law. 3 Credit Hours.**

This course expands the regulatory concepts covered in QARA 5592. Each semester the specific topics change.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5606. Regulatory Strategy: Discovery to Approval. 3 Credit Hours.**

A regulatory strategy is a key component of a therapeutic product's development. It is imperative to create a regulatory strategy early in the development process to consider such critical factors as the correct indication, size of the treatment population, cost and extent of clinical studies, and potential market for the product under consideration. The regulatory strategy should be developed as soon as the target product profile (TPP) is determined. Considering the enormous investments companies incur when launching new products, any regulatory strategy must be well thought out, reviewing existing patents, current regulatory intelligence, and pricing issues. This course covers the development and execution of product approval strategy from discovery to marketing approval. Class discussions include analyses of successful product launches as well as ones that failed due to insufficient regulatory strategies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5611. Regulation of Advertising and Promotions. 3 Credit Hours.**

This course reviews the regulatory and legal fundamentals of advertising and promotion of FDA-regulated prescription products. Emphasis will be placed on prescription pharmaceuticals and the current regulatory and legal environment. Discussions include how prescription drug regulations differ from those applicable to OTCs (over-the-counter drugs), biologics and restricted medical devices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in QARA 5533.

**QARA 5612. Bioethics for Pharmaceutical Professionals. 3 Credit Hours.**

This course focuses on bioethical issues arising in the regulation and conduct of research. It instills a basic understanding of bioethics and the theories and principles underlying its practices and application to research. It also discusses how bioethical theories and principles provide the foundation for many research regulations. Starting with a brief history of research ethics and regulation, it explores past and present ethical research controversies. Note: This course is required for the Certificate in Clinical Trial Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5615. Project Management for Pharmaceutical Professionals. 3 Credit Hours.**

This course discusses the strategic positioning of drugs, specifically focusing on domestic and international registration strategies. It explores why a company seeks a particular indication in labeling and how RA/QA professionals play a critical role in understanding and developing regulatory intelligences. It covers how project teams should be created, including the effective clarification of roles and responsibilities, so regulatory timeliness can be achieved. Workshops include an overview of project planning tools, techniques and critical path management, including negotiating registration strategies with the FDA and foreign agencies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5616. Accelerated Regulatory Pathways: From Fast Track to Reliance. 3 Credit Hours.**

Facilitated Regulatory Pathways (FRPs) are regulatory approaches used by ministries of health to accelerate the development and assessment of new products or reduce the burden of duplicative regulatory activities, helping to make the development and assessment of safe, effective, quality medicines more efficient and timelier often through reliance or recognition mechanisms, thereby promoting efficient access to important medicines worldwide. This course has been designed to help the student understand the evolution of and distinguish the characteristics of FRPs used by ICH and maturing regulators. Participants will learn how to apply these to real-world global drug development programs. Students will investigate how to apply the concept of Return on Investment for the use of FRPs, as these apply to companies and agencies and will gain an understanding of how the data requirements for FRPs and the acceleration of authorizations through these pathways have implications for agencies, patients, payers and health technology assessment bodies. A combination of presentation styles will be used: lecture by the instructor and invited international speakers; interactive questions will be posed by the presenter to the students; each week selected students will be asked to prepare a 10-minute overview of a recently published manuscript/research paper/policy document that will relate to the topic of the session and will help students familiarize themselves with important advances in the field of FRPs; and an in-session discussion will be presented by the course instructor based on the reading homework, and practical applicability of the learnings from the publication will be stressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in QARA 5459.

**QARA 5618. Clinical Data Management (CDM). 3 Credit Hours.**

Data management is the activity of collecting, reviewing, organizing, and analyzing data from clinical research studies. The data from clinical research studies are the crux of a regulatory submission for a new drug or biologic. There is no basis for a therapeutic claim without data. Thus the success of a submission depends on quality data management practices and strict adherence to regulatory requirements. This course teaches students how to go from collecting data for the first protocol to ultimate submission to a regulatory agency from data collection, management, and reporting perspectives. Note: This course is required for the Certificate in Clinical Trial Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5621. Regulatory Bioanalysis. 3 Credit Hours.**

This course covers several broad topics: (1) a high-level quantitative analysis of biological samples that provide data to support pharmaceutical drug/biological product approval, (2) detailed instruction of FDA and EMA regulations and guidances that govern bioanalytical method development, validation and application in routine sample analysis, (3) "best practices" recommended for implementing quality management systems in a bioanalytical laboratory, and (4) discussion of approaches to address common problems that may arise during method validation and sample analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5622. Unit Operations. 3 Credit Hours.**

This course will expose students to the current process steps common to the manufacture of modern pharmaceuticals. In particular, the key variables for each step of a process will be discussed. Each class will feature a specific process common to pharmaceutical processing. Specific variables will be discussed, including an analysis of each process. At the end of the course the student should be able to describe a process by a series of smaller operations, describe the key variables for each small operation, identify key limitations of time and resources in proposed processes, and provide constructive improvements to complex processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5625. Process Analytical Technology (PAT). 3 Credit Hours.**

The course focuses on state-of-the art utilization of process controls, including multivariate methods and feed-back loops. It will investigate analytical tools, including thermal conductivity, NIR, and Raman spectroscopy. It will also cover process analysis and feedback, as well as batch record analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5627. Statistical Design of Experiments (DOE). 3 Credit Hours.**

This course exposes students to the use of statistical methods for designing optimal processes used in industry, extensively using data sets and data charting. At the end of the course the student should be able to: create an experimental plan to optimize a process; create a screening study to limit the number of experiments; use surface methodology to set process specifications; and use specialized methodology for material analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5629. Process Monitoring. 3 Credit Hours.**

This course reviews Control Charting, Six Sigma, Root Cause Analysis, Risk/Benefit Analysis, Process Capability, and Process Efficiency/Lean Manufacturing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 5650. Special Topics in Regulatory Affairs and Quality Assurance. 3 Credit Hours.**

Special topics as announced.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**QARA 5655. Analytical Chemistry in Pharmaceutical Laboratories. 3 Credit Hours.**

This course provides an overview of laboratory operations and the critical role of an analytical scientist. It reviews regulatory requirements for pharmaceutical lab operations and provides a framework for quality in a drug development laboratory. Although the course is designed for pharmaceutical scientists, many of the operations discussed are applicable to the chemical and environmental industries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**QARA 8001. Principles of Drug Action/PK. 3 Credit Hours.**

This course presents the fundamental principles of pharmacology, medicinal chemistry, and pharmacokinetics needed to understand their application in drug discovery and developmental processes. The material, presented in an integrated manner, includes the molecular mechanisms of drug action, structure-activity relationships, and the time-course of drug absorption and disposition.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 8002. Pharmaceutical Analysis. 3 Credit Hours.**

Application of chemical analysis as it relates to pharmaceuticals and pharmaceutical manufacturing. Classical separation methods including GC and HPLC, as well as hyphenated techniques (GS-MC and HPLC-MC) will be explored. Students will also be introduced to newer immunologic antibody-based procedures and emerging technologies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 8003. Preformulation - Small Molecules. 3 Credit Hours.**

Preformulation research of small molecules is the foundation of pharmaceutical manufacturing. Inadequate understanding of the physical/chemical and biophysical properties of drug substance or excipient can lead to the development of formulations and manufacturing processes that are not robust. The ability of a company to demonstrate to health agencies a firm understanding of the "manufacturing science" related to the production of each dosage form is essential. This course describes the evolution of preformulation from a science dedicated to primarily characterizing basic drug substance and excipient attributes as they relate to the finished product to the science of understanding, utilizing and controlling such properties to optimize the manufacture and bioavailability of a dosage form. The influence of preformulation data in the era of Quality by Design (QbD) and expectations for outstanding science from global health authorities will be incorporated throughout the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 8004. Pharmaceutical Manufacturing II: Solid Dosage Forms. 3 Credit Hours.**

This course presents the comprehensive, integrated, and most up-to-date methods, processing, and principles as they apply to solid dosage form design and product development. Conventional and specific techniques of industrial pharmacy, including direct compression, wet and dry granulation, fluid bed and coating operations, tableting machine instrumentation and compatibility measurements, and solid product evaluation will be presented. Novel oral dosage forms and technologies associated with solid products as well as product quality and performance assessment will be covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 8006. Physical Pharmacy I. 3 Credit Hours.**

The emphasis of this course is to form a bridge between the concepts of physical pharmacy and the application of pharmaceutical sciences. Students will understand basic aspects of intermolecular forces, physical properties of solutions, ionic equilibria, buffers and isotonic solutions, solubility and partition phenomena, complexation and protein binding, reaction kinetics, mass transport, dissolution phenomena, interfacial phenomena, and rheology. Pharmaceutical applications based on the basic principles will be discussed as well. Students will be expected to be able to apply the basic concepts from this course to typical formulation and stability issues of pharmaceutical dosage forms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**QARA 8007. Applied Biopharmaceutics. 3 Credit Hours.**

This course considers the interrelationship of the physicochemical properties of the drug, the dosage form, and the route of administration on the rate and extent of systemic drug absorption. Drug absorption mechanisms, physiological and GIT constraints on dosage form transit and bioavailability, effect of formulation parameters, dissolution methodologies, in-vitro/in-vivo correlation of drug product performance as well as PAC, ICH and FDA guidelines on development and approval process will be covered. Formulation strategies for optimum therapeutic outcome via application of pharmaceutical sciences to the design of drug delivery systems is provided.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Philosophy (PHIL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PHIL 5210. Special Topics in Philosophy. 3 Credit Hours.**

Arranged each semester. Please consult the instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 5211. Intermediate Logic. 3 Credit Hours.**

This course will go through the soundness and completeness proofs for a first-order deductive system (i.e., the kind used in intro logic). The main goal of the course will be to deepen the students' understanding of logic by acquainting them with these formal results. But we'll also try to spend a little time on some philosophical issues (e.g., what, if anything, does logic have to do with reasoning).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5216. Philosophy of Science. 3 Credit Hours.**

Basic issues in the current philosophy of science, and particularly various accounts of such key notations of science as hypotheses, confirmation, laws, causation, explanation, and theories.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5217. Feminist Epistemology and the Philosophy of Science. 3 Credit Hours.**

This course explores the effects of gender on scientific creativity, method and decision making. Thomas Kuhn, in *The Structure of Scientific Revolutions* (1962), was one of the first to show that political, social and psychological factors affect scientific change. Feminist criticisms of science, developed over the last thirty years, are one way in which his views have been developed. We will examine cases from a wide range of sciences to see where, and how, gender influences scientific practice. The complex relations between gender, race, class and nationality will also be discussed in relation to these issues. Central questions of the course will be: How pervasive is gender bias in science? Can gender bias be eliminated, and is it desirable to do so? Does the reduction of gender bias require an increased representation of women in science? Can the popular view that science is objective, truth-seeking and progressive be maintained in the face of findings of gender bias? We will read from the work of Evelyn Fox Keller, Donna Haraway, Sandra Harding, Helen Longino, Alison Wylie and others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5218. Philosophy of Medicine. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5221. Social and Political Philosophy. 3 Credit Hours.**

Arranged each semester. Please consult the instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5222. Contemporary Ethical Theory. 3 Credit Hours.**

Issues in ethical theory that have come to prominence in the 20th century. Both meta-ethical issues (about the meaning and justification of ethical statements) and normative issues (about obligation, responsibility, and goodness) will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5223. Feminist Ethics and Political Philosophy. 3 Credit Hours.**

An examination of feminism's contribution to ethics, political philosophy, and legal theory. Issues may include: the role of care versus that of justice in determining moral obligations; the nature and causes of women's oppression (including the difference between the sexual oppression experienced by white women and the additional forms of oppression to which women of color/third-world women are subject); pornography and prostitution; equality and difference; essentialism as it pertains to gender and race; feminist jurisprudence; postmodern feminism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5225. Metaethics. 3 Credit Hours.**

The course examines the foundations of ethical value, including the metaphysics of ethical value, the semantics of ethical language, normativity, and the relation between kinds of value such as instrumental, final, intrinsic, and extrinsic as well as personal, ethical, moral, and prudential.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5226. Classics in Moral Philosophy. 3 Credit Hours.**

The course will introduce students to Greek ethical thought through seminal texts in this genre.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5229. Philosophy in Literature. 3 Credit Hours.**

Selected philosophical themes as they appear in classical and modern literature. Frequently the themes concern the "enlightenment project," "modernism," and their critics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5230. Special Topics. 3 Credit Hours.**

Arranged each semester. Please consult the instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 5232. History of Aesthetics. 3 Credit Hours.**

A study of major works in the history of aesthetics selected from such philosophers as Plato, Aristotle, Hume, Kant, Schopenhauer, Hegel, Dewey, Bell, Collingwood, Beardsley, Langer, Dickie, Danto, and contemporary figures.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5233. Problems in Aesthetics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5235. Classics in Moral Philosophy II. 3 Credit Hours.**

A study of the major works in the history of moral philosophy selected from among the writings of such philosophers as Plato, Aristotle, Hobbes, Spinoza, Hume, Kant, Mill, Nietzsche, Moore.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5240. Special Topics. 3 Credit Hours.**

Arranged each semester. Please consult the instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 5241. Theory of Knowledge. 3 Credit Hours.**

An examination of knowledge and belief. The specific subtopics involving them include truth, perception, innate ideas, justification, induction, the priori, mathematical knowledge and rationalism versus empiricism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5242. Metaphysics. 3 Credit Hours.**

An examination of the most general features of the universe. Topics include the character of truth, the existence of abstract entities, the nature of persons, free will, the existence or non-existence of God, ontological commitment, the relation of philosophy to science, causation, modal properties, reality and appearance, and various forms of realism and anti-realism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5243. Philosophy of Law. 3 Credit Hours.**

An introduction to philosophical problems arising in the examination of legal statements, including questions and theories about the nature of law itself, about legal responsibility and legal punishment, and about standards of fairness in settling legal disputes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5244. Philosophy of the Mind. 3 Credit Hours.**

An examination of the character of mental and psychological states. Specific issues may include the nature of persons, relations between natural and psychological sciences, action, mental content, and its relation to language.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5249. Ethics in Medicine. 3 Credit Hours.**

Exploration of ethical issues generated by the application of scientific and technological advances to the preservation, destruction, and programming of human life. Topics may include: ethics of medical research, abortion, euthanasia, behavior control, allocation of scarce medical resources, and the ethics of patient-physician interaction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5250. Topics in the Philosophy of Psychology. 3 Credit Hours.**

The course examines select topics in the philosophy of psychology such as philosophical treatments of the nature of cognition, perception, and sensation, as well as emotion, intention, action, and moral psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 5251. Philosophy of Language. 3 Credit Hours.**

This course focuses on philosophical topics concerning the nature of language. Broadly, these topics include semantics (theory of linguistic meaning), syntax (theory of linguistic structure), and pragmatics (theory of linguistic use). The precise content varies according to the instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**PHIL 5253. Philosophy of History. 3 Credit Hours.**

Problems of historical knowledge, e.g., problems about the historian's claim to explain historical events (causation in history, reasons for actions, challenges to the objectivity of history) and problems about historical interpretation (including global interpretations of the historical process, such as Augustine's, Kant's, and Hegel's.)

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5269. Contemporary British and American Philosophy. 3 Credit Hours.**

Selected topics in 20th and 21st century English-speaking philosophy, varying according to instructor and semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5271. Nineteenth-Century Philosophy. 3 Credit Hours.**

Selected European philosophers from Hegel to Bradley.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5272. Philosophy of Culture. 3 Credit Hours.**

The purpose of this course is to address central themes in philosophy of culture, such as philosophical problems raised by the notion of cultural conditions of possibility, the relation of mythic knowledge to scientific and philosophical knowledge, the role of signs and symbols in theories of culture, the philosophical significance of psychoanalysis, and the distinction between a philosophical anthropology and anthropological theory. This course will be topical in nature, which means that it can be taken each year as different dimensions of the subject receive focus.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5273. Greek Philosophy. 3 Credit Hours.**

Interpretation and critical examination of the dialogues of Plato and the works of Aristotle.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5274. Pragmatism and American Thought. 3 Credit Hours.**

American pragmatism and naturalism, with emphasis on Emerson, James, Peirce, Mead, Dewey, and contemporary pragmatists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5275. British Empiricism. 3 Credit Hours.**

Selected topics in 17th- and 18th-century philosophers such as Locke, Berkeley, Hume, and Reid.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5276. Contemporary Continental Philosophy. 3 Credit Hours.**

Phenomenology and existentialism, with emphasis on such 20th century philosophers as Husserl, Heidegger, Sartre, Merleau-Ponty, Foucault, Derrida, and other post-structuralists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5278. Continental Rationalism. 3 Credit Hours.**

This course is devoted to selected topics in 17th- and 18th-century philosophers in the Rationalist tradition such as Descartes, Spinoza, and Leibniz.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 5279. Kant. 3 Credit Hours.**

In depth study of some of the major critical writings of Kant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8602. Seminar in Greek Philosophy. 3 Credit Hours.**

This course will examine Greek philosophical conceptions of pleasure and hedonism. We will begin with some Presocratic material, then move to Plato (selections from Gorgias, Protagoras, Republic). We will examine Plato's Philebus in its entirety. Thereafter, we will look at Aristotle's treatments in Nicomachean Ethics VII and X, including Eudoxus' arguments, as well as Rhetoric I. Finally, we will consider the hedonism of the Cyrenaics and Epicureans.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8611. Seminar in Continental Rationalism. 3 Credit Hours.**

Selected topics in 17th- and 18th-century philosophers such as Descartes, Spinoza and Leibniz.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8616. Seminar in British Empiricism. 3 Credit Hours.**

Selected topics in 17th- and 18th-century philosophers such as Locke, Berkeley, Hume, and Reid.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8621. Seminar in Kant. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8626. Seminar in Nineteenth-Century Philosophy. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8631. Seminar in Contemporary Continental Philosophy. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8641. Seminar in American Philosophy. 3 Credit Hours.**

Selected topics in the thought of American philosophers, especially the American pragmatists such as James, Dewey, and Pierce.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8666. Seminar in Philosophy of the Social Sciences. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8701. Seminar in Aesthetics. 3 Credit Hours.**

The general plan of the seminar is to explore the master thinkers of continental aesthetics from an analytic vantage and against the dominant themes of Anglo-American aesthetics. I anticipate drawing on a good selection of continental authors and a specimen or two of a more sustained treatment. This would involve, for instance, a selection among the classic figures spanning Kant and Hegel, phenomenology, hermeneutics, structuralism, post-structuralism, and the Frankfurt-critical school at least. Proposals of topics or figures are welcome.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8712. Seminar in Ethics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8721. Seminar in Social and Political Philosophy. 3 Credit Hours.**

This seminar will examine three core approaches in contemporary political philosophy--Rawlsian contractarianism, Habermasian critical social theory, and feminist political theory--and will critically analyze the strengths and weaknesses of each through a study of their main exponents. Since recent controversies in social and political philosophy have tended to focus on global issues, some attention will be given to how these three approaches address questions of global justice, political ecology, and cooperation and solidarity across borders. The seminar will proceed through a close study of key texts from each approach and will involve oral presentations by participants and an original research paper. Readings will include John Rawls, Thomas Pogge, Jurgen Habermas, Iris Marion Young, Alison Jaggar, and Nancy Fraser.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for a total of 6 credit.

**PHIL 8731. Seminar in the Philosophy of the Mind. 3 Credit Hours.**

Examination of current views of such topics as materialistic accounts of mind, intentionality, the analysis of specific mental phenomena (e.g., belief, consciousness, emotion, desire), ascription of mental attributes to machines.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8741. Seminar in Epistemology. 3 Credit Hours.**

For the most part, we will closely study disputes surrounding foundationalism. Originally a theory about justified belief, foundationalism has become a watchword in wider cultural wars. Because its wider use is not wholly unrelated to its original use in the theory of knowledge, it is certainly something on which we should try to achieve clarity. A recent anthology entitled *Contemporary Debates in Epistemology*, edited by Matthias Steup & Ernest Sosa contains essays, pro and con, on various aspects of this issue, written by a number of leading epistemologists, and with both defenses and critiques of each of the positions involved. The topics in the anthology cover, among other things, the nature of justification, a priori knowledge, perception, skepticism, the ethics of belief, truth, and context. The hope is that we can work through the 11 sections of this text to achieve a better grasp of the issues and their broader implications for our understanding.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8746. Seminar in Metaphysics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 8755. Seminar in the Philosophy of Language. 3 Credit Hours.**

This course is devoted to topics in the philosophy of language such as meaning, reference, metaphor, speech-act theory, and vagueness.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHIL 9882. Tutorial. 1 to 3 Credit Hour.**

Independent study for graduates with a professor within the department, usually their advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 9982. Tutorial. 3 Credit Hours.**

Independent study for graduates with a professor within the department, usually their advisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 9996. Master's Thesis Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Registration required each semester after Preliminary Examinations while researching the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHIL 9999. Dissertation Research. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Physical Therapy (PHTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PHTH 8101. Introduction to Physical Therapy. 1 Credit Hour.**

This course introduces students to the concepts of professionalism, advocacy and the role of the physical therapist in the American health care system. Students will learn about the American Physical Therapy Association, its role in advancing the profession of Physical Therapy, and the resources available through the organization. In preparation for clinical practice students will be introduced to various documentation strategies including electronic health records.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8102. Teaching, Learning, Group Dynamics. 2 Credit Hours.**

The course is designed to assist the student physical therapist in improving his/her clinical and behavioral teaching, learning, and group dynamics skill sets through activities, lectures, and group projects. The first part of the course provides instruction to the student about group dynamics. Therapists, regardless of employment location, must work in harmony with many disciplines to achieve patient goals. Teamwork and inter-professional communication are critical factors in accurate clinical decision making. Trust, leadership, dependency, group dynamic theory, and inclusion are explored in the first half of the course within the framework of the inter-professional team approach to the provision of health care. The second part of the course focuses on behaviors and teaching skills associated with the therapist-patient interaction. Students are also encouraged to reflect on their individual learning preferences and strategies for optimizing success in the classroom and clinical environments. Topics explored include the patient-therapist collaborative clinical decision model, patient education, the FOG index of teaching, verbal and written clinical teaching methodology, teaching pedagogy, distance medicine, interaction with patient families, long and short term goal setting, clinical objectives and clinical education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8103. Clinical Examination and Intervention Skills I. 2 Credit Hours.**

This is the first course in a 3-part sequence of Clinical Examination and Intervention Skills. This course includes a lecture component and lab activities. Clinical Examination and Intervention Skills (CEIS) 1 is offered as a 2 credit lecture/lab course during summer of the initial term of the DPT curriculum. The CEIS course sequence provides instruction in and practice of examination and intervention skills that can be applied to a wide variety of clinical settings and patient populations. CEIS 1 focuses on building a foundation of skills that foster increasingly complex clinical-decision making throughout the next two courses in the CEIS sequence.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8105. Human Anatomy I. 6 Credit Hours.**

This course represents the composite lecture and lab components of the regional study of the gross structure of the human body. It includes classroom lecture, laboratory, and dissection activities regarding anatomical considerations for the back, upper and lower limbs, thorax, head and neck, abdomen, pelvis, and perineum. Emphasis is on the structure and function of the skeletal, muscular, cardiovascular, respiratory, and peripheral nervous systems, including their embryologic development. Students must learn origins, insertions, actions, and both spinal cord level and peripheral innervations. In addition, students must know all bony landmarks, ligaments, and tendons that support the joints under study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8107. Functional Biomechanics. 3 Credit Hours.**

Functional Biomechanics is offered as a 15-week, 3-credit course during the fall semester of the first year of the DPT curriculum and represents a course that provides an initial bridge between anatomy and physiology of the neuromusculoskeletal system, and the biomechanics of movement. The course is designed to help the DPT student understand the complex nature of human movement by using various types of models to establish a biomechanical foundation from which movement can be analyzed. Students will be expected to identify, comprehend, and apply some movement models that can be appropriately generalized across multiple portions of the body and do likewise for specific movement models of specific joints, body segments or tasks such as posture, standing and basic movement patterns.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8109. Human Physiology and Pathology I. 3 Credit Hours.**

This is the first in a two-course series designed to provide first-year doctor of physical therapy students with a basic understanding of the following: normal adult human physiology, basic pathology (injury, inflammation, healing and adaptation), normal microanatomy of skin, bone and connective tissue and pathology of the cardiac, pulmonary, immune, endocrine, musculoskeletal and integumentary systems. The topics to be discussed will provide a frame of reference for the various pathophysiological states encountered by the contemporary, practicing physical therapist.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8111. Clinical Examination and Intervention Skills II. 3 Credit Hours.**

Clinical Examination and Intervention Skills 2 (CEIS 2) is the second in a sequence of courses that includes theory and evidence for, and practice of, examination and intervention skills that can be applied to a wide variety of client populations seen by physical therapists. The CEIS 2 lecture and laboratory course provides a framework for upper quarter assessment and intervention. Students are expected to synthesize content from the CEIS 1 course to expand critical thinking and problem-solving with respect to clinical decision making. Additionally, this course provides the student a foundation in the basic theory and science of exercise and a central framework by which to prescribe and modify therapeutic exercise to a variety of clients.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8113. Evidence Based Practice I. 2 Credit Hours.**

This is the first course in a three-course series. Evidence Based Practice I provides an introduction to the critical analysis of professional literature in preparation for practical implementation evidence based practice. Students will learn how to conduct searches of scientific and professional literature on specific topics related to physical therapy, judge the validity of information obtained through both print and electronic media, and assess the internal and external validity of research articles as sources of information on which to base clinical decisions. Students will also learn how to use web-based technology to maintain a personal database of references and prepare reports of research-based literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8114. Neuroscience. 3 Credit Hours.**

Students will first learn basic neuroanatomical and brain vascular structures, their relationships to other neuroanatomical structures as well as basic neuroembryology, neurohistology and neurophysiology. Next, students will learn regional neuroanatomy and the main function of each regional structure, building on their new knowledge of neuroanatomy using case histories as a learning tool. Lastly, students will learn systems neuroscience, which focuses on how the regional brain structures connect and function as integrated sensory, motor, cognitive, and emotional processes, again using case histories as a learning tool. Thus, lectures, computer based labs and wet brain labs, interactive sessions and case histories comprise this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8115. Human Physiology and Pathology II. 3 Credit Hours.**

This is the second in a two-course series designed to provide first-year doctor of physical therapy students with a basic understanding of the following: normal adult human physiology, basic pathology (injury, inflammation, healing and adaptation), normal microanatomy of skin, bone and connective tissue and pathology of the cardiac, pulmonary, immune, endocrine, musculoskeletal and integumentary systems. The course work is didactic with no laboratory component. The topics to be discussed will provide a frame of reference for the various pathophysiological states encountered by the contemporary, practicing physical therapist.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8116. Motor Control and Learning. 3 Credit Hours.**

In this course theories and basic principles of motor control and learning will be integrated and related to motor behaviors observed in individuals with or without sensory and motor impairments. The students will gain experience in observing and measuring human motor behavior, which will focus on postural control, locomotion and goal-directed manual tasks. The students will learn to perform task analysis on motor skills as a method to analyze movement behavior and allow them to apply practice principles to enhance motor learning in individuals with or without sensory or motor impairments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8118. Clinical Examination and Intervention Skills III. 3 Credit Hours.**

This lecture and laboratory course is the third of a 3-part sequence and takes place during the spring semester of the first year of the doctor of physical therapy program. The CEIS 3 course provides a continuation of assessment and intervention initiated in CEIS 2 through a systematic progression of the lower extremities. Students will additionally incorporate practice of a thorough neurologic examination and balance assessment within the scope of physical therapy practice. Exercise physiology concepts are more deeply discussed, and students will be expected to demonstrate an understanding of muscle physiology in response to exercise as well as concepts surrounding aerobic assessment. Students are expected to synthesize content from the first two courses in the CEIS sequence to expand critical thinking and problem-solving with respect to clinical decision making.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8121. Clinical Electrophysiology and Biophysical Agents. 3 Credit Hours.**

Electrophysiology & Biophysical Agents includes the known physiologic and physical effects, and application, of select thermal and electrical modalities (therapeutic modalities). A problem-solving approach is used to assist the student to integrate basic physiologic, physical and medical science aspects for the safe application of the modality. Electrodiagnostic testing in the context of physical therapy practice will be presented. Validity, reliability, sensitivity and specificity of select clinical tests and the effectiveness of each thermal modality/electrotherapeutic device will be addressed. Students will actively engage in the use of each modality through laboratory sessions to inform clinical decision making and demonstrate skill of device usage.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8123. Development Across the Lifespan. 2 Credit Hours.**

Lifespan (PHTH 8123) offered as a combined lecture and laboratory based course consisting of the equivalent of 1 credit laboratory experiences (30 Hours) and 1 CH of lecture (15 hours) during the summer semester of the 2nd year of the Doctor of Physical Therapy curriculum. This course represents the integration of the skills and knowledge acquired from Biomechanics and Motor Control and Learning, the clinical examination and intervention courses, as well as the musculoskeletal and neuromuscular series of clinical management courses taken concurrently. This course builds upon the basic science and theory of previous coursework to allow an understanding of the mechanisms that define human movement and allow for interaction of the individual with their environment across the lifespan. A large focus of the course will be the typical trajectory of motor development (pediatrics through geriatrics) and pathologic effects which occur through the lifespan on an individual's ability to move and interact with their surroundings. The laboratories also involve discussion and training on the use of the tests for motor development, balance and posture, gait, and upper extremity function, and are supplemented with pediatric, adult, and geriatric case studies to allow for the development of the skill set necessary to allow the student to apply the tests as used in lab to the clinical arena.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8125. Clinical Management of Musculoskeletal Conditions I. 4 Credit Hours.**

This is the first in a series of 3 courses in the clinical musculoskeletal management sequence. The course will build upon material from previous courses in the basic sciences and foundational clinical examination and intervention skills. Students will become proficient in a patient-centered, biopsychosocial approach to the management of patients with lower quarter musculoskeletal disorders using the current best evidence to inform clinical decision making. Students will learn a comprehensive lower quarter musculoskeletal examination scheme utilizing the most valid and reliable tests and measures. Students will learn to develop and carry out a plan of skilled physical therapy treatment interventions with an emphasis on manual therapy, therapeutic exercise, and patient education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8127. Clinical Management of Neuromuscular Conditions I. 4 Credit Hours.**

This course introduces DPT students to evidence-based practice specific to individuals with neuromuscular dysfunction. The student will apply the elements of examination, history, systems review, tests and measures, evaluation, diagnosis, prognosis, and interventions to individuals with various neuromuscular diseases and conditions using the International Classification of Function (ICF) model and clinical decision-making tools. The Task Oriented Approach and the Hypothesis Oriented Algorithm for Clinicians (HOAC II) will be emphasized. Students will gain further skill in examining and identifying impairments of the human movement system and limitations in functional activities associated with neuromuscular disorders. An emphasis will be placed on designing effective interventions for individuals with stroke, traumatic brain injury (TBI), and spinal cord injury (SCI). Clinical case examples will highlight the acute and subacute rehabilitation patient management environments. Students will also be introduced to prevention and long-term management of chronic impairments and loss of function in these individuals. The course content will include pathophysiology, epidemiology, and medical and physical therapy management of stroke, TBI, and SCI. Physical therapy examination principles and skills will be presented and practiced, including disease specific and generalized tests and measures utilized with these patient populations. Students will apply content to clinical case studies to demonstrate integration within the cognitive and psychomotor domains of learning. Case study scenarios and clinical practical examinations will be utilized to assess knowledge translation to psychomotor and clinical reasoning skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8129. Psychosocial Aspects. 2 Credit Hours.**

The goal of this course is for students to develop a greater appreciation of the psychosocial aspects of disability and wellness. We will examine models of disability, systems affecting individuals with disabilities, psychosocial factors related to adjustment, and treatment and health-promotion models. Psychopathology and psychiatric disabilities will be examined, as well as mental health issues related to disease, chronic and acute illness, and injury.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8131. Clinical Management of Musculoskeletal Conditions II. 4 Credit Hours.**

This is the second in a series of 3 courses in the clinical musculoskeletal management sequence. The course will build upon material from previous courses in the basic sciences and foundational clinical examination and intervention skills. Students will become proficient in a patient-centered, biopsychosocial approach to the management of patients with lower quarter musculoskeletal disorders using the current best evidence to inform clinical decision making. Students will learn a comprehensive lower quarter musculoskeletal examination scheme utilizing the most valid and reliable tests and measures. Students will learn to develop and carry out a plan of skilled physical therapy treatment interventions with an emphasis on manual therapy, therapeutic exercise, and patient education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8133. Clinical Management of Neuromuscular Conditions II. 4 Credit Hours.**

The course focuses on progressive disorders and selected current topics in managing neuromuscular disorders. The diagnostic groups covered include: Huntington's disease, Parkinson's disease, multiple sclerosis, amyotrophic lateral sclerosis, Alzheimer's disease, post-polio, Guillain Barre, myasthenia gravis, neurologic injuries due to infection or neoplasm, cerebellar and vestibular disorders. Examination, evaluation, diagnosis, prognosis and application of intervention will be addressed utilizing case studies to enhance application of cognitive and psychomotor skills within the lectures and laboratory experiences. The course will include epidemiologic data, pathophysiology, and medical management and lifespan changes typically seen in these disorders. Students will develop strategies to reduce barriers in the community and enhance optimal participation in patients with chronic neuromuscular conditions by identifying resources, preventing secondary impairments, addressing wellness, and personal issues. Students will learn to select appropriate outcome measures based on psychometric properties and patient related factors. The efficacy and effectiveness of interventions to address impairments and activity loss in individuals with neuromuscular disorders will be examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8135. Clinical Management of Cardiopulmonary Conditions. 3 Credit Hours.**

The course challenges students to translate information learned in Anatomy, Physiology, Pathophysiology, and Clinical Decision Making into clinical scenarios that will represent their future practice as it relates to rehabilitation and management of individuals with cardiopulmonary conditions. Because of the evolving role of physical therapists in the health care system (including primary care), students will be expected to recognize signs and symptoms of cardiovascular and pulmonary primary and secondary diseases as they impact on the patient/client's plan of care. Students are challenged to anticipate the consequences of cardiovascular and pulmonary disease based on data collected during clinical practice. Students will gain experience in the clinical monitoring of cardiovascular and pulmonary signs and symptoms through the use of the Clinical Simulation Center. Through the use of case studies, students will need to collect and interpret clinical data from robotic mannequins programmed to display a variety of clinical scenarios that will require clinical decision making.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8136. Bioethics. 2 Credit Hours.**

This course provides an overview of the field of bioethics with special emphasis on areas of applicability for future physical therapists, including methods for decision-making and problem solving; autonomy; health disparities; distributive justice; informed consent and health literacy; professionalism and codes of ethics; violence; disability ethics; and the social determinants of health. Most weeks will include an ethics case study that students will analyze using models for clinical decision-making, the APTA Code of Ethics and Standards of Physical Therapist Practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8137. Evidence Based Practice II. 2 Credit Hours.**

This is the second course in a three course series. In Evidence Based Practice II, students will practice performing focused literature searches, documenting search strategies, evaluating the validity of clinical research studies using standard metrics and knowledge gained during Evidence Based Practice I, synthesizing multiple studies to answer a clinical foreground question, and providing a clinical bottom line. Students will work both independently and as part of a group to complete the course objectives. This course refines and allows for practice of skills needed to locate, understand, and critique research literature for clinical decision-making. Emphasis will be placed on methods used to find relevant literature and assess the validity of individual articles, systematic reviews and meta-analyses. As a result of the activities within this course, students will be able to conduct and document a focused search of the literature to answer a specific clinical question.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8138. Management and Healthcare Systems. 2 Credit Hours.**

Management and Healthcare Systems is an introduction to the American Healthcare system and management of physical therapy practice. The component of the Healthcare Systems will emphasize the interconnections between the various segments of the health care system and the impact of health literacy, access, safety, reimbursement, legislation and regulation. The course will also look at the impact of consumerism and its unique characteristics in health care. It will also explore and integrate the role of physical therapy as a profession and physical therapists as professionals in the system. Further emphasis will be on class participation as a method of modeling professional behavior. Management of Physical Therapy Practices (MPTP) represents a transitional learning experience by allowing the translation of bench and clinical knowledge gained during the first year of the DPT curriculum to the procedural and management framework of developing and maintaining a physical therapy clinical practice. The student will be expected to demonstrate an understanding of how patient care assessment and intervention algorithms can meld with the parameters of reimbursement, compliance, management hierarchy, ethics, and regulatory issues in the inpatient, wellness, and outpatient settings while allowing for individual and group therapist provision of quality care and the attainment of personal and professional goals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8139. Medical Diagnostics. 2 Credit Hours.**

Physical therapists are frequently called upon to make diagnostic decisions in both primary and tertiary care roles. Furthermore, diagnostic imaging information can impact the physical therapy plan of care. Physical therapists require a basic level of knowledge about diagnostic imaging including when and what imaging study may be indicated, how the information from diagnostic imaging impacts the evaluation and plan of care, and how to have an informed discussion about diagnostic imaging with both patients and colleagues. In the course, students will gain an appreciation for and begin to develop strategies to integrate data from medical diagnostic imaging procedures. These data will include results obtained from data derived from musculoskeletal, vascular, neurologic, cardiac and pulmonary imaging. The focus will be on utilizing clinical data that documents the status as well as the progression of disease and its impact on differential diagnosis, prognostication, and physical therapy interventions. The course meets weekly for lecture and discussion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8141. Clinical Management of Musculoskeletal Conditions III. 4 Credit Hours.**

This is the third in a series of 3 courses in the clinical musculoskeletal management sequence. The course will build upon material from previous courses in the basic sciences and foundational clinical examination and intervention skills. Students will become proficient in a patient-centered, biopsychosocial approach to the management of patients with spinal disorders using the current best evidence to inform clinical decision making. Students will learn a comprehensive spinal musculoskeletal examination scheme utilizing the most valid and reliable tests and measures. Students will learn to develop and carry out a plan of skilled physical therapy treatment interventions with an emphasis on manual therapy, therapeutic exercise, and patient education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8143. Management of the Medically Complex Patient. 3 Credit Hours.**

Medical acuity and medical complexity can present in a variety of environments. The intention of the course is for students to gain exposure to and develop strategies and skills in working with individuals with both medical/surgical acuity as well as complexity. Course work challenges students to interpret medical and/or surgical events/data and anticipate the impact of that information on an individual's function. Students develop plans of care while dealing with medical/surgical equipment and treatments that might be necessary for the patient's safety. In addition, students will be challenged to anticipate the impact of past medical/surgical history, pharmacology, social history, and resources in developing a plan of care. Since students encounter individuals with medical acuity and/or complexity across the health care delivery spectrum, students will develop strategies for collaboration and coordination of services with other health professionals. Because of the evolving role of physical therapists in the health care system, students will be expected to provide safe, effective, patient-centered, equitable, timely, coordinated and evidence-based care for these individuals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8145. Pharmacotherapeutics. 2 Credit Hours.**

The course exposes student to the importance of incorporating a patient's pharmacologic management into clinical decision making, prognosis and progression. Because of the evolving role of the physical therapist in the health care system, including primary care, students must recognize the importance and impact of pharmacologic effects on safe patient management. This course explores the essential principles of clinical pharmacology. Content includes pharmacokinetics, indications and contraindications of various drugs relative to their effect on diagnosis, prognosis and interventions in physical therapy. Specific pharmacologic categories covered in the course are cardiovascular medications, chemotherapeutic agents, NSAIDs, antirheumatic agents, pulmonary medications, pain management strategies, neuromuscular medications, ionto/phonophoresis agents, different classifications of steroids and diabetes management agents. Through interactive teaching-learning lecture and online methodologies, students critically review and analyze various clinical pharmacology issues at both the individual and societal levels. Discipline-specific assignments are used to correlate pharmacologic principles of particular relevance to a variety of health professions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8146. Clinical Management of Pediatrics. 2 Credit Hours.**

Pediatric physical therapy is practiced across a wide range of ages and developmental levels, within specialized environments spanning complex medical care to non-clinical setting such as school systems. The physiological changes associated with normal and atypical development, the interpretation of standardized assessments of development, imaging, and clinical decision making in the pediatric population will be discussed. The course content will also include pathophysiology, epidemiology, medical and physical therapy management of common pediatric conditions including neuromuscular, musculoskeletal and cardiovascular/pulmonary conditions across a variety of pediatric practice settings. Physical therapy examination principles and skills will be presented and practiced, including disease specific and generalized tests and measures utilized with these pediatric patient populations. Evidence based practice and clinical practice guidelines in pediatric physical therapy will be discussed and compared to adult physical therapy practice. The student will be expected to demonstrate an understanding of how physical therapy assessment and intervention strategies must be adapted to meet the unique needs and settings of the pediatric population. Students will be introduced to prevention and long term management of chronic impairments and loss of function across development. Topic content will be provided in seminar form with a short lecture followed by discussion and group work. Students will apply content extensively to case studies to demonstrate integration within the cognitive and psychomotor domains of learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8147. Clinical Pain Sciences. 1 Credit Hour.**

One in five individuals within the United States live with chronic pain. Physical therapists are well positioned to take a leading role in addressing the societal and individual burden of chronic pain. This course will equip the physical therapy student with contemporary knowledge and critical thinking to enhance their understanding, assessment, and management of patients with complex and persistent pain disorders. Using a combination of lecture and group discussions/activities this course will build upon foundational knowledge from physiology, neuroscience, psychosocial issues, bioethics, and the clinical management course series. The course will emphasize a person-centered assessment process using a biopsychosocial framework. Students will learn the clinical application of non-invasive, conservative management strategies including: pain education, self-management principles, cognitive behavioral techniques, and graded motor imagery.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8148. Assistive Technologies. 2 Credit Hours.**

This course represents a transitional learning experience for the third year student by allowing for the synthesis of clinical knowledge learned during the first two years of the DPT curriculum with technology meeting the needs of the International Classification of Functioning, Disability and Health (ICF) model. The student will be expected to demonstrate how patient care paradigms for the individual with a disability are not restricted to episodic care, but are tied into long term care and quality of life issues as well. The methods employed will explain to the student the concepts of AT within the traditional role of the physical therapist in assessing, prescribing, and adapting AT for mobility issues (prosthetics and orthotics). The course will also expand upon this foundation by explaining the concept of universal design and by expanding the discussion of AT to encompass such concepts as communication and cognitive aids, recreation, telerehabilitation and robotics, and most importantly, finding funding for AT. At the conclusion of the course, the student should be well prepared for the evolving role of the physical therapist to develop, maintain, and restore maximum movement, functional ability, and quality of life throughout the lifespan.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8150. Elective - Special Topics. 1.5 Credit Hour.**

The physical therapy profession is a dynamic profession responding to changes in practice settings, health care policy, societal issues, and knowledge advancements. This course will cover topics that reflect current and anticipated needs in our profession that have emerged in current physical therapy practice. PHTH 8150 is an elective course for 3rd year Doctor of Physical Therapy students and is designed to contain content classified as above the standard of entry-level professional education in physical therapy. Topics offered vary across areas of specialized clinical practice and clinical research activities of departmental faculty members.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 8151. Evidence Based Practice III. 2 Credit Hours.**

This is the third course in a three course sequence. This course is designed to encourage use of the principles of evidence-based practice, integrating clinical expertise, patients' preference/values, and research evidence to produce a therapeutic alliance. In this course, students will develop a clinical question based on a case scenario, search the literature for research pertaining to the question, critically appraise the research, develop a clinical bottom line, and apply the research, along with sound clinical decision making taking into account the clinical context and individual patient preferences, to the case scenario. The students will develop a capstone presentation and deliver it during the Annual Temple DPT Student Presentation Day.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8152. Elective - Musculoskeletal. 1.5 Credit Hour.**

This laboratory-based experience will provide students with instruction, practice, and peer reviewed evidence concerning orthopedic manual physical therapy. This course will build upon basic techniques learned in the Musculoskeletal Management courses and address advanced clinical decision making. All of the major regions of the musculoskeletal system will be addressed including the spine and extremities. Techniques will include joint manipulation, soft tissue mobilization, and complementary exercise. All classes will be instructed by physical therapists with fellowship training in manual physical therapy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8153. Elective - Vestibular. 1.5 Credit Hour.**

This lecture-laboratory hybrid experience will provide students with instruction, practice, and peer reviewed evidence on key concepts within the arena of vestibular rehabilitation. This course will build upon basic techniques learned in the Clinical Management of Neuromuscular Conditions II course and address advanced clinical decision making required by vestibular rehabilitation-trained clinicians. The course will cover pathophysiology, epidemiology, medical and physical therapy management of vestibular and balance disorders that benefit from vestibular rehabilitation. The course will highlight a variety of topics regarding patient history, objective examination, and clinical management for a myriad of vestibular conditions, including vestibular hypofunction, benign paroxysmal positional vertigo, post-concussive syndrome, central disorders, chronic subjective dizziness, and cervicogenic dizziness, among others. An emphasis will be placed on clinical decisions for diagnosis, appropriate referral, and intervention selection. Students will also be exposed to basic diagnostic concepts regarding vestibular function testing. As part of coursework, students will design a peer-reviewed case study and complete a competency examination. All classes will be instructed by a physical therapist with advanced training in vestibular rehabilitation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8154. Elective - Clinical Simulation. 1.5 Credit Hour.**

The goal of this experience is to expose students to "real time" clinically simulated physical therapy situations where they will have to interpret or collect examination data, react to changes in patient status, perform or plan interventions, and document clinical findings and conclusions. The clinical situations will be of increasing complexity with different levels of clinical decision making. The student will be exposed to documentation strategies that match the clinical environment of the simulated case. The topic content will include preparatory paper-based case studies, the utilization of clinical simulation interactions that involve interactions with robotic simulators as well as actual standardized patients, and debriefing sessions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8155. Elective - Pediatrics. 1.5 Credit Hour.**

This elective experience will provide the third-year Doctor of Physical Therapy student with a comprehensive overview of the process of normal and pathological development from prenatal to late adolescence. The World Health Organization's International Classification of Functioning, Disability and Health - Children and Youth version (ICF/CY) will serve as the course's health classification framework. Physical therapy practice across common pediatric conditions and settings will be discussed and compared to adult physical therapy practice. This seminar experience represents a translational learning experience: taking the previously learned clinical science, assessment and interventional strategies from the first two years of the DPT program and directing them toward a specific age-defined cohort of individuals. The student will be expected to demonstrate a complex understanding of how physical therapy assessment and intervention strategies must be adapted to meet the unique needs and settings of the pediatric population. Topic content will be provided in seminar form with a short lecture followed by discussion and group work. Outside experts and experimental learning will also be utilized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8156. Elective - Geriatrics. 1.5 Credit Hour.**

A comprehensive overview of the process of healthy and pathological aging: physiology, cognition, pathology, societal interaction, and functional adaptation. This experience represents a translational learning experience: taking the previously learned clinical science, assessment and interventional strategies from the first two years of the DPT program and integrating them into a case study based learning experience to enhance the delivery of skilled services for the older adult. Emphasis will focus on the student's clinical reasoning for clients ranging from the medically complex older adult to high level healthy aging to promote a clinically excellent approach to patient care with the older adult. The student will be expected to demonstrate a complex understanding of how physical therapy assessment and intervention strategies are best applied towards the older adult with an emphasis on appropriate prescription of exercise.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8160. Special Topics - Integrated Learning Experience. 1 Credit Hour.**

The course serves as a "capstone" in which students continue to develop complex clinical reasoning by using a faculty-designed critical thinking scaffold. Student groups are assigned cases designed to demonstrate systematic clinical decision making. The student groups investigate the assigned cases and respond to the corresponding questions presented with each case scenario. Each group then provides a teaching module on their case (which includes practice of psychomotor skills relevant to the case) to their peers. The course culminates in an integrated learning experience that provides an opportunity for students to self-assess and receive individual feedback on their ability to examine and evaluate a simulated patient in either an inpatient or an outpatient environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 8161. Integrated Clinical Experience 1. 1 Credit Hour.**

The Integrated Clinical Experience (ICE) 1 course is the first in a series of five. This course implements approaches to develop the clinical reasoning scaffold in patient care, while enhancing opportunities for growth of professional behaviors and peer learning. The aim of the ICE course series is to integrate concurrent didactic coursework with experiential learning activities in varying settings. The ICE 1 course emphasizes the development of the patient-therapist interaction surrounding basic clinical skills and aims to present clinical decision making strategies at a linear and beginner level. The course activities take place in simulated patient environments, clinical settings, and in the classroom and aim to foster professional behavior, communication, and patient interaction skills. Guided self-reflection is utilized to illustrate the interactions within the reasoning process, appropriate for students at this beginning level. Students perform self and peer reflection within learning activities related to basic skill development occurring simultaneously in the didactic curriculum. Students will be expected to act in a professional manner and practice skills learned in laboratory sessions of 1st year DPT courses during this experiential learning course. Presented clinical and simulated cases highlight typical attributes of the health condition, body structure/function, activities, and participation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8162. Integrated Clinical Experience 2. 1 Credit Hour.**

The Integrated Clinical Experience (ICE) 2 course is the second in a series of five. This course implements approaches to develop the clinical reasoning scaffold in patient care, while enhancing opportunities for growth of professional behaviors and peer learning. The aim of the ICE course series is to integrate concurrent didactic coursework with experiential learning activities in varying settings. The ICE 2 course emphasizes the development of the patient-therapist interaction surrounding basic clinical skills and aims to present clinical decision making strategies at a linear and beginner level. The course activities take place in simulated patient environments, clinical settings, and in the classroom and aim to foster professional behavior, communication, and patient interaction skills. Guided self-reflection is utilized to illustrate the interactions within the reasoning process, appropriate for students at this beginning level. Students perform self and peer reflection within learning activities related to basic skill development occurring simultaneously in the didactic curriculum, as well as skills learned across semesters in the 1st year. Students will be expected to act in a professional manner and practice skills learned in laboratory sessions of 1st year DPT courses during this experiential learning course. Presented clinical and simulated cases highlight typical attributes of the health condition, body structure/function, activities, and participation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8163. Integrated Clinical Experience 3. 1 Credit Hour.**

The Integrated Clinical Experience (ICE) 3 course is the third in a series of five. This course implements approaches to develop the clinical reasoning scaffold in patient care, while enhancing opportunities for growth of professional behaviors and peer learning. The aim of the ICE course series is to integrate concurrent didactic coursework with experiential learning activities in varying settings. The ICE 3 course further develops patient-therapist interaction surrounding basic clinical skills and aims to present clinical decision making strategies at a linear and beginner level. The course activities take place in simulated patient environments, clinical settings, and in the classroom and aim to foster professional behavior, communication, and patient interaction skills. Guided self-reflection is utilized to illustrate the interactions within the reasoning process, appropriate for students at this beginning level. Students perform self and peer reflection within learning activities related to basic skill development occurring simultaneously in the didactic curriculum, as well as skills learned across the entire 1st year didactic curriculum. Presented clinical and simulated cases highlight typical attributes of the health condition, body structure/function, activities, and participation. Students will synthesize examination and evaluation findings to expand upon the linear clinical decision-making process. This synthesis facilitates the development of an appropriate physical therapy prognosis and plan of care with a focus on the ICF model.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8164. Integrated Clinical Experience 4. 1 Credit Hour.**

The Integrated Clinical Experience (ICE) 4 course is the fourth in a series of five. This course implements approaches to develop the clinical reasoning scaffold in patient care, while enhancing opportunities for growth of professional behaviors and peer learning. The aim of the ICE course series is to integrate concurrent didactic coursework with experiential learning activities in varying settings. The ICE 4 course emphasizes the integration of the ICF model and its complex interactions and aims to foster more comprehensive and multi-faceted clinical decision-making strategies. ICE 4 expands upon the foundations established during the first year based upon the concurrent body systems course work. The course activities take place in simulated patient environments, clinical settings, and in the classroom and aim to foster professional behavior, communication, and patient interaction skills. The ICE 4 course helps to further develop the framework of clinical reasoning processes and strategies, integrating material between the courses in the Fall semester of the 2nd didactic year, and between the first and second academic years. Additional complexity is incorporated into clinical scenarios and patient/client interactions that involve patient-related environmental factors such as motivation, family support, beliefs and expectations. It is the expectation that students begin to develop more complex and nonlinear clinical reasoning skills in the ICE 4 course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8165. Integrated Clinical Experience 5. 1 Credit Hour.**

The Integrated Clinical Experience (ICE) 5 course is the fifth in a series of five. This course implements approaches to develop the clinical reasoning scaffold in patient care, while enhancing opportunities for growth of professional behaviors and peer learning. The aim of the ICE course series is to integrate concurrent didactic coursework with experiential learning activities in varying settings. The ICE 5 course emphasizes the integration of the ICF model and its complex interactions and aims to foster more comprehensive and multi-faceted clinical decision-making strategies. ICE 5 expands upon the foundations established during the first year based upon the concurrent body systems course work. The course activities take place in simulated patient environments, clinical settings, and in the classroom and aim to foster professional behavior, communication, and patient interaction skills. The ICE 5 course helps to further develop the framework of clinical reasoning processes and strategies, integrating material between courses in the Spring semester of the 2nd didactic year, across semesters in the 2nd didactic year, and between the first and second academic years. Additional complexity is incorporated into clinical scenarios and patient/client interactions that involve patient-related environmental factors such as motivation, family support, beliefs and expectations. At the end of the ICE 5 course, students should demonstrate readiness to enter the full-time clinical education curriculum.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8531. Pro Bono Clinical Practice. 0 Credit Hours.**

This elective course provides students actively enrolled in a health/health care program with opportunities to practice and learn new clinical skills from licensed community-based practitioners in their respective fields who will serve as their clinical mentors. Students have the opportunity to apply knowledge and skills that they are currently learning in a real practice setting. The clinical services are delivered in the College of Public Health's North Broad Physical Therapy Center which is a pro bono clinic providing health and health care services to individuals who are uninsured, under-insured, or do not have the financial means to make their copays. The Center emphasizes the importance of inter-professional education and collaboration for students in the College of Public Health and the Schools of Medicine and Pharmacy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Medicine, Lewis Katz School, Pharmacy, Social Work.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 8581. Mslsklt Mgt I Residency. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 8582. Mslsklt Mgt II Residency. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9085. Mentorship I Residency. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9086. Mentorship II Residency. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9185. Clinical Experience 1. 8 Credit Hours.**

This course is designed as a full-time clinical internship. The clinical experience takes place at an off campus clinical site with coordination by the Director of Clinical Education. The students will have the opportunity to problem solve and utilize their clinical decision making skills in examining, evaluating, assessing and developing plans of care for varied patient populations as per the objectives of the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9285. Clinical Experience 2. 4 Credit Hours.**

This course is designed as a full-time clinical internship for each student and takes place over the course of 12 weeks. This course requires placement at an off-campus clinical site with coordination from the Director of Clinical Education. The students will have the opportunity to problem solve and utilize their clinical decision making skills in examining, evaluating, assessing and developing plans of care for varied patient populations as per the objectives of the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may be repeated for a total of 8 credit.

**PHTH 9385. Clinical Experience 3. 8 Credit Hours.**

Clinical Experience 3 is the third and final full-time clinical experience occurring after all didactic content has been delivered. The Clinical Experience 3 is twelve weeks in length. The affiliation typically takes place off site and is coordinated, managed, and overseen by the Director of Clinical Education. The students will have the opportunity to problem solve and utilize their clinical decision making skills in examining, evaluating, assessing and developing plans of care for varied patient populations as per the objectives of the course. Students will be supervised in an affiliating clinical facility by a licensed physical therapist, using an experiential teaching format. Students will have the opportunity to work and learn in a physical therapy setting, and have the opportunity to integrate classroom didactic information with practical hands-on clinical experience. The student will have exposure to patient care, have the opportunity for clinical learning and teaching, administration, observation and/or participation in research, and practice and adopt professional socialization skills. Instructional methods will include online asynchronous Canvas assignments and onsite clinical practical experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Physical Therapy.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9620. Human Movement Science I: Neural Factors. 3 Credit Hours.**

Current theories and research pertaining to the neural mechanisms of motor control and sensorimotor integration are introduced as a foundation for the evaluation and treatment of movement and balance deficits. Studies involving lesions of the nervous system are discussed to demonstrate the impact of neural impairments on motor performance and motor learning. The course also introduces the neurophysiologic methods to evaluate the relationship between neural circuitry and human movement (e.g., MRI, EEG, single unit recording, and PET).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9621. Human Movement Science III: Cognition and Learning. 3 Credit Hours.**

A survey of theory and research concerning the cognitive processes of the human brain and motor behavior is conducted. Emphasis is on the developmental changes that underlie cognition as they relate to motor behavior. These objectives are approached by examining lifespan motor development and learning, attentional mechanisms, perceptual effects on motor output, implicit and procedural memory effects on motor control, automatic compensatory responses and/or strategies following injury or disease, and adaptation to long- and short-term changes in the body or environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9622. Instrumentation and Motion Analysis. 3 Credit Hours.**

Current methodology appropriate to the study of normal and abnormal human movement is presented. Both technical and theoretical foundations of instrumentation use are included. Students have opportunities to develop skills in data acquisition, reduction, and analyses in the laboratory sessions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9623. Atypical Human Movement. 3 Credit Hours.**

An exploration of the theoretical perspectives used to interpret movement dysfunctions. Topics include overuse, developmental regression, limited repertoires, and external and internal constraints. Required for Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** PHTH 9620.

**PHTH 9624. Human Movement Science II: Mechanics and Models. 3 Credit Hours.**

Application of the mechanical principles to static and dynamic models of human posture and movement and of the mechanical properties of the link-segment systems and biological tissues are introduced in this course. Dynamical systems framework are introduced as a basis for understanding the organization of complex movement patterns. Other systems, computational, and statistical models that are commonly used to analyze and describe the mechanisms of human posture and movement are discussed. Interpretation of the model predictions is based on healthy individuals in addition to those with movement deficits.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9625. Clinical Decision Making. 3 Credit Hours.**

A survey of theory and research concerning the cognitive processes of the human brain and motor behavior is conducted. Emphasis is placed on the developmental changes that underlie cognition as they relate to motor behavior. These objectives are approached by examining lifespan motor development and learning, attentional mechanisms, perceptual effects on motor output, implicit and procedural memory effects on motor control, automatic compensatory responses and/or strategies following injury or disease, and adaptation to long- and short-term changes in the body or environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9626. Musculoskeletal Impairment: Evidence for Examination and Intervention Strategies. 3 Credit Hours.**

Review of evidence from refereed literature and from expert clinical practice that supports reliability, validity, and utility of examination and intervention techniques used in the physical therapy management of patients with musculoskeletal impairment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9627. Movement Sci & Cognitive. 3 Credit Hours.**

Current theories pertaining to the control of movement and posture are reviewed as a foundation for the evaluation and treatment of movement and balance dysfunction. Required for Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9645. Advanced Musculoskeletal Anatomy. 3 Credit Hours.**

Advanced cadaver dissection and study. Students must have a basic understanding of human anatomy and cadaver dissection. The course integrates clinical and anatomical perspective of the human body. Individual projects are planned by each student.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9651. Theoretical Foundations of Physical Therapy. 3 Credit Hours.**

This course examines theories that underlie the discipline of Physical Therapy. Topics include neuronal regeneration, balance control, motor development, cumulative trauma disorders, health services research and expertise in clinical practice. Students examine empirical evidence that supports or refutes each theory. Required for Ph.D. in PT students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** PHTH 9620.

**PHTH 9653. Research Strategies. 3 Credit Hours.**

Research in health care practice and education. Includes critical analysis of manuscripts, experimental and nonexperimental research designs, and overview of quantitative and qualitative analyses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9654. Laboratory Rotations and Seminar in Human Movement Science. 3 Credit Hours.**

Full-time work in the laboratory of a faculty member to learn instrumentation and techniques pertinent to the area of research the student wishes to pursue. Two rotations are required for Ph.D. in PT students. Health care problems are also presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9655. Qualitative Research Strategies for Health Care. 3 Credit Hours.**

Qualitative research focusing on grounded theory and case analysis is the subject of this course. Combining qualitative and quantitative research strategies to study health care problems is also presented.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9673. Curricular Design and Teaching in the Health Professions. 3 Credit Hours.**

This course covers philosophical orientations to and alternative curricular designs for professional health care academic and clinical education, as well as theories of learning, teaching strategies, and evaluation formats. Required for Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9682. Independent Study. 1 to 3 Credit Hour.**

This course offers individual investigation in physical therapy practice or research under the guidance of a mentor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9774. Administration of Health Professions Academic Programs. 3 Credit Hours.**

This course examines the organization of universities with an emphasis on administration of professional graduate programs, program and faculty evaluation and development, funding, admissions, professional accreditation, clinical education, and state licensure. Required for Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHTH 9787. Teaching Practicum. 1 to 3 Credit Hour.**

Practicum in teaching in the professional physical therapy curriculum. Students contract with a faculty member for guided development, presentation and evaluation of a course segment based on principles and concepts covered in PHTH 9673.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is limited to Ph.D. students who have completed all their coursework and are finishing qualifying examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9998. Dissertation Proposal. 1 to 3 Credit Hour.**

Students are expected to prepare and submit a dissertation proposal in the form of a grant proposal and successfully defend it orally before their Dissertation Committee. As appropriate, they must obtain IRB approval for their proposed research, and submit a copy of the grant proposal to the Graduate School. Students are expected to have developed and defended their dissertation grant proposal within one year of successfully completing their preliminary examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHTH 9999. Dissertation Research and Colloquium. 1 to 4 Credit Hour.**

This course is limited to Ph.D. students who have passed preliminary examinations. Continuous registration in the Fall and Spring semesters is required until the oral defense has been passed. Students are required to attend a colloquium held once a month to review and discuss progress to date.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Physician Assistant (PA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PA 8101. Physician Assistant Practice I. 1 Credit Hour.**

This is a Physician Assistant one-credit lecture/seminar. Physician Assistant Practice I is the first of a four-course series that explores the social, regulatory, ethical and professional aspects of becoming a physician assistant. This first course will review the societal aspects of the profession that include the history of the physician assistant profession, how PAs fit into the U.S. healthcare system, professionalism, the PA-physician supervisor relationship and PA scope of practice. Students will be introduced to the concepts of effective communication skills with patients and other healthcare providers. Students will also learn about patient motivators to incorporate healthy behaviors and how various stakeholders to good health influence patients and healthcare providers in health promotion and disease prevention.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8102. Patient Assessment I. 1 Credit Hour.**

This is a Physician Assistant one-credit lecture/seminar. Patient Assessment I is the first of a four-part progressive sequence of learning that introduces the critical skills and concepts of physical examination and history taking that are necessary for the practice as Physician Assistants in contemporary society. Students will learn interview and examination techniques along with appropriate counseling and patient education skills. This course consists of an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in fundamental clinical skills that include: taking a patient history, performing a physical examination of a normal adult, and basic case presentation. Professionalism and the student's emerging role as a healthcare provider are addressed throughout the course. Activities are integrated with the science curriculum whenever possible.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8103. Human Gross Anatomy. 5 Credit Hours.**

This is a Physician Assistant five credit course with focus on the study of functional and applied human anatomy. Each topic will utilize lecture and lab experiences, which include human cadaver specimens. When appropriate, clinical and surgical correlations are made from a diagnostic as well as an operative point of view. Instruction is primarily in lecture and laboratory format. Textbooks, atlases, computer software programs, and other visual aids are available for study. Applied learning based on clinically relevant cases will be emphasized.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8104. Introduction to Scientific Inquiry. 1 Credit Hour.**

This is a Physician Assistant one-credit course offered during Summer Session I. This course is the first course in the preparation of the student for the capstone project that will cumulate at the end of their clerkship year through the Scholarly Clinical Research Courses I and II. It will focus on introducing students to hypothesis directed research approaches that leads to new findings that ultimately impact on the care of patients. Library staff will provide instruction on the use of the library resources available to support research. In addition, students will be introduced to the reading, presentation, interpretation and critique of published manuscripts dealing with current important issues in clinical medicine. Each topic will utilize lecture and class discussion. Students will also be expected to make class presentations of clinically relevant manuscripts. The Introduction to Scientific Inquiry course will be coordinated with the Introduction to Epidemiology and Biostatistics course, which will be running simultaneously.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8105. Foundations of Medical Sciences I. 4 Credit Hours.**

This is a Physician Assistant four-credit course offered during Summer Session I. It will focus on reviewing and extending basic fundamental knowledge in medical sciences in the areas of biochemistry, nutrition, molecular biology, genetics, and cell and organ physiology. Mastery of this information is necessary to progress to the organ systems clinical medicine fundamentals courses, which will follow, in subsequent semesters. Each topic will utilize lecture, problem solving, and workshop experiences followed by an examination. Textbooks, PowerPoint presentations prepared by faculty, problem sets prepared by faculty and other visual aids are available for study. Applied learning based on clinically relevant cases will be emphasized.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8106. Introduction to Epidemiology and Biostatistics. 2 Credit Hours.**

This is a Physician Assistant two-credit course offered during Summer Session I. It will focus on providing an introduction to epidemiology and biostatistics. Concepts will be presented in lecture and reinforced with homework problem sets and workshops. Homework problems and workshops will be designed around clinically important research topics. Topics include measures of disease frequency, probability, overview of the epidemiologic study designs, sample size, hypothesis testing, tests of significance (p-values, confidence intervals, chi-square tests), measures of data quality and bias, multivariate models, survival analysis, and causality. Emphasis will be placed on students being able to apply information taught to the interpretation and critique of clinically relevant research manuscripts.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8201. Physician Assistant Practice II. 1 Credit Hour.**

This is a Physician Assistant one-credit lecture/seminar course. The Physician Assistant Practice (II) course is the second of a four-course series that explores the social, regulatory, ethical and professional aspects of a physician assistant. This second course will focus on regulatory issues that impact the practice of the physician assistant including the political process, drivers of public health, health policy development, health care financial systems and the contributions of the physician assistant regarding these issues.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8202. Patient Assessment II. 1 Credit Hour.**

This is a Physician Assistant one-credit lecture/seminar. Patient Assessment II is the second of a four-part progressive sequence of learning that introduces the critical skills and concepts of physical examination and history taking that are necessary for the practice as Physician Assistants in contemporary society. Students will continue to learn interview and examination techniques along with appropriate counseling and patient education skills. Patient Assessment II is designed to build upon the skills acquired in Patient Assessment I. Patient Assessment II is taught throughout the first fall semester of the PA program. This course consists of an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in fundamental clinical skills that include: taking a patient's focused medical history, performing a focused physical examination, and case presentation. The focused history taking and physician exam will include the normal neurological and mental status examination, the cardiology, pulmonary and hematology focused examinations. Professionalism and the student's emerging role as a healthcare provider are addressed throughout the course. Activities are integrated with the science curriculum whenever possible.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8203. Foundations of Medical Sciences II. 4 Credit Hours.**

This is a Physician Assistant four-credit course offered during Fall Session I. It will focus on reviewing and extending basic fundamental knowledge in medical sciences in the areas of immunology, microbiology, and pharmacology. Mastery of this information is necessary to progress to the organ systems clinical medicine fundamentals courses, which will follow later in this semester and subsequent semesters. Each area of study will utilize lecture, problem solving, and workshop experiences followed by an examination. Textbooks, PowerPoint presentations prepared by faculty, problem sets prepared by faculty and other visual aids are available for study. Applied learning based on clinically relevant cases will be emphasized.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8204. Fundamentals of Hematology. 3 Credit Hours.**

This is a Physician Assistant, three-credit course. Fundamentals of Hematology is a course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of hematological diseases. It is one of the integrated system blocks that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Internal Medicine and Cardiology. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises using high-fidelity patient mannequins. The course provides instruction in clinical application of hematological basic science principals, focused physical examination techniques (in conjunction with Patient Assessment II), the initial use of diagnostic tests in the evaluation of hematological disease, the initial therapeutic approach to a variety of hematological diseases and the communication skills necessary for providing patient education on hematological diseases.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8205. Fundamentals of Cardiology. 4 Credit Hours.**

This Physician Assistant four-credit course, Fundamentals of Cardiology is a fall semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of cardiovascular diseases. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises using high-fidelity patient mannequins. The course provides instruction in clinical application of cardiovascular basic science principles, focused cardiovascular physical examination techniques (in conjunction with Patient Assessment II), the initial use of diagnostic tests in the evaluation of cardiovascular disease, the initial therapeutic approach to a variety of cardiovascular diseases and the communication skills necessary for providing patient education on cardiovascular diseases.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8206. Fundamentals of Pulmonology. 4 Credit Hours.**

This Physician Assistant four-credit course, Fundamentals of Pulmonology, is a fall semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of pulmonary diseases. It is the second of the integrated system courses that is taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Internal Medicine, Surgery and Radiology. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises using high-fidelity patient mannequins. The course provides instruction in clinical application of the pulmonary system's basic science principles, focused pulmonary physical examination techniques (in conjunction with Patient Assessment II), the initial use of diagnostic tests in the evaluation of respiratory disease, the initial therapeutic approach to a variety of respiratory diseases and the communication skills necessary for providing patient education on pulmonary/respiratory diseases.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8207. Fundamentals of Gastroenterology. 3 Credit Hours.**

This Physician Assistant three-credit course, Fundamentals of Gastroenterology, is a course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of Gastroenterology diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Department of Medicine/Gastroenterology. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of Gastroenterology basic science principles, focused Gastroenterology physical examination techniques (in conjunction with Patient Assessment III), the initial use of diagnostic tests in the evaluation of Gastroenterology disease, the therapeutic approach to a variety of Gastroenterology diseases and the communication skills necessary for providing patient education on Gastroenterology diseases.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8301. Physician Assistant Practice III. 1 Credit Hour.**

This is a Physician Assistant one-credit lecture/seminar course. The Physician Assistant Practice (III) is the third of a four-course series that explores the social, regulatory, ethical and professional aspects of physician assistant practice. This third course will focus on the ethical aspects of the profession that serve to enhance care and to protect patients and healthcare workers.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8302. Patient Assessment III. 1 Credit Hour.**

This is a Physician Assistant one-credit lecture/seminar course. Patient Assessment III is the third of a four-part progressive sequence of learning that introduces the critical skills and concepts of physical examination and history taking that are necessary for the practice as Physician Assistants in contemporary society. Students will continue to learn interview and examination techniques along with appropriate counseling and patient education skills. Patient Assessment is designed to build upon the skills acquired in Patient Assessment I and II. This course consists of an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in fundamental clinical skills that include: taking a patient's focused medical history, performing a focused physical examination, and case presentation. The medical history taking and physician exam will focus on the skin exam, EENT, abdominal, musculoskeletal and neurological examinations and the findings associated with diseases and disorders of these corresponding systems. Professionalism and the student's emerging role as a healthcare provider are addressed throughout the course. Activities are integrated with the science curriculum whenever possible.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8303. Fundamentals of Nephrology. 2 Credit Hours.**

This Physician Assistant two-credit course, Fundamentals of Nephrology is a Spring I semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of renal diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Medicine/Nephrology. By the end of the Fundamentals of Nephrology course, the physician assistant student will: Evaluate Nephrology diseases that are commonly found in primary care medicine in relation to the etiology, epidemiology and pathophysiology for patients presenting with Nephrology diseases and disorders; Recognize the signs and symptoms commonly linked with specific Nephrology diseases and formulate a comprehensive differential diagnosis; Select the appropriate diagnostic testing and procedures used in the evaluation and management of Nephrology disease; Classify the diagnostic test and procedure results as they relate to disease of the Nephrology system; Choose the most appropriate pharmacologic and non-pharmacologic treatment and management options for the Nephrology disorders studied; Assess a clinical situation as a basis for referral to a Nephrology specialist; Decide on the necessary examination and procedures required for the diagnosis and management of kidney disorders.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8304. Fundamentals of Endocrinology. 3 Credit Hours.**

This is a Physician Assistant three-credit course. Fundamentals of Endocrinology is a Spring I semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of Endocrinologic diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Medicine/Division of Endocrinology. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of Endocrinology basic science principles, focused physical examination techniques (in conjunction with Patient Assessment III), the initial use of diagnostic tests in the evaluation of Endocrinology disease, the therapeutic approach to a variety of Endocrinology disorders and the communication skills necessary for providing patient education on Endocrinology diseases.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8305. Fundamentals of Ears/Eyes/Nose/Throat (EENT). 2 Credit Hours.**

This is a Physician Assistant two-credit course. Fundamentals of Ears/Eyes/Nose/Throat (EENT) is a Spring I semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of EENT diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Internal Medicine/Ophthalmology and otolaryngology.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8306. Fundamentals of Neurology. 2 Credit Hours.**

This Physician Assistant two-credit course, Fundamentals of Neurology is a Spring I semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of neurological diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Internal Medicine and the Department of Neurology. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of Neurological basic science principles, focused Neurological physical examination techniques (in conjunction with Patient Assessment III), the initial use of diagnostic tests in the evaluation of Neurological disease, the therapeutic approach to a variety of Neurological diseases and the communication skills necessary for providing patient education on Neurological diseases and disorders.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8307. Fundamentals of Rheumatology and Orthopedics. 3 Credit Hours.**

This is a Physician Assistant, three-credit course. Fundamentals of Rheumatology and Orthopedics is a Spring I semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of renal diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Medicine/Rheumatology and the Department of Orthopedic Surgery. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of Rheumatology and Orthopedics basic science principles, focused Rheumatology and Orthopedics physical examination techniques (in conjunction with Patient Assessment III), the initial use of diagnostic tests in the evaluation of musculoskeletal disease, the therapeutic approach to a variety of Rheumatology and Orthopedics diseases and the communication skills necessary for providing patient education on musculoskeletal diseases and disorders.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8308. Fundamentals of Dermatology. 2 Credit Hours.**

This is a Physician Assistant, two-credit course. Fundamentals of Dermatology is a Spring I semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of dermatological diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Internal Medicine and Dermatology. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of dermatological basic science principles, focused dermatological physical examination techniques (in conjunction with Patient Assessment II), the initial use of diagnostic tests in the evaluation of dermatological disease, the therapeutic approach to a variety of dermatological disorders and the communication skills necessary for providing patient education on dermatological diseases.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8309. Essentials of Psychiatry. 2 Credit Hours.**

This is a Physician Assistant two-credit lecture/seminar. Essentials of Psychiatry is a Spring I semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of psychiatric diseases. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Internal Medicine and the Department of Psychiatry. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of psychiatric basic science principles, focused psychiatric physical examination techniques (in conjunction with Patient Assessment IV), the initial use of diagnostic tests in the evaluation of psychiatric disease, the therapeutic approach to a variety of psychiatric diseases and the communication skills necessary for providing patient education on psychiatric diseases and disorders.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8401. Physician Assistant Practice IV. 1 Credit Hour.**

This is a Physician Assistant one-credit lecture/seminar course. The Physician Assistant Practice (IV) course is the last of a four-course series that explores the social, regulatory, ethical and professional aspects of physician assistant practice. This fourth course will focus on the topics pertinent to employment and practice of a physician assistant including licensing and credentialing, medical coding bills, avoiding malpractice, healthcare financing and delivery systems along with career and leadership opportunities. Students will continue to work on their professional portfolios.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8402. Patient Assessment IV. 1 Credit Hour.**

Patient Assessment IV is the last course of a four-part progressive sequence of learning that introduces the critical skills and concepts of physical examination and history taking that are necessary for the practice as Physician Assistants in contemporary society. Students will continue to learn interview and examination techniques along with appropriate counseling and patient education skills. Patient Assessment is designed to build upon the skills acquired in Patient Assessment I - III. Overviews of clinical skills and patient management principles are presented in lectures, and rehearsed in small-group, hands-on settings in the Clinical Simulation Center. Simulated patients, physician assistant faculty, and high-fidelity patient mannequins are used throughout the course. Students participate in formative Practice Clinical Encounters, after which they review and critique their performance with their program faculty instructor.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8403. Bioethics. 2 Credit Hours.**

This is a Physician Assistant two-credit lecture/seminar. Bioethics is a Summer II semester course and consists of lecture and small group work. The course will focus on practical principles related to medical ethics and professionalism which includes topics related to professional conduct, cultural awareness and ethical problem solving using clinical scenarios. The overarching goal of this course is to provide students with the competences to interact professionally and ethically with patients, families and other health care providers, as well as to prepare them to engage in bioethics policy related discussions and decisions, whether at the level of the individual clinic, hospital, city, state, or federal government.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8404. Essentials of Reproductive Health. 4 Credit Hours.**

This is a Physician Assistant four-credit lecture/seminar. This Essentials of Reproductive Health course is a Summer II semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of diseases affecting the genital/urinary system. It is one of the integrated system courses that are taught by basic-science faculty from the Department of Biomedical Education and Data Science as well as physician assistants and physician faculty from the Departments of Internal Medicine, Obstetrics and Gynecology, Urology and Surgery. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of basic science principles, focused physical examination techniques (in conjunction with Patient Assessment IV), the initial use of diagnostic tests in the evaluation of disease effecting the genitourinary system, the initial therapeutic approach to a variety of diseases and the communication skills necessary for providing patient education on these diseases.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8405. Essentials Across the Lifespan. 4 Credit Hours.**

This is a Physician Assistant four-credit lecture/seminar. This four-credit course, Essentials Across the Lifespan is a summer II semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of common diseases and conditions affecting infants, children, adolescents and older adults. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Pediatrics and Internal Medicine. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises using high-fidelity patient mannequins. The course provides instruction in clinical application of basic science principles, focused physical examination techniques (in conjunction with Patient Assessment IV), the initial use of diagnostic tests, the initial therapeutic approach and the communication skills necessary for providing patient education of common outpatient diseases and conditions.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 8406. Essentials of Surgery and Emergency Medicine. 4 Credit Hours.**

This is a Physician Assistant four-credit lecture/seminar. Essentials of Surgery and Emergency Medicine is a summer II semester course that provides the physiology and pathophysiology, diagnostic evaluation and initial therapeutic approach of surgical/emergent disease and disorders. It is one of the integrated system courses that are taught by basic-science faculty from the Departments of Physiology and Pharmacology as well as physician assistants and physician faculty from the Departments of Surgery and Emergency Medicine. This course is an integrated series of lectures, small-group discussions, simulated patient encounters, and clinical correlation exercises. The course provides instruction in clinical application of Surgical and Emergency Medicine basic science principles, with focus on the Surgical and Emergency evaluation and treatment modalities. Physical examination techniques (in conjunction with Patient Assessment IV), the use of diagnostic tests in the evaluation of Surgical and Emergency disorders, the therapeutic approach to the spectrum of these disorders and the communication skills necessary for providing patient education will be given.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9085. Family Medicine Clerkship. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in evaluating and treating common problems encountered in Family Medicine. Experience is provided at the level of a primary care physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9086. Elective Clerkship in Medicine Subspecialties I. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in the practice of a Medicine Subspecialty chosen by the student. These may include one of the following: Cardiology, Endocrinology, Gastroenterology, Hepatology, Hematology/Oncology, Hospital Medicine, Infectious Disease, Nephrology or Rheumatology. Students may participate in the management of patients in both the inpatient and outpatient setting under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9087. Elective Clerkship in Urology. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in Urology. Students may participate in the management of the surgical patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9182. Independent Study. 1 to 6 Credit Hour.**

This is a Physician Assistant, variable credit Independent Study (1-6 credits) course. This course is designed to provide the student with an opportunity to gain or enhance knowledge and to explore an area of interest related to physician assistant research or the delivery and/or administration of health services.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may be repeated for additional credit.

**PA 9185. Internal Medicine Clerkship. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in evaluating and treating common problems encountered in Internal Medicine. Experience is provided at the level of a primary care physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9186. Elective Clerkship in Neurology. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in the practice of Neurology. Students may participate in the management of Neurological patients both in the inpatient and outpatient setting under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9187. Elective Clerkship in Medicine Subspecialties II. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in the practice of a Medicine Subspecialty chosen by the student. These may include one of the following: Cardiology, Endocrinology, Gastroenterology, Hepatology, Hematology/Oncology, Hospital Medicine, Infectious Disease, Nephrology or Rheumatology. Students may participate in the management of patients in both the inpatient and outpatient setting under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8406, and PA 9991.

**PA 9285. Emergency Medicine Clerkship. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in evaluating and treating common problems encountered in Emergency Medicine. Experience is provided at the level of a primary care physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9286. Elective Clerkship in Neurosurgery. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in Neurosurgery. Students may participate in the management of the neurosurgical patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9287. Elective Clerkship in Surgical Subspecialties II. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in the Surgical Subspecialty chosen by the student. These may include one of the following: Abdominal Organ Transplant, Cardiovascular Surgery, Colorectal Surgery, Minimally Invasive Surgery, Plastic and Reconstructive Surgery, Surgical Oncology, Trauma Surgery and Critical Care, or Vascular and Endovascular Surgery. Students may participate in the management of the surgical patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9385. Obstetrics/Gynecology Clerkship. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in evaluating and treating common problems encountered in obstetrics and gynecology. Experience is provided at the level of a primary care physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9386. Elective Clerkship in Ophthalmology. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in Ophthalmology. Students may participate in the management of the ophthalmological patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9485. Surgery Clerkship. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluating and managing common problems encountered in surgery. Students will participate in management of surgical patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9486. Elective Clerkship in Orthopaedic Surgery and Sports Medicine. 5 Credit Hours.**

This is a 5-week elective clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in Orthopaedic Surgery and Sports Medicine. This rotation can be customized to the student's interests. Time can be spent on the different Orthopaedic Services including Trauma, Joints, Sports, Spine, and Hand Surgery. Competency in evaluating and managing patients with the following conditions will be expected: trauma, degenerative and inflammatory arthritis, sports injuries, spine deformity and degenerative conditions, hand injuries and arthritis conditions, musculoskeletal infections, and metastatic musculoskeletal disease. The student will accompany a staff member and residents in outpatient orthopaedic clinics. The student will assist in the operating room and hospital rounds. Emergency care of the injured patient will also be emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9585. Behavioral Medicine Clerkship. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in evaluating and treating common problems encountered in Behavioral Medicine. Experience is provided at the level of a primary care physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9586. Elective Clerkship in Otolaryngology. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in Otolaryngology. Students may participate in the management of the otolaryngology patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9685. Pediatric Medicine Clerkship. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in evaluating and treating common problems encountered in pediatrics. Experience is provided at the level of a primary care physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9686. Elective Clerkship in Physical Medicine and Rehabilitation. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in the practice of Physical Medicine and Rehabilitation. Students may participate in the management of Physical Medicine and Rehabilitation patients both in the inpatient and outpatient setting under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9785. Elective Clerkship I. 5 Credit Hours.**

This is one of two 5-week clinical elective courses designed to provide the physician assistant with exposure to likely areas of medical practice of interest to the student. Potential areas include but are not limited to the following: Cardiology, Pulmonology, Orthopedic Surgery, Trauma Surgery, Gastroenterology. The physician assistant student will be provided experience in evaluating and treating common problems encountered in the area of their chosen elective.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9786. Elective Clerkship in Radiology. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common procedures encountered in the practice of Radiology. Students may be involved in the obtaining and interpreting of medical images obtained with x-rays, radioactive substances, magnetism or ultrasound in both the inpatient and outpatient setting under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9885. Elective Clerkship II. 5 Credit Hours.**

This is one of two 5-week clinical elective courses designed to provide the physician assistant with exposure to likely areas of medical practice of interest to the student. Potential areas include but are not limited to the following: Cardiology, Pulmonology, Orthopedic Surgery, Trauma Surgery, Gastroenterology. The physician assistant student will be provided experience in evaluating and treating common problems encountered in the area of their chosen elective.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9886. Elective Clerkship in Surgical Subspecialties I. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in the Surgical Subspecialty chosen by the student. These may include one of the following: Abdominal Organ Transplant, Cardiovascular Surgery, Colorectal Surgery, Minimally Invasive Surgery, Plastic and Reconstructive Surgery, Surgical Oncology, Trauma Surgery and Critical Care, or Vascular and Endovascular Surgery. Students may participate in the management of the surgical patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9985. Elective Clerkship in Dermatology. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in Dermatology. Students may also participate in the management of the dermatologic patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9986. Elective Clerkship in Thoracic Medicine and Surgery. 5 Credit Hours.**

This is a 5-week clinical course designed to provide the physician assistant student with experience in data gathering, evaluation and management of common problems encountered in Thoracic Medicine and Surgery. Students may participate in the management of the thoracic medicine and surgery patient during the pre-operative phase, assist during surgery and other procedures, and provide post-operative care management in both the in-patient and out-patient setting under the supervision of physicians and physician assistants. Experience is provided at the level of a primary care physician assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PA 8401, PA 8402, PA 8403, PA 8404, PA 8405, PA 8406, and PA 9991.

**PA 9991. Scholarly Clinical Research I. 1 Credit Hour.**

This is a Physician Assistant one-credit course. Scholarly Clinical Research I is a summer II semester course and is the first of a two-part series. In the first part of the series, students will plan and develop the goals and background information for their capstone clinical research project that will culminate in the second part during the summer III semester. This course builds upon the concepts presented in the first semester's Introduction to Scientific Inquiry (PA 8104) course. Students will be expected based on their experiences in the first three semesters in the program to select a topic and a graduate faculty mentor for their capstone clinical research project at the beginning of the semester. Topics must be in 1 of 4 potential general areas: Basic Research, Community-Based Research, Evidence-Based Medicine Research or Translational Research. The topic of the project and the mentor must be approved by the course director. Working with the Program approved graduate faculty mentor, the students will develop the specific objective(s)/hypothesis of their project and research the background literature pertinent to the project. At the end of the semester, the students will submit a research paper providing this information in a publishable form. The student will be expected to continue the development and production of this proposal throughout the Fall II, Spring II and Summer III semesters.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may not be repeated for additional credits.

**PA 9993. Comprehensive Review. 2 Credit Hours.**

This two-credit review course employs lectures, small-group discussions, self-assessments, and a comprehensive written examination to measure clinical learning in preparation for graduation from the physician assistant program. In addition, this course will prepare students to challenge the National Commission on the Certification of Physician Assistants (NCCPA) Physician Assistant National Certifying Examination (PANCE) that all must pass to function as a physician assistant.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may be repeated for additional credit.

**PA 9995. Scholarly Clinical Research II. 1 Credit Hour.**

This one-credit course, Scholarly Clinical Research II, will be taken in the third summer of the PA Program and is the second of a two-part series focusing on scholarly research. This interactive course will build upon the concepts presented in the first semester's Introduction to Scientific Inquiry (PA 8104) and Scholarly Clinical Research I (PA 9991) courses. Working with their Program-approved graduate faculty mentor, the student will complete their capstone research during fall II, spring II, and summer III. At the conclusion of the course, the student will be required to complete the paper begun as part of Scholarly Clinical Research I by describing the results of their project and discussing them in the context of the available published literature. In addition, the students will prepare a poster for presentation of their capstone project at the specified PA Research Day.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physician Assistant.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Medicine, Lewis Katz School.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in PA 8104 and PA 9991.

## Physics (PHYS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PHYS 5000. Topical Seminar. 3 Credit Hours.**

This course considers special topics in Physics, not considered in our other courses. The level of this course is graduate, but the content could be accessible to upper-level undergraduate Physics majors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 5001. Introduction to Quantum Computing. 3 Credit Hours.**

This course will give an elementary introduction to some basics of quantum information and quantum computing that are accessible to not only physicists but also people with a variety of backgrounds. It will introduce the students to the latest scientific and technological advancement, and prepare for further study and/or initiating research if one wishes to pursue in this field.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 5002. Physics Research and Ethics. 1 Credit Hour.**

This course will introduce new graduate students to the diverse faculty research programs in physics at Temple, and help them to make an informed choice of research advisor and topic. It will also make sure that all students are aware of the ethical code for physicists. The course will meet for one hour per week. In the first 3 to 5 weeks, the instructor will lecture on the ethical and etiquette responsibilities of students, teachers, and researchers in physics. In each of the next 10 to 12 weeks, a faculty volunteer will explain his or her research program and opportunities for student participation in it. A faculty member may also nominate a graduate student to speak to the class. Former graduate students who hold physics research positions could also be invited to speak. Students will have ample opportunity to ask questions. They will be required to turn in one-page summaries of the lectures for grading by the lecturers; this should measure the students' understanding and improve their writing skills. A possible text for the ethics lectures would be the National Academy of Sciences booklet "On Being a Scientist".

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Physics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 5101. Analytical Mechanics. 3 Credit Hours.**

Variational principles, Lagrange's and Hamilton's equations; canonical transformations; small oscillations; dynamics of particles, rigid bodies, strings and membranes; hydrodynamics; chaos in deterministic systems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 5301. Electromagnetic Theory. 3 Credit Hours.**

Boundary value problems of the electrostatic and magnetostatic fields; Maxwell's equations; plane waves at boundaries in dielectric and conducting media; potentials in the Lorentz gauge; Green's functions for wave and Helmholtz equations; multipole radiation; material dispersion; diffraction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 5302. Advanced Electromagnetic Theory. 3 Credit Hours.**

Maxwell stress tensor; relativistic dynamics; Lagrangian formulation of electrodynamics; Noether's theorem; laser resonant cavities and optics of Gaussian beams; Eikonal and geometrical optics limit; synchrotron radiation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 5301.

**PHYS 5501. Mathematical Physics. 3 Credit Hours.**

Tensor analysis; group theory; complex variable theory; partial differential equations; Sturm-Liouville systems; integral transforms; integral equations and Green's function methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 5502. Computational and Mathematical Physics. 3 Credit Hours.**

Preliminaries; numerical applicability, survey of algorithms, computer modeling, programming considerations; basic numerical methods; numerical linear algebra; numerical solution to ordinary and partial differential equations; molecular dynamics; Monte Carlo simulations; nonlinear methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 5501.

**PHYS 5701. Quantum Mechanics I. 3 Credit Hours.**

Fundamental principles of quantum mechanics; relation to classical mechanics; Schrodinger and operator formulations; path integrals; Aharonov-Bohm effect; examples of exact solutions; central forces and angular momentum; scattering theory; Bell's theorem.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 5702. Quantum Mechanics II. 3 Credit Hours.**

Matrix mechanics; theory of electron spin; Hilbert space formulation of quantum mechanics; transformation theory; theory of rotations; spin and statistics; stationary approximation methods with application to atomic systems; time-dependent perturbation theory; exponential decay.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 5701.

**PHYS 8001. Practicum Teaching of Physics. 1 Credit Hour.**

Required of all graduate teaching assistants in their first semester. Consists of supervised instruction in undergraduate laboratories and a weekly two-hour class.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 8004. Problems in Experimental Physics. 1 to 6 Credit Hour.**

Special problems in the field of experimental physics. The course is designed to acquaint the student with the research techniques employed in experimental physics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 8005. Problems in Theoretical Physics. 1 to 6 Credit Hour.**

Special problems in the field of theoretical physics. The course is designed to acquaint the student with the research techniques employed in theoretical physics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 8020. Topical Seminar I. 3 Credit Hours.**

This course considers special topics in Physics, not considered in depth in our other courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 8030. Topical Seminar II. 3 Credit Hours.**

This course considers special topics in Physics, not considered in depth in our other courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 8050. Physics Seminar. 0 Credit Hours.**

This course provides the graduate students with the state of the field knowledge about Physics. Students attend 10 to 12 Colloquium/Seminars per semester given by the experts, mostly drawn from national and international authorities in the field. The students are graded on the basis of their attendance in these seminars, and are encouraged to discuss their research with these visiting experts. Last year's colloquium included among other experts, a Nobel Laureate, Sir Anthony Leggett, 2003.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 8102. Statistical Mechanics. 3 Credit Hours.**

Review of thermodynamics; kinetic theory; statistical definition of entropy; microcanonical, canonical, and grand canonical ensembles; applications to gases, diatomic molecules, magnetic systems, phase transitions; quantum statistics; ideal boson and fermion systems; Bose-Einstein condensation; black body radiation; models of solids; properties of liquid helium.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (PHYS 5501 and PHYS 5701)

**PHYS 8701. Quantum Field Theory. 3 Credit Hours.**

Properties of quantized radiation field; emission, absorption and scattering of photons by atoms; nonrelativistic Lamb shift; Dirac equation: nonrelativistic limit, Lorentz covariance, exact solutions; hole theory; Lagrangian field theory; field quantization; S-matrix; covariant perturbation theory; Feynman rules for QED with application to various processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 5702.

**PHYS 8702. Solid State Physics. 3 Credit Hours.**

Crystal and x-ray diffraction; lattice vibrations and thermal properties; energy bands and electronic properties; semiconductors; optical and dielectric properties; para-, ferro-, and antiferromagnetism; introduction to superconductivity and superfluidity.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 5701 and PHYS 5702.

**PHYS 8703. Nuclear and Elementary Particle Physics. 3 Credit Hours.**

The Standard Model (SM); gauge invariance, non-Abelian gauge theories, SM Lagrangian, electroweak theory and QCD, Higgs mechanism, confinement; experimental considerations: accelerators and detectors, elastic scattering and form factors, deep inelastic scattering and structure functions; advanced topics in the SM: grand unification, neutrino mass, big bang cosmology, dark matter.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 5701 and PHYS 5702.

**PHYS 8704. Many Electron Theory. 3 Credit Hours.**

The course is at an intermediate level and is appropriate for students of experimental and theoretical condensed matter and AMO physics. The course familiarizes students with the theory of correlated electrons and states with broken electron symmetry, it also provides a framework for the description of experimental properties in materials with electron correlations. Topics include: Phenomenology of cohesion in molecules and solids, Many-electron wavefunctions, Functionals and their extrema, Wavefunction variational principles, Hellmann-Feynman theorem, One- and two-particle density matrices, and the electron density Wavefunction vs. density functional methods, Hohenberg-Kohn theorem, Functional derivatives, Uniform electron gas Kohn-Sham spin-density functional theory, Approximate functionals, Linear Response Theory and Stability, Collective Excitations, Superconducting Instability, Magnetic Instabilities, Charge Density Wave Instabilities in low-dimensional systems, Ferromagnetic, Spin and Orbital density wave phases, Instabilities of the Half-Filled Band, BCS Theory of Superconductivity, s, p and d wave pairing, the Integer and Fractional Quantum Hall States, Collective Excitations and Goldstone Modes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Science & Technology.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 8702.

**PHYS 8705. Advanced Topics in Nuclear and Particle Physics. 3 Credit Hours.**

The course is at an intermediate level and is appropriate for students of experimental and theoretical nuclear and particle physics. Topics include: Accelerators, Detectors, Essential elements of data analysis and statistics, Selected advanced topics in QFT, Hard scattering processes and the parton structure of hadrons, Breaking of global and local symmetries (Higgs mechanism), Effective field theory, Neutrino physics, Physics beyond the SM, Nuclear matter under extreme conditions, Overview of nuclear structure and reactions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Science & Technology.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in PHYS 8703.

**PHYS 8985. Teach in Higher Ed: Phys. 2 Credit Hours.**

Teaching in Higher Ed: Physics. This course focuses on learning theory and the best teaching practices, with the aim of preparing students for effective higher education teaching.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PHYS 9991. Master's Research Projects. 1 to 6 Credit Hour.**

Short-term, limited research project or laboratory project in the field. This course is not the capstone project course, nor can it be used for thesis based research. The course is for master's students only, including PSM, MA or MS. This class will not confer full-time program status unless nine credits are taken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Master of Science, Prof Science Masters.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course is required for students who are preparing for the preliminary or candidacy examination. Students should enroll after coursework is completed or when preparing for the candidacy exam until the time that the preliminary or candidacy examination is completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. All students must complete a minimum of one credit of this course. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 9995. Capstone Project. 1 to 6 Credit Hour.**

Capstone project for master's students including students in PSM, MA or MS. This class will provide full-time status. Students in PSM programs need to register for at least one credit of this course to fulfill program requirements. Additional credits may be required for specific programs. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Arts, Master of Science, Prof Science Masters.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 9996. Master's Thesis Research. 1 to 6 Credit Hour.**

Course for master's thesis research. Only intended for students in thesis bearing master's programs. A minimum of one credit is required. This course will confer full-time status at the minimum credit hour registration limit of one credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 9998. Pre-Dissertation Research / Elevation to Candidacy. 1 to 6 Credit Hour.**

This course is intended for students who are performing research prior to candidacy. Students can register for this course after required courses are completed. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must be registered for this course during the semester that they are to be elevated to candidacy examination. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PHYS 9999. Dissertation Research. 1 to 6 Credit Hour.**

The course is for Ph.D. students who have been elevated to candidacy. During the course of their candidacy students must complete a minimum of two credits of dissertation research. This course will confer full-time status at the minimum credit hour registration limit of one credit. Students must complete a total of 6 credit hours of 9994, 9998 and 9999.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Physiology-Biophysics (PHBI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PHBI 0110. Human Anatomy & Physiology. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PHBI 0115. Human Physiology. 4 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PHBI 0310. Human Anatomy & Physiology. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PHBI 0315. Human Physiology. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## Podiatric Clinical Education (PCED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PCED P337. Third-year Elective Podiatric Clerkship. 4.5 Credit Hours.**

The third-year elective podiatric clerkship is an off-campus podiatric clinical experience designed to supplement the podiatric training of students for whom this is more desirable than similar training in a primary medical discipline. Students in P337 will be assigned to rotate with faculty at approved residency and clerkship sites in a mixture of office and hospital settings.

**Repeatability:** This course may be repeated for additional credit.

**PCED P381. Intro Clerkship Clinical Pod I. 13.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. The patients seen in PM typically present with a variety of chronic conditions for which they have been treated previously (such as mechanically induced keratoses of the feet as well as various nail pathologies such as onychomycosis and nail dystrophy); thus, the emphasis of this rotation is not on the initial patient evaluation. However, patients presenting for care of an established problem do develop new concerns from time to time and the student should be prepared to elicit a pertinent history and perform a focused examination appropriate to their evaluation. Furthermore, since many of the patients seen in PM have systemic disorders such as diabetes mellitus, students are expected to evaluate them for pedal manifestations which may indicate worsening of the systemic disorder and refer patients to the appropriate physician for more extensive work-up and intervention. Students should also routinely survey patients for changes in pedal risk factors such as the appearance of neuropathy and the development of pre-ulcerative lesions. Students will gain extensive experience in the recognition and management of a variety of hyperkeratotic and nail pathologies and are expected to appreciate the contributions of biomechanical factors and underlying systemic conditions to these.

**Repeatability:** This course may be repeated for additional credit.

**PCED P384. Clerkship Clinical Podiatry I. 4.5 Credit Hours.**

Clerkship in Clinical Podiatry (Surgery).

**Class Restrictions:** Must be enrolled in one of the following Classes: Third Year Podiatry.

**Repeatability:** This course may be repeated for additional credit.

**PCED P385. Clerkship Clinical Podiatry II. 4.5 Credit Hours.**

Clinical Clerkship in Podiatry (Medicine).

**Repeatability:** This course may be repeated for additional credit.

**PCED P386. Clerkship Clinical Podiatry III. 4.5 Credit Hours.**

Clerkship in Clinical Podiatry (Orthopedics).

**Repeatability:** This course may be repeated for additional credit.

**PCED P387. Medical Elective. 4.5 Credit Hours.**

Spring Clerkships for 3rd year Podiatry Students.

**Repeatability:** This course may be repeated for additional credit.

**PCED P390. Clinical Correlations for Podiatric Medicine. 4.5 Credit Hours.**

This course will combine instruction in the psychomotor skills of physical examination with high-yield focused clinical instruction using case studies, clinical vignettes, peer practice, patient simulations, and standardized patient contacts as appropriate for individual modules to develop skills in patient assessment and awareness of key issues in management of common systemic conditions and less common ones of critical importance in podiatric practice. Prerequisites: Successful completion (grade of 70 or better, or S or P as applicable) in all TUSPM didactic coursework.

**College Restrictions:** Must be enrolled in one of the following Colleges: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PCED P410. Clerkship in General Orthopedics. 4.5 Credit Hours.**

Podiatric medical students are responsible to the rotation intern, orthopedic resident(s) and the clinical orthopedic faculty for that particular orthopedic service. Podiatric medical students will be paired with a medical student for the duration of the rotation. This program is designed to have podiatric medical students become familiar with and experience orthopedic pathology to include diseases, fractures, soft tissue injuries, tumors, infections, neurological conditions, sports medicine injuries, etc.

**Repeatability:** This course may be repeated for additional credit.

**PCED P420. Clerkship in Internal Medicine. 4.5 Credit Hours.**

Students are assigned to an inpatient general medicine service where they function as part of the treatment team. Wherever possible, TUSPM students are paired with third or fourth year medical students. In any event, an intern or resident closely supervises the clinical activities of the students. Students are exposed to the usual routine of hospital based patient care and the record keeping which is required. Students are also preceptored in the work-up of patients. Attendance at all case conferences, team rounds, grand rounds, and didactic-activities are mandatory.

**Repeatability:** This course may be repeated for additional credit.

**PCED P430. Summer Clinic. 5 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**PCED P431. Clerkship Clinical Podiatry IV. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. The patients seen in PM typically present with a variety of chronic conditions for which they have been treated previously (such as mechanically induced keratoses of the feet as well as various nail pathologies such as onychomycosis and nail dystrophy); thus, the emphasis of this rotation is not on the initial patient evaluation. However, patients presenting for care of an established problem do develop new concerns from time to time and the student should be prepared to elicit a pertinent history and perform a focused examination appropriate to their evaluation. Furthermore, since many of the patients seen in PM have systemic disorders such as diabetes mellitus, students are expected to evaluate them for pedal manifestations which may indicate worsening of the systemic disorder and refer patients to the appropriate physician for more extensive work-up and intervention. Students should also routinely survey patients for changes in pedal risk factors such as the appearance of neuropathy and the development of pre-ulcerative lesions. Students will gain extensive experience in the recognition and management of a variety of hyperkeratotic and nail pathologies and are expected to appreciate the contributions of biomechanical factors and underlying systemic conditions to these.

**Repeatability:** This course may be repeated for additional credit.

**PCED P432. Clerkship Clinical Podiatry V. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. The patients seen in PM typically present with a variety of chronic conditions for which they have been treated previously (such as mechanically induced keratoses of the feet as well as various nail pathologies such as onychomycosis and nail dystrophy); thus, the emphasis of this rotation is not on the initial patient evaluation. However, patients presenting for care of an established problem do develop new concerns from time to time and the student should be prepared to elicit a pertinent history and perform a focused examination appropriate to their evaluation. Furthermore, since many of the patients seen in PM have systemic disorders such as diabetes mellitus, students are expected to evaluate them for pedal manifestations which may indicate worsening of the systemic disorder and refer patients to the appropriate physician for more extensive work-up and intervention. Students should also routinely survey patients for changes in pedal risk factors such as the appearance of neuropathy and the development of pre-ulcerative lesions. Students will gain extensive experience in the recognition and management of a variety of hyperkeratotic and nail pathologies and are expected to appreciate the contributions of biomechanical factors and underlying systemic conditions to these.

**Repeatability:** This course may be repeated for additional credit.

**PCED P433. Clerkship Clinical Podiatry VI. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. The patients seen in PM typically present with a variety of chronic conditions for which they have been treated previously (such as mechanically induced keratoses of the feet as well as various nail pathologies such as onychomycosis and nail dystrophy); thus, the emphasis of this rotation is not on the initial patient evaluation. However, patients presenting for care of an established problem do develop new concerns from time to time and the student should be prepared to elicit a pertinent history and perform a focused examination appropriate to their evaluation. Furthermore, since many of the patients seen in PM have systemic disorders such as diabetes mellitus, students are expected to evaluate them for pedal manifestations which may indicate worsening of the systemic disorder and refer patients to the appropriate physician for more extensive work-up and intervention. Students should also routinely survey patients for changes in pedal risk factors such as the appearance of neuropathy and the development of pre-ulcerative lesions. Students will gain extensive experience in the recognition and management of a variety of hyperkeratotic and nail pathologies and are expected to appreciate the contributions of biomechanical factors and underlying systemic conditions to these.

**Repeatability:** This course may be repeated for additional credit.

**PCED P434. Clerkship Clinical Podiatry VII. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. The patients seen in PM typically present with a variety of chronic conditions for which they have been treated previously (such as mechanically induced keratoses of the feet as well as various nail pathologies such as onychomycosis and nail dystrophy); thus, the emphasis of this rotation is not on the initial patient evaluation. However, patients presenting for care of an established problem do develop new concerns from time to time and the student should be prepared to elicit a pertinent history and perform a focused examination appropriate to their evaluation. Furthermore, since many of the patients seen in PM have systemic disorders such as diabetes mellitus, students are expected to evaluate them for pedal manifestations which may indicate worsening of the systemic disorder and refer patients to the appropriate physician for more extensive work-up and intervention. Students should also routinely survey patients for changes in pedal risk factors such as the appearance of neuropathy and the development of pre-ulcerative lesions. Students will gain extensive experience in the recognition and management of a variety of hyperkeratotic and nail pathologies and are expected to appreciate the contributions of biomechanical factors and underlying systemic conditions to these.

**Repeatability:** This course may be repeated for additional credit.

**PCED P440. Community Clerkship. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. This rotation will mimic a private practice setting.

**Repeatability:** This course may be repeated for additional credit.

**PCED P441. External Podiatric Clerkship I. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. This rotation will mimic a private practice setting.

**Repeatability:** This course may be repeated for additional credit.

**PCED P442. External Podiatric Clerkship II. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. This rotation will mimic a private practice setting.

**Repeatability:** This course may be repeated for additional credit.

**PCED P443. External Podiatric Clerkship III. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. This rotation will mimic a private practice setting.

**Repeatability:** This course may be repeated for additional credit.

**PCED P444. External Podiatric Clerkship IV. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. This rotation will mimic a private practice setting.

**Repeatability:** This course may be repeated for additional credit.

**PCED P446. External Podiatric Clerkship V. 4.5 Credit Hours.**

Students function as primary podiatric care providers under the supervision of the attending podiatric physician. This rotation will mimic a private practice setting.

**Repeatability:** This course may not be repeated for additional credits.

**PCED P447. External Podiatric Clerkship VI. 4.5 Credit Hours.**

Clerkship training is an integral and, therefore, required part of the curriculum of the fourth year student. The primary objective of the clerkship is to immerse the student in the highest quality educational experience possible. The following objectives are delineated for clerkship programs: 1. Provide comprehensive clinical exposure to the common problems of medicine and surgery. 2. Provide an environment in which the students can develop their clinical skills and diagnostic abilities. 3. Provide students, under attending supervision and as appropriate, an opportunity to increase their independence in treating patients. 4. Orient students to hospital-based acute care management. 5. Familiarize students with hospital operations and the role of podiatric medicine within this environment.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in PCED P441, PCED P442, PCED P443, PCED P444, and PCED P446.

**PCED P448. External Podiatric Clerkship VII. 4.5 Credit Hours.**

Clerkship training is an integral and, therefore, required part of the curriculum of the fourth year student. The primary objective of the clerkship is to immerse the student in the highest quality educational experience possible. The following objectives are delineated for clerkship programs: 1. Provide comprehensive clinical exposure to the common problems of medicine and surgery. 2. Provide an environment in which the students can develop their clinical skills and diagnostic abilities. 3. Provide students, under attending supervision and as appropriate, an opportunity to increase their independence in treating patients. 4. Orient students to hospital-based acute care management. 5. Familiarize students with hospital operations and the role of podiatric medicine within this environment.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in PCED P441, PCED P442, PCED P443, PCED P444, PCED P446, and PCED P447.

**PCED P449. External Podiatric Clerkship VIII. 4.5 Credit Hours.**

Clerkship training is an integral and, therefore, required part of the curriculum of the fourth year student. The primary objective of the clerkship is to immerse the student in the highest quality educational experience possible. The following objectives are delineated for clerkship programs: 1. Provide comprehensive clinical exposure to the common problems of medicine and surgery. 2. Provide an environment in which the students can develop their clinical skills and diagnostic abilities. 3. Provide students, under attending supervision and as appropriate, an opportunity to increase their independence in treating patients. 4. Orient students to hospital-based acute care management. 5. Familiarize students with hospital operations and the role of podiatric medicine within this environment.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in PCED P441, PCED P442, PCED P443, PCED P444, PCED P446, and PCED P447.

**PCED P495. Clinical Independent Study. 0 to 5 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

## Podiatric Interdepartmental (PDID)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PDID P390. Pod Path Lab Rotation. 0 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**PDID P391. Pod Pathology Lab. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDID P490. Pod Path Lab Rotation. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDID P491. Pod Pathology Lab. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## Podiatric Medicine (PDMD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PDMD P130. Fundmntl of Podiatric Pract I. 3.5 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P200. Fundmntl of Podiatric Pract II. 2.7 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P215. Internal Medicine. 3 Credit Hours.**

Internal Medicine is the study of the etiology, pathophysiology, clinical signs, symptoms and treatment of a wide variety of illnesses of the human body.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P230. Fundamentals of Dermatology. 2.2 Credit Hours.**

This is a course in the basic and clinical aspects of cutaneous medicine. The course provides a foundation that will enable the podiatry student to recognize and understand a number of diseases in which the skin is solely or largely the central focus of disturbance; it is also an introduction to much of medicine since the skin so often reflects internal disease.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P231. Princ of Primary Care. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P233. Physical Diagnosis. 2.5 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P234. Psychiatry. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P235. Radiology. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P236. Foot and Ankle Radiology. 2.6 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P237. Vascular Disease. 2 Credit Hours.**

Students will learn to appreciate normal physiology and the underlying pathophysiology of arterial, venous and lymphatic disease and to recognize and appropriately manage common vascular disorders with a focus on the lower extremities.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P239. Infectious Disease. 1 Credit Hour.**

This course is a comprehensive lecture series on Infectious Diseases emphasizing lower extremity and systemic pathologies and treatments. Students will develop: A. An understanding of the basic concepts of Infectious Diseases and how to apply them to podiatric medicine; B. The ability to recognize common bacterial, viral and fungal infections and the likely causative organism; C. An understanding of the clinical usage of antimicrobial agents, their selection and dosing for different infections, their toxicities when used for these infections, subtle differences between agents of a class; D. The ability to recognize the special case that is the diabetic foot infection and to understand the principles of proper treatment.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P330. Fundamentals of Dermatology. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P331. Clerkship Clinical Neurology. 4.5 Credit Hours.**

Clinical Clerkship.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P332. Clerkship Periph Vascular Dis. 4.5 Credit Hours.**

Clinical Clerkship.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P333. Peripheral Vascular Dis. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P334. Clerkship Internal Medicine. 4.5 Credit Hours.**

Clinical Clerkship.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P335. Internal Medicine. 4 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P336. Neurology. 1.6 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P338. Clerkship Infectious Disease. 4.5 Credit Hours.**

Clinical Clerkship.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P339. Infectious Disease. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P371. Summer Medicine Clinic. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P381. Medicine Clinic. 10 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P420. Clerkship Internal Medicine. 4.5 Credit Hours.**

Students are assigned to an inpatient general medicine service where they function as part of the treatment team. Wherever possible, TUSPM students are paired with third or fourth year medical students. In any event, an intern or resident closely supervises the clinical activities of the students. Students are exposed to the usual routine of hospital based patient care and the record keeping which is required. Students are also precepted in the work-up of patients. Attendance at all case conferences, team rounds, grand rounds, and didactic-activities are mandatory.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P421. Clerkship Clinical Neurology. 4.5 Credit Hours.**

Students are assigned to and function as members of a neurology consult service. Students follow patients in the hospital from initial consult through resolution. Outpatient experience is highly desirable and will be integrated into this rotation through assignments to outpatient clinic sessions whenever possible. Students are instructed in the performance of a complete neurological examination and its interpretation. Attention is paid to the ordering of special studies to confirm or rule out possible diagnoses (EMG, NCV, evoked potentials, and imaging studies). While students are exposed to a broad spectrum of neurological diseases, the primary emphasis is upon patients with lower extremity manifestations (which may be due to head injury, spinal trauma, CVA, Parkinsonian syndromes and other movement disorders), and on understanding the lower extremity manifestations of each pathology encountered.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P428. Clerkship Infectious Disease. 4.5 Credit Hours.**

Students are assigned to and function as members of a medical infectious disease consult service. Students follow patients in the hospital from initial consult through resolution. In this way, the students are expected to become familiar with a variety of infectious disorders and be alert to their development in future patients. Students are also expected to gain in depth knowledge of the pathogens encountered in lower extremity infections and the diagnosis and treatment of such infections. Attendance at all case conferences, team rounds, and other didactic activities are mandatory.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P445. Clerkship in Peripheral Vascular Disease. 4.5 Credit Hours.**

The vascular clerkship student will report to the vascular surgical resident on service or the vascular surgical fellow. The contact person will function essentially as a resident. Typical hours are from 6:00 a.m. to 8:00 p.m. with opportunities for patient examination, daily monitoring and redressing as well as surgical assistance.

**Repeatability:** This course may be repeated for additional credit.

**PDMD P471. Summer Medicine Clinic. 1.6 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P508. Diabetes/Wound Care. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDMD P509. Podiatric Radiology. 1.5 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

## Podiatric Orthopedics (PDOR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PDOR P140. Intro to Biomechanics. 3 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P142. Physical Medicine and Rehabilitation. 2 Credit Hours.**

The course in Physical Medicine and Rehabilitation describes the use of various physical therapeutic modalities in the treatment of podiatric medical patients. Patient evaluation, treatment plan development and proper progress reporting will be emphasized. Provide the student with an understanding of the role of physical medicine and rehabilitation and the profession of physical therapy in the treatment of the podiatric patient. Provide the student with knowledge of all physical modalities and procedures used in the treatment of disorders of the foot and ankle (emphasis will be placed on the most commonly used treatments with only brief mention of other related modalities). Students will understand the purpose and use of the modalities and procedures presented and be able to properly prescribe and administer them in the treatment of foot, ankle, and related disorders. Students will understand both indications and contraindications for each modality and procedure presented. Students will know the elements of a complete therapeutic treatment plan and be able to record patient progress including evaluation, progress notes, goal setting with rationale and discharge. SOAP format, short and long term goal setting and functional outcome reporting will be discussed.

**Class Restrictions:** Must be enrolled in one of the following Classes: First Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P240. Pathomechanics. 2 Credit Hours.**

The course reviews the single plane osseous deformities of the lower extremity and their effect on normal foot function. It also establishes all the normal criteria for foot function and the structures involved and how to alter abnormal foot function. Gait analysis including phasic activity of muscle is completely reviewed.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P241. Casting. 1 Credit Hour.**

Actual casting is demonstrated to the student for pathological traumatic conditions of the lower extremity. Students participate in the casting which provides a basic insight in the handling and application of casting.

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P242. Physical Med & Rehab. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P243. Clinic Foot Orthopedics. 1.8 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P244. Biomechanics Workshop. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P247. General Orthopedics. 2 Credit Hours.**

This course will provide a general overview of orthopedics above the ankle. Orthopedic pathologies including their clinical presentation, differential diagnosis, conservative and surgical management will be discussed. One lab session will be included covering physical examination of the knee, hip and lumbar spine.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P248. Sports Medicine. 2 Credit Hours.**

This course is concerned with the specific areas of sports and athletics and the relationship of lower extremity mechanics and function on those activities. It also concerns itself with injury in sports - mechanisms, types of injuries, treatment, and prevention. Students will learn: To explore the scope of sports practice, the ethics of the doctor-athlete relationship, and the legal liabilities of the sports physician; To identify, diagnose and treat common injuries of the foot, ankle and leg encountered in everyday practice; To understand the biomechanics of sports injuries and the use of treadmill and video analysis to examine and interpret the cause of injury in gait; To gain insight into athletic footwear and footwear prescription, and the use of foot orthoses in the treatment and prevention of sports injury; To understand the impact of nutrition and health lifestyles on the adolescent, adult, and geriatric athlete and to identify and screen physiopsychological aberrations such as eating disorders, substance abuse, "little league syndrome", and obsessive behaviors.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P340. General Orthopedics. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P341. Clrkshp Gen Orthopedics. 4.5 Credit Hours.**

Clinical Clerkship.

**Repeatability:** This course may be repeated for additional credit.

**PDOR P342. Pediatric Foot Orthopedics. 1.8 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P343. Sports Medicine. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P344. Orthotics & Prosthetics. 2.5 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P346. Traumatology. 1.75 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P372. Summer Orthopedics Clin. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P382. Orthopedics Clinic. 10 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P391. Casting. 1 Credit Hour.**

Actual casting is demonstrated to the student for pathological traumatic conditions of the lower extremity. Students participate in the casting which provides a basic insight in the handling and application of casting.

**Repeatability:** This course may not be repeated for additional credits.

**PDOR P410. Clerkship General Orthopedics. 4.5 Credit Hours.**

Podiatric medical students are responsible to the rotation intern, orthopedic resident(s), and the clinical orthopedic faculty for that particular orthopedic service. Podiatric medical students will be paired with a medical student for the duration of the rotation. This program is designed to have podiatric medical students become familiar with and experience orthopedic pathology to include diseases, fractures, soft tissue injuries, tumors, infections, neurological conditions, sports medicine injuries, etc.

**Repeatability:** This course may be repeated for additional credit.

**PDOR P472. Summer Orthopedics Clin. 1.6 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

## Podiatric Surgery (PDSR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PDSR P250. Principles of Podiatric Surgery I. 2.8 Credit Hours.**

This course will expose the podiatric medical student to various introductory aspects of foot surgery, such as charting and informed consent, wound healing, wound closure, bone healing, tendon, ligament, nerve healing, and repair, as well as various technical aspects of surgery, such as hemostatic techniques, dressing and a comprehensive overview of the principles and techniques of modern anesthesia.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P252. Principles of Podiatric Surgery II. 2.5 Credit Hours.**

A comprehensive one-semester, 4-hour-per-week course dealing with soft tissue and osseous pathology affecting the toes and lesser metatarsus. The structure and function of the forefoot will be discussed, and patient evaluation and preoperative management will be described. Emphasis will be placed on specific reconstructive surgical procedures, both historical and currently used, with detailed attention being paid to sound surgical principles, rationale for selection, step-by-step performance, and objective postoperative assessment. Following completion of this course, the student will be expected to have the didactic knowledge necessary for the development of a functional clinical and practical understanding of forefoot surgery. Basic surgical principles and a thorough knowledge of the surgical anatomy of the toes and lesser metatarsus will serve as the foundations for this clinical and practical understanding of forefoot surgery.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P253. O R Protocol. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P257. Podiatric Surgical Skills. 2.4 Credit Hours.**

This is a laboratory course that offers an overview of commonly performed podiatric surgical procedures and techniques. To allow the podiatric medical student hands-on experience in performing surgical procedures upon cadaver and demonstrating manual skill techniques common to first degree level podiatric practice.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P352. Princ First Ray Surgery. 2.6 Credit Hours.**

This course deals with the etiology, clinical, x-ray criteria and surgical approaches for the correction of hallux valgus deformity, hallux limitus deformity and related conditions. Content to be learned includes the clinical examination of patients with hallux abductus deformity together with the x-ray interpretation of hallux abductus deformity. Also covered is an overview of the most current procedures commonly used for correction of this deformity together with postoperative care and complications which can develop from surgical correction. The method of instruction used will be lectures aided by power point presentations. At the completion of this course, the student will be expected to clinically evaluate patients with 1st metatarsophalangeal joint deformity, evaluate the same patient with regard to x-ray criteria, logically formulate a treatment plan including surgical procedure and post-op management, and be able to describe surgical procedures used to correct 1st MPJ deformities and be familiar with possible complications of these procedures and their treatment.

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P353. Reconstruct Surgery Foot & Leg. 2.6 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P355. Podiatric Surgical Skills. 2 Credit Hours.**

This is a one-semester laboratory course that offers an overview of commonly performed podiatric surgical procedures and techniques. The course allows the podiatric medical student hands-on experience in performing surgical procedures upon a cadaver and demonstrating manual skill techniques common to first degree level podiatric practice.

**Class Restrictions:** Must be enrolled in one of the following Classes: Second Year Podiatry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Podiatric Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P356. Anesthesia. 2.5 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P383. Surgery Clinic. 10 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P473. Summer Surgery Clinic. 1.8 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P505. Cadaver Surgery. 2.5 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P506. First Ray Surgery. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**PDSR P507. Dig Met Surg Review. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

## Political Science (POLS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**POLS 8000. Topics in Research Design. 3 Credit Hours.**

Students learn how to formulate and justify research questions, situate their research within the scholarly literature, select cases, and address problems related to making causal inferences. An important focus of the course is on the similarities and differences between quantitative and qualitative research designs and their respective strengths and weaknesses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 8001. Political Statistics I. 3 Credit Hours.**

Required of all M.A. and Ph.D. students. Introductory applied social statistics. Topics covered include descriptive measures, elementary probability theory, hypothesis testing, and correlation and regression analysis. This course explores inductive statistics including: probability and sampling, multivariate contingency tables, analysis of variance, correlation and regression analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8002. Qualitative Research Methods. 3 Credit Hours.**

Required of all Ph.D. students. An examination of some of the major qualitative research approaches in political science -- case studies, comparative historical, institutional, community power studies, etc. The course aims to teach students the basic methods and reasoning procedures for doing advanced research in political science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in POLS 8001.

**POLS 8003. Political Statistics II. 3 Credit Hours.**

The course offers a thorough coverage of the basic linear regression model. Two-thirds of the class is devoted to the Ordinary Least Squares (OLS) method with a focus on estimation, hypothesis testing, and diagnosing threats to statistical inference. Cross-sectional, time-series, and panel data applications are covered. The remainder of the class introduces students to Maximum Likelihood estimators that address limitations to the OLS model.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** POLS 8001.

**POLS 8101. Government in American Society. 3 Credit Hours.**

An introduction to key theoretical and methodological approaches to the study of the major areas in American politics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8102. American Presidency. 3 Credit Hours.**

This course examines the state of Presidency research in political science. The American presidency is evaluated as an institution and as a position of political leadership.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8103. Legislative Behavior. 3 Credit Hours.**

Analysis and research on legislatures, legislators and the legislative process at national, state, and local levels. Focus on legislative decision-making.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8105. Public Law. 3 Credit Hours.**

A survey of the main political and legal factors affecting the development of the basic constitutional doctrines regarding judicial review, separation of powers, the presidency, foreign affairs, the basic delegated powers of Congress in the areas of regulation of commerce and taxation, and federalism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8106. Civil Rights and Liberties. 3 Credit Hours.**

A critical overview and exploration of the evolution, and various aspects of U.S. anti-discrimination laws and policies using court decisions as well as political and legal theories.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8107. Business Politics and Power. 3 Credit Hours.**

Course examines the role of business in politics. Includes a review some of the most important theoretical approaches that dominate the study of business political activity and its impact on policy outcomes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8108. American Party System. 3 Credit Hours.**

Examines political parties and party systems at the federal and state level, in both historical and contemporary contexts. What are political parties? Who forms them? This course focuses mostly on officeholders and activists to understand political parties in government and political parties as organizations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8109. Campaigns, Elections, and Media. 3 Credit Hours.**

The role of elections in contemporary American society. Special attention to parties and mass media as managers of campaigns. Factors affecting the voting behavior of the mass public and the link voting provides between the public and policy formation. The role of elections in contemporary American society. Factors affecting the voting behavior of the mass public and the link voting provides between the public and policy formation. Special attention also will be paid to the roles of political parties and mass media.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8112. Research in State Politics. 3 Credit Hours.**

This course introduces graduate students to the research investigating politics and governance in the American states. Seminar discussions will focus on identifying the questions motivating state politics research, comparing different methodological approaches, and discovering what questions remain unanswered. We also will consider how findings from state politics research might extend to other institutional settings. The goal of the seminar is to stimulate students to conduct their own state politics research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8113. Politics of Race and Class in America. 3 Credit Hours.**

Examines the intersection of race and class in American cities from theoretical and practical perspectives. Readings cover some of the major theories of race and urban poverty going from the "declining significance of race" proponents on the one hand to the "increasing significance of race" theorists on the other end of the spectrum. The course also examines how considerations of race and class have shaped key policy areas such as housing, education, and community development. Finally, the course examines the "new immigration" and its impact on class and race relations within urban areas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8114. Community Based Research. 3 Credit Hours.**

Engages students in community based research projects that are identified and developed by community-based organizations to address a particular program or policy need that they have encountered. Students work closely with these organizations as they carry out the research. Field-based research is supported by weekly seminar meetings that combine instruction in research methods with substantive examination of community development issues. Students share their experiences from the field during the seminar meetings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8120. Topics in Public Policy. 3 Credit Hours.**

Special topics course. Subject varies with instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 8121. National Public Policy. 3 Credit Hours.**

Focuses on the content or substance of contemporary U.S. public policy and developing agendas in several salient areas such as environmental protection, economic development, education, public assistance, drug abuse, and civil rights.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8122. Urban Public Policy. 3 Credit Hours.**

Explores key areas of urban public policy, such as housing, economic and community development, and education. Examines the political, social, institutional and cultural factors that shape the policy making context and ultimately the policies themselves. Interdisciplinary approach using readings from political science, sociology, economics, planning and social history. Covers major research conducted on policy areas and central debates surrounding them.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8124. Public Opinion. 3 Credit Hours.**

Survey of the broad field of public opinion research. Topics include: political sophistication, citizen competence, democratic responsiveness, political socialization, attitude formation, and the effects of mass media and political rhetoric.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8125. Theories of Policy Making. 3 Credit Hours.**

Considers various models of the policy process and policymaking, including those within group, systemic, rational, and institutional approaches. Empirical and normative perspectives are both addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8130. Topics in American Politics. 3 Credit Hours.**

Special topics course. Subject varies with instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 8201. Comparative Politics. 3 Credit Hours.**

A survey of core theories, methodological approaches and central issues in the comparative study of political systems throughout the world. Issues include state, class, party systems and interest groups, dependency, democracy and autocracy, reform and revolution, ethnic/nationalist conflict, and policymaking in industrial welfare states.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8202. Comparative Politics: Advanced Industrial Nations. 3 Credit Hours.**

Comparative analysis of political systems in Western Europe. Topics covered include the development of political parties and interest group politics, political economy, the welfare state, democratization/market liberalization in Eastern Europe, and European integration (EU). NOTE: This course was previously titled "Comparative Politics: Western Europe." Be advised that students can receive credit only once for POLS 8202.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8203. Comparative Politics: Developing Nations. 3 Credit Hours.**

What are the ideological, economic, and political processes that have created "First" and "Third" worlds? Is "underdevelopment" a consequence of the international system or are its sources home-grown? What are the connections between economic processes and political change? This course compares rational, structural, and cultural approaches to the study of development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8205. Russian and Eastern European Civilizations. 3 Credit Hours.**

This course will familiarize students with the political development and transition to democracy in Russia and former republics of the Soviet Union.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8212. Democratic Politics. 3 Credit Hours.**

Free and fair elections are democracy's defining feature. This course examines the politics surrounding democratic politics, focusing on organizations, institutions, and behavior. In terms of organizations, the course pays close attention to the principle protagonists in democratic elections: political parties. We will explore the origins of political parties in general as well as the conditions giving rise to certain types of political parties. In terms of institutions, the course considers the institutions that shape the selection of political leaders in a democracy and the allocation of power across those elected officials. In particular, we will attend to electoral rules, legislative-executive relations, and the vertical allocation of authority, identifying how democracies decide on these institutions as well as exploring the varied and often far-reaching impact that these institutions have on a wide range of political and economic outcomes. Finally, in terms of behavior, we will explore how mass publics engage with democracy, largely through their participation in elections. Throughout, we will consider the experiences of both longstanding and new democracies, evaluating to what extent theories and ideas travel across contexts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8213. Political Economy of Development. 3 Credit Hours.**

This graduate course exposes students to the major debates in the political economy of development on the origins and transformations of three key institutional fields: the state, market institutions, and the international economy. We read classic works in political economy on the philosophical underpinnings of the role of the state in development; and more recent works on the relationship between the state and market creation, evolution, and reform in the context of global integration. We also survey selected works on the political and economic development of the newly industrialized countries of East and Southeast Asia and Latin America; developing countries in South Asia and Africa; and post-Communism in China and Russia.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8214. Political Economy of Identity in the Global Era. 3 Credit Hours.**

This graduate course explores the conceptual and theoretical tools that have been brought to bear to investigate the role of identity and relationship between economics and identity in the context of globalization, particularly post-cold war developments. It exposes students to some of the major debates on conceptualizing and operationalizing the multidimensionality of identity; the context-specific issues that make identity an important factor to explore as both a cause and an effect in a globalizing economy; and existing research on what shapes identity and the impact of identity. We ask the following questions: Why study identity? How to study identity? What causes identity? How does identity matter? We encounter these questions via existing literature across subfields of political science, sociology, and history; different methodological lens; and substantive knowledge of empirical reality.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8215. Middle East and Islamic Politics. 3 Credit Hours.**

This course is a reading-intensive graduate seminar on the comparative politics of the Middle East, and the broader Islamic world including sub-Saharan Africa, Southeast Asia, and South Asia. It focuses upon the nature of both political regimes and mass societies in this diverse geographic crescent bound by Islamic heritage and identity, and engages the following lines of inquiry: first, the distribution of democracy versus dictatorship in Islamic countries; second, the rise of Islamic social movements in both peaceful and violent manifestations; third, the role of religion in shaping political institutions and behavior in these regions; and finally, transformative changes such as popular uprisings, economic breakthroughs, and gender equality. Assignments involve weekly response papers and a final research paper.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8216. The State in Comparative Politics. 3 Credit Hours.**

This course offers an in-depth assessment of the state. It begins with the definitional question, and explores different approaches to the state. We will then proceed to historical analysis of the rise of states in Europe and other world regions. The third component of the course explores the relationship between states and societies, focusing on cases from both Europe and other world regions. Finally, the course explores the extent of state weakness around the world, and explanations for variation in the strength and stability of states, closing with two recent broad attempts to rethink the state and our relationship to it. Readings range from theoretical social science to empirical work on a variety of specific cases, and from classics in the field to new work and non-academic accounts of particular countries and regions. The course will build toward the production of a significant research paper. Students are encouraged to use this paper to explore a set of issues relevant to their research interests. Prior completion of POLS 8201 (Comparative Politics) is strongly recommended.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8217. Democracy, Dictatorship, and Political Regimes. 3 Credit Hours.**

This course is a reading-intensive graduate seminar on the comparative politics of democratization and authoritarianism. It focuses upon political regimes in historical and comparative perspective, and immerses students in empirical scholarship and theoretical analysis to engage four core concerns: first, the origins of democracy, dictatorship, and hybrid regime types around the world; second, the trajectory and stability of different regimes in the modern era; third, the domestic and international causes of regime transitions, including institutional, economic, and systemic forces; and fourth, the key concepts and methodological strategies used in this field. The course draws upon countries and cases from across the world, including both West and non-Western regions, and incorporates comparative political work utilizing a variety of methodologies, including qualitative, quantitative, and formal approaches. Assignments involve regular analytical writing and original scholarship, encompassing a series of response papers throughout the term culminating in a final research paper.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8230. Topics in Comparative Politics. 3 Credit Hours.**

Special topics course. Subject varies with instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 8301. International Politics. 3 Credit Hours.**

A graduate-level introduction to theories of international politics, ranging from classical realism and liberalism through contemporary neorealist, institutionalist, constructivist and other approaches. Core course in the area.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8302. International Security. 3 Credit Hours.**

Graduate-level introduction to the study of international security, addressing a range of approaches to topics such as the causes of war, the balance of power, alliances, economic statecraft and sanctions, humanitarian intervention and peacekeeping, and terrorism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8303. International Political Economy. 3 Credit Hours.**

A graduate-level introduction to the history and theory of international political economy. Topics include: states and markets; power and wealth; economic statecraft; international economic organizations; economic development; and the nature of interstate conflict and cooperation in the global economic system.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8304. International Organizations. 3 Credit Hours.**

Advanced graduate seminar, which surveys the scholarly literature dealing with the role of international institutions and international organizations in world politics, and the prospects for global governance in various issue-areas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8305. US Foreign Policy. 3 Credit Hours.**

Graduate level introduction to the history and theory of American foreign policy. The seminar is arranged in three sections: the first offers a series of approaches to explaining American foreign policy, the second a survey of the past two-plus centuries of American foreign policy-making, and the last, a number of topics in contemporary foreign policy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8306. Foreign Policy Analysis. 3 Credit Hours.**

Graduate-level survey of foreign policy-making in comparative perspective. The course examines various theoretical accounts of the determinants of a state's foreign policy, including factors such as leadership, bureaucratic politics, perception and misperception, interest-group politics and public opinion, and survey the empirical literature on comparative public policy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8330. Topics in International Politics. 3 Credit Hours.**

Special topics course. Subject varies with instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 8401. Introduction to Political Theory. 3 Credit Hours.**

Introduction to the major conceptual issues in politics-- power, authority, equality, liberty, democracy, justice- through the reading of both classics in political thought and contemporary political theory. The course will also consider methodological issues in the social sciences and key topics in the philosophy of science and the philosophy of social science.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8403. Modern Political Philosophy. 3 Credit Hours.**

This course will be devoted to in-depth analyses of some of the formative works of modern political theory and practice that have helped to shape not only modern politics but modern cultural and psychological sensibility as well. The primary theorists that we will be analyzing are Machiavelli, Hobbes, Locke, Rousseau, Hegel, Marx, Nietzsche, and Freud, as well as some contemporary political philosophers. Texts and authors covered in this seminar will go beyond the materials covered in the Core Seminar in Political Theory.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8404. Contemporary Political Theory. 3 Credit Hours.**

Examines the rise of modern social theory (Hegel, Marx, Weber, Durkheim, Freud) as a response to the emergence of increasingly rationalized, class-stratified and bureaucratized industrial societies. Issues addressed include the relationship of the individual to society; the relationship between socio-economic and political power; the difficulty of establishing moral meaning in increasingly bureaucratic and routinized societies. The course will also examine post-modern theorists (e.g. Foucault, Derrida, Lyotard) who contend that modern social theory's anachronistic hypothesis of rational, industrial societies cannot adequately explain post-modern, commodified societies increasingly "decentered" by differences of culture, race, and gender. NOTE: This course was previously titled "19th and 20th Century Political and Social Thought." Students can receive credit only one time for POLS 8404.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8405. Theories of Democracy. 3 Credit Hours.**

Considers the defenses, criticisms, and varieties of democracy in both the American and worldwide settings. Examines the relationship between liberalism and democracy, as well as communitarian, conservative and radical critiques of liberal pluralism. Questions explored include: Can minority rights be guaranteed in a majoritarian democratic system? What are the cultural and socioeconomic prerequisites for a democratic society? Does the distribution of power in America today conform to the norms of a democratic society? NOTE: This course was previously titled "Contemporary Theories of Democracy." Please be advised that students will receive credit only once for POLS 8405.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 8430. Problems in Political Philosophy. 3 Credit Hours.**

An examination of some central themes and issues in political philosophy conducted through the study of one or more major works of political philosophy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 8440. Special Topics in Political Philosophy. 3 Credit Hours.**

Special topics course. Subject varies with instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 8601. Teaching Methods. 1 Credit Hour.**

Required of all M.A. and Ph.D. students wishing to be considered for financial aid. This course is to be offered once each year. No student will be awarded financial assistance for a second year without having successfully completed this course. This course is conducted on a Pass-Fail basis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**POLS 9083. Directed Study and Research I. 1 to 3 Credit Hour.**

Fall credit for special study/research with a professor outside of a regularly scheduled course. A letter grade of A, B, C, or F is awarded. A student may register for this course only with the advance approval of the pertinent faculty member and the Graduate Chair.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 9183. Directed Study and Research II. 1 to 3 Credit Hour.**

Spring credit for special study/research with a professor outside of a regularly scheduled course. A letter grade of A, B, C, or F is awarded. A student may register for this course only with the advance approval of the pertinent faculty member and the Graduate Chair.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 9283. Directed Study and Research III. 1 to 3 Credit Hour.**

First summer session credit for special study/research with a professor outside of a regularly scheduled course. A letter grade of A, B, C, or F is awarded. A student may register for this course only with the advance approval of the pertinent faculty member and the Graduate Chair.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

The purpose of such credit is to assure continuous enrollment as required by the University while one is preparing for M.A. or Ph.D. comprehensive or Preliminary examinations. A grade of "R" is awarded the student by the Graduate Chair or other faculty designated by the Chair of the Department. The semester in which the Preliminary exams are passed, a grade other than "R" is awarded.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Three credits are required in the initial semester following the Preliminary Examinations while the Ph.D. student prepares the dissertation prospectus through a reading course with their primary dissertation supervisor. During subsequent semesters, if not yet advanced to candidacy, students continue to enroll in the 1-credit option in order to assure continuous enrollment as required by the university. Students must participate in the seminar until they execute a completed dissertation proposal. A grade of "R" is awarded until the student passes the prospectus defense. At the semester of passing the prospectus, the grade of "Pass" will be awarded to only that semester's 9998.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**POLS 9999. Dissertation Research. 1 to 3 Credit Hour.**

Dissertation Research credit maintains the continuous enrollment as required by the University after a student has passed the Ph.D. comprehensive exam and prospectus defense. This is the minimum credit required each semester after the proposal defense and while the student is researching and writing the dissertation. A minimum of 6 s.h. of POLS 9999 must be completed before defending the Ph.D. dissertation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Portuguese (PORT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PORT 5000. Special Topics in Portuguese. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PORT 5101. Brazilian Short Story. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PORT 5102. Contemporary Portuguese and Brazilian Literature. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Psychiatry & Behavioral Science (PSYM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PSYM M162. Addiction Medicine. 0 Credit Hours.****Course Attributes:** M5**Repeatability:** This course may not be repeated for additional credits.**PSYM M165. Intro to C&L Psychiatry. 0 Credit Hours.****Course Attributes:** M5**Repeatability:** This course may not be repeated for additional credits.**PSYM M242. Interv the Ill & Dying. 0 Credit Hours.****Course Attributes:** M5**Repeatability:** This course may not be repeated for additional credits.**PSYM M243. Intro to Child Psychiatry. 0 Credit Hours.****Course Attributes:** M5**Repeatability:** This course may not be repeated for additional credits.**PSYM M251. Rel/Spirit Clin Practice. 0 Credit Hours.****Course Attributes:** M2**Repeatability:** This course may not be repeated for additional credits.**PSYM M266. Psychiatry: A Narrative Pursuit. 0 Credit Hours.**

The objective of this course is to expose students to the experience of mental illness through various narratives. Psychiatry as a discipline has a unique relationship with language and story telling. The psychiatric exam itself relies almost solely on the narrative that exists between physician and patient; in addition, psychiatric illness can be seen as a narrative that is both intrinsic and extrinsic to the mind of the affected person. This course will review a myriad of different texts in order to gain a view into the nuances of mental illness, as well as into the extraordinary relationship between patient and doctor of the mind. The goal of the course is to build narrative competence such that students will be better situated to approach the care of patients living with mental illness. By the end of the course, students will understand how narrative competence can inform psychiatric practice, and how narrative medicine can enhance physician empathy toward these patients who are often misunderstood. Using techniques such as close reading and textual analysis, this course will explore relationships between mental illness, patient, and caregiver. Following discussion of a text, students will be asked to participate in unstructured writing; the intent of this exercise is to encourage students to make a connection between readings and their own experience, as humans, and as physicians-in-training. Sharing of personal stories, as written or spoken narratives, will allow students to broaden their concept of what it means to be a psychiatrist in a multicultural world.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Medicine.**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Medicine.**Repeatability:** This course may not be repeated for additional credits.**PSYM M300. Career Exploration of Psychiatry Consultation-Liaison. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.**PSYM M340. Psychiatry. 0 Credit Hours.****Course Attributes:** M7**Repeatability:** This course may not be repeated for additional credits.**PSYM M372. Career Exploration of Child Psychiatry. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.**PSYM M700. General Psychiatry. 0 Credit Hours.****Course Attributes:** M2**PSYM M701. General Psychiatry/Outpatient. 0 Credit Hours.****Course Attributes:** M2

**PSYM M702. Child and Adolescent Psychiatry. 0 Credit Hours.**

The purpose of this elective is to provide fourth-year medical students experience with psychiatric disorders in children and adolescents. Students will gain exposure, during the one month of child psychiatry, to the diagnosis, treatment, and management of behavioral, psychotic and mood disorders, anxiety, trauma, PTSD, ADHD, and autism. They will also become familiar with age-appropriate psychiatric history-taking in children and adolescents and normal developmental stages and milestones. They will also learn to recognize broad patterns of developmental disease and propose treatment of common childhood psychiatric disorders. Students will also have the opportunity to participate in family meetings to review assessment, diagnosis, and treatment.

**Repeatability:** This course may not be repeated for additional credits.

**PSYM M707. C & L Psychiatry. 0 Credit Hours.**

**Course Attributes:** M2

**PSYM M711. Emergency Psychiatry. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**PSYM M713. Addiction Psychiatry Elective. 0 Credit Hours.**

There is a critical need for medical students to be exposed to the diagnosis and treatment of co-occurring addiction and mental and emotional illnesses. Addiction Psychiatry is a 4th year elective designed to expose medical students to the diagnosis and treatment of substance abuse disorders. Students will be paired with faculty treating patients for substance abuse in both the inpatient and outpatient settings. Students will be exposed to treating patients for withdrawal in the acute care setting and outpatient maintenance care. The importance of transitional care will be highlighted with particular attention to socioeconomic challenges experienced by patients with drug dependence.

**Repeatability:** This course may be repeated for additional credit.

**PSYM M719. Geriatric Psychiatry. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**PSYM M735. Eating Disorder. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**PSYM M736. Substance Abuse. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**PSYM M890. Psychiatry Subinternship. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may be repeated for additional credit.

## Psychology (PSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PSY 5003. Advanced Statistics. 3 Credit Hours.**

This course is primarily meant to prepare master's-level psychology students to conduct statistical analyses on data related to their research, and to prepare them for more advanced courses, such as multivariate statistics (PSY 8031). Topics will include linear regression, repeated-measures ANOVA, multi-factorial ANOVA, and several nonparametric alternatives to "standard" inferential tests. In addition to significance testing, this course will focus on the measurement and interpretation of effect size and power. Students will also learn how to perform data analysis using the SPSS statistical software package.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 5100. Topics: Brain, Behavior and Cognition. 3 Credit Hours.**

This graduate course is to be offered for graduate students interested in the topical course designated PSY 3100 but wish to work with the instructor to earn graduate credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 5103. Learning and Behavior Analysis. 3 Credit Hours.**

A systematic introduction to the principles of behavior analysis with emphasis on their application as well as their origins in basic research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 5104. Ethics and Ethical Conflicts in Psychological Science. 3 Credit Hours.**

Psychologists are bound by an official code of conduct that includes general ethical principles, as well as specific enforceable standards for ethical conduct in research, education and training, public service, and clinical practice. This course will use a case study approach with fine-grained analyses of ethical conflicts to learn and understand the ethical standards set forth in the American Psychological Association's *Ethical Principles of Psychologists and Code of Conduct* (APA, 2010). We will consider both historical and recent cases of ethical misconduct in research, the concept of evidence-based treatment, and newly emerging ethical dilemmas in the field of cognitive neuroscience and imaging. Case studies and discussions will include ethical conduct relevant for graduate students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in PSY 5791 and PSY 5891.

**PSY 5791. Master's Directed Research I. 1 to 4 Credit Hour.**

This course is open to students in the first year of the Master of Science in Psychological Research program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 5891. Master's Directed Research II. 1 to 4 Credit Hour.**

This course is open to students in the first year of the Master of Science in Psychological Research program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8005. Affective Neuroscience. 3 Credit Hours.**

The brain is not just a thinking machine; it is also a feeling machine. This course explores the neural substrates behind emotions such as love, trust, fear, and pleasure. We will also discuss the relationship between emotions and cognition, the effect of emotions on animal and human behavior, and the biological basis of affective disorders such as anxiety and depression.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8011. Graduate Statistics I. 3 Credit Hours.**

Review of hypothesis-testing methods for means, variances, correlations, and proportions. One-way ANOVA for completely randomized, blocked, and repeated measure designs. Planned and post hoc multiple comparisons.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8015. Teaching of Psychology. 0 to 1 Credit Hours.**

Required of all graduate teaching assistants during their first semester of teaching. Designed to assist and prepare them for their teaching duties. Supervision and feedback are used to promote effective communication and teaching skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**PSY 8016. Professional Development Seminar. 2 Credit Hours.**

This course is taken concurrently with PSY 8015, the Professional Development Seminar Series (PDS). The course will provide in-depth coverage of issues introduced at PDS seminars and roundtables, along with supporting activities and discussions relevant to students working towards the MS degree in Psychological Research. Students engage in structured written exercises that reinforce necessary professional skills, including preparation of CVs, abstracts for conference presentations, peer review of manuscripts, and grant writing. The major project in this course will be preparation of a draft for a National Science Foundation Graduate Research Fellowship application.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Co-requisites:** PSY 8015.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in PSY 5003, PSY 5791, and PSY 5891.

**PSY 8017. Professional Issues for Psychology Careers. 0 or 1 Credit Hours.**

This course provides first-year Psychology PhD students and 4+1 Psychology students in their Masters year with an introduction to graduate school and to the profession of psychology. It comprises the first half of a one-year sequence in professional development. The full sequence includes this course each Fall and Teaching of Psychology (PSY 8015) that is offered each Spring semester. These courses are designed to provide graduate students with information that most faculty have learned only through direct (and not always successful!) experiences. Academic psychology has both explicit and implicit (i.e., tacit) knowledge and rules that underlie the success of individuals in the system. The formalized rules and knowledge are available and relatively easy to acquire; the tacit knowledge is harder to discern and, thus, to acquire. Graduate advisors mentor students to prepare them for successful postgraduate careers, and each program in the department emphasizes the development of particular skills. However, some topics are better addressed through a class environment. By helping to demystify the academic path, this course will place the preparation for successful post-graduate careers at the beginning, rather than the end, of our graduate program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8021. Graduate Statistics II. 3 Credit Hours.**

Multiway ANOVA for completely randomized and repeated measures, nested designs, covariance designs. Simple effects and planned and post hoc comparisons. Use of available statistical computer programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in PSY 8011.

**PSY 8031. Survey of Multivariate Techniques. 3 Credit Hours.**

Beginning with bivariate correlation and regression, generalizations are made, through the aid of matrix algebra, to multiple regression and correlation. Multivariate techniques also include principal components, canonical correlation, and multivariate analysis of variance use of available statistical programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** PSY 8011.

**PSY 8032. Structural Equation Modeling. 3 Credit Hours.**

This graduate course overviews the application of structural equation modeling to various analysis problems confronted throughout the social, behavioral, and health sciences. Topics will include confirmatory factor analysis, measurement and structural models, path analysis, mediation, latent growth modeling, assessing model fit, and implementation of methods in statistical software.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** PSY 8021.

**PSY 8033. Hierarchical Linear Modeling. 3 Credit Hours.**

Usually, this takes the form of individuals nested in bounded social organizations (e.g., students nested in schools or residents nested in neighborhoods), speaking to issues of social influence that the social sciences endeavor to address. This course will introduce students to HLM techniques, with a focus on practical applications of HLM. The course will focus on HLM applications to single continuous outcomes—analyzing the effects of context on individual outcomes and analyzing longitudinal data. HLM for binary outcomes and multivariate situations (multiple dependent variables) and (time allowing) HLM for cross-nested designs will also be covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** PSY 8021.

**PSY 8110. Topical Seminars in Experimental Psychology. 3 Credit Hours.**

Examination of different topics within experimental psychology, varied from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8310. Topical Seminar in Cognitive Psychology. 3 Credit Hours.**

Topics vary from semester to semester. Students may repeat this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8312. Core Course in Cognitive Psychology. 3 Credit Hours.**

Review of theory and research in the areas of memory, language, and thinking.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8410. Multicultural Issues in Clinical Psychology. 3 Credit Hours.**

Topics such as depression, sexuality, neuropsychology, death and dying, stress, impulsivity, specialized treatment approaches, and others are varied from semester to semester according to programmatic needs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8411. Cognitive-Behavioral Therapies. 3 Credit Hours.**

Surveys cognitive-behavioral approaches to the treatment of the major classes of mental, behavioral and emotional disorders. Emphasis is placed on cognitive-behavioral models and case formulation as well as empirical evaluation of the relevant cognitive-behavioral treatment outcome literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8412. Core Course in Psychopathology. 3 Credit Hours.**

The course will review concepts, theory, and research in psychopathology. Behavioral, cognitive, interpersonal, psychodynamic, sociocultural, genetic, and biological/neuroscience aspects of psychopathology will be covered as appropriate, depending on the disorder. The course will emphasize descriptive psychopathology (e.g. phenomenology, epidemiology, course of disorder) and issues of etiology, rather than treatment, although some work on treatment will also be discussed. The major goals of the course are knowledge of the nature of various mental disorders and what is known about their causes and risk factors, an appreciation of important issues in psychopathology, and development of the ability to think clearly and critically about these issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8413. Psychological Assessment I. 3 Credit Hours.**

A year-long course; surveys concepts of intelligence and teaches the administration, scoring, and interpretation of individually administered tests. The evaluation of learning disabilities and neuropsychological disorders is also covered. Surveys the diagnostic system of mental disorders. Teaches the administration, scoring, and interpretation of projective tests and other procedures used to identify and understand clinical dynamics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8420. Topical Seminars in Clinical Psychology. 3 Credit Hours.**

Topics such as depression, sexuality, neuropsychology, death and dying, stress, impulsivity, specialized treatment approaches, and others are varied from semester to semester according to programmatic needs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8423. Psychological Assessment II. 3 Credit Hours.**

A year-long course; surveys concepts of intelligence and teaches the administration, scoring, and interpretation of individually administered tests. The evaluation of learning disabilities and neuropsychological disorders is also covered. Surveys the diagnostic system of mental disorders. Teaches the administration, scoring, and interpretation of projective tests and other procedures used to identify and understand clinical dynamics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8430. Topical Seminars in Clinical Psychology IV. 3 Credit Hours.**

Topics such as depression, sexuality, neuropsychology, death and dying, stress, impulsivity, specialized treatment approaches, and others are varied from semester to semester according to programmatic needs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8433. Clinical Psychology: Scientific and Professional Dimensions. 3 Credit Hours.**

History, ethics, research and service methodologies, psychometrics, and topical discussions pertinent to the relationships between psychological science and the practice of clinical psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8481. Social, Cognitive, and Developmental Aspects of Behavior. 3 Credit Hours.**

This is a general graduate level survey course that will include three 5-week evaluated education experiences (EEE's) focusing on each of (a) social aspects of behavior (b) cognitive aspects of behavior and (c) developmental aspects of behavior. The social EEE will include topics such as group processes, attributions, discrimination and attitudes. The developmental EEE will include topics such as transitions, growth, and development across an individual's life. The cognitive EEE will include topics such as learning, memory, thought processes, and decision-making. As a part of each EEE, students will be assigned primary readings of classic articles in the area as well as recent research findings. This course is designed to meet the American Psychological Association requirements for discipline specific knowledge in social, cognitive, and developmental aspects of behavior.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8510. Topical Seminar in Developmental Psychology I to IV. 3 Credit Hours.**

In different semesters these courses focus on topics such as aging, adolescence, infancy, language development, learning and memory development, perceptual development, and theories of development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8512. Core Course in Developmental Psychology. 3 Credit Hours.**

Consideration of theories and related research on human development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8610. Topical Seminar in Organizational-Social. 3 Credit Hours.**

Topics selected depend on the current emphasis in the field and interests of the students. A student may repeat this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 8612. Core Course in Social Psychology. 3 Credit Hours.**

A survey of theoretical foundations and the substantive and methodological issues of social psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 8712. Core Course in Behavioral Neuroscience. 3 Credit Hours.**

An examination of brain-behavior relationships in the context of evolution.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 9187. Clinical Practicum. 3 Credit Hours.**

Under the auspices of the Psychological Services Center, students work with a different faculty member for each of four semesters. Each semester will emphasize either a different client population or a different orientation to the assessment and treatment of child, family, and adult disorders. Faculty assignments and the focus of group supervision vary from semester to semester.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Psychology, Psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9283. Readings in Psychology. 1 to 3 Credit Hour.**

A post-master's advanced tutorial course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9287. Clinical Practicum. 3 Credit Hours.**

Under the auspices of the Psychological Services Center, students work with a different faculty member for each of four semesters. Each semester will emphasize either a different client population or a different orientation to the assessment and treatment of child, family, and adult disorders. Faculty assignments and the focus of group supervision vary from semester to semester.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Psychology, Psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9387. Clinical Practicum. 3 Credit Hours.**

Under the auspices of the Psychological Services Center, students work with a different faculty member for each of four semesters. Each semester will emphasize either a different client population or a different orientation to the assessment and treatment of child, family, and adult disorders. Faculty assignments and the focus of group supervision vary from semester to semester.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Psychology, Psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9411. Clinical Research Methodology. 3 Credit Hours.**

Focuses on design issues and major methodological problems in research on such topics as psychotherapy outcome, characteristics of diagnostic groups, and stress in families. Particular attention is given to internal and external validity threats, advantages and disadvantages of assessment methods, principles of test construction, challenges and alternatives to traditional research methods, single subject designs, and approaches to integrating clinical research and practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PSY 9485. Ph.D. Internship Course. 1 to 6 Credit Hour.**

For clinical students only who are on internship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9487. Clinical Practicum. 3 Credit Hours.**

Under the auspices of the Psychological Services Center, students work with a different faculty member for each of four semesters. Each semester will emphasize either a different client population or a different orientation to the assessment and treatment of child, family, and adult disorders. Faculty assignments and the focus of group supervision vary from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9587. Clinical Practicum. 3 Credit Hours.**

Under the auspices of the Psychological Services Center, students work with a different faculty member for each of four semesters. Each semester will emphasize either a different client population or a different orientation to the assessment and treatment of child, family, and adult disorders. Faculty assignments and the focus of group supervision vary from semester to semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9987. Assessment Practicum. 3 Credit Hours.**

The assessment practicum is designed to provide clinical students in-depth training in comprehensive psychological/neuropsychological assessment. Under the auspices of the Psychological Services Center, students work with a faculty member who is a licensed psychologist for two semesters conducting psychological assessments. Integration of test results and other sources of information (e.g., interview, medical history, informant reports, etc.) will be emphasized. Additionally, the assessment practicum will focus on generating recommendations based on the psychological/neuropsychological assessment and communicating results to clients and referral sources.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in PSY 8413 and PSY 8423.

**PSY 9991. Research. 1 to 6 Credit Hour.**

Intended to meet the needs of students who desire to carry on an individual investigation while working for the master's degree.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

Preparation for the preliminary examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Independent research for the dissertation proposal. Registration each semester required until approval and elevation to candidacy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PSY 9999. Ph.D. Dissertation Research. 1 to 6 Credit Hour.**

After passing the preliminary examinations and having an approved proposal, Ph.D. students must register each semester for this course until the completion of the dissertation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Public Policy (PLCY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**PLCY 5000. Topics in Non-Profit Management. 3 Credit Hours.**

Special topics related to the management, finances, funding, activities and/or impacts of nonprofit organizations. Specific topic varies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PLCY 5001. Non-Profit Organization and Management. 3 Credit Hours.**

The course focuses on the organizational features, management, and evaluation of non-profit organizations. It is primarily for individuals who currently work in or with non-profit organizations or who may be interested in employment within them. To help prepare these practitioners, the course focuses less upon the development of theory and purely academic topics and more on the application of theory and the real-world goals, challenges and behavior of non-profit organizations. At the same time, the course offers a broad perspective on how non-profits are established, managed and evaluated that goes beyond merely describing their nuts-and-bolts operations. Ph.D. students and others with an academic interest in non-profit organizations will gain an in-depth understanding of why these organizations exist and how they behave.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PLCY 5002. Non-Profit Fundraising. 3 Credit Hours.**

Fundraising is a crucial element of leading and managing non-profit organizations. Most non-profits do not have readily available sources of revenue built into the logic of their organization (such as the power to tax in the case of public sector organizations and the profit motive in the case of business enterprises). Therefore, teaching students how to locate, attract and cultivate donors and how to acquire and manage financial resources is of the utmost practical value. This course covers the fundraising process from start to finish, beginning with identifying potential donors and ending with evaluating a fundraising campaign.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PLCY 5001 (may be taken concurrently)

**PLCY 5003. Financial Management for Non-Profit Organizations. 3 Credit Hours.**

Managing finances is an essential skill of nonprofit managers because their organizations cannot attain most of their goals without remaining in sound financial health. This course provides a foundation in nonprofit finance and accounting concepts and techniques. It highlights the similarities and differences along a variety of dimensions between nonprofits and for-profit and public sector organizations. The specific topics covered include: distinguishing among different kinds of budgets, budgetary planning and making spending and revenue projections, cash flow management, endowment management, capital financing, expenditure control and audits, how to read different financial statements and reports.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PLCY 5001 (may be taken concurrently)

**PLCY 5004. Leadership in Public Sector and Non-Profit Organizations. 3 Credit Hours.**

This course focuses on the tasks of leadership in public sector and nonprofit organizations, leadership behavior and how leaders succeed or fail to promote the mission and goals of their organizations. Among the topics covered are types of leaders, the constraints of organizational context and culture on leaders' influence, decision-making processes and practices that help to avoid mistakes, developing organizational priorities and strategies, building effective teams, handling ethical quandaries, and how to measure leaders' effectiveness.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in PLCY 5001 (may be taken concurrently)

**PLCY 5085. Internship in Public Policy. 3 Credit Hours.**

Students in the MPP program must serve in an approved internship of approximately 16 hours per week during the fall or spring semester (or approximately 32 hours per week during a summer session). Students earn 3 credits for paid and unpaid internships. The internship may be in a federal, state or local agency in the executive or legislative branches of government or in a private or non-profit firm that works closely with such an agency to fulfill the agency's mission.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Public Policy.

**College Restrictions:** Must be enrolled in one of the following Colleges: Liberal Arts.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of C in (PLCY 8119 (may be taken concurrently) or POLS 8119 (may be taken concurrently)) and (PLCY 8123 (may be taken concurrently) or POLS 8123 (may be taken concurrently))

**PLCY 8001. Statistics for Public Policy. 3 Credit Hours.**

Introductory applied social statistics for public policy. Topics covered include descriptive measures, elementary probability theory, hypothesis testing, and correlation and regression analysis. This course explores inductive statistics including: probability and sampling, multivariate contingency tables, analysis of variance, correlation and regression analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PLCY 8118. The Policy-Making Process. 3 Credit Hours.**

This course explores the process through which federal and state governments in the United States formulate and implement public policies. Major political and institutional actors that influence policy-making are covered, including public opinion, interest groups, legislatures, bureaucracies and chief executives, and courts. The course covers how problems are recognized and get "framed" by advocates and policymakers and how they reach the agenda, how alternatives are formulated and adopted, the implementation and evaluation of policies and programs, and how the performance and structure of existing policies feed back into the process as policies undergo expansion, revision or termination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Liberal Arts.

**Repeatability:** This course may not be repeated for additional credits.

**PLCY 8119. Policy Analysis. 3 Credit Hours.**

This course is an introduction to policy analysis for MPP students. Policy analysis involves collecting and analyzing information pertinent to public policy issues and solutions and communicating them clearly to a client, which is usually a policymaker or administrator of a program. Policymakers need analyses that clearly define and describe the nature and severity of an issue, assess the feasibility and estimate the costs and benefits of alternative solutions for addressing them, and (often) recommend one or more courses of action over others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Liberal Arts.

**Repeatability:** This course may not be repeated for additional credits.

**PLCY 8120. Topics in Public Policy. 3 Credit Hours.**

Explores in-depth a particular public policy issue area (such as education, health, public finance, etc.) or a thematic topic (such as leadership and public policy, ethics and public policy, etc.). Topic(s) covered varies with instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**PLCY 8123. Bureaucracy and Public Management. 3 Credit Hours.**

Bureaucracies and the public managers who inhabit them are of critical importance for the formulation, implementation and evaluation of public policies. This course provides students with an overview of bureaucratic agencies as key actors who shape public policy and performance. One focus of the course is how the institutional features of bureaucracies as large, complex organizations and of the broader political system in which they operate shape agencies' behavior. The other major focus is on how the leaders, managers and staff work together to shape bureaucratic cultures, missions and operating procedures and how these, in turn, determine whether the agency is capable of carrying out policies effectively and in accord with legislative mandates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PLCY 8127. Public Policy Project. 3 Credit Hours.**

A semester-length project that students take in their last semester in the MPP program. They produce an original, full-length policy analysis for a client. Students attend a weekly seminar to report on their progress at each stage in the development of their policy analysis, receive feedback from other seminar participants, and provide advice to other students in the seminar.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Public Policy.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in POLS 8001 and (PLCY 8119 or POLS 8119)

**PLCY 8128. State and Local Budgeting. 3 Credit Hours.**

Examines the economic and political aspects of the budgetary process in government, particularly at the state and local levels. Topics covered include the major sources and types of revenue, discretionary and non-discretionary spending, managing deficits and debt, forecasting fiscal conditions, capital budgeting, pension management, and other issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**PLCY 8131. Innovation in Government. 3 Credit Hours.**

Innovation is considered a critical component of both private industry and the academic research community, but the concept is also highly relevant for government. While its outcomes may look differently in a government setting and focus more on efficiencies and social benefit rather than new products or services, innovation remains a critical part of any successful government. Without setting the stage for innovation and purposefully managing it, government lacks capacity for improving constituent services, engaging purposefully with its neighborhoods and residents, and developing more efficient and cost-effective internal processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (PLCY 8118 (may be taken concurrently) or PLCY 8123 (may be taken concurrently))

## Radiation Oncology (RAON)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**RAON M167. Intro to Clinical Oncology. 0 Credit Hours.**

This didactic course will provide an overview of major concepts of caring for a patient with malignant disease. Physicians from Temple University Hospital Cancer Center will discuss diagnosis, staging, role of treatment modalities including surgery, chemotherapy, radiotherapy and interventional radiology, supportive care and long term follow up for a cancer patient.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Medicine.

**Repeatability:** This course may be repeated for additional credit.

**RAON M168. Intro/Radiation Oncology. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**RAON M300. Career Exploration of Radiation Oncology. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**RAON M730. Radiation Oncology. 0 Credit Hours.**

## Radiology (RADI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**RADI M101. Introductory Elective. 0 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**RADI M137. New Diag Imaging Techn.. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**RADI M140. Intro to Diag Imaging. 0 Credit Hours.**

**Course Attributes:** M4

**Repeatability:** This course may not be repeated for additional credits.

**RADI M234. Intro to Nuclear Med.. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**RADI M300. Career Exploration of Radiology. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**RADI M302. Career Exploration of Vascular and Interventional Radiology. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**RADI M553. Clin Thoracic Imaging. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**RADI M596. Nuclear Medicine. 0 Credit Hours.**

**Course Attributes:** M2

**RADI M599. Neuroradiology Elective. 0 Credit Hours.**

This is a four-week elective rotation for fourth year medical students. The student will predominantly spend time in the neuroradiology reading room, and work one-on-one with the attendings and residents on service. The student is expected to participate in reading studies during the elective. When not directly participating in reading a study, the student is encouraged to observe the resident or attending reading studies. During the first morning of the rotation, the student will be oriented by the course director (or another attending) to the mechanics of the section. Students are expected to review studies, read patient history in electronic medical records, and present the case to the attending. Students are asked to be on service by 7:30 AM.

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**RADI M718. Abdominal Imaging. 0 Credit Hours.**

This course provides students an opportunity to directly observe and participate in day to day medical practice in the radiology reading room with faculty and residents in the abdominal imaging department. Major modalities include x-ray and fluoroscopy of the GI/GU tract, CT of the abdomen and pelvis, ultrasound, and MRI of the abdomen and pelvis. Students will be exposed to a wide range of pathology and should gain a reasonable understanding of the workflow and challenges faced in abdominal imaging. This course should aid in future practice of students pursuing the fields of radiology, surgery, internal medicine, urology, obstetrics/gynecology, pathology and emergency medicine.

**Repeatability:** This course may be repeated for additional credit.

**RADI M720. Radiology. 0 Credit Hours.**

**Course Attributes:** M2

**RADI M722. Interventional Radiology. 0 Credit Hours.**

**Course Attributes:** M2

**RADI M729. Pediatric Radiology. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**RADI M737. Diag Imag in Rad Onc. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**RADI M749. Musculoskeletal Radiology. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

## Real Estate (RE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**RE 5101. Real Estate Finance and Capital Markets. 3 Credit Hours.**

This course is the gateway to the other courses in the MSRE program, by providing the fundamental building blocks of knowledge and technical skills needed to understand the finance of real estate. Concepts and applications will include time value of money, discounted cash flow analysis and investment forecasting and returns. Using a live case study format, we use an actual real estate investment to apply the knowledge. Students will prepare a Discounted Cash Flow analysis to report both an unleveraged and leveraged returns analysis and joint venture returns. In addition to the learning outcomes students complete a working financial model that is then used for future courses in the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RE 5102. Enterprise Real Estate Asset Optimization. 3 Credit Hours.**

Public and private enterprises in the United States control \$40 trillion of real estate assets and most are not in the real estate business. An enterprise's real estate assets are either the first or second largest balance sheet item and operating expense. Despite this reality, public and private enterprises often overlook the optimization potential of their capital dedicated to real estate. Business leaders who synchronize the dynamic, ever-changing landscape of enterprise strategy with their real estate holdings enhance liquidity and shareholder value, and insure that scarce corporate capital remains dedicated to "mission critical" activities. The course is designed to provide business and real estate students with an understanding of how real estate can be optimized within enterprises through the synthesis of all the various corporate management functions and strategic planning. The course is set up as an interactive learning and classroom experience designed to create strategic insights for business students to enhance the value of real estate assets owned and leased by public and private enterprises. The focus of the course is to provide an academic context for a unique value proposition in today's business world - identification and measurement of asset optimization for enterprises from their real estate portfolios. Learning materials will include case studies, white-papers, SAP cloud-based real estate software solutions, actual management consulting projects, and case studies relating to the field of enterprise real estate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RE 5104. Real Estate Development, Construction, and Design. 3 Credit Hours.**

This course is designed to introduce students to the complex world of real estate development. Understanding commercial real estate property and capital markets, financing, and development dynamics requires learning about types of real estate assets and interests, conveyances, government regulations on land use and zoning, highest and best use, public and private finance, mortgage markets, and valuation and marketing of space in the context of highly competitive localized and segmented markets. This course evaluates development on vacant sites as well as rehabilitation, redevelopment, and acquisition investments. The course examines raw and developed land and the similarities and differences of traditional real estate product types including office, R & D, retail, warehouses, single family and multi-family residential, mixed use, and land as well as specialty uses like golf courses, assisted living, and fractional share ownership. Emphasis is on concise analysis and decision making. The course discusses the development process with topics including market analysis, site acquisition, due diligence, zoning, entitlements, approvals, site planning, building design, construction, financing, leasing, and ongoing management and disposition. Special topics like urban redevelopment, affordable housing, place-making economic development, infrastructure, sustainability, innovation districts, public-private partnerships (P3's), project finance, and running a development company will also be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**RE 5105. Real Estate Valuation and Market Analysis. 3 Credit Hours.**

This course focuses on the theory and techniques of real estate valuation with an in-depth exposure to market analysis, highest and best, and contemporary valuation models including the three traditional to valuation: Cost, Sales Comparison, and Income Approaches. Market analysis will include the study of commercial and residential property with special emphasis on the decision matrices and processes used in feasibility studies, site selection, and marketability studies. Students will perform individual and group case study assignments, and guest speakers will complement traditional lectures.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RE 5106. Infrastructure Development and Sustainability. 3 Credit Hours.**

This course provides an understanding of the demand for, and supply of, sustainable infrastructure related to the pace of urbanization across the globe. The challenges for both developing and developed countries is examined from the perspective of potential new strategies, new technologies, new business models, and new financing techniques that could make a difference in addressing a full range of infrastructure needs while addressing sustainability objectives. In terms of sustainability, this will include an understanding of the demand and supply side, cultural factors, the policy framework, and the potential impact of technology and innovation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**RE 5107. Inclusive Economic Development and Place-Making/Real Estate Innovation. 3 Credit Hours.**

Real estate is the "currency for economic development" and reimagining underutilized real estate assets and neighborhoods is one of the most under-appreciated subject areas in the real estate industry. Place-making is the process of teaching communities and their stakeholders how to "tell their market story" and create inclusive economic development and jobs through real estate innovation. This process requires a plethora of activities that includes implementing an Asset optimization plan and interacting with residents in a way that creates future demand for the commercial real estate assets within a particular location. Specifically, this experiential based course is centered on the roles of various stakeholders in the place-making process, and how they can collaborate together to transform neighborhoods, anchor properties in communities which are underutilized, or overall economic development strategies through real estate innovation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**RE 5108. Affordable Housing Development and Finance. 3 Credit Hours.**

This course provides you with an overview of the multi-family rental housing segment within the real estate industry. Topics covered will include: market and demand analysis and their impact on product and product characteristics such as unit mix, size and amenities, construction, and development sequencing. How product influences design, construction, financing/capital stack, ownership structure. Also discussed will be regulations governing operations of low income housing, alternative financing and sources, and property operations. Students will perform individual and group case study assignments, and guest speakers will complement traditional lectures.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**RE 5109. Institutional Investment Management. 3 Credit Hours.**

This course introduces students to the concepts and discipline of Real Estate Institutional Investment Management incorporating theory, practice and outcomes executed by Real Estate Investment Managers. The course focuses on sources of capital, investment strategy and risk, return expectations and measurement, manager due diligence, documentation, and regulatory oversight. Access to organizations, publications and research in the field is an integral part of this course offering. The past several decades has seen significant growth in the real estate investment management field including the offerings brought to market by real estate managers. This course intends to demonstrate how investment managers raise capital for real estate investment and how they oversee the vehicles in which investors participate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RE 5151. Real Estate Integrative Analysis. 3 Credit Hours.**

The Capstone is designed to provide students with an integrative experience in real estate finance that prepares them for entry into the workplace. To this end, business cases and a Capstone project reinforce and unify the tools that students have developed in prior classes through practical application and a full exploration of real finance as it is applied in investment scenarios. This class will involve detailed study of asset valuation and investment characteristics of commercial real estate using lecture, case study analysis techniques, Capstone project paper, and formal presentation. Topics covered will include acquisition and investment analysis, discounted cash flow analysis, enterprise asset optimization, financing, strategic disposition, risk mitigation, community revitalization, market analysis, and valuation techniques for commercial real estate. Class time will be spent reviewing key real estate valuation, finance, and development topics interspersed with selected group case studies that supplement the in-class discussions. Class time will also include student interaction, presentations, and team assignments. The focus of this course will be on critical thinking, utilization of the tools of real estate finance, and development of business communication skills. Each student should leave the class with an understanding of the issues faced by public and private real estate enterprises, governments, developers, the risks and decisions unique to real estate finance and investment, and the tools used to manage those risks and decisions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RE 5182. Independent Study. 1 to 3 Credit Hour.**

Special study in a particular aspect of real estate under the direct supervision of an appropriate graduate faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Recreational Therapy (RCTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**RCTH 5001. Graduate Research I in Recreational Therapy. 3 Credit Hours.**

This course is designed as a graduate level introduction to research design, methods, and analyses. The course will focus on the fundamentals of health and social research, including: the logic of scientific inquiry, research ethics, developing testable research questions, data collection techniques, and basic data analysis. Students will also examine the diverse methods used in health and social research - including survey research, experimental design, single-subject design, and qualitative research - exploring both strengths and weaknesses of different designs. Students will address a single research question by integrating multi-disciplinary sources in a scholarly paper and by orally presenting the findings.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5009. Entrepreneurship in the Health Professions. 3 Credit Hours.**

This course is designed to introduce students to entrepreneurship. The goal of the course is to demonstrate the links between knowledge, experience and skills and commercial possibilities. The course integrates a number of different disciplines, ranging from sociology and psychology to economics, finance, marketing and human resource management. Through assigned readings, class discussions, activities and guest lectures from various professional fields, students will be challenged to apply theoretical principles, concepts and frameworks to real world situations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5102. Recreational Therapy: Now and Then. 3 Credit Hours.**

This course explores the historical roots of disability and the recreational therapy profession, as well as the current trajectory of the disability movement and recreational therapy practice. Concepts, models, approaches, and theories utilized in recreational therapy practice are reviewed, in which students are challenged to explain, apply, compare/contrast, and critique this information as it applies to current challenges, issues, and trends in practice and healthcare. The course additionally reviews and applies professional ethics and standards of practice to current healthcare situations; evaluates and reimagines scenarios for cultural competence and interprofessional collaboration; and hypothesizes potential approaches to current issues and trends for forward momentum of the profession, public health, and client outcomes. Students will review case studies that explore the application of the RT process (Assessment, Planning, Implementation, Evaluation, and Documentation) in different settings.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5201. Managing Dementia Care. 3 Credit Hours.**

Utilizing a person-centered and interdisciplinary approach, the course explores the strategies for assisting practitioners, agencies, families and caregivers with balancing the needs and behaviors of the individual with dementia, and the social and physical environments in which the person with dementia is placed. Students will apply fundamental principles for the design and evaluation of activity-based, psychosocial programs for this population. Models for managing problem behaviors while respecting the needs of the client will be explored. This course seeks to emphasize the importance of interdisciplinary support and is therefore, appropriate for students of healthcare disciplines that utilize an activity-based approach. NOTE: Prior courses in lifespan/human development and anatomy are suggested. Undergraduates may enroll with permission of instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5204. Recreational Therapy and Assistive Technology. 3 Credit Hours.**

This course provides an in depth review of the use of and opportunities for assistive technology in recreational therapy services in promoting the full inclusion and community participation of persons with disabilities. Emphasis is placed on the AT devices and services that promote functional independence and participation in the community and in physically and socially active recreation and leisure. Students will review the literature on the use of assistive technology and make practice recommendations for therapists working with individuals who may benefit from the use of assistive technology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5205. Recreational Therapy in Geriatric Services. 3 Credit Hours.**

This course provides an in-depth review of the evidence for the use of recreational therapy in geriatric service settings. Emphasis is placed on developing best practices for recreational therapists to assess needs, develop interventions, and evaluate intervention outcomes. Students will (1) read and critique current literature related to RT practice in geriatric service settings; (2) synthesize the research findings and identify key elements that should be disseminated to recreational therapists within geriatric services settings; (3) develop knowledge translation plan; and (4) present findings to peers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5212. Play and Pediatric Development. 3 Credit Hours.**

This course explores the theoretical and practical dimensions of play and the dynamic relationship that exists between a child's play and ongoing development - from infancy through adolescence. Opportunities are provided to examine elements of play, benefits of play and various play modalities and the contribution to developmental tasks for typically and atypically developing children. Topics to be covered include the intersection of gender, race/ethnicity, disability, culture, community, media, and technology with play and development. Additional topics reviewed include assessing play behaviors, designing multipurpose play environments, selection and safety of play materials and apparatus and current efforts to reinvigorate the culture of play in the development of children.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5214. Child Life Interventions. 3 Credit Hours.**

This course examines Foundation of Child Life practice, including theories and methods used to reduce stress and increase child/family abilities to cope with illness and hospitalization. The course includes rationale and evidence for interventions related to techniques to prepare children for medical procedures, pain management, coping skills, family-centered care, and bereavement support. Students learn about credentialing requirements for Child Life Specialists and are encouraged to engage in field-based experiential learning. NOTE: Undergraduates may register for this course with permission of the instructor and must have completed course content in basic psychology and anatomy and physiology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5250. Special Topics in Recreational Therapy. 1 to 3 Credit Hour.**

Contemporary issues related to new methods and areas of RT practice, including, but not limited to assistive technology, RT in school settings, home health care, and community leisure programs for individuals with disabilities. Course topics will change. This course may be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RCTH 5261. Disability Seminar on Developmental Disabilities and Mental Health Conditions. 3 Credit Hours.**

This course examines the prevalence, etiology, pathology, prognosis, characteristics, and complications of various mental health diagnoses and developmental disabilities across the lifespan. Common needs and issues of these health conditions related to recreational therapy's scope of practice in healthcare and human services are reviewed, specifically issues related to institutionalization, community-based services and inclusion, as well as others. Healthcare and human services trends and common evidence-based recreational therapy interventions are reviewed.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5271. Disability Seminar on Physical and Neurological Health Conditions. 3 Credit Hours.**

This course examines the prevalence, etiology, pathology, prognosis, characteristics, and complications of various physical and neurological health conditions across the lifespan. Common needs and issues of each health condition related to recreational therapy's scope of practice are reviewed, along with personal narratives of people living with the health condition to foster an understanding of the lived experience. Healthcare trends and common evidence-based recreational therapy interventions are reviewed, which students apply to case studies in preparation for clinical practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5301. Evidence Based Practice in Recreational Therapy I. 3 Credit Hours.**

This course will introduce students to evidence-based practice in recreational therapy (RT). Students will develop a critical understanding of how evidence is generated, retrieved, and appraised. They will become knowledgeable about the relevance of research findings for clinical decision-making in RT practice. Students will develop skills at synthesizing and presenting evidence to support or challenge current RT issues/practices for particular diagnostic groups or interventions.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5302. Evidence Based Practice in Recreational Therapy II. 3 Credit Hours.**

In this course, students will explore the practitioner-researcher role by building upon prior knowledge attained across the Recreational Therapy program. This course supports the use of research knowledge in making practice decisions that improve the delivery of recreational therapy interventions. It serves as a culminating course through which students demonstrate mastery of program competencies. Course assessments include a comprehensive exam and the development of an evidence-based protocol.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in RCTH 5301 and RCTH 5442.

**RCTH 5311. Conceptual and Contemporary Issues in Recreational Therapy. 3 Credit Hours.**

This course examines conceptual, theoretical, and practical issues associated with the organization and delivery of RT services. It uses a combination of readings and oral and written exercises through which students reflect on and develop informed positions on core values and beliefs that support the profession.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5312. Leisure, Health, and Recreational Therapy Interventions. 3 Credit Hours.**

In this course, students will explore the relationship of leisure to health and well-being and delve into the literature on specific recreational therapy modalities, interventions, and facilitation techniques. A focus on evidence-based practice will be applied by identifying therapy ingredients in the literature that promote change, using thoughtful clinical decision-making in the absence of evidence, and adapting or modifying based on client needs. Students will conduct an activity and task analysis, identify modalities to meet specific population needs, and increase awareness of modality resources.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5314. Leisure-time Physical Activity and Community Engagement in Recreational Therapy. 3 Credit Hours.**

This course provides an overview of the effects of physical activity and community participation on health among individuals with disabilities. All levels of physical activity (i.e., sedentary - vigorous) will be examined in relation to the impact on cognitive, physical, social, and emotional health. This class has a unique focus on utilizing the community as a resource to increase physical activity. Thus students will have the opportunity to assess barriers and facilitators to community-based physical activities in diverse populations, as well as exploring community specific resources. Particular attention will be given to organizational sponsorship of and different options for community-based activities for individuals with disabilities. Additionally, the class will critique interventions aimed at increasing LTPA for individuals with disabilities. Topics to be covered include: sedentary-vigorous physical activity, metabolic equivalency of leisure time activities, assessment of physical activity, and a critique of population specific intervention considerations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5315. Social Engagement and Community Participation in Recreational Therapy. 3 Credit Hours.**

This recreational therapy course explores the theoretical and practical dimensions of social systems and the dynamic relationship between the individual with disabilities and their community. The course will identify how individuals with disabilities interface with their social environments and the challenges that are experienced in the navigation process. Students will explore aspects of stigma that influence the openness of a community, and consider both the benefits and the challenges of segregation, integration and full inclusion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5316. Measuring Health and Disability: The ICF Model. 3 Credit Hours.**

The International Classification of Functioning, Disability, and Health is a worldwide biopsychosocial model of disability and coding system for the purpose of providing a scientific basis for understanding and studying health, establishing a common language for describing health, and comparing data across countries and disciplines. This course introduces students to the ICF model reviewing the model's development, aims, and application in current healthcare practice, as well as opportunities to expand its application in the pursuit of providing high-quality, transdisciplinary, and integrated research and care in clinical and non-clinical settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5382. Independent Study. 1 to 6 Credit Hour.**

This supervised project is structured between the student and a faculty mentor. Projects may include developing a research proposal, conducting a field-based investigation, or developing and evaluating a program. Registering for this course requires prior permission from a faculty mentor. A mutually agreeable study contract must be secured before the end of the second week of the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RCTH 5402. Recreational Therapy Administration and Management. 3 Credit Hours.**

This course examines program, personnel, fiscal, and facilities management, including professional standards of practice and accreditation standards that guide and regulate organization and delivery of Recreational Therapy services in health care and human services settings.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5442. Program Planning and Practice in Recreational Therapy. 3 Credit Hours.**

This course is designed to prepare students for the development of systematically designed recreational therapy service delivery programs. This course examines conceptual models used in the development of evidence-based recreational therapy programs. Students learn the processes for developing comprehensive program and specific program plans that are applied in a manner that provides efficient recreational therapy services to clients receiving services across community and non-community based settings.

**Repeatability:** This course may not be repeated for additional credits.

**RCTH 5787. Recreational Therapy Practicum. 1 to 3 Credit Hour.**

Field placement is made with emphasis on acquisition and application of practical skills for students who do not meet eligibility for NCTRC professional level certification examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Science.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

## Rehabilitation Medicine (RHMD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**RHMD M144. Survey of Rehab Medicine. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**RHMD M300. Rehabilitation Medicine Elective. 0 Credit Hours.**

This course will enable students to develop a basic understanding of the fund of knowledge and types of medical problems seen in this specialty; to develop a basic understanding of the medical decision making process involved in the practice; and to develop an understanding of and practice of medical interpersonal communication and professionalism.

**Repeatability:** This course may be repeated for additional credit.

**RHMD M341. Principles of Brain Trauma Rehabilitation. 0 Credit Hours.**

This course will enable students to develop a basic understanding of the fund of knowledge and types of medical problems seen in this specialty; to develop a basic understanding of the medical decision making process involved in the practice; and to develop an understanding of and practice of medical interpersonal communication and professionalism.

**Repeatability:** This course may be repeated for additional credit.

**RHMD M343. Career Exploration of General Physical Medicine and Rehabilitation. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**RHMD M740. General PM&R. 0 Credit Hours.**

**Course Attributes:** M2

**RHMD M741. Brain Trauma Rehabilitation. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**RHMD M742. Pediatric Rehabilitation Med. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**RHMD M745. Musculoskeletal Rehab Medicine. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

## Rehabilitation Sciences (REHB)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **REHB 5311. Leisure-time Physical Activity and Community Engagement in Persons with Disabilities. 3 Credit Hours.**

This course provides an overview of the effects of physical activity and community participation on health among individuals with disabilities. All levels of physical activity (i.e., sedentary - vigorous) will be examined in relation to the impact on cognitive, physical, social, and emotional health. This class has a unique focus on utilizing the community as a resource to increase physical activity. Thus students will have the opportunity to assess barriers and facilitators to community-based physical activities in diverse populations, as well as exploring community specific resources. Particular attention will be given to organizational sponsorship of and different options for community-based activities for individuals with disabilities. Additionally, the class will critique interventions aimed at increasing LTPA for individuals with disabilities. Topics to be covered include: sedentary-vigorous physical activity, metabolic equivalency of leisure time activities, assessment of physical activity, and a critique of population specific intervention considerations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **REHB 5312. Social Engagement and Community Participation for Persons with Disabilities. 3 Credit Hours.**

This blended course (i.e. on-line & classroom) explore the theoretical and practical dimensions of social systems and the dynamic relationship between the individual with disabilities and their community. The course will identify how individuals with disabilities interface with their social environments and the challenges that are experienced in the navigation process. Students will explore aspects of stigma that influence the openness of a community, and consider both the benefits and the challenges of segregation, integration and full inclusion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **REHB 5313. Measuring Health and Disability: The ICF Model. 3 Credit Hours.**

The International Classification of Functioning, Disability, and Health is a WORLDWIDE biopsychosocial disability model and coding system for the purpose of providing a scientific basis for understanding and studying health, establishing a common language for describing health, and comparing data across countries and disciplines. This course introduces students to the ICF model reviewing the model's development, aims, and application in current healthcare practice, as well as opportunities to expand its application in the pursuit of providing high-quality, transdisciplinary, and integrated research and care in clinical and non-clinical settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Religion (REL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **REL 5000. Special Topics. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

### **REL 5001. Foundations in Philosophy of Religion. 3 Credit Hours.**

Considers a selection of classical and modern European and American philosophers and the implications of their views for religious thought. Some of those whose writings are considered may include Hume, Kant, Schleiermacher, Hegel, Kierkegaard, James, Whitehead, Rosenzweig, Gadamer, Ricoeur, Derrida, Irigaray, Habermas, and Foucault. Also may consider non-Western philosophies of religion, for example, those deriving from India or Japan.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5002. Foundations in Religion and the Social Sciences. 3 Credit Hours.**

Introduces students to the discourse of Western social sciences on religion. Examines both modern and postmodern thinkers. Offers extensive readings in Durkheim, Marx and Weber. Then puts these modern theorists into conversation with postmodern critical theory as exemplified by Foucault and Bourdieu.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5003. Foundations in Textual and Historical Studies in Religion. 3 Credit Hours.**

Teaches the issues, methods, and trends emerging in the turbulent world of historical studies. Explores the problems, ideological constraints, and new venues that occur when "religion" is introduced to historical studies. Deals with New Historicism, Cultural Materialism, postcolonial theory, various feminisms, the crisis of narrative history, and various approaches now in vogue for reading ancient texts, 1st through 6th century CE and dealing with Greco-Roman religions, Judaism, and Christianity.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5004. Foundations in Religion and Psychology. 3 Credit Hours.**

Introduces psychological theorizing about the origins, motivations, and aims of religion. Psychological thought will be contextualized, showing how it has been shaped by and in turn reshapes more traditional Western reflection on the nature of persons, symbols, and faith. Simultaneously, psychological perspectives assist Western people to appreciate, interpret, and adapt non-Western forms of religion and practices. In this course, we will read classic theorists, modern revisers, and some recent rethinking and responses to these theorists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5006. Foundations in Religion, Race, and Ethnicity. 3 Credit Hours.**

Critically engages leading theoretical discussions about the intersection of religion, race, and ethnicity. Serves also as a practicum in relevant social science methodologies and their application in the analysis of a chosen "ethnic" congregation in the Philadelphia area.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5009. Foundations for the Critical Study of the Hebrew Bible. 3 Credit Hours.**

This seminar provides an introduction to the development and application of various critical methods employed in Hebrew Bible scholarship (sometimes called Old Testament scholarship). It will focus on methodological developments from the mid-nineteenth century CE through the present. Knowledge of Hebrew is not required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5101. Foundations in Hinduism. 3 Credit Hours.**

Both a historical and thematic survey of Hinduism. Attempts to make clear the structures of Hinduism and to explain its internal coherence as well as its apparent inconsistencies. While recognizing that it is impossible to include everything in the study of a religion which covers a time span of 5,000 years and which has existed over a vast geographical area, this course aims at giving comprehensive coverage of the history, traditions, rituals and theologies of Hinduism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5102. Foundations in Indian Buddhism. 3 Credit Hours.**

Examines the biographical data (not Buddhology) and philosophical themes in the Majjhima Nikaya and the Digha Nikaya. Studies philosophical themes in early Theravada traditions and selected suttas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5201. Foundations in Chinese Religions. 3 Credit Hours.**

Basic studies of (1) the classical texts and essential teachings of early Confucianism and Taoism, and (2) the ideological continuity from early Confucianism and Taoism to Neo-Confucianism and Neo-Taoism. Focuses on the major religious and philosophical traditions of China. Special consideration is given to the ethical, religious, and social thought of Confucianism and Daoism. Topics of discussion include: 1) the pre-Han concepts of spirits and gods, 2) classical Confucianism (the "Kung-Meng tradition"), 3) philosophical Daoism (the "Lao-Zhuang tradition"), 4) religious Daoism (including the popular cult of immortality), 5) ideological continuities and transformations in Neo-Confucianism and Neo-Daoism, and 6) religious practices in contemporary China. The approach is both historical and comparative. No knowledge of Chinese is required, as the readings are in translation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5202. Foundations in Chinese Buddhism. 3 Credit Hours.**

The course will provide an overview of Chinese Buddhism from its beginning in ca. 200 CE to the modern era. We will read primary sources in translation supplemented by overview lectures on history and philosophy. We will look at Chinese Buddhist thought, as well as its art and architecture, social dynamics and relationship with other traditions. A special section on modern and contemporary Chinese Buddhism will emphasize Buddhist reactions to modernity. Participants will create an annotated bibliography, do at least one presentation, and write a term paper (20+ pages).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5301. Foundations in Japanese Buddhism. 3 Credit Hours.**

Prepares students to do an in-depth study of Japanese Buddhism, covering several major Buddhist thinkers, such as Kukai, Dogen, Shinran, Myoe, Hakuin, Takuan, and Nishida. In order to understand how Japanese Buddhism accepted Indian and Chinese Mahayana Buddhism, the course traces some of the prominent conceptual frameworks of these two. The methodological orientation of the course is philosophical.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5401. Foundations in Judaism. 3 Credit Hours.**

This course offers students a critical introduction to issues within Jewish studies and the study of Jews, Judaism and Jewishness. Who are Jews and how have these designations shifted and changed over time? What is Judaism and how is it a religion? What role do texts and practices play in defining Judaism? The course asks these and other questions in order to both build on the legacy of how Judaism has been studied within the academic field of religious studies and to challenge some of these long held assumptions. In other words, the course both appreciates and challenges this scholarly legacy by offering students Religious studies, Jewish studies and literary critical tools to better appreciate Jewish texts and practices. And, by looking at Jews, Judaism and Jewishness in the plural, the course offers students a broad historical vision of Jewish culture. The course is organized, more or less, chronologically offering students a critical overview of Jewish history moving from the biblical period to the present with attention to specific Jewish texts and artifacts from specific periods and geographical locations within this history.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5501. Foundations in Christianity. 3 Credit Hours.**

Focuses on both thought (doctrine, theology) and patterns of spiritual life, especially as revealed in Christian devotional "classics." What has been believed, taught and confessed by Christians since the Church's earliest era? How have individuals lived out these teachings, helped to reshape them, and discerned a spiritual life focused on God as known through Jesus Christ? As contemporary persons, how can we read and interrogate as well as appropriate these texts within a religious and cultural world so different from those of the authors? The continuing importance and vitality of these "classics" - or their rediscovery after long periods of obscurity - is part of the milieu for Christianity in its world context today.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5601. Foundations in Islam. 3 Credit Hours.**

Provides a basic survey of Islam for non-specialists. Includes a historical overview focusing on the relationship of Islam to the world and to other religions and ideologies of ancient, medieval, and modern times. Also considers the major modalities of Islam as a religion, including the legal, spiritual, philosophical, and social aspects. Finally, current issues in Islam will be considered, including modern changes in social organization and present-day politics. No prerequisites or language requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5701. Foundations in African Religions. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 5801. Foundations in Digital Humanities for the Study of Religion. 3 Credit Hours.**

"Foundations in Digital Humanities for the Study of Religion" will familiarize graduate students with methods and applications from the emerging field of DH. This course alerts students to the digital difference in three fields: text, space, and networks. It focuses on examples from the domain of religious studies, but the methods are applicable in other fields as well.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8001. Religious History of the United States in the 20th Century. 3 Credit Hours.**

Explores the scholarly literature on the history of religion in the United States in the 20th century. Focuses on members of New Religious Movements; on Muslims, Protestants, and Catholics; on race and ethnicity; on diasporas; on gender; and on changing concepts of the nature of "religion."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8002. American Religious History. 3 Credit Hours.**

Discusses and analyzes a selected topic in American religious history.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8003. American Religious History II. 3 Credit Hours.**

Discusses and analyzes a selected topic in American religious history.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8004. The History of Ethics. 3 Credit Hours.**

A general survey of the development of human ethics in history. While all of the most prominent religions and civilizations will be looked at, the course may concentrate more on some than others in accord with the expertise of the instructor, including especially contemporary themes in the study and application of ethical standards.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8005. Interreligious Dialogue. 3 Credit Hours.**

Investigates the theoretical issues that underlie all interreligious dialogue as well as examples of actual dialogue in progress, the latter partly according to student interest in those dialogues. The former will include analyses of what precisely is meant by dialogue and of the philosophical, theological, religious, psychological, "spirituality," and "praxis" aspects of interreligious dialogue, in other words, the presuppositions and implications of such dialogue.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8006. Methodological Options in the Study of Religion. 3 Credit Hours.**

Focuses on one of the currently available methodologies used in academic discourses on religion, enabling the students to evaluate this methodology and compare and contrast it with others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8007. The Body: East and West. 3 Credit Hours.**

This course assumes a comparative approach to investigate how we understand our body, how we live our body, and how our body changes through the practice of self-cultivation. It will first examine some of the traditional Western concepts of the body (e.g. Plato, Aristotle, Descartes, and Merleau-Ponty). Then it will turn to the study of the body as it has been articulated in the Eastern intellectual tradition (e.g. Samkhya Karika, Patanjali's Yogasutra, and Yuasa Yasuo's *The Body, Self-Cultivation and Ki-Energy*).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8008. Jung and the East. 3 Credit Hours.**

This comparative course delves into the similarities and differences between Jung's major theories developed after 1928 (e.g., archetypes, collective unconscious, synchronicity) and the representative Eastern theories of Taoist, Buddhist, and Kundalini Yoga traditions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8009. Religious Experience: Body and Meditation. 3 Credit Hours.**

This course examines the nature, the variety, the depths, and the meanings of religious experiences with the view to advancing a third alternative position to the two prominent contemporary philosophical positions which W. T. Stace and Steven Katz offered on this topic. As a preparation for this task, the course will first review some of the major classical texts, both Western and Eastern (e.g., Plotinus, Pseudo-Dionysius, St. Teresa, St. John of the Cross, Meister Eckhart, Early Buddhism, Kundalini Yoga, and Shintoism), so that the student will become familiar with the scope and the depth of the subject.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8010. Rel Exper-East & West. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 8011. Religion and Public Life. 3 Credit Hours.**

We will inquire about key intellectual issues pertaining to the public understanding of religion in the U.S. today: examining the ideas of secular and religious; understanding the first amendment clauses on religious freedom and establishment; tracking ethical debates concerning race, gender, and sexuality; gaining perspective on civil religion and popular culture; examining how religion uses and is portrayed in the media; and gaining insight about religious pluralism in local and global contexts. Additional goals include understanding the connections among world events, American society, and religious life. Students will do critical writing in a variety of styles to address public and academic audiences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8012. Religion and Sexuality. 3 Credit Hours.**

This course examines recent ideas and trends in the scholarly literature about sexuality in the context of religious studies. We will focus primarily on how contemporary scholars have reshaped and rethought religious traditions that control and celebrate sexuality in light of contemporary ideas about the power and variety of sexual experience and expression. Students will be required to read and critically engage scholarly monographs and write an extensive original research paper on a topic of their choice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8100. Topics in Buddhist Thought. 3 Credit Hours.**

Various topics in the Buddhist thought of Japan, China, or India. May treat one, two, or all three of these traditions on a given topic and also compare them with parallel Western thought.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 8201. Chinese Philosophy and Religion. 3 Credit Hours.**

This course will introduce participants to a select few seminal works in the history of East Asian thought. These works will be read closely and in depth together with secondary scholarship on them. The primary readings will usually be from the pre-modern period and will focus on foundational works of Confucianism, Buddhism, and Daoism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8300. Topics in Japanese Buddhism. 3 Credit Hours.**

Provides an in-depth study of one or more topics in Japanese Buddhism. May cover any of the major Japanese Buddhist thinkers such as Kukai, Dogen, Shinran, Myoe, Hakuin, Takuan, and Nishida. Methodological orientation is philosophical.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 8301. Kyoto School of Philosophy. 3 Credit Hours.**

We will be reading for the course some of the major thinkers belonging to the Kyoto School, such as Nishida Keiji, Miki Kiyoshi, and Abe Masao. The thematic focus of the course falls on the understanding of the meaning of nothingness (both relative and absolute) from a philosophical as well as a depth-psychological viewpoint, while questioning the traditional formulation of ontology from an East Asian perspective.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8400. Topics in Biblical Studies. 3 Credit Hours.**

Research and discussion on a selected topic or topics in the biblical studies, including either the Hebrew Bible, the New Testament, or both, as well as a consideration of the relationship of that literature to other writings, including the apocryphal and pseudepigraphic.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 8401. Race, Gender, Class and Ethnicity in Ancient Near East. 3 Credit Hours.**

Against the background of the substantial work done in recent years in biblical racial and gender studies, this course explores the ancient Near Eastern, and specifically biblical, origins of diversity and religious nationalism in terms of race, gender, class, and ethnicity. The focus will be on how these apply to particular biblical texts that involve gender, ethnic, and class confrontations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8402. Violence in Ancient Religion: Pagan, Christian, and Jewish, 50 CE-500 CE. 3 Credit Hours.**

Explores examples of coercion, violence, and war resulting primarily from religious motivations within the political framework of the Roman Empire. The rubrics of violence in the cause of freedom, violence due to intolerance, and violence in the cause of ideology will organize the work. The questions of how religious ideas serve the cause of power and how the victims respond in each religion will dominate the seminar. In addition, discovering whether racial or ethnic biases skewed perceptions and inspired conflicts will be important throughout. In order to do this, we must look at the new studies of contemporary scholars who explore definitions of self-identity in antiquity. Who is a "Jew," a "Greek," a "Roman," and a "barbarian"? Finally, analyzing the range of acts, from ignorant prejudice to violence sanctioned by the state through legislation, will aid in the task of situating the phenomena in antiquity within the context of contemporary theories on the problem.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8403. Holocaust and Representation. 3 Credit Hours.**

Building on works by Saul Friedlander, Sidra Ezrahi, James Young, and others, this course raises questions about what it means to represent and remember the Holocaust, focusing on issues of the aesthetic, memory, and the labor of representation. What do art, film, and literature enable in relation to legacies of communal destruction and trauma, and what do they foreclose? Other topics will include: the construction of historical narratives (whose stories? whose texts?), the art of fascism, nazi culture, and questions about the ongoing labor of memory, testimony, and artistic production.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8405. Women in Ancient Christianity. 3 Credit Hours.**

Explores the wide variety of women's participation in and experiences of early Christianity, from the first century to the fifth. Pays close attention to extent primary evidence and the varieties of ways that this body of evidence is used and interpreted in both theological and historical contexts. Hence the course will combine historical and hermeneutical issues in contemporary scholarship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8406. Feminist and Womanist Biblical Interpretation. 3 Credit Hours.**

This seminar provides a survey of the history and development of feminist and womanist biblical interpretation in the United States. It includes interpreters of the Hebrew Bible (sometimes called Old Testament) and New Testament in religious and non-religious contexts. Knowledge of Hebrew or Greek is not required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8501. Modern Catholicism. 3 Credit Hours.**

Focuses on reform movements within the Catholic Church from the 18th-century Enlightenment forward, concentrating particularly on the most recent times. These reform movements, climaxing in Vatican Council II (1962-1965), constitute a Copernican turn in Catholic history and involve at least five dimensions: 1) the turn toward the historical, 2) the turn toward the world, 3) the turn toward freedom/democracy, 4) the turn toward reform, and 5) the turn toward dialogue. Key thinkers include De Chardin, Küng, Schillebeeckx, Haring, and Ruether.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8502. Women in Ancient Christianity. 3 Credit Hours.**

Focuses on the four main figures of Christian tradition in the West: Augustine, Aquinas, Luther, and Calvin. Includes reading of original texts in English translation. Also includes modern works by Troeltsch and Weber.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8503. Issues in Theology. 3 Credit Hours.**

Deals with one or more issues in modern and/or contemporary religious theology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8504. Christology in the Ancient Church. 3 Credit Hours.**

Explores the emergent ambiguities with regard to the identity of Jesus Christ during the 2nd through the 4th centuries. In order to understand the common person's view of Christ, we shall read apocryphal acts, lives of saints, sayings of the desert mothers, sayings of the desert fathers, and martyrologies. In addition, we shall examine primary texts of authors known as the Fathers, such as Tertullian, Irenaeus of Lyon, Melito of Sardis, Origen, Eusebius, Basil of Caesarea, Macrina, Gregory of Nyssa, and Gregory of Nazianus. One of the goals is to understand the debates and differences with the context of institutional monastic and ecclesiastical growth.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8600. Topics in Islamic History. 3 Credit Hours.**

Offers one of several topics in classical Muslim history, including the life of the Prophet Muhammad, the early development of the political system and Muslim law, Muslim theories of history, and selected trends in modern Muslim history.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 8601. Islamic Jurisprudence. 3 Credit Hours.**

Examines the Muslim legal prescriptions regarding women and war, the two issues for which Islam is most attacked today both in academia and the media. It will consider both the classical law and recent developments. Special attention will be given to the question of flexibility versus rigidity in the law, as well as to the type of society envisioned by the proponents of different interpretations. Current trends and possible future outcomes will be considered. The changing status and role of the religious responsum or fatwa will be probed as well, leading to a discussion of the development of religious authority in Islam.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8602. Islamic Mysticism. 3 Credit Hours.**

Examines the sources, rise and development of Muslim spirituality. The ideal of life and worship in Islam will be studied as the framework for Muslim mysticism. Then the development of spiritual life and thought will be examined, and especially the contribution of noted individuals. Finally, Sufi orders and their role in the life of Muslim society will be considered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8603. Islam in Global Perspective. 3 Credit Hours.**

This course focuses on contemporary Islam in a global context. It will consider the development of Islamic networks and the emergence of transnational identities among Muslims from places like Africa, Asia, Europe, and the United States. West African Muslim migrants among other groups will be examined for how they respond to the political, economic, and cultural processes of globalization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8604. African American Islam. 3 Credit Hours.**

This graduate seminar is designed to introduce students to the growing scholarly literature on African American Islam. It will explore the intersection of race, religion, and ethnicity in light of the various ways African American Muslims negotiate their identities and religious practices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8700. Topics in African Religions. 3 Credit Hours.**

Covers a selected topic or topics in the study of African religions, including some or all of the following: African traditional religions, new African religions, and forms of Christianity and other major religions as practiced and elaborated by Africans.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 8701. African Ideas of God. 3 Credit Hours.**

Introduces the conception of God in African traditional spirituality and the implications of such a "theology" on African understanding of humanity. Explores African creation myths, the names and attributes of God in African languages, what people expect from God, and what God expects from people. In doing this, we will address African ethics or the conception of good and evil among Africans. The relationship of African concepts of God with Islam and Christianity will also be discussed, including the beliefs of African practitioners of those religions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8702. Religions of the African Diaspora. 3 Credit Hours.**

Looks at the historical development of African-derived or African-inspired religions in the African diaspora. Particular emphasis will be placed on Candomble in Brazil, Vodou in Haiti, and Santeria in Cuba, as well as on communities practicing these and related religious traditions in the United States.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8703. Africana Philosophical Thought. 3 Credit Hours.**

Explores a variety of philosophical and metaphilosophical problems in recent African philosophy through an examination of the treatment of the concept of "invention" in the work of several influential philosophers and social theorists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8704. Foucault in Africana Thought. 3 Credit Hours.**

Examines the two classic phases of Foucault's thought, archaeological and genealogical, and explores the impact they have had on the construction of race, gender, sexual orientation, disciplinarity, secularization, and politics as configured in Africana thought. Includes close readings of Foucault and his impact on the thought of Africana thinkers such as V. Y. Mudimbe, Cornel West, Molefi Asante, Sylvia Wynter, Paget Henry, Joy James, and B. Anthony Bogues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**REL 8800. Special Topics in Religion. 3 Credit Hours.**

A series of special topics in the field of religion, including some of those taught by visiting faculty. Content will vary from semester to semester. Specifics will appear in department course description booklet each semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 8810. Special Topics in Religion. 3 Credit Hours.**

A series of special topics in the field of religion, including some of those taught by visiting faculty. Content will vary from semester to semester. Specifics will appear in department course description booklet each semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9087. Teaching Practicum in Religion Studies. 3 Credit Hours.**

This course is for students who are beginning to teach religious studies in a university setting and wish to think about and develop their teaching skills. The course will help teachers in constructing the syllabus, conducting class discussions, designing lectures, getting the most out of student evaluations, using office hours effectively, creating teaching portfolios, working as a teaching assistant, grading, and problem solving around student interactions. The class will involve classroom visits and peer critiques, practical exercises and discussion about problems as they arise, so students should enroll during a semester when they are actually engaged in teaching.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9182. Individual Study. 1 Credit Hour.**

Individual study with a faculty member while in the coursework phase of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9282. Individual Study. 3 Credit Hours.**

Individual study with a faculty member while in the coursework phase of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9382. Individual Study. 3 Credit Hours.**

Individual study with a faculty member while in the coursework phase of the program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This course fulfills the continuous enrollment requirement after coursework completion while preparing for the Preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9996. Master's Thesis Research. 1 to 6 Credit Hour.**

Capstone MA course. Student explores a specific topic with his or her MA advisor and writes a thesis of approximately 50 pages. Registration each semester required until thesis approval.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Pre-Dissertation Research. After having passed the Preliminary exams, registration is appropriate for students working on the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**REL 9999. Dissertation Research. 1 to 6 Credit Hour.**

Registration required each semester after elevation to candidacy until completion and successful defense of the dissertation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Restorative Dentistry (RDNT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**RDNT 8001. Fundamentals of Prosthodontics. 7 Credit Hours.**

This course is divided into modules of the disciplines of prosthodontics, i.e., fixed, removable, complete dentures, implant dentistry, intraoral photography and occlusion. Modules are overviews of: Occlusion, Implant Dentistry, Removable Partial Dentures, Intraoral Photography, Complete Dentures, Fixed Partial Dentures, Prosthodontic Diagnosis and Treatment planning, and Digital data acquisition and manipulation.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**Repeatability:** This course may not be repeated for additional credits.

**RDNT 8002. Biomaterials. 2 Credit Hours.**

This course is a seminar series of 12 lectures for the PGY1 postgraduate prosthodontics students. A variety of topics relating to restorative materials used in prosthodontics is presented by the course director and the PG students. Each student is required to present at least one topic. The presentation must contain a full discussion of the important chemical, physical and clinical properties of materials chosen for the topic. A literature review of current research of the material, as well as a comparison of available products must also be presented.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**Repeatability:** This course may not be repeated for additional credits.

**RDNT 8003. Maxillofacial Prosthetics. 2 Credit Hours.**

This course will provide the prosthodontic resident with an understanding of maxillofacial prosthetics and dental oncology.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**Repeatability:** This course may not be repeated for additional credits.

**RDNT 8004. Integrated Medical Sciences. 2 Credit Hours.**

Temple faculty and invited guest lecturers administer modules within the overall course. The course has a series of lecture/seminars that address subjects that are ancillary to prosthodontics but which are important for the practice of prosthodontics and for which the residents must have an understanding.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**Repeatability:** This course may not be repeated for additional credits.

**RDNT 8005. Board Review Seminar. 2 Credit Hours.**

The format of this seminar is to review American Board of Prosthodontics released examinations. The questions are assigned to the residents who must find a reference to justify each of the answers. Approximately 750 questions are reviewed. This seminar provides a broad overview and review of didactic materials to be tested on the actual Board examination that all third year residents take. The questions are reviewed individually and the correct answers identified. The residents are assigned to the questions in a rotating cycle.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**Repeatability:** This course may be repeated for a total of 4 credit.

**RDNT 8011. Implant Literature Review Seminar. 1 Credit Hour.**

This seminar is a combined seminar of the oral-maxillofacial residents' periodontal, prosthodontic postgraduate students and specialty faculty. Each discipline is responsible for hosting the monthly seminar. The specific discipline selects the topic for discussion and selects the articles for review. This course is designed to review the current literature and most up-to-date techniques. Special emphasis is placed on critical examination of all the literature related to research design and validity of the conclusions.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**RDNT 8012. Current Literature Review Seminar I. 2 Credit Hours.**

Postgraduate students select articles after reviewing current periodicals, and are selected based on interest and application to prosthodontics practice. Articles may be selected from any peer-reviewed journal of relevance to prosthodontics.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**RDNT 8050. Advanced Prosthodontics Seminar. 2 Credit Hours.**

Invited guest lecturers and RSDM faculty present a variety of clinical topics for review. This course is designed to introduce the first year resident to basic concepts in five (5) areas of prosthodontics. Formal lectures are combined with seminar discussions of prosthodontics topics.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**Repeatability:** This course may be repeated for a total of 4 credit.

**RDNT 8183. Prosthodontics Literature Review Seminar. 5 Credit Hours.**

This course is designed to develop an in-depth knowledge of prosthodontics through primary classic and historical literature in Fixed Prosthodontics, Removable Partial Dentures and Complete Dentures, Implant Dentistry and Articulation and Occlusion. Specific topics are assigned for each seminar. Generally 10 articles will be reviewed during each seminar. Individual students will review and report on each article. The review will be a synopsis of each article identifying all pertinent points discussed. The student must determine the clinical significance of each article and how it affects their clinical practice. Assigned articles will be compared to citation in well-respected texts, adapted from recommendations by the American Board of Prosthodontics, and reviewed annually for revision.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**RDNT 8187. Prosthodontic Treatment Planning Seminar. 2 Credit Hours.**

This seminar is designed to develop the treatment planning/treatment sequencing acumen of the postgraduate students. The student is required to give a formal presentation in ABP format with mounted diagnostic casts. The students are exposed to incisive questioning from faculty and peers. Once per month, this clinical case conference is a combined case presentation with Periodontics, OMFS and Prosthodontics Implant patients. Patients are assigned in team concept to a surgical (resident-Perio-OMFS) and a prosthodontics postgraduate student. The various participants of different specialties will participate in the presentation and discuss viable treatment alternatives relative to each specialty. This is a combined participation seminar for identifying maximum predictability for success.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

**RDNT 9185. Advanced General Dentistry Clinic I. 1 to 12 Credit Hour.**

This course is the clinical component of the Advanced Education in General Dentistry (AEGD) Postdoctoral Program, a CODA-recognized advanced training program beyond a dental degree. Residents are assigned patients by the Director to provide vast experience in all disciplines of dentistry. Cases are assigned to fulfill the program requirements, to meet accreditation standards, and prepare the postdoctoral resident for independent general dental practice. A wealth of clinical information and learning is provided by faculty supervised patient treatment.

**RDNT 9285. Advanced General Dentistry Clinic II. 1 to 12 Credit Hour.**

This course is the clinical component of the Advanced Education in General Dentistry (AEGD) Postdoctoral Program, a CODA-recognized advanced training program beyond a dental degree. Residents are assigned patients by the Director to provide vast experience in all disciplines of dentistry. Cases are assigned to fulfill the program requirements, to meet accreditation standards, and prepare the postdoctoral resident for independent general dental practice. A wealth of clinical information and learning is provided by faculty supervised patient treatment.

**RDNT 9385. Clinical Prosthodontics. 12 Credit Hours.**

This is the clinical component of the Postgraduate Prosthodontics Program. Students are assigned patients by the Director, to provide vast experience in all disciplines of prosthodontics. Cases are assigned to fulfill the program requirements, to meet accreditation standards and prepare cases for the clinical portion of the American Board of Prosthodontics.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Prosthodontics.

## Risk Management and Insurance (RMI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**RMI 5051. Managing Risk. 1 to 3 Credit Hour.**

Risk Management requires the firm to identify opportunities for gain and exposures to unexpected loss. The firm must then assess the potential consequences, and plan to finance the consequences of the adverse event if it happens. This course is designed to introduce the risk management process in the context of general corporate management. Each step in the process will be reviewed in detail, including setting the risk management context, identification of risk, measurement and analysis of potential impact, and appropriate treatment techniques. Risk financing options will be discussed in the context of global insurance and alternative capital markets. While the risk management process encompasses all types of risks, we will focus our identification discussion on the class of risks known as pure risk events; those that pose the threat of a loss if they happen, but no possibility of a gain.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 5101. Managing Human Capital Risk. 3 Credit Hours.**

The course introduces students to the major areas in non-pension employee benefits from the perspective of actuarial practice. It reviews the general considerations in employee benefit design including federal and state regulation, group insurance and the group insurance technique, sources of healthcare benefits, HMOs, PPOs, managed care systems and disability income benefits. The course also studies flexible benefits plans and funding considerations, and examines income tax implications and healthcare cost containment issues. In addition, students learn about group and individual life insurance theory and practice and their use in employee benefits plans.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (RMI 5301, RMI 5401, or RMI 5051)

**RMI 5102. Retirement Plans. 3 Credit Hours.**

Composed of two sections: 1) Reviews basic features and defined contribution approaches of retirement income. Examines sponsor objectives served by the creation of qualified retirement plans, tax and non-tax qualification requirements, and individual account retirement plans. Subjects: profit sharing plans, Section 401(k) and 403(b), employee stock ownership, cash balance, simplified employee pension, and executive retirement arrangements. 2) explores defined benefit plans and plan administration, fundamentals of pension plans with emphasis on the defined benefit approach to providing retirement income. Subjects: plan design, actuarial aspects (costs and funding), investment of plan assets, and plan termination insurance. Provides a basic foundation of retirement income.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 5103. Health Risks. 3 Credit Hours.**

Focuses on: 1) special characteristics of risk management in healthcare institutions/agencies; 2) health insurance issues (as benefit for patients and revenue source for providers); 3) health economics (macro) as related to above.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in HCM 5101.

**RMI 5104. Managing Property and Liability Risk. 3 Credit Hours.**

The course introduces students to the major areas in property and liability insurance from the perspective of actuarial practice. This is a highly participative and writing-intensive course that is designed to broaden perspectives on insurer operations and management of risk with a focus on the following areas: Enterprise Risk Management, Property & Casualty (P&C) Insurance Underwriting, Claims Management, Insurer Distribution Channels, Financial Performance Metrics and Ratings, Insurance Regulation, Reinsurance, Alternate Risk Transfer, Modeling Catastrophic Risk, and Innovation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (RMI 5301, RMI 5401, or RMI 5051)

**RMI 5105. Advanced Applications in Risk Management. 3 Credit Hours.**

Divided into five parts. 1) reviews statistical distributions common in insurance e.g., negative binomial, pareto, and log normal distributions and evaluates their ability to model long-tail losses. 2) considers inferences from insurance data, e.g., the fitting of theoretical distributions using the method of moments and maximum and credibility theory. 3) considers loss reserve runoffs and forecasting future. 4) applies portfolio theory (including correlation analysis) to show the relationship between firm value (net worth) and insurance purchases. 5) reviews discounted cash flow techniques to determine premiums and illustrate financial aspects of captive formation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 5106. Adv Risk Mgmt Models. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 5107. Risk Management, Governance and the Role of the Board. 3 Credit Hours.**

Large scale failures of firms such as Enron, WorldCom, Adelphia, and a long list of others are widely viewed as failures of corporate governance. These cases have drawn significant regulatory attention to the role of corporate governance in preventing or contributing to those failures. One outcome of this increasing scrutiny is the emergence of Enterprise Risk Management (ERM) as a framework for managing risk while maximizing shareholder value in today's complex environment. Board members and senior officers are facing increasing scrutiny of their ERM processes from ratings organizations, standards setting agencies, regulators, clients and investors. Each of these has expectations for the role that the Board of Directors plays in managing risk across the organization. This course will focus on the relationship between corporate governance and ERM, using case analysis and discussion of both US and international governance and ERM standards, and Directors' and Officers' liability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (RMI 5301, RMI 5401, or RMI 5051)

**RMI 5108. Managing International Risk. 3 Credit Hours.**

This course provides an in-depth examination of risk management and insurance from an international perspective. It considers enterprise risk management in a global economy with emphasis on multinational corporations. The course will extensively apply principles of risk management to case studies related to some of the most salient, current international risks including in the areas of political instability, cybersecurity, terrorism, and natural catastrophes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (RMI 5051, RMI 5101, RMI 5104, RMI 5301, or RMI 5401)

**RMI 5109. Operational and Strategic Risk Management. 3 Credit Hours.**

This course includes the study of both Strategic and Operational Risk Management. Operational Risk, broadly speaking, arises from the management of human capital, operational processes and systems including but not limited to other specialized functions such as managing information technology, physical security, supply chain, and environmental health and safety. This course will review and discuss these risks in detail. The curriculum includes the application of risk analysis frameworks and metrics; the development of common mitigation techniques, such as IT security, risk financing, business continuity planning and implementation; and, will examine the most common operational factors that give rise to risk that may cause firms to fail. This course will also review and discuss operational risk management case studies. Strategic Risk Management, according to the Risk and Insurance Management Society, is a business discipline that drives deliberation and action regarding uncertainties and untapped opportunities that affect an organization's strategy and execution. The strategic planning process results in the firm making significant investments to address stakeholder needs and drive long term growth. This begs the question: how can a firm set its overall appetite for risk, and evaluate competing strategic initiatives from a risk/reward perspective in the context of its existing portfolio of risks? The second half of the course will, therefore, explore the connections between strategy and enterprise risk management, including the concepts of risk capacity, risk appetite/tolerance, and risk profile. It will also look at the role of enterprise risk management in effective decision-making and governance from the perspective of a firm's board of directors. Finally, this course will explore several Strategic Risk Management cases including the exploration of how corporate boards address risks that can lead to stakeholder litigation and possible bankruptcy because of damage to reputation, failed mergers, and failure to innovate.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in (RMI 5301, RMI 5401, or RMI 5051)

**RMI 5170. Special Topics. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RMI 5182. Independent Study. 1 to 6 Credit Hour.**

Special study in a particular aspect of insurance and risk under the direct supervision of appropriate graduate faculty member. No more than six hours of independent study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RMI 5190. Special Topics - Risk Management and Insurance. 1 to 6 Credit Hour.**

Special topics in risk management and insurance.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RMI 5282. Independent Study. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RMI 5801. Enterprise Risk Management. 3 Credit Hours.**

This course is designed to introduce the risk management process in the context of general corporate management. Each step in the process will be reviewed in detail, including setting the risk management context, identification of risk, measurement and analysis of potential impact, and appropriate treatment techniques. Risk financing options will be discussed in the context of global insurance and alternative capital markets.

**Level Registration Restrictions:** May not be enrolled in one of the following Levels: Undergraduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 5882. Independent Study. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RMI 5890. Special Topics - RMI. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RMI 9001. Corporate Risk Management. 3 Credit Hours.**

This course examines how corporations, especially financial firms such as banks and insurance companies, manage the risk and uncertainty that is inherent in their businesses. In particular, this course aims to move students to the frontier of academic research on corporations in the Risk Management and Insurance field. In addition to presenting canonical theoretical work, this course also draws from recently published, empirical academic research from the top academic journals in RMI, Corporate Finance, Accounting, and Economics. As a result, it also emphasizes current applied methods and data. NOTE: Students who have completed RMI 9001 with the title "Seminar-Property and Liability Insurance Markets" should not register for RMI 9001 with the title "Corporate Risk Management" as they are the same course and students will not receive credit for taking RMI 9001 more than once.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 9002. Household Finance and Risk Management. 3 Credit Hours.**

This course examines individual and household financial management under risk and uncertainty. Many household decisions are exposed to risk and this course provides an overview including household management of property, labor, health, and longevity risks. The course draws from recently published, empirical academic research. As a result, it also emphasizes current applied methods used to infer causal relationships. NOTE: Students who have completed RMI 9002 with the title "Seminar-Life Insurance and Employee Benefits" should not register for RMI 9002 with the title "Household Finance and Risk Management" as they are the same course and students will not receive credit for taking RMI 9002 more than once.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 9003. Theory of Risk and Uncertainty. 3 Credit Hours.**

This course aims to move students to the frontier of academic research on consumer decision theory under risk and uncertainty. In addition to presenting canonical theoretical work based on the expected utility framework, this course also incorporates psychological and behavioral evidence into economics. As a result, students will be exposed to modern utility frameworks and the experimental methods used to test them. NOTE: Students who have completed RMI 9003 with the title "Seminar in Risk Theory" should not register for RMI 9003 with the title "Theory of Risk and Uncertainty" as they are the same course and students will not receive credit for taking RMI 9003 more than once.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 9004. Healthcare Finance and Insurance. 3 Credit Hours.**

This seminar provides a set of technical skills and knowledge base for the analysis of healthcare financing in different countries. It is designed to be of use to those working: in Ministries of Health, Ministries of Finance, or private insurance companies around the globe; in the economics and marketing departments of international pharmaceutical companies; or on the staff of international agencies. There will be a series of short assignments, two papers, and an exam. It is anticipated that some students will use the assignments as a starting point for their dissertation proposals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 9005. Law and Economics of Liability Markets. 3 Credit Hours.**

This seminar will cover the theoretical and empirical literature of the law and economics of liability. Insurance and tort (and their interaction) are the two major compensations systems and will be a focal part of the class, but others such as administrative compensation funds will be discussed. The first half of the class will focus on the economic theory underlying liability and liability financing. The second half of the class will focus on empirical studies of the law and economics of various markets and public policy responses to liability issues.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may not be repeated for additional credits.

**RMI 9090. Spec Topic Risk Mgt. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**RMI 9183. Directed Study-Risk Mgt. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## School of Dentistry (DENT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **DENT D001. 1st Yr Dental Sch Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D002. 2nd Yr Dental Sch Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D003. 3rd Yr Dental Sch Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D004. 4th Yr Dental Sch Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D100. Biochemistry. 4 Credit Hours.**

The goal of Biochemistry is to permit students to understand human biochemistry in health and disease. The student must become familiar with the basic biochemical pathways and the structures of important metabolites since this basic information underlies discussions of biochemical regulation throughout the course. Some emphasis is given to nutritional concerns in dental disease and treatment.

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D101. General and Oral Histology. 4 Credit Hours.**

The dental histology course will be taught in the following sequence. First you should read the textbook prior to coming to laboratory. The next part of the sequence is the laboratory. The laboratory portion of the course is taught in Lecture Room A. The histology laboratory is also on Canvas. The Canvas site contains the Laboratory, which is a series of exercises with text and pictures that we will go through during each laboratory session. Students will work in groups and will go through the Lab under the guidance of the laboratory instructor. The instructor will project the images and if students have laptop computers they can bring them into lab to facilitate the learning process. Otherwise you should bring in a copy of the images for the lab and you will label these images in class. The laboratory is the place where we will be discussing the basic structure of cells, tissues and organs. The next part of course is the lecture. During the lecture the lecturer will be building upon the material that was learned in laboratory and add the functional and cell biological information that you need to know.

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D108. Science in Dental Practice I. 1 Credit Hour.**

Students receive face to face and online instruction in the scientific method of inquiry and research methodology including how research is conducted, evaluated and applied to patient care. The practicum component of the course requires that each student attend and participate in four annual Scholarly Activity and Research (SAR) Days during the four years of dental education.

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D120. The Practice and Profession of Dentistry. 2 Credit Hours.**

The primary goal of the Practice and Profession of Dentistry course is to introduce the new dental student to the many aspects of the profession. Upon entrance into the clinic, the student will be expected to not only apply the knowledge and skills obtained during the first two years of their education, but also to manage an entire host of other factors. This course, which is divided into learning modules, will introduce the new professional student to the topics of ethics and professionalism as a student and a practitioner; legal and regulatory aspects of dentistry; the dental team; and practice management.

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D131. Behavioral Sciences. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

### **DENT D139. DPH I: Cariology, EBD and Principles of Prevention. 1 Credit Hour.**

The Dental Public Health I course is designed to provide foundation knowledge and experiences on the important role that dentists play in promoting health not only for their patients but also in the communities where they work. Temple University Kornberg School of Dentistry has had a long history of community service and engagement with different population groups. In this course you will learn in lectures, discussions and exercises the foundation knowledge of evidence-based practice to promote oral health among your patients and the community where you will practice.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D150. Dental Materials I. 1 Credit Hour.**

This course presents the basic science foundation for understanding the behavior and evaluation of dental materials, specific properties for dental materials presented in the course, and practical properties of these materials for application clinically. The course includes thirteen lectures, four of which are focused on properties of materials and nine on specific dental materials. A required group project involves creating an online wiki site through Blackboard involving critical thinking and evidence-based evaluation of dental materials.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D161. Restorative Dentistry I for Advanced Standing. 4 Credit Hours.**

The goal of the summer session course D161, Restorative Dentistry I for Advanced Standing, is to prepare the advanced standing student to integrate into the sophomore class of the traditional dental curriculum in the fall semester. Pre-requisite subjects and skills for future classes are covered, which will orient the advanced standing student to instrumentation, materials, and procedures used in RDIII and RDIV. Student's previous knowledge in dental anatomy and occlusion will be assessed. Normal TMJ anatomy is considered in relationship to centric relation and maximum intercuspation. The different possible occlusal schemes in static and dynamic occlusion are studied. Students learn the principles and application of the dental articulator and face bow. The subjects of cariology and caries risk assessment are introduced and the ICDAS system of caries classification is reviewed. Students learn the principles of tooth preparation that contribute to resistance, retention, and convenience form and practice the application of these principles in the preparation of direct composite and amalgam restorations, as well as crown and fixed partial dentures.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D162. Restorative Dentistry I - Lecture. 2 Credit Hours.**

Course D162 is designed to provide foundation knowledge and experiences of the anatomy of the primary and permanent dentitions and the surrounding structures. In addition, it is expected that the student will learn occlusion and the anatomy of the temporomandibular joint through lectures.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D163. Restorative Dentistry I - Lab. 2 Credit Hours.**

The laboratory course D163 is designed to learn and develop hand skills to restore typodont teeth to proper shape and function using wax. The course will provide foundation knowledge and experiences of the anatomy of the primary and permanent dentitions and the surrounding structures. In addition, students will learn occlusion and the anatomy of the temporomandibular joint through laboratory preclinical sessions.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D164. Projects in Restorative Dentistry Advanced Standing. 8 Credit Hours.**

This is a combined lecture and laboratory course, which prepares the advanced standing student to enter the Restorative Dentistry curriculum. The focus is on laboratory skills essential to the fabrication of custom trays, primary and secondary models, articulation, waxing, and casting of a gold crown. Additional exercises in tooth preparation and provisionalization are included. Information is distributed by use of assignments in textbook, laboratory manual, hand out, and lectures.

**Repeatability:** This course may be repeated for additional credit.

**DENT D200. Inflammation, Infection and Wound Healing. 3 Credit Hours.**

The course provides the foundation knowledge (physiology, microbiology, immunology and pathology) necessary for clinical decision making related to the conditions of inflammation, infection and wound healing. Emphasis is on the oral and maxillofacial complex and the dental management of patients with these conditions, including pharmacologic therapies.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D202. Gross Anatomy. 6 Credit Hours.**

The subject matter for Dental Gross Anatomy has been divided into three units: Unit I - Back, Spinal Cord, Posterior Triangle of the Neck, and Upper Extremity; Unit II - Head and Neck; Unit III - Thorax and Abdomen. The pelvic-perineal regions and lower extremity will not be studied. You are responsible for knowing all material you are directed to study in the "Dental Gross Anatomy Course Dissection Guide" and all material presented in the Conferences and Lectures.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D203. Neuroanatomy. 2 Credit Hours.**

Neuroanatomy for the undergraduate dental student provides a foundation of fundamental knowledge from which the student may develop an appreciation of the nervous system in both health and disease. The student will acquire a general understanding of structure and function of the nervous system that will be neither exhaustive in scope nor superficial in approach.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D204. The Nervous System and Pain. 3 Credit Hours.**

The course provides the foundation knowledge (physiology, microbiology, immunology and pathology) necessary for clinical decision making related to the normal and abnormal function of the nervous system. Emphasis is on the oral and maxillofacial complex, physical diagnosis and dental management of patients with pain and pathologic conditions of the nervous system, including pharmacologic therapies.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D210. Postnatal Craniofacial Growth and Cephalometrics. 2 Credit Hours.**

Postnatal Craniofacial Growth & Cephalometrics is a lecture series which includes one workshop and one problem based learning experience. Objectives of the course are to introduce the predoctoral student to the processes of normal craniofacial growth and development in order to recognize and identify deviations from normal.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D211. Behavioral Science I. 1 Credit Hour.**

This course is provided in the freshman year of the DMD program. The course consists of classroom lecture and discussion. It is the first course in a two-course sequence designed to introduce students to the importance of behavioral science as it relates to dentistry.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D250. Dental Materials II. 1 Credit Hour.**

The overall goal of this course is for the freshman dental student to continue to attain dental biomaterials competency through the development and application of foundation knowledge in materials science and in specific dental materials (gypsum materials for investments and die stones, high temperature investment materials, hydrocolloid/alginate and elastomeric impression materials, casting alloys, casting procedures, soldering materials and procedures, porcelain and ceramic materials, ceramic-metal systems, cements and luting materials, polymer and denture base resins, and dental implants/tissue engineering materials) necessary for completing the preclinical, clinical and laboratory phases of the dental curriculum. This didactic material also involves attainment of a working knowledge of these dental materials including their selection, use and limitations.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D251. Dental Materials I & II. 2 Credit Hours.**

This two credit course presents the basic science foundation for understanding the behavior and evaluation of dental materials, specific properties for dental materials presented in the course, and practical properties of these materials for application clinically. This blended course includes assigned readings, online asynchronous PowerPoint presentations, selected online class capture lecture presentations, and completion and review of assigned study questions. Three current materials-oriented journal articles are assigned. Two live class sessions are conducted, one at the beginning of the course for orientation and initial presentations, and one toward the end of the course for seminar-style discussion and review of assigned materials. Assessment is by an in-class written multiple short essay examination based on study questions. Grading is Pass/Fail. Required text is: von Fraunhofer A. Dental Materials at a Glance. Wiley-Blackwell. Ames, Iowa. 2010. ISBN 978-0-8138-1614-2.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D252. Advanced Standing Behavioral Science I. 1 Credit Hour.**

Behavioral Science I blended learning course consists of classroom lecture and discussion. It is the first course in a two-course sequence designed to introduce students to the importance of behavioral science as it relates to dentistry.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D253. Advanced Standing Periodontology. 1 Credit Hour.**

Periodontology is a blended learning lecture series examining the structural biology of the periodontium in health and disease, with consideration of clinical, histologic, biochemical, microbiologic and immunologic features and risk factors. An overview examination of plaque-related periodontal diseases as specific microbial infections in susceptible human hosts is provided, with emphasis on gingivitis.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D254. Advanced Standing Dental Public Health. 1 Credit Hour.**

The Dental Public Health blended learning course is designed to provide foundation knowledge and experiences on the important role that dentists play in promoting health not only for their patients but also in the communities where they work. Temple University Kornberg School of Dentistry has had a long history of community service and engagement with different population groups. In this course you will learn in lectures, discussions and exercises the foundation knowledge of evidence-based practice to promote oral health among your patients and the community where you will practice. This course will cover three areas: 1) Foundation knowledge for the field of community oral health and dental practice, 2) Principles of oral health promotion, and 3) Prevention of dental caries.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D255. Advanced Standing Restorative Dentistry I Projects. 8 Credit Hours.**

Projects in Restorative Dentistry for Advanced Standing students is a combined lecture and laboratory course, which prepares the student to enter the Restorative Dentistry curriculum. The focus is on laboratory skills essential to fabrication of custom trays, primary and secondary models, articulation, waxing and casting of a gold crown. Additional exercises in tooth preparation and provisionalization are included. Information is distributed by use of assignments in textbook, laboratory manual, hand out and lectures.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D261. Restorative Dentistry II for Advanced Standing. 4 Credit Hours.**

The goal of the fall semester course D261, Restorative Dentistry II for Advanced Standing, is to review and update the basic concepts required for restorative procedures utilizing dental amalgam and composite resin, in preventive procedures, minimally invasive restorations, conservative and conventional preparations, veneers, and foundations for full coverage crowns. Students apply the principles of caries removal and tooth preparation that contribute to resistance, retention, and convenience form. Students practice the application of these principles in the preparation of direct composite and amalgam restorations, as well as foundations for crowns and fixed partial dentures. Students will be afforded the opportunity to learn and demonstrate knowledge and technical skills required for academic advancement and patient treatment.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D262. Restorative Dentistry II Lecture. 4 Credit Hours.**

The primary goal of Restorative Dentistry II Courses D262 and D263 is to introduce basic concepts required for restorative procedures utilizing dental amalgam, composite resin, and full coverage cast restorations. Special emphasis will be placed on cavity preparation design and correct manipulation of dental materials. Students will be afforded the opportunity to learn and demonstrate knowledge and technical skills required for academic advancement and patient treatment. Course material will be presented in lectures, reading assignments, demonstrations, and laboratory exercises. To use time efficiently and for laboratory projects to be meaningful learning experiences, it is necessary that you complete the reading assignments prior to the session in which the information is utilized.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D263. Restorative Dentistry II Lab. 4 Credit Hours.**

The primary goal of Restorative Dentistry II Courses D262 and D263 is to introduce basic concepts required for restorative procedures utilizing dental amalgam, composite resin, and full coverage cast restorations. Special emphasis will be placed on cavity preparation design and correct manipulation of dental materials. Students will be afforded the opportunity to learn and demonstrate knowledge and technical skills required for academic advancement and patient treatment. Course material will be presented in lectures, reading assignments, demonstrations, and laboratory exercises. To use time efficiently and for laboratory projects to be meaningful learning experiences, it is necessary that you complete the reading assignments prior to the session in which the information is utilized.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D267. Oral Radiology. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D300. Human Systems and Disease I. 5 Credit Hours.**

The course provides the foundation knowledge (physiology, microbiology, immunology, pathology and pharmacology) necessary for clinical decision making related to the normal and abnormal function of the cardiovascular, respiratory and renal systems. Emphasis is on dental management and history taking for patients with diseases of these systems. The physical examination techniques commonly used in dentistry that relate to the cardiovascular and respiratory systems are taught and practiced.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D301. Human Systems and Disease II. 5 Credit Hours.**

The course provides the foundation knowledge (physiology, microbiology, immunology, pathology and pharmacology) necessary for clinical decision making related to the normal and abnormal function of the endocrine-reproductive, gastrointestinal, hematologic and musculoskeletal systems. Emphasis is on dental management and history taking for patients with diseases of these systems.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D339. Oral Surgery I. 1 Credit Hour.**

This course concentrates on fundamentals of Oral and Maxillofacial Surgery.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D350. Dental Materials II. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D360. Restorative Dentistry III Lecture. 4 Credit Hours.**

The Restorative Dentistry III (D360) lecture course is a continuation and further development of the material presented in freshman year Restorative Dentistry I & II. This course is closely integrated with the laboratory course (D361), both being designed to introduce fundamental concepts required for restorative dentistry procedures utilizing metal-ceramic and all-ceramic crowns, porcelain laminate veneers, fixed partial dentures, cast gold onlays, restoration of endodontically treated teeth and single tooth implants. Emphasis will be placed on principles of tooth preparation and fabricating provisional and permanent restorations along with correct manipulation of dental materials related to these restorations, providing integration of clinical and basic sciences. Problem solving, critical thinking, metacognitive and self-directed learning skills are incorporated.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D361. Restorative Dentistry III Lab. 4 Credit Hours.**

The Restorative Dentistry III (D361) laboratory course is a continuation and further development of the material presented in freshman year Restorative Dentistry I & II. This course is closely integrated with the lecture course (D360), both being designed to introduce fundamental concepts required for restorative dentistry procedures utilizing metal-ceramic crowns, porcelain laminate veneers, fixed partial dentures, cast gold onlays, restoration of endodontically treated teeth and single tooth implants. Emphasis will be placed on principles of tooth preparation and fabricating provisional and permanent restorations along with correct manipulation of dental materials related to these restorations, providing integration of clinical and basic sciences. Problem solving, critical thinking, metacognitive and self-directed learning skills are incorporated.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D373. Principles of Periodontology I. 2 Credit Hours.**

Principles of Periodontology I (DENT D373) is a lecture series that examines the structural biology of the periodontium in health and disease, with consideration of clinical and histologic features. This course also discusses the local, behavioral, and systemic etiological and predisposing factors of periodontal diseases, and the impact of periodontal infection on systemic health. The second half of the course includes the methods used in clinical and radiographic evaluation of the patient's periodontal health, periodontal risk assessment and prognosis, and development of a treatment plan of the diagnosed periodontal disease. Periodontal treatment of medically compromised patients and the management of periodontal emergencies will also be covered.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D401. Dental Ethics and Jurisprudence. 1 Credit Hour.**

Lectures and case presentations provide information about relevant areas of the law, including: contracts, employment issues, malpractice, risk management, informed consent, recordkeeping, and legal obligations. Students are instructed on the scope of practice, prescription writing limitations, Drug Enforcement Agency issues, and the impact of federal, state and local laws on the dental profession.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D402. DPH II - Health Promotion in Populations. 1 Credit Hour.**

This course provides an introduction to the public health and dental public health principles, practices, and achievements. The oral health status and the needs of the U.S. population across the lifespan, including underserved populations are discussed. Students are introduced to the dental health care delivery systems in the U.S. and various factors influencing these systems. This course provides the student the basic understanding of oral health policies, how they are developed and implemented. Dental professions' role in advocating for optimal oral health will be discussed. An overview of the definition of health literacy, how health literacy and oral health literacy are measured, and the role of oral health literacy in promoting oral health and accessing dental care in both private practice and in public health settings will be elaborated.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D403. Advanced Restorative Dentistry Lecture and Lab. 3 Credit Hours.**

Advanced technique in Restorative Dentistry, including those related to replacement of missing teeth, CAD/CAM technology and other advances in modern dental care.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D408. Oral Pathology I. 3 Credit Hours.**

diseases and developmental abnormalities that commonly affect the oral and maxillofacial complex. When appropriate, the radiographic and histologic features of pathologic processes are discussed. Students are taught to formulate appropriate clinical differential diagnoses for soft tissue abnormalities of the oral and perioral region. Students receive instruction in the management of patients with common oral mucosal diseases. Indications for patient referral to medical or dental specialists for diagnostic evaluation or disease management are presented. When applicable, information related to basic and clinical sciences will be discussed. Integration of the principles learned in clinical sciences and basic sciences (general and systems pathology, histology, embryology, etc.) will be addressed as applicable. Critical thinking is emphasized in case-based small group modules.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D420. Intro Clinical Dentistry. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D421. Treatment Planning. 2 Credit Hours.**

The sophomore course in Treatment Planning is designed to impart a foundation level of knowledge required in creating fully functional dental records, collecting and evaluating all pertinent medical and dental findings for the establishment of proper diagnosis, and the development of a sequential treatment plan in accordance with comprehensive general dental practice care.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D422. Medical Emergencies. 1 Credit Hour.**

This course presents medical emergencies that may arise during routine dental care and how to treat them.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D442. Pre-Clinical Radiography. 2 Credit Hours.**

The fundamentals of periapical, bitewing, and occlusal radiographic techniques are presented in a pre-clinical laboratory model.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D452. Endodontology Lecture. 2 Credit Hours.**

The Preclinical Endodontology lecture series encompasses the biology of the dental pulp and the management of pulpal and periapical pathological conditions using evidence based presentations. The pulp and periapical tissues are examined from the healthy state through the progression of inflammation and infection. Symptomatology and endodontic differential diagnosis through the use of communication with the patient, clinical examination, etiology determination, diagnostic testing and radiology are discussed. Variations of tooth and pulpal anatomy are examined. The rationales for the need of Endodontic therapy are considered from a biologic viewpoint. Patient management and the importance of informed consent are also discussed. The materials and methods of endodontic procedures are discussed including instruments, medicaments, pretreatment, access preparation, instrumentation, obturation and post-treatment techniques. Aspects of pediatric endodontics and endodontic emergencies are examined including management of cases which include the psychological aspects of pain. Case selection is appraised as it relates to associated systemic and local conditions including errors which could occur through treatment. Students are encouraged to use critical thinking throughout the course through class interaction such as small group sessions, discussion and in-class assignments.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D453. Endodontology Laboratory. 1 Credit Hour.**

This is a preclinical technique course in which each student will perform various nonsurgical endodontic techniques on a series of extracted human teeth. The techniques will be taught with the aid of lectures, tapes, assigned reading in textbooks and demonstrations. Supervision will be by the staff of the Advanced Education and Predoctoral Divisions of the Department of Endodontology.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D456. Restorative Dentistry IV Lecture. 3 Credit Hours.**

Complete and removable partial denture prosthodontics - lecture phase.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D457. Restorative Dentistry IV Lab. 3 Credit Hours.**

To provide the student with a basic understanding of biomechanical principles and technical skills required in the restoration of the complete and partially edentulous patient.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D465. Oral Radiology. 1 Credit Hour.**

The fundamentals of the production and interaction of x rays are presented in lecture form. This is followed by the production of the radiograph (physics, chemistry and technique), special imaging techniques (digital dental radiography, CT, CBCT, MRI), selection criteria, quality assurance, basics of radiation biology and radiation protection.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D466. Pediatric Dentistry Lecture and Laboratory. 3 Credit Hours.**

Pediatric Dentistry is an age-defined specialty that provides both primary and specialty comprehensive preventive and therapeutic care for infants and children through adolescence, including those with special health care needs. Pediatric Dentistry (D466) will build on aspects of restorative, endodontic, orthodontic and surgical principles so that diagnosis and treatment can be tailored to the primary and young permanent dentitions. This lecture and lab series is designed to prepare the undergraduate dental student for the clinical experience of treating children and adolescents in the Pediatric Dental Clinic and in a general practice setting.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D473. Principles of Periodontology II. 2 Credit Hours.**

Principles of Periodontology II (D473) is a lecture and lab series examining plaque control techniques, manual periodontal instrumentation, sonic and ultrasonic periodontal instrumentation, periodontal re-evaluation, phase II and supportive periodontal therapy, use of local and systemic antimicrobial agents in periodontal therapy, use of host modulation agents in periodontal therapy, and use of adjunctive diagnostic aids in periodontics.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D478. Local Anesthesia and Pain Control. 1 Credit Hour.**

To familiarize students with the full scope of pain control and management of the anxious patient using lectures and clinical laboratories to administer and receive injections and nitrous oxide sedation.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D491. Clinical Caries Management Throughout Life: A Pragmatic Course. 2 Credit Hours.**

This clinical application course will introduce the steps in caries management from detection and classification of caries lesions using clinical, radiological, and transillumination, risk assessment of behavioral, dietary, and medical conditions, risk classification, diagnosis, and developing and executing a care plan (treatment plan) for in-office and at home care.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D505. Temporomandibular Disorders (TMD) and Oral Medicine. 1 Credit Hour.**

Students will study temporomandibular disorders (TMD) of the craniofacial muscles, temporomandibular joints, masticatory system, nervous system and facial pain. Students will also study the dental management considerations of patients with systemic diseases that impact the oral condition, including but not limited to patients undergoing or with a history of head and neck cancer treatment. The acute and long-term impact of cancer therapies (especially head and neck radiation) on the various systems of the head and neck, including the oral cavity, will be studied. An emphasis will be placed on the role of the general dentist in the diagnosis and management of TMD, and medically complex patients with dental needs. Course information is routinely updated to ensure emerging information and current best evidence is integrated into the course.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D506. Oral Pathology II. 3 Credit Hours.**

Students receive instruction regarding the etiology, clinical features, histopathology, pathogenesis, treatment, and prognosis of diseases and developmental abnormalities that commonly affect the oral and maxillofacial complex. When appropriate, the radiographic features of pathologic processes are discussed. Students are taught to formulate appropriate clinical and radiographic differential diagnoses for soft and hard tissue abnormalities of the oral and perioral region. Indications for patient referral to medical or dental specialists for diagnostic evaluation or disease management are presented. Critical thinking is emphasized in case-based modules. Blackboard will be used as an adjunct teaching tool for instruction (subject material and images) and posting of grades. Case based clinical pathologic correlation (CPC) sessions will be held during the course at the end of each differential diagnosis section.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D510. Basic Interdisciplinary Implant. 2 Credit Hours.**

Basic Interdisciplinary Implantology is a lecture and laboratory series. This course will provide an introduction to historical and technologic development of present day dental implants. It will examine the implant-bone interface and the concept of osseointegration, along with discussion on the biomechanical consideration directed at both the dental implant and prosthesis. A review of the process for the formulation of a preoperative patient evaluation, pre surgical preparation, and comprehensive implant treatment planning will be reviewed. This will include treatment options discussed based on prosthetic need and surgical techniques. This course will also incorporate impression taking, fabrication of a surgical stent, and implant placement. Insights into potential complications, advanced surgical procedures related to dental implants, and preventative maintenance protocol will also be presented in the lectures.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D552. Endodontology. 1 Credit Hour.**

Endodontology (D552) is a lecture series designed to offer the student fundamental knowledge in endodontics making emphasis in its clinical application. With a biological perspective, topics such as traumatic injuries of the tooth, endodontic surgery, as well as relationship between endodontics and other dental and medical disciplines is discussed, helping the student to make a smooth transition to the endodontic clinic.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D553. Restorative Dentistry V. 2 Credit Hours.**

This course is designed to build on DENT D421 (Treatment Planning) providing a further and more detailed knowledge of comprehensive treatment planning. This includes collecting and evaluating dental records as well as pertinent medical and dental findings. Students will understand how to establish a proper diagnosis. Utilizing the obtained records and diagnoses, the student will learn how to develop treatment options and ultimately a sequential treatment plan. Through weekly small group seminars, emphasis will be placed on the thought process of gathering and evaluation of pertinent data resulting in the development of treatment options as well as techniques for communicating a treatment plan to patients. The small group meetings will be followed by the class meeting in a lecture format where treatment planning concepts as well as treatment principles used in the treatment cases will be reviewed and reinforced.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D567. Oral Radiology. 1 Credit Hour.**

This course consists of a series of lectures that deal with fundamentals of radiographic interpretation, radiation biology and protection, selection criteria of radiography, the appearances of normal radiographic anatomy, variations of normal, and abnormalities or disease processes, which are common in the oral and maxillofacial region.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D568. Oral Surgery. 1 Credit Hour.**

A continuation of D339, emphasizing the basic Oral and Maxillofacial management of patients within the scope of the general practitioner. Some advanced concepts are introduced.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D573. Periodontal Therapy and Treatment Planning. 1 Credit Hour.**

A team approach, lecture series course providing evidence-based principles and case based examples of the surgical treatment of periodontal disease. It will present a variety of procedures including the general principles of periodontal surgery, flap designs, gingivectomy techniques, resective osseous surgery, regenerative procedures using bone grafting materials, membranes and biologics, management of furcation problems, periodontal plastic and esthetic surgery and care before and after the surgical procedures. Emphasis will be placed on proper diagnosis and treatment planning through case presentations in class and through a Wiki project. Course prerequisites: successful completion of the sophomore year of the DMD program, and enrollment in junior year.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D589. Jr. Summer Clinic I. 9 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D591. Jr. Practice of Dentistry. 7 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D599. Jr. Summer Clinic II. 6 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D600. Senior Summer Clinic. 12 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D608. Radiology. 1 Credit Hour.**

This course consists of a series of lectures that deal with the concepts of radiographic interpretation of maxillofacial abnormalities or diseases. The course goals are to provide the information and experience necessary for the student to be able to recognize abnormalities or diseases that commonly affect the maxillofacial complex. Radiographic, CT and MRI images are used extensively to demonstrate representative interpretations.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D609. Orthodontics. 1 Credit Hour.**

This course introduces the student to the practice of orthodontics. Also included in the course are presentations of armamentarium and novel systems of orthodontic treatment. The Invisalign System is emphasized. Primarily, this course is designed to enable the student to interact with the orthodontic specialist and the patient for the management of complex orthodontic problems. Additionally, the student will receive practical information on managing the dental practice.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D610. Adv Interdis Implant. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D611. Practice Management II. 1 Credit Hour.**

This course aims to inform students about different areas in Practice Management that can be applied in the practice of dentistry. Since dental students are about to enter the senior year, this course will provide information on different business models, areas or marketing, finance and accounting, as well as prepare students to practice dentistry in a successful business environment.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D612. Advanced Restorative Dentistry Lecture & Lab. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D637. Practice Management I. 1 Credit Hour.**

The goal of Practice Management I is to inform and acquaint the junior student with basic principles and philosophies of practice management, and with the latest and most modern dental technology available today.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D644. Dentistry for Patients with Special Needs. 1 Credit Hour.**

Dentistry for Patients with Special Needs integrates principles of clinical management with behavioral and communication skills needed to provide comprehensive dental care to the special needs population. This course emphasizes practical skills that are evidence based, sensitive to context and applicable in a private practice.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D660. Behavioral Science II. 1 Credit Hour.**

This course will prepare students to assess and treat dental anxiety and dental pain. In addition, the major types of psychopathology that you may encounter in your patients are reviewed, with suggestions for appropriate management techniques and referrals.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D662. Restorative Dentistry VI. 1 Credit Hour.**

This course emphasizes the practical application of fundamental principles of restorative dentistry with particular attention paid to evidence based decision making. The first part of this course will concentrate on how treatment outcomes are measured and assessed. The second part of the course will present several advanced concepts in restorative dentistry.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D666. Pediatric Dentistry. 1 Credit Hour.**

Pediatric Dentistry is an age-defined specialty that provides comprehensive preventive and therapeutic care for infants and children through adolescence, including those with special health care needs. Pediatric Dentistry (D666) will build on and modify specific aspects of restorative, endodontic, orthodontic and surgical principles so that diagnosis and treatment can be tailored to the primary and young permanent dentitions. This course is designed to prepare the undergraduate dental student for the clinical experience of treating children and adolescents in the Pediatric Dental Clinic and ultimately in a general practice setting.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D668. Oral Surgery. 1 Credit Hour.**

A continuation of D568, introducing more advanced oral and maxillofacial concepts to acquaint the student with the full scope of Oral and Maxillofacial Surgery.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D671. Ortho Consideration in General Dental Practice. 1 Credit Hour.**

This didactic course introduces the student to concepts of orthodontic treatment in the young and the adult. The distinction between "orthodontic tooth movement" and "orthodontic treatment" is emphasized. Adjunctive orthodontics and the role of tooth movement in general dental practice are emphasized. Interactions between specialties and sequencing of treatment are accentuated. This course is designed for the student to make the transition from preclinical to clinical activities in orthodontics.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D674. Admissions Clinic I. 1 Credit Hour.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D675. Emergency/Oral Surg. Cl.. 2 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D676. Radiology Clinic I. 1 Credit Hour.**

This course consists of a series of duty rotations for junior dental students in Diagnosis and Radiology Clinics. Students practice radiographic techniques and interpretations in a clinical environment. Intra and extra-oral radiographic techniques and writing radiographic reports will be emphasized in the course.

**Repeatability:** This course may be repeated for additional credit.

**DENT D691. Orthodontics-Clinic. 1 Credit Hour.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D692. Endodontology-Clinic. 2 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D693. Periodontology Clinic. 2 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D696. Pediatric Dent-Clinic. 2 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D697. Restor Dent Clinic Jr. 6 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D700. Summer Clinic II. 6 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D790. Sr. Pract of Dentistry. 12 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D801. Science in Dental Practice II. 2 Credit Hours.**

In this course, students receive online instruction in the scientific method of inquiry and research methodology, including how research is conducted, evaluated and applied to patient care. Students are taught lifelong learning skills on how to access, critically appraise, and apply scientific literature to evidence based oral health care. The ethics of research and ethical decision making in human and animal research is presented. Critical thinking and problem solving is emphasized, particularly as it relates to scientific inquiry, research methodology and critical appraisal of scientific evidence. Blackboard will be used as an adjunct teaching tool for instruction as needed, and for the posting of grades. Online instruction will be through Temple Blackboard site for the course.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D808. Comprehensive Care. 1 to 3 Credit Hour.**

This course has two components, as follows: 1) Grand Rounds Case Presentations: Each student will prepare and present a concise and structured analysis of an intermediate or complex restorative patient care case that he/she has completed at least to point of delivery of a prosthesis. Within intermediate and complex cases, treatments that can be presented are failed treatments that are being redone or treatments where the patient was not satisfied. The analysis will include baseline assessment, treatment plan, comprehensive care provided, outcomes assessment and evaluations of Patient Wellness Reports (PWR). Each presentation will be followed by questions from a calibrated panel of multidisciplinary faculty. 2) Advanced Topics Seminars: An interdisciplinary group of faculty and guest speakers will present a senior seminar series on a review of some fundamental concepts in dentistry, including restorative dentistry, periodontology, endodontology, prosthodontics, digital dentistry, TMD, patients with special needs and disabilities, pediatric dentistry, and complex treatment planning, etc., as well as advanced topics in dentistry.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D809. Practice Management III. 1 Credit Hour.**

This course applies principles of practice management through a seminar series augmented with experiential learning opportunities (Practice Management in Action/PMIA rotation). Students will work with dentists, other dental care providers and staff, from those who manage the first contact with patients to those who are responsible for billing and recall. They will learn, in real-time, about communication skills and patient management.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D810. DPH III: Community Health Engagement. 2 Credit Hours.**

This course applies principles of community health engagement and aims to engender a life-long appreciation for community service. The course will be structured as a seminar series augmented with experiential learning opportunities (Community Outreach Rotation). Students will meet as a class with the course director to explore principles of community engagement and understand the core objectives of the course outreach experience.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D874. Admissions Clinic II. 1 Credit Hour.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D875. Emergency/Oral Surg. Cl.. 3 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D876. Radiology Clinic II. 2 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D891. Orthodontics-Clinic. 1 Credit Hour.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D892. Endodontology-Clinic. 3 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D893. Periodontology-Clinic. 3 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D896. Pediatric Dent-Clinic. 3 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D897. Restor Dent Clinic Sr. 12 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D898. Oral Surgery-Clinic. 2 Credit Hours.**

**Repeatability:** This course may be repeated for additional credit.

**DENT D900. Practice of Dentistry IV. 6 Credit Hours.**

An extension of clinical responsibilities for students who are deficient in clinical requirements. This summer session clinical course will enable the student to complete degree necessary requirements.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D903. Practice of Dentistry V. 9 Credit Hours.**

This course is designed for students who have exceeded the 4 year DMD program who are still deficient in clinical experiences. Students are required to demonstrate additional skills in all clinical disciplines towards achieving the DMD degree.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D932. Perio Honors Program. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D982. Operative Dentistry II. 2 Credit Hours.**

Requirements for the course include completing 11 composite resin restorations, 7 Amalgam restorations, application of rubber dams, completion of "Operative Dentistry Skills" examinations, and two operative competencies (Amalgam and Composite resin).

**Repeatability:** This course may not be repeated for additional credits.

**DENT D983. Dental Public Health Science. 2 Credit Hours.**

Dental Ethics is concerned with medical ethical issues as they relate to dentistry, in the context of a patient centered educational experience. Instruction consists of lectures and class discussions of cases. Readings and cases will be made available electronically before the scheduled lecture. Students should read the material and cases before coming to class, print this material and bring it with them to class. To familiarize the entering professional with various areas of law, enabling legal, ethical, and profitable practice, with lessened risk of lawsuit. The Dental Public Health I course is designed to provide foundation knowledge and experiences on the important role that dentists play in promoting health not only for their patients but also in the communities where they work. Temple University Kornberg School of Dentistry has had a long history of community service and engagement with different population groups. In this course you will learn in lectures, discussions and exercises the foundation knowledge of evidence-based practice to promote oral health among your patients and the community where you will practice. This course will cover three areas: 1) Foundation knowledge for the field of community oral health and dental practice, 2) Principles of oral health promotion, and 3) Prevention of dental caries.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D984. Endodontics. 1 Credit Hour.**

A lecture series designed to offer the student fundamental knowledge in endodontics making emphasis in its clinical application. With a biological perspective, topics such as traumatic injuries of the tooth, endodontic surgery, as well as relationship between endodontics and other dental and medical disciplines is discussed, helping the student to make a smooth transition to the endodontic clinic.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D985. Oral Maxillofacial Pathology Medicine Surgery. 2 Credit Hours.**

To familiarize students with the full scope of pain control and management of the anxious patient using lectures and clinical laboratories to administer and receive injections and nitrous oxide sedation. This course presents medical emergencies that may arise during routine dental care and how to treat them.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D986. Pre-Clinic Orthodontics. 1 Credit Hour.**

The candidate will be enrolled in the Temple University Blackboard Orthodontic Clinic work group which contains the educational modules Orthodontic Diagnosis Part I and Part II. These contain pre-clinical didactic information for orthodontic diagnosis and treatment planning necessary to meet requirements for the orthodontic clinical course.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D988. Pediatric Dentistry. 3 Credit Hours.**

Pediatric Dentistry is an age-defined specialty that provides both primary and specialty comprehensive preventive and therapeutic care for infants and children through adolescence, including those with special health care needs. Pediatric Dentistry (D466) will build on aspects of restorative, endodontic, orthodontic and surgical principles so that diagnosis and treatment can be tailored to the primary and young permanent dentitions. This course is designed to prepare the undergraduate dental student for the clinical experience of treating children and adolescents in the Pediatric Dental Clinic and in a general practice setting. Pediatric Dentistry is an age-defined specialty that provides comprehensive preventive and therapeutic care for infants and children through adolescence, including those with special health care needs. Pediatric Dentistry (D666) will build on and modify specific aspects of restorative, endodontic, orthodontic and surgical principles so that diagnosis and treatment can be tailored to the primary and young permanent dentitions. This course is designed to prepare the undergraduate dental student for the clinical experience of treating children and adolescents in the Pediatric Dental Clinic and ultimately in a general practice setting.

**Repeatability:** This course may not be repeated for additional credits.

**DENT D989. Pediatric Dentistry. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D990. Periodontology. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D991. Orthodontics. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D992. O M P M S. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D993. Operative Dentistry Clinic. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D994. Fixed Prosthodontics I. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D995. Fixed Prosthodontics II. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D996. Removable Prosthodontics I. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D997. Removable Prosthodontics II. 2 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D998. Endodontics I. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

**DENT D999. Endodontics II. 1 Credit Hour.**

**Repeatability:** This course may not be repeated for additional credits.

## School of Medicine (MEDS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**MEDS 5003. Fundamentals of Biochem. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 5004. Fundamentals of Physiology. 4 Credit Hours.**

Fundamentals of Physiology addresses important topics including membranes and membrane transport, excitation and contraction of skeletal, smooth and cardiac muscle, the heart and blood flow, renal physiology and lung physiology. Important medically related examples will be discussed. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 5006. Microbio and Immunology. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 5007. Human Anatomy. 4 Credit Hours.**

Human Anatomy provides instruction in gross anatomy for postbac students. Important medically related examples will be discussed. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 5008. Medical Pharmacology. 4 Credit Hours.**

Medical Pharmacology provides instruction in pharmacology for postbac students. Important medically related examples will be discussed. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 5009. Biochemistry of Life Systems. 2 Credit Hours.**

This course provides students with an understanding of the basic principles of biochemistry related to pre-health competencies tested by the MCAT. Topics related to these competencies include: protein structure and function; enzyme function and regulation; transmission of genetic information, membrane structure and composition, bioenergetics, fuel metabolism and cell signaling. NOTE: This course fulfills a requirement for students enrolled in the Basic Core in Medical Sciences (BCMS) Post Baccalaureate Program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 5010. Special Topics in Medicine. 3 Credit Hours.**

Special Topics in Medicine discusses important topics in medicine including translational research and evidence based medicine for postbac students. Course syllabus will be provided by the course director.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**MEDS 5011. The Application of Physical Principles to the Understanding and Practice of Medicine. 4 Credit Hours.**

The principles of the physical world are the foundation of many diagnostic and therapeutic modalities used in the practice of medicine as well as essential physiological processes. This course is offered every fall to provide students with an understanding of the principles and applications of physical science to biological systems and medicine. The application of physical science to medicine will be subdivided into three sections: relationship to human organ function, imaging and diagnosis, and therapies. Topics in the first section include heat, electricity, sound and light waves, and fluids. The second section will describe their application to microscopy, MRI, CT, X-ray, PET and ultrasound imaging. The final section includes therapies for treating disease. The course is lecture based and includes problem solving and presentations by practicing physicians. This course fulfills a requirement for students enrolled in the Basic Core in Medical Sciences post-baccalaureate program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 8004. Macromolecules. 4 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 8010. Seminar Clinical Res. 1 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**MEDS 8020. Crit Lit Clin Transl Res. 2 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**MEDS 8030. Grant Writing: Clin Res. 2 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**MEDS 8051. Intro to Biostatistics. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS 9995. Res Prjct Clin/Trnsl Med. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M001. 1st Yr Med School Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M002. 2nd Yr Med School Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M003. 3rd Yr Med School Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M004. 4th Yr Med School Prog. 12 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M010. Transition to Medical School. 0 Credit Hours.**

The Transition to Medical School course serves to bring together first year medical students from diverse educational and career backgrounds and experiences and introduces them to the new and challenging environment of medical school. Sessions cover important curricular areas such as professionalism, teamwork, study habits, communications skills and personal well-being to provide a foundation for success in medical school.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M011. Fundamentals 1: Human Structure. 0 Credit Hours.**

This course covers the fundamentals of clinical anatomy and imaging, principles of embryology, fundamentals of histology and cell physiology.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M012. Fundamentals 2: Cellular Function. 0 Credit Hours.**

Clinical anatomy and imaging, principles of embryology, fundamentals of histology and cell physiology.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M013. Fundamentals 3: Host Defenses and Threats. 0 Credit Hours.**

General principles of immunology, including the interactions of immune system components in normal and disease states. Immunological methods to diagnose and treat diseases. Structure and function of microorganisms both as microbiota and pathogens, and introduction to major microbial pathogens and their diseases. Additional pathogens will be introduced longitudinally in integrated sessions throughout the organ system blocks.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M014. Fundamentals 4: Basis of Disease and Treatment. 0 Credit Hours.**

Fundamentals of pathology and oncology, principles of pharmacology, and the diagnosis and treatment of infectious disease. Case-based introductions to biostatistics and epidemiology.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M015. Systems 1: Neuroscience and Psychiatry. 0 Credit Hours.**

Development, histology, neuroanatomy, and physiology of the autonomic and central nervous systems. Pathology and pathophysiology of nervous system diseases and treatment modalities will be interwoven. Behavioral topics, including psychiatric illnesses and substance use disorders, will be discussed, along with their treatment and societal impact.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M016. Systems 2: Cardiovascular Medicine. 0 Credit Hours.**

Development, histology, and physiology of the cardiovascular system. Pathology and pathophysiology of diseases related to the cardiovascular system, along with the basis for diagnosis and the pharmacologic, medical, surgical, and behavioral treatment options.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M017. Systems 3: Pulmonary Medicine. 0 Credit Hours.**

Development, histology, and physiology of the respiratory system. Pathology and pathophysiology of diseases related to the respiratory system, along with the basis for diagnosis and the pharmacologic, medical, surgical, and behavioral treatment options.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M020. Systems 4: Nephrology. 0 Credit Hours.**

Development, histology, and physiology of the renal system. Pathology and pathophysiology of renal diseases, along with the basis for diagnosis and the pharmacologic, medical, surgical, and behavioral treatment options.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M021. Systems 6: Gastroenterology and Nutrition. 0 Credit Hours.**

Development, histology and physiology of the gastrointestinal system. Pathology and pathophysiology of diseases of the gastrointestinal system, along with the basis for diagnosis and the pharmacological, medical, surgical, and behavioral treatment options. This course also covers metabolism and nutrition and the effect of nutrient deficiencies and excesses on health.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M022. Systems 5: Endocrinology, Obstetrics and Gynecology, and Urology. 0 Credit Hours.**

Development, histology and physiology of the endocrine system and male and female reproductive systems. Pathology and pathophysiology of diseases of the endocrine system, male and female reproductive systems, along with the basis for diagnosis and the pharmacological, medical, surgical, and behavioral treatment options.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M023. Systems 7: Multi-Organ System Disease. 0 Credit Hours.**

Students will learn the development, histology and physiology of the hematologic, musculoskeletal and dermatologic systems. The pathology and pathophysiology of diseases of the hematologic, musculoskeletal (rheumatologic and orthopedic) and dermatologic systems, along with the basis for diagnosis and the pharmacological, medical, surgical, and behavioral treatment options will also be taught. This course will also include integrated multi-organ system clinical cases, incorporating topics from earlier courses that will require critical thinking and clinical problem solving.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M100. Nutrition and Health. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M101. Fundamentals of Anatomy. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M102. Fundamentals of Medicine 1. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M103. Biological Systems I: Cardiovascular, Blood, Respiratory and Renal Systems. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M104. Biological Systems II: Gastrointestinal, Endocrine, Bone and Reproductive Systems. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M105. Biological Systems III: Nervous and Musculoskeletal Systems. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M106. Biological Systems IV: Inflammation, Immune System and Skin. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M107. Doctoring 1. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M110. Clinical Immun Topics. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M111. Clinical Informatics: Electronic Medical Records and Data in Healthcare. 0 Credit Hours.**

This elective will give medical students an introduction to the field of Clinical Informatics from the physician perspective. Managing the IT needs of physicians in the hospital and office has emerged as an increasingly important task in health care delivery. There are increasing opportunities for physicians to play a role in guiding the evolution of the EMR systems and the use of data in healthcare. In this elective, students will shadow the Chief Medical Information Officer for Temple University Hospital, gaining an understanding of how IT and data impact the job of the physician, and how physicians can in turn impact the use of IT to support quality, safety and financial initiatives critical to the success of the organization.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M120. Sexual Health. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M130. Reflections on Gross Anatomy. 0 Credit Hours.**

This elective will address issues raised by the first and one of the most powerful rites of initiation into the medical profession – gross anatomy. Topics will include death, dissection, graveyard humor, and (postmortem) physician-patient relations. Reading will include both fiction (Shakespeare, Tillie Olson, Hemingway, William Carlos Williams) and medical essays (Richard Selzer, Lewis Thomas, Robert Coles, Perri Klass). Students will write then read in class three brief pieces in either fictional or essay form.

**MEDS M139. Medical Sign Language. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M141. Intro to Medical Ethics. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M143. Medical Humanities. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M146. Global Health 1. 0 Credit Hours.**

The TEAC/IHO Global Health elective was created to help students expand their educational knowledge and procedural experience so that they can be better prepared to understand global diseases and make a humanitarian difference. The course is taught by faculty members in the department of Emergency Medicine, who have diverse medical backgrounds and have led medical humanitarian missions in Central and South America, Asia and Africa. Whether the participant plans on future global medical experiences or wants an interactive/comprehensive clinical elective to complement his or her education, the TEAC/IHO Global Health Elective has been a fun and highly rated experience for everyone.

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M147. Global Health 2. 0 Credit Hours.**

The Temple Emergency Action Corps/Global Health: Part II elective will provide a comprehensive overview of emergency medical care from the site of the incident to the hospital to provide a framework of disaster recognition, response, and preparedness in the Philadelphia Region. Emergency skills will be explained, taught, and opportunities for actual skill performance provided to each student through time in the Simulation Lab as well as the Emergency Department. The students will have an opportunity to participate in EMS ride-alongs, Fighting Chance, and an advanced triage session. This elective is required for advancement in the TEAC leadership.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M149. Basic Medical Spanish. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M150. Introductory Elective. 0 Credit Hours.**

This generic first and second year School of Medicine elective serves as an introduction to a special topic, often with an interdisciplinary focus. Topics vary from semester to semester and may include an extension of a content area already covered in the required curriculum, an introduction to a new topic or research issue, or exposure to a clinical discipline. First and second year electives are optional and do not impact graduation requirements. Electives are scheduled for seven two-hour sessions each, for a total of fourteen contact hours. Student interest and faculty availability determine topics offered each semester.

**MEDS M170. Advanced Medical Spanish. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M171. Big Friends/Kenderton School. 0 Credit Hours.**

A crucial part of the experience of medical students in Temple is community engagement. In fact, students are asked to reflect on what experiences they have encountered through their immersion in the surrounding community. With such a large role in the development of who we are and who we will become as physicians, we hope to be able to bring an elective to campus that highlights this role and creates a greater partnership with the Kenderton community. Similar to us, Kenderton holds electives for their seventh and eighth grade classes. These electives serve a similar purpose to our own - engage students in something that they may not receive in their everyday curriculum. With mentorship opportunities through Big Friends, we hope to be able to provide the students with an elective that will engage them in medicine and science, something they seem to miss out on in their own classes. Not only will this help the Kenderton community, but it will foster a greater relationship with the neighboring school, which is a big part of our community and our mission to serve it.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M189. Intro Disaster Response. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M191. Intro Disaster Response II. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M193. Introduction to Bioethics. 0 Credit Hours.**

In this lecture/discussion-based course, students will be exposed to a range of key themes, concepts and current controversies in medical ethics. Topics to be addressed may include: Social Determinants of health and urban bioethics, Mediation as a clinical dispute resolution mechanism, Cultural humility and community competency, Disability ethics, Ethics at the end-of-life, Three-parent babies and reproductive ethics, Bioethics, policy, and the values of health care reform.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M194. Bioethics at the Movies. 0 Credit Hours.**

This elective uses feature and documentary film as a catalyst for theoretical and practical discussions of a series of bioethics topics. We also will be looking through the films, treating them as a lens through which to historically understand the evolving relationships between medicine, society, and popular culture. Specific topics to be covered may include: genetics and the social consequences of genetic knowledge; professionalism and humanism in medicine; dying in the 21st century; research with vulnerable populations; illness, disability, and autonomy; research ethics; and access to care, health policy, and health disparities.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M195. Physicians as Credible Messengers in Firearm Violence Prevention. 0 Credit Hours.**

This elective examines how physicians can become more credible messengers and advocates for gun violence prevention. Topics to be covered include: firearm injury epidemiology, violence as a public health issue, the role of physicians in gun-policy, clinical bedside skills related to gun safety and injury, among others.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M200. Community Hosp Svc. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M208. Introduction to Research. 0 Credit Hours.**

Research is a crucial aspect of every physician's career. They must evaluate research to find the best evidence-based ways to treat their patients. And their blend of clinical experience and formal education puts them in the best position to know what patients need and how to achieve it. For these reasons, learning how clinical research is done is a necessity to properly evaluate the literature and hopefully to conduct research in the future. By starting from scratch, creating a research question and culminating in a paper, it will remove the mystique of the research process. Building this foundation for the students will benefit their future patients, make hospitals more efficient, and progress science as a whole. We feel holding the course throughout the year will allow for the required time for students to develop an appropriate time line for their project. The sessions will include: 1. Why research? How to get involved. 2. History, introduction and submission to the IRB (CITI training included). 3. How to formulate a research question (PICO and FINER). 4. Effective literature searching techniques/using a citation manager (EndNote). 5. Rating the literature: level of evidence/open source/"Grey" literature. 6. Study design: types, pitfalls, feasibility. 7. Data sources at St Luke's: Keeping data safe (Redcap). 8. "It is better to have written" introduction to IMRaD, the use of an outline. 9. Methods/Results: a great place to start. 10. Introduction and discussion: constant tweaking. 11. Abstract and meeting/publication basics presentation.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M210. Diseases of Renal/Endo/Repro. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M212. Microbiology/Inf. Dis.. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M214. Diseases of Cardio/Resp. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M217. Doctoring 2. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M220. Epidemiology Journal Club. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M222. Diseases IV: GI/Hem-Onc/MS. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M224. Diseases III: CNS. 0 Credit Hours.****Course Attributes:** M1**Repeatability:** This course may not be repeated for additional credits.**MEDS M225. Disability Through the Lens of Self-Reflection. 0 Credit Hours.**

This elective brings voices from the disability community to the world of medicine. A primary goal is to challenge medicine's imperative to 'fix' disability. A medical diagnosis of a disability often becomes a singular observational lens that isolates and limits people with disabilities. However, by listening to stories directly from members of the disability community, we see instead a perspective that views disability as something that is natural, fluid, and dignified. Learning to embrace diversity and disability through the self-representations, this elective helps prepare future doctors to better contribute to individuals' health, well-being, and flourishing. Students will explore several key theoretical, policy, and medical debates in the field of disability. Specific topics include, for example: stigma and stereotypes; pre-natal genetic testing, neuro-diversity, and disability activism; health policy; medical interventionism; non-traditional communication and informed consent; and self-representation in the arts.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Medicine.**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Medicine.**Repeatability:** This course may not be repeated for additional credits.**MEDS M226. Arts Workshop. 0 Credit Hours.**

Arts Workshop will be a hands-on workshop style class in which students will draw with pencil and ink, paint with watercolor and acrylic, and create an art book over the course of the elective. The goal is to provide a hands-on creative outlet, a fresh perspective on perspective, and improve observational skills and nourish creativity. Classes will build each week on previously explored art concepts and will focus in part on translating observational skills into visual representation using plants, birds, landscapes, and the human body.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Medicine.**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Medicine.**Repeatability:** This course may not be repeated for additional credits.**MEDS M227. Fundamentals of Improv Theater. 0 Credit Hours.**

In this elective, students can expect to learn the fundamental skills of improvisation and how it applies to caring for patients. Improvisation is a collaborative art form built on listening, supporting, creativity, intuition, quick response and, well, fun. Students will sharpen their listening skills, their ability to use intuition at the bedside talking with patients, and developing empathy.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Medicine.**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Medicine.**Repeatability:** This course may not be repeated for additional credits.**MEDS M230. Receptive Music Experiences for Future MDs. 0 Credit Hours.**

This elective course will actively engage students in live and recorded music experiences with the intent of increasing emotional self-awareness and empathy towards others. Through discussion and journaling, students will be encouraged to reflect on these musical experiences, as well as the relationship between personal experiences and the practice of medicine. This class will deepen personal understanding of the relevance of music in self-care practices and for meaningful interpersonal interactions. Students will learn of the physiological and psychological benefits of engaging with music for self-care and engage in relaxation experiences as well as determine preferred music for personal relaxation. They will explore ways that receptive music experiences support self-awareness and self-expression.

**Repeatability:** This course may be repeated for additional credit.**MEDS M233. Bridging Gap Clerkship. 0 Credit Hours.****Course Attributes:** M5**Repeatability:** This course may not be repeated for additional credits.**MEDS M234. Yoga and Writing. 0 Credit Hours.**

In this Yoga and Writing course we will place our bodies on the yoga mats - and we will place our words with grace on the page. You will let go, tell your necessary stories, sweat, breathe and laugh through this non-dualistic approach to writing and yoga. In this 7-week course, you will learn about the history of yoga as a spiritual and physical discipline as we devote each week to both yoga exercises and writing exercises. You will move through writer's block by using yoga exercises designed to free up mental and physical space. You will tell necessary stories from the heart/mind and have the opportunity to work with these spontaneous writings in class. We will study and experience - through our mind/body - how Yoga's holistic approach to health can complement the Western medical practice.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M235. History of Medicine. 0 Credit Hours.**

Certain events in the history of medicine have had a major impact on the practice of medicine today. We propose to teach a course that in no way attempts to be a survey of medical history but one in which selected vignettes that have had a major impact will be featured. The course will be taught in an interactive format based on readings selected by the course instructors. Biographies of seminal individuals in the history of medicine in addition to major discoveries and events will be the focus. Ideally participants will select an event or individual and prepare either a talk or paper to conclude the course. Examples of potential topics include: The discovery of the structure of DNA, the Cocoanut Grove Fire of 1942, Pasteur's discoveries, individuals who contributed to advances in transplantation (specifically Thomas Starzl), self-experimentation, and the discovery of ABO blood groups.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M236. Specialized Anatomy Review. 0 Credit Hours.**

The course is designed to provide second-year medical students with an advanced knowledge and appreciation of the structure and clinical function of the human body with particular emphasis on a specialized region of their choice. This course involves small group laboratory, case-based clinical anatomy review, and radiology/medical imaging review sessions. Learners will also have the opportunity to serve as Teaching Assistants in the cadaver lab and support first-year medical students in the Fundamentals 1 course.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M240. An Exploration of Narrative Medicine. 0 Credit Hours.**

Storytelling is an indispensable part of medicine, too often overlooked. But the pendulum is swinging back! In this class, we will celebrate the joy of telling stories, and the good that can come of it. We will talk about ways to make sure the human experience stays front and center as students move forward in their path to becoming doctors. We will talk about how to listen, how to earn trust, how to use stories as an effective way to communicate with patients. We will read and discuss examples of great medical storytelling by physician writers and journalists, and look at how this has enriched the lives of patient, physician, and the public. Students will also visit patients in the hospital, and write two short pieces of their own in any style they please. Reflection in any form is a great way to process the intensity of experiences in medical school and as a physician. By the end of the seven weeks, students will have improved their storytelling skills and gained appreciation for the importance of stories in medicine. They will have gained experience interviewing and eliciting patient stories, and they will have muted or at least diminished any fear of writing.

**MEDS M241. An Exploration of Meaning through Stories, Poems, and Plays. 0 Credit Hours.**

Medical school is sometimes a rollercoaster through thickets of facts, emotion, and doubt. As in other parts of life, meaning and purpose can get lost. In a spirit of playful inquiry, the class will read, discuss, and write about various approaches to create meaning, including work by Italo Calvino, Mary Oliver, J.K. Rowling, Billy Collins, Martin Buber, and Maurice Sendak. With apologies to Monty Python, the class will address fundamental questions. How do we preserve meaning in the face of sorrow or tragedy, and in the daily grind? How might religion, humor, and art nurture a sense of self and meaning? What is the role of intimacy and compassion? And when might ambiguity support meaning? Students will meet as a group for seven, two-hour Friday afternoon sessions, spread over three months in the fall. Reading assignments will be very short. Every other session, students will bring a brief written response in any genre they choose to share as a prompt for class discussion.

**MEDS M243. Humans of North Philly: Portraits from the Streets. 0 Credit Hours.**

In this class, working with photojournalist Michael Perez, students will descend into the streets around the medical school, seeking out residents to interview and photograph. Students will follow their hearts and instincts, looking for people who they believe will make a great portrait and have an interesting story to tell. The students will approach their subjects with sensitivity and respect, ask for permission to take photographs, and then interview the subject of the photo. As part of the class, students will write a little story to accompany their photos, the best of which will hang in a gallery show in the MERB. By the end of the elective, students will have learned how to approach strangers and initiate conversations, to appreciate the stories of the residents of this community who so often are the patients at Temple Hospital, and to see the world literally and figuratively through a new lens. Students will develop a sensitivity and communication skills that will help them as clinicians. They will also learn technical skills on how to use a camera.

**MEDS M244. Narrative and Relationship-Centered Care. 0 Credit Hours.**

This elective will introduce medical students to narrative approaches to clinical practice and the influence of stories in patient-centered care. By listening, writing, and attending to patient stories, students will strengthen their written and oral intake skills along with developing a deeper understanding and awareness of individual patient experiences, the influence of a patient's cultural background in her/his healthcare, the importance of building patient-physician relationships, and the power of empathy. Students will learn the complexities of narrative texts by participating in close readings and conducting critical analyses of patient stories before collecting and/or writing their own narratives.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M245. HIV Prevention Corps. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M248. Business of Medicine. 0 Credit Hours.**

**Course Attributes:** M2

**MEDS M250. Research and Grantsmanship for Medical Students. 0 Credit Hours.**

This course targets first and second year medical students who wish to learn how to identify, prepare a proposal and submit successful applications. The course will cover NIH, NSF and foundation granting agencies. This learning opportunity provides medical students the skill set for grant writing if they wish to become successful clinician scientists. Curriculum will include a series of interactive skills development presentations by basic science and clinical faculty at LKSOM who have successful research portfolios at Temple University. Students will have the opportunity to select a mentor, identify a funding opportunity and construct a proposal for submission.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M260. My Daughter's Kitchen comes to Medical School. 0 Credit Hours.**

Once a week, for seven weeks, Philadelphia Inquirer Food Editor Maureen Fitzgerald, as part of her My Daughter's Kitchen healthy cooking initiative, [www.philly.com/mydaughter](http://www.philly.com/mydaughter), will prepare healthy meals with students in the College of Public Health's kitchen down the street from the MERB. Students will learn how to slice, saute, simmer, roast, bake and in every way prepare a meal for six. And then they will all sit down to a hot meal. Students, with counsel from the instructor, will each come up with one recipe that meets nutritional and affordability requirements. Discussions at mealtime will focus on techniques and strategies to deliver this information – the value, ease and pleasure of cooking your own healthy meals – to patients. For the last class, students will invite a group of patients in need of healthier eating habits and cook a meal for them, sharing what they have learned. These future physicians will literally be able to hand their patients a recipe and say, "This vegetable soup or this turkey sloppy joe is healthy and easy and good for you because I made it myself!" They can even give cooking or preparation tips! Or suggest where in the neighborhood to buy the ingredients! At the end of the class, students will have an option to write a reflection of 250 to 500 words. Ms. Fitzgerald will periodically write and publish reports describing the class for a general audience.

**MEDS M265. Mind-Body Medicine Elective. 0 Credit Hours.**

This elective is a practical introduction to mind-body medicine. We will explore mind-body medicine from two points of views: primarily, as a practical set of techniques and skills to promote students' own well-being, resilience, mindfulness and empathy; and secondarily, as an introduction to practices about which students may choose to learn more and counsel their future patients. Techniques include mindfulness meditation, guided imagery, biofeedback, breathing techniques, and other mind-body approaches that can alleviate stress and foster self-awareness and self-care. Each session will begin with an opening meditation, followed by a short talk on the technique of focus for that session. The majority of the students' time will be spent practicing and then reflecting on that practice through discussion with the group. Students will be exposed to mind-body medicine skills during session time and encouraged to practice them at home.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M270. Artful Thinking. 0 Credit Hours.**

Students will attend small-group sessions held in the galleries of the Pennsylvania Academy of Fine Arts. Over the six weeks, the students will learn about the rich history of painting and medicine in Philadelphia, including discussion of Eakins' The Gross Clinic and the Agnew Clinic. They will be introduced to research showing that observational skills for clinical application are proved to be enhanced by looking at art, and they will participate in a series of exercises to improve their own acuity of vision and diagnosis. They will focus on how doctors can use art with patients and with themselves, including building important sociocultural and therapeutic skills. Students focus on developing emotional intelligence and considering visual art as a modality for interrogating cultural and gender biases that they or their patients may hold. In one class, they will also draw studio models to practice applying their understanding of human anatomy.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M275. Cannabinoids (Medicinal Marijuana). 0 Credit Hours.**

The recent approval of medicinal cannabinoids and the frequency of patient self-medication make it imperative that physicians are familiar with the scientific background related to cannabinoids and their effect on physiologic and pathophysiologic function. The course will cover the endogenous cannabinoid system and how modifications of this system can influence both therapy and pathology for a number of diseases. It will also examine legal issues related to the use of medicinal and recreational marijuana.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M276. Case Based Topics. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M280. Health Education and Advocacy Resources at Temple (HEARTS). 0 Credit Hours.**

The HEARTS Clinic at Temple/St. Luke's provides education and medical care to uninsured and underinsured patients in the Southside of Bethlehem. Our focus this year is initiation of a Diabetes Prevention Program (DPP) aimed at preventing the development of diabetes in prediabetics and preventing the progression of diabetes in newly diagnosed diabetics. The second year student's role is to be a student leader of the DPP. The DPP consists of one hour of education, which we are basing off of the CDC's prevent type 2 diabetes pre-made educational materials. The student is expected to run a 1-hour education session, followed by participation/leadership of a 1-hour cooking/exercise class.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M295. Cmplmnty/Altern Med III. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M296. Cmplmnty/Altern Med I. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M297. Cmplmnty/Altern Med II. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M298. Independent Study/Research. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may be repeated for additional credit.

**MEDS M299. Pre-Clerkship Biomedical Research Elective. 0 Credit Hours.**

This elective is designed for pre-clerkship students to learn and participate in clinical or translational research. Students will gain knowledge and skills in best practices in research, IRB procedures and research methodologies.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M306. Faculty Mentored Scholarly Experience 2. 0 Credit Hours.**

This is a required course to enable students to initiate or complete a faculty mentored scholarly experience. In the FMSE courses, students will apply a systematic approach to a scholarly project with the support of a faculty mentor.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M307. Clerkship Longitudinal Biomedical Research. 0 Credit Hours.**

This elective is designed for medical students looking for an advanced specialty clinical research experience, to increase understanding of IRB protocols, utilize EPIC data in research methodology.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M311. Intersession: Integrated Topics to Prepare for Surgery. 0 Credit Hours.**

The Intersession: Integrated Topics to Prepare for Surgery is a 3.5-day course immediately preceding the Surgery Clerkship. The goal is to ensure students' readiness to successfully participate in learning on the clerkship and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group case-based discussions and clinical skills sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M312. Intersession: Integrated Topics to Prepare for Family Medicine and Psychiatry. 0 Credit Hours.**

The Intersession: Integrated Topics to Prepare for Family Medicine and Psychiatry is a 3.5-day course immediately preceding the Family Medicine and Psychiatry clerkships. The goal is to ensure students' readiness to successfully participate in learning on the clerkships and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group case-based discussions and clinical skills sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M313. Intersession: Integrated Topics to Prepare for Ob-Gyn and Pediatrics. 0 Credit Hours.**

The Intersession: Integrated Topics to Prepare for Ob-Gyn and Pediatrics is a 3.5-day course immediately preceding the Obstetrics & Gynecology and Pediatric clerkships. The goal is to ensure students' readiness to successfully participate in learning on the clerkship and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group case-based discussions and clinical skills sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M314. Intersession: Integrated Topics to Prepare for Internal Medicine. 0 Credit Hours.**

The Intersession: Integrated Topics to Prepare for Internal Medicine is a 3.5-day course immediately preceding the Internal Medicine Clerkship. The goal is to ensure students' readiness to successfully participate in learning on the clerkship and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group case-based discussions and clinical skills sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M315. Mid-Year Intersession: Academic Coaching and Career Development. 0 Credit Hours.**

The Mid-Year Intersession: Academic Coaching and Career Development is a 5-day course at the mid-point of Phase 2. The goal is to provide individualized enhancement of knowledge and skills, to develop individualized learning goals for the remainder of Phase 2 and for Phase 3, and to offer the opportunity for career exploration. The course will include small group discussions, skill development sessions, self-directed learning, clinical experiences, meetings with career advisors, and individual coaching sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M316. Intersession: Black (Psychiatry and Neurology). 0 Credit Hours.**

The Intersession: Black is a 3.5-day course immediately preceding the upcoming clerkships. The goal is to ensure students' readiness to participate successfully in learning on the clerkships and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group case-based discussions and clinical skills sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M317. Intersession: White (Internal Medicine and Pediatrics). 0 Credit Hours.**

The Intersession: White is a 3.5-day course immediately preceding the Internal Medicine and Pediatrics clerkships. The goal is to ensure students' readiness to participate successfully in learning on the clerkships and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group case-based discussions and clinical skills sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M318. Intersession: Silver (Family Medicine and Faculty Mentored Scholarly Experience). 0 Credit Hours.**

The Intersession: Silver is a 3.5-day course immediately preceding the Family Medicine clerkship and the Faculty Mentored Scholarly Experience course. The goal is to ensure students' readiness to participate successfully in learning on the clerkship and Faculty Mentored Scholarly Experience course and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group and large group and skills building sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M319. Intersession: Red (Surgery and Obstetrics and Gynecology). 0 Credit Hours.**

The Intersession: Red is a 3.5-day course immediately preceding the Surgery and Obstetrics and Gynecology clerkships. The goal is to ensure students' readiness to participate successfully in learning on the clerkships and further students' ability to apply learning related to relevant content from the longitudinal health science curriculum. The course will include small group case-based discussions and clinical skills sessions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M337. Transition to Phase 2. 0 Credit Hours.**

Transition to Phase 2 is a 1 week-required course offered at the beginning of the clerkship year (Phase 2). The course contains a review of basic clinical skills and sessions to help prepare students for clinical rotations.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in MEDS M010, MEDS M011, MEDS M012, MEDS M013, MEDS M014, MEDS M015, MEDS M016, MEDS M017, MEDS M107, MEDS M020, MEDS M021, MEDS M022, MEDS M023, and MEDS M217.

**MEDS M338. Doctoring 3/OSCE. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M339. Introduction to COVID19. 0 Credit Hours.**

This 2-week course will introduce students to the basic medical and public health issues surrounding the COVID19 pandemic. Students will engage in independent learning through reading, online lectures, and modules. They will participate in discussions and complete two assignments. The course will be Pass/Fail and combined with another 2-week elective will fulfill credit for one elective course.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M401. Non-Graded Specialty Experience. 0 Credit Hours.**

This course provides the opportunity for students to engage in a clinical learning experience at another LCME-accredited institution. This opportunity will enable students to broaden their experience through exposure to a different patient population in a novel clinical environment to prepare them for residency.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M411. Community Health. 0 Credit Hours.**

This elective will provide an overview to the medical students of important Community Health and preventive Medicine topics including Access to Care, Healthy Living, Maternal and Child Health Services, HIV Care, Elder Health and Mental Health topics. The student will be able to select a specific community health topic to explore in more depth and complete a project, i.e. nutrition, diabetes prevention, etc. The course will provide additional education about Social Determinants of Health (SDOH), Health Equity and Lifestyle Medicine topics, which are not generally covered in other clerkships/electives.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M425. M4 Literature and Medicine On-line Elective. 0 Credit Hours.**

Students will be divided into groups of 4-6 members who will collectively select three books from a suggested reading list. One or two will be nonfictional, about healthcare practice or the factual or autobiographical experience of being a patient. The remaining one or two books will be fictional, bearing some relation to health or healthcare. After completing each book students will participate in an on-line discussion on Canvas, in which each student poses one question related to the book and all other students in the group respond. Students will compose two 3-4 page papers, one at the outset of the course where they describe their personal background and one at the finish describing a critical incident that shaped their career goals. A faculty preceptor will monitor and help guide group discussions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M426. Narratives of Alcoholism and Addiction. 0 Credit Hours.**

This course will explore narratives of alcoholism and addiction in writing and in film. By reading, discussing, and reflecting on the individual patient and family narratives, students will strengthen their ability to hear, consider, and interpret the stories of others. Understanding the individual experiences and stories of patients can yield universal lessons for effective health care. While the opiate epidemic is a national problem, Kensington, Philadelphia is home to the largest open-air heroin markets in the country. Temple University Hospital, Episcopal Campus is a particularly dense site of engagement with people who use opioids and students will spend time shadowing in the Emergency Department during the course.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M427. How and Why Doctors Write. 0 Credit Hours.**

We will read and examine a variety of physician writings. Authors will include nationally known doctors, such as Atul Gawande and Oliver Sacks, contributors to newspapers and medical journals, as well as Temple doctors and students. We will discuss the motivations for writing as well as the works themselves. Students are expected to spend out-of-class time reading and writing and by the end of the course each student will have an 850-word essay completed on a topic of their choosing.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M428. Narratives of Grief and Loss. 0 Credit Hours.**

This course will explore narratives of grief and loss. Participants will read, discuss, and reflect on the individual patient and family narratives. Students will strengthen their ability to hear, consider, and interpret the stories of others. The individual experiences and stories of patients will yield universal lessons for effective health care. Participants will be able to use learning from the course in future patient care interactions.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M429. Non-fiction Writing. 0 Credit Hours.**

This course is designed for the student who would like to write. Through a series of exercises, we will generate ideas for reflective and opinion writing. If there is student interest, other non-fiction genres may be explored. We will evaluate effective pieces of writing and work to create our own. Students are expected to spend out-of-class time reading and writing and by the end of the course each student will have an 850-word essay completed on a topic of their choosing.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M444. Community Health. 0 Credit Hours.**

This elective will provide an overview to the medical students of important Community Health and preventive medicine topics including Access to Care, Healthy Living Maternal and Child Health Services, HIV Care, Elder Health and Mental Health topics. The student will be able to select a specific community health topic to explore in more depth and complete a project, i.e. nutrition, diabetes prevention, etc. The course will provide additional education about Social Determinants of Health (SDOH), Health Equity and Lifestyle Medicine topics, which are not generally covered in other clerkships/electives.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M447. Transition to Phase 3 (TTP3). 0 Credit Hours.**

TTP3 is a 1-week required course offered at the beginning of Phase 3. During this course, students learn and practice the advanced clinical skills needed in the Phase 3 courses.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M494. Doctoring Teaching Elective. 0 Credit Hours.**

This elective will provide an opportunity for 4th year students interested in Academic Medicine to develop and/or revise Doctoring Curriculum, provide peer to peer instruction through teaching of clinical skills, and facilitate small group discussions.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in MEDS M107 and MEDS M217.

**MEDS M667. Transition to Residency. 0 Credit Hours.**

This is a 1-2 week course near the end of the 4th year. The course includes lectures, small group sessions and simulation experiences. Students will learn and practice important skills needed for internships. They will reflect with classmates on the medical school experience and prepare to transition to the intern year.

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M905. International Med Elective. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M906. Research Elective. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may be repeated for additional credit.

**MEDS M908. Faculty Mentored Scholarly Experience 3a. 0 Credit Hours.**

Students will participate in scholarly work during the 4-week block. This is work to advance an ongoing project. This work is done with mentorship by a faculty member. Students completing this course will be expected to write and submit an abstract. All work will be presented at the FMSE Poster Symposium prior to graduation.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in MEDS M306.

**MEDS M909. Interprofessional Healthcare Quality Improvement. 0 Credit Hours.**

This interprofessional course will combine medical students with students from nursing and other professions in a healthcare quality experience. The didactic curriculum, based upon the Institute of Healthcare Improvement materials, is presented in longitudinal workshop sessions over a semester. During the following semester, interprofessional student teams identify a clinical quality gap and use the PDSA (Plan-Do-Study-Act) model to assess the gap, design an intervention, and assess the impact of their intervention. Project outcomes will be presented at a scholarly venue(s).

**MEDS M913. Patient Safety/Quality. 0 Credit Hours.**

Patient safety and quality improvement is now, more than ever, becoming recognized as a cornerstone of the practice of medicine. These concepts are fundamental, not only to one's personal development and growth as a physician, but to the future of healthcare. This course is designed for those students who have an interest in patient safety and quality improvement and wish to expand upon their knowledge outside of the standard curriculum. This course will integrate several core competencies that are central to the mission of LKSOM, especially those related to Systems Based Practice and Practice Based Learning and Improvement that focus on quality, improvement of care, and utilization. Furthermore, students in the course will attend several hospital committee meetings and, by doing so, will learn more about both inter-professional collaboration and professionalism.

**Repeatability:** This course may be repeated for additional credit.

**MEDS M920. Faculty Mentored Scholarly Experience 3b. 0 Credit Hours.**

This elective is for students who require an additional block to advance and complete their scholarly work. The expectation for students completing this course will be to write and submit an abstract for presentation.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in MEDS M908.

**MEDS M990. Health System Administration. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M992. Doctoring 4/Capstone. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M995. Medical Advocacy. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M996. Academic Medicine. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**MEDS M997. Independent Study. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

## School Psychology (SPSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SPSY 5303. Ethical and Legal Issues. 3 Credit Hours.**

This course is designed to introduce students to the ethical codes relevant to their discipline for students studying ABA (Behavior Analyst Certification Board Professional and Ethical Compliance Code), School Psychology (American Psychological Association Ethical Principles of Psychologists and Code of Conduct; National Association of School Psychologists Principles for Professional Ethics), and Counseling (American Psychological Association Ethical Principles of Psychologists and Code of Conduct; American Counseling Association Code of Ethics). Students will explore common ethical and legal issues such as boundaries of competence, multiple relationships, confidentiality, research, client/student rights, effective treatment, etc. Students will begin to develop a professional decision making framework for resolving ethical conflicts around such issues. Students will also become conversant with current legislation and regulations relevant to their practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 5667. Introduction to Cognitive Assessment. 3 Credit Hours.**

Intensive overview and training with diagnostic instruments of cognitive abilities. Practice with specific tests of intelligence, memory, and cognitive processing. Introduction to the assessment of adaptive behavior. Discussion of theories of cognitive functioning and research literature on intelligence testing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 5671. Integrative Assessment. 3 Credit Hours.**

The purpose of this course is to develop advanced skills in the individual assessment of children and adolescents. One major component of the course will be learning additional tests of cognitive skills. The second major component will be learning standardized, norm-referenced tests of academic achievement. The third major component will be coverage of assessment of children from a variety of cultural, language, and other backgrounds. The focus will be on administering, scoring, interpreting, and integrating test results to provide a full and accurate picture of the student. Successful students will become familiar with test administration, scoring, and interpretation of a variety of instruments and techniques, as well as gain practice in demands analysis and integrating assessment findings across cognitive, academic, and social/emotional domains. This course is designed for matriculated school psychology students only. The tests taught in this course are secure instruments, which can be administered only by psychologists; therefore, only in the rarest of circumstances will a student from another program be permitted to enroll. A course in introductory cognitive assessment (SPSY 5667 or equivalent) is a prerequisite of this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in SPSY 5667.

**SPSY 5672. Personality and Psychotherapy. 3 Credit Hours.**

Covers major theories of personality and psychotherapy, and applications to counseling, assessment, and projective testing in the schools.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: School Psy Clinical Clearance.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 5673. Introduction to the Diagnostic Process. 3 Credit Hours.**

Discussion of the integration of data from case histories, observations, interview and tests in making differential diagnosis. Diagnosis using DSM-IV-TR and educational identification under special education law with both covered. Overview of major diagnostic categories found in schools. Comprehensive study of skills in interviewing, report writing, systematic observation of child behavior, and evaluation of teaching effectiveness. Major emphasis on conceptualizing and writing recommendations for educational remediation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 5674. Social and Emotional Aspects of Behavior and Assessment. 3 Credit Hours.**

This course is intended for graduate students in the helping professions. The course provides an overview of the affective/emotional and social aspects of behavior. Topics include defining emotion, emotion experience, and regulation, intrapersonal and interpersonal functions of emotion, gender and cultural differences in emotion, emotion across the lifespan, and emotion and well-being. Building on this foundation, the course provides theoretical and applied training in assessment techniques useful in evaluating children and adolescents with social, emotional, and behavioral difficulties. It covers a wide variety of methods including the use of direct and indirect assessment techniques for children and adolescents. The course also addresses the development of cultural competence in assessment, classification, decision-making, and intervention planning. The first portion of the course focuses on the foundations of social and emotional functioning. The second portion centers on methods of behavioral and social-emotional assessment. The third portion of the course covers the assessment of specific problems, competencies, and populations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 5676. Applied Behavior Analysis. 3 Credit Hours.**

Introduction to the functional analysis of behavior of children in the school setting. Includes behavior theory, assessment, interaction, and evaluation. A behavior-change program is conducted.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 5771. Biological Aspects of Behavior. 3 Credit Hours.**

This course is designed to provide graduate level students with an understanding of principles, theories, and research in biological/physiological psychology. A major focus will be on the relationship between the brain and behavior. General topics will include: neuroanatomy and physiology, neural communication, behavior genetics and evolutionary psychology, brain damage and plasticity, vision, movement, emotions, learning, memory, language, intelligence, and neurological and psychological disorders. One of the objectives of this course is to relate the content to school-age children. Students will be expected to apply what they have learned to the science and practice of school psychology. Students will also be expected to critically evaluate relevant findings and claims generated by neuroscience research. The course will incorporate lecture, directed reading and writing assignments, case studies, videos, and class discussion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8621. Academic Assessment and Intervention. 3 Credit Hours.**

This course is intended to introduce pre-service school psychologists to the theories, skills, and ethical and legal considerations of academic assessment in school settings. The assessment class will be taught within the over-arching framework of an ecological, multi-tiered assessment model. The link between assessment and instructional decision-making will be emphasized throughout the course, with attention to assessment practices for learners with diverse needs and providing instructional support to teachers. Students enrolled in the course will learn how to select, design, administer, score, interpret, and report results for a variety of assessment approaches related to monitoring instructional efficacy and learner outcomes in a standard-aligned model. Assessment approaches will include: (a) authentic; (b) screening; (c) diagnostic; (d) formative; (e) benchmark; and (f) summative.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in SPSY 5676 (may be taken concurrently)

**SPSY 8770. Seminar: Special Topics in School Psychology. 3 Credit Hours.**

Advanced seminar considering the literature in a specific area of school psychology research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 8771. Social Psychology of Education. 3 Credit Hours.**

Discussion of principles of social psychology as applied to the school as an institution. Emphasis on the psychology of planned educational change. Theoretical bases of the process of change and innovation within the schools. Rationale for intervention strategies

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: School Psy Clinical Clearance.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8772. Seminar: Role and Function of the School Psychologist. 3 Credit Hours.**

Analysis of role and functions of school psychologists. Study of relevant research dealing with varied roles the school psychologist can play within the school system and in other settings. Consideration of legal and ethical practices in school psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8773. Developmental Psychopathology and Low Incidence Disabilities. 3 Credit Hours.**

This course will look at child psychopathology from a development perspective, covering typical social-emotional and cognitive development and then examining how this gets disrupted or otherwise altered to result in child and adolescent psychopathology. We will examine classification systems and models of diagnosis and disease, as well as alternatives to the more traditional "medical model" such as examining risk, resilience and the role of psychosocial and cultural factors. The course will aim to teach students to identify potential mental/behavioral health issues in children and adolescents, and then understand and be able to explain to others what the implications of this might be for a given child or teen. Students will think critically about the ethics and issues of controversy around child and adolescent mental health.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8774. Professional Issues and Literature in School Psychology. 3 Credit Hours.**

Doctoral seminar in professional issues and the research literature in school psychology. Required for School Psychology Ph.D. students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8775. Legal and Ethical Problems and Professional Responsibility. 3 Credit Hours.**

This course familiarizes advanced graduate students in psychological studies with ethical principles and codes of conduct as well as legal requirements and legislative outcomes to guide our practice as psychologists and pupil services employees/administrators. The APA Ethical Principles and Code of Conduct and NASP Professional Conduct Manual will be perused, as well as PA Law governing the licensure and practice of psychologists. Also covered in this course will be federal and state law related to regular and special education, civil rights, and gifted education. Case law surrounding these issues will be explored.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: School Psy Clinical Clearance.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8776. History and Systems of Psychology. 3 Credit Hours.**

This course is for graduate students in training to become psychologists. It introduces students to the history of psychology and the theoretical schools of psychology practice. It is required for students in the School Psychology PhD program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8777. Theories and Techniques of Counseling for Youth. 3 Credit Hours.**

The purpose of this course is to develop the basic skills students will need in order to conduct successful school mental health counseling interactions. We accomplish this through the practice and development of counseling microskills in an experiential format. Students will have an opportunity to begin to develop mastery of these skills through in class role-playing, mock interviews, and videotaped counseling session role-plays and supervised counseling experiences to improve interpersonal, emotional, and social functioning in young children to adolescents. Students learn to design, deliver, and evaluate evidence-based prevention and intervention approaches and consultative mental health services. By working alongside a field site supervisor, students engage in case review, analysis, and delivery of counseling services designed to mirror expectations placed on mental health professionals in school and community settings. Self-reflection, transcript analysis, and peer, instructor, and supervisor feedback are employed to develop professional and personal individual and group counseling skills within a multi-tiered system of support.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 8780. Topical Seminar in School Psychology. 1 to 6 Credit Hour.**

Special topics of interest to the school psychologist. Topics may include therapeutic problems, school discipline problems, parenting and remediation strategies. Topics may vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 8787. Seminar on Verbal Behavior. 3 Credit Hours.**

Advanced course in applied behavior analysis with an emphasis on verbal behavior. Designed to provide students with an overview of verbal behavior (as defined in the field of applied behavior analysis) and an overview of its practical application in teaching language to children with diagnosed language delays.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SPSY 5676.

**SPSY 9487. Professional Issues and Practicum. 1 to 3 Credit Hour.**

Students will complete a school-based practicum, one day per week. The program will assign you to a school for this practicum. Your supervisor must be a certified school psychologist with at least 5 years of experience in the field. You should plan to be at your site one day per week (6 to 8 hours), for a total of at least 225 hours across the entire school year. The weekly class will include group supervision and discussion of cases, plus a didactic portion covering role and function and professional issues in school psychology.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: School Psychology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9488. Advanced Practicum in School Psychology. 1 Credit Hour.**

Doctoral students complete advanced practicum, generally two days per week for an academic year. They are responsible for arranging this advanced practicum placement. In the third year, these placements are typically in specialized schools, agencies, clinics, or hospitals. In the fourth year, these placements may include public schools to allow students to complete the required 600 school-based hours for certification. Advanced practicum supervisors must be doctoral-level practitioners, appropriately credentialed for the site. In most cases, the supervisor is a licensed doctoral-level psychologist. Students should plan to be at their sites two days per week, for a total of at least 400 hours over the course of an academic year.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9551. Consultation. 3 Credit Hours.**

This course consists of learning about consulting with teachers regarding behavior change, instructional consultation, and mental health consultation. The course also addresses the assessment of treatment integrity. This introductory graduate course is designed to provide students with theoretical background and applied training in school-based psychological consultation. Students will be exposed to a variety of theoretical models of consultation (e.g., behavioral, mental health, ecological, instructional, organizational, and cross-cultural perspectives), and will have opportunities to develop relevant skills (e.g., problem-solving, data collection, and communication/interpersonal skills). The course includes both didactic and applied components, and will involve such diverse activities and assignments as readings, class discussions, lectures, and role-plays. This course will be conducted in a mixed format that includes lecture, discussion, and group activities. Students are expected to come to class on time each week, having completed all assignments, and participate actively in class discussions and activities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPSY 9587. School Consultation. 3 Credit Hours.**

Extensive school practicum (practicum of 3 hours per week) consulting with teachers regarding behavior change, instructional consultation, and mental health consultation. Includes assessing treatment integrity.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: School Psy Clinical Clearance.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9687. Clinical Supervision Seminar in School Psychology. 3 to 12 Credit Hours.**

Case studies by the student in the Psychoeducational Clinic (taken concurrently) are reviewed in depth. Assessment, observations, interviews, diagnosis, educational identification, and remedial strategies are covered. Open only to matriculated school psychology students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9688. Psychoeducational Clinic. 3 Credit Hours.**

A practicum course providing supervised training in psychoeducational assessment and counseling of children with learning problems. Open only to matriculated school psychology students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9787. Practicum on Children with Low Incidence Disabilities. 3 to 6 Credit Hours.**

Supervised experience in schools or related settings assessing students with a variety of disabilities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: School Psy Clinical Clearance.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9788. Seminar on Children with Low Incidence Disabilities. 3 Credit Hours.**

Training and supervision on special tests, rating scales, and observational assessment of children who are blind, deaf, or have disabilities such as mental retardation, autism, orthopedic disabilities, or multiple disabilities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: School Psy Clinical Clearance.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9876. Supervision of Psychological Services. 3 Credit Hours.**

This course will prepare school psychologists to conduct effective, ethical clinical supervision. Issues of administrative supervision and evaluation of school psychological services will also be addressed. Both theory and practice will be emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SPSY 9687.

**SPSY 9885. Internship in School Psychology. 3 to 12 Credit Hours.**

Supervised internship as a full-time school psychologist in an approved school system, intermediate unit, or consortium.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9882. Independent Study in School Psychology. 1 to 6 Credit Hour.**

Intended to meet the needs of students in school psychology who desire to carry on an individual investigation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9886. Internship in School Psychology. 1 to 12 Credit Hour.**

Supervised internship as a school psychologist in an approved school system, intermediate unit, or consortium.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may be repeated for additional credit.

**SPSY 9999. Doctoral Dissertation. 1 to 6 Credit Hour.**

Registration limited to candidates for the doctorate who have successfully completed the minimum number of semester hours required for the degree and the preliminary examination. Continuous registration during the fall and spring terms is required until the dissertation has been completed, successfully defended, and accepted by the Graduate School.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student, School Psy Clinical Clearance.

**Repeatability:** This course may be repeated for additional credit.

## Science Education (Elementary) (SCEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SCEE 5401. Pre Sch & Elem Sci N-6. 3 Credit Hours.**

This course prepares students to teach the sciences in the elementary and middle grades. This course teaches how to design and teach inquiry-based science lessons that support elementary and middle school students' constructivist learning for deep understanding. Students in this course will practice designing and teaching inquiry-based lessons. They will experience inquiry-based science lessons and laboratories first-hand. This will familiarize them with the instructional approach and teach them specific science. They will also learn to review video and other resources to determine elementary and middle school students' misconceptions about the same science. Students in this course will practice integrate all this information as they design and teach inquiry-based lessons on e.g. energy, body systems, the seasons, density, and the water cycle. For their final project, students will research, design, and teach an inquiry-based lesson on a science topic of their own choosing. Learning how to manage the inquiry-based science classroom will be emphasized throughout the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Science Education (Secondary) (SCES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SCES 5415. Tchgs Sci Sec Sch Tchrs. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SCES 5713. L&T Hi Sch Bio/Phys/Chem. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SCES 5714. L&T Mid Sch Bio/Phy/Chem. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SCES 8726. Demonstrations in Sci. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SCES 8727. Critical Iss in Math/Sci. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SCES 8728. Curr Pract in Math/Sci. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SCES 9782. Special Projects. 1 to 4 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Science, Secondary Education (SCSE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SCSE 8765. Lab Exper Rel Hist Sci. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Secondary Education (SECE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **SECE 5471. Literacy and Differentiation in the Academic Areas, 7-12. 3 Credit Hours.**

This course examines ways in which secondary teachers can support all students' development of the complex literate knowledge, strategies, and practices required to achieve deep understandings of essential concepts and skills in an academic or vocational area. The course conceptualizes academic literacies broadly to include written, spoken, graphic, and visual "texts" used both as objects of instruction and supports for learning. Taking a "back-to-front" approach to curriculum design, students develop instructional activities to enable learning of specialized vocabularies, as well as reading and writing in various genres and modes. They learn to differentiate those activities so as to address differences in student backgrounds, interests, language use, learning preferences, and background knowledge.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Social and Behavioral Sciences (SBS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **SBS 5001. Fundamentals of Public Health. 3 Credit Hours.**

This course encompasses historical and sociocultural approaches to understanding public health and bioethics. Emphasis is on understanding public health systems from the dawn of history to the 21st century and the evolution of bioethical issues including the application of bioethical principles, regulations, and strategies in research and health practice. This seminar emphasizes the integration of conceptual and experiential learning. This is reflected in the course design and in teaching and learning processes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may not be repeated for additional credits.

### **SBS 5002. Program Planning, Theory, and Practice. 3 Credit Hours.**

Program Planning, Theory, and Practice is a core course in the MPH curriculum that includes content critical to the development of public health practitioners and researchers. It covers all aspects of the public health program planning cycle: (1) the identification of community stakeholders and conducting needs assessments; (2) using scientific literature and best practices to inform program development; and (3) implementation and evaluation of community programs. The course will introduce major models of human health behavior and use theory and evidence to guide students as they develop a public health program. Final program proposals include measurable goals and objectives, activities, and an evaluation plan, with a focus on cultural competence and tailoring to meet the needs of the community. Upon completion of the course, students will have the tools to design and evaluate public health programs in the community.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **SBS 5004. Understanding Stress and Change. 3 Credit Hours.**

This course focuses on the impact of stress on physical and emotional health and quality of life. It focuses on the causes, types, and physiology of stress and stress reduction methods, including relaxation, biofeedback, fear control, cognitive restructuring, and social psychological interventions in community settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **SBS 5008. Global Health: People, Planet, Place. 3 Credit Hours.**

This course introduces students to key global health concepts related to population health, environmental health, maternal and child health, emerging infectious diseases, communicable diseases, and chronic diseases. Throughout the course students will explore commonalities and differences in disease burden between global regions. The global burden of disease will be examined through the lens of social, political, and economic determinants. The course will feature case studies of current global health challenges through course activities, assignments, videos, and readings to provide a real-world context. Global health experts will be featured to share their stories, experiences, and lessons learned from the field.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 5009. Risk Communication and Public Health. 3 Credit Hours.**

The goal of this course is to demonstrate how health communication professionals can create and implement risk communication plans related to either possible or actual public health hazards (anything that can cause morbidity or mortality). This course focuses on risk communication within the context of terrorism, infectious disease outbreaks, and health problems that occur because of natural disasters. It will include core principles of risk communication, examine special challenges of risk communication with diverse audiences, and prepare students to create a crisis and emergency risk communication plan.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 5015. Public Health Nutrition. 3 Credit Hours.**

This seminar course explores nutrition as a science and platform for public health promotion and disease prevention. The fundamental contribution of nutrition to public health as well as the potential of food and nutrition policy, programs, and interventions to reduce risk and promote health are examined.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 5102. Theoretical Foundations of Health Behavior. 3 Credit Hours.**

Theories of decision-making related to health behavior. Emphasis on the dynamic interaction of attitudes, values, situational factors and other factors that influence health promoting and health damaging behavior.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 5105. Maternal and Child Health. 3 Credit Hours.**

This seminar on maternal and child health (MCH) focuses on health problems and diseases affecting pregnant and postpartum women and their children from the individual, community, and national perspectives. The course highlights the impact of common health problems and their functional outcomes in terms of morbidity, mortality, psychological well being, reproduction and growth. Students will examine social, behavioral, systems and broader population determinants of maternal and childhood diseases, as well as interventions and programs designed to address MCH problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 5500. Seminar in Current Issues in Public Health. 3 Credit Hours.**

Seminar topics rotate to address current issues in public health research, policy and practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may be repeated for additional credit.

**SBS 8001. Research Methods in Public Health. 3 Credit Hours.**

This course provides fundamental graduate-level research methods training germane to the social and behavioral sciences. Students will examine how to formulate research problem statements and hypotheses, select appropriate and sound methods for data collection, and critically evaluate research designs in social and behavioral science research. It concentrates on fundamental concepts in research design and measurement that help prepare students to plan and implement theoretically-informed and methodologically-sound scientific studies and to critically evaluate and discuss social and behavioral science research. The course emphasizes ethical and practical methods of studying and evaluating causal relations (efficacy and internal validity); determining generalizability of observations (effectiveness, external and ecological validity); and accurate and reliable measurement and conceptualization of variables (construct validity).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (SBS 5002 or SBS 5102), EPBI 5002 (may be taken concurrently), and (EPBI 5201 (may be taken concurrently) or EPBI 5101 (may be taken concurrently))

**SBS 8005. Health Promotion in Vulnerable Populations. 3 Credit Hours.**

Health inequities - unequal, unfair, and preventable differences in the burden of disease, injury, violence, or opportunities to achieve optimal health experienced by vulnerable populations - are well documented in the United States. This course will review, critically appraise and discuss theory and research on the physical, mental, and social vulnerabilities contributing to the poor health of subgroups of the American populace, with a focus on challenges and approaches to engaging hard-to-reach populations in intervention research aimed at improving health outcomes. Specifically, this course will cover theoretical frameworks, methodological and recruitment challenges and strategies, approaches to intervening at the individual, community, and system levels, and approaches to developing and adapting interventions. Students will develop a deep understanding of the potential causes of and solutions to health inequities in the US.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 8006. Addictions and Dependencies. 3 Credit Hours.**

This graduate level course explores current narratives and policies around substance use, dependency and addiction using a public health lens incorporating compassion, person first framing and harm reduction along the continuum of prevention, treatment, and recovery for persons experiencing chaotic drug use. Students will engage with current and seminal texts across multiple platforms, e.g., investigative journalism, peer reviewed journals, book chapters, podcasts, videos and lecture and delve into hot topics in the substance use landscape. Assignments may include student made content videos, program critiques, persuasive essays and policy reviews.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 8009. Health Psychology. 3 Credit Hours.**

Through class lecture, readings, and discussions, students will learn how characteristics of persons (e.g., personality, behavior, coping, and biological reactivity) and their environments (e.g., stress and social support) influence health outcomes at the individual and population level. In addition, the course examines the potential of health psychology to explain population-level health problems and to ameliorate public health problems through behavioral and community-based interventions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health, Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 8018. Obesity: From Genes to Junk Food. 3 Credit Hours.**

The course will broadly explore the etiology, treatment, and prevention of obesity from a multilevel systems perspective. Genetic, epigenetic, physiological, and psycho-social influences will be considered at the level of the individual. These influences will also be considered within family, school, and work-site contexts. Macro-level influences include government policies and programs, media, food industry influences, and community resources. Critical thinking skills and scholarly exchange will be emphasized through classroom discussion and weekly presentations/critiques of emerging science in each topic area.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101, PBHL 5101, EPBI 5201, or PBHL 5201)

**SBS 8105. Health Communication. 3 Credit Hours.**

This course examines multiple communication levels, channels, media, and communication technologies as they relate to developing and implementing public health communication interventions. Levels of communication processes and effects in the following will be covered: 1) intrapersonal health communication related to personality, attitudes, cognitive style, and culture; 2) interpersonal communication in the patient-caregiver relationship including communication style, decision making, and dynamics of stress and conflict; 3) mass communication processes including media campaigns and social marketing to promote good health and disease prevention; and 4) risk and crisis communication across settings and strategies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SBS 8111. Public Health Program Planning. 3 Credit Hours.**

This course covers program planning in public health practice. It analyzes national health objectives and their applications at the state and community levels. One emphasis is on program planning as a change strategy to alter knowledge, attitudes, and health behavior to achieve positive health outcomes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EPBI 5101 (may be taken concurrently), PBHL 5101 (may be taken concurrently), EPBI 5201 (may be taken concurrently), or PBHL 5201 (may be taken concurrently)), (EPBI 5002 (may be taken concurrently) or PBHL 5002 (may be taken concurrently)), and (SBS 5102 (may be taken concurrently) or PBHL 5102 (may be taken concurrently))

**SBS 8112. Creating Novel Interventions in Public Health. 3 Credit Hours.**

This course is a core course in the PhD in Social and Behavioral Sciences curriculum and an elective available to MPH and other graduate students in the College of Public Health. This course will guide students' efforts to build a stronger foundational knowledge of empirical evidence about a public health problem, and to synthesize that evidence with public health theories and principles of behavior change to understand how to improve strategies to address the problem. Students will use inductive strategies and deductive logic to develop and defend conceptual models that (a) represent risk and protective factors influencing a chosen problem and (b) exemplify the potential efficacy of an intervention strategy that either highlights current state-of-art practice (masters students) or that advances (doctoral students) the current state-of-art approaches to that problem. The culmination of sequential assignments includes student presentations highlighting current public health challenges in their topical areas and a testable intervention strategy framed conceptually by health behavior theory. Students are expected to prepare for each class and participate actively. Note: Prior to fall 2023, the course title was "Concepts and Methods to Improve Public Health Interventions."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (SBS 8009 or SBS 5002)

**SBS 9083. Readings and Conference in Public Health. 1 to 3 Credit Hour.**

This is an advanced tutorial in public health with an appropriate faculty member. Note: Registration requires a written contract with the supervising faculty member and approval of the student's advisor and of the Director of Graduate Programs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SBS 9289. MPH Fieldwork I. 3 Credit Hours.**

This course entails a fieldwork project or internship in a public health agency. It includes seminars, oral and written reports of progress, and joint supervision by a preceptor and faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in EPBI 5101, HPM 5006, SBS 5001, (SBS 5002 or SBS 5102), and (EPBI 5006 or (EPBI 5002 and EPBI 5005))

**SBS 9291. Dietetics Experiential Learning. 3 Credit Hours.**

Students will complete three assignments that draw on their experiences in the clinical and food service setting and present their work to the class. In addition, students will participate in journal clubs and role play activities that help develop management and ethical practice skills. Preceptors will evaluate the application of these skills in a real life setting and provide feedback that does not impact the student's grade. This course will give students the space to reflect on their experiences, and tie academic learning to experiential learning and learn from each other.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SBS 5214 and SBS 5211.

**SBS 9389. MPH Fieldwork II. 3 Credit Hours.**

This course is an evaluation of the fieldwork project or internship using a full range of research methodologies. Data are collected, analyzed, and reported in a comprehensive final report. Oral and/or poster presentations are presented to public health organizations. The course includes a final oral defense of the project or internship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SBS 9289, (SBS 5002 or SBS 5102), ((EPBI 5002 and EPBI 5005) or EPBI 5006), and (EPBI 5201 or EPBI 5101)

**SBS 9994. Preliminary Examinations. 1 Credit Hour.**

This course supports preparation for taking the preliminary examinations in the Health Policy and Social and Behavioral Sciences Ph.D. programs. To enroll, students must have completed all required coursework for the Ph.D. and obtain the approval of the Ph.D. Program Director. Students must be enrolled to take the required preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SBS 9998. Dissertation Proposal Research. 2 Credit Hours.**

This course supports preparation of the dissertation proposal. The course is required for students who have passed the preliminary examinations for their PhD program and who have not yet defended the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Doctor of Philosophy.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in SBS 9994.

**SBS 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is limited to Ph.D. candidates who have completed and defended a dissertation proposal that is filed with the Graduate School by the last day to add a course in the semester. Continuous registration in 9999 fall and spring is required until the dissertation is successfully defended.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Social Studies Education (Elementary) (SSEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SSEE 5451. Tchg Social Stds N:6. 3 Credit Hours.**

This course is available for students interested in becoming eligible for certification at the N-6 level. Content covered includes teaching strategies for social studies for elementary school children that address geography, civics history, and economics. A special project is required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSEE 8763. Curriculum in Social Studies. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Social Studies Education (Secondary) (SSES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SSES 5465. Meth & MatrIs Sec Soc St. 3 Credit Hours.**

This course is available for students interested in becoming eligible for certification at the 7-12 level in social studies. Content covered includes theoretical propositions underlying pedagogical approaches; issues in diversity and social justice in the classroom; and instructional materials and teaching strategies for secondary social studies. A special project is required. Contact a social studies adviser for further information.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSES 5466. Teaching for Understanding in Secondary Social Studies. 3 Credit Hours.**

This course focuses on applied social studies methods; the course objectives are (1) that pre-service social studies teachers will learn about the rich resources found at museums, archives, and historic sites and (2) that they will have an opportunity to apply what they have learned in the program to developing curricular materials. There is a required field experience for which students are placed at Philadelphia area cultural institutions. Students will be developing collections and curriculum materials for schools and teachers in general and for National History Day. Class time will be devoted to strengthening and supporting the field experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (EDUC 5402 and EDUC 5605)

## **Social Work (Graduate) (SSWG)**

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SSWG 5000. Special Topics in Social Work. 1 to 3 Credit Hour.**

Topics vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SSWG 5003. Foundations in Social Work Research. 3 Credit Hours.**

This is the foundation course in research methods in the MSW program. This course provides graduate social work students with a basic understanding of social work research methods. The philosophy of traditional scientific inquiry will be presented along with a postmodern orientation to knowledge building. Students will learn quantitative deductive and qualitative inductive approaches to empirical study of social work problems. Critical thinking about knowledge, values and ethics regarding problem formulation, research methods and use of findings, and research skills as they relate to social work will be emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 5005. Social Welfare Policies and Services I. 3 Credit Hours.**

This is an introduction to American social welfare policies and social service programs in their historical, political, economic, and social context. Methods of social problem analysis and the social work profession as a social institution are covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 5006. Social Welfare Policies and Services II. 3 Credit Hours.**

This course builds on SSWG 5005 and covers methods of social policy analysis and advocacy in the public policy arena, including skills in argumentation and lobbying.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (SSWG 5005 or 'Y' in SW05)

**SSWG 5007. Deconstructing White Supremacy in Social Work. 3 Credit Hours.**

Using the School of Social Work's mission of "societal transformation" as a springboard, this course explores a critical aspect of being a social worker: becoming an agent of social change. The course focuses on the ideology of white dominant culture and white supremacy as a structural and systemic problem to be acknowledged and dismantled within the field of social work as a starting place before responding in equitable and anti-oppressive ways to societal and global issues. Attention is paid to core social work ethics and values, understanding how identity and lived experiences shape social work, and facilitating working with others. The advancement of anti-oppressive frameworks, on micro, mezzo and macro and global levels of practice is addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Social Work.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 5101. Theory-Informed Direct Practice I: Individuals, Families, and Groups. 3 Credit Hours.**

This is the first of two courses focused on theory-informed social work direct practice with individuals and families. This course emphasizes how our theoretical knowledge base of human behavior and human development (within the context of the social environment) impacts our engagement with and assessment of individuals. The course begins with an exploration of the role of human behavior theory, its limitations and strengths, and proceeds to provide knowledge of human development and human behavior throughout the life course from a person-in-environment perspective. Interrelationships among biological, psychological, social, and cultural systems (as they affect, and are affected by, human behavior) are studied using a number of interdisciplinary theoretical approaches, including knowledge about how exposure to trauma impacts human development. We then apply this knowledge through experiential learning to our practice with individuals, integrating tenets of Motivational Interviewing, trauma-informed practice, and anti-oppressive practice to develop a rapport with individuals and complete a comprehensive bio-psycho-social-spiritual assessment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (SSWG 5005 (may be taken concurrently) or 'Y' in SW05) and SSWG 5007 (may be taken concurrently)

**SSWG 5102. Theory-Informed Direct Practice II: Individuals, Families, and Groups. 3 Credit Hours.**

This is the second of two courses focused on theory-informed direct social work practice with individuals and families. This course emphasizes how our theoretical knowledge-base of human behavior and human development (within the context of the social environment) impacts our interventions with individuals and families. This course emphasizes theories related to family development, integrating knowledge of the impact of trauma on families, with a critical discussion about its limitations and strengths. Interrelationships among biological, psychological, social, and cultural systems (as they affect and are affected by human behavior) are studied using a number of interdisciplinary theoretical approaches. We then apply this knowledge to our practice with individuals and families, through experiential role plays, continuing to use the tenets and skills of trauma-informed practice, anti-oppressive practice, and Motivational Interviewing as a foundation of our work. We will critically assess a series of interventions for our work with individuals and families using evidence-based practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 5101, (SSWG 5003 (may be taken concurrently), EPBI 5101 (may be taken concurrently), or 'Y' in SW03), and (SSWG 5006 (may be taken concurrently) or 'Y' in SW06)

**SSWG 5103. Theory-Informed Macro Practice I: Groups, Organizations, and Communities. 3 Credit Hours.**

This is the first of two foundation courses that focus on macro social work. Macro social work is concerned with collective interventions in and with group, organization, and community systems. This course emphasizes the theories and practice skills necessary for understanding, assessing, designing, and planning interventions of change in macro systems. Students apply theory during experiential learning opportunities. Particular attention is paid to the dynamics of multiculturalism, using a trauma/resiliency-informed lens and an anti-oppressive framework to identify and evaluate culturally-appropriate, evidence-based macro interventions. Promising practice examples from macro social work will illustrate how to bring about societal transformation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (SSWG 5005 (may be taken concurrently) or 'Y' in SW05) and SSWG 5007 (may be taken concurrently)

**SSWG 5104. Theory-Informed Macro Practice II: Groups, Organizations, and Communities. 3 Credit Hours.**

This is the second of two foundation courses that focus on macro social work. Macro social work is concerned with collective interventions with group, organization, and community systems. This course emphasizes the theories and practice skills necessary for implementing, monitoring, and evaluating planned macro interventions. Students apply theory during experiential learning opportunities. Particular attention is paid to the dynamics of multiculturalism, using a trauma/resiliency-informed lens and an anti-oppressive framework to identify and evaluate culturally-appropriate, evidence-based macro interventions. Promising practice examples from macro social work will illustrate how to bring about societal transformation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 5103, (SSWG 5003 (may be taken concurrently), EPBI 5101 (may be taken concurrently), or 'Y' in SW03), and (SSWG 5006 (may be taken concurrently) or 'Y' in SW06)

**SSWG 5108. Practice of Social Service Delivery II. 3 Credit Hours.**

This course builds on SSWG 5107 by focusing on refinement of and competence in generalist social work practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in SSWG 5107, SSWG 5002 (may be taken concurrently), (SSWG 5006 (may be taken concurrently) or 'Y' in SW06), and (SSWG 5003 (may be taken concurrently) or 'Y' in SW03)

**SSWG 5187. Foundation Field Practicum I. 3 Credit Hours.**

For the first semester of the foundation-year field practicum, the student works within a generalist social work framework to develop basic competencies in key knowledge, skill, and affect arenas. This generalist framework includes a broad range of knowledge and skills; theories and models; practice at the micro, mezzo, and macro levels; performance in numerous social work roles; and understanding the various fields of practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in SSWG 5007 (may be taken concurrently), (SSWG 5005 (may be taken concurrently) or 'Y' in SW05), and ((SSWG 5001 (may be taken concurrently) and SSWG 5107 (may be taken concurrently)) or (SSWG 5101 (may be taken concurrently) and SSWG 5103 (may be taken concurrently)))

**SSWG 5188. Foundation Field Practicum II. 3 Credit Hours.**

This course continues SSWG 5187 as the foundation-year field practicum taken in the second semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- (except where noted) in SSWG 5187 (P or higher), (SSWG 5006 (may be taken concurrently) or 'Y' in SW06), (SSWG 5003 (may be taken concurrently) or 'Y' in SW03), and ((SSWG 5002 (may be taken concurrently) and SSWG 5108 (may be taken concurrently)) or (SSWG 5102 (may be taken concurrently) and SSWG 5104 (may be taken concurrently)))

**SSWG 5302. Critical Thinking for Societal Transformation. 1.5 Credit Hour.**

This course focuses on the development of critical thinking skills essential for social work practice focused on societal transformation. In contrast to undergraduate education in social work (that emphasizes descriptive writing, memory recall, and basic interpretation of data and conclusions), this course stresses critical analysis. This course prioritizes the following: weighing and considering the meaning and significance of claims; creative and innovative thinking; problem solving; logical reasoning; and evaluating and synthesizing research and theory. This course is essential to ensure that students, capable in generalist social work practice, will be primed to enter a graduate curriculum that emphasizes social justice and, as such, requires innovative thinking and skill acquisition in a concentrated social work method as well as in a specialized area of study.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 5309. Societal Responses to Aging. 3 Credit Hours.**

This course explores public and private resources, the need for social and political action, and the network of services required to meet the needs of individuals and their families. It presents policies and practice in income maintenance, health, housing, safety, and social status. Public-private sponsorship, cost, accountability, benefit levels, and administration are discussed. Student social action projects are completed and expanded.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in (SSWG 5005 or 'Y' in SW05)

**SSWG 8000. Special Topics in Social Work. 1 to 3 Credit Hour.**

Topics vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SSWG 8010. Special Topics in Social Work. 1 to 3 Credit Hour.**

Topics vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SSWG 8101. Clinical Practice with Individuals, Families, and Groups I. 3 Credit Hours.**

This advanced practice course for students in the Clinical concentration is the first course in a year-long sequence of two courses that comprise the clinical concentration practice curriculum. Students learn guidelines for evidence-based practice and develop a multicultural perspective of clinical social work practice with individuals, families, and groups. The course provides more depth and breadth in the evidence base for selection of effective theoretical frameworks that support collaborative interventions with vulnerable and diverse populations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- (except where noted) in (SSWG 5302, Complete the following: SSWG 5001, SSWG 5002, (SSWG 5003 or 'Y' in SW03), SSWG 5107, SSWG 5108, and SSWG 5188 (P or higher), or Complete the following: (SSWG 5003 or 'Y' in SW03), SSWG 5101, SSWG 5102, SSWG 5103, SSWG 5104, and SSWG 5188 (P or higher))

**SSWG 8102. Clinical Practice with Individuals, Families, and Groups II. 3 Credit Hours.**

This course continues to develop advanced practice skills and knowledge with individuals, families, and groups as undertaken in SSWG 8101. Students further develop self-awareness, use of self, and recognition of feelings evoked in relation to the helping process.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8101.

**SSWG 8107. Macro Practice in Organizational, Community and Policy Arenas. 3 Credit Hours.**

This course prepares students in the Macro Concentration for advanced work in human service and social change organizations, geographic and identity-based communities, and policy arenas. Students will acquire knowledge and skills to be change agents within organizations and contribute to creating the requisite social, political, and economic conditions to help communities and constituencies meet their needs and achieve their full potential. The course will cover nature and characteristics of public, private and nonprofit organizations, community dynamics, policy practices and processes, organizing, planning, collaborations, development and sustainability, inclusivity and diversity, use of research to inform practice, ethics and professional development. Knowledge and skill competencies, as identified by the social work profession, inform the design of the course. Note: The course is for MSW students who have selected the Macro Concentration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- (except where noted) in (SSWG 5302, Complete the following: SSWG 5001, SSWG 5002, (SSWG 5003 or 'Y' in SW03), SSWG 5107, SSWG 5108, and SSWG 5188 (P or higher), or Complete the following: (SSWG 5003 or 'Y' in SW03), SSWG 5101, SSWG 5102, SSWG 5103, SSWG 5104, and SSWG 5188 (P or higher))

**SSWG 8109. Social Innovation and Entrepreneurship. 1 Credit Hour.**

Social Innovation has been a defining characteristic of the social work profession from its earliest days. Mary Richmond's early casework assessment tools, community organizing and economic development efforts, social entrepreneurship and philanthropic initiatives as well as anti-racism/anti-oppression/anti-violence interventions are just a few of the change-oriented contributions made by social workers. This five-week, one-credit course is intended to further encourage students to see themselves as innovators who can make their vision for positive social transformation a reality. The course offers students a substantive grounding in social entrepreneurship (SE) and social innovation. It presents SE's history, context, diversity of applications, as well as the increasing regard for SE as a tool to transform the current corporate economy to an ecological and equitable one. The course provides a space for students to reflect and raise questions about how they might like to use their skills to make a difference in the world through social entrepreneurship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8107.

**SSWG 8111. Legislative Advocacy. 1 Credit Hour.**

Building on foundational knowledge of policy issues, and SSWG 8107 (Macro Practice), this one-credit course provides students with the advanced skills necessary to undertake legislative advocacy. Students will review tactics for legislative advocacy for social justice and human rights. A range of tactics and techniques used in defining issues and assessing policy conditions will be taught. Students will also learn about regulations and how to advocate for regulations that yield the best outcomes for vulnerable groups. Students will develop and implement a legislative advocacy campaign as a policy practice project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8107.

**SSWG 8112. Coalitions and Partnerships. 1 Credit Hour.**

In this one-credit course, students will become familiar with key strategies for building partnerships and coalitions, by building upon community issues already identified in Macro Practice and foundations human behavior course. Students will explore strategies that mobilize and leverage community support services and incorporate diverse community perspectives. Topics include collaborative leadership, coalition development, developing a constituency/partnership, team building, and advocacy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8107.

**SSWG 8113. Resource and Grant Development for Human Services. 1 Credit Hour.**

In today's society, financial resources for human services are severely limited and public demand for greater accountability on the part of agencies is growing. Administrators, managers and supervisors of human services and non-profit agencies are seeking to become more knowledgeable and skillful in resource development. This 1-credit course is designed to respond to that need by preparing students to use resource acquisition as a key tool for accomplishing the objectives of their future organizations of employment. This course focuses on resource acquisition (fund raising, campaigns, use of grants, and entrepreneurial options).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8107.

**SSWG 8114. Supervision, Staff Management, and Staff Development in Human Service Organizations. 1 Credit Hour.**

In this 1-credit course, students will examine roles and the range of issues that encompass supervision in organizational contexts, including management and development of personnel. Students will gain practical information and tools to assist them as they function as social work supervisors, managers, administrators, and executives in human service organizations. Students will examine social work supervision from historical, theoretical and applied perspectives, with particular emphasis on challenges, ethical issues, and solution-focused techniques in administrative, educational and supportive supervision.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8107.

**SSWG 8115. Leadership in Human Service and Social Change Organizations. 1 Credit Hour.**

This 1-credit course will increase understanding of leadership at the personal, interpersonal, team, and organizational levels, and will prepare students for assuming leadership roles in human service and social change delivery organizations. It is critical for students to have the capacity to lead from wherever they sit in the organization, as practitioners, coordinators, managers, supervisors, or executives, and that they develop an effective style of leadership and acquire the competence, skills and knowledge necessary to assist in leading human service and social change organizations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8107.

**SSWG 8116. Grassroots Mobilization: In the US and Internationally. 1 Credit Hour.**

This one-credit course on grassroots mobilization will build on the content from SSWG 8107 (Macro Practice). It will cover the theoretical and skill-based underpinnings of organizing with the grassroots to create increased social and economic justice. Social, economic and political reforms around the world often begin when those who are most vulnerable organize to enact positive change for themselves and others in their communities. The empowerment of these groups can lead to sweeping social, political and economic changes. As social workers, we must use our skills to create and become a part of these grassroots movements in order to fulfill the mission and the ethics of our profession.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 8107.

**SSWG 8187. Advanced Field Practicum I. 3 Credit Hours.**

This advanced year practicum for service delivery builds competencies in the Clinical concentration, Management and Planning concentration, or Communities and Policy Arenas concentration, and by selected specialization. This is the first semester (fall) of a two-semester internship in which the student gains greater depth in knowledge and skills for her or his choice of concentration, and increased familiarity with a chosen field of practice (specialization).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (SSWG 5302, SSWG 8101 (may be taken concurrently), or SSWG 8107 (may be taken concurrently))

**SSWG 8188. Advanced Field Practicum II. 3 Credit Hours.**

This advanced year practicum for service delivery builds on SSWG 8187. This is the second semester course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- (except where noted) in SSWG 8187 (P or higher) and ((SSWG 8101, SSWG 8102 (may be taken concurrently), and SSWG 8205 (may be taken concurrently)) or (SSWG 8107, SSWG 8207 (may be taken concurrently), and Complete 1 of the following: (SSWG 8109 (may be taken concurrently), SSWG 8111 (may be taken concurrently), SSWG 8112 (may be taken concurrently), SSWG 8113 (may be taken concurrently), SSWG 8114 (may be taken concurrently), SSWG 8115 (may be taken concurrently), or SSWG 8116 (may be taken concurrently))))

**SSWG 8205. Evaluation of Clinical Practice. 3 Credit Hours.**

This is a required advanced-level research course for students in the Clinical concentration. It provides students with tools of practice evaluation and learning experiences of formal evaluation of student's individual work with individuals, families, and groups. It also reviews methods of evaluation of direct practice at both individual and program levels.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- (except where noted) in (Complete the following: (SSWG 5003, EPBI 5101, or 'Y' in SW03) and SSWG 5188 (P or higher) or SSWG 5302) and SSWG 8101 (may be taken concurrently)

**SSWG 8207. Social Work Research: Communities and Policy Arenas and Management/Planning. 3 Credit Hours.**

This is a required advanced-level research course for students in the Management and Planning and Communities and Policy Arenas concentrations. It focuses on the history and philosophies, conceptual approaches, techniques and methods, and issues in practice and utilization of research applied to communities, organizations, social programs, and policies. It provides students with the skills to carry out research designed to support human rights through community and/or policy assessment, planning, and intervention.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- (except where noted) in (Complete the following: (SSWG 5003, EPBI 5101, or 'Y' in SW03) and SSWG 5188 (P or higher) or SSWG 5302) and SSWG 8107 (may be taken concurrently)

**SSWG 8303. Dynamics of Health, Health Care, and Health Systems. 3 Credit Hours.**

This advanced year graduate course focuses on Human Behavior in the Social Environment (HBSE) content relevant to health and mental health social work practice at all systems levels. Students study the effects of bio-psycho-social, familial, organizational, economic, and cultural variables on the definition, incidence, prevalence, experience, treatment, and prevention of chronic and acute conditions, particularly those prevalent among oppressed populations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ((SSWG 5001 and SSWG 5002), (SSWG 5101 and SSWG 5103), SSWG 5301, or SSWG 5302)

**SSWG 8307. Health/Mental Health Policy. 3 Credit Hours.**

This advanced-level policy course is for students in the Health/Mental Health Policy specialization. This course examines historical and current issues in health/mental health policy, including the U.S. health care system (e.g., managed care, Medicare, and Medicaid) as well as international comparisons. Insurance, access to care, and differential health/mental health outcomes are studied.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ((SSWG 5005 and SSWG 5006), SSWG 5301, SSWG 5302, ('Y' in SW05 and 'Y' in SW06), (SSWG 5005 and 'Y' in SW06), or (SSWG 5006 and 'Y' in SW05))

**SSWG 8403. Children and Families in the Social Environment. 3 Credit Hours.**

This advanced year graduate course is designed to develop students' understanding of children within the context of families and other socializing institutions. Children and families are viewed from an ecological and systems perspective, i.e., in the context of families, communities, schools, and organizations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ((SSWG 5001 and SSWG 5002), (SSWG 5101 and SSWG 5103), SSWG 5301, or SSWG 5302)

**SSWG 8407. Policy on Families and Children. 3 Credit Hours.**

This is an advanced-level policy course for students in the Children and Families specialization. It offers an overview of policies that impact families, children, and youth in the United States. These three policy areas, although distinct, are integrally related. The challenge of creating effective social policies for families, children, and youth is the focus of this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ((SSWG 5005 and SSWG 5006), SSWG 5301, SSWG 5302, ('Y' in SW05 and 'Y' in SW06), (SSWG 5005 and 'Y' in SW06), or (SSWG 5006 and 'Y' in SW05))

**SSWG 8503. Military Culture: The Service Member, Veteran and Family in the Social Environment. 3 Credit Hours.**

This course intends to provide students with a learning experience that provides a foundation of theory, skills, and knowledge necessary in the practice of military social work. Social work practice with the military, not unlike other facets of social work practice, must keep in mind the unique culture of the individual within the context of their unique environment and history. Learning modules include military culture, the military family, military children, female warriors and veterans, and clinical assessment and treatment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C (except where noted) in (SSWG 5002 or SSWG 5301 (B- or higher))

**SSWG 8504. Integrative Seminar. 3 Credit Hours.**

This course provides an opportunity for students, individually and in teams, to identify and critically examine major ethical/legal as well as practical concerns facing the profession. The course is designed to enhance self-awareness and self-confidence through the integration of knowledge, skills, and values learned throughout the M.S.W. program. Note: Students must take this course in the last semester of the M.S.W. Program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- (except where noted) in (SSWG 8101 or SSWG 8107), (SSWG 8205 (may be taken concurrently) or SSWG 8207 (may be taken concurrently)), SSWG 8187 (P or higher), and SSWG 8188 (P or higher; may be taken concurrently)

**SSWG 8505. Advanced Social Justice: Anti-Oppressive Social Work. 3 Credit Hours.**

Advanced Social Justice: Anti-Oppressive Social Work is an advanced-year course focused on explicitly identifying solutions and actionable processes for addressing forms of oppression. This course provides course participants with the opportunity to engage in critical self-awareness that is essential to creating sustainable change. Participation in this course will lead to refined and actionable skills in awareness and engagement in anti-oppressive practices. This course combines theory and practice skills applicable to all forms of social work practice by utilizing an ecological perspective, considering interpersonal skills, and advocacy. This course focuses on the development of the practitioner, increasing inclusive practices applicable to the diversity of pathways occupied by the social work professional. Advanced Social Justice: Anti-Oppressive Social Work is designed to solidify concepts from Social Justice: Foundation for Transformative Social Work (SSWG 5007), which is offered in the foundation-year of the MSW program. Anti-Oppressive Social Work focuses on solidifying anti-oppressive skills via critical self-reflection and increasing social awareness. Critical race theory, ecological perspective, and intersectionality are foundational theories to the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- (except where noted) in SSWG 8188 (P or higher; may be taken concurrently) and (SSWG 5007 or SSWG 5302)

**SSWG 8507. Military Health Care, Policy and Community Response. 3 Credit Hours.**

The purpose of the course is to introduce students to the arena of social policy analysis, policy practice, and advocacy as related to social work practice with the military.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Social Work.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C (except where noted) in (SSWG 5006, SSWG 5301 (B- or higher), or 'Y' in SW06)

**SSWG 8603. Advanced Human Behavior and the Social Environment - Gender and Sexuality through the Lifespan. 3 Credit Hours.**

Sexual wellness is a key component of human wellness. The World Health Organization states "sexual health is influenced by a complex web of biological and social factors. It requires a positive, responsible approach to sexuality and sexual relationships as well as pleasurable, safe sexual experiences that are free from coercion, discrimination, or violence." Taking a human behavior, social environment, and biopsychosocial approach to gender and sexuality, this course is designed to increase the student's comfort and sensitivity to the diversity of sexual issues people face and the normative spectrum of behavior and identity that exists. The course will explore the diversity of human sexuality; paying specific attention to the roles that gender, race, class, sexual orientation, religion/spirituality, and ethnicity have on sexuality. Sexual violence will be examined on both macro and micro levels with emphasis on human rights and social justice aspects of vulnerable populations. Sexual concerns of clients will be examined in a variety of practice settings such as case management, counseling, health care, schools, and child welfare. A variety of sexuality related topics will be covered including sex through the life span, diagnostic interviewing, disability and illness, reproductive justice, sexual wellness, sexuality education, and sexual diversity. All materials will be taught using the framework of NASW's Code of Ethics for social workers dealing with sexually related matters.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ((SSWG 5001 and SSWG 5002), (SSWG 5101 and SSWG 5103), or SSWG 5302)

**SSWG 8607. Advanced Policy - Gender and Sexuality. 3 Credit Hours.**

This advanced level course focuses on the arena of social policy analysis, policy practice, and advocacy as related to gender and sexuality. Specific focus will be on evaluating how class, race, religion, and immigration status interact with gender and sexuality to impact policy, services, and outcomes for client populations. Policies at the national and international level, the state and local level, and at the agency and organization level will be examined. Students will identify how these policies can affect client populations and macro, mezzo, and micro practice. A major goal of the course is to provide students with knowledge and skills to influence the development, implementation, and evaluation of policies that relate to gender and sexuality.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ((SSWG 5005 and SSWG 5006), SSWG 5301, SSWG 5302, ('Y' in SW05 and 'Y' in SW06), (SSWG 5005 and 'Y' in SW06), or (SSWG 5006 and 'Y' in SW05))

**SSWG 8801. Financial Management. 3 Credit Hours.**

In a global society for human service management, financial resources are competitive and limited. Moreover, the funders (government, private corporations, and the public) demand greater accountability on the part of agencies. Administrators of social work organizations need to become knowledgeable and skillful as fiscal and program managers. This course is designed to prepare students to use resource acquisition as well as risk and cost management techniques to become effective administrators. This course is designed to complement and support the administration courses by focusing on the financial management aspects of integrated program planning and budgeting. Topics covered include resource expenditure (budget development, fiscal management, risk management, cost analysis and control, financial and IRS reporting) and resource acquisition (fund raising, capital campaigns, use of grants, performance-based and other services contracting, diversification of income sources, entrepreneurial options). Students develop ethical decision-making practices with regard to resource allocation that enable them to develop a professional sense of accountability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8803. Emotional Disorders in Children and Adolescents. 3 Credit Hours.**

This course studies emotional, social, behavioral, and developmental disorders that are prevalent during childhood. Risk factors, developmental pathways, co-occurring conditions, and effective treatment approaches are studied.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8804. Social Work with the Homeless. 3 Credit Hours.**

This course provides a framework for the analysis of social policies and programs related to the social problems of homelessness in the United States. Although the focus of the course is on contemporary issues of homelessness, the approach includes an historical perspective in order to explore the enduring legacy of early interventions and approaches to the relief and social control of marginalized populations. The implications of differing viewpoints and alternative problem definitions for policy and service delivery are considered. The course explores shifts in housing policies. Additionally, employment programs are discussed in some detail to demonstrate their impact on the increasing numbers of Americans who are homeless.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8807. HIV/AIDS and Social Work. 3 Credit Hours.**

This course provides an overview of knowledge, skills, values, and policy issues related to prevention and service delivery with HIV/AIDS infected and affected persons.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8809. Child Welfare Policy. 3 Credit Hours.**

This course provides an overview of social welfare policies affecting children with particular attention to the problems of child abuse and neglect.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8811. Alcohol and Drug Use. 3 Credit Hours.**

This course provides students with current information about alcohol and other substance use. Using ecosystems and family systems frameworks, information is presented regarding the bio-psycho-social impact of alcohol and other substance use on individual and family functioning. Particular attention is given to treatment options and resources for change.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8814. Loss and Grief. 3 Credit Hours.**

This course examines the dynamics of loss and mourning, societal attitudes about death, and cultural variations in dealing with loss.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8815. Law and the Practice of Human Services. 3 Credit Hours.**

This course considers various legal issues as they pertain to the practice of social work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8816. Practice Consultation. 3 Credit Hours.**

This course is offered to students planning a career in clinical social work. It builds on the foundation of Clinical Practice I and II, going further and deeper into the skills of clinical practice. It is designed as a seminar with components of peer and clinical supervision similar to LSWs seeking supervision hours toward LCSW licensure. It covers a wide variety of practice skills addressing client needs as presented in class. As such, the majority of class content will be case driven in accord with case presentations. Students should have a strong theoretical foundation and clinical experience working with clients in a mental health setting.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8818. Supervision, Staff Development, and Training. 3 Credit Hours.**

This course examines sources of power in organizational hierarchies, alternative formats for organizational development, and supervisory and staff development practices.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8823. Psychodynamics of Race, Class and Culture. 3 Credit Hours.**

This course focuses on psychodynamic dimensions unique to particular cultural and socioeconomic groups and their relationship to social work practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8824. Assessment and the DSM. 3 Credit Hours.**

The focus is on using the DSM-5 as an assessment tool and the implications for social work practice. A bio-psycho-social approach to understanding human behavior is taken.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8826. Aging HBSE. 3 Credit Hours.**

This course provides an overview of the major biological, psychological, and sociological theories used to understand the aging process, in conjunction with the social, emotional, and physical environment. The interrelationship between the aging person, his or her family, and society is explored. Particular attention is given to at-risk and diverse populations such as women, minorities, and the oldest old. This course further examines the pathologies and functional disorders which occur in some populations, in addition to the normative process of aging in today's society.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8827. Aging Policy. 3 Credit Hours.**

This is one of three courses in the Aging Specialization. This course focuses on the major social policies affecting the lives of aging Americans. It provides students with the opportunity to understand and analyze the principal social programs, which have been developed in response to the major issues confronted by America's elderly. Students will explore key policy issues in the areas of work and retirement; income maintenance; housing; health care (including long term care, both institutional and home based); delivery of preventive and acute care in the community; the impact of managed care on the elderly; prescription reimbursement programs; abuse and neglect of the elderly; hospice care; euthanasia; Medicare and Medicaid; nutritional support; mental health issues and other related health care topics; and the needs of selected populations during aging (e.g., chronically mentally ill, developmentally disabled and others experiencing pre-existing chronic health care concerns). All of these issues will be pursued with a focus upon social justice, diversity, and consumer involvement in policy development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8831. Social Transformation. 3 Credit Hours.**

This course is an exploration of social transformation theories and practices in the humanities, sciences, social sciences, and other uncategorized ventures for a different world. Topics selected by students range from art therapy to nonviolent civil disobedience. The course emphasizes participatory learning and practical application in social work settings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SSWG 8832. Wealth, Poverty, and In Between: Implications of Class Identity and Stratification on Social Work. 3 Credit Hours.**

Socioeconomic class is ever-present in social work; yet, rarely is it examined critically as an aspect of one's cultural identity, as a means of categorizing society, and as an underpinning for policy and practice. This course will focus on the construction of class identity, especially as it intersects with other cultural dimensions, the ways in which socio-economic status shapes individual and group opportunities, and how class-based assumptions are made, promoted, and institutionalized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SSWG 5007 and (SSWG 5005 or 'Y' in SW05)

**SSWG 9182. Independent Study. 3 Credit Hours.**

This is an independent course of study in an area of special interest. A faculty facilitator and the student work together to identify the content and design learning opportunities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SSWG 9282. Independent Study. 1 to 4 Credit Hour.**

This is an independent course of study in an area of special interest. A faculty facilitator and the student work together to identify the content and design learning opportunities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SSWG 9817. Clinical Military Practice and the Invisible Wounds of War. 3 Credit Hours.**

Social work practice with the military, not unlike other facets of social work practice, must keep in mind the unique culture of the individual within the context of their environment and history. This course intends to provide students with the knowledge and skills that inform the practice of clinical social work with military service members. Topics include clinical work with military families, women warriors, couples, children, service members, and veterans. Facets of clinical work discussed include various contemporary issues facing the modern military service member including the invisible wounds of war. Learning modules include the signature (invisible) wounds of contemporary conflicts, military sexual trauma, issues of sexuality, female warriors, the military family, military children, and the new warrior.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in SSWG 8503 and SSWG 8507.

## Sociology (SOC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SOC 8011. Logic of Inquiry. 3 Credit Hours.**

This course is an introduction to the logic and methods of social research. We will examine the issues that arise in doing and evaluating both quantitative and qualitative research by reading the sociological literature. We will spend some time on the simple tools, e.g. tables and graphs, needed to summarize research results. However the focus will be on larger issues, namely, how researchers draw conclusions from empirical data, and how we can assess the validity of the conclusions they reach.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8111. Classical Social Theory. 3 Credit Hours.**

This course reviews the main lines of sociological and other "social" thought of the modern times (roughly from the 1660s to our time), paying attention to four basic directions in theorizing: (1) The liberal and "classical economic" theories of John Locke and Adam Smith and the rise of neo-classical (neo-liberal) thinking [rational choice theory and its variations]. (2) The liberal-idealist theory of German philosophy (since Kant) and the "interpretative" and "subjectivist" paradigm of Max Weber [and various neo- and nearly-Weberians]. (3) The "social-structural" ("dialectical" in the old language) theory of Karl Marx and its many offshoots [neo-Marxisms, half-Marxisms (such as "Critical Theory," etc.), post-Marxisms]. (4) The "collectivist" (sociologistic) theory of Emile Durkheim and its contemporary versions ["structuralist" (Blau), "culturalist" and "functionalist" (Parsons), "systems" (Luhmann), or "neo-functionalistic" (Faia, Alexander)].

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8211. Inferential and Multivariate Statistics. 4 Credit Hours.**

This course starts with a review of bivariate statistics and moves quickly into multivariate statistics focusing on multiple regression. The emphasis of this course is on conceptual understanding, interpretation, and application. All major computations are performed using the SPSS computing program. Students are also expected to learn the basic skills for working with large social science data sets, such as the GSS. This course serves as a prerequisite for SOC 9211, which involves the application of the statistical procedures taught in this class to the study of real social issues through secondary data analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8221. Qualitative Methods. 3 Credit Hours.**

This course introduces the assumptions, theories and practices of qualitative research methods. The course is designed to provide opportunities for developing specific qualitative research skills while gaining familiarity with theories, issues, and problems in qualitative research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8231. Demography & Immigration. 3 Credit Hours.**

This course surveys the social demographic research on immigration, broadly conceived, and the numerous social, economic, and political processes with which it intersects. The course has two main goals: (1) to introduce students to the sources of data most commonly used by social demographers to study immigration and to social demographic methods; and (2) to critically review the leading social demographic research literature on the dynamics of immigration and social change. The data and research covered during the semester will focus primarily on the United States, but a non-negligible share of the course will be devoted to cross-national comparisons, the global migration system, and transnationalism and development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8241. The Ethics of Social Research. 3 Credit Hours.**

This course examines many of the ethical dimensions of conducting social research. Social researchers are accountable to: a) their own consciences and their own ethics, b) the actual people they are studying, c) international and federal laws, d) institutional policies and practices, e) their disciplines and sub-fields, f) their peers and colleagues, and g) any other communities to which they belong or in which they participate. This course examines a series of readings organized around key themes in research ethics. In addition, students are asked to investigate particular cases of alleged research misconduct and to take a position on the controversy. By the end of this class, students should: 1) Know the key laws and statutes governing social research; 2) Be familiar with the ethical resources available to social researchers; 3) Be able to evaluate the ethics of particular research cases; and 4) Be able to weigh ethical dilemmas in their own research practice and make responsible decisions about those dilemmas.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8311. Sociology of Education. 3 Credit Hours.**

The main focus is on the ways educational systems both maintain and challenge social inequality. Students discuss the ways education differentially allocates resources based on race, class, and gender. The class explores this issue in both "classical readings" in the Sociology of Education, and also in recent books by those working in the field. Books chosen for the course are intended to begin discussion on contemporary debates. The class pays special attention to whether the policies discussed by them ameliorate or exacerbate existing inequalities by race, class, and/or gender. This course has three main objectives: (1) prepare students for the preliminary examination in the Sociology of Education through discussions of main theories, ideas, and classical works in the field; (2) promote critical debate about contemporary issues in education by reading and discussing "hot topics" in education like debates over curricula, "marketing" universities, racial inequality in school achievement, and school choice; and (3) advance students' own research projects through frequent discussions and evaluations of students' work by the instructor and their peers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8331. Race and Ethnicity. 3 Credit Hours.**

This course focuses on the nature of racism, discrimination, prejudice, racial conflict, and racial oppression in American society. Special emphasis will be given to the relationship between race, gender, nationality, immigration status and social class.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8341. Sociology of Kinship. 3 Credit Hours.**

This course will survey a range of topics from the field of sociology of kinship: historical changes in kinship as well as global changes in the family over the twentieth century; inequalities in families related to social class, social capital and family life; inequalities related to race and ethnicity; comparative adolescence and transitions to adulthood; sexuality and love in transnational contexts; perspectives on psychic and intimate relations in families; gender and power relations within the family; the state, public policy and the politics of kinship relations and more. We will also examine how the family came to be a centrally contested sphere in contemporary American political debates. Finally, you will have hands-on experience formulating a research proposal that investigates a research question related to this literature as well as assessing and responding to the proposals of your classmates. The purpose of the seminar is to review some of the major debates in this rapidly evolving field and to gain experience in formulating viable research questions about contemporary kinship issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8361. Urban Sociology. 3 Credit Hours.**

This course is about the space and urban sociology. The goal of this course is twofold: 1) to review, assess and analyze important theoretical perspectives on space in urban sociology, and 2) to determine the utility of applying these perspectives to contemporary urban issues. Urban problems will be examined largely from the perspective of how space and location are linked to these problems and they will not be investigated in their own right. The underlying theme of this course relates to theoretical propositions around space. This course will also focus on research from the vantage point of how theory can and should be used as a foundation for conceptualizing research problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8371. Sociology of Culture. 3 Credit Hours.**

The goal of this class is to survey the breadth of work that has been conducted under the sociology of culture, to identify the many ways that culture has been shown to be powerful, to examine competing theories about how culture works, to identify the types of research methods that can be used in cultural analysis, and to pinpoint the ways that each of us can embrace a cultural perspective in our own research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8381. Social Inequality. 3 Credit Hours.**

This course reviews theories and research regarding the dimensions of inequality and the processes which create, increase, and decrease inequality. It also examines the issues of the relationships between the dimensions of inequality and the processes of cumulative advantage and disadvantage. Individuals, groups, areas, and other social contexts are typically organized hierarchically, and the course explores the ways in which these different social levels shape and are shaped by social inequality over the life course. Examples of these processes include social multiplier effects, "winner take all" theories, the "Matthew Effect" in science, and the "Peter Principle."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8391. Medical Sociology. 3 Credit Hours.**

This course examines the historical changes in the ideas of health and disease and in society's response to illness. An important component of the course will be to examine the influences of social/political environment on morbidity and mortality in the United States and how population sub-groups experience illness in the medical system.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8401. Sexuality and Gender. 3 Credit Hours.**

This is a research intensive course in which we will examine the historical and sociological structures underlying relationships of sexuality and gender. The perspective of the course is that sexuality is a social creation with meaning to be found in culture. Sexuality is learned through socialization and resocialization. This learning takes place within a gendered social system and so sexuality itself is gendered in our culture. We will examine a number of theoretical perspectives and read the major sociological work in the field. The course will be divided into a reading seminar during the first half of each class and research presentations by students in the second half. During the course of the semester each student will each work on a topic of her choosing and will present her progress to class periodically.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8411. Gender and Body. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8421. Urban Health. 3 Credit Hours.**

Globally, the majority of humans now live in cities. Yet questions about what makes for healthy cities—and how we can measure and assess the complex relationship between health and place—continue to pose theoretical and methodological challenges for planners, social scientists, and biomedical researchers. Recent scholarship in the sociology of health and illness has focused on how the social determinants of health—sometimes called the non-medical determinants of health—powerfully shape health and mortality outcomes. Poverty, social isolation, political ideologies and economic policies, neighborhood contexts and effects of social networks have all been shown to be influential in determining the health and well-being both of entire groups and the individuals in them, acting as a serious constraint on (or enabler of) basic life chances. This course focuses on the empirical evidence for these health disparities and the theories about how and why they manifest as they do in urban settings. This seminar is designed to appeal to students interested in urban health, population health, the sociology of health and illness, and place and health.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8431. Globalization and Development. 3 Credit Hours.**

This graduate course is designed to critically examine the competing perspectives, historical processes, and key issues and debates in the study of globalization and development. Our emphasis is on the relationships between local and global social, economic, political, and cultural processes. In particular, we will focus on the late 20th century and early 21st century "globalization," known as the "neo-liberal globalization," and how the forces of globalization interact with the development trajectories of nation-states, societies, and communities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8510. Special Departmental Seminar. 3 Credit Hours.**

The topics will vary and cover areas not covered by the current roster of classes. Please consult with the instructor for details.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SOC 8620. Departmental Seminar. 3 Credit Hours.**

The topics will vary and cover areas not covered by the current roster of classes. Please consult with the instructor for details.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SOC 8873. Writing for the Social Sciences. 3 Credit Hours.**

This seminar will help any social scientist become a better writer and thinker. We'll achieve this by creating a collaborative space where a community of readers help each other draft and revise our writing and thereby refine our thinking. The course begins with what makes for good writing in general, starting with sentences then moving onto paragraphs and outlines, and then onto the two types of editing: copy-editing and developmental editing. Then we move to the basics of good arguments, a key skill for social scientists. The course requires you to develop and submit a semester-long work plan that specifies dates for key writing deliverables. You will choose or be assigned a writing partner, who in addition to your instructor will serve as a primary reader and editor of your work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 8883. Second-Year Research. 0 Credit Hours.**

This course is for students preparing their Second Year Research Paper. Students will need to assemble a committee of two sociology professors who will grade their second-year paper. Students will work with their committee throughout the semester to make sure their work is aligned with committee expectations. Committees will evaluate papers based on the demonstrated abilities to synthesize the relevant literatures, to conceptualize a researchable problem, and/or carrying out a feasible research design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in SOC 8011.

**SOC 9111. Contemporary Sociological Theory. 3 Credit Hours.**

This course surveys a broad range of theoretical perspectives from the 20th and 21st centuries. The course compares these theories in terms of how they contribute to on-going sociological research around a number of social problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9131. Theories of Identity. 3 Credit Hours.**

A seminar that offers the students the opportunity for specialized study of one of the most debated issues in sociology nowadays: social and cultural identities. The course will deal with the latest developments in identity theory, emphasizing the work of Louis Althusser, Michel Foucault, Ernesto Laclau, Chantal Mouffe, Slavoj Zizek, Stuart Hall, Craig Calhoun, R.S. Perinbanayagam, James Holstein, Jaber Gubrium, Judith Butler, Lawrence Grossberg, Charles Taylor and Paul Ricouer, among others.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9141. Theories of Globalization. 3 Credit Hours.**

This course provides a broad introduction to the major theories, approaches, issues and debates in the studies of globalization. Globalization has redefined not only the way we understand society at the very basic level but also our own sense of place and identity in a world where we are connected to and influenced by events and people in far off places. Substantively, this course will focus on the relationships between local and global social, economic, political, and cultural processes across time and space. Our scope will be global and historical-comparative, and our approach will be sociological and interdisciplinary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9211. Graduate Data Analysis. 3 Credit Hours.**

In this course, you will do original sociological research using secondary data analysis. In this course, in addition to looking for meaningful relationships between variables in the data, we apply quantitative research methods to examine explanations for why relationships between variables may exist. To do this, we explore whether and how a relationship between two variables changes when we add a third (or fourth or fifth...) variable. The research process consists of several steps: (1) construct a research question, (2) formulate one or more theories related to your research question based on a literature review, (3) turn those theories into testable hypotheses, and (4) test those hypotheses using secondary data. Your research will be presented in a final paper organized according to the standards of the discipline and then summarized in an oral presentation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SOC 8211.

**SOC 9241. Qualitative Data Analysis. 3 Credit Hours.**

The central goal of this course is to have students complete a qualitative research project. It focuses on how to collect data, how to organize data for analysis, and how to use the data to answer a research question and/or develop concepts that might inform future research. Toward this end, the course begins with readings about the qualitative research process. The readings detail the agenda(s), logic, and epistemological foundation of qualitative research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9291. Departmental Seminar in Research Methods. 3 Credit Hours.**

The topics in research methods will vary and cover areas not covered by the current roster of classes. Please consult with the instructor for details.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9311. Immigration and Inequality. 3 Credit Hours.**

The causes, consequences, and repercussions of immigration constitute one of the most important topics of the 21st century. This course surveys key current theoretical debates in the study of international migration with an emphasis on related literature dealing with gender, kinship, and ethnicity. Considered are theoretical approaches to international migration; controversies regarding assimilation; the framing of migration through gender and kinship relations, social networks, and social capital; family ideologies and achievement; and the social context of immigration, ethnic niches and enclaves, transnationalism, empirical trends in post-WWII United States immigration and settlement, second-generation immigrant patterns, and immigration policies and politics. The long-term goal is to encourage students to undertake research in the field of migration research. This field is unique in its interdisciplinary and methodologically pluralist nature: stretching from the demography and economics of migration, through political science, sociological and geographical approaches, to the ethnography and oral history of migrants.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9321. Theories of Race and Racism. 3 Credit Hours.**

This course focuses on theories and analyses that seek to explain the social salience of race. The selected readings explore various concepts that surround the study of race, such as racism, white supremacy, oppression and subordination, nationalism, sexism and inequality. Many scholars believe that modernity, capitalism, and race are coterminous. We will explore in this seminar those connections. Some of the questions that we will explore are: How did the racial dimension of world society come to be, and how did it gain such weight in the organization of social/economic/political processes? How are the racial dimensions of society constituted and changed? How are they related to other central aspects of society, such as class, gender, ethnicity, age, nationality, citizenship, etc.? What is the relation between race, racism and whiteness? Is it a colorblind society possible? What is a "race narrative" and how it affects people's identities and social structures?

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9382. Independent Study Progm. 1 to 6 Credit Hour.**

With the consent of the graduate chairperson and the instructor concerned, students may select an intensive program of study and/or research within a specific area of sociology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SOC 9385. Internship in Social Research. 1 to 6 Credit Hour.**

The internship in social research provides a learning experience that unites the core concepts of sociology with professional organizational settings and the community as a whole, while also guiding students as they transition into their own professional lives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SOC 9386. Internship in Social Research - Part II. 1 to 6 Credit Hour.**

The internship in social research provides a learning experience that unites the core concepts of sociology with professional organizational settings and the community as a whole, while also guiding students as they transition into their own professional lives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in SOC 9385.

**SOC 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

This is an advanced reading course for students preparing for the preliminary examination.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SOC 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

This course is for advanced graduate students who are developing a dissertation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SOC 9999. Dissertation Research. 1 to 6 Credit Hour.**

This course is for advanced graduate students, post-candidacy, working on their dissertations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Spanish (SPAN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SPAN 5060. Special Topics. 3 Credit Hours.**

A comprehensive study of language, literature, culture or other areas of special interest in the Hispanic/Latinx worlds.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5121. Survey in Spanish Literature. 3 Credit Hours.**

Survey of selected periods and themes of Spanish literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5122. Medieval Spanish Literature. 3 Credit Hours.**

This course analyzes Spanish texts written during the Middle Ages.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5124. 16th and 17th Century Spanish Literature. 3 Credit Hours.**

This course is devoted to the study of the literature produced during what has been called the Spanish Golden Age.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5126. Cervantes. 3 Credit Hours.**

The course entails an in-depth study of Miguel de Cervantes' selected works

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5136. 18th and 19th Century Spanish Literature. 3 Credit Hours.**

This course is devoted to the study of Spanish literature during the 18th and 19th centuries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5137. Hispanic Modernism. 3 Credit Hours.**

Using significant works by leading authors (i.e., Casal, Gutierrez Najera, Jimenez, Machado, Marti, Unamuno, and/or Valle-Inclan), this course explores aspects of Modernity in Spain and/or Spanish America.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5138. 20th and 21st Century Spanish Literature. 3 Credit Hours.**

This course is devoted to the study of Spanish literature during the 20th and/or 21st centuries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5141. Survey in Spanish-American Literature. 3 Credit Hours.**

Survey of selected periods and themes in Spanish American literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5142. Spanish-American Short Story. 3 Credit Hours.**

This course explores the evolution of the Spanish- American short story.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5143. Spanish American Novel. 3 Credit Hours.**

This course is devoted to the in-depth study of the Spanish-American novel.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5144. Spanish American Poetry. 3 Credit Hours.**

This course studies the trends in Spanish-American poetry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5146. National Literatures of Spanish America. 3 Credit Hours.**

This course studies literature in its cultural context focusing on texts from one or more countries in Spanish America.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5148. Latin American Literature of Social Conflict. 3 Credit Hours.**

This course analyzes class, ethnic, gender, religious, and other social conflicts in Latin American literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5151. Literature of the Caribbean. 3 Credit Hours.**

This course is a comparative study of representative literary works from Cuba, the Dominican Republic, Puerto Rico, and non-Spanish speaking nations of the Caribbean.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5152. U.S. Latino Literature. 3 Credit Hours.**

This course examines U.S. Latino literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5161. Hispanic Literature through Art. 3 Credit Hours.**

This course is a comparative study of trends and styles in Hispanic literature in the context of trends and styles in the history of art.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 5301. Spanish Phonetics. 3 Credit Hours.**

This course studies the articulatory and acoustic nature of Spanish phonemes and allophones, the syllable, stress, suprasegmentals, and intonation, with attention to regional variation and comparisons with English.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 5302. Introduction to Spanish Linguistics. 3 Credit Hours.**

This course covers concepts and methods of linguistic description and explanation applied to the phonology, morphology, syntax, and semantics of the Spanish language.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 5303. Spanish/English Contrasts. 3 Credit Hours.**

This course is a systematic study of the phonological, morphosyntactic, and lexico-semantic patterns of Spanish and English.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 5304. Spanish Applied Linguistics. 3 Credit Hours.**

This course takes a linguistic approach to theories of language learning and teaching, including second language acquisition.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 5305. History of the Spanish Language. 3 Credit Hours.**

This course covers the development of the Spanish language from its early beginnings (Latin) to the many present-day regional, social, and stylistic varieties. Analysis is made of the phonological, morphological, syntactic, lexical, and semantic changes Spanish went through.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 5306. Spanish Sociolinguistics. 3 Credit Hours.**

This course covers the concepts and methods in sociolinguistic research as applied to the study of variation and change in the Spanish language.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 5401. The Art of Translation. 3 Credit Hours.**

This is an advanced course on the strategies of translating literary texts from Spanish to English, including practice and practical orientation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 5601. Spanish for Health Professions. 3 Credit Hours.**

In this course students will acquire a foundational knowledge of the medical language and cultural practices pertinent to interactions in a healthcare context that includes Spanish-speaking and Latino patients. Intensive study of medical vocabulary, participation in role-plays, and readings of cultural norms in medical contexts will prepare students for basic interactions with Spanish-speakers. In addition to discrete vocabulary terms, students will learn to use and recognize high frequency phrases in medical contexts bettering their oral and aural skills. To develop long-term retention of vocabulary, frequent practice using video, audio, online activities and interactions with the instructor will cement new vocabulary. In alignment with the CLAS (National Standards for Culturally and Linguistically Appropriate Services), course content will cover several areas of cultural competency, which include, but are not limited to, linguistic register, managing a situation without a trained interpreter, patient dignity, respect for cultural practice, ethical use of language, etc. The emphasis of the course is on the building a breadth of foundational skills that prepare the student linguistically and knowledgeably for more in-depth study of medical Spanish, translation/interpretation and Latino health issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (SPAN 1003 or 'EXMPT' in LCSP)

**SPAN 5602. Advanced Medical Spanish. 3 Credit Hours.**

In Spanish 5602 students use their Spanish for a specific purpose: providing health services to a Spanish speaker, or intervening as an interpreter or translator to facilitate the practice of some aspect of medicine. Course content covers cultural competency, health literacy, communication skills, Spanish vocabulary and expressions for anatomy, systems, diseases and health-related concerns, medical tests, nutrition, and in-depth discussions of a selection of health-related situations. All class work, student-student interactions and student-professor interactions and assignments will be in Spanish. The emphasis of the course is on oral skills, which will be practiced in a variety of online platforms including: paired recordings, synchronous sessions with the professor, recorded responses to video and audio prompts, and an interview with a healthcare professional. The oral work will include presentations, role-plays and simple medical explanations. Readings of health-related materials and articles will be assigned, followed by oral and written reports which will consolidate students' ability to express themselves on materials studied.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (SPAN 2096 or SPAN 5601)

**SPAN 5603. Latino Health Issues in the US. 3 Credit Hours.**

In 2015, the Hispanic population comprised 17% of the US population with 53 million individuals with diverse backgrounds. Effectively working with this population requires an understanding of the cultural, environmental, economic and medical factors that play a part in an individual's health, wellness and care. Through contemporary readings in Spanish and English from government publications, medical journals, US and foreign newspapers and a textbook, students will gain an understanding of the diversity of the Latino population and knowledge of the current research on the health issues and concerns that most frequently impact the Latino community. Additionally, this course will include practice in language varieties and registers to help professionals recognize the myriad language varieties they might encounter and to increase sensitivity to potentially offensive language expectations; instruction in some history and geography will develop cultural competencies and background knowledge of the population. In addition to readings, discussions and an ethnography, the students will engage in case studies and problem solving. Specific topics include: Access to Health Systems, Chronic Diseases, Child and Elder care, Mental Health.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (SPAN 2096 or SPAN 5602)

**SPAN 5604. Spanish/English Interpretation Techniques for Healthcare. 3 Credit Hours.**

This course introduces students to the ethics and techniques of interpretation and translation used in healthcare settings. To ensure safe and reliable communication and to help students engage in best practices whenever in the role of translator/interpreter, the course covers both translation/interpretation theory and practice. Students will learn about the roles of an interpreter, how to evaluate their ability to interpret in any given situation and how culture influences translation/interpretation. Students will work with authentic documents such as patient consent sheets, fact sheets, clinical paperwork (discharges) and medical journal articles. Interpretation practice will encompass such topics as medical diagnosis, procedural descriptions, and accurate interpretations of anatomy, physiology and medical language. Students must also demonstrate appropriate culture competence when interpreting.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in (SPAN 2096 or SPAN 5602)

**SPAN 8000. Special Topic Seminar. 3 Credit Hours.**

Special topics course. Subject varies with instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8001. Hispanic Bibliography and Research. 3 Credit Hours.**

This course presents the tools and methods of research and investigation in Spanish and Ibero-American languages and literatures.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 8110. Seminar in Spanish and Spanish-American Literature. 2 to 3 Credit Hours.**

The students examine intensively particular topics or issues concerning Spanish and/or Spanish-American literature. This course may be repeated if subject varies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8122. Seminar in Medieval Spanish Literature. 3 Credit Hours.**

This course studies aspects of medieval Spanish literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8130. Seminar in Golden Age Literature. 3 Credit Hours.**

This course studies aspects of Golden Age-Spanish literature

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8140. Seminar in 18th and 19th Century Spanish-American Literature. 3 Credit Hours.**

This course studies aspects of 18th and/or 19th century Spanish literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8141. Seminar in 20th and 21st Century Spanish Literature. 3 Credit Hours.**

This course studies aspects of 20th and/or 21st century Spanish literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8146. Colonial and 19th Century Spanish-American Literature. 3 Credit Hours.**

This course studies aspects of colonial and/or 19th century Spanish American literature.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8147. 20th and 21st Century Spanish-American Literature. 3 Credit Hours.**

This course studies aspects of 20th and/or 21st century Spanish American literature

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8149. Spanish-American Theater. 3 Credit Hours.**

This graduate seminar deals with the developments in Spanish-American theater since Naturalism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 8161. Critical Approaches to Hispanic Literature. 3 Credit Hours.**

This course provides an overview of critical theories and schools of thought in literary criticism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8300. Seminar in Spanish Linguistics. 2 to 3 Credit Hours.**

This course covers selected problems in the field of Spanish language and linguistics using a contemporary analytical and/or historical approach.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8301. Spanish Phonology and Morphology. 3 Credit Hours.**

This course provides an advanced theoretical and applied study of the sound system and the morphological system of present day Spanish and their relationship to each other.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8302. Syntax. 3 Credit Hours.**

This course covers the advanced theoretical study of Spanish syntax that combines generalizations of a descriptive nature with current syntactic theories such as functionalism and minimalism. Topics studied are noun phrase and verb phrase structure, case assignment and arguments, predication, transitivity/intransitivity, voice and syntactic relations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8303. Hispanic Dialectology. 3 Credit Hours.**

This course discusses the mechanisms of dialectal differentiation in Spain and Latin America as the result of diatopic, diastratic, and diachronic changes through normal language transmission and internal development, with special attention given to both historical and contemporary perspectives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8304. Spanish Language of Puerto Rico. 3 Credit Hours.**

This course studies the history, dialectology, and sociolinguistics of the Spanish language in Puerto Rico.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 8985. Teaching Higher Education: Language. 1 to 3 Credit Hour.**

This course focuses on learning theory and the best teaching practices, with the aim of preparing students for effective higher education teaching.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 9001. Spanish for Graduate Reading Knowledge. 1 Credit Hour.**

This course provides guidance and practice in the reading of Spanish language texts for students preparing for the Spanish reading/translation exam.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 9083. Directed Readings. 1 to 3 Credit Hour.**

This course is offered for students who wish to pursue independent study of research topics with faculty supervision. It is not to be used as a substitute for courses offered in the Department.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 9991. Directed Research. 1 to 3 Credit Hour.**

This course is offered for students who wish to pursue independent study of research topics with faculty supervision. It is not to be used as a substitute for courses offered in the Department.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 9993. Master's Comprehensive Examination. 3 Credit Hours.**

Students enrolled in SPAN 9993 will work with three faculty members to prepare a customized reading list for each of the 3 areas in which they are going to be examined before finally taking the comprehensive examination. The three areas in the Department of Spanish and Portuguese (Latin American studies, Spanish Peninsular studies, and Hispanic Linguistics) will be represented by one faculty member. To fit the structure of the MA comprehensive exam, one of these areas will be designated as the main area. The departmental Associate Chair for Graduate Studies will supervise mentoring and submit the final grade.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPAN 9994. Preliminary Examination Preparation. 1 to 6 Credit Hour.**

Must be taken by all graduate students in the semester following coursework completion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 9998. Pre-Dissertation Research. 1 to 6 Credit Hour.**

Must be taken by all students in the Ph.D. program who have finished coursework, passed the Preliminary Examination, and are preparing the dissertation proposal.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPAN 9999. Dissertation Research. 1 to 12 Credit Hour.**

This course is intended only for those students who have achieved Ph.D. Candidacy status. A minimum of 6 semester hours is required for graduation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Special Education (SPED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SPED 5105. Assessment in Special Education. 3 Credit Hours.**

This course is designed to provide students with an understanding of assessment theory, the purposes of assessment and specific assessment techniques as they relate to the education of struggling students and students with disabilities. Emphasis is placed both on how assessment is used to identify students with disabilities and how assessment can be used to plan and monitor the effectiveness of instructional practices related to student learning and development in the classroom. We use a problem-solving approach in this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5106. Literacy Instruction for Students with Disabilities. 3 Credit Hours.**

The focus of this graduate level course is to provide knowledge of language and literacy for pre-service PreK-12 teachers. In turn, this knowledge will serve as grounding for effective literacy instruction for struggling readers in inclusive settings including students with a wide range of abilities and disabilities. Emphasis will be placed on understanding theories and interventions that surround language acquisition and literacy development for children in Pre-Kindergarten to grade 12 settings, with an additional exploration of how language and literacy are impacted by diversity, various disabilities and atypical behaviors. Attention will be given to basic knowledge about literacy and language development with information on such important topics as: reading components and building-blocks, writing and spelling elements, reading fluency, reading comprehension, and the facilitation of language in the classroom. An equally important theme will be how to actually implement this knowledge in inclusive classrooms through: appropriate assessment practices, research validated literacy interventions, developmental reading programs, evidence-based instructional practices, and content area materials. Other integral parts of literacy and language development, such as co-teaching, collaboration with paraprofessionals and other related support staff, spoken language, communication skill development through assistive technology, and universal design in inclusive classrooms will be examined at the instructor's discretion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5107. Understanding and Using Special Education Research. 3 Credit Hours.**

This course provides students with an introduction to research methods used in special education. Students will learn how to critically read research and evaluate if practices are evidence-based. The goal of this class is not for students to leave with the ability to design studies, but for students to understand which components are necessary for making causal claims about interventions. Students will leave with tools to select and use evidence-based practices in their classrooms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5108. Assistive Technology and Universal Design. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5109. Classroom Management and Positive Behavior Support. 3 Credit Hours.**

This course provides an in-depth presentation of Positive Behavior Interventions and Supports and its application in classroom systems to prevent challenging behavior and academic failure. Infused throughout the course will be intervention strategies that will allow for the accommodation of all children in the general-education system. The emphasis of the course will be proactive, constructive strategies that prevent, rather than react to, classroom difficulties.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5111. Educating Students with Disabilities in Inclusive Settings. 2 Credit Hours.**

This course is an introduction to effective strategies for teaching students with disabilities. This course will identify strategies that will aid in student success throughout the middle grade years in the least restrictive environment. Emphasis is placed on evidence based strategies and activities specific to middle grades students, technology in the classroom, and ways to address diversity in today's classroom.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Co-requisites:** MGRE 5102, SPED 5187.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5187. Graduate Assessment Practicum in Early Childhood Special Education. 3 Credit Hours.**

This course is field-based with classroom/online experiences and designed to provide students with an understanding of assessment theory, the purposes of assessment and specific assessment techniques as they relate to the education of struggling students and students with disabilities. Emphasis is placed both on how assessment is used to identify students with disabilities as well as how assessment can be used to plan and monitor the effectiveness of instructional practices related to student learning and development in the classroom. We use a problem-solving approach in this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Co-requisites:** MGRE 5102, SPED 5111.

**Repeatability:** This course may be repeated for additional credit.

**SPED 5201. Students with Moderate to Severe Disabilities: Effective Teaching Strategies. 3 Credit Hours.**

This course is an introduction to best instructional practices and strategies for teaching students with a range of moderate to severe disabilities in varied educational settings. The purpose of this course is to identify and understand specific evidence-based strategies that positively impact student success based on student profiles including abilities, disabilities, interests, assessment data, and needs for supports. Emphasis is placed on strategies and activities specific to learners spanning from Pre-Kindergarten through 12th grade. We emphasize and practice collaboration and communication strategies which will be expected of us as professional special educators. In addition, we discuss/analyze appropriate applications of instructional, adaptive and assistive technology in the classroom. Finally, we focus on ways to incorporate/encourage family participation and embrace diversity in contemporary classrooms comprised of diverse learners having diverse abilities and needs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5211. Effective Instruction for Students with Disabilities. 3 Credit Hours.**

This course is an introduction to effective instruction and strategies for teaching students with disabilities across Pre-K to 12th grade. The purpose of this course is to identify specific strategies that will aid in student success in the inclusive setting. Emphasis will be placed on strategies and activities specific to pre-kindergarten and elementary students, collaboration and communication strategies among professionals, technology in the classroom, and ways in which to address family participation and diversity in today's classroom.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5287. Integrated Literacy and Special Education Practicum. 2 Credit Hours.**

This integrated practicum experience will provide opportunities for students to apply theoretical models and research-based instructional strategies in the area of literacy to middle grades students in inclusive classrooms. Focus will be placed on developmental, cognitive, physical, social, behavioral, processing and learning needs of students and how these needs relate to comprehending written text, specifically for students having disabilities. Particular emphasis will be focused on ways to connect information from the co-requisite literacy methods course and apply this knowledge to students with disabilities in the middle grades classroom. Differentiated instruction, response to intervention, appropriate curricular modification, and authentic assessment related to appropriate instructional decision-making are themes that run throughout this learning experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Co-requisites:** MGRE 5102, SPED 5111.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in (EDUC 5402 and MGRE 5101)

**SPED 5301. Building Communication in Students with Autism Spectrum Disorder and Severe Disabilities. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5302. Effective Teaching Strategies and Academic Interventions. 3 Credit Hours.**

This course overviews assessment and intervention strategies for learners with skill deficits. Learners with a diverse set of needs will be discussed in the course (e.g., neurotypical, autism, intellectual disability, emotional and behavioral disturbance, among others). The link between assessment and intervention will be emphasized throughout the course, with attention to effective practices for learners with diverse needs. Students enrolled in the course will learn how to select, administer, score, interpret, and report results for a variety of behavioral assessment methods that will be related to selecting interventions, monitoring student progress, and making decisions based upon data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Clearance for Education.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5303. Ethics and Applied Behavior Analysis. 3 Credit Hours.**

This course provides the student with an overview of ethical practices and considerations for behavior analysts working across a variety of applied settings, including schools and agencies that support people with disabilities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5304. Concepts and Principles of Behavior Analysis. 3 Credit Hours.**

This course provides the student with an introduction to the concepts and principles of behavior analysis. Core concepts including motivation, reinforcement, punishment, extinction, and rule governed and verbal behavior will be covered, along with examples of behavior change techniques that employ these concepts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5305. Single Subject Research Design. 3 Credit Hours.**

This course provides an overview of strategies for designing and conducting single-subject research in special education. Competencies include selection of independent and dependent variables for research, measurement tactics, research design, establishing generality of results, and ensuring the integrity of research procedures. The methods discussed are not specific to any disability or age level; rather, they are a general set of methods for conducting and interpreting single-subject research.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5401. Students with Mild Disabilities: Effective Teaching Strategies. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5402. Effective Transition Practices for Students with Disabilities. 3 Credit Hours.**

The focus of this course is to provide knowledge and skill development in the areas of transition planning, self-determination, and collaboration among professionals, families, and students with disabilities in academic, vocational, and community settings. Emphasis will be placed on evidence-based practices in transition to enhance post-school outcomes, including assessment, instructional strategies, and identified predictors of post-school outcomes. Special attention will be given to knowledge about pre-K, elementary, middle school, and secondary transition to postsecondary education and employment, along with information on such important topics as: transition-related legislation; local, state, and national resources; inclusive secondary education; self-determination, family involvement, interagency collaboration, and transition Individualized Education Programs (IEPs).

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5501. Learning Environments. 3 Credit Hours.**

Examination of the context in which exceptional persons learn. Consideration of the influence of multiculturalism, the family, school, social agencies, the media, courts, laws and forces such as inclusion as they affect the learning environment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5511. Managing Learning Environments. 3 Credit Hours.**

Provides students with the knowledge of a range of alternative management techniques appropriate for facilitating learning in classrooms, within families and in other environments. Multicultural aspects of learning environments are considered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5512. Methods and Curriculum. 3 Credit Hours.**

An introduction to the appropriate assessment and teaching of persons with disabilities at a variety of age levels. Particular emphasis placed upon the modification of the basic school curriculum.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5521. Issues in Social, Emotional, and Physical Development. 3 Credit Hours.**

The nature, developmental problems, assessment, and educational intervention of physical, perceptual, motor, and socio-emotional problems are studied. Field application including observations, interviews, and trial interventions are required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5522. Cognition, Language, and Literacy. 3 Credit Hours.**

Deals with the following aspects of language and cognitive development: nature and theory, multicultural aspects, normal acquisition and development, problems in development, assessment and intervention strategies. An attempt is made to link theory and practice.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5587. Special Education Practicum. 6 Credit Hours.**

The special education practicum experience is taken during the final semester of study before completion of the special education teacher preparation program requirements. Eligibility for graduation and recommendation for K-12 Special Education certification is contingent on the successful completion of this practicum. Students are provided with an opportunity to be in a classroom for an extended period of time and to put into practice what they have learned in their special education courses. Over the course of the semester, students will experience, in depth, the full role and meaning of teaching in special education and/or an inclusive classroom. Experiences include planning and organizing for instruction, developing classroom teaching competencies and skills, evaluating pupil progress, participating in extra-class activities, participating in the development of IEPs, working collaboratively with other school personnel, and utilizing school and community resources in the instructional program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may be repeated for additional credit.

**SPED 5611. Total Inclusion Seminar. 3 Credit Hours.**

Course content focuses on inclusive practices in school, community, and employment settings for students with various degrees of disability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 5666. Introduction to Special Education. 3 Credit Hours.**

This class is a preliminary overview of inclusion and its pervasive, on-going impact on both special and general education. Special emphasis will be placed on: the legal ramifications of inclusion, related terminology, and IEPs; various disability categories; adapting the classroom environment, especially in terms of various behavioral concerns and positive behavioral supports; teaching strategies and assessment practices appropriate to inclusion; and collaborative relationships with parents in inclusive settings. Other topics and miscellaneous resources/best practices will be highlighted at the instructor's discretion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 8101. Trends and Issues in Special Education. 3 Credit Hours.**

Discussion and examination of current topics in special education. We will examine controversial and/or critical issues in special education, which may include: current IDEA definitions (e.g., LD, OHI, ED, and CI), controversial treatments and evidence-based practices, issues with evaluation of students (e.g., RTI, over-representation, testing), special education laws and policies, the role that research plays in education, as well as other topics relating to special education or inclusion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 8701. Proseminar in Individual Differences. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 8711. Seminar in Special Education Research. 3 Credit Hours.**

A seminar on problems of research as applied to special education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 8741. Seminar in Exceptionalities. 3 Credit Hours.**

Current trends, problems, and issues in special education, teacher education, research, and administration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 8742. Seminar in Exceptionalities. 3 Credit Hours.**

Current trends, problems, and issues in special education, teacher education, research, and administration.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SPED 9187. Practicum in Special Education. 3 to 9 Credit Hours.**

Temple will place students at a site. One-half day of practice teaching, five days each week for the full semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPED 9287. Practicum in Special Education. 3 to 6 Credit Hours.**

Temple will place students at a site. One-half day of practice teaching, five days each week for the full semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPED 9387. Practicum in Special Education. 3 to 6 Credit Hours.**

Full-time summer practicum. Temple provides the practicum site. Five full days (mornings and afternoons) of practice teaching each week for the full summer semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPED 9485. Augmen Comm Empow Intern. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SPED 9489. Fld Exp Spec Ed Supervis. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

# Sport and Recreation Management (SRM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

## **SRM 5201. Sport Finance. 3 Credit Hours.**

With the recent growth of the sports industry, competent managers must have a sound understanding of finance topics and the ability to apply a series of basic financial principles to the decision-making process of sport firms and organizations. Financial decision-making, including cash management; ratio analysis; asset management; leverage; short, intermediate, and long-term financing will be the course focus. Additionally, different types of budgets will be reviewed and students will learn the budget preparation and approval process.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## **SRM 5202. Sport Economics. 3 Credit Hours.**

This course uses the world of sports as a practical application for many economic theories. The tools learned from the fields of industrial organization, public finance, and labor economics will be used to examine sports and economics. Time and preferences may lead to examining the fields of amateurism and college sports, and finance. The intent of this course is to examine the sports world as economists, thus we will gain greater insight into both the sports world and the economists' world.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

## **SRM 5211. Sport Finance and Economics. 3 Credit Hours.**

This course will analyze the relationship between finance and the sport and recreation industry. The purpose is to apply a series of basic financial and economic principles to the decision making process of sport firms and organizations. Issues include optimal pricing strategies, demand analysis, optimal financing, hiring decisions, and investment decisions; all of which can be undertaken with the tools addressed in this course. This course examines a variety of financial management issues relevant to major professional sport franchises, the corporations that use sport as a vehicle for promotion, and other organizations comprising the industry. Additionally, emphasis is placed on the financial and economic aspects of the public finance of sport facility construction and other forms of government subsidizes of the sport industry.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

## **SRM 5212. Legal Issues in Sport and Recreation. 3 Credit Hours.**

The course addresses the legal aspects of sport, recreation, and leisure services, with a focus on tort liability, human rights liability, criminal liability, and contractual liability. Legal concepts of negligence, situations which give rise to law suits, and principles of risk management will be covered. Legal issues related to use of equipment, facility management, and accommodation for special populations will also be addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

## **SRM 5214. Philosophy and Ethics. 3 Credit Hours.**

The course will apply the traditional philosophical schools of thought (Idealism, Realism, Pragmatism, and Naturalism) to the philosophy of sport and recreation. In addition, Existentialism and Humanism will be analyzed to determine the implications for organizing sport and recreation programs. The course also covers issues and problem areas associated with ethics, ethical behavior, and ethical codes of sport and recreation professional associations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5215. Sport Marketing. 3 Credit Hours.**

This course provides an overview of the core sport marketing and promotions principles. In addition to covering the essentials of the marketing mix, this course will also include lessons on the development of marketing strategies in the modern sport marketplace.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5216. Strategic Management in Sport and Recreation. 3 Credit Hours.**

This course focuses on the basic functions of management and the strategic challenges confronting firms that compete in the global economy within the sport and recreation industry. It provides students a forum in which to apply and integrate management and strategic theories, practices and skills in a global environment, and across all types of organizations, including public, private, and voluntary. The course also gives opportunities for entrepreneurs in the industry through business plan development.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5217. Sport Facility Management. 3 Credit Hours.**

The principles of planning areas and facilities for sport, recreation, and parks are explored. In addition to the design and construction of specific sport and recreation facilities, approaches to standards and regional planning will be discussed. Problems and issues related to funding, maintenance, and use of sport and recreation facilities will be analyzed. The course will also include trends in facility design, construction, and maintenance.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5218. Equity, Inclusion, and Ethics in Sport Business. 3 Credit Hours.**

This course examines an encompassing perspective of diversity within North American and international sport organizations. Specifically, the course provides students with an analysis and understanding of the various ways that people within sport organizations can differ, and how power differences based on this diversity impact life and work experiences and outcomes. The course covers issues of the non-dominant, historically under-represented elements of U.S. society, with a particular emphasis placed on racial, ethnic, and gender issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5220. Special Topics in Sport and Recreation. 3 Credit Hours.**

This course is designed to provide knowledge of the psychological foundations of consumer behavior, the mechanisms of influence that are most likely to lead consumers to change their attitudes, their beliefs, and, most importantly their actions, and how to engage these mechanisms in building persuasive communications. The focus of this class will be on the scientific research (of behavioral scientists from multiple disciplines) that illuminates the psychological processes underlying consumer behavior, with specific focus on spectator and participant based sport and recreation activities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**SRM 5221. Sport Governance and Policy. 3 Credit Hours.**

The course addresses the various approaches to organizing and governing sport and athletic programs from school sports to professional sports, from individual conferences to international organizations. Principles, issues, and problem areas associated with the governance of individual athletic departments will be addressed as well as the principles, issues, and problem areas associated with athletic conferences, and national and international governing bodies. Specific problems in relation to the size, structure, and staff of athletic departments and sport governing bodies will be analyzed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5224. Grad Seminar: Sport/Rec. 3 Credit Hours.**

Problems involving organizational patterns and administrative functions essential to effective program organization will be analyzed. There will be special emphasis on staffing, scheduling, records, equipment, fund raising, equipment liability, and plant facilities. Sessions with leaders and practitioners in sport and administration will be included.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5225. Sport Sponsorship and Sales. 3 Credit Hours.**

The course analyzes and produces skills essential to revenue production through sport sponsorship and a variety of approaches and the identification of the various areas and components of sales in the sport industry. Sales theory, principles, current issues, and understanding the unique selling trends of organizations will be addressed as they apply to all levels of programs and in all types of contexts. Experiential learning will be a priority and will be infused into the content delivery through the learning experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5226. Consumer Behavior in Sport and Recreation. 3 Credit Hours.**

This course is designed to provide knowledge of the psychological foundations of consumer behavior, the mechanisms of influence that are most likely to lead consumers to change their attitudes, their beliefs, and, most importantly their actions, and how to engage these mechanisms in building persuasive communications. The focus of this class will be on the scientific research (of behavioral scientists from multiple disciplines) that illuminates the psychological processes underlying consumer behavior, with specific focus on spectator and participant based sport and recreation activities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5227. Sport Media and Communication. 3 Credit Hours.**

This course examines the various aspects of the relationship between sport and both media and communication. An overview of theories in media and communication is systemically provided and discussed. It focuses on the nature of traditional and digital media and its implication for sport policy and management. Specifically, the relationship between the sender, the message, the medium, and the audience are critically examined. Communication management and strategy are also discussed as the production, organization, and consumption of sport involve a wide range of communicative processes. Attention is also paid to the legal and ethical aspects of sport communication.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5231. Compliance in Intercollegiate Athletics. 1.5 Credit Hour.**

This course addresses the legislation related to rules compliance in intercollegiate athletics. Regulations and enforcement structure will be examined at the national, conference, and institutional levels. The implications and consequences of such legislation will be explored.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5232. Fundraising and Development. 3 Credit Hours.**

This course provides an overview of the role of fundraising and development in a sport setting. Students will gain an understanding of the strategies and processes used to generate revenue through philanthropic giving for programs. Environmental analyses and strategic planning will be central to training students to develop appropriate, successful fundraising and development programs. The role of governing bodies, ethical and legal implications will also be addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5233. Governance and Policy in Intercollegiate Athletics. 3 Credit Hours.**

The purpose of this course is to provide an in depth overview of intercollegiate athletic governing bodies. The students will gain an understanding of the structure, policies, finances, and current issues related to intercollegiate athletics. Additionally, students will identify appropriate strategies for effectively dealing with current issues/problems in intercollegiate athletics.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5234. Student-Athlete Affairs in Intercollegiate Athletics. 1.5 Credit Hour.**

This course addresses the current state of student services in intercollegiate athletics. The course will also detail the support mechanisms aimed at the academic and personal development of student-athletes. The metrics used by the NCAA to measure academic performance of students will be explored, as well as industry trends and issues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5235. The Business of Recreation. 3 Credit Hours.**

The purpose of this course is to provide students with an overview to the scope and variety of recreational business. Time will be spent exploring the development of the industry, current state, and future trends through the lenses of recreation and leisure services. The course is also intended to introduce students to the business principles important for creating and operating a profitable commercial recreation enterprise, as well as how recreation is different from other goods and services in the sport industry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5241. Evaluation of Programs and Events. 1.5 Credit Hour.**

The goal of this course is to provide students with the background necessary to understand the evaluation process in the field of events and recreation management. The focus of the class is on evaluation, assessment, and different types of program evaluation, including needs assessment, formative research, process evaluation, monitoring of outputs and outcomes, impact assessment, and cost analysis. Both quantitative and qualitative research methods are addressed. Students will execute an applied evaluation project. This project involves practice in interviewing, focus groups, survey questionnaire development, data collection, and data analysis. The course will provide students with a conceptual map of how evaluation research is conducted, the resources available to them, the vocabulary of research, and guidance in writing an evaluation report.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5242. Business of Non-Profit Organizations. 1.5 Credit Hour.**

This course examines the theoretical, philosophical, practical, and ethical perspectives related to the effective management and leadership of not-for-profit organizations in the twenty-first century. Students will examine strategies related to governance and policy development in the not-for-profit organization. The fundamental differences of working for a non-profit or government entity will be discussed and compared/contrasted with for-profit organizations. In addition, students will examine the unique managerial challenges posed to not-for-profit organizations and the typical techniques and practices used by leaders in the public and non-profit sectors. The course will also familiarize students with the legal implications, unique financial management, and revenue generating models of not-for-profit organizations.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5243. Event Management. 3 Credit Hours.**

An experience-based course, this course will present principles of event management, along with a broad overview of opportunities in the industry. There will be a special focus on current trends and technology, risk management, staffing, and budgeting. A wide diversity of experiences will be available.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5251. Introduction to Sport Analytics. 3 Credit Hours.**

The class will discuss the theory, development, and application of analytics in sport. Students will learn about the application of analytics in sport for purposes of evaluating player performance, team management, market segmentation, pricing, and other areas in sport industry operations. Analytics includes the inclusive use of data, statistical and quantitative analysis, explanatory and predictive models, and fact-based decision making. Analytic methods are employed to gain insights on team and player production, human resource practices, and game management. Additionally, quantitative methods are used to analyze pricing, advertising, promotions, and other sport business decisions. Many new techniques and methods to communicate analytical results are emerging and will be a factor in this new area of sport analytics.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Sport Business.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 5001 (may be taken concurrently) or STHM 5111 (may be taken concurrently))

**SRM 5252. Sport for Development. 3 Credit Hours.**

In grassroots development and peace promotions, sport is used in an extremely wide range of situations - whether as an integrated tool in short-term emergency human aid activities, or in long-term development cooperation projects on local, regional, or global scales. This course explores the role sport plays as a promoter of social integration and economic development in different geographical, cultural, and political contexts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5253. Applied Sport Analytics. 3 Credit Hours.**

This course is an applied analytics course where students will learn common analytics concepts standard in the sport industry as well as the tools to help analyze these concepts. Many of the questions this course will address will not have clear answers. The course seeks to enable students to practice analytics-based decision making skills to create a well-supported argument rather than attempting to identify what is correct.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5254. Advanced Sport Data Analysis and Visualization. 3 Credit Hours.**

This course will focus on learning the common technical skills required to be a successful data analyst in the sport industry. Students will learn how to use advanced data analytics software to deliver efficient, impactful insights when faced with problems related to the sport industry. Students will also be exposed to common data visualization and management tools.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5255. The Sport Workplace. 3 Credit Hours.**

This course focuses on the basic functions of management and the strategic challenges confronting firms that compete in the global economy within the sport and recreation industry. It provides students a forum in which to apply and integrate management and strategic theories, practices and skills in a global environment, and across all types of organizations including public, private, and voluntary. The course focuses on specific elements of the workplace that are distinctive within the sport industry, such as the role of affect and organizational climate. Career opportunities and industry labor statistics are introduced in depth to allow a full view of the broad sport industry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5256. Professional Portfolio in Sport Analytics. 3 Credit Hours.**

The professional portfolio is a capstone course that provides students within the Sport Analytics concentration with an opportunity to demonstrate achievement in sport analytics. The course is a true culminating experience where students synthesize learning from previous coursework in the concentration. Students will be required to conduct independent data analyses and share their work with the broader sport analytics community.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**SRM 5285. Graduate Internship in Sport and Recreation. 3 Credit Hours.**

The Graduate Internship experience represents a practical industry experience for students in the MS program. A minimum of 3 credit hours is required for all students, regardless of concentration. The Graduate Internship utilizes a field placement with emphasis on acquisition and application of practical skills. One hundred and eighty contact hours will take place in cooperation between the student and an agency, under supervision of both the University internship coordinator and the agency-designated supervisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

## **Sport, Tourism and Hospitality Management (STHM)**

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**STHM 5111. Applied Research. 3 Credit Hours.**

The course equips the student with an understanding of the process of pure and applied research and the scientific method, including an introduction to statistics and computer applications. It prepares the student to analyze critically the scientific literature of sport, recreation, tourism, hospitality, and leisure. The course will address the major ways of conceptualizing and designing research, and acquiring, interpreting, and disseminating data. It will focus on applied research, with the expectation that the students will learn the practical application of research uses in the professional setting.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 5411. Management of Organizations. 3 Credit Hours.**

The course addresses the basic functions of management as they pertain to the administration of organizations that function in primarily service industries like those represented by STHM. Management theory, principles, current issues, and problem areas will be addressed as they apply to all levels of programs and in all types of organizations, including public, private, and voluntary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 5413. Financial Management. 3 Credit Hours.**

The course will analyze managerial accounting and financial management, along with management strategies for financing ventures and expansion. Topics will include accounting systems and internal control, financial statement analysis and interpretation, operational analysis, cost behavior, budgeting and forecasting, pricing and feasibility analysis. Computer applications will be highlighted.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 5415. Service Marketing. 3 Credit Hours.**

The marketing mix (promotions, public relations, sales, advertising, operations, pricing) as applied to various settings will be analyzed, as well as marketing segmentation and targeting. The application of the principles specific to service marketing will be a primary focus of the course, which will employ case study methods in addition to traditional content delivery. Current issues and problem areas associated with marketing and public relations will be analyzed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 5483. Readings and Conferences. 1 to 3 Credit Hour.**

This course provides an opportunity for students to engage in extensive readings in the literature, under the direction of a faculty advisor, into topics not covered in other courses in the curriculum. Students must present a written proposal to a faculty advisor explaining why they wish to engage in additional readings in the literature as a part of their graduate degree program. The student will meet periodically on an arranged basis with the faculty advisor to discuss the readings.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9001. Research Seminar. 3 Credit Hours.**

Methodologies and techniques for the scientific investigation of tourism will be discussed. Trends in the history of tourism research will be identified through a critical analysis of the literature. Quantitative methods for tourism analysis will be discussed. The dissertation process will be highlighted, with preliminary development of a dissertation proposal being required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 9002. Seminar in Theory Development: Tourism and Sport Concepts. 3 Credit Hours.**

The impacts of tourism on both the host and guest will be discussed. Major theoretical approaches for understanding (a) tourism behavior and (b) tourism impacts will be addressed. Tourism theoretical foundation and the empirical record of tourism impacts will be related to tourism planning, development, and policy formulation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 9003. Sem:Tour/Hosp Mgt/Ebus. 3 Credit Hours.**

Electronic business and the Internet have impacted the tourism industry, especially the role of managers and management decisions, tremendously. This course will discuss the various business models that are used, highlight the successes and failures of these models, and strategize for disseminating the information to future managers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 9004. Seminar in Culture and Communication. 3 Credit Hours.**

This course focuses on the study of culture and communication in the context of tourism and sport. It draws on a growing body of cross-cultural research to examine ways in which cultural factors influence human behavior and communication, and interact in the development of such concepts as perception, identity, emotion, authenticity, interpretation, meaning, etc. In what ways are we alike? In what ways are we different? Why? The course explores world views, cultural values, relationships, communication theories and practices, and other topics in order to provide a context for understanding the differences in human behavior and communication and what those differences tell us about ourselves and others and, in particular, our experiences. The understanding of culturally different human behavior and communication presents a global challenge to the tourism and sport industry in the 21st century.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 9090. Special Topics in Tourism and Sport. 1 to 3 Credit Hour.**

This seminar is designed to provide an in-depth exploration of special topics, current issues, and trends in tourism and sport as they relate to topics such as interpretation of international multiculturalism; concepts of strategic management; the use of information technology and its impact on destinations; competitive strategy and marketing; environmental trends, planning, and development; policy formulation; and the social and economic impact of tourism and sport. Relevant industry problems and issues facing management and personnel in the related industries are discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9482. Independent Study. 3 Credit Hours.**

This course provides an opportunity for students to engage in systematic investigations, under the direction of a faculty advisor, into topics not covered in other courses in the curriculum. Students must present a written proposal to a faculty advisor explaining why they wish to undertake an independent study course as a part of their graduate degree program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9795. Master's Continuation. 1 Credit Hour.**

For master's candidates in the final stages of their program after coursework completion. Taken by arrangement with School adviser/coordinator. Satisfies continuous registration requirement in the final semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STHM 9982. Independent Research. 2 to 12 Credit Hours.**

This course provides an opportunity for students to engage in independent formal research, under the direction of a faculty advisor, into research questions which are not covered in other courses in the curriculum. Students must present a written proposal to a faculty advisor explaining why they wish to conduct independent formal research as a part of their degree program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9994. Preliminary Examination Preparation. 1 Credit Hour.**

This course is designed for those doctoral students who have completed all of the prescribed courses, but have not completed their doctoral comprehensive exams. Students will work with a doctoral advisor to develop a plan of study to prepare for the doctoral comprehensive exams.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9995. Master's Project. 3 Credit Hours.**

Sessions will be scheduled by arrangement with the Master's Project adviser. The Master's Project is limited to those who plan to earn the master's degree by completing a project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9996. Master's Thesis. 3 or 6 Credit Hours.**

Sessions will be scheduled by arrangement with the Master's Thesis adviser. The Master's Thesis is limited to those who plan to complete the master's degree by writing a thesis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9998. Pre-Dissertation Research. 1 to 3 Credit Hour.**

This course is designed for those doctoral students who have completed their doctoral Preliminary exams but who have not completed their dissertation proposal. Students will work with their assigned dissertation advisor to develop a plan of study leading to the approval of their dissertation proposal..

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**STHM 9999. Doctoral Dissertation. 1 to 9 Credit Hour.**

This course is designed for those doctoral students who have completed their dissertation proposal. Students will work with their assigned dissertation advisor and their dissertation steering committee to conduct the study outlined in the dissertation proposal. Students must remain registered for Doctoral Dissertation until the dissertation is approved by the examination committee at an oral defense, and the final copies of the dissertation are registered in the Graduate School.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Statistics (STAT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**STAT 5001. Quantitative Methods for Business. 3 Credit Hours.**

This course is designed to introduce you to contemporary elementary applied statistics and to provide you with an appreciation for the uses of statistics in business, economics, everyday life, as well as hands-on capabilities needed in your later coursework and professional employment.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 5002. Introduction to Biostatistics. 3 Credit Hours.**

Topics cover statistical methods and concepts with special emphasis on applications in health and biological sciences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 5170. Special Topics. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 5182. Independent Study. 1 to 6 Credit Hour.**

Special study in a particular aspect of statistics under the direct supervision of an appropriate graduate faculty member. No more than six semester hours of independent study may be counted toward degree requirements.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 5190. Special Topics - Stat. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 5282. Independent Study. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in STAT 5001.

**STAT 5602. Visualization: The Art of Numbers and the Psychology of Persuasion. 3 Credit Hours.**

Organizations are collecting an unprecedented volume of data, and analysts are producing information from data using analytics and models. None of the information that is extracted from the data is usable unless it can be effectively communicated. In this course, we will begin with the fundamental questions of communication: Who is the audience? What is the information? What is the goal? Using these questions to focus our thoughts, we will explore the techniques that allow you to select appropriate information and to craft a narrative that clearly and effectively communicates this information using visual elements. Producing good visual displays is a combination of art and science and compromise between function and form. We will discuss how humans process and encode visual and textual information in relation to selecting an appropriate visual display, and we will cover topics including: exploratory data analyses, charts, tables, graphics, static and dynamic displays, effective presentations, multimedia content, animation, and dashboard design. Examples and cases will be used from a variety of industries.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 5603. Statistical Learning and Data Mining. 3 Credit Hours.**

This course is designed to change the way you think about data. Numerous firms have demonstrated that the ability to reliably extract managerially-relevant information from data is a potent and enduring source of competitive advantage, a realization that transforms data into an asset that can be a primary source of competitive advantage. Competition is pushing organizations to "mine" (or extract) these insights faster, with greater reliability, and in ways that maximize the probability of implementation. In this course we will explore how statistical learning and data mining techniques can be used to improve decision-making and profitability. The course will provide an overview of the fundamental principles and techniques of data mining, and we will use real-world examples, cases, and "hands-on" techniques to demonstrate data-mining techniques in context, to develop your analytic thinking, and to develop your model building acumen.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 5001, (STAT 5301 and MIS 5301), or (STAT 5401 and MIS 5401)) and STAT 5606.

**STAT 5604. Experiments: Knowledge by Design. 3 Credit Hours.**

How do we know which policies, strategies, and decisions work, which should be continued, and which should be changed? Organizations frequently implement strategies and changes, only to find that they fail to produce their intended effects. Thus, there is a gap between what "sounded good" and what was "right." Ultimately, the gold standard for assessing what is "right" is a controlled experiment, which is the least utilized technique in the corporate arsenal. Experiments provide a structured way to construct a feedback loop that allows us to identify errors in our beliefs and to ascertain the real drivers of outcomes. In this course, we will explore how to use this "test and learn" paradigm to answer questions such as how advertising should be designed and targeted, what types of promotions are most effective, what products should be offered, how employees should be compensated, which sales channels should be emphasized, how webpages should be designed, and more. Experiments are an ideal way to understand how to implement a "test and learn" approach to management and to separate the "signal" from the "noise."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 5001, (STAT 5301 and MIS 5301), or (STAT 5401 and MIS 5401))

**STAT 5605. Decision Models: From Data to Decisions. 3 Credit Hours.**

Good analysts know that predictions are always uncertain. However, merely expressing uncertainty is not sufficient for decision making. In addition, we need to combine the results of uncertain inputs into a more general model, account for the relative severity of negative outcomes, and choose a strategy that best achieves our goals (e.g. highest expected value, most robust, least chance of losing, etc.). We also need to communicate the process and conclusions to constituents and to decision-makers. This course focuses on techniques for combining uncertain inputs into a decision model that can be used to characterize likely and unlikely outcomes, to quantify risk, and to identify inputs to a decision that are "high leverage" (i.e., outcomes are very sensitive to those inputs). In addition, you will learn how to build a decision model, how to make better decisions in the presence of uncertainty, and how to deal with multi-stage decisions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 5001, (STAT 5301 and MIS 5301), or (STAT 5401 and MIS 5401))

**STAT 5606. Data: Care, Feeding, and Cleaning in Python. 3 Credit Hours.**

Data is ubiquitous. Real data is also "dirty." Analysis of unclean data can significantly distort the results of analyses, and it can reduce or eliminate the benefits of an information-driven strategy. Thus, the first step in generating good information from data is to "clean" the data. Substantial research has been done on procedures to automatically or semi-automatically identify--and, when possible, correct--errors in large datasets. Even after data have been "scrubbed" the datasets are frequently not in the correct configuration for analysis. Data combination and manipulation involves techniques for merging and summarizing datasets, extracting subsets of data, and transforming variables within the datasets. In this course we explore tools and techniques for cleaning raw data (fixing errors, identifying outliers, etc.), extracting subsets or samples of data, merging and combining datasets, summarizing disaggregate data, and manipulating and transforming individual variables within the datasets. We will also discuss good procedures for ensuring data quality and reliability in data collection. In addition, we will discuss techniques to identify issues in data collection and how to clean the data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 5001 (may be taken concurrently), (STAT 5301 (may be taken concurrently) and MIS 5301 (may be taken concurrently)), or (STAT 5401 (may be taken concurrently) and MIS 5401 (may be taken concurrently)))

**STAT 5607. Advanced Business Analytics. 3 Credit Hours.**

This course builds upon the foundation in Business Analytics. In previous courses, we saw that data by itself is useless, and that it must be transformed into information in order to have value to decision makers. This course will extend your understanding of the art and science of extracting information from data into increasingly complex and "real world" data. Specifically, we will cover extensions to regression, logistic regression, hierarchical modeling, model selection, and other topics spanning the process of building and evaluating models. In addition, we will practice drawing intuition and insight from models and effectively communicating that insight in a format that can help decision-makers to make better decisions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 5001, (STAT 5301 and MIS 5301), or (STAT 5401 and MIS 5401))

**STAT 5611. Business Analytics II. 1.5 Credit Hour.**

Organizations are drowning in a sea of data. However, data by itself is useless. To have value, it must be transformed into information that can be used to make decisions. It has been shown by myriad companies that one path to success in the business arena is through superior use of information - information about customers, markets, and operations. This course extends the material presented in Business Analytics I, continuing the development of the art and science of extracting information from data. The emphasis is on using extracted information to improve business decisions. It also delves into the presentation of quantitative data using state of the art tools and techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in ((STAT 5301 and MIS 5301), (STAT 5401 and MIS 5401), or STAT 5001)

**STAT 5651. Capstone in Analytics. 3 Credit Hours.**

The capstone in analytics is the culmination of analytics-focused coursework. You will work with real data from "live" clients. Some of you will work on projects at companies for which you are interning. Others will work with MBA teams as part of our Fox Management Consulting program, providing analytics support for a live client. Others will work on primarily analytics focused projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 5801. Statistical Analysis for Management. 3 Credit Hours.**

In this course, you'll learn how to use statistics to help solve business problems throughout an enterprise. You'll examine case examples of statistical analysis in areas such as marketing, finance and management. You'll learn descriptive and inferential techniques such as regression analysis and how to analyze data and reach decisions, using statistical computer software and Excel.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 5802. Quantitative Techniques for Management. 3 Credit Hours.**

In this course you'll apply advanced quantitative techniques for managerial decision-making such as forecasting, linear programming, simulation, decision analysis, Markov chains and game theory. You'll use customized software and Excel to analyze these models extensively and apply them to decisions regarding resource allocation and other managerial problems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 5890. Special Topics. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 8001. Probability and Statistics Theory I. 3 Credit Hours.**

Topics include basic probability theory and combinatorial problems, generating functions, random variables, probability distributions, law of large numbers, and limit theorems.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8002. Probability and Statistics Theory II. 3 Credit Hours.**

A comprehensive development of the theory of statistics, including standard distributions, sampling distributions, general theory of estimation, testing of hypotheses, statistical decision theory, order statistics, linear statistical estimation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8001.

**STAT 8003. Statistical Methods and Concepts. 3 Credit Hours.**

Introduction to applied statistics. Topics include data management, probability distributions, parameter estimation, hypothesis testing, sampling methodologies, graphical display, analysis of variance, and simple and multiple regression. Use of R, S-Plus and SAS statistical software.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8004. Statistical Modeling and Inference. 3 Credit Hours.**

Design of experiments, analysis of discrete data, introduction to nonparametric methods, logistic regression, ARIMA time series analysis, bootstrapping, jackknife, robustness, and selected topics in multivariate analysis. Use of R, S-Plus and SAS statistical software.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8003.

**STAT 8031. Probability and Large Sample Theory. 3 Credit Hours.**

An advanced level theoretical course covering measure theoretic probability, some probability inequalities, statistical independence, strong and weak laws of large numbers, convergence in distribution, variance stabilizing transformations, characteristic functions and central limit theorem.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in STAT 8001.

**STAT 8101. Stochastic Processes. 3 Credit Hours.**

This is a first course in stochastic processes, with an emphasis on continuous-time models that support applications in financial mathematics and derivative evaluation. The course covers: fundamentals of probability, limit theorems, conditional expectation, change of measures, Markov chains, random walks, martingales, Brownian motion, the Ito integral, stochastic differential equations, the Black-Scholes model and its use in evaluating a variety of financial derivatives.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 8001 or STAT 8112)

**STAT 8102. High Dimensional Inference. 3 Credit Hours.**

This course covers current topics on high-dimensional statistical learning methods for data science with large and complex data sets. Methods exploiting sparsity and other data and model structures are introduced including penalized regression approaches for linear models, generalized linear models, and high-dimensional classifications. Other selected high-dimensional statistical learning topics will be discussed including tree methods, boosting, random forest, neural networks and unsupervised learning.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8003.

**STAT 8103. Sampling Theory. 3 Credit Hours.**

Theory and application of sampling from finite populations. Topics include random, stratified, cluster, and systematic sampling; estimation of means and variances; optimal allocation of resources; problems of nonsampling errors; and ratio and regression estimation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8003.

**STAT 8104. Mathematics for Statistics. 3 Credit Hours.**

Vector spaces; linear independence of vectors and basis; matrices and algebraic operations on matrices; determinants; rank of a matrix; inverse of nonsingular matrices; linear equations and their solutions; generalized inverse of a matrix; eigen values and vectors of matrices; diagonalization theorems; quadratic forms and their reduction to sum of squares; Jacobians.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8105. Univariate Time Series Analysis. 3 Credit Hours.**

Theory and application of univariate time series analysis. Includes both time domain and frequency domain methods. Considers stationary and nonstationary linear processes, time series model building, forecasting, unit root test, intervention models and outlier detection, spectral theory of stationary processes, spectral windows, and estimation of spectrum.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8002.

**STAT 8106. Linear Models I. 3 Credit Hours.**

Covers the basic theory and practice of generalized linear models (GLM), such as the logistic, Poisson and gamma regression, as well as models for multilevel or longitudinal Gaussian responses, such as the hierarchical linear model and linear mixed model. The students will need to work with R and SAS throughout the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8002, STAT 8004, and STAT 8104.

**STAT 8107. Design of Experiments I. 3 Credit Hours.**

Principles of experimental designs, completely randomized designs, multiple comparisons, randomized block design, latin square design, missing value problems, analysis of covariance, and factorial experiments.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8004.

**STAT 8108. Applied Multivariate Analysis I. 3 Credit Hours.**

Multivariate normal distribution; marginal and conditional distributions; estimation of population mean vector and dispersion matrix; correlation, partial correlation, and multiple correlation coefficients; Hotelling's T<sup>2</sup>; MANOVA; discriminant function; repeated measurements analysis; principal components and canonical correlation; factor analysis; and multidimensional scaling.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8003.

**STAT 8109. Applied Statistics and Data Science. 3 Credit Hours.**

PART I: Elements of a scientific problem, including estimands, the role of statistical models, the language of statistical modeling, notions of likelihood, finite vs infinite populations, and types of analysis. PART II: Elements of statistical modeling, including transformation theorems, sufficiency, 1-parameter and multi-parameter models, multivariate Normal models, Dirichlet-multinomial models, hierarchical models, generalized linear models, mixture models, text analysis, social network analysis. PART III: Concepts and algorithms for estimation and inference, including information, statistical efficiency, asymptotic approximations, maximum likelihood estimators, method of moments estimators, Bayesian estimators, empirical Bayes vs full Bayes estimation strategies, expectation-maximization algorithm, Monte Carlo approximations, Gibbs samplers, Metropolis-Hastings samplers, prior and posterior predictive checks, and Bayesian vs. frequentist coverage. Data Science visitors: The course will feature a series of short talks and Q&A sessions with prominent data scientists spanning academia, government, and the Tech industry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8111. Survey Techniques for Business Applications. 3 Credit Hours.**

Application oriented. A course dealing with statistical and nonstatistical aspects of organizing a sample survey. Included are discussions of objectives, measurement, sample selection, pilot testing, data collection, data editing, summarization and interpretation of results in addition to describing the various sampling schemes. Students may be required to plan and execute a survey.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8112. Statistical Methods for Business Research I. 3 Credit Hours.**

Part I of a doctoral level, one-year sequence of courses for the PhD students in Business Administration program. The course covers a variety of statistical methods useful in business research, such as: multiple regression analysis, ANOVA, linear models, analysis of covariance, logistic regression, principal component analysis, exploratory factor analysis and canonical correlation analysis. Emphases are placed on rationales, assumptions, techniques, and interpretation of results from computer packages. Relevant mathematical results will be presented, but proofs or abstract arguments shall be avoided. The lectures cover computer usages, such as R and/or SAS, and the students are expected to work with SAS (or equivalent packages) throughout the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8113. Statistical Methods for Business Research II. 3 Credit Hours.**

Part II of a doctoral level, one-year sequence of courses for the PhD students in Business Administration program. Topics covered in this course are: discriminant analysis, confirmatory factor analysis and structural equations modeling, time-series intervention analysis, survival (event history) analysis, MANOVA, multivariate profile analysis, hierarchical linear models (HLM), linear mixed models (LMM) for multilevel data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8112.

**STAT 8114. Survival Analysis I. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8115. Nonparametric Methods. 3 Credit Hours.**

A thorough course in nonparametric statistics. Estimation and testing of hypothesis when the function form of the population distribution function is not completely specified.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8003.

**STAT 8116. Categorical Data Analysis. 3 Credit Hours.**

Sampling models and analyses for discrete data: Fisher's exact test; Logistic regression; ROC analysis; Log-linear models and Poisson regression; Conditional logistic regression; Cochran-Mantel-Haenszel test; Measures of agreement between observers; Quasi-independence; Multinomial logit models; Proportional odds model; Association models; generalized estimating equations (GEE); generalized linear mixed model (GLIMMIX); GSK models; Composite link functions. The students will need to work with R and SAS throughout the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8003.

**STAT 8117. Clinical Trials. 3 Credit Hours.**

Introduction to the special problems associated with medical trials on humans. Topics include randomization, sample-size determination, methods for early trial termination, and tests for superiority, equivalence, and non-inferiority. Also discussed are choice of endpoints, control, side effects, use of historical data, meta-analysis and ethics of experimentation on humans.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 8002 or STAT 8004)

**STAT 8121. Statistical Computing and Optimization. 3 Credit Hours.**

Use of computers in the solution of statistical problems. Topics include: floating point architecture, random number generation, design of statistical software, computational linear algebra, numerical integration, optimization methods.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8004.

**STAT 8122. Advanced SAS Programming. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (MATH 1042 or MATH 1942), STAT 8001, and STAT 8002.

**STAT 8123. Time Series Analysis and Forecasting. 3 Credit Hours.**

A time series analysis with financial and business applications. Topics include important univariate and multivariate time series methods including ARIMA models, intervention analysis, outlier detection, time series regression, volatility and GARCH models, vector time series and co-integration. Projects using software are required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (STAT 8002 or STAT 8004)

**STAT 8207. Design and Analysis of Complex Experiments. 3 Credit Hours.**

Experimentation has become a strategic foundation for modern corporations. This course focuses on strategies for designing, executing, and analyzing experiments on large populations, as well as dealing with large collections of concurrent experiments. We will consider settings where units of analysis may be assigned treatment in multiple experiments that are running concurrently. The course is largely based on critical reading of recent articles and technical reports. The emphasis will be on the design of complex field experiments that produce actionable results, and in working with experimentation platforms at large IT companies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8109.

**STAT 8515. Data Wrangling and Curation. 3 Credit Hours.**

This course will explore advanced tools and techniques for cleaning "raw" data. Real data is ubiquitous, but it is almost always "dirty". Analysis of "dirty" data can significantly distort results, which can reduce or eliminate the benefits from an analytic solution. The first step in extracting actionable information from data is to "clean" the data, and this process frequently occupies the majority of the analysis time. In this course, we will provide an in-depth look at the techniques that can be used to identify and deal with problematic data. Even after data have been "scrubbed", datasets are frequently not in the correct configuration for analysis, and we will explore techniques for merging and summarizing datasets, extracting subsets of data, and transforming variables. We will also discuss procedures for ensuring data quality and reliability in data collection.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 8982. Independent Study. 1 to 3 Credit Hour.**

Special study in statistics theory and methods under the supervision of a graduate faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 9001. Advanced Statistical Inference I. 3 Credit Hours.**

Background: Matrix Theory Estimation: Sufficiency, Completeness, UMVU Estimation, Information Inequality, Invariance Principle, Bayes Estimation, Admissibility, Maximum Likelihood Estimation, Large Sample Properties of Estimators.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8001 and STAT 8002.

**STAT 9002. Advanced Statistical Inference II. 3 Credit Hours.**

Testing of Hypotheses: Neyman-Pearson Fundamental Lemma; Uniformly Most Powerful Tests, Confidence Intervals, Likelihood Ratio Tests; Asymptotic Tests, Multiple Hypotheses Testing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STAT 9090. Special Topics. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**STAT 9101. Multivariate Time Series Analysis. 3 Credit Hours.**

Theory and application of multiple time series analysis and special topics. Covers transfer function models, time series regression with autocorrelated errors, ARCH and GARCH models, vector time series models, cointegration, state space models, long memory processes and nonlinear processes, time series aggregation and disaggregation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8105.

**STAT 9103. Stat Lrng & Data Mining. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8001, STAT 8002, STAT 8003, and STAT 8004.

**STAT 9106. Linear Models II. 3 Credit Hours.**

Continuation of Stat 8106, covers the theory and practice of analyzing multivariate repeated/correlated non-Gaussian responses, with or without missing observations. Missing at random (MAR) models; informative missingness; EM algorithm; multiple imputations; quasi-likelihood estimation; generalized estimating equations (GEE); transition models; Gibbs sampling; Markov Chain Monte-Carlo (MCMC) technique. The students will need to work with R, SAS and WinBugs throughout the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8106.

**STAT 9107. Design of Experiments II. 3 Credit Hours.**

Covers symmetric and asymmetrical factorial experiments, fractional replication, split plot design, balanced and partially balanced incomplete block designs without and with recovery of interblock information and lattice designs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8107.

**STAT 9108. Multivariate Analysis II. 3 Credit Hours.**

A study of specialized topics in multivariate analysis.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8002 and STAT 8108.

**STAT 9114. Survival Analysis II. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 8114.

**STAT 9116. Statistical Genetics: An Advanced Graduate Course. 3 Credit Hours.**

An advanced level graduate course in statistical genetics covering the basic concepts of allele, gene, genotype, phenotype, Hardy-Weinberg equilibrium, linkage analysis, QTL mapping using marker analysis, functional mapping for longitudinal traits, analysis of ultra-high dimensional data, genome-wide association studies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B in STAT 8001, STAT 8002, STAT 8003, and STAT 8004.

**STAT 9180. Seminar in New Topics in Statistics. 3 Credit Hours.**

Special topics in Statistics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 9183. Directed Study in Statistics. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 9190. Seminar in New Topics in Statistics. 3 Credit Hours.**

Special topics in Statistics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 9994. Preliminary Examination Preparation. 1 Credit Hour.**

Preparation for preliminary examinations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 9998. Pre-Dissertation Research. 1 Credit Hour.**

Proposal design. Registration required until approved proposal is on file at the Graduate School.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STAT 9999. Dissertation Research. 1 to 12 Credit Hour.**

For students elevated to candidacy and doing their dissertation research. Registration required until successful defense and graduation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Strategic Communication (STRC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**STRC 8102. Legal Issues in Communication Management. 3 Credit Hours.**

Grounding in legal issues that bear on communication: governmental regulation of speech; deceptive advertising; product liability class action; defamation and commercial speech; publicity and privacy; trademarks, patents, trade secrets, and copyrights; obscenity and indecency; journalistic privilege, free press, fair trial, and access to information. Note: Core course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STRC 8800. Spec Topics in Comm Mgmt. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STRC 8985. Teach in Higher Ed:Comm. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STRC 9001. Crisis Communication and Issue Management. 3 Credit Hours.**

This course examines a wide range of issues and crises, including natural and man-made disasters, defective products, executive malfeasance, and activism. It focuses on managing issues before they become crises, mediating conflict with various publics, putting together a crisis plan, dealing with the unexpected during a crisis, and rectifying long-term effects of crises.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STRC 9004. Government Relations and Lobbying. 3 Credit Hours.**

This course examines the government relations and lobbying functions within non-profit and publicly traded organizations, including corporations, special interest groups, and other organizations. It covers the history of lobbying, different types of lobbying and lobbyists, the role of lobbying within a democratic government, and building a career in government relations. This is a hands-on course; student projects include lobbying a state or federal issue.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**STRC 9054. Directed Readings in Communication. 1 to 4 Credit Hour.**

Independent study. A specific faculty member must agree to serve as supervisor before the student registers. Special form needed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**STRC 9101. Capstone Project in Communication Management. 3 Credit Hours.**

In-depth, original analysis of a professional issue in communication management. Required of all MS students in their final semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Strategic Management (SGM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SGM 5001. Mng New & Small Enterprs. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5002. Business Plan Developmnt. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5051. Business Strategy in a Global Environment. 3 Credit Hours.**

This course is designed to present international strategic management concepts and the field of global industry competitive analysis. This seminar combines multiple attributes and analytical frameworks of strategic management to assess an industry and the relevant competitor strategies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5103. Management of Technology and Innovation. 3 Credit Hours.**

This course is designed to give students insights into the technological, customer, and management issues that must be considered when developing new products or technologies. This course offers students the chance to understand and apply a number of analytical, decision making, management, and planning tools that can be used to guide the development of new products (and services) from idea to the marketplace (invoice). It is relevant to students who would like to more systematically manage and execute their own innovative ideas as well as those that wish to lead new venture, new product development, and research and development processes and groups. The course will prepare students to take the certification exam for the Product Development Management Association (PDMA) New Product Development Professional (NPDP) Certification.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5104. Management of Growth, Decline and Turnaround. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5001, ECON 5001, STAT 5001, MKTG 5001, MIS 5001, FIN 5001, and MSOM 5001)

**SGM 5105. Industry Competitive Analysis. 3 Credit Hours.**

An applied examination of recently developed techniques for assessing industry competitive forces and devising appropriate business strategies. Topics include: analysis of industry trends, recognizing types of industries, developing strategic maps of industry competitors, and learning to utilize industry information sources, among others. Students will be required to conduct an in-depth analysis of at least one industry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5001, ECON 5001, STAT 5001, MKTG 5001, MIS 5001, FIN 5001, and MSOM 5001)

**SGM 5107. Management of Mergers and Acquisitions. 3 Credit Hours.**

Examines managerial aspects of growth through mergers and acquisitions. Examines pre-merger analysis, strategies for negotiation and bidding, as well as post-merger integration of target firms. Utilizes several techniques valuable for acquisition analysis, including financial valuation techniques and industry analysis. Case studies develop students' analytical skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5108. New Venture Creation. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in (ACCT 5001, ECON 5001, STAT 5001, MKTG 5001, MIS 5001, FIN 5001, and MSOM 5001)

**SGM 5116. Non-Profit Governance: Preparing to Sit on a Board of Directors. 0 to 3 Credit Hours.**

Participation on a nonprofit board is a rite of passage for business leaders. The course provides a rich opportunity to study governance, risk management, and leadership development at a strategic level. It also offers rich professional development opportunities and the satisfaction of sharing professional skills with mission-driven organizations. Through active involvement with the board of a nonprofit organization, enriched by a management project for the organization, students will consolidate their MBA or MS skills while exploring issues related to governance, risk management, impact measures and executive development and motivation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5131. Social Entrepreneurship - Innovative Approaches to Achieving Positive Social Impact. 3 Credit Hours.**

Private enterprise (business) is a powerful tool for stimulating innovation and investment - but often neglects community, social and environmental costs. Public enterprise (government) is useful in allocating public resources and serving the disenfranchised - but often at the cost of efficiency and creativity. Social entrepreneurship promises to combine the energy, discipline and appetite for innovation of private enterprise with the inclusiveness and far-sightedness of public enterprise to solve pressing social, environmental and economic problems. Social entrepreneurship sounds wonderful - but how does it play out in reality? And what does it take to manage multiple bottom lines (people, profit and place) effectively? In this highly interactive and experiential course, students will have a chance to interact with, learn from, and work on business challenges for social entrepreneurs as well as the entrepreneurial ecosystem that supports social impact investing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5133. Management Consulting: Principles and Practices. 3 Credit Hours.**

Whether your goal as a management consultant is to join a dedicated firm, operate in-house, or launch your own practice, the factors for success are similar. This course focuses on the skills (hard and soft), methods, and practices of successful consultants. Consulting is highly practical; therefore, the course includes many practical exercises with content from experts in the field. Research projects and project simulations will be evaluated by senior practitioners from industry, including the course instructor. A personal assessment and individual development plan will help you identify and map the best path to a career in consulting. [Note: This course would also benefit aspiring entrepreneurs and students preparing for the capstone.]

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5134. The Consulting Engagement: Managing Projects and Change. 3 Credit Hours.**

In management consulting, project management and change management are two sides of the same coin. This course presents both the tools and practices successful consultants use to manage both the process and the people. The engagement management component of the course focuses on three critical activities: 1) From RFP to scope to exit interview, managing the client, 2) Project planning across the boundaries that divide consultant and client, and 3) How to analyze, manage and report upon the financial components of a project, including project ROI. The second half of the course addresses the need for leaders to manage employees and other key stakeholders through transformational change, and the role the consultant plays in this process. By understanding the challenges of managing people through complex change, as well as the methodologies, tools and proven approaches of successful consultants, students can ensure enterprise-wide understanding, buy-in and collaboration throughout the transformation process.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5135. Innovation Intelligence: Plan, Build, Protect, and Monetize a Technology / Innovation Portfolio. 3 Credit Hours.**

Almost all firms want to be more innovative, however, few succeed at profiting from their innovations. Furthermore, some of the most interesting technological inventions are commercial failures. This course trains students in approaches to strategically manage an innovation or technology-focused organization or consultancy. Developing 'intelligence' in a domain requires accessing relevant information, analyzing it using appropriate approaches, and making informed strategic decisions based on your analysis. This course will demonstrate a number of tools and perspectives that are critical to strategically plan, coordinate, and make decisions relevant to innovation, research and development (R&D), and technology or new product development. You will learn to systematically assess R&D / technology trends and risks, scout for development opportunities, identify technology and product leaders and uncover their strategies, protect and leverage your portfolio of innovations/technologies, and build a coherent innovation plan that aligns with your organization's strategy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5136. Principles of Strategy and Management. 3 Credit Hours.**

Whether you are interested in being a high-performing employee, a manager within an organization, an innovator, or a successful entrepreneur, understanding the core business principles of strategy and management is critical to helping you achieve your goals. This course will provide an overview of traditional as well as cutting-edge, innovation-focused perspectives and tools including: industry and stakeholder analysis, competitive advantage, business models, profitability, organizational design, and the evolving roles of managers and leaders. This is an introductory course for anyone without formal business training or education. It is utilized as an introductory course in a number of certificates and masters programs and can help individuals considering whether or not a Fox graduate degree is interesting or appropriate for them. NOTE: Not open to MBA students but available to all other majors / all schools and colleges.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** May not be enrolled in one of the following Degrees: Master of Business Admin.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5137. Entrepreneurial Thinking and New Venture Creation. 3 Credit Hours.**

Whether students are aspiring entrepreneurs bent on launching new businesses or managers bent on growing profitable businesses, the module seeks students to "think big" and "think out of the box". The central focus of the module is on two key success factors: the entrepreneur; and his/her ability to create and recognize opportunities. It examines the concepts, skills and know-how, information, attitudes and alternatives that are relevant for entrepreneurs engaged in start-up and early-stage ventures, managers of new ventures within established organizations, and the relevant stakeholders. Key questions raised and answered in the module include: What are the key aspects of new venture creation process? Where can you look for new opportunities? How do you evaluate an opportunity? How do you generate, evaluate, and evolve your ideas? How do new ventures achieve growth? What are the key elements of deal structure? How should you structure a deal? What are the strategies for harvesting new ventures? What are the unique properties of entrepreneurs and their teams?

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5138. Global Innovation Strategy: Creating Agile, Innovative, Globally-Competitive Organizations. 3 Credit Hours.**

This course discusses innovation-based strategies as a source of competitive advantage as well as how to build and design agile / adaptive organizations that excel at innovation. Major topics include understanding how disruptive innovations impact industries, designing an organization that encourages innovation and embraces change, balancing performance and innovation demands, and organizing to take advantage of various sources of innovation. In addition, students will be exposed to a number of cutting-edge topics relevant to next-generation strategy: global R&D and emerging market innovation, organizational learning and knowledge management, and open innovation approaches that engage both your customer base as well as your value system to innovate and create unparalleled value.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5139. Lean Entrepreneurship / Innovation: Fast & Frugal Methods to Launch Startups & Test Innovative Ideas. 3 Credit Hours.**

The Lean Startup or Lean Launchpad methodology has transformed the way that entrepreneurship is taught and practiced and has even changed how the most innovative organizations in the world invent new products and services or reinvent themselves via innovation. In this experiential, hands-on course students will learn the 'customer-development' approach that serves as a counterpoint to traditional 'product development' undertaken in most organizations. Students will be immersed in the iterative (build-measure-learn) process and will learn how to accelerate the process via creative approaches to designing minimum-viable products, prototypes, and experiments. Furthermore, they will learn how to more systematically identify and test assumptions so that they can make decisions to pivot, proceed, or restart based on customer insights and evidence gathered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5142. Business Model Innovation. 3 Credit Hours.**

A business model describes how an organization creates and captures value - a business model is like the DNA of an organization. Business model tools and perspectives have recently advanced at a dramatic pace and business model innovations are one of the most significant sources of industry disruption. This course uses the business model canvas methodology as well as the strategic revolution/blue ocean strategy approaches to generate rule-breaking business models. In addition, building on this business model foundation, we will explore theories of innovation characteristics, adoption, and diffusion to provide practical advice and techniques for finding first customers, implementing innovative ideas, and driving acceptance by modifying your products, services, and business model.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5144. Creativity Unleashed: Harnessing Creativity to Solve Real-World Innovation Challenges. 3 Credit Hours.**

We all face an innovation imperative - innovate or die. Innovation fuels our ability to be competitive - both on a corporate level and on a personal one. However, innovation remains elusive to many organizations and individuals. Students in this course will shift both their perspective and their behaviors as they learn a set of creativity tools that they will apply to real-world innovation challenges during class. This course delves deep into critical creativity topics like problem formulation, divergent thinking techniques, idea evaluation and convergent thinking, evolving ideas to increase impact and feasibility, and championing your ideas to find acceptance. No matter what career or profession you are going into, being familiar with creative approaches and techniques will help you to be more valuable, employable, innovative, and entrepreneurial. Developing your competencies in this area might be one of the most important investments you can make in yourself. Creativity has become one of the most sought after characteristics of employees and managers and is an important predictor of executive success. Creativity is not simply something you have, it is something that you can develop.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5145. Plan, Pitch, and Fund an Entrepreneurial Start-Up. 3 Credit Hours.**

For many entrepreneurs securing funding is the most challenging phase of the entrepreneurial process. Although more options than ever before are available for early stage funding, a substantial portion of the entrepreneurial funding landscape involves appealing to potential investors. Increasingly accelerator programs, incubators, and a number of other key players in the entrepreneurial ecosystem are using the same criteria as angel and venture capital investors for selecting investment-worthy ventures. This course focuses on positioning and presenting your venture or concept such that it has the greatest chance to be funded. Your 'pitch' or investor presentation is a critical phase in the entrepreneurial process, and you should not underestimate how important it is to the success or failure of your company. The investor presentation is unlike any other business presentation you've done: investors are a most demanding and impatient audience. It's a fact that many companies that truly deserve to be funded don't get funded because they can't communicate what they have well enough to engage investors.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5148. Open Innovation and Managing Strategic Alliances. 3 Credit Hours.**

It is said that competition is no longer company-vs-company but business ecosystem against business ecosystem. Unbridled advances in technology, connectedness, globalization, and fragmentation of value chains across industries have transformed the relationship between companies, customers, partners, and competitors. Increasingly the knowledge and specialization required by firms to produce new products, gain new resources including strategic intelligence, and to place bets across nascent markets resides outside of firms' boundaries. To be successful in this context, firms - from established industry giants to entrepreneurial new ventures - must build comprehensive open innovation strategies that engage and mobilize external stakeholders to productive and innovative ends. This course addresses the distinct challenges and opportunities posed by the confluence of digital community (i.e. "the crowd"), powerful and expanding data gathering and analytics, and the ambiguous boundaries of successful modern firms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5170. Special Topics. 1 to 6 Credit Hour.**

Special topics in Strategic Management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Repeatability:** This course may be repeated for additional credit.

**SGM 5180. Special Topics in SGM. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 5182. Independent Study. 1 to 6 Credit Hour.**

Only available to MBA/MS students. Course provides an opportunity for students to explore the creation of an idea for a new eBusiness, as well the planning and research involved in moving from the idea stage to the startup stage. This course involves preparation of a business plan on the new eBusiness idea. In addition, this course provides students with an on-going platform to develop and integrate concepts presented in previous and concurrent seminars. Prior to taking this course, students will be exposed to an entrepreneurship module in the Fall semester. This module is designed to provide students with an opportunity to present preliminary ideas for a new eBusiness endeavor to be expanded on during this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 5190. Special Topics: General & Strategic Management. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 5282. Independent Study. 1 to 3 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 5411. Organizational Strategy. 3 Credit Hours.**

To achieve business success, managers must develop the resources and capabilities needed to gain and sustain advantage in competitive markets. The way in which organizations attempt to develop such competitive advantage constitutes the essence of their strategy. This course introduces the concept of strategic management and considers the basic direction and goals of an organization, the external environment, industry and market structure, and organizational strengths and weaknesses. The emphasis of the course is on the development of gestalt thinking regarding organizational challenges, as well as the tools and methods required to address those challenges.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

**Co-requisites:** FIN 5411.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C in BA 5412 and ACCT 5411.

**SGM 5501. International Management. 3 Credit Hours.**

This course is designed to present the break-through concepts to understand and address the complexities and opportunities associated with a turbulent global business context. For example, students will analyze the economic, financial, and human consequences resulting from the rise of emerging markets, the 2008 Global Financial Crisis, and the 2020 global pandemic. This 3-credit course will focus on the formidable challenges and opportunities in managing internationally for any manager, regardless of location (US or overseas). The course will draw from different disciplines to enhance management skills, cross-cultural literacy, negotiation, decision-making under uncertainty, and leadership, in particular.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5801. Contemporary Corporate Strategy. 3 Credit Hours.**

In this course, you'll increase your grasp of strategic management concepts as they relate to for-profit, not-for-profit and professional organizations. You'll enhance your ability to analyze an industry and develop relevant enterprise-level strategies. In particular, through several real-world case studies, you'll learn about cutting-edge developments in e-business and e-business strategies. You'll apply the concepts to organizations that you and other program participants work for or are interested in.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5882. Independent Study. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 5890. Special Topics. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 5901. Mng New/Small Enterprise. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 5902. Managing Bus Planning. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 9001. Seminar: Strategic Form - Environmental Analysis. 3 Credit Hours.**

A critical evaluation of the paradigms, theories, and research approaches as well as the current state of knowledge in strategic management. The courses focuses specifically on the theory and current state of research in the analysis of relevant environments and the subsequent formulation of strategy within corporate entities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 9002. Seminar: Administrative Strategic Decisions. 3 Credit Hours.**

Design of systems to implement decisions. Examines concepts and theories of organizational design and processes required to transform strategic decisions into action and desired results. The current research literature in the area of organization decision making is emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 9003. Seminar: Management Control. 3 Credit Hours.**

Survey of control theory and research as it relates to organizational behavior. Examines managerial practices and organizational processes which have the potential effect of achieving strategic goals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 9011. Proseminar in Strategy and International Business. 3 Credit Hours.**

The Proseminar is intended to give the doctoral students in Strategic Management and International Business concentrations a head-start on embedding themselves into the scholarly community at the Fox School, as well as to provide a platform for integrating their early coursework to their research interests and sharpen their vision for the chosen academic career. Specifically, the course attempts to provide an integrative framework to build your profile as an impactful academic. In particular, we will systematically go through the many roles that you will take on as an academic. We will also focus on developing your critical thinking skills in reading research papers, to provide an opportunity to assess your technical skills in empirical research and to build effective presentation skills. The course integrates the departmental seminar series to help you assimilate, critique, and leverage them to generate your own research ideas. The Proseminar culminates with a presentation of your vision statement and a proposal for your first summer research paper.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 9090. Spec Topic Strategy. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 9183. Directed Study in Mgt. 1 to 6 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**SGM 9211. Theor Fndns in Entrepr. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**SGM 9212. Strategic Management of Technology and Innovation. 3 Credit Hours.**

This doctoral seminar provides an introduction to the phenomenon of innovation from the strategic management perspective. By introducing some of the basic theories and concepts of innovation research, this seminar serves as a foundation for building our understanding of how organizations create new innovations, engage in search, design their organizations optimally, and manage change. The emphasis of the seminar is on understanding the main theories on innovation and technology strategy and synthesizing research in this area. We will also develop skills to appreciate and construct theoretically rich empirical research designs.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Supervisory Certification Program (SUPV)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SUPV 5601. Assessment of Curriculum and Instruction. 3 Credit Hours.**

An introduction to procedure and methods used in the evaluation of curricula and programs in school settings. This course comprises the general supervisory component and are required for most students. This course also meets the curriculum requirements for principal certification.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Supply Chain Management (SCM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**SCM 5101. Supply Chain Analytics. 3 Credit Hours.**

Supply chain analytics is unique and, to some degree, represents a paradox because it is concerned with one of the oldest and also the most newly discovered activities of business. This course will assist you in understanding the importance of data in the supply chain and how organizations can gain competitive advantage using the analytics tools at various stages in the supply chain. This course includes applications of the tools learned in earlier courses.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 5001.

**SCM 5102. Supply Chain Logistics and Distribution. 3 Credit Hours.**

This course will cover the three important building blocks of an effective supply chain - transportation, inventory, and warehousing management. Have you ever wondered how Amazon pulls off that last-minute birthday gift or home article at your doorstep when you need it? Answer - it is made possible due to a well-developed network of transport systems, smart technologies and dedicated personnel. This course will begin with an overview of the freight logistics. It will enable you a broader understanding of the five primary modes of freight transportation and how freight moves at the domestic and international level. You will get acquainted with different transportation market structures, cost structures, and pricing strategies. You will learn about the new and innovative sustainability efforts currently underway in transportation, and lastly, study some of the quantitative tools and techniques required for designing transport networks to achieve cost minimization while meeting the customer demand. After learning about the freight transportation systems, the course will delve into some inventory management philosophies, and their quantitative and qualitative aspects. When thinking of Amazon, you may imagine that there are a number of factors that go into serving up the right product to the right customer! While transportation is one of them, inventory management is a large part of their business. In this part of the course, you will learn the mathematical models used for inventory ordering and replenishment decisions. You will critically approach inventory management decisions when faced with uncertainties. You will also acquaint yourselves with good warehousing practices that leads to new market opportunities while meeting customer demands and expectations. Understanding the different material, information, people management tools, and examining the costs and benefits associated with different warehousing designs and processes will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 5001.

**SCM 5103. Strategic Sourcing and Procurement. 3 Credit Hours.**

Many forces, such as globalization, new technologies, new materials, government policy and regulations, political and economic unrest, environmental change and better informed consumers, all must be considered for their impact on the procurement and steady supply of the materials and services a firm needs to operate. A company's supply chain consists of various entities, including suppliers, manufacturers, distributors, logistics providers, and retailers to fulfill customer demand. Aside from the acquisition of materials, strategic procurement is also responsible for securing and maintaining the various relationships among and across this chain, such as third-party logistics providers and contract manufacturers. Sourcing is identifying potential suppliers, while procurement involves purchasing from those sources, with a goal of corporate strategy congruence. The proposed sourcing and procurement course will: Provide an understanding and hands-on practice of how firms organize for strategic procurement, pass through the sourcing process (from development of a procurement strategy, through understanding the environments surrounding material and service needs, through source identification, selection, and monitoring), ending with supplier development; Address what firms must do to achieve a competitive advantage from their procurement and sourcing processes, with a focus on the impact of procurement and related supply chain decisions on supply chain finance; Show how firms build enduring supply chain relationships across the entire supply chain; Expand beyond traditional boundaries of for-profit to for-profit procurement to explore non-profit and government procurement; Focus on areas such as but not limited to sustainability, risk management and supplier diversity.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 5001.

**SCM 5182. Independent Study. 1 to 3 Credit Hour.**

Study in particular aspects of supply chain management under the direct supervision of a graduate faculty member.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

# Surgery (SURG)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

## **SURG M122. Common Surgical Problems. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

## **SURG M123. Laparoscopic Surgery. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

## **SURG M125. Intro to Clin Gen Surg. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

## **SURG M151. Intro Trauma Surgery. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

## **SURG M153. Introduction to Vascular and Endovascular Surgery. 0 Credit Hours.**

The course will include an introduction to the basic tenants of vascular and endovascular surgery. Principles discussed will include, but not be limited to: arterial and venous disease; the most common arterial and venous maladies encountered in vascular surgery; introduction to open vascular surgery with discussion of vessel control and bypass/replacement methods, and indications for this procedure; basic introduction to endovascular surgery and its principles; dialysis access; venous disease; the vascular history and physical exam.

**Repeatability:** This course may be repeated for additional credit.

## **SURG M166. Intro Cardiac Surgery. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

## **SURG M201. Introduction to Oral/Maxillofacial. 0 Credit Hours.**

This course is an introduction to the principles of Advanced Oral and Maxillofacial Surgery. It is intended to facilitate the continuation of basic biomedical sciences and clinical skills into subspecialty level clinical patient care. All presentations are designed to utilize the available and most recent clinical and scientific evidence.

**Repeatability:** This course may be repeated for additional credit.

## **SURG M203. Introductory Elective. 0 Credit Hours.**

This generic first and second year Surgery elective serves as an introduction to a special topic in the Department of Surgery. Topics vary from semester to semester and may include an extension of a content area already covered in the required curriculum, an introduction to a new topic or research issue, or exposure to a clinical discipline. First and second year electives are optional and do not impact graduation requirements. Electives are schedule for seven two-hour sessions each, for a total of fourteen contact hours. Student interest and faculty availability determine topics offered each semester.

## **SURG M281. Intro to Plastic Surgery. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

## **SURG M300. Surgery Elective. 0 Credit Hours.**

This course will enable students to develop a basic understanding of the fund of knowledge and types of medical problems seen in this specialty; to develop a basic understanding of the medical decision making process involved in the practice; and to develop an understanding of and practice of medical interpersonal communication and professionalism.

**Repeatability:** This course may be repeated for additional credit.

**SURG M350. Surgery. 0 Credit Hours.**

**Course Attributes:** M6

**Repeatability:** This course may not be repeated for additional credits.

**SURG M351. Career Exploration of Thoracic Surgery. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**SURG M353. Career Exploration of Trauma Surgery. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**SURG M363. Career Exploration of Vascular Surgery. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**SURG M365. Career Exploration of Surgical Oncology. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**SURG M382. Career Exploration of General Plastic Surgery. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**SURG M399. Career Exploration of Colon Rectal Surgery. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**SURG M400. Advanced Oral/Maxillofacial. 0 Credit Hours.**

This is an advanced course in Oral and Maxillofacial Surgery. It is intended to expand on the basic surgical knowledge and clinical skills needed for the advanced subspecialty of Oral and Maxillofacial Surgery. It helps the learner to enhance their knowledge base and develop clinical decision making, critical thinking, and clinical skills needed for a contemporary Oral and Maxillofacial Surgeon.

**Repeatability:** This course may be repeated for additional credit.

**SURG M500. Oral and Maxillofacial Surgery Clerkship I. 0 Credit Hours.**

This is a clinical rotation in Oral and Maxillofacial Surgery. It is intended to expand on the basic surgical knowledge and clinical skills towards advanced subspecialty of Oral and Maxillofacial Surgery training. It helps the learner to enhance their knowledge base and develop clinical decision making, critical thinking, and clinical skills needed for a contemporary Oral and Maxillofacial Surgeon.

**Repeatability:** This course may be repeated for additional credit.

**SURG M501. Oral and Maxillofacial Surgery Clerkship II. 0 Credit Hours.**

This is an advanced clinical rotation in Oral and Maxillofacial Surgery. It is intended to give students an additional experience in Oral and Maxillofacial Surgery training. The students will continue to enhance their knowledge base and develop clinical decision making, critical thinking, and clinical skills needed for a contemporary Oral and Maxillofacial Surgeon.

**Repeatability:** This course may be repeated for additional credit.

**SURG M503. Pediatric Oral/Maxillofacial Surgery. 0 Credit Hours.**

This is an advanced clinical rotation in Pediatric Oral and Maxillofacial Surgery. It is intended to expand on the basic surgical knowledge and clinical skills towards advanced subspecialty of Oral and Maxillofacial Surgery training with exposure to the Pediatric setting. It helps the learner to enhance their knowledge base and develop clinical decision making, critical thinking, and clinical skills needed for a contemporary Oral and Maxillofacial Surgeon.

**Repeatability:** This course may be repeated for additional credit.

**SURG M750. General Surgery. 0 Credit Hours.**

This a 4th year elective rotation for students interested in an excellent community general surgery experience. Students will work closely with affiliated surgical faculty, as there are no residents present. The rotation will focus heavily on core general surgery, with additional exposure to both trauma care and colorectal surgery. Students will have the ability to work in both the inpatient and outpatient settings.

**Repeatability:** This course may be repeated for additional credit.

**SURG M751. Surgery Night Coverage/Consultation. 0 Credit Hours.**

This elective will provide an opportunity for 4th year students interested in surgical careers the opportunity to experience night time surgical patient care. Many surgical residencies have a night-float system to remain within work hour limits, and this course will prepare our students to comfortably operate in these systems. Focus will be on performing effective patient care hand-offs and transitions, learning to triage and manage phone calls while covering multiple surgical services, and providing general surgical consultative services as appropriate. Students will mostly operate at the sub-intern level caring for patients on the hospital floors. Students may participate in operative surgical procedures as able, and provide ED and floor consultative services when possible.

**Repeatability:** This course may be repeated for additional credit.

**SURG M763. Vascular Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**SURG M764. Surgical Nutrition. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**SURG M765. Surgical Oncology. 0 Credit Hours.**

**Course Attributes:** M2

**SURG M766. Reconstructive Plastic Surgery Oncology. 0 Credit Hours.**

Student experience will focus on reconstructive surgeries after cancer. They will learn and participate in the full spectrum of reconstructive options, ranging from skin grafts to the most complex techniques using free tissue transfer. With the FCCC plastic surgeons, the student will work collaboratively with the medical team to restore normal structure and function after treatment for cancers such as breast, head and neck, and sarcomas. This course may offer the opportunity for students to learn about research related to reconstructive surgery.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of P in MEDS M447.

**SURG M767. Head & Neck Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**SURG M769. Surgical ICU (SICU) - Critical Care. 0 Credit Hours.**

The required critical care course will introduce students to the management of critically ill patients. Students are expected to follow their patients' progress and contribute to their care with supervision. Students will observe and assist as possible in procedures being performed in the ICU. Students will obtain exposure to assisted ventilation, palliative and end-of life care.

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in INTM M301, OBGY M320, PEDI M330, PSYM M340, SURG M350, NEUR M370, and FAMP M360.

**SURG M770. Cardiac Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**SURG M771. Robotic Cardiac Surgery. 0 Credit Hours.**

Students will work closely with Dr. Guy and the Cardiovascular Surgery team with integral involvement in all aspects of patient care. Students will be expected to contribute to pre-operative evaluation, operative procedures, and post-operative management. Special emphasis will be placed on selective criteria and management of patients for robotic procedures vs. conventional procedures. Dedicated time with robotic simulation equipment will allow the student to advance technical skills. A presentation on a topic of interest to the student will be expected upon completion of the course.

**Repeatability:** This course may be repeated for additional credit.

**SURG M773. Transplant Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**SURG M775. Thoracic Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may be repeated for additional credit.

**SURG M777. Trauma Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**SURG M780. General Plastic Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**SURG M783. Cardiothoracic Surgery. 0 Credit Hours.**

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**SURG M789. Cardiothoracic ICU (CT-ICU) - Critical Care. 0 Credit Hours.**

The required critical care course will introduce students to the management of critically ill patients. Students are expected to follow their patients' progress and contribute to their care with supervision. Students will observe and assist as possible in procedures being performed in the ICU. Students will obtain exposure to assisted ventilation, and palliative and end-of-life care.

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in INTM M301, OBGY M320, PEDI M330, PSYM M340, SURG M350, NEUR M370, and FAMP M360.

**SURG M795. Burn ICU (BICU) - Critical Care. 0 Credit Hours.**

The required critical care course will introduce students to the management of critically ill patients. Students are expected to follow their patients' progress and contribute to their care with supervision. Students will observe and assist as possible in procedures being performed in the ICU. Students will obtain exposure to assisted ventilation, palliative and end-of-life care.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of P in INTM M301, OBGY M320, PEDI M330, PSYM M340, SURG M350, NEUR M370, and FAMP M360.

**SURG M799. Surgical Subspecialties. 0 Credit Hours.**

**Course Attributes:** M2

**SURG M870. Surgery Subinternship. 0 Credit Hours.**

**Course Attributes:** M1

**Repeatability:** This course may be repeated for additional credit.

**SURG M982. Minimally Invasive Surgery. 0 Credit Hours.**

The student will be exposed to all aspects of the multidisciplinary care of bariatric patients. This will include preoperative evaluation, operative management, surgical options, inpatient postoperative care, and outpatient follow-up. In addition to bariatric surgery the student will be exposed to all aspects of minimally invasive surgery.

**Course Attributes:** M2

**Repeatability:** This course may not be repeated for additional credits.

## Teaching English to Speakers of Other Languages (TESL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

### **TESL 5611. Applied Language Study I: Phonology and the Lexicon. 3 Credit Hours.**

The purpose of this course is to introduce current and future teachers to the structure of the English phonology and the lexicon and to familiarize them with the key principles of language teaching and diagnostic assessment in these areas. The practicum component of the course gives students an opportunity to apply this theoretical knowledge to practice and to conduct hands-on analysis of an individual learner's pronunciation and vocabulary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **TESL 5612. Applied Language Study II: Grammar, Morphology and Classroom Discourse. 3 Credit Hours.**

The purpose of the course is to introduce current and future teachers to the structure of the English grammar and to the concepts of interactional and narrative competence. The practicum component of the course gives students an opportunity to apply this theoretical knowledge to practice and to conduct hands-on analysis of an individual learner's grammar and discourse.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **TESL 5613. Multilingual Students' Literacy Development. 3 Credit Hours.**

This course focuses specifically on the academic language needed for ELLs to be successful in U.S. schools. The course begins with an emphasis on foundational knowledge of language structures (i.e. English phonology, morphology and syntax) as well as a thorough review of key theories and principles in first and second language acquisition. The course also looks at the particular issues faced by students at different points in their education: elementary, middle and high school and the role of literacy in the content areas. With this, students will understand the complexities of reading and writing development in more than one language.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **TESL 5614. Current Approaches to Teaching English Language Learners. 3 Credit Hours.**

The purpose of this course is to introduce students to the most current methods in teaching English as a second language and English as a foreign language. The course is a hands-on course that provides many practical strategies and ideas for how to teach an effective language lesson. Students will be offered multiple opportunities to apply and reflect upon particular approaches. Course activities include lectures, discussions, small-group activities, and poster writing. Students are expected to write multiple lesson plans and share videotapes of their teaching with their classmates. The emphasis is to start where each student is and take them to the next level of professionalism as a language teacher.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

### **TESL 5615. Teaching English in a Global Context. 3 Credit Hours.**

This course explores language as a social form, focusing on the connections between language, culture, perception and linguistic globalization. Against a sociolinguistic backdrop, the course aims to raise students' consciousness to the political, socio-cultural and ethical aspects of the global spread of English. The topics covered will equip students with the basic, critical concepts needed to examine the pros and cons of the internationalization of English worldwide. At a practical level, students will be guided to reflect on and incorporate these concepts in their approaches to teaching English in the US and abroad. Through readings, discussions, international conversation partners, and reflection assignments, students will (re)conceptualize how English is taught as an international language, problematizing the issues related to "Standard English" and "NES/NNES dichotomy." Individually and collectively, the class will deconstruct notions of "one-size fits all" approach to teaching (i.e. English language as a standardized language) and explore pedagogies that take into consideration multiple varieties of Englishes. From start to finish, students will be encouraged to draw on their own experiences, link theory to practice, and collect resources to support their future careers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 5616. Designing Assessment and Curriculum for Multilingual Students. 3 Credit Hours.**

This course will guide you in understanding and applying principles of curriculum design and teacher-based assessment. Course readings, assignments and class discussions will guide you through thinking about how to best teach English language learners by adapting a curriculum that has been handed to you (i.e. a mandated curriculum), by building upon existing curricula in your instructional setting, or by creating a curriculum from scratch. In this course, curriculum is conceived of as an instructional process which includes planning, instructing and assessing. A foundational idea in this course is that assessment can and should be integrated into instruction. As such, you will learn how to sequence instruction in response to students' performance on a variety of authentic assessments. You will also learn approaches to environment and needs analysis and will experience how these analyses can inform teaching and curriculum design. Toward the end of the course, the Continua of Biliteracy will be used as an organizing framework that will guide you toward taking a critical stance when reflecting upon the curriculum you have created.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 5618. Second Language Development. 3 Credit Hours.**

The purpose of this course is to introduce key concepts in second language acquisition (SLA) and to survey state-of-the-art findings and current debates about linguistic, neurolinguistic, cognitive, affective, and social aspects of second language learning and use. Classroom discussions focus on understanding SLA concepts on linking theories and empirical research to classroom practice. This course serves as a precursor to the Master's comprehensive exam.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 5621. Contexts for Teaching and Learning Language. 3 Credit Hours.**

In this course, we explore sociocultural and political dimensions of language learning and teaching. Learning a language is not a politically neutral enterprise: Who is encouraged to learn a language and who is prevented from accessing linguistic resources are closely related to issues of power. By focusing on sociocultural, political, racial, and economic perspectives, the course emphasizes the interplay between the macro-level relations of power in society and the micro-level experiences of language learners. In other words, we are in the business of taking a critical look at why language learning is encouraged and valued in certain situations while it is discouraged and marginalized in other situations. We will draw on language learning situations both in the U.S. and in international contexts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 5631. Foundations of Language Teaching: Meeting the Needs of English Language Learners. 3 Credit Hours.**

This course offers students an introduction to theory, research and practice in teaching English language learners in the elementary, middle and secondary grades. The course begins with an overview of sociocultural characteristics of ELLs, legal responsibilities, and educational and language policies in the United States. Students will also learn the basic theories and principles associated with second language acquisition. Students will explore the philosophies of bilingual and ESL education as well as different program models that address the education of linguistically diverse students. Students will be introduced to an array of contemporary, research-based instructional approaches, including content-based instruction, task-based language teaching, and sheltered English instruction. As a result, they will gain an understanding of how to adapt standards-based lessons for English language learners. Through a practicum component, students will learn to design lessons and assessments for small-group instruction. Students will also develop cross-cultural competence through interactions with ELLs, teachers and school staff. NOTE: This course is only for students in the Post-Baccalaureate Program, the Graduate Certification Program and the ESL Certificate Program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 5687. Practicum for Teaching English Language Learners. 3 Credit Hours.**

The course serves as a practicum for TESOL Masters students, and involves teaching, observation, reading, and reflection. Students will team-teach for 10 weeks with a mentor teacher in the Intensive English Language Program (IELP) at Temple and meet weekly for a seminar. Specifically, under the leadership of a current IELP teacher, a pair of practicum students attend a minimum of three IELP classes per week and provide varying levels of instructional support. For the first two/three weeks of the semester, the practicum students will shadow the IELP teacher, work with him/her in developing lesson plans and materials, and observe the classes and assist with small group activities. By the fourth week of the semester, the practicum students will team-teach two of the three IELP classes each week. This practicum is designed to provide a sheltered teaching experience, where students can apply what they have learned to a real-world teaching experience. Students will be observed four times throughout the semester by a practicum "coach". This coach will observe, evaluate, and provide useful feedback to maximize students' improvement and growth as ESL teachers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 8625. Applied Linguistics. 3 Credit Hours.**

Applied Linguistics is a 3-credit graduate-level course whose goal is to provide an overview of themes and topics in applied linguistics, to highlight current debates and controversies, and to make students more informed research consumers and better academic writers. Discussions will cover a wide range of areas where applied linguists conduct research on language, including but not limited to advertising, business, economy, education, healthcare, landscape, law, military, politics, and religion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 8626. Second Language Writing. 3 Credit Hours.**

Second Language Writing is a 3-credit graduate-level course that introduces students to the teaching and learning of Second-Language Writing through the exploration of major issues in the theory, research and pedagogy. Students will learn about the scope of Second-Language Writing as a field and engage in theoretical debates about teaching second-language writers and practical responses to these debates. Students will also investigate and reflect upon their own writing processes and products, and will also conduct an investigation of a second-language writer. The course will focus on the social nature of writing as well as the nature of writing as a cognitive process. Additional topics to be studied include revision, intercultural rhetoric, plagiarism and textual borrowing, responding to and assessing student writing, reading-writing connections, and grammar feedback. This course will help students learn how to responsibly address the needs of second language writers in ESL and EFL contexts as well as university-level and K-12 contexts.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 8634. Bilingualism and Bilingual Education. 3 Credit Hours.**

Bilingualism and Bilingual Education is a 3-credit graduate-level course designed to introduce students to a range of perspectives on bilingualism and bilingual education, addressing both psycholinguistic aspects of bilingual development and sociocultural and political dimensions of educating bilingual students. Discussion topics will include: infant bilingualism; family language policy; code-switching; bilingualism and cognition; the impact of bilingualism on individuals' identity; politics of bilingual education; immersion education; heritage language maintenance; third language acquisition, and bilingualism and deaf education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 8635. Educating English Language Learners: State of Knowledge. 3 Credit Hours.**

Educating English Language Learners (ELLs) is a 3-credit graduate-level course designed to critically examine the state of knowledge on ELL education. Discussion topics will include: politics of ELL education, ELLs' oral language development, literacy development, content instruction, assessment, first language maintenance, college access and success, and use of technology in ELL education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 8636. Assessment of English Language Learners. 3 Credit Hours.**

Assessment of English Language Learners is a 3-credit course designed to cover a broad range of language assessment issues. The goal is to provide teachers of English as a second or foreign language with a basic foundation in language assessment issues; the knowledge to be able to critique language assessment instruments currently in use; and the tools to create valid classroom tests that not only reliably measure student achievement and proficiency, but also can serve to help guide instructional decisions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 8643. Research Methods in Applied Linguistics. 3 Credit Hours.**

Research Methods in Applied Linguistics is a 3-credit graduate-level course designed to familiarize students with a representative array of research methods used in the field of applied linguistics. Using concrete examples, the course will introduce students to basic principles of research design and methods of data collection and analysis from a variety of perspectives. Students will also be required to design, conduct, and write up an original research study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**TESL 8644. Current Issues in Applied Linguistics. 3 Credit Hours.**

Current Issues in Applied Linguistics is a 3-credit doctoral-level seminar designed to introduce students to cutting-edge research in the fields of applied linguistics, TESOL, and second/foreign language education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Theater (THTR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**THTR 5012. American Musical Theater. 1 to 3 Credit Hour.**

To obtain advanced understanding of the history, forms and elements of American Musical Theater through study of the developments of the art form and exploration of the most enduring works of the genre.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5121. Musical Theater Dance Techniques. 1 to 3 Credit Hour.**

An intensive study of dance vocabulary, styles, and combinations utilized in auditions and performances for the professional musical theater stage. This course is designed to explore the unique principles and techniques characteristic of Theater Dance, as well as an approach to the audition process, storytelling, characterization, and self-expression through movement. This course also explores the significance and historical/cultural impact of the art form of musical theater, focusing on the choreographic element. Prior dance experience and understanding of the fundamentals of dance technique is required. Students will execute a ballet and jazz based warm-up, conditioning, technical skills, and various combinations drawing from the musical theater repertoire of the 20's through today.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5134. Directing for the Musical Stage. 1 to 4 Credit Hour.**

The focus of this class will be on advancing the student director's skill as pertains to the American Musical Theater repertoire. The course will address the myriad challenges of directing a musical work: including heightened stakes and storytelling techniques, intensified scheduling and management requirements of musical productions, and collaboration with musical directors and choreographers. Students will also apply and enhance acquired skills in script analysis, concept work, staging, working with actors and design elements by applying them to a challenging variety of material from the American Musical Theater.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5211. Speech for the Actor I. 1 Credit Hour.**

In the fall, students concentrate on developing the actor's awareness of speech and articulation patterns. They learn vocal anatomy and the fundamentals of articulation. It is the goal of this class to help the actor have command of the International Phonetic Alphabet in preparation for dialect work and to learn the Detail Model, the Standard American Speech of Edith Skinner and General American English. Through in-class coaching they apply this knowledge to the final poetry performances.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5212. Speech for the Actor II. 2 Credit Hours.**

Students learn the fundamentals of the Detail Model of phonetics and Standard American English. Through in-class monologue and scene coaching, they apply this knowledge to the performance of poems or speeches that are worked on in conjunction with Voice Class. Making use of the "Detail Model." Students are also coached on a Standard-American-dialect-verse piece which is scanned, scored for pitch, length, and emphasis, and worked using Edith Skinner's "Challengers for Actors in Classic Plays". Students are also continually quizzed on the International Phonetic Alphabet.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5221. Acting I. 2 Credit Hours.**

An immersion into the fundamentals of acting technique as influenced by the Stanislavski method. The goal is to reexamine the actors craft in order to develop an effective process for teaching acting to students in Higher Education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5222. Acting II. 2 Credit Hours.**

Acting II is a continuation of the foundational work in Acting I with the introduction of style. The focus in the class will be on working with heightened text such as Shakespeare, the Greeks, Moliere, Restoration, Comedy of Manners, etc.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5231. Vocal Production for the Actor I. 1 to 8 Credit Hour.**

Fall term will focus on self discovery, increasing sensitivity and awareness, and finding release. We will be involved in taking personal inventory. What is our vocal history? What are our patterns of use? Where do we hold tension? How is our breath and physical life supporting or inhibiting our communication? Are there psychological / emotional issues we need to address in order to feel less inhibited in exploring our sound and claiming our own authentic voice? We will evaluate and determine where our present patterns function well and where they need to be replaced with a fuller, healthier, or more efficient way of producing and supporting sound. We will introduce the Fitzmaurice system of deconstructing and structuring.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5232. Vocal Production for the Actor II. 2 to 3 Credit Hours.**

Spring term will continue the work of the previous term. We will continue to explore the journey from breath to voice using a variety of exercises and approaches (including Fitzmaurice voice work). We will be exploring vocal possibilities with and without text. We will address support, balance, tension zones, groundedness, and energy flow as it translates into vocal energy (just how we extend ourselves in communication). We will explore the mind-body relationship of voco-physical experience through Laban concepts and work with chakras.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5241. Dance for the Actor I. 1 to 8 Credit Hour.**

**Movement:** In the fall, students are introduced to the basic principles of the Alexander Technique and begin to apply the Technique to their physical and vocal organization in simple everyday tasks. Students are introduced to kinesthetic awareness of the relationship between the head, neck, back, and pelvis, and its role in the coordination of the acting instrument. The goals of this course are to give actors greater awareness of their vocal and physical habits, to give them a psycho-physical means which they can use to live fully in the present moment, and to provide a method of working actors can use to develop a more coordinated use of their vocal and physical instruments. **Dance:** Modern Dance Technique, Lester Horton and Martha Graham. Actors learn a strong physical warm-up including Pilates. Actors are introduced to improvisation, isolations, and Laban work which culminates in short performance scenes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5242. Dance for the Actor II. 2 to 3 Credit Hours.**

**Movement:** The spring course is a continuation of TH 5241. Students learn to kinesthetically explore and intellectually understand the role of the head, spine, and pelvis in increasingly complex activities. Students explore developmental movement and begin to analyze movement patterns and relate them to basic movements covered in the 1st semester. They also continue to learn how a person's habits of Use correlate with their understanding of how the body works. Students begin to apply the Technique to increasingly athletic activities and to performance. The goal of this class is to prepare students for the vocal and physical work of their 2nd year of training and to further develop a means of working that they can use to improve their performance both on and off the stage. **Dance:** Continue work with Lester Horton. Long Neck and Space combinations. Ballet technique is introduced (Baker center work and space). Period dance is introduced as well (for example, Pavanne, Morris Dance, and Galliard). Strong warm-up technique component continues. Class also addresses Physical Gesture in Shakespeare scenes, Meyerhold and Chekhov projects.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5261. The Job Market. 1 to 3 Credit Hour.**

This class is a study of the business of working in the theater and film at all levels and positions within the entertainment hierarchy and will allow students to understand the nature and structure of arts enterprises. It consists of discussions, paper projects, guest artists, and hands-on opportunities which examine various scenarios involving actors, designers, managers, producers, and administrators to better prepare students for the challenges of a career in the arts. It will explore early career opportunities such as internships, assistantships, fellowships, and entry level positions in the entertainment industry. The course will focus not only on establishing, but maintaining a career in the entertainment industry. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5287. Rehearsal/Performance. 1 to 3 Credit Hour.**

An advanced project-based exploration of musical theater creation. Students will continue developing their thesis projects under faculty mentorship, culminating in a 29-hour-style reading at the end of term. Throughout the semester, students will write and revise their thesis projects with several sharing sessions, individual project feedback sessions, and additional check-ins and mentorship as needed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5288. Rehearsal & Performance. 1 to 3 Credit Hour.**

An advanced project-based exploration of musical theater creation. Students will continue developing their thesis projects under faculty mentorship, culminating in a 29-hour-style reading at the end of term. Throughout the semester, students will write and revise their thesis projects with several sharing sessions, individual project feedback sessions, and additional check-ins and mentorship as needed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5387. Directing Practicum I. 2 to 3 Credit Hours.**

The theory and practice of directing, focusing on short, realistic scenes. Students will study the scene as a structural unit and explore its function within the play.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5388. Directing Practicum II. 2 to 3 Credit Hours.**

The theory and practice of directing, focused on longer scenes of various styles. Students will study the scene as it reflects the values and behaviors of the larger world of the play.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5392. The Business of the Business in Theater. 1 to 4 Credit Hour.**

The Business of the Business in Theater analyzes various management, organization, publicity, marketing, job preparation, casting, and agency techniques and practices as they apply to professionals in the non-profit and commercial theater industries. It offers a foundation for students interested in developing, launching, or advancing innovative enterprises in theater. The course is a study of the business of working in the theater at all levels and positions within the entertainment hierarchy and allows students to understand the nature and structures of arts enterprises. It consists of paper projects, guest artists, and hands-on opportunities that examine various scenarios involving actors, designers, managers, producers, and administrators to better prepare students for the challenges of a career in the arts. It explores early career opportunities such as internships, assistantships, fellowships, and entry level positions in the entertainment industry. The course will focus not only on establishing, but maintaining a career in the entertainment industry.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5487. Musical Theater Practicum I. 1 to 4 Credit Hour.**

An intensive, team-taught practicum that guides directors, composers, lyricists, and book writers to merge their unique artistic visions to create musical theater pieces. Songwriting craft, issues of communication between artists of different disciplines, and storytelling through music and text are emphasized. From character creation and script analysis to collaborating with writers, directors and music directors, students will have the full experience of working on new musical pieces, and will be encouraged to find their own voices and learn to merge their unique artistic visions with those of other collaborative artists to create exciting new work. Class participants work in rotating teams to write and present songs and scenes, exploring song form, dramatic structure, and the process of conceiving longer works.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5587. Musical Theater Practicum II. 1 to 4 Credit Hour.**

This course is a continuation of Musical Theater Practicum I, an intensive, team-taught practicum that guides directors, composers, lyricists and book writers to merge their unique artistic visions to create musical theater pieces. Songwriting craft, issues of communication between artists of different disciplines, and storytelling through music and text are emphasized. From character creation and script analysis to collaborating with writers, directors and music directors, students will have the full experience of working on new musical pieces, and will be encouraged to find their own voices and learn to merge their unique artistic visions with those of other collaborative artists to create exciting new work. Class participants work in rotating teams to write and present songs and scenes, exploring song form, dramatic structure, and the process of conceiving longer works.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5613. History of Decor. 1 to 3 Credit Hour.**

This is a survey course, examining the trends in architecture, furniture, and period motifs and how they can be interpreted in theatrical design. Lectures include discussions of the decorative arts in relation to political and socioeconomic developments. The goal is to give a general understanding and a greater appreciation of the historical periods and how they relate to each other. The successful student will be able to differentiate general periods and have an understanding of the western civilization's historic timeline. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5625. History of Fashion. 1 to 3 Credit Hour.**

This is a survey course, examining the global history of dress from the Ancient Middle East to present day western cultures. The course focuses on what is worn, and why it is worn, correlating socioeconomic, religious and political influences on dress and fashion. The goal is to give a general understanding and a greater appreciation of the historical periods and how they relate to each other. The successful student will be able to differentiate general periods of dress and have an understanding of the western civilization's fashion timeline. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5641. Theatrical Model Making. 1 to 3 Credit Hour.**

Model building skills are used in theatrical design, architecture, interior design and the film and television industry. This is a skills based studio course, with a concentration on skills, and individual progress as opposed to finished design and concept work. Concepts covered include construction materials and techniques; surface finishes and paint techniques; and research duplication. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5713. Design Drafting. 1 to 3 Credit Hour.**

Drafting skills are used in many disciplines within theatrical design. As a communication tool it is essential to theatrical collaboration. This is a skills based studio course, with a concentration on industry standard drafting conventions. Students will gain knowledge in the generation, manipulation and presentation of 2D design and construction drawings. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5741. Design for TV and Film. 1 to 3 Credit Hour.**

This is a design based studio course with highlighted components in research and presentation. Topics covered include the camera; production nomenclature; survival tactics and the market; production visuals; and a brief history of art directors and production design. Major design projects are based in an original film script, multi camera sitcom, and non-fiction informational programming. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5804. Dramaturgy. 1 to 3 Credit Hour.**

This course engages the student in the process of providing comprehensive production dramaturgy to better enhance and support the creative process of mounting and marketing a theatrical production. The first task of the dramaturg is to read the text. This course is a seminar on how to read a play. Through weekly readings and discussion, we will develop and refine criteria for analyzing and understanding a play as well as making judgments about its merits. Readings will consist of theoretical approaches to analyzing a play and samples of scripts to which theory will be applied.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5871. Playwriting I. 1 to 3 Credit Hour.**

This course is designed for the relatively inexperienced playwright and the more experienced who want to improve their craft. It is a workshop based course with the focus on storytelling. The aim is to examine the fundamentals of the writers' craft: theatricality, structure, character, plot, dialogue. We are looking to develop the playwright's "voice."

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5872. Playwriting II. 1 to 3 Credit Hour.**

This course involves the creation of a jointly written work. Team writing techniques are used, and the classes become writing meetings to create weekly "episodes." Writers will rotate being Lead writers, supplying the story lines used at their particular writing session. The over-all story will be developed with character back-stories and settings established in the first two weeks.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5873. Adaptation. 1 to 3 Credit Hour.**

The course is designed to provide experience and techniques to adapt story material from other media. The work is divided into two parts: exercises in theatricality and the potential of language; and work on adapting the individual writer's choice of material. Outside reading will include other writers' material and assigned projects. The course will run as a workshop with in-class readings and discussion. Some Sunday evenings may be required.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5874. Docudrama. 1 to 3 Credit Hour.**

This course is designed to develop playwrights' skills and interest in writing plays based on news events and other factual information. Docudramas, plays based on actual happenings and presented with fidelity to those facts, are in demand for theater, films and television. The ability to research, formulate and complete such works is a significant advantage for writers who want to pursue professional careers.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5875. Poetry As Performance. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5892. Script and Score Analysis. 1 to 4 Credit Hour.**

This course is designed to equip students with a set of tools from which they may draw in the analysis of a musical theater text. Through weekly readings and discussion students will develop and refine criteria for analyzing and understanding musicals as well as making judgments about their merits.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 5893. Lyric Seminar I. 1 to 4 Credit Hour.**

This course offers a writing workshop environment for the study of creating lyrics for a musical theater piece. Instruction focuses on three equally important and interrelated aspects of songwriting: form, theme, and content. Each week, students perform practical exercises and write lyrics to strengthen their songwriting skills. Exercises are designed to broaden rhyming patterns, add specificity and color to songs, and strengthen narrative. Students also study lyrics from established songwriters such as Cole Porter, Ira Gershwin, Oscar Hammerstein and Stephen Sondheim. The course culminates in the presentation of a 12 minute piece written by the student.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 5894. Lyric Seminar II. 1 to 4 Credit Hour.**

This course builds on the foundational practices and principles learned and developed in Lyric Seminar I. Musical Theater is an integral and ever-changing part of the American culture. Its ambiguous relationship--or lack thereof--with the "popular music" of the day has caused a detachment between writers and audiences. This course encourages the aspiring writers to seek new directions in the writing of musical theater. The students will examine classic and contemporary examples of musical theater pieces, as well as works from other genres, and proceed to write their own scenes and lyrics. They will also become familiar with various musical styles and learn to communicate with future collaborators.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B in THTR 5893.

**THTR 8001. Seminar in Dramatic Literature. 2 to 3 Credit Hours.**

A comprehensive study of the literature, criticism, and history of Western theater from the ancient Greeks to the end of the French neo-Classic period. Note: Required of all M.F.A. candidates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8002. Seminar in Dramatic Literature. 2 to 3 Credit Hours.**

A comprehensive study of the literature, criticism, and history of Western theater from the Restoration period to the present. Note: Required of all M.F.A. candidates.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8101. Stagecraft for Teachers. 3 Credit Hours.**

Stagecraft is the study of technical theater and introduces students to a practical approach to technical and production aspects of live theater. This course will introduce students, both novice and experienced, to a practical approach in both technical and production aspects of theater. Students learn the skills needed to construct scenery, hang and focus lighting instruments, and implement a sound system. Students are trained in the usage of tools, lumber, and equipment. Emphasis will be on the application of this technical knowledge into the classrooms of the educators taking the class and all lessons are geared towards teaching teachers how to teach technical theater.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8102. Acting 1 for Teachers. 3 Credit Hours.**

The actor explores techniques in relaxation, improvisation, and concentration using Uta Hagen's Basic Object exercises as a foundation. These techniques will be applied to one scene and one monologue taken from contemporary American dramatic literature. This course is geared towards K-12 teachers who will take the knowledge back to their classrooms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8103. Introduction to the Director's Art for Teachers. 3 Credit Hours.**

In this class, students will undertake a comprehensive study of the director's role as a storyteller - the directing process from preparation to performance. The course will cover Script Analysis - developing a directorial approach to the material based on reading, research, as well as text and character analysis; the Tools of the Trade - the craft fundamentals of staging, working with actors in the rehearsal process; process of casting, design, tech and production; Exercises and Scenes - the study, exploration and practical application of the above through in-class exercises, presented scene work and written analysis. The class will discuss how to apply all of these basics back into the school setting of the teachers taking the course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8104. Methods of Teaching Theater for Teachers. 3 Credit Hours.**

The course will guide those pursuing the Theater Education Certificate, or MA in Theater Instruction, or the Endorsement for grades K-12, to the theory and practice of teaching artistry. In addition to gaining practical method and techniques, students will also gain an understanding of the teacher-student dynamic in the classroom and the culture of educational settings. This course will prepare students to work as effective and thoughtful teachers in partnership with classroom teachers. An exploration of the theory and practice of teaching artistry, students will examine how to engage young people, in partnership with a classroom teacher, in and through theater. A hands-on course (though online), students will acquire practical methods, strategies, and a repertoire of exercises, through which theater can be used as a teaching and learning tool in both the K-6 and 7-12 classroom settings. Throughout the course, students will apply and dissect the methods learned, in their Temple online classroom and in their own or others' observed classrooms. Students will learn from each other through observation and discussion of the Teaching Artist methods implemented in class. The course will explore what the Association of Teaching Artists and others have identified as essential skills and capacities.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8105. Stage Management for Teachers. 3 Credit Hours.**

In most levels of theater there are few opportunities to learn the all important skills of the Stage Manager. Most new stage managers move through their performances and duties using improvisation, trying to carry out their duties by trial and error. This course will provide a sheltered environment for students to acquire the knowledge and skills necessary to become a competent stage manager. Most importantly this course will teach teachers how to teach stage management to their students. Organization, delegation, scheduling, and personnel management are some of many of the skills discussed. After completion one should be able to successfully stage management a theater production and pass along this knowledge to their own classrooms. Additionally, this course will demonstrate to students how to teach these fundamental concepts to future teachers in the Theater Education 4+1 program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8106. World of the Play for Teachers. 3 Credit Hours.**

World of the Play for Teachers is intended to provide an overview of the dramaturgical research process, which includes providing research materials for a cast, the creative team, and for publicity/marketing purposes. Included will be approaches to creating engagement for artists, audiences and educational purposes. For those pursuing the Theater Education M.A., lectures and information will be geared towards how to take the objectives and outcomes of this course and apply it to your school setting. For each project, anyone in the MA Theater Education Program will be required to add that slant to your papers and projects - the angle of teaching others the lessons you have just learned.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8107. Acting II for Teachers. 3 Credit Hours.**

Through scene work and in-class exercises, students will further explore releasing impulses as well as bettering their application of circumstances, objectives, and actions to a character. Students will participate in various exercises (Talking & Listening, Objective/Obstacle, Personalization), will create a personal warm-up, will score their scripts, and will perform two different scene presentations. In addition, there will be work with advanced solo exercises, intended to further cement the truthful foundation of acting. The course will also focus on how drama and theater teachers can utilize and synthesize this information in applying it to their own classrooms, with their own students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8108. Directing for the Musical Stage for Teachers. 3 Credit Hours.**

Directing for the Musical Stage for Teachers provides instruction, mentorship, and practice in the art of directing musical theater. Students examine the myriad complexities of directing musicals: multiple-artist-collaboration, large cast management and scheduling, and musical knowledge essential for interpretation of scores and libretti. Most importantly, the course offers information, planning, and pedagogy for the M.A. Theater Education students to take back to their own classrooms...teaching theater teachers how to teach theater.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8109. Introduction to Design for Teachers. 3 Credit Hours.**

The objective of Introduction to Design is to introduce the principles of theatrical design through lecture, discussion and practical work. At the conclusion of the course, students should gain a basic understanding of scenic, lighting, sound, and costume design and the processes involved - as applied to the theater. Topics covered include Script Analysis for Design; the Elements of Design and Principles of Composition; The Design Process; along with the Techniques of Visual Communication and Presentation. Students will be able to use the skills and vernacular of theater design in the planning and implementation of their own classrooms in the school system settings. Essentially...teaching teachers how to teach theater design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8111. Welcome Backstage for Teachers. 3 Credit Hours.**

This class will acquaint teachers with the world of technical theater and provide a working understanding of theater as a collaborative art. Through lectures, class discussions, online activities, projects, written work, online content, and more you will be introduced to the concepts of scenery design and construction, costumes, props, lighting, sound and stage management - and how they all work together to create a unified theatrical production. Additionally, this course will focus on not only the skills, but how to translate those skills back to your classrooms, shops, and stages - anywhere you work with students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8211. Speech for the Actor III. 1 to 3 Credit Hour.**

Exploration and study of dialects and accents for use in stage productions. Initial emphasis for each dialect will be on the use of the International Phonetic Alphabet for dialect transcription. Then special attention is placed on gaining comfort and ease in the dialects through conversation and improvisation. The class will consist of regular presentation and performance of scripted material using each of the selected dialects. Dialects to be studied and reviewed include: Irish, French, South African, Spanish, and Italian and one North American (or otherwise new world dialect of students choosing). There is a final project where dialect accusation and interview skills will be put to the test.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8212. Speech for the Actor IV. 1 to 3 Credit Hour.**

Begin work on dialect acquisition and learn Standard British as well as a non-coastal southern US dialect. The goal is that the dialect work will culminate in performances, (in collaboration with the Graduate Acting Class), of dialect plays. Also, throughout the semester, they will continue work on standard speech by applying it to a poetry-in-performance project that will be work-shopped in class. As a capstone for this year's work, actors choose a dialect that they research, master and teach to the class; they also apply it to a monologue that will be performed in Friday Scenes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8221. Acting III. 3 Credit Hours.**

Text: Explore different playwrights, focusing on texts that challenge the actor in style, period, class, character, movement, and language. Research literature and the historical context and physical world of the period using exercises and scene work from plays by Tennessee Williams and Eugene O'Neill. Through improvisation and in small group projects, gain a deeper appreciation for the relationship with the audience and one's own body's capacity for expression.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8222. Acting IV. 1 to 3 Credit Hour.**

Text: Explore different playwrights, focusing on texts that challenge the actor in style, period, class, character, movement, and language. Research literature and the historical context and physical world of the period to find appropriate movement to reveal characters' psychological impulses. Technique: Introduce Chekhov Technique. Scene work is from plays by Anton Chekhov. Shakespeare: Continue increased emphasis on the physical dimension through explorations with Laban and focus on discovering the muscularity and musicality of the language, images, and movement impulses in the text. Continue to develop and refine a feeling for Shakespeare with an awareness of sound and rhythm in relation to meaning and emotion and how that translates into action.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8231. Vocal Production for the Actor III. 2 to 3 Credit Hours.**

Focus on structuring the voice while maintaining the relaxation and centeredness acquired in the destructuring. Structuring employs rib-reserve and abdominal support. Application of this technique to Shakespeare monologues.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8232. Vocal Production for the Actor IV. 1 to 3 Credit Hour.**

Focus on structuring the voice while maintaining the relaxation and centeredness acquired in the destructuring. Structuring employs rib-reserve and abdominal support. Application of this technique to Shakespeare scenes.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8241. Dance for the Actor III. 2 to 4 Credit Hours.**

Movement: In the fall, students apply the principles of the Alexander Technique to vocal work. Students explore the relationship between the use of their Primary control and vocal resonance, breathing, and emotional availability. Students will apply the Alexander Technique to the whispered "ah", vocal exercises, singing, and monologues. The goal of this class is to help actors become aware of the role that their overall physical use plays in their vocal expression and to give them a means whereby they can work towards vocal health and expressiveness. Dance: The first half of the class period alternates weekly between Modern and Ballet. The second half of the class addresses such social steps as the Polka, Mazurka, waltz, Tango, and Fox Trot. Stage Combat: This course focuses on familiarizing students with the essential requirements for performing safe, effective stage combat. Students train in the foundation skills of stage combat techniques: Unarmed and knife.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8242. Dance for the Actor IV. 1 to 3 Credit Hour.**

Movement: In the spring, the course centers on characterization - on doing the "incorrect thing correctly." Through out-of-class observation and analysis as well as in-class investigation and scene work, students apply what they have learned in previous years to the exploration of characters with age, disabilities, and other physical challenges. The goal of this course is to teach actors how to keep their instruments healthy and working at their best when presented with a challenging role. Dance: The first half of the class period alternates weekly between Modern and Ballet. The second half of the class is devoted to Tap: time steps, soft shoe, buck and wing, and fast foot coordination. Stage Combat: Introduction of additional weapon styles: Rapier, Dagger and Broadsword. The performer receives a well-rounded approach to each style. At the conclusion of the course, students will have the opportunity to take the "Skills Proficiency Tests" toward official SAFD recognition in stage combat skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8321. Costume Production. 1 to 3 Credit Hour.**

This course is an introduction to the process of costume construction from the designer's sketch to the finished garment. This course will cover basic skills necessary to construct a garment and create costume props and accessories. Sewing skills, fabric identification and basic pattern layout are some of the topics included. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8421. Drawing and Rendering for the Theater I. 1 to 3 Credit Hour.**

This course is a skills based studio class, with a concentration on skills and individual progress as opposed to finished design work. The course covers dry and wet media as a basis for further study of presentation and communication techniques in all disciplines of theatrical design. Included media - pencil, charcoal, pen and ink, watercolor, gouache and acrylic. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8422. Drawing and Rendering for the Theater II. 1 to 3 Credit Hour.**

This course is a skills based studio class in digital and digital/hand combinations techniques. There will be a concentration on skills and individual progress as opposed to finished design work. The digital environments of Photoshop, Illustrator and SketchUp will be explored along with how those programs can be combined with analog drawing and painting techniques. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8431. Scene Painting I. 1 to 3 Credit Hour.**

The goal of this course is to provide the student with a basic knowledge of scenic painting techniques, including styles, tools and nomenclature. These goals will be achieved through demonstration and practical "hands-on" painting projects. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8432. Scene Painting II. 1 to 3 Credit Hour.**

This course is a continuation of Scene Painting I. Techniques and concepts that were introduced will be explored in more detail. Concentration is on intermediate techniques and the execution and accurate use of paint elevations. Assignments are more individualized and the student must be self-motivated in carrying out the assignments. As in Scene Painting I, the goals will be achieved through practical "hands-on" painting projects. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8482. Projects in Technical Production. 1 to 8 Credit Hour.**

A practicum course to provide a grading source for graduate production work. Work will be evaluated in the following general areas: professional practice, artistic growth, communication, and collaboration. The faculty will also be asking for a self-evaluation of your project, in written form, due at a date to be determined by the Design and Production faculty. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8511. Lighting Design II. 1 to 3 Credit Hour.**

To provide a clear understanding and strong basis of language analysis and its application in lighting design. Various techniques in text interpretation will be used and explored. These techniques will then be used to the design process. There will also be a research project in the direct application of contemporary scientific developments. Throughout this course, the design process for the current Temple productions will continually be examined. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8521. Lighting Design III. 1 to 3 Credit Hour.**

To provide a clear understanding and strong basis of language analysis and its application in lighting design. Various techniques in text interpretation will be used and explored. These techniques will then be used to the design process. There will also be a research project in the direct application of contemporary scientific developments. Throughout this course, the design process for the current Temple productions will continually be examined. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8611. Costume Design II. 1 to 3 Credit Hour.**

The goal of Costume Design II is to develop skills leading to a profession in the field of costume design for the performing arts (theater, television, film, opera, dance, etc.) or entertainment industry. Advanced projects in script analysis, character development, primary and secondary research as well as real-world problem solving. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8621. Costume Design III. 1 to 3 Credit Hour.**

The goal of Costume Design III is to continue development of skills leading to a profession in the field of costume design for the performing arts (theater, television, film, opera, dance, etc.) or entertainment industry. Advanced projects in script analysis, character development, primary and secondary research as well as real-world problem solving. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8622. Draping and Flat Pattern Drafting I. 1 to 3 Credit Hour.**

To develop skills in drafting flat patterns using slopers, draping on a dress form, individual measurements and pattern resources. Pattern making skills will focus on historic patterns and fabrics and the development of period costumes for theatrical use. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8623. Costume Crafts. 1 to 3 Credit Hour.**

This class covers materials techniques and alternative applications used in creating costume pieces that are crafted rather than sewn. Projects will include mask making, millinery and other costume accessories used in theatrical productions. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8624. Draping and Flat Pattern Drafting 2. 1 to 3 Credit Hour.**

This course entails advance flat pattern drafting and draping techniques needed to construct period garments for theatrical productions. The focus of the projects will be on period men's garments, tailoring techniques and advance pattern drafting. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in THTR 8621.

**THTR 8641. Theatrical Makeup. 1 to 3 Credit Hour.**

The course is designed to give to students an overview of basic makeup techniques with the hands-on opportunity to learn and apply the principles of standard and character stage makeup. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8682. Projects in Costuming. 1 to 8 Credit Hour.**

A practicum course to provide a grading source for graduate production work. Work will be evaluated in the following general areas: professional practice, artistic growth, communication, and collaboration. The faculty will also be asking for a self-evaluation of your project, in written form, due at a date to be determined by the Design and Production faculty. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8711. Scene Design II. 1 to 6 Credit Hour.**

This is a skills/activity course in the theory, process, and techniques of scenic design for the theater. Topics will include principles, elements, and concepts of design; script analysis; design concept development; creative research and its interpretation; and the communication and presentation of theatrical ideas. Specific projects, lectures and discussions, followed by student presentation and response will structure the course. Projects and presentations will include: scenic plots, research, thumbnails, sketches, ground plans, elevations, color renderings and models. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8721. Scene Design III. 1 to 3 Credit Hour.**

This is a skills/activity course in the theory, process, and techniques of scenic design for the theater. Topics will include principles, elements, and concepts of design; script analysis; design concept development; creative research and its interpretation; and the communication and presentation of theatrical ideas. Specific projects, lectures and discussions, followed by student presentation and response will structure the course. Projects and presentations will include: scenic plots, research, thumbnails, sketches, ground plans, elevations, color renderings and models. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8881. Playwriting III. 1 to 3 Credit Hour.**

Writers and Directors. This course explores the relationships between writers and directors in the creation of new work. The aim is to create the most fruitful collaborative experience so that the writer can complete work influenced by staging possibilities, and the director can understand more fully the nuances of original texts. Mounting scenes and creating practical circumstances for writers and directors will be the primary methods for exploring this essential relationship.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8882. Playwriting IV. 1 to 3 Credit Hour.**

This course examines and develops techniques for creating solo performance works, works intended to be done by the writer or by actors. The work of such early solo artists as Spalding Gray, Eric Bogosian, Anna Deveare Smith, Laurie Anderson and Karen Finley will be discussed as well as contemporary artists. Course will culminate in a solo performance night.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8883. Teaching Playwriting. 3 Credit Hours.**

In the third year of the program, the playwright will teach classes or all of a playwriting course, preparing syllabi and daily lesson plans. The mentor will visit classes and examine the work produced.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 8983. Vocal Arranging. 1 to 4 Credit Hour.**

Vocal Arranging is designed for students who want to write vocal charts for the musical theater stage and music industry professionals that are easy to understand, cleanly written, plot driven, and musically satisfying. Through guided study using demonstrations, audio clips, and writing exercises, the course explores how to write for a variety of vocal ranges and timbres and how to create interest by utilizing numerous arranging tools. The course starts by introducing the basic concepts of vocal writing—how singers use their voices and what they need from writers, in addition to proper notation and setting of text to music. Analysis of "successful" vocal arrangements from a variety of arrangers past and present will be emphasized as well as writing projects. The course then explores how to create rich textures through 2-, 3-, and 4-part background harmonies, increasing in complexity. You will also study a capella writing, stressing the importance of constantly changing texture to maintain interest. Each week, you will have the opportunity to rehearse and record your own arrangements, thereby hearing what you've created.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8984. Music Direction for the Musical Theater Stage. 1 to 4 Credit Hour.**

Study of the practical skills needed to prepare the student musical director to work in a professional musical theater environment. Songs and scenes from standard musical repertoire will be analyzed. Special attention will be given to unique challenges of the musical theater: stylistic interpretation, vocal technique and ornamentation as it applies to the stage, the creative realizing of vocal and orchestral arrangements, playing rehearsals, coaching singers, working with directors and choreographers, and aspects of sound design and amplification. Participants will use the latest technology to receive hands on training in the management and implementation of the musical theater audition, rehearsal, and production processes. Lectures will also be given by industry experts on pertinent subjects relating to real-world success in the field of music direction.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 8985. Teach in Higher Education. 3 Credit Hours.**

This is a course in pedagogy that is designed to expose graduate students to "best teaching practices" in Higher Education. Successful completion of the course results in a certificate from Temple University verifying that the student has successfully prepared to teach on the college level.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 9001. Lyrics/Book Seminar I. 1 to 4 Credit Hour.**

This course focuses on developing the framework of a musical theater piece. The workshop discussion includes the basic book and lyric writing techniques: plot structure, story development and adaptation, as well as song forms (pop, musical theater, etc.) and how to musicalize scenes. Writers will also be encouraged to explore the collaborative process and develop ideas for original musicals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9002. Lyrics/Book Seminar II. 1 to 4 Credit Hour.**

This course continues the work of Lyrics/Book Seminar I, focusing on developing the framework of a musical theater piece. The class expands on foundational studies in book and lyric writing techniques: plot structure, story development and adaptation, as well as song forms (pop, musical theater, etc.) and how to musicalize scenes. Writers continue to explore the collaborative process and develop ideas for original musicals.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9085. Theater Internship. 1 to 6 Credit Hour.**

This course offers hands-on, organized, professional work under supervision in a professional theater or a leader in the entertainment industry. Permission of the instructor is necessary and course registration must occur prior to actual internship work. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 9087. Graduate Ensemble Practicum. 1 Credit Hour.**

This course provides a forum for creating ensemble across the Theater MFA cohort. Its purpose is to generate relationships and networking opportunities as well as dissolving barriers between disciplines. Course work will include in-class projects, round table discussion, production presentations and professional guests on subjects appropriate to the success of a working artist. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9211. Speech for the Actor V. 1 to 3 Credit Hour.**

In the third year, speech class is devoted to tutorials. Students meet with the professor and decide on a course of study that fits their area of specialization and emphasis. Each student meets on a weekly basis for at least one half-hour. During these sessions, any persistent speech problems the student has may be addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9212. Speech for the Actor VI. 1 to 3 Credit Hour.**

Ongoing tutorials in student and teacher-driven projects. As a capstone for this year, actors will focus on a topic in speech as it applies to their final main stage performance. A final written evaluation and score of the text will serve as documentation of their work.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9221. Acting V. 1 to 3 Credit Hour.**

Acting V focuses on acting work in front of the camera - both as a way of learning how to successfully transition acting skills to mediated dramatic material and as a way of examining the work as seen through the lens of the camera.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9222. Acting VI. 1 to 3 Credit Hour.**

Acting VI is the culmination of the graduate acting sequence and will focus on projects such as serialized dramatic material, or generative projects in partner with the graduate directing program. The work will be highly collaborative and will culminate in a final project.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9231. Vocal Production for the Actor V. 2 to 3 Credit Hours.**

Research a major voice technique through careful study of one text. Prepare a presentation of the main thesis as well as a sequence of exercises that most clearly exemplifies the method and is most useful for the vocal development of the actor. Continue work on individual vocal development through private tutorials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9232. Vocal Production for the Actor VI. 1 to 3 Credit Hour.**

Discussion of methods and presentation of workshops by those who have elected a vocal emphasis. Continue work on individual vocal development through private tutorials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9241. Dance for the Actor V. 1 to 3 Credit Hour.**

**Movement:** The fall semester concentrates on a broader view of kinesthetically-based methods of working with oneself, with the primary focus being the relationship between the Alexander Technique and the Feldenkrais Method. Through Awareness, Movement and Functional Integration students will delve into their personal movement patterns from a different perspective. The goal of this course is to provide a perspective on how to use their Alexander training when presented with other movement modalities. **Dance:** Projects involving movement and dance will be conceived and coached. Also, individual attention to those students for whom this area is their craft emphasis. **Stage Combat:** Students continue in new weapon styles: Single sword, Small Sword and Quarterstaff. Again, at the conclusion of the class, students will have the opportunity to take the "Skills Proficiency Tests" toward official SAFD recognition in advanced stage combat skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9242. Dance for the Actor VI. 1 to 3 Credit Hour.**

**Movement:** In the spring, the course will be treated as a studio class with students receiving multiple private lessons and presenting scenes and monologues in class. The goal of this class is focus in depth on each student's individual vocal and physical needs and to give them opportunities to perform using the skills they are working on in front of an audience that can give informed feedback. **Dance:** Projects involving movement and dance will be conceived and coached. Also, individual attention to those students for whom this area is their craft emphasis. **Stage Combat:** Students will have the opportunity to continue their training by assisting in teaching an undergraduate combat class or by pursuing a special topic as their craft emphasis. The craft emphasis will culminate in a performance or workshop, incorporating stage combat skills.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9251. Acting for the Camera. 1 to 3 Credit Hour.**

The study of acting techniques as applied to film, soap operas, prime-time dramas, prime-time situation comedies, commercials and industrials.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9282. Project in Acting. 1 to 4 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9283. Projects in Acting. 1 to 8 Credit Hour.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9382. Projects in Directing I. 1 to 4 Credit Hour.**

The course is offered each year on a tutorial basis and may be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9383. Projects in Directing II. 1 to 4 Credit Hour.**

The course is offered each year on a tutorial basis and may be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9387. Directing Practicum III. 1 to 3 Credit Hour.**

The theory and practice of directing, focusing on specific genre scenes. Students will study the scene as a means of exploring the work of challenging playwrights.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9388. Directing Practicum IV. 1 to 4 Credit Hour.**

The theory and practice of directing, focusing on specific genre scenes. Students will study the scene as a vehicle for developing stylistic or methodological approaches to directing.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9411. Seminar in Technical Production I. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9421. Seminar in Technical Production II. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9483. Projects in Technical Production. 1 to 8 Credit Hour.**

A practicum course to provide a grading source for graduate production work. Work will be evaluated in the following general areas: professional practice, artistic growth, communication, and collaboration. The faculty will also be asking for a self-evaluation of your project, in written form, due at a date to be determined by the Design and Production faculty. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9487. Musical Theater Practicum III. 1 to 4 Credit Hour.**

This course is a continuation of Musical Theater Practicum II, an intensive, team-taught practicum that guides directors, composers, lyricists, and book writers to merge their unique artistic visions to create musical theater pieces. Songwriting craft, issues of communication between artists of different disciplines, and storytelling through music and text are emphasized. From character creation and script analysis to collaborating with writers, directors and music directors, students will have the full experience of working on new musical pieces, and will be encouraged to find their own voices and learn to merge their unique artistic visions with those of other collaborative artists to create exciting new work. Class participants work in rotating teams to write and present songs and scenes, exploring song form, dramatic structure, and the process of conceiving longer works.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 9511. Seminar in Lighting I. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9521. Seminar in Lighting II. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9582. Projects in Lighting. 1 to 8 Credit Hour.**

A practicum course to provide a grading source for graduate production work. Work will be evaluated in the following general areas: professional practice, artistic growth, communication, and collaboration. The faculty will also be asking for a self-evaluation of your project, in written form, due at a date to be determined by the Design and Production faculty. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9587. Musical Theater Practicum IV. 1 to 4 Credit Hour.**

This course is a continuation of Musical Theater Practicum III, an intensive, team-taught practicum that guides directors, composers, lyricists, and book writers to merge their unique artistic visions to create musical theater pieces. Songwriting craft, issues of communication between artists of different disciplines, and storytelling through music and text are emphasized. From character creation and script analysis to collaborating with writers, directors and music directors, students will have the full experience of working on new musical pieces, and will be encouraged to find their own voices and learn to merge their unique artistic visions with those of other collaborative artists to create exciting new work. Class participants work in rotating teams to write and present songs and scenes, exploring song form, dramatic structure, and the process of conceiving longer works.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THTR 9611. Seminar in Costumes. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9621. Seminar in Costumes II. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9682. Projects in Costuming. 1 to 8 Credit Hour.**

A practicum course to provide a grading source for graduate production work. Work will be evaluated in the following general areas: professional practice, artistic growth, communication, and collaboration. The faculty will also be asking for a self-evaluation of your project, in written form, due at a date to be determined by the Design and Production faculty. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9711. Seminar in Scenery. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9721. Seminar in Scenery II. 1 to 6 Credit Hour.**

A variable topic production course covering subjects not found in other courses. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9782. Projects in Scene Design. 1 to 8 Credit Hour.**

A practicum course to provide a grading source for graduate production work. Work will be evaluated in the following general areas: professional practice, artistic growth, communication, and collaboration. The faculty will also be asking for a self-evaluation of your project, in written form, due at a date to be determined by the Design and Production faculty. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9882. Projects in Playwriting. 1 to 6 Credit Hour.**

Working with a mentor on an ongoing project. The course is offered each year on a tutorial basis and may be repeated for credit.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9982. Projects in Playwriting. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9991. Research. 1 to 4 Credit Hour.**

A research project and written documentation may be required of all MFA Design candidates at some point during their three year program. Subject and format to be determined by the candidate and their mentor. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THTR 9995. Thesis. 1 to 8 Credit Hour.**

A thesis project and written documentation is required of all MFA Design candidates. The candidate will create a thesis committee to preside over their defense and approval of the written document. *All Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This design and production work is an extension of what is presented in the classroom and an experiential component to the degree program.*

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Therapeutic Recreation (THRC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**THRC 5009. Entrepreneurship in the Health Professions. 3 Credit Hours.**

This course is designed to introduce students to entrepreneurship. The goal of the course is to demonstrate the links between knowledge, experience and skills and commercial possibilities. The course integrates a number of different disciplines, ranging from sociology and psychology to economics, finance, marketing and human resource management. Through assigned readings, class discussions, activities and guest lectures from various professional fields, students will be challenged to apply theoretical principles, concepts and frameworks to real world situations.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5101. Health, Activity and Aging. 3 Credit Hours.**

This course provides an interdisciplinary lifespan-oriented overview of the aging process, with an emphasis on its interrelationships with health and activity. Particular emphasis is given to the roles of leisure, health, activity, and environment in promoting health and well-being, as well as accommodations that may be necessary to maintain the health and well-being of older adults. Given the diversity of aging populations, topics such as gender, ethnicity, and lifelong disabilities are also addressed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5102. Orientation TR. 2 to 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5204. Recreation Therapy and Assistive Technology. 3 Credit Hours.**

This course introduces students to the role of assistive technology (AT) in promoting the full inclusion and community participation of persons with disabilities. Emphasis is placed on the AT devices and services that promote functional independence and participation in the community and in physically and socially active recreation and leisure.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5205. RT Geriatric Services. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5211. Rec Th & Phys Rehab. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5212. Play and Development. 3 Credit Hours.**

This blended course (i.e., online and classroom) explores the theoretical and practical dimensions of play and the dynamic relationship between child's play and development. The course examines the intersection of gender, race/ethnicity, culture, community, media, and technology with play and development. Topics include play of typically and atypically developing children, assessing play behaviors, designing multipurpose play environments, and current efforts to reinvigorate the culture of play in children development. NOTE: Undergraduates may register for this course with permission of the instructor. Also, previous coursework in developmental psychology, child/adolescent psychology, or lifespan/human development is suggested.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5213. Therapeutic Play, Recreation and Children's Health. 3 Credit Hours.**

This course examines the range of organized and structured play and recreation services used by recreation therapists to promote health, well-being, and social inclusion of children. The course examines developmental and psychosocial needs resulting from trauma, abuse, chronic illnesses, and other disabling conditions, and the use of play and recreation modalities to promote resiliency, recovery and hope within myriad service settings including hospitals, residential treatment centers, schools, camps, and municipal recreation departments. NOTE: Undergraduates may register for this course with permission of the instructor. Also, previous coursework in developmental psychology, child/adolescent psychology or lifespan/human development is suggested.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5214. Child Life Interventions. 3 Credit Hours.**

This course examines Foundation of Child Life practice, including theories and methods used to reduce stress and increase child/family abilities to cope with illness and hospitalization. The course includes rationale and evidence for interventions related to techniques to prepare children for medical procedures, pain management, coping skills, family-centered care, and bereavement support. Students learn about credentialing requirements for Child Life Specialists, and are required to engage in field-based experiential learning. NOTE: Undergraduates may register for this course with permission of the instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5243. Managing Dementia Care. 3 Credit Hours.**

Utilizing a person-centered and interdisciplinary approach, the course explores the strategies for assisting practitioners, agencies, families and caregivers with balancing the needs and behaviors of the individual with dementia, and the social and physical environments in which the person with dementia is placed. Students will apply fundamental principles for the design and evaluation of activity-based, psychosocial programs for this population. Models for managing problem behaviors while respecting the needs of the client will be explored. This course seeks to emphasize the importance of interdisciplinary support and is therefore appropriate for students of healthcare disciplines that utilize an activity-based approach. NOTE: Prior courses in lifespan/human development and anatomy are suggested. Undergraduates may enroll with permission of instructor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5250. Special Topics in TR Practicum. 1 to 3 Credit Hour.**

Contemporary issues related to new methods and areas of TR practice, including assistive technology, TR in school settings, home health care, and community leisure programs for individuals with disabilities are covered.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THRC 5261. Therapeutic Recreation and Disabilities Seminar I. 3 Credit Hours.**

This seminar combines literature research on issues associated with mental health, developmental disabilities, or aging, with individual/small group conferences to integrate findings with related course content. Students complete an issues paper that synthesizes research literature and any other structured learning activities, and draws implications for Therapeutic Recreation practice. Findings are also presented to undergraduates as part of a concurrent undergraduate course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5271. Therapeutic Recreation and Disabilities Seminar II. 3 Credit Hours.**

This seminar combines literature research on issues associated with physical rehabilitation, pediatrics, or long-term care, with individual/small group conferences to integrate findings with related course content. Students complete an issues paper that synthesizes research literature and any other structured learning activities, and draws implications for Therapeutic Recreation practice. Findings are also presented to undergraduates as part of a concurrent undergraduate course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5301. Evidence Based Practice in Recreation Therapy I. 1 Credit Hour.**

This course will introduce students to evidence based practice in recreation therapy. Students will develop a critical understanding of how evidence is generated, retrieved, and appraised. They will become knowledgeable about the relevance of research findings for clinical decision-making in recreation therapy (RT) practice. Students will develop skills at synthesizing and presenting evidence to support or challenge current RT issues/practices for particular diagnostic groups or interventions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5302. Evidence Based Practice in Recreation Therapy II. 2 to 3 Credit Hours.**

This course will introduce students to the practitioner-researcher role by building upon prior knowledge attained in THRC 5301 Evidence Based Practice in Recreation Therapy I. This course supports the use of research knowledge in making practice decisions that improve the delivery of recreational therapy interventions. It serves as a springboard for the student's Master's project.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Recreation Therapy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5311. Conceptual and Contemporary Issues in Therapeutic Recreation. 3 Credit Hours.**

This course examines conceptual, theoretical, and practical issues associated with the organization and delivery of TR services. It uses a combination of lectures, readings, and oral and written exercises through which students reflect on and develop informed positions on core values and beliefs that support the profession. Students develop a plan of action for ongoing professional development during the academic program and beyond.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5312. Leisure, Health, and Life Quality. 3 Credit Hours.**

The purpose of this course is to explore the dominant concepts and theories related to recreation and leisure behaviors and experiences, and their linkages to health, wellness, and life quality. Current research describing the interrelationships between leisure and health/life quality are examined, including the topics of disability and diversity issues such as culture, gender, race/ethnicity, class, age/lifespan, and sexual orientation. The interlinking triads among theory/conceptualizations, research, and practice are emphasized.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5382. Independent Study. 1 to 6 Credit Hour.**

This supervised project is structured between the student and a faculty mentor. Projects may include developing a research proposal, conducting a field-based investigation, or developing and evaluating a program. Registering for this course requires prior permission from a faculty mentor. A mutually agreeable study contract must be secured before the end of the second week of the semester.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THRC 5402. Recreation Therapy Administration and Management. 3 Credit Hours.**

This course examines program, personnel, fiscal, and facilities management, including professional standards of practice and accreditation standards that guide and regulate organization and delivery of Therapeutic Recreation services in health care and human services settings. The course may involve applied learning experiences in area agencies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5442. Clinical Programming and Practice in Therapeutic Recreation. 3 Credit Hours.**

The course examines the dynamics of recreational and other activity-based interventions used for health promotion and psychosocial adaptation. It focuses on group program design and implementation, client motivation, and leadership skills. The course includes field-based application.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Recreation Therapy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 5787. Therapeutic Recreation Practicum. 3 to 9 Credit Hours.**

Field placement is made with emphasis on acquisition and application of practical skills. For non-certified students, this 4 to 6 credit practicum is designed to meet eligibility requirements for the NCTRC credentialing examination. For currently certified students, the 3-credit practicum is designed as an advanced clinical or administrative placement.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Science.

**College Restrictions:** Must be enrolled in one of the following Colleges: College of Public Health.

**Repeatability:** This course may be repeated for additional credit.

**THRC 8133. Family Centered Care. 3 Credit Hours.**

Recent legislative, professional, demographic, and social changes have expanded traditional approaches of delivery of health services to incorporate the family in treatment and/or follow up. Students have an opportunity in this course to examine family systems theories and family-centered services for individuals with disabilities across the life cycle. They will also explore models of family-centered teams, the issues of client/family empowerment, and the accessing of services, as well as learning how to incorporate this information into the development of a family service plan. Many sessions will have an experiential component to increase awareness of family issues effecting treatment and/or practical application of technique.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 8161. Methods in Community-Based Participatory Research (CBPR) for Health. 3 Credit Hours.**

This course aims to critically examine how researchers, practitioners, and community partners can work together to establish and consolidate equitable, transdisciplinary, and sustainable partnerships by using a CBPR approach to improve the health and life quality of community populations in general and to eliminate health disparities in particular. What distinguishes CBPR from other approaches to research is the active engagement and integration of all investigators and partners into the research process through such principles as mutual respect and teamwork (rather than a top-down/university-down approach); co-learning and mutual capacity building; and power-sharing and co-ownership of research. This course provides an overview of conceptual, methodological, and practical approaches to CBPR by focusing on cross-disciplinary health issues such as holistic health, culture and health, health disparities, mixed methods in health research, evidence-based and people-centered community healthcare, and inclusive health policy.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THRC 8280. Behavioral Change Seminar. 3 Credit Hours.**

This course provides structure through which students design and implement a theory-based individual or group behavior change program through local agencies. Drawing from evidence-based "best practices" and national mandates to improve the health and wellness of individuals with chronic illnesses and disabilities, programs are designed to promote health and reduce secondary conditions. Seminar meetings are also used to provide peer supervision and feedback.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THRC 9282. Readings and Conference for Therapeutic Recreation. 1 to 3 Credit Hour.**

In-depth investigation of current literature related to a specialized area of research or practice is undertaken. Examples include health promotion programs to prevent secondary health problems, dementia care, programming for at-risk youth, and ethics. The course may also be used as preparation for THRC 8141 or background preparation for the comprehensive examination.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Therapeutic Recreation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THRC 9995. Master's Project in Therapeutic Recreation. 1 to 3 Credit Hour.**

Enrollment in this course is limited to those completing the master's degree requirements through a field-based programming project under the supervision of a faculty member. Projects include but are not limited to designing, implementing, or evaluating therapeutic recreation programs; designing projects related to systems change; or engaging in constituent awareness and education.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Therapeutic Recreation.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B in THRC 8102.

## Tourism and Hospitality Management (THM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**THM 5311. Service Management for the Tourism and Hospitality Industry. 3 Credit Hours.**

This course provides an introduction to the underlying principles of service management in the tourism and hospitality industry. It is focused on the strategies, systems, processes and design aspects of creating and evaluating service delivery, service excellence and service orientation. Topics include understanding the "service-dominant logic" approach to marketing and managing service, setting service strategy, understanding customer needs, building a service-minded workforce, measuring and evaluating service quality, and drivers of service industry customer loyalty.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5312. Legal Issues for Hospitality and Event Enterprises. 3 Credit Hours.**

This course provides a comprehensive overview of laws and regulations governing the tourism and hospitality industry. Legal implications of civil laws, areas of tort, and contract law will be discussed, along with the law and legal relationships that exist in the business context. Hospitality law, especially when dealing with customers and business contracts, will be the main focus. Issues will be discussed from the points of view of innkeepers, restaurateurs, travel agents, lawyers, and event planners. Attention will be given to labor relations laws, Equal Employment Opportunity laws, including Title VII of the Civil Rights Act and the Americans with Disabilities Act, risk management, zoning, and unions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5313. Financial Mgt Tour/Hosp. 3 Credit Hours.**

The course will analyze managerial accounting and financial management as they are practiced in the tourism and hospitality industry, along with management strategies for financing ventures and expansion. Topics will include hospitality accounting systems and internal control, financial statement analysis and interpretation, operational analysis, cost behavior, budgeting and forecasting, pricing and feasibility analysis. Computer applications will be highlighted.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5314. e-Business for Tourism and Hospitality. 3 Credit Hours.**

This course will examine how and why electronic business and the Internet have impacted the tourism, hospitality, and entertainment industries. It will discuss the various business models that are used, and highlight the successes and failures of those models. Topics will include marketing, finance, strategy, and globalization with special emphasis on information technology and the dissemination of information.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5315. Strategic Tourism and Hospitality Marketing. 1.5 Credit Hour.**

This course provides a strategic overview of marketing in the contemporary tourism and hospitality industry. Important topics include marketing concepts, service characteristics, marketing environment and intelligence, marketing research, marketing mix, segmentation, targeting and positioning. Special emphasis will be placed on the analysis of the marketing environment and the diversity of marketing practices used by tourism/hospitality marketers in today's global market place. The course is designed as the foundation course for the Tourism and Hospitality Marketing concentration in the MSHM program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5316. Strategic Management in the Tourism and Hospitality Industry. 3 Credit Hours.**

This course covers the concepts of strategic management in the tourism and hospitality business environment and the role of strategic leadership practices. Strategic management principles will be examined to create competitive advantages for tourism and hospitality industry leaders and organizations. Specifically, the course examines the total enterprise, the industry, and the competitive environment in which it operates. The goal is to develop a mastery of the analytical tools to perform analyses of the environment, industry, competitors, and organizational resources. Management implications that are related to strategy development, implementation, and control are examined with a focus on the effective allocation of organizational resources.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5317. Tourism and Hospitality Management Consulting Project. 3 Credit Hours.**

The THM Consulting Project is designed as a capstone experience to enable MTHM students in their final semester, to work in consulting teams, analyzing real tourism and hospitality business problems, recommending appropriate actions for client organizations in the greater Philadelphia region. In teams of three to five, students will emphasize their critical and creative thinking that they have developed as a result of participating in the MTHM program to enable effective problem identification with a solution orientation. Teams will develop a written report that provides an analysis of the current situation, recommended solutions, as well as a detailed implementation plan. A formal presentation of the report to the client organization is also required. A strong emphasis will be placed upon developing consulting skills which will augment the discipline specific content reflected in other courses.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of C- in THM 5485.

**THM 5318. Sustainable Tourism Management. 3 Credit Hours.**

This course provides an overview of the foundations of the destination design process. Emphasis will be on the basic theory of travel behavior as well as the systems that support the development of destinations. Consideration will be given to the ecological impacts of tourism, examining the processes that enable sustainable destination planning. Special readings from the current literature, case studies, guest speakers, and video cases will form an integral part of this course.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**THM 5320. Special Topics in Tourism and Hospitality Management. 1.5 Credit Hour.**

This seminar is designed to provide an in-depth exploration of special topics, current issues, and trends in the tourism and hospitality industry. Relevant industry problems and issues facing management and personnel in the related industries will be discussed.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**THM 5321. Tourism Analytics. 3 Credit Hours.**

This course aims to provide tourism industry professionals with the necessary tools to guide/aid decision making. The course is designed to familiarize students with quantitative data management and analytic skills such as econometric modeling, forecasting, interpretation of results, and development of conclusions, using tourism and hospitality information databases, as well as analytical software. Specific emphasis is given to econometric modeling of tourism assets that have cross and/or spatial dependence, in conjunction with applicable urban economics and finance theories. The course has two main goals: development of skill in the use of advanced data analysis techniques and the development of expertise in the interpretation and communication of their results.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in STAT 5001.

**THM 5322. Strategic Brand Management. 1.5 Credit Hour.**

Successful brand management is a requirement for tourism and hospitality organizations operating in highly competitive markets. In providing students the insight to leverage a competitive advantage through brand management, this course will introduce the nature of brands, the importance of the brand establishing a promise, and the tools required to develop a coherent brand strategy. Consideration will be given to the elements of a successful service brand with a focus on establishing a compelling differentiated tourism and hospitality proposition. A strategic brand management framework will set the foundation for the course, enabling students the opportunity to consider, in detail, the elements required to manage a tourism or hospitality brand effectively.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5323. Sustainable Tourism Development. 3 Credit Hours.**

This course will examine the three major areas that make up sustainability: economic, socio-cultural, and environmental sustainability. Students will learn how the international tourism industry effects each of these areas and the inter-connectedness of these impacts. Students will investigate the main principles for sustainable tourism development at the local, regional, national, and international levels.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SF

**Repeatability:** This course may not be repeated for additional credits.

**THM 5324. International Tourism. 3 Credit Hours.**

The importance and the development of an international tourism market will be discussed, along with the planning and development of an international tourism destination. Cultural tourism and ecotourism will be included.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5325. Gaming and Casino Management. 1.5 Credit Hour.**

The objectives of this course are to develop an understanding of the gaming industry. An examination of the evolution of the industry will set the foundation for examining management considerations for casino operations within a casino hotel. Current issues in the casino and gaming industry will be discussed with a detailed examination of trends, policies, and subsequent operational impacts.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5326. Consumer Behavior in Tourism and Hospitality. 3 Credit Hours.**

This course provides an overview of current knowledge about consumer behavior in the tourism/travel and hospitality businesses. Basic behavioral science and specific research (both qualitative and quantitative) tools used in marketing practice are covered. Issues of consumer decision-making, behavioral determinants, cultural influences, motivation, information search, and marketing implications are addressed. The course format includes lecture/discussion, student presentations, and a required term paper. The course is designed for graduate students who want to pursue managerial positions in consumer behavior/marketing research in the tourism or hospitality industry. [Basic college-level statistical knowledge is required.]

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5327. Customer Relationship Management in Tourism and Hospitality. 1.5 Credit Hour.**

This course focuses on the broad spectrum of Customer Relationship Management (CRM) and concentrates on concepts and practices related to building and maintaining customer loyalty and firm profitability in the tourism/hospitality businesses. It emphasizes customer profitability analysis and the profitable management of customer relationships. It covers innovative approaches to calculating the value of customers, managing customer portfolios, and making strategic decisions necessary to increase customer equity using value propositions. Some data mining/ management examples will be used to illustrate the relevant CRM techniques.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5328. Tourism Economics and Policy. 3 Credit Hours.**

This course focuses on the role that economics and policy play within the tourism industry. Specific economic and policy theories that are essential for the tourism industry will be investigated. Topics include theory of tourism demand and supply, using cost-benefit analysis, tax policy impacts, tourism valuation, economic analysis in management, and marketing and policy decision.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5329. New Media and Distribution. 1.5 Credit Hour.**

This course will examine the fluid and rapidly changing nature of the distribution networks of the tourism and hospitality industry and the resultant effects on branding, loyalty, and value. Specifically, this highly interactive class will explore the complex relationships that currently exist in the tourism and hospitality industry, both in terms of financial and operating structure, and those with vendors who sell their products. A particular focus will be on current and emerging intermediaries, who will increasingly yield substantial influence as the gatekeepers directing consumer traffic, and ways to measure their relative effectiveness.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5330. Special Topics in Tourism, Hospitality, and Event Management. 3 Credit Hours.**

Varying special topics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**THM 5331. Hospitality Operations Management. 1.5 Credit Hour.**

This course concerns itself with how work is done in hospitality operations. Hospitality operations tend to be complex due to their unique characteristics and highly uncertain environments. Students will develop an understanding of operations management theories and expand their ability to apply suitable theories under different situations. Application of techniques to create, operate, staff and evaluate service systems is emphasized. Consideration is given to queuing, forecasting demand, route and scheduling as well as quality management and liability minimization. The course is designed as the foundation course for the Operations Management concentration in the MTHM program.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5332. Management Information Systems in Tourism and Hospitality. 3 Credit Hours.**

This class will examine the implication of information technology on the tourism and hospitality business and how to manage information technology resources within a company to maximize operation efficiency and productivity. Students will learn to be information technology professionals in the industry who can manage, develop, and lead organizational information systems based on the integration of core business concepts and ever-changing knowledge about information and technology.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5333. Seminar for Information Technology in Tourism and Hospitality. 3 Credit Hours.**

The final course in the information technology track is a case studies course. We will be examining technology and dot-com case studies in the tourism, hospitality, and entertainment industries. The case study methodology will be covered so that students can conduct and write case studies. For a final project, each student will be writing a case study. It is intended that those case studies may be expanded into a Master's Thesis or Project that is required of students for degree completion.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5334. The Business of Event Management. 1.5 Credit Hour.**

The events and meeting industry has long been recognized as a major market sector in the tourism and hospitality industry, and is one of the fastest growing in the industry. This course will provide students insight into its complex and diverse nature as represented in the diversity of the industry, including goal and mission establishment, strategic planning, event program planning and design, program evaluation and many other industry specific topics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5335. Effective Sales Management. 1.5 Credit Hour.**

Personal selling is a significant contributor to tourism and hospitality revenues. In providing students with an overview of the sales management process and its significance to the industry, this course will emphasize experiential based learning. Students will have an opportunity to develop and practice their personal selling skills by participating in field based sales initiatives with industry partners.

**Field of Study Restrictions:** Must be enrolled in one of the following Majors: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5336. Revenue Management and Hotel Analytics. 3 Credit Hours.**

Perishable inventory with variable demand necessitates effective revenue management to realize the tourism and hospitality mechanism of revenue optimization. Participation in this course will afford students the opportunity to identify and exploit the core elements of revenue management, namely forecasting, controls (pricing and allocation/optimization decisions) and monitoring. This course aims for students to establish a reasonable level of relevant analytical/technical proficiency in each one of these core revenue management elements. Within the broader area of pricing theory, additional emphasis is placed on overbooking, consumer behavior, distribution channel management, and market segmentation. Utilizing STR hospitality metrics, students will develop hotel analytical skills and the opportunity to receive the STR certification in Hotel Industry Analytics.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5341. Destination Events - A Global Perspective. 3 Credit Hours.**

This course provides an in-depth and comprehensive analysis for the worldwide festivals and event industry, the impact of current international issues, an understanding of how events and festivals are staged globally, as well as the legal and risk related concerns that come with events and festivals. Characteristics specific to the global aspect of the industry will be examined as well as the essentials of developing an effective inbound tourist experience.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5342. Destination Management and Marketing. 3 Credit Hours.**

This course is designed to provide a comprehensive understanding of the role, the scope and the business of destination marketing organizations (DMOs) as well as convention and visitor bureaus (CVBs). The trends, issues and challenges facing DMOs and CVBs will be discussed. In addition, an analysis of the planning process in developing tourism destinations in global, community, metropolitan, urban and rural settings will be investigated. Emphasis will be on stakeholder engagement, product development as well as enhancement of facilities to meet the needs of tourists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5343. Cultural Intelligence. 3 Credit Hours.**

This course will focus on the concept of cultural intelligence (CQ), and provide students with both a theoretical background, as well as practical approaches to using this concept within the travel and tourism industry. Students will become knowledgeable in Hofstede's cultural dimensions, the four areas of CQ, as well as strategies for increasing CQ.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5344. Crisis, Risk and Disaster Management. 3 Credit Hours.**

This course will focus on crisis reduction, readiness, response and recovery efforts from both natural and human-induced disasters that affect tourism destinations and businesses. Furthermore, this course will address tourism's potential opportunities for improving systems and procedures.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5345. Understanding Tourism in the 21st Century. 3 Credit Hours.**

This course will explore the conceptual foundations of tourism so that all students in the master's program will have exposure to a common core of tourism content. Specifically, this class will introduce students to topics such as leisure theory, travelers' motivations and decision making, the production of tourism and tourism places, globalization of tourism, social theories of tourist practice and experience, tourism policy, planning and governance, and critical perspectives on tourism.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5422. Entrepreneurship and Real Estate. 3 Credit Hours.**

The class will focus on real estate issues in hospitality operations, and on the requirements and skills needed to become an entrepreneur in hospitality. As such, the real estate portion will cover general principles of real estate ownership and management, but with a concentration on the unique aspects of hospitality real estate development and financing. Project feasibility analysis and sound underwriting criteria will be a major focus of this section of the course. The entrepreneurship portion of the course will focus on requirements of owning and operating one's own business, including acquisition of capital, capital sources, and preparation of a complete business plan for a new venture.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5485. Graduate Internship. 3 Credit Hours.**

The Graduate Internship utilizes a field placement with emphasis on acquisition and application of practical skills. One hundred and eighty contact hours will take place in an agency, under supervision of both the University internship coordinator and the agency-designated supervisor.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may be repeated for additional credit.

**THM 5601. Service Industry Analytics. 3 Credit Hours.**

This course will examine how organizations in the service industry can use analytics to make better decisions to solve practical industry problems. Analytics involves the use of data and data analysis to make fact-based decisions. This class will address the use of data as a tool for strategic success. It will focus on the collection, preparation, analysis, visualization, management, interpretation, and communication of data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5602. Service Experience Design. 3 Credit Hours.**

This course presents an overview of the process of planning and organizing human, environment, technology and culture components of a service experience in order to improve its quality and the interaction between service provider and customers. Students will learn how to measure and evaluate service experiences using both qualitative and quantitative methods. Furthermore, students will learn how to design service experiences according to consumers' needs as well as the service providers' competencies.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5603. Food and Beverage Management. 1.5 Credit Hour.**

This course focuses on contemporary challenges that managers and entrepreneurs in food and beverage businesses face. Key operational and financial success factors that underscore effective foodservice management are emphasized. Topics include restaurant metrics and cost control, menu design, service systems and special event planning. Food trends in restaurants, in addition to the structure of the beverage industry, will be explored including alcohol and food safety regulations. Given an increased consumer emphasis on health, both personally and environmentally as reflected in concern about food sources, nutrition and sustainability issues are also discussed.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5604. Event Logistics and Risk Management. 1.5 Credit Hour.**

This course examines event logistics, crisis and risk management strategies as they apply to the hospitality, festival and event industries. It is designed to look at both theoretical and practical elements of event operations and production to include a comprehensive review of logistics, contracts, technical production elements, staging and risk management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5605. Entrepreneurial Thinking for Hospitality and Event Industries. 1.5 Credit Hour.**

Students will be introduced to the fundamentals of entrepreneurship and how to initiate a new hospitality or event venture. Consideration of the stages of conceptualization, development and operation of a new entity will be emphasized, affording students the opportunity to appreciate the requirements to source funds, make location/ distribution decisions and ultimately, successful and sustainable management of the operation. The focus of the course will be idea generation and business plan development.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Tourism and Hospitality Mgmt.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5606. Hospitality Cost Control. 1.5 Credit Hour.**

Effective management of a hospitality enterprise requires strong cost control acumen to ensure the financial goals of the organization are realized. This course will examine all aspects of cost control within hospitality organizations including food and beverage costs, purchasing, labor cost management, menu pricing, cash flow, theft and loss prevention. Consideration will be given to the importance of effective budgeting and understanding hospitality financial ratios as well as other factors contributing to organizational profitability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5801. Hospitality Asset Lifecycle Optimization. 3 Credit Hours.**

This course is designed to give senior hospitality executives an introduction into managing hospitality assets effectively. With its foundation in macroeconomics, this course will provide insight into the requirements for developing optimal asset life cycles, with consideration being given to ongoing performance systems as well as other long-term consequences, such as the environment and the community in which the asset operates (i.e., corporate social responsibility). Specifically, students will be introduced to commercial real estate and hotel investment as well as gain an appreciation of the asset cycle and the asset management process. Brand selection and managing the relationship with the management company are focuses for hospitality asset managers and, therefore, this course. Finally, students will examine current trends in the hospitality investment and finance markets.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5802. Successful Compliance Strategies for Hospitality Asset Management. 3 Credit Hours.**

This course will provide a comprehensive overview of laws and regulations that focus on the transactional and operational aspects of maintaining hospitality and/or tourist related business. A student in this executive level course will gain knowledge on asset acquisition, asset management and development, and finally, asset divestiture. The course will span the laws that focus on creating and/or joining an existing business, proper legally sound management of that business and factors/methods of divesting the business. Attention will be given to real estate law, merger and acquisitions, divestiture, labor relations laws, equal employment opportunity laws, including Title VII of the Civil Rights Act and the Americans with Disabilities Act, and risk management.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5803. Business Analytics for Executive Decisions in Hospitality. 3 Credit Hours.**

This course aims to provide senior hospitality professionals with the necessary tools to guide executive decisions from analysis of hospitality asset prices and returns. The course is designed to familiarize students with quantitative data management and analytic skills, such as handling of hospitality asset data, econometric modeling, forecasting, interpretation of results, and development of conclusions. Specific emphasis is given to econometric modeling of hospitality asset returns that have cross and/or spatial dependence, in conjunction with applicable urban economics and finance theories. After successful completion of the course, the students are expected to develop significant competencies in the following areas: collection and management of hospitality asset data files; evaluation of historical risk and returns from hospitality assets; construction and optimization of hospitality asset portfolios; spatial econometric modeling; quantitative revenue management/pricing; and, forecasting and statistical inference.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM 5804. Winning Strategies for Hospitality Asset Portfolio Management. 3 Credit Hours.**

This course seeks to develop the critical analytical skills of the senior hospitality executive so that they are able to make effective strategic decisions with respect to the hospitality asset portfolio. Participation in this course will enable students to develop their ability to articulate a strategic vision for managing the asset portfolio, including the effective development and execution of capital plans as well as the evaluation of such capital expenditures. Knowledge is acquired regarding asset portfolio development, specifically mergers and acquisitions, hold versus sell and refinancing decisions.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

**Repeatability:** This course may not be repeated for additional credits.

**THM U000. Elective UL. 0 Credit Hours.**

**Repeatability:** This course may not be repeated for additional credits.

## Tyler School of Art (TYLE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**TYLE 8000. Interdisciplinary Seminar. 3 Credit Hours.**

The Graduate Interdisciplinary Seminar is a required course for all first-year MFA students at Tyler. The course is designed to look at events and phenomena that have shaped culture across all disciplines in order to encourage discourse, recognize shared affinities with the understanding that a studio practice occurs within a large cultural context.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may be repeated for additional credit.

**TYLE 8001. Graduate Professional Practices. 3 Credit Hours.**

This course provides MFA students with insight into professional studio practices and the transition to post-MFA endeavors. It may include preparation and submission of materials for the MFA thesis exhibition, developing and refining an artist's statement, and other strategies that students can use to present their work and ideas to external audiences.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Degree Restrictions:** Must be enrolled in one of the following Degrees: Master of Fine Arts.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**TYLE 8149. Japanese Art, Theory, and Design Workshop. 3 Credit Hours.**

The Tyler Summer Art Workshop is rigorous and professional ten-week program that integrates theory and application through an intensive series of guest lectures, research trips, critiques, and studio. In addition, students will have an opportunity to work on a collaborative art project with the guest artist faculty. This interdisciplinary workshop consists of students studying drawing, painting, printmaking and photography. The opportunity to engage in discussions and critiques with students from different art disciplines opens up a whole wide range of topics in art. As a production tool, the Tyler Summer Interdisciplinary Art Workshop offers students the opportunity to explore new technical methods while refining their area of expertise. Students are expected to complete a cohesive of work or one large-scale project by the end of the workshop. This work should not only demonstrate a command of one's craft but in some manner incorporate the overall cultural experience as well. As an enriching medium, the workshop offers students ample opportunity to participate in one of the world's most progressive and culturally stimulating city of Tokyo. Students of visual mediums will find Japan an amalgamation of stoic, ancient ways and cutting edge style.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**TYLE 8501. Theories of Visual Representation. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

**Repeatability:** This course may not be repeated for additional credits.

**TYLE 8985. Teaching in Higher Education. 3 Credit Hours.**

This course enhances knowledge of how people learn and encourages participants to expand and diversify teaching methods. The course requires class discussion of readings and activities, provides individualized feedback on assignments, and opportunities for self-reflection along with reflection from the learning community of colleagues. The course will also address discipline-specific considerations of teaching studio art and design.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

## Urban Bioethics (UBTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**UBTH 5001. Urban Bioethics 1 (Professional Students). 3 Credit Hours.**

In a seminar format, this course introduces students to the field of urban bioethics. Topics to be covered include: the history and theoretical foundations of bioethics; the role of values and ethics in health, health care, law, and policy; the role of values and ethics in understanding the social determinants of health and health disparities and inequities. The course features guest lectures from CBUHP faculty fellows. UBTH 5001 is the number of the course for MD, JD or other Professional students. UBTH 5101 is the number of the course for University Graduate Students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5002. Urban Bioethics 2 (Professional Students). 3 Credit Hours.**

In a seminar format, this course introduces students to the field of urban bioethics. Topics to be covered include: health policy, the ethics of research with vulnerable populations, clinical ethics, theories of cultural competency/humility, and critical epidemiology. The course features guest lectures from CBUHP faculty fellows. UBTH 5002 is the course number for Urban Bioethics 2 for MD, JD, and other Professional students. UBTH 5102 is the number of the course for other graduate students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5022. Community Engagement I (Professional Students). 2 Credit Hours.**

This is the first of a two-course series that incorporates a hands-on, community-based approach that takes a holistic look at a community, analyzing both its strengths and challenges. Students will work in multidisciplinary teams and with a faculty advisor and community representative in different neighborhoods within the city of Philadelphia. Students will work in and with the community to learn how to identify the values underlying the community's strengths and challenges, and then use those that value-orientation to: perform a medical urban map, perform a needs assessment, analyze the bioethics dimensions and the social determinants of health and illness in the community, write a pretend grant to study health issues in the community, conduct oral histories with community members, and conduct photojournalism assignments, among other things.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5023. Community Engagement II (Professional Students). 2 Credit Hours.**

This is the second of a two-course series that incorporates a hands-on, community-based approach that takes a holistic look at a community, analyzing both its strengths and challenges. Students will work in multidisciplinary teams and with a faculty advisor and community representative in different neighborhoods within the city of Philadelphia. Students will work in and with the community to learn how to identify the values underlying the community's strengths and challenges, and then use those that value-orientation to: perform a medical urban map, perform a needs assessment, analyze the bioethics dimensions and the social determinants of health and illness in the community, write a pretend grant to study health issues in the community, conduct oral histories with community members, and conduct photojournalism assignments, among other things.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in UBTH 5022.

**UBTH 5031. The Values, Ethics, & Economics of Health Care Delivery in Urban Communities (Professional Students). 2 Credit Hours.**

This course focuses on the values, organization, funding, and logistics of community based health care delivery. Students will be introduced to the various agencies involved in urban health care delivery - FQHC, HRSA, NIH, and others. In addition, an introduction to grant writing in the area of urban bioethics and health delivery in urban communities will be provided.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5041. Critical Social Science and Urban Bioethics (Professional Students). 2 Credit Hours.**

This course introduces students to the theories and methods of critical social science, such as critical medical anthropology (CMA). Students will gain an appreciation for the role and importance of political, religious, economic, and social lenses, and of understanding disease and illness as biocultural phenomena.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5082. Independent Study 1 (Professional Students). 3 Credit Hours.**

Working in conjunction with an advisor, who upon approval can be from the Medical School, the CBUHP, or a dual-degree student's home department, the student will craft and complete an independent study course on a topic/area of interest relevant to professional development. This is the first of two independent studies allowed for MA in Urban Bioethics credit. Please see the MA in Urban Bioethics Handbook for the most recent description of allowable approaches to the independent study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5101. Urban Bioethics 1 (Graduate Students). 3 Credit Hours.**

In a seminar format, this course introduces students to the field of urban bioethics. Topics to be covered include: the history and theoretical foundations of bioethics; the role of values and ethics in health, health care, law, and policy; the role of values and ethics in understanding the social determinants of health and health disparities and inequities. The course features guest lectures from CBUHP faculty fellows. UBTH 5101 is the number of the course for University Graduate Students. UBTH 5001 is the number of the course for MD, JD or other Professional students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5102. Urban Bioethics 2 (Graduate Students). 3 Credit Hours.**

In a seminar format, this course introduces students to the field of urban bioethics. Topics to be covered include: health policy, the ethics of research with vulnerable populations, clinical ethics, theories of cultural competency/humility, and critical epidemiology. The course features guest lectures from CBUHP faculty fellows. UBTH 5102 is the course number for Urban Bioethics 2 for Temple Graduate students. UBTH 5002 is the number of the course for MD, JD, and other Professional students.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5122. Community Engagement I (Graduate Students). 2 Credit Hours.**

This is the first of a two-course series that incorporates a hands-on, community-based approach that takes a holistic look at a community, analyzing both its strengths and challenges. Students will work in multidisciplinary teams and with a faculty advisor and community representative in different neighborhoods within the city of Philadelphia. Students will work in and with the community to learn how to identify the values underlying the community's strengths and challenges, and then use those that value-orientation to: perform a medical urban map, perform a needs assessment, analyze the bioethics dimensions and the social determinants of health and illness in the community, write a pretend grant to study health issues in the community, conduct oral histories with community members, and conduct photojournalism assignments, among other things.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5123. Community Engagement II (Graduate Students). 2 Credit Hours.**

This is the second of a two-course series that incorporates a hands-on, community-based approach that takes a holistic look at a community, analyzing both its strengths and challenges. Students will work in multidisciplinary teams and with a faculty advisor and community representative in different neighborhoods within the city of Philadelphia. Students will work in and with the community to learn how to identify the values underlying the community's strengths and challenges, and then use those that value-orientation to: perform a medical urban map, perform a needs assessment, analyze the bioethics dimensions and the social determinants of health and illness in the community, write a pretend grant to study health issues in the community, conduct oral histories with community members, and conduct photojournalism assignments, among other things.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in UBTH 5122.

**UBTH 5131. The Values, Ethics, & Economics of Health Care Delivery in Urban Communities (Graduate Students). 2 Credit Hours.**

This course focuses on the values, organization, funding, and logistics of community based health care delivery. Students will be introduced to the various agencies involved in urban health care deliver - FQHC, HRSA, NIH, and others. In addition, an introduction to grant writing in the area of urban bioethics and health delivery in urban communities will be provided.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5141. Critical Social Science and Urban Bioethics (Graduate Students). 2 Credit Hours.**

This course introduces students to the theories and methods of critical social science, such as critical medical anthropology (CMA). Students will gain an appreciation for the role and importance of political, religious, economic, and social lenses, and of understanding disease and illness as biocultural phenomena.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5182. Independent Study 1 (Graduate Students). 3 Credit Hours.**

Working in conjunction with an advisor, who upon approval can be from the Medical School, the CBUHP, or a dual-degree student's home department, the student will craft and complete an independent study course on a topic/area of interest that is relevant to professional development. This is the first of two independent studies allowed for MA in Urban Bioethics credit. Please see the MA in Urban Bioethics Handbook for the most recent description of allowable approaches to the independent study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**UBTH 5189. Urban Bioethics Field Study 1. 1 to 6 Credit Hour.**

The student will identify a specific urban problem evident in North Philadelphia and collaborate with academic, medical, and community mentors to develop and begin implementation of an innovative intervention with the goal of improving health in a fiscally sustainable way.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may be repeated for additional credit.

**UBTH 5210. Special Topics: Social Science Approaches to Urban Bioethics. 1 to 3 Credit Hour.**

This course features a rotating set of topics related to the intersections of the social sciences and urban bioethics. Offerings are not part of the regular course listings. Examples include 'cultural competency and humility'; 'health, illness, and the urban body', and 'public images of urban health and illness'. Please contact the listed Center for Bioethics, Urban Health, and Policy faculty member for more details on the current offering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may be repeated for additional credit.

**UBTH 5220. Special Topics: Urban Bioethics at the Bedside. 1 to 3 Credit Hour.**

This course features a rotating set of topics related to the clinical urban bioethics. Offerings are not part of the regular course listings. Examples include 'general clinical ethics in the urban environment', 'navigating clinical disagreements', and 'pediatric urban bioethics'. Please contact the listed Center for Bioethics, Urban Health, and Policy faculty member for more details on the current offering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may be repeated for additional credit.

**UBTH 5230. Special Topics: Current Topics in Urban Bioethics. 1 to 3 Credit Hour.**

This course features a rotating set of topics related to current events in urban bioethics. Offerings are not part of the regular course listings. Examples include bioethics and political discourse; navigating the Ebola fear response; and public policies affecting violence and health. Please contact the listed Center for Bioethics, Urban Health, and Policy faculty member for more details on the current offering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may be repeated for additional credit.

**UBTH 5240. Special Topics: Research and Urban Bioethics. 1 to 3 Credit Hour.**

This course features a rotating set of topics related to urban bioethics and research. Offerings are not part of the regular course listings. Examples include the social determinants of health in urban research and establishing and maintaining trust of community partners. Please contact the listed Center for Bioethics, Urban Health, and Policy faculty member for more details on the current offering.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may be repeated for additional credit.

**UBTH 9082. Independent Study 2 (Professional Students). 3 Credit Hours.**

Working in conjunction with an advisor, who upon approval can be from the Medical School, the CBUHP, or a dual-degree student's home department, the student will craft and complete an independent study course on a topic/area of interest relevant to professional development. This is the second of two independent studies allowed for MA in Urban Bioethics credit. Please see the MA in Urban Bioethics Handbook for the most recent description of allowable approaches to the independent study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in UBTH 5082.

**UBTH 9182. Independent Study 2 (Graduate Students). 3 Credit Hours.**

Working in conjunction with an advisor, who upon approval can be from the Medical School, the CBUHP, or a dual-degree student's home department, the student will craft and complete an independent study course on a topic/area of interest that is relevant to professional development. This is the second of two independent studies allowed for MA in Urban Bioethics credit. Please see the MA in Urban Bioethics Handbook for the most recent description of allowable approaches to the independent study.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**Pre-requisites:** Minimum grade of B- in UBTH 5182.

**UBTH 9189. Urban Bioethics Field Study 2. 1 to 6 Credit Hour.**

This course continues its companion course, UBTH 5189: Urban Bioethics Field Study 1. The student, having identified a specific urban problem evident in North Philadelphia, and having developed and initiated the intervention, will continue to work with academic, medical, and community mentors to evaluate the intervention. This course also charges the student with laying the groundwork for future sustainability.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may be repeated for additional credit.

**Pre-requisites:** Minimum grade of B- in UBTH 5189.

**UBTH 9995. MA in Urban Bioethics Thesis (Professional Students). 3 Credit Hours.**

Working in conjunction with a thesis advisor, who upon approval can be from the Medical School, the CBUH&P, or a dual-degree student's home department, the student will conduct an original research project (empirical or non-empirical) and produce a publishable quality paper. The thesis should be a novel contribution to the field.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Law, Medicine.

**Repeatability:** This course may be repeated for additional credit.

**UBTH 9996. MA in Urban Bioethics Thesis (Graduate Students). 1 to 6 Credit Hour.**

Working in conjunction with a thesis advisor, who upon approval can be from the Lewis Katz School of Medicine, the CBUH&P, or a dual-degree student's home department, the student will conduct an original research project (empirical or non-empirical) and produce a publishable quality paper. The thesis should be a novel contribution to the field.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate, Law Graduate.

**Repeatability:** This course may be repeated for additional credit.

## Urban Education (URBE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**URBE 5401. Policy and Practice in Urban Education. 3 Credit Hours.**

This course introduces students to key issues in urban education. It helps students situate urban schools in their broader social, political, and economic contexts, providing a deeper understanding of the ways larger social processes shape cities and their schools. In addition, it provides students with multiple lenses to understand dynamics within urban schools and classrooms.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**URBE 5417. The Urban Environment. 3 Credit Hours.**

"The Urban Environment" will provide students with an introduction to the historical, social, and political factors shaping cities. The course is primarily, but not exclusively, intended for education students and is designed to help students to develop a more sophisticated understanding of the contexts in which urban education occurs. More specifically, the course will focus on the history of cities, including 20th and 21st century urban transformation, the development and persistence of residential segregation, urban politics and poverty, and trends in theory and practice around urban redevelopment. Students will, of course, be encouraged to make connections between course material and other issues in urban education or their own areas of specialization.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Course Attributes:** SI

**Repeatability:** This course may not be repeated for additional credits.

**URBE 5501. Urban Schools. 3 Credit Hours.**

This course is designed to help students understand the social, political, and economic factors that shape urban schools. The focus is on both perennial and emerging issues affecting the urban environment and schools and on major policies relating to those issues (e.g., equity, accountability, and school finance). The class requires several critiques of educational literature, as well as an extensive review of the literature on a substantive topic related to urban education. Offered every Fall term.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**URBE 5515. Service Learning and Community Development. 3 Credit Hours.**

This course presents models for service learning with particular emphasis on those that contribute to urban community development and community building. Students conduct a participatory community study and design a service learning project that meets authentic community needs. Offered every Fall term.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**URBE 5516. School-Community Partnerships in Urban Settings. 3 Credit Hours.**

This course introduces models, practices, and theories for developing partnerships between schools, universities, community-based groups/agencies, and neighborhoods. Among the models studied are various types of partnerships, community organizations, family centers, and community schools.

The course emphasizes the manifold issues that emerge when partnerships involve participants who cross the boundaries of class, race, gender, professions, culture, and language. Field visits and fieldwork are included. Offered Spring term.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**URBE 5565. The Origins of Urban Education. 3 Credit Hours.**

This reading and discussion class is based on the most important secondary literature in urban history and the history of urban education. Philadelphia is used as a case study. Topics in urban history include the geography and functional differentiation of urban space; the political economy of cities; urban demographics with a special emphasis on racial and ethnic minorities; urban political and social institutions; and the site as educator, including regional and site planning and urban material culture. Topics in urban educational history include race and ethnicity in the history of urban education; the politics of urban education; the history of social class; and the opportunity structure in urban education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**URBE 5611. Reforming City Schools. 3 Credit Hours.**

This course will examine educational policy reform ideas and strategies. The course content will focus on understanding the impact of educational policymaking on big city school districts and their local school contexts. Special attention will be paid to the urban social and political environments in which policies are made and applied, along with the challenges of racial and social class inequalities. Students will consider different types of current and past reforms, utilizing published research literature, popular media, and Internet-based resources to increase the likelihood that current debates in the field are covered. The intended and unintended consequences of educational and social policy will be examined as well.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**URBE 5620. Special Topics in Urban Education. 2 to 6 Credit Hours.**

Topics vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**URBE 5630. Special Seminar in Urban Education. 3 Credit Hours.**

Topics vary.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**URBE 8602. Theory Seminar in Urban Schools. 3 Credit Hours.**

This course introduces some important theoretical frameworks and theorists that inform research in urban education. Emphasis is on the contributions of the social sciences. Theories are discussed in the context of urban education and are applied to major issues of interest to the class. Each student selects an issue, which s/he may have begun to explore in URBAN ED 5501, around which written and oral presentations are based. Teams of students also lead class discussions on the work of selected theorists.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may not be repeated for additional credits.

**URBE 8603. Urban Education Doctoral Capstone. 3 Credit Hours.**

This is the first semester of a two semester (Fall/Spring) course that is required for all urban Education doctoral students. It is designed to support students as they carry out their own independent research projects and to serve as a capstone to their doctoral education. Ideally, all students will work on developing projects related to their future dissertation research.

**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Urban Education.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**College Restrictions:** Must be enrolled in one of the following Colleges: Education & Human Development.

**Repeatability:** This course may be repeated for additional credit.

**URBE 9982. Independent Research in Urban Education. 3 Credit Hours.**

Because the Urban Education Program is interdisciplinary and draws on faculty from across the University, it is critical that students become acquainted with faculty whose research styles and interests will contribute to their course of study by, for example, serving on their dissertation committees. This course requires students to design and complete a project with a faculty member outside the program. In consultation with their advisors, students identify an affiliated member with whom to work and then create and complete an independent study. This research can take several forms, e.g., collecting and analyzing data, conducting an extensive literature review, or utilizing secondary data.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**URBE 9991. Research Practicum. 3 Credit Hours.**

This doctoral-level course provides each student with the experience of completing an independent study research project. Students are required to formulate a research question; conduct a thorough review of the relevant literature on the topic; design a small study to be carried out throughout the year; and write up the results. While this project may be directly related to the student's dissertation research, it does not serve as a replacement of that research endeavor. Each student is expected to present her/his work in a public setting.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**URBE 9996. Masters Thesis. 3 Credit Hours.**

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Repeatability:** This course may be repeated for additional credit.

**URBE 9999. Doctoral Dissertation. 1 to 6 Credit Hour.**

Open only to doctoral candidates who have successfully completed the minimum hours of coursework required for the degree, passed the preliminary examination, and have an approved proposal on file with the Graduate School. Continuous registration during the Fall and Spring semesters is required until the dissertation is completed and accepted by the Graduate School.

**Level Registration Restrictions:** Must be enrolled in one of the following Levels: Graduate.

**Student Attribute Restrictions:** Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

**Repeatability:** This course may be repeated for additional credit.

## Urology (UROL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

**UROL M290. Intro Clinical Urology. 0 Credit Hours.**

**Course Attributes:** M5

**Repeatability:** This course may not be repeated for additional credits.

**UROL M391. Career Exploration of Urology. 0 Credit Hours.**

This elective will allow students to gain exposure to the specialty and the types of health conditions experienced by patients seen by providers in this specialty as healthcare team members.

**Repeatability:** This course may be repeated for additional credit.

**UROL M790. Urology. 0 Credit Hours.**

**Course Attributes:** M2

**UROL M890. Urology Sub-I. 0 Credit Hours.**

Urology Sub-I satisfies the sub-I requirement for 4th year. Students will participate on the Urology service, in both the inpatient and outpatient setting. They will take on the role of an intern, including seeing consults, following patients, seeing patients in clinic and participating in OR cases. They will develop assessment and plans for the patients they are seeing.

**Repeatability:** This course may be repeated for additional credit.

# Faculty

---

## Beasley School of Law

*Alice G. Abreu*, The Honorable Nelson A. Diaz Professor of Law, Department of Law; JD, Cornell Law School.

*Olufunmilayo B. Arewa*, Murray H. Shusterman Professor in Transactional and Business Law, Department of Law; JD, Harvard Law School.

*Gilat Juli Bachar*, Assistant Professor, Department of Law; JSD, Stanford Law School.

*Jane B. Baron*, Professor, Department of Law; JD, Harvard Law School.

*Robert J. Bartow*, Laura H. Carnell Professor, Department of Law; LLM, Yale Law School.

*Edith Beerdsen*, Assistant Professor, Department of Law; JD, Columbia Law School.

*Zamir Ben-Dan*, Assistant Professor, Department of Law; JD, The City University of New York School of Law.

*Marian G. Braccia*, Practice Professor, Department of Law; JD, Temple University Beasley School of Law.

*Scott C. Burris*, Professor, Department of Law; JD, Yale Law School.

*Amy J. Cohen*, Professor and the Robert J. Reinstein Endowed Chair in Law, Department of Law; JD, Harvard Law School.

*Susan L. De Jarmatt*, Professor of Legal Research and Writing, Department of Law; JD, Temple University Beasley School of Law.

*Margaret M. Deguzman*, James E. Beasley Professor of Law, Department of Law; PhD, National University of Ireland.

*Michael A. Donnelly*, Practice Professor, Department of Law; JD, University of Chicago Law School.

*Erika M. Douglas*, Assistant Professor, Department of Law; LLM, Stanford University.

*Jeffrey L. Dunoff*, Laura H. Carnell Professor, Department of Law; LLM, Georgetown University Law Center.

*JoAnne A. Epps*, Professor, Department of Law; JD, Yale Law School.

*Jules M. Epstein*, Professor, Department of Law; JD, University of Pennsylvania School of Law.

*Gabriela Femenia*, Associate Professor of Instruction, Department of Law; JD, University of Pennsylvania Carey Law School.

*Roger C. Green*, Professor, Department of Law; PhD, Princeton University.

*Paul R. Gugliuzza*, Professor, Department of Law; JD, Tulane University School of Law.

*Donald P. Harris*, Professor, Department of Law; LLM, University of Wisconsin Law School.

*J. Benton Heath*, Assistant Professor, Department of Law; LLM, New York University School of Law.

*Duncan B. Hollis*, Laura H. Carnell Professor, Department of Law; JD, Boston College Law School.

*Kenneth A. Jacobsen*, Practice Professor, Department of Law; JD, Villanova University Charles Widger School of Law.

*Sarah R. Katz*, Professor of Law, Department of Law; JD, University of Pennsylvania Carey Law School.

*Nancy J. Knauer*, Sheller Professor of Public Interest Law, Department of Law; JD, University of Pennsylvania Carey Law School.

*Jennifer J. Lee*, Associate Professor, Department of Law; JD, Columbia Law School.

*Mary E. Levy*, Practice Professor, Department of Law; JD, Temple University Beasley School of Law.

*Tom C.W. Lin*, Jack E. Feinberg Professor in Litigation, Department of Law; JD, University of Pennsylvania Carey Law School.

*Elizabeth L. Lippy*, Practice Professor, Department of Law; JD, Temple University Beasley School of Law.

*Jonathan C. Lipson*, Professor and the Harold E. Kohn Chair in Law, Department of Law; JD, University of Wisconsin Law School.

*Laura E. Little*, James G. Schmidt Professor of Law, Department of Law; JD, Temple University Beasley School of Law.

*Gregory N. Mandel*, Professor, Department of Law; JD, Stanford Law School.

*Kathy C. Mandelbaum*, Practice Professor, Department of Law; JD, Harvard Law School.

*Jane Manners*, Assistant Professor, Department of Law; PhD, Princeton University.

*Ellie Margolis*, Professor of Legal Research and Writing, Department of Law; JD, Northeastern University School of Law.

*Finbarr McCarthy*, Associate Professor, Department of Law; JD, Tulane University School of Law.

*Salil K. Mehra*, Charles B. Klein Professor of Law, Department of Law; JD, University of Chicago Law School.

*Andrea Monroe*, Professor, Department of Law; LLM, New York University School of Law.

*Dennis W. Morrow*, Visiting Professor, Department of Law; JD, Temple University Beasley School of Law.

*Kristen E. Murray*, Professor, Department of Law; JD, Georgetown University Law Center.

*Trang (Mae) Nguyen*, Assistant Professor, Department of Law; JD, New York University School of Law.

*Lauren M. Ouziel*, Professor, Department of Law; JD, Columbia Law School.

*Rafael A. Porrata-Doria*, Professor, Department of Law; JD, Yale Law School.

*Mark C. Rahdert*, Professor, Department of Law; JD, Yale Law School.

*Jaya E. Ramji-Nogales*, I. Herman Stern Professor of Law for Research, Department of Law; LLM, Georgetown University Law Center.

*Spencer F. Rand*, Clinical Professor, Department of Law; JD, Case Western Reserve University School of Law.

*Evelyn M. Rangel-Medina*, Assistant Professor, Department of Law; JD, University of California, Berkeley Law.

*Rachel D. Rebouche*, Professor, Department of Law; LLM, Queen's University, Belfast.

*Harvey Rishikof*, Visiting Professor of Law, Department of Law; JD, New York University School of Law.

*Tina Saunders*, Associate Professor of Instruction in Law, Department of Law; JD, University of Maryland School of Law.

*James A. Shellenberger*, Professor, Department of Law; JD, Villanova University Charles Widger School of Law.

*Rahshanda K. Sibley*, Assistant Clinical Professor, Department of Law; JD, New York University School of Law.

*Amy Sinden*, Professor, Department of Law; JD, University of Pennsylvania Carey Law School.

*Patty Skuster*, Visiting Professor and the Phyllis W. Beck Chair in Law, Department of Law; JD, University of Michigan.

*Peter J. Spiro*, Charles R. Weiner Professor of Law, Department of Law; JD, University of Virginia School of Law.

*Bonny L. Tavares*, Associate Professor of Legal Research and Writing, Department of Law; JD, Howard University School of Law.

*Erol Gökhan Tolay*, Assistant Practice Professor, Department of Law; SJD, Temple University Beasley School of Law.

*Andrew M. Weiner*, Practice Professor, Department of Law; LLM, Georgetown University Law Center.

*Harwell Wells*, I. Herman Stern Professor of Law for Teaching, Department of Law; PhD, University of Virginia.

*Mo Zhang*, James E. Beasley Professor of Law, Department of Law; SJD, University of Pennsylvania Carey Law School.

## Boyer College of Music and Dance

*Charles Abramovic*, Professor, Department of Keyboard Studies; DMA, Temple University.

*Mitos Andaya Hart*, Associate Professor, Department of Vocal Arts; DMA, University of Kansas.

*Christine L. Anderson*, Associate Professor, Department of Vocal Arts; DMA, University of Cincinnati College-Conservatory of Music.

*Beth Bolton*, Associate Professor, Department of Music Education and Music Therapy; PhD, Temple University.

*Karen E. Bond*, Associate Professor, Department of Dance; PhD, La Trobe University.

*Darlene M. Brooks*, Associate Professor, Department of Music Education and Music Therapy; PhD, Temple University.

*Matthew Brunner*, Assistant Professor of Instruction, Department of Instrumental Studies; DMA, Indiana University.

*Sara Buechner*, Professor, Department of Keyboard Studies; DMA, Manhattan School of Music.

*Nathan Buonviri*, Associate Professor, Department of Music Education and Music Therapy; PhD, Temple University.

*David B. Cannata*, Associate Professor, Department of Music Studies; PhD, New York University.

*Dustin Cates*, Assistant Professor, Department of Music Education and Music Therapy; PhD, University of Missouri-Kansas City Conservatory of Music and Dance.

*Deborah A. Confredo*, Professor, Department of Music Education and Music Therapy; PhD, Florida State University.

*Patricia Cornett*, Assistant Professor, Department of Instrumental Studies; DMA, University of Michigan.

*Marcus DeLoach*, Associate Professor, Department of Vocal Arts; DMA, Rice University.

*Alexander deVaron*, Associate Professor of Instruction, Department of Music Studies; DMA, Temple University.

*Rollo A. Dilworth*, Professor, Department of Music Education and Music Therapy; DMA, Northwestern University.

*Sherril Dodds*, Professor, Department of Dance; PhD, University of Surrey.

*Stephanie Doktor*, Assistant Professor, Department of Music Studies; PhD, University of Virginia.

*Lillian Eyre*, Visiting Professor, Department of Music Education and Music Therapy; PhD, Temple University.

*Edward Flanagan*, Associate Professor, Department of Music Studies; PhD, Temple University.

*Rachelle Fleming*, Associate Professor, Department of Vocal Arts; DMA, University of Miami.

*Mark Franko*, Laura H. Carnell Professor, Department of Dance; PhD, Columbia University.

*Shana Goldin-Perschbacher*, Associate Professor, Department of Music Studies; PhD, University of Virginia.

*Lorie A. Gratis Harris*, Assistant Professor of Instruction, Department of Vocal Arts; DMA, Temple University.

*Matthew J. Greenbaum*, Professor, Department of Music Studies; PhD, City University of New York.

*Suzanne Hall*, Associate Professor, Department of Music Education and Music Therapy; PhD, University of Memphis.

*Jillian Harris*, Associate Professor, Department of Dance; MFA, New York University Tisch School of the Arts.

*yaTande Whitney V. Hunter*, Assistant Professor, Department of Dance; PhD, Institute for Doctoral Studies in the Visual Arts.

*Lawrence R. Indik*, Associate Professor of Practice, Department of Vocal Arts; DMA, Manhattan School of Music.

*Laura E. Katz Rizzo*, Associate Professor, Department of Dance; PhD, Temple University.

*Gregory S. Kettinger*, Instructor, Department of Music Studies; BM, Temple University.

*Joann M. Kirchner*, Assistant Professor of Instruction, Department of Keyboard Studies; PhD, University of Oklahoma.

*Michael Klein*, Professor, Department of Music Studies; PhD, State University of New York at Buffalo.

*Jan L. Krzywicki*, Professor, Department of Music Studies; MM, Philadelphia Musical Academy.

*Edward D. Latham*, Associate Professor, Department of Music Studies; PhD, Yale University.

*Kathryn Leemhuis*, Assistant Professor, Department of Vocal Arts; DMA, University of Cincinnati College-Conservatory of Music.

*Joyce Z. Lindorff*, Professor, Department of Keyboard Studies; DMA, The Juilliard School.

*Wendy Magee*, Professor, Department of Music Education and Music Therapy; PhD, University of Sheffield.

*Noriko Manabe*, Associate Professor, Department of Music Studies; PhD, Graduate Center, City University of New York.

*David McDonnell*, Assistant Professor of Instruction, Department of Music Studies; DMA, University of Cincinnati College-Conservatory of Music.

*Alisha C. Nypaver*, Instructor, Department of Music Studies; MM, Temple University.

*Phillip R. O'Banion*, Associate Professor, Department of Instrumental Studies; MM, University of Colorado.

*Richard D. Oatts*, Professor, Department of Music Studies.

*Lambert T. Orkis*, Professor, Department of Keyboard Studies; MM, Temple University.

*Elizabeth C. Parker*, Associate Professor, Department of Music Education and Music Therapy; PhD, University of Nebraska-Lincoln.

*David Pasbrig*, Associate Professor of Instruction, Department of Music Studies; DMA, Temple University.

*Paul Rardin*, Elaine Brown Chair in Choral Music and Associate Professor, Department of Vocal Arts; DMA, University of Michigan.

*Alison M. Reynolds*, Professor, Department of Music Education and Music Therapy; PhD, Temple University.

*Eduard Schmieder*, Laura H. Carnell Professor, Department of Instrumental Studies; DMA equiv., Gneissen Russian Academy of Music.

*Helen Shoemark*, Professor, Department of Music Education and Music Therapy; PhD, University of Melbourne.

*Jeffrey G. Solow*, Professor, Department of Instrumental Studies; BA, University of California Los Angeles.

*Merián Soto*, Professor, Department of Dance; MA, Columbia University.

*Terell L. Stafford*, Laura H. Carnell Professor, Department of Music Studies; MM, Rutgers University.

*Robert T. Stroker*, Professor, Department of Music Education and Music Therapy; PhD, Michigan State University.

*Christopher Turbessi*, Instructor, Department of Vocal Arts; MM, University of Michigan.

*Adam Vidiksis*, Assistant Professor, Department of Music Studies; DMA, Temple University.

*Timothy Warfield*, Visiting Professor, Department of Music Studies.

*Lindsay Weightman*, Associate Professor of Instruction, Department of Music Studies; DMA, Manhattan School of Music.

*Samuel Wells*, Assistant Professor of Instruction, Department of Music Studies; DMA, California Institute of the Arts.

*Maurice W. Wright*, Laura H. Carnell Professor, Department of Music Studies; DMA, Columbia University.

*Xiang Xu*, Assistant Professor, Department of Dance; MFA, New York University Tisch School of the Arts.

*Michael L. Zanders*, Assistant Professor, Department of Music Education and Music Therapy; PhD, Temple University.

*Steven D. Zohn*, Laura H. Carnell Professor, Department of Music Studies; PhD, Cornell University.

## **College of Education and Human Development**

*Gregory Anderson*, Professor, Department of Policy, Organizational and Leadership Studies; PhD, City University of New York.

*Crystal L. Austin*, Assistant Professor of Instruction, Department of Psychological Studies in Education; PhD, University at Albany, State University of New York.

*Janelle M. Bailey*, Associate Professor, Department of Teaching and Learning; PhD, University of Arizona.

*Julie L. Booth*, Professor, Department of Teaching and Learning; PhD, Carnegie Mellon University.

*Jean A. Boyer*, Assistant Professor of Instruction, Department of Teaching and Learning; PhD, University of Cincinnati.

*Joseph Boyle*, Associate Professor, Department of Teaching and Learning; PhD, University of Kansas.

*Carol B. Brandt*, Associate Professor, Department of Teaching and Learning; PhD, University of New Mexico.

*Wanda M. Brooks*, Professor, Department of Teaching and Learning; EdD, University of Pennsylvania.

*Kathryn Burke*, Research Assistant Professor, Department of Teaching and Learning; PhD, University of Kansas.

*James P. Byrnes*, Professor, Department of Psychological Studies in Education; PhD, Temple University.

*Sarah A. Cordes*, Associate Professor, Department of Policy, Organizational and Leadership Studies; PhD, New York University.

*Maia Bloomfield Cucchiara*, Associate Professor, Department of Teaching and Learning; PhD, University of Pennsylvania.

*James Earl Davis*, Professor, Department of Policy, Organizational and Leadership Studies; PhD, Cornell University.

*Sarah Elizabeth Diamond*, Associate Professor of Practice, Department of Teaching and Learning; PhD, Auburn University.

*Meixia Ding*, Associate Professor, Department of Teaching and Learning; PhD, Texas A and M University.

*Arthur G. Dowdy*, Assistant Professor, Department of Teaching and Learning; PhD, Temple University.

*Joseph P. DuCette*, Professor, Department of Psychological Studies in Education; PhD, Cornell University.

*Richard M. Englert*, Professor and Chancellor, Department of Policy, Organizational and Leadership Studies; EdD, University of California Los Angeles.

*Armando X. Estrada*, Associate Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of Texas at El Paso.

*Frank H. Farley*, Professor Emeritus, Department of Psychological Studies in Education; PhD, University of London.

*Catherine A. Fiorello*, Professor, Department of Psychological Studies in Education; PhD, University of Kentucky.

*Judith Flanigan*, Associate Professor of Instruction, Department of Teaching and Learning; PhD, Temple University.

*Timothy P. Fukawa-Connelly*, Professor, Department of Teaching and Learning; PhD, University of Maryland.

*Allison Gilmour*, Assistant Professor, Department of Teaching and Learning; PhD, Vanderbilt University.

*Sally A. Gould-Taylor*, Research Associate Professor, Department of Teaching and Learning; PhD, Temple University.

*John Hall*, Assistant Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of California Berkeley.

*Insook Han*, Associate Professor, Department of Teaching and Learning; EdD, Columbia University, Teachers College.

*Shanta Hattikudur*, Associate Professor of Instruction, Department of Policy, Organizational and Leadership Studies; PhD, University of Wisconsin-Madison.

*Annemarie H. Hindman*, Professor, Department of Teaching and Learning; PhD, University of Michigan.

*Heidi Hutman*, Assistant Professor of Instruction, Department of Psychological Studies in Education; PhD, University of Albany.

*Xu (Lilya) Jiang*, Assistant Professor, Department of Psychological Studies in Education; PhD, University of South Carolina.

*Jennifer Johnson*, Assistant Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of Maryland College Park.

*Paul Jones*, Assistant Professor, Department of Psychological Studies in Education; PhD, Temple University.

*Avshalom Kaplan*, Professor, Department of Psychological Studies in Education; PhD, University of Michigan.

*Suzanne Kelley*, Clinical Assistant Professor, Department of Teaching and Learning; PhD, Temple University.

*Julie Beth Kessler*, Associate Professor of Instruction, Department of Teaching and Learning; PhD, Temple University.

*Janice H. Laurence*, Professor, Department of Psychological Studies in Education; PhD, George Mason University.

*Di Liu*, Assistant Professor of Instruction, Department of Teaching and Learning; EdD, Boston University.

*Christopher W. McGinley*, Professor of Practice, Department of Policy, Organizational and Leadership Studies; EdD, University of Pennsylvania.

*Kelly M. McGinn*, Assistant Professor, Department of Psychological Studies in Education; PhD, Temple University.

*Sabina Neugebauer*, Associate Professor, Department of Teaching and Learning; EdD, Harvard University.

*Kristie Jones Newton*, Professor, Department of Teaching and Learning; PhD, University of Maryland College Park.

*Beth Olanoff*, Associate Professor of Instruction, Department of Policy, Organizational and Leadership Studies; JD, University of Pennsylvania.

*Timothy J. Patterson*, Assistant Professor, Department of Teaching and Learning; PhD, Columbia University, Teachers College.

*Laura Pendergast*, Associate Professor, Department of Psychological Studies in Education; PhD, The Pennsylvania State University.

*Charles Price*, Associate Professor, Department of Policy, Organizational and Leadership Studies; PhD, Graduate Center, City University of New York.

*M. Meghan Raisch*, Assistant Professor of Instruction, Department of Policy, Organizational and Leadership Studies; PhD, Temple University.

*Jessica Reinhardt*, Associate Professor of Practice, Department of Psychological Studies in Education; PhD, University of Denver.

*Jayminn S. Sanford-DeShields*, Associate Professor, Department of Teaching and Learning; EdD, Harvard University.

*W. Joel Schneider*, Professor, Department of Policy, Organizational and Leadership Studies; PhD, Texas A and M University.

*Lori A. Shorr*, Associate Professor of Instruction, Department of Psychological Studies in Education; PhD, University of Pittsburgh.

*Michael W. Smith*, Professor, Department of Teaching and Learning; PhD, University of Chicago.

*Judith C. Stull*, Research Professor, Department of Policy, Organizational and Leadership Studies; PhD, Boston College.

*Jill May Swavely*, Professor of Instruction, Department of Teaching and Learning; EdD, Temple University.

*Matthew J. Tincani*, Professor, Department of Teaching and Learning; PhD, The Ohio State University.

*Renee M. Tobin*, Professor, Department of Psychological Studies in Education; PhD, Texas A and M University.

*Benjamin Torsney*, Assistant Professor of Instruction, Department of Policy, Organizational and Leadership Studies; PhD, Temple University.

*Jason C. Travers*, Associate Professor, Department of Teaching and Learning; PhD, University of Nevada, Las Vegas.

*Matthew J. Elvis Wagner*, Associate Professor, Department of Teaching and Learning; EdD, Columbia University, Teachers College.

*Daniel Walinsky*, Associate Professor of Instruction, Department of Psychological Studies in Education; PhD, University of North Dakota.

*Barbara A. Wasik*, Professor and the PNC Chair in Early Childhood Education, Department of Teaching and Learning; PhD, Temple University.

*Diana L. Wildermuth*, Associate Professor of Practice, Department of Psychological Studies in Education; PhD, Temple University.

*Jason Wingard*, Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of Pennsylvania.

*Christine A. Woyshner*, Professor, Department of Teaching and Learning; EdD, Harvard University.

## College of Engineering

*Bechara E. Abboud*, Associate Professor, Department of Civil and Environmental Engineering; PhD, Drexel University.

*Fauzia Ahmad*, Associate Professor, Department of Electrical and Computer Engineering; PhD, University of Pennsylvania.

*Mohammad Ali Al-Adaileh*, Assistant Professor of Instruction, Department of Engineering, Technology, and Management; PhD, Ohio University.

*Maryam Alibeik*, Assistant Professor of Instruction, Department of Electrical and Computer Engineering; PhD, Purdue University.

*Gangadhar Andaluri*, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Temple University.

*Berk Ayranci*, Instructor, Department of Engineering, Technology, and Management; MSME, Temple University.

*Li Bai*, Professor, Department of Electrical and Computer Engineering; PhD, Drexel University.

*Evangelia Bellas*, Assistant Professor, Department of Bioengineering; PhD, Tufts University.

*Saroj K. Biswas*, Professor, Department of Electrical and Computer Engineering; PhD, University of Ottawa.

*Achinta Bordoloi*, Research Assistant Professor, Department of Civil and Environmental Engineering; PhD, University of Canterbury.

*Robert M. Brooks*, Associate Professor, Department of Civil and Environmental Engineering; PhD, Indian Institute of Technology.

*Cory Budischak*, Associate Professor of Instruction, Department of Electrical and Computer Engineering; PhD, University of Delaware.

*Shih-Jiun Chen*, Professor, Department of Mechanical Engineering; PhD, Drexel University.

*Harsh Deep Chopra*, Professor, Department of Mechanical Engineering; PhD, University of Maryland College Park.

*Joseph Thomas Coe Jr.*, Associate Professor, Department of Civil and Environmental Engineering; PhD, University of California Los Angeles.

*Richard S. Cohen*, Associate Professor, Department of Mechanical Engineering; PhD, Princeton University.

*Philip Dames*, Assistant Professor, Department of Mechanical Engineering; PhD, University of Pennsylvania.

*Kurosh Darvish*, Professor, Department of Mechanical Engineering; PhD, University of Virginia.

*Zdenka J. Delalic*, Associate Professor, Department of Electrical and Computer Engineering; PhD, University of Pennsylvania.

*Yasir Demiryurek*, Assistant Professor of Instruction, Department of Mechanical Engineering; MS, Rutgers University.

*Dmitriy A. Dikin*, Research Associate Professor, Department of Mechanical Engineering; PhD, National Academy of Sciences of Ukraine, Institute for Low Temperature Physics and Engineering.

*Julie Drzymalski*, Professor of Instruction, Department of Engineering, Technology, and Management; PhD, Lehigh University.

*Liang Du*, Assistant Professor, Department of Electrical and Computer Engineering; PhD, Georgia Institute of Technology.

*Thomas V. Edwards*, Associate Professor of Instruction, Department of Engineering, Technology, and Management; DPS, Pace University.

*Ahmed Faheem*, Associate Professor, Department of Civil and Environmental Engineering; PhD, University of Wisconsin.

*James A. Furmato*, Assistant Professor of Instruction, Department of Bioengineering; PhD, Drexel University.

*Jonathan Arye Gerstenhaber*, Assistant Professor of Instruction, Department of Bioengineering; PhD, Temple University.

*Bojana Gligorijevic*, Associate Professor, Department of Bioengineering; PhD, Georgetown University.

*Yah-el Har-el*, Associate Professor of Instruction, Department of Bioengineering; PhD, Johns Hopkins University.

*John J. Helferty*, Associate Professor, Department of Electrical and Computer Engineering; PhD, Drexel University.

*Hamid Heravi*, Assistant Professor of Instruction, Department of Mechanical Engineering; PhD, University of Cardiff.

*Parsaoran Hutapea*, Professor, Department of Mechanical Engineering; PhD, North Carolina State University.

*Daniel A. Jacobs*, Assistant Professor, Department of Mechanical Engineering; PhD, Stanford University.

*Dimitri Karagiannis*, Assistant Professor of Instruction, Department of Mechanical Engineering; PhD, Villanova University.

*Mehdi Khanzadeh Moradillo*, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Oklahoma State University.

*Mohammad F. Kiani*, Professor, Department of Mechanical Engineering; PhD, Louisiana Tech University.

*Sanghun Kim*, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Syracuse University.

*Paul A. Laviola*, Instructor, Department of Engineering, Technology, and Management; MS, Widener University.

*Peter Lelkes*, Laura H. Carnell Professor, Department of Bioengineering; PhD, RWTH Aachen University.

*Michel Lemay*, Professor, Department of Bioengineering; PhD, Case Western Reserve University.

*Haijun Liu*, Associate Professor, Department of Mechanical Engineering; PhD, University of Maryland College Park.

*Ling Liu*, Associate Professor, Department of Mechanical Engineering; PhD, Columbia University.

*Erica R. McKenzie*, Associate Professor, Department of Civil and Environmental Engineering; PhD, University of California Davis.

*Iyad Obeid*, Associate Professor, Department of Electrical and Computer Engineering; PhD, Duke University.

*Ruth Ochia*, Professor of Instruction, Department of Bioengineering; PhD, University of Washington.

*Chetan A. Patil*, Assistant Professor, Department of Bioengineering; PhD, Vanderbilt University.

*Vallorie J. Peridier*, Associate Professor, Department of Mechanical Engineering; PhD, Lehigh University.

*Joseph Picone*, Professor, Department of Electrical and Computer Engineering; PhD, Illinois Institute of Technology.

*Alex Pillapakkam*, Associate Professor of Instruction, Department of Mechanical Engineering; PhD, New Jersey Institute of Technology.

*Nancy Pleshko*, Laura H. Carnell Professor, Department of Bioengineering; PhD, Rutgers University.

*William Querido Maciel*, Research Assistant Professor, Department of Bioengineering; PhD, Université de Haute-Alsace Mulhouse-Colmar.

*Fei Ren*, Associate Professor, Department of Mechanical Engineering; PhD, Michigan State University.

*Laura D. Riggio*, Assistant Professor of Instruction, Department of Mechanical Engineering; PhD, Lehigh University.

*Robert J. Ryan*, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Drexel University.

*Keyanoush Sadeghipour*, Professor, Department of Mechanical Engineering; PhD, University of Manchester Institute of Science and Technology.

*Elham Sahraei*, Assistant Professor, Department of Mechanical Engineering; PhD, George Washington University.

*Liliana Schwartz*, Associate Professor of Instruction, Department of Engineering, Technology, and Management; PhD, Ben-Gurion University of the Negev.

*Anita Singh*, Associate Professor, Department of Bioengineering; PhD, Wayne State University.

*Damoon Soudbakhsh*, Assistant Professor, Department of Mechanical Engineering; PhD, George Washington University.

*Andrew Spence*, Associate Professor, Department of Bioengineering; PhD, Cornell University.

*Rominder Suri*, Professor, Department of Civil and Environmental Engineering; PhD, Michigan Technological University.

*Rouzbeh Tehrani*, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Temple University.

*Brian F. Thomson*, Associate Professor of Instruction, Department of Electrical and Computer Engineering; PhD, The Pennsylvania State University.

*Erkan Tüzel*, Associate Professor, Department of Bioengineering; PhD, University of Minnesota.

*Philip D. Udo-Inyang*, Associate Professor, Department of Civil and Environmental Engineering; PhD, University of Missouri-Columbia.

*Felix F. Udoeyo*, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Abubakar Tafawa Balewa University.

*Evelyn Walters*, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Technische Universität München.

*Han Wang*, Assistant Professor, Department of Electrical and Computer Engineering.

*Karin Wang*, Assistant Professor, Department of Bioengineering; PhD, Cornell University.

*Chang-Hee Won*, Professor, Department of Electrical and Computer Engineering; PhD, University of Notre Dame.

*Heyang Yuan*, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Virginia Polytechnic Institute and State University.

*Yimin Daniel Zhang*, Associate Professor, Department of Electrical and Computer Engineering; PhD, University of Tsukuba.

*Yichuan Zhu*, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Texas A and M University.

## College of Liberal Arts

*Casarae Abdul-Ghani*, Assistant Professor, Department of English; PhD, Purdue University.

*Zain Abdullah*, Associate Professor, Department of Religion; PhD, The New School for Social Research.

*Elizabeth Adams*, Instructor, Department of Criminal Justice; PhD, Michigan State University.

*Hiram Aldarondo*, Associate Professor, Department of Spanish and Portuguese; PhD, University of Chicago.

*Lauren B. Alloy*, Laura H. Carnell Professor, Department of Psychology and Neuroscience; PhD, University of Pennsylvania.

*Cate Almon*, Associate Professor of Instruction, Department of First Year Writing Program; EdD, Temple University.

*Rebecca T. Alpert*, Professor Emerita, Department of Religion; PhD, Temple University.

*Eli Alshanetsky*, Assistant Professor, Department of Philosophy; PhD, New York University.

*Michael Altimore*, Professor of Instruction, Department of Sociology; PhD, University of Iowa.

*Elizabeth Alvarez*, Associate Professor of Instruction, Department of Religion; PhD, University of Chicago Divinity School.

*Nilgün Anadolu-Okur*, Professor, Department of Africology and African American Studies; PhD, Hacettepe University.

*Reynaldo Anderson*, Associate Professor, Department of Africology and African American Studies; PhD, University of Nebraska-Lincoln.

*Max Andrucki*, Associate Professor of Instruction, Department of Geography and Urban Studies; PhD, University of Leeds.

*Molefi Kete Asante*, Professor, Department of Africology and African American Studies; PhD, University of California Los Angeles.

*Philip Atkins*, Associate Professor of Instruction, Department of Philosophy; PhD, University of California Santa Barbara.

*Melissa Auerbach*, Assistant Professor of Instruction, Department of Psychology and Neuroscience; PhD, State University of New York at Stony Brook.

*Kathleen Auerhahn*, Associate Professor, Department of Criminal Justice; PhD, University of California Riverside.

*James D. Bachmeier*, Associate Professor, Department of Sociology; PhD, University of California Irvine.

*Marcia B. Bailey*, Associate Professor of Instruction, Department of Intellectual Heritage Program; PhD, Colgate Rochester Crozer Divinity.

*Chloé Bakalar*, Assistant Professor, Department of Political Science; PhD, University of Pennsylvania.

*Ronald W. Webb*, Instructor, Department of Latin American Studies Program; PhD, The Pennsylvania State University.

*Douglas Webber*, Associate Professor, Department of Economics; PhD, Cornell University.

*Marsha A. Weinraub*, Professor Emerita, Department of Psychology and Neuroscience; PhD, University of Michigan.

*Robert W. Weisberg*, Professor, Department of Psychology and Neuroscience; PhD, Princeton University.

*Charles A. Weitz*, Professor, Department of Anthropology; PhD, The Pennsylvania State University.

*Timothy Welbeck*, Assistant Professor of Instruction, Department of Africology and African American Studies; JD, Villanova University.

*Susan Wells*, Professor Emerita, Department of English; PhD, University of Texas at Austin.

*Wayne N. Welsh*, Professor, Department of Criminal Justice; PhD, University of California Irvine.

*Gabriel Wettach*, Professor of Instruction, Department of English; PhD, Purdue University.

*Sydney D. White*, Associate Professor, Department of Religion; PhD, University of California Berkeley.

*Catherine Wiley*, Associate Professor of Instruction, Department of English; PhD, Temple University.

*Kimberly D. Williams*, Associate Professor, Department of Anthropology; PhD, The Ohio State University.

*Lalain Williams*, Instructor, Department of Psychology and Neuroscience; MS, Capella University.

*Roland L. Williams Jr.*, Professor, Department of English; PhD, University of Pennsylvania.

*Mathieu E. Wimmer*, Assistant Professor, Department of Psychology and Neuroscience; PhD, University of Pennsylvania.

*Gregory Winch*, Assistant Professor of Instruction, Department of First Year Writing Program; PhD, Southern Illinois University.

*Brad Windhauser*, Professor of Instruction, Department of First Year Writing Program; MFA, Queens University of Charlotte.

*Steven Windisch*, Assistant Professor, Department of Criminal Justice; PhD, University of Nebraska.

*Celeste M. Winston*, Assistant Professor, Department of Geography and Urban Studies; PhD, City University of New York.

*Gordon Witty*, Assistant Professor of Instruction, Department of Asian and Middle Eastern Languages and Studies; MA, University of Pennsylvania.

*David Wolfsdorf*, Professor, Department of Philosophy; PhD, University of Chicago.

*Wendy H. Wong*, Assistant Professor of Instruction, Department of Intellectual Heritage Program; PhD, Temple University.

*Jennifer D. Wood*, Professor, Department of Criminal Justice; PhD, University of Toronto.

*Alese Wooditch*, Associate Professor, Department of Criminal Justice; PhD, George Mason University.

*Matt Wray*, Associate Professor, Department of Sociology; PhD, University of California Berkeley.

*Hongling Xie*, Associate Professor, Department of Psychology and Neuroscience; PhD, University of North Carolina at Chapel Hill.

*Sean Yom*, Associate Professor, Department of Political Science; PhD, Harvard University.

*Reiko Yoshida*, Instructor, Department of Asian and Middle Eastern Languages and Studies; MA, West Chester University.

*Ralph F. Young*, Professor of Instruction, Department of History; PhD, Michigan State University.

*Amarat Zaatut*, Assistant Professor, Department of Criminal Justice; PhD, Rutgers University.

*Janire Zalbidea*, Assistant Professor, Department of Spanish and Portuguese; PhD, Georgetown University.

*Lu Zhang*, Associate Professor, Department of Sociology; PhD, Johns Hopkins University.

*Shanyang Zhao*, Professor, Department of Sociology; PhD, University of Maryland.

*Yun Zhu*, Associate Professor, Department of Asian and Middle Eastern Languages and Studies; PhD, University of South Carolina.

*Rebekah Zhuraw*, Associate Professor of Instruction, Department of Intellectual Heritage Program; PhD, University of Pennsylvania.

*Adam Ziegfeld*, Associate Professor, Department of Political Science; PhD, Massachusetts Institute of Technology.

## College of Public Health

*William Aaronson III*, Associate Professor, Department of Health Services Administration and Policy; PhD, Temple University.

*Cynthia R. Abbott-Gaffney*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; MA, Boston University.

*Rebecca Alper*, Assistant Professor, Department of Communication Sciences and Disorders; PhD, University of Iowa.

*Susannah Anderson*, Assistant Professor of Instruction, Department of Social and Behavioral Sciences; PhD, Tulane University.

*Robin Aronow*, Instructor, Department of Communication Sciences and Disorders; MA, University of Delaware.

*Laura Baehr*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Temple University.

*Sarah Bauerle Bass*, Associate Professor, Department of Social and Behavioral Sciences; PhD, Temple University.

*Loretta Ann Bassion*, Clinical Assistant Professor, Department of Nursing; DNP, Drexel University.

*Lisa M. Bedore*, Professor, Department of Communication Sciences and Disorders; PhD, Purdue University.

*Janet P. Bettger*, Professor, Department of Health and Rehabilitation Sciences; ScD, Boston University.

*Amelia Bieda*, Associate Professor of Instruction, Department of Nursing; PhD, Case Western Reserve University.

*Linda Bomboka Wilson*, Assistant Professor of Instruction, Department of Social and Behavioral Sciences; PhD, University of South Florida.

*Algje Lakesa Bond*, Assistant Professor of Instruction, Department of Health Services Administration and Policy; MHA, Saint Joseph's University.

*Andrea R. Branas*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Arcadia University.

*Susan Brotherton*, Assistant Professor of Instruction, Department of Social Work; MSW, Temple University.

*Jennifer Brown*, Assistant Professor of Instruction, Department of Nursing; DNP, Walden University.

*Heather J. Burket*, Instructor, Department of Health and Rehabilitation Sciences; MEd, Temple University.

*Scott Burns*, Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, University of Colorado Denver.

*Lauren E. Burrows*, Assistant Professor of Instruction, Department of Communication Sciences and Disorders; DPhil, University of Memphis.

*Cheri E. Carter*, Associate Professor of Instruction, Department of Social Work; PhD, University of Delaware.

*Chaudron Carter Short*, Professor of Instruction, Department of Nursing; EdD, Saint Joseph's University.

*Susan S. Caspari*, Instructor, Department of Communication Sciences and Disorders; MA, Temple University.

*Wendy Cheesman*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Temple University.

*Sezgin Ciftci*, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, Middle East Technical University.

*Marissa Cloutier*, Assistant Professor of Instruction, Department of Social and Behavioral Sciences; DSc, Harvard University.

*Bradley N. Collins*, Professor, Department of Social and Behavioral Sciences; PhD, State University of New York at Binghamton.

*Lorri L. Collins*, Clinical Instructor, Department of Nursing; MSN, Drexel University.

*Susan E. Connor*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Thomas Jefferson University.

*Revy O. Corbett*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, University of Virginia.

*LaVonne E. Couch*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, The College of St. Scholastica.

*Jeanne Coviello*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Thomas Jefferson University.

*Patricia A. Crane*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Widener University.

*Tamika Curry*, Assistant Professor of Instruction, Department of Health Services Administration and Policy; PhD, Temple University.

*Gayle DeDe*, Research Associate Professor, Department of Communication Sciences and Disorders; PhD, Boston University.

*Melissa Dichter*, Associate Professor, Department of Social Work; PhD, University of Pennsylvania.

*Susan B. Dickey*, Associate Professor, Department of Nursing; PhD, University of Pennsylvania.

*Deirdre Dingman*, Associate Professor of Instruction, Department of Social and Behavioral Sciences; DrPH, University of North Carolina at Greensboro.

*Ann E. Dolloff*, Instructor, Department of Health and Rehabilitation Sciences; MEd, Temple University.

*Kathleen M. Donocoff*, Clinical Assistant Professor, Department of Communication Sciences and Disorders; MS, La Salle University.

*Jeffrey N. Draine*, Professor, Department of Social Work; PhD, University of Pennsylvania.

*Levent Dumenci*, Professor, Department of Epidemiology and Biostatistics; PhD, Iowa State University.

*Bari Dzomba*, Associate Professor of Instruction, Department of Health Services Administration and Policy; PhD, Alvernia University.

*Jasmine Edwards*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Temple University.

*William E. Egan*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Regis University.

*Karin Eyrich-Garg*, Associate Professor, Department of Social Work; PhD, Washington University in St. Louis.

*Jay S. Fagan*, Professor Emeritus, Department of Social Work; PhD, Columbia University.

*Marina Oktapodas Feiler*, Research Assistant Professor, Department of Epidemiology and Biostatistics; PhD, University of Rochester.

*Lisa Ferretti*, Research Assistant Professor, Department of Social Work; MSW, University at Albany, State University of New York.

*Jennifer Orlet Fisher*, Professor, Department of Social and Behavioral Sciences; PhD, The Pennsylvania State University.

*Cathy A. Flite*, Associate Professor of Instruction, Department of Health Services Administration and Policy; MEd, Widener University.

*Margaret M. Foley*, Associate Professor of Instruction, Department of Health Services Administration and Policy; PhD, Temple University.

*Anne Frankel*, Associate Professor of Instruction, Department of Social and Behavioral Sciences; PhD, Florida International University.

*Kathryn Fritz*, Assistant Professor of Instruction, Department of Kinesiology; PhD, University of Georgia.

*Felicidad M. Garcia*, Assistant Professor of Instruction, Department of Communication Sciences and Disorders; MS, Columbia University.

*Lina-Maria Garcia*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Temple University.

*Heather M. Gardiner*, Associate Professor, Department of Social and Behavioral Sciences; PhD, State University of New York at Buffalo.

*Jeffrey Gehris*, Associate Professor of Instruction, Department of Kinesiology; PhD, Temple University.

*Catherine Gibbs*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; BSN, Thomas Jefferson University.

*Letitia Gill Gembala*, Associate Professor of Instruction, Department of Nursing; DNP, Duquesne University.

*Susan Gresko*, Assistant Professor of Instruction, Department of Nursing; MSN, University of Pennsylvania.

*Matthew Hall*, Assistant Professor, Department of Communication Sciences and Disorders; PhD, University of California San Diego.

*Inkyu Han*, Associate Professor, Department of Epidemiology and Biostatistics; PhD, Rutgers, The State University of New Jersey.

*Joelle D. Hargraves*, Associate Professor of Instruction, Department of Nursing; DNP, Chatham University.

*Kyle Harris*, Instructor, Department of Kinesiology; MS, Temple University.

*Chantelle Hart*, Professor, Department of Social and Behavioral Sciences; PhD, Case Western Reserve University.

*Jonathan M. Hartmann*, Instructor, Department of Communication Sciences and Disorders; MA, Gallaudet University.

*DaVonti' DeAngelo Haynes*, Assistant Professor of Instruction, Department of Social Work; PhD, The Ohio State University.

*Kathryn A. Helland*, Clinical Instructor, Department of Communication Sciences and Disorders; MS, William Paterson University of New Jersey.

*Elizabeth Heller Murray*, Assistant Professor, Department of Communication Sciences and Disorders; PhD, Boston University.

*Kaitlyn Heron*, Clinical Instructor, Department of Nursing; MSN, Drexel University.

*Beth Heuer*, Associate Professor of Instruction, Department of Nursing; DNP, Robert Morris University.

*Shivayogi V. Hiremath*, Assistant Professor, Department of Health and Rehabilitation Sciences; PhD, University of Pittsburgh.

*Ilene L. Hollin*, Assistant Professor, Department of Health Services Administration and Policy; PhD, Johns Hopkins University.

*Cheryl A. Hyde*, Associate Professor, Department of Social Work; PhD, University of Michigan.

*Jennifer K. Ibrahim*, Associate Professor, Department of Health Services Administration and Policy; PhD, University of California Berkeley.

*Graciela Jaschek*, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, University of Maryland.

*Laura Johnson*, Assistant Professor, Department of Social Work; PhD, Rutgers, The State University of New Jersey.

*Lauren Gabrielle Johnson*, Assistant Professor of Instruction, Department of Nursing; PhD, University of Pennsylvania.

*Lisa A. Johnson*, Associate Professor of Instruction, Department of Nursing; DrNP, Drexel University.

*Resa M. Jones*, Associate Professor, Department of Epidemiology and Biostatistics; PhD, University of Minnesota.

*Hoda Jradi*, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, The Ohio State University.

*Zebulon V. Kendrick*, Professor, Department of Kinesiology; PhD, Temple University.

*Emily Keshner*, Professor Emerita, Department of Health and Rehabilitation Sciences; EdD, Columbia University.

*Julia Kobulsky*, Assistant Professor, Department of Social Work; PhD, Case Western Reserve University.

*Sara J. Kovacs*, Associate Professor of Instruction, Department of Kinesiology; PhD, University of Pittsburgh.

*Rena A. Krakow*, Associate Professor, Department of Communication Sciences and Disorders; PhD, Yale University.

*Erin R. Kulick*, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, Columbia University.

*Joseph A. Kumi*, Instructor, Department of Social Work; MSW, Florida State University.

*Yanda Lang*, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, Western Michigan University.

*Margorie H. Lehigh*, Clinical Instructor, Department of Nursing; MSN, American Sentinel University.

*Stephen J. Lepore*, Professor, Department of Social and Behavioral Sciences; PhD, University of California Irvine.

*Beth A. Levine*, Instructor, Department of Communication Sciences and Disorders; MS, Boston University.

*Wenxue Lin*, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, The Pennsylvania State University.

*Barbara A. Little*, Clinical Instructor, Department of Nursing; MS, La Salle University.

*Jialiang Liu*, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, University of North Texas.

*Amy Lynch*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, University of Delaware.

*Raven E. Lynch*, Assistant Professor of Instruction, Department of Social Work; PhD, The Ohio State University.

*Edwin Maas*, Associate Professor, Department of Communication Sciences and Disorders; PhD, San Diego State University.

*Jamie Mansell*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

*Nadine Martin*, Laura H. Carnell Professor, Department of Communication Sciences and Disorders; PhD, Temple University.

*Bettyanne Matase*, Assistant Professor, Department of Nursing; DNP, Walden University.

*Karen McBride*, Assistant Professor of Instruction, Department of Health Services Administration and Policy; MS, Philadelphia University.

*Philip McCallion*, Professor, Department of Social Work; PhD, University at Albany, State University of New York.

*Bryan P. McCormick*, Professor, Department of Health and Rehabilitation Sciences; PhD, Clemson University.

*Jane McDevitt*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

*Brian D. McHugh*, Associate Professor, Department of Communication Sciences and Disorders; PhD, University of California Los Angeles.

*Gabriella M. McLoughlin*, Assistant Professor, Department of Kinesiology; PhD, University of Illinois at Urbana-Champaign.

*Nicholas S. Mirabito*, Instructor, Department of Kinesiology; MS, Temple University.

*C. Daniel Moser*, Assistant Professor of Instruction, Department of Kinesiology; PhD, Temple University.

*Pricila Mullachery*, Assistant Professor, Department of Health Services Administration and Policy; PhD, New York University.

*Kavya Sukumaran Nair*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, University of Florida.

*Elizabeth Neil*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Indiana State University.

*Bernie Sue Newman*, Associate Professor, Department of Social Work; PhD, University of Pittsburgh.

*Emeka Nwadiora*, Associate Professor, Department of Social Work; JD, Hofstra University School of Law.

*Michael C. O'Hara*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Temple University.

*Lindsey Oakes*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, University of North Carolina at Greensboro.

*Rebecca A. Operacz*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, University of Colorado and Health Sciences Center.

*Kimberly Pachik*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Chatham University.

*Aimee J. Palumbo*, Associate Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, Drexel University.

*Carolyn Parks*, Associate Professor of Instruction, Department of Social and Behavioral Sciences; PhD, University of Tennessee at Knoxville.

*Paige Pastalove*, Assistant Professor of Instruction, Department of Communication Sciences and Disorders; AuD, West Virginia University.

*Jay S. Patel*, Assistant Professor, Department of Health Services Administration and Policy; PhD, Indiana University - Purdue University Indianapolis.

*Elizabeth A. Pfeiffer*, Associate Professor, Department of Health and Rehabilitation Sciences; PhD, Nova Southeastern University.

*Jacqueline Phillips*, Associate Professor of Instruction, Department of Kinesiology; PhD, Temple University.

*Heather Porter*, Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

*Kseniia Power*, Assistant Professor of Instruction, Department of Kinesiology; PhD, Temple University.

*Erica A. Pugh*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Temple University.

*Gillian A. Rai*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DOT, Temple University.

*Laura Rauth*, Clinical Instructor, Department of Nursing; MSN, Yale University.

*Jodi Reich*, Associate Professor of Instruction, Department of Communication Sciences and Disorders; PhD, Yale University.

*James J. Reilly*, Professor, Department of Communication Sciences and Disorders; PhD, University of Pennsylvania.

*Daniel M. Rosney*, Assistant Professor of Instruction, Department of Kinesiology; PhD, State University of New York at Buffalo.

*Nancy L. Rothman*, Professor, Department of Nursing; EdD, Temple University.

*Abby Rudolph*, Associate Professor, Department of Epidemiology and Biostatistics; PhD, Johns Hopkins University.

*Anne C. Russ*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

*Mark Salzer*, Professor, Department of Social and Behavioral Sciences; PhD, University of Illinois at Urbana-Champaign.

*Mayra C. Santiago*, Associate Professor, Department of Kinesiology; PhD, University of Minnesota.

*David B. Sarwer*, Professor, Department of Social and Behavioral Sciences; PhD, Loyola University Chicago.

*Michelle C. Scarpulla*, Instructor, Department of Social and Behavioral Sciences; MPH, Temple University.

*Krista Schroeder*, Assistant Professor, Department of Nursing; PhD, Columbia University.

*Brittany Schuler*, Assistant Professor, Department of Social Work; PhD, University of Maryland Baltimore.

*Leah M. Schumacher*, Assistant Professor, Department of Kinesiology; PhD, Drexel University.

*Jack V. Sears*, Assistant Professor of Instruction, Department of Kinesiology; PhD, University of Texas at Austin.

*Jay S. Segal*, Professor, Department of Social and Behavioral Sciences; PhD, The Ohio State University.

*Jing Shen*, Assistant Professor, Department of Communication Sciences and Disorders; PhD, University of California San Diego.

*Laura Siminoff*, Professor, Department of Social and Behavioral Sciences; PhD, Johns Hopkins University.

*Laura Sinko*, Assistant Professor, Department of Nursing; PhD, University of Michigan.

*Melody J. Slashinski*, Associate Professor of Instruction, Department of Social and Behavioral Sciences; PhD, University of Texas.

*Alissa Smethers*, Assistant Professor, Department of Kinesiology; PhD, The Pennsylvania State University.

*Brandon S. Snead*, Instructor, Department of Health and Rehabilitation Sciences; MS, Temple University.

*Gretchen A. Snethen*, Associate Professor, Department of Health and Rehabilitation Sciences; PhD, Indiana University.

*Tulay G. Soyulu*, Assistant Professor of Instruction, Department of Health Services Administration and Policy; PhD, George Mason University.

*Alesya Starayeva*, Instructor, Department of Communication Sciences and Disorders; BA, Gallaudet University.

*Elizabeth Steele*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Arcadia University.

*Gerry A. Stefanatos*, Associate Professor, Department of Communication Sciences and Disorders; DPhil, Oxford University.

*Ashley E. Stewart*, Assistant Professor of Instruction, Department of Social Work; PhD, Ohio State University.

*Amy Stolarick*, Instructor, Department of Nursing; MSN, Wilmington University.

*Mark Stoutenberg*, Associate Professor, Department of Kinesiology; PhD, University of Miami.

*Chang Su*, Assistant Professor, Department of Health Services Administration and Policy; PhD, Xi'an Jiaotong University.

*Gabriel Tajeu*, Assistant Professor, Department of Health Services Administration and Policy; DrPH, University of Alabama at Birmingham.

*Monica Taylor*, Associate Professor of Instruction, Department of Kinesiology; PhD, University of Pittsburgh.

*Brenda Teichman*, Clinical Instructor, Department of Nursing; MS, Western Governors University.

*Elizabeth Tenison*, Assistant Professor of Instruction, Department of Kinesiology; PhD, Northern Illinois University.

*Mary Terhaar*, Professor, Department of Nursing; PhD, The Catholic University of America.

*Elizabeth Thomas*, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of Nebraska-Lincoln.

*Christopher Thompson*, Assistant Professor, Department of Health and Rehabilitation Sciences; PhD, University of Illinois.

*Ryan T. Tierney*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

*Jazmine M. Tooles*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, University of Delaware.

*Gina Tripicchio*, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of North Carolina at Chapel Hill.

*Elizabeth Van Nostrand*, Associate Professor, Department of Health Services Administration and Policy; JD, Tulane University.

*Gena B. Vargas*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Clemson University.

*Aurora J. Verlin*, Instructor, Department of Health and Rehabilitation Sciences; MS, Temple University.

*Carolina Villamil Grest*, Assistant Professor, Department of Social Work; PhD, University of Southern California.

*Christopher Wheldon*, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of South Florida.

*Kirsten Wiens*, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, New York University.

*Robin T. Wilson*, Associate Professor, Department of Epidemiology and Biostatistics; PhD, University of Iowa.

*Caitlin N. Wolak*, Instructor, Department of Social and Behavioral Sciences; MPH, Temple University.

*Andrea Wolf*, Associate Professor of Instruction, Department of Nursing; DNP, Case Western Reserve University.

*W. Geoffrey Wright*, Professor, Department of Health and Rehabilitation Sciences; PhD, Brandeis University.

*Huanmei Wu*, Professor, Department of Health Services Administration and Policy; PhD, Northeastern University.

*Jingwei Wu*, Associate Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, Indiana University.

*Andrew Yannaccone*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Virginia Commonwealth University School of Medicine.

*Recai Yucel*, Professor, Department of Epidemiology and Biostatistics; PhD, The Pennsylvania State University.

*Dana Zeuggin*, Instructor, Department of Communication Sciences and Disorders; MS, Bloomsburg University.

*Yaara Zisman-Ilani*, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of Haifa.

## College of Science and Technology

*Stephen Blair Hedges*, Laura H. Carnell Professor, Department of Biology; PhD, University of Maryland.

*Meredith M. Hegg*, Associate Professor of Instruction, Department of Mathematics; PhD, Temple University.

*Matthew Richard Helmus*, Assistant Professor, Department of Biology; PhD, University of Wisconsin-Madison.

*Emanuel B. Hey*, Professor, Department of Biology; PhD, State University of New York at Stony Brook.

*Tonia Hsieh*, Associate Professor, Department of Biology; PhD, Harvard University.

*Anthony Hughes*, Professor of Instruction, Department of Computer and Information Sciences; PhD, University of Illinois.

*Maria Iavarone*, Professor, Department of Physics; PhD, University of Napoli Federico II.

*Mihaela Ignatova*, Selma Lee Bloch Brown Assistant Professor in Mathematics, Department of Mathematics; PhD, University of Southern California.

*Susan A. Jansen-Varnum*, Professor, Department of Chemistry; PhD, University of Missouri-St. Louis.

*Serge Jasmin*, Associate Professor of Instruction, Department of Chemistry; BS, Temple University.

*Rob Jennings*, Assistant Professor of Instruction, Department of Biology; PhD, Massachusetts Institute of Technology.

*Donald Jones*, Research Assistant Professor, Department of Physics; PhD, University of Virginia.

*Kelli Shepard El Jones*, Instructor, Department of Mathematics; MS, Temple University.

*Krishna Kant*, Professor, Department of Computer and Information Sciences; PhD, University of Texas at Dallas.

*Gurpreet Kaur*, Assistant Professor of Instruction, Department of Biology; PhD, Temple University.

*Jaskiran Kaur*, Assistant Professor of Instruction, Department of Chemistry; MS, University of Pennsylvania.

*Vince Kelly*, Associate Professor of Instruction, Department of Computer and Information Sciences; MS, Temple University.

*Roy A. Keyer*, Professor of Instruction, Department of Chemistry; PhD, University of California Irvine.

*Bojeong Kim*, Associate Professor, Department of Earth and Environmental Science; PhD, Cornell University.

*Daniel Kim*, Assistant Professor, Department of Chemistry; PhD, University of California.

*Isaac Klapper*, Professor, Department of Mathematics; PhD, New York University Courant Institute of Mathematical Sciences.

*Michael L. Klein*, Professor, Department of Chemistry; PhD, University of Bristol.

*Dominique M. Kliger*, Assistant Professor of Practice, Department of Computer and Information Sciences; PhD, Temple University.

*James F. Korsh*, Professor Emeritus, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

*Svetlana Kotochigova*, Research Professor, Department of Physics; PhD, St. Petersburg State University.

*Rob J. Kulathinal*, Associate Professor, Department of Biology; PhD, McMaster University.

*Sudhir Kumar*, Laura H. Carnell Professor, Department of Biology; PhD, The Pennsylvania State University.

*Eugene Kwatny*, Professor, Department of Computer and Information Sciences; PhD, Drexel University.

*Sally Kyvernitis*, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, Indiana University.

*Paul S. LaFollette Jr.*, Associate Professor, Department of Computer and Information Sciences; MD, Temple University.

*Jaclyn Lang*, Assistant Professor, Department of Mathematics; PhD, University of California Los Angeles.

*Longin Jan Latecki*, Professor, Department of Computer and Information Sciences; PhD, University of Hamburg.

*Dominic Letarte*, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Ecole Polytechnique Montreal.

*Edward S. Letzter*, Professor, Department of Mathematics; PhD, University of Washington.

*Robert J. Levis*, Professor, Department of Chemistry; PhD, The Pennsylvania State University.

*Ronald M. Levy*, Laura H. Carnell Professor, Department of Chemistry; PhD, Harvard University.

*Stephanie Lewkiewicz*, Research Assistant Professor, Department of Mathematics; PhD, University of California Los Angeles.

*Xiuqi Li*, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Florida Atlantic University.

*David A. Liberles*, Professor, Department of Biology; PhD, California Institute of Technology.

*Chyanlong Lin*, Associate Professor, Department of Physics; PhD, Temple University.

*Maria E. Lorenz*, Professor of Instruction, Department of Mathematics; PhD, University of Southern California.

*Martin W. Lorenz*, Professor, Department of Mathematics; PhD, Universität Giessen.

*Sheryl L. Love*, Associate Professor of Instruction, Department of Biology; PhD, Temple University.

*Mia Luehrmann*, Associate Professor of Instruction, Department of Physics; PhD, University of Illinois at Urbana-Champaign.

*Jay Lunden*, Assistant Professor of Instruction, Department of Biology; PhD, Temple University.

*A. Marjatta Lyyra*, Professor, Department of Physics; PhD, University of Stockholm.

*Marcella Macaluso*, Associate Professor of Instruction, Department of Biology; PhD, University of Palermo.

*Stephen MacNeil*, Assistant Professor, Department of Computer and Information Sciences; PhD, University of North Carolina at Charlotte.

*Carol M. Manhart*, Assistant Professor, Department of Chemistry; PhD, University of Colorado Boulder.

*C. Jeffrey Martoff*, Professor, Department of Physics; PhD, University of California Berkeley.

*Spiridoula Matsika*, Professor, Department of Chemistry; PhD, The Ohio State University.

*Kathleen E. Mc Kinley*, Instructor of Practice, Department of Mathematics; MS, Saint Joseph's University.

*Rose Marie McGinnis*, Assistant Professor of Instruction, Department of Computer and Information Sciences; MBA, Temple University.

*Michelle Hedwig McGowan*, Associate Professor of Instruction, Department of Biology; PhD, Rutgers University.

*George Mehler*, Assistant Professor of Practice, Department of Biology; PhD, Temple University.

*Gerardo A. Mendoza*, Professor, Department of Mathematics; PhD, Massachusetts Institute of Technology.

*Andreas Metz*, Professor, Department of Physics; PhD, Institut Für Kernphysik Universität Mainz.

*Olena Mishchuk*, Assistant Professor of Instruction, Department of Biology; PhD, Yuriy Fedkovych Chernivtsi National University.

*Irina Mitrea*, Laura H. Carnell Professor, Department of Mathematics; PhD, University of Minnesota.

*Sayaka Miura*, Research Associate Professor, Department of Biology; PhD, The Pennsylvania State University.

*Anna Moore*, Assistant Professor, Department of Biology; PhD, University of Connecticut Health Center.

*Andrea Morrione*, Research Associate Professor, Department of Biology; PhD, University of Milan.

*Karl Morris*, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Florida International University.

*Atsuhiko Muto*, Associate Professor, Department of Earth and Environmental Science; PhD, University of Colorado.

*Manal A. Nael*, Research Assistant Professor, Department of Chemistry; PhD, University of Mississippi.

*James Napolitano*, Professor, Department of Physics; PhD, Stanford University.

*Frank E. Nelson*, Assistant Professor of Instruction, Department of Biology; PhD, Oregon State University.

*Matthew Newby*, Assistant Professor of Instruction, Department of Physics; PhD, Rensselaer Polytechnic Institute.

*Allen W. Nicholson*, Professor, Department of Biology; PhD, University of Pennsylvania.

*Rhonda H. Nicholson*, Associate Professor of Instruction, Department of Biology; PhD, Wayne State University.

*John Noel*, Associate Professor of Instruction, Department of Physics; PhD, Texas A and M University.

*Jonathan Nyquist*, Professor, Department of Earth and Environmental Science; PhD, University of Wisconsin.

*Zoran Obradovic*, Laura H. Carnell Professor, Department of Computer and Information Sciences; PhD, The Pennsylvania State University.

*Uloma Opara-Osuoha*, Assistant Professor of Instruction, Department of Biology; PhD, University of Ibadan.

*Michael Opferman*, Assistant Professor of Instruction, Department of Physics; PhD, University of Pittsburgh.

*Charles Osborne*, Associate Professor of Instruction, Department of Mathematics; PhD, Temple University.

*Maria A. Pacheco*, Research Assistant Professor, Department of Biology; PhD, Universidad Simón Bolívar.

*Karen B. Palter*, Associate Professor Emerita, Department of Biology; PhD, Princeton University.

*Alex Pang*, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, North Carolina State University.

*Ellen Panofsky*, Associate Professor of Instruction, Department of Mathematics; PhD, Lehigh University.

*Christopher Pascucci*, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, University of Pennsylvania.

*Mohit Patel*, Assistant Professor, Department of Chemistry; PhD, Temple University.

*John A. Paulos*, Professor, Department of Mathematics; PhD, University of Wisconsin.

*Jamie Payton*, Professor, Department of Computer and Information Sciences; DSc, Washington University.

*Simona Percec*, Research Professor, Department of Chemistry; PhD, Institute of Macromolecular Chemistry.

*John P. Perdew*, Laura H. Carnell Professor, Department of Physics; PhD, Cornell University.

*Claudia Pine-Simon*, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, University of Pennsylvania.

*Athanasia Polychronopoulou*, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Temple University.

*Sergei L. Kosakovsky Pond*, Professor, Department of Biology; PhD, University of Arizona.

*Edwin F. Posada*, Research Assistant Professor, Department of Chemistry; PhD, Temple University.

*Matthew Posik*, Research Associate Professor, Department of Physics; PhD, Temple University.

*Sean Gillian Queisser*, Associate Professor, Department of Mathematics; PhD, Ruprecht-Karls University of Heidelberg.

*Daniele Ramella*, Associate Professor of Instruction, Department of Chemistry; PhD, Boston University.

*Paul Rapoport*, Research Assistant Professor, Department of Mathematics; PhD, University of Illinois at Chicago.

*Robert Rarig*, Associate Professor of Instruction, Department of Chemistry; PhD, University of Michigan.

*Sujith Ravi*, Associate Professor, Department of Earth and Environmental Science; PhD, University of Virginia.

*Brian Rider*, Professor, Department of Mathematics; PhD, New York University Courant Institute of Mathematical Sciences.

*Peter S. Riseborough*, Professor, Department of Physics; PhD, Imperial College London.

*Igor Rivin*, Professor, Department of Mathematics; PhD, Princeton University.

*Dmitri Romanov*, Research Professor, Department of Physics; PhD, Novosibirsk Institute of Semiconductor Physics, USSR Academy of Sciences.

*Andrew B. Rosen*, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Georgia State University.

*Kenneth Ruff*, Assistant Professor of Practice, Department of Biology; PhD, Temple University.

*Elisabeth Russell-McKenzie*, Assistant Professor of Practice, Department of Chemistry; PhD, Temple University.

*Dumitru D. Rusu*, Associate Professor of Instruction, Department of Mathematics; PhD, University of Guelph.

*Adrienn Ruzsinszky Perdew*, Associate Professor, Department of Physics; PhD, Budapest University of Technology and Economics.

*Robert W. Sanders*, Professor, Department of Biology; PhD, University of Georgia.

*Christian E. Schafmeister*, Professor, Department of Chemistry; PhD, University of California San Francisco.

*Benjamin Seibold*, Professor, Department of Mathematics; PhD, University of Kaiserslautern.

*Cinzia Sevignani*, Associate Professor of Instruction, Department of Biology; PhD, University of Modena.

*Brent Sewall*, Associate Professor, Department of Biology; PhD, University of California Davis.

*Joel B. Sheffield*, Professor Emeritus, Department of Biology; PhD, University of Chicago.

*Xinghua Mindy Shi*, Associate Professor, Department of Computer and Information Sciences; PhD, University of Chicago.

*Yuan Justin Shi*, Associate Professor, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

*Jingyang Shu*, Research Assistant Professor, Department of Mathematics; PhD, University of California Davis.

*Scott M. Sieburth*, Professor Emeritus, Department of Chemistry; PhD, Harvard University.

*Jeromy Sivek*, Associate Professor of Instruction, Department of Mathematics; PhD, University of Pittsburgh.

*Jonathan Smith*, Associate Professor of Instruction, Department of Chemistry; PhD, Wesleyan University.

*Gregory S. Smutzer*, Associate Professor of Instruction, Department of Biology; PhD, State University of New York at Buffalo.

*Richard Souvenir*, Professor, Department of Computer and Information Sciences; DSc, Washington University.

*Francis C. Spano*, Professor, Department of Chemistry; PhD, Princeton University.

*Nikolaos Sparveris*, Associate Professor, Department of Physics; PhD, University of Athens.

*Rachel Spigler*, Associate Professor, Department of Biology; PhD, University of Georgia.

*Robert J. Stanley*, Professor, Department of Chemistry; PhD, The Pennsylvania State University.

*Matthew Stover*, Associate Professor, Department of Mathematics; PhD, University of Texas at Austin.

*Daniel R. Strongin*, Professor, Department of Chemistry; PhD, University of California Berkeley.

*Deborah Stull*, Associate Professor of Practice, Department of Biology; PhD, Yale University.

*Ang Sun*, Research Professor, Department of Biology; PhD, Sbarro Institute for Cancer Research and Molecular Medicine.

*Yugang Sun*, Professor, Department of Chemistry; PhD, University of Science and Technology of China.

*Bernd Surrow*, Professor, Department of Physics; PhD, University of Hamburg.

*Daniel B. Szyld*, Professor, Department of Mathematics; PhD, New York University.

*Chiu Chiang Tan*, Associate Professor, Department of Computer and Information Sciences; PhD, College of William and Mary.

*Hong Tang*, Research Assistant Professor, Department of Physics; PhD, Northwestern Polytechnical University.

*Rongjia Tao*, Professor, Department of Physics; PhD, Columbia University.

*Samuel J. Taylor*, Associate Professor, Department of Mathematics; PhD, University of Texas at Austin.

*Dennis O. Terry Jr.*, Associate Professor, Department of Earth and Environmental Science; PhD, University of Nebraska.

*Jesse Thornburg*, Assistant Professor of Instruction, Department of Earth and Environmental Science; MS, Temple University.

*Laura Toran*, Professor, Department of Earth and Environmental Science; PhD, University of Wisconsin.

*Darius H. Torchinsky*, Assistant Professor, Department of Physics; PhD, Massachusetts Institute of Technology.

*Georgia Triantafillou*, Professor, Department of Mathematics; PhD, University of Bonn, Germany.

*Tsvetelin D. Tsankov*, Associate Professor of Instruction, Department of Physics; PhD, Drexel University.

*Allison Tumarkin-Deratzian*, Professor of Instruction, Department of Earth and Environmental Science; PhD, University of Pennsylvania.

*Shivaiah Vaddypally*, Research Assistant Professor, Department of Chemistry; PhD, Hyderabad University.

*Ann M. Valentine*, Professor, Department of Chemistry; PhD, Massachusetts Institute of Technology.

*Elisa Ventura*, Research Assistant Professor, Department of Biology; PhD, Temple University.

*Vladimir Visnjic*, Associate Professor of Instruction, Department of Mathematics; PhD, University of Bonn, Germany.

*Evelyn Vleck*, Assistant Professor of Instruction, Department of Biology; MA, William Paterson College.

*Vincent Voelz*, Associate Professor, Department of Chemistry; PhD, University of California San Francisco.

*Slobodan Vucetic*, Professor, Department of Computer and Information Sciences; PhD, Washington State University.

*Anduo Wang*, Assistant Professor, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

*Charles Wang*, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Wayne State University.

*Pei Wang*, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Indiana University.

*Rongsheng Wang*, Associate Professor, Department of Chemistry; PhD, Washington University in St. Louis.

*Yan Wang*, Assistant Professor, Department of Computer and Information Sciences; PhD, Stevens Institute of Technology.

*Yu Wang*, Professor, Department of Computer and Information Sciences; PhD, Illinois Institute of Technology.

*Richard B. Waring*, Associate Professor, Department of Biology; PhD, Essex University.

*Sarah Elizabeth Wengryniuk*, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry; PhD, Duke University.

*Vladimira V. Wilent*, Associate Professor of Instruction, Department of Chemistry; PhD, University of Pennsylvania.

*Katherine A. Willets*, Professor, Department of Chemistry; PhD, Stanford University.

*Jie Wu*, Laura H. Carnell Professor, Department of Computer and Information Sciences; PhD, Florida Atlantic University.

*Wei Wu*, Assistant Professor of Instruction, Department of Mathematics; PhD, University of Leuven.

*Xifan Wu*, Professor, Department of Physics; PhD, Rutgers University.

*Stephanie L. Wunder*, Professor, Department of Chemistry; PhD, University of Massachusetts.

*Xiaoxing Xi*, Laura H. Carnell Professor, Department of Physics; PhD, Peking University and Institute of Physics.

*Xiaojun Xu*, Research Assistant Professor, Department of Physics; PhD, Chinese Academy of Sciences.

*Qimin Yan*, Assistant Professor, Department of Physics; PhD, University of California Santa Barbara.

*Wei-Shih Yang*, Professor, Department of Mathematics; PhD, Cornell University.

*Weidong Yang*, Professor, Department of Biology; PhD, Fudan University.

*Mengsha Yao*, Research Assistant Professor, Department of Mathematics; PhD, University of Southern California.

*Atilla Yilmaz*, Associate Professor, Department of Mathematics; PhD, New York University.

*Tan Yuen*, Associate Professor, Department of Physics; PhD, Temple University.

*Michael J. Zdilla*, Professor, Department of Chemistry; PhD, Princeton University.

*Bailin Zhang*, Research Assistant Professor, Department of Biology; PhD, Dalian Institute of Chemical Physics, Chinese Academy of Sciences.

*Kai Zhang*, Associate Professor, Department of Computer and Information Sciences; PhD, Hong Kong University of Science and Technology.

*Mi Zhao*, Research Assistant Professor, Department of Chemistry; PhD, South China Sea Institute of Oceanology, Chinese Academy of Sciences.

## Fox School of Business and Management

*Aleksi Aaltonen*, Assistant Professor, Department of Management Information Systems; PhD, London School of Economics.

*Edoardo Airoldi*, Professor, Department of Statistics, Operations, and Data Science; PhD, Carnegie Mellon University.

*Joan Allatta*, Associate Professor of Instruction, Department of Management; PhD, University of Pennsylvania.

*Andrew T. Allmond*, Assistant Professor of Practice, Department of Marketing; MJ, Temple University.

*Ronald C. Anderson*, Professor, Department of Finance; PhD, Texas A and M University.

*Lynne M. Andersson*, Associate Professor, Department of Management; PhD, University of North Carolina at Chapel Hill.

*Cynthia R. Axelrod*, Associate Professor of Practice, Department of Finance; MBA, Drexel University.

*Sezgin Ayabakan*, Assistant Professor, Department of Management Information Systems; PhD, University of Texas at Dallas.

*Xue Bai*, Professor, Department of Statistics, Operations, and Data Science; PhD, Carnegie Mellon University.

*Gurdip Bakshi*, Marvin Wachman Professor, Department of Finance; PhD, University of Wisconsin-Madison.

*Xiaohui Gao Bakshi*, Research Associate Professor, Department of Finance; PhD, University of Florida.

*Steven Balsam*, Professor, Department of Accounting; PhD, City University of New York.

*Rajiv Banker*, Professor and the Stanley Merves Chair in Accounting, Information Technology and Management, Department of Accounting; DBA, Harvard University.

*Sudipta Basu*, Professor, Department of Accounting; PhD, University of Rochester.

*Konstantin Bauman*, Assistant Professor, Department of Management Information Systems; PhD, Moscow State University.

*Tawanda Benesi*, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, University of Georgia.

*Gary J. Blau*, Professor, Department of Management; PhD, University of Cincinnati.

*Misty P. Blessley*, Associate Professor of Instruction, Department of Marketing; PhD, Temple University.

*Jeffrey R. Boles*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of California Berkeley.

*Lawrence Brown*, Seymour Wolfbein Distinguished Research Professor, Department of Accounting; PhD, University of Rochester.

*Lauren N. Burns*, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, Temple University.

*Dmitri Byzalov*, Associate Professor, Department of Accounting; PhD, Harvard University.

*Dwight Carey*, Associate Professor of Practice, Department of Management; BS, Farleigh Dickinson University at Madison.

*Debra Casey*, Associate Professor of Instruction, Department of Management; PhD, Rutgers University-New Brunswick.

*Steven J. Casper*, Associate Professor of Instruction, Department of Finance; PhD, Temple University.

*Yiwei Chen*, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, Massachusetts Institute of Technology.

*Pallavi Chitturi*, Research Professor, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Austin.

*J. Jay Choi*, Laura H. Carnell Professor, Department of Finance; PhD, New York University.

*Teresa Gill Cirillo*, Assistant Professor of Practice, Department of Marketing; MA, Rowan University.

*Benjamin Collier*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Kentucky.

*Mary Conran*, Professor of Practice, Department of Marketing; MBA, Temple University.

*Cheri Cutler*, Assistant Professor of Practice, Department of Marketing; MS, Temple University.

*John R. Deckop*, Professor, Department of Management; PhD, University of Minnesota.

*C. Anthony Di Benedetto*, Professor, Department of Marketing; PhD, McGill University.

*Denise Donaghue*, Assistant Professor of Practice, Department of Marketing; MA, Immaculata University.

*Yuexiao Dong*, Associate Professor, Department of Statistics, Operations, and Data Science; PhD, The Pennsylvania State University.

*John V. Dormuth*, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MS, Boston University.

*Martin J. Doyle*, Associate Professor of Practice, Department of Management Information Systems; MS, University of Phoenix.

*Rob B. Drennan*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Pennsylvania.

*Randy E. Dumm*, Research Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Georgia.

*Leora F. Eisenstadt*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, New York University School of Law.

*Eric M. Eisenstein*, Research Professor, Department of Statistics, Operations, and Data Science; PhD, University of Pennsylvania.

*Philip English*, Research Associate Professor, Department of Finance; PhD, University of South Carolina.

*Ming Fang*, Assistant Professor of Instruction, Department of Finance; PhD, Yale University.

*Susan Feinberg*, Associate Professor, Department of Management; PhD, University of Minnesota.

*Laurie J. Fitzpatrick*, Assistant Professor of Practice, Department of Marketing; MFA, Temple University.

*Thomas T. Fung*, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; MS, University of Pennsylvania.

*Deanna Geddes*, Professor, Department of Management; PhD, Purdue University.

*Katherine W. Gerst*, Associate Professor of Practice, Department of Marketing; MBA, Temple University.

*Melissa Glenn*, Associate Professor of Practice, Department of Marketing; MA, La Salle University.

*Daniel Goldberg*, Associate Professor of Instruction, Department of Management; EdD, Delaware Valley University.

*Enrique A. Gomez*, Assistant Professor, Department of Accounting; PhD, University of Georgia.

*Elizabeth A. Gordon*, Professor, Department of Accounting; PhD, Columbia University.

*Kelly A. Grace*, Assistant Professor of Instruction, Department of Management; PhD, University of Florida.

*Martin Grace*, Harry Cochran Professor in Risk, Insurance and Healthcare Management, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Florida.

*Curtis J. Gregory*, Assistant Professor of Instruction, Department of Management; PhD, Walden University.

*Michael Guglielmo*, Associate Professor of Practice, Department of Management; MBA, Temple University.

*Bertrand Guillotin*, Associate Professor of Instruction, Department of Management; PhD, Grenoble Ecole de Management.

*Terry Ann Halbert*, Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, Rutgers University.

*Crystal M. Harold*, Associate Professor, Department of Management; PhD, George Mason University.

*James D. Harrington*, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MBA, University of Georgia.

*Theodore L. Hill III*, Professor of Instruction, Department of Management; PhD, Temple University.

*James Hilliard*, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Connecticut.

*Samuel D. Hodge Jr.*, Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, Temple University.

*Brian C. Holtz*, Associate Professor, Department of Management; PhD, George Mason University.

*Leila Hosseini*, Assistant Professor, Department of Management Information Systems; PhD, University of Texas at Dallas.

*Michael Hubbel*, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MBA, College of Insurance.

*Michael J. Hughes*, Assistant Professor of Practice, Department of Marketing; MBA, Temple University.

*Thomas Intoccia*, Assistant Professor of Practice, Department of Finance; MBA, Regis University.

*Daniel Isaacs*, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; JD, Brooklyn Law School.

*Alan J. Izenman*, Professor, Department of Statistics, Operations, and Data Science; PhD, University of California Berkeley.

*Cheng (Jason) Jiang*, Associate Professor of Instruction, Department of Finance; PhD, University of California Riverside.

*David E. Jones*, Associate Professor of Practice and the Jerome Fox Chair in Accounting, Taxation and Financial Strategy, Department of Accounting; PhD, Case Western Reserve University.

*Jaehwuen Jung*, Assistant Professor, Department of Management Information Systems; PhD, University of Minnesota.

*Darin Kapanjie*, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; EdD, Temple University.

*Vishesh Karwa*, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, The Pennsylvania State University.

*Roger J. Kashlak*, Professor of Instruction, Department of Management; PhD, Temple University.

*Howard Keen*, Assistant Professor of Instruction, Department of Finance; PhD, Bryn Mawr College.

*Thomas Kenny*, Assistant Professor of Practice, Department of Finance; MBA, Temple University.

*Alan Kerzner*, Assistant Professor of Practice, Department of Management; MBA, University of Pennsylvania.

*Guangwen Kong*, Associate Professor, Department of Statistics, Operations, and Data Science; PhD, University of Southern California.

*A. J. Kreimer*, Associate Professor of Practice, Department of Accounting; MBA, Temple University.

*Jagannathan Krishnan*, Professor, Department of Accounting; PhD, The Ohio State University.

*Jayanthi Krishnan*, Professor, Department of Accounting; PhD, The Ohio State University.

*Ravi S. Kudesia*, Assistant Professor, Department of Management; PhD, Washington University in St. Louis.

*Subodha Kumar*, Professor, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Dallas.

*Edmund (Ned) L. Lafer*, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MD, Sackler School of Medicine.

*Sheri L. Lambert*, Associate Professor of Practice, Department of Marketing; MBA, University of Michigan.

*James M. Lammendola*, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; JD, University of Tulsa College of Law.

*David Lanter*, Assistant Professor of Practice, Department of Management Information Systems; PhD, University of South Carolina.

*Amy Lavin*, Associate Professor of Practice, Department of Management Information Systems; MBA, Temple University.

*Vanessa J. Lawrence*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, University of Pennsylvania School of Law.

*Kuang-Yao Lee*, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, The Pennsylvania State University.

*Yan Li*, Associate Professor, Department of Finance; PhD, Cornell University.

*Xueming Luo*, Charles E. Gilliland, Jr. Professor in Marketing, Department of Marketing; PhD, Louisiana Tech University.

*Marco J. Malandra*, Associate Professor of Practice, Department of Accounting; MS, Golden Gate University.

*Barbara Blundi Manaka*, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; PhD, Temple University.

*Munir Y. Mandviwalla*, Professor, Department of Management Information Systems; PhD, Claremont Graduate University.

*Connie Xiangdong Mao*, Professor, Department of Finance; PhD, Cornell University.

*Marie-Christine Martin*, Assistant Professor of Practice, Department of Management Information Systems; MBA, University of Montreal.

*Kenichiro McAlinn*, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, Duke University.

*John A. McClendon*, Associate Professor, Department of Management; PhD, University of South Carolina.

*Michael McCloskey*, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MBA, Drexel University.

*James P. Miller*, Associate Professor of Practice, Department of Marketing; PhD, University College Cork.

*Laurel A. Miller*, Associate Professor of Practice, Department of Management Information Systems; MS, Temple University.

*Neha Mittal*, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, Rutgers University.

*Thorsten P. Moenig*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, Georgia State University.

*Christopher Monos*, Assistant Professor of Practice, Department of Marketing; PhD, Columbia University.

*Solon Moreira*, Assistant Professor, Department of Management; PhD, Copenhagen Business School.

*Shreeram R. Mudambi*, Frank M. Speakman Professor of Strategic Management, Department of Management; PhD, Cornell University.

*Susan Mudambi*, Research Professor, Department of Marketing; PhD, University of Warwick.

*Jose Munoz*, Professor of Instruction, Department of Accounting; DBA, Anderson University of Indiana.

*David Nash*, Associate Professor of Practice, Department of Management; MS, University of Pennsylvania.

*Nicole Naumoff*, Assistant Professor of Practice, Department of Management; MBA, York University, Canada.

*Lalitha Naveen*, Associate Professor, Department of Finance; PhD, Arizona State University.

*Katherine A. Nelson*, Assistant Professor of Practice, Department of Management; BA, College of Mount Saint Vincent.

*Cory Ng*, Associate Professor of Instruction, Department of Accounting; DBA, Wilmington College Delaware.

*In-Sue Oh*, Professor, Department of Management; PhD, University of Iowa.

*Christina M. Owings*, Associate Professor of Practice, Department of Marketing; MEd, Lesley College.

*Bora Ozkan*, Associate Professor of Instruction, Department of Finance; PhD, University of New Orleans.

*Min-Seok Pang*, Associate Professor, Department of Management Information Systems; PhD, University of Michigan.

*Dennis A. Paris*, Associate Professor of Practice, Department of Marketing; MBA, Drexel University.

*Hyun Jong Park*, Assistant Professor, Department of Accounting; PhD, University of Florida.

*Arvind Parkhe*, Laura H. Carnell Professor, Department of Management; PhD, Temple University.

*Tony Petrucci*, Associate Professor of Practice, Department of Management; PhD, Regent University.

*Michael D. Power*, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, Temple University.

*Robert S. Pred*, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Austin.

*Shaojun Qin*, Assistant Professor, Department of Marketing; PhD, University of Minnesota.

*Yue Qui*, Assistant Professor, Department of Finance; PhD, University of Minnesota.

*Robert T. Rajewski*, Assistant Professor of Practice, Department of Finance; MS, Johns Hopkins University.

*Crystal Reeck*, Assistant Professor, Department of Marketing; PhD, Duke University.

*Sheri Risler*, Associate Professor of Practice, Department of Accounting; BS, Boston University.

*Michael J. Rivera*, Associate Professor of Instruction, Department of Management; PhD, Purdue University.

*Samuel Rosen*, Assistant Professor, Department of Finance; PhD, University of North Carolina at Chapel Hill.

*Edward C. Rosenthal*, Professor, Department of Statistics, Operations, and Data Science; PhD, Northwestern University.

*Abhishek Roy*, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Austin.

*Donald B. Rubin*, Research Professor, Department of Statistics, Operations, and Data Science; PhD, Harvard University.

*Oleg Rytchkov*, Associate Professor, Department of Finance; PhD, Massachusetts Institute of Technology.

*Sanat K. Sarkar*, Cyrus C.K. Curtis Professor in Statistics, Department of Statistics, Operations, and Data Science; PhD, Calcutta University.

*Todd Schifeling*, Assistant Professor, Department of Management; PhD, University of Michigan.

*Michael Schirmer*, Assistant Professor of Practice, Department of Marketing; DBA, Wilmington College Delaware.

*Stuart M. Schmidt*, Professor Emeritus, Department of Management; PhD, University of Wisconsin-Madison.

*David Schuff*, Research Professor, Department of Management Information Systems; PhD, Arizona State University.

*Steven E. Sclarow*, Assistant Professor of Practice, Department of Management Information Systems; MBA, Temple University.

*Jonathan A. Scott*, Professor, Department of Finance; PhD, Purdue University.

*Anthony Louis Seeton*, Assistant Professor of Practice, Department of Management; MBA, Temple University.

*Jeremy J. Shafer*, Assistant Professor of Practice, Department of Management Information Systems; MS, Temple University.

*Tianxiang (Tim) Shi*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Waterloo.

*Amir Shoham*, Professor of Instruction, Department of Finance; PhD, Ben-Gurion University of the Negev.

*Ofra Shoham-Bazel*, Research Assistant Professor, Department of Finance; EDBA, Temple University.

*Indrajit Sinha*, Associate Professor, Department of Marketing; PhD, University of Michigan.

*Marcus J. Sobel*, Associate Professor Emeritus, Department of Statistics, Operations, and Data Science; PhD, University of California Berkeley.

*John A. Soss*, Associate Professor of Instruction, Department of Finance; PhD, Northwestern University.

*Joydeep Srivastava*, Professor, Department of Marketing; PhD, University of Arizona.

*Alexander Stein*, Assistant Professor of Instruction, Department of Marketing; PhD, Temple University.

*Detmar Straub*, Research Professor, Department of Management Information Systems; DBA, Indiana University.

*Minhui (Barbara) Su*, Assistant Professor, Department of Accounting; PhD, University of Toronto.

*Jennifer M. Sundstrom-Fitzgerald*, Assistant Professor of Practice, Department of Marketing; MBA, Temple University.

*Roman S. Szewczuk*, Assistant Professor of Practice, Department of Statistics, Operations, and Data Science; MBA, La Salle University.

*Chung (Jennifer) Won Tae*, Assistant Professor, Department of Management; PhD, London School of Business.

*Vivek Tandon*, Assistant Professor, Department of Management; PhD, University of Michigan.

*Cheng-Yong Tang*, Professor, Department of Statistics, Operations, and Data Science; PhD, Iowa State University.

*Jason Thatcher*, Milton F. Stauffer Professor, Department of Management Information Systems; PhD, Florida State University.

*Reza Vafa*, Instructor of Practice, Department of Statistics, Operations, and Data Science; MS, West Chester University.

*Michael Valenza*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, Temple University.

*Vinod Venkatraman*, Associate Professor, Department of Marketing; PhD, Duke University.

*Krupa S. Viswanathan*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Pennsylvania.

*Ryan M. Vogel*, Associate Professor, Department of Management; PhD, University of Georgia.

*Kathleen Voss*, Associate Professor of Practice, Department of Management; MS, University of Pittsburgh.

*Monica Wadhwa*, Associate Professor, Department of Marketing; PhD, Stanford University.

*Wei Wang*, Assistant Professor, Department of Accounting; PhD, University of Missouri-Columbia.

*Yang Wang*, Assistant Professor, Department of Marketing; PhD, Rice University.

*Sunil Wattal*, Professor, Department of Management Information Systems; PhD, Carnegie Mellon University.

*William W. S. Wei*, Professor, Department of Statistics, Operations, and Data Science; PhD, University of Wisconsin-Madison.

*Jean K. Wilcox*, Assistant Professor of Practice, Department of Marketing; PhD, University of Chicago.

*David J. Wilk*, Assistant Professor of Practice, Department of Finance; MS, Johns Hopkins University.

*Wayne W. Williams*, Associate Professor of Instruction, Department of Accounting; PhD, University of Pennsylvania.

*Gary Witt*, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, University of Pennsylvania.

*Christian E. Wurst*, Associate Professor of Instruction, Department of Accounting; PhD, Temple University.

*Timothy Young*, Assistant Professor of Practice, Department of Statistics, Operations, and Data Science; MBA, Temple University.

*Zhigen Zhao*, Associate Professor, Department of Statistics, Operations, and Data Science; PhD, Cornell University.

*Jeffrey Zheng*, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MEd, Harvard University.

*M. Michael Zuckerman*, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; JD, John Marshall Law School.

## Kornberg School of Dentistry

*Nezar Al-Hebshi*, Associate Professor, Department of Oral Health Sciences; PhD, University of Bergen.

*Jasim M. Albandar*, Professor, Department of Periodontology and Oral Implantology; DMD, Temple University Kornberg School of Dentistry.

*Anabela Amado*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Mustafa A. Badi*, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Eileen K. Barfuss*, Instructor (Clinician Scholar), Department of Oral Health Sciences.

*Kelcie Barnts*, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Mohamed A. Bassiouny*, Professor, Department of Restorative Dentistry.

*Jeffrey S. Bendler*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Nicholas R. Bizzaro*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Kenneth G. Boberick*, Associate Professor, Department of Restorative Dentistry; DMD.

*Kevin Chen*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Susan M. Chialastri*, Associate Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

*Sandra Deiley*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Louis Dipede*, Associate Professor (Clinician Scholar), Department of Restorative Dentistry.

*Carmen Doumit*, Assistant Professor (Clinician Scholar), Department of Orthodontics.

*Eugene M. Dunne*, Assistant Professor, Department of Oral Health Sciences; PhD, University of Florida-Gainesville.

*Jennifer Dyke*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Maria L. Fornatora*, Associate Dean - Dental, Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*John P. Friel Jr.*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Nazanin Ghobadi*, Associate Professor (Clinician Scholar), Department of Clinic Rev Restorative.

*Jeffrey H. Godel*, Associate Professor (Clinician Scholar), Department of Orthodontics; DDS, Howard University.

*Wanda C. Gordon*, Associate Professor (Clinician Scholar), Department of Endodontology.

*Ayla Gourani*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Marc Herman*, Associate Professor (Clinician Scholar), Department of Restorative Dentistry.

*Luis Herra Pernudiz*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Kelly A. Holst*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Hae Young Hong*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Mehran Hossaini Zadeh*, Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Yueh Hsiao*, Associate Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

*Amid Ismail*, Laura H. Carnell Professor and Dean, Department of Restorative Dentistry; DrPH, University of Michigan.

*Jodi J. Jasionowicz*, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Maryam Khalili*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Jong Ryul Kim*, Associate Professor (Clinician Scholar), Department of Endodontology; DMD, PhD, Kyung Hee University School of Dentistry.

*Kevin Krick*, Assistant Professor (Clinician Scholar), Department of Pediatric Dentistry.

*Laurie MacPhail*, Professor, Department of Oral and Maxillofacial Pathology, Medicine and Surgery; DMD.

*Judith Mckain-Rubin*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Robert C. Miller*, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Ivan R. Miloradovic*, Assistant Professor (Clinician Scholar), Department of Endodontology.

*John V. Moore*, Assistant Professor of Instruction, Department of Oral Health Sciences.

*Gary T. Morreale*, Assistant Professor (Clinician Scholar), Department of Endodontology.

*Alaa Mouminah*, Associate Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

*Becky Newcomb*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Roni Nissan*, Associate Professor, Department of Endodontology; DMD, Temple University Kornberg School of Dentistry.

*Jo Ann Nyquist*, Associate Professor of Instruction, Department of Pediatric Dentistry.

*Chukwuebuka Ogwo*, Research Assistant Professor, Department of Oral Health Sciences.

*Santiago Orrego*, Assistant Professor, Department of Restorative Dentistry; PhD, University of Maryland Baltimore County.

*Bhumica R. Patel*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Nupur Patel*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Michael E. Pliskin*, Associate Professor, Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Sumant Puri*, Assistant Professor, Department of Oral Health Sciences; PhD, State University of New York at Buffalo.

*Thomas E. Rams*, Professor, Department of Periodontology and Oral Implantology; DDS, University of Maryland.

*Sheila Reilly*, Instructor (Clinician Scholar), Department of Restorative Dentistry.

*Ahmed Sarhan*, Assistant Professor (Clinician Scholar), Department of Endodontology.

*James J. Sciote*, Professor, Department of Orthodontics; PhD, University of Michigan.

*Aaron Segal*, Associate Professor (Clinician Scholar), Department of Restorative Dentistry.

*David P. Semeniuk*, Assistant Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

*Sheelpa S. Shah*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Christopher Singh*, Associate Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Shari Jill Sklar*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Varun Vivek Solanki*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Leona A. Sperrazza*, Associate Dean, Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

*Roy H. Stevens*, Professor, Department of Endodontology; DDS, Columbia University.

*Fang-Yu Su*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Louis P. Tarnoff*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Marisol Tellez-Merchán*, Associate Professor, Department of Oral Health Sciences; PhD, University of Michigan.

*Sara Toema*, Assistant Professor (Clinician Scholar), Department of Pediatric Dentistry.

*Orhan C. Tuncay*, Gerald D. Timmons Professor, Department of Orthodontics; DMD, Temple University Kornberg School of Dentistry.

*Elizabeth Tweddale*, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

*Geraldine Weinstein*, Professor (Clinician Scholar), Department of Restorative Dentistry.

*Eugene J. Whitaker*, Associate Professor, Department of Restorative Dentistry; DMD, University of Pennsylvania.

*Adam B. Wolf*, Assistant Professor (Clinician Scholar), Department of Pediatric Dentistry.

*Jie Yang*, Professor, Department of Oral and Maxillofacial Pathology, Medicine and Surgery; DMD, Temple University Kornberg School of Dentistry.

*Maobin Yang*, Associate Professor, Department of Endodontology; DMD, Temple University Kornberg School of Dentistry, PhD, University of Connecticut.

*Cemil Yesilsoy*, Associate Professor, Department of Endodontology; DMD, Temple University Kornberg School of Dentistry.

## **Law Klein College of Media and Communication**

*Quaiser D. Abdullah*, Assistant Professor of Instruction, Department of Communication and Social Influence; PhD, Temple University.

*Tracy Agostarola*, Assistant Professor of Instruction, Department of Advertising and Public Relations; BA, Kutztown University.

*Saleem Ahmed*, Assistant Professor of Practice, Department of Journalism; MFA, University of Hartford.

*Osei Alleyne*, Assistant Professor, Department of Media Studies and Production; PhD, University of Pennsylvania.

*Jennifer Gerard Ball*, Assistant Professor, Department of Advertising and Public Relations; PhD, University of Texas at Austin.

*Jillian E. Bauer-Reese*, Associate Professor of Practice, Department of Journalism; MS, Philadelphia University.

*Geoffrey Baym*, Professor, Department of Media Studies and Production; PhD, University of Utah.

*Katherine M. Bex*, Assistant Professor of Instruction, Department of Advertising and Public Relations; MS, Temple University.

*David Boardman*, Professor, Department of Journalism; MA, University of Washington.

*David W. Brown*, Associate Professor of Instruction, Department of Advertising and Public Relations; ThM, Eastern University.

*Lauren J. Bullock*, Assistant Professor of Instruction, Department of Advertising and Public Relations; MS, Florida State University.

*Deborah Cai*, Professor, Department of Communication and Social Influence; PhD, Michigan State University.

*Guillermo G. Caliendo*, Assistant Professor of Instruction, Department of Communication and Social Influence; PhD, University of Pittsburgh.

*Amy L. Caples*, Assistant Professor of Instruction, Department of Media Studies and Production; BA, Temple University.

*Alice Castellini*, Assistant Professor of Instruction, Department of Media Studies and Production; MS, University of Pennsylvania.

*Jessica Castonguay*, Assistant Professor, Department of Advertising and Public Relations; PhD, University of Arizona.

*Olivia Cohen*, Assistant Professor of Instruction, Department of Communication and Social Influence; PhD, The Pennsylvania State University.

*William B. Cook*, Assistant Professor of Instruction, Department of Advertising and Public Relations; MA, The Pennsylvania State University.

*Erin K. Coyle*, Associate Professor, Department of Journalism; PhD, University of North Carolina at Chapel Hill.

*Brian Creech*, Associate Professor, Department of Journalism; PhD, University of Georgia.

*Sherri Hope Culver*, Associate Professor of Instruction, Department of Media Studies and Production; MLA, University of Pennsylvania.

*Fabienne L. Darling-Wolf*, Professor, Department of Journalism; PhD, University of Iowa.

*Jason del Gandio*, Associate Professor of Instruction, Department of Communication and Social Influence; PhD, Southern Illinois University, Carbondale.

*Ryan S. Eanes*, Assistant Professor of Instruction, Department of Advertising and Public Relations; PhD, University of Oregon.

*Alison Ebbecke*, Associate Professor of Instruction, Department of Advertising and Public Relations; BA, Temple University.

*Gregg C. Feistman*, Associate Professor of Practice, Department of Advertising and Public Relations; MA, Marist College.

*Jan L. Fernback*, Associate Professor, Department of Media Studies and Production; PhD, University of Colorado.

*Matthew R. Fine*, Associate Professor of Practice, Department of Media Studies and Production; MS, Columbia University.

*Edward L. Fink*, Laura H. Carnell Professor, Department of Communication and Social Influence; PhD, University of Wisconsin-Madison.

*Jennifer Lovrinic Freeman*, Assistant Professor of Instruction, Department of Advertising and Public Relations; BS, Northwestern University.

*Joseph Glennon*, Associate Professor of Instruction, Department of Advertising and Public Relations; MFA, Temple University.

*Paul Gluck*, Associate Professor of Practice, Department of Media Studies and Production; BA, Temple University.

*Scott Gratson*, Professor of Instruction, Department of Communication and Social Influence; PhD, University of Denver.

*Bruce W. Hardy*, Associate Professor, Department of Communication and Social Influence; PhD, University of Pennsylvania.

*Christopher Harper*, Professor Emeritus, Department of Journalism; MJ, Northwestern University.

*Stacey J. Harpster*, Assistant Professor of Instruction, Department of Advertising and Public Relations; MBA, Temple University.

*Marc Lamont Hill*, Professor, Department of Media Studies and Production; PhD, University of Pennsylvania.

*R. Lance Holbert*, Professor, Department of Communication and Social Influence; PhD, University of Wisconsin-Madison.

*Andrew Iliadis*, Assistant Professor, Department of Media Studies and Production; PhD, Purdue University.

*Thomas L. Jacobson*, Professor, Department of Media Studies and Production; PhD, University of Washington.

*Denise James*, Assistant Professor of Practice, Department of Journalism; BA, Michigan State University.

*Peter Jaroff*, Assistant Professor of Practice, Department of Media Studies and Production; BA, Grinnell College.

*Tricia S. Jones*, Professor, Department of Communication and Social Influence; PhD, The Ohio State University.

*Sheryl D. Kantrowitz*, Assistant Professor of Instruction, Department of Advertising and Public Relations; BFA, Syracuse University.

*Carolyn L. Kitch*, Laura H. Carnell Professor, Department of Journalism; PhD, Temple University.

*John S. Klotz*, Associate Professor of Practice, Department of Media Studies and Production; MS, Rosemont College.

*Lauren Kogen*, Assistant Professor, Department of Media Studies and Production; PhD, University of Pennsylvania.

*Joseph J. Kraus*, Assistant Professor of Practice, Department of Media Studies and Production; BA, Temple University.

*Heather LaMarre*, Associate Professor, Department of Communication and Social Influence; PhD, The Ohio State University.

*Sarah M. Landwehr*, Assistant Professor of Instruction, Department of Journalism; MA, Temple University.

*Yvonne Latty*, Professor of Practice, Department of Journalism; MA, New York University.

*Susanna Lee*, Assistant Professor, Department of Advertising and Public Relations; PhD, University of Florida.

*Matthew Lombard*, Associate Professor, Department of Media Studies and Production; PhD, Stanford University.

*Christopher Malo*, Assistant Professor of Practice, Department of Journalism; MS, Temple University.

*Larisa Kingston Mann*, Assistant Professor, Department of Media Studies and Production; PhD, University of California, Berkeley Law.

*Michael L. Maynard*, Associate Professor, Department of Advertising and Public Relations; PhD, Rutgers University.

*George W. Miller III*, Associate Professor of Practice, Department of Journalism; MJ, Columbia University.

*David T.Z. Mindich*, Professor, Department of Journalism; PhD, New York University.

*Logan K. Molyneux*, Associate Professor, Department of Journalism; PhD, University of Texas at Austin.

*Nancy E. Morris*, Professor Emerita, Department of Media Studies and Production; PhD, University of Pennsylvania.

*Katherine A. Mueller*, Associate Professor, Department of Advertising and Public Relations; MFA, Temple University.

*Patrick D. Murphy*, Professor, Department of Media Studies and Production; PhD, Ohio University.

*Wazhmah Osman*, Associate Professor, Department of Media Studies and Production; PhD, New York University.

*Aron Pilhofer*, Associate Professor and the James B. Steele Chair in Journalism Innovation, Department of Journalism; BA, University of Minnesota.

*Hector Postigo*, Associate Professor, Department of Media Studies and Production; PhD, Rensselaer Polytechnic Institute.

*Deborah M. Racano*, Assistant Professor of Instruction, Department of Advertising and Public Relations; BFA, Moore College of Art and Design.

*Clemencia Rodriguez*, Professor, Department of Media Studies and Production; PhD, Ohio University.

*Steve K. Ryan*, Assistant Professor of Instruction, Department of Advertising and Public Relations; MS, Temple University.

*Dana K. Saewitz*, Associate Professor of Instruction, Department of Advertising and Public Relations; MLA, University of Pennsylvania.

*Youngji Seo*, Assistant Professor of Instruction, Department of Advertising and Public Relations; PhD, University of Georgia.

*Adrienne Shaw*, Associate Professor, Department of Media Studies and Production; PhD, University of Pennsylvania.

*Larry Stains*, Associate Professor of Practice, Department of Journalism; MJ, Columbia University.

*Meghna Tallapragada*, Assistant Professor, Department of Advertising and Public Relations; PhD, Cornell University.

*Karen M. Turner*, Associate Professor, Department of Journalism; JD, Northwestern University School of Law.

*Barry Vacker*, Associate Professor of Instruction, Department of Media Studies and Production; PhD, University of Texas at Austin.

*Linn Washington*, Professor, Department of Journalism; MSL, Yale Law School.

*Kristine Trever Weatherston*, Associate Professor of Instruction, Department of Media Studies and Production; PhD, Virginia Commonwealth University.

*Tracey Weiss*, Associate Professor of Instruction, Department of Advertising and Public Relations; PhD, Temple University.

*Andrea D. Wenzel*, Assistant Professor, Department of Journalism; PhD, University of Southern California.

*Thomas Wright*, Associate Professor of Instruction, Department of Communication and Social Influence; PhD, Purdue University.

*Laura Zaylea*, Associate Professor of Instruction, Department of Media Studies and Production; MFA, San Francisco Art Institute.

## School of Sport, Tourism and Hospitality Management

*John Allgood*, Assistant Professor of Practice, Department of Sport and Recreation Management; MS, University of Oklahoma.

*Benjamin Altschuler*, Associate Professor of Practice, Department of Tourism and Hospitality Management; PhD, University of Utah.

*Bradley J. Baker*, Assistant Professor, Department of Sport and Recreation Management; PhD, Temple University.

*Heather A. Blackburn*, Assistant Professor of Instruction, Department of Sport and Recreation Management; EdD, Drexel University.

*Debra K. Blair*, Associate Professor of Instruction, Department of Sport and Recreation Management; EdD, Temple University.

*Christine Ann Cleaver*, Assistant Professor of Practice, Department of Tourism and Hospitality Management; MEd, Cabrini College.

*George Diemer*, Associate Professor of Instruction, Department of Sport and Recreation Management; PhD, Temple University.

*Daniel C. Funk*, Professor, Department of Sport and Recreation Management; PhD, The Ohio State University.

*Ashley Gardner*, Assistant Professor of Instruction, Department of Sport and Recreation Management; PhD, University of Tennessee.

*Amy Giddings*, Professor of Instruction, Department of Sport and Recreation Management; PhD, Temple University.

*Caroline Heffernan*, Assistant Professor of Instruction, Department of Sport and Recreation Management; PhD, University of Minnesota.

*Jonathan E. Howe*, Assistant Professor of Instruction, Department of Sport and Recreation Management; PhD, The Ohio State University.

*Gareth J. Jones*, Assistant Professor, Department of Sport and Recreation Management; PhD, North Carolina State University.

*Jeremy S. Jordan*, Professor, Department of Sport and Recreation Management; PhD, The Ohio State University.

*R. Aubrey Kent*, Professor, Department of Sport and Recreation Management; PhD, The Ohio State University.

*Thilo Kunkel*, Associate Professor, Department of Sport and Recreation Management; PhD, Griffith University.

*Lindsey Lee*, Assistant Professor, Department of Tourism and Hospitality Management; PhD, University of Houston.

*Xiang Li*, Professor, Department of Tourism and Hospitality Management; PhD, Texas A and M University.

*Lu Lu*, Associate Professor, Department of Tourism and Hospitality Management; PhD, University of Washington.

*Joseph Mahan III*, Associate Professor of Instruction, Department of Sport and Recreation Management; PhD, University of Maryland College Park.

*Chihyung Michael Ok*, Associate Professor, Department of Tourism and Hospitality Management; PhD, Kansas State University.

*Richard Ridall*, Associate Professor of Instruction, Department of Sport and Recreation Management; MEd, Temple University.

*Wesley S. Roehl*, Professor, Department of Tourism and Hospitality Management; PhD, Texas A and M University.

*Ira L. Rosen*, Associate Professor of Practice, Department of Tourism and Hospitality Management; MA, Montclair State University.

*Michael F. Sheridan*, Associate Professor of Practice, Department of Tourism and Hospitality Management; EdD, Temple University.

*Elizabeth Taylor*, Assistant Professor, Department of Sport and Recreation Management; PhD, University of Tennessee.

*Luorong Wu*, Associate Professor, Department of Tourism and Hospitality Management; PhD, The Pennsylvania State University.

*Yang Yang*, Associate Professor, Department of Tourism and Hospitality Management; PhD, University of Florida.

## School of Theater, Film and Media Arts

*Mounia Akl*, Assistant Professor of Instruction, Department of Film and Media Arts; MFA, Columbia University.

*Nora Alter*, Professor, Department of Film and Media Arts; PhD, University of Pennsylvania.

*Warren F. Bass*, Professor, Department of Film and Media Arts; MFA, Columbia University.

*Chris Cagle*, Associate Professor, Department of Film and Media Arts; PhD, Brown University.

*Marie Anne Chiment*, Professor, Department of Theater; MFA, New York University Tisch School of the Arts.

*Roderick L. Coover*, Professor, Department of Film and Media Arts; PhD, University of Chicago.

*Peter P. d'Agostino*, Professor, Department of Film and Media Arts; MA, San Francisco State University.

*Neal Dhand*, Assistant Professor of Instruction, Department of Film and Media Arts; MFA, Rochester Institute of Technology.

*Sarah Drury*, Associate Professor, Department of Film and Media Arts; MA, New York University Tisch School of the Arts.

*Fred M. Duer*, Professor, Department of Theater; MFA, Ohio University.

*LeAnn Erickson*, Professor, Department of Film and Media Arts; MFA, University of Iowa.

*Marcus Giamatti*, Associate Professor, Department of Theater; MFA, Yale University.

*Lindsay Goss*, Assistant Professor, Department of Theater; PhD, Brown University.

*Steven Gross*, Associate Professor, Department of Theater; PhD, Yale University.

*David Ingram*, Associate Professor of Instruction, Department of Theater; MFA, New York University Tisch School of the Arts.

*Lynne Innerst*, Associate Professor, Department of Theater; MFA, University of Southern California.

*Melanie Julian*, Associate Professor of Practice, Department of Theater; MFA, Point Park University.

*Michael J. Kuetemeyer*, Associate Professor, Department of Film and Media Arts; MFA, Temple University.

*Andrew Laine*, Associate Professor of Practice, Department of Theater; MFA, University of Texas at Austin.

*King Lu*, Assistant Professor of Instruction, Department of Film and Media Arts; MFA, Columbia University.

*Brandon McShaffrey*, Assistant Professor of Instruction, Department of Theater; MFA, Temple University.

*Matthew Miller*, Professor of Practice, Department of Theater; MFA, University of North Carolina at Chapel Hill.

*Kartik Nair*, Assistant Professor, Department of Film and Media Arts; PhD, New York University.

*Jason Norris*, Instructor, Department of Theater; MFA, University of Texas at Austin.

*Amy R. Olk*, Assistant Professor of Instruction, Department of Film and Media Arts; MFA, Temple University.

*Chet Pancake*, Associate Professor, Department of Film and Media Arts; MFA, School of the Art Institute of Chicago.

*David A. Parry*, Professor, Department of Film and Media Arts; MS, Massachusetts Institute of Technology.

*Louis J. Pepe*, Associate Professor of Instruction, Department of Film and Media Arts; MFA, Temple University.

*Peter R. Reynolds*, Associate Professor of Practice, Department of Theater; MFA, Temple University.

*Amina S. Robinson*, Assistant Professor of Instruction, Department of Theater; MFA, Temple University.

*Donna Snow*, Associate Professor, Department of Theater; MFA, American Conservatory Theater.

*Jennifer Stafford*, Assistant Professor, Department of Theater; MFA, New York University Tisch School of the Arts.

*Elisabeth Subrin*, Professor, Department of Film and Media Arts; MFA, School of the Art Institute of Chicago.

*Rea Tajiri*, Associate Professor, Department of Film and Media Arts; MFA, California Institute of the Arts.

*Douglas C. Wager*, Professor, Department of Theater; MFA, Boston University.

*Kimmika Williams-Witherspoon*, Associate Professor, Department of Theater; PhD, Temple University.

*Ashley S. Young*, Instructor, Department of Film and Media Arts; PhD, University of Southern California.

*Jamie Zelechowski*, Assistant Professor of Instruction, Department of French, German, Italian and Slavic; PhD, University of California Los Angeles.

## College of Science and Technology

*Ergin H. Ahmed*, Research Associate Professor, Department of Physics; PhD, Temple University.

*Ola Ajaj*, Assistant Professor of Instruction, Department of Physics; PhD, Florida Atlantic University.

*Tamer Aldwairi*, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Mississippi State University.

*Shohreh Amini*, Professor, Department of Biology; PhD, University of Pennsylvania.

*Eleni Anni*, Associate Professor of Instruction, Department of Biology; PhD, University of Patras.

*Alla Arzumanyan*, Research Assistant Professor, Department of Biology; PhD, Yerevan State University.

*Hamza Atac*, Research Assistant Professor, Department of Physics; PhD, Temple University.

*Caryn S. Babaian*, Assistant Professor of Instruction, Department of Biology; PhD, Temple University.

*Jessica Babcock*, Assistant Professor of Instruction, Department of Mathematics; MEd, Temple University.

*Zachary Bailey*, Assistant Professor of Instruction, Department of Mathematics; PhD, University of Delaware.

*Darius Balciunas*, Associate Professor, Department of Biology; PhD, Uppsala University.

*Matthew Banks*, Research Assistant Professor, Department of Biology; PhD, State University of New York at Stony Brook.

*Suman Batish*, Assistant Professor of Instruction, Department of Biology; PhD, University of Cambridge.

*Rebecca L. Beadling*, Assistant Professor, Department of Earth and Environmental Science; PhD, University of Arizona.

*Jocelyn Behm*, Assistant Professor, Department of Biology; PhD, University of Wisconsin-Madison.

*Richard Beigel*, Professor, Department of Computer and Information Sciences; PhD, Stanford University.

*Gianfranco Bellipanni*, Associate Professor of Instruction, Department of Biology; PhD, University of Palermo.

*Abha Belorkar*, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, National University of Singapore.

*Shiferaw S. Berhanu*, Professor, Department of Mathematics; PhD, Rutgers University.

*Eugeny Bichenkov*, Research Assistant Professor, Department of Biology; PhD, Novosibirsk Institute of Bioorganic Chemistry.

*Christopher J. Biehl*, Instructor, Department of Computer and Information Sciences; MBA, Temple University.

*James D. Bloxton*, Associate Professor of Instruction, Department of Chemistry; PhD, Temple University.

*Eric U. Borguet*, Professor, Department of Chemistry; PhD, University of Pennsylvania.

*Yelena Borovitskaya*, Associate Professor of Instruction, Department of Physics; PhD, Institute of Applied Physics, Nizhnii Novgorod, Russia.

*Angela L. Bricker*, Associate Professor of Instruction, Department of Biology; PhD, University of Cambridge.

*Craig Brumwell*, Assistant Professor of Instruction, Department of Biology; PhD, University of Connecticut Health Center.

*Ilya V. Buynevich*, Associate Professor, Department of Earth and Environmental Science; PhD, Boston University.

*Vincenzo Carnevale*, Associate Professor, Department of Biology; PhD, International School for Advanced Studies, Trieste.

*Elizabeth Cerkez*, Associate Professor of Instruction, Department of Chemistry; PhD, Temple University.

*Farzana Chaudhry*, Associate Professor of Instruction, Department of Mathematics; PhD, Oxford University.

*Steven M. Chemtob*, Assistant Professor, Department of Earth and Environmental Science; PhD, California Institute of Technology.

*Je-Wei Chen*, Associate Professor of Instruction, Department of Mathematics; PhD, State University of New York at Stony Brook.

*Ke Chen*, Research Associate Professor, Department of Physics; PhD, Chinese Academy of Sciences.

*Yuzhou Chen*, Assistant Professor, Department of Computer and Information Sciences; PhD, Princeton University.

*Rujeko Chinomona*, Research Assistant Professor, Department of Mathematics; PhD, Southern Methodist University.

*Martha Constantinou*, Selma Lee Bloch Brown Associate Professor in Physics, Department of Physics; PhD, University of Cyprus.

*Erik Cordes*, Professor, Department of Biology; PhD, The Pennsylvania State University.

*Raymond F. Coughlin*, Associate Professor, Department of Mathematics; PhD, Illinois Institute of Technology.

*Edward T. Crotty*, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

*Hai-Lung Dai*, Professor, Department of Chemistry; PhD, University of California Berkeley.

*Boris A. Datskovsky*, Professor, Department of Mathematics; PhD, Harvard University.

*Alexandra Krull Davatzes*, Associate Professor, Department of Earth and Environmental Science; PhD, Stanford University.

*Nicholas Davatzes*, Associate Professor, Department of Earth and Environmental Science; PhD, Stanford University.

*Franklin A. Davis*, Professor Emeritus, Department of Chemistry; PhD, Syracuse University.

*Timothy S. Davis*, Instructor, Department of Earth and Environmental Science; MS, Temple University.

*Graham Dobereiner*, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry; PhD, Yale University.

*David Dobar*, Instructor, Department of Computer and Information Sciences; MS, Temple University.

*Vasily Dolgushev*, Professor, Department of Mathematics; PhD, Massachusetts Institute of Technology.

*Marilyn Downing*, Assistant Professor of Instruction, Department of Mathematics; MA, Temple University.

*Eduard Dragut*, Associate Professor, Department of Computer and Information Sciences; PhD, University of Illinois at Chicago.

*Jeanette V. Dumas*, Associate Professor of Instruction, Department of Biology; PhD, Drexel University.

*Zbigniew Dziembowski*, Associate Professor, Department of Physics; PhD, Warsaw University.

*Andrew Eisenberg*, Assistant Professor of Instruction, Department of Mathematics; PhD, Tufts University.

*Khaled M. Elokely*, Research Associate Professor, Department of Chemistry; PhD, University of Mississippi.

*Jennifer Emtage*, Assistant Professor of Instruction, Department of Biology; PhD, Johns Hopkins University.

*Ananias A. Escalante*, Professor, Department of Biology; PhD, University of California Irvine.

*Catherine Fair*, Assistant Professor of Practice, Department of Chemistry; MD, University of Alabama at Birmingham.

*Mark A. Feitelson*, Professor, Department of Biology; PhD, University of California Los Angeles.

*John Fiore*, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, University of Pennsylvania.

*Leigh Flagg*, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, University of Tulsa.

*Steven Fleming*, Professor of Instruction, Department of Chemistry; PhD, University of Wisconsin.

*Natalie P. Flynn*, Assistant Professor of Instruction, Department of Earth and Environmental Science; MA, Temple University.

*Seema Freer*, Associate Professor of Practice, Department of Biology; PhD, Thomas Jefferson University.

*Amy Freestone*, Associate Professor, Department of Biology; PhD, University of California Davis.

*David Futer*, Professor, Department of Mathematics; PhD, Stanford University.

*Hongchang Gao*, Assistant Professor, Department of Computer and Information Sciences; PhD, University of Pittsburgh.

*Eleonora Gianti*, Research Associate Professor, Department of Chemistry; PhD, University of the Sciences.

*Jayakumar G. Gilbert*, Associate Professor of Instruction, Department of Chemistry; PhD, Drexel University.

*Isabel C. Gines*, Instructor, Department of Biology; PSM, Temple University.

*Antonio Giordano*, Professor, Department of Biology; PhD, University of Trieste.

*Mary Grace Giraldo*, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Syracuse University.

*Yury Grabovsky*, Professor, Department of Mathematics; PhD, New York University.

*David E. Grandstaff*, Professor, Department of Earth and Environmental Science; PhD, Princeton University.

*Jean-David Grattepanche*, Research Assistant Professor, Department of Biology; PhD, University of Littoral.

*Giovanni Gravina*, Research Assistant Professor, Department of Mathematics; PhD, Carnegie Mellon University.

*Alexander Gray*, Associate Professor, Department of Physics; PhD, Lawrence Berkeley National Laboratory and University of California, Davis.

*Cristian E. Gutiérrez*, Professor, Department of Mathematics; PhD, University of Buenos Aires.

*Raymond Habas*, Professor, Department of Biology; PhD, State University of New York at Stony Brook.

*Allan Haldane*, Research Associate Professor, Department of Physics; PhD, Rutgers University.

*Nahed Hamid*, Assistant Professor of Instruction, Department of Mathematics; MS, Kean University.

*Jun Han*, Research Assistant Professor, Department of Chemistry; PhD, Texas A and M University.

*Xubin He*, Professor, Department of Computer and Information Sciences; PhD, University of Rhode Island.

## Lewis Katz School of Medicine

*Thair Abed*, Clinical Professor, Department of Pediatrics; MD.

*Omar Agosto*, Clinical Associate Professor, Department of Radiology; MD.

*Mian Ahmad*, Clinical Professor, Department of Anesthesiology; MD.

*Saira Ahmad*, Clinical Assistant Professor, Department of Radiology; MBBS.

*Ziauddin Ahmed*, Clinical Professor, Department of Medicine; MD.

*Israh Akhtar*, Clinical Professor, Department of Pathology and Laboratory Medicine; MD.

*Kamardeen Alao*, Clinical Associate Professor, Department of Anesthesiology; MBBS.

*Jennifer Aldrich*, Clinical Professor, Department of Medicine; MD.

*Nadia Ali*, Clinical Associate Professor, Department of Medicine; MD.

*Sayed Ali*, Professor, Department of Radiology; MBBS.

*Jack Allan*, Clinical Instructor, Department of Emergency Medicine; MD.

*Jill Megan Allenbaugh*, Associate Professor, Department of Medicine; MD.

*Natalie Allman*, Clinical Assistant Professor, Department of Neurology; DO.

*Rami Almefty*, Assistant Professor, Department of Neurosurgery; MD.

*Mohamed Alsammak*, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD.

*Jeffrey H. Anderson*, Clinical Assistant Professor, Department of Surgery; MD.

*Syed Yasir Andrabi*, Assistant Professor, Department of Radiology; MD.

*Allison M. Andrews*, Research Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

*Jonathan Anolik*, Clinical Professor, Department of Medicine; MD.

*Sofia B. Arango Mendoza*, Clinical Assistant Professor, Department of Medicine; MD.

*Jordana Arkus*, Assistant Professor, Department of Physician Assistant Program; MMS.

*Valerie Armstead*, Clinical Professor, Department of Anesthesiology; MD.

*Stephen Aronoff*, Professor and the Waldo Nelson Chair, Department of Pediatrics; MD.

*Oneida Arosarena*, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Aileen Arriola*, Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

*Michael V. Autieri*, Professor, Department of Lemole Center for Integrated Lymphatics Research; PhD, Hahnemann University.

*Peter Axelrod*, Professor, Department of Medicine; MD.

*Arleen Ayala-Crespo*, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Homaira Azim*, Assistant Professor, Department of Biomedical Education and Data Science; MD, PhD.

*Sanam Baghshomali*, Clinical Assistant Professor, Department of Neurology; MD.

*Karim Bahmed*, Research Assistant Professor, Department of Center for Inflammation and Lung Research; PhD.

*Ashish Bains*, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MBBS.

*Upneet K. Bains*, Clinical Associate Professor, Department of Ophthalmology; MD.

*Charles T. Bakhos*, Professor, Department of Thoracic Medicine and Surgery; MD.

*Eli Balshan*, Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

*Pamela Bannon*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Mary F. Barbe*, Professor, Department of Center for Translational Medicine; PhD, Wake Forest University.

*Ruby H. Barghini*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*Leslie F. Barnes*, Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Jeffrey Barrett*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Riyaz Bashir*, Professor, Department of Medicine; MBBS.

*Anuj Basil*, Associate Professor, Department of Medicine; MD.

*Sean M. Baskin*, Clinical Assistant Professor, Department of Anesthesiology; DO.

*Richard H. G. Baxter*, Assistant Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Chicago.

*Jessica Beard*, Associate Professor, Department of Surgery; MD.

*Jordan G. Becker*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Joseph Benjamin*, Clinical Professor, Department of Medicine; MBBS.

*Abiona Berkeley*, Clinical Professor, Department of Anesthesiology; MD.

*Robert L. Bettiker*, Clinical Professor, Department of Medicine; MD.

*Sumita Bhambhani*, Clinical Professor, Department of Anesthesiology; MBBS.

*Rajiv Bhuta*, Clinical Assistant Professor, Department of Medicine; MD.

*Aurelia N. Bizamcer*, Clinical Professor, Department of Psychiatry and Behavioral Science; MD, PhD.

*Carly Blick*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Michael Bode*, Clinical Assistant Professor, Department of Medicine; MD.

*Charles Bongiorno*, Clinical Professor, Department of Medicine; MD.

*Lucia Borriello*, Assistant Professor, Department of Cancer and Cellular Biology; PhD, University of Paris.

*Suzanne Boyle*, Associate Professor, Department of Medicine; MD.

*Tanise L. Branche*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Kathleen Brennan*, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

*Lawrence Brent*, Professor, Department of Medicine; MD.

*Jessica Briscoe*, Clinical Assistant Professor, Department of Medicine; MD.

*Michael Bromberg*, Professor, Department of Medicine; MD, PhD.

*Andrea E. Brown*, Clinical Associate Professor, Department of Physical Medicine and Rehabilitation; MD.

*Lauren A. Brown*, Clinical Assistant Professor, Department of Radiology.

*Robert Bryan*, Clinical Associate Professor, Department of Emergency Medicine; DO.

*Tricia Helen Burdo*, Professor, Department of Center for Neurovirology and Gene Editing; PhD, Penn State College of Medicine.

*Julia M. Burger*, Clinical Associate Professor, Department of Pediatrics; MD.

*Jessie Burkhartzmeyer Huff*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; DO.

*Jacqueline Burnell*, Clinical Assistant Professor, Department of Medicine; MD.

*Monica Busuioc*, Clinical Associate Professor, Department of Medicine; MD, PhD.

*Bettina A. Buttaro*, Associate Professor, Department of Biomedical Education and Data Science; PhD, University of Minnesota.

*Whitney V. Cabey*, Assistant Professor, Department of Emergency Medicine; MD.

*Rachel Caplan*, Clinical Assistant Professor, Department of Neurology; MD.

*Saraswathi A. Cappelle*, Clinical Assistant Professor, Department of Medicine; DO.

*Bruce Carnivale*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; DO.

*Jordan Carter*, Clinical Assistant Professor, Department of Medicine; MD.

*Dione J. Cash*, Clinical Professor, Department of Pediatrics; MD.

*John Cernetich*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Linda Chaille-Arnold*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Marion M. Chan*, Associate Professor, Department of Biomedical Education and Data Science; PhD, Cornell University Medical College.

*Ashwin Chandar*, Assistant Professor, Department of Medicine; MD.

*Seetha Chandrasekhara*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*Georgios Charatzoglou*, Assistant Professor, Department of Anesthesiology; MD.

*Wissam Chatila*, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

*Ankita Chatterjee*, Clinical Assistant Professor, Department of Medicine; MD.

*Alexander Chau*, Clinical Assistant Professor, Department of Medicine; MD.

*Cindy Chen*, Clinical Assistant Professor, Department of Medicine; MD.

*Zhongjian Cheng*, Research Assistant Professor, Department of Center for Translational Medicine; PhD.

*Santhosh Cherian*, Clinical Assistant Professor, Department of Radiology; MD.

*Konstantin Chernukha*, Clinical Associate Professor, Department of Radiology; MD.

*Divya Chillapalli*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Hui Ying Joanna Choi*, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

*Julee Choi*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Parkson Lee-Gau Chong*, Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Illinois at Urbana-Champaign.

*Christopher Chu*, Clinical Associate Professor, Department of Medicine; MD.

*Frank B. Chumley*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*David E. Ciccolella*, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

*Rachael E. Clark*, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

*Tatyan Clarke*, Clinical Associate Professor, Department of Surgery; MD.

*Heather Clauss*, Clinical Professor, Department of Medicine; MD.

*Katsuko Nagayoshi Cleymaet*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; DO.

*Kylee Clyatt*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Gary S. Cohen*, Professor and the Herbert M. Stauffer Chair in Diagnostic Imaging, Department of Radiology; MD.

*Lisa Collazzo*, Clinical Assistant Professor, Department of Radiology; MD.

*Christopher J. Combs*, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; PhD.

*Serban Constantinescu*, Professor, Department of Medicine; MD, PhD.

*Joshua Cooper*, Professor, Department of Medicine; MD.

*Francis C. Cordova*, Professor, Department of Thoracic Medicine and Surgery; MD.

*Brittany Corso*, Clinical Assistant Professor, Department of Medicine; MD.

*Melanie A. Cosby*, Assistant Professor, Department of Office of Health Equity, Diversity and Inclusion; PhD.

*Thomas G. Costantino*, Clinical Professor, Department of Emergency Medicine; MD.

*Vincent Cowell*, Clinical Professor, Department of Anesthesiology; MD.

*Deborah Crabbe*, Professor, Department of Medicine; MD.

*Gerard J. Criner*, Laura H. Carnell Professor, Department of Thoracic Medicine and Surgery; MD.

*Edmond Cronin*, Associate Professor, Department of Medicine; MBBSCh.

*Amy Cruz*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Ernesto S. Cruz*, Professor, Department of Physical Medicine and Rehabilitation; MD.

*Jeffrey Cruz*, Clinical Assistant Professor, Department of Radiology; MD.

*Dorian L. Culmer-Butler*, Assistant Professor, Department of University Animal Laboratory Resources; DVM.

*Emily Cuthbertson*, Clinical Associate Professor, Department of Radiology; MD.

*Gilbert E. D'Alonzo*, Professor, Department of Thoracic Medicine and Surgery; DO.

*Joseph D'Orazio*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Simindokht Dadparvar*, Professor, Department of Radiology; MD.

*Judith Daniels*, Associate Professor, Department of Biomedical Education and Data Science; PhD, University of North Carolina at Chapel Hill.

*Chandra Dass*, Professor, Department of Radiology; MBBS.

*Elizabeth Dauer*, Clinical Associate Professor, Department of Surgery; MD.

*Edward C. DaVeiga*, Clinical Assistant Professor, Department of Medicine; MD.

*Blachy Davila*, Clinical Assistant Professor, Department of Radiology; MD.

*Michael A. DeAngelis*, Clinical Professor, Department of Emergency Medicine; MD.

*Anahita Deboo*, Clinical Professor, Department of Neurology; MD.

*Christopher Decker*, Assistant Professor, Department of Surgery; MD.

*Giuliana Defrancesch*, Clinical Professor, Department of Medicine; MD.

*Michael Del Vecchio*, Clinical Professor, Department of Pediatrics; MD.

*Nicole Desai*, Clinical Assistant Professor, Department of Medicine; DO.

*Parag Desai*, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

*Mark Desmond*, Clinical Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Eric A. DeVeaux*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Sanjiv Dewan*, Clinical Assistant Professor, Department of Surgery; MD.

*Antonio Di Carlo*, Professor, Department of Surgery; MD.

*Jaclyn Dietzold*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*Shalizi Dolan*, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Gary Domeracki*, Clinical Associate Professor, Department of Ophthalmology; MD.

*Eduardo Dominguez Castillo*, Clinical Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

*Jose Dorotan*, Assistant Professor, Department of Anesthesiology; MD.

*Laura Douglass*, Clinical Assistant Professor, Department of Urology; MD.

*Ilona Duffy*, Clinical Associate Professor, Department of Pediatrics; MD.

*Sean Duffy*, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

*Nahum J. Duker*, Professor, Department of Pathology and Laboratory Medicine; MD, University of Illinois College of Medicine.

*Michelle Duncan*, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Shahnaz Duymun*, Clinical Assistant Professor, Department of Medicine; DO.

*Charles Earley*, Assistant Professor, Department of Medicine.

*Jocelyn P. Edathil*, Clinical Associate Professor, Department of Medicine; MD.

*Merritt Edlind*, Clinical Assistant Professor, Department of Medicine; MD.

*Daniel Edmundowicz*, Professor and the Florence P. Bernheimer Distinguished Service Chair in Medicine, Department of Medicine; MD.

*Satoru Eguchi*, Professor, Department of Cardiovascular Research Center; MD, Tohoku University School of Medicine, PhD, Tokyo Medical and Dental University.

*Adam C. Ehrlich*, Associate Professor, Department of Medicine; MD.

*Toby K. Eisenstein*, Professor, Department of Center for Substance Abuse Research; PhD, Bryn Mawr College.

*Isabel Eisner*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*John Elrod*, Associate Professor, Department of Cardiovascular Research Center; PhD, Albert Einstein College of Medicine.

*Nora Engel*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Buenos Aires.

*Cherie P. Erkmen*, Professor, Department of Thoracic Medicine and Surgery; MD.

*Kadir Erkmen*, Professor, Department of Neurosurgery; MD.

*Maria Escorcia De Leon*, Clinical Assistant Professor, Department of Medicine; MD.

*David Essex*, Professor, Department of Medicine; MD.

*Concepcion Estaras*, Assistant Professor, Department of Center for Translational Medicine; PhD, University of Barcelona.

*Shekar Eswarakrishnan*, Clinical Assistant Professor, Department of Medicine; MD.

*Daniel D. Eun*, Professor, Department of Urology; MD.

*Justin Faden*, Associate Professor, Department of Psychiatry and Behavioral Science; DO.

*Kathleen Fane*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Pauline Farnsworth*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Anam Fatma*, Clinical Assistant Professor, Department of Medicine; MD.

*Diana Feinstein*, Clinical Associate Professor, Department of Anesthesiology; DO.

*Thomas Fekete*, Professor and the Thomas M. Durant Chair, Department of Medicine; MD.

*Arthur Feldman*, Laura H. Carnell Professor, Department of Cardiovascular Sciences; MD, PHD, Louisiana State University.

*Sarah D. Fenerty*, Clinical Assistant Professor, Department of Radiology; MD.

*Gustavo Fernandez Romero*, Clinical Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

*Jaime Fineman*, Clinical Associate Professor, Department of Medicine; MD.

*Michael J. Fiorito*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*David J. Fish*, Clinical Professor, Department of Anesthesiology; MD.

*David Fiss*, Clinical Associate Professor, Department of Medicine; MD.

*Jack FitzSimmons*, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*David Fleece*, Clinical Professor, Department of Pediatrics; MD.

*Kimberly Forde*, Associate Professor, Department of Medicine; MD.

*Paul Forfia*, Professor, Department of Medicine; MD.

*Silvia Fossati*, Associate Professor, Department of Alzheimer's Center at Temple; PhD, University of Florence.

*Joseph Friedberg*, Professor, Department of Thoracic Medicine and Surgery; MD.

*Frank K. Friedenberg*, Professor, Department of Medicine; MD.

*Emily Friend*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Jian Fu*, Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

*Gianluca Gallo*, Professor, Department of Neural Sciences; PhD, University of Illinois.

*David Galos*, Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Ana Gamero*, Associate Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of South Florida.

*Justin M. Gamez*, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Andrew Gangemi*, Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

*Chethan Gangireddy*, Clinical Associate Professor, Department of Medicine; MD.

*Michael P. Gannon*, Assistant Professor, Department of Medicine; MD.

*Erhe Gao*, Research Professor, Department of Center for Translational Medicine; MD, PhD.

*Jamie Garfield*, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

*Amanda Gavin*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*Nina Gentile*, Professor, Department of Emergency Medicine; MD.

*Glenn Stephen Gerhard*, Professor and the Joseph and Rebecca Goodfriend Endowed Chair in Genetics, Department of Medical Genetics and Molecular Biochemistry; MD, The Pennsylvania State University.

*Susan Gersh*, Clinical Professor, Department of Medicine; MD.

*Edward J. Gettings*, Associate Professor, Department of Neurology; DO.

*Jayashri Ghosh*, Research Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD.

*Kathleen M. Giangiaco*, Associate Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Pennsylvania.

*Andrew Gibb*, Instructor, Department of Cardiovascular Research Center.

*Ryan C. Gibbons*, Associate Professor, Department of Emergency Medicine; MD.

*Avrum Gillespie*, Professor, Department of Medicine; MD.

*Carol Glowacki*, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Ellen Gluzman*, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; MD.

*Harry Goett*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Eric Gokcen*, Clinical Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Amy J. Goldberg*, Professor and the George S. Peters, MD and Louise C. Peters Chair in Surgery, Department of Surgery; MD.

*Marc S. Goldberg*, Clinical Professor, Department of Anesthesiology; MD.

*Alejandro Gonzalez*, Clinical Associate Professor, Department of Medicine; MD.

*Maria Gonzalez*, Associate Professor, Department of Pathology and Laboratory Medicine; MD.

*Louis Goodrich*, Clinical Assistant Professor, Department of Neurology; DO.

*Matthew Gordon*, Associate Professor, Department of Thoracic Medicine and Surgery; MD.

*James J. Graham*, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; DO.

*Jeffrey Grand*, Clinical Assistant Professor, Department of Surgery; PsyD.

*Xavier Graña-Amat*, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Barcelona.

*Nicole Griffin*, Associate Professor, Department of Biomedical Education and Data Science; PhD.

*Paul Guido*, Clinical Assistant Professor, Department of Medicine; MD.

*Neilesh Gupta*, Clinical Assistant Professor, Department of Radiology; MD.

*Rohit Gupta*, Associate Professor, Department of Thoracic Medicine and Surgery; MBBS.

*Hemalatha Guruprasad*, Clinical Professor, Department of Pediatrics; MBBS.

*Maryellen E. Gusic*, Professor, Department of Biomedical Education and Data Science; MD.

*Behnum Habibi*, Assistant Professor, Department of Physical Medicine and Rehabilitation; MD.

*Dale S. Haines*, Associate Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, Hahnemann University.

*Shqiponja Hajdinaj*, Clinical Assistant Professor, Department of Radiology; DO.

*Ashleigh Hall*, Clinical Associate Professor, Department of Pediatrics; DO.

*Eman A. Hamad*, Professor, Department of Medicine; MD.

*Alireza Hamidian Jahromi*, Assistant Professor, Department of Surgery; MD.

*Samuel Han*, Clinical Assistant Professor, Department of Surgery; MD.

*Brittany Hansen*, Clinical Associate Professor, Department of Pediatrics; DO.

*Amanda Hargrove*, Clinical Associate Professor, Department of Anesthesiology; MD.

*Richard A. Harrigan*, Professor, Department of Emergency Medicine; MD.

*Brendan Hart*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Laura A. Hart*, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Jared Hassler*, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD.

*Ellen Hauck*, Clinical Professor, Department of Anesthesiology; DO.

*Mary B. Hays*, Assistant Professor, Department of Center for Urban Bioethics; MSW.

*Megan Healy*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Candrice R. Heath*, Assistant Professor, Department of Dermatology; MD.

*Megan Heere*, Clinical Professor, Department of Pediatrics; MD.

*Terry Heiman-Patterson*, Professor, Department of Neurology; MD.

*Stephen Heller*, Clinical Professor, Department of Medicine; MD.

*Jeffrey Henderer*, Professor and the Edward Hagop Bedrossian Chair, Department of Ophthalmology; MD.

*Randa P. Hennawy*, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MBChB.

*Enrique Hernandez*, Professor and the J. Robert Willson Chair, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Gail Herrine*, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Sharon Herring*, Associate Professor, Department of Medicine; MD.

*Beverly Hershey*, Clinical Professor, Department of Radiology; MD.

*Gregory Hertel*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Hannah Hill*, Clinical Assistant Professor, Department of Medicine; MD.

*Wen-Zhe Ho*, Professor, Department of Pathology and Laboratory Medicine; MD, Wuhan University School of Medicine.

*Carolyn Hogan*, Clinical Assistant Professor, Department of Medicine; MD.

*Kelly Holz*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Brenda J. Horwitz*, Clinical Professor, Department of Medicine; MD.

*Ralph I. Horwitz*, Professor, Department of Cardiovascular Research Center; MD.

*Hillary Hott*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Karen Houck*, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Steven R. Houser*, Professor, Department of Cardiovascular Research Center; PhD, Temple University.

*Aroonsiri Howell*, Associate Professor, Department of Medicine; MD.

*Sylvia Hsu*, Professor, Department of Dermatology; MD.

*Wenhui Hu*, Professor, Department of Center for Metabolic Disease Research; MD, PhD, Peking Union Medical College and Chinese Academy of Medical Science.

*Kelly Eileen Hughes*, Clinical Assistant Professor, Department of Medicine; MD.

*Christian Hurtz*, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Albert-Ludwigs-Universität Freiburg im Breisgau.

*Tiffany Hwa*, Assistant Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Vanneta Hyatt*, Clinical Professor, Department of Medicine; MD.

*Laura Igarabuzza*, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

*Vikranth Induru*, Clinical Assistant Professor, Department of Medicine; MD.

*Glenn Isaacson*, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Derek Isenberg*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*David Isgan*, Associate Professor, Department of Biomedical Education and Data Science; MHS.

*Sabrina Islam*, Assistant Professor, Department of Medicine; MD.

*Amy Iwamaye*, Assistant Professor, Department of Medicine; MD.

*Jessica Jackson*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Mercedes P. Jacobson*, Professor, Department of Neurology; MD.

*Neelu Jain*, Assistant Professor, Department of Radiology.

*Jessica James*, Clinical Associate Professor, Department of Pediatrics; MD.

*Arundathi Jayatilleke*, Clinical Associate Professor, Department of Medicine; MD.

*Liselotte Jensen*, Associate Professor, Department of Center for Inflammation and Lung Research; PhD, University of Aarhus.

*Stacey Jeronis*, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Nirag C. Jhala*, Professor, Department of Pathology and Laboratory Medicine; MD.

*Xi Jing*, Associate Professor, Department of Surgery; MD.

*Keonna Johnson*, Clinical Assistant Professor, Department of Surgery; MD.

*Christine M. Jones*, Assistant Professor, Department of Surgery; MD.

*Nora L. Jones*, Associate Professor, Department of Center for Urban Bioethics; PhD, Temple University.

*Padmaja Jonnalagadda*, Clinical Professor, Department of Radiology; MBBS.

*Erin Kaesshaefer*, Assistant Professor, Department of Physician Assistant Program; MS.

*Allan Kahler*, Instructor, Department of Pediatrics.

*Caroline Kaigh*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Aditi Kalla*, Clinical Assistant Professor, Department of Medicine; MD.

*Bhishak Kamat*, Clinical Associate Professor, Department of Radiology; MD.

*Ihab Kamel*, Professor, Department of Anesthesiology; MD.

*Rafal Kaminski*, Research Assistant Professor, Department of Center for Neurovirology and Gene Editing; PhD.

*Shin Hyeok Kang*, Assistant Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Johns Hopkins University School of Medicine.

*Lawrence Kaplan*, Professor, Department of Medicine; MD.

*Karan Kapoor*, Assistant Professor, Department of Medicine; MD.

*Sergey Karakashev*, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD.

*Sunil Karhadkar*, Associate Professor, Department of Surgery; MBBS.

*Alyssa Karl*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*David J. Karras*, Professor, Department of Emergency Medicine; MD.

*Mohammed A. Kashem*, Research Assistant Professor, Department of Surgery; PhD.

*Willard Stein Kasoff*, Associate Professor, Department of Neurosurgery; MD.

*Paul Katz*, Clinical Professor, Department of Neurology; MD.

*Martin Keane*, Professor, Department of Medicine; MD.

*Nicole Keane*, Clinical Assistant Professor, Department of Medicine; MBBCh.

*Amer Kechli*, Clinical Professor, Department of Pediatrics; MD.

*Kathleen M. Keefe*, Assistant Professor, Department of Biomedical Education and Data Science; PhD.

*Cory Keller*, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; DO.

*Caroline Kelly*, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

*Steven G. Kelsen*, Professor, Department of Thoracic Medicine and Surgery; MD.

*Renee M. Kendzierski*, Clinical Assistant Professor, Department of Radiology; DO.

*Michael F. Keresztury*, Clinical Professor, Department of Anesthesiology; MD.

*Kamel Khalili*, Laura H. Carnell Professor, Department of Center for Neurovirology and Gene Editing; PhD, University of Pennsylvania School of Medicine.

*Adil Irfan Khan*, Associate Professor, Department of Pathology and Laboratory Medicine; PhD.

*Mansoor Khan*, Clinical Associate Professor, Department of Radiology; MD.

*Mohsin Khan*, Assistant Professor, Department of Cardiovascular Sciences; PhD, University of the Punjab.

*Laurie Kilpatrick*, Professor, Department of Center for Inflammation and Lung Research; PhD, University of Pennsylvania.

*Andrew Kim*, Clinical Assistant Professor, Department of Radiology; MD.

*Bong-Soo Kim*, Clinical Professor, Department of Neurosurgery; MD.

*Daniel Kim*, Assistant Professor, Department of Medicine; MD.

*Rebecca Kim*, Clinical Assistant Professor, Department of Medicine; MD.

*Seonhee Kim*, Associate Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Rutgers University.

*Louis King*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Neil A. King*, Assistant Professor, Department of Surgery; MD.

*Lynn Kirby*, Professor, Department of Center for Substance Abuse Research; PhD, University of Pennsylvania.

*Natasha Kiryankova-Dalseth*, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; MD.

*Raj Kishore*, Professor, Department of Center for Translational Medicine; PhD, Lucknow University.

*Walter J. Koch*, Professor and the William Wikoff Smith Endowed Chair in Cardiovascular Medicine, Department of Center for Translational Medicine; PhD, University of Cincinnati College of Medicine.

*Robert Koenigsberg*, Professor, Department of Radiology; DO.

*Donald Koers*, Assistant Professor, Department of Anesthesiology; MD.

*Lauren Koffman*, Clinical Assistant Professor, Department of Neurology; DO.

*Beata Kosmider*, Professor, Department of Center for Inflammation and Lung Research; PhD, University of Lodz.

*Nikhil Kothari*, Clinical Assistant Professor, Department of Medicine; MD.

*Sheetal Koul*, Clinical Assistant Professor, Department of Medicine; MBBS.

*Jessica G. Kovach*, Clinical Professor, Department of Psychiatry and Behavioral Science; MD.

*Samuel L. Krachman*, Professor, Department of Thoracic Medicine and Surgery; DO.

*Mark Krakauer*, Clinical Associate Professor, Department of Ophthalmology; MD.

*Kristin Kain Krauss*, Clinical Associate Professor, Department of Anesthesiology; MD.

*Benjamin Krevsky*, Professor, Department of Medicine; MD.

*Kewal Krishan*, Clinical Associate Professor, Department of Surgery; MBBS.

*Barbara Krynska*, Research Associate Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Medical University of Silesia.

*Riya Kuklani*, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; DDS.

*Maruti Kumaran*, Associate Professor, Department of Radiology; MBBS.

*Satya P. Kunapuli*, Professor, Department of Sol Sherry Thrombosis Research Center; PhD, Indian Institute of Science.

*Lindsay Kuo*, Assistant Professor, Department of Surgery; MD.

*Caitlyn Labella*, Clinical Assistant Professor, Department of Medicine; MD.

*James Labor*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Tim Lachman*, Clinical Professor, Department of Neurology; MD.

*Vladimir Lakhter*, Assistant Professor, Department of Medicine; DO.

*T. Dianne Langford*, Professor, Department of Center for Substance Abuse Research; PhD, University of Alabama.

*David Laslett*, Assistant Professor, Department of Medicine; MD.

*Kwan Nang Lau*, Associate Professor, Department of Surgery; MD.

*Menachem Leasy*, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

*Derek Lee*, Assistant Professor, Department of Radiology; MD.

*Iris Lee*, Professor, Department of Medicine; MD.

*Janet B. Lee*, Associate Professor, Department of Pediatrics; MD.

*Jean Lee*, Clinical Professor, Department of Medicine; MD.

*Shane Lee*, Clinical Assistant Professor, Department of Radiology; MD.

*Woo Jung Jay Lee*, Clinical Associate Professor, Department of Medicine; MB.

*Young Ju Lee*, Clinical Assistant Professor, Department of Medicine; MD.

*Paul Leone*, Clinical Assistant Professor, Department of Medicine; MD.

*Eros Leotta*, Clinical Assistant Professor, Department of Surgery; MD.

*Noah Levinson*, Clinical Assistant Professor, Department of Neurology; MD.

*Nicole Levy*, Assistant Professor, Department of Radiology; MD.

*Shuxin Li*, Professor, Department of Shriners Hospitals Pediatric Research Center; MD, PhD, Henan Medical University.

*Si Li*, Clinical Assistant Professor, Department of Medicine; MD.

*Abdelhamid Liacini*, Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

*Dan A. Liebermann*, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Weizmann Institute.

*Adrienne Ligouri*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Chien-Fu Lin*, Clinical Assistant Professor, Department of Medicine; MD.

*Karen Lin*, Clinical Professor and the Abraham Roth Chair in Preventative Medicine, Department of Medicine; MD.

*Stephen Ling*, Clinical Professor, Department of Radiology; MD.

*Jeffrey Liu*, Associate Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Xiaolei Liu*, Assistant Professor, Department of Lemole Center for Integrated Lymphatics Research; PhD, University of Oklahoma Health Sciences Center.

*Lee-Yuan Liu-Chen*, Professor, Department of Center for Substance Abuse Research; PhD, Massachusetts Institute of Technology.

*Jon Livelsberger*, Clinical Associate Professor, Department of Anesthesiology; DO.

*Carla Lopinto-Khoury*, Associate Professor, Department of Neurology; MD.

*Matthew Lorei*, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Victor Luna*, Assistant Professor, Department of Alzheimer's Center at Temple; PhD.

*Jin Jun Luo*, Professor, Department of Neurology; MD, PhD.

*Nicholas Lyssenko*, Instructor, Department of Alzheimer's Center at Temple; PhD.

*Grace X. Ma*, Laura H. Carnell Professor, Department of Center for Asian Health; PhD, University of Oklahoma.

*Flore Macenat Sulzynski*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Mark Magee*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Zoe Maher*, Associate Professor, Department of Surgery; MD.

*Ian Maitin*, Professor, Department of Physical Medicine and Rehabilitation; MD.

*Mark Malamood*, Clinical Assistant Professor, Department of Medicine; MD.

*Zubair Malik*, Associate Professor, Department of Medicine; MD.

*Albert James Mamary*, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

*David Manoff*, Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

*Nathaniel Marchetti*, Professor, Department of Thoracic Medicine and Surgery; DO.

*Hillel Maresky*, Assistant Professor, Department of Radiology; MD.

*Aswin Mathew*, Clinical Assistant Professor, Department of Medicine; MD.

*Brionna Matt*, Clinical Assistant Professor, Department of Medicine; DO.

*Stephen McCaughan*, Clinical Associate Professor, Department of Anesthesiology; DO.

*Joseph McComb*, Clinical Associate Professor, Department of Anesthesiology; DO.

*Lindsay McGann*, Clinical Assistant Professor, Department of Medicine; MD.

*Alexander McGinley*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Rita McKeever*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Erica McKernan*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Paige McLaughlin*, Assistant Professor, Department of Anesthesiology; MD.

*Caitlin McLean*, Clinical Associate Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Robert McNamara*, Professor, Department of Emergency Medicine; MD.

*Keith McNellis*, Clinical Professor, Department of Medicine; MD.

*Amanda Mcvey*, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

*Jared Meshekow*, Clinical Assistant Professor, Department of Radiology; MD.

*Michael Metro*, Clinical Associate Professor, Department of Urology; MD.

*Pietro Miazzo*, Clinical Professor, Department of Psychiatry and Behavioral Science; MD.

*Nicole Mills*, Assistant Professor, Department of Thoracic Medicine and Surgery; DO.

*Nancy Minniti*, Clinical Assistant Professor, Department of Neurology; PsyD.

*Aaron Mishkin*, Assistant Professor, Department of Medicine; MD.

*Curtis Miyamoto*, Professor, Department of Radiation Oncology; MD.

*Neena Mohan*, Clinical Assistant Professor, Department of Medicine; MD.

*Sadia Mohsin*, Assistant Professor, Department of Cardiovascular Research Center; PhD, University of the Punjab.

*Suyog A. Mokashi*, Assistant Professor, Department of Surgery; MD.

*Mehri Mollaei*, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

*Lauren Monaco*, Clinical Assistant Professor, Department of Medicine; MD.

*Marc Monestier*, Professor, Department of Biomedical Education and Data Science; MD, PhD, University of Lyon.

*Richard Month*, Clinical Associate Professor, Department of Anesthesiology; MD.

*Pekka Moaar*, Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Gordon Morewood*, Clinical Professor, Department of Anesthesiology; MD.

*Mary Morrison*, Professor, Department of Psychiatry and Behavioral Science; MD.

*Christine Mount*, Clinical Associate Professor, Department of Physician Assistant Program; MS.

*Ray Moyer*, Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Daniel Mueller*, Clinical Associate Professor, Department of Medicine; MD.

*Wadia Mulla*, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Michael Mullen*, Associate Professor, Department of Neurology; MD.

*Gurpreet Mundi*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Maria Munoz-Allen*, Clinical Associate Professor, Department of Anesthesiology; MD.

*Lauren Murphy*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Meghan Musselman*, Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*Jack H. Mydlo*, Professor, Department of Urology; MD.

*Sumithra Nalla*, Clinical Assistant Professor, Department of Medicine; MBBS.

*John Nawn*, Clinical Assistant Professor, Department of Medicine; MD.

*Joshua Nelson*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Andy Ngo*, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

*Malgorzata Nieborowska-Skorska*, Research Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; MD, PhD.

*Dmitry Niman*, Clinical Professor, Department of Radiology; MD.

*Michelle Noreski*, Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; DO.

*David O'Gurek*, Associate Professor, Department of Family and Community Medicine; MD.

*Brian O'Murchu*, Clinical Professor, Department of Medicine; MD.

*Bryan O'Young*, Professor, Department of Physical Medicine and Rehabilitation; MD.

*Emily A. Oliver*, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MBBS.

*Estefania Oliveros Soles*, Assistant Professor, Department of Medicine; MD.

*Ebenezer Oni*, Assistant Professor, Department of Medicine; MBBS.

*Lawrence Oresanya*, Assistant Professor, Department of Surgery; MD.

*Natalia Ortiz*, Clinical Professor, Department of Psychiatry and Behavioral Science; MD.

*Kourtney Osorio*, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

*Kaede Ota*, Professor, Department of Pathology and Laboratory Medicine; MD.

*Brett Oxberry*, Associate Professor, Department of Biomedical Education and Data Science; PhD.

*Avita Pahwa*, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Joseph Panaro*, Clinical Associate Professor, Department of Radiology; MD.

*Ioannis P. Panidis*, Professor, Department of Medicine; MD.

*Anuradha Paranjape*, Professor, Department of Medicine; MBBS.

*Dustin Pardo*, Clinical Associate Professor, Department of Medicine; MD.

*Henry P. Parkman*, Professor, Department of Medicine; MD, Case Western Reserve University.

*Akash S. Patel*, Assistant Professor, Department of Medicine; DO.

*Arjun Patel*, Clinical Assistant Professor, Department of Medicine; MD.

*Dilipkumar Patel*, Clinical Professor, Department of Anesthesiology; MBBS.

*Monica Patel*, Clinical Assistant Professor, Department of Medicine; DO.

*Abhijit Pathak*, Professor, Department of Surgery; MD.

*Pravin Patil*, Professor, Department of Medicine; MD.

*Jessica Patterson*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*David Paul*, Clinical Assistant Professor, Department of Anesthesiology; DO.

*Theresa Pazonis*, Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Jack Peace*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Helen E. Pearson*, Associate Professor, Department of Biomedical Education and Data Science; PhD, Medical College of Pennsylvania.

*Lee Peng*, Clinical Professor, Department of Medicine; MD, PhD.

*Stephen Permut*, Professor, Department of Family and Community Medicine; MD.

*Yuri Persidsky*, Professor, Department of Pathology and Laboratory Medicine; MD, PhD, Kiev State Medical Institute.

*Sara Peterson*, Clinical Associate Professor, Department of Medicine; MD.

*Roman Petrov*, Associate Professor, Department of Thoracic Medicine and Surgery; MD, PhD.

*Victoria Pham*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Kristopher Philogene*, Clinical Assistant Professor, Department of Medicine; MD.

*Matthew Philp*, Clinical Associate Professor, Department of Surgery; MD.

*Gregory Piech*, Clinical Assistant Professor, Department of Medicine; MD.

*Shaun Plotnick*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*Juan Poggio*, Professor, Department of Surgery; MD.

*Natasha Pollak*, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Michel A. Pontari*, Professor, Department of Urology; MD.

*Steven N. Popoff*, Professor and the John Franklin Huber Chair, Department of Biomedical Education and Data Science; PhD, Loyola University.

*Raghava Potula*, Professor, Department of Pathology and Laboratory Medicine; PhD, Jawaharlal Nehru Institute of Postgraduate Medical Education and Research.

*Valeriya Poukas*, Clinical Associate Professor, Department of Neurology; MD.

*Seyedmohammad Pourshahid*, Clinical Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

*Theresa Power*, Clinical Associate Professor, Department of Radiology; DO.

*Swayam Prabha*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Nebraska Medical Center.

*Domenico Praticò*, Professor and the Scott Richards North Star Charitable Foundation Chair for Alzheimer's Research, Department of Alzheimer's Center at Temple; MD, University of Roma, La Sapienza Medical School.

*Jeremy G. Price*, Assistant Professor, Department of Radiation Oncology; MD, PhD.

*Daniela M. Proca*, Clinical Professor, Department of Pathology and Laboratory Medicine; MD.

*Mary T. Pronovost*, Clinical Associate Professor, Department of Surgery; MD.

*Paul H. Pronovost*, Clinical Associate Professor, Department of Medicine; MD.

*Danielle Pulton*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Lisa Rae*, Associate Professor, Department of Surgery; MD.

*Yusuf Rahman*, Clinical Assistant Professor, Department of Medicine; DO.

*Sudarsan Rajan*, Research Associate Professor, Department of Center for Translational Medicine; PhD.

*Charu Rajput*, Research Instructor, Department of Center for Inflammation and Lung Research; PhD.

*Ilay Rakhman*, Clinical Assistant Professor, Department of Medicine; MD.

*Val Rakita*, Assistant Professor, Department of Medicine; MD.

*Parth Rali*, Associate Professor, Department of Thoracic Medicine and Surgery; MBBS.

*Ravishankar Raman*, Clinical Assistant Professor, Department of Surgery; MBBS.

*Servio Ramirez*, Professor, Department of Pathology and Laboratory Medicine; PhD, University of Rochester School of Medicine and Dentistry.

*A. Koneti Rao*, Sol Sherry Professor, Department of Pathology and Laboratory Medicine; MBBS, All India Institute of Medical Sciences.

*Ajaykumar Rao*, Associate Professor, Department of Medicine; MD.

*Aarif Rassiwalla*, Clinical Associate Professor, Department of Medicine; MD.

*Hannah Ravreby*, Clinical Associate Professor, Department of Medicine; MD.

*Scott M. Rawls*, Professor, Department of Center for Substance Abuse Research; PhD, East Carolina University School of Medicine.

*Jessica Reardon*, Clinical Associate Professor, Department of Anesthesiology; DO.

*Adam Reese*, Associate Professor, Department of Urology; MD.

*Kathleen Reeves*, Clinical Professor, Department of Pediatrics; MD.

*Saqib Rehman*, Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Zachary W. Reichenbach*, Assistant Professor, Department of Medicine; MD, PhD.

*Zachary Repanshek*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Lori Lee Rhodes*, Assistant Professor, Department of Surgery.

*Charis Ripley-Hager*, Assistant Professor, Department of Surgery.

*Victor Rizzo*, Professor, Department of Cardiovascular Research Center; PhD, University of Medicine and Dentistry of New Jersey, New Jersey Medical School.

*Dmitry Roberman*, Clinical Assistant Professor, Department of Anesthesiology; DO.

*Monique Roberts*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*William Robinson*, Professor, Department of Biomedical Education and Data Science; PhD, DPT.

*Thomas J. Rogers*, Professor, Department of Center for Inflammation and Lung Research; PhD, University of Wisconsin-Madison.

*Slava Rom*, Assistant Professor, Department of Pathology and Laboratory Medicine; PhD, Ben-Gurion University of the Negev.

*Michelle Romeo*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Yuan Rong*, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD, PhD.

*Marisa Rose*, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Jennifer Rosenbaum*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Naomi Rosenberg*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Jeffrey Rosenblum*, Clinical Assistant Professor, Department of Urology; MD.

*Anika Ross*, Clinical Assistant Professor, Department of Medicine; DO.

*Brad S. Rothberg*, Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Florida.

*Isoke Roundtree*, Clinical Associate Professor, Department of Medicine; MD.

*Daniel Rubin*, Professor, Department of Medicine; MD.

*Jonathan Rubin*, Clinical Assistant Professor, Department of Radiology; MD.

*Rachel Rubin*, Clinical Associate Professor, Department of Medicine; MD.

*Abdelkarim Sabri*, Professor, Department of Cardiovascular Research Center; PhD, Rene Descartes University.

*Mahmut Safak*, Associate Professor, Department of Center for Neurovirology and Gene Editing; PhD, Thomas Jefferson University.

*Amy Safran-Henderson*, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

*Yedidya Saiman*, Assistant Professor, Department of Medicine; MD, PhD.

*Umadevi Sajjan*, Associate Professor, Department of Center for Inflammation and Lung Research; PhD, University of Mysore.

*Yidy Yuliana Salamanca-Padilla*, Clinical Associate Professor, Department of Anesthesiology; MD.

*Larissa Salas*, Clinical Associate Professor, Department of Anesthesiology; DO.

*Daniel Salerno*, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

*Denise Salerno*, Clinical Professor, Department of Pediatrics; MD.

*Maura Sammon*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Rafik Samuel*, Professor, Department of Medicine; MD.

*Thomas Santora*, Professor, Department of Surgery; MD.

*Carmen Sapienza*, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Dalhousie University.

*Ilker K. Sariyer*, Research Associate Professor, Department of Center for Neurovirology and Gene Editing; PhD, DVM, Temple University.

*Aditi Satti*, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

*Wayne A. Satz*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Bassel E. Sawaya*, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Rene Descartes University.

*Vishal Saxena*, Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Rosario Scalia*, Professor, Department of Cardiovascular Research Center; MD, PhD, University of Catania.

*Scott A. Schartel*, Professor, Department of Anesthesiology; DO.

*Cecelia Schmalbach*, Professor and the David Myers, MD Chair, Department of Otolaryngology - Head and Neck Surgery; MD.

*Frank Schmieder*, Clinical Professor, Department of Surgery; MD.

*Ryan Schreiter*, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; DO.

*Kraftin Schreyer*, Associate Professor, Department of Emergency Medicine; MD.

*Gerri A. Schulman*, Professor, Department of Medicine.

*Sara Schultz*, Associate Professor, Department of Medicine; MD.

*Ari B. Schwell*, Clinical Professor, Department of Emergency Medicine; MD.

*Michael Selzer*, Professor, Department of Shriners Hospitals Pediatric Research Center; MD, PhD, New York University.

*Anjali Seth*, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; PhD.

*Anish Sethi*, Clinical Assistant Professor, Department of Anesthesiology; DO.

*Joseph Sowards*, Clinical Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Michael Shafik*, Clinical Assistant Professor, Department of Medicine; DO.

*Avani Shah*, Clinical Assistant Professor, Department of Neurology; MD.

*Monali Shah*, Clinical Assistant Professor, Department of Medicine; MD.

*Dharmini Shah Pandya*, Clinical Associate Professor, Department of Medicine; MD.

*Yanfu Shao*, Clinical Professor, Department of Anesthesiology; MD.

*Manjari Sharma*, Clinical Associate Professor, Department of Medicine; MBBS.

*Kartik Shenoy*, Professor, Department of Thoracic Medicine and Surgery; MD.

*Scott Shepard*, Clinical Professor, Department of Neurosurgery; MD.

*Norihisa Shigemura*, Professor, Department of Surgery; MD, PhD.

*Scott K. Shore*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Drexel University.

*Edward Siegel*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Mari Siegel*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Stephanie E. Sullivan*, Assistant Professor, Department of Center for Substance Abuse Research; PhD, Vanderbilt University.

*Jillian Simon*, Assistant Professor, Department of Cardiovascular Sciences; PhD, University of Illinois at Chicago.

*Matthew Simon*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Peter Simonsson*, Assistant Professor, Department of Center for Urban Bioethics; PhD.

*Jason Sims*, Clinical Assistant Professor, Department of Medicine; MD.

*Imali Sirisena*, Clinical Associate Professor, Department of Medicine; MD.

*Lars Ola Sjöholm*, Clinical Associate Professor, Department of Surgery; MD.

*Tomasz Skorski*, Professor, Department of Fels Cancer Institute for Personalized Medicine; MD, PhD, DSc, Medical Academy of Warsaw.

*Jeffrey Smietana*, Assistant Professor, Department of Medicine; MD.

*Cara Lea Smith*, Clinical Assistant Professor, Department of Medicine; MD.

*George Smith*, Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Case Western Reserve University.

*Nathaniel W. Snyder*, Associate Professor, Department of Center for Metabolic Disease Research; PhD, University of Pennsylvania.

*Rachel Snyder*, Clinical Assistant Professor, Department of Medicine; MD.

*Samantha So*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Rohit Soans*, Associate Professor, Department of Surgery; MD.

*Jonathan Soboloff*, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Ottawa.

*Mark Solarz*, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Ahmed Soliman*, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Debra L. Somers*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Young-Jin Son*, Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, University of Texas at Austin.

*Dianne R. Soprano*, Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, Rutgers University.

*Stephanie Spivack*, Clinical Assistant Professor, Department of Medicine; MD.

*Uma Sriram*, Research Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

*James Stefano*, Clinical Assistant Professor, Department of Medicine; MD.

*Gerald Sterling*, Professor, Department of Biomedical Education and Data Science; PhD.

*Sam Stern*, Clinical Associate Professor, Department of Medicine; MD.

*Nicolle Strand*, Associate Professor, Department of Center for Urban Bioethics; JD.

*Francisco Felipe Suero*, Clinical Assistant Professor, Department of Anesthesiology; MD.

*Gail Sullivan*, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

*Rebecca Sullivan*, Professor, Department of Biomedical Education and Data Science; PhD.

*Enid Sun*, Clinical Assistant Professor, Department of Medicine; MD.

*Vincent Tam*, Assistant Professor, Department of Microbiology, Immunology and Inflammation; PhD, Harvard Medical School.

*Michiko Taniguchi*, Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

*Suad Taraif*, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD.

*Heidi Taylor*, Clinical Associate Professor, Department of Pediatrics; DO.

*Ellen Tedaldi*, Professor, Department of Medicine; MD.

*Sean Thatcher*, Associate Professor, Department of Biomedical Education and Data Science; PhD.

*Joseph Thoder*, John W. Lachman Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

*Emil Thomas*, Clinical Associate Professor, Department of Medicine; MD.

*Gareth Thomas*, Associate Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Dundee University.

*Ying Tian*, Associate Professor, Department of Center for Translational Medicine; PhD, Temple University.

*Douglas Tilley*, Professor, Department of Center for Translational Medicine; PhD, Queen's University.

*Stephanie Tittaferante*, Clinical Assistant Professor, Department of Medicine; MD.

*Pedro Torres-Ayuso*, Assistant Professor, Department of Cancer and Cellular Biology; PhD, Autonomous University of Madrid.

*Yoshiya Toyoda*, Professor and the William Maul Measey Chair in Surgery, Department of Surgery; MD, PHD.

*John Travaline*, Professor, Department of Thoracic Medicine and Surgery; MD.

*Gaurav Trehan*, Clinical Professor, Department of Anesthesiology; MD.

*Ching Tsao*, Clinical Assistant Professor, Department of Neurology; MD.

*Alexander Y. Tsygankov*, Associate Professor, Department of Sol Sherry Thrombosis Research Center; PhD, Bach Institute of Biochemistry, Moscow.

*James Rory Tucker*, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

*Chaim Tuckman*, Clinical Assistant Professor, Department of Medicine; MD.

*Ronald F. Tuma*, George H. Stewart Professor, Department of Center for Substance Abuse Research; PhD, Temple University.

*Brian Tuohy*, Assistant Professor, Department of Center for Urban Bioethics; PhD.

*Nicholas Tyner*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Çagla Tükel*, Associate Professor, Department of Center for Microbiology and Immunology; PhD, Ankara University.

*Jacob W. Ufberg*, Professor, Department of Emergency Medicine; MD.

*Audrey Uknis*, Professor, Department of Medicine; MD.

*Mehriban Ulas*, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MD, PhD.

*Ellen M. Unterwald*, Professor, Department of Center for Substance Abuse Research; PhD, Boston University School of Medicine.

*Anjali Vaidya*, Professor, Department of Medicine; MD.

*Paul Van Bemmelen*, Professor, Department of Surgery; MD, PhD.

*William Van Decker*, Professor, Department of Medicine; MD.

*James T. VandenBerg*, Clinical Assistant Professor, Department of Emergency Medicine; MD.

*Priju Varghese*, Clinical Assistant Professor, Department of Medicine; MD.

*Cherie Lisa Vaz Wicks*, Associate Professor, Department of Medicine; MBBS.

*Maria Elena Vega Sanchez*, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

*Varun Vendra*, Assistant Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Nicholas R. Villalta*, Clinical Assistant Professor, Department of Medicine; MD.

*Philip Villanueva*, Clinical Professor, Department of Neurosurgery; MD.

*Ernest Vina*, Associate Professor, Department of Medicine; MD.

*David A. Wald*, Professor, Department of Emergency Medicine; DO.

*M.Ingre Walters*, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; MD.

*Hong Wang*, Laura H. Carnell Professor, Department of Center for Metabolic Disease Research; MD, PhD, University of Montreal.

*Jiaqiong Wang*, Clinical Assistant Professor, Department of Radiology; MD, PhD.

*Sara Jane Ward*, Assistant Professor, Department of Center for Substance Abuse Research; PhD, Wake Forest University.

*Susan Ward*, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

*Arthur Washburn*, Associate Professor, Department of Biomedical Education and Data Science; PhD.

*Michael W. Weaver*, Professor, Department of Neurosurgery; MD.

*Sheila E. Weaver*, Clinical Professor, Department of Thoracic Medicine and Surgery; DO.

*Kelly A. Whelan*, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Drexel University.

*Karl Vincent Whitley*, Clinical Associate Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

*Isaac R. Whitman*, Associate Professor, Department of Medicine; MD.

*John Wiebelhaus*, Assistant Professor, Department of Anesthesiology; MD.

*Mauricio Wilk*, Clinical Assistant Professor, Department of Surgery; MD.

*Eric Wilkens*, Clinical Professor, Department of Anesthesiology; MD.

*Kevin Williams*, Professor, Department of Cardiovascular Research Center; MD.

*Paul Williams*, Clinical Associate Professor, Department of Medicine; MD.

*Jennifer Windstein*, Clinical Associate Professor, Department of Physician Assistant Program; MS.

*Marla R. Wolfson*, Professor, Department of Center for Translational Medicine; PhD, Temple University.

*Hassen S. Wollebo*, Assistant Professor, Department of Center for Neurovirology and Gene Editing; PhD, Humboldt University.

*Matthew Wong*, Clinical Associate Professor, Department of Emergency Medicine; MD.

*Brian Work*, Clinical Associate Professor, Department of Medicine; MD.

*Sam Wu*, Clinical Professor, Department of Physical Medicine and Rehabilitation; MD.

*Sheng Wu*, Associate Professor, Department of Center for Metabolic Disease Research; PhD, University of Victoria.

*Janice Yackoski*, Clinical Assistant Professor, Department of Medicine; MD.

*Roh Yanagida*, Assistant Professor, Department of Surgery; MD, PhD.

*Ling Yang*, Assistant Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, Chinese Academy of Sciences.

*Xiao-Feng Yang*, Professor, Department of Cardiovascular Research Center; MD, PhD, University of Montreal.

*Yoon Kyong Yang*, Clinical Associate Professor, Department of Medicine; MD, Yonsei University Wonju College of Medicine.

*Ho-Man Yeung*, Clinical Assistant Professor, Department of Medicine; MD.

*Daohai Yu*, Professor, Department of Center for Biostatistics and Epidemiology; PhD.

*Jun Yu*, Associate Professor, Department of Center for Metabolic Disease Research; MD, Yale University School of Medicine.

*M. Raza Zaidi*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Rutgers University, Robert Wood Johnson Medical School.

*Massa Zantah*, Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

*Yi Zhang*, Clinical Associate Professor, Department of Ophthalmology; MD, PhD.

*Huaqing Zhao*, Professor, Department of Center for Biostatistics and Epidemiology; PhD.

*Xin Zhou*, Clinical Assistant Professor, Department of Neurology; MD.

*Lin Zhu*, Assistant Professor, Department of Center for Asian Health; PhD.

*Polina Zilbering*, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

*Beverly Zuccarello*, Clinical Assistant Professor, Department of Physician Assistant Program; MS.

## School of Pharmacy

*Magid Abou-Gharbia*, Laura H. Carnell Professor, Department of Pharmaceutical Sciences; PhD, University of Pennsylvania.

*Carlos Barrero*, Assistant Professor, Department of Pharmaceutical Sciences; MD, Universidad de Caldas.

*Neela Bhajandas*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

*Benjamin E. Blass*, Assistant Professor, Department of Pharmaceutical Sciences; PhD, University of Rochester.

*Michael R. Borenstein*, Associate Professor, Department of Pharmaceutical Sciences; PhD, Temple University.

*Daniel J. Canney*, Associate Professor, Department of Pharmaceutical Sciences; PhD, Temple University.

*Marrisa Cavaretta*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Albany College of Pharmacy.

*Michael J. Cawley*, Clinical Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

*Wayne E. Childers*, Associate Professor, Department of Pharmaceutical Sciences; PhD, University of Georgia.

*Katherine Cho*, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, University of Michigan.

*Mark Cinquegrani*, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, University of Wisconsin.

*A. Reza Fassihi*, Professor, Department of Pharmaceutical Sciences; PhD, Brighton University.

*Jason C. Gallagher*, Clinical Professor, Department of Pharmacy Practice; PharmD, Rutgers University.

*Patrick M. Glassman*, Assistant Professor, Department of Pharmaceutical Sciences; PhD, University at Buffalo.

*Van T. Hellerslia*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

*Marc A. Ilies*, Professor of Instruction, Department of Pharmaceutical Sciences; PhD, University of Bucharest.

*Kenneth R. Korzekwa*, Professor, Department of Pharmaceutical Sciences; PhD, University of Washington.

*David B. Lebo*, Professor of Instruction, Department of Pharmaceutical Sciences; PhD, Philadelphia College of Pharmacy.

*Patrick J. McDonnell*, Clinical Professor, Department of Pharmacy Practice; PharmD, Temple University.

*Salim Merali*, Professor, Department of Pharmaceutical Sciences; PhD, City University of New York.

*Margaret A. Miklich*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, University at Buffalo.

*Swati V. Nagar*, Professor, Department of Pharmaceutical Sciences; PhD, University of Minnesota.

*Jayanth Panyam*, Professor, Department of Pharmaceutical Sciences; PhD, University of Nebraska Medical Center.

*Nima M. Patel-Shori*, Clinical Professor, Department of Pharmacy Practice; PharmD, Rutgers University.

*Oscar Perez-Leal*, Assistant Professor, Department of Pharmaceutical Sciences; MD, Universidad del Norte.

*Melissa Mary Potts*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Temple University.

*Talitha L. Pulvino*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Temple University.

*Mario C. Rico*, Research Assistant Professor, Department of Pharmaceutical Sciences; MD, Universidad Nacional de Colombia.

*Natalie P. Rodriguez*, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

*Susan Romann*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, University of North Carolina.

*Christina Rose*, Clinical Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

*Melissa E. Rotz*, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

*Charles Ruchalski*, Clinical Professor, Department of Pharmacy Practice; PharmD, Temple University.

*Nicole Sifontis*, Clinical Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

*Divita Singh*, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, Rutgers University.

*Tina Tran*, Assistant Professor, Department of Pharmacy Practice; PharmD, University of California San Francisco.

*Ellen A. Walker*, Professor, Department of Pharmaceutical Sciences; PhD, University of Michigan.

*Ho-Lun Wong*, Professor, Department of Pharmaceutical Sciences; PhD, University of Toronto.

*Hui Yi Xue*, Research Assistant Professor, Department of Pharmaceutical Sciences; PhD, University of Toronto.

## School of Podiatric Medicine

*Khurram H. Khan*, Associate Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

*Kwasi Y. Kwaadu*, Associate Professor, Department of Podiatric Surgery; DPM, Temple University School of Podiatric Medicine.

*Ziad George Labbad*, Professor, Department of Podiatric Biomechanics; DPM, Temple University School of Podiatric Medicine.

*Ebony L. Love*, Associate Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

*James B. McGuire*, Professor, Department of Podiatric Medicine; DPM, Pennsylvania College of Podiatric Medicine.

*Andrew J. Meyr*, Professor, Department of Podiatric Surgery; DPM, Temple University School of Podiatric Medicine.

*Joshua Moore*, Professor, Department of Podiatric Surgery; DPM, Des Moines University College of Podiatric Medicine and Surgery.

*Steven J. Pettineo*, Associate Professor, Department of Podiatric Biomechanics; DPT, Temple University.

*Jane Pontious*, Professor, Department of Podiatric Surgery; DPM, Pennsylvania College of Podiatric Medicine.

*Lesly Robinson*, Associate Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

*Laura E. Sansosti*, Associate Professor, Department of Podiatric Biomechanics; DPM, Temple University School of Podiatric Medicine.

*Jinsup Song*, Assistant Professor, Department of Podiatric Biomechanics; DPM, Temple University School of Podiatric Medicine, PhD, Drexel University.

*Samuel Spadone*, Instructor, Department of Podiatric Medicine; DPM, Pennsylvania College of Podiatric Medicine.

*Jennifer C. Van*, Associate Professor, Department of Podiatric Surgery; DPM, Temple University School of Podiatric Medicine.

*Tracey C. Vlahovic*, Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

## Tyler School of Art and Architecture

*Mariola Alvarez*, Assistant Professor, Department of Art History; PhD, University of California.

*Stephen M. Anderson*, Associate Professor of Instruction, Department of Architecture and Environmental Design; MArch, University of Pennsylvania.

*Kate E. Benisek*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MLA, Cornell University.

*Philip P. Betancourt*, Professor Emeritus, Department of Art History; PhD, University of Pennsylvania.

*Sonja Bijelic*, Associate Professor of Instruction, Department of Architecture and Environmental Design; MArch, New Jersey Institute of Technology.

*Gerard F. Brown*, Associate Professor, Department of Art; MA, School of the Art Institute of Chicago.

*Douglas J. Bucci*, Assistant Professor, Department of Art; MFA, Temple University.

*Susan E. Cahan*, Professor, Department of Art History; PhD, Graduate Center, City University of New York.

*Joshua S. Caplan*, Research Associate Professor, Department of Architecture and Environmental Design.

*William J. Cohen*, Associate Professor of Practice, Department of Architecture and Environmental Design; PhD, University of Pennsylvania.

*Tracy E. Cooper*, Professor, Department of Art History; PhD, Princeton University.

*Chad D. Curtis*, Associate Professor, Department of Art; MFA, Alfred University, New York State College of Ceramics.

*Delaney K. DeMott*, Assistant Professor of Instruction, Department of Art; MFA, School of the Art Institute of Chicago.

*Ryan Devlin*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; PhD, University of California Berkeley.

*Therese A. Dolan*, Professor Emerita, Department of Art History; PhD, Bryn Mawr College.

*Jeffrey Doshna*, Associate Professor of Instruction, Department of Architecture and Environmental Design; PhD, Rutgers University.

*Müge Durusu-Tanrıöver*, Assistant Professor, Department of Art History; PhD, Brown University.

*Linda Earle*, Professor of Practice, Department of Art History; MFA, Columbia University.

*Sasha Eisenman*, Associate Professor, Department of Architecture and Environmental Design; PhD, Rutgers University.

*Amze J. Emmons*, Associate Professor, Department of Art; MFA, University of Washington.

*Jane DeRose Evans*, Professor, Department of Art History; PhD, University of Pennsylvania.

*Clifton R. Fordham*, Associate Professor, Department of Architecture and Environmental Design; MArch, Yale University.

*Samuel C. Fritch*, Assistant Professor of Instruction, Department of Foundations; MFA, Temple University.

*Mark T. Gibson*, Assistant Professor, Department of Art; MFA, Yale University.

*Philip Glahn*, Associate Professor, Department of Art; PhD, City University of New York.

*Abby Ryan Guido*, Assistant Professor, Department of Graphic and Interactive Design; MBA, Temple University.

*Marcia B. Hall*, Laura H. Carnell Professor, Department of Art History; PhD, Harvard University.

*Sally W. Harrison*, Professor, Department of Architecture and Environmental Design; MArch, Massachusetts Institute of Technology.

*Jesse Harrod*, Associate Professor, Department of Art; MFA, School of the Art Institute of Chicago.

*Nathan Heavers*, Associate Professor, Department of Architecture and Environmental Design; MLA, University of Pennsylvania.

*David Herman Jr.*, Assistant Professor, Department of Art Education and Community Arts Practices; PhD, University of North Texas.

*Kelly A. Holohan*, Professor, Department of Graphic and Interactive Design; MFA, Temple University.

*Richard D. Hricko*, Professor Emeritus, Department of Art; MFA, University of Iowa.

*Pauline Hurley-Kurtz*, Associate Professor, Department of Architecture and Environmental Design; MLA, University of Pennsylvania.

*Renee E. Jackson*, Assistant Professor, Department of Art Education and Community Arts Practices; PhD, Concordia University.

*Simona M. Josan-Barkley*, Associate Professor of Instruction, Department of Foundations; MFA, Pennsylvania Academy of the Fine Arts.

*Jessica Jane Julius*, Associate Professor of Instruction, Department of Art; MFA, Rochester Institute of Technology.

*Gabriel Kaprielian*, Assistant Professor, Department of Architecture and Environmental Design; MArch, University of California Berkeley.

*Lisa Kay*, Associate Professor, Department of Art Education and Community Arts Practices; EdD, Northern Illinois University.

*Nichola Kinch*, Associate Professor, Department of Foundations; MFA, Temple University.

*Joseph R. Kopta*, Assistant Professor of Instruction, Department of Art History; PhD, Temple University.

*Jenny Kowalski*, Assistant Professor of Instruction, Department of Graphic and Interactive Design; MFA, Temple University.

*Robert T. Kuper*, Associate Professor, Department of Architecture and Environmental Design; MLA, Auburn University.

*Baldev S. Lamba*, Associate Professor, Department of Architecture and Environmental Design; MLA, University of Pennsylvania.

*Scott R. Laserow*, Professor, Department of Graphic and Interactive Design; BFA, Temple University.

*Roberto Lugo*, Assistant Professor, Department of Art; MFA, The Pennsylvania State University.

*Dermot MacCormack*, Professor, Department of Graphic and Interactive Design; BFA, National College of Art and Design, Dublin.

*Martha Madigan*, Professor Emerita, Department of Art; MFA, School of the Art Institute of Chicago.

*Lynn A. Mandarano*, Associate Professor, Department of Architecture and Environmental Design; PhD, University of Pennsylvania.

*Christopher McAdams*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MArch, University of Pennsylvania.

*Pablo Meninato*, Associate Professor, Department of Architecture and Environmental Design; PhD, Universidade Federal do Rio Grande do Sul.

*Rebecca Michaels*, Associate Professor of Instruction, Department of Art; MFA, Temple University.

*Leah Modigliani*, Associate Professor, Department of Art History; PhD, State University of New York at Stony Brook.

*Dona R. Nelson*, Professor, Department of Art; BFA, The Ohio State University.

*Jeffrey Nesbit*, Assistant Professor, Department of Architecture and Environmental Design; DDes, Harvard University, Graduate School of Design.

*Emily Neumeier*, Assistant Professor, Department of Art History; PhD, University of Pennsylvania.

*Rachel Grace Newman*, Assistant Professor, Department of Art History; PhD, Stanford University.

*Sharyn A. O'Mara*, Associate Professor, Department of Art; MFA, Rhode Island School of Design.

*Odili Donald Odita*, Professor, Department of Art; MFA, Bennington College.

*Karyn Olivier*, Professor, Department of Art; MFA, Cranbrook Academy of Art.

*Michael Olszewski*, Associate Professor, Department of Architecture and Environmental Design; PhD, University of Delaware.

*Eric Oskey*, Associate Professor of Practice, Department of Architecture and Environmental Design; MArch, Cornell University.

*Pepón Osorio*, Laura H. Carnell Professor, Department of Art Education and Community Arts Practices; MA, Columbia University.

*Alpesh Patel*, Associate Professor, Department of Art History; PhD, University of Manchester.

*Erin Pauwels*, Assistant Professor, Department of Art History; PhD, Indiana University, Bloomington.

*Andrea Ray*, Associate Professor of Instruction, Department of Art; PhD, Lund University.

*Jeffrey Richards*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MArch, Yale University.

*Fauzia Sadiq Garcia*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MArch, Harvard University, Graduate School of Design.

*Lauren Sandler*, Associate Professor of Instruction, Department of Art; MFA, The Pennsylvania State University.

*Bryan Martin Satalino*, Associate Professor of Instruction, Department of Graphic and Interactive Design; MFA, Temple University.

*Mark Shaver*, Associate Professor of Instruction, Department of Foundations; MFA, University of Georgia.

*Paul E. Sheriff*, Professor, Department of Graphic and Interactive Design; BFA, Temple University.

*Mark Shetabi*, Associate Professor, Department of Art; MFA, Pennsylvania Academy of the Fine Arts.

*Robert Z. Shuman Jr.*, Associate Professor, Department of Architecture and Environmental Design; BArch, Temple University.

*Gerald D. Silk*, Professor Emeritus, Department of Art History; PhD, University of Virginia.

*Samantha Simpson*, Associate Professor, Department of Foundations; MFA, San Francisco Art Institute.

*Hester Stinnett*, Professor, Department of Art; MFA, Temple University.

*Alexandra Strada*, Assistant Professor, Department of Art; MFA, Columbia University.

*Kim D. Strommen*, Professor, Department of Foundations; MFA, Washington University.

*Lolly Tai*, Professor Emerita, Department of Architecture and Environmental Design; PhD, Heriot-Watt University, Edinburgh College of Art.

*Christian Tomaszewski*, Assistant Professor, Department of Art; MFA, Academy of Fine Arts in Poznan, Poland.

*Ulysses Sean Vance III*, Associate Professor, Department of Architecture and Environmental Design; MArch, North Carolina State University.

*Jessica Vaughn*, Associate Professor, Department of Art; MFA, University of Pennsylvania.

*Ashley West*, Associate Professor, Department of Art History; PhD, University of Pennsylvania.

*Mallory Weston*, Associate Professor of Instruction, Department of Art; MFA, Rhode Island School of Design.

*M. Katherine Wingert-Playdon*, Professor, Department of Architecture and Environmental Design; MS, The Pennsylvania State University.

*Andrew Wit*, Associate Professor, Department of Architecture and Environmental Design; MArch, Massachusetts Institute of Technology.

*Byron Wolfe*, Professor, Department of Art; MFA, Arizona State University.

*William Yalowitz*, Associate Professor, Department of Art Education and Community Arts Practices; EdD, Temple University.

*Nathan W. Young*, Assistant Professor of Instruction, Department of Graphic and Interactive Design; MFA, Rhode Island School of Design.

*Jennifer Zarro*, Assistant Professor of Instruction, Department of Foundations; PhD, Rutgers University.
