Learn more about the graduate certificate in Geographic Information Systems.

### About the Certificate

Geographic Information Systems (GIS) is a powerful analytical software tool that combines data and maps to solve complex problems at different scales. GIS is a rapidly growing field with applications in a variety of disciplines, including engineering, journalism, planning, public health and sustainability. The Graduate Certificate in GIS teaches advanced location science and technology that meets the increased demand for well-trained professional practitioners. Our courses introduce students to a variety of cutting-edge spatial analysis technology and mapping software to identify, analyze and visualize spatial data patterns. The Graduate

Certificate in GIS has a range of electives to allow students to tailor their coursework to their professional or academic interests. The Department of Geography and Urban Studies faculty have expertise in a range of GIS applications, including business, environment, geovisualization, health, location analysis, remote sensing and urban analytics.

The certificate complements our Professional Science Master's in GIS and may serve as a gateway into the program. Students in the certificate program pursue a curriculum that provides training in GIS that also complements graduate programs offered in the College of Education and Human Development, College of Liberal Arts, College of Public Health, College of Science and Technology, Fox School of Business and Management, and Lew Klein College of Media and Communication.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate program's administrator for more information.

**Job Prospects:** Training in GIS prepares individuals to take on advanced research positions in technology-based companies, governmental agencies and nonprofit organizations. The array of electives for the certificate allows students to specialize in the areas of their professional or academic interests.

**Non-Matriculated Student Policy:** Courses are available to non-matriculated graduate students with approval from the Graduate Chair or Assistant Director. Non-matriculated students may take up to 12 credits prior to matriculation in the Professional Science Master's in GIS. Please contact psmgis@temple.edu for more information about registering as a non-matriculated student.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring:* Admission is on a rolling basis. Interested students should contact psmgis@temple.edu for permission to enroll in coursework. Students are processed by the Office of Continuing Studies.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12<sup>1</sup>

*Required Courses:*

Code	Title	Credit Hours
<b>Core Course</b> <sup>2</sup>		
GUS 5062	Fundamentals of Geographical Information Systems	3
or GUS 8067	Spatial Database Design	
<b>Electives</b>		
Select three from the following: <sup>3</sup>		9
GUS 5000	Special Topic Seminars <sup>4</sup>	
GUS 5061	Cartographic Production	

GUS 5063	Remote Sensing
GUS 5065	Urban Geographical Information Systems
GUS 5066	Environmental Applications of GIS
GUS 5067	GIS and Location Analysis
GUS 5068	Census Analysis with Geographical Information Systems
GUS 5069	GIS for Health Data Analysis
GUS 5072	Advanced Remote Sensing
GUS 5073	Geovisualization
GUS 5162	Advanced Statistics for Urban Applications
GUS 8065	Cartographic Design
GUS 8066	Application Development for Geographic Information Systems
GUS 8067	Spatial Database Design
GUS 8068	Web Mapping and Map Servers

**Total Credit Hours** 12

1

Matriculated graduate students may take certificate courses as electives for their program of study with the approval of their program advisor.

2

GUS 8067 Spatial Database Design is required if GUS 5062 Fundamentals of Geographical Information Systems has already been taken at any level or if the student has equivalent industry experience. Permission is required from the Graduate Chair or Assistant Director.

3

Alternately, students may select any course within the range of GUS 5030-5040 and GUS 8060-8070 as an elective toward the certificate.

4

One GUS 5000 Special Topic Seminars course with a focus on Spatial Analysis may be used toward the certificate. Special Topic courses must be approved by the Graduate Chair or Assistant Director.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Geospatial Data Science

COLLEGE OF LIBERAL ARTS

Learn more about the graduate certificate in Geospatial Data Science.

### About the Certificate

Data science is an emerging interdisciplinary field with roots in computer science, mathematics and statistics. Spatial data are common and high value, including government administrative data, remotely sensed images, smartphone and vehicle location data, and volunteered geographic information (VGI). Our courses introduce students to big data handling, data mining, geosimulation, geospatial analytics and machine learning. The Department of Geography and Urban Studies faculty have expertise in cartography, GIS, machine learning, remote sensing, spatial data science, spatial statistics and urban analytics.

This graduate certificate complements our Professional Science Master's in Geospatial Data Science and may serve as a gateway into the program. Students in the certificate program pursue a curriculum that provides training in geospatial data science that also complements graduate programs offered in the College of Education and Human Development, College of Liberal Arts, College of Public Health, College of Science and Technology, Fox School of Business and Management, and the Lew Klein College of Media and Communication.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate program's administrator for more information.

**Job Prospects:** Combined training in GIS and data science prepares individuals to take on lead data science teams in technology-based companies, governmental agencies and nonprofit organizations who regularly work with big geospatial data and undertake projects that require geospatial skills and a spatial perspective.

**Non-Matriculated Student Policy:** Courses are available to non-matriculated graduate students with approval from the Graduate Chair

or Assistant Director. Non-matriculated students may take up to 9 credits prior to matriculation, but an exception can be made to accept all 12 certificate credits for those who want to pursue the Professional Science Master's in Geospatial Data Science. For more information, please email [psmgis@temple.edu](mailto:psmgis@temple.edu) about registering as a non-matriculated student.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring:* Admission is on a rolling basis. Interested students should contact [psmgis@temple.edu](mailto:psmgis@temple.edu) for permission to enroll in coursework. Students are processed by the Office of Continuing Studies.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
GUS 5161 or GUS 5073	Statistics for Urban Spatial Analysis Geovisualization	3
GUS 8061	Big GeoSpatial Data	3
<b>Electives</b>		
Select two from the following: <sup>1</sup>		6
GUS 5031	GIS Programming	
GUS 5032	Geosimulation

## Graduate Certificate: Neuroscience

COLLEGE OF LIBERAL ARTS

Learn more about the graduate certificate in Neuroscience.

### About the Certificate

The graduate certificate in Neuroscience was established in the College of Liberal Arts to impart training to graduate students who are interested in developing an in-depth understanding of neuroscience and pursuing research in this area. Students are required to fulfill the following requirements as a part of this certificate program:

1. Be a currently matriculating graduate student in good standing in a Temple University PhD program.
2. Meet all obligations of the student's participating department.
3. Include one member of the Neuroscience program on their dissertation committee.

4. Enroll in NSCI 9381 Readings in Neuroscience, which requires attending and participating in the seminars/journal clubs of the Neuroscience program, for three academic terms of 1 credit each.
5. Enroll in two courses in each of the following Neuroscience specialization areas:
  - Behavioral/Cognitive/Systems Neuroscience
  - Cellular/Molecular Neuroscience

Upon successful completion of all departmental and Neuroscience program requirements, students receive a PhD degree in the discipline represented by their department with a certificate in Neuroscience. Doctoral students enrolled in the Department of Biology and Department of Psychology and Neuroscience can be awarded this specialization in Neuroscience.

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed only on a full-time basis.

**Non-Matriculated Student Policy:** Students can take up to 9 credits on a non-matriculated basis. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Neuroscience by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** Applicants already admitted to a graduate degree program at Temple University have demonstrated that they possess the required bachelor's degree.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 15*

*Required Courses:*

Code	Title	Credit Hours
NSCI 9381	Readings in Neuroscience (3 terms)	3
	Behavioral/Cognitive/Systems Neuroscience courses <sup>1</sup>	6
	Cellular/Molecular Neuroscience courses <sup>1</sup>	6
<b>Total Credit Hours</b>		<b>15</b>

1

Of the four Neuroscience courses required in the specialization areas, three 3-credit courses are mandatory. One course may, however, be taken from the 2-credit courses offered by the Lewis Katz School of Medicine, which ensures that students have a wider breadth of course selection in the certificate program. When students select a 2-credit course, they are limited to taking one such course and, to achieve the 15 credits required to earn the certificate, must take an additional academic term of NSCI 9381 Readings in Neuroscience for 1 credit.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Non-Profit Management

COLLEGE OF LIBERAL ARTS

Learn more about the graduate certificate in Non-Profit Management.

### About the Certificate

By one estimate, the United States has about 1.5 million nonprofit organizations of varying size, structure and purpose that employ over 14 million workers. Nonprofits work closely with each other as well as with governments at the federal, state and municipal levels. Government agencies contract with nonprofits to conduct research, evaluate programs, and deliver goods and services during program implementation. Many nonprofits also advocate on behalf of particular causes and constituencies. Such organizations have a critical role in responding to a wide array of challenges faced by society, such as access to affordable healthcare, criminal justice reform, economic development, education system reform, poverty and hunger, sustainability and others.

The Non-Profit Management certificate's curriculum gives students a foundation in the themes, concepts and tools of nonprofit management. Students who earn a "B" or better in their coursework and are admitted into the Master of Public Policy (MPP) program have at least 9 credits applied toward completion of the MPP.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online, with virtual synchronous sessions held in the evenings to accommodate working professionals

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate program's administrator for more information.

**Job Prospects:** The Non-Profit Management certificate program is intended primarily for graduate students who seek preparation for jobs in the nonprofit sector and professionals working in the field who hope to advance their careers. Completion of the certificate signals to employers that the student has a solid foundation in the concepts, knowledge and practical tools of nonprofit management.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program.

## Admission Requirements and Deadlines

*Fall and Spring:* Admission is rolling.

Submit your application at <https://forms.gle/5ULjY3XTN2jLt7oH7>.

Questions should be directed to [mpp@temple.edu](mailto:mpp@temple.edu).

**Bachelor's Degree in Discipline/Related Discipline:** Applicants already admitted to a graduate degree program at Temple University have demonstrated that they possess the required bachelor's degree. Applicants not currently enrolled in a Temple University graduate degree program and applicants enrolled in a graduate degree program at another university must submit official transcripts for all coursework taken since high school, whether or not a degree was earned from the institution(s). Evidence of the award of a baccalaureate degree from an accredited university with an undergraduate GPA of at least 2.5 on a 4.0 scale must be shown. Transcripts should be sent to [mpp@temple.edu](mailto:mpp@temple.edu).

**Additional Requirements for Students Not Currently Enrolled in a Temple University Graduate Degree Program:** Submit these additional materials via email to [mpp@temple.edu](mailto:mpp@temple.edu):

- Two letters of recommendation from persons in a position to evaluate the applicant's academic ability and accomplishments
- A personal statement of approximately 250 words indicating interests, plans and objectives within the field of nonprofit management
- Current resume

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

## Graduate Certificate: Police Leadership

COLLEGE OF LIBERAL ARTS

### About the Certificate

This graduate certificate is not open for enrollment for the 2023-2024 academic year.

## Graduate Certificate: Public Policy

COLLEGE OF LIBERAL ARTS

Learn more about the graduate certificate in Public Policy.

## About the Certificate

Public policy plays a key role in virtually every aspect of social life. Governments at the federal, state and municipal levels make laws, issue regulations, levy taxes and spend money in ways that can have profound impacts on a variety of important and challenging issues that we confront as a society, including access to affordable healthcare, climate change, control of epidemics, homeland security, immigration, income inequality, reproductive rights, unemployment and underemployment, and many others.

The Public Policy certificate's curriculum gives students a foundation in the themes, concepts and tools of public policy that orient them to the activities of federal, state and municipal governments and the nonprofit and for-profit organizations that work closely with them. Students in the certificate program who earn a "B" or better in their coursework and are admitted into the Master of Public Policy (MPP) program have the certificate credits applied toward completion of the MPP.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Center City for in-person instruction or Online with a combination of asynchronous and synchronous evening components

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate program's administrator for more information.

**Job Prospects:** The Public Policy certificate program is intended primarily for graduate students who seek preparation for better jobs in the public and nonprofit sectors as well as academia. Completion of the certificate signals to employers that the student has a solid foundation in concepts, knowledge and practical tools of public policy making, including creation, implementation, evaluation and analysis.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program.

## Admission Requirements and Deadlines

# Graduate Certificate: Spanish for Health Professions

COLLEGE OF LIBERAL ARTS

Learn more about the graduate certificate in Spanish for Health Professions.

## About the Certificate

The online graduate certificate in Spanish for Health Professions prepares professionals in healthcare fields to engage in culturally sensitive, knowledgeable Spanish communication with the Latinx and Spanish-speaking community in healthcare settings. This exclusively online certificate offers maximum flexibility in recognition of the unique time and geographical constraints of the working professional. The coursework allows students to:

- hone and improve their oral, aural, reading and writing skills in Spanish;
- appreciate, recognize and comprehend the varieties of language used by the target population;
- engage in the practice of the techniques of interpretation and translation between Spanish and English; and
- learn to recognize their own linguistic capacities and how to harness them.

Cultural competency is developed as students examine the diversity of the Latinx population in the United States, discussing cultural norms, concerns and expectations around healthcare. Students also acquire an overview of the most prominent health issues in the community to enable them to engage with patients on these topics.

As the coursework is completed entirely in Spanish, both a theoretical and a practical grasp of the issues and the language are attained by completion of the certificate. Once completed, graduates are better able to meet the needs of a healthcare system that demands culturally competent, bilingual individuals be able to serve a diverse set of patients in a variety of healthcare settings.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online, with virtual synchronous sessions held in the evenings to accommodate working professionals

**Full-Time/Part-Time Status:** The graduate certificate is completed on a part-time basis. Students may take one course per academic term. Courses are offered in seven-week sessions with two sessions in the Fall semester and two sessions in the Spring semester. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate program's administrator for more information.

**Job Prospects:** The certificate program is designed for those either working in the healthcare professions or with the background to do so. Completion of the certificate advances an employee's professional training, adding value to their agency and their salary.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program.

## Admission Requirements and Deadlines

*Fall:* Admission is rolling. Students may begin when SPAN 5601 is offered.

Submit your application at <https://form.jotform.com/200635209925050>.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of a baccalaureate degree at Temple University with a GPA of 2.5 or better.

**Statement of Goals:** In 500 to 1,000 words, outline your interest in seeking the certificate in Spanish for Health Professions.

**Resume:** Current resume required.

**Language Requirement:** All applicants must demonstrate proficiency equivalent to completion of SPAN 1003 at Temple University through the placement exam, AP credits, previous coursework, or Spanish advising placement.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
SPAN 5601	Spanish for Health Professions <sup>1</sup>	3
SPAN 5602	Advanced Medical Spanish <sup>1</sup>	3
SPAN 5603	Latino Health Issues in the US	3
SPAN 5604	Spanish/English Interpretation Techniques for Healthcare	3
<b>Total Credit Hours</b>		<b>12</b>

1

If demand warrants, this course may be offered in the summer.

Healthcare professionals may elect to complete the certificate through this intensive one-year schedule:

Year 1		
Fall		Credit Hours
SPAN 5601	Spanish for Health Professions <sup>1</sup>	3
SPAN 5602	Advanced Medical Spanish <sup>2</sup>	3
<b>Credit Hours</b>		<b>6</b>
Spring		
SPAN 5603	Latino Health Issues in the US <sup>3</sup>	3
SPAN 5604	Spanish/English Interpretation Techniques for Healthcare <sup>4</sup>	3
<b>Credit Hours</b>		<b>6</b>
<b>Total Credit Hours</b>		<b>12</b>

1

SPAN 5601 is taken as a 7-week (7A) course that begins at the start of the regular Fall term.

2

SPAN 5602 is taken as a 7-week (7B) course that begins in the middle of the regular Fall term.

3

SPAN 5603 is taken as a 7-week (7A) course that begins at the start of the regular Spring term.

4

SPAN 5604 is taken as a 7-week (7B) course that begins in the middle of the regular Spring term.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

**Culminating Event:** Students must successfully pass all four courses to earn the certificate. None of these courses can be applied toward a master's or doctoral degree in the Department of Spanish and Portuguese.

## Low Klein College of Media and Communication

The Low Klein College of Media and Communication (KCMC) at Temple University is one of the most prominent of its kind in the nation. Combining a history of success with an eye on the constantly shifting horizon, Klein College offers one of the most advanced and diverse programs for learning and networking in the communications field.

With its superb faculty, diverse student body, and location in the nation's fourth-largest media market, KCMC is one of the most exciting places in the world to study the role and many facets of communication in public life. Possessing an array of experience and expertise, KCMC faculty range from world-renowned scholars to Pulitzer Prize-winning practitioners. All are dedicated to teaching and ensuring that our school is a powerful force for innovation, diversity and social justice. We foster curiosity in our students and encourage their willingness to begin with tough questions and challenge themselves and each other in pursuing truth. Our students graduate with the confidence to communicate effectively across cultures.

Klein College students learn by doing. Classrooms provide hands-on training using industry-standard technology. All KCMC facilities are uniquely outfitted for the teaching, research and production of all disciplines of communications study. Annenberg Hall is home to:

- a 75-seat film and video screening room,
- broadcast and film production areas,
- electronic news writing and editing rooms,
- journalism and photography labs,
- multimedia labs,
- video and film editing areas, and
- three fully equipped studios for educational use, including videography, television direction and broadcast performance.

At Temple University Center City, the Multimedia Urban Reporting Lab (MURL) is a newsroom that features wireless networking, digital recorders, access to the AP wire, and video equipment.

Since the founding of the Department of Journalism in 1927, the structure and curriculum of the communications program has evolved to meet the demands and expectations of a changing media landscape. Key events include:

- In 1967, the School of Communications and Theater was formed by combining the Department of Journalism and the Department of Radio, Television and Film.
- Also in 1967, an MFA in Theater was offered as the first graduate degree and was followed four years later by an MFA in Film and Video.
- In 2010, TUTV, Temple's digital cable channel, was launched within the city of Philadelphia on Comcast and Verizon, as well as online at <https://templetv.net/>.
- In 2012, the school was renamed the School of Media and Communication when a University realignment of schools and colleges moved the Department of Film and Media Arts and Department of Theater to a new Center for the Arts.

In March 2017, in celebration of the school's 50th anniversary, an official renaming made it the Low Klein College of Media and Communication. The name change honors broadcasting pioneer Low Klein. Klein began

teaching TV courses at Temple University in 1952, while he also worked as an executive at WFIL-TV (now WPVI) in Philadelphia. In the ensuing 65 years, he helped launch the careers of hundreds of professionals, including *CBS Evening News* Executive Producer Steve Capus, *SMC '86*; the late comedian Bob Saget, *SMC '78*; and the late host and producer Dick Clark. In addition to serving as executive producer of *American Bandstand* and producing legendary Philadelphia-area programs, such as *Captain Noah and His Magical Ark*, Klein played an instrumental role in launching Channel 6's *Action News* format as program director of the station in 1970. He also spent 15 years producing Philadelphia Phillies telecasts and was president of Gateway Communications, which owned four TV stations in the East. Throughout his momentous career, Klein taught as a part-time adjunct professor at Temple.

## Graduate Programs and Certificates

- Communication for Development and Social Change MS (p. 438)
- Communication Management MS (p. 440)
- Journalism MJ (p. 441)
- Media and Communication PhD (p. 443)
- Media Studies and Production MA (p. 445)
- Graduate Certificate: Conflict Management and Dispute Resolution (p. 448)
- Graduate Certificate: Cultural Analytics (p. 449)
- Graduate Certificate: Public Relations (p. 451)
- Graduate Certificate: Strategic Communication and Cross-Cultural Leadership (p. 452)

## Graduate Faculty

*Osei Alleyne*, Assistant Professor, Department of Media Studies and Production, Low Klein College of Media and Communication; PhD, University of Pennsylvania.

*Jennifer Gerard Ball*, Assistant Professor, Department of Advertising and Public Relations, Low Klein College of Media and Communication; PhD, University of Texas at Austin.

*Geoffrey Baym*, Professor, Department of Media Studies and Production, Low Klein College of Media and Communication; PhD, University of Utah.

*Deborah Cai*, Professor, Department of Communication and Social Influence, Low Klein College of Media and Communication; PhD, Michigan State University.

*Jessica Castonguay*, Assistant Professor, Department of Advertising and Public Relations, Low Klein College of Media and Communication; PhD, University of Arizona.

*Erin K. Coyle*, Associate Professor, Department of Journalism, Low Klein College of Media and Communication; PhD, University of North Carolina at Chapel Hill.

*Brian Creech*, Associate Professor, Department of Journalism, Low Klein College of Media and Communication; PhD, University of Georgia.

*Fabienne L. Darling-Wolf*, Professor, Department of Journalism, Low Klein College of Media and Communication; PhD, University of Iowa.

*Jason del Gandio*, Associate Professor of Instruction, Department of Communication and Social Influence, Low Klein College of Media and Communication; PhD, Southern Illinois University, Carbondale.

*Gregg C. Feistman*, Associate Professor of Practice, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; MA, Marist College.

*Jan L. Fernback*, Associate Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Colorado.

*Edward L. Fink*, Laura H. Carnell Professor, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, University of Wisconsin-Madison.

*Scott Gratson*, Professor of Instruction, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, University of Denver.

*Bruce W. Hardy*, Associate Professor, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, University of Pennsylvania.

*Marc Lamont Hill*, Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Pennsylvania.

*R. Lance Holbert*, Professor, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, University of Wisconsin-Madison.

*Andrew Iliadis*, Assistant Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, Purdue University.

*Thomas L. Jacobson*, Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Washington.

*Tricia S. Jones*, Professor, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, The Ohio State University.

*Carolyn L. Kitch*, Laura H. Carnell Professor, Department of Journalism, Lew Klein College of Media and Communication; PhD, Temple University.

*Lauren Kogen*, Assistant Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Pennsylvania.

*Heather LaMarre*, Associate Professor, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, The Ohio State University.

*Susanna Lee*, Assistant Professor, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; PhD, University of Florida.

*Matthew Lombard*, Associate Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, Stanford University.

*Larisa Kingston Mann*, Assistant Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of California, Berkeley Law.

*George W. Miller III*, Associate Professor of Practice, Department of Journalism, Lew Klein College of Media and Communication; MJ, Columbia University.

*David T.Z. Mindich*, Professor, Department of Journalism, Lew Klein College of Media and Communication; PhD, New York University.

*Logan K. Molyneux*, Associate Professor, Department of Journalism, Lew Klein College of Media and Communication; PhD, University of Texas at Austin.

*Nancy E. Morris*, Professor Emerita, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Pennsylvania.

*Katherine A. Mueller*, Associate Professor, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; MFA, Temple University.

*Patrick D. Murphy*, Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, Ohio University.

*Wazhmah Osman*, Associate Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, New York University.

*Aron Pilhofer*, Associate Professor and the James B. Steele Chair in Journalism Innovation, Department of Journalism, Lew Klein College of Media and Communication; BA, University of Minnesota.

*Clemencia Rodriguez*, Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, Ohio University.

*Adrienne Shaw*, Associate Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Pennsylvania.

*Larry Stains*, Associate Professor of Practice, Department of Journalism, Lew Klein College of Media and Communication; MJ, Columbia University.

*Meghna Tallapragada*, Assistant Professor, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; PhD, Cornell University.

*Karen M. Turner*, Associate Professor, Department of Journalism, Lew Klein College of Media and Communication; JD, Northwestern University School of Law.

*Barry Vacker*, Associate Professor of Instruction, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Texas at Austin.

*Linn Washington*, Professor, Department of Journalism, Lew Klein College of Media and Communication; MSL, Yale Law School.

*Kristine Trever Weatherston*, Associate Professor of Instruction, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, Virginia Commonwealth University.

*Andrea D. Wenzel*, Assistant Professor, Department of Journalism, Lew Klein College of Media and Communication; PhD, University of Southern California.

*Thomas Wright*, Associate Professor of Instruction, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, Purdue University.

*Laura Zaylea*, Associate Professor of Instruction, Department of Media Studies and Production, Lew Klein College of Media and Communication; MFA, San Francisco Art Institute.

## Communication for Development and Social Change MS

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the Master of Science in Communication for Development and Social Change.

### About the Program

The Master of Science in Communication for Development and Social Change (CDSC) is a 30-credit program designed to be completed in one year. The program focuses on using communication, media and digital platforms to empower communities, bring about social change and strengthen social justice. There is a pressing need for communication for social change experts who can foster communication within communities, governments, and nongovernmental and civil society organizations. This work requires specific expertise in using tools like strategic communication, communication campaigns, participatory interventions, managing and evaluating social change projects, media and information literacy training, and media and digital platforms for social change.

The MS curriculum provides a comprehensive overview of theory and practice in the field of communication for social change, including research methods tailored to the specific needs of social change professionals. Our curriculum emphasizes the importance of empowered communities, local voices and participatory strategies in social change processes. Students complete 18 credits of required core coursework, 9 credits in an area of specialization, and 3 credits of capstone field experience.

**Time Limit for Degree Completion:** 4 years, although the program is designed to be completed in one year

**Campus Location:** Main

**Full-Time/Part-Time Status:** While the degree program can be completed on a full- or part-time basis, full-time enrollment is strongly encouraged.

**Interdisciplinary Study:** The program is designed to be interdisciplinary in nature.

**Areas of Specialization:** Previously designed specializations include those listed below, but the possibilities are limitless as students are encouraged to design their own specializations based on their interests:

- Civic Engagement and Democratic Governance
- Climate Change and Adaptation
- Conflict, Peace and Human Rights
- Gender Equity
- Media Development and Advocacy
- Public Health

- Social Justice
- Sustainable Development

**Job Prospects:** The program prepares graduates as communication specialists who can help raise public understanding, build consensus and generate change by effectively using the range of communication alternatives available, whether by facilitating processes of dialogue among stakeholders or through media campaigns for governmental and non-governmental institutions.

Among the positions held by our alumni after graduation are:

- communications consultant for the United Nations
- communications manager for Read by 4th
- community outreach specialist for Stokes Creative Group
- digital communications specialist for UNICEF
- monitoring and evaluation officer for Greenpeace
- project manager for The Corps Network

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits before applying to the MS program.

**Financing Opportunities:** Merit scholarships are awarded on a competitive basis by the admissions committee. For information on endowed scholarships, please contact Klein's Graduate Office.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* March 1

Admission is open for the Fall term only. Applications are accepted after the deadline, but late applications cannot be guaranteed merit scholarship consideration.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who are able to provide insight into the applicant's potential for professional achievement and aptitude for graduate study. It is important that recommenders offer insight into the applicant's academic skills, including writing, analytical and critical thinking, and research abilities.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the baccalaureate degree at Temple University.

**Statement of Goals:** In approximately 1,000 words, present your strongest statement in the form of an essay about your interests and experiences in the field of Communication for Development and Social Change. The goal of your essay is to allow us to assess your institutional fit. Toward this end, please review the descriptions of our program, curriculum and faculty, also incorporating this content into your statement. You may use one or more of the following prompts as a starting point:

- What are your interests, experiences or academic research in the area of media and communication for development and social change, including your life experiences? The best candidates are people who can connect their life experiences and passions to their career goals.

- How will the MS in Communication for Development and Social Change advance your professional aspirations, intellectual objectives or social change/social justice goals?
- What is your experience as a social justice activist, public information campaign practitioner, community media practitioner or local journalist?
- How will you benefit from our program, and what will you contribute to our learning community?

**Standardized Test Scores:**

GRE: Optional. If provided, scores at or above the 65th percentile are expected.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master’s degree at a U.S. institution, must report scores within two years of the test date for a standardized test of English that meet these minimums:

- TOEFL iBT: 105
- IELTS Academic: 7.0

**Resume:** Current resume or curriculum vitae is required.

**Writing Sample:** If you elect to not submit GRE scores, you are required to submit one of the options below so that your readiness and ability/potential to engage rigorously with graduate-level work can be assessed:

1. A formal academic paper from your undergraduate work that represents your best academic writing. Please include a cover sheet on which you indicate:
  - a. your name,
  - b. the institution where you took the course for which the paper was produced,
  - c. the course number and title of the course for which the paper was written,
  - d. the professor for whom you wrote the paper, and
  - e. the term in which you took the course.
2. Professional writing samples that you produced in a professional capacity, such as a published report, research report, grant proposal, and/or assessment or evaluation report. Please include a cover sheet indicating:
  - a. what role you played in the publication’s production,
  - b. the institution that sponsored it, and
  - c. on what date the material was produced.

**Program Requirements**

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Year 1		Credit Hours
Summer II		
GDC 8001	Seminar in Media, Communication and Development	3
<b>Credit Hours</b>		<b>3</b>

Fall		
GDC 8003	Research Approaches in Communication, Development and Social Change	3
MSP 8254	Public Information Media Campaigns	3
MSP 8275	#ourmedia: Community, Activist, Citizens' and Radical Media	3
Specialization Course <sup>1</sup>		3
<b>Credit Hours</b>		<b>12</b>
Spring		
GDC 8002	Communication for Social Change Project Design	3
JRN 5213	Solutions Journalism	3
Two Specialization Courses <sup>1</sup>		6
<b>Credit Hours</b>		<b>12</b>
Summer		
GDC 9995	Master's Research Project	3
<b>Credit Hours</b>		<b>3</b>
<b>Total Credit Hours</b>		<b>30</b>

1

Students choose three courses in one area of specialization. Coursework options can be identified by contacting the Program Director. In addition, courses from across the University may be selected by students as they design their own specializations.

**Culminating Event:**

*Capstone Course:*

GDC 9995 Master's Research Project is a hybrid course in which students meet with the course instructor early in the Summer term and then complete their field experiences independently during the summer under the supervision and evaluation of the instructor. Research projects can include internships with governmental and non-governmental organizations, investigative projects with socially responsible businesses, participation in community development initiatives, or media productions for social changes that allow students to acquire knowledge and new skills and become more reflective development practitioners.

## Communication Management MS

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the Master of Science in Communication Management.

### About the Program

The MS in Communication Management is a professionally oriented program focused on deep exploration of communication principles and practices. It features coursework in key areas such as audience analysis, communication strategies for emerging media, organizational communication, and research and data synthesis. Emphasizing strategic communication in the workplace and public communication, this program prepares entry-level and mid-career professionals to engage in effective communication campaigns as well as handle conflict and crisis management.

The MS program is offered completely online through an exciting combination of instructional formats. Students learn through both online interaction with faculty and by engaging with learning resources that they may individually access at their convenience.

Although not necessary for successful completion of the program, students may choose to focus on one of our socially relevant concentrations: Conflict Management and Dispute Resolution, Public Relations, or Strategic Communication and Cross-Cultural Leadership. Concentrations are displayed on the transcript upon graduation.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Online

**Full-Time/Part-Time Status:** The online program, which can be completed on a full- or part-time basis, is designed to be completed in one year. All courses are offered for seven weeks in synchronous or asynchronous formats, can be taken in any order, and have no prerequisites.

**Areas of Specialization:** Three optional concentrations are available to students in the Communication Management MS degree program:

- Conflict Management and Dispute Resolution
- Public Relations
- Strategic Communication and Cross-Cultural Leadership

**Job Prospects:** Graduates of the MS in Communication Management program have gained the effective executive skills to manage different organizational demands such as crisis management, cross-cultural conflict, employee dispute resolution, leading diverse teams, and responsible decision-making in both corporate and non-corporate institutions. They are prepared to serve in corporate and nonprofit organizations, public and government relations, and public and political advocacy.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits before applying to the MS program.

**Financing Opportunities:** Merit scholarships are awarded on a competitive basis by the admissions committee.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* February 15

*Spring:* November 1

Applications are accepted after the deadline, but late applications cannot be guaranteed merit scholarship consideration.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who are able to provide insight into the applicant's potential for professional achievement and aptitude for graduate study.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the baccalaureate degree at Temple University.

**Statement of Goals:** In approximately 1,000 words, explain:

- How the MS in Communication Management program will advance your career goals and intellectual objectives, and
- What interests, experiences, and academic or research achievements that you bring to the program.

This statement is used to assess your institutional fit, i.e., how you will benefit from our program and what you will contribute to our learning community. Toward this end, please review the descriptions of our program, curriculum and faculty, incorporating this content into your statement. The strongest statement integrates your answers to these prompts into a coherent essay.

**Standardized Test Scores:**

GRE: Optional. If provided, scores at or above the 65th percentile are expected.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 105
- IELTS Academic: 7.0

**Resume:** Current resume or curriculum vitae required.

**Writing Sample:** If you elect to not submit GRE scores, you are required to submit one of the options below so that your readiness and ability/potential to engage rigorously with graduate-level work can be assessed:

1. Professional writing samples that you produced in a professional capacity, such as a project report, public relations release, or any internal communications. Please include a cover sheet indicating

the purpose of the piece, intended audience and if any analysis was done.

- Academic paper or published article. Please include a cover sheet identifying the course and term for which the academic paper was written or for what publication and on what date the material was published.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 31

Code	Title	Credit Hours
<b>Core Courses</b>		
CMGT 8101	Data Driven Insights	3
CMGT 8103	Organizational Communication	3
CMGT 8105	Social Responsibility in Corporations and Not-for-Profit Organizations	3
CMGT 8106	Communication Theory for Professionals	3
<b>Electives/Optional Concentration(s)</b>		
Select six courses from the following. Declaring a concentration is optional. A concentration is earned when all three courses in an area of study are successfully completed: <sup>1</sup>		18
<b>Conflict Management and Dispute Resolution</b>		
CMGT 5002	Leadership in Crises and Conflict Management	
CMGT 5101	Conflict Management Processes in the Workplace	
CMGT 5102	Designing Workplace Dispute Systems	
<b>Public Relations</b>		
CMGT 5201	Consulting and Consultation in Public Relations	
CMGT 5202	Storytelling through Innovation	
CMGT 5203	Law and Ethics in Public Relations	
<b>Strategic Communication and Cross-Cultural Leadership</b>		
CMGT 5001	Communicating Organizational Leadership	
CMGT 5003	Leading Diverse Teams	
CMGT 5004	Cross-Cultural Leadership	
<b>Directed Readings <sup>2</sup></b>		
CMGT 5583	Directed Readings in Communication Management	
<b>Capstone Course</b>		
CMGT 8109	Final Project	1
<b>Total Credit Hours</b>		<b>31</b>

1

Up to two concentrations may be declared.

2

Students may choose to take a directed readings course for elective credit, pending faculty approval. Approval from the program director is required to count CMGT 5583 toward a concentration.

### Culminating Event:

#### *Capstone Project:*

CMGT 8109 constitutes the final project in Communication Management. It requires students to solve a critical structural and/or procedural communication problem affecting an organization's ability to communicate efficiently or effectively at internal and/or external levels. The 20-minute video-recorded presentation allows students during their

final academic term to reflect on and summarize relevant concepts, practices and readings from their entire course of study.

## Journalism MJ

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the Master of Journalism in Journalism.

### About the Program

Temple's one-year Master of Journalism program directly engages with the rich and diverse communities of Philadelphia. Coursework and reporting projects focus on the problems and opportunities of urban life. Hands-on multimedia work is combined with the study of journalism's evolving roles and practices. Students learn by experiencing what it is like to work in today's ever-changing media environment. In recognition of the exciting evolution underway in the news industry, the program is designed to help current and aspiring journalists develop into engaged and innovative professionals.

The program benefits greatly from its location at Temple University in the fourth-largest media market in the United States, one ripe with innovation. Philadelphia is full of journalistic initiatives, including startups and nonprofits that are rethinking metropolitan, niche and ethnic media. Students interact with journalists and innovators from these organizations. Students take advantage of rich reporting opportunities in the Philadelphia area, a city with a vibrant culture, a highly diverse population, and significant challenges common to other cities, including crime, housing, development controversies, economic inequity, educational equity and race relations. The Urban Reporting Lab and the master's research project provide opportunities for MJ students to

tackle such problems in innovative ways as they pursue their graduate education and seek to make a difference.

The one-year, 30-credit program is designed to provide rigorous training as a cohort experience, encouraging students to work together and learn from one another as well as Master of Journalism faculty, local journalists and other innovators. This process begins with an immersive experience in Philadelphia communities before the first academic term and ends with a master's research project in the summer term in which students design and complete a journalistic masterwork. The program requires three elective courses to be taken from among graduate and upper-level undergraduate offerings in journalism and across Klein College. Students may choose to develop a specialization through these electives, including specializations in data and investigative journalism, multimedia journalism and sports journalism.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** While the degree program can be completed on a full- or part-time basis, full-time enrollment is strongly encouraged.

**Areas of Specialization:** Coursework is demanding and prepares students to work as professional journalists in the media of their choice. Specialized training is available in broadcast journalism, community journalism, entrepreneurial journalism, investigative reporting, podcasting and various forms of digital journalism. Students develop a specialization through their elective courses and a self-guided master's research project.

**Job Prospects:** The program is dedicated to training professional practitioners in journalism and media careers. Former students have also found success as freelancers and entrepreneurs.

**Non-Matriculated Student Policy:** Non-matriculated students are encouraged to begin with introductory and required courses. If accepted to the program, those courses may be applied toward the degree program, provided grade requirements have been met. Consistent with Graduate School policy, students are permitted to take up to 9 credits before deciding whether to apply formally to the program.

**Financing Opportunities:** Merit scholarships are awarded on a competitive basis by the admissions committee.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 15

Admission is open for the Fall term only. Applications are accepted after the deadline, but late applications cannot be guaranteed merit scholarship consideration.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from college/university faculty members, professional supervisors or others familiar with the applicant's academic and professional competence. At least one letter should be from an academic reference.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required for admission. Applicants with undergraduate degrees in fields other than journalism and communication are welcome provided they can demonstrate sufficient interest in and proficiency with journalistic communication and practice.

**Statement of Goals:** In approximately 1,000 words, present your strongest statement, which integrates your answers to the prompts below into a coherent essay, to allow us to assess your institutional fit. Toward this end, please review the descriptions of our program, curriculum and faculty, also incorporating this content into your statement. The prompts include:

- Your interest in journalism and your view of its place in society;
- Your career goals in journalism; and
- Your interests, experiences, and academic or professional achievements that you bring to the program.

### Standardized Test Scores:

GRE: Optional. Scores submitted are preferred to be at least 65% on the verbal section with a writing score of at least 3.5. If you elect to not submit GRE scores, a writing sample is required.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 105
- IELTS Academic: 7.0
- Duolingo: 110

**Resume:** Current resume or curriculum vitae is required.

**Writing Sample:** If you elect to not submit GRE scores, you are required to submit a writing sample, which is otherwise strongly encouraged. Published journalistic works (e.g., in professional outlets or college media) are preferred. You may also submit a formal academic paper from your undergraduate studies that represents your best writing. In this case, please indicate on a cover sheet when, for what course, and at which institution the paper was produced.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the MJ program, subject to approval of the Master of Journalism Committee. Requests to transfer credits must be submitted during the first term of matriculation so that the student's future curriculum can be planned. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Year 1		Credit Hours
Summer II		
JRN 5301	Introduction to Urban Journalism	3
<b>Credit Hours</b>		<b>3</b>

<b>Fall</b>		
JRN 5302	Urban Reporting Lab 1	3
JRN 5303	Journalism Concepts	3
JRN 5308	Multiplatform Journalism	3
JRN Elective		3
<b>Credit Hours</b>		<b>12</b>
<b>Spring</b>		
JRN 5305	Urban Reporting Lab 2	3
JRN 5306	Journalism and the Public Interest	3
Two JRN Electives		6
<b>Credit Hours</b>		<b>12</b>
<b>Year 2</b>		
<b>Summer I</b>		
JRN 9995	Master's Research Project	3
<b>Credit Hours</b>		<b>3</b>
<b>Total Credit Hours</b>		<b>30</b>

**Culminating Event:***Capstone Project:*

JRN 9995 Master's Research Project constitutes the culminating event. Students complete an independent reporting project that results in a journalistic masterwork analogous to a thesis that will be pitched to a professional news organization, creating the foundation for a portfolio of published work.

**Media and Communication PhD**

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the Doctor of Philosophy in Media and Communication.

**About the Program**

The PhD in Media and Communication offers a comprehensive curriculum in communication theory and research designed to provide advanced students with the breadth and depth of knowledge needed to make significant contributions in the academic and professional fields of mediated communication and, generally, communication.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Media and Communication students are expected to be "in residence" during their first year of study, excluding summer sessions. Thus, they must register for at least 9 credits in each of the two consecutive terms of Fall and Spring. Although the Graduate School allows for PhD programs to be completed on a full- or part-time basis, students receiving funding are required to maintain full-time status during their tenure in the program.

**Interdisciplinary Study:** The Media and Communication PhD program encourages interdisciplinary coursework, research and interactions among faculty and students with interest in the humanities and social sciences.

**Areas of Specialization:** Faculty members specialize and offer coursework in diverse areas related to media and communication, including communication effects and psychological processes; emerging media and technology; global media, social change and activism; journalism studies; media, identity and representation; the media industry, law and policies; political communication; and popular communication.

**Job Prospects:** The Media and Communication PhD program is designed to prepare graduates for work as professors in colleges and universities around the world. Graduates also hold a variety of positions in the communication and other commercial industries as well as in nonprofit organizations.

**Non-Matriculated Student Policy:** Non-matriculated students are restricted to taking MMC 9001 Communication Theory I and MMC 9002 Researching Communication I. These courses may only be taken with the permission of the instructor. If the student is admitted to the program, these courses may be applied toward the degree.

**Financing Opportunities:** As part of the admissions process, all applicants are considered for funding for a small number of competitive fellowships and teaching assistantships that carry a stipend and full tuition remission of up to 9 credits per term. Starting in their third year, funded students are given the opportunity to teach their own class as the instructor of record. Funding offers are made on or before March 15. April 15 is the final date to accept or decline the offer.

**Admission Requirements and Deadlines****Application Deadline:**

*Fall:* December 1

Admission is open for the Fall term only. All applications are evaluated together after the deadline date. Admitted students may defer entrance to the program for one year, but students may not begin the program in the Spring term unless there are truly extenuating circumstances, as

evaluated by the program director. Admission is based on several criteria, including:

- a match between the applicant's abilities and faculty's expectations;
- a match between the applicant's goals and the training and other attributes offered by the program;
- the applicant's academic and personal references;
- their demonstrated academic ability and research potential; and
- their standardized test scores.

APPLY ONLINE to this graduate program.

#### Letters of Reference:

Number Required: 3

*From Whom:* Letters of recommendation should be obtained from evaluators, particularly college/university faculty, who can provide insight into your academic abilities and talents, as well as comment on your aptitude for graduate study.

**Master's Degree in Discipline/Related Discipline:** A master's degree in Communication, Media Studies, or in the humanities or social sciences is required. A minimum graduate GPA of 3.25 is expected. Those with scores near this minimum typically have their references scrutinized rigorously.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the baccalaureate degree at Temple University. A minimum undergraduate GPA of 3.0 is expected. Those with scores near this minimum typically have their references scrutinized rigorously.

**Statement of Goals:** In approximately 1,000 to 1,500 words, describe your specific interest in Temple's program, research goals, future career goals, and academic and research achievements. Your statement should name faculty with whom you are interested in working.

#### Standardized Test Scores:

GRE: Optional for Fall 2024 admission. Typically, only applicants who have a minimum total verbal and quantitative GRE score of 300, with a minimum verbal score of 150, are considered for admission. Candidates with scores near these minima typically have their references scrutinized rigorously.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores within two years of the test date for a standardized test of English that meet these minimums:

- TOEFL iBT: 96
- IELTS Academic: 7.0
- Duolingo: 110

**Resume:** Current resume or curriculum vitae is required.

**Interview:** In some cases, faculty may request an interview with applicants as part of evaluating their fit with the program and potential funding merit.

**Writing Sample:** Applicants should submit a formal academic paper that represents their best academic writing.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Master's: 48

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MMC 8985	Teaching in Higher Education: Communications	3
MMC 9001	Communication Theory I	3
MMC 9002	Researching Communication I	3
MMC 9003	Doctoral Colloquium	1
MMC 9005	Colloquium II (2 terms)	2
MMC 9101	Communication Theory II	3
MMC 9102	Researching Communication II	3
<b>Advanced Research Methods Course<sup>1</sup></b>		<b>3</b>
<b>Electives<sup>2</sup></b>		<b>21</b>
<b>Research Courses<sup>3</sup></b>		<b>6</b>
MMC 9994	Preliminary Examination Preparation	
MMC 9998	Pre-Dissertation Research	
MMC 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>48</b>

1

All students are required to take at least one advanced research methods course in Media and Communication. Beyond the first course, these advanced courses can be taken as electives. Students are encouraged to take additional advanced courses under the guidance of their program advisor.

2

Electives may be taken in the Lew Klein College of Media and Communication, with up to 6 graduate credits taken in other schools and colleges at Temple University.

3

The six credits must include at least two credits of MMC 9999, which requires an approved dissertation proposal.

### Culminating Events:

#### Preliminary Examinations:

Under the direction of an approved faculty committee, the PhD student must satisfactorily complete written and oral examinations prior to achieving formal PhD candidacy. Areas of examination and the constituency of the committee are tailored to the individual student. The subject areas are determined, in advance, by the student and their Doctoral Advisory Committee (DAC). The examinations consist of essay questions in three areas written by the members of the student's DAC. The exams are designed to demonstrate the student's critical and interpretive knowledge of specialized areas of media and communication. The exams evaluate the student's ability to apply specific research foci to related issues in the discipline.

The preliminary examinations should be taken no more than one term after the student completes the coursework component of the program. Students who are preparing to write their preliminary examinations should confirm a date and time with the chair of their DAC and register this information with Klein's Office of Research and Graduate Studies.

The student and chair receive confirmation of the date, time and, where applicable, room and proctor for the examinations.

The DAC evaluates the examinations. The student must answer every question in order to be evaluated. The evaluators look for breadth and depth of understanding of specific research areas; a critical application of that knowledge to specific media and communication issues; and an ability to write technical prose in a manner consistent with media and communication research. Each committee member votes to pass or fail the student. In order to pass, a majority of the committee members must agree that the exams have been satisfactorily completed.

If a student's answers are deemed suitable and complete, they may be passed without an oral defense. Otherwise, examinations may be defended orally approximately three weeks after they are written. Examinations must be completed and passed before the student defends their dissertation proposal.

*Proposal:*

With the guidance of their academic advisor, who is a member of the Media and Communication faculty, and at least two other committee members, the student proposes, conducts and creates a written report of an original, theoretically motivated research project. The proposal should consist of the context and background surrounding a particular research problem; identification of the theoretical and, if relevant, practical importance of the problem; an exhaustive survey and review of literature related to the problem; and a detailed methodological plan for investigating the problem. The proposal should be completed and approved no more than one term after the student completes coursework. It cannot be defended before the preliminary examinations are taken. Upon approval, a timeline for completing the investigation and writing process is established.

*Dissertation:*

The doctoral dissertation is an original empirical study that makes a significant contribution to the field of media and communication. It should expand the existing knowledge and demonstrate the student's knowledge of both research methods and their primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standards of the communication field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of media and communication; and be prepared for publication in a professional journal.

The DAC oversees the student's dissertation research and is comprised of at least three graduate faculty members. Two members, including the chair, must be from the Media and Communication program. Committee compositions must be approved by the Media and Communication faculty. The chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the DAC members, and informing the student of their academic progress.

The Dissertation Examining Committee (DEC) evaluates the student's dissertation and oral defense. This committee is composed of the DAC and at least one additional graduate faculty member from outside the Media and Communication program. The outside examiner should be identified no later than the beginning of the term in which the student will defend the dissertation. The DEC evaluates the student's ability to express verbally their research question, methodological approach, primary findings and implications. DEC members vote to pass or fail the dissertation and the defense at the conclusion of the public presentation.

If a student needs to change a member of a committee, the new member must be approved by the program's faculty and registered with Klein's Office of Research and Graduate Studies and the Graduate School.

Students who are preparing to defend their dissertation should confirm a date and time with their DEC members and register with Klein's Office of Research and Graduate Studies at least 15 days before the defense. The date, time and room are arranged within two working days, and the student is forwarded the appropriate forms. After the defense has been set, the student must send a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," to the Graduate School at least 10 days before the defense. The Media and Communication program announces the defense via e-mail.

## Media Studies and Production MA

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the Master of Arts in Media Studies and Production.

### About the Program

In the Media Studies and Production master's program, we study and create media with an eye to the global media environment. We research new and legacy forms of media and media-related technologies; study industry practices and how they interact with governments, communities, other industries and social forces; and examine audiences and their dynamic relationships with media. We design and produce media that reflect big ideas about individual, community and cultural experience in a program that provides pathways to leadership in numerous careers: corporate and nonprofit communication, marketing and research, media

production, media management, academic research, and media publicity and advertising.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** Departmental courses must constitute a minimum of 19 of the 36 credits required to graduate. Provided this requirement is met, students are free to take courses in other departments and pursue an interdisciplinary focus.

**Affiliation(s):** Department faculty members and students regularly present research at established communications associations, such as the Association for Education in Journalism and Mass Communication (AEJMC), Association of Internet Researchers (AoIR), Broadcast Education Association (BEA), Eastern Communication Association (ECA), International Association for Media and Communication Research (IAMCR), International Communication Association (ICA), and National Communication Association (NCA).

**Study Abroad:** Students can pursue opportunities for study away during the Summer semester.

**Areas of Specialization:** The program focuses on three areas of interest:

1. Communication Scholarship covers the history, economics, law, regulation and policy pertaining to broadcast, cable and new technology industries in both national and international contexts; social processes such as the psychology, sociology, cultural study and politics of both media and communications technology, particularly as related to their impact on everyday life; and the analysis of the behavior and management of communications systems, particularly in terms of the media, telecommunication industries, digital platforms and institutions.
2. Media Business covers corporate and nonprofit communications; media management, marketing and research; and media publicity and advertising.
3. Media Production covers TV, radio, digital platforms, multimedia production, gaming and emergent communication technologies.

**Job Prospects:** Given that all institutions engage with media in today's society, graduates find positions in academia, the corporate sector, government/public service, nonprofit organizations, journalism and entertainment media. Expertise gained in this program positions graduates for leadership positions.

**Non-Matriculated Student Policy:** Non-matriculated students are encouraged to begin with introductory and required courses. If accepted to the program, those courses may be applied toward the degree program, provided grade requirements have been met. Consistent with Graduate School policy, students are permitted to take up to 9 credits before deciding whether to apply formally to the program.

**Financing Opportunities:** Scholarships are awarded on a competitive basis by the admissions committee.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* February 15

Admission is open for the Fall term only. Applications are accepted after the deadline, but late applications cannot be guaranteed merit scholarship consideration.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from college/university faculty, professional supervisors or others familiar with the applicant's academic or professional competence. At least one letter should be from an academic reference.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Communication, Media Studies, or the Humanities or Social Sciences is required.

**Statement of Goals:** In approximately 1,000 words, explain:

- How the MA in Media Studies and Production will advance your research goals, career goals and intellectual objectives; and
- Your interests, experiences, and academic or research achievements that you bring to the program.

This statement is used to assess your institutional fit, i.e., how you will benefit from our program and what you will contribute to our learning community. Toward this end, please review the descriptions of our program, curriculum and faculty, and incorporate this content into your statement. The strongest statement integrates your answers to the above prompts into a coherent essay.

**Standardized Test Scores:**

GRE: Optional. Scores that are submitted are preferred to be at least 60% verbal and at least 25% quantitative. A writing score of at least 3.5 is recommended.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- Duolingo: 110

**Resume:** Current professional resume or curriculum vitae is required.

**Writing Sample/Production Portfolio:** If you elect to not submit GRE scores, you are required to submit one of the options below so that your readiness and ability/potential to engage rigorously with graduate-level work can be assessed:

1. A formal academic paper from your undergraduate work that represents your best academic writing. Please include a cover sheet on which you indicate:
  - a. your name,
  - b. the institution where you took the course for which the paper was produced,
  - c. the course number and title of the course for which the paper was written,

- d. the professor for whom you wrote the paper, and
  - e. the term in which you took the course.
2. Professional writing samples that you produced in a professional capacity, such as published news articles or press releases. Please include a cover sheet indicating in what publication and on what date the material was published.
  3. A production portfolio that includes professionally or academically produced video, audio or web material. Please submit an academic essay that explains how theory and research inform the production portfolio, indicating your role in the production, where the material was produced, and the date.

**Transfer Credit:** Up to 8 credits of graduate coursework may be transferred into the master's program, subject to the approval of the department's Graduate Faculty. To request the transfer of credits, a student must complete and submit a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms," to Klein's Office of Research and Graduate Studies during the first term of matriculation so that their future curriculum can be properly planned. Additional details on credit transfer are available in the MA manual. The maximum number of credits a student may transfer is 8.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 36*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MSP 5011	Introduction to Communication Concepts	3
MSP 5114	Communication Research Methods	3
MSP 9845	Masters Colloquium	1
Select at least one of the following:		3
MSP 5021	Media Institutions <sup>1</sup>	
MSP 5042	Media Technology and Culture <sup>2</sup>	
<b>Courses in Area of Interest <sup>2</sup></b>		<b>20</b>
<b>Research Course</b>		<b>6</b>
MSP 9333	Master Colloq/Comp Exam	
	or MSP 9996 MA Thesis/Project	
<b>Total Credit Hours</b>		<b>36</b>

1

MSP 5021 is only offered in the Fall term.

2

When required courses have been completed, students may pursue coursework in a focal area of their choice: Communication Scholarship, Media Business, or Media Production.

## Proposed Plan of Study Outlined by Year and Term

It is recommended that full-time students adhere to the following timeline for degree completion:

<b>Year 1</b>		
<b>Fall</b>		<b>Credit Hours</b>
MSP 5011	Introduction to Communication Concepts	3
MSP 5021	Media Institutions <sup>1</sup>	3
Or one course in area of interest <sup>2</sup>		
MSP 5114	Communication Research Methods	3
MSP 9845	Masters Colloquium	1
<b>Credit Hours</b>		<b>10</b>
<b>Spring</b>		
MSP 5042	Media Technology and Culture <sup>3</sup>	3
Select two courses in area of interest <sup>4</sup>		7
<b>Credit Hours</b>		<b>10</b>
<b>Year 2</b>		
<b>Fall</b>		
Select three courses in area of interest <sup>4</sup>		10
<b>Credit Hours</b>		<b>10</b>
<b>Spring</b>		
Select one of the following:		6
MSP 9333	Master Colloq/Comp Exam	
MSP 9996	MA Thesis/Project	
<b>Credit Hours</b>		<b>6</b>
<b>Total Credit Hours</b>		<b>36</b>

1

MSP 5021 is only offered in the Fall term. If selected, MSP 5021 must be taken in the Fall of Year 1.

2

Coursework is taken in a focal area of the student's choice: Communication Scholarship, Media Business, or Media Production. One such course is taken in the Fall of Year 1 if the student does not choose to enroll in MSP 5021. All full-time students are required to take 10 credits in their first semester of study.

3

Students who did not take MSP 5021 in the Fall are required to enroll in MSP 5042 in the Spring. Those who have taken MSP 5021 and do not elect to also take MSP 5042 are required to take three courses in their area of interest, i.e., Communication Scholarship, Media Business, or Media Production, in the Spring of Year 1.

4

Students who elect to take comprehensive exams complete these credits through coursework taken in a focal area of the student's choice: Communication Scholarship, Media Business, or Media Production.

### Culminating Events:

*Master's Thesis or Project:*

Students can elect to complete a thesis or master's project.

*Comprehensive Examinations:*

Upon completion of all or most coursework and all other requirements, students who elect to not complete a thesis or master's project must take comprehensive examinations. The comprehensive examinations are a set of written tests on several subjects, that may, if necessary, be followed by oral discussions. As students near coursework completion, they should discuss with their advisor the constitution of the Comprehensive Examination Committee and the topics of the examinations. During this period, students are also advised to check with prospective faculty

members concerning their willingness and ability to serve as members on the committee. This should be done sometime during the students' third term of study. The comprehensive exams are taken during the final term of study.

The examinations cover the discipline of media and communication, not the precise coursework taken by a given student. Students are examined in three areas that they determine in conjunction with their committee. Each area is represented by the question(s) of one committee member. The questioner in each examination area may be understood to be the lead or main reader for that area. The three areas are chosen from Communication Behavior, Communication History, Communication Institutions, Communication Message Systems, Communication Research Methodology, Communication Theory and an optional area.

The form of the examinations is determined by the student and the Comprehensive Examination Committee. Each of the three examinations can be taken either in office or at home, either with or without the use of notes and/or books, and for a period of a few hours to a week. In all cases, the written portion of the examination must be completed within a 14-day period. In-office examinations may not exceed four hours.

Students must answer every question on the examination in order to be evaluated. Evaluators look for an understanding of core concepts, application of relevant materials, informed responses and careful writing. Additional standards may be applied by individual faculty members. All members of the Comprehensive Examination Committee evaluate each answer and convey their assessments to the committee chair within three weeks of receiving the examinations. First, each content area is graded on a pass/fail basis. To pass in a given area, the majority of committee members (i.e., no fewer than two) must accept the answer(s). Included in this majority approval must be that of the area examiner (i.e., the lead reader). Second, to pass the comprehensive examinations, the Comprehensive Examination Committee must also determine that the overall written (and oral, if required) performance across all questions and areas is adequate. Thus, it is possible that a student may discharge each area just passably but have such a weak overall performance that they fail the comprehensive examinations.

The examinations are scheduled by the student and their committee members. The student must complete all of the examinations within the 90 days following the approval of the student's Comprehensive Examination Committee. If 90 days elapse from the approval-of-committee date without completion, the process must be started again from the beginning. Examinations may be scheduled any time during the regular academic term, either Fall or Spring.

## Graduate Certificate: Conflict Management and Dispute Resolution

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the graduate certificate in Conflict Management and Dispute Resolution.

### About the Certificate

The graduate certificate in Conflict Management and Dispute Resolution is designed for those interested in developing their skills to manage organizational demands for crisis management and resolution of employee disputes. This 12-credit certificate program provides graduate students with an in-depth understanding of the causes of cultural and professional disputes and enhances communication, management and conflict resolution techniques.

Because workplace conflicts are common, the presence of a professional who can manage and mitigate disputes benefits productivity, workflow and the organizational environment. In the certificate program, students learn to design, examine and utilize conflict management and dispute resolution systems in various organizations and fields, including government, healthcare, higher education and the private sector.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online, thereby offering students flexibility in accessing resources, submitting assignments and communicating online to accommodate demanding job constraints and challenging personal responsibilities

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. All courses are offered for seven weeks in synchronous or asynchronous formats, have no prerequisites, and can be taken in any order.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits before submitting an application.

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must submit official undergraduate and graduate transcripts from all accredited institutions attended and/or from which credit was earned. International applicants should also submit official documentation that validates completion and conferral of their degree(s).

**Statement of Goals:** Write a 250-500 word statement of purpose outlining your interest in seeking a graduate certificate as well as your academic and job-related experiences that are relevant to the program.

**Resume:** Current resume required.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
CMGT 5002	Leadership in Crises and Conflict Management	3
CMGT 5004	Cross-Cultural Leadership	3
CMGT 5101	Conflict Management Processes in the Workplace	3
CMGT 5102	Designing Workplace Dispute Systems	3
<b>Total Credit Hours</b>		<b>12</b>

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Cultural Analytics

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the graduate certificate in Cultural Analytics.

### About the Certificate

The graduate certificate in Cultural Analytics at Temple University is an interdisciplinary effort by faculty members in the Tyler School of Art and Architecture, College of Education and Human Development, College of Liberal Arts, Lew Klein College of Media and Communication, Center for the Performing and Cinematic Arts, and College of Science and Technology, as well as librarians in Temple University Libraries and its Loretta C. Duckworth Scholars Studio. This certificate program trains students in humanistic and non-scientific fields in the use of computational methods to analyze cultural objects.

"Cultural Analytics" refers to the analysis of cultural objects assisted by computer technology and quantitative methods. Sometimes called "digital humanities," the field developed in response to the digitization of archival materials, books, museum objects and paintings, making it possible to analyze cultural objects using methods more familiar to computer scientists and statisticians than to humanists or qualitative social scientists.

Much of modern culture originates in digital form. Digital versions of traditional humanistic materials — artifacts, books, films, paintings and sculptures — are readily available for study. Graduate students who work with digital materials benefit from specialized training in managing and manipulating their materials so that they can take full advantage of the digital format. Students are prepared for advanced research in their discipline by allowing them to specialize in the specific skills that are most relevant to their research. Participants are encouraged to work within one of the following focal areas:

- Basic programming
- Data visualization
- Mapping and geographic information systems
- Research design and analysis
- Social media research
- Statistics
- Text encoding and analysis
- Virtual environments

The certificate program in Cultural Analytics facilitates work on a dissertation, thesis or culminating event by offering training in these technical skills along with the conceptual background needed to understand the opportunities and obstacles each method brings with it.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact a Klein College admissions advisor for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program. When they complete 9 credits, they must declare their intention to complete the graduate certificate in Cultural Analytics by completing and submitting the "Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program," found in TUportal under the Tools tab within "University Forms."

## Admission Requirements and Deadlines

*Fall and Spring* admissions are on a rolling basis.

To enroll in a given academic term, current students must apply no later than the add/drop deadline for that term. Students currently enrolled in a graduate degree program at Temple University must submit a personal statement of no more than 250 words and complete the Internal Application Form.

Applicants not currently enrolled at Temple are welcome, and applications are due August 1 for enrollment in the Fall term. Complete the External Application Form.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants already admitted to a graduate degree program at Temple University have demonstrated that they possess the required bachelor's degree. Applicants not currently enrolled in a Temple University graduate degree program and applicants enrolled in a graduate degree program at another university must submit official transcripts for all coursework taken since high school, whether or not a degree was earned from the institution(s). Evidence of the award of a baccalaureate degree from an accredited university with an undergraduate GPA of at least 3.0 on a 4.0 scale must be shown.

## Certificate Requirements

ARCH 5011	Graduate Representation Intensive 1
ARCH 5012	Graduate Representation Intensive 2
ARCH 8133	Arch Research Seminar <sup>3 4</sup>

**Total Credit Hours** **9-10**

1

HIST 5152 Digital History may be substituted for CLA 5019 with the approval of the Certificate Program Director.

2

Students enrolled in a degree program register for the non-credit practicum through the certificate program's administrator. Non-matriculated students must find a faculty sponsor for their project and enroll in 1 credit of practicum.

3

This course has prerequisites.

4

This course requires approval of the Certificate Program Director as content for this course varies.

5

This is a 4-credit course.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Graduate Certificate: Public Relations

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the graduate certificate in Public Relations.

## About the Certificate

The graduate certificate in Public Relations is designed for those interested in learning how to effectively present public images and prepare for a career in a rapidly changing media landscape. This 12-credit certificate program is designed for current public relations professionals to further their expertise in the field, as well as for students who want to capitalize on growing trends in public relations before entering the industry.

Through communication theories and real-world practice, students gain an in-depth understanding of the vital components of public relations—from data and technology to consulting and ethics—to help them excel in the workplace. After completing the Public Relations certificate program, graduates are able to:

- present campaign ideas to executives through oral and written methods,
- become involved in high-level decision-making as a communications consultant,
- analyze and research how advances in technology are impacting the industry,
- understand the legal and ethical issues of public relations practices through various perspectives, and
- utilize digital tools to analyze key campaign metrics and results.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online, thereby offering students flexibility in accessing resources, submitting assignments and communicating online to accommodate demanding job constraints and challenging personal responsibilities

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. All courses are offered for seven weeks in synchronous or asynchronous formats, have no prerequisites, and can be taken in any order.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits before submitting an application.

## Admission Requirements and Deadlines

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must submit official undergraduate and graduate transcripts from all accredited institutions attended and/or from which credit was earned. International applicants should also submit official documentation that validates completion and conferral of their degree(s).

**Statement of Goals:** Write a 250-500 word statement of purpose outlining your interest in seeking a graduate certificate as well as your academic and job-related experiences that are relevant to the program.

**Resume:** Current resume required.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
CMGT 5201	Consulting and Consultation in Public Relations	3
CMGT 5202	Storytelling through Innovation	3
CMGT 5203	Law and Ethics in Public Relations	3
CMGT 8101	Data Driven Insights	3
<b>Total Credit Hours</b>		<b>12</b>

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Graduate Certificate: Strategic Communication and Cross-Cultural Leadership

LEW KLEIN COLLEGE OF MEDIA AND COMMUNICATION

Learn more about the graduate certificate in Strategic Communication and Cross-Cultural Leadership.

## About the Certificate

The graduate certificate in Strategic Communication and Cross-Cultural Leadership is designed for those interested in expanding their cross-cultural awareness and strategic competence to develop and manage collaboration in their organizations. The certificate provides students with leadership communication theory, as well as research and practice critical to increasingly diverse leadership contexts at the breakneck pace of changing media. The 12-credit Strategic Communication and Cross-Cultural Leadership graduate certificate is ideal for individuals aspiring to leadership positions, as well as those who currently hold leadership positions and want to increase their ability to deal with cross-cultural conflicts, manage diverse teams and make responsible decisions.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online, thereby offering students flexibility in accessing resources, submitting assignments and communicating online to accommodate demanding job constraints and challenging personal responsibilities

## Lewis Katz School of Medicine

Lewis Katz School of Medicine (LKSOM) at Temple University, located on the Health Sciences Center campus, is dedicated to excellence in education, research and patient care achieved by faculty, staff and students who represent the diversity of society. LKSOM takes pride in the excellence of its teaching, research and service programs by:

- providing education that is patient-centered, instilling in learners the school's ethic of human service and lifelong learning;
- engaging in research that advances and integrates basic and clinical science; and
- administering patient care with compassion and understanding, utilizing contemporary knowledge and techniques.

Located in the historic city of Philadelphia where American medicine has its roots, LKSOM has been known for its faculty's uncommon interest in and concern for students and its commitment to the highest quality of care for all people. On November 1, 2007, the Medical School broke ground on a new home. The 11-story, 480,000-square-foot glass and brick structure opened in May 2009 and has proven to be highly functional for both education and research.

On September 16, 1901, Russell H. Conwell, founder of Temple University, opened a medical school, lit by gaslight, for the "common man." The faculty consisted of 27 lecturers, demonstrators and instructors. Medical practitioners taught classes at College Hall, next to the Baptist Temple, on present-day Main Campus. Samaritan Hospital, two miles up Broad Street, was the site of clinical instruction. Anatomical dissections on cadavers, which were delivered in pickle barrels, were performed in a hayloft. According to admissions materials, "matriculates of academic or scientific colleges, or graduates of reputable high schools of the first grade, or a normal school established by State authority, of both sexes, are admitted to the first year class without examination." In the inaugural class, 31 students began the five-year program that included:

- classes held on nights and weekends to accommodate students' day jobs,
- 15 required textbooks,
- total tuition and fees of a modest \$635, and
- a curriculum requiring 700 hours of work each year.

From such modest beginnings, LKSOM has emerged as a school of national reputation. Nationally ranked by *U.S. News & World Report*, the Lewis Katz School of Medicine at Temple University prepares students for a rewarding career in medical practice or research. The combined energy created by enthusiastic faculty, state-of-the-art technology, and soaring new facilities makes Temple an exciting place to study medicine today.

## Graduate and Professional Programs and Certificates

- Biomedical Sciences MS (p. 457)
- Biomedical Sciences PhD (p. 460)
- Medicine MD (p. 463)
- Physician Assistant MMS (p. 465)
- Urban Bioethics MA (p. 468)

- Graduate Certificate: Narrative Medicine (p. 470)
- Graduate Certificate: Urban Bioethics (p. 471)

## Graduate Faculty

*Michael V. Autieri*, Professor, Department of Lemole Center for Integrated Lymphatics Research, Lewis Katz School of Medicine; PhD, Hahnemann University.

*Mary F. Barbe*, Professor, Department of Center for Translational Medicine, Lewis Katz School of Medicine; PhD, Wake Forest University.

*Richard H. G. Baxter*, Assistant Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, University of Chicago.

*Lucia Borriello*, Assistant Professor, Department of Cancer and Cellular Biology, Lewis Katz School of Medicine; PhD, University of Paris.

*Tricia Helen Burdo*, Professor, Department of Center for Neurovirology and Gene Editing, Lewis Katz School of Medicine; PhD, Penn State College of Medicine.

*Bettina A. Buttaro*, Associate Professor, Department of Biomedical Education and Data Science, Lewis Katz School of Medicine; PhD, University of Minnesota.

*Marion M. Chan*, Associate Professor, Department of Biomedical Education and Data Science, Lewis Katz School of Medicine; PhD, Cornell University Medical College.

*Parkson Lee-Gau Chong*, Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, University of Illinois at Urbana-Champaign.

*Judith Daniels*, Associate Professor, Department of Biomedical Education and Data Science, Lewis Katz School of Medicine; PhD, University of North Carolina at Chapel Hill.

*Satoru Eguchi*, Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; MD, Tohoku University School of Medicine, PhD, Tokyo Medical and Dental University.

*Toby K. Eisenstein*, Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, Bryn Mawr College.

*John Elrod*, Associate Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; PhD, Albert Einstein College of Medicine.

*Nora Engel*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, University of Buenos Aires.

*Concepcion Estaras*, Assistant Professor, Department of Center for Translational Medicine, Lewis Katz School of Medicine; PhD, University of Barcelona.

*Arthur Feldman*, Laura H. Carnell Professor, Department of Cardiovascular Sciences, Lewis Katz School of Medicine; MD, PHD, Louisiana State University.

*Silvia Fossati*, Associate Professor, Department of Alzheimer's Center at Temple, Lewis Katz School of Medicine; PhD, University of Florence.

*Gianluca Gallo*, Professor, Department of Neural Sciences, Lewis Katz School of Medicine; PhD, University of Illinois.

*Ana Gamero*, Associate Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, University of South Florida.

*Glenn Stephen Gerhard*, Professor and the Joseph and Rebecca Goodfriend Endowed Chair in Genetics, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; MD, The Pennsylvania State University.

*Kathleen M. Giangiacomo*, Associate Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, University of Pennsylvania.

*Xavier Graña-Amat*, Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, University of Barcelona.

*Dale S. Haines*, Associate Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, Hahnemann University.

*Wen-Zhe Ho*, Professor, Department of Pathology and Laboratory Medicine, Lewis Katz School of Medicine; MD, Wuhan University School of Medicine.

*Steven R. Houser*, Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; PhD, Temple University.

*Wenhui Hu*, Professor, Department of Center for Metabolic Disease Research, Lewis Katz School of Medicine; MD, PhD, Peking Union Medical College and Chinese Academy of Medical Science.

*Christian Hurtz*, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, Albert-Ludwigs-Universität Freiburg im Breisgau.

*Liselotte Jensen*, Associate Professor, Department of Center for Inflammation and Lung Research, Lewis Katz School of Medicine; PhD, University of Aarhus.

*Shin Hyeok Kang*, Assistant Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; PhD, Johns Hopkins University School of Medicine.

*Sergey Karakashev*, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD.

*Kamel Khalili*, Laura H. Carnell Professor, Department of Center for Neurovirology and Gene Editing, Lewis Katz School of Medicine; PhD, University of Pennsylvania School of Medicine.

*Mohsin Khan*, Assistant Professor, Department of Cardiovascular Sciences, Lewis Katz School of Medicine; PhD, University of the Punjab.

*Laurie Kilpatrick*, Professor, Department of Center for Inflammation and Lung Research, Lewis Katz School of Medicine; PhD, University of Pennsylvania.

*Seonhee Kim*, Associate Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; PhD, Rutgers University.

*Lynn Kirby*, Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, University of Pennsylvania.

*Raj Kishore*, Professor, Department of Center for Translational Medicine, Lewis Katz School of Medicine; PhD, Lucknow University.

*Walter J. Koch*, Professor and the William Wikoff Smith Endowed Chair in Cardiovascular Medicine, Department of Center for Translational Medicine, Lewis Katz School of Medicine; PhD, University of Cincinnati College of Medicine.

*Beata Kosmider*, Professor, Department of Center for Inflammation and Lung Research, Lewis Katz School of Medicine; PhD, University of Lodz.

*Barbara Krynska*, Research Associate Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; PhD, Medical University of Silesia.

*Satya P. Kunapuli*, Professor, Department of Sol Sherry Thrombosis Research Center, Lewis Katz School of Medicine; PhD, Indian Institute of Science.

*T. Dianne Langford*, Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, University of Alabama.

*Shuxin Li*, Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; MD, PhD, Henan Medical University.

*Dan A. Liebermann*, Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, Weizmann Institute.

*Xiaolei Liu*, Assistant Professor, Department of Lemole Center for Integrated Lymphatics Research, Lewis Katz School of Medicine; PhD, University of Oklahoma Health Sciences Center.

*Lee-Yuan Liu-Chen*, Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, Massachusetts Institute of Technology.

*Victor Luna*, Assistant Professor, Department of Alzheimer's Center at Temple, Lewis Katz School of Medicine; PhD.

*Grace X. Ma*, Laura H. Carnell Professor, Department of Center for Asian Health, Lewis Katz School of Medicine; PhD, University of Oklahoma.

*Sadia Mohsin*, Assistant Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; PhD, University of the Punjab.

*Marc Monestier*, Professor, Department of Biomedical Education and Data Science, Lewis Katz School of Medicine; MD, PhD, University of Lyon.

*Henry P. Parkman*, Professor, Department of Medicine, Lewis Katz School of Medicine; MD, Case Western Reserve University.

*Helen E. Pearson*, Associate Professor, Department of Biomedical Education and Data Science, Lewis Katz School of Medicine; PhD, Medical College of Pennsylvania.

*Yuri Persidsky*, Professor, Department of Pathology and Laboratory Medicine, Lewis Katz School of Medicine; MD, PhD, Kiev State Medical Institute.

*Steven N. Popoff*, Professor and the John Franklin Huber Chair, Department of Biomedical Education and Data Science, Lewis Katz School of Medicine; PhD, Loyola University.

*Swayam Prabha*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, University of Nebraska Medical Center.

*Domenico Praticò*, Professor and the Scott Richards North Star Charitable Foundation Chair for Alzheimer's Research, Department of Alzheimer's Center at Temple, Lewis Katz School of Medicine; MD, University of Roma, La Sapienza Medical School.

*Servio Ramirez*, Professor, Department of Pathology and Laboratory Medicine, Lewis Katz School of Medicine; PhD, University of Rochester School of Medicine and Dentistry.

*A. Koneti Rao*, Sol Sherry Professor, Department of Pathology and Laboratory Medicine, Lewis Katz School of Medicine; MBBS, All India Institute of Medical Sciences.

*Scott M. Rawls*, Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, East Carolina University School of Medicine.

*Victor Rizzo*, Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; PhD, University of Medicine and Dentistry of New Jersey, New Jersey Medical School.

*Thomas J. Rogers*, Professor, Department of Center for Inflammation and Lung Research, Lewis Katz School of Medicine; PhD, University of Wisconsin-Madison.

*Slava Rom*, Assistant Professor, Department of Pathology and Laboratory Medicine, Lewis Katz School of Medicine; PhD, Ben-Gurion University of the Negev.

*Brad S. Rothberg*, Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, University of Florida.

*Abdelkarim Sabri*, Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; PhD, Rene Descartes University.

*Mahmut Safak*, Associate Professor, Department of Center for Neurovirology and Gene Editing, Lewis Katz School of Medicine; PhD, Thomas Jefferson University.

*Umadevi Sajjan*, Associate Professor, Department of Center for Inflammation and Lung Research, Lewis Katz School of Medicine; PhD, University of Mysore.

*Carmen Sapienza*, Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, Dalhousie University.

*Ilker K. Sariyer*, Research Associate Professor, Department of Center for Neurovirology and Gene Editing, Lewis Katz School of Medicine; PhD, DVM, Temple University.

*Bassel E. Sawaya*, Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, Rene Descartes University.

*Rosario Scalia*, Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; MD, PhD, University of Catania.

*Michael Selzer*, Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; MD, PhD, New York University.

*Scott K. Shore*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, Drexel University.

*Stephanie E. Sullivan*, Assistant Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, Vanderbilt University.

*Jillian Simon*, Assistant Professor, Department of Cardiovascular Sciences, Lewis Katz School of Medicine; PhD, University of Illinois at Chicago.

*Tomasz Skorski*, Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; MD, PhD, DSc, Medical Academy of Warsaw.

*George Smith*, Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; PhD, Case Western Reserve University.

*Nathaniel W. Snyder*, Associate Professor, Department of Center for Metabolic Disease Research, Lewis Katz School of Medicine; PhD, University of Pennsylvania.

*Jonathan Soboloff*, Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, University of Ottawa.

*Young-Jin Son*, Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; PhD, University of Texas at Austin.

*Dianne R. Soprano*, Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, Rutgers University.

*Vincent Tam*, Assistant Professor, Department of Microbiology, Immunology and Inflammation, Lewis Katz School of Medicine; PhD, Harvard Medical School.

*Gareth Thomas*, Associate Professor, Department of Shriners Hospitals Pediatric Research Center, Lewis Katz School of Medicine; PhD, Dundee University.

*Ying Tian*, Associate Professor, Department of Center for Translational Medicine, Lewis Katz School of Medicine; PhD, Temple University.

*Douglas Tilley*, Professor, Department of Center for Translational Medicine, Lewis Katz School of Medicine; PhD, Queen's University.

*Pedro Torres-Ayuso*, Assistant Professor, Department of Cancer and Cellular Biology, Lewis Katz School of Medicine; PhD, Autonomous University of Madrid.

*Alexander Y. Tsygankov*, Associate Professor, Department of Sol Sherry Thrombosis Research Center, Lewis Katz School of Medicine; PhD, Bach Institute of Biochemistry, Moscow.

*Ronald F. Tuma*, George H. Stewart Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, Temple University.

*Çagla Tükel*, Associate Professor, Department of Center for Microbiology and Immunology, Lewis Katz School of Medicine; PhD, Ankara University.

*Ellen M. Unterwald*, Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, Boston University School of Medicine.

*Hong Wang*, Laura H. Carnell Professor, Department of Center for Metabolic Disease Research, Lewis Katz School of Medicine; MD, PhD, University of Montreal.

*Sara Jane Ward*, Assistant Professor, Department of Center for Substance Abuse Research, Lewis Katz School of Medicine; PhD, Wake Forest University.

*Kelly A. Whelan*, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, Drexel University.

*Marla R. Wolfson*, Professor, Department of Center for Translational Medicine, Lewis Katz School of Medicine; PhD, Temple University.

*Hassen S. Wollebo*, Assistant Professor, Department of Center for Neurovirology and Gene Editing, Lewis Katz School of Medicine; PhD, Humboldt University.

*Sheng Wu*, Associate Professor, Department of Center for Metabolic Disease Research, Lewis Katz School of Medicine; PhD, University of Victoria.

*Ling Yang*, Assistant Professor, Department of Medical Genetics and Molecular Biochemistry, Lewis Katz School of Medicine; PhD, Chinese Academy of Sciences.

*Xiao-Feng Yang*, Professor, Department of Cardiovascular Research Center, Lewis Katz School of Medicine; MD, PhD, University of Montreal.

*Jun Yu*, Associate Professor, Department of Center for Metabolic Disease Research, Lewis Katz School of Medicine; MD, Yale University School of Medicine.

*M. Raza Zaidi*, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine, Lewis Katz School of Medicine; PhD, Rutgers University, Robert Wood Johnson Medical School.

## Biomedical Sciences MS

LEWIS KATZ SCHOOL OF MEDICINE

### About the Program

The MS program is aimed at broad interdisciplinary training in the major areas of Biomedical Sciences. The goal is to train students in the theory and practice of Biomedical Sciences for eventual service in research and teaching. Students are instructed in diverse laboratory techniques through a series of lecture and laboratory courses.

Under the guidance of a faculty member, thesis students are provided with a program of experimental research. Two options are available:

- Thesis Track, with a transcribed concentration in the area of thesis research. Five areas of concentration or clusters are available: Cancer Biology and Genetics, Infectious Disease and Immunity, Molecular and Cellular Biosciences, Neuroscience, and Organ Systems and Translational Medicine. Students complete and defend a master's thesis under the supervision of a faculty member.
- Non-Thesis Track, which is in General Biomedical Sciences. Students complete didactic coursework in each of the five cluster areas.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Health Sciences Center. With the permission of the student's Advisory Committee, elective courses not offered at HSC may be taken at other campuses.

**Full-Time/Part-Time Status:** The MS degree program is designed as a full-time day program of study to be completed in 20 to 24 months.

**Interdisciplinary Study:** The graduate program in Biomedical Sciences is interdisciplinary and emphasizes translational research. Students have the opportunity to work with faculty in disease-based research centers in the Lewis Katz School of Medicine, including the Center for Inflammation and Lung Research; Center for Metabolic Disease Research; Center for Neurovirology and Gene Editing; Center for Substance Abuse Research; Center for Translational Medicine; Comprehensive NeuroAIDS Center; Fels Cancer Institute for Personalized Medicine; Independence Blue Cross Cardiovascular Research Center; Shriners Hospitals Pediatric Research Center; Sol Sherry Thrombosis Research Center; and Temple Autoimmunity Center.

**Ranking:** In 2023, *U.S. News & World Report* ranked the Lewis Katz School of Medicine at Temple University number 68 in Research and among the Best Medical Schools.

**Areas of Specialization:** This interdisciplinary Biomedical Sciences graduate program offers five areas of concentration for students who plan to earn the MS with a thesis:

- Cancer Biology and Genetics
- Infectious Disease and Immunity
- Molecular and Cellular Biosciences
- Neuroscience
- Organ Systems and Translational Medicine

**Job Prospects:** This well-balanced program has been designed to be individually tailored to meet the interests and needs of each student and to fully prepare each student for a Biomedical Sciences career in academia, industry and government. The graduate program is designed to provide training in the theory and practice of Biomedical Sciences for eventual placement in research and teaching positions.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in some courses with permission from the course instructor and approval from the Office of Graduate Studies at the Lewis Katz School of Medicine.

**Financing Opportunities:** Students may visit the Student Financial Services website for financial aid information.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: February 15

All applicants to the MS program must apply via BioMedical's Centralized Application Service (BioMedCAS). The system can be accessed at <https://biomedcas2024.liaisoncas.com/applicant-ux/#/login>. Applicants should check their application status on the BioMedCAS portal often and inquire directly of BioMedCAS about receipt of materials.

A supplemental application is also required to be submitted directly to Temple University. Submission of the supplemental application generates the applicant's TUID number. The BioMedCAS application will not be considered without the assigned TUID.

### Letters of Reference:

Number Required: 3

*From Whom:* Letters of recommendation should be obtained from faculty and supervisors of research experiences.

**Coursework Required for Admission Consideration:** Applicants should have undergraduate training in the life sciences such as Biochemistry, Biology, Cell Biology, or Molecular Biology and Genetics. Students are also expected to have training in Chemistry and Mathematics.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in the Biological or Chemical Sciences is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's Biomedical Sciences graduate program, research interests and past experience, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Optional. Students are not required to submit standardized scores, including GRE or MCAT scores, to supplement their application.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the MS program in Biomedical Sciences. The completed courses must be equivalent in content to coursework offered at Temple, and the grades earned must be a "B" or better in order to transfer credits. The Associate Dean reviews the syllabus from the completed course(s) to determine equivalency and makes the recommendation to accept the credits for transfer.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 30 Thesis Track or 36 Non-Thesis Track

Required Courses:

## Thesis Track

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
BMSC 8101	Molecules to Cells	6
BMSC 8102	Experimental Design and Biostatistics	1
BMSC 8103	Scientific Integrity and Bioethics	1
BMSC 8201	Organ Systems: Function, Dysfunction and Therapeutics	4
BMSC 8202	Scientific Communications	1
BMSC 8203	Introduction to Bioinformatic Tools and Applications	1
Concentration-Specific Student Seminar and Journal Club (2 terms) <sup>2</sup>		2
<b>Basic Elective</b>		
Select one from the following:		2
BMSC 8205	Cell Structure & Function	
BMSC 8206	Molecular, Cellular and Systems Signal Transduction	
BMSC 8207	Molecular Approaches to Research	
<b>Concentration-Specific Advanced Electives</b> <sup>3</sup>		4
<b>Research Courses</b>		
BMSC 9991	Biomedical Science Research	1
BMSC 9996	Master's Thesis	7
<b>Total Credit Hours</b>		<b>30</b>

1

All students in the Biomedical Sciences program participate in a common first-year interdisciplinary experience that includes the core courses identified.

2

To complete this requirement, students select the course from the following that aligns with their area of concentration: BMSC 8500 Cancer Biology and Genetics Student Seminar and Journal Club, BMSC 8600 Infectious Disease and Immunity Student Seminar and Journal Club, BMSC 8700 Molecular and Cellular Biosciences Student Seminar and Journal Club, BMSC 8800 Neuroscience Student Seminar and Journal Club, or BMSC 8900 Organ Systems and Translational Medicine Student Seminar and Journal Club.

3

Students select approved courses identified in the grid below for their area of concentration. One basic elective not taken to complete the "Basic Elective" requirement may be substituted for an advanced elective to fulfill this requirement.

## Approved Advanced Electives by Area of Concentration

Code	Title	Credit Hours
<b>Cancer Biology and Genetics</b>		
BMSC 8502	Cancer Biology	
BMSC 8503	Genetics and Epigenetics	
<b>Infectious Disease and Immunity</b>		
BMSC 8602	The Biology of the Immune Response	

BMSC 8603	Molecular Genetics of Human Viruses
BMSC 8604	Cellular and Molecular Basis of Host-Microbe Interactions

### Molecular and Cellular Biosciences

BMSC 8703	RNA and its Role in Gene Expression
BMSC 8704	Molecular Physiology of Ion Signaling
BMSC 8706	Structure and Dynamics of Biomolecules and Assemblies

### Neuroscience

BMSC 8802	Essentials of Neuroscience <sup>1</sup>
BMSC 8803	Molecular and Cellular Neuroscience
BMSC 8804	Neuropharmacology
BMSC 8805	Pharmacology of Drugs of Abuse
BMSC 8806	Translational Science of Nervous System Diseases

### Organ Systems and Translational Medicine

BMSC 8902	Mechanisms of Cardiovascular Pathophysiology
BMSC 8903	Hemostasis and Thrombosis
BMSC 8904	Translational Pulmonary Physiology - Experimental Basis
BMSC 8905	Advanced Pharmacology and Translational Medicine
BMSC 8906	Development, Function and Diseases of the Musculoskeletal System
BMSC 8907	Organ Metabolism - Molecular Pathology and Experimental Models

1

Students who select Neuroscience as their concentration are required to complete BMSC 8802 as one of their advanced electives.

## Non-Thesis Coursework Track

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
BMSC 8101	Molecules to Cells	6
BMSC 8102	Experimental Design and Biostatistics	1
BMSC 8103	Scientific Integrity and Bioethics	1
BMSC 8104	Introduction to Laboratory Research I	1
BMSC 8201	Organ Systems: Function, Dysfunction and Therapeutics	4
BMSC 8202	Scientific Communications	1
BMSC 8203	Introduction to Bioinformatic Tools and Applications	1
BMSC 8204	Introduction to Laboratory Research II	1
Student Seminar and Journal Club (2 terms) <sup>2</sup>		2
<b>Basic Elective</b>		
Select one from the following:		2
BMSC 8205	Cell Structure & Function	
BMSC 8206	Molecular, Cellular and Systems Signal Transduction	
BMSC 8207	Molecular Approaches to Research	
<b>Advanced Electives</b> <sup>3</sup>		<b>16</b>
<b>Total Credit Hours</b>		<b>36</b>

1

All students in the Biomedical Sciences program participate in a common first-year interdisciplinary experience that includes the core courses identified.

2

To complete this requirement, students select from BMSC 8500 Cancer Biology and Genetics Student Seminar and Journal Club, BMSC 8600 Infectious Disease and Immunity Student Seminar and Journal Club, BMSC 8700 Molecular and Cellular Biosciences Student Seminar and Journal Club, BMSC 8800 Neuroscience Student Seminar and Journal Club, or BMSC 8900 Organ Systems and Translational Medicine Student Seminar and Journal Club.

3

Students fulfill this requirement by selecting approved courses identified in the grid above. At least one course must be taken in each of the five areas of concentration: Cancer Biology and Genetics, Infectious Disease and Immunity, Molecular and Cellular Biosciences, Neuroscience, and Organ Systems and Translational Medicine. Basic electives not taken to complete the "Basic Elective" requirement may be substituted for advanced electives to fulfill this requirement.

## Non-Thesis Project Track

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
BMSC 8101	Molecules to Cells	6
BMSC 8102	Experimental Design and Biostatistics	1
BMSC 8103	Scientific Integrity and Bioethics	1
BMSC 8104	Introduction to Laboratory Research I	1
BMSC 8201	Organ Systems: Function, Dysfunction and Therapeutics	4
BMSC 8202	Scientific Communications	1
BMSC 8203	Introduction to Bioinformatic Tools and Applications	1
Student Seminar and Journal Club (2 terms) <sup>2</sup>		2
<b>Basic Elective</b>		
Select one from the following:		2
BMSC 8205	Cell Structure & Function	
BMSC 8206	Molecular, Cellular and Systems Signal Transduction	
BMSC 8207	Molecular Approaches to Research	
<b>Advanced Electives</b> <sup>3</sup>		<b>12</b>
<b>Research Course</b>		
BMSC 9995	Master's Project (2 terms) <sup>4</sup>	5
<b>Total Credit Hours</b>		<b>36</b>

1

All students in the Biomedical Sciences program participate in a common first-year interdisciplinary experience that includes the core courses identified.

2

To complete this requirement, students select from BMSC 8500 Cancer Biology and Genetics Student Seminar and Journal Club, BMSC 8600 Infectious Disease and Immunity Student Seminar and Journal Club, BMSC 8700 Molecular and Cellular Biosciences Student Seminar and Journal Club, BMSC 8800 Neuroscience Student Seminar and Journal Club, or BMSC 8900 Organ Systems and Translational Medicine Student Seminar and Journal Club.

3

Students fulfill this requirement by selecting approved courses identified in the grid above. At least one course must be taken in each of the five areas of concentration: Cancer Biology and Genetics, Infectious Disease and Immunity, Molecular and Cellular Biosciences, Neuroscience, and Organ Systems and Translational Medicine.

4

This course is taken under the direction of a faculty mentor. All BMSC 9995 credits must be earned under the direction of the same faculty mentor.

### Culminating Event:

#### Thesis:

For the [Thesis Track](#), the thesis must be based on an original research project. It should demonstrate the student's familiarity with laboratory techniques related to the research project and the ability to evaluate critically the literature in the student's chosen area. The student submits the thesis in complete form not less than 14 days prior to the date of the final examination. The thesis must have been read and approved by the thesis advisor prior to distribution. The student should confirm a time and date for the thesis defense with the Final Examination Committee.

The final examination consists of a defense of the student's thesis to demonstrate competence within the field of the thesis and closely related areas. The student's Advisory Committee votes to pass or fail the thesis and the defense at the conclusion of the presentation. If the student must make revisions, those changes must be approved as arranged by the Committee.

Note that the [Non-Thesis Track](#) has no culminating event except for successful completion of coursework. Students may elect to gain research experience within a laboratory.

## Biomedical Sciences PhD

LEWIS KATZ SCHOOL OF MEDICINE

### About the Program

The PhD program is aimed at broad interdisciplinary and translational training in Biomedical Sciences and provides in-depth training in one of five areas of concentration. All students participate in an interdisciplinary first-year experience and then select an area of concentration from among Cancer Biology and Genetics, Infectious Disease and Immunity, Molecular and Cellular Biosciences, Neuroscience, and Organ Systems and Translational Medicine. The curriculum provides students with an interdisciplinary approach to research training, offering new pathways for learning and discovery. The PhD program is intended to educate premier biomedical scientists who will be tomorrow's leaders in research, education and government.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Health Sciences Center. With the permission of the student's Research Advisory Committee, elective courses not offered at HSC may be taken at other campuses.

**Full-Time/Part-Time Status:** The PhD degree program is designed as a full-time day program of study.

**Interdisciplinary Study:** The graduate program in Biomedical Sciences is interdisciplinary and emphasizes translational research. Students have the opportunity to work with faculty in disease-based research centers at the Lewis Katz School of Medicine, including the Center for Inflammation and Lung Research; Center for Metabolic Disease Research; Center for Neurovirology and Gene Editing; Center for Substance Abuse Research; Center for Translational Medicine; Comprehensive NeuroAIDS Center; Fels Cancer Institute for Personalized Medicine; Independence Blue Cross Cardiovascular Research Center; Shriners Hospitals Pediatric Research Center; Sol Sherry Thrombosis Research Center; and Temple Autoimmunity Center.

**Ranking:** In 2023, *U.S. News & World Report* ranked the Lewis Katz School of Medicine at Temple University number 68 in Research and among the Best Medical Schools.

**Areas of Specialization:** This interdisciplinary Biomedical Sciences graduate program offers five areas of concentration for students who plan to earn the PhD:

- Cancer Biology and Genetics
- Infectious Disease and Immunity
- Molecular and Cellular Biosciences
- Neuroscience
- Organ Systems and Translational Medicine

**Job Prospects:** This well-balanced program has been designed to be individually tailored to meet the interests and needs of each student and to fully prepare each student for a Biomedical Sciences career in academia, industry and government. The graduate program is designed to provide training in the theory and practice of Biomedical Sciences for eventual placement in research and teaching positions.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in some courses with permission from the course instructor and approval from the Office of Graduate Studies at the Lewis Katz School of Medicine.

**Financing Opportunities:** All students are provided with a competitive stipend, health insurance and tuition remission. First-year students are supported by Medical School fellowships. After the first year, students receive financial support from extramural funds available to their research mentor, including training grants, research assistantships and fellowships. Students are expected to work full-time toward the completion of the degree requirements. A satisfactory level of performance must be maintained at all times.

Exceptionally qualified students who apply to the program may be nominated for Presidential and University Fellowships. In order to be considered for nomination, prospective students must submit all application materials by February 15.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 15

All applicants to the PhD program must apply via BioMedical's Centralized Application Service (BioMedCAS). The system can be accessed at <https://biomedcas2024.liaisoncas.com/applicant-ux/#/login>. Applicants should check their application status on the BioMedCAS portal often and inquire directly of BioMedCAS about receipt of materials.

A supplemental application is also required to be submitted directly to Temple University. Submission of the supplemental application generates the applicant's TUID number. The BioMedCAS application will not be considered without the assigned TUID.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from faculty and supervisors of research experiences.

**Coursework Required for Admission Consideration:** Applicants should have undergraduate training in the life sciences such as Biochemistry, Biology, Cell Biology, or Molecular Biology and Genetics. Students are also expected to have training in Chemistry and Mathematics.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in the Biological or Chemical Sciences is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's Biomedical Sciences graduate program, research interests and past experiences, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Optional. Students are not required to submit standardized scores, including GRE or MCAT scores, to supplement their application.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Advanced Standing:** Students who enter the PhD program in Biomedical Sciences may be considered for advanced standing, based on the successful completion of graduate-level courses in the Biological Sciences or Chemistry. The completed courses must be equivalent in content to coursework offered at Temple, and the grades earned must be a "B" or better in order to transfer credits. The Associate Dean reviews the syllabus from the completed course(s) to determine equivalency and makes the recommendation to accept the credits for Advanced Standing.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 37

### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
BMSC 8101	Molecules to Cells	6
BMSC 8102	Experimental Design and Biostatistics	1
BMSC 8103	Scientific Integrity and Bioethics	1
BMSC 8104	Introduction to Laboratory Research I	1
BMSC 8201	Organ Systems: Function, Dysfunction and Therapeutics	4
BMSC 8202	Scientific Communications	1
BMSC 8203	Introduction to Bioinformatic Tools and Applications	1
BMSC 8204	Introduction to Laboratory Research II	1
BMSC 8401	Scientific Grant Writing	1
Student Seminar and Journal Club (1 per year) <sup>2</sup>		4
<b>Basic and Advanced Concentration-Specific Electives</b>		<b>10</b>
<b>Research Courses</b> <sup>3</sup>		
BMSC 9994	Preliminary Exam Preparation	
BMSC 9998	Postcandidacy Research	
BMSC 9999	Dissertation Writing	
<b>Total Credit Hours</b>		<b>37</b>

1

All students in the Biomedical Sciences program participate in a common first-year interdisciplinary experience that includes the core courses identified.

2

To complete this requirement, students select from BMSC 8500 Cancer Biology and Genetics Student Seminar and Journal Club, BMSC 8600 Infectious Disease and Immunity Student Seminar and Journal Club, BMSC 8700 Molecular and Cellular Biosciences Student Seminar and Journal Club, BMSC 8800 Neuroscience Student Seminar and Journal Club, or BMSC 8900 Organ Systems and Translational Medicine Student Seminar and Journal Club. Students register one time a year in the Spring term. Registration begins in their second year and then continuously throughout their matriculation. Students must complete a minimum of 3 credits before defending their dissertation. Students who fulfill the BMSC-PHD requirements prior to the Spring semester of their fifth year take an additional credit of BMSC 9999 in the term they defend their dissertation to fulfill the PhD credit requirement.

3

Students must take at least 6 credits of BMSC 9994, BMSC 9998, and/or BMSC 9999, with a minimum of 2 credits of BMSC 9999 taken after elevation to PhD candidacy to defend their dissertation. Students who have fulfilled the BMSC-PHD requirements prior to the Spring term of their fifth year take 7 credits of BMSC 9994, BMSC 9998, and/or BMSC 9999, with at least 3 credits of BMSC 9999 taken after elevation to PhD candidacy to defend their dissertation.

#### **Additional Requirements:**

##### *Laboratory Research:*

In the first year, students complete three laboratory rotations. In subsequent years, they participate in seminars and journal clubs in addition to performing research in the laboratory of their choice.

##### *Research Advisory Committee Meetings:*

Students are required to meet with their Research Advisory Committee each term to evaluate their progress toward the degree.

##### *Publications:*

Students must have sufficient data for at least one full-length, high-quality, first-author publication, excluding review articles, before receiving permission to write the dissertation. If a manuscript has not been accepted for publication at the time a student requests permission to write the dissertation, the student must present a submission-ready manuscript and evidence that the manuscript has been submitted for publication. The evidence is to include the name of the journal and acknowledgement of receipt of the manuscript from the journal.

##### *Outside Research Proposal:*

In the Spring term of the second year of study, students are required to prepare and defend an NIH-style grant proposal in their area of concentration on a topic that is distinct from the student's research. This is a requirement for elevation to candidacy.

#### **Culminating Events:**

##### *Dissertation Proposal:*

The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should describe the context and background surrounding a particular research problem and a methodological plan for investigating the problem. The proposal is a requirement for admission to candidacy and should be submitted and approved during the Fall term of the third year in the program.

##### *Dissertation:*

The PhD in Biomedical Sciences is a research degree. Research training begins with three research rotations in the first year of the graduate program and continues with the selection of an area of concentration and a Dissertation Research Advisor, who is a member of the Graduate Faculty from within the selected area of concentration. The areas of concentration include Cancer Biology and Genetics, Infectious Disease and Immunity, Molecular and Cellular Biosciences, Neuroscience, and Organ Systems and Translational Medicine.

Under the direction of the Dissertation Research Advisor, the student develops an original research project. Dissertation research involves meaningful, critical thinking and the execution of ideas in the laboratory through the use of the scientific method. Dissertation research conducted by the student should be an original contribution to scientific knowledge. The quality of the student's PhD dissertation research should be equivalent to that found in reputable biomedical sciences journals.

Upon selection of an area of concentration and a Dissertation Research Advisor, a Research Advisory Committee is formed for each student. This Committee is responsible for the review of the student's research and academic progress twice yearly. It determines whether the content of the student's research is sufficient for the PhD dissertation.

The student submits the dissertation in complete form not less than 14 days prior to the date of the final examination. The dissertation must have been read and approved by the Dissertation Research Advisor prior to distribution. After the student has arranged the time, date and room for the dissertation defense, the "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," is completed and forwarded to the Graduate School on Main Campus and to the Office of Graduate Studies on the Health Sciences Center Campus at least 10 working days before the defense. Announcements of the defense are posted and emailed to all members of the cluster/area of concentration.

The Final Examination Committee evaluates the student's dissertation and demonstration of competence within the field of the dissertation and related areas. This Committee consists of five faculty members, including the Dissertation Research Advisor, Research Advisory Committee, and one additional faculty member from another cluster. The Committee evaluates the quality of the dissertation research and the student's ability to express, both in writing and orally, their research question, methodological approach, primary findings and implications. The Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation and private question/answer period.

## Medicine MD

LEWIS KATZ SCHOOL OF MEDICINE

## About the Program

Each year, the Lewis Katz School of Medicine at Temple University (LKSOM) welcomes a diverse class of students who have achieved academic excellence and demonstrated a commitment to serving others. Temple is renowned for its culture of service. We place particular emphasis on attracting future physicians who will provide care for underserved populations. Through their commitment to fulfilling the medical needs of our North Philadelphia neighbors and surrounding communities, our faculty pass on this tradition to our students.

LKSOM is dedicated to excellence in education, research and patient care, achieved by faculty, staff and learners who represent and serve our diverse society. The school provides:

- education that is patient-centered, instilling in learners the school's ethic of human service and lifelong learning;
- research that advances and integrates basic and clinical science; and
- patient care that is administered with compassion and understanding, utilizing contemporary knowledge and techniques.

LKSOM confers the Doctor of Medicine degree as well as offers the following dual degree programs: MD/PhD, MD/MA in Urban Bioethics, MD/MPH and MD/MBA.

The MD curriculum is a four-year program that is divided into two phases: pre-clerkship and clerkship. Our commitment is to train students to provide outstanding quality patient care and to conduct medical research with the utmost in professionalism.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Health Sciences Center of Temple University in Philadelphia, PA and St. Luke's University Health Network Regional Campus in Bethlehem, PA

**Full-Time/Part-Time Status:** The MD program must be completed on a full-time basis.

**Ranking:** In 2023, *U.S. News & World Report* ranked the Lewis Katz School of Medicine at Temple University number 68 in Research and among the Best Medical Schools.

**Job Prospects:** Graduates of the MD program typically continue their training in Accreditation Council for Graduate Medical Education (ACGME) accredited residencies and fellowships in all disciplines of medicine throughout the United States. Following residency, graduates enter careers in academic medicine, private practice, research and industry.

**Non-Matriculated Student Policy:** All students must be full-time matriculants.

**Financing Opportunities:** Financial support opportunities include scholarships, loans and federal work study.

## Admission Requirements and Deadlines

### Application Deadline:

*AMCAS® Application:* December 15

*Transcript submission to AMCAS®:* December 29

*Supplemental materials, including fee and letters:* January 15

Candidates apply through the American Medical College Application Service® (AMCAS®). The application deadline is December 15 of the year preceding matriculation. Temple considers applications from U.S. citizens or those with permanent resident or refugee/asylee status with the United States Citizenship and Immigration Services (USCIS).

When Temple has received a verified application from AMCAS®, candidates are sent an email with details for access to the online LKSOM supplemental application. Applications are considered complete when a supplemental application, supplemental fee and required letters of recommendation are received.

The supplemental application is used to help identify the applicant's unique interest in Lewis Katz School of Medicine at Temple University. A \$90 non-refundable application fee is collected online when you submit your LKSOM supplemental application. The supplemental application fee is waived for candidates who were approved for the Association of American Medical Colleges (AAMC) Fee Assistance Program (FAP) prior to submitting an AMCAS® application.

**Letters of Reference:** LKSOM considers letters of recommendation from a premedical committee, a packet from a school letter compilation service, or three individual letters:

- Premedical committee letters do not need a specific number of science/non-science letters.
- If submitting a compilation packet or individual letters, we prefer, but do not require, two letters from professors with whom you completed coursework from the AMCAS® course classification of Biology, Chemistry or Physics. One additional letter is required from a non-science professor regarding work experience or service activity.
- LKSOM welcomes letters from research experiences but prefers they be included in addition to the requested science letters from professors with whom you completed coursework.

LKSOM participates in the AMCAS® Letter Service. Letters can be sent to AMCAS® through the AMCAS® Letter Writer Application or Interfolio. All letters should be on letterhead and contain the letter writer's signature.

If LKSOM is designated as a recipient of the letter on the AMCAS® application, AMCAS® will release the electronic copy to LKSOM. All letters designated for LKSOM must be received for your application to undergo review.

At any point in the application process, applicants may submit additional letters to support their application and are encouraged to use the AMCAS® Letter Service to transmit those letters.

**Coursework Required for Admission Consideration:** Applicants should demonstrate preparation for the rigors of medical school and competency in the sciences achieved through a broad range of science coursework and the MCAT® exam. While there are no absolute course requirements, it is recommended that students complete coursework in Biochemistry, Biology, Chemistry (both general and organic), Physics, Psychology and Sociology. The Office of Admissions will only evaluate courses completed at a U.S. or Canadian college/university.

If recommended coursework in Biology, Chemistry or Physics is completed using AP credits, online, at a community college or through a study abroad program, we prefer to see classroom-based, upper-level science coursework in that discipline.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required. Students who matriculate through the Temple University Accelerated Health Scholars program will earn their bachelor's degree after the first year of medical school.

LKSOM prefers a minimum of 90 semester hours from a U.S. or Canadian college/university. Coursework should be directed to the needs of premedical students. Courses designed for non-science majors or allied health students are not accepted.

Although the Admissions Committee holds no preference for science majors, all applicants, whether science majors or not, must demonstrate capacity for excellence in the sciences. In addition, students should have a broad humanities education and strong writing skills.

**Statement of Goals:** Applicants must submit a personal statement with their application.

**Standardized Test Scores:**

MCAT®: Required. Every applicant must take the Medical College Admission Test (MCAT®) of the Association of American Medical Colleges within three years of matriculation, and no later than September of the year in which the candidate applies. Applications are considered with the most recent MCAT® results, both sections and total. No minimum score is required for application.

Casper: All applicants to the MD program are required to complete an online assessment to assist with our selection process. Casper is an online, video-scenario test that assesses for non-cognitive skills and interpersonal characteristics that we believe are important for success in our program and complements the other tools that we use for applicant selection. Applicants can register for the U.S. Medicine test (CSP-10111) at <https://acuityinsights.app/>. Casper test results are valid for one admissions cycle.

## Program Requirements

### General Program Requirements:

#### Required Courses:

Code	Title	Credit Hours
<b>Year 1</b>		
MEDS M101	Fundamentals of Anatomy	0
MEDS M102	Fundamentals of Medicine 1	0
MEDS M103	Biological Systems I: Cardiovascular, Blood, Respiratory and Renal Systems	0
MEDS M104	Biological Systems II: Gastrointestinal, Endocrine, Bone and Reproductive Systems	0
MEDS M105	Biological Systems III: Nervous and Musculoskeletal Systems	0
MEDS M106	Biological Systems IV: Inflammation, Immune System and Skin	0
MEDS M107	Doctoring 1	0
<b>Year 2</b>		
MEDS M210	Diseases of Renal/Endo/Repro	0
MEDS M212	Microbiology/Inf. Dis.	0
MEDS M214	Diseases of Cardio/Resp	0
MEDS M217	Doctoring 2	0
MEDS M222	Diseases IV: GI/Hem-Onc/MS	0
MEDS M224	Diseases III: CNS	0
<b>Year 3</b>		
Third-Year Preparation		
FAMP M360	Family Medicine	0
INTM M301	Medicine	0
NEUR M370	Neurology	0
OBGY M320	Obstetrics/Gynecology	0
PEDI M330	Pediatrics	0
PSYM M340	Psychiatry	0
SURG M350	Surgery	0
Elective (1 block): Students must complete a 4-week elective block during their third year. Choose one 4-week elective or two 2-week electives. Electives are offered in several specialties, including surgical and medical subspecialties.		
<b>Year 4</b>		
EMMD M403	Emergency Medicine	0
Select one from the following:		
INTM M850	Medicine Subinternship	
PEDI M860	Pediatrics Subinternship	
SURG M870	Surgery Subinternship	
Select one from the following:		
INTM M530	Medical ICU (MICU) - Critical Care	
PEDI M685	Neonatal ICU (ICN) - Critical Care	
PEDI M690	Pediatric Pulmonary ICU/PICU	
SURG M769	Surgical ICU (SICU) - Critical Care	

Electives (6 blocks): Students must complete six 4-week elective blocks in their fourth year. Students may choose any elective offered, including clinical and non-clinical experiences. Electives give students the opportunity to learn more about the specific field and, in clinical rotations, to continue to participate in patient care and improve clinical skills. Non-clinical experiences include Advanced Anatomy and a Research or an Academic Medicine block.

Select one from the following:<sup>1</sup>

MEDS M908	Faculty Mentored Scholarly Experience 3a	
Seventh Elective Block		
MEDS M992	Doctoring 4/Capstone	0

1

Students may elect to do a year-long Scholarly Project in their fourth year. The project can be in clinical or basic science research, education, or school or community engagement. They have an advisor for the project and complete a Poster Presentation at the end of the year. If students do not choose to complete a Scholarly Project, they must complete a seventh elective block.

## Physician Assistant MMS

LEWIS KATZ SCHOOL OF MEDICINE

### About the Program

The Master of Medical Science (MMS) program is designed to train outstanding Physician Assistants who enhance patient care in the North Philadelphia community and beyond. Graduates of the program are recognized as leaders, educators and innovators in the delivery of high-quality healthcare that is accessible, affordable, compassionate and respectful of cultural diversity.

The Physician Assistant program facilitates delivery of an innovative curriculum for medical students that meets the accreditation standards for inter-professional education set by the Liaison Committee on Medical Education (LCME). The program is designed to prepare students to provide patient-centered care in practice settings under the supervision of and in collaboration with physicians and inter-professional teams. The curriculum satisfies all of the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA) standards and

provides instruction in all areas tested by the National Commission on Certification of Physician Assistants (NCCPA) licensing examination. The goals of the program are to:

- support diversity and inclusion;
- promote cultural sensitivity in the provision of care to a diverse community;
- prepare highly trained physician assistants with a robust didactic and clinical curriculum that results in high-quality, compassionate, patient-centered care;
- encourage a high level of professionalism;
- cultivate collaborative patient care skills through integrated inter-professional education (IPE); and
- develop the skills needed to be effective lifelong learners.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Health Sciences Center

**Full-Time/Part-Time Status:** The curriculum is designed to be completed in approximately 26 months. Students begin in early June of the first year and complete their studies 26 months later at the end of the 12-week summer session, around July 30, to receive an August diploma.

**Interdisciplinary Study:** The Physician Assistant program is part of inter-professional education at the Lewis Katz School of Medicine. Inter-professional education is a collaborative exercise that involves students from the School of Medicine as well as from Temple University's College of Public Health, Maurice H. Kornberg School of Dentistry, School of Pharmacy, and School of Podiatric Medicine.

**Ranking:** In 2023, *U.S. News & World Report* ranked the Lewis Katz School of Medicine at Temple University number 68 in Research and among the Best Medical Schools.

**Job Prospects:** A critical need for Physician Assistants to work as part of a medical team providing access to quality healthcare has resulted from a looming critical shortage of physicians and an increase in the number of Americans covered through the Affordable Care Act (ACA) of 2010. Job prospects for graduates of the MMS program are excellent.

**Licensure/Certification:** The graduation competencies for the Physician Assistant MMS program are based on recommendations of the Physician Assistant Education Association (PAEA) and the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA), which is the accrediting body.

All students studying for the MMS degree at the Lewis Katz School of Medicine at Temple University receive a broad medical education that prepares them to take the Physician Assistant National Certifying Examination (PANCE). The PANCE is administered by the National Commission on Certification of Physician Assistants (NCCPA).

A passing score on the PANCE examination allows graduates to apply for licensure to practice medicine as a physician assistant in each U.S. state and territory. In addition, eight states require physician assistants to pass a jurisprudence examination demonstrating knowledge of state law prior to licensure: Louisiana, Maine, Nevada, Oklahoma, Oregon, South Carolina, Texas, and Wisconsin.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in some courses with permission from the course instructor and

approval from the Office of Graduate Studies at the Lewis Katz School of Medicine.

**Financing Opportunities:** Limited financial support is available for MMS students.

## Admission Requirements and Deadlines

### Application Deadline:

*Summer I:* January 15

All applicants to the MMS program must apply via the Centralized Application Service for Physician Assistants (CASPA). The system can be accessed at <https://caspa.liasoncas.com/>. All application materials must be submitted, completed and verified by CASPA no later than January 15. As this is a self-managed process, applicants are expected to monitor the status, including submission and receipt, of all application materials through the CASPA applicant portal. Because CASPA processing may take up to six weeks, it is strongly recommended that all application materials be received by CASPA by December 1.

A supplemental application is also required to be submitted directly to Temple University. Submission of the supplemental application generates the applicant's TUID number. The CASPA application will not be considered without the assigned TUID.

Applications are processed throughout the year as they are received. Thus, it is in the applicant's best interest to apply early to this highly competitive degree program. Deadline extensions for incomplete applications are not available.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation are to be submitted electronically at <https://caspa.liasoncas.com/>. They should include one letter each from:

- a professor with whom the applicant has completed science coursework;
- a physician, physician assistant (preferred, but not required), or nurse practitioner; and
- an individual of the applicant's choosing, but one who possesses a personal supervisory knowledge of the applicant.

**Coursework Required for Admission Consideration:** Prerequisite coursework includes:

- Biochemistry (3 credits)
- General Biology I and II, with lab (8 credits)
- General Chemistry I and II, with lab (8 credits)
- Human Anatomy\* (4 credits)
- Human Physiology\* (3 credits)
- Medical Terminology (2 credits)
- Organic Chemistry, with lab (4 credits)
- Psychology (3 credits)
- Statistics (2 credits)
- Two or more of the following: Cell Biology, Genetics, Immunology, Microbiology, Molecular Biology (6 credits)

\* Combined Human Anatomy/Physiology may substitute with a total of 8 required credits.

All science and math prerequisite coursework must be completed within 10 years prior to June enrollment. All prerequisite coursework must be completed prior to enrollment with a grade of at least a "C" or 2.0 on a 4.0 scale.

To identify coursework that fulfills the program's prerequisite requirements, applicants are required to complete the "Program Materials: Prerequisites" section of the CASPA application.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree from a regionally accredited college or university in the United States or Canada is required.

**Statement of Goals:** In approximately 500 to 1,000 words, describe your interest in Temple's Physician Assistant graduate program, research interests and past experiences, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE or MCAT: Optional. If submitting scores, the test must have been taken within three years of matriculation. Applicants with GRE scores must contact ETS to request release of GRE scores through CASPA. The relevant code for the Physician Assistant program is 1746. MCAT scores are automatically transmitted to CASPA when the applicant's AMCAS® ID number is provided.

**Resume:** Current resume or CV required.

**Interview:** Candidates must have strong interpersonal skills, including the ability to listen and be culturally sensitive to another's point of view. The PA Program Admissions Committee gives strong consideration to students who:

- have demonstrated exceptional service to others (e.g., military/police/fire service, Peace Corps, Teach for America);
- are educationally/environmentally disadvantaged; or
- hail from groups underrepresented in medicine.

Applicants are notified of their selection for interview by email. In addition to two personal interviews, the interview day includes a Clinical Skills Center Activity (MMI) and a brief essay at the time of interview.

**Citizenship:** Due to limitations on U.S. government-subsidized financing for medical education, Temple University only considers applications from U.S. citizens or non-citizens who have permanent resident or refugee/asylee status with the U.S. Immigration and Naturalization Service (INS). Applicants with permanent resident or refugee/asylee status need to provide a copy of official INS documentation when completing the CASPA application.

**Healthcare/Patient Contact Experience:** To be considered for an interview, 400 hours of clearly documented volunteer or paid direct hands-on patient contact experience or witnessing care firsthand are required. These hours are strongly recommended to include a minimum of 100 hours working with or shadowing an MD, DO, and/or Physician Assistant and 200 hours of relevant healthcare experience.

**Community/Volunteer Service:** Applicants are recommended to have a minimum 50 hours of community service activities, not including those performed in high school. All types of community service and volunteer activities are considered.

**Clearances:** Upon acceptance, students must complete a Child Abuse History Clearance and a Criminal Background Check. Any academic infraction, license infraction, felony or misdemeanor after the date of the original CASPA application submission must be reported to the MMS program within 10 business days of the occurrence.

## Program Requirements

### General Program Requirements:

*Number of Credits Required to Earn the Degree:* 117, divided into a preclinical curriculum of 69 credits over 14 months and a clinical curriculum of 48 credits over 12 months

### Required Courses:

Year 1		
<b>Summer I</b>		<b>Credit Hours</b>
PA 8101	Physician Assistant Practice I	1
PA 8102	Patient Assessment I	1
PA 8103	Human Gross Anatomy	5
PA 8104	Introduction to Scientific Inquiry	1

<b>Total Credit Hours</b>		<b>117</b>

1

Students spend the last 12 months of the program rotating through clerkships in seven assigned medical disciplines and two elective rotations at Temple University Hospital System locations. Students are under the direct supervision of a physician or physician assistant, although they interact with numerous other healthcare providers, including residents, interns, medical students, nurses, and others. Students are expected to work the preceptor's work schedule, which may include nights/weekends.

### Culminating Event:

#### Technical Standards:

The technical standards for the Lewis Katz School of Medicine at Temple University Physician Assistant Program have been established to ensure that students have the ability to demonstrate academic mastery and competence when performing clinical skills and the ability to communicate clinical information. These technical standards are intended to ensure that each student has the academic and physical ability to acquire competencies, as defined by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), the American Academy of Physician Assistants (AAPA), the National Commission on Certification of Physician Assistants (NCCPA), and the Physician Assistant Education Association (PAEA). The technical standards are consistent with the technical standards set forth by the Accreditation Council for Graduate Medical Education (ACGME).

The candidate for successful completion of the Physician Assistant Program must be able to perform the following skills:

1. Observation: Observe demonstrations and experiments in the basic sciences, including but not limited to physiologic and pharmacologic demonstrations, microbiologic cultures, and microscopic studies of microorganisms and tissues in normal and pathologic states; observe

a patient accurately at a distance and close at hand, necessitating the functional use of vision, which is enhanced by the functional use of the sense of smell.

2. **Communication:** Speak to, hear and observe patients in order to elicit both verbal and nonverbal information; communicate effectively and sensitively with and about patients; communicate effectively and efficiently in oral and written form with the patient, the patient's family, and all members of the healthcare team, including referral sources such as agencies and other physicians. Speech, reading and writing are essential.
3. **Motor:** Exhibit sufficient motor function to carry out basic laboratory techniques and to elicit information from patients by palpation, auscultation, percussion and other diagnostic maneuvers; perform anatomical dissections and use a microscope; perform basic laboratory tests (e.g., urinalysis, gram stain, preparation of a blood smear), diagnostic procedures (e.g., proctoscopy, paracentesis); perform/read EKGs and read X-rays; execute motor movements reasonably required to provide general care and emergency treatment to patients (e.g., cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, opening obstructed airways, suturing simple wounds, and performing simple, general gynecologic procedures). Coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision are essential.
4. **Intellectual, i.e., Conceptual, Integrative, and Quantitative Abilities:** Possess abilities to measure, calculate, reason, analyze and synthesize, which are required when engaging in problem solving, the critical skill demanded of physician assistants; comprehend three-dimensional relationships and understand the spatial relationships of structures.
5. **Behavioral and Social Attributes:** Possess the physical and emotional health required for full utilization of intellectual abilities, exercise of good judgment, prompt completion of all responsibilities attendant to the diagnosis and care of patients, and development of mature, sensitive and effective relationships with patients; adapt to changing environments, display flexibility, and learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities assessed during the admission and education process.

The faculty of Temple University's Physician Assistant Program recognizes its responsibility to present candidates for the Physician Assistant degree who have the knowledge, attitudes and skills to function in a broad variety of clinical situations and to render a broad spectrum of patient care.

## Urban Bioethics MA

LEWIS KATZ SCHOOL OF MEDICINE

## About the Program

The Master of Arts in Urban Bioethics (MAUB) is the nation's only bioethics degree explicitly centered on health equity. The program provides a solid foundation in traditional bioethics along with practical training and resources for understanding and analyzing the ethics, values and value conflicts that exist in urban settings.

Students who pursue the MAUB gain practical, theoretical and methodological skills to address extreme inequities of health and access to medical, legal and other resources in disparate, diverse and dense urban areas. Due to the far-reaching impact of bioethics, students are welcomed from a wide variety of educational and professional backgrounds, including medicine, policy, philosophy and law.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Health Sciences Center

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The degree is designed for graduate students and professionals who face, or will soon face, the complexities and disparities of urban health, and want specialized training in the ethics, values and politics of healthcare in our increasingly multidimensionally diverse society. Dual-degree students can take advantage of the inherent interdisciplinary nature of a dual degree by applying approved electives from their primary program toward the MA, while stand-alone MA students take 15 credits of applicable electives to round out their degree. Six dual-degree programs are currently offered:

- MD/MA in Urban Bioethics within the Lewis Katz School of Medicine at Temple University

- DPT in Physical Therapy/MA in Urban Bioethics with the Temple University College of Public Health
- MA in Philosophy/MA in Urban Bioethics with the Temple University College of Liberal Arts
- PhD in Philosophy/MA in Urban Bioethics with the Temple University College of Liberal Arts
- MA in Sociology/MA in Urban Bioethics with the Temple University College of Liberal Arts
- PhD in Sociology/MA in Urban Bioethics with the Temple University College of Liberal Arts

**Ranking:** In 2023, *U.S. News & World Report* ranked the Lewis Katz School of Medicine at Temple University number 68 in Research and among the Best Medical Schools.

**Job Prospects:** Students graduating with the MA in Urban Bioethics have the practical skills, including qualitative research, writing for diverse audiences, and advocacy, as well as theoretical and methodological training to advance in their existing careers and compete more competitively for residencies, job placements or other advanced graduate training programs.

**Non-Matriculated Student Policy:** Non-matriculated students with at least a bachelor's degree may register for courses by contacting MAUB@temple.edu. Credit toward a subsequent degree program at Temple University is limited to 9 credits, unless the student enrolls in the Urban Bioethics graduate certificate program. All 14 credits required to complete the certificate are applicable to the Urban Bioethics MA.

**Financing Opportunities:** Limited support is available for MA students concurrently enrolled in the MD program at Temple University.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1  
*Summer:* April 1

Late applications may be considered for admission, even as late as up to two weeks prior to the term's start date.

Dual-degree applicants should note that application deadlines for companion programs may be earlier than the deadlines for the MA in Urban Bioethics. Please visit the companion program's description in the Graduate Bulletin for details.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2-3

Students applying to the Urban Bioethics MA program must submit three letters of reference and original transcripts from all post-high school institutions attended. However, students already matriculated into a graduate program at Temple University who are applying for a dual degree may:

- upon permission of their recommenders and their home school, use their home school letters of recommendation for the Urban Bioethics MA application; and

- ask the Urban Bioethics program administrators to request a transcript from the home school.

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with your academic performance and/or from professional supervisors familiar with your professional experience, accomplishments and potential for success in a graduate program.

**Bachelor's Degree in Discipline/Related Discipline:** While a baccalaureate degree is required for admission to the MA program, the major studied for the undergraduate degree is not specified.

**Statement of Goals:** Two to three double-spaced pages should address how you see the MA in Urban Bioethics as integral to your current educational goals and current/future career development.

### Standardized Test Scores:

GRE: Optional for applicants graduating from traditional undergraduate programs. Applicants for the dual degree and those already holding an advanced degree are not required to submit GRE scores.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** Current resume or CV required.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 32

### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
UBTH 5001	Urban Bioethics 1 (Professional Students)	3
UBTH 5002	Urban Bioethics 2 (Professional Students)	3
UBTH 5022	Community Engagement I (Professional Students)	2
UBTH 5023	Community Engagement II (Professional Students)	2
UBTH 5031	The Values, Ethics, & Economics of Health Care Delivery in Urban Communities (Professional Students)	2
UBTH 5041	Critical Social Science and Urban Bioethics (Professional Students)	2
<b>Electives</b>		<b>15</b>
<b>Research Course</b>		
UBTH 9996	MA in Urban Bioethics Thesis (Graduate Students)	3
<b>Total Credit Hours</b>		<b>32</b>

### Culminating Event:

*Thesis:*

The thesis should make a novel contribution to the field. Toward this end, the student conducts an original research project, empirical or non-

empirical, and produces a publishable paper. The research is undertaken with guidance from an approved thesis advisor from the Lewis Katz School of Medicine, the Center for Urban Bioethics, or a dual-degree student's home department.

## Graduate Certificate: Narrative Medicine

LEWIS KATZ SCHOOL OF MEDICINE

### About the Certificate

The graduate certificate in Narrative Medicine is designed to enhance medical and healthcare education by giving students the competence to identify, acknowledge and interpret stories of sickness and of health through close observation of the human experience as they represent and serve our diverse society. Strong focus is placed on analysis of fiction and non-fiction writing. Reflective and creative writing assignments are designed to improve students' ability to recognize, interpret and tell

patient stories. Students interested in film, visual arts, dance and other creative mediums have opportunities to explore these outlets.

Using small-seminar courses and a capstone project, students explore the role of narrative in medicine and the vast expanse of human stories to improve their ability to care for patients and to deepen their satisfaction as a healthcare provider. The certificate is unique in its provision of a theoretical and academic foundation in narrative medicine bolstered immediately and rigorously by experiential work in the hospital setting.

The certificate program is open to students at the Lewis Katz School of Medicine (LKSOM) who are working toward their MD degree. They may complete the Narrative Medicine certificate along with their LKSOM MD curriculum. Courses and assignments have been formulated to align with and complement medical school coursework.

The certificate program is also open to students who are not pursuing the MD. They may take advantage of the vast knowledge and experience of our medical school and humanities faculties and teaching physicians at Temple University Hospital.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Health Sciences Center

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate's director for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

Applications are reviewed year-round for the graduate certificate program.

Students in the MD program apply to the Narrative Medicine certificate program before or during their first year of study in order to coordinate their schedule and complete the certificate by the time they finish the MD degree.

*APPLY ONLINE to this certificate program.*

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University. Official undergraduate and graduate transcripts from all accredited institutions attended are required.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

## Graduate Certificate: Urban Bioethics

LEWIS KATZ SCHOOL OF MEDICINE

### About the Certificate

The Urban Bioethics graduate certificate program is designed for individuals confronting, or who anticipate confronting, health inequities in their work and are seeking specialized training in understanding and analyzing the ethics, values and value conflicts relevant to the urban setting. Students in the certificate program gain practical skills, theoretical orientations and resources to deliver better care. They are prepared to be innovators in research, care delivery, and policy and advocacy work.

The Urban Bioethics certificate program is a viable option for those who seek additional bioethics training but are unable to fully commit to the master's program or who wish to explore the field before applying to the MA program. Students who earn the graduate certificate have one year after being awarded the certificate to apply for the MA program and, if accepted, all certificate credits can be applied to the master's degree.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Health Sciences Center

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate's senior advisor for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the graduate certificate program. Credit toward a subsequent degree program at Temple University is limited to 9 credits. However, if the student completes the Urban Bioethics graduate certificate program, all 14 credits required to earn the certificate are applied to the MA in Urban Bioethics.

## Admission Requirements and Deadlines

### Application Deadline:

Applications are reviewed year-round for the graduate certificate program.

*APPLY ONLINE to this certificate program.*

## Center for the Performing and Cinematic Arts / Boyer College of Music and Dance

Since its founding as a college of music in 1962, the Boyer College of Music and Dance has grown in size and scope to become a comprehensive college representing academic and artistic excellence in music and dance. Originating as a single department of music education offering vocal instruction at Temple University in 1893, the College is now part of the Center for the Performing and Cinematic Arts at Temple University. Boyer College is located in close proximity to Philadelphia's historic cultural institutions, including the Kimmel Cultural Campus, Opera Philadelphia, PHILADANCO!, Philadelphia Ballet, Philadelphia Museum of Art, and The Philadelphia Orchestra.

The Boyer College of Music and Dance is committed to nurturing talented students by promoting music and dance as art forms, as media for human expression, and as subjects of intellectual inquiry. Recognizing that all of the arts possess unique powers—to move the spirit, to excite the mind, to reveal the past, to celebrate the future, to instruct, to heal, to foster communication—the College aims to advance music and dance in their myriad, interrelated forms through creative and scholarly work, teaching and service. Boyer College seeks to provide an inclusive educational community that honors the uniqueness of the individual, values diversity of perspective, and affirms music and dance as central to society and culture.

Students at Boyer College have the unique opportunity to interact with leading composers, conductors, educators, performers and choreographers while experiencing a challenging and diverse academic curriculum. Graduates have gone on to rewarding careers as music and dance professionals. Many are in leadership positions and teaching at top colleges and universities throughout the country.

Among the many accomplishments of the Boyer College of Music and Dance are:

- Numerous Grammy nominations and awards.
- Selection of Dance MFA student choreography for the American College Dance Association's biennial National College Dance Festival at the John F. Kennedy Center for the Performing Arts.
- Faculty honors that include Fulbright Scholarships; Guggenheim, National Endowment for the Arts, and Pew Fellowships; and National Dance Education Organization awards.

## Graduate Faculty

*Charles Abramovic*, Professor, Department of Keyboard Studies, Boyer College of Music and Dance; DMA, Temple University.

*Mitos Andaya Hart*, Associate Professor, Department of Vocal Arts, Boyer College of Music and Dance; DMA, University of Kansas.

*Christine L. Anderson*, Associate Professor, Department of Vocal Arts, Boyer College of Music and Dance; DMA, University of Cincinnati College-Conservatory of Music.

*Beth Bolton*, Associate Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, Temple University.

*Karen E. Bond*, Associate Professor, Department of Dance, Boyer College of Music and Dance; PhD, La Trobe University.

*Darlene M. Brooks*, Associate Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, Temple University.

*Sara Buechner*, Professor, Department of Keyboard Studies, Boyer College of Music and Dance; DMA, Manhattan School of Music.

*Nathan Buonviri*, Associate Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, Temple University.

*David B. Cannata*, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, New York University.

*Dustin Cates*, Assistant Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, University of Missouri-Kansas City Conservatory of Music and Dance.

*Deborah A. Confredo*, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, Florida State University.

*Patricia Cornett*, Assistant Professor, Department of Instrumental Studies, Boyer College of Music and Dance; DMA, University of Michigan.

*Marcus DeLoach*, Associate Professor, Department of Vocal Arts, Boyer College of Music and Dance; DMA, Rice University.

*Rollo A. Dilworth*, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; DMA, Northwestern University.

*Sherril Dodds*, Professor, Department of Dance, Boyer College of Music and Dance; PhD, University of Surrey.

*Stephanie Doktor*, Assistant Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, University of Virginia.

*Edward Flanagan*, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, Temple University.

*Rachelle Fleming*, Associate Professor, Department of Vocal Arts, Boyer College of Music and Dance; DMA, University of Miami.

*Mark Franko*, Laura H. Carnell Professor, Department of Dance, Boyer College of Music and Dance; PhD, Columbia University.

*Shana Goldin-Perschbacher*, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, University of Virginia.

*Matthew J. Greenbaum*, Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, City University of New York.

*Suzanne Hall*, Associate Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, University of Memphis.

*Jillian Harris*, Associate Professor, Department of Dance, Boyer College of Music and Dance; MFA, New York University Tisch School of the Arts.

*yaTande Whitney V. Hunter*, Assistant Professor, Department of Dance, Boyer College of Music and Dance; PhD, Institute for Doctoral Studies in the Visual Arts.

*Laura E. Katz Rizzo*, Associate Professor, Department of Dance, Boyer College of Music and Dance; PhD, Temple University.

*Michael Klein*, Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, State University of New York at Buffalo.

*Edward D. Latham*, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, Yale University.

*Kathryn Leemhuis*, Assistant Professor, Department of Vocal Arts, Boyer College of Music and Dance; DMA, University of Cincinnati College-Conservatory of Music.

*Joyce Z. Lindorff*, Professor, Department of Keyboard Studies, Boyer College of Music and Dance; DMA, The Juilliard School.

*Wendy Magee*, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, University of Sheffield.

*Noriko Manabe*, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, Graduate Center, City University of New York.

*Phillip R. O'Banion*, Associate Professor, Department of Instrumental Studies, Boyer College of Music and Dance; MM, University of Colorado.

*Richard D. Oatts*, Professor, Department of Music Studies, Boyer College of Music and Dance.

*Lambert T. Orkis*, Professor, Department of Keyboard Studies, Boyer College of Music and Dance; MM, Temple University.

*Elizabeth C. Parker*, Associate Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, University of Nebraska-Lincoln.

*Paul Rardin*, Elaine Brown Chair in Choral Music and Associate Professor, Department of Vocal Arts, Boyer College of Music and Dance; DMA, University of Michigan.

*Alison M. Reynolds*, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, Temple University.

*Eduard Schmieder*, Laura H. Carnell Professor, Department of Instrumental Studies, Boyer College of Music and Dance; DMA equiv., Gneissen Russian Academy of Music.

*Helen Shoemark*, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, University of Melbourne.

*Jeffrey G. Solow*, Professor, Department of Instrumental Studies, Boyer College of Music and Dance; BA, University of California Los Angeles.

*Merián Soto*, Professor, Department of Dance, Boyer College of Music and Dance; MA, Columbia University.

*Terrell L. Stafford*, Laura H. Carnell Professor, Department of Music Studies, Boyer College of Music and Dance; MM, Rutgers University.

*Robert T. Stroker*, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, Michigan State University.

*Adam Vidiksis*, Assistant Professor, Department of Music Studies, Boyer College of Music and Dance; DMA, Temple University.

*Maurice W. Wright*, Laura H. Carnell Professor, Department of Music Studies, Boyer College of Music and Dance; DMA, Columbia University.

*Xiang Xu*, Assistant Professor, Department of Dance, Boyer College of Music and Dance; MFA, New York University Tisch School of the Arts.

*Michael L. Zanders*, Assistant Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; PhD, Temple University.

*Steven D. Zohn*, Laura H. Carnell Professor, Department of Music Studies, Boyer College of Music and Dance; PhD, Cornell University.

## Choral Conducting MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Choral Conducting.

### About the Program

The Department of Vocal Arts offers a program of study leading to the Master of Music in Choral Conducting. Graduate majors in the department have the opportunity to conduct a number of resident ensembles, as well as present their own recitals with the Graduate Conductors Chorus.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With the approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The degree is intended to prepare students for successful careers in choral music by providing the highest level of

training in the many skills required for the choral conductor, including technical, theoretical, analytical, historical, linguistic, keyboard and vocal skills. The department prepares students to become teachers and conductors striving toward the highest possible artistic excellence.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission of the department chair and the Associate Dean.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* December 1

Applications are processed as they arrive up to the deadline date.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 32*

*Required Courses:*

Code	Title	Credit Hours
MUSC 8207	Vocal Pedagogy for the Choral Conductor	2
MUSC 8300	Concert Choir (2 terms)	2
MUSC 8351	Choral Conducting Seminar I	2
MUSC 8352	Choral Conducting Seminar II	2
MUSC 8353	Choral Conducting Seminar III	2
MUSC 8354	Choral Conducting Seminar IV	2
MUSC 8359	Choral Literature: 1910 to the Present	2
MUSC 8361	Choral Literature 1450-1610	2
MUSC 8362	Choral Literature 1610-1910	2
MUSC 8364	Choral Literature in the Global Community	2
MUSC 8384	Private Lesson: Choral Conducting Major (2 terms)	2
MUST 8701	Research in Music	3
MUST 8742	Seminar in Theoretical Analysis	3
	or MUST 8746 Seminar in Stylistic Analysis	
Electives <sup>1</sup>		4
<b>Total Credit Hours</b>		<b>32</b>

<sup>1</sup>

Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition,

Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

*Proficiencies in Voice, Piano, and Musicianship:*

Proficiencies are evaluated by the department in the first term of graduate study.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Graduate students in non-performing curricula may take up to six credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of

performance majors. In this event, a fee of \$200, not covered by tuition remission, is charged.

Alternately, a graduate student, regardless of major, with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level performing audition, may, by audition, qualify to take two credits of applied study per term for graduate credit. These courses carry a fee of \$400 plus tuition and may be applied to the non-performing curriculum for degree credit up to six credits with the approval of the major advisor. Tuition remission may not be used to cover the private lesson fee.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:***Comprehensive Examination:*

All candidates for the Master of Music degree are required to take a comprehensive examination in the major area that is designed and given by the department in the final term of coursework. With this final comprehensive spoken examination, each student spends one hour with the entire choral faculty answering questions that are mostly from the major field but also often include other areas of music, art, history, theory, etc. Often, but not always, examples are played at the piano for historic placement and identification. The students prepare for the exam mostly through a thorough review of eight notebooks, four each from Choral Literature and Choral Conducting Seminar. The exam is scheduled by the department and graded by all of the department's graduate faculty.

*Public Recitals:*

Choral Conductors present two recitals in the second year of study, utilizing the Recital Chorus and the Graduate Conductors Chorus. One public recital is required in the Fall term (MUSC 8353) and one in the Spring term (MUSC 8354).

Graduation recitals are typically one hour in length, presented on campus in either Rock Hall or Klein Recital Hall, and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital.

## Collaborative Piano and Chamber Music MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Collaborative Piano and Chamber Music.

### About the Program

The master's degree in Collaborative Piano and Chamber Music is designed to prepare pianists to play in small ensembles and to accompany soloists.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Students are trained to:

- listen to the many events occurring simultaneously in ensembles;
- learn how to conduct rehearsals;
- appreciate how text can affect musical performance;
- distinguish between the many different kinds of ensemble participation depending on the media; and
- develop their pianistic skills in order to meet the demands of advanced chamber and accompanied works.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and

internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and complete a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions

credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. - received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:***Comprehensive Final Project:*

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the MM program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Studies adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Studies no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Studies no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the Department of Keyboard Studies read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either pass or fail. Any student who fails is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and graded as before. Students who fail a second time are dismissed from the degree program.

*Recital Accompaniment:*

Students must accompany one student recital in the first term and two full senior or master's recitals in each of three succeeding academic terms. In addition, performance of a full chamber music work is required each of the four terms. Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members.

## Collaborative Piano and Opera Coaching MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Collaborative Piano and Opera Coaching.

### About the Program

The master's degree in Collaborative Piano and Opera Coaching is designed for pianists who wish to make accompanying and opera coaching the focus of their professional lives. Students learn about the many skills required of opera singers, including diction, foreign languages, vocal technique, stage movement and acting. Additionally, students learn to negotiate the often un pianistic piano reductions that are part of this scene. Finally, students learn how to conduct rehearsals in a professional setting, and become aware of the special problems encountered by singers.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: March 1

Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and complete a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In

addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 30

Required Courses:

Code	Title	Credit Hours
MUSC 8212	Coaching Skills (4 terms)	8
MUSC 8416	Piano for Accompanying and Chamber Music Majors	2
MUSC 8417	Piano for Accompanying and Chamber Music Majors	2
MUSC 8418	Piano for Accompanying and Chamber Music Majors	2
MUSC 8419	Piano for Accompanying and Chamber Music Majors	2
MUSC 8471	Recital Accompanying	1
MUSC 8472	Recital Accompanying	1
MUSC 8473	Recital Accompanying	1
MUSC 8474	Recital Accompanying	1
MUST 8701	Research in Music	3
MUST 8708	History of Opera	2
MUST 8709	History of Opera	2
MUST 8742	Seminar in Theoretical Analysis	3
	or MUST 8746 Seminar in Stylistic Analysis	
<b>Total Credit Hours</b>		<b>30</b>

### Additional Requirements:

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of

terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.

- b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Dance MA**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Arts in Dance.

## About the Program

The Dance Department offers programs of study leading to the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees. All students are expected to develop a command of the discipline of dance, as a performing art and as both subject and medium of inquiry. The department's mission places high value on the role of dance in a pluralistic, multicultural society.

The MA in Dance is a research-centered degree that allows students to follow and integrate strands in cultural, creative and educational studies of dance. Through coursework blending experiential and theoretical inquiry and an in-depth thesis project, the program prepares students for doctoral education in dance and professional development in research, writing, creative process and pedagogy.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main. All department courses are offered on Main Campus, but students may take out-of-department credits on other campuses.

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and interactions among faculty and students with interests in Africology and African American Studies, Anthropology, Education, History, Jewish Studies, Media Arts, Music, Philosophy, Sociology, Theater Arts, Women's Studies, and the like.

**Accreditation:** The MA in Dance is pending plan approval by the National Association of Schools of Dance (NASD).

**Areas of Specialization:** The MA in Dance is a research-centered degree that allows students to follow and integrate strands in cultural, creative and educational studies of dance. Through coursework blending experiential and theoretical inquiry and an in-depth thesis project, the program prepares students for doctoral education in dance. It also provides master's-level professional development in research, writing, the creative process and pedagogy.

**Job Prospects:** Graduates perform and choreograph with companies throughout the world, teach at all levels of education, serve as arts administrators and policymakers for the arts, and publish extensively.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take technique classes and some core coursework with permission of the instructor and the department chair. If accepted into the program, those courses (up to a maximum of 9 credits) may be applied toward the degree program.

**Financing Opportunities:** Teaching Assistantships (TAs), Research Assistantships (RAs), and Academic Internships (AIs) are available. Teaching responsibilities usually include teaching university general education courses. On occasion, TAs are assigned to teach BFA Dance courses for which they are qualified. This award includes a monthly stipend, book allowance and tuition remission. Assistantships are generally awarded for a minimum of one year. The TA/RA/AI application is part of the supplemental dance application for admission. Continuing students who have not held an assistantship also submit a written application in the term prior to commencement of the award.

## Admission Requirements and Deadlines

### Application Deadline:

*Summer II:* January 11

All department and university application materials must be received by the Dance Department. After acceptance at the department level, final review of all application materials is made by the Boyer College of Music and Dance.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from qualified representatives of academic or professional communities in dance.

**Coursework Required for Admission Consideration:** Applicants should have an undergraduate GPA of 3.0, and an undergraduate degree in Dance or equivalent professional experience. Depending on the individual's professional goals, certain prerequisite courses may be assigned to fill in any gaps in preparation.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required.

**Statement of Goals:** In three to five typed pages, address how your experience and education have prepared you for advanced study in dance and how the degree will support your professional goals.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** A current resume detailing experience in dance, art, education, scholarship and/or public leadership is required.

**Writing Sample:** A recent scholarly or academic research paper must be submitted as a writing sample.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the MA in Dance program. Transfer credits must be approved by the Graduate Coordinator, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
DANC 8859	Dancing the City	3
DANC 8861	Dancing Self in Community	3
DANC 8862	Embodied Craft	3
DANC 8872	Educating Dance	3
DANC 8873	Concepts of Culture	3
DANC 9801	Research Methods in Dance	3
<b>Electives</b>		
DANC 8808	Corporeal Improvisation (or a Technique course)	2
Other Dance Electives		6
<b>Research Course</b>		
DANC 9996	Master's Thesis in Dance	4
<b>Total Credit Hours</b>		<b>30</b>

1

Although no credit is earned, attendance is mandatory at the Graduate Tutorial held every Tuesday evening.

**Culminating Event:***Master's Thesis:*

The MA thesis is a substantial research project developed over three terms, culminating in a written thesis of 20,000 words. During Spring term of the first year of full-time study, students carry out bibliographic research, develop an annotated bibliography, and create a thesis proposal in a mentored seminar setting. A thesis advisor, with whom the student works until the completion of the project, is then determined. Prior to graduation, students make a formal presentation of their thesis research for dance faculty, students and invited guests. Detailed guidelines for the MA thesis process and evaluation are found in the Graduate Handbook.

**Dance MFA**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Fine Arts in Dance.

**About the Program**

The Dance Department offers programs of study leading to the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees. All students are expected to develop a command of the discipline of dance, as a performing art and as both subject and medium of inquiry. The department's mission places high value on the role of dance in a pluralistic, multicultural society.

The MFA in Dance develops choreographers and dance artists who are in command of their idiom as a basis for meaningful aesthetic investigation, embodied research and critical inquiry. The program fosters skilled dance making; sensitivity to personal artistic qualities and sources; openness to interdisciplinary perspectives; and awareness of the social, political and historical implications of dance. The MFA seeks to align itself with the evolving aesthetics and pedagogies of professional dance practice, to introduce students to contemporary developments in the field of dance scholarship, and to prepare students to enter the competitive job market.

The emphasis of the MFA in Dance is on providing resources that allow each student to take responsibility for their artistic development and vision. As choreographers, students immerse themselves in studying the craft and persuasion of their art form, study the historical and cultural dimensions of dance, experience a spectrum of valid approaches to issues of communication, and continuously challenge their own artistic viewpoints and directions. As performers, students are expected to engage themselves fully and with personal integrity in the creation, interpretation and presentation of dance works; develop technically and artistically in order to fulfill the varying demands of dance as a performing art; and participate fully in the choreographic process. The MFA in Dance also supports the vision of those students who aspire to work in higher education and other education and community contexts as artist-educators.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main. All department courses are offered on Main Campus, but students may take out-of-department credits on other campuses.

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and interactions among faculty and students with interests in Africology and African American Studies, Anthropology,

Education, History, Jewish Studies, Media Arts, Music, Philosophy, Sociology, Theater Arts, Women's Studies, and the like.

**Accreditation:** The MFA in Dance is fully accredited by the National Association of Schools of Dance (NASD).

**Areas of Specialization:** The MFA faculty includes internationally known artists and scholars whose work represents a variety of contemporary approaches to choreography, performance and theoretical inquiry in dance. The emphasis of the program is choreographic research. In addition, students have requirements in performance, production, dance education and dance scholarship. An important objective of the MFA program is that each student develop a personal aesthetic that manifests an understanding of their place in the world.

**Job Prospects:** Since the focus of the MFA in Dance is choreography, most graduates continue as independent or affiliated choreographers after graduation. In addition, many teach in higher education or perform professionally.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take technique classes and some core coursework with the permission of the instructor and the department chair. If accepted into the program, those courses (up to a maximum of 9 credits) may be applied toward the degree program.

**Financing Opportunities:** Teaching Assistantships (TAs), Research Assistantships (RAs), and Academic Internships (AIs) are available. Teaching responsibilities usually include teaching university general education courses. On occasion, TAs are assigned to teach BFA Dance repertory, technique or theory courses for which they are qualified. This award includes a monthly stipend, book allowance and tuition remission. Assistantships are generally awarded for a maximum of two years. The TA/RA/AI application is part of the supplemental dance application for admission. Continuing students who have not held an assistantship also submit a written application in the term prior to commencement of the award.

All MFA applicants are considered for departmental nomination for a University fellowship. This university-wide scheme is highly competitive, and recipients are selected by the Graduate School.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 11

All department and university application materials must be received by the Dance Department. After acceptance at the department level, final review of application materials is made by the Boyer College of Music and Dance.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from qualified representatives of academic or professional communities in dance.

**Coursework Required for Admission Consideration:** Applicants should have an undergraduate GPA of 3.0 and an undergraduate degree in Dance or equivalent professional experience. Depending on the

applicant's professional goals, certain prerequisite courses may be assigned to fill in any gaps in preparation.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required.

**Statement of Goals:** In two pages or less, detail your focus and artistic vision in dance. The MFA faculty reviews this document in relation to the audition, choreographic showing, and resume to determine your fit with the MFA program and what the faculty can offer. Curiosity and openness are sought.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** A resume detailing experience in dance, art, education, scholarship and/or public leadership is required.

**Transfer Credit:** Graduate credits from an accredited institution may be transferred into the MFA in Dance program. Transfer credits must be approved by the Graduate Coordinator, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 12.

Dance	3
Outside of Department	6
<b>Master's Thesis Concert</b>	
DANC 9984 Master's Concert in Dance	7
<b>Total Credit Hours</b>	<b>60</b>

**Culminating Events:***Comprehensive Examination:*

The comprehensive examination is designed to evaluate the student's general knowledge in four major areas that are not covered by required courses: dance history, dance in a cultural context, dance education, and dance science. An acceptable level would be equivalent to that acquired from taking a single course in each area covered by the exam.

The comprehensive examination consists of two parts. The short answer section gives students the opportunity to demonstrate knowledge in diverse areas and is taken under supervision, without access to reference materials. The essay section allows students to use any appropriate references and resources. These questions require critical thinking, analysis and specificity. The essay section is completed over a period of days, and students may use any appropriate references as resources.

The comprehensive examination is taken before the first term of study and must be successfully completed before Master's Concert approval. Graduate Faculty appropriate to the MFA degree write the questions. Evaluation of the examination is followed by advising, where needed, as to specific deficient areas, with recommendations made for courses within the graduate dance curriculum that address areas of concern.

*Master's Thesis Concert:*

The Master's Concert is a seven-credit exercise developed over three terms, and culminating in a publicly produced presentation of choreographic work. The Master's Concert generally consists of one major choreographic work designed to demonstrate the candidate's highest achievement of artistry, craft and thinking.

During the Spring term of the second year of full-time study, students identify a thesis advisor, conduct preliminary research, and prepare the thesis concert proposal. The proposal articulates the artistic and intellectual focus of the project, setting out the questions and challenges of the work that will be developed further in the final paper. After the culminating performance, the student submits a written thesis of 8,000 words that documents the choreographic research process and final product, but more crucially also explores the interaction of theory and practice that informs the work, presenting in-depth reflection on strengths, challenges, meanings and projections for future work.

**Dance PhD**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Philosophy in Dance.

**About the Program**

The Dance Department offers programs of study leading to the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees. All students are expected to develop a command of the discipline of dance, as a performing art and as both subject and medium of inquiry. The department's mission places high value on the role of dance in a pluralistic, multicultural society.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main. All department courses are offered on Main Campus, but students may take out-of-department credits on other campuses.

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and interactions among faculty and students with interests in Africology and African American Studies, Anthropology, Education, History, Jewish Studies, Media Arts, Music, Philosophy, Sociology, Theater Arts, Women's Studies, and the like.

**Accreditation:** The PhD in Dance is fully accredited by the National Association of Schools of Dance (NASD).

**Areas of Specialization:** Individual doctoral faculty members conduct research studies on African and African American aesthetics; dance as a phenomenon in its own right; dance reconstruction; dance teaching and learning across the life span; feminism and dance; performance theory and practice; philosophical, historical and cultural perspectives of the body and dance, including issues of gender, race and class; and more.

Research expertise of doctoral faculty is in aesthetic, artistic, educational, ethnographic, historical, phenomenological and sociological modes of inquiry in dance.

**Job Prospects:** Graduates perform and choreograph with companies throughout the world, teach at all levels of education, serve as arts administrators and policymakers for the arts, and publish extensively.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take technique classes and some core coursework with the permission of the instructor and the department chair. If accepted into the program, those courses (up to a maximum of 9 credits) may be applied toward the degree program.

**Financing Opportunities:** Teaching Assistantships (TAs), Research Assistantships (RAs), and Academic Internships (AIs) are available. Teaching responsibilities usually include teaching university general education courses. On occasion, TAs are assigned to teach BFA Dance repertory, technique or theory courses for which they are qualified. This award includes a monthly stipend, book allowance and tuition remission. Assistantships are generally awarded for a maximum of two years. The TA/RA/AI application is part of the supplemental dance application for admission. Continuing students who have not held an assistantship also submit a written application in the term prior to commencement of the award.

All PhD applicants are considered for departmental nomination for a University fellowship. This university-wide scheme is highly competitive, and recipients are selected by the Graduate School.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* January 11

All department and university application materials must be received by the Dance Department. After acceptance at the department level, final review of all application materials is made by the Boyer College of Music and Dance.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from qualified representatives of academic or professional communities in dance.

**Coursework Required for Admission Consideration:** Applicants should have an undergraduate GPA of 3.0, a graduate GPA of 3.4 or above, and transcripts that show a foundational knowledge of dance.

**Master's Degree in Discipline/Related Discipline:** A master's degree in any discipline, in combination with substantial professional or recreational experience in dance, is required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required, although it need not be in Dance.

**Statement of Goals:** Address your unique profile as a developing professional in the field of dance, as well as your ability to do original research. Reflect on why the Dance Department, i.e., the research foci of

its doctoral faculty, its mission and its resources, is well matched to your career and educational goals.

### Standardized Test Scores:

GRE/MAT: Not required. If submitted, scores are expected to be at the 50th percentile or above.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

Any students admitted with a TOEFL score below the minimum must pass an English skills course during their first term at Temple University.

**Graduate Interview Day:** All applicants are expected to attend the Dance Department's graduate interview day or to make other arrangements to complete interview day requirements. Subject to approval of the Graduate Coordinator, international applicants may be considered for admission by completing all graduate interview day requirements via video and Skype. The day includes a studio warm-up taught by a member of the faculty, presentation of research or applied practice, development of an on-site writing sample, and an interview with doctoral faculty.

**On-Site Writing Activity:** All applicants take part in an on-site writing activity. Results are considered in the admissions process. Remedial coursework may be required.

**Resume:** A resume that details experience in dance, art, education, scholarship and/or public leadership is required.

**Writing Sample:** A recent scholarly or academic research paper must be submitted as a writing sample.

**Advanced Standing:** Students who enter the PhD program in Dance may be considered for advanced standing, based on relevant coursework. The Dance Doctoral Faculty Committee, with approval of the Associate Dean, awards credits toward advanced standing on a case-by-case basis in the first year of full-time study. The maximum number of advanced standing credits awarded is 33.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 46*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
DANC 8867	Educational Inquiry in Dance	3
DANC 9801	Research Methods in Dance	3
DANC 9873		5
DANC 9991	Directed Research-Dance	1

DANC 9998	Pre-Dissertation Research	1
DANC 9999	Doctoral Dissertation	4

**Total Credit Hours** 46

1

Advisor approval required.

**Culminating Events:***Qualifying Examination:*

Students take a Qualifying Examination at the end of Fall term in Year 2. The examination covers three areas crucial to doctoral research. Questions are devised in consultation with specialist advisors. Details of the Qualifying Examination are published in the Graduate Handbook.

*Preliminary Exam Projects:*

Upon completion of all required coursework for the degree, students complete two Preliminary Exam Projects, which are submitted for review early in Fall term of Year 3. These include:

1. A position paper presented in view of the dissertation, which was drafted in DANC 9873 in Spring term of Year 2.
2. A course proposal for higher education, which the student began work on in DANC 8867 Educational Inquiry in Dance in Spring term of Year 2.

Through DANC 9994 Preliminary Examination Preparation, the student demonstrates significant achievement of scholarly and professional competencies. The Preliminary Exam Projects must be reviewed and approved by a committee composed of at least three Dance doctoral faculty.

*Dissertation Proposal:*

Through DANC 9998 Pre-Dissertation Research, the student prepares a dissertation proposal that evidences a strong body of work thus far and preparedness to complete the Dance PhD program. A primary advisor and Doctoral Advisory Committee are established upon the student's successful completion of the Preliminary Exam Projects. In consultation with the primary advisor, the student prepares a proposal, including an abstract that is reviewed and approved by Dance doctoral faculty. Once approved for defense, the student makes a formal oral presentation of the proposal to the Doctoral Advisory Committee. Upon approval of the dissertation proposal, the student is elevated to candidacy in the PhD program. The dissertation proposal is normally defended in Spring term of Year 3. Written guidelines for the dissertation proposal are published in the Graduate Handbook.

*Dissertation:*

The dissertation is a substantial piece of original and independent research making a significant contribution to new knowledge in

dance and possibly related fields. Typically, students complete the dissertation and DANC 9999 Doctoral Dissertation in Year 4 or 5, although candidates may submit beyond Year 5 in consultation with their primary advisor. The original Doctoral Advisory Committee may be expanded with additional doctoral faculty from Temple University or other universities, or with doctoral-level experts who work outside a university setting. For purposes of the dissertation defense, the committee must include at least one additional doctoral faculty member who is not from the student's program; so constituted, it becomes the Dissertation Examining Committee. At least one member of the Dissertation Examining Committee must be an "outside examiner," defined as one who has not read the dissertation in progress.

The primary advisor and student confer with the Dissertation Examining Committee to establish a date for oral defense of the dissertation. A majority of the members of the Dissertation Examining Committee must approve the written dissertation and oral defense; once passed, the student has 30 days to complete final revisions. Detailed guidelines for the dissertation process and examination are published in the Graduate Handbook.

# Instrumental Conducting: Wind-Band Emphasis MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Instrumental Conducting with a Wind-Band Emphasis.

## About the Program

The Instrumental Studies Department offers a program of study leading to the Master of Music in Instrumental Conducting: Wind-Band Emphasis. Students in the program have the opportunity to receive advanced instruction in technique, artistry and scholarship while preparing for success as a conductor-educator in an academic or professional setting.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Students are trained to listen to the many events occurring simultaneously in ensembles; to learn how to conduct rehearsals; to appreciate how text can affect musical performance; to distinguish between the many different kinds of ensemble participation depending on the media; and to develop their pianistic skills in order to meet the demands of advanced chamber and accompanied works.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* December 1

Applications are processed as they arrive up to the deadline date.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** In a maximum of 1,500 words, describe your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Prescreening Video:** For the prescreening video, the applicant's face and torso must face the camera and include 15 to 20 minutes of rehearsal and 5 to 10 minutes of performance. The video is submitted via Acceptd.

**Written Analysis:** Each applicant must upload to Acceptd a written score analysis of one of the following selections: *Theme and Variations, Op. 43a* by Arnold Schoenberg; *Lincolnshire Posy* by Percy Grainger; or *Chester Overture for Band* by William Schuman.

**Resume:** A professional resume is required. Instrumental teaching experience at the secondary level, community ensemble level, collegiate level, semi-professional level, or professionally is highly encouraged and is favorably viewed in the decision process.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of

success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 32*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8352	Choral Conducting Seminar II	2

<b>Electives</b> <sup>1</sup>		<b>3</b>
<b>Total Credit Hours</b>		<b>32</b>

1

Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

**Language Examination:** Candidates in Instrumental Conducting: Wind-Band Emphasis must demonstrate competency in foreign language dictions at the time of admission to the program. Where the transcript or pass-off examination does not reveal such competency, the appropriate deficiency course in diction skills must be taken prior to completion of the master's degree.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon

registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Proficiencies in Piano and Musicianship:*

The department evaluates proficiencies in piano and musicianship in the first term of graduate study.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise.

Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Graduate students in non-performing curricula may take up to six credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of \$200, not covered by tuition remission, is charged.

Alternately, a graduate student, regardless of major, with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level performing audition, may, by audition, qualify to take two credits of applied study per term for graduate credit. These courses carry a fee of \$400 plus tuition and may be applied to the non-performing curriculum for degree credit up to six term hours with the approval of the major advisor. Tuition remission may not be used to cover the private lesson fee.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### *Recitals:*

Students in Instrumental Conducting: Wind-Band Emphasis present two recitals during the two years of study with members of the Wind Symphony, Symphonic Band, Collegiate Band, and other instrumentalists and/or vocalists:

- One is a public chamber recital with a Keynote© presentation, for which the repertoire is selected, with approval, by the student. At least 50 minutes of music are presented on campus in either Rock Hall or Klein Recital Hall, with adjudication by three full-time music faculty members.
- The second is a comprehensive public large ensemble recital, which comprises small and large performances with the Wind Symphony, Symphonic Band, and Collegiate Band throughout the academic year/concert season. The repertoire is selected by the conductor of the ensemble. Performances are presented in Temple Performing Arts Center and adjudicated by two or three full-time music faculty members.

Students must show evidence through Temple University academic records of having taken private lessons up to the time of the concert performances, both chamber and large ensembles.

#### *Program Notes:*

Students in Instrumental Conducting: Wind-Band Emphasis must provide scholarly program notes for compositions performed at public performance recitals, including details about the composer, the historical context, analytical components and inspiration. These are submitted to the Director of Bands four weeks prior to the performance date for review. The notes must be provided with the program at the public performance.

#### *Keynote© or PowerPoint Presentation for Chamber Recital:*

Students in Instrumental Conducting: Wind-Band Emphasis present a 30-minute Keynote© or PowerPoint presentation prior to the public concert. This presentation is presented one hour before the recital or one day prior to the public concert (location arranged by the student). The Keynote© or PowerPoint presentation includes salient and interesting features of the pieces and the program. The Keynote© or PowerPoint presentation is meant to supplement the concert experience for the audience and offer a platform for the student conductor to speak about the music, not to reiterate the printed program notes.

#### *Portfolio:*

Prior to taking the Comprehensive Examination, students in the Instrumental Conducting: Wind-Band Emphasis MM program must submit a portfolio. The portfolio is to include printed concert programs, recordings (audio and visual), resume, transcript, major projects and assignments completed during degree program, presentations, attendance at conferences and symposia, and any other documentation related to experiences in the program. The portfolio is to be submitted during the final term of study for review by the Director of Bands and Director of Athletic Bands.

#### **Culminating Event:**

##### *Comprehensive Examination:*

Taken in the final term of study, this three-part exam is:

1. tailored toward the student's coursework while in the program, and
2. standardized to cover a body of knowledge related to history and repertoire in relation to winds.

The Director of Bands mentors students, creates the exam, and administers the writing and listening portions of the exam. A small committee, including the Director of Bands, the Director of Athletic Bands, and one or two Conducting and/or Music Education (instrumental) faculty, is involved in the creation of the oral portion of the exam. The student is asked questions that are mostly from the major field but also include other areas of music, history, theory and related topics. The department schedules the exam, and the committee grades it pass or fail.

## Jazz Studies MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Jazz Studies.

### About the Program

The master's degree in Jazz Studies consists of advanced training in Jazz Performance and support academic areas vital to the field. Studio and ensemble experiences are combined with rigorous coursework to provide comprehensive training in performance and scholarship. This broad and rigorous program is built on an ideal blend of performance and academic courses taught by an outstanding faculty. Intensive studio training and the proper blend of supportive academic coursework are designed to prompt students to enhance technical expertise while further honing a unique creative/artistic vision.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 5 graduate credits outside the field of music.

**Accreditation:** This degree program has been submitted for Plan Approval by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument in both solo and ensemble settings combined with academic support areas in music. Students must select a concentration from among these major instruments:

- Bassoon
- Cello
- Clarinet
- Double Bass
- Euphonium
- Flute
- French Horn
- Guitar
- Oboe
- Percussion
- Piano
- Saxophone
- Trombone
- Trumpet
- Tuba
- Viola
- Violin
- Voice

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

#### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

#### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 71
- IELTS Academic: 6.5
- PTE Academic: 49

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8100	Jazz Ensemble (4 terms) <sup>1</sup>	4
MUST 8104	Jazz Major	3
MUST 8114	Jazz Major	3
MUST 8124	Jazz Major	3
Jazz Seminars or Jazz Special Topics Courses		9
<b>Electives</b> <sup>2</sup>		<b>5</b>
<b>Final Project</b>		
MUST 8184	Jazz Major (Recital)	3
<b>Total Credit Hours</b>		<b>30</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

### Additional Requirements:

#### *Diagnostic Examinations:*

All entering Master of Music students in Jazz Studies are required to take Diagnostic Examinations in Jazz Theory and Jazz Styles and Analysis prior to the first term of graduate study. The purpose of these examinations is to determine weaknesses in undergraduate preparation. Depending on the examination results, students may be required to take one or more remedial courses. In these instances, the remedial courses will be graded on a "Credit / No Credit" basis and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section thereof to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript.

Remedial courses are offered for undergraduate credit only, and may not count toward graduate degree requirements. Students may take the test only once, and if they do not pass the test or any portion thereof, they must enroll in the remedial course(s) during their first term of study. Depending on which section(s) of the examination are failed, the examiners will stipulate which sections of remedial coursework the student must take. The courses are:

Code	Title	Credit Hours
MUST 5105	Remedial Studies in Jazz History	1-3
MUST 5106	Remedial Studies in Jazz Theory	1-3

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who

1. matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
2. received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in Jazz Studies must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$500 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Final Project:*

Embedded in MUST 8184 Jazz Major (Recital), the final project is based on the total studio experience and the final recital, the program of which demonstrates completed research, composition and arranging.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree [MUST 8184 Jazz Major (Recital)]. Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the

time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music MA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Arts in Music.

### About the Program

The Master of Arts in Music program is designed for students who wish to prepare for entrance into a doctoral program in music. The program is also intended for performers with academic interests who envision teaching music composition, music theory or musicology in the classroom. It is a music-generalist degree program, especially for students who are preparing to teach music composition, music history or music theory as a secondary area in a college or university. The degree does not, however, supplant the MM degrees in Music Composition, Music History, or Music Theory, which examine only one area and are

intended to prepare students for a more focused research-based PhD program.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** Accreditation is being sought from the National Association of Schools of Music (NASM).

**Areas of Specialization:** Within the prescribed credits for the MA in Music, students can focus their studies on music composition, music theory or musicology.

**Job Prospects:** The program prepares students for various careers related to music and for further academic training at the doctoral level.

**Non-Matriculated Student Policy:** With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Decisions regarding admission are rendered after receipt of all required credentials. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** The bachelor's degree in Music may be in any concentration: composition, education, performance, and more.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8749	Current Topics in Musicology and Theory	3
<b>Focused Electives</b>		<b>9</b>
Select courses in Music Composition, Music History, or Music Theory		
<b>Free Electives</b> <sup>1</sup>		<b>15</b>
<b>Total Credit Hours</b>		<b>30</b>

1

Students work with an advisor to select courses that align with their interests in music composition, music theory, musicology, or a cognate area such as performance.

**Language Examination:** To complete the degree, students must fulfill a foreign language requirement in French, German, Italian, Spanish, or another language with approval of the chair. This requirement may be fulfilled in any one of three ways:

1. The student successfully completed four semesters of a foreign language as an undergraduate.
2. The student passes a foreign language examination with the requisite language department.
3. The student takes four terms of a foreign language. Since language credits are at the undergraduate level, they do not count toward the MA degree, but they do fulfill the language requirement.

**Additional Requirements:**

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required for all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present.

Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Piano Proficiency Examination:*

Before the end of their course of study, students in the Music MA program must take a piano proficiency exam, consisting of the following elements:

1. A Bach chorale (prepared).
2. The exposition of a symphony from the 18th or 19th centuries (prepared).
3. The accompaniment of a song (German Lied or French Chanson; prepared).

#### **Culminating Events:**

##### *Comprehensive Examination:*

In their final term of study, students in the Music MA program take a three-hour comprehensive exam. Members of the department, appointed by the chair, devise the exam based on the coursework the student has taken for the degree.

##### *Final Project:*

The final project is an expanded version of a paper or music composition completed in a seminar. The result is intended to be suitable for use when applying to doctoral programs or to show an ability to teach in a particular area. Students submit a written paper in music theory or musicology OR one composition project to their advisor.

## Music MS

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Science in Music.

## About the Program

The Master of Science in Music program is designed for graduate students who wish to broaden their experience in music and combine research and practice at the graduate level. This is a music-generalist degree program that allows students to experience graduate-level instruction that connects research to creative work and problem-solving in a field of practice, as well as expands students' major performing medium or allows them to explore performance media other than their undergraduate major. The degree does not, however, supplant the MM degrees in classical or jazz performance.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** Accreditation is being sought from the National Association of Schools of Music (NASM).

**Areas of Specialization:** Within the prescribed credits for the MS in Music, students can focus their studies on instrumental music, keyboards or voice.

**Job Prospects:** The program prepares students for various careers related to music and for further academic training at the doctoral level.

**Non-Matriculated Student Policy:** With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Audition:** No audition is required for entry to the program, but students do complete an audition for placement in voice lessons and auditioned ensembles at the beginning of the first academic term.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within

"University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 30

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8704	Music in History	3
MUST 8741	Analytical Techniques	3
<b>Lesson Courses in Voice, Keyboards, or Instrumental Music</b>		
Select one from the following:		2
MUSC 5201	Applied Vocal Graduate Minor	
MUSC 5401	Applied Keyboard Graduate Minor	
MUSC 5501	Applied Instrumental Graduate Minor	
Select one from the following:		2
MUSC 5202	Applied Vocal Graduate Minor	
MUSC 5402	Applied Keyboard Graduate Minor	
MUSC 5502	Applied Instrumental Graduate Minor	
Select one from the following:		2
MUSC 5203	Applied Vocal Graduate Minor	
MUSC 5403	Applied Keyboard Graduate Minor	
MUSC 5503	Applied Instrumental Graduate Minor	
<b>Ensemble Courses</b> <sup>1</sup>		<b>3</b>
<b>Electives</b>		
Select two courses in Music History or Music Theory		6
Select two courses in Dance, Music, Music Education, Music Studies, or Musical Theater		6
<b>Total Credit Hours</b>		<b>30</b>

1

Three 1-credit ensemble courses are taken in Instrumental Music or Voice.

**Language Examination:** A language examination is not required for the MS in Music.

**Additional Requirements:**

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

**A. Graduate Diagnostic Examination in Aural Theory**

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

**B. Graduate Diagnostic Examination in Written Theory**

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

**C. Graduate Diagnostic Examination in Music History**

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

**D. Conditions for Exemption from Diagnostic Examinations**

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

**Culminating Events:**

*Final Project:*

As a culminating event, students choose to complete an advisor-approved paper, make a presentation, or deliver a performance that connects research to practice. The paper or program verifying the presentation or performance is placed on file in the Associate Dean's office prior to graduation.

Learn more about the Doctor of Philosophy in Music.

## About the Program

The Music PhD program includes four concentrations: Composition, Music Studies, Music Theory, and Musicology. Each concentration includes a small core of required courses, allowing students to develop their remaining coursework with an advisor to focus on their particular scholarly or creative interests. The concentration in Music Studies allows students to combine disciplines (e.g., Music Theory/Composition or Musicology/Music Theory) in order to face the changes evident in the scholarly/creative fields in music departments throughout the world.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The Music PhD program includes four concentrations:

- Composition
- Music Studies
- Music Theory
- Musicology

**Job Prospects:** Graduates of the program typically find employment in professional music organizations throughout the world and in colleges and universities, among other employment venues in the music profession.

**Non-Matriculated Student Policy:** At the discretion of the department, an applicant may be permitted to enroll for up to 9 graduate credits as a non-matriculated student on a probationary basis, permitting them to attend classes and develop sufficient evidence of compositional talent beyond what is demonstrated at the time of application to qualify for full acceptance into the program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* December 1

Decisions regarding admission are rendered after all required credentials have been submitted and the admissions application is complete.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Master's Degree in Discipline/Related Discipline:** For each of the four concentrations, the following master's degree is expected:

Composition

A degree in Music is expected; a degree in Composition is preferred.

Music Studies

A degree in Music is expected.

Music Theory

A degree in Music is expected; a degree in Music Theory is preferred.

Musicology

A degree in Music is expected; a degree in Musicology/Music History is preferred.

**Bachelor's Degree in Discipline/Related Discipline:** For each of the four concentrations, the following baccalaureate degree is expected:

Composition

A degree in Music is expected; a degree in Composition is preferred.

Music Studies

A degree in Music is expected.

Music Theory

A degree in Music is expected; a degree in Music Theory is preferred.

Musicology

A degree in Music is expected; a degree in Musicology/Music History is preferred.

**Statement of Goals:** Share your special interests within the discipline and your expectations for the program.

**Standardized Test Scores:**

GRE/MAT: Required.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Portfolio:** For those undertaking the Composition concentration, a portfolio is required. Applicants must submit, via Acceptd, evidence of compositional activity. If an applicant has enrolled in MUST 8740 Seminar in Composition prior to submitting an application for formal admission to

the program in Composition, the work accomplished therein may serve to meet this entrance requirement, if satisfactory.

For the concentrations in [Music Studies](#), [Music Theory](#), and [Musicology](#), a portfolio is not required.

**Resume:** Current resume required.

**Scholarly Paper:** For those undertaking the [Composition](#) concentration, applicants must submit, via Acceptd, one research paper that has no fewer than 12 pages.

For the concentrations in [Music Studies](#), [Music Theory](#), and [Musicology](#), applicants must submit, via Acceptd, two research papers on contrasting topics. Each paper must be no fewer than 12 pages in length.

**Advanced Standing:** The Music PhD program consists of 42 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 42 required credits of the doctoral degree. However, students may transfer into the doctoral degree up to 12 graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the PhD degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Other:** The program provides the opportunity for advanced study in music that conforms to the very highest artistic and pedagogical ideals. For this reason, enrollment in the program is limited.

Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 42*

*Required Courses:*

### Composition Concentration

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8740	Seminar in Composition (4 terms)	12
MUST 8749	Current Topics in Musicology and Theory	3
Select two from the following:		6
MUST 9702	Doctoral Seminar in Music Studies: Music Theory	

MUST 9703	Doctoral Seminar in Music Studies: Music History	
MUST 9704	Doctoral Seminar in Music Studies: Music Composition	
<b>Electives</b> <sup>1</sup>		<b>12</b>
<b>Research Course</b>		
MUST 9999	Dissertation/Monograph Research	6
<b>Total Credit Hours</b>		<b>42</b>

1

Student selects no fewer than 12 credits in consultation with an advisor, and with approval of the Chair of Music Studies and the Associate Dean for Student Affairs.

### Music Studies Concentration

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8731	The Pedagogy of Music Theory	3
	or MUST 8737 History and Pedagogy of Musicology	
MUST 8743	Seminar in Stylistic Analysis	3
MUST 8749	Current Topics in Musicology and Theory	3
Select two from the following:		6
MUST 9702	Doctoral Seminar in Music Studies: Music Theory	
MUST 9703	Doctoral Seminar in Music Studies: Music History	
MUST 9704	Doctoral Seminar in Music Studies: Music Composition	
<b>Electives</b> <sup>1</sup>		<b>18</b>
<b>Research Course</b>		
MUST 9999	Dissertation/Monograph Research	6
<b>Total Credit Hours</b>		<b>42</b>

1

Student selects no fewer than 18 credits in consultation with an advisor, and with approval of the Chair of Music Studies and the Associate Dean for Student Affairs.

### Music Theory Concentration

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8739	Schenkerian Analysis 2	3
	or MUST 8771 Post-Tonal Theory II	
MUST 8743	Seminar in Stylistic Analysis	3
MUST 8749	Current Topics in Musicology and Theory	3
Select two from the following:		6
MUST 9702	Doctoral Seminar in Music Studies: Music Theory	
MUST 9703	Doctoral Seminar in Music Studies: Music History	
MUST 9704	Doctoral Seminar in Music Studies: Music Composition	
<b>Electives</b> <sup>1</sup>		<b>18</b>
<b>Research Course</b>		

MUST 9999	Dissertation/Monograph Research	6
<b>Total Credit Hours</b>		<b>42</b>

1

Student selects no fewer than 18 credits in consultation with an advisor, and with approval of the Chair of Music Studies and the Associate Dean for Student Affairs.

## Musicology Concentration

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8737	History and Pedagogy of Musicology	3
MUST 8738	Schenkerian Analysis 1	3
	or MUST 8748 Seminar in Post-Tonal Theory	
MUST 8743	Seminar in Stylistic Analysis	3
MUST 8749	Current Topics in Musicology and Theory	3
Select two from the following:		6
MUST 9702	Doctoral Seminar in Music Studies: Music Theory	
MUST 9703	Doctoral Seminar in Music Studies: Music History	
MUST 9704	Doctoral Seminar in Music Studies: Music Composition	
<b>Electives</b> <sup>1</sup>		<b>15</b>
<b>Research Course</b>		
MUST 9999	Dissertation/Monograph Research	6
<b>Total Credit Hours</b>		<b>42</b>

1

Student selects no fewer than 15 credits in consultation with an advisor, and with approval of the Chair of Music Studies and the Associate Dean for Student Affairs.

**Language Examination:** Prior to the dissertation proposal, students are required to pass two foreign language exams, with preference among German, French and Italian. Students may choose a different language if it relates to their dissertation research. The Chair of the Music Studies Department must approve a language exam outside of German, French and Italian.

### Additional Requirements:

All degree credits are to be earned at Temple University.

#### Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. If the examinations are failed a second time, remediation must occur. Students are advised by departmental faculty who develop a remediation plan according to the student's needs. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate

secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam (required only for the Composition and Music Theory concentrations): From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Composition Exam (required only for the Composition concentration): This examination includes essay questions on stylistic analysis and historical context, the writing of a figured bass line, and the Piano Performance Examination.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Composition Portfolio* (required only for the Composition concentration): Scores of completed compositions in various media must be submitted on or before the date of the Piano Performance Examination. Tapes of works in electronic media may also be submitted with or without graphic representation. All such submitted work of these designations should indicate the composer's abilities to use effectively both instrumental and vocal media, and, if appropriate, electronic media.

#### Piano Performance Examination:

Prior to the examination, the following should be prepared:

1. A twentieth-century work for piano of sufficient technical difficulty and expressive scope to demonstrate at least medium ability.
2. Score-reading a section of a nineteenth- or twentieth-century orchestral score.

In addition, the following is given for sight-reading:

1. Bach chorale.
2. Eighteenth-century orchestral score, in part.
3. Realization of a figured bass.

If the applicant in Composition gives evidence of outstanding ability to work in computer synthesis of music and has an educational background to support this kind of musical composition rather than one oriented to a more traditional performing medium, dispensation of the performance requirement may be made by the department, based on the applicant's evidence of skills related to the above or to other specialized modes of musical composition. If admitted on these qualifications in lieu of performance ability, the applicant is required to undertake sufficient work at the piano to enable them to perform, as a minimum requirement, a prepared chorale harmonization by Bach and a relatively simple orchestral score, also prepared in advance.

#### Recital (required only for the Composition concentration):

A recital of the student's music of chamber dimension is presented as a public event, with the performances the responsibility of the composer-candidate. A faculty committee selected from relevant performance and academic, as well as compositional, areas is asked to attend this recital

and to participate in an oral critique of the recital as a whole with the composer-candidate. This is held at a designated time closely following the recital as set by the department chair. This recital must take place prior to the preliminary examination.

With departmental permission, a student may request a waiver of the recital requirement by presenting scores and recordings of five compositions that have received professional performances. The request must be made in writing to the department chair and a committee convened to review the compositions with the candidate prior to the preliminary examination.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the PhD program in Music until the completion of all coursework.

*Continuation in the PhD Program:*

Each course or seminar requires an end-of-term final grade based on papers presented, recitals prepared, and discussion and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade of less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate

Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Written Preliminary Examination:*

After the student completes coursework, the student and the student's academic advisor agree on a dissertation topic and choose a Doctoral Advisory Committee (DAC). The student presents a written description of the dissertation topic with an accompanying bibliography to the DAC for review. When the committee approves the description and bibliography, a date is set for the Written Preliminary Examination. The examination, composed by the DAC, should test the student's readiness to commence the dissertation. When the student completes the written exam, the DAC convenes an oral defense of the exam. If the defense of the preliminary exam is successful, the student presents a formal dissertation proposal. If the student fails the Written Preliminary Examination, the DAC schedules a second examination.

*Oral Preliminary Examination:*

One week after the completion of the Written Preliminary Examination, the student takes an Oral Preliminary Examination with the DAC.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

*Other:*

Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

**Culminating Events:**

*Proposal:*

Having completed the Written Preliminary Examination, the student's proposal for the dissertation is also complete.

*Dissertation:*

For the Composition concentration, the dissertation consists of two parts:

1. An original composition of dimension approved by the advisor for full or chamber orchestra with or without soloists, or for voices and orchestra, or other approved media.
2. A short research paper suitable for publication.

Early in the term in which a defense of the dissertation is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the dissertation with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

For those in the [Music Studies](#), [Music Theory](#), and [Musicology](#) concentrations, the completed dissertation demonstrates the capability to integrate coursework; identify a viable research topic; develop an appropriate research design; systematically gain evidence toward resolving the stated problem; and write, defend and publicize the results in a professional manner. When the dissertation is complete and approved by the major advisor, the major advisor of the DAC asks the Associate Dean to appoint an "outside" reader, who is a graduate faculty member from Temple or another university, but not from the faculty of the student's home department. The DAC plus the outside reader comprise the Dissertation Examining Committee (DEC) for the oral defense. The DEC is formed early in the term in which a defense is anticipated.

One month prior to the requested defense date, the "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," must be submitted to the Associate Dean bearing all appropriate signatures. This form is available in the Main Office and on the Graduate School website. Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Composition MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Composition.

## About the Program

The Master of Music in Composition is a regimen of professional training spanning the gamut of traditional academic studies from counterpoint to experimental studies in subjects such as software synthesis. The master's program encourages the composer of demonstrated accomplishment to develop a personal voice through private study with at least two members of the Composition faculty.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Job Prospects:** The program prepares students for various careers related to music, as well as for further academic and musical training at the doctoral level.

**Non-Matriculated Student Policy:** With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom

assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Portfolio:** The composition portfolio should demonstrate the student's skills in music composition.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews,

recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8726	Computer Synthesis	3
MUST 8740	Seminar in Composition (4 terms)	12
Select two from the following:		6
MUST 8742	Seminar in Theoretical Analysis	
MUST 8743	Seminar in Stylistic Analysis	
MUST 8744	Seminar in Stylistic Analysis	
MUST 8745	Seminar in Stylistic Analysis	
MUST 8746	Seminar in Stylistic Analysis	
<b>Electives</b> <sup>1</sup>		<b>9</b>
Recommended courses include:		
MUST 8701	Research in Music	
MUST 8713	Canon and Fugue	
MUST 8727	Electronic Music Composition: Practice, History, Theory	
MUST 8747	Aesthetics of Music	
<b>Total Credit Hours</b>		<b>30</b>

1

Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

**Language Examination:** Reading knowledge of a foreign language is expected. If a deficiency exists, students may be required to take up to two terms of a foreign language.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon

registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Piano Examination:*

Composition majors must pass a functional piano examination encompassing the following points:

1. Score Reading: Prepared in advance of the examination, the scores are to be brought to the examination. The exposition of the first movement of a symphony by Haydn or Mozart is recommended. Suggested scores are the 12 "London" symphonies by Haydn or one

of the last six symphonies by Mozart. Students may elect to play a more difficult score by a later composer.

2. Sight-reading a Bach chorale.
3. Realization of a figured bass.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise.

Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Participation in Ensembles:*

With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Comprehensive Examination:*

Upon completion of a minimum of 30 credits of graduate study and with the approval of the major advisor, the student may request permission from the Associate Dean of the Boyer College of Music and Dance to take the written qualifying examination. This request must be made in writing at least one month before the scheduled date of the examination. If desired, the student may take this examination during the final term of graduate study. The master's qualifying examination is offered once each term.

The Music Composition Division requires a five-hour written examination that includes the composition of a fugal exposition on a subject provided; the composition of a figured bass; the reduction, analysis and identification of a passage from a provided orchestral work; and two essays about the history and practice of composition. In addition, the division administers a one-hour oral examination consisting of discussion and identification of various orchestral scores. Scheduled by Assistant Dean David Brown, the exam is graded by two members of the department's graduate faculty.

*Portfolio:*

Students are required to submit a portfolio of their work completed during the time they participated in the Master of Music program.

## Music Education MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Music Education.

### About the Program

The Master of Music in Music Education degree offers opportunities for advanced studies on broad-based principles and practices in Music Education, as well as theories of learning and teaching, and provides an introduction to research methodology.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main. Also offered fully online for students currently residing in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Illinois,

Maine, Montana, Nebraska, New Hampshire, New Jersey, North Carolina, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Vermont, Virginia, Wisconsin and Wyoming. Whether enrolling in the in-class or the online program, students must already hold teacher certification in at least one state.

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The Music Education programs at Boyer College of Music and Dance are fully accredited by the National Association of Schools of Music (NASM), the Pennsylvania Department of Education, and the National Council for Accreditation of Teacher Education (NCATE).

**Areas of Specialization:** The MM in Music Education provides opportunities for advanced study through specialization in either music education practice or music education research. This program of study is designed for students intending to pursue a doctoral degree in Music Education, those seeking permanent certification in Pennsylvania. or those who view the degree as terminal.

**Job Prospects:** Students typically find employment in educational systems and also within the music industry. The program also is recommended for those who plan to pursue a doctoral degree in Music Education.

**Non-Matriculated Student Policy:** With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 1

*Spring:* November 15

Decisions regarding admission are rendered after all required credentials have been submitted and the admissions application is complete.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study. Applicants who received a bachelor's

degree from the Boyer College of Music and Dance within the previous 12 months are exempt from this requirement.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music Education is required.

**Statement of Goals:** Provide a written account of your accomplishments to date, goals and expectations for the program, goals for beyond the program, and special interests in the discipline.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61

**Resume:** Your current resume must be submitted in paper form with other supporting application materials and forwarded electronically to the department chair.

**Academic and Musical Profile (AMP):** The Academic and Musical Profile (AMP) consists of two parts:

1. Performance: Applicants must submit a digital video of representative instruction episodes that adequately demonstrate both teaching skills and musicianship. The tape should be no more than 15 minutes in duration and may include any type of music teaching. Applicants should include a brief written narrative explaining the contents of the video.
2. Written: This examination is completed by the applicant during the on-campus interview visit. The applicant has 90 minutes to demonstrate writing skills and general knowledge about music education. The exam is scored by Music Education faculty. Results are considered in the admissions decision. Additional coursework may be required to remediate inadequacies.

**Teaching Certification:** Applicants must be certified to teach in at least one state in the United States. A copy of the teaching certificate must be submitted.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the

Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

Applicants are encouraged, but not required, to submit any additional information that will help the faculty making an admissions decision. Additional items may include, but are not limited to, digital recordings of compositions or arrangements, recordings of performance groups, lesson or rehearsal plans, curriculum development material, and recital performance recordings.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*<sup>1</sup>

Code	Title	Credit Hours
<b>Core Courses</b>		
MUED 8651	Psych Music Lrn & Behav	3
MUED 8652	Measurement and Evaluation in Music	3
MUED 8653	Learning Theory in Music	3
MUED 8661	Research in Music Education	3
<b>Electives</b>		
Additional Music Education Courses		6
Coursework in Supporting Areas <sup>2</sup>		9
<b>Capstone Course</b>		
MUED 9995	Master's Final Project	3
	or MUED 9996 Master's Thesis Music Education	
<b>Total Credit Hours</b>		<b>30</b>

1

All MM coursework stresses the acquisition of advanced knowledge of the theory of teaching and learning, as well as principles of and practices in Music Education.

2

"Supporting areas" include, for example, ethnomusicology, music history and music theory.

**Additional Requirements:**

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon

registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of

Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Applied Study:*

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor, department chair, and the chair of vocal or instrumental studies. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of \$200, not covered by tuition remission, is charged.
2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of \$400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.
3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Event:**

##### *Comprehensive Oral Examination:*

Students in the Music Education MM program must take a comprehensive oral examination as part of the capstone course. The choice of capstone course must be declared no later than the second term of study following discussion with the academic advisor:

- MUED 9995 Master's Final Project: The comprehensive oral examination is part of the oral defense of the final project. It is scheduled individually during finals week. The student is asked to apply coursework materials to concepts covered in the final written project. The Defense Examining Committee presides and evaluates.

- MUED 9996 Master's Thesis Music Education: The comprehensive oral examination is part of the oral defense of the thesis. The student is asked to apply coursework materials to concepts covered therein. The Defense Examining Committee presides and evaluates.

## Music Education PhD

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Philosophy in Music Education.

### About the Program

The PhD program in Music Education stresses the development of university teaching skills and research experience. It prepares music educators with advanced skills in quantitative or qualitative research methods to effectively translate research findings into music education practice and develops a cadre of music education professors who can assume leadership roles in the music education profession. Students are offered advanced study through specialization in music education practice and research, focusing on skills development and accountability for a diverse student population in a rapidly changing educational terrain. The program provides a home for those with traditional and non-traditional backgrounds. Its breadth and flexibility allow outstanding opportunities for differences in expertise and focus. The curriculum is

overseen by the academic advisor in concert with the departmental PhD advisory committee.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** Interdisciplinary study is encouraged.

**Accreditation:** The Music Education programs at Boyer College of Music and Dance are fully accredited by the National Association of Schools of Music (NASM), the Pennsylvania Department of Education, and the National Council for Accreditation of Teacher Education (NCATE).

**Areas of Specialization:** Students enrolled in the PhD program in Music Education identify an area of scholarly focus while at Temple. Examples include, but are not limited to, arts education, choral education, composition, conducting, dance and movement, early childhood music education, educational administration, educational policy studies, elementary music education, general music education, instrumental education, kinesiology, music history, music theory, psychology, secondary music education, sociology, technology and urban education.

**Job Prospects:** Graduates of the program typically find employment in colleges and universities, public and private educational systems, and other venues in the music industry, or as independent researchers.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 1  
*Spring:* September 15

Decisions regarding admission are rendered after all required credentials have been submitted and the admissions application is complete.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study. Applicants who received a degree from

the Boyer College of Music and Dance within the previous 12 months are exempt from this requirement.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected. At least one degree, whether bachelor's or master's, must be in Music Education.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is required.

**Statement of Goals:** Provide a written account of your accomplishments to date, goals and expectations for the program, goals for beyond the program, and special interests in the discipline.

**Standardized Test Scores:**  
GRE/MAT: Optional

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Resume:** Your current resume must be submitted in paper form with other supporting application materials and forwarded electronically to the department chair.

**Interview:** After the complete admissions application has been received by Temple University, applicants should contact the department at 215-204-8310 to arrange a campus visit and schedule an interview.

**Writing Sample:** Applicants submit a paper that was written while completing the master's degree. This paper should demonstrate the applicant's scholarship and writing ability.

**Academic and Musical Profile (AMP):** The Academic and Musical Profile (AMP) consists of two parts:

1. Performance: Applicants must submit a digital video of representative instruction episodes that adequately demonstrate both teaching skills and musicianship. The recording should be no more than 15 minutes in duration and may include any type of music teaching. Applicants should include a brief written narrative explaining the contents of the video. The digital video is submitted via Acceptd.
2. Written: This examination is completed by the applicant during the on-campus interview visit. The applicant has 90 minutes to demonstrate writing skills and general knowledge about music education, including contemporary theories, practices, problems and trends. The exam is scored by Music Education faculty. Results are considered in the admissions decision. Additional coursework may be required to remediate inadequacies.

**Teaching Certification:** Applicants must be certified to teach in at least one state in the United States. A minimum of three years' successful elementary or secondary teaching experience is required. A copy of the teaching certificate must be submitted.

**Advanced Standing:** The PhD program in Music Education consists of 60 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 60 required credits of the doctoral degree. However, students may transfer into the doctoral degree up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the PhD program and must be approved by the major advisor, the department chair, and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

<b>Total Credit Hours</b>		<b>60</b>

1

Electives in Music Education are taken in the Major Area, advised by the academic advisor. These courses are taken in Music Education and research skills development (educational psychology, statistics, etc.). A course of study is developed depending on the candidate's prior experiences and professional goals.

2

Electives in Music Supportive Areas are designed to reinforce musical foundations and musicianship. They include conducting, ethnomusicology, literature, music history, music theory, and performance.

3

After the candidate has been accepted into the program but prior to the first term of study, the candidate declares a cognate area in concert with the academic advisor. The candidate and faculty advisor then develop a general course of study appropriate to the cognate area. The course of study becomes the curriculum that guides the student and faculty advisor throughout the degree program. During the first year of study, students may opt to modify the course of study and/or cognate area in consultation with the advisor. Following the first year of study, the cognate area and general course of study become binding.

#### **Additional Requirements:**

##### *Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed. If the examinations are failed a second time, remediation must occur. Students are advised by departmental faculty who develop a remediation plan according to the student's needs.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.

##### *Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the PhD program in Music Education until completion of all coursework.

##### *Continuation in the PhD Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major

examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade of less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

##### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

##### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

##### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

##### *Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. They should be taken no later than the end of the fifth year. Subject areas are in the major field, as well as in the minor field areas (typically Music History and Music Theory). The written preliminary examinations in Music Education require the student to demonstrate knowledge and the ability to transfer concepts and ideas. The focus is on assessment methods; current issues in Music Education; foundations (psychological, sociological, historical, philosophical); music perception and cognition; musicianship and aesthetic development; research interpretation; research methods; and teaching methods.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times

of the preliminary examinations for which they have been scheduled. A study guide for the Music Education Preliminary Examinations is available in the Music Education Office. Students are advised to prepare written answers to the questions in the study guide.

Faculty members within the student's major and minor subject areas are involved in preparing the examination questions. At least three graduate faculty members independently read and score each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Paper Project:*

While a student is matriculated, completion of at least one pre-dissertation sole-authored article suitable for publication in a refereed journal is required. The paper project must demonstrate the ability to synthesize information and processes of research and go significantly beyond any course assignment. It may not duplicate any previous papers completed by the student outside of the degree program. The work on this paper may begin at any time during coursework and must meet current professional standards for publication. The student works with the academic advisor on planning the paper project as soon as the student matriculates in the program. The academic advisor and department chair must approve all project plans.

*Residency:*

A one-year residency of two contiguous (Fall and Spring) terms is required for PhD candidates. During the residency, internship requirements are met. The residency provides candidates with the opportunity to work closely with a faculty mentor and allows focused time for work toward degree completion with faculty guidance. Candidates with previous University teaching experience may apply for a residency waiver.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

*Other:*

Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

**Culminating Events:**

*Proposal:*

Students work with the major advisor to prepare a proposal. With the knowledge of the major advisor, the student may consult other faculty members. When the major advisor approves the dissertation proposal, an oral defense of the dissertation proposal is scheduled with all Music Education faculty members present. Faculty members must receive a hard copy of the dissertation proposal no fewer than two weeks before the scheduled defense.

After a dissertation proposal has been developed by the student and approved by the major advisor and Music Education faculty at the oral defense, the student prepares a final copy for approval. At the same time, the student identifies the members of the Doctoral Advisory Committee (DAC) in consultation with the major advisor. The major advisor then provides the names of the DAC members to the Associate Dean for consideration. The DAC is appointed officially by the Graduate School. The DAC consists of no fewer than three persons: the student's major advisor, a second person from the department, and a third person from outside the department. Each member of the DAC must sign the final proposal. When all DAC members have signed the title page, the student copies the final proposal and delivers, within 30 days, one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School.

After all coursework is completed, preliminary examinations have been passed, and the dissertation proposal has been accepted by the Music Education faculty, the candidate should register for MUED 9999 Doctoral Dissertation each Fall and Spring term until the dissertation has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUED 9999 during their program as a whole, but must register for a minimum of 1 such credit each term while working on the dissertation.

*Dissertation:*

The completed dissertation demonstrates the capability to integrate coursework; identify a viable research topic; develop an appropriate research design; systematically gain evidence toward resolving the stated problem; and write, defend and publicize the results in a professional manner. When the dissertation is complete and approved by the major advisor, the major advisor of the DAC asks the Associate Dean to appoint an outside reader, who is a graduate faculty member from Temple or another university, but not from the faculty of the student's home department. The DAC plus the outside reader comprise the Dissertation Examining Committee (DEC) for the oral defense. The DEC is formed early in the term in which a defense is anticipated.

One month prior to the requested defense date, the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," must be submitted to the Associate Dean bearing all appropriate signatures. Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music History MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Music History.

### About the Program

The Master of Music in Music History is intended for those who wish to expand their knowledge of historical styles, genres, composers, periods, music literature and analytical techniques. The program is especially recommended for those who want to pursue a doctoral degree in musicology.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Within the prescribed credits for the MM in Music History, students can focus their studies on traditional Western-oriented music history topics spanning antiquity through the twentieth century.

**Job Prospects:** The program prepares students for various careers related to music and for further academic and musical training at the doctoral level.

**Non-Matriculated Student Policy:** With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Decisions regarding admission are rendered after receipt of all required credentials. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S.

institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** Current resume required.

**Writing Sample:** Applicants must submit with the application for admission an undergraduate-level paper demonstrating their ability to do musical analysis and/or report research.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 32*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8749	Current Topics in Musicology and Theory	3
Select one from the following:		3
MUST 8742	Seminar in Theoretical Analysis	
MUST 8743	Seminar in Stylistic Analysis	
MUST 8744	Seminar in Stylistic Analysis	
MUST 8745	Seminar in Stylistic Analysis	
MUST 8746	Seminar in Stylistic Analysis	
Select four additional Music History courses from MUST 8000 and above		12
<b>Electives</b> <sup>1</sup>		<b>9</b>
<b>Capstone Course</b>		
MUST 9995	Final Project: Music Technology (2 terms)	2
<b>Total Credit Hours</b>		<b>32</b>

1

Select from Music, Music Education, Music Studies, and other graduate departments. Up to 6 credits in applied music study are permitted. Advisor approval required.

**Language Examination:** Reading knowledge of a foreign language is expected. If a deficiency exists, students may be required to take up to four terms of a foreign language.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700

2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Piano Examination:*

Music History majors take a functional piano examination encompassing the following points:

1. Score Reading: Prepared in advance of the examination, the scores are to be brought to the examination. The exposition of the first movement of a symphony by Haydn or Mozart is recommended. Suggested scores are the 12 "London" symphonies by Haydn or one of the last six symphonies by Mozart. Students may elect to play a more difficult score by a later composer.
2. Performing a portion of the score of a four- (or more) part choral work from any period.
3. Accompanying on an elementary lied.
4. Sight-reading a Bach chorale.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming

familiar with the College's statement on plagiarism and academic honesty.

#### *Applied Music Study:*

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of \$200, not covered by tuition remission, is charged.
2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of \$400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.
3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Comprehensive Examination:*

Upon completion of a minimum of 30 credits of graduate study and with the approval of the major advisor, the student may request permission from the Associate Dean of the Boyer College of Music and Dance to take the written qualifying examination. This request must be made in writing at least one month before the scheduled date of the examination. If desired, the student may take this examination during the final term of graduate study. The master's qualifying examination is offered once each term.

The three-hour written examination in Music History covers topics from the Middle Ages to the present, bibliographic resources, and performance practice. More penetrating questions are included in subject areas that the student has covered in formal situations. Musical scores are included for analysis and discussion. Scheduled by Assistant Dean David Brown, the exam is graded by two members of the department's graduate faculty.

##### *Final Written Project:*

Music History majors write a final written project (MUST 9995 Final Project: Music Technology) that is 50-75 pages in length. This is not a thesis. The project provides an opportunity to utilize and demonstrate the skills acquired in historical, stylistic and analytical research, and also provides a vehicle needed for those interested in applying for doctoral studies. No defense of the final written project is scheduled. The major advisor evaluates and grades the final written project.

## Music Performance/Bassoon MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

## About the Program

The master's degree in Bassoon Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann

3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
 (a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the

use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/Cello MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

### About the Program

The master's degree in Cello Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

### Admission Requirements and Deadlines

**Application Deadline:**

Fall: March 1  
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

#### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

#### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment

Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 32

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500	Instrumental Ensemble (4 terms) <sup>1</sup>	4
MUSC 8504	Instrumental Major	3
MUSC 8510	Instrumental Ensemble (4 terms) <sup>1</sup>	4
MUSC 8514	Instrumental Major	3
MUSC 8524	Instrumental Major	3
MUSC 8561	Lower String Pedagogy	2
	or MUSC 8562 Upper String Pedagogy	
MUST 8701	Research in Music	3
<b>Electives<sup>2</sup></b>		<b>7</b>
<b>Public Recital</b>		
MUSC 8584	Instrumental Major (Recital)	3
<b>Total Credit Hours</b>		<b>32</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

### Additional Requirements:

#### Diagnostic Examinations:

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

**A. Graduate Diagnostic Examination in Aural Theory**

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this

type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/Classical Guitar MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF  
MUSIC AND DANCE

Learn more about the Master of Music in Performance.

### About the Program

The master's degree in Classical Guitar Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made

only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized

examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500	Instrumental Ensemble (2 terms) <sup>1</sup>	2
MUSC 8504	Instrumental Major	3

MUST 8748	Seminar in Post-Tonal Theory	
MUST 8749	Current Topics in Musicology and Theory	
<b>Electives</b> <sup>2</sup>		<b>8</b>
<b>Public Recital</b>		
MUSC 8584	Instrumental Major (Recital)	3
<b>Total Credit Hours</b>		<b>30</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor

perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *University Orchestra:*

At the master's degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/Euphonium MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

### About the Program

The master's degree in Euphonium Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: March 1

Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 30

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>

<b>Electives<sup>2</sup></b>		<b>8</b>
<b>Public Recital</b>		
MUSC 8584	Instrumental Major (Recital)	3
<b>Total Credit Hours</b>		<b>30</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

#### **Additional Requirements:**

##### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann

3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and

open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course

is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher,

a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/French Horn MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

### About the Program

The master's degree in French Horn Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500	Instrumental Ensemble (2 terms) <sup>1</sup>	2

MUST 8748	Seminar in Post-Tonal Theory	
MUST 8749	Current Topics in Musicology and Theory	
<b>Electives <sup>2</sup></b>		<b>8</b>
<b>Public Recital</b>		
MUSC 8584	Instrumental Major (Recital)	3
<b>Total Credit Hours</b>		<b>30</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

**Additional Requirements:**

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

**A. Graduate Diagnostic Examination in Aural Theory**

Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *University Orchestra:*

At the master's degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject

to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/Harpsichord MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

## About the Program

The master's degree in Harpsichord Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Keyboard Instruction provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With the approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8441	Seminar in Early Keyboard Instruments I	3
MUSC 8477	Baroque Keyboard Performance Practice	3
MUSC 8500	Instrumental Ensemble <sup>1</sup>	1
MUSC 8510	Instrumental Ensemble <sup>1</sup>	1
MUSC 8904	Harpsichord Major	3
MUSC 8914	Harpsichord Major	3
MUSC 8924	Harpsichord Major	3
MUST 8701	Research in Music	3
<b>Electives <sup>2</sup></b>		<b>7</b>
Recommended course includes:		
MUSC 8478	Classical Keyboard Performance Practice	
<b>Public Recital</b>		
MUSC 8984	Harpsichord Major	3
<b>Total Credit Hours</b>		<b>30</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

#### Additional Requirements:

##### Diagnostic Examinations:

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall

term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Final Project:*

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the MM program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Studies adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Studies no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Studies no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the Department of Keyboard Studies read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either "Pass" or "Fail." If the student fails, they are not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and graded as before. If the student fails a second time, they are dismissed from the degree program.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A recital approval jury must be formed to demonstrate the student's ability to perform the degree recital successfully. Normally, this occurs at the preceding term's jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

### Additional Requirements:

#### Diagnostic Examinations:

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special

Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued

a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to

the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/Percussion MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

### About the Program

The master's degree in Percussion Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions

are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and

- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per academic term lesson

fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Final Project:*

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the MM program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations

- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Studies adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Studies no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Studies no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the Department of Keyboard Studies read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either "Pass" or "Fail." If the student fails, they are not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and graded as before. If the student fails a second time, they are dismissed from the degree program.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8484). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A recital approval jury must be formed to demonstrate the student's ability to perform the degree recital successfully. Normally, this occurs at the preceding term's jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

## Music Performance/Saxophone MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

## About the Program

The master's degree in Saxophone Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: March 1

Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Courses Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500	Instrumental Ensemble (2 terms) <sup>1</sup>	2

MUSC 8524	Instrumental Major	3
MUST 8701	Research in Music	3
Select one from the following:		3
MUST 8742	Seminar in Theoretical Analysis	
MUST 8743	Seminar in Stylistic Analysis	
MUST 8744	Seminar in Stylistic Analysis	
MUST 8745	Seminar in Stylistic Analysis	
MUST 8746	Seminar in Stylistic Analysis	
MUST 8747	Aesthetics of Music	
MUST 8748	Seminar in Post-Tonal Theory	
MUST 8749	Current Topics in Musicology and Theory	
<b>Electives<sup>2</sup></b>		<b>8</b>
<b>Public Recital</b>		
MUSC 8584	Instrumental Major (Recital)	3
<b>Total Credit Hours</b>		<b>30</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

#### Additional Requirements:

##### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:****Comprehensive Examination:**

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

**Public Recital:**

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may

be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study

for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/Trumpet MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

### About the Program

The master's degree in Trumpet Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional

artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

**Additional Requirements:**

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

## A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

## B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

## C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

## D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject

to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

#### *Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## **Music Performance/Viola MM**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

## About the Program

The master's degree in Viola Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. No more than 2 credits of MUSC 8555 Orchestral Repertoire can be taken as an elective. Advisor approval required.

### Additional Requirements:

#### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann

3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
 (a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *University Orchestra:*

At the master's degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

#### *Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8584). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

## Music Performance/Voice MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Performance.

### About the Program

The master's degree in Voice Performance prepares singers for multifaceted careers as well-rounded performers on concert and operatic stages and/or as teachers of voice. The ultimate goal of the program is to produce singing artists capable of competing successfully in the professional world of music.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The program offers a systematic approach to vocal technique; specialized studies in vocal literature; the refinement of language and diction skills; the development of acting techniques; the continued refinement of musical and theoretical skills; advanced study in musical style and performance practice; and the provision of recital, operatic and concert performance opportunities designed to emulate a professional environment.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: March 1  
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In

addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 30

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8204	Voice Major	3
MUSC 8214	Voice Major	3
MUSC 8220	Opera Workshop (2 terms)	4
MUSC 8224	Voice Major	3
Select two from the following:		4
MUSC 8245	Vocal Literature: Renaissance and Baroque	
MUSC 8246	Vocal Literature: Classical/Bel Canto	
MUSC 8247	Vocal Literature: German Romantic	
MUSC 8248	Vocal Literature: French Romantic	
MUSC 8249	Vocal Literature: Contemporary	
MUST 8701	Research in Music	3
Select one from the following:		3
MUST 8742	Seminar in Theoretical Analysis	
MUST 8743	Seminar in Stylistic Analysis	
MUST 8744	Seminar in Stylistic Analysis	
MUST 8745	Seminar in Stylistic Analysis	
MUST 8746	Seminar in Stylistic Analysis	
MUST 8747	Aesthetics of Music	
MUST 8748	Seminar in Post-Tonal Theory	
MUST 8749	Current Topics in Musicology and Theory	
<b>Electives</b> <sup>1</sup>		<b>4</b>
<b>Public Recital</b>		
MUSC 8284	Voice Major-Recital	3
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup>

Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. No more than 2 credits of MUSC 8215 Vocal Coaching can be taken as an elective. Advisor approval required.

**Language Examination:** Candidates in the Voice Performance program must present undergraduate coursework in French, German and Italian languages (or pass a translating and speaking examination at Temple) at the time of admission. Where the transcript or pass-off examination does not reveal such study, the appropriate deficiency course(s) must be taken prior to completion of the master's degree.

### Additional Requirements:

#### Diagnostic Examinations:

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition,

Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Functional Piano Examination:*

In addition to the written diagnostic examinations required upon entrance to the program, Voice majors take a functional piano examination encompassing the following points:

1. Playing a prepared accompaniment (music can be used).
2. Sight-reading a simple accompaniment.
3. Improvising an accompaniment to a simple melody.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject

to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.

## **Music Performance/Bassoon DMA**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

### **About the Program**

The objective of the DMA program in Bassoon Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is

available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9504	Doctoral Instrumental Major	3
MUSC 9514	Doctoral Instrumental Major	3
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9524	Doctoral Instrumental Major	3
MUSC 9534	Doctoral Instrumental Major	3
MUSC 9562	Double Reed Woodwind Pedagogy	2
MUSC 9684	DMA Lecture-Recital	1
	or MUSC 9784 DMA Performance with Orchestra	
MUSC 9701	Doct Perf Practice I	3
	or MUSC 9702 Doct Perf Practice II	
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Electives</b>		
	Music History	3
	Advanced Music	3
	<b>Minor Area in Music</b> <sup>1</sup>	<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

#### *Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

#### *Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

#### *Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

#### *Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals.

Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided

at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:***Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Cello DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

### About the Program

The objective of the DMA program in Cello Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5

- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A Bach unaccompanied suite (complete).
- A major concerto such as Dvorak, Haydn, Lalo, Schumann, Shostakovich, or Tchaikovsky's *Variations on a Rococo Theme*.
- A sonata of contrasting period/style from the concerto, i.e., Classical period if the concerto is Romantic or Romantic period if the concerto is Classical.
- A virtuoso composition such as *At the Fountain, Elfentanz*, or Weber's *Adagio and Rondo*.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized

examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 55*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500	Instrumental Ensemble	1
	or MUSC 8510 Instrumental Ensemble	
MUSC 9004	Doctoral String Major	3
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9014	Doctoral String Major	3
MUSC 9021	Chamber Music	1
MUSC 9024	Doctoral String Major	3
MUSC 9034	String Major Doctorate	3
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9384	DMA Chamber Recital	1
	or MUSC 9684 DMA Lecture-Recital

MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>55</b>

<sup>1</sup>

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9184)
2. Chamber Music Recital (MUSC 9384) or Lecture Recital (MUSC 9684)

3. Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:***Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the

Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the

Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Clarinet DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

## About the Program

The objective of the DMA program in Clarinet Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been

recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment

Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Master's: 54

#### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9504	Doctoral Instrumental Major	3
MUSC 9514	Doctoral Instrumental Major	3
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9524	Doctoral Instrumental Major	3
MUSC 9534	Doctoral Instrumental Major	3
MUSC 9561	Single Reed Woodwind Ped	2
MUSC 9684	DMA Lecture-Recital	1
	or MUSC 9784 DMA Performance with Orchestra	
MUSC 9701	Doct Perf Practice I	3
	or MUSC 9702 Doct Perf Practice II	
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Electives</b>		
	Music History	3
	Advanced Music	3
	<b>Minor Area in Music</b> <sup>1</sup>	<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from courses at the level of MUSC 8404 or higher.

#### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

#### Additional Requirements:

##### Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

##### Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

##### Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

##### Continuation in the DMA Program:

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals

##### Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give

impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year,

and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Two contrasting movements from a Bach unaccompanied suite.
- A major concerto such as Bottesini, Capuzzi, Dittersdorf, or Koussevitzky.

- A sonata or similar work of contrasting period/style from the concerto, i.e., Classical or 20th Century if the concerto is Romantic, or Romantic or Classical if the concerto is 20th Century.
- A virtuoso composition such as Bottesini, Paganini, Simandl, or the like.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 55*

### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500 or MUSC 8510	Instrumental Ensemble	1
MUSC 9004	Doctoral String Major	3
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9014	Doctoral String Major	3
MUSC 9021	Chamber Music	1
MUSC 9024	Doctoral String Major	3
MUSC 9034	String Major Doctorate	3
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9384 or MUSC 9684	DMA Chamber Recital DMA Lecture-Recital	1
MUSC 9515	Technical and Interpretive Seminar-Strings	2
MUSC 9516	Seminar for String Literature	2
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9567	Lower String Pedagogy	2
MUSC 9784	DMA Performance with Orchestra	1
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Elective in Music History</b>		<b>3</b>
<b>Minor Area in Music <sup>1</sup></b>		<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>55</b>

1

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9184)
2. Chamber Music Recital (MUSC 9384) or Lecture Recital (MUSC 9684)
3. Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

#### Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate

secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and

open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must

be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC,

the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Final Recital:**

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

**Proposal:**

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

**Monograph:**

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

**Music Performance/Euphonium DMA**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

**About the Program**

The objective of the DMA program in Euphonium Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based

on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>

MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from courses at the level of MUSC 8404 or higher.

**Recitals:**

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:***Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.

4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate

in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within

the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued

a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

#### *Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

##### *Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

##### *Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

# Music Performance/Flute DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

## About the Program

The objective of the DMA program in Flute Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral

program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9504	Doctoral Instrumental Major	3
MUSC 9514	Doctoral Instrumental Major	3
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9524	Doctoral Instrumental Major	3
MUSC 9534	Doctoral Instrumental Major	3
MUSC 9564	Flute Pedagogy	2
MUSC 9684	DMA Lecture-Recital	1
	or MUSC 9784 DMA Performance with Orchestra	
MUSC 9701	Doct Perf Practice I	3
	or MUSC 9702 Doct Perf Practice II	
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3

### Electives

Music History	3
Advanced Music	3
<b>Minor Area in Music</b> <sup>1</sup>	<b>12</b>
<b>Research Course</b>	
MUSC 9999 Monograph Research	6
<b>Total Credit Hours</b>	<b>54</b>

1

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

*Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

### Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to

the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's

curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure

in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension

during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/French Horn DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

### About the Program

The objective of the DMA program in French Horn Performance is to foster growth and development of the highest and most sophisticated

expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.

2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9504	Doctoral Instrumental Major	3
MUSC 9514	Doctoral Instrumental Major	3
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9524	Doctoral Instrumental Major	3
MUSC 9534	Doctoral Instrumental Major	3
MUSC 9566	Upper Brass Pedagogy	2
MUSC 9684	DMA Lecture-Recital	1
	or MUSC 9784 DMA Performance with Orchestra	
MUSC 9701	Doct Perf Practice I	3
	or MUSC 9702 Doct Perf Practice II	
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Electives</b>		
	Music History	3
	Advanced Music	3
	<b>Minor Area in Music</b> <sup>1</sup>	<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from courses at the level of MUSC 8404 or higher.

**Recitals:**

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:***Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study

culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised

by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Final Oral Examination:**

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:****Final Recital:**

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

**Proposal:**

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

**Monograph:**

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

**About the Program**

The objective of the DMA program in Harp Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of this program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5

- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A sonata or solo from the Baroque period, e.g., *Sonata in G Major* by C.P.E. Bach.
- A major concerto, e.g., *Harp Concerto* by Ginastera, or *Danse Sacrée et Danse Profane* by Debussy.
- A sonata or major solo from the Romantic or Impressionist period, e.g., Britten's *Suite for Harp in C Major, Op. 83* or Tournier's *Sonatine, Op. 30*.
- A representative 20th-Century work, preferably written after 1950.
- Four orchestral excerpts and/or cadenzas.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews,

recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9184)
2. Chamber Music Recital (MUSC 9384) or Lecture Recital (MUSC 9684)

3. Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

#### *Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

#### *Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

#### *Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

#### *Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the

Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the

Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Historical Keyboard DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

## About the Program

The objective of the DMA program in Historical Keyboard Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance. Under the guidance of a highly specialized faculty, students are expected to achieve the most advanced level of professional knowledge, training and experience in the performance of solo and ensemble music on historical keyboard instruments. Studies encompass repertoire from approximately the year 1500 up through the present.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program has been submitted for Plan Approval by the National Association of Schools of Music (NASM).

**Areas of Specialization:** To thoroughly prepare for future professional performance opportunities, students learn technique and figured bass, as well as gain a working knowledge of tuning and maintenance assistance. In keeping with the historical basis of the study, 17th- and 18th-century

performance practice are emphasized in all course and studio work to ensure the cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program are qualified to find employment in professional music ensembles throughout the world, in colleges and universities, in private teaching studios, and as professional accompanists and coaches, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Repertory representing at least three different styles, chosen from German, French, Italian, English, or Iberian works composed prior to 1800.
- Sight-read a simple basso continuo line.

Memorization is not required.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

#### Additional Requirements:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 9 required credits within the Music Studies area.
3. Show transcript evidence at the master's level in the area of performance practices. If no transcript evidence can be presented, students must take up to 6 credits of MUSC 8477 Baroque Keyboard Performance Practice and/or MUSC 8478 Classical Keyboard Performance Practice .

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

#### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8441	Seminar in Early Keyboard Instruments I	3
MUSC 8442	Seminar in Early Keyboard Instruments II	3
MUSC 9011	Doctoral Chamber Music	1
MUSC 9104	Historical Keyboard Instruments Major/Doctoral	3
MUSC 9114	Historical Keyboard Instruments Major/Doctoral	3
MUSC 9124	Historical Keyboard Instruments Major/Doctoral	3
MUSC 9134	Historical Keyboard Instruments Major/Doctoral	3
MUSC 9351	Performance Traditions	3
MUSC 9384	DMA Chamber Recital	1
MUSC 9451	Keyboard Literature-Doctoral	2
MUSC 9452	Keyboard Literature-Doctoral	2
MUSC 9684	DMA Lecture-Recital	1
MUSC 9701	Doct Perf Practice I	3
MUSC 9784	DMA Performance with Orchestra	1
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Electives <sup>1</sup></b>		<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from graduate courses in Music Studies (at least 6 credits), Performance Practice, Ensemble, Independent Study, or Special Topics. Advisor permission required.

#### Recitals:

1. Solo public recital, no later than completion of MUSC 9134, with advisor approval
2. Chamber Music Recital (MUSC 9384)
3. Lecture Recital (MUSC 9684)

4. Performance with Orchestra (MUSC 9784)
5. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:**

*Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the

Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the

Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Oboe DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

## About the Program

The objective of the DMA program in Oboe Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been

recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment

Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Master's: 54

#### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3

<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from courses at the level of MUSC 8404 or higher.

#### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

#### Additional Requirements:

##### Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

##### Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

##### Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

##### Continuation in the DMA Program:

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

##### Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give

impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year,

and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

1

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

#### *Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.

5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior

permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty

members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued

a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Piano DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

### About the Program

The objective of the DMA program in Piano Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, in private teaching studios, and as professional accompanists and coaches, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

#### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A major work from each of the Baroque, Classical, Romantic, and Impressionistic periods.
- A representative 20th-Century work, e.g., Barber, Bartok, Copland, Hindemith, Prokofiev, and the like.

All works should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken

beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

#### Additional Requirements:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.
3. Show transcript evidence at the master's level in the area of performance practices. If no transcript evidence can be presented, students must take up to 6 credits of MUSC 8477 Baroque Keyboard Performance Practice and/or MUSC 8478 Classical Keyboard Performance Practice.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

#### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

#### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9351	Performance Traditions	3
MUSC 9384	DMA Chamber Recital	1
MUSC 9404	Piano Major/Doctoral	3
MUSC 9414	Piano Major/Doctoral	3
MUSC 9424	Piano Major/Doctoral	3
MUSC 9434	Piano Major Doctorate	3
MUSC 9451	Keyboard Literature-Doctoral	2
MUSC 9452	Keyboard Literature-Doctoral	2
MUSC 9684	DMA Lecture-Recital	1
MUSC 9784	DMA Performance with Orchestra	1
MUSC 9984	DMA Final Recital	1

MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Electives</b> <sup>1</sup>		<b>21</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from Music Studies (at least 5 credits), Applied Early Keyboard lessons, Composition (with permission from that department), Performance Practice, Piano Pedagogy, or up to 6 credits taken in approved Temple University graduate coursework outside the Boyer College of Music and Dance. The chair of the Department of Keyboard Studies must approve all elective courses.

**Recitals:**

1. Solo public recital, no later than completion of MUSC 9434, with advisor approval
2. Chamber Music Recital (MUSC 9384)
3. Lecture Recital (MUSC 9684)
4. Performance with Orchestra (MUSC 9784)
5. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:***Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must

contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of

independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.

- b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:***Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found

in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

**Music Performance/Trombone DMA**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

## About the Program

The objective of the DMA program in Trombone Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find

the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

#### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9504	Doctoral Instrumental Major	3
MUSC 9514	Doctoral Instrumental Major	3
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9524	Doctoral Instrumental Major	3
MUSC 9534	Doctoral Instrumental Major	3
MUSC 9565	Lower Brass Pedagogy	2
MUSC 9684	DMA Lecture-Recital	1
	or MUSC 9784 DMA Performance with Orchestra	
MUSC 9701	Doct Perf Practice I	3
	or MUSC 9702 Doct Perf Practice II	
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Electives</b>		
	Music History	3
	Advanced Music	3
	<b>Minor Area in Music</b> <sup>1</sup>	<b>12</b>
<b>Research Course</b>		

MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

1

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

#### Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

#### Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

#### Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into

the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure

occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense

on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits

only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 54*

### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9504	Doctoral Instrumental Major	3
MUSC 9514	Doctoral Instrumental Major	3
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9524	Doctoral Instrumental Major	3
MUSC 9534	Doctoral Instrumental Major	3
MUSC 9566	Upper Brass Pedagogy	2
MUSC 9684	DMA Lecture-Recital	1
	or MUSC 9784 DMA Performance with Orchestra	
MUSC 9701	Doct Perf Practice I	3
	or MUSC 9702 Doct Perf Practice II	
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3

	Music History	3
	Advanced Music	3
<b>Minor Area in Music</b> <sup>1</sup>		<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>54</b>

<sup>1</sup>

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)

3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:**

*Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major

examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject

to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint

an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Tuba DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

### About the Program

The objective of the DMA program in Tuba Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5

- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected

for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

#### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

#### Additional Requirements:

##### *Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance

examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

##### *Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

##### *Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

##### *Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

##### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons:

two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

#### *Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to

register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

##### *Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

##### *Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Viola DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

## About the Program

The objective of the DMA program in Viola Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom

assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Accepd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Two contrasting movements from a Bach unaccompanied suite.
- A major concerto such as Bartok, Hindemith, Hoffmeister, Stamitz, or Walton.

- A sonata or similar work of contrasting period/style from the concerto, i.e., Classical or 20th Century if the concerto is Romantic, or Romantic or Classical if the concerto is 20th Century.
- A virtuoso composition such as *Allegro di molto* from Haydn's *Divertimento in D Major*, Hummel, Paganini, or Rolla.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 55*

### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500 or MUSC 8510	Instrumental Ensemble	1
MUSC 9004	Doctoral String Major	3
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9014	Doctoral String Major	3
MUSC 9021	Chamber Music	1
MUSC 9024	Doctoral String Major	3
MUSC 9034	String Major Doctorate	3
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9384 or MUSC 9684	DMA Chamber Recital DMA Lecture-Recital	1
MUSC 9515	Technical and Interpretive Seminar-Strings	2
MUSC 9516	Seminar for String Literature	2
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9563	Upper String Pedagogy	2
MUSC 9784	DMA Performance with Orchestra	1
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Elective in Music History</b>		<b>3</b>
<b>Minor Area in Music <sup>1</sup></b>		<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>55</b>

1

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9184)
2. Chamber Music Recital (MUSC 9384) or Lecture Recital (MUSC 9684)
3. Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

#### Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate

secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and

open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must

be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC,

the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

#### *Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

#### *Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

#### *Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Two contrasting movements from a Bach unaccompanied sonata or partita. (A chaconne is acceptable on its own.)
- One of the following: Mozart's *Violin Concerto No. 3 in G major, K. 216*; *Violin Concerto No. 4 in D major, K. 218*; or *Violin Concerto No. 5 in A major, K. 219*.
- One major concerto such as Bartok, Beethoven, Brahms, Bruch, Mendelssohn, Mozart, Prokofiev, Shostakovich, Sibelius, or Tchaikovsky.

- One sonata of contrasting period/style from the concerto, i.e., Classical period if the concerto is Romantic or Romantic if the concerto is Classical.
- One virtuoso composition such as Paganini, Sarasate, Wieniawski, and the like.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 55*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8500 or MUSC 8510	Instrumental Ensemble	1
MUSC 9004	Doctoral String Major	3
MUSC 9011	Doctoral Chamber Music	1
MUSC 9012	Doctoral Chamber Music	1
MUSC 9014	Doctoral String Major	3
MUSC 9021	Chamber Music	1
MUSC 9024	Doctoral String Major	3
MUSC 9034	String Major Doctorate	3
MUSC 9184	DMA Solo Public Recital	1
MUSC 9351	Performance Traditions	3
MUSC 9384 or MUSC 9684	DMA Chamber Recital DMA Lecture-Recital	1
MUSC 9515	Technical and Interpretive Seminar-Strings	2
MUSC 9516	Seminar for String Literature	2
MUSC 9517	Advanced Conducting-Doctoral	2
MUSC 9563	Upper String Pedagogy	2
MUSC 9784	DMA Performance with Orchestra	1
MUSC 9984	DMA Final Recital	1
MUST 9701	Doctoral Seminar Analysis, Interpretation, and Performance	3
<b>Elective in Music History</b>		<b>3</b>
<b>Minor Area in Music <sup>1</sup></b>		<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>55</b>

1

Select from courses at the level of MUSC 8404 or higher.

**Recitals:**

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9184)
2. Chamber Music Recital (MUSC 9384) or Lecture Recital (MUSC 9684)
3. Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:***Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate

secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

*Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

*Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

*Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and

open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must

be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC,

the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Performance/Voice DMA

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Musical Arts in Performance.

### About the Program

The objective of the DMA program in Voice Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The program offers a systematic approach to vocal technique; specialized studies in vocal literature; the refinement of language and diction skills; the development of acting techniques; the continued refinement of musical and theoretical skills; advanced study in musical style and performance practice; and the provision of recital, operatic and concert performance opportunities designed to emulate a professional environment.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may

be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who did not earn both their baccalaureate and a master's degree from an institution in the United States must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- TOEFL Essentials: 10.5
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Accepted. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- One recitative and aria from an opera.
- One recitative and aria from an oratorio.
- Four songs or arias selected one each from among the Baroque, Classical, Romantic, Impressionistic, or Contemporary periods. Each selection also must be in a different language (English, German, French, or Italian).

All selections should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The DMA program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the DMA degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 55*

*Required Courses:*

<b>Elective in Music History</b>		<b>3</b>
<b>Minor Area in Music</b> <sup>1</sup>		<b>12</b>
<b>Research Course</b>		
MUSC 9999	Monograph Research	6
<b>Total Credit Hours</b>		<b>55</b>

1

Select from courses at the level of MUSC 8404 or higher.

### Recitals:

1. Solo public recital, no later than completion of MUSC 9234
2. Lecture Recital (MUSC 9684)
3. Performance with Orchestra (MUSC 9784) or Major Opera Role (MUSC 9884)
4. Final Doctoral Recital (MUSC 9984)

**Language Examination:** Candidates in the Voice Performance program are expected to successfully complete a translation examination, specified by the Department of Vocal Arts, in one foreign language: either French, German, Italian, or other national language with department permission. The examination must be completed before the preliminary examinations may be taken.

### Additional Requirements:

*Written Entrance Examinations:*

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance

examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

#### *Diagnostic Recital:*

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact their advisor to arrange the jury. The recital consists of a full program, approximately 25-30 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

#### *Continuous Registration:*

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the DMA program in Music Performance until the completion of all coursework.

#### *Continuation in the DMA Program:*

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. Any student who earns a grade less than "B-" may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

*Written Preliminary Examinations:*

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which they would undertake to perform any composition in their major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

*Oral Preliminary Examinations:*

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

*Final Recital and Monograph Proposal:*

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons:

two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Final Oral Examination:*

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to

register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Final Recital:*

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

*Proposal:*

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

*Monograph:*

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

## Music Technology MS

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Science in Music Technology.

## About the Program

Over the past several decades, music technology has become a major factor in virtually every area of the music industry. Music technology fuses musical skill and technological knowledge that enables one trained in these areas to create works and/or pursue employment or graduate education in an extremely wide variety of areas. Some of these include music composition, editing and publishing, equipment installation, performance, production, recording and editing, software and hardware development, and systems design, as well as numerous audio fields such as the recording and editing of concerts, events, films and television, and games, among others.

The Master of Science in Music Technology program offers students holding a bachelor's degree in music or its equivalent an opportunity to further advance their experience and understanding of music technology research and practice at the graduate level. Students prepare for professional work, as well as for the possibility of entrance into a doctoral program, through specialized research, creative work and practical experience in the field.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** Accreditation has been granted by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The program offers advanced study in music and music technology whereby students are encouraged to develop

diverse abilities in the field, while allowing them also to focus on an area of expertise of their interest.

**Job Prospects:** Students are prepared for employment in numerous facets of the music industry, higher education teaching in music technology, or pursuit of further graduate education in music and/or technology. The U.S. Bureau of Labor Statistics *Occupational Outlook Handbook* shows continued strong demand for positions in the computer and computer music industry.

**Non-Matriculated Student Policy:** With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships, academic internships and tuition scholarships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students) based on departmental needs as well as satisfactory academic and musical progress by the recipient. Tuition scholarships do not carry a work commitment.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 1

Decisions regarding admission are rendered after receipt of all required credentials. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** Entry to the program is contingent on completion of an undergraduate degree in music or its equivalent. Those not holding a bachelor's degree in music who are admitted to the MS degree in Music Technology are assigned additional undergraduate deficiency coursework at the time of admission to bring the student to the level of holding an equivalent degree in music. This coursework is determined based on a thorough review of the undergraduate transcript, pass-off exams in various music subjects upon matriculation, and through Diagnostic Examinations required of all entering students seeking a master's degree. Typically, applicants have an overall undergraduate GPA of at least 3.33 (B+).

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Entrance Exam:** No audition is required for entry to the Music Technology master's program. Admitted students are required to take the master's Diagnostic Examinations in Sound Recording, Sound Editing and Aural Theory prior to the first term of study. See the Program Requirements tab for details.

**Portfolio:** Applicants must demonstrate proficiency in music technology through submission of an entrance portfolio.

**Resume:** Current resume required.

**Writing Sample:** A separate written document explaining the development and creation of the portfolio must be submitted.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 31*

*Required Courses:*

Year 1		Credit Hours
Fall		
MUST 5701	Research in Music	3
or	or Research in Music	
MUST 8701		

MUST 5728	Advanced Audio Production	3
or	or Advanced Audio Production	
MUST 872E		
MUST 5773	Digital Signal Processing for Music	3
or	or Digital Signal Processing for Music	
MUST 8773		
<b>Credit Hours</b>		<b>9</b>
<b>Spring</b>		
MUST 5750	Special Topics in Music Technology	3
or	or Special Topics in Music Technology	
MUST 8750		
Music Technology Elective <sup>1</sup>		3
Elective in Music, Music Studies, or Music Education		3
<b>Credit Hours</b>		<b>9</b>
<b>Year 2</b>		
<b>Fall</b>		
MUST 5760	Special Topics in Music Technology	3
or	or Special Topics in Music Technology	
MUST 8760		
Elective in Music, Music Studies, or Music Education		3
Elective <sup>2</sup>		3
<b>Credit Hours</b>		<b>9</b>
<b>Spring</b>		
MUST 5730	Electronic Music Ensemble	1
or	or Electronic Music Ensemble	
MUST 8730		
MUST 9995	Final Project: Music Technology	3
<b>Credit Hours</b>		<b>4</b>
<b>Total Credit Hours</b>		<b>31</b>

1

Select one of the following: MUST 5706 Live Recording and Mixing for Broadcast (3 s.h.), MUST 5707 Computer Programming for Musicians (3 s.h.), MUST 5724 Printing Musical Scores and Parts (3 s.h.), MUST 5726 Computer Synthesis (3 s.h.), MUST 5732 Programming in Max (3 s.h.), MUST 5733 Music Mixing in Pro Tools (3 s.h.), MUST 5763 Analog and Modular Sound Synthesis (3 s.h.), MUST 5764 Scoring for Film and Digital Media (3 s.h.), MUST 5765 Scoring and Audio Design for Video Games (3 s.h.), MUST 5774 Hearing Music: Acoustics and Psychoacoustics of Music (3 s.h.), MUST 8706 Live Recording and Mixing for Broadcast (3 s.h.), MUST 8707 Computer Programming for Musicians (3 s.h.), MUST 8722 Scoring for Film and Digital Media (3 s.h.), MUST 8724 Printing Musical Scores and Parts (3 s.h.), MUST 8726 Computer Synthesis (3 s.h.), MUST 8727 Electronic Music Composition: Practice, History, Theory (3 s.h.), MUST 8732 Programming in Max (3 s.h.), MUST 8733 Music Mixing in Pro Tools (3 s.h.), MUST 8774 Hearing Music: Acoustics and Psychoacoustics of Music (3 s.h.), MUST 8778 Scoring and Audio Design for Video Games (3 s.h.), or MUST 8783 Analog and Modular Sound Synthesis (3 s.h.).

2

This elective can be selected from among the graduate courses offered in the Boyer College of Music and Dance or any other graduate course available at Temple University.

**Language Examination:** A language examination is not required for the MS in Music Technology.

**Additional Requirements:**

#### *Diagnostic Examinations:*

Prior to the first semester of study in the Music Technology MS program, entering students take a Diagnostic Examination in Aural Theory administered by the Department of Music Studies, as well as a two-part examination in Sound Recording and Sound Editing.

#### A. Graduate Diagnostic Examination in Aural Theory

Students must pass the Aural Theory Diagnostic Examination prior to the first semester of graduate study. Students who fail the exam are required to satisfactorily complete the 3-credit aural theory review course, MUST 5004 Grad Aural Theory Review, with a grade of "P" (i.e., "Pass") during the Spring term. Credits earned in MUST 5004 do not count toward the 31 required graduate credits for the MS degree in Music Technology.

#### B. Graduate Diagnostic Examination in Sound Recording

Music Technology faculty administer the Graduate Diagnostic Examination in Sound Recording. Questions are selected from a test-bank of questions currently used in the final exam for the sound recording course, MUST 4713. These objective, self-graded questions are administered through the Canvas learning management system.

#### C. Graduate Diagnostic Examination in Sound Editing

Music Technology faculty also administer the Graduate Diagnostic Examination in Sound Editing. Questions are selected from a test-bank of audio files currently used in the final exam of the sound editing course, MUST 4714. Using the audio files provided, students are asked to edit and mix a recording session in Pro Tools with careful attention to best practices, including dynamic compression, volume maximization, equalization, clipping and signal routing. Students have 24 hours to complete the exam and must provide a screen capture video approximately 5 minutes in length displaying the Pro Tools session wherein the examinee discusses the choices and techniques utilized throughout the editing and mixing process. Additionally, the examinee is required to submit the complete Pro Tools session with proper asset management.

#### D. Passing the Sound Diagnostic Examinations

Students must pass the Diagnostic Examinations in Sound Recording and Sound Editing prior to the first semester of graduate study. Students who pass both parts of the exam will be permitted to register for MUST 8728 Advanced Audio Production for graduate credit during the first semester of graduate study in the Music Technology MS program.

Students who do not pass one or both parts of the Diagnostic Examinations in Sound Recording and Sound Editing are required to complete the 3-credit course MUST 5006 Sound Recording and Editing Techniques with a grade of "P" (i.e., "Pass") during the first semester of graduate study in the program and prior to being permitted to register for MUST 8728 Advanced Audio Production. MUST 5006 is an intensive semester-long 3-credit course that integrates both sound recording and sound editing topics using Pro Tools software. The course utilizes Linked-In Learning videos available through TUportal, with self-guided learning activities, as well as recording studio and class lecture time. Credits earned in MUST 5006 do not count toward the 31 required graduate credits for the MS degree in Music Technology.

#### E. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examinations in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements (e.g., Spring undergraduate graduation followed by Fall matriculation in the MS program); and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Further, entering Music Technology MS students may waive taking the Diagnostic Examinations in Sound Recording and Sound Editing. If they so choose, however, they are required to complete MUST 5006 satisfactorily with a grade of "P" (i.e., "Pass") prior to taking MUST 8728 Advanced Audio Production. Credits earned in MUST 5006 do not count toward the 31 required graduate credits for the MS degree in Music Technology.

Also note the following:

- Undergraduate senior music majors who want to apply for the Music Technology MS program may elect to take MUST 5006 during the senior year. MUST 5006 will not, however, count toward the 31 graduate credits required for the graduate program.
- If a Boyer student has already taken MUST 4725 Advanced Audio Production at the undergraduate level with a grade of "B-" or better earned, they may waive this course at the graduate level and replace it with a different 3-credit graduate music technology course.
- Remedial coursework must be completed by the end of the first year of study.

**Culminating Events:** Evidence of student learning is assessed through a combination of course-embedded assessments and projects, written examinations, and a capstone final project presented to the Music Studies Department that demonstrates the application of integrated music technology.

## Music Theory MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Music Theory.

### About the Program

The Master of Music in Music Theory provides a comprehensive collection of courses designed to develop skills in the areas of music theory research, music analysis and musical composition.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The master's program in Music Theory is organized into a series of small seminars, with an emphasis on developing strong analytical skills and the application of music theory in the academic environment. The program's primary purpose is to prepare majors for further academic studies at the doctoral level.

**Job Prospects:** The program prepares students for various careers related to music and for further academic and musical training at the doctoral level.

**Non-Matriculated Student Policy:** With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* January 7  
*Spring:* November 1

Decisions regarding admission are rendered after receipt of all required credentials. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** Current resume required.

**Writing Sample:** Applicants must submit with the application for admission an undergraduate-level paper demonstrating their ability to do musical analysis and/or report research. The applicant must submit an assignment of:

- A compositional nature, such as counterpoint, a figured bass, a harmonized melody, an original composition, or the like; and
- An analytical nature, such as a formal analysis, a harmonic analysis, a pitch-class set analysis, or the like.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned

criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate: 32*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUST 8701	Research in Music	3
MUST 8713	Canon and Fugue	3
MUST 8742	Seminar in Theoretical Analysis (Post-Tonal Music)	3
MUST 8742	Seminar in Theoretical Analysis (Schenkerian Analysis)	3
MUST 8749	Current Topics in Musicology and Theory	3
One course involving Music and Technology		3
<b>Electives</b> <sup>1</sup>		<b>12</b>
<b>Capstone Course</b>		
MUST 9996	Final Written Project: Music Theory (2 terms)	2
<b>Total Credit Hours</b>		<b>32</b>

1

Select from Music, Music Education, Music Studies, and other graduate departments, depending on the research interests of the student. One graduate course in Music History is strongly recommended. Advisor approval required.

**Language Examination:** Students must pass an exam in a foreign language. French and German are strongly recommended, but a different language is possible with approval of the division coordinator. The exam is waived for students who had 2 years of a foreign language as an undergraduate, or for students who reached the final term of a foreign language as an undergraduate.

**Additional Requirements:**

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the

first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Keyboard Examination:*

This exam is scheduled by the student with a member of the Music Theory faculty. Although it can be scheduled at any time, the student is strongly encouraged to complete the exam in the first year of study. Students prepare the following:

1. Score reading of the exposition of the first movement of an 18th-century symphony.
2. A simple lied accompaniment.
3. A Bach chorale.
4. A figured bass.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number

of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Applied Music Study:*

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of \$200, not covered by tuition remission, is charged.
2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of \$400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.
3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Comprehensive Examination:*

This three-hour written examination includes two lists: one of terms to identify, and the second of music theorists to describe and explain. The examination also requires short essay answers about current theory and an analysis of a work provided. Students should contact the Associate Dean of the Boyer College of Music and Dance in writing at least one month before the scheduled date of the examination. This exam is generally given in the first week of April. Scheduled by Assistant Dean

David Brown, the exam is graded by two members of the department's graduate faculty.

*Final Written Project:*

Music Theory majors write a final written project (MUST 9996 Final Written Project: Music Theory that is 30-40 pages in length. This is not a thesis. Students choose an advisor, who approves the topic of the project in Music Theory. Students are strongly encouraged to begin their final project no later than the beginning of the second year of study and complete the project in their final term of study. The completed final project must be approved by the advisor and a second reader, generally a faculty member in Music Studies.

## Music Therapy MMT

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music Therapy.

### About the Program

The MMT degree program in Music Therapy is designed to provide professional music therapists with advanced clinical training, supported by studies in research, theory and ethics. The curriculum focuses on two areas: Music Medicine and Music Psychotherapy. A broad range of clinical populations, orientations, practices and research paradigms

is presented, and opportunities for self-directed learning are provided through independent study projects. Emphasis is given to integrating professional and personal development through self-experiences in Music Therapy. The program in Music Therapy is led by four world-renowned music therapists.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main, although students may fulfill some credits at TUCC and through online classes

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM) and approved by the American Music Therapy Association (AMTA).

**Areas of Specialization:** The MMT in Music Therapy provides two tracks of advanced study, with a variety of course offerings in each track:

- The Music Medicine Track provides didactic and experiential training in how music and the client-therapist relationship are used to facilitate mind-body communication and health.
- The Music Psychotherapy Track provides didactic and experiential training in how music and the client-therapist relationship are used to promote emotional and interpersonal growth.

Coursework is designed to give students in-depth knowledge of creative, receptive, recreative and verbal methods of Music Therapy; the ability to utilize and integrate these methods within medical and psychotherapeutic settings and with a broad range of clientele; the ability to apply theory and research to practice; and an understanding of ethical issues in practice and research. In order to relate theory, research and practice, all courses involve extensive readings along with experiential training in their clinical applications. Additional requirements are a final project and courses on both quantitative and qualitative approaches to research. The experiential components of the program are designed to sensitize students to the effects of their own personality on the client, the music, and the therapy process, while also identifying ethical issues indigenous to music therapy practice. Various theoretical orientations are presented for medical and psychotherapeutic areas of practice.

**Job Prospects:** Graduates typically find employment in a variety of areas, including community mental health agencies, day care facilities, educational institutions, general and psychiatric hospitals, nursing homes, rehabilitation centers, and private practice. Graduates may combine clinical work with research in the above areas of practice. The program also provides preparation for doctoral study in Music Therapy and related disciplines.

**Licensure/Certification:** Board Certification as a Music Therapist demonstrates that you have completed comprehensive competency testing based on your education and clinical training and that you have met an objective standard that ensures you are prepared to practice music therapy. Certification is required to practice as a music therapist in the following states: California, Connecticut, Georgia, Nevada, New Jersey, New York, North Dakota, Oklahoma, Oregon, Rhode Island, Utah, Virginia, and Wisconsin. The Certification Board of Music Therapists administers an examination that students must pass in order to become certified. Temple University's Master of Music in Music Therapy program, accredited by the American Music Therapy Association (AMTA), meets the educational requirements to sit for the certification examination. Students must also complete a clinical internship following

graduation before sitting for the certification examination. For more information, visit <https://www.cbmt.org/state-requirements/>.

**Non-Matriculated Student Policy:** Professionals who wish to enroll in specific courses for continuing education may take courses with departmental approval. The Graduate School permits up to 9 credits of graduate coursework taken at Temple University as a non-matriculated student to be applied to a graduate degree.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 1

Applications are processed as they arrive up to the deadline date.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** Three admission options are open to those seeking the MMT degree:

1. Master of Music Therapy, which is the option available to an applicant who has completed a bachelor's degree in Music Therapy and is certified to practice Music Therapy. Applicants for the MMT degree are expected to demonstrate the musicianship, self-awareness and interpersonal skills needed for in-depth clinical work.
2. Music Therapy/Combined Master's Equivalency Program, which is the option available to an applicant who has a bachelor's degree in Music, but is not certified in Music Therapy and must complete Music Therapy core courses. This program integrates core courses in Music Therapy required for entry-level certification with the master's program.
3. Bachelor of Music in Music Therapy, which is the option available to an applicant who holds an undergraduate degree outside of Music or who does not have at least 60 undergraduate credits in Music or its equivalent. The bachelor's degree must be earned prior to applying for the MMT.

In addition, the Master of Music Therapy – Licensed Professional Counselor (LPC) Program is available to both MMT students and Master's Equivalency students who want to complete the additional

coursework needed to satisfy the Pennsylvania requirements for licensure.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Music Therapy, Music Education, Music History, Music Performance, or Music Theory is required.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Audition:** Applicants must submit a video-recorded audition consisting of two pieces in different styles in the applicant's major performance medium (with accompanist when needed) and three standard or popular songs sung and played by the applicant on piano and/or guitar from American children, geriatric, adult or adolescent repertoire. See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and download and complete a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 36 for the MMT; 63 for the Music Therapy/Combined Master's Equivalency Program; 12 to add the Licensed Professional Counselor option

*Required Courses:*

## Master of Music Therapy

CPSY 5694	Introduction to Assessment	3
EPSY 5541	Concepts in Human Development	3
<b>Total Credit Hours</b>		<b>12</b>

### Additional Requirements:

#### Diagnostic Examination:

The Diagnostic Examination in Voice, Piano, and Guitar is required for all students entering the master's degree program in Music Therapy. The examination covers two broad areas of competence:

1. the ability to sing and play a large repertoire of songs from the standard, popular, traditional, folk, rock or country literature; and
2. the ability to sight-sing and sight-harmonize songs from a fake book.

For the examination, students bring a list of at least 12 songs that they are prepared to sing and play. The examiners then select one or more songs to be sung and played on the piano, and one or more to be sung and played on the guitar. In the next portion of the examination, students are asked to sight-sing and sight-harmonize tunes from a fake book, using piano and guitar as accompaniments.

Any student who has not studied voice, piano and/or guitar, or who is not prepared to play popular music or use a fake book, may waive any or all portions of the examination and opt to take the appropriate remedial course(s). This is not unusual. Most students entering the program need instruction or practice in one or more of these areas. Therefore, students are encouraged to view this as merely a placement examination. Depending on each student's background and competence, as demonstrated on the examination, students may be placed in the following remedial courses for 1 credit each:

Code	Title	Credit Hours
MUED 1658	Guitar I	1
MUED 1659	Guitar II	1
MUED 3631	Functional Voice I	1

MUED 3632	Functional Voice II	1
MUED 3633	Functional Piano I	1
MUED 3634	Functional Piano II	1
MUED 3635	Functional Guitar I	1
MUED 3636	Functional Guitar II	1
MUSC 1211	Voice Class	1
MUSC 1212	Voice Class	1
MUST 2105	Jazz Secondary Piano	1
MUST 2106	Jazz Secondary Piano	1
MUST 3105	Jazz Class Piano	1
MUST 3106	Jazz Class Piano	1

Credits earned in required remedial courses do not apply toward the master's degree.

**NOTE:** All students must present themselves for the Diagnostic Examination at the designated time. Students who wish to waive any portion of the examination by taking the remedial courses are still required to present themselves for the scheduled Diagnostic Examination, unless they send written notification to the Music Therapy faculty stating their intent to waive all portions of the exam. When students waive all portions of the exam, they are required to take all remedial coursework without any further opportunity for taking or retaking the examination.

*Clinical Experience:*

Ongoing clinical experience is required.

*Tuition and Fee Payments:*

All tuition and fees must be paid according to the deadlines given by the Bursar's Office at the time of registration. This means that all payments must be received prior to the first day of the term in which the course is offered—not prior to the first day of the course, which in Music Therapy may be very late in the term. When payments are not received by the University deadlines for each term, registrations are automatically canceled, and late fees are imposed for reregistering. Often students do not receive written notification of this until well into the term. Students are encouraged to be punctual in meeting all registration deadlines, as failure to do so is very costly in time, effort and money.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic

and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Applied Music Study:*

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of \$200, not covered by tuition remission, is charged.
2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of \$400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.
3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

*Incompletes:*

All incomplete grades must be fulfilled within one year.

**Culminating Events:**

*Comprehensive Examination:*

Upon completion of the final projects and with permission of the Program Coordinator, the student may request permission to take the written qualifying examination. Students should contact the Program Coordinator regarding administration dates of the comprehensive examination.

The written qualifying examination in Music Therapy does not limit its scope to the coursework taken at Boyer College of Music and Dance. Instead, the student is expected to study comprehensively in preparation for this examination. The written qualifying examination in Music Therapy covers:

1. Basic methods and techniques of Music Therapy.
2. Principles of assessment and evaluation.
3. Various client populations.
4. Various theoretical approaches to individual and group therapy.
5. Existing research literature and research approaches.
6. Professional ethics.

*Final Project:*

As part of the Music Therapy curriculum, students undertake a final project that encompasses a pilot research study.

## Music Therapy PhD

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Doctor of Philosophy in Music Therapy.

### About the Program

The PhD program at Temple University is a true PhD in Music Therapy. Rather than having music therapy as a minor or elective track within another field, or as merely the main topic for the dissertation, the program has Music Therapy as the major area of study with its own core curriculum of advanced Music Therapy courses, supported by studies in research, music and related health disciplines. The goal is to prepare skilled and experienced clinicians to become competent scholars who make significant contributions to research and theory in the field by:

- preparing individuals to conduct research and develop theory, with opportunities to study both quantitative and qualitative research paradigms; and
- providing for the development of expertise and skill in college-teaching and clinical supervision.

The program has undergone extensive review and has been granted plan approval by the National Association of Schools of Music (NASM). It is

the first of its kind in the United States. The program in Music Therapy is led by four world-renowned music therapists.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main, Center City

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The PhD program in Music Therapy offers the opportunity for further development of clinical expertise in two advanced areas of practice: Music Medicine and Music Psychotherapy. The program allows for the acquisition of expertise in an area of specialization within the two areas of practice (e.g., a particular client population, methodology, or research paradigm).

**Job Prospects:** Graduates typically find employment as professors in colleges and universities, and as practitioners, supervisors or researchers in a variety of healthcare settings.

**Licensure/Certification:** Students may opt to take additional coursework that may meet licensure requirements in one or more states.

**Non-Matriculated Student Policy:** The core doctoral courses are not open to non-matriculated students.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 1

Applications are processed as they arrive up to the deadline date.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from academic advisors, professors, or professional supervisors who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** Applicants who have not completed the following courses before matriculation must complete them while a doctoral student:

Code	Title	Credit Hours
MUED 8601	Qualitative Research in Music Therapy	3
MUED 8602	Quantitative Research in Music Therapy	3
MUED 8603	Theories of Music Psychotherapy	2
MUED 8618	Music in Medicine	2
MUED 8619	Music Therapy Education and Training	2
MUED 8621	Music Therapy Ethics	2
MUED 9995	Master's Final Project	1-3

**Master's Degree in Related Discipline:** A master's degree in Music, Music Education, Music Therapy, Creative Arts Therapy, Health Studies, or Psychology is required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in any music-related field is required.

**Statement of Goals:** Share your professional goals, which must be clearly articulated, feasible, relevant to the needs of the profession, and appropriate to the program at Temple.

#### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd. This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Two major works in a major performance medium.
- Two standard or popular songs sung with own piano accompaniment.
- Two standard or popular songs sung with own guitar accompaniment.
- Sight-sing and sight-harmonize tunes from a fake book, using both piano and guitar for accompaniment, and sight-read simple piano pieces.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Resume:** Current resume required.

**Interview:** After all application materials have been received, an interview is scheduled with the applicant by the Program Coordinator. (Please allow at least three weeks after submission.) The interview may occur at the time of the in-person audition or may be scheduled after the applicant submits a recorded audition.

**Writing Sample:** A clinical, theoretical or research paper in Music Therapy must be uploaded to Acceptd.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Test Waiver:** A completed MMT degree from Temple may warrant a waiver.

**Advanced Standing:** Advanced standing is awarded upon admission, after review of transcripts by the Doctoral Coordinator. Students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is undertaken after admission and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 36.

**Additional Requirements:** The successful applicant must:

1. Hold professional certification in Music Therapy.
2. Have at least five years of full-time clinical experience as a professional music therapist (or its equivalent).
3. Have earned a master's degree in Music Therapy or related area or satisfactorily completed 18 graduate credits in Music.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Master's: 44*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUED 8622	Res Mus Psychotherapy	3
MUED 8624	Research in Music Medicine	3
MUED 9611	Theory Development in Music Therapy	3
MUED 9641	Music Therapy Doctoral Seminar	3
<b>Electives <sup>1</sup></b>		
Music, Music Therapy, and/or Non-Music Courses		14
Research, including 6 credits in Statistics		12
<b>Research Course</b>		
MUED 9999	Doctoral Dissertation	6
<b>Total Credit Hours</b>		<b>44</b>

1

Advisor approval required.

**Additional Requirements:**

*Grading:*

For doctoral degrees, only grades of "B-" and higher may be counted toward degree requirements.

*Tuition and Fee Payments:*

All tuition and fees must be paid according to the deadlines given by the Bursar's Office at the time of registration. This means that all payments must be received prior to the first day of the term in which the course is offered—not prior to the first day of the course, which in Music Therapy may be very late in the term. When payments are not received by the University deadlines for each term, registrations are automatically canceled, and late fees are imposed for reregistering. Often students do not receive written notification of this until well into the term. Students are encouraged to be punctual in meeting all registration deadlines, as failure to do so is very costly in time, effort and money.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Applied Music Study:*

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of \$200, not covered by tuition remission, is charged.
2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of \$400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.
3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

*Incompletes:*

All incomplete grades must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Preliminary Examination:*

The preliminary examination is designed to test the student's knowledge of the literature; research competence in both quantitative and qualitative paradigms; ability to integrate theory, research and practice; ability to contextualize one's own work within the field; ability to project solutions to disciplinary and professional issues; and ability to synthesize and evaluate one's own learning. It has two components: scholarly projects and the oral defense.

1. Scholarly projects originate from specific assignments given in required doctoral courses and, depending on the project, may be completed with additional faculty supervision through other elective courses (e.g., research apprenticeship). Ultimately, the project must go significantly beyond any course assignment, and it may not duplicate any previous projects completed by the student outside of the degree program. At least three Music Therapy faculty independently grade each preliminary examination project using a 5-point rating scale. A passing average grade for each question is 3.
2. The oral defense covers any of the topics addressed in the written projects. The oral examiners are the same Music Therapy faculty members who scored the scholarly projects. Upon completion of the oral defense, the examining committee determines whether the student passed or failed. If any portion is failed, the committee specifies in writing whether permission is granted to retake various portions of the examination, and the conditions under which such permission is granted. Students are given only one opportunity to retake the examination or portion thereof. Students should contact the Doctoral Coordinator of the Music Therapy PhD program for more details regarding the nature of the examination questions.

Upon completion of 30 credits, the student requests permission from the Doctoral Coordinator to take the examination. Upon consultation with the Music Therapy faculty, the Doctoral Coordinator schedules the exam. The oral part can be scheduled three weeks after the student submits the written part.

*Proposal:*

The proposal must include the student's background and experience with the research topic; an articulate and comprehensive review of the literature; a clear statement of the research problem and questions to be answered; and a proposed methodology. Upon approval of a Doctoral Advisory Committee, the student works with the major advisor to prepare the proposal. In the process, the student consults other members of the committee. Each member of the Doctoral Advisory Committee must approve and sign the final proposal. Once all members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the Doctoral Advisory Committee, the department chair, the Associate Dean, and the Graduate School. The dissertation proposal must be approved before the student may register for MUED 9999 Doctoral Dissertation.

*Dissertation:*

The purpose of the dissertation is to contribute new knowledge or insight to any aspect of Music Therapy. The dissertation is overseen by the Doctoral Advisory Committee, which consists of at least three members, two from the department and one from outside the department. The committee works together to guide the student toward completion of dissertation research, with the chair coordinating these efforts. In addition to the Doctoral Advisory Committee, one or two graduate faculty may serve as examiners for the defense. These examiners are expected to read and evaluate the student's dissertation and, with the Doctoral Advisory Committee, determine whether it is acceptable, needs revision,

or is unacceptable. The dissertation must meet the various expectations of quality from each member of the Doctoral Advisory Committee. A major criterion shall be whether the student has demonstrated scholastic excellence in carrying out the research project as proposed.

The Doctoral Advisory Committee determines when the dissertation is ready for defense. Upon obtaining approval to defend, the major advisor asks the Associate Dean to assign outside readers. The advisor makes all the necessary arrangements for scheduling the defense. The "Announcement of Oral Defense" form bearing signatures of all of the Dissertation Examining Committee members must be submitted to the Associate Dean at least one month prior to the requested defense date. Upon receiving approval to defend, the Associate Dean announces the dissertation defense to the academic community.

To make a change in a committee, the student petitions the Doctoral Coordinator of the program or the Associate Dean. Upon appropriate consultation with all parties pertinent to the petition, the Associate Dean makes the final determination. The change also must be communicated to the Graduate School.

## Opera MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Opera.

## About the Program

The Master of Music in Opera is designed to prepare qualified performers for professional careers as singer-actors on both national and international operatic stages. The faculty only admits singers who demonstrate outstanding potential for the operatic stage, both vocally and dramatically, and strives to provide as thorough a graduate training as possible within a two-year framework. The ultimate goal is to produce singing artists capable of competing successfully in the professional world of opera.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With the approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The program prepares students through a systematic approach to vocal technique, specialized studies in operatic literature, the refinement of language and diction skills, the development of acting techniques, the continued refinement of musical and theoretical skills, advanced study in musical style and performance practice, and the provision of operatic performance opportunities designed to emulate a professional environment.

**Job Prospects:** Graduates work throughout the world performing in opera houses, singing as soloists, and teaching in colleges and universities as well as in private studios.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* February 1; December 15 international

*Spring:* September 15; August 1 international

Applications are processed as they arrive up to the deadline date.

APPLY ONLINE to this graduate program.

**Letters of Reference:**

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

**General Program Requirements:**

Number of Credits Required Beyond the Baccalaureate: 32

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8213	Opera Diction	2
MUSC 8216	Aria Repertoire	2
MUSC 8220	Opera Workshop (4 terms)	8
MUSC 8234	Opera Major	2
MUSC 8244	Opera Major	2
MUSC 8254	Opera Major	2
MUSC 8264	Opera Major	2
MUSC 8274	Opera Role Performance	1
MUST 8701	Research in Music	3
MUST 8708	History of Opera	2
MUST 8709	History of Opera	2
<b>Electives <sup>1</sup></b>		<b>4</b>
<b>Total Credit Hours</b>		<b>32</b>

<sup>1</sup>

A maximum of one term of vocal coaching may be taken.

**Language Examination:** Candidates in Opera must present undergraduate coursework in French, German and Italian languages (or pass a translating and speaking examination at Temple) at the time of admission to the program. Where the transcript or pass-off examination does not reveal such study, the appropriate deficiency course(s) must be taken prior to completion of the master's degree.

**Additional Requirements:**

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Piano Proficiency:*

In addition to the written Diagnostic Examinations required upon entrance to the program, Opera majors take a functional piano examination encompassing the following points:

1. playing a prepared accompaniment (music can be used);
2. sight-reading a simple accompaniment; and
3. improvising an accompaniment to a simple melody.

Remedial coursework may be required.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

#### **Culminating Events:**

##### *Comprehensive Examination:*

The Voice and Opera program requires a one-hour comprehensive examination in music literature and theory. When admitted to the College, a list of 100 musical works of the standard literature from the Middle Ages through the 20th century is made available to the student as an aid to prepare for the examination. This examination should be taken in the penultimate term of study.

The examination is in three parts: identification of specific selections from a list of 100 works, identification of a "mystery" selection, and

score analysis. Two graduate faculty members grade the examination. Students must pass all three sections. A score of 70% or better must be achieved in the identification section, and a "Pass" or "Weak Pass" must be achieved in the "mystery" selection and the score analysis section.

The examination is administered approximately ten times each year. Students notify the Assistant Dean no later than one week prior to the requested examination administration date. For examination dates, see the Graduate Music Examination Schedule.

*Adjudicated Roles:*

Opera majors must have accumulated at least two major adjudicated roles or one major and two minor adjudicated roles in addition to opera theater assignments. Fully-staged opera productions with orchestra are typically presented each term. Opera roles are adjudicated by three full-time music faculty members.

## Piano Pedagogy MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Piano Pedagogy.

## About the Program

The master's degree in Piano Pedagogy expands the resources, skills and insights of pianists who wish to be teachers, either in a private studio or at an institution, and who—in addition to having a comprehensive knowledge about teaching children and adults at an elementary level—are equipped to teach intermediate and early advanced students.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** While private lessons and ensemble participation are required each term, a major concentration of the curriculum is the study and practice of the teaching of the piano. Included in this concentration are coursework and fieldwork through the College's preparatory division.

**Job Prospects:** The program prepares musicians for teaching careers, professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate

Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

#### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

#### Additional Requirements:

##### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.
2. **Participation:** Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this

type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

#### *Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. **Exceptions to Recital Extension:**
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

#### *Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

### **Culminating Events:**

#### *Comprehensive Final Project:*

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the MM program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Studies adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Studies no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Studies no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the Department of Keyboard Studies read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either pass or fail. Any student who fails is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and graded as before. Students who fail a second time are dismissed from the degree program.

#### *Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8084). Graduation recitals are typically one hour in length; presented on campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding

Summer months. A recital approval jury must be formed to demonstrate the student's ability to perform the degree recital successfully. Normally, this occurs at the preceding term's jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

## **Piano Performance and Music Theory MM**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Piano Performance and Music Theory.

### **About the Program**

Guided by the philosophy that the development of both performance and theoretical skills is vital for students, the Department of Keyboard Studies in the Boyer College of Music and Dance developed a master's degree that combines significant performance and theoretical components. A historical connection exists between the two fields that continues to this day.

The goal of the Piano Performance and Music Theory MM degree program is to prepare graduates with music theory knowledge that makes them well-rounded practical musicians who are able to apply skills and knowledge to performance. Students acquire additional valuable skills and credentials for use in the field.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on both piano performance and music theory, with additional coursework that supports advanced development in both areas.

In Piano Performance, students study privately with professional artist-teachers and enjoy opportunities for performance in solo recitals and large/small chamber music ensembles. Piano Performance studies culminate in an adjudicated solo recital.

In Music Theory, students engage the field's current analytical trends and applications. The theory portion of this program is organized into a series of small seminars. Through discussion and research, strong analytical skills and advanced tools are developed for use in both performance and academic environments. Theory studies culminate in a comprehensive examination and a written project.

**Job Prospects:** The program prepares graduates to pursue substantive professional activities in both performing and academic venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 44

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8404	Piano Major	3
MUSC 8414	Piano Major	3
MUSC 8424	Piano Major	3
MUSC 8461	Piano Pedagogy I	2
MUSC 8465	Piano Pedagogy II	2
MUSC 8477	Baroque Keyboard Performance Practice	3
MUSC 8478	Classical Keyboard Performance Practice	3
MUSC 8510	Instrumental Ensemble (2 terms)	2
MUST 8701	Research in Music	3
MUST 8713	Canon and Fugue	3
MUST 8738	Schenkerian Analysis 1	3
MUST 8748	Seminar in Post-Tonal Theory	3
MUST 8749	Current Topics in Musicology and Theory	3
<b>Music Technology Elective</b>		<b>3</b>
<b>Culminating Courses</b>		
MUSC 8484	Piano Major-Recital	3
MUST 9996	Final Written Project: Music Theory (2 terms)	2
<b>Total Credit Hours</b>		<b>44</b>

**Additional Requirements:***Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

**A. Graduate Diagnostic Examination in Aural Theory**

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

**B. Graduate Diagnostic Examination in Written Theory**

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

**C. Graduate Diagnostic Examination in Music History**

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

**D. Conditions for Exemption from Diagnostic Examinations**

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior

permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Final Project:*

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the MM program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Studies adjudicate the oral presentation. The session should last approximately 30 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Studies no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 20 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Studies no later than April 1 for May graduation or November 15 for January graduation. At least two graduate faculty members from the Department of Keyboard Studies read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either pass or fail. Any student who fails is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and

graded as before. Students who fail a second time are dismissed from the degree program.

*Public Recital:*

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8484). Graduation recitals are typically one hour in length, presented on campus in either Rock Hall or Klein Recital Hall, and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A recital approval jury must be held to demonstrate the student's ability to perform the degree recital successfully. Normally, this occurs at the preceding term's jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

*Comprehensive Examination:*

This three-hour written examination includes two lists: one of terms to identify, and the second of music theorists to describe and explain. The examination also requires short essay answers about current theory and an analysis of a work provided. Students should contact the Associate Dean of the Boyer College of Music and Dance in writing at least one month before the scheduled date of the examination. This exam is generally given in the first week of April. The exam is graded by two graduate faculty members.

*Final Written Project:*

A final written project (MUST 9996) that is 30-40 pages in length is required for completion of the degree. This is not a thesis. Students choose an advisor, who approves the topic of the project in Music Theory. Students are strongly encouraged to begin their final project no later than the beginning of the second year of study and complete the project in their final term of study. The completed final project must be approved by the advisor and a second reader, generally a faculty member in Music Studies.

## Piano Performance/Collaborative Piano and Chamber Music MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Piano Performance/Collaborative Piano and Chamber Music.

### About the Program

Guided by the philosophy that the development of diverse performance skills is vital for musicians, the Department of Keyboard Studies in the Boyer College of Music and Dance developed a master's degree that combines performance with collaborative and accompaniment studies. The goal of the Piano Performance/Collaborative Piano and Chamber Music MM degree program is to prepare graduates who are more commercially viable and competitive in the field.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music. Students are also trained to:

- listen to the many events occurring simultaneously in ensembles;
- learn how to conduct rehearsals;
- appreciate how text can affect musical performance;
- distinguish between the many different kinds of ensemble participation depending on the media; and
- develop their pianistic skills in order to meet the demands of advanced chamber and accompanied works.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** For the Piano Performance/Collaborative Piano and Chamber Music MM, the pianist should supply the instrumentalist(s) for their recorded audition. Two fast movements and two slow movements are to be performed from two of the following works:

- Beethoven Sonata for Piano and Violin in F, Op. 24
- Brahms Sonata for Piano and Cello in E Minor, Op. 38
- Debussy Sonata for Cello and Piano
- Mozart Sonata for Piano and Violin in B-flat, K. 454
- Two substantial solo works that demonstrate proficiency at a graduate (i.e., memorized) level, preferably one work from the 20<sup>th</sup>/21<sup>st</sup> centuries

A sight-reading exam is required. The Department of Keyboard Studies arranges a time with applicants to conduct the exam.

For more information about audition repertoire requirements, see <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp>.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 48*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8404	Piano Major	3
MUSC 8414	Piano Major	3
MUSC 8416	Piano for Accompanying and Chamber Music Majors	2
MUSC 8419	Piano for Accompanying and Chamber Music Majors	2
MUSC 8424	Piano Major	3
MUSC 8443	Listening/Learning Skills: Piano I	3
MUSC 8461	Piano Pedagogy I	2
MUSC 8465	Piano Pedagogy II	2
MUSC 8471	Recital Accompanying	1

MUSC 8472	Recital Accompanying	1
MUSC 8473	Recital Accompanying	1
MUSC 8474	Recital Accompanying	1
MUSC 8475	Studio Accompanying (2 terms)	2
MUSC 8477	Baroque Keyboard Performance Practice	3
MUSC 8478	Classical Keyboard Performance Practice	3
MUSC 8500	Instrumental Ensemble <sup>1</sup>	1
MUSC 8510	Instrumental Ensemble (3 terms) <sup>1</sup>	3
MUST 8701	Research in Music	3
MUST 8741	Analytical Techniques	3
<b>Electives</b> <sup>2</sup>		<b>3</b>
<b>Public Recital</b>		
MUSC 8484	Piano Major-Recital	3
<b>Total Credit Hours</b>		<b>48</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

#### Additional Requirements:

##### Diagnostic Examinations:

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior

permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per academic term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Recital Extension:*

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

*Comprehensive Final Project:*

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) and collaborative teacher while enrolled in the MM program. Students choose two stylistically contrasting pieces from their final solo recital program and two contrasting works from their collaborative repertoire. Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Studies adjudicate the oral presentation. The session should last approximately 30 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Studies no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 20 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Studies no later than April 1 for May graduation or November 15 for January graduation. At least two graduate faculty members from the Department of Keyboard Studies read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either pass or fail. Any student who fails is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and graded as before. Students who fail a second time are dismissed from the degree program.

**Public Recital:**

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8484). Graduation recitals are typically one hour in length, presented on campus in either Rock Hall or Klein Recital Hall, and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A recital approval jury must be formed to demonstrate the student's ability to perform the degree recital successfully. Normally, this occurs at the preceding term's jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

**Recital Accompaniment:**

Students must accompany one student recital in the first term and two full senior or master's recitals in each of three succeeding academic terms. In addition, performance of a full chamber music work is required each of the four terms. Graduation recitals are typically one hour in length, presented on campus in either Rock Hall or Klein Recital Hall, and adjudicated by three full-time music faculty members.

**Piano Performance/Piano Pedagogy MM**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Piano Performance/Piano Pedagogy.

**About the Program**

Guided by the philosophy that the development of both performance and pedagogical skills is vital for students, the Department of Keyboard Studies in the Boyer College of Music and Dance developed a master's degree that combines significant performance and pedagogical components. The goal of the Piano Performance/Piano Pedagogy MM degree program is to prepare graduates who are more commercially viable and competitive in the field as musicians and teachers by acquiring valuable skills and credentials. Given that studio teaching and, occasionally, group instruction can and often do constitute significant portions of a keyboardist's workload, this degree should be viewed as a highly attractive educational investment that provides evidence of competence.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music. While private lessons and ensemble participation are required each term, a major concentration of the curriculum is the study and practice of the teaching of the piano.

**Job Prospects:** The program prepares musicians for teaching careers, professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: March 1

Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

### Letters of Reference:

Number Required: 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** For the Piano Performance/Piano Pedagogy MM, all works are to be performed from memory:

- Complete work by Bach (e.g., *The Well-Tempered Clavier*, including prelude and fugue, suite, toccata, etc.)
- Complete sonata by Beethoven, Haydn, Mozart, or Schubert
- Large Romantic work
- Impressionistic or Contemporary work

For more information about audition repertoire requirements, see <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp>.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits

only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 39

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8404	Piano Major	3
MUSC 8414	Piano Major	3
MUSC 8424	Piano Major	3

<b>Total Credit Hours</b>		<b>39</b>

1

MM candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2

Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

### Additional Requirements:

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor

perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### *Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number

of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### *Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

#### *Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

#### *Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

#### *Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course is offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course is replaced by a letter grade and MUSC 5000 Recital Extension is issued a grade of "CR." Credit derived from Recital Extension is not counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study is the cost of 2 graduate credits plus a \$400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
  - a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
  - b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, any student who does not take Recital Extension during the Summer may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension is reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:****Comprehensive Final Project:**

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the MM program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy and

performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Studies adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Studies no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Studies no later than April 1 for May graduation or November 15 for January graduation. At least two graduate faculty members from the Department of Keyboard Studies read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either pass or fail. Any student who fails is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and graded as before. Students who fail a second time are dismissed from the degree program.

**Public Recital:**

Performance majors present a public recital as the culminating event for the master's degree (MUSC 8484). Graduation recitals are typically one hour in length, presented on campus in either Rock Hall or Klein Recital Hall, and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A recital approval jury must be held to demonstrate the student's ability to perform the degree recital successfully. Normally, this occurs at the preceding term's jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

**Pedagogy Final Project:**

A final project (MUSC 9995) is required for completion of the degree. The student writes a research-quality paper that is 15 to 20 pages in length based on important pedagogical theories and/or practices. The chair of the department and appropriate faculty with expertise in piano pedagogy guide the topic of the paper and grade the final project.

## String Pedagogy MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in String Pedagogy.

## About the Program

The Master of Music in String Pedagogy is for the graduate student who desires to concentrate on the pedagogy of stringed instruments.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** While private lessons and ensemble participation are required each term, a major concentration of the curriculum is the study and practice of the teaching of stringed instruments. Included in this concentration are coursework and fieldwork through the College's preparatory division.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated

graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Audition:** See <https://www.temple.edu/boyer/admissions/graduate-admissions/audition-requirements.asp> for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 33*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUED 8653	Learning Theory in Music	3
MUSC 8500	Instrumental Ensemble (4 terms)	4
MUSC 8510	Instrumental Ensemble (2 terms)	2
MUSC 8541	Advanced Orchestral Conducting I-II	2
MUSC 8561	Lower String Pedagogy	3
	or MUSC 8562 Upper String Pedagogy	
MUSC 8566	String Major/Pedagogy	2
MUSC 8567	String Major/Pedagogy	2
MUSC 8568	String Major/Pedagogy	2
MUSC 8569	String Major/Pedagogy	2
MUST 8701	Research in Music	3
<b>Electives</b> <sup>1</sup>		<b>6</b>
<b>Final Pedagogy Project</b>		
MUSC 9996	Final Project: String Pedagogy	2
<b>Total Credit Hours</b>		<b>33</b>

1

Select from Music, Music Education, Music Studies, or other graduate departments. Performance practice courses recommended. Advisor approval required.

### Additional Requirements:

*Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for all entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

*Professional Development Policy:*

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may

be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

*Performance:*

All bowed string pedagogy majors at the master's degree level must perform in the university orchestra each term they receive lessons.

*Performing Ensembles:*

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair and the Associate Dean.

*Independent Study Courses:*

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

*Acceptable English:*

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

*Graduate Private Lesson Policy:*

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A \$250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

*Incompletes:*

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Event:**

*Final Pedagogy Project:*

The final pedagogy project (MUSC 9996) is based on a subject determined with the major advisor, and may take the form of a lecture/recital, teaching demonstration, research paper, article or method book. Faculty members in the Department of Instrumental Studies grade the final project.

## Vocal Arts MM

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the Master of Music in Vocal Arts.

### About the Program

The interdisciplinary Master of Music in Vocal Arts is designed for graduate students who want to continue their education and practice in the disciplines of solo and choral singing in preparation for careers in community music, education or performance. The degree offers an opportunity to broaden the scope of graduate vocal education beyond the classical studio experience. Students complete a core of private

voice lessons and choral ensembles, and may select electives in choral studies, music education, musical theater and voice/opera studies.

In contrast to the Master of Music in Voice Performance, which is a focused program that serves students whose career goal is to become a professional classical voice performer, the Vocal Arts MM allows students to broaden their vocal training to choral music, conducting, music education or musical theater. The Vocal Arts MM program allows students to balance the rigor of classical voice training with the freedom to select an area of focus in another genre.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** Accreditation is being sought from the National Association of Schools of Music (NASM).

**Areas of Specialization:** Within the prescribed credits for the MM in Vocal Arts, students can focus their studies on choral music, conducting, music education or musical theater.

**Job Prospects:** The program prepares students for various careers related to the vocal arts and for further academic training at the doctoral level.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in select courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance and/or direct service related to academic programs. Assistantship and internship awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

*Spring:* November 1

Applications are processed as they arrive up to the deadline date.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Share your special interests within the discipline and expectations for the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 75
- IELTS Academic: 6.5
- PTE Academic: 51

**Audition:** Applicants must successfully pass a voice audition.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with their academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
MUSC 8204	Voice Major	3
MUSC 8214	Voice Major	3
MUSC 8224	Voice Major	3
MUSC 8310	Choral Ensemble (3 terms)	3

MUST 8701	Research in Music	3
<b>Electives</b>		<b>12</b>
Select courses in Choral Conducting, Choral Literature, Music Education, Musical Theater, Opera Diction, Pedagogy, or Vocal Literature		
<b>Public Recital</b>		
MUSC 8284	Voice Major-Recital	3
<b>Total Credit Hours</b>		<b>30</b>

**Language Examination:** To complete the degree, students must fulfill a foreign language requirement in French, German, Italian, Spanish or another language with approval of the chair. This requirement may be fulfilled in any one of three ways:

1. The student successfully completed three terms of a foreign language (one term each of French, German or Italian) as an undergraduate.
2. The student passes a foreign language examination with the requisite language department.
3. The student completes three terms of a foreign language (one term each of French, German or Italian). Since language credits are at the undergraduate level, they do not count toward the MM degree, but they do fulfill the language requirement.

#### Additional Requirements:

##### *Diagnostic Examinations:*

Diagnostic examinations in Aural Theory, Written Theory, and Music History are **required** for **all** entering master's students. The exceptions are students in Jazz Studies and Music Therapy who have their examinations arranged within their respective departments. In addition, Keyboard students take an additional two-hour examination in Keyboard Literature. As stated in the *Boyer College Graduate Handbook*, master's "students may not take final qualifying examinations nor perform graduation recitals until all diagnostic examinations have been successfully completed."

The exams may be taken in one day or split over three days, or the exams can be taken online for a fee. Preparations are provided upon registration. Visit the Boyer College of Music and Dance website for the graduate music examination schedule and registration form.

Please note that registration for a student's first term of study is completed in consultation with the Associate Dean for Student Affairs. Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study. It is also best for students to complete MUST 8701 Research in Music, which is required of all students except those in Jazz Studies, Music Education, and Music Therapy in the first year of study.

#### A. Graduate Diagnostic Examination in Aural Theory

The examination lasts approximately 40 minutes and consists of a written portion in which students are asked to:

1. Dictate a chord progression that modulates and contains chromatic harmony by writing out the bass line and identifying chords by Roman numerals and inversions.
2. Complete a two-part melodic dictation that modulates and contains chromatic pitches.

#### B. Graduate Diagnostic Examination in Written Theory

The examination lasts one and one-half hours and is in two parts:

1. Harmonic analysis of two chorales: one that uses diatonic harmony, and one that uses chromatic harmony.
2. Analysis of the form, motives and phrase structures of the first movement of a Classical-era piano sonata.

#### C. Graduate Diagnostic Examination in Music History

The examination lasts one hour and contains objective questions in a multiple choice and/or true/false format. It covers composers, forms, instruments, musical works, styles and terms from 1450 to the present. Sample questions are:

1. The basso continuo came into use in about which year?  
(a) 1500 (b) 1600 (c) 1650 (d) 1700
2. Who composed *Das Lied von der Erde* (The Song of the Earth)?  
(a) Mahler (b) Bruckner (c) Brahms (d) Schumann
3. Which of the following instruments would not be found in the score of a symphony by Haydn?  
(a) horn (b) oboe (c) timpani (d) trombone (e) trumpet

#### D. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

#### Culminating Events:

##### *Comprehensive Examination:*

Candidates for the Master of Music degree are required to complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts, all of which must be passed:

- identification of specific selections from a list of 100 musical works of the standard literature from the Middle Ages through the 20th Century;
- identification of one "mystery" selection not found on the list; and
- score analysis.

The examination, which is administered in both the Fall and Spring terms, may be taken at any time in a student's program. Two graduate faculty members grade the examination.

##### *Final Project:*

The supervised final project (MUSC 8284) reflects the student's areas of study, culminating in a unique one-hour public performance, at least half of which must be the candidate's solo performance. The interdisciplinary nature of the degree affords several project options for the final project performance, including choral conducting, lecture recital, thesis or vocal recital that could include both classical and contemporary commercial music repertoire.

## Graduate Certificate: Music Teaching

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the graduate certificate in Music Teaching.

### About the Certificate

The graduate certificate program in Music Teaching offers those with at least a bachelor's degree in music or its equivalent a pathway to becoming a certified PK-12 music teacher in Pennsylvania. The goal is to achieve competencies and co-curricular credentials required by the Pennsylvania Department of Education (PDE) in preparation for one semester of full-time PK-12 music student teaching and, ultimately, Temple University's recommendation of the student to PDE for certification to teach PK-12 music in Pennsylvania.

In preparation to meet credentialing requirements, the student must have a 3.0 cumulative or higher GPA in their undergraduate degree; carry a 3.0 or higher GPA throughout their graduate certificate coursework; file evidence of four clearances annually by the required deadlines to engage in field, extern and student-teaching assignments; and file evidence of passing scores on two *Praxis*® exams: Fundamental Subjects: Content Knowledge (5511) and Music: Content Knowledge (5113). Up to 9 hours of certificate coursework completed with a grade of "B" or higher can be applied as electives to the MM in Music Education graduate program within two academic terms (i.e., Fall/Spring or Spring/Fall) of completing the certificate.

Students engage as preservice music teachers in preparation for general and choral or instrumental music student teaching at the elementary and secondary levels. Faculty guide certificate program students in learning, demonstrating, analyzing, applying, documenting and reflecting on PK-12 preservice music teaching skills, knowledge, attitudes and professional competencies comprising inclusive, contemporary music-education practices. Upon successfully meeting the certificate's curricular and co-curricular requirements and demonstrating preprofessional dispositions, students are eligible for Temple University's recommendation to PDE for Level I PK-12 Music Education Certification.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The certificate program can be completed on a full- or part-time basis. The student-teaching semester requires a full-time commitment.

**Accreditation:** The degree programs of Boyer College of Music and Dance are accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** All students complete specialization in general music coursework and, in their final semester, complete elementary student teaching. Upon application, applicants additionally declare either a choral or instrumental specialization to complete the minimum prerequisite courses in preparation for secondary student teaching in their final semester. The choral or instrumental specialization focuses the student's secondary student-teaching placement.

**Job Prospects:** With PK-12 music certification from PDE, graduates can apply for music teaching jobs within Pennsylvania. For information about the portability of the PK-12 music certification from PDE to other states in the United States, visit <https://www.temple.edu/professional-licensure-disclosures> and/or contact Alison.Reynolds@temple.edu.

**Non-Matriculated Student Policy:** Students admitted to the certificate program are classified as non-matriculated graduate students by the University, since the program does not lead to a degree. No portion of the Music Teaching curriculum can be completed by credit transfer from another institution. Credit earned in Music Teaching can only be transferred to the Music Education MM program and is limited to 9 credits.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 1  
*Spring:* November 15

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents and aptitude for graduate study in general and PK-12 music teaching.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a

curriculum of 124 to 135 hours. A GPA of 3.0 or higher must have been attained.

In addition, departmental review of the application may identify competencies the applicant will need to achieve through additional coursework to best prepare for student teaching and recommendation to PDE for PK-12 music teaching in Pennsylvania. Graduate certificate students may opt to take additional credits.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is preferred. Submit all official transcripts for all coursework taken previously from all institutions attended, whether or not a degree was awarded.

Applicants who have fluent music skills and flexible musicianship with a bachelor's degree in a different discipline are encouraged to contact Dr. Alison Reynolds at Alison.Reynolds@temple.edu.

**Statement of Goals:** Provide a written account of your accomplishments to date, goals and expectations for the program, goals for beyond the program, and special interests in becoming certified in Pennsylvania to teach PK-12 music.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 90
- IELTS Academic: 6.5
- PTE Academic: 61

NOTE: As of May 2020, applicants to PDE for PK-12 music certification who earned their baccalaureate or higher degree in a country other than the United States may be eligible for certification if they meet PDE's requirements. For more information, visit <https://www.education.pa.gov/Educators/Certification/OutOfState/Pages/Foreign-Educated-Teacher-Certification-Applicants.aspx>.

**Resume:** Your current resume must be submitted electronically with other supporting application materials.

**Interview:** After the complete admissions application has been received by Temple University, applicants should contact Dr. Alison Reynolds at Alison.Reynolds@temple.edu to schedule an interview.

**Academic and Musical Profile (AMP):** The Academic and Musical Profile (AMP) consists of two parts:

1. Music Skills: At the time of application, applicants submit a digital video of no more than 15 minutes. The video should feature clips in which applicants demonstrate their musicianship and the types of activities they currently associate with music teaching and learning interactions, with at least one other person engaging in the activities with them. If declaring Choral, applicants need to feature music-making using their singing voice, but are welcome to demonstrate their ability to play other instruments. If declaring Instrumental, applicants need to feature music-making playing a primary instrument and their singing voice, but are welcome to demonstrate their ability to play other instruments. Given complications related to COVID-19, video recording of online engagement featuring musicianship and communication skills of the applicant are acceptable. All applicants

should include a brief written narrative explaining the contents of the video.

2. Writing: Upon completing the formal half-hour application interview, applicants agree to a 90-minute session during which they complete the writing portion of the AMP. This allows applicants to feature their best writing in real time in response to prompts resonating with each applicant's lived experiences. The exam is evaluated by Music Education faculty. Results are considered in the admissions decision.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

Applicants are encouraged, but not required, to submit any additional information that will help the faculty making an admissions decision. Additional items may include, but are not limited to, digital recordings of compositions or arrangements, recordings of performance groups, lesson or rehearsal plans, curriculum development material, and recital performance recordings.

Finally, additional fees are applicable for some courses, lessons and ensembles.

Please re-read the admission letter, especially the "Special Notes" section on page 2, regarding any entrance deficiencies. If any remedial coursework is required, it must be completed by the end of the first year of study.

2

Course selection is done in consultation with the coordinator of the Music Teaching program.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

### Additional Requirements:

#### Standards of Scholarship:

The following standards of scholarship apply for students in the Music Teaching graduate certificate program:

- Maintain a 3.0 or higher GPA in each course to ensure the certificate student maintains an overall 3.0 or higher GPA required by PDE for Level I PK-12 Music Education Certification in Pennsylvania.

- Students who earn below a 3.0 in a single certificate course may repeat the same course once to replace the original grade. If after repeating the course once without satisfactorily raising the grade, the certificate student is dismissed from the certificate program.

Additionally, these time-sensitive co-curricular requirements must be met by students in the certificate program:

- Upon full-time entry to the certificate program, the student must apply for student teaching.
- Prior to the student-teaching semester, the certificate student is required to complete sequenced coursework and field placements. During the sequence, the student learns, demonstrates, analyzes, applies, documents and reflects on preservice music teaching skills, knowledge, attitudes and professional competencies comprising inclusive contemporary music education practices, including demonstrating preprofessional dispositions.
- Additional co-curricular requirements must also be met as follows:
  - As directed by the guidelines of the College of Education and Human Development in conjunction with Boyer College's Department of Music Education and Therapy, the certificate student is responsible for annually filing evidence of all clearances. School districts require the clearances for students engaging in observation, field, extern and student-teaching assignments in PK-12 school-music contexts.
  - Without evidence of clearances filed, the certificate student cannot enter PK-12 school-music contexts. Thus, without clearances, the certificate student cannot complete certificate course requirements and will not be permitted to retain enrollment in certificate program classes.
  - One semester prior to the student-teaching semester, the certificate student updates the student-teaching application and participates in a scheduled formal interview with the Coordinator of Student Teaching. Together, the student and coordinator review the application for remaining requirements and projected achievements relative to their completion. Placements are not confirmed at that time. Instead, types of experiences in music teaching and learning are prioritized, and conversations are held about transportation and the timing of elementary and secondary placements.
  - Ninety days prior to student teaching, the certificate student needs to have filed evidence of passing scores on two *Praxis*® standardized tests required by PDE, including Fundamental Subjects: Content Knowledge (5511) and Music: Content Knowledge (5113). Certificate students are responsible for filing the scores with the Department of Music Education and Therapy in addition to having requested that the *Praxis*® scores be sent to Temple University.

### Student Teaching Semester:

With prerequisite coursework and all co-curricular requirements completed, the certificate student is eligible to engage daily (i.e., Monday through Friday mirroring the hours and activities of students assigned to the music teacher's school day) over one semester of music student teaching in two placements: elementary and secondary. The certificate student is responsible for transportation to and from the placement sites.

During the student-teaching semester, the certificate student is required to continue to have filed clearances through the end of the semester and to maintain a 3.0 or higher GPA. The certificate student is assigned to a cooperating school music teacher and to a Boyer College of Music and Dance supervising faculty member for the elementary and secondary

placements. Certificate student teachers may be observed informally in each placement and will be observed formally twice during each student-teaching placement using form PDE-430: Pennsylvania Statewide Evaluation Form for Student Professional Knowledge and Practice. Being formally and informally observed prepares the certificate student for entering the in-service music teaching profession.

In the weekly student-teaching seminar, typically held in person Mondays from 4:00 to 6:00 p.m., certificate music students professionally plan and reflect on all assignments.

**Culminating Event:** Successful completion of coursework and the student teaching experience constitute the culminating event.

## Graduate Certificate: Professional Studies

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE

Learn more about the graduate certificate in Professional Studies.

### About the Certificate

The post-master's certificate program in Professional Studies is rooted in the conservatory tradition with a strong emphasis on advanced

performance study. It offers a year of comprehensive study and intensive training in major performance areas. Students choose from 12 instruments, including brass, cello, classical guitar, double bass, historical keyboard instruments, opera, percussion, piano, viola, violin, voice and woodwinds.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The certificate program is completed on a full-time basis.

**Accreditation:** The degree programs of Boyer College of Music and Dance are accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The Professional Studies post-master's certificate is offered in the following instruments:

- Brass
- Cello
- Classical Guitar
- Double Bass
- Historical Keyboard Instruments
- Opera
- Percussion
- Piano
- Viola
- Violin
- Voice
- Woodwinds

**Job Prospects:** The certificate program prepares musicians who are already performing at the post-master's level with specialized preparation for the professional world.

**Non-Matriculated Student Policy:** Students admitted to the certificate program are classified as non-matriculated graduate students by the University, since the program does not lead to a degree. No portion of the Professional Studies curriculum can be completed by credit transfer from another institution. Additionally, credit earned in Professional Studies cannot be transferred to another Boyer College program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring:* Admission is on a rolling basis. Interested students should contact [music@temple.edu](mailto:music@temple.edu) for permission to enroll in coursework.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. To enroll in the post-master's certificate program, candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

## Certificate Requirements

Number of Credits Required to Complete the Certificate: 18

Required Courses:

### Brass, Classical Guitar, Percussion, and Woodwinds

Code	Title	Credit Hours
MUSC 8500	Instrumental Ensemble (2 terms)	2
MUSC 9001	Appl Music-Prof Studies	4
MUSC 9002	Appl Music-Prof Studies	4
Ensemble or Repertoire course (2 terms)		2
Elective (2 terms) <sup>1</sup>		6
<b>Total Credit Hours</b>		<b>18</b>

1

Students select electives to meet their individual needs. These may be advanced theory or history courses, performance practice courses, non-music courses that support the student's major study, or courses designed to fill gaps in earlier study. With departmental permission, elective credits may also be fulfilled by additional repertoire or ensemble courses, but only if this does not limit the participation of students in other programs in the College.

### Cello, Viola, and Violin

Code	Title	Credit Hours
MUSC 8500	Instrumental Ensemble (2 terms)	2
MUSC 8510	Instrumental Ensemble (2 terms)	2
MUSC 8555	Orchestral Repertoire (2 terms)	2
MUSC 9001	Appl Music-Prof Studies	4
MUSC 9002	Appl Music-Prof Studies	4
Elective (2 terms) <sup>1</sup>		4
<b>Total Credit Hours</b>		<b>18</b>

1

Students select electives to meet their individual needs. These may be advanced theory or history courses, performance practice courses, non-music courses that support the student's major study, or courses designed to fill gaps in earlier study. With departmental permission, elective credits may also be fulfilled by additional repertoire or ensemble courses, but only if this does not limit the participation of students in other programs in the College.

### Double Bass

Code	Title	Credit Hours
MUSC 8500	Instrumental Ensemble (2 terms) or MUSC 8510 Instrumental Ensemble	2
MUSC 9001	Appl Music-Prof Studies	4
MUSC 9002	Appl Music-Prof Studies	4
Ensemble or Repertoire course (2 terms)		2
Elective (2 terms) <sup>1</sup>		6
<b>Total Credit Hours</b>		<b>18</b>

1

Students select electives to meet their individual needs. These may be advanced theory or history courses, performance practice courses, non-music courses that support the student's major study, or courses designed to fill gaps in earlier study. With departmental permission, elective credits may also be fulfilled by additional repertoire or ensemble courses, but only if this does not limit the participation of students in other programs in the College.

### Historical Keyboard Instruments and Piano

Code	Title	Credit Hours
MUSC 9001	Appl Music-Prof Studies	4
MUSC 9002	Appl Music-Prof Studies	4
Ensemble, Accompanying, Literature, or Repertoire course (2 terms)		4
Elective (2 terms) <sup>1</sup>		6
<b>Total Credit Hours</b>		<b>18</b>

1

Students select electives to meet their individual needs. These may be advanced theory or history courses, performance practice courses, non-music courses that support the student's major study, or courses designed to fill gaps in earlier study. With departmental permission, elective credits may also be fulfilled by additional repertoire or ensemble courses, but only if this does not limit the participation of students in other programs in the College.

### Opera

Code	Title	Credit Hours
MUSC 8231	Opera Role Preparation	3
MUSC 8232	Opera Role Preparation	3
MUSC 8235	Opera Vocal Lessons	2
MUSC 8236	Opera Vocal Lessons	2
Elective (2 terms) <sup>1</sup>		8
<b>Total Credit Hours</b>		<b>18</b>

1

Students select electives to meet their individual needs. These may be advanced theory or history courses, performance practice courses, non-music courses that support the student's major study, or courses designed to fill gaps in earlier study, although it is recommended that those in Opera take 2 credits of MUSC 8215 Vocal Coaching. With departmental permission, elective credits may also be fulfilled by additional repertoire or ensemble courses, but only if this does not limit the participation of students in other programs in the College.

### Voice

Code	Title	Credit Hours
MUSC 9001	Appl Music-Prof Studies	4
MUSC 9002	Appl Music-Prof Studies	4
Ensemble, Repertoire, Literature, or other Performance course (2 terms)		4
Elective (2 terms) <sup>1</sup>		6
<b>Total Credit Hours</b>		<b>18</b>

1

Students select electives to meet their individual needs. These may be advanced theory or history courses, performance practice courses, non-music courses that support the student's major study, or courses designed to fill gaps in earlier study. With departmental permission, elective credits may also be fulfilled by additional repertoire or ensemble courses, but only if this does not limit the participation of students in other programs in the College.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

**Additional Requirements:** Only grades of "B-" and higher count toward certificate requirements.

**Culminating Event:** A graduation recital is not required. Students are, however, required to play a jury each academic term.

## Center for the Performing and Cinematic Arts / School of Theater, Film and Media Arts

The School of Theater, Film and Media Arts brings the Department of Theater and the Department of Film and Media Arts under the umbrella of the Center for the Performing and Cinematic Arts.

### Theater

Located on the northern edge of the Avenue of the Arts and just minutes away from the heart of Philadelphia's thriving theater community, the Department of Theater has established itself as one of the finest theater training programs in the nation. Many of our alumni are thriving as actors, directors, playwrights, designers and technicians. They are working artists with credits on stage, television and film here in Philadelphia; in major entertainment industry centers like New York City and Los Angeles; and with professional theater companies all across the country and internationally.

The Professional Training Program in Theater at Temple University, which awards the Master of Fine Arts (MFA), has distinguished itself as one of the foremost theater training and performance institutions in the nation and as an important contributor to the Philadelphia theater landscape. Our MFA actors, directors, designers, playwrights and technicians collaborate with professional faculty, staff and guest artists to train and produce exciting contemporary theater, encompassing a broad range of genres and styles, including classics, new plays and musicals, for a diverse campus and public audience. Our faculty is comprised of a collaborative team of experienced, celebrated working professionals and distinguished scholars from the theater world, who, as both teachers and mentors, generously share their consummate artistry, seasoned expertise and great passion for practicing the craft of theater.

### Film and Media Arts

The Master of Fine Arts (MFA) program in the Department of Film and Media Arts (FMA) is the country's foremost program in alternative film, video and new media. Temple's FMA department is internationally recognized as a center for filmmaking that is socially engaged, activist, diverse, interdisciplinary and international. With approximately 40 graduate students from diverse communities and countries, the program is large enough to offer intellectual stimulation through a wide range of courses, yet small enough to afford individual attention, maximum access to equipment, and creative control over one's own projects.

The MFA in FMA is viewed as a creative laboratory for producing works of social significance and artistic merit. We are committed to advancing methods that articulate alternative voices, including those of women; people of color; and others who have been economically, politically or artistically disenfranchised. We look for students with strong creative ideas, experiences and critical depth, no matter their background. FMA students come from all over the world, including through programs like Fulbright. Situated in Philadelphia's thriving arts scene, diverse communities and institutions, the program additionally offers students wide-ranging opportunities for collaborations and audiences.

The MFA is a terminal degree comparable to a doctoral degree, with the notable exception that the Temple program stresses a creative synthesis of both production and theory, requiring comprehensive exams and a final creative project instead of a dissertation. Students work with faculty who are international leaders in their fields with awards from Fulbright,

Guggenheim, Jerome, the National Endowment for the Arts, the National Endowment for the Humanities, Pew and Rockefeller as well as major film, art and publication credits. Temple's MFA in FMA allows filmmakers, videomakers, screenwriters and media artists to challenge the current practices of Hollywood, commercial television and global media. With a combination of academic and professional training, the degree qualifies graduates to teach on the university level.

The MFA program at Temple is one of the most recognized graduate programs in the country in terms of national and international film and video awards. Temple graduate students have received nationally competitive:

- University Film and Video Association production grants,
- National Endowment for the Arts media fellowships, and
- Eastman Kodak Scholarships, the nation's most competitive scholarship in cinematography.

Temple graduate students have also received major recognition at:

- American Film Institute FEST, Ann Arbor Film Festival, Asian American International Film Festival, Chicago International Film Festival, the Dore Schary Awards, New York Film Festival, Philadelphia Film Festival, San Francisco International Film Festival, and Sundance Film Festival, as well as
- Numerous festivals across the globe in Athens, Berlin, Bonn, Dallas, Houston, London, Melbourne, Montreal and Paris.

Major professional recognition for student projects includes:

- Hollywood's coveted Academy Nicholl Fellowship in Screenwriting,
- Several Oscar nominations, and
- Awards from both the Academy of Motion Picture Arts and Sciences and the Academy of Television Arts and Sciences.

In addition, Temple MFA productions have been picked up for distribution by such prestigious organizations as:

- Coe Film Associates
- Direct Cinema Limited
- Museum of Modern Art
- New Day Films
- Women Make Movies

and for national and international broadcasts in the United States, Asia, Australia, Canada and Europe.

### Graduate Programs and Certificates

- Documentary Arts and Visual Research PhD (p. 708)
- Film and Media Arts MFA (p. 711)
- mediaXarts: Cinema for New Technologies and Environments MA (p. 713)
- Musical Theater Collaboration MFA (p. 715)
- Theater/Acting MFA (p. 718)
- Theater/Design MFA (p. 719)
- Theater/Directing MFA (p. 721)
- Theater/Playwriting MFA (p. 723)
- Theater Instruction MA (p. 724)

- Graduate Certificate: Documentary Arts and Ethnographic Research (p. 726)
- Graduate Certificate: Theater Instruction (p. 727)

## Graduate Faculty

*Nora Alter*, Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; PhD, University of Pennsylvania.

*Warren F. Bass*, Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MFA, Columbia University.

*Chris Cagle*, Associate Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; PhD, Brown University.

*Marie Anne Chiment*, Professor, Department of Theater, School of Theater, Film and Media Arts; MFA, New York University Tisch School of the Arts.

*Roderick L. Coover*, Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; PhD, University of Chicago.

*Peter P. d'Agostino*, Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MA, San Francisco State University.

*Sarah Drury*, Associate Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MA, New York University Tisch School of the Arts.

*Fred M. Duer*, Professor, Department of Theater, School of Theater, Film and Media Arts; MFA, Ohio University.

*LeAnn Erickson*, Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MFA, University of Iowa.

*Marcus Giamatti*, Associate Professor, Department of Theater, School of Theater, Film and Media Arts; MFA, Yale University.

*Lindsay Goss*, Assistant Professor, Department of Theater, School of Theater, Film and Media Arts; PhD, Brown University.

*Steven Gross*, Associate Professor, Department of Theater, School of Theater, Film and Media Arts; PhD, Yale University.

*David Ingram*, Associate Professor of Instruction, Department of Theater, School of Theater, Film and Media Arts; MFA, New York University Tisch School of the Arts.

*Lynne Innerst*, Associate Professor, Department of Theater, School of Theater, Film and Media Arts; MFA, University of Southern California.

*Michael J. Kuetemeyer*, Associate Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MFA, Temple University.

*Kartik Nair*, Assistant Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; PhD, New York University.

*Chet Pancake*, Associate Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MFA, School of the Art Institute of Chicago.

*Donna Snow*, Associate Professor, Department of Theater, School of Theater, Film and Media Arts; MFA, American Conservatory Theater.

*Jennifer Stafford*, Assistant Professor, Department of Theater, School of Theater, Film and Media Arts; MFA, New York University Tisch School of the Arts.

*Elisabeth Subrin*, Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MFA, School of the Art Institute of Chicago.

*Rea Tajiri*, Associate Professor, Department of Film and Media Arts, School of Theater, Film and Media Arts; MFA, California Institute of the Arts.

*Douglas C. Wager*, Professor, Department of Theater, School of Theater, Film and Media Arts; MFA, Boston University.

*Kimmika Williams-Witherspoon*, Associate Professor, Department of Theater, School of Theater, Film and Media Arts; PhD, Temple University.

## Documentary Arts and Visual Research PhD

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS

Learn more about the Doctor of Philosophy in Documentary Arts and Visual Research.

### About the Program

The PhD program in Documentary Arts and Visual Research is designed for students who have developed a professional level of technological artistry in sound and image production through the completion of an MFA degree and who want to apply their skills to develop visual research projects or to reflect critically on traditional and digital forms of cinema through scholarship and technological analysis. The PhD program offers MFA graduates the opportunity to use their creative education to take on the intellectual challenge of our technological age: the expression of ideas, once communicated entirely by written means but now through multiple forms of media.

In the PhD program, students explore research questions based in field-based research, critical analysis and/or history of nonfictional forms in film, media arts and emerging technologies. The intertwining relationships of theory and practice are at the heart of this interdisciplinary program. Students enter with both a professional mastery production in cinema and media arts or a related field as well as strong scholarly skills. Thus, they can create groundbreaking work that moves fluidly between creative and critical approaches to images and the stories they tell. Doctoral projects may draw from multiple disciplines and research methods in the arts, humanities and sciences. The projects may take many forms, such as those of critical, digital and visual research in the humanities, interactive and emergent forms of writing, and cross-disciplinary visual ethnography.

Learning outcomes include the ability to:

- apply advanced visualization technologies and creative methods in the pursuit of original scholarly research;
- expand critical research from both theoretical and applied perspectives;
- pursue scholarly careers in a vital and emerging technological field; and

- work with research teams that are engaged in digital scholarship and visualization in such diverse fields as anthropology, geography and media studies.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program is expected to be completed on a full-time basis.

**Interdisciplinary Study:** The program requires students to take one appropriate interdisciplinary elective from inside or outside of the department.

**Ranking:** Temple's Film and Media Arts graduate programs are ranked among the top 10 film/video programs nationally and within the top three programs offered by public institutions.

**Areas of Specialization:** Dr. Roderick Coover, Program Director, has been working in the areas of visual research, interactive documentary cinema, and experimental ethnography since the 1990s. Dr. Nora Alter publishes books and other critical works on essay films, German nonfiction cinema, and other related topics. Dr. Chris Cagle publishes books and essays on documentary theory and practice. Dr. Kartik Nair's research focuses on the transnational infrastructures of popular visual cultures.

Additionally, many of the program's practice-oriented faculty, including Professors Warren Bass, Peter d'Agostino, Sarah Drury, LeAnn Erickson, Michael Kuetemeyer, David Parry, Eran Preis, Jeff Rush, and Rea Tajiri, make documentary works or works integrating documentary praxis. Students also have opportunities to work with faculty in related departments both within the Center for the Performing and Cinematic Arts and beyond.

**Job Prospects:** Graduates are prepared for advanced career opportunities in academia, research-based documentary production, cultural institutions/foundations, research institutions, arts curating, emerging media technologies and industries, and critical writing wherein both interdisciplinary and applied perspectives are invaluable.

**Non-Matriculated Student Policy:** Coursework is limited to those matriculating in the PhD program.

**Financing Opportunities:** Contact the department directly for more information.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* December 1

Applications are evaluated together after the deadline has passed. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty familiar with the applicant's academic

competency and/or professionals working in film, media arts and documentary forms, or other closely related fields.

**Coursework Required for Admission Consideration:** Students who earned their MFA at a university other than Temple should contact the PhD Program Director, Dr. Roderick Coover, at roderick.coover@temple.edu to ensure that their graduate work prepares them for the PhD degree.

**Master's Degree in Discipline/Related Discipline:** All applicants must have earned a Master of Fine Arts degree in film or media arts or be in the final year of their MFA program. The PhD program is designed for students seeking to integrate production and theory who have finished their MFA degree by the end of the summer before the PhD program begins.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

*Applicants educated in China* should review the information found on the Graduate School website regarding the submission of education documents to Temple University. See <https://grad.temple.edu/admissions/international-applicants/before-you-apply>. The admissions committee for the Documentary Arts and Visual Research PhD program will review your materials to determine your admissions status provided the required documentation is submitted in support of your application.

**Statement of Goals:** In approximately 500 words, describe your primary goals and areas of interest for your doctoral studies, as well as your long-term professional aims and relevant biographical information.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Portfolio:** Applicants must submit a portfolio, which should include work related to their proposed doctoral goals. The applicant's role in each work must be clearly indicated.

**Resume:** Current resume required.

**Writing Sample:** Submission of a scholarly writing sample related to the applicant's doctoral goals is also required.

**Advanced Standing:** The PhD in Documentary Arts and Visual Research program consists of 37 discrete credits taken beyond the MFA degree. At the time of admission, the entire MFA degree serves as advanced standing credits. These credits are not counted toward the 37 required credits of the doctoral degree. However, students may transfer into the doctoral degree up to 6 graduate credits in coursework taken beyond the MFA degree. Typically, this coursework is reviewed after admission to the PhD degree and must be approved by the Film and Media Arts committee.

## Program Requirements

**General Program Requirements:**

Number of Credits Required Beyond the MFA: 37

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
Select courses from the following that total 11 credits:		11
FMA 5468	Art-Culture-Technology Seminar <sup>1</sup>	
FMA 5671	Film Theory Seminar <sup>1</sup>	
FMA 8462	Documentary Arts and Visual Research <sup>1</sup>	
FMA 8680	Advanced Topics in Media Arts Studies	
FMA 9346	Methodologies and Praxis	
Additional FMA graduate courses and FMA 9683 Directed Readings <sup>2</sup>		17
Non-FMA graduate course <sup>2</sup>		3
<b>Research Courses <sup>3</sup></b>		<b>6</b>
FMA 9994	Doctoral Comprehensive Exam Study	
FMA 9998	Doctoral Dissertation Proposal	
FMA 9999	Doctoral Dissertation	
<b>Total Credit Hours</b>		<b>37</b>

1

Students who have previously taken FMA 5468, FMA 5671 and/or FMA 8462 are required to substitute a graduate-only course(s) taught by doctoral faculty with approval from the student's advisor and the Program Director.

2

Students select courses with approval from the Program Director. An additional 3-credit graduate course taken outside the department may be substituted for 3 credits of FMA required courses and Directed Readings.

3

The Graduate School requires that students complete a minimum of 6 research credits that include FMA 9994, FMA 9998 and FMA 9999. Of the 6 credits, at least 2 credits must be earned in FMA 9999.

#### **Culminating Events:**

##### *Comprehensive Exam:*

The list of examiners must be submitted to the Program Director no later than the first week of the term in which the exam is anticipated. The exam is conducted with at least three doctoral-level faculty of the Graduate School of Temple University. The examination committee chair must be faculty in the Department of Film and Media Arts. Additional doctoral-level examiners are permitted. The exam must be conducted no later than the 14th week of the term in which the exam is anticipated and signed approval must be submitted according to the Graduate School guidelines.

##### *Proposal:*

The formation of a dissertation committee must be submitted to the Program Director no later than the first week of the term in which a dissertation proposal is to be submitted. Students develop their dissertation proposal through individual tutorials and group workshops. The dissertation proposal is due no later than March 30. The Dissertation Examining Committee Chair must be a tenured or tenure-track doctoral faculty member from the Department of Film and Media Arts. The dissertation proposal deadline is set by the committee and is conducted according to the Graduate School guidelines.

##### *Dissertation:*

Students work with their dissertation advisor to complete the dissertation. Doctoral dissertation projects are to employ the latest visualization technologies.

Early in the term in which a defense of the dissertation is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the Doctoral Advisory Committee (DAC) plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the dissertation with the Associate Dean at least one month before the requested defense date. The "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the School of Theater, Film and Media Arts. All members of the DEC attend the oral defense and then vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

## Film and Media Arts MFA

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER,  
FILM AND MEDIA ARTS

Learn more about the Master of Fine Arts in Film and Media Arts.

### About the Program

The MFA program in Film and Media Arts is designed to prepare socially aware, artistically innovative candidates for professional careers in film, video or digital media. The program is characterized by an openness to all forms of media expression, with an emphasis on independent film and video arising out of both an artistic and social consciousness, taught under the supervision of recognized scholars and professionals in the field. Special attention is paid to the contemporary documentary, the independent narrative, video art and installation, and emerging forms and technologies.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered at convenient times of the day and evening.

**Interdisciplinary Study:** Although graduate students in the Film and Media Arts (FMA) program are expected to complete most of their coursework in the FMA Department, they are encouraged to explore relevant courses in other departments.

**Affiliation(s):** The FMA program is associated with the University Film and Video Association, an international organization of university and industry professionals working in the field of media production.

**Study Abroad:** FMA courses are offered at Temple's satellite campuses in Rome, London and Tokyo where graduate students may choose to complete courses. Graduate students may also choose to complete courses through FMA's Los Angeles Study Away Program.

**Ranking:** The MFA in Film and Media Arts is ranked among the top 10 film/video programs nationally and is one of the top three programs offered by public institutions.

**Areas of Specialization:** The MFA degree program offers concentrations for students to specialize in filmmaking, new media or screenwriting. The concentrations are:

- Cinematic Arts: Narrative and Documentary
- Media Arts
- Screenwriting

**Job Prospects:** The FMA graduate program produces media makers who pursue careers in academia and in the communications and production industries. Many graduates choose to work independently, creating original narrative and documentary films and videos or new media projects.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits within the department at the discretion of individual instructors.

**Financing Opportunities:** Applicants to the MFA program in Film and Media Arts are eligible and nominated for Teaching Assistantship and fellowship awards during the application process. Most students accepted

into the program receive some form of funding, which can be applied to the full 54-credit program at the rate of up to 13 credits per term. The awards include:

- *Four-Term Teaching Assistantship* – FMA departmental awards provide 50% tuition support and a stipend for either terms 1-4 or terms 2-5.
- *Variable Teaching Assistantship* – FMA departmental awards offer partial tuition support and a stipend, both with various values.
- *University Fellowship* – Recipients of the competitive fellowship awards receive 100% support for three years. Fellowship funding is provided by the Graduate School in terms 1, 2, and 6, with departmental support in the form of a Teaching Assistantship offered in terms 3, 4, and 5.
- *Fulbright Support* – FMA accepts international Fulbright Award students, who generally receive 100% tuition and a stipend for three years, with teaching opportunities.

All awards are based on and contingent upon the student maintaining an excellent record of achievement and advancement in the program. Given that the MFA is typically a three-year, six-term program, most students fund their sixth term by teaching as adjunct faculty.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* November 15; October 15 international

Applications are evaluated together after the deadline has passed. Late applications may be considered for admission. To ensure funding consideration, however, applicants must submit an application and all supporting materials by November 15.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty familiar with the applicant's academic competency and/or professionals in the fields of communication or media production.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

*Applicants educated in China* should review the information found on the Graduate School website regarding the submission of education documents to Temple University. See <https://grad.temple.edu/admissions/international-applicants/before-you-apply>. The admissions committee for the Film and Media Arts MFA program will review your materials to determine your admissions status provided the required documentation is submitted in support of your application.

**Statement of Goals:** In approximately 1,000 to 1,500 words, explain your personal interests, educational aims and professional goals, along with relevant biographical information.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S.

institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68
- Duolingo: 105

**Portfolio:** A portfolio is submitted as evidence of creative potential. This usually includes a completed film or videotape accompanied by a cover sheet to explain the applicant's role in the project, including production date, running time, relevant credits, and the conditions and constraints under which it was produced. Other exceptional creative work in writing, art, music, still photography, computer arts, criticism or research scholarship might be appropriate. Such work also may be used to supplement a film or video exhibit. Portfolio materials should be submitted as an online link.

**Resume:** Current resume required.

**Transfer Credit:** The Film and Media Arts MFA program accepts graduate credits completed in coursework related to the program. Acceptance of transfer credits is determined solely by the FMA committee. The maximum number of credits a student may transfer is 11.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 54, with 12-13 required credits and 41-42 concentration-specific credits

Code	Title	Credit Hours
<b>Core Courses</b>		
FMA 5242	Videography	4
FMA 5670	M.F.A. Colloquium (2 terms)	2
FMA 5671	Film Theory Seminar <sup>1</sup>	3
Select one critical studies course from the following:		3-4
FMA 5672	History of Documentary Film	
FMA 5673	Time-Image Arts/Cinema Praxis	
FMA 5676	Anthropological Film/Media	
FMA 5680	Topics in Film Study	
FMA 8462	Documentary Arts and Visual Research	
FMA 8670	Topics in Media Studies	
FMA 8673	Historical Film Research	
FMA 8674	Critical Studies Seminar	
FMA 8675	Seminar: International Film	
FMA 8680	Advanced Topics in Media Arts Studies	
FMA 8870	U Penn Critical Studies	
FMA 9346	Methodologies and Praxis	
<b>Total Credit Hours</b>		<b>12-13</b>

<sup>1</sup>

With permission from the Graduate Program Director, Media Arts students may substitute a graduate-level arts- or media-theory course for FMA 5671.

Additional course requirements for each of the three concentrations are identified in the following course grids:

## Cinematic Arts: Narrative and Documentary

Code	Title	Credit Hours
FMA 5241	Cinematography Workshop	4
FMA 5361	Writing for Media I	4
FMA 9245	Thesis Development Workshop	4
FMA 9246	Thesis Production Workshop	4
Electives <sup>1</sup>		25-26
<b>Total Credit Hours</b>		<b>41-42</b>

<sup>1</sup>

May include up to 6 thesis credits taken with the student's thesis committee chair.

## Media Arts

Code	Title	Credit Hours
FMA 5674	Media Arts Thry-Practice	4
Select one content-design and writing course from the following:		4
FMA 5361	Writing for Media I	
FMA 5462	Video Game Theory and Writing	
FMA 8245	Documentary Workshop	
FMA 8461	Interactive Narrative	
FMA 8462	Documentary Arts and Visual Research	
Select three media arts courses from the following:		12
FMA 5243	Audio Production and Aesthetics	
FMA 5451	Animation Workshop	
FMA 5462	Video Game Theory and Writing	
FMA 8244	Experimental Methods	
FMA 8451	Digital Animation	
FMA 8452	New Technology Laboratory	
FMA 8461	Interactive Narrative	
FMA 8551	Digital Post-Production	
Electives <sup>1</sup>		21-22
<b>Total Credit Hours</b>		<b>41-42</b>

<sup>1</sup>

May include up to 6 thesis credits taken with the student's thesis committee chair.

## Screenwriting

Code	Title	Credit Hours
FMA 5241	Cinematography Workshop	4
FMA 5361	Writing for Media I	4
FMA 8362	Joint Writing Workshop 1	4
FMA 8363	Joint Writing Workshop 2	4
Select one from the following:		4
FMA 5362	Serial Writing	
FMA 8361	Writing for Media II	
Electives <sup>2</sup>		21-22
<b>Total Credit Hours</b>		<b>41-42</b>

1

May include up to 6 thesis credits taken with the student's thesis committee chair.

### **Culminating Events:**

#### *Faculty Reviews:*

At the end of both the first and second years, students formally present their work to the FMA faculty, who review and evaluate students' work and progress in the program.

#### *Comprehensive Examination:*

The MFA program in Film and Media Arts requires a Comprehensive Examination in addition to an MFA thesis. The program is committed to synthesizing theory and practice, allowing students to develop aesthetically and conceptually as makers. The MFA candidate forms a committee of three FMA faculty members (or two FMA faculty and one outside approved member) and works with the committee to design customized areas of inquiry that embody their interests in film studies, media theory or any other field of knowledge relevant to them and their work. Typically, after completing 38 credits of coursework, students write and defend the examination questions, which include two essays and a research-based expanded artist statement.

#### *Thesis Proposal and Defense:*

A thesis is a completed stand-alone work that can be:

- a complete sound, film or video production;
- a feature film script; or
- a completed work in an alternative media form, such as computer-generated media, interactive media, installations or newly emerging technologies.

Students develop their thesis project proposal, treatment and/or script during their fourth semester and form a thesis committee at that time, selecting a thesis chair. The thesis committee may comprise FMA faculty entirely or two FMA faculty and one outside member. The student then proposes an MFA thesis. The MFA thesis committee evaluates project proposals individually for rigor, scope, length and other specific criteria prior to the start of production.

A thesis project must be completed by the date set annually by the School of Theater, Film and Media Arts and Temple University. While it is common and expected for students to develop thesis projects into works for professional public audiences that might entail additional changes after graduation, such as professional color correction, the thesis work must be complete and presentable. Rough versions and drafts with placeholders are not considered complete thesis projects. Upon completion of the MFA thesis, the committee and student hold a public screening or reading of the work.

## **mediaXarts: Cinema for New Technologies and Environments MA**

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS

Learn more about the Master of Arts in mediaXarts: Cinema for New Technologies and Environments.

## **About the Program**

The one-year, 30-credit master's program in mediaXarts: Cinema for New Technologies and Environments prepares students for professions in the creative design industries, interaction design for public organizations, and emergent cinematic art forms, including interactive cinema, projection design, media installation, user experience design, design for mobile media, net art and social media. The mediaXarts MA program interfaces with the full range of Media Arts BFA, MA and MFA curricula at Temple University, which are among the leading programs for interdisciplinary, alternative and emerging media arts. The mediaXarts program trains artists who seek to challenge cinematic and arts conventions through narrative, non-narrative and hybrid forms, including interactive installation, projection design for performance and architecture, mobile media app design, digital animation, game design, interactive fabrication and new media studies. The curriculum engages the exciting interdisciplinary contexts of Temple's Center for the Performing and Cinematic Arts and Philadelphia's thriving arts scene.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered at convenient times of the day and evening.

**Interdisciplinary Study:** The degree program allows media artists to:

- engage in interdisciplinary art practices through collaborations across cinematic fields, theater, fine arts, humanities, the sciences

and visual research within Boyer College of Music and Dance and the School of Theater, Film and Media Arts in the Center for the Performing and Cinematic Arts, Tyler School of Art and Architecture, and other programs within the University;

- bridge analog and digital forms, from optical-printing and hand-painted film to projection design, mobile media, interactive cinema, physical computing, analog/digital animation and installation arts; and
- develop collaboration skills across the fields of media production, digital media arts, performing arts and fine arts through curricular programs in the Center for the Performing and Cinematic Arts. With permission, students may also take courses at the Tyler School of Art and Architecture.

**Affiliations:** Media artists work with Film and Media Arts faculty, who are leading artists making works for museums, public spaces, interactive cinema, mobile media, gallery installation, performance, projection and the Web. Our mediaXarts students also work within Philadelphia's vibrant art scene and local communities as well as through national and international networks.

**Study Abroad:** Media artists have opportunities for study-away experiences in Los Angeles, Tokyo and Venice. Study-away experiences have to be balanced with the degree requirements of the program.

**Ranking:** Temple's Film and Media Arts graduate programs are ranked among the top 10 film/video programs nationally and within the top three programs offered by public institutions.

**Areas of Specialization:** The faculty are international leaders with awards from Fulbright, Guggenheim, the National Endowment for the Arts (NEA), the National Endowment for the Humanities (NEH), Pew, and Rockefeller, as well as major film, art and publication credits. Faculty members specialize and offer coursework in:

- Digital Animation (2D and 3D)
- Digital Ethnography and New Documentary Forms
- Game, App and Interactive Design
- Installation and Multi-Platform Design
- Media Production and Post-Production
- Physical Computing
- Projection Design for Theater, Performance and Architecture
- Writing for Media

**Job Prospects:** Media artists go on to careers across the creative industries, culture and education. For example, the MFA program in Film and Media Arts has produced more Princess Grace and Eastman Scholar Award winners than any other school in recent decades.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits within the department at the discretion of individual instructors.

**Financing Opportunities:** Contact the department directly for more information.

## Admission Requirements and Deadlines

### Application Deadline:

Fall: March 1

Applications are evaluated together after the deadline has passed. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 3*

*From Whom:* Letters of recommendation should be obtained from college/university faculty familiar with the applicant's academic competency and/or professionals in the fields of communication or media production.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

*Applicants educated in China* should review the information found on the Graduate School website regarding the submission of education documents to Temple University. See <https://grad.temple.edu/admissions/international-applicants/before-you-apply>. The admissions committee for the Film and Media Arts MFA program will review your materials to determine your admissions status provided the required documentation is submitted in support of your application.

**Statement of Goals:** In approximately 500 words, explain your personal interests, educational aims and professional goals, along with relevant biographical information.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Portfolio:** A portfolio, with your role in each work clearly indicated, is submitted as evidence of creative potential. The works can include film, video, animation, visual art, examples of design, interactive work or other media art forms, as well as writing, art, music, still photography, computer arts, criticism or research scholarship, if appropriate.

**Resume:** Current resume required.

**Transfer Credit:** The mediaXarts MA program accepts graduate credits completed in coursework related to the program. Acceptance of transfer credits is determined solely by the Film and Media Arts committee. The maximum number of credits a student may transfer is 3.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 30*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
FMA 5242	Videography	4
FMA 5468	Art-Culture-Technology Seminar	4

FMA 5674	Media Arts Thry-Practice	4
<b>Electives</b>		
Three courses in Film and Media Arts <sup>1</sup>		12
Two in Film and Media Arts or Outside the Department		6
<b>Total Credit Hours</b>		<b>30</b>

1

Students customize their course of study after completion of all required courses.

#### **Culminating Event:**

##### *End-of-Year Review:*

Student work is evaluated by the Film and Media Arts faculty near the end of the year in a closed individual session. Each student is asked to present their completed work and work in progress, along with an artistic statement that indicates future direction. Student participation in the End-of-Year Review is mandatory.

## **Musical Theater Collaboration MFA**

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER,  
FILM AND MEDIA ARTS

Learn more about the Master of Fine Arts in Musical Theater Collaboration.

### **About the Program**

The George Abbott Master of Fine Arts in Musical Theater Collaboration is designed to prepare candidates for a career in the musical theater industry as collaborating creative team members and as independent artists engaged in the creation of new musical theater works for the commercial and nonprofit sectors, as well as educational programs. The program emphasizes intensive graduate-level craft-based training that includes abundant studio, workshop and production experience opportunities. Rather than the usual isolated pedagogical separation of the various craft and artistic disciplines within the field, the program places primary emphasis on the inherent collaborative nature of this most integrated of performing art forms.

The innovative degree in Musical Theater Collaboration is the only MFA graduate training program in the nation designed to collectively train, mentor and develop new book writers, choreographers, composers, directors, lyricists and playwrights together as a cohort in a comprehensive collaborative program. The broad scope of the program includes a comprehensive overview and history of the field, a deep understanding of the aesthetics of the form, as well as knowledge of the business side of the industry. The program seeks to mirror the actual field-based creative process of generating new musical theater works by teaching fundamental craft and collaboration skills within a world of access to the necessary mentoring and talent resources vital to the process of creating a new musical.

The three-year curriculum includes:

- In Year 1, a focus primarily on building creative collaboration skills in concert with studies based in students' respective disciplinary areas of emphasis.
- In Year 2, a continuation of disciplinary studies and division of the cohort into groups of collaborative teams focused on the creation of new musical theater thesis pieces.
- In Year 3, a focus on bringing thesis projects to fruition, culminating in a fully realized workshop production. The productions are presented in New York City in an industry showcase of excerpts of students' work for consideration by an invited roster of field and industry professionals.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program as part of a cohort on a full-time basis.

**Interdisciplinary Study:** The program is interdisciplinary in nature, given that book writers and playwrights, composers and composer/lyricists, and directors and director/choreographers learn and create together.

**Accreditation:** The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

**Areas of Specialization:** Within the cohort, students concentrate in one of three areas:

- Bookwriting
- Composing/Lyricist
- Directing

**Job Prospects:** The program prepares candidates for careers in the musical theater industry or academy as collaborating creative team members and as independent artists engaged in the creation of new musical theater works.

**Non-Matriculated Student Policy:** Coursework may not be taken on a non-matriculated basis.

**Financing Opportunities:** Lab, studio and classroom teaching opportunities are available for Teaching Assistants. Duties include assisting in grading papers for survey and literature classes. Assistantships carry a stipend and full tuition remission. Academic Internships are also available in production work, including rehearsal and performance of plays for the theater season.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* February 1, 2025

**\*\* APPLICATIONS will next be accepted for FALL 2025 ADMISSION \*\***

Applications are accepted from applicants through the University/Resident Theatre Association (URTA) audition/interview process as well as local auditions in Philadelphia. Auditions are held every three years (e.g., 2025, 2028, 2031). We visit all three sites: New York City, Chicago and San Francisco. We also recruit through the Stage Directors and Choreographers Society (SDC) and with several prominent musical theater development companies such as the National Alliance for Musical Theatre (NAMT). After candidates have auditioned and been interviewed, those accepted are notified by letter on or before April 15. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required: 3*

*From Whom:* Letters of recommendation should be obtained from college/university professors and/or professionals in the field who are familiar with the applicant's work.

**Coursework Required for Admission Consideration:** Applicants must have completed a bachelor's degree or equivalent and ideally have professional experience in their discipline.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the baccalaureate degree at Temple University.

**Statement of Goals:** Introduce yourself in approximately 500 words by relaying your relevant experience, values and areas of interest. Proper essay form should be used, but it may be in a personal style.

**Standardized Test Scores:** No standardized test is used for admission to the MFA in Musical Theater Collaboration program.

**Resume:** Current resume required.

**Interview:** Interviews are generally conducted in March and April through URTA, with audition sites in New York, Chicago and San Francisco, as well as locally on the Temple University campus. Applicants called back for an interview are required to bring transcripts, a headshot and a resume.

### Other Requirements:

- **Bookwriting:** Via Acceptd, submit a writing sample that is either one full-length manuscript or two one-act scripts.
- **Composing/Lyricist:** Via Acceptd, submit samples of creative work, portfolio, reviews and/or website.
- **Directing:** Via Acceptd, submit a reel of creative work, production photos, reviews and/or website.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate: 60*

### Required Courses:

In Year 1, foundation coursework is taken. In Year 2, thesis project teams are formed and collaboration begins. In Year 3, the thesis projects are completed, presented and showcased for industry.

All students enrolled in a cohort of the Musical Theater Collaboration MFA program take the following core courses together:

Code	Title	Credit Hours
THTR 5012	American Musical Theater	2
THTR 5287	Rehearsal/Performance	2
THTR 5392	The Business of the Business in Theater	2
THTR 5804	Dramaturgy	2
THTR 5873	Adaptation <sup>1</sup>	1-2
THTR 5892	Script and Score Analysis	2
THTR 8001	Seminar in Dramatic Literature	2
THTR 8002	Seminar in Dramatic Literature	2
THTR 8985	Teach in Higher Education	3
THTR 9487	Musical Theater Practicum III	1
THTR 9587	Musical Theater Practicum IV <sup>2</sup>	2-3
THTR 9995	Thesis	6
General Electives <sup>3</sup>		12
<b>Total Credit Hours</b>		<b>39-41</b>

**1**

Students in the Bookwriting concentration take THTR 5873 for 1 credit; students in the Composing/Lyricist and Directing concentrations take this course for 2 credits.

**2**

Students in the Directing concentration take THTR 9587 for 2 credits; students in the Bookwriting and Composing/Lyricist concentrations take this course for 3 credits.

3

Consult with the program director to ensure selection of appropriate electives.

The balance of coursework annually is taken by students in their respective areas of concentration:

## Bookwriting Concentration

Code	Title	Credit Hours
THTR 5487	Musical Theater Practicum I	1
THTR 5587	Musical Theater Practicum II	1
THTR 5871	Playwriting I	1
THTR 5872	Playwriting II	2
THTR 5893	Lyric Seminar I	3
THTR 5894	Lyric Seminar II	4
THTR 8881	Playwriting III	2
THTR 8882	Playwriting IV	2
THTR 9882	Projects in Playwriting	2
Select one Design Area course from the following:		2
THTR 5613	History of Decor	
THTR 5625	History of Fashion	
THTR 5741	Design for TV and Film	
THTR 8511	Lighting Design II	
THTR 8611	Costume Design II	
THTR 8711	Scene Design II	
<b>Total Credit Hours</b>		<b>20</b>

## Composing/Lyricist Concentration

Code	Title	Credit Hours
MUST 8715	Composition I	3
MUST 8717	Composition II	4
THTR 5487	Musical Theater Practicum I	1
THTR 5587	Musical Theater Practicum II	1
THTR 5893	Lyric Seminar I	3
THTR 5894	Lyric Seminar II	4
General Elective <sup>1</sup>		3
<b>Total Credit Hours</b>		<b>19</b>

1

Consult with the program director to ensure selection of an appropriate elective.

## Directing Concentration

Code	Title	Credit Hours
THTR 5134	Directing for the Musical Stage	4
THTR 5387	Directing Practicum I	2
THTR 5388	Directing Practicum II	3
THTR 9382	Projects in Directing I	2
THTR 9387	Directing Practicum III	2
Select one Design Area course from the following or a general elective: <sup>1</sup>		3

THTR 5613 History of Decor

THTR 5625 History of Fashion

THTR 5741 Design for TV and Film

THTR 8511 Lighting Design II

THTR 8611 Costume Design II

THTR 8711 Scene Design II

General Elective

Film Course<sup>2</sup> 4**Total Credit Hours 20**

1

Consult with the program director in choosing an elective if a Design Area course is not selected.

2

Consult with the program director to ensure selection of an appropriate film course.

### Culminating Events:

#### Thesis Project:

The cohort creates a complete new musical culminating in a fully rehearsed workshop production. It is written by MFA candidate book writers and composers/lyricists, with subsequent direction by MFA candidate directors.

#### Showcase:

An industry showcase of students' selected work is presented in New York City to an invited roster of industry and field professionals. Funded in part by the George and Joy Abbott Center for Musical Theater at Temple University, the showcase consists of a short concert-style presentation featuring selected performed excerpts from the candidates' body of original work.

## Theater/Acting MFA

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER,  
FILM AND MEDIA ARTS

Learn more about the Master of Fine Arts in Theater/Acting.

### About the Program

The MFA program in Theater/Acting provides holistic actor training modeled after the conservatory approach. We are interested in actors with professional resumes who are willing to commit to a three-year regimen of study and performance. A twofold objective guides the graduate Acting program: assist professional actors in breaking through patterns or habits that have been holding back artistic growth; and develop a method for training that enables actors to effectively articulate the process to the student.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered at convenient times of the day and evening.

**Interdisciplinary Study:** Students are able to take some coursework with graduate students in Film and Media Arts and may participate, on a voluntary basis, in independent films directed by graduate and undergraduate directors in Film and Media Arts.

**Affiliation(s):** Temple theater students have the opportunity to intern with many of the numerous professional theaters in Philadelphia, including the Arden Theatre Company, Philadelphia Theatre Company, the Walnut Street Theatre, and The Wilma Theater.

**Accreditation:** The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

**Areas of Specialization:** The actor is offered a well-rounded acting curriculum in addition to pedagogical training in teaching in higher education.

**Job Prospects:** The program is primarily focused on training working mid-career professionals in the theater industry. Many of our graduates are working in television, film, regional theater, off-Broadway and Broadway and as instructors and professors in higher education.

**Non-Matriculated Student Policy:** Coursework may not be taken on a non-matriculated basis.

**Financing Opportunities:** Lab, studio and classroom teaching opportunities are available for Teaching Assistants. Duties include assisting in grading papers for survey and literature classes. Assistantships carry a stipend and full tuition remission. Academic Internships are also available in production work, including rehearsal and performance of plays for the theater season.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1, 2025

**\*\* APPLICATIONS will next be accepted for FALL 2025 ADMISSION \*\***

Applications are accepted from applicants through the University/ Resident Theatre Association (URTA) audition/interview process as well as local auditions in Philadelphia. Auditions are held every three years (e.g., 2025, 2028, 2031). We visit all three sites: New York City, Chicago and San Francisco. After candidates have auditioned and been interviewed through the URTA process or here locally, those accepted are notified by letter on or before April 15.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university professors and/or professionals in the field who are familiar with the applicant's work.

**Coursework Required for Admission Consideration:** Applicants must have completed a bachelor's degree or equivalent and ideally have considerable professional experience as working actors.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the baccalaureate degree at Temple University.

**Statement of Goals:** Introduce yourself in approximately 500 words by relaying your relevant experience, values and areas of interest. Proper essay form should be used, but it may be in a personal style.

**Standardized Test Scores:** No standardized test is used for admission to the MFA Acting program.

**Audition:** We audition through URTA with audition sites in New York, Chicago and San Francisco and locally on the Temple University campus.

**Resume:** Current resume required.

**Interview:** In addition to the audition, applicants who are called back for an interview are required to bring transcripts, a headshot and a resume. Interviews are generally held in February and March.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 60

*Required Courses:*

Code	Title	Credit Hours
THTR 5211	Speech for the Actor I	
THTR 5212	Speech for the Actor II	
THTR 5221	Acting I	
THTR 5222	Acting II	
THTR 5231	Vocal Production for the Actor I	

THTR 5232	Vocal Production for the Actor II
THTR 5241	Dance for the Actor I
THTR 5242	Dance for the Actor II
THTR 5287	Rehearsal/Performance
THTR 8001	Seminar in Dramatic Literature
THTR 8002	Seminar in Dramatic Literature
THTR 8211	Speech for the Actor III
THTR 8212	Speech for the Actor IV
THTR 8221	Acting III
THTR 8222	Acting IV
THTR 8231	Vocal Production for the Actor III
THTR 8232	Vocal Production for the Actor IV
THTR 8241	Dance for the Actor III
THTR 8242	Dance for the Actor IV
THTR 8985	Teach in Higher Education
THTR 9087	Graduate Ensemble Practicum
THTR 9211	Speech for the Actor V
THTR 9221	Acting V
THTR 9222	Acting VI
THTR 9231	Vocal Production for the Actor V
THTR 9232	Vocal Production for the Actor VI
THTR 9241	Dance for the Actor V
THTR 9251	Acting for the Camera
THTR 9283	Projects in Acting

**Culminating Events:** Completion of the degree is predicated on successfully completing required coursework and maintaining collegial relationships with faculty and fellow students. No formal thesis or other culminating event is required.

## Theater/Design MFA

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS

Learn more about the Master of Fine Arts in Theater/Design.

### About the Program

The Theater/Design MFA program offers a professional training curriculum wherein MFA designers and technicians collaborate with professional faculty, staff and guest artists to stage exciting contemporary theater for diverse audiences. We are looking for aspiring designers who will pursue the intent of the play wherever it leads them, into any period or style, into any emotion or state of mind, and whose knowledge and skills are so various that they bring a rich theatricality to the worlds they create. The Design program for Theater combines intensive classroom work with full-scale productions to create well-rounded designers and technicians. Our graduates find work in many aspects of theater, including regional theater, educational theater and the entertainment industry.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered at convenient times of the day and evening.

**Interdisciplinary Study:** Design students are encouraged to explore other fields of study, such as art history, cinematography and photography, as their course of study allows.

**Affiliation(s):** The Theater Department has informal affiliations with The Freedom Theatre, The Lighting Practice, and Philadelphia Theatre Company. With special permission from their advisors, students have the opportunity to intern at these and other professional theaters and production companies in the greater Philadelphia area. The Theater Department is a member of the Association for Theatre in Higher Education (ATHE), National Association of Schools of Theatre (NAST), University/Resident Theatre Association (URTA), and the United States Institute for Theatre Technology (USITT).

**Accreditation:** The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

**Areas of Specialization:** Each student, in consultation with the faculty, develop their own program of study based on individual interests and talent. Full-time faculty members are available for mentoring. Students may specialize in one or more of the following areas:

- Costume Design
- Lighting Design
- Scenic Design

**Job Prospects:** The program is primarily focused on training students for careers in the theater industry. Graduates of the Theater/Design

program find employment in regional theater, higher education and the entertainment industries.

**Non-Matriculated Student Policy:** Along with all university approvals, non-matriculated students are required to obtain written approval from the instructor for each class they want to take.

**Financing Opportunities:** Assistantships carry a stipend for working 20 hours per week in the shop of a student's respective design discipline and full-tuition remission. Lab, studio and classroom teaching opportunities are available.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

Applications are processed on a semi-rolling basis throughout the Spring.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university professors and professionals in the field who are familiar with the applicant's work.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Portfolio:** A portfolio is required of all applicants. The portfolio should contain examples of work, ranging from design projects, classroom exercises and fine art to realized designs. The portfolio should include the complete process for at least one show, including script analysis, concept statement, research materials, sketches, renderings, models, appropriate paperwork and production photography, if applicable.

**Resume:** Current resume required.

**Interview:** An interview is required of all applicants, and a campus visit is highly recommended. An interview can be held on campus or during the University/Resident Theatre Association (URTA) National Unified Interviews in Chicago at the end of January of the preceding academic year. Candidates are not required to interview through the URTA process, but are strongly encouraged to do so. Please see the URTA website, found at <https://www.urtacom/>, for more information. The deadline for participation in the URTA interview process is the middle of November of the preceding academic year.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 60

The Theater/Design MFA curriculum follows a three-year cycle. Specific course order is based on when a student starts their program.

### Required Courses:

Code	Title	Credit Hours
	Seminar in Dramatic Literature	
	Scenic Design	
	Costume Design	
	Lighting Design	
	Design for TV and Film	
	History of Decor	
	History of Fashion	
	Drawing and Rendering Techniques	
	Draping and Flat Pattern Drafting	
	Costume Crafts	
	Theatrical Model Making	
	Scene Painting	
	Projection and Media Design	
	The Job Market	

### Additional Requirements:

As a component of the three-year MFA degree program, all Theater/Design candidates actively participate in design and production work in the Theater Department's main stage season. This work is an extension of what is presented in the classroom and becomes the experiential component to the degree program. Coursework and production work are equally balanced throughout the academic year, both philosophically and pedagogically.

All Design students must participate in a portfolio review and faculty evaluation at the end of each semester.

### Culminating Event:

#### *Thesis:*

The master's thesis is typically a realized and produced production executed by the Theater Department as part of its main stage season. The underlying premise is to create and produce a professional design within a professional production. Along with gathering all research and creating all designs, drafts, renderings, models and appropriate paperwork for the design, fulfilling a written thesis component completes the degree process. The thesis production and document are defended before a faculty committee and then digitally published through Temple University.

In some cases, where appropriate, a "paper" thesis may be assigned. In this case, the candidate completes all the same research, designs, drafts, renderings, models and a written document defending the design and the process, but the design will neither be realized nor produced.

## Theater/Directing MFA

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS

Learn more about the Master of Fine Arts in Theater/Directing.

## About the Program

The focus of the MFA program in Theater/Directing is to develop the directing student as a visionary creative communicator and artistic leader. Directing students are trained to be fully capable of illuminating a text through the exploration of character in collaboration with the writer, actors and design/production team and of delivering a compelling and unified theatrical storytelling event to the audience.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is required.

**Interdisciplinary Study:** Students can take coursework in film with graduate students in Film and Media Arts.

**Affiliation(s):** Temple theater students have the opportunity to intern with many of the numerous professional theaters in Philadelphia, including the Arden Theatre Company, Lantern Theater Company, Philadelphia Theatre Company, Prince Theater, and The Wilma Theater.

**Accreditation:** The Theater Department is accredited by the National Association of Schools of Theatre (NAST) and is a founding member of the University/Resident Theatre Association (URTA).

**Areas of Specialization:** The goal of the program is to develop the director as a master "storyteller." Students focus on learning, through the study of craft-based pedagogy, about the director's primary commitment to the illumination of text for an audience through the work of the actor; through design, staging, thematic and theatrical interpretation; and through artistic/team collaboration and leadership.

**Job Prospects:** The program is primarily focused on training students for careers in professional theater.

**Non-Matriculated Student Policy:** Coursework may not be taken on a non-matriculated basis.

**Financing Opportunities:** Based on the number of assistantships allocated to the program, three-year Teaching Assistantships are awarded to students upon acceptance into the program. The award provides both a stipend and either full or half tuition remission. Fellowships are occasionally awarded to exceptionally qualified, eligible students.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1, 2025

**\*\* APPLICATIONS will next be accepted for FALL 2025 ADMISSION \*\***

The MFA Directing program recruits applicants through the National Unified Auditions and Interviews (NUAIs) conducted by University/Resident Theatre Association (URTA) in New York and Chicago. We currently recruit a minimum of two candidates every three years. The next class will be admitted for Fall 2025. Those interested in our program are strongly encouraged to apply at <https://urta.com/> when appropriate. Applications are thoroughly screened, and top candidates are invited to interview at one of the URTA audition sites or at Temple University. After all candidates have been interviewed, those accepted are notified by letter by April 15. Candidates unable to interview as part of the NUAIs should adhere to the criteria listed below.

All candidates must also complete the formal Temple University Graduate School application. *APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university professors and professionals in the field who are familiar with the applicant's work.

**Coursework Required for Admission Consideration:** Coursework in Theater, typically completed as part of an undergraduate major in Theater, is required.

**Bachelor's Degree in Discipline/Related Discipline:** The BA in Theater or BFA degree in Acting, Design or Directing is preferred.

**Statement of Goals:** Introduce yourself in approximately 500 words by relaying your relevant experience, values and areas of interest. Proper essay form should be used, but it may be in a personal style.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

**Resume:** Current resume required.

**Interview:** The applicant meets with appropriate faculty, either through URTA at audition sites in New York and Chicago or on Temple University's Main Campus.

**Other:** In addition to a baccalaureate degree, applicants must have a body of professional or semi-professional experience in Directing.

Film Course <sup>1</sup>		4

General Electives <sup>2</sup>	12
<b>Total Credit Hours</b>	<b>60</b>

1

Consult with the program director to ensure selection of an appropriate film course.

2

Consult with the program director to ensure selection of appropriate electives.

**Additional Requirements:**

*First Year:*

Students direct scenes plus a one-act play in the studio theater and serve as assistant to the director of a main stage show.

*Second Year:*

Scene work continues. Students also direct two unsupported projects in the studio theater.

*Third Year:*

Students direct a thesis production. This is a fully supported production that is part of the main stage season. During the alternate term, an opportunity may exist for an internship to assist or direct in one of the professional theaters in the Philadelphia area. This choice requires faculty approval. An additional option is an unsupported project to allow the student to explore personal interest or career objectives in theater.

*Practical Application (in addition to coursework):*

First Year/Fall Term: Practical focus is on the short scene (5-10 minutes). Three scenes are presented to the department with a focus primarily on contemporary realism.

First Year/Spring Term: Continued practical focus is on directing scenes from acknowledged 20th-century classics.

Second Year/Fall Term: Practical focus is on Shakespeare, culminating in the presentation of a Shakespeare scene project.

Second Year/Spring Term: Practical focus is on scene work from a variety of non-realistic genres and styles, including the study of comedy.

Second Year: Potential opportunity exists to direct a minimally supported full-length production during one of the terms.

Third Year/Fall Term: Practical focus is on new work, including self-created ensemble-based work.

Third Year/Spring Term: Practical focus is on the serial television project as well as musical theater.

**Culminating Event:**

*Thesis:*

One fully supported thesis project is produced in the main season during the third year. This is accompanied by a detailed, comprehensive written thesis, which includes an account of the research and script analysis that preceded the rehearsal process, a director's rehearsal log, and the student's evaluation of the production. The student meets with appropriate faculty after the production has closed for discussion and evaluation of both the process and the production. Faculty members look systematically at all aspects of the theater production and evaluate the student in terms of what was attempted and what was achieved. Theatrical concept, unity of design and stylistic approach, the visual and

aural components of storytelling, and ensemble work of the actors are evaluated from the point of view of directing, acting and design.

## Theater/Playwriting MFA

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS

Learn more about the Master of Fine Arts in Theater/Playwriting.

### About the Program

The Theater/Playwriting MFA program is dedicated to developing each writer's unique voice and equipping the writer with skills necessary to sustain life as an artist. Core coursework provides rigorous training with attention to craft in a range of forms. Additional courses emphasize the collaborative nature of theater-making and provide an environment for creating a network of fellow artists from across disciplines. The curriculum is designed to allow writers to explore areas of interest both within the School of Theater, Film and Media Arts, and outside of it, including research in areas such as African American Studies, Anthropology, Art History, Music or Women's Studies in augmentation of a particular project or idea. Class sizes are small, with individualized instruction as a priority.

Our interest is in training playwrights for artistic success in both current and potential future landscapes. We seek students who are motivated by a desire for passionate self-expression and a sense of social purpose. The program sits within the context of our highly regarded acting, design and directing programs and the vibrant, diverse theater community of Philadelphia.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main, Center City

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered at convenient times of the day and evening.

**Interdisciplinary Study:** Research areas are encouraged. Previous areas of interest have included African American studies, anthropology, film, mass media, new media and women's studies. Permission to enroll in particular courses is determined by the department involved.

**Affiliation(s):** Contacts are maintained with professional theaters with new play programs.

**Study Abroad:** No formal relationships exist, but study abroad programs in the Low Klein College of Media and Communication are available. London and Dublin programs include theater visits and can include courses or internships.

**Accreditation:** The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

**Areas of Specialization:** Areas of specialization can be developed through graduate study in any of the research areas. Particularly relevant are courses in film or television writing.

**Job Prospects:** The program is primarily focused on training our students for careers in the theater industry.

**Non-Matriculated Student Policy:** Along with all university approvals, non-matriculated students are required to obtain written approval from the instructor for each class they want to take.

**Financing Opportunities:** Assistantships, including tuition remission and a stipend, may be available for exceptional candidates.

## Admission Requirements and Deadlines

## Theater Instruction MA

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS

Learn more about the Master of Arts in Theater Instruction.

**About the Program**

The Master of Arts in Theater Instruction provides opportunities for students to explore ideas and concepts using drama strategies and theater forms in the classroom and, most importantly, how to translate the student's learning back into their own classroom. Students learn how to demonstrate understanding of all areas of theater performance — acting, design/tech, directing, history, musical theater, production and management, and more — and how to best present this information to their own Kindergarten to grade 12 classrooms.

The MA in Theater Instruction is designed for existing teachers with certification in any subject who want to add the Theatre Endorsement from the Pennsylvania Department of Education while earning a master's degree in Education that will further their effectiveness in the classroom. It is also designed for current endorsement holders or those who have been teaching drama in schools but need new or remedial training in all areas of live theater production.

The program consists of a mix of subjects to provide the student with a well-rounded theater degree. This allows existing teachers to return to the classroom with a wealth of knowledge for their own students. All classes are taught from the perspective of teaching theater teachers how best to teach theater. Coursework integrates theory and reflective practice, offering the student the opportunity to develop skills and expand knowledge in the art of theater, the principles of teaching and learning in the arts, and the practices of applied drama and theater.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The MA program features online, hybrid, on-campus and practical fieldwork. The program is offered in a hybrid format with some in-person instruction/meetings and some online learning/instruction. Fall and Spring terms are mostly hybrid or online, while two Summer II sessions are intensives on campus. By the nature of the schedule, this program is tailored for working teachers or those interested in teaching in the performing arts.

**Interdisciplinary Study:** By its very nature, the program is interdisciplinary. The curriculum interweaves all elements of theater study.

**Accreditation:** The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

**Job Prospects:** The degree serves to elevate the stature of current teachers in their schools as they bring deeper knowledge of teaching theater and its various elements to the K-12 classroom. It increases the marketability of those with certification in another subject area.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits within the department at the discretion of individual instructors.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* March 1  
*Spring:* November 1  
*Summer II:* June 1

Applications are evaluated as they are received. Late applications may be considered for admission.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators, such as a school principal, department chair or college/university faculty, who can provide insight into the applicant's aptitude for graduate study.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a baccalaureate degree, but it need not be in a theater-related field.

**Statement of Goals:** In approximately 500 words, explain your personal interests, educational aims and professional goals, along with relevant biographical information.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Resume:** Current resume required.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Year 1		
Summer II		Credit Hours
THTR 8101	Stagecraft for Teachers	3
THTR 8102	Acting 1 for Teachers	3
THTR 8103	Introduction to the Director's Art for Teachers	3
<b>Credit Hours</b>		<b>9</b>
Fall		
THTR 8104	Methods of Teaching Theater for Teachers	3
THTR 8105	Stage Management for Teachers	3
<b>Credit Hours</b>		<b>6</b>
Spring		
THTR 8106	World of the Play for Teachers	3
THTR 9382	Projects in Directing I	3
<b>Credit Hours</b>		<b>6</b>
Year 2		
Summer II		Credit Hours
THTR 8107	Acting II for Teachers	3
THTR 8108	Directing for the Musical Stage for Teachers	3
THTR 8109	Introduction to Design for Teachers	3
<b>Credit Hours</b>		<b>9</b>
<b>Total Credit Hours</b>		<b>30</b>

**Culminating Event:** Successful completion of coursework is required to earn the MA in Theater Instruction.

## Graduate Certificate: Documentary Arts and Ethnographic Research

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER,  
FILM AND MEDIA ARTS

Learn more about the graduate certificate in Documentary Arts and Ethnographic Research.

## About the Certificate

The graduate certificate in Documentary Arts and Ethnographic Research is a 12-credit interdisciplinary program that involves faculty and courses in the Center for the Performing and Cinematic Arts, the College of Liberal Arts, and the Lew Klein College of Media and Communication. The certificate builds on Temple's strong international reputation in documentary film and visual anthropology. It is ideally suited for students who plan to incorporate visual studies, ethnographic methods and documentary practices into their artistic and scholarly projects. The certificate program offers students the opportunity to develop marketable applied expertise in practices that bridge the arts, humanities and social sciences.

The philosophy behind the certificate program is to promote a broad and critical use of diverse media tools in the study and representation of culture(s). Program topics include the theories, methods, aesthetics and ethics of documentary research and visual representation; the relationships between artistic, humanistic and scientific visual research methods; the collaborative use of visual media in indigenous, diaspora and non-Western communities; the critical understanding of the use of

new media in documentary contexts, such as mobile media; and the political economy that shapes how images are made, distributed and used worldwide. Students in the program develop skills to:

- create cultural, cross-cultural and interdisciplinary documentary projects through film, digital technologies and representational media;
- integrate visual and cross-cultural materials through innovative uses of technologies;
- incorporate cultural aesthetics, research ethics, cross-cultural research and the use of documentary arts and media tools in their teaching careers; and
- work on collaborative projects involving multiple countries and contexts that can include scholarly research, international government and nongovernmental research, participation in cross-disciplinary projects on contemporary issues, and media activism.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the certificate program director for more information.

**Non-Matriculated Student Policy:** The certificate program is open only to students enrolled in MFA and PhD programs at Temple University.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 21  
*Spring:* October 21

Access the certificate application here.

### Letters of Reference:

*Number Required:* 1

*From Whom:* A letter of support must be written by the applicant student's advisor.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a baccalaureate degree — and must be currently enrolled in an MFA or PhD program at Temple University.

**Statement of Goals:** Describe your reasons for pursuing the certificate in Documentary Arts and Ethnographic Research in 250 words.

**Interview:** Qualifying applicant students are invited for an interview with a member of the Certificate Steering Committee.

**Other Requirement:** Applicant students must provide certification that they are currently enrolled in good standing, maintaining a minimum GPA of 3.5 in their MFA or PhD program at Temple University.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
Select at least one ANTH course and one FMA course to complete a minimum of two of the following:		6
ANTH 5389	Fieldwork in Ethnography	
ANTH 5438	Anthropology of Mass Media	
ANTH 5444	Anthropological Problems in Visual Production	
ANTH 8408	Approaches in the Anthropology of Visual Communication I	
FMA 5676	Anthropological Film/Media	
FMA 8462	Documentary Arts and Visual Research	
<b>Electives</b>		
Select at least two from the following: <sup>1</sup>		6
ANTH 5428	Theory and Methods in Culture and Communication	
ANTH 5439	Anthropology and Photography	
ANTH 5458	Anthropology of Public Culture	
ANTH 8012	Ethical Considerations in Anthropology Research	
ANTH 8344	Seminar in Expressive Culture	
ANTH 8409	Approaches in the Anthropology of Visual Communication II	
ANTH 8429	Problems in the Anthropology of Visual Communication	
ANTH 8435	Seminar in Visual Anthropology and the Arts	
ARTH 5405	History of Photography	
FMA 5241	Cinematography Workshop <sup>2</sup>	
FMA 5242	Videography <sup>2</sup>	
FMA 5672	History of Documentary Film	
FMA 5673	Time-Image Arts/Cinema Praxis	
FMA 5674	Media Arts Thry-Practice	
FMA 8244	Experimental Methods	
FMA 8245	Documentary Workshop	
FMA 8246	Advanced Documentary/Fiction Workshop	
FMA 8340	Topics in Production	
FMA 8450	Topics in Media	
FMA 8551	Digital Post-Production	
FMA 8670	Topics in Media Studies	
FMA 8680	Advanced Topics in Media Arts Studies	
MMC 9209	Media Ethnography	
PHOT 8283	Graduate Projects in Photography I	
PHOT 8284	Graduate Projects in Photography II	
SOC 8371	Sociology of Culture	
<b>Total Credit Hours</b>		<b>12</b>

1

Alternately, students may choose to take one or two additional courses from the list of core courses above to fulfill the electives requirement.

2

Only non-FMA students make apply this course toward the certificate.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Theater Instruction

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS

Learn more about the graduate certificate in Theater Instruction.

### About the Certificate

The graduate certificate in Theater Instruction is designed for teachers who have a desire to teach drama or lead after-school drama programs in a K-12 setting or who currently teach drama and want to refine their skills. The certificate program also allows teachers of other disciplines to pursue their interest in Theater Instruction. In either case, teachers take a sequence of courses that enhances their marketability. In accordance with the guidelines of the Pennsylvania Department of Education, the coursework may be taken for Act 48 Continuing Education credit and re-certification and gains the teacher an extra skill set that can be utilized in the classroom, during after-school activities, and to enhance the teacher's classroom presence. Skills acquired through the certificate program in Theater Instruction include confidence in public speaking and presentation, creativity, collaboration, technical theater and management, professionalism and empathy.

The certificate consists of a five-course, 15-credit sequence that satisfies the PA Department of Education's Theatre Endorsement. Further, since the five required courses constitute one-half of the courses needed to

complete the MA in Theater Instruction, students may choose to continue their studies beyond the certificate.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main, with a combination of hybrid, online and intensive course formats accommodating students' teaching schedules

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the recruitment coordinator for the School of Theater, Film and Media Arts for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits within the department at the discretion of individual instructors.

## Admission Requirements and Deadlines

*Fall, Spring and Summer II* admissions are on a rolling basis.

For information on how to apply, contact Matthew Miller, the Head of Theater Education, at [mbmiller@temple.edu](mailto:mbmiller@temple.edu).

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a baccalaureate degree, but it need not be in a theater-related field.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 15<sup>1</sup>

*Required Courses:*

Code	Title	Credit Hours
THTR 8102	Acting 1 for Teachers	3
THTR 8104	Methods of Teaching Theater for Teachers	3
THTR 8105	Stage Management for Teachers	3
THTR 8106	World of the Play for Teachers	3
THTR 8111	Welcome Backstage for Teachers	3
<b>Total Credit Hours</b>		<b>15</b>

1

Completion of the 15 credits of coursework satisfies the Theatre Endorsement from the Pennsylvania Department of Education.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## School of Pharmacy

Located on Temple University's bustling Health Sciences Center campus, the School of Pharmacy strives to bridge the gaps between drug discovery, preclinical basic research and translation medicine.

We are positioned to continue to provide leadership in our educational mission, while also pursuing innovative research. In conjunction with both of these efforts, we train future researchers in pharmaceutical sciences, drug discovery and development, and basic preclinical and translational research.

In recent years, the School of Pharmacy has enjoyed tremendous growth in our research enterprise. We have established several centers of excellence for scientific study across a wide range of disciplines. The Temple University Drug Discovery Initiative, launched in 2010, has resulted in a substantial expansion of our research facilities and an increase in the number of talented and accomplished researchers joining our faculty and staff.

Efforts by the faculty and research staff of the School of Pharmacy are focused on multidisciplinary approaches to complex scientific problems associated with a number of important disease states. Funding for our research has been generously provided by several foundations, federal and state-funded grants, contract research programs and Temple University research awards. Members of our faculty have been recognized by outside scientific organizations with numerous honors, awards and invited lectureships.

The School of Pharmacy offers students the ideal combination of a high-quality education, dedicated faculty, active research programs, and a supportive atmosphere enlivened by diversity and community service.

- Post-Master's Certificate: Advanced Regulatory Affairs and Quality Assurance (p. 769)
- Post-Master's Certificate: Biologics and Biosimilars Manufacturing (p. 771)
- Post-Master's Certificate: Biologics and Biosimilars: Regulatory Aspects (p. 772)
- Post-Master's Certificate: Biopharmaceutical Manufacturing and Regulatory Affairs (p. 773)
- Post-Master's Certificate: Clinical Trial Management (p. 774)
- Post-Master's Certificate: Food Regulatory Affairs and Quality Assurance (p. 775)
- Post-Master's Certificate: Generic Drugs (p. 776)
- Post-Master's Certificate: Global Pharmacovigilance/Benefit-Risk Management (p. 777)
- Post-Master's Certificate: Medical Device (p. 778)
- Post-Master's Certificate: Pharmaceutical Labeling, Advertising and Promotions (p. 779)
- Post-Master's Certificate: Pharmaceutical Manufacturing: Process Development and Analysis (p. 780)
- Post-Master's Certificate: Sterile Process Manufacturing (p. 781)
- Post-Master's Certificate: Validation Sciences (p. 782)

### Graduate Faculty

*Magid Abou-Gharbia*, Laura H. Carnell Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Pennsylvania.

*Carlos Barrero*, Assistant Professor, Department of Pharmaceutical Sciences, School of Pharmacy; MD, Universidad de Caldas.

*Benjamin E. Blass*, Assistant Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Rochester.

*Michael R. Borenstein*, Associate Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, Temple University.

*Daniel J. Canney*, Associate Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, Temple University.

*Wayne E. Childers*, Associate Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Georgia.

*A. Reza Fassihi*, Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, Brighton University.

*Patrick M. Glassman*, Assistant Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University at Buffalo.

*Marc A. Ilies*, Professor of Instruction, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Bucharest.

*Kenneth R. Korzekwa*, Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Washington.

*David B. Lebo*, Professor of Instruction, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, Philadelphia College of Pharmacy.

*Salim Merali*, Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, City University of New York.

*Swati V. Nagar*, Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Minnesota.

*Jayanth Panyam*, Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Nebraska Medical Center.

*Oscar Perez-Leal*, Assistant Professor, Department of Pharmaceutical Sciences, School of Pharmacy; MD, Universidad del Norte.

*Tina Tran*, Assistant Professor, Department of Pharmacy Practice, School of Pharmacy; PharmD, University of California San Francisco.

*Ellen A. Walker*, Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Michigan.

*Ho-Lun Wong*, Professor, Department of Pharmaceutical Sciences, School of Pharmacy; PhD, University of Toronto.

## Advanced Biotherapeutics: Manufacturing and Regulatory Affairs MS

### SCHOOL OF PHARMACY

Learn more about the Master of Science in Advanced Biotherapeutics: Manufacturing and Regulatory Affairs.

### About the Program

The MS in Advanced Biotherapeutics: Manufacturing and Regulatory Affairs (ABMRA) is a program arising from a partnership between Temple University's School of Pharmacy and the Kanbar College of Design, Engineering & Commerce at Thomas Jefferson University. The program combines courses from Temple's Regulatory Affairs and Quality Assurance (RAQA) graduate program with courses from the Jefferson Institute for Bioprocessing (JIB). Students may earn the ABMRA degree from either Temple University or Thomas Jefferson University, depending on their area of interest: biopharmaceutical manufacturing (JIB) or regulatory affairs and quality assurance (Temple).

The ABMRA degree addresses the career needs of individuals involved in the discovery and manufacture of large-molecule therapeutic agents, including cell and gene therapies (GCT), vaccines and personalized medicines. The demand and discovery of these therapeutic agents rooted in monoclonal antibody-based therapies and messenger-RA technology continue to burgeon, creating a national shortage of skilled and knowledgeable professionals familiar with the manufacturing processes and regulatory/quality requirements of these agents.

Temple's ABMRA degree highlights the regulatory science practices and strategies as well as quality expectations involved in the development and manufacture of biopharmaceutical products. Jefferson's ABMRA degree focuses more on the development, manufacturing and analytical processes associated with the production of biopharmaceutical therapeutic agents on state-of-the-art equipment located at the JIB facility in Spring House, PA. Students have the ability to earn certificates from either school while also earning a degree from either Temple or Jefferson, depending on their preferred area of focus.

Graduates of the ABMRA degree from either university have a broad foundation in:

- U.S. and global regulatory landscapes for biologics and biosimilars;
- regulatory strategies for non-clinical and clinical studies for biologics and biosimilar products;
- Chemistry, Manufacturing and Control (CMC) strategies for biologics and biosimilars;
- phase-appropriate regulatory compliance elements applicable to biologics and biosimilars;
- fundamentals of Quality by Design (QbD) and Statistical Process Control (SPC) principles as relevant to biologics and biosimilars manufacturing;
- mastery of core engineering, scientific, regulatory and quality principles utilized in the development and manufacturing of biopharmaceuticals, biologics and advanced therapies;
- biopharmaceutical manufacturing operations, including bioreactor, chromatography, formulation and product concentration operations; and
- process development concepts, from early to late phase development and launch.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Online, in a hybrid format with some in-person instruction but largely learning online, or:

- at Fort Washington evenings and weekends for Temple courses
- at Spring House, PA for JIB courses

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program fosters interdisciplinary study between biopharmaceutical sciences and technology as well as mandated regulatory and quality requirements.

**Job Prospects:** The program prepares graduates for positions in the global marketplace related to biosimilars and biologics.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Master's students are generally not considered for financial support.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* March 1; December 15 international

*Spring:* November 1; September 1 international

Summer I: March 1; January 15 international

Applications are processed throughout the year. Late applications may be considered for admission. However, the entire application packet must be received by the Regulatory Affairs and Quality Assurance Office before it is reviewed by the Admissions Committee. Applicants are responsible for making sure that all materials have been received.

APPLY to this graduate program, submitting the application to QARA2@temple.edu.

Students who wish to apply to Jefferson's ABMRA MS should visit <https://www.jefferson.edu/admissions/graduate/apply.html>.

#### Letters of Reference:

Number Required: 2

*From Whom:* One letter of recommendation should be obtained from a college/university faculty member familiar with academic competence and one from a work supervisor.

**Coursework Required for Admission Consideration:** It is expected that applicants have a strong science or engineering background.

**Bachelor's Degree in Discipline/Related Discipline:** A BS in Bioengineering or Chemical Engineering, Biochemistry, Biology, Chemistry, Physics or a related discipline is required.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider, either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** Describe your experience in the pharmaceutical, biopharmaceutical or related industries, indicating how the ABMRA MS program will help you achieve your career objectives.

#### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV, signed by the applicant, required.

**Transfer Credit:** Transfer credits are not accepted. Any student who has completed a similar RAQA course through an accredited graduate program may request to replace a required course with a listed elective course. Such requests are considered on a case-by-case basis.

## Program Requirements

#### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 36, of which 21 are completed at Temple University's School of Pharmacy and 15 at Thomas Jefferson University's Jefferson Institute for Bioprocessing (JIB)

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5459	Drug Development	3
QARA 5515	Biologics/Biosimilars: A Regulatory Overview	3
QARA 5572	Vaccines: Regulatory Affairs and Quality Assurance Issues	3
QARA 5577	Global CMC Regulatory Compliance for Biopharmaceuticals and Other Biologics	3
<b>Electives</b>		
Select three from the following:		9
PS 5501	Development of Sterile Products	
PS 8005	Pharmaceutical Biotechnology	
QARA 5451	Statistical Quality Control	
QARA 5468	Validation of Facilities, Utilities and Equipment (FUE)	
QARA 5471	Biotechnology: Bioprocess Basics	
QARA 5474	Process Validation	
QARA 5479	Advanced Good Manufacturing Practices - Defining "c"	
QARA 5492	Production of Sterile Parenterals	
QARA 5493	Sterilization Processes	
QARA 5512	Microbiological Concepts in Pharmaceutical Manufacturing	
QARA 5514	Regulatory eSubmissions	
QARA 5516	Cleaning Validation	
QARA 5538	Clinical Drug Safety and Pharmacovigilance <sup>1</sup>	
QARA 5544	Regulatory Intelligence	
QARA 5571	Post-Marketing Safety Surveillance <sup>1</sup>	
QARA 5574	Pharmaceutical Quality Management Systems	
QARA 5575	Regulatory Sciences: Managing the Guidelines to Quality	
QARA 5625	Process Analytical Technology (PAT)	
QARA 5627	Statistical Design of Experiments (DOE)	
QARA 5629	Process Monitoring	
<b>JIB Required Courses</b> <sup>2</sup>		<b>12</b>
<b>JIB Elective(s)</b> <sup>3</sup>		<b>3</b>
<b>Total Credit Hours</b>		<b>36</b>

1

Students may take QARA 5538 or QARA 5571, but not both.

2

Four 3-credit courses required by JIB include ENGR 604 Biopharm Process Operations, ENGR 609 Bioprocess Engineering for Scientists, ENGR 611 Principles of Biopharmaceutical Process Engineering, and ENGR 621 Introduction to Biopharmaceutical and Biologics Production. Coursework is subject to change to reflect the most current trends and techniques in the production of biopharmaceutical therapeutic agents.

3

Electives approved by JIB include four 3-credit courses: ENGR 601 Intro Upstream Unit Operations, ENGR 602 Intro Downstream Unit Operations, ENGR 613 Vector and Cell Line Design, and ENGR 622 Biotherapeutic Formulation. Three 1.5-credit courses are also approved: ENGR 612 Emerging Therapeutics; ENGR 614 Vaccine Formulation; and ENGR 618 Technical and Regulatory Aspects of Analytical Method Validation. Coursework is subject to change to reflect the most current trends and techniques in the production of biopharmaceutical therapeutic agents.

**Culminating Event:** Successful completion of coursework is required to earn Temple's ABMRA MS.

# Global Clinical and Pharmacovigilance Regulations MS

SCHOOL OF PHARMACY

Learn more about the Master of Science in Global Clinical and Pharmacovigilance Regulations.

## About the Program

The MS in Global Clinical and Pharmacovigilance Regulations addresses the career needs of individuals involved in domestic and global clinical trials and pharmacovigilance activities within the pharmaceutical industry, including managing and assisting in clinical trials, supervising record keeping of clinical trials, reviewing safety data of clinical trials or post-marketing reports of healthcare products, and other related activities. In recent years, pharmacovigilance activities have been conducted alongside clinical trials to determine the benefits and risk factors of products both under development and on the market.

Pharmacovigilance, or drug safety, relates to the myriad of activities the pharmaceutical and related industries use in monitoring, assessing and compiling the benefits and risks involved with their products. Whereas pharmacovigilance studies used to be undertaken once products were already on the market, the latest trend is to conduct these studies with "first in human" studies, which are generally done on healthy volunteer subjects to ascertain how a new product affects an individual without the known disease state. Clinical trials are highly regulated research studies of pharmaceutical and related products, treatment options, or medical devices in human beings. Their goal is to find new or better ways to prevent, detect, diagnose, or treat disease or disease states. In order to accomplish this, clinical trials must rigorously follow certain protocols, study designs, and data collection and monitoring methods defined by regulatory authorities.

The MS in Global Clinical and Pharmacovigilance Regulations degree program is primarily designed for PharmD students who already possess extensive experience in clinical settings, but would benefit from specific knowledge of domestic and global regulations to be more marketable for careers in the pharmaceutical industry. This MS degree combining clinical practices with global pharmacovigilance empowers PharmD graduates with knowledge of:

- the need for pharmacovigilance and clinical regulations;
- the evolution of global pharmacovigilance and clinical regulations;
- domestic and international pharmacovigilance and clinical requirements and regulations for healthcare products;
- differences in regulations between product types and regions;
- current utilization of pharmacovigilance data throughout the lifespan of all products;
- the ability to contextualize and interpret safety data; and
- the paramount importance of data collection, statistics and data mining in the industry.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Online or at Fort Washington on evenings and weekends

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program fosters interdisciplinary study between the pharmaceutical sciences and technology.

**Job Prospects:** The program prepares graduates for positions in the global marketplace related to drug safety and human clinical trials.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Master's students are generally not considered for financial support.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1; December 15 international

*Spring:* November 1; September 1 international

*Summer I:* March 1; January 15 international

Applications are processed throughout the year. Late applications may be considered for admission. However, the entire application packet must be received by the Regulatory Affairs and Quality Assurance Office before it is reviewed by the Admissions Committee. Applicants are responsible for making sure that all materials have been received.

APPLY to this graduate program, submitting the application to QARA2@temple.edu.

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with academic competence.

**Coursework Required for Admission Consideration:** It is expected that applicants are PharmD students or graduates.

**Bachelor's Degree in Discipline/Related Discipline:** A BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline is required.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider, either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** Describe your experience in the pharmaceutical or related industries, indicating how the Global Clinical and Pharmacovigilance Regulations MS program will help you achieve your career objectives.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV required.

**Transfer Credit:** Temple University PharmD students may apply a maximum of 15 credits toward this MS degree. The following courses are applicable:

Code	Title	Credit Hours
	Ethics course	2
PP P254	Bio Stat/Med Lit Eval	2
PP P312	ADRS Organ Systems Appr	2
PP P313	Clin Pharmacokinetics	3
QARA 5459	Drug Development	3
QARA 5536	Good Clinical Practices	3
QARA 5537	Clinical Trial Management	3

Students in and graduates of PharmD programs at other accredited schools of pharmacy may apply for transfer credits. Such requests are decided on a case-by-case basis. A maximum of 6 transfer credits are permitted for this group of prospective students.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

### Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5459	Drug Development	3
QARA 5508	Good Pharmacovigilance Operations	3
QARA 5536	Good Clinical Practices	3
QARA 5537	Clinical Trial Management	3
QARA 5538	Clinical Drug Safety and Pharmacovigilance	3
	or QARA 5571 Post-Marketing Safety Surveillance	
QARA 5573	Pharmacoepidemiology	3
QARA 5578	Benefit Risk Management and Safety Signaling of Healthcare Products	3
QARA 5579	Regulatory and Legal Basis of Pharmacovigilance	3
<b>Electives</b>		
Select from the following approved courses:		6
PP P312	ADRS Organ Systems Appr	
PP P313	Clin Pharmacokinetics	
QARA 5497	Statistics for Clinical Trials <sup>1</sup>	
QARA 5539	Global Clinical Drug Development	
QARA 5547	Project Management for Clinical Trials	
QARA 5612	Bioethics for Pharmaceutical Professionals	
QARA 5618	Clinical Data Management (CDM)	
<b>Total Credit Hours</b>		<b>30</b>

1

Alternately, students may take PP P254 Bio Stat/Med Lit Eval.

**Culminating Event:** Successful completion of coursework is required to earn the MS in Global Clinical and Pharmacovigilance Regulations.

# Pharmaceutical Regulatory Sciences MS

SCHOOL OF PHARMACY

Learn more about the Master of Science in Pharmaceutical Regulatory Sciences.

## About the Program

The MS in Pharmaceutical Regulatory Sciences (MSPRS) blends two disciplines, pharmaceutical and regulatory sciences, providing a unique and critical academic path for professionals in the pharmaceutical, medical device and biologics industries:

- Pharmaceutical science courses focus on the core science principles involved in the development and manufacturing of therapeutic products.
- RAQA courses provide a strong framework of regulations and quality practices, addressing scientific methods needed to ensure safety, efficacy, quality and consistent performance.

The MSPRS program is designed to prepare a cadre within the pharmaceutical industry of senior regulatory professionals who are familiar with both the pharmaceutical sciences and worldwide regulatory practices as they interact with the U.S. Food and Drug Administration (FDA) and other global regulators in bringing new chemical entities and biologics to market.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Online, in a hybrid format with some in-person instruction but the majority of learning online

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program fosters interdisciplinary study with the pharmaceutical sciences and technology.

**Job Prospects:** The program prepares graduates for positions in the global marketplace related to the pharmaceutical and regulatory sciences.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Master's students are generally not considered for financial support.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1; December 15 international  
*Spring:* November 1; September 1 international  
*Summer I:* March 1; January 15 international

Applications are processed throughout the year. Late applications may be considered for admission. However, the entire application packet must be received by the Graduate Studies Office before it is reviewed by the Admissions Committee. Applicants are responsible for making sure that all materials have been received.

*APPLY to this graduate program, submitting the application to QARA2@temple.edu.*

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from supervisors or college/university instructors familiar with the student's academic competence.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Pharmacy, Biochemistry, Biology, Chemistry, Chemical Engineering or Mechanical Engineering is required.

Applicants who did not achieve a 3.0 undergraduate GPA in a science discipline may be admitted after taking three of the four courses listed below and earning an overall 3.33 (B+) GPA in the coursework:

Code	Title	Credit Hours
PS 8002	Pharmaceutical Analysis	3
PS 8005	Pharmaceutical Biotechnology	3
PS 8006	Physical Pharmacy I	3
QARA 5575	Regulatory Sciences: Managing the Guidelines to Quality	3

**Statement of Goals:** Describe your career goals and objectives in 500 to 1,500 words.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 7.0
- PTE Academic: 58

**Resume:** Current resume or CV required.

**Transfer Credit:** Students may transfer a maximum of 6 credits into the MS program. These credits must be similar or identical to courses offered by the Temple University School of Pharmacy and applicable to the MS in Pharmaceutical Regulatory Sciences. In addition, the student must request the transfer credits at the time of application to the MS program, providing copies of course syllabi. The maximum number of credits a student may transfer is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 30

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
PS 8003	Pharmaceutical Manufacturing I: Preformulation/ Formulation	3
PS 8004	Solid Dosage Forms - Small Molecules	3
PS 8005	Pharmaceutical Biotechnology	3
QARA 5468	Validation of Facilities, Utilities and Equipment (FUE)	3
QARA 5495	Investigational New Drug/New Drug Application Submissions	3
QARA 5575	Regulatory Sciences: Managing the Guidelines to Quality	3
QARA 5576	Global CMC Issues and Regulatory Dossier (Or QARA 5577 )	3
QARA 8006	Physical Pharmacy I	3
<b>Pharmaceutical Sciences Elective</b>		
Select one from the following:		3
PS 8002	Pharmaceutical Analysis	
PS 8007	Applied Biopharmaceutics	
<b>Regulatory Affairs and Quality Assurance Elective</b>		
Select one from the following:		3
QARA 5474	Process Validation	
QARA 5478	High Purity Water Systems	
QARA 5498	Computerized System Validation	
QARA 5515	Biologics/Biosimilars: A Regulatory Overview	
QARA 5572	Vaccines: Regulatory Affairs and Quality Assurance Issues	
QARA 5577	Global CMC Regulatory Compliance for Biopharmaceuticals and Other Biologics	

QARA 5606 Regulatory Strategy: Discovery to Approval

**Total Credit Hours** 30

**Culminating Event:** Successful completion of coursework is required to earn the MS in Pharmaceutical Regulatory Sciences.

## Pharmaceutical Sciences/ Medicinal Chemistry MS

SCHOOL OF PHARMACY

Learn more about the Master of Science in Pharmaceutical Sciences.

### About the Program

The School of Pharmacy offers a graduate program leading to the MS, with a choice of Thesis or Non-Thesis Option, and the PhD in Pharmaceutical Sciences with a concentration in Medicinal Chemistry. The program is designed to prepare students for positions in the pharmaceutical industry, government agencies, and as faculty in schools of pharmacy.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Health Sciences Center, Main

Some courses may be offered at the Fort Washington campus. Research must be carried out at the Health Sciences Center campus under the supervision of an advisor who is a member of the Graduate Faculty.

**Full-Time/Part-Time Status:** Full-time status is recommended due to the nature of ongoing research.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and collaborations among faculty and students with interests in biochemistry, molecular modeling, organic chemistry and pharmacology.

**Areas of Specialization:** The focus is Medicinal and Pharmaceutical Chemistry, including design and synthesis of ligands for nicotinic receptors and ligands for retinoic acid receptors, novel anticonvulsants, and the development of analytical methodologies.

**Job Prospects:** The program primarily concentrates on providing research scientists for the pharmaceutical industry and government agencies, as well as faculty for schools of pharmacy.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Master's students are generally not considered for financial support. Financial support in the form of University fellowships, teaching assistantships and research assistantships is generally available to PhD candidates only. Only under rare circumstances are MS students considered for support.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* December 15

All applications are evaluated together after the deadline.

APPLY ONLINE to this graduate program.

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence and professionals in a supervisory position.

**Coursework Required for Admission Consideration:** It is recommended that applicants complete the courses (or their equivalent, as determined by the School of Pharmacy) to obtain a BS in Chemistry, preferably Organic Chemistry, before entering the program.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Biochemistry, Chemistry (preferably Organic Chemistry), or Pharmacy is required.

Transcripts from all post-secondary institutions attended may be sent electronically to [tusgrad@temple.edu](mailto:tusgrad@temple.edu). Alternately, unopened official transcripts bearing the school's seal must be sent directly from the Registrar at each institution to the School of Pharmacy's Office of Graduate Studies.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider, either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** In approximately 500 to 1,000 words, state your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV required.

**Transfer Credit:** With approval, courses specific to Medicinal Chemistry or Organic Chemistry may be transferred into the program. Applicants must present supporting documentation (syllabus, course description, and/or transcript) for transfer consideration at the time of application. The maximum number of credits a student may transfer into the MS program is 6.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 36

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
PS 8002	Pharmaceutical Analysis	3
PS 8051	Seminar in Pharm Science	1
PS 8121	Department of Pharmaceutical Sciences Seminar Series	1
PS 8127	Pharmacokinetics	3
PS 8128	Principles in Drug Discovery	3
PS 8129	Bioethics in Research	2
PS 8131	Principles of Biochemistry	4
PS 8403	Advanced Pharmacogenomics	2
STAT 5002	Introduction to Biostatistics	3
<b>Concentration-Specific Electives</b> <sup>1,2</sup>		<b>14-8</b>
<b>Research Course</b> <sup>3</sup>		
PS 9996	Master's Research	0-6
<b>Total Credit Hours</b>		<b>36</b>

<sup>1</sup>

Suggested electives include CHEM 4201 Organic Structure and Mechanisms, CHEM 5202 Organic Reaction Mechanisms, PS 8009 Advanced Medicinal Chemistry I, and PS 8011 Advanced Medicinal Chemistry II. Electives should be taken primarily in Chemistry. Coursework in Biomedical Sciences, Computer and Information Science, and other disciplines is also permissible with guidance from the advisor.

2

Students in the Thesis Option take 8 credits of electives, while students in the Non-Thesis Option complete 14 elective credits.

3

Students in the Thesis Option take 6 credits of PS 9996. In lieu of this research course, students in the Non-Thesis Option complete their electives.

### Culminating Events:

#### *Thesis Option:*

A thesis is required when choosing the Thesis Option. The MS thesis is an original, theoretical and/or empirical study that contributes to the field of Medicinal/Pharmaceutical Chemistry. It should expand existing knowledge and demonstrate the student's knowledge of research methods and a mastery of their primary area of interest. The thesis should be rigorously investigated; uphold the ethics and standards of the pharmaceutical sciences; demonstrate an understanding of the relationship between the primary area of interest and the broader field of medicinal chemistry; and be prepared for publication in a professional journal.

Students who are preparing to defend their thesis should confirm a time and date with their advisor and register with the Administrative Assistant at least 15 days before the defense is to be scheduled. The Administrative Assistant arranges the time, date and room within two working days and forwards to the student the appropriate forms. Once approved, the public announcement of the defense is posted.

The Thesis Examining Committee evaluates the student's ability to express verbally their research question, methodological approach, primary findings and implications. This committee is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be members of the Graduate Faculty of the School of Pharmacy. The Thesis Examining Committee votes to pass or fail the thesis and the defense at the conclusion of the public presentation.

#### *Non-Thesis Option:*

Successful completion of coursework constitutes the culminating event for this option.

## Pharmaceutical Sciences/ Pharmaceutics MS

SCHOOL OF PHARMACY

Learn more about the Master of Science in Pharmaceutical Sciences.

### About the Program

The School of Pharmacy offers a graduate program leading to the MS, with a choice of Thesis or Non-Thesis Option, and the PhD in Pharmaceutical Sciences with a concentration in Pharmaceutics. The program is designed to prepare students for positions in the pharmaceutical industry, government agencies, and as faculty in schools of pharmacy.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Health Sciences Center, Fort Washington

Students in the [Thesis Option](#) take a majority of required and elective courses at the Health Sciences Center and Fort Washington campuses. Some courses may be offered at Main campus. Research must be carried out at the Health Sciences Center campus under the supervision of an advisor who is a member of the Graduate Faculty.

Students in the [Non-Thesis Option](#) take a majority of required and elective courses at Fort Washington. Some courses may be offered at the Health Sciences Center campus.

**Full-Time/Part-Time Status:** The program is considered full-time for those in the [Thesis Option](#) and part-time for those in the [Non-Thesis Option](#). Part-time students can complete the program through classes offered during evenings and weekends primarily at the Fort Washington campus.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and collaborations among faculty and students with interests in biochemistry, molecular modeling, organic chemistry and pharmacology.

**Areas of Specialization:** Faculty members specialize and offer graduate coursework in controlled release dosage forms, drug metabolism, encapsulation, mechanisms of drug action, pharmaceutical analysis, pharmacokinetics and solid dosage forms.

**Job Prospects:** Graduates generally find employment in the pharmaceutical industry, government agencies or academia.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Master's students are generally not considered for financial support. Financial support in the form of University fellowships, teaching assistantships and research assistantships is generally available to PhD candidates only. Only under rare circumstances are MS students in the [Thesis Option](#) considered for support. Students enrolled in the [Non-Thesis Option](#) are ineligible for financial support because their program is part-time.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* December 15

All applications are evaluated together after the deadline.

For the [Thesis Option](#), APPLY ONLINE.

For the [Non-Thesis Option](#), contact Sophon Din, Administrative Assistant, at [tuspgrad@temple.edu](mailto:tuspgrad@temple.edu) or 215-707-4972. Application materials are to be mailed to:

Temple University School of Pharmacy  
Dept. of Pharmaceutical Sciences  
Office of Graduate Studies  
3307 N. Broad Street, Suite 528  
Philadelphia, PA 19140

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence and professionals in a supervisory position.

**Coursework Required for Admission Consideration:** It is recommended that applicants should have completed a minimum of two years of General Chemistry, including Organic Chemistry; one Analytical Chemistry course; and Mathematics, including at least Introductory Calculus. A course in Physical Chemistry is also advisable.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Pharmacy, Biology, Biochemistry, Chemistry, Engineering or a related discipline is required.

Transcripts from all post-secondary institutions attended may be sent electronically to [tuspgrad@temple.edu](mailto:tuspgrad@temple.edu). Alternately, unopened official transcripts bearing the school's seal must be sent directly from the Registrar at each institution to the School of Pharmacy's Office of Graduate Studies.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider, either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** In approximately 500 to 1,000 words, state your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV is required whether applying for the [Thesis Option](#) or the [Non-Thesis Option](#).

**Transfer Credit:** With approval, courses specific to the field of Pharmaceutics may be transferred into the program. Applicants must present supporting documentation (syllabus, course description and/or transcript) for transfer consideration at the time of application. The maximum number of credits a student may transfer into the MS program is 6.

**Pharmaceutical Sciences/  
Pharmacodynamics MS**

SCHOOL OF PHARMACY

Learn more about the Master of Science in Pharmaceutical Sciences.

**About the Program**

The School of Pharmacy offers a graduate program leading to the MS, with a choice of Thesis or Non-Thesis Option, and the PhD in Pharmaceutical Sciences with a concentration in Pharmacodynamics. The program is designed to prepare students for positions in the pharmaceutical industry, government agencies, and as faculty in departments engaged in biomedical research.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Health Sciences Center, Main

Some courses may be offered at the Fort Washington campus. Research must be carried out at the Health Sciences Center campus under the supervision of an advisor who is a member of the Graduate Faculty.

**Full-Time/Part-Time Status:** Full-time status is recommended due to the nature of ongoing research.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and collaborations among faculty and students with interests in biochemistry, molecular modeling, organic chemistry and pharmacology.

**Areas of Specialization:** The Pharmacodynamics concentration involves the study of integrated drug transport and mechanism of drug action research.

**Job Prospects:** Graduates generally accept employment offers shortly before or after defending their thesis. Job opportunities for graduates include positions as postdoctoral researchers, scientists in the pharmaceutical industry, and faculty members in a variety of departments involved in biomedical research.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Master's students are generally not considered for financial support. Financial support in the form of University fellowships, teaching assistantships and research assistantships is generally available to PhD candidates only. Only under rare circumstances are MS students considered for support.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Biochemistry, Biology, Molecular Biology, Pharmacology, Pharmacy or Psychology is required.

Transcripts from all post-secondary institutions attended may be sent electronically to [tuspsgrad@temple.edu](mailto:tuspsgrad@temple.edu). Alternately, unopened official transcripts bearing the school's seal must be sent directly from the Registrar at each institution to the School of Pharmacy's Office of Graduate Studies.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider,

either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** In approximately 500 to 1,000 words, state your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV required.

**Transfer Credit:** With approval, courses specific to the field of Pharmacodynamics may be transferred into the program. Applicants must present supporting documentation (syllabus, course description, and/or transcript) for transfer consideration at the time of application. The maximum number of credits a student may transfer into the MS program is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 36

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
PS 8002	Pharmaceutical Analysis	3
PS 8051	Seminar in Pharm Science	1
PS 8121	Department of Pharmaceutical Sciences Seminar Series	1
PS 8127	Pharmacokinetics	3
PS 8128	Principles in Drug Discovery	3
PS 8129	Bioethics in Research	2
PS 8131	Principles of Biochemistry	4
PS 8402	Pharmacodynamics	3
PS 8403	Advanced Pharmacogenomics	2
STAT 5002	Introduction to Biostatistics	3
<b>Concentration-Specific Electives</b> <sup>1,2</sup>		<b>11-5</b>
<b>Research Course</b> <sup>3</sup>		
PS 9996	Master's Research	0-6
<b>Total Credit Hours</b>		<b>36</b>

1

Electives can be taken in Pharmaceutical Sciences, Biomedical Sciences, Biology, and other disciplines with guidance from the advisor.

2

Students in the Thesis Option take 5 credits of electives, while students in the Non-Thesis Option complete 11 elective credits.

3

Students in the Thesis Option take 6 credits of PS 9996. In lieu of this research course, students in the Non-Thesis Option complete their electives.

**Culminating Events:***Thesis Option:*

A thesis is required when choosing the Thesis Option. The MS thesis is an original, theoretical and/or empirical study that contributes to the field of Pharmacodynamics. It should expand existing knowledge and demonstrate the student's knowledge of research methods and a mastery of their primary area of interest. The thesis should be rigorously investigated; uphold the ethics and standards of the pharmaceutical sciences; demonstrate an understanding of the relationship between the primary area of interest and the broader field of pharmacodynamics; and be prepared for publication in a professional journal.

Students who are preparing to defend their thesis should confirm a time and date with their advisor and register with the Administrative Assistant at least 15 days before the defense is to be scheduled. The Administrative Assistant arranges the time, date and room within two working days and forwards to the student the appropriate forms. Once approved, the public announcement of the defense is posted.

The Thesis Examining Committee evaluates the student's ability to express verbally their research question, methodological approach, primary findings and implications. This committee is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be members of the Graduate Faculty of the School of Pharmacy. The Thesis Examining Committee votes to pass or fail the thesis and the defense at the conclusion of the public presentation.

*Non-Thesis Option:*

Successful completion of coursework constitutes the culminating event for this option.

## Pharmaceutical Sciences/ Medicinal Chemistry PhD

SCHOOL OF PHARMACY

Learn more about the Doctor of Philosophy in Pharmaceutical Sciences.

### About the Program

The School of Pharmacy offers a graduate program leading to the MS and to the PhD in Pharmaceutical Sciences with a concentration in Medicinal Chemistry. The program is designed to prepare students for positions in the pharmaceutical industry, government agencies, and as faculty in schools of pharmacy.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Health Sciences Center, Main

Some courses may be offered at the Fort Washington campus. Research must be carried out at the Health Sciences Center campus under the supervision of an advisor who is a member of the Graduate Faculty.

**Full-Time/Part-Time Status:** Full-time status is recommended due to the nature of ongoing research.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and collaborations among faculty and students with interests in biochemistry, molecular modeling, organic chemistry and pharmacology.

**Areas of Specialization:** The focus is Medicinal and Pharmaceutical Chemistry, including design and synthesis of ligands for cholinergic receptors and ligands for retinoic acid receptors, novel anticonvulsants, and the development of analytical methodologies.

**Job Prospects:** The program primarily concentrates on providing research scientists for the pharmaceutical industry and government agencies, as well as faculty for schools of pharmacy.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Support options include University fellowships, teaching assistantships and research assistantships. Recipients are determined on a competitive basis during the admission process and receive a stipend and full tuition remission (up to 9 credits per term).

The principal duties of a Teaching Assistant (TA) include assisting faculty members in laboratory instruction, preparing apparatus or materials for PharmD students, conducting recitations, grading quizzes and reports, and proctoring exams. TAs are expected to work 20 hours per week.

A Research Assistant (RA) is expected to spend 20 hours per week engaged in research and is assigned to a specific faculty member. The research subjects are determined by consultation between the student and their research advisor.

Applications should include a statement of previous teaching and/or research experience, areas of interest, and future goals; official transcripts; and a curriculum vitae. The department attempts to make offers of assistantships on or before May 1. June 1 is the final date for acceptance or declination of department offers. Applications should be directed to:

Temple University School of Pharmacy  
3307 North Broad Street, Suite 528  
Philadelphia, PA 19140

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* December 15

All applications are evaluated together after the deadline.

*APPLY ONLINE to this graduate program.*

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence and professionals in a supervisory position.

**Coursework Required for Admission Consideration:** It is recommended that applicants complete the courses (or their equivalent, as determined by the School of Pharmacy) to obtain a BS in Biochemistry, Chemistry (preferably Organic Chemistry), or Pharmacy before entering the program.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Biochemistry, Chemistry (preferably Organic Chemistry), or Pharmacy is required.

Transcripts from all post-secondary institutions attended may be sent electronically to [tuspgrad@temple.edu](mailto:tuspgrad@temple.edu). Alternately, unopened official transcripts bearing the school's seal must be sent directly from the Registrar at each institution to the School of Pharmacy's Office of Graduate Studies.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider, either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** In approximately 500 to 1,000 words, state your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

### Standardized Test Scores:

GRE: Scores are expected to be in the 65th percentile or above.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the

exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV required.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 46

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
PS 8002	Pharmaceutical Analysis	3
PS 8051	Seminar in Pharm Science	1
PS 8121	Department of Pharmaceutical Sciences Seminar Series	1
PS 8127	Pharmacokinetics	3
PS 8128	Principles in Drug Discovery	3
PS 8129	Bioethics in Research	2
PS 8131	Principles of Biochemistry	4
PS 8403	Advanced Pharmacogenomics	2
STAT 5002	Introduction to Biostatistics	3
<b>Electives</b> <sup>1</sup>		<b>18</b>
<b>Research Courses</b> <sup>2</sup>		<b>6</b>
PS 9994	Preliminary Examination Preparation	
PS 9998	Pre-Dissertation Research	
PS 9999	Dissertation Research	
<b>Total Credit Hours</b>		<b>46</b>

<sup>1</sup>

Suggested electives include CHEM 4201 Organic Structure and Mechanisms, CHEM 5201 Physical Methods in Organic Chemistry, CHEM 5205 Organic Syntheses, and PS 8009 Advanced Medicinal Chemistry I. Electives should be taken primarily in Chemistry. Coursework in Biomedical Sciences, Computer and Information Science, and other disciplines is also permissible with guidance from the advisor.

<sup>2</sup>

Of the 6 required research credits, a minimum of 2 credits of PS 9999 must be taken. The other 4 credits may be taken in any combination of PS 9994, PS 9998, and PS 9999.

### Culminating Events:

*Preliminary Examination:*

The purpose of the preliminary examination is to demonstrate critical and interpretive knowledge in specialized areas of the discipline. The examination evaluates the student's ability to apply specific research foci to anticipated practical problems in the field. Students who accumulate 40 didactic credits are eligible to take the exam.

The preliminary exam consists of two sections. The first is a written section consisting of questions from the student's Doctoral Advisory Committee (DAC). Each member of the DAC submits a question and

then judges the quality of the student's answer based on criteria such as accuracy, thoroughness and originality. They then share that score and their rationale for it with the other members of the DAC. The evaluators look for a breadth and depth of understanding of concepts in the areas being tested, application of that knowledge, and the ability to write technical prose in a manner consistent with scientists in the field. The second section of the preliminary exam includes the preparation of a research proposal approved by the DAC and a 30-minute oral summary of the proposal followed by an oral defense of the proposal.

Students who are preparing to take their preliminary examination should confirm a time and date with the Director of Graduate Studies and register with the Administrative Assistant in the Office of Graduate Studies. The student and Director receive confirmation of the time, date, room and proctor for the examination.

#### *Dissertation Proposal:*

The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of:

- the context and background surrounding a particular research problem;
- an exhaustive survey and review of literature related to the problem; and
- a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing the preliminary exam. Upon approval, a doctoral student is promoted to PhD candidacy, and a timeline for completing the investigation and writing process are established.

#### *Dissertation:*

The doctoral dissertation is an original, theoretical and/or empirical study that makes a significant contribution to the field. It should expand existing knowledge and demonstrate the student's knowledge of research methods and a mastery of their primary area of interest. The dissertation should be rigorously investigated; uphold the ethics and standards of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field; and be prepared for publication in a professional journal.

The Dissertation Examining Committee (DEC) is formed to oversee the student's doctoral research. It is charged with evaluating the student's dissertation and oral defense, including the student's ability to express verbally their research question, methodological approach, primary findings and implications. The DEC, which includes the members of the DAC, is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the School of Pharmacy. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the Committee members, and informing the student of their academic progress. At least one additional Graduate Faculty member from outside the School of Pharmacy must be included on the DEC. This outside examiner should be identified no later than the beginning of the academic term in which the student will defend the dissertation. The DEC members vote to pass or fail the dissertation and the defense at the conclusion of the public presentation.

Committee compositions must be approved by the departmental graduate committee. If a student needs to change a member of a committee, the new member must be approved by the departmental graduate committee and by the Graduate School. The changes must be documented with the Administrative Assistant and the Graduate School using the "Request

for Change in Dissertation Committee" form, found in TUportal under the Tools tab within "University Forms."

Students who are preparing to defend their dissertation should confirm a time and date with their DEC and register with the Office of Graduate Studies at least 15 days before the defense is to be scheduled. The Office of Graduate Studies arranges the time, date and room and forwards to the student the appropriate forms. After the Administrative Assistant has made the arrangements, the student must send the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 days before the defense date. The department posts announcements for the defense.

## Pharmaceutical Sciences/ Pharmaceutics PhD

SCHOOL OF PHARMACY

Learn more about the Doctor of Philosophy in Pharmaceutical Sciences.

### About the Program

The School of Pharmacy offers graduate program leading the MS and to the PhD in Pharmaceutical Sciences with a concentration in Pharmaceutics. The program is designed to prepare students for

positions in the pharmaceutical industry, government agencies, and as faculty in schools of pharmacy.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Health Sciences Center, Fort Washington

Some courses may be offered at Main campus. Research must be carried out at the Health Sciences Center campus under the supervision of an advisor who is a member of the Graduate Faculty.

**Full-Time/Part-Time Status:** The PhD program is considered full-time. A minimum residency of one year is required during which the student must work full time in a laboratory at the School of Pharmacy under the direction of a faculty member in the department.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and collaborations among faculty and students with interests in biochemistry, molecular modeling, organic chemistry and pharmacology.

**Areas of Specialization:** Faculty members specialize and offer graduate coursework in controlled release dosage forms, drug metabolism, encapsulation, mechanisms of drug action, pharmaceutical analysis, pharmacokinetics and solid dosage forms.

**Job Prospects:** The program primarily concentrates on providing research scientists for the pharmaceutical industry and government agencies, as well as faculty for schools of pharmacy.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Support options include University fellowships, teaching assistantships and research assistantships. Recipients are determined on a competitive basis during the admission process and receive a stipend and full tuition remission (up to 9 credits per term).

The principal duties of a Teaching Assistant (TA) include assisting faculty members in laboratory instruction, preparing apparatus or materials for PharmD students, conducting recitations, grading quizzes and reports, and proctoring exams. TAs are expected to work 20 hours per week.

A Research Assistant (RA) is expected to spend 20 hours per week engaged in research and is assigned to a specific faculty member. The research subjects are determined by consultation between the student and their research advisor.

## Pharmaceutical Sciences/ Pharmacodynamics PhD

SCHOOL OF PHARMACY

Learn more about the Doctor of Philosophy in Pharmaceutical Sciences.

### About the Program

The School of Pharmacy offers a graduate program leading to the MS and to the PhD in Pharmaceutical Sciences with a concentration in Pharmacodynamics. The program is designed to prepare students for positions in the pharmaceutical industry, government agencies, and as faculty in various departments performing biomedical research.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Health Sciences Center, Main

Some courses may be offered at the Fort Washington campus. Research must be carried out at the Health Sciences Center campus under the supervision of an advisor who is a member of the Graduate Faculty.

**Full-Time/Part-Time Status:** Full-time status is recommended due to the nature of ongoing research.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research and collaborations among faculty and students

with interests in biochemistry, molecular modeling, organic chemistry and pharmacology.

**Areas of Specialization:** The Pharmacodynamics concentration involves the study of integrated drug transport and mechanism of drug action research.

**Job Prospects:** Graduates generally accept employment offers shortly before or after defending their dissertation. Job opportunities for graduates include positions as postdoctoral researchers, scientists in the pharmaceutical industry, and faculty members in a variety of departments involved in biomedical research.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take up to 9 credits before formal application must be made to the program.

**Financing Opportunities:** Support options include University fellowships, teaching assistantships and research assistantships. Recipients are determined on a competitive basis during the admission process and receive a stipend and full tuition remission (up to 9 credits per term).

The principal duties of a Teaching Assistant (TA) include assisting faculty members in laboratory instruction, preparing apparatus or materials for PharmD students, conducting recitations, grading quizzes and reports, and proctoring exams. TAs are expected to work 20 hours per week.

A Research Assistant (RA) is expected to spend 20 hours per week engaged in research and is assigned to a specific faculty member. The research subjects are determined by consultation between the student and their research advisor.

Applications should include a statement of previous teaching and/or research experience, areas of interest, and future goals; official transcripts; and a curriculum vitae. The department attempts to make offers of assistantships on or before May 1. June 1 is the final date for acceptance or declination of department offers. Applications should be directed to:

### Culminating Events:

#### *Preliminary Examination:*

The purpose of the preliminary examination is to demonstrate critical and interpretive knowledge in specialized areas of the discipline. The examination evaluates the student's ability to apply specific research foci to anticipated practical problems in the field. Students who accumulate 40 didactic credits are eligible to take the exam.

The preliminary exam consists of two sections. The first is a written section consisting of questions from the student's Doctoral Advisory Committee (DAC). Each member of the DAC submits a question and then judges the quality of the student's answer based on criteria such as accuracy, thoroughness and originality. They then share that score and their rationale for it with the other members of the DAC. The evaluators look for a breadth and depth of understanding of concepts in the areas being tested, application of that knowledge, and the ability to write technical prose in a manner consistent with scientists in the field. The second section of the preliminary exam includes the preparation of a research proposal approved by the DAC and a 30-minute oral summary of the proposal followed by an oral defense of the proposal.

Students who are preparing to take their preliminary examination should confirm a time and date with the Director of Graduate Studies and register with the Administrative Assistant in the Office of Graduate Studies. The student and Director receive confirmation of the time, date, room and proctor for the examination.

#### *Dissertation Proposal:*

The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of:

- the context and background surrounding a particular research problem;
- an exhaustive survey and review of literature related to the problem; and
- a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing the preliminary exam. Upon approval, a doctoral student is promoted to PhD candidacy, and a timeline for completing the investigation and writing process are established.

#### *Dissertation:*

The doctoral dissertation is an original, theoretical and/or empirical study that makes a significant contribution to the field. It should expand existing knowledge and demonstrate the student's knowledge of research methods and a mastery of their primary area of interest. The dissertation should be rigorously investigated; uphold the ethics and standards of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field; and be prepared for publication in a professional journal.

The Dissertation Examining Committee (DEC) is formed to oversee the student's doctoral research. It is charged with evaluating the student's dissertation and oral defense, including the student's ability to express verbally their research question, methodological approach, primary findings and implications. The DEC, which includes the members of the DAC, is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the School of Pharmacy. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the Committee members, and informing the student of their academic progress. At least one additional Graduate Faculty member from outside the School of Pharmacy must be included on the DEC. This outside examiner should be identified no later than the beginning of the academic term in which the student will defend the dissertation. The DEC members vote to pass or fail the dissertation and the defense at the conclusion of the public presentation.

Committee compositions must be approved by the departmental graduate committee. If a student needs to change a member of a committee, the new member must be approved by the departmental graduate committee and by the Graduate School. The changes must be documented with the Administrative Assistant and the Graduate School using the "Request for Change in Dissertation Committee" form, found in TUportal under the Tools tab within "University Forms."

Students who are preparing to defend their dissertation should confirm a time and date with their DEC and register with the Office of Graduate Studies at least 15 days before the defense is to be scheduled. The Office of Graduate Studies arranges the time, date and room and forwards to the student the appropriate forms. After the Administrative Assistant has made the arrangements, the student must send the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 days before the defense date. The department posts announcements for the defense.

## Pharmaceutical Sciences/ Regulatory Affairs and Quality Assurance PhD

SCHOOL OF PHARMACY

Learn more about the Doctor of Philosophy in Pharmaceutical Sciences.

### About the Program

The School of Pharmacy offers a graduate program leading to the PhD in Pharmaceutical Sciences with a concentration in Regulatory Affairs and Quality Assurance (RAQA). Emphasis is placed on combining scientific principles and methodology with regulatory and quality practices to streamline the discovery, manufacturing, safety profiling and post-approval processes. The program applies academic research methods to current industry regulatory issues, enabling candidates to pursue a dissertation that helps to define and resolve regulatory or quality problems with data research and scientific methodology. The goal of each dissertation is to present new and thoughtful answers to industry questions and problems that result in cost savings, safer and/or more effective products, better safety profiles, and other benefits for patients and manufacturers.

The RAQA concentration is designed for professionals who have a minimum of 15 years of relevant work experience, including supervisory responsibilities, in pharmaceutical and related sciences and/or regulation in such areas as analytical methods, clinical and pharmacovigilance supervision, corporate drug development or manufacturing science, quality practices, validation implementation, and other pertinent industry practices that draw heavily on regulatory policy and quality assurance. Work experience must be applicable to the topic candidates plan to investigate for their dissertation.

Selection is highly competitive as a very limited number of candidates is accepted each year. Successful candidates are expected to have:

- a master's degree or the equivalent in a pharmaceutical, science, medical, engineering or related field;
- a minimum of 15 years of work experience in the field related to their PhD dissertation;
- current work experience that can be applied to the regulatory/quality topic to be investigated for their PhD dissertation;
- the ability to work both independently and as part of a team, displaying recognizable initiative;
- a willingness to pursue original, independent research, utilizing a multidisciplinary approach to problem solving;
- strong communication skills, both verbal and written, including the ability to write academic research papers containing original thought and cogent arguments;
- basic knowledge of data analysis, having completed at least one course in statistical methods; and

- the ability to accept constructive criticism and welcome feedback provided by the Dissertation Advisor and Dissertation Advisory Committee.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Health Sciences Center, Fort Washington

Courses may also be offered at Main campus. Research must be carried out, however, at the Health Sciences Center campus under the supervision of an advisor who is a member of the Graduate Faculty.

**Full-Time/Part-Time Status:** The degree is completed on a part-time basis in 2 to 5 years. Successful candidates are expected to pursue the PhD program at least two terms every academic year (Fall, Spring or Summer) until the dissertation is completed. Typically, students pursue the PhD every Fall and Spring term, but a Summer term may be substituted. Note that a minimum of one credit each Fall and Spring term is required to maintain the candidate's active student status.

**Job Prospects:** Job opportunities include positions as postdoctoral researchers, scientists in the pharmaceutical industry, and faculty members.

**Non-Matriculated Student Policy:** Non-matriculated students are ineligible for participation in the program.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* March 1

All applications are evaluated together after the deadline. Selection is highly competitive. A very limited number of candidates is accepted each year.

*APPLY to this graduate program,* submitting the application to RAQAPHD@temple.edu.

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence and/or professionals in a supervisory position.

**Master's Degree in Discipline/Related Discipline:** A master's degree or equivalent is required in a pharmaceutical, science, medical, engineering or related field. Course credits achieved in the master's degree may be applied toward the PhD program's credit requirements.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required.

Transcripts from all post-secondary institutions attended may be sent electronically to RAQAPHD@temple.edu. Alternately, unopened official transcripts bearing the school's seal must be sent directly from the Registrar at each institution to the Regulatory Affairs and Quality Assurance Graduate Program.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider, either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** In approximately 500 to 1,000 words, state your specific interest in Temple's program, research goals, future career goals, and academic and research achievements.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV required.

**Other Requirement:** It is recommended that applicants provide a commitment statement from their employer indicating that the employer supports the individual's involvement in the RAQA PhD program.

## Program Requirements

**General Program Requirements:**

*Number of Credits Required Beyond the Baccalaureate:* 40

*Required Courses:*

Code	Title	Credit Hours
<b>Graduate-level coursework completed while earning a pharmaceutical, science, medical, engineering or related degree</b> <sup>1</sup>		<b>30</b>
<b>Coursework beyond the MS degree</b>		
PS 8051	Seminar in Pharm Science	1
Graduate-level course in Data Science, Data Analytics, or Healthcare Analytics <sup>2</sup>		3
Additional coursework as required by the Dissertation Advisor and School of Pharmacy Graduate Committee <sup>3</sup>		
<b>Research Courses</b>		
PS 9998	Pre-Dissertation Research (2 terms)	4
PS 9999	Dissertation Research (2 terms)	2
<b>Total Credit Hours</b>		<b>40</b>

1

The School of Pharmacy accepts up to 30 credits. The decision of the School on the number of credits accepted is final.

2

A minimum of one 3-credit graduate-level course is to be completed. This coursework is related to decision analysis, quantitative methods, research design, scientific decision-making, statistics and probability for data analysis, and the like.

3

The number of credits accepted toward the PhD and the number required for completion of the PhD are determined by the Dissertation Advisor and the Graduate Committee of the School of Pharmacy. It may be determined that additional coursework is required to prepare the student to write the dissertation. The course grid below lists approved course options.

## Additional Approved Coursework Options <sup>1</sup>

Code	Title	Credit Hours
PS 5451	Statistical Quality Control	3
	or QARA 5627 Statistical Design of Experiments (DOE)	
PS 8005	Pharmaceutical Biotechnology	3
QARA 5473	Generic Drug Regulation (ANDAs)	3
QARA 5474	Process Validation <sup>2</sup>	3
	or QARA 5498 Computerized System Validation	
QARA 5492	Production of Sterile Parenterals <sup>3</sup>	3
	or QARA 5493 Sterilization Processes	
QARA 5496	Regulation of Medical Devices: Compliance <sup>4</sup>	3
	or QARA 5502 Regulation of Medical Devices: Submissions	
QARA 5503	Design Controls for Medical Devices and Combination Products	3
	or QARA 5548 Risk Management of Pharmaceutical and Medical Devices	
QARA 5508	Good Pharmacovigilance Operations	3
	or QARA 5538 Clinical Drug Safety and Pharmacovigilance	
QARA 5512	Microbiological Concepts in Pharmaceutical Manufacturing	3
QARA 5513	Active Pharmaceutical Ingredients (APIs)	3
	or QARA 5546 Global Pharmaceutical Excipient Regulation	
QARA 5515	Biologics/Biosimilars: A Regulatory Overview	3
QARA 5532	Global Labeling Regulation: Principles and Practices	3
QARA 5544	Regulatory Intelligence	3
QARA 5572	Vaccines: Regulatory Affairs and Quality Assurance Issues	3
QARA 5574	Pharmaceutical Quality Management Systems	3
	or QARA 5575 Regulatory Sciences: Managing the Guidelines to Quality	
QARA 5576	Global CMC Issues and Regulatory Dossier	3
	or QARA 5577 Global CMC Regulatory Compliance for Biopharmaceuticals and Other Biologics	
QARA 5578	Benefit Risk Management and Safety Signaling of Healthcare Products <sup>5</sup>	3
	or QARA 5579 Regulatory and Legal Basis of Pharmacovigilance	
QARA 5618	Clinical Data Management (CDM)	3
QARA 5650	Special Topics in Regulatory Affairs and Quality Assurance <sup>6</sup>	3
QARA 5655	Analytical Chemistry in Pharmaceutical Laboratories	3
	or QARA 8002 Pharmaceutical Analysis	
QARA 8003	Preformulation - Small Molecules	3
	or QARA 8004 Pharmaceutical Manufacturing II: Solid Dosage Forms	

1

Other coursework in Regulatory Affairs and Quality Assurance may also be assigned by the Dissertation Advisor.

2

QARA 5478 High Purity Water Systems is a third choice.

3

PS 5501 Development of Sterile Products is another option.

4

QARA 5505 Global Regulation of Medical Devices is also approved.

5

QARA 5591 Global Regulatory Affairs can also be selected.

6

QARA 5650 may only be taken with departmental approval.

**Other Requirement:** Formal evaluation of each PhD student's progress occurs at the end of the first year and each year thereafter to ensure that the quality of work will result in a fully approved dissertation project. Failure to conduct a reasonable amount of research or writing could result in suspension or dismissal from the program. The following is a typical dissertation schedule:

*Year 1:*

- Assess dissertation proposal topic, including candidate's knowledge span to determine strengths and deficiencies.
- Determine additional coursework required, if any.
- Review candidate's past work and publications as they pertain to the PhD dissertation.
- Select final dissertation topic and possible research protocol.
- Outline dissertation proposal, research protocol and introductory chapter by Year 1's end.
- Meet with research advisor as required and recommended.

*Years 2-4:*

- Pursue research activities to depict quantitative, qualitative and policy analysis methods, including literature review and annotated bibliography.
- Prepare dissertation introduction, discussion and conclusion.

*Final Year:*

- Prepare dissertation material for one or more publications.
- Defend dissertation as required by the School of Pharmacy.

### **Culminating Events:**

#### *Dissertation Proposal:*

The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of:

- the context and background surrounding a particular research problem;
- an exhaustive survey and review of literature related to the problem; and
- a detailed methodological plan for investigating the problem.

Upon approval of the dissertation proposal, the doctoral student is promoted to PhD candidacy, and a timeline for completing the investigation and writing process is established.

#### *Dissertation:*

The doctoral dissertation is an original, theoretical and/or empirical study that makes a significant contribution to the field. It should expand existing knowledge and demonstrate the student's knowledge of research methods and a mastery of their primary area of interest. The dissertation should be rigorously investigated; uphold the ethics and standards of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field; and be prepared for

publication in a professional journal. It is expected that the dissertation will consist of an appropriate mix of quantitative and qualitative research methodology and be suitable for publication.

The Dissertation Examining Committee (DEC) is formed to oversee the student's doctoral research. It is charged with evaluating the student's dissertation and oral defense, including the student's ability to express verbally their research question, methodological approach, primary findings and implications. The DEC, which includes the members of the DAC, is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the School of Pharmacy. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the Committee members, and informing the student of their academic progress. At least one additional Graduate Faculty member from outside the School of Pharmacy must be included on the DEC. This outside examiner should be identified no later than the beginning of the academic term in which the student will defend the dissertation. The DEC members vote to pass or fail the dissertation and the defense at the conclusion of the public presentation.

Committee compositions must be approved by the departmental graduate committee. If a student needs to change a member of a committee, the new member must be approved by the departmental graduate committee and by the Graduate School. The changes must be documented with the Administrative Assistant and the Graduate School using the "Request for Change in Dissertation Committee" form, found in TUportal under the Tools tab within "University Forms."

Students who are preparing to defend their dissertation should confirm a time and date with their DEC and register with the Office of Graduate Studies at least 15 days before the defense is to be scheduled. The Office of Graduate Studies arranges the time, date and room and forwards to the student the appropriate forms. After the Administrative Assistant has made the arrangements, the student must send the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 days before the defense date. The department posts announcements for the defense.

## Pharmacy PharmD

### SCHOOL OF PHARMACY

Learn more about the Doctor of Pharmacy.

## About the Program

Temple University School of Pharmacy, established in 1901, carries far more than a century's worth of history and reliability in pharmacy education. The Doctor of Pharmacy (PharmD) degree program trains pharmacists who pursue career paths in community pharmacy, hospital pharmacy, long-term care, managed care, the pharmaceutical industry, government and more.

The PharmD curriculum prepares one to capably and confidently deliver pharmacy care in all practice settings. Students engage with faculty in large and small classes, labs and guided simulations. Introductory Pharmacy Practice Experiences (IPPE), scheduled during the first three years of the program, and Advanced Pharmacy Practice Experiences (APPE) in the fourth year allow students to gain real-world supervised experience as members of the healthcare team. Students are introduced to a variety of environments to help them decide on their first step in their pharmacy career.

Specialization can mean differentiation in the job market. Elective tracks in Clinical Trials, Drug Safety, and Advanced Clinical Practice allow students to customize their degree based on their interests. Earn credits toward a Master of Science degree in Global Clinical and Pharmacovigilance Regulations or a Master of Business Administration degree from the Fox School of Business and Management while completing the PharmD program.

An abundance of extracurricular activities complement academics. The School of Pharmacy hosts and supports student chapters of all major pharmacy associations, recurring professional and social events, clinical mission trips and other opportunities toward becoming a well-rounded professional. The School of Pharmacy Alumni Association is a built-in network committed to helping graduates assimilate in the professional world.

The School of Pharmacy is located on the Temple University Health Sciences Center campus in Philadelphia, along with Temple University Hospital, Lewis Katz School of Medicine, Maurice H. Kornberg School of Dentistry, and the College of Public Health. Favorite facilities on campus include the Student Faculty Center with recreation and study areas, the

Temple University Hospital Cafeteria, and the Research Library at the Lewis Katz School of Medicine.

The Temple University School of Pharmacy's PharmD program offers the chance to pursue excellence and opportunity in education, scholarship, research and practice.

**Time Limit for Program Completion:** 4 years

**Campus Location:** Health Sciences Center

**Full-Time/Part-Time Status:** The program may be completed on a full-time basis.

## Admission Requirements and Deadline

**Application Deadline:** March 1

APPLY ONLINE to this program via PharmCAS.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A bachelor's degree is not required, but applicants must complete the prerequisites for the PharmD program. Visit <https://pharmacy.temple.edu/admissions/apply/pharmd> for specific information regarding the application process.

**Prerequisites for the PharmD Program:** All applicants are required to complete and pass the coursework identified below at either Temple University or another fully accredited institution of higher learning regardless of how many years of pre-pharmacy coursework was taken before starting the professional PharmD degree program.

All prerequisites must be completed before beginning the PharmD program, but application can be made while still taking prerequisites. It is important to appropriately list coursework that is still in progress when applying through PharmCAS.

Note that if your institution uses a quarter system instead of a semester system, you can multiply the number of credits you have by 0.66 to translate them into semester hours. Round partial credits of 0.5 and above up to the next semester hour; round credits of 0.4 and below down.

Code	Title	Credit Hours
<b>Math Discipline</b>		
	Calculus I	4

### Economics Discipline

Microeconomics or Macroeconomics	3
----------------------------------	---

### Electives

Complete a minimum of 18 credits in the following disciplines, meeting the stated minimums: <sup>5</sup> 18

### Social Sciences Discipline

Complete a minimum of 6 credits from at least two different departments:

Anthropology
Geography
History
Political Science
Psychology
Religion
Sociology

### Humanities Discipline

Complete a minimum of 6 credits from at least two different departments:

Architecture
Communication/Public Speaking
Fine Arts
Languages
Literature
Literature/Classics
Philosophy

### Mathematics Discipline

Statistics recommended	
<b>Total Credit Hours</b>	<b>62-65</b>

1

An Anatomy/Physiology Lab is not required.

2

Biology I must be equivalent to BIOL 1111 and Biology II must be equivalent to BIOL 2112 at Temple University. For details, refer to the Temple University Course Catalog.

3

A non-calculus-based Physics course is acceptable.

4

Analytical Reading and Writing English Composition may be taken in the Fall or Spring semester. Students taking a course for ESL students are required to take an additional English course, which may be counted as a Humanities Elective.

5

Temple students are advised to select courses within each of the GenEd areas.

Advanced Pharmacy Practice Experience (APPE) <sup>6</sup>		6

**Credit Hours 18**

**Total Credit Hours 140**

1

During the first through third professional years of study, students are required to complete a total of 300 hours of Introductory Pharmacy Practice Experiences (IPPEs). These hours may be scheduled throughout the year.

2

Students are required to complete the Interprofessional Education (IPE) workshops, simulations and community service activities as outlined in the IPPE manual.

3

"CPD" indicates Continuing Personal/Professional Development.

4

The Pathophysiology and Therapeutics (P/T) courses are offered sequentially in each semester.

5

During the third year of professional study at Temple University School of Pharmacy, students may begin to differentiate their degree by choosing electives in one of the following tracks: Advanced Clinical Practice, Clinical Trials, and Drug Safety. Students are required to take a minimum of 8 elective credits but may choose to take up to 12 elective credits.

6

All students are required to complete six 6-week Advanced Pharmacy Practice Experiences (APPEs) and are awarded 6 credits for each experience. These rotations are scheduled throughout the student's fourth professional year (May-May).

#### **Additional Requirements:**

- All PY-3 students are required to take the PCOA Exam scheduled during the Spring semester. Students must pass the Frequently Prescribed Medication Competency Exam in the semester prior to starting the APPE component of the curriculum.
- PY-4 students are required to pass the six Qualifying Exams and to take the online Pre-NAPLEX Practice Test.

# **Regulatory Affairs and Quality Assurance MS**

SCHOOL OF PHARMACY

Learn more about the Master of Science in Regulatory Affairs and Quality Assurance.

## **About the Program**

Since its establishment in 1968, Temple's Regulatory Affairs and Quality Assurance (RAQA) program has played a significant role in training pharmaceutical company personnel in regulations and quality principles and practices. Coursework meets the career requirements of professionals in the pharmaceutical and related industries. The program provides students with a broad knowledge of the industry, fostering their professional development and preparing them for supervisory and managerial positions.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. The MS is offered in its entirety on evenings and weekends at Fort Washington.

**Interdisciplinary Study:** The program fosters interdisciplinary study between the pharmaceutical sciences and technology.

**Affiliation(s):** Each year the program sponsors a major conference with the pharmaceutical industry and the U.S. Food and Drug Administration (FDA), focusing on current regulatory and quality issues.

**Ranking:** Temple's RAQA master's degree is widely recognized as the oldest, most comprehensive, and most respected academic program of its type in the world.

**Areas of Specialization:** This is a non-thesis MS program. Faculty members are specialists in many areas, such as auditing; clinical trial management and operations; global regulation; IND/NDA submissions; manufacturing; pharmaceutical, food and device law; pharmaceutical labeling and advertising; quality assurance; regulatory affairs; and validation.

**Job Prospects:** Students find positions in all areas of the pharmaceutical industry, including big Pharmaceutical Research and Manufacturers of America (PhRMA) and generic companies, biotechnology, clinical research organizations, and medical devices and packaging. Employment is also found with government agencies, including the FDA, and healthcare providers.

**Non-Matriculated Student Policy:** Students may complete a maximum of 9 credits before they must formally apply for admission. Before taking any electives, new students are strongly encouraged to take QARA 5459 Drug Development and QARA 5592 Food and Drug Law.

**Financing Opportunities:** Students in the RAQA MS program are generally working professionals. Therefore, funding for assistantships and academic internships is limited.

## **Admission Requirements and Deadlines**

**Application Deadline:**

*Fall:* March 1; December 15 international  
*Spring:* November 1; September 1 international  
*Summer I:* March 1; January 15 international

Applications are processed throughout the year. Late applications may be considered for admission. However, the entire application packet must be received by the Regulatory Affairs and Quality Assurance Graduate Studies Office before it is reviewed by the Admissions Committee. Applicants are responsible for making sure that all materials have been received.

APPLY to this graduate program, submitting the application to QARA2@temple.edu.

**Letters of Reference:**

Number Required: 2

*From Whom:* One letter should be obtained from the candidate's direct supervisor, indicating that the supervisor is aware of and supports the candidate's involvement in Temple's RAQA graduate program.

**Bachelor's Degree in Discipline/Related Discipline:** A BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline is required.

Applicants who earned a degree at a non-U.S. institution must submit an equivalency evaluation of their transcript(s) through a third-party provider, either World Education Services (WES) or Educational Credential Evaluators (ECE).

**Statement of Goals:** Describe your experience in the pharmaceutical or related industries, indicating how the RAQA MS program will help you achieve your career objectives.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 85
- IELTS Academic: 6.5
- PTE Academic: 58

**Resume:** Current resume or CV required.

**Transfer Credit:** Students may transfer a maximum of 6 credits into the MS program. These credits must be similar or identical to courses offered in Temple's RAQA program. In addition, the student must request the transfer credits at the time of application to the MS program, providing copies of course syllabi. The maximum number of credits a student may transfer is 6.

## Program Requirements

**General Program Requirements:**

Number of Credits Required Beyond the Baccalaureate: 36

Required Courses:

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5459	Drug Development	3

QARA 5494	Quality Audit	3
or QARA 5495	Investigational New Drug/New Drug Application Submissions	
QARA 5592	Food and Drug Law	3
<b>Good Practices Course</b>		
Select one from the following:		3
QARA 5476	Good Laboratory Practices	
QARA 5477	Good Manufacturing Practices	
QARA 5479	Advanced Good Manufacturing Practices - Defining "c"	
QARA 5536	Good Clinical Practices	
<b>Electives <sup>1</sup></b>		<b>24</b>
<b>Total Credit Hours</b>		<b>36</b>

<sup>1</sup>

Upon completion of the four required courses, students may concentrate their electives in either Regulatory Affairs or in Quality Assurance. Alternately, students may select courses from both disciplines to broaden their portfolio.

**Culminating Event:** Successful completion of coursework is required to earn the MS in Regulatory Affairs and Quality Assurance.

## Graduate Certificate: Basic Pharmaceutical Development

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Basic Pharmaceutical Development.

### About the Certificate

Professionals with business or other non-science degrees may want to enter or advance their careers in the pharmaceutical industry but need specialized training in its terminology, concepts and regulatory environment. Whether just entering the workforce or looking for ways to advance in a global corporation, they can benefit from a deeper understanding of how pharmaceutical products are discovered, manufactured and distributed, as well as a greater familiarity with the multitude of federal and international regulations governing every aspect of product quality.

The graduate certificate in Basic Pharmaceutical Development combines a general overview of the drug development process with pharmaceutical industry business practices. This certificate enables students to explore quality assurance and regulatory affairs as a prospective career path without committing to a master's degree. Students are exposed to the specialized language of the industry, the overriding concern for imbuing quality in the industry, and the regulations that directly impact industry business decisions.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

### Admission Requirements and Deadlines

#### Application Deadline:

Fall and Spring admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution of higher learning. A science degree is not mandatory.

### Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5459	Drug Development	3
QARA 5472	Pharmaceutical Marketing	3
<b>Electives</b>		
Select two from the following:		6
QARA 5408	Pharmacoeconomics	
QARA 5495	Investigational New Drug/New Drug Application Submissions	
QARA 5533	Requirements for Product Labeling and Advertising	
QARA 5592	Food and Drug Law	
QARA 5615	Project Management for Pharmaceutical Professionals	
<b>Total Credit Hours</b>		<b>12</b>

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Biologics and Biosimilars Manufacturing

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Biologics and Biosimilars Manufacturing.

### About the Certificate

Given the rapidly expanded development of biopharmaceuticals in the past decade, an immediate need exists for professionals with knowledge of and credentials in key manufacturing quality issues governing biologics

and biosimilar drugs. The graduate certificate in Biologics and Biosimilars Manufacturing requires the completion of coursework focusing on how biologics and biosimilars are manufactured, looking specifically at regulatory compliance elements, fundamentals of Quality by Design (QbD) and Statistical Process Control (SPC). Chemistry, Manufacturing and Controls (CMC) strategies, including materials sourcing and testing requirements, are also studied. Discussions include the technologies used in manufacturing and the unique considerations that arise when dealing with such technologies as cell and gene therapies, therapeutic monoclonal antibodies, vaccines, cytokines, antisense technology, interference RNA and growth factors.

**Time Limit for Certificate Completion:** 4 years, with courses meeting for a minimum of 36 class contact hours over 10 or 12 consecutive weeks

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biology, Chemistry, Engineering, Pharmacy, Physics or related field.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 15

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
PS 8005	Pharmaceutical Biotechnology	3
QARA 5471	Biotechnology: Bioprocess Basics <sup>1</sup>	3
QARA 5515	Biologics/Biosimilars: A Regulatory Overview <sup>1</sup>	3
QARA 5577	Global CMC Regulatory Compliance for Biopharmaceuticals and Other Biologics	3
<b>Elective</b>		
Select one from the following:		3
PS 5501	Development of Sterile Products	
QARA 5000	Special Topics in Regulatory Affairs and Quality Assurance <sup>2</sup>	
QARA 5451	Statistical Quality Control	
QARA 5468	Validation of Facilities, Utilities and Equipment (FUE)	
QARA 5474	Process Validation	

QARA 5479 Advanced Good Manufacturing Practices - Defining "c"

QARA 5492 Production of Sterile Parenterals

QARA 5493 Sterilization Processes

QARA 5512 Microbiological Concepts in Pharmaceutical Manufacturing

QARA 5516 Cleaning Validation

QARA 5572 Vaccines: Regulatory Affairs and Quality Assurance Issues

QARA 5627 Statistical Design of Experiments (DOE)

QARA 5629 Process Monitoring

**Total Credit Hours**

**15**

1

With prior written approval of the RAQA Office, students with demonstrated experience in biotechnology or biologics/biosimilar regulatory aspects may substitute an elective for QARA 5471 or QARA 5515.

2

Before taking QARA 5000 Special Topics in Regulatory Affairs and Quality Assurance as an elective, students must receive prior written approval from the RAQA Office to ensure that the course content focuses specifically on biologics and biosimilars.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Graduate Certificate: Biologics and Biosimilars: Regulatory Aspects

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Biologics and Biosimilars: Regulatory Aspects.

## About the Certificate

Given the rapidly expanded development of biopharmaceuticals in the past decade, an immediate need exists for professionals with knowledge of and credentials in U.S. and global regulations governing biologics and biosimilar drugs. The graduate certificate in Biologics and Biosimilars: Regulatory Aspects explores the regulatory, strategic, technical and scientific issues that are unique to biologics and biosimilar drug manufacturers.

Discussions include the clinical, manufacturing, regulatory and strategic issues that challenge the global commercialization pathways of biological products, as well as current technical and scientific issues involved in developing biological products in major regions of the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH). Questions such as how biologics and biosimilars differ from chemically synthesized drugs and the unique analytical methods used to characterize biologics, as opposed to small molecule testing, are covered. Topics include Quality by Design (QbD) principles relating to development, manufacturing and testing of biologics. Three required courses review the drug development process, biologic and biosimilar regulations, as well as global Chemistry, Manufacturing and Controls (CMC) issues for biologics. Depending on career focus, students may select electives in sterile products (such as vaccines), pharmacovigilance issues, clinical issues or regulatory eSubmissions.

The Biologics and Biosimilars: Regulatory Aspects certificate may be pursued on its own or as part of the Regulatory Affairs and Quality Assurance MS (p. 754).

**Time Limit for Certificate Completion:** 4 years, with courses meeting for a minimum of 36 class contact hours over 10 or 12 consecutive weeks

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

## Graduate Certificate: Biopharmaceutical Manufacturing and Regulatory Affairs

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Biopharmaceutical Manufacturing and Regulatory Affairs.

### About the Certificate

The graduate certificate in Biopharmaceutical Manufacturing and Regulatory Affairs is intended to enable Regulatory Affairs and Quality Assurance (RAQA) students to receive formal recognition for studying the highly specialized, rapidly growing field of pharmaceutical biotechnology, which includes the manufacturing techniques and applicable regulations used in the development and production of biotechnology products. The first biopharmaceutical product, namely, recombinant human insulin, was approved in 1982. Since then, products derived through biotechnology have provided advances in medicine that include therapeutic monoclonal antibodies, cancer vaccines, cytokines, antisense technology, interference RNA, and growth factors. The regulatory framework required for the approval of biotechnology-derived products (or biologics) is lengthy, rigorous and highly complicated. This certificate delves into the complex regulations governing the development, manufacturing and distribution of such products.

Through completion of the certificate, students understand the following:

- the pharmaceutical science behind the discovery of biotechnology products, including biologics, biosimilars and biopharmaceuticals;
- the requirements for sourcing and testing materials used in the production of biotechnology products;
- the technologies and unique considerations associated with the manufacturing and distribution of biotechnology products;
- the applicable regulations involved with biotechnology products; and
- the processes used to sterilize biotechnology products, including regulatory requirements for thermal, gaseous, radiation, filtration and aseptic processing.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

### Admission Requirements and Deadlines

**Application Deadline:**

*Fall and Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

## Graduate Certificate: Clinical Trial Management

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Clinical Trial Management.

### About the Certificate

The graduate certificate in Clinical Trial Management is specifically designed for pharmaceutical and healthcare professionals who actively contribute to the clinical trial process, including physicians, clinical research monitors, investigators and coordinators, and members of Institutional Review Boards (IRBs). Coursework provides the tools and information needed to understand the basis for new drug discovery, the design and implementation of the clinical protocol, its conduct and effective monitoring strategies, and the auditing of data to ensure the integrity of the trial.

Students sharpen their knowledge of clinical trials without committing to a master's degree. The certificate leads to understanding how clinical trials must be designed and overseen in the pharmaceutical industry, including writing protocols and consent forms, understanding the requirements of Good Clinical Practices, and managing budgets and data.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

### Admission Requirements and Deadlines

#### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

### Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 15

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5459	Drug Development	3
QARA 5536	Good Clinical Practices	3
QARA 5537	Clinical Trial Management	3
QARA 5612	Bioethics for Pharmaceutical Professionals	3
<b>Elective</b>		
Select one from the following:		3
QARA 5497	Statistics for Clinical Trials	
QARA 5538	Clinical Drug Safety and Pharmacovigilance	
QARA 5547	Project Management for Clinical Trials	
QARA 5578	Benefit Risk Management and Safety Signaling of Healthcare Products	
QARA 5618	Clinical Data Management (CDM)	
<b>Total Credit Hours</b>		<b>15</b>

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Drug Development

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Drug Development.

### About the Certificate

Regulations governing the pharmaceutical industry at the state, federal and global levels continue to expand and change. Quality assurance principles are the core of pharmaceutical discovery, manufacturing, clinical trials and validation processes. Familiarity with the latest trends

and current practices in regulatory affairs is critical to any industry professional's success.

The graduate certificate in Drug Development is specifically designed for pharmaceutical and healthcare professionals who actively contribute to the drug development process or aspire to pursue a career in the pharmaceutical industry. Students explore regulatory affairs and quality assurance as a prospective career path without committing to a master's degree. The certificate provides the tools and information needed to understand the basis for new drug discovery; the Federal Food, Drug, and Cosmetic Act (FD&C Act); and good pharmaceutical practices as they apply to the clinical, laboratory or manufacturing components of the drug development process.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5459	Drug Development	3
QARA 5477	Good Manufacturing Practices <sup>1</sup>	3
QARA 5592	Food and Drug Law	3
<b>Elective</b> <sup>2</sup>		<b>3</b>
<b>Total Credit Hours</b>		<b>12</b>

1

It is strongly recommended that students take QARA 5477. Depending on their career path in industry, however, students may request to instead take QARA 5476 Good Laboratory Practices, QARA 5479 Advanced Good Manufacturing Practices - Defining "c" or QARA 5536 Good Clinical Practices. Permission from the Advisor is required.

2

Students may select any elective course in the Regulatory Affairs and Quality Assurance (RAQA) MS (p. 754) program for the elective, which allows maximum flexibility to pursue a particular career objective. Those, however, who want to complete the four requirements for the master's degree in RAQA should take QARA 5494 Quality Audit or QARA 5495 Investigational New Drug/New Drug Application Submissions as their elective for the certificate.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Food Regulatory Affairs and Quality Assurance

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Food Regulatory Affairs and Quality Assurance.

### About the Certificate

The graduate certificate in Food Regulatory Affairs and Quality Assurance is intended to enable Regulatory Affairs and Quality Assurance (RAQA) students to receive formal recognition for studying food regulation and quality practices, which expands their regulatory knowledge. The certificate is also designed for individuals working in Philadelphia's large food industry so they can earn credentials in this highly important and rapidly expanding field. As the name "Food and Drug Administration" (FDA) implies, numerous parallels exist between the regulations and quality practices of drug and food products. Since the 1990s, employees from Philadelphia's food industry have been engaged in the RAQA graduate program, either taking individual

courses or pursuing the MS degree. Then, in 2011, the Food Safety and Modernization Act (FSMA) encompassed some of the most sweeping reforms in food safety laws in more than 70 years, shifting the focus of food safety from responding to contamination to preventing it.

Through completion of the certificate, students become:

- knowledgeable and conversant in key regulatory practices that prepare them for supervisory and managerial positions in the food industry or better prepare them for positions in the pharmaceutical industry with food-related products;
- fluent in discussing the basics of food quality practices, including good manufacturing practices (GMPs) and preventive control and hazard/risk analysis;
- knowledgeable about the legal and regulatory requirements involved in a food company's processing activities;
- capable of identifying the key regulatory agencies—in addition to the FDA, the Environmental Protection Agency (EPA) and the United States Department of Agriculture (USDA)—involved in food quality assurance and regulation, being familiar with their roles, responsibilities, and missions; and
- fluent in knowing where to find the latest FDA regulatory changes in the food industry so they can respond quickly to new regulatory and quality trends and developments.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Job Prospects:** Those completing the certificate gain the knowledge and skills to prepare them to address the laws and regulations set forth in FSMA. Graduates are at an advantage when pursuing an FDA career in food inspection or employment with food manufacturers. They are also prepared to work with the medical foods of the RAQA industry, such as baby formula, dietary supplements, nutraceuticals, and vitamins.

**Non-Matriculated Student Policy:** The certificate program may be completed on a non-matriculated basis.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 9<sup>1</sup>

*Required Courses:*

Code	Title	Credit Hours
QARA 5595	Food Law	3
QARA 5596	Food Labeling and Regulatory Affairs	3
QARA 5597	Food Good Manufacturing Processes	3
<b>Total Credit Hours</b>		<b>9</b>

1

Upon completion of the certificate, students who choose to pursue additional study in food issues are recommended to take QARA 5594 Regulation of Dietary Supplements and Functional Foods (3 s.h.).

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Generic Drugs

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Generic Drugs.

### About the Certificate

The graduate certificate in Generic Drugs studies the topics that are unique to generic drug manufacturers. Courses focus on the regulatory issues that are critical for generic industry professionals to understand if they are to ensure that their companies create safe and effective bioequivalent drugs. Coursework delves into the global business environment of generic therapeutic products and pertinent domestic and global regulations. Starting with an overview of the drug development process for innovator products, the required courses compare and explore the Abbreviated New Drug Application (ANDAs) used for generics. Elective courses enable students to explore various manufacturing and regulatory issues, including current trends in the

global marketplace regarding APIs and excipients. The certificate allows students to sharpen their knowledge of this industry niche without committing to a master's degree.

The Generic Drugs certificate provides the tools and information to understand how generic drugs are regulated locally, nationally and globally. Students become familiar with:

- domestic and global regulations for generic products,
- the highly competitive environment of generic products,
- manufacturing issues of global products, and
- current regulatory filing and quality assurance issues affecting generic products.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biology, Chemistry, Engineering, Pharmacy, Physics or related field.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>

## Graduate Certificate: Global Pharmacovigilance/Benefit-Risk Management

SCHOOL OF PHARMACY

### About the Certificate

Pharmacovigilance focuses on the detection, assessment, understanding and prevention of adverse effects associated with the use of healthcare products, including biologics, consumer products, devices, drugs, human cell and tissue products, in vitro diagnostics, and vaccines. The healthcare industry is challenged with providing safety oversight throughout the product lifecycle, including continually reviewing safety profiles as well as managing and assessing benefits and risks that arise during and after product development. While a company's goal is to move products through all phases of development in a timely and cost-efficient manner, the obligation to protect public safety remains paramount.

The discipline of pharmacovigilance is constantly evolving in a dynamic regulatory, economic and scientific environment. The graduate certificate in Global Pharmacovigilance/Benefit-Risk Assessment provides a strong foundation in pharmacovigilance principles for both experienced professionals and those seeking entry into the career field from within and outside of regulated industry. Coursework explores pharmacovigilance in a global environment, combining key regulatory, scientific, demographic and analytical concepts that define the field. Upon

completion of the certificate, students can better appreciate the need for continuous learning in this complex discipline.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 15

*Required Courses:*<sup>1</sup>

Code	Title	Credit Hours
QARA 5508	Good Pharmacovigilance Operations	3
QARA 5538 or QARA 5571	Clinical Drug Safety and Pharmacovigilance Post-Marketing Safety Surveillance	3
QARA 5573	Pharmacoepidemiology	3
QARA 5578	Benefit Risk Management and Safety Signaling of Healthcare Products	3
QARA 5579	Regulatory and Legal Basis of Pharmacovigilance	3

**Total Credit Hours** 15

1

For their first course, it is suggested that students take QARA 5538 Clinical Drug Safety and Pharmacovigilance or QARA 5571 Post-Marketing Safety Surveillance. Both courses provide an overview of pharmacovigilance practices, but with a slightly different focus. QARA 5538 focuses on preclinical and clinical applications, while QARA 5571 focuses primarily on pharmacovigilance practices after a product is created. Alternately, students may begin the program with QARA 5573 Pharmacoepidemiology. Finally, those with prior educational or professional experience in regulatory affairs, clinical research or clinical drug safety may start with QARA 5579 Regulatory and Legal Basis of Pharmacovigilance.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Medical Device

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Medical Device.

### About the Certificate

The U.S. Food and Drug Administration (FDA) regulation of medical devices has the same objective as its regulation of drugs: protecting public health by ensuring a balance of risk vs. benefit for marketed products. Some high-risk medical devices, such as sutures, contact lenses and antibiotic sensitivity disks, were regulated as drugs before legislation was passed in 1976 extending the FDA's regulatory authority over devices. Because medical devices are highly variable in complexity and technology, a more flexible approach to regulation has evolved to meet this variability than has evolved for drugs.

The graduate certificate in Medical Device focuses on the domestic and global regulations governing the medical device field. Many pharmaceutical companies have separate device divisions or entire subsidiaries that focus on marketing medical and diagnostic devices, such as diagnostic instruments and kits, surgical sponges, and drug delivery devices, which range from syringes to transdermal patches. Regulatory affairs professionals pursuing this certificate deepen their understanding of the device field by exploring the similarities and differences in pharmaceutical and device regulations. The certificate reviews key aspects of the medical device industry: regulation, compliance and submissions in the domestic and global realms. Instructors are experts from the medical device sector who conduct highly interactive classes with hands-on workshops, enabling students to apply their knowledge immediately to the workplace.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

## Graduate Certificate: Pharmaceutical Labeling, Advertising and Promotions

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Pharmaceutical Labeling, Advertising and Promotions.

## About the Certificate

The graduate certificate in Pharmaceutical Labeling, Advertising and Promotions is intended to produce well-qualified experts with knowledge of the U.S. and global regulations governing the labeling, advertising and promotions of pharmaceuticals and related products. Coursework addresses the complexity of the Prescribing Information (PI), showing how it must delineate every aspect of the product, from its dosage form to its unique storage requirements and dosage information. Topics include how the PI must be incorporated into print and internet advertising and promotions for products and also the requirements for television ads. Differences in the regulations in key world markets are also discussed.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis.

APPLY HERE to the post-baccalaureate certificate program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

## Certificate Requirements

# Graduate Certificate: Pharmaceutical Manufacturing: Process Development and Analysis

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Pharmaceutical Manufacturing: Process Development and Analysis.

## About the Certificate

The graduate certificate in Pharmaceutical Manufacturing: Process Development and Analysis is designed to enhance students' understanding of the science and regulations involved in pharmaceutical manufacturing processes. Through coursework, students learn how to set standards for increasing product quality, improve plant efficiency, lower production costs, and meet current domestic and global compliance requirements. The curriculum also reflects the culture of meeting continuous manufacturing quality, such as the Food and Drug Administration's Quality Metric Guidance document and its focus on data integrity, change control, quality risk management, Installation Qualifications (IQ), Operational Qualifications (OQ), and Performance Qualifications (PQ).

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

*APPLY HERE to the post-baccalaureate certificate program.*

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Engineering, Pharmacy, Physics or related discipline. They must also have a basic knowledge of pharmaceutical manufacturing processes.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
QARA 5622	Unit Operations	3

QARA 5627	Statistical Design of Experiments (DOE)	3
QARA 5629	Process Monitoring	3
<b>Elective</b>		<b>3</b>
Select one from the following:		
QARA 5512	Microbiological Concepts in Pharmaceutical Manufacturing	
QARA 5548	Risk Management of Pharmaceutical and Medical Devices	
QARA 5625	Process Analytical Technology (PAT)	
<b>Total Credit Hours</b>		<b>12</b>

1

It is recommended that students take the core courses in the following order, if possible: QARA 5622 first, QARA 5629 second, and QARA 5627 third. The elective is taken last.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Graduate Certificate: Sterile Process Manufacturing

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Sterile Process Manufacturing.

### About the Certificate

The graduate certificate in Sterile Process Manufacturing is intended to enable Regulatory Affairs and Quality Assurance (RAQA) students to receive formal recognition for studying the techniques and applicable regulations used in the development and manufacture of sterile products.

Sterile products include a wide range of commonly used items, such as intradermal (ID), intramuscular (IM), intravenous (IV), and subcutaneous (SC), as well as vaccines and products administered directly into different parts of the body, such as arteries (intra-arterial), bones (intrasternal), heart (intracardiac), or the spinal canal (intrathecal). Sterile products must be manufactured using aseptic (i.e., free from contamination) methods wherein the drug substance, excipients, and vehicle (e.g., saline or water for injection) are combined in a container, such as a syringe. Generally, the final dosage form cannot be sterilized at the end of the manufacturing process since the drug substance would become degraded. Therefore, sterility must be ensured during the manufacturing process by utilizing sterile filtration, microbial controls, and facility design, all of which must follow regulatory guidelines.

Through completion of the certificate, students understand the following:

- routes and types of administration of sterile products;
- regulations, processes and unique considerations involved with sterile parenteral products;
- manufacturing and facility requirements for the design and production of sterile products;
- validation and compliance specifications for sterile products; and
- methods used for sterilization, including regulatory requirements for thermal, gaseous, radiation, filtration and aseptic processing.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

*APPLY HERE to the post-baccalaureate certificate program.*

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

## Graduate Certificate: Validation Sciences

SCHOOL OF PHARMACY

Learn more about the graduate certificate in Validation Sciences.

### About the Certificate

The graduate certificate in Validation Sciences provides students with a strong foundation in validation science principles, whether the student is an experienced professional or someone seeking entry into the career field. Validation is a critical and all-encompassing tool in the pharmaceutical, medical device, biotechnology and related regulated industries. At the heart of quality assurance practices, validation includes every test and scientific methodology used to demonstrate that facilities, utilities, equipment, processes, computers and products meet agreed-

upon standards. Validation relies on the measured precision of scientific methods.

Coursework explores validation sciences in a global environment, combining key regulatory, scientific and analytical concepts. Through completion of the certificate, students understand and can apply:

- the benefits, principles and concepts associated with validation science; and
- the domestic and international regulations that govern the discipline.

**Time Limit for Certificate Completion:** 4 years**Campus Location:** Health Sciences and Online

**Full-Time/Part-Time Status:** The certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

*APPLY HERE to the post-baccalaureate certificate program.*

**Coursework Required for Admission Consideration:** Students pursuing the certificate in Validation Sciences are expected to have knowledge of current Good Manufacturing Practice regulations. Students without such knowledge should consider taking QARA 5477 Good Manufacturing Practices (3 s.h.) before starting the program.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 15**Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5468	Validation of Facilities, Utilities and Equipment (FUE)	3
QARA 5474	Process Validation <sup>1</sup>	3
<b>Electives</b> 9		
Select three from the following:		
QARA 5451	Statistical Quality Control	
QARA 5478	High Purity Water Systems	
QARA 5492	Production of Sterile Parenterals	
QARA 5493	Sterilization Processes	
QARA 5498	Computerized System Validation	

QARA 5503	Design Controls for Medical Devices and Combination Products
QARA 5516	Cleaning Validation
QARA 5627	Statistical Design of Experiments (DOE)
QARA 5629	Process Monitoring
QARA 5650	Special Topics in Regulatory Affairs and Quality Assurance <sup>2</sup>
<b>Total Credit Hours</b>	<b>15</b>

1

Students are expected to take QARA 5474 as their first course. However, students with educational or professional experience in validation science may begin the certificate program with an elective, although all required courses must be completed to earn the certificate.

2

QARA 5650 should focus on current development and regulatory practices in validation science.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Advanced Regulatory Affairs and Quality Assurance

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Advanced Regulatory Affairs and Quality Assurance is designed to allow individuals holding a master's degree in Regulatory Affairs and Quality Assurance (RAQA) to pursue advanced coursework from a broad array of topics and receive formal recognition

for their work. The certificate program is also open to those holding an advanced degree in the sciences who have worked extensively in the pharmaceutical industry and seek a cadre of advanced courses in RA or QA to be compliant with Food and Drug Administration regulations on training records.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants completing the program to earn the post-master's certificate must hold a master's degree in Regulatory Affairs and Quality Assurance from Temple University or a peer institution. An advanced degree in the sciences is also accepted.

Applicants who did not earn their master's degree from Temple University's School of Pharmacy must formally apply to the certificate program. They must provide proof of their advanced degree, including a transcript and documentation of the titles and descriptions of previous RA/QA courses taken. A summary of their industry experience in the form of a CV or resume is also required.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants completing the program to earn a graduate certificate must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12-15, depending on the institution from which and/or the subject in which the master's degree was earned<sup>1</sup>

*Required Courses:*

Code	Title	Credit Hours

Students who earned their MS in Regulatory Affairs and Quality Assurance from Temple University's School of Pharmacy are permitted to select any four 3-credit courses not previously completed as part of their MS curriculum. Those who earned a master's degree in Regulatory Affairs and Quality Assurance from a peer institution, as well as those holding an advanced degree in the sciences, are required to take five 3-credit courses.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Biologics and Biosimilars Manufacturing

SCHOOL OF PHARMACY

### About the Certificate

Given the rapidly expanded development of biopharmaceuticals in the past decade, an immediate need exists for professionals with knowledge of and credentials in key manufacturing quality issues governing biologics and biosimilar drugs. The post-master's certificate in Biologics and Biosimilars Manufacturing requires the completion of coursework focusing on how biologics and biosimilars are manufactured, looking specifically at regulatory compliance elements, fundamentals of Quality by Design (QbD) and Statistical Process Control (SPC). Chemistry, Manufacturing and Controls (CMC) strategies, including materials sourcing and testing requirements, are also studied. Discussions include the technologies used in manufacturing and the unique considerations that arise when dealing with such technologies as cell and gene therapies, therapeutic monoclonal antibodies, vaccines, cytokines, antisense technology, interference RNA and growth factors.

**Time Limit for Certificate Completion:** 4 years, with courses meeting for a minimum of 36 class contact hours over 10 or 12 consecutive weeks

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biology, Chemistry, Engineering, Pharmacy, Physics or related field.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 15

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
PS 8005	Pharmaceutical Biotechnology	3
QARA 5471	Biotechnology: Bioprocess Basics <sup>1</sup>	3
QARA 5515	Biologics/Biosimilars: A Regulatory Overview <sup>1</sup>	3
QARA 5577	Global CMC Regulatory Compliance for Biopharmaceuticals and Other Biologics	3
<b>Elective</b>		
Select one from the following:		3
PS 5501	Development of Sterile Products	
QARA 5000	Special Topics in Regulatory Affairs and Quality Assurance <sup>2</sup>	
QARA 5451	Statistical Quality Control

## Post-Master's Certificate: Biologics and Biosimilars: Regulatory Aspects

SCHOOL OF PHARMACY

### About the Certificate

Given the rapidly expanded development of biopharmaceuticals in the past decade, an immediate need exists for professionals with knowledge of and credentials in U.S. and global regulations governing biologics and biosimilar drugs. The post-master's certificate in Biologics and Biosimilars: Regulatory Aspects explores the regulatory, strategic, technical and scientific issues that are unique to biologics and biosimilar drug manufacturers.

Discussions include the clinical, manufacturing, regulatory and strategic issues that challenge the global commercialization pathways of biological products, as well as current technical and scientific issues involved in developing biological products in major regions of the

International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH). Questions such as how biologics and biosimilars differ from chemically synthesized drugs and the unique analytical methods used to characterize biologics, as opposed to small molecule testing, are covered. Topics include Quality by Design (QbD) principles relating to development, manufacturing and testing of biologics. Three required courses review the drug development process, biologic and biosimilar regulations, as well as global Chemistry, Manufacturing and Controls (CMC) issues for biologics. Depending on career focus, students may select electives in sterile products (such as vaccines), pharmacovigilance issues, clinical issues or regulatory eSubmissions.

The Biologics and Biosimilars: Regulatory Aspects certificate may be pursued on its own or as part of the Regulatory Affairs and Quality Assurance MS (p. 754), if not already earned.

**Time Limit for Certificate Completion:** 4 years, with courses meeting for a minimum of 36 class contact hours over 10 or 12 consecutive weeks

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biology, Chemistry, Engineering, Pharmacy, Physics or related field.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 15*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
QARA 5459	Drug Development	3
QARA 5515	Biologics/Biosimilars: A Regulatory Overview	3
QARA 5577	Global CMC Regulatory Compliance for Biopharmaceuticals and Other Biologics	3
<b>Electives</b>		
Select two from the following:		6
QARA 5000	Special Topics in Regulatory Affairs and Quality Assurance <sup>2</sup>	
QARA 5492	Production of Sterile Parenterals	

QARA 5514	Regulatory eSubmissions
QARA 5538	Clinical Drug Safety and Pharmacovigilance <sup>3</sup>
QARA 5571	Post-Marketing Safety Surveillance <sup>3</sup>
QARA 5572	Vaccines: Regulatory Affairs and Quality Assurance Issues
QARA 5650	Special Topics in Regulatory Affairs and Quality Assurance <sup>4</sup>
<hr/>	
<b>Total Credit Hours</b>	<b>15</b>

1

Students who previously completed any of these required core courses as part of the Regulatory Affairs and Quality Assurance MS (p. 754) should consult with the RAQA Office about substituting elective courses in their place.

2

Before taking QARA 5000 Special Topics in Regulatory Affairs and Quality Assurance as an elective, students must receive prior written approval from the RAQA Office to ensure that the course content focuses specifically on biopharmaceutical manufacturing.

3

Students may take QARA 5538 **or** QARA 5571 as an elective but not both.

4

Only the topic of "Current Trends in Clinical Trials" will be accepted for elective QARA 5650 Special Topics in Regulatory Affairs and Quality Assurance.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

# Post-Master's Certificate: Biopharmaceutical Manufacturing and Regulatory Affairs

SCHOOL OF PHARMACY

## About the Certificate

The post-master's certificate in Biopharmaceutical Manufacturing and Regulatory Affairs is intended to enable Regulatory Affairs and Quality Assurance (RAQA) specialists to receive formal recognition for studying the highly specialized, rapidly growing field of pharmaceutical biotechnology, which includes the manufacturing techniques and applicable regulations used in the development and production of biotechnology products. The first biopharmaceutical product, namely, recombinant human insulin, was approved in 1982. Since then, products derived through biotechnology have provided advances in medicine that include therapeutic monoclonal antibodies, cancer vaccines, cytokines, antisense technology, interference RNA, and growth factors. The regulatory framework required for the approval of biotechnology-derived products (or biologics) is lengthy, rigorous and highly complicated. This certificate delves into the complex regulations governing the development, manufacturing and distribution of such products.

Through completion of the certificate, students understand the following:

- the pharmaceutical science behind the discovery of biotechnology products, including biologics, biosimilars and biopharmaceuticals;
- the requirements for sourcing and testing materials used in the production of biotechnology products;
- the technologies and unique considerations associated with the manufacturing and distribution of biotechnology products;
- the applicable regulations involved with biotechnology products; and
- the processes used to sterilize biotechnology products, including regulatory requirements for thermal, gaseous, radiation, filtration and aseptic processing.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

# Post-Master's Certificate: Clinical Trial Management

SCHOOL OF PHARMACY

Learn more about the post-master's certificate in Clinical Trial Management.

## About the Certificate

The post-master's certificate in Clinical Trial Management is designed for those who hold an MS in Regulatory Affairs and Quality Assurance and want to keep current with industry issues and meet regulatory requirements for training. The certificate program is also open to professionals with other master's or doctoral degrees.

The Clinical Trial Management certificate is specifically designed for pharmaceutical and healthcare professionals who actively contribute to the clinical trial process, including physicians, clinical research monitors, investigators and coordinators, and members of Institutional Review Boards (IRBs). Coursework provides the tools and information needed to understand the basis for new drug discovery, the design and implementation of the clinical protocol, its conduct and effective monitoring strategies, and the auditing of data to ensure the integrity of the trial. The certificate leads to understanding how clinical trials must be designed and overseen in the pharmaceutical industry, including writing protocols and consent forms, understanding the requirements of Good Clinical Practices, and managing budgets and data.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall and Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field, including but not limited to an MS in Regulatory Affairs and Quality Assurance. Graduates of Temple University's RAQA program take certificate coursework to keep current with industry issues and meet regulatory requirements for training. Applicants with an advanced science degree from an accredited institution of higher learning other than Temple University must have worked in the pharmaceutical industry for a minimum of three years.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific

major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12 for graduates of the Temple University Regulatory Affairs and Quality Assurance (RAQA) MS; 15 for students who completed their master's degree at an institution other than Temple University

*Required Courses:*<sup>1</sup>

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5459	Drug Development	3
QARA 5536	Good Clinical Practices	3
QARA 5537	Clinical Trial Management	3
QARA 5612	Bioethics for Pharmaceutical Professionals	3
<b>Elective</b>		
Select one from the following: <sup>2</sup>		3
QARA 5401	Fundamentals of Pharmacology and Pharmacokinetics	
QARA 5494	Quality Audit	
QARA 5497	Statistics for Clinical Trials	
QARA 5538	Clinical Drug Safety and Pharmacovigilance	
QARA 5539	Global Clinical Drug Development	
QARA 5547	Project Management for Clinical Trials	
QARA 5571	Post-Marketing Safety Surveillance	
QARA 5573	Pharmacoepidemiology	
QARA 5578	Benefit Risk Management and Safety Signaling of Healthcare Products	
QARA 5618	Clinical Data Management (CDM)	
<b>Total Credit Hours</b>		<b>15</b>

1

Graduates of Temple University's RAQA MS program take four courses to complete 12 credits, provided none of the courses were completed previously as part of their RAQA master's degree. Students who earned a non-Temple master's degree must complete all four core courses and one elective for a total of 15 credits.

2

Students holding a Temple RAQA MS select from the list of electives to complete 12 credits for the post-master's certificate only if they previously completed one or more core courses in earning their master's degree. All students who earned a non-Temple master's degree must select one elective to complete a total of 15 credits.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Food Regulatory Affairs and Quality Assurance

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Food Regulatory Affairs and Quality Assurance enables Regulatory Affairs and Quality Assurance (RAQA) specialists to receive formal recognition for studying food regulation and quality practices, which expands their regulatory knowledge. The certificate is also designed for individuals working in Philadelphia's large food industry so they can earn credentials in this highly important and rapidly expanding field. As the name "Food and Drug Administration" (FDA) implies, numerous parallels exist between the regulations and quality practices of drug and food products. Since the 1990s, employees from Philadelphia's food industry have been engaged in the RAQA graduate program, either taking individual courses or pursuing the MS degree. Then, in 2011, the Food Safety and Modernization Act (FSMA) encompassed some of the most sweeping reforms in food safety laws in more than 70 years, shifting the focus of food safety from responding to contamination to preventing it.

Through completion of the certificate, students become:

- knowledgeable and conversant in key regulatory practices that prepare them for supervisory and managerial positions in the food industry or better prepare them for positions in the pharmaceutical industry with food-related products;
- fluent in discussing the basics of food quality practices, including good manufacturing practices (GMPs) and preventive control and hazard/risk analysis;
- knowledgeable about the legal and regulatory requirements involved in a food company's processing activities;
- capable of identifying the key regulatory agencies—in addition to the FDA, the Environmental Protection Agency (EPA) and the United States Department of Agriculture (USDA)—involved in food quality assurance and regulation, being familiar with their roles, responsibilities, and missions; and

- fluent in knowing where to find the latest FDA regulatory changes in the food industry so they can respond quickly to new regulatory and quality trends and developments.

**Time Limit for Certificate Completion:** 2 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Job Prospects:** Those completing the certificate gain the knowledge and skills to prepare them to address the laws and regulations set forth in FSMA. Graduates are at an advantage when pursuing an FDA career in food inspection or employment with food manufacturers. They are also prepared to work with the medical foods of the RAQA industry, such as baby formula, dietary supplements, nutraceuticals, and vitamins.

**Non-Matriculated Student Policy:** The certificate program may be completed on a non-matriculated basis.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 9<sup>1</sup>

*Required Courses:*

Code	Title	Credit Hours
QARA 5595	Food Law	3
QARA 5596	Food Labeling and Regulatory Affairs	3
QARA 5597	Food Good Manufacturing Processes	3
<b>Total Credit Hours</b>		<b>9</b>

1

Upon completion of the certificate, students who choose to pursue additional study in food issues are recommended to take QARA 5594 Regulation of Dietary Supplements and Functional Foods (3 s.h.).

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Generic Drugs

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Generic Drugs studies the topics that are unique to generic drug manufacturers. Courses focus on the regulatory issues that are critical for generic industry professionals to understand if they are to ensure that their companies create safe and effective bioequivalent drugs. Coursework delves into the global business environment of generic therapeutic products and pertinent domestic and global regulations. Starting with an overview of the drug development process for innovator products, the required courses compare and explore the Abbreviated New Drug Application (ANDAs) used for generics. Elective courses enable students to explore various manufacturing and regulatory issues, including current trends in the global marketplace regarding APIs and excipients. The certificate allows students to sharpen their knowledge of this industry niche.

The Generic Drugs certificate provides the tools and information to understand how generic drugs are regulated locally, nationally and globally. Students become familiar with:

- domestic and global regulations for generic products,
- the highly competitive environment of generic products,
- manufacturing issues of global products, and
- current regulatory filing and quality assurance issues affecting generic products.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

*APPLY HERE* to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biology, Chemistry, Engineering, Pharmacy, Physics or related field.

## Post-Master's Certificate: Global Pharmacovigilance/Benefit-Risk Management

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Global Pharmacovigilance/Benefit-Risk Assessment is designed for those who hold an MS in Regulatory Affairs and Quality Assurance and want to keep current with industry issues and meet regulatory requirements for training. The certificate program is also open to professionals with other master's or doctoral degrees.

Pharmacovigilance is constantly evolving in a dynamic regulatory, economic and scientific environment. The post-master's certificate in Global Pharmacovigilance/Benefit-Risk Assessment provides a solid scientific and regulatory foundation in the key disciplines necessary for a successful career in the field of pharmacovigilance. It focuses on establishing a platform for continuous learning in pharmacovigilance rather than on an unrealistic goal of seeking total subject mastery. Importantly, it focuses on pharmacovigilance in a global environment.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field, including but not limited to an MS in Regulatory Affairs and Quality Assurance. Graduates of Temple University's RAQA program take certificate coursework to keep current with industry issues and meet regulatory requirements for training. Applicants with an advanced science degree from an accredited institution of higher learning other than Temple University must have worked in the pharmaceutical industry for a minimum of three years.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 15

*Required Courses:*<sup>1</sup>

Code	Title	Credit Hours
QARA 5508	Good Pharmacovigilance Operations	3
QARA 5538	Clinical Drug Safety and Pharmacovigilance	3
or QARA 5571	Post-Marketing Safety Surveillance	
QARA 5573	Pharmacoepidemiology	3
QARA 5578	Benefit Risk Management and Safety Signaling of Healthcare Products	3
QARA 5579	Regulatory and Legal Basis of Pharmacovigilance	3
<b>Total Credit Hours</b>		<b>15</b>

1

Students select alternate coursework to complete the post-master's certificate from the approved QARA courses identified in the grid below if they:

- hold an MS in Regulatory Affairs and Quality Assurance, and
- completed one or more of the courses required for the post-master's certificate in previously fulfilling degree requirements for their master's degree.

## Approved QARA Courses for Substitution of Required Coursework Previously Completed

Code	Title	Credit Hours
QARA 5539	Global Clinical Drug Development	3
QARA 5547	Project Management for Clinical Trials	3
QARA 5548	Risk Management of Pharmaceutical and Medical Devices	3
QARA 5612	Bioethics for Pharmaceutical Professionals	3

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Medical Device

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Medical Device is designed for those who hold an MS in Regulatory Affairs and Quality Assurance and want to keep current with industry issues and meet regulatory requirements for training. The certificate program is also open to professionals with other master's or doctoral degrees.

The U.S. Food and Drug Administration (FDA) regulation of medical devices has the same objective as its regulation of drugs: protecting public health by ensuring a balance of risk vs. benefit for marketed products. Some high-risk medical devices, such as sutures, contact lenses and antibiotic sensitivity disks, were regulated as drugs before legislation was passed in 1976 extending the FDA's regulatory authority over devices. Because medical devices are highly variable in complexity and technology, a more flexible approach to regulation has evolved to meet this variability than has evolved for drugs.

Coursework for the Medical Device post-master's certificate focuses on the domestic and global regulations governing the medical device field. Many pharmaceutical companies have separate device divisions or entire subsidiaries that focus on marketing medical and diagnostic devices, such as diagnostic instruments and kits, surgical sponges, and drug delivery devices, which range from syringes to transdermal patches. Regulatory affairs professionals pursuing this certificate deepen their understanding of the device field by exploring the similarities and differences in pharmaceutical and device regulations. The certificate reviews key aspects of the medical device industry: regulation, compliance and submissions in the domestic and global realms. Instructors are experts from the medical device sector who conduct highly interactive classes with hands-on workshops, enabling students to apply their knowledge immediately to the workplace.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field, including but not limited to an MS in Regulatory Affairs and Quality Assurance. Graduates of Temple University's RAQA program take certificate coursework to keep current with industry issues and meet regulatory requirements for training. Applicants with an advanced science degree from an accredited institution of higher learning other than Temple University must have worked in the pharmaceutical industry for a minimum of three years.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 15

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5496	Regulation of Medical Devices: Compliance	3
QARA 5502	Regulation of Medical Devices: Submissions	3
QARA 5505	Global Regulation of Medical Devices	3
QARA 5592	Food and Drug Law <sup>1</sup>	3
<b>Elective</b>		
Select one from the following:		3
QARA 5474	Process Validation	
QARA 5494	Quality Audit	
QARA 5498	Computerized System Validation	
QARA 5503	Design Controls for Medical Devices and Combination Products	
QARA 5511	Advanced Audit Workshop of Quality Systems	
QARA 5541	Pharmaceutical Packaging: Technology and Regulation	
QARA 5548	Risk Management of Pharmaceutical and Medical Devices	
<b>Total Credit Hours</b>		<b>15</b>

1

Graduates of Temple's MS in Regulatory Affairs and Quality Assurance program will have completed QARA 5592 as part of their master's degree. Those credits are brought forward to count for the Medical Device post-master's certificate. These students are then required to take QARA 5496 Regulation of Medical Devices: Compliance, QARA 5502 Regulation of Medical Devices: Submissions, QARA 5505 Global Regulation of Medical Devices, and one elective to complete the post-master's certificate in Medical Device. Any student who previously completed QARA 5496, QARA 5502 and/or QARA 5505 as part of their MS degree program must select an elective to replace any previously completed course(s) in fulfilling the required 15 credits for the post-master's certificate.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Pharmaceutical Labeling, Advertising and Promotions

SCHOOL OF PHARMACY

Learn more about the post-master's certificate in Pharmaceutical Labeling, Advertising and Promotions.

### About the Certificate

The post-master's certificate in Pharmaceutical Labeling, Advertising and Promotions is intended to produce well-qualified experts with knowledge of the U.S. and global regulations governing the labeling, advertising and promotions of pharmaceuticals and related products. Coursework addresses the complexity of the Prescribing Information (PI), showing how it must delineate every aspect of the product, from its dosage form to

its unique storage requirements and dosage information. Topics include how the PI must be incorporated into print and internet advertising and promotions for products and also the requirements for television ads. Differences in the regulations in key world markets are also discussed.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** The certificate program cannot be taken on a non-matriculated basis.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in Regulatory Affairs and Quality Assurance.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

**Other:** Applicants who did not earn their master's degree from Temple University's School of Pharmacy must have sufficient industry experience and familiarity with the basic tenets of regulatory affairs and quality assurance to pursue the post-master's certificate. As part of the application, these applicants must include:

- a letter of request to the Assistant Dean of Regulatory Affairs and Quality Assurance indicating the courses to be pursued and citing the applicant's industry experience;
- a copy of their resume; and
- a photocopy of their final transcript from the institution where the master's or doctoral degree was earned.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*<sup>1</sup>

Code	Title	Credit Hours
QARA 5532	Global Labeling Regulation: Principles and Practices	3
QARA 5533	Requirements for Product Labeling and Advertising	3
QARA 5592	Food and Drug Law	3
QARA 5611	Regulation of Advertising and Promotions	3
<b>Total Credit Hours</b>		<b>12</b>

1

Post-master's students who have already completed one or more of the required certificate courses as part of the MS in Regulatory Affairs and Quality Assurance may, with prior written approval of the RAQA Office, complete one or more of the following electives: QARA 5507 Regulation of Non-Prescription Healthcare Products, QARA 5535 Advanced Topics in Labeling Development, QARA 5544 Regulatory Intelligence, QARA 5605 Advanced Topics in Food and Drug Law, and/or, when the special topic relates to issues of labeling, advertising, and promotions, QARA 5650 Special Topics in Regulatory Affairs and Quality Assurance.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Pharmaceutical Manufacturing: Process Development and Analysis

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Pharmaceutical Manufacturing: Process Development and Analysis is designed to enhance students' understanding of the science and regulations involved in pharmaceutical manufacturing processes. Through coursework, students learn how to set standards for increasing product quality, improve plant efficiency, lower production costs, and meet current domestic and global compliance requirements. The curriculum also reflects the culture of meeting continuous manufacturing quality, such as the Food and Drug Administration's Quality Metric Guidance document and its focus on

data integrity, change control, quality risk management, Installation Qualifications (IQ), Operational Qualifications (OQ), and Performance Qualifications (PQ).

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

Fall and Spring admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

APPLY HERE to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Engineering, Pharmacy, Physics or related discipline. They must also have a basic knowledge of pharmaceutical manufacturing processes.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 12*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b> <sup>1</sup>		
QARA 5622	Unit Operations	3
QARA 5627	Statistical Design of Experiments (DOE)	3
QARA 5629	Process Monitoring	3
<b>Elective</b>		<b>3</b>
Select one from the following:		
QARA 5512	Microbiological Concepts in Pharmaceutical Manufacturing	
QARA 5548	Risk Management of Pharmaceutical and Medical Devices	
QARA 5625	Process Analytical Technology (PAT)	
<b>Total Credit Hours</b>		<b>12</b>

<sup>1</sup>

It is recommended that students take the core courses in the following order, if possible: QARA 5622 first, QARA 5629 second, and QARA 5627 third. The elective is taken last.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Sterile Process Manufacturing

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Sterile Process Manufacturing is intended to enable Regulatory Affairs and Quality Assurance (RAQA) students to receive formal recognition for studying the techniques and applicable regulations used in the development and manufacture of sterile products. Sterile products include a wide range of commonly used items, such as intradermal (ID), intramuscular (IM), intravenous (IV), and subcutaneous (SC), as well as vaccines and products administered directly into different parts of the body, such as arteries (intra-arterial), bones (intrasternal), heart (intracardiac), or the spinal canal (intrathecal). Sterile products must be manufactured using aseptic (i.e., free from contamination) methods wherein the drug substance, excipients, and vehicle (e.g., saline or water for injection) are combined in a container, such as a syringe. Generally, the final dosage form cannot be sterilized at the end of the manufacturing process since the drug substance would become degraded. Therefore, sterility must be ensured during the manufacturing process by utilizing sterile filtration, microbial controls, and facility design, all of which must follow regulatory guidelines.

Through completion of the certificate, students understand the following:

- routes and types of administration of sterile products;
- regulations, processes, and unique considerations involved with sterile parenteral products;
- manufacturing and facility requirements for the design and production of sterile products;
- validation and compliance specifications for sterile products; and

- methods used for sterilization, including regulatory requirements for thermal, gaseous, radiation, filtration and aseptic processing.

**Time Limit for Certificate Completion:** 3 years

**Campus Location:** Online and Fort Washington

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

*APPLY HERE* to the post-master's certificate program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a BS degree in Biochemistry, Biology, Chemistry, Physics or a health-related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate:* 12

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5492	Production of Sterile Parenterals	3
	or QARA 5493 Sterilization Processes	
QARA 5512	Microbiological Concepts in Pharmaceutical Manufacturing	3
<b>Electives</b>		<b>6</b>
Select two from the following:		
QARA 5492	Production of Sterile Parenterals <sup>1</sup>	
QARA 5493	Sterilization Processes <sup>1</sup>	
QARA 5501	Development of Sterile Products	
QARA 5572	Vaccines: Regulatory Affairs and Quality Assurance Issues	
<b>Total Credit Hours</b>		<b>12</b>

1

Course may be selected as an elective only if not taken as a core course above.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## Post-Master's Certificate: Validation Sciences

SCHOOL OF PHARMACY

### About the Certificate

The post-master's certificate in Validation Sciences provides students with a strong foundation in validation science principles, whether the student is an experienced professional or someone seeking entry into the career field. Validation is a critical and all-encompassing tool in the pharmaceutical, medical device, biotechnology and related regulated industries. At the heart of quality assurance practices, validation includes every test and scientific methodology used to demonstrate that facilities, utilities, equipment, processes, computers and products meet agreed-upon standards. Validation relies on the measured precision of scientific methods.

Coursework explores validation sciences in a global environment, combining key regulatory, scientific and analytical concepts. Through completion of the certificate, students understand and can apply:

- the benefits, principles and concepts associated with validation science; and
- the domestic and international regulations that govern the discipline.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Health Sciences and Online

**Full-Time/Part-Time Status:** The post-master's certificate may be completed on a part-time basis. NOTE: International students may not be eligible to apply for a student visa based on admission to the certificate

program. Please contact the School of Pharmacy's program coordinator for more information.

**Non-Matriculated Student Policy:** Non-matriculated students may take up to 9 credits of coursework before applying to the certificate program.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall* and *Spring* admissions are on a rolling basis. Interested students should contact the School of Pharmacy for permission to enroll in coursework.

*APPLY HERE* to the post-master's certificate program.

**Coursework Required for Admission Consideration:** Students pursuing the certificate in Validation Sciences are expected to have knowledge of current Good Manufacturing Practice regulations. Students without such knowledge should consider taking QARA 5477 Good Manufacturing Practices (3 s.h.) before starting the program.

**Master's Degree in Discipline/Related Discipline:** Applicants must hold a master's degree in a Pharmacy-related field.

**Bachelor's Degree in Discipline/Related Discipline:** Applicants must hold a bachelor's degree from an accredited institution. While no specific major is required, most applicants should have a background in biological sciences, engineering, healthcare, natural sciences or related discipline.

## Certificate Requirements

*Number of Credits Required to Complete the Certificate: 15*

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
QARA 5468	Validation of Facilities, Utilities and Equipment (FUE)	3
QARA 5474	Process Validation <sup>1</sup>	3
<b>Electives</b>		<b>9</b>
Select three from the following:		
QARA 5451	Statistical Quality Control	
QARA 5478	High Purity Water Systems	
QARA 5492	Production of Sterile Parenterals	
QARA 5493	Sterilization Processes	
QARA 5498	Computerized System Validation	
QARA 5503	Design Controls for Medical Devices and Combination Products	
QARA 5516	Cleaning Validation	
QARA 5627	Statistical Design of Experiments (DOE)	
QARA 5629	Process Monitoring	
QARA 5650	Special Topics in Regulatory Affairs and Quality Assurance <sup>2</sup>	
<b>Total Credit Hours</b>		<b>15</b>

1

Students are expected to take QARA 5474 as their first course. However, students with educational or professional experience in validation science may begin the certificate program with an elective, although all required courses must be completed to earn the certificate.

2

QARA 5650 should focus on current development and regulatory practices in validation science.

**GPA Required to be Awarded the Certificate:** 3.0 minimum

## School of Podiatric Medicine

Temple University School of Podiatric Medicine (TUSPM) opened in September 1963 as the Pennsylvania College of Podiatric Medicine (PCPM). In response to the 1960 closing of the Temple University School of Chiropractic, the original podiatric medical school, several faculty sought and obtained a charter from the Commonwealth of Pennsylvania to open a new school of podiatry. In July 1998, PCPM officially merged with Temple University. As a valued asset within the Temple University Health System, TUSPM continues to strengthen its presence within the Philadelphia community.

TUSPM is accredited by the Council on Podiatric Medical Education (CPME), holding the status of "accreditation" since 1967. Accreditation is an indication of public approbation, attesting to the quality of the podiatric medical education program and the institution's continued commitment to it. CPME is recognized by both the U.S. Department of Education and the Council for Higher Education Accreditation as the professional institutional accrediting agency for podiatric medical education. For more information, contact CPME at 9312 Old Georgetown Road, Bethesda, MD 20814 or at 301-571-9200.

The school's current campus opened in 1973. It was the first facility ever developed specifically for podiatric use. In addition to classrooms and laboratories, the complex includes both a medical clinic called the Foot and Ankle Institute and student housing. TUSPM is also home to The Shoe Museum, which was founded in 1976 to coincide with the nation's bicentennial as an added attraction for visitors to nearby Independence National Historical Park and the Liberty Bell. Its original international shoe collection was on long-term loan from the Dr. H. Augustus Wilson (1853-1919) Shoe Collection of The Mütter Museum at The College of Physicians of Philadelphia. Dr. Wilson was a noted Philadelphia orthopedist and world traveler who collected footwear from over 30 countries. Today, exhibits range from "The Anatomy and Physiology of Shoes" and "Mummer Shoes" to "Shoes in Space" and many more.

### Professional Program

- Podiatric Medicine DPM (p. 784)

## Podiatric Medicine DPM

SCHOOL OF PODIATRIC MEDICINE

Learn more about the Doctor of Podiatric Medicine.

### About the Program

Temple University School of Podiatric Medicine (TUSPM) offers coursework and clinical programs leading to the Doctor of Podiatric Medicine degree in four years. The DPM curriculum fully prepares students for post-graduate residency training.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Center City

**Full-Time/Part-Time Status:** Full-time study is required.

**Interdisciplinary Study:** In collaboration with the College of Public Health at Temple University, TUSPM offers a joint program that leads to the Master of Public Health and Doctor of Podiatric Medicine degrees. Earned full time in the midst of podiatric studies, the MPH helps students understand the social and environmental factors that influence healthcare

and patient experiences. These affiliated degree programs allow students to earn two advanced degrees in five years.

**Job Prospects:** Graduates of the program have excellent prospects at employment in the podiatric medicine field.

**Licensure/Certification:** Podiatric physicians are licensed in all 50 states, Washington, D.C., and Puerto Rico to treat the foot, ankle and related structures of the leg by medical, surgical or other means.

Students enrolled in any of the nine colleges of podiatric medicine are required to pass Parts I and II of the American Podiatric Medical Licensing Examination (APMLE) before beginning residency training. Part I covers basic science areas and is generally taken at the conclusion of the second year. Part II has two components: (a) a written exam that covers clinical areas such as Anesthesia and Surgery; Community Health, Jurisprudence and Research; Medicine; Orthopedics, Biomechanics and Sports Medicine; and Radiology; and (b) the Clinical Skills Patient Encounter (CSPE) portion that assesses proficiency in podiatric clinical tasks. Part III of the APMLE is taken during residency. The APMLE is overseen by the National Board of Podiatric Medical Examiners (NBPME). To learn more about the exam, visit <https://www.apmle.com/>.

State licensing requirements generally include graduation from an accredited school or college of podiatric medicine, passage of the National Board exams, and postgraduate training. Podiatric physicians may also become certified in one or both specialty areas: (a) primary care and orthopedics, and/or (b) surgery. National podiatric specialty boards grant certification to qualified podiatrists who have completed the specified educational requirements and who successfully complete written and oral examinations. For more information, see <https://aacpm.org/becoming-a-podiatric-physician/>.

**Non-Matriculated Student Policy:** Coursework may not be taken on a non-matriculated basis.

**Financing Opportunities:** Partial scholarships, student loans and work study funds are available.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall Admission Only:*

- April 1 - Priority Deadline for First-Year and International Applicants
- May 1 - Deadline for Transfer and Advanced Standing Applicants
- June 30 - Rolling Deadline for First-Year and International Applicants

Applications are processed as they are received throughout the year. Early application is encouraged.

APPLY ONLINE to this professional program.

Applicants for the Podiatric Medicine DPM must utilize the American Association of Colleges of Podiatric Medicine Application Service (AACPMAS), which is a centralized application service for all nine U.S. schools and colleges of podiatric medicine. The AACPMAS application must be completed at <https://aacpmas.liaisoncas.com/>.

**Letters of Reference:**

*Number Required:* 1-3

*From Whom:* For first-year applicants, letters of academic evaluation are required from an advisor and premedical advisory committee. Alternately, two letters are needed from science faculty and a letter from a podiatric physician. For transfer applicants, a letter of good standing is required from the dean of the applicant's current medical college. TUSPM participates in Interfolio and VirtualEvals.

**Degree Required for Admission Consideration:** Most incoming students have at least a bachelor's degree. The minimum requirement is 90 credits of undergraduate education completed at an accredited college or university, including these prerequisite courses:

- Biology or Zoology: 8 credits, including laboratory. Additional courses in Anatomy, Cell Biology, Embryology, Evolution, Genetics, Histology, Microbiology and Physiology are recommended but not required.
- General/Inorganic Chemistry: 8 credits, including laboratory
- Organic Chemistry: 8 credits, including laboratory. An additional course in Biochemistry is recommended but not required.
- Physics: 8 credits, including laboratory
- English: 6 credits
- An additional 52 credits

#### Standardized Test Scores:

MCAT or DAT: A minimum score is not fixed as candidates are evaluated on their entire academic portfolio, but the reported test score must be respectable. The test must have been taken no more than three years prior to the beginning of the application cycle.

**Interview:** A personal interview is required for all students under consideration by the Admissions Committee. Applicants take part in an interview day that consists of a tour of the TUSPM campus, lunch with current students, and interviews conducted by faculty members and admissions personnel.

**Transfer Credit:** Students transferring from other podiatric medical schools should expect to lose a year because of differences in curriculum. Podiatric-specific courses at TUSPM begin with the first-year curriculum.

## Program Requirements

### General Program Requirements:

*Number of Credits Required:* 196.15

*Required Courses:*

Code	Title	Credit Hours
<b>Year 1</b>		
PBMS P100	Histology	6.25
PBMS P102	General Anatomy	7
PBMS P103	Lower Extremity Anatomy	7.7
PBMS P104	Neurophysiology	2.5
PBMS P105	Neuroanatomy	2
PBMS P109	Biomechanics	2
PBMS P110	Biochemistry	6
PBMS P111	Physiology	5
PBMS P120	Microbiology	6.8
PDMD P130	Fundmntl of Podiatric Pract I	3.5
PDOR P142	Physical Medicine and Rehabilitation	2

### Year 2

PBMS P210	Pharmacology	5.25
PBMS P221	Pathology	9
PBMS P222	Pathophysiology	3
PDMD P200	Fundmntl of Podiatric Pract II	2.7
PDMD P215	Internal Medicine	3
PDMD P230	Fundamentals of Dermatology	2.2
PDMD P236	Foot and Ankle Radiology	2.6
PDMD P237	Vascular Disease	2
PDMD P239	Infectious Disease	1
PDMD P336	Neurology	1.6
PDOR P240	Pathomechanics	2
PDOR P241	Casting	1
PDOR P243	Clinic Foot Orthopedics	1.8
PDOR P248	Sports Medicine	2
PDSR P250	Principles of Podiatric Surgery I	2.8
PDSR P252	Principles of Podiatric Surgery II	2.5
PDSR P253	O R Protocol	1
PDSR P257	Podiatric Surgical Skills	2.4

### Year 3

PCED P381	Intro Clerkship Clinical Pod I	13.5
PCED P384	Clerkship Clinical Podiatry I	4.5
PCED P385	Clerkship Clinical Podiatry II	4.5
PCED P386	Clerkship Clinical Podiatry III	4.5
PCHA P360	Community Health	2
PCHA P361	Law & Podiatric Medicine	1.8
PCHA P362	Professional Administration and Development	2
PDOR P340	General Orthopedics	2
PDOR P342	Pediatric Foot Orthopedics	1.8
PDOR P346	Traumatology	1.75
PDSR P352	Princ First Ray Surgery	2.6
PDSR P353	Reconstruct Surgery Foot & Leg	2.6
Select one from the following:		4.5

PCED P387 Medical Elective

PDMD P334 Clerkship Internal Medicine

Select one from the following: 4.5

PDMD P331 Clerkship Clinical Neurology

PDMD P332 Clerkship Periph Vascular Dis

PDMD P334 Clerkship Internal Medicine (may be taken twice for credit)

PDMD P338 Clerkship Infectious Disease

PDOR P341 Clrkshp Gen Orthopedics

### Year 4

PCED P431	Clerkship Clinical Podiatry IV	4.5
PCED P432	Clerkship Clinical Podiatry V	4.5
PCED P440	Community Clerkship	4.5
PCED P441	External Podiatric Clerkship I	4.5
PCED P442	External Podiatric Clerkship II	4.5
PCED P443	External Podiatric Clerkship III	4.5
PCED P444	External Podiatric Clerkship IV	4.5
PCED P446	External Podiatric Clerkship V	4.5
Select one from the following:		4.5

PCED P443 External Podiatric Clerkship III

PCED P447	External Podiatric Clerkship VI	
Select one from the following:		4.5
PCED P410	Clerkship in General Orthopedics (cannot be taken in addition to PDOR P341)	
PDMD P421	Clerkship Clinical Neurology (cannot be taken in addition to PDMD P331)	
PDMD P421	Clerkship Clinical Neurology (may be taken after PDMD P334 and/or PCED P387, and must be selected if PDMD P334 or PCED P387 has not already been completed)	
PDMD P428	Clerkship Infectious Disease (cannot be taken in addition to PDMD P338)	
PDMD P445	Clerkship in Peripheral Vascular Disease (cannot be taken in addition to PDMD P332)	
<b>Total Credit Hours</b>		<b>196.15</b>

## College of Public Health

The College of Public Health is a global leader in the discovery, dissemination and integration of health-related research and practice. We prepare future generations of professionals through an intellectual environment that incorporates interdisciplinary collaboration, critical thinking and innovation to instill a commitment to ethical practice and lifelong learning. Exemplary research, teaching and service are informed by our engagement with professional and community, regional, national and global partners.

The College of Public Health engages in exciting, innovative research and supports talented, committed researchers. Investigations focus on medical interventions, social and behavioral inquiries, and animal and basic science. Inquiries are frequently interdisciplinary, crossing departmental and collegial lines, and draw on resources from across the University. The college's research mission entails:

- increasing faculty productivity in grants and published research;
- encouraging faculty to seek research funds creatively from such non-governmental sources as corporations and foundations;
- promoting collaborative research;
- developing a research infrastructure supported by best practices and outstanding staff;
- creating students' awareness of faculty research and opportunities for research assistantships;
- providing research opportunities for students; and
- ensuring sufficient support to train faculty, students, administrators and staff in the uses of new technologies.

The College of Public Health is also committed to excellence in fieldwork and clinical education. We believe that academic preparation must be complemented with a well-designed and mentored real-world experience that transforms classroom and laboratory learning into a dynamic, field-based demonstration of professional attitudes, skills and abilities. Our students benefit from the college's location in a metropolitan area filled with diverse and highly regarded healthcare, human services and other non-medical agencies promoting health of individuals and communities. Our network of partnering agencies includes top-rated hospitals and rehabilitation centers, wellness clinics, state and federal government agencies, public and private schools, community health and human services agencies, research centers and private practice offices. Field/clinical education can also begin on campus at clinics and research centers operated by departments in the College of Public Health, through placements with intercollegiate athletics, and at Temple University Hospital. To learn more about the integral role of clinical and field education in the College of Public Health, click to explore your area of interest:

- Athletic Training MSAT Clinical Education
- Epidemiology MPH Field Education
- Health Policy and Management MPH Field Education
- Nursing DNP Clinical Education
- Nutrition MPH Field Education
- Physical Therapy DPT Clinical Education
- Social and Behavioral Sciences MPH Field Education
- Social Work MSW Clinical Education
- Speech, Language and Hearing Science MA Clinical Education

As noted, graduate students in many of the College of Public Health's degree programs engage in required clinical/field education experiences at facilities both on and off the University's campuses. Many of these placements may require the student to have personal health insurance. Additionally, many require a criminal background check, Act 33/34 clearances, and perhaps a drug screen. Failure to maintain personal health insurance or the results of background clearances may limit and potentially eliminate placement options for students. This, in turn, can result in an inability to meet graduation requirements. The college cannot ensure clinical field placements if a student fails to meet the requirements or maintain health insurance. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent a student from becoming credentialed and/or licensed to practice in certain professions. Applicants are encouraged to review the requirements for the particular program in which they are interested, as well as the licensure/credentialing rules in the state(s) in which they are interested in working to review their eligibility.

In Fall 2015, the College of Public Health introduced a common College Core course requirement for all incoming graduate students. The course, HRPR 5001 Current and Emerging Issues in Public Health and Health Professions, is completely online and designed such that students can complete the modules at their own pace over the course of their degree program. Tuition is not charged for the course since it carries no credit. However, it is a required pass/fail course, and students will not be eligible for graduation unless the course is completed. The course requires graduate students to complete a set of six learning modules that address core elements of health, including guiding principles, practices and guidelines. Students then have the option to select an additional six modules from a menu of modules. Each module includes a video presentation, PowerPoint slides, additional resources and a short quiz. A minimum grade of 80% on each module is required to pass the course. Program directors and faculty advisors work closely with students to explain the modules, discuss appropriate timing for their completion, and monitor progress toward completion before graduation.

**Beginning in Fall 2020, all incoming students in the College of Public Health are required to have a laptop.** Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

Ultimately, the goal of our diverse population of students and highly recognized faculty is to enhance the quality of life for all.

## Graduate Programs and Certificates

- Applied Biostatistics MPH (p. 789)
- Applied Physical Activity and Health Promotion MS (p. 792)
- Athletic Training MSAT (p. 792)
- Athletic Training DAT (p. 795)
- Communication Sciences and Disorders PhD (p. 797)

- Environmental Health MPH (p. 799)
- Environmental Health MS (p. 802)
- Epidemiology MPH (p. 803)
- Epidemiology MS (p. 806)
- Epidemiology PhD (p. 808)
- Health Informatics MS (p. 813)
- Health Informatics PhD (p. 816)
- Health Policy and Health Services Research PhD (p. 820)
- Health Policy and Management MPH (p. 824)
- Neuromotor Science MS (p. 828)
- Neuromotor Science PhD (p. 830)
- Nursing DNP (p. 833)
- Nutrition MPH (p. 837)

- Recreational Therapy MS (p. 850)
- Social and Behavioral Sciences MPH (p. 853)
- Social and Behavioral Sciences PhD (p. 857)
- Social Work MSW (p. 861)
- Speech, Language and Hearing Science MA (p. 865)
- Graduate Certificate: Clinical Health Services Research (p. 870)
- Graduate Certificate: Global Health (p. 871)
- Graduate Certificate: Health Informatics (p. 872)
- Graduate Certificate: Interdisciplinary Health Communication (p. 873)
- Graduate Certificate: Maternal and Child Health (p. 875)
- Graduate Certificate: Nutrition (p. 876)
- Graduate Certificate: Public Health Law Research (p. 877)
- Graduate Certificate: Public Health Preparedness and Response (p. 878)

## Graduate Faculty

*William Aaronson III*, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Temple University.

*Sarah Bauerle Bass*, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Temple University.

*Lisa M. Bedore*, Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Purdue University.

*Janet P. Bettger*, Professor, Department of Health and Rehabilitation Sciences, College of Public Health; ScD, Boston University.

*Bradley N. Collins*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, State University of New York at Binghamton.

*Melissa Dichter*, Associate Professor, Department of Social Work, College of Public Health; PhD, University of Pennsylvania.

*Susan B. Dickey*, Associate Professor, Department of Nursing, College of Public Health; PhD, University of Pennsylvania.

*Jeffrey N. Draine*, Professor, Department of Social Work, College of Public Health; PhD, University of Pennsylvania.

*Levent Dumenci*, Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Iowa State University.

*Karin Eyrich-Garg*, Associate Professor, Department of Social Work, College of Public Health; PhD, Washington University in St. Louis.

*Jay S. Fagan*, Professor Emeritus, Department of Social Work, College of Public Health; PhD, Columbia University.

*Jennifer Orlet Fisher*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, The Pennsylvania State University.

*Heather M. Gardiner*, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, State University of New York at Buffalo.

*Matthew Hall*, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of California San Diego.

*Inkyu Han*, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Rutgers, The State University of New Jersey.

*Chantelle Hart*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Case Western Reserve University.

*Elizabeth Heller Murray*, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Boston University.

*Shivayogi V. Hiremath*, Assistant Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of Pittsburgh.

*Ilene L. Hollin*, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Johns Hopkins University.

*Cheryl A. Hyde*, Associate Professor, Department of Social Work, College of Public Health; PhD, University of Michigan.

*Jennifer K. Ibrahim*, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, University of California Berkeley.

*Laura Johnson*, Assistant Professor, Department of Social Work, College of Public Health; PhD, Rutgers, The State University of New Jersey.

*Resa M. Jones*, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, University of Minnesota.

*Emily Keshner*, Professor Emerita, Department of Health and Rehabilitation Sciences, College of Public Health; EdD, Columbia University.

*Julia Kobulsky*, Assistant Professor, Department of Social Work, College of Public Health; PhD, Case Western Reserve University.

*Erin R. Kulick*, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Columbia University.

*Stephen J. Lepore*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of California Irvine.

*Edwin Maas*, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, San Diego State University.

*Nadine Martin*, Laura H. Carnell Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Temple University.

*Philip McCallion*, Professor, Department of Social Work, College of Public Health; PhD, University at Albany, State University of New York.

*Bryan P. McCormick*, Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Clemson University.

*Gabriella M. McLoughlin*, Assistant Professor, Department of Kinesiology, College of Public Health; PhD, University of Illinois at Urbana-Champaign.

*Elizabeth A. Pfeiffer*, Associate Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Nova Southeastern University.

*James J. Reilly*, Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of Pennsylvania.

*Nancy L. Rothman*, Professor, Department of Nursing, College of Public Health; EdD, Temple University.

*Mark Salzer*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Illinois at Urbana-Champaign.

*David B. Sarwer*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Loyola University Chicago.

*Krista Schroeder*, Assistant Professor, Department of Nursing, College of Public Health; PhD, Columbia University.

*Brittany Schuler*, Assistant Professor, Department of Social Work, College of Public Health; PhD, University of Maryland Baltimore.

*Jing Shen*, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of California San Diego.

*Laura Siminoff*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Johns Hopkins University.

*Gretchen A. Snethen*, Associate Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Indiana University.

*Mark Stoutenberg*, Associate Professor, Department of Kinesiology, College of Public Health; PhD, University of Miami.

*Chang Su*, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Xi'an Jiaotong University.

*Gabriel Tajeu*, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; DrPH, University of Alabama at Birmingham.

*Elizabeth Thomas*, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Nebraska-Lincoln.

*Christopher Thompson*, Assistant Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of Illinois.

*Gina Tripicchio*, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of North Carolina at Chapel Hill.

*Elizabeth Van Nostrand*, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; JD, Tulane University.

*Carolina Villamil Grest*, Assistant Professor, Department of Social Work, College of Public Health; PhD, University of Southern California.

*Christopher Wheldon*, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of South Florida.

*Robin T. Wilson*, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, University of Iowa.

*W. Geoffrey Wright*, Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Brandeis University.

*Huanmei Wu*, Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Northeastern University.

*Recai Yucel*, Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, The Pennsylvania State University.

*Yaara Zisman-Ilani*, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Haifa.

## Applied Biostatistics MPH

### COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Public Health in Applied Biostatistics.

### About the Program

The Master of Public Health in Applied Biostatistics is a unique and newly developed degree that responds to the growing need for master's-trained professionals with expertise in advanced biostatistical methods. The program is designed to train professionals in the field of public health who have a clear understanding of and expertise in the use, statistical application and interpretation of large and complex data sets; of the critical importance of valid study designs and analytic methods; and of the application of hypothesis-based development and statistical programming and testing.

Students complete their studies with the fundamental critical thinking skills and statistical/programming competencies necessary for public health practice related to Applied Biostatistics in accordance with Council on Education for Public Health (CEPH) standards. Applied Biostatistics courses address topics such as database coding and development; environmental surveillance; multivariate biostatistics, including the use of regression models and multifactorial analysis; research design; and risk assessment and statistical analysis in human disease. Students in the Applied Biostatistics program are trained in the MPH core competencies

while gaining skills to use and apply multiple statistical program packages, including SAS and R; to develop appropriate study designs based on appropriate research questions; and to interpret and present study results to various audiences. Thus, the MPH in Applied Biostatistics at Temple University is particularly poised to foster interdisciplinary research and train students to work in an interdisciplinary environment.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students can complete the degree program through evening classes and online courses. Full-time students usually complete the program within two academic years. Part-time students usually take three to four years to complete their degree.

**Interdisciplinary Study:** Interdisciplinary MPH coursework, research and interactions with students and faculty in other departments are encouraged to give students as broad a perspective as possible so as to excel in the complex, diverse and dynamic arena of public health. Through associations with the Center for Obesity Research and Education, Center for Women's Health, and others, students have access to over 100 faculty at Temple University and additional regional scholars who are actively involved in programs, research and teaching in public health. Further, as with other MPH degree programs offered by the College of Public Health, the MPH in Applied Biostatistics can be undertaken as part of these dual MPH degree programs:

- DMD/MPH with Temple University's Kornberg School of Dentistry
- JD/MPH with Temple University's Beasley School of Law
- MD/MPH with the Lewis Katz School of Medicine at Temple University
- MHA/MPH with Temple University's Fox School of Business and Management
- MPP/MPH with Temple University's College of Liberal Arts
- MS Health Informatics/MPH within the Temple University College of Public Health
- MSW/MPH with the Temple University School of Social Work

For more information, visit <https://www.temple.edu/academics/dual-degree-programs>.

**Affiliation(s):** Locally, the program has long-standing research affiliations with The Food Trust, Fox Chase Cancer Center, Health Federation of Philadelphia, Philadelphia Department of Public Health, Public Health Management Corporation (PHMC), School District of Philadelphia, Temple University Health System, and numerous other community health agencies. These partnerships allow us to offer students a wide range of fieldwork opportunities to translate skills learned in the classroom to actual practice in the community.

**Study Abroad:** Short-term intensive study abroad courses are offered as part of the MPH program of study. These courses are offered during the Summer and are open to both undergraduate and graduate students.

**Accreditation:** The MPH is fully accredited by the Council on Education for Public Health (CEPH). Achieving accreditation in 1985, Temple's MPH program is one of the longest established accredited MPH programs in community health in the country.

**Areas of Specialization:** The MPH degree program is offered in six specialty fields of study:

- Applied Biostatistics (APBIO)
- Environmental Health (EH)
- Epidemiology (EPI)
- Health Policy and Management (HPM)
- Nutrition (NUTR)
- Social and Behavioral Sciences (SBS)

Students in the MPH program may complete transcripted College of Public Health certificate programs by taking their 9 credits of electives in the relevant coursework. For questions about certificates, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Job Prospects:** Graduates with an MPH in Applied Biostatistics are employed in research institutions, such as universities and medical centers; at government agencies at the federal level, such as the Centers for Disease Control and Prevention, as well as local and state governments; and in private industry, including pharmaceutical firms, in positions such as research associates and statisticians.

**Licensure/Certification:** Students who complete an MPH at Temple University are eligible to sit for the Certified in Public Health (CPH) exam offered by the National Board of Public Health Examiners and the Certified Health Education Specialist (CHES®) exam offered by the National Commission for Health Education Credentialing, Inc. (NCHEC). For more information about credentialing in public health, visit <https://www.nche.org/>.

**Non-Matriculated Student Policy:** Non-matriculated students are required to speak with an advisor before registering for classes and to obtain the permission of the professor. If accepted to the program, a maximum of three courses (9 credits) may be applied toward the degree program. Exceptions to this policy relate to formal certificate programs.

**Financing Opportunities:** The Graduate School awards fellowships on a competitive basis only to students with outstanding academic records who are admitted to Temple University for the Fall term. Applicants who wish to be considered for fellowships must apply no later than January 26 for consideration for the Fall term. The Admissions Committee of the Department of Epidemiology and Biostatistics nominates outstanding students for these awards, but the Graduate Board's Fellowship Committee makes all award decisions.

Limited Teaching and Research Assistantships are available in the College of Public Health. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Students whose Fall applications are complete prior to or at the application deadline are reviewed for eligibility for Teaching Assistant (TA) positions. TAs are required to work 20 hours per week in any combination of teaching assignments made by the department and must meet the English Language Proficiency standards set by the University and the College. Students who hold Teaching or Research Assistantships are not permitted to hold other employment without the written prior approval of their advisor, the Director of Graduate Programs, and the Graduate School. To be considered for a Teaching or Research Assistantship, complete an application form that is sent to students upon admission to the MPH program. The completed application must be returned to [publichealth@temple.edu](mailto:publichealth@temple.edu) to be considered.

The College of Public Health has a limited number of scholarship opportunities available for MPH students, as shown at <https://cph.temple.edu/admissions/scholarships>. Students may also be eligible for financial support through the Office of Student Financial Services.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

All applicants to the MPH program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with academic competence. If the applicant has been out of school for more than 5 years, ensure that letters are provided by professional colleagues who can discuss your relevant academic skills, including critical thinking, research and writing.

**Coursework Required for Admission Consideration:** Applicants' files are reviewed for undergraduate coursework in mathematics and/or statistics, social sciences and writing.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0. No prerequisites must be met to apply to the MPH program at Temple University, but strong grades in mathematics and/or statistics, social sciences and writing are preferred.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** Write a well-considered 500- to 1,000-word statement of purpose that articulates your interests in public health and our program in particular. Craft your statement to specifically address the following questions:

- Why are you pursuing the MPH in Applied Biostatistics, and what are your particular areas of interest in public health?
- How does the MPH in Applied Biostatistics best fit your public health interests?
- What are your career goals, and how will this degree help you to achieve these goals?
- What are your plans in the first few years after graduation?

### Standardized Test Scores:

GRE: Optional. While the program takes a portfolio approach to admissions, standardized tests provide important insight into quantitative and verbal abilities. If submitted, scores above the 50th percentile on both the verbal and quantitative sections of the test are desired. Official GRE scores should be sent to SOPHAS using code 0151. If GRE scores are not submitted, it is recommended that the applicant's GPA is 3.25 or greater in mathematics and statistics courses. This provides important information on the applicant's quantitative abilities required for the program. Applications that do not include GRE scores and do not meet the mathematics/statistics GPA must provide some evidence

of quantitative abilities either through prior experiences, the personal statement and/or letters of recommendation.

Standardized tests considered in lieu of the GRE include DAT, GMAT, MCAT, OAT and PCAT. The LSAT, which is also considered for some MPH specialties, is not accepted when applying for Applied Biostatistics or Epidemiology.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an MPH program accredited by the Council on Education for Public Health (CEPH) may be transferred into the MPH. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The MPH program director approves the transfer of credits based on a review of course materials provided by the student. The maximum number of credits a student may transfer is 9.

**Clearances:** The MPH program requires students to complete fieldwork education. In the MPH program, it is the fieldwork site that determines the clearances, such as criminal background check and FBI fingerprinting, needed by a student. The results of these clearances determine whether a student may be onboarded at a respective site.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 42

*Required Courses:*

Code	Title	Credit Hours
<b>College Core Course</b>		
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions	0
<b>Public Health Core Courses</b>		
ENVH 5004	Environmental Health	1.5
EPBI 5006	Biostatistics and Applied Analysis of Health	4.5

<b>Total Credit Hours</b>		<b>42</b>

1

Courses not taken to fulfill the Applied Biostatistics elective above may be selected to fulfill one or both of these general electives.

2

Other electives may be selected with approval.

**Minimum Grade to be Earned for All Required Courses: B-**

#### **Culminating Events:**

##### *Fieldwork Practicum:*

Students are required to synthesize and integrate the knowledge acquired in coursework and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice through an internship or practicum experience with a public health agency, health services organization, or under the supervision of a faculty preceptor. The MPH fieldwork experience serves as the applied practice experience as required by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health, for completion of the Master of Public Health degree. In addition, this applied practice experience provides the student with the opportunity to develop expertise in a topic area and to contribute original and independent observations to a body of knowledge.

Part-time fieldwork experiences are available for students who work full-time.

#### *Evaluative Paper:*

For the applied practice experience to fulfill the requirements of EPBI 9289 and EPBI 9389, MPH in Applied Biostatistics students are expected to complete a fieldwork experience. The required deliverable for the MPH fieldwork requirement is a final evaluative paper. Students must demonstrate their proficiency and the application of theory and principles in the paper.

## **Applied Physical Activity and Health Promotion MS**

COLLEGE OF PUBLIC HEALTH

### **About the Program**

This program is not accepting applications for the 2023-2024 academic year.

## **Athletic Training MSAT**

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Science in Athletic Training.

## About the Program

The Master of Science in Athletic Training (MSAT) degree is accredited by the Commission on the Accreditation of Athletic Training and prepares students to become certified athletic trainers who are at the forefront of clinical practice and education. This degree program was designed in response to the decision by the Commission on Accreditation of Athletic Training Education (CAATE), the Board of Certification, and the National Athletic Trainers' Association to transition to an entry-level master's degree as a requirement for certification eligibility. These groups all recognize the increasing scope of practice for athletic trainers.

Temple University established the professional MSAT degree as it phased out the BSAT. As a leader in the education of future and current certified athletic trainers for more than 30 years, Temple secured its position by implementing a program in 2016, ahead of the curve, given that the master's degree was not required until 2022. Temple's geographical location, access to quality field experiences, alumni network, cutting-edge healthcare research, and dedicated faculty provide a unique and competitive educational experience.

Students graduating from the MSAT program are able to:

- clinically apply the foundational behaviors of professional practice;
- demonstrate knowledge and competency within the content areas of athletic training;
- serve as leaders and advocates to enhance clinical and patient outcomes;
- practice with cultural competence and professional integrity;
- advance the athletic training profession;
- effectively communicate with peer healthcare professionals, patients and athletic program administrators; and
- apply evidence-based decision-making to clinical practice to increase patient outcomes and satisfaction.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students are expected to complete their two years of coursework on a full-time basis.

**Interdisciplinary Study:** Interdisciplinary study is available within the department and through other departments in the University.

**Ranking:** While rankings of individual programs and the department are not conducted in the profession, the programs at Temple University have excellent reputations.

**Accreditation:** The MSAT degree program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

**Areas of Specialization:** The Athletic Training Practice Domains, as identified by the Board of Certification, encompass five main areas:

1. Injury/illness prevention and wellness promotion
2. Examination, assessment and diagnosis
3. Immediate and emergency care
4. Therapeutic intervention
5. Healthcare administration and professional responsibility

As a result of the uniqueness of Temple University's College of Public Health and its research areas, areas of distinctiveness also include:

- Advanced concussion education
- Evidence-based practice components

**Job Prospects:** Graduates are prepared to work as entry-level clinical certified athletic trainers in various traditional settings (e.g., high schools, universities, clinics, hospitals); to apply for advanced research-based education (e.g., PhD) or clinical education (e.g., DAT); or to practice in an emerging area (e.g., dance, military).

**Licensure/Certification:** Graduates of the MSAT degree program are eligible to take the Board of Certification examination to become a certified athletic trainer. For more information on the certification process, see <https://www.bocac.org/>. For more information about state regulatory processes, see <https://members.nata.org/gov/state/regulatory-boards/map.cfm>.

**Non-Matriculated Student Policy:** Non-matriculated students are welcome to take classes in the department, assuming they have the requisite knowledge to be successful in the coursework.

**Financing Opportunities:** For information on financial aid, contact the Office of Student Financial Services at [sfs@temple.edu](mailto:sfs@temple.edu) or 215-204-2244.

## Admission Requirements and Deadlines

### Application Deadline:

*Summer II:* June 1

All applicants to the MSAT program must apply via the Athletic Training Centralized Application Service (ATCAS). The system can be accessed at <https://atcas.liasoncas.com/>.

### Letters of Reference:

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from evaluators, typically college/university faculty or an immediate work supervisor, who can provide insight into the applicant's aptitude for graduate study. These should be submitted at <https://atcas.liasoncas.com/>.

**Coursework Required for Admission Consideration:** Required coursework includes:

- Biology
- Chemistry
- Exercise Physiology
- General or Sport Psychology
- Human Anatomy and Physiology (8 credits)
- Nutrition
- Physics
- Statistics

Prerequisites are not required to have been taken while an undergraduate. The courses may be completed at a local community college or any accredited institution of higher education. Prerequisites may be in progress at the time of the initial application, but must be completed and verified on one's ATCAS application by June 1 of the year

for which application is made. Questions regarding prerequisite work should be directed to the Program Director.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of a baccalaureate degree.

**Statement of Goals:** A statement of one to two pages should be clearly written and well-thought-out. It should be submitted at <https://atcas.liaisoncas.com/>.

**Standardized Test Scores:**

GRE: Optional. If submitted, scores must be sent directly to ATCAS.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** A current resume that includes the applicant's undergraduate GPA and any relevant clinical and/or research experiences, if applicable, is required to be submitted at <https://atcas.liaisoncas.com/>.

**Interview:** Selected applicants are invited to interview via video chat at a mutually convenient time for the faculty interviewer(s) and the applicant.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** At the discretion of the Program Director, relevant graduate courses taken at other accredited universities may be considered for transfer credit to the student's program. The maximum number of credits a student may transfer is 6.

**Clearances:** The Athletic Training MSAT program requires students to complete clinical/field education experiences at facilities both on and off Temple University's campuses. These placements require students to have a physical exam, immunizations with titers, and a PPD test. Many placements also require criminal background checks, Act 33/34 clearances, and perhaps a drug screen. Students may also be required to maintain personal health insurance. The results of these requirements may limit and potentially eliminate placement options for the student, thus resulting in their inability to meet graduation requirements. The College cannot ensure clinical field placements if the individual fails to meet the requirements or maintain health insurance. Additionally, conviction of a

misdemeanor, felony, or felonious or illegal act may prevent the student from becoming certified to practice athletic training.

**Other:** Students must submit the following items in preparation for the Fall practicum courses after admission to the program but prior to August 1:

- Emergency Cardiac Care Certification
- FBI Fingerprint Check
- PA Criminal Background Check
- PA Department of Public Welfare Child Abuse Clearance
- Proof of Physical Examination, including blood titers/boosters where applicable
- PPD Skin Test for Tuberculosis Exposure

2

ATHT 5888 is scheduled to be taken in August in the Fall "Early Term Start" academic period. See the official academic calendar on the Office of the University Registrar website.

3

ATHT 5808 is scheduled to be taken midterm of the Spring term in the 7-week "7B" academic period. To determine the first day of class, see the official academic calendar on the Office of the University Registrar website.

4

ATHT 5888 is scheduled to be taken December to January in the Spring "Early Term Start" academic period. See the official academic calendar on the Office of the University Registrar website.

5

ATHT 5988 is scheduled to be taken at the start of the regular Spring term in the 7-week "7A" academic period.

**Minimum Grade to be Earned for All Required Courses: B-**

### Culminating Event:

#### *Fieldwork Practica:*

Students in the MSAT program are assigned by the program to a clinical education site and preceptor (i.e., a certified athletic trainer or physician who has successfully completed preceptor training offered by program faculty) each Fall and Spring academic term. Affiliation agreements with over 30 clinical education sites and 60 approved clinical preceptors currently are in place. Immersive clinical education experiences may also be completed outside of the Greater Philadelphia region.

## Athletic Training DAT

COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Athletic Training.

## About the Program

The Doctor of Athletic Training (DAT) program is offered online by the Department of Health and Rehabilitation Sciences in the College of Public Health at Temple University, which has been a leader in athletic training education for more than 30 years. Establishing the DAT keeps Temple University ahead of the curve in athletic training education as the master's becomes the entry-level degree in 2022.

Offering the DAT online increases student access to a unique and innovative world-class graduate education. The combination of outstanding faculty, administrative support, and online instructional resources allows Temple University to provide an excellent education to an ever-growing market of students seeking quality graduate education. Students seek advising and complete or update advising contracts with the Program Director. Faculty work closely with students to select courses, develop an evidence-based project question, and complete the capstone project.

The DAT is geared toward advancing clinical knowledge of currently practicing certified athletic trainers. The program is designed to enhance clinical decision-making by allowing the practicing certified athletic trainer to utilize evidence-based techniques, including the identification and interpretation of current literature to improve patient outcomes. Delivering the program exclusively online allows a greater audience to be reached and collaboration with people from diverse backgrounds and with varied experiences to occur.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Online

**Full-Time/Part-Time Status:** While not recommended, the degree program can be completed on a part-time basis. This must be approved by the Program Director.

**Ranking:** While rankings of individual programs and the department are not conducted in the profession, the programs at Temple University have excellent reputations.

**Job Prospects:** As of 2021, the U.S. Bureau of Labor Statistics projects a 17% growth in athletic training until 2031, which is above the standard workforce demand rate.

**Licensure/Certification:** Applicants for and graduates of the DAT program must be certified athletic trainers. This program does not allow for students to take the Board of Certification exam. Applicants interested in becoming a certified athletic trainer should consider Temple's accredited Master of Science in Athletic Training (MSAT) program.

**Non-Matriculated Student Policy:** DAT coursework is available only to matriculated students.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* July 1

All applicants to the DAT program must apply via SOPHAS Express. The system can be accessed at <https://sophasexpress.liaisoncas.com/>.

**Letters of Reference:**

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from evaluators, typically college/university faculty or immediate work supervisor, who can provide insight into the applicant's aptitude for graduate study. These should be submitted at SOPHAS Express.

**Coursework Required for Admission Consideration:** All applicants must be certified athletic trainers via the procedures specified by the Board of Certification.

**Master's Degree in Discipline/Related Discipline:** A master's degree is required.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of a baccalaureate degree.

**Statement of Goals:** A statement of one to two pages should be clearly written and well-thought-out. It should be submitted at SOPHAS Express.

**Standardized Test Scores:**

GRE: Optional, although applicants who believe GRE scores would complement their application are encouraged to submit scores to SOPHAS Express using code 0151.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS Express using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** A current resume that includes the applicant's GPA and relevant clinical and research experiences is required to be submitted at SOPHAS Express.

**Interview:** Selected applicants are invited to interview via video chat at a mutually convenient time for the faculty interviewer(s) and the applicant.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Communication Sciences and Disorders PhD**

COLLEGE OF PUBLIC HEALTH

Learn more about the Doctor of Philosophy in Communication Sciences and Disorders.

**About the Program**

The PhD program in Communication Sciences and Disorders seeks to bring students to a level of education at which they may participate as scholars in the discipline. It is the program's objective to provide doctoral students with a base of information sufficiently broad that they understand the range of their discipline, yet deep enough in a chosen area of specialization to enable them to comfortably assume positions of leadership. The program emphasizes education in specific methods of research, appropriate to the student's area of specialization, reaching a level at which the graduate will be able to make original and valuable contributions to the knowledge of the field. A final objective is to infuse students with the spirit of scientific inquiry and wisdom in the methods and philosophy of science to place their own contributions, and the contributions of others, in a proper perspective with regard to theoretical and philosophical positions and trends. It is anticipated that graduates will contribute to the discipline as leaders and exemplars in the areas of teaching, research, administration and clinical services.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program may be completed on a full- or part-time basis.

**Interdisciplinary Study:** Students often take elective coursework outside the department in disciplines such as biostatistics, education and psychology.

**Affiliation(s):** Cooperative efforts have been established with Temple University Hospital and Lewis Katz School of Medicine, the Camden School District, MossRehab, and the School District of Philadelphia.

**Areas of Specialization:** Areas of concentration are Speech-Language Pathology with emphases in adult language disorders, child language and literacy development and disorders, and motor speech.

**Job Prospects:** Graduates are prepared for careers in universities and research institutions.

**Non-Matriculated Student Policy:** Departmental permission is required for registration in graduate classes. A maximum of 9 credits earned as a non-matriculated student may be applied toward the degree.

**Financing Opportunities:** Research and Teaching Assistantships may be available. Preference will be given to students who have already earned a graduate-level degree and who elect to attend full-time. Contact the Department of Communication Sciences and Disorders to inquire.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* December 15

All applicants to the PhD program in Communication Sciences and Disorders must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation should be obtained from professors, employers or colleagues who are able to evaluate the applicant's research potential. One letter must be from a previous professor, advisor or research supervisor.

**Coursework Required for Admission Consideration:** Applicants must demonstrate coursework taken in statistics and probability.

**Master's Degree in Discipline/Related Discipline:** A master's degree is not required.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Communication Disorders, Education, Linguistics or Psychology is required.

**Statement of Goals:** In approximately 500 to 1,000 words, address your background, academic and professional goals, and how your interests fit with the program.

### Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume required.

**Writing Sample:** A writing sample that is expository in nature, e.g., a chapter of a thesis, a convention paper, and/or a paper from senior undergraduate or master's level coursework, should be submitted.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Advanced Standing:** The student's advisor recommends advanced standing to the PhD Program Director based on a review of prior coursework and experience. Coursework taken as part of a degree program for which a degree has been conferred is not considered for advanced standing. The maximum number of advanced standing credits awarded is 6.

With approval from the PhD Program Director, students may select alternate courses as Statistics and Methodology electives.

3

With approval from the PhD Program Director, students may select alternate courses as Content Area electives.

**Minimum Grade to be Earned for All Required Courses: B-**

#### **Culminating Events:**

##### *Preliminary Examination:*

The preliminary examination is undertaken when the student has completed all other requirements for advancement to candidacy, but no later than the end of the third year of study. Specifically, students are expected to have produced at least two publishable manuscripts and completed all coursework prior to registering for the exam. Students should have successfully presented the first-year project and second-year evaluation.

The examination itself includes a written examination and an oral defense. The written examination consists of three to five questions developed by the student's committee and approved by the PhD Program Director and department chair. Students have two weeks to complete the written examination. At least one question addresses methodology and the other two are on distinct but related topics close to the student's area of research. Upon submission of the written examination, the student orally defends the written responses in a meeting of graduate faculty. At a minimum, the student's committee, the PhD Program Director, and department chair are present. The student must pass the preliminary examination in no more than two attempts. The Doctoral Advisory Committee evaluates the exam on a pass/fail basis. All judgments are by committee consensus.

##### *Proposal:*

The preliminary examination prepares students to write a data-driven dissertation proposal, which is a prospectus with literature review and proposed methodology. When the student has successfully defended the preliminary examination and submitted an approved prospectus, the student has ascended to doctoral candidacy.

##### *Dissertation:*

The dissertation is an original study that makes a significant and publishable contribution to the field. It should demonstrate a thorough

knowledge of the theoretical and empirical literature in the area of investigation. It should also be of sound and rigorous methodology. Original research of quality appropriate for publication in a first-tier national journal is expected.

Graduate School guidelines for announcing the defense are followed. Notice is given through postings, email and listserv announcements. The defense lasts two hours.

## **Environmental Health MPH**

### COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Public Health in Environmental Health.

### **About the Program**

Environmental factors and sustainable development are major determinants of health in individuals and communities. The Master of Public Health in Environmental Health is a professional degree that prepares students for practice-oriented careers in promoting and protecting public health by identifying and addressing environmental factors that may cause or contribute to disease, injury or other adverse health outcomes. Students in this program gain a comprehensive understanding of the relationships between human health and the natural and built environment, including topics such as air, water and soil quality; climate change; emerging environmental health threats; environmental justice; food safety; hazardous waste management;

occupational health; and sustainability. They also develop skills in epidemiology, exposure and risk assessment, policy analysis, as well as communication and advocacy. The program is grounded in the core MPH competencies and disciplines of public health, with an emphasis on examining environmental factors and policies that affect the public's health and sustainable environments of communities.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students can complete the degree program through evening classes and online courses. Full-time students usually complete the program within two academic years. Part-time students usually take three to four years to complete their degree.

**Interdisciplinary Study:** Interdisciplinary MPH coursework, research, and interactions with students and faculty in other departments are encouraged to give students as broad a perspective as possible to excel in the complex, diverse, and dynamic state of public health. Through associations with the Center for Obesity Research and Education, Center for Women's Health, and others, students have access to over 100 faculty at Temple University and additional regional scholars who are actively involved in programs, research, and teaching in public health. Further, as with the other four MPH degree programs offered by the College of Public Health, the MPH in Environmental Health can be undertaken as part of these dual MPH degree programs:

- DMD/MPH with Temple University's Kornberg School of Dentistry
- JD/MPH with Temple University's Beasley School of Law
- MD/MPH with the Lewis Katz School of Medicine at Temple University
- MHA/MPH with Temple University's Fox School of Business and Management
- MPP/MPH with Temple University's College of Liberal Arts
- MS Health Informatics/MPH within the Temple University College of Public Health
- MSW/MPH with the Temple University School of Social Work

For more information, visit <https://www.temple.edu/academics/dual-degree-programs>.

**Affiliation(s):** Locally, the program has long-standing research affiliations with The Food Trust, Fox Chase Cancer Center, Health Federation of Philadelphia, Philadelphia Department of Public Health, Public Health Management Corporation (PHMC), School District of Philadelphia, Temple University Health System, and numerous other community health agencies. These partnerships allow us to offer students a wide range of fieldwork opportunities to translate skills learned in the classroom to actual practice in the community.

**Study Abroad:** Short-term intensive study abroad courses are offered as part of the MPH program of study. These courses are offered during the Summer and are open to both undergraduate and graduate students.

**Accreditation:** The MPH is fully accredited by the Council on Education for Public Health (CEPH). Achieving accreditation in 1985, Temple's MPH program is one of the longest established accredited MPH programs in community health in the country.

**Areas of Specialization:** The MPH degree program is offered in six specialty fields of study:

- Applied Biostatistics (APBIO)
- Environmental Health (EH)
- Epidemiology (EPI)
- Health Policy and Management (HPM)
- Nutrition (NUTR)
- Social and Behavioral Sciences (SBS)

Students in the MPH program may complete transcripted College of Public Health certificate programs by taking their 9 credits of electives in the relevant coursework. For questions about certificates, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Job Prospects:** Graduates with an MPH in Environmental Health have positions in a wide range of health-related settings, including academia; consulting firms; government agencies at the local, state or federal level; healthcare sectors (e.g., hospitals, clinics); nonprofit organizations; and private industry. Graduates are employed as adjunct faculty, consultants, environmental health specialists, evaluation specialists, infection control coordinators, marketing specialists, prevention specialists, project directors, research directors, and senior health educators. Virtually all students are placed within three to six months of graduation.

**Licensure:** Students who complete an MPH at Temple University are eligible to sit for the Certified in Public Health (CPH) exam offered by the National Board of Public Health Examiners and the Certified Health Education Specialist (CHES®) exam offered by the National Commission for Health Education Credentialing, Inc. (NCHEC). For more information about credentialing in public health, visit <https://www.nchech.org/>.

**Non-Matriculated Student Policy:** Non-matriculated students are required to speak with an advisor before registering for classes and to obtain the permission of the professor, whether the coursework is taken in the on-campus or online format. If accepted to the program, a maximum of three courses (9 credits) may be applied toward the degree program. Exceptions to this policy relate to formal certificate programs. For more information, contact Natasha Benoit, Senior Academic Advisor, at [nbenoit@temple.edu](mailto:nbenoit@temple.edu).

**Financing Opportunities:** The Graduate School awards fellowships on a competitive basis only to students with outstanding academic records who are admitted to Temple University for the Fall term. Applicants who wish to be considered for fellowships must apply no later than January 26 for consideration for the Fall term. The Admissions Committee of the Department of Epidemiology and Biostatistics nominates outstanding students for these awards, and the Graduate Board's Fellowship Committee makes all award decisions.

Limited Teaching and Research Assistantships are available in the College of Public Health. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Students whose Fall applications are complete prior to or at the application deadline are reviewed for eligibility for Teaching Assistant (TA) positions. TAs can work 5 to 20 hours per week in any combination of teaching assignments made by the department and must meet the English Language Proficiency standards set by the University and the College. Students who hold Teaching or Research Assistantships are not permitted to hold other employment without the written prior approval of their advisor, the Director of Graduate Programs, and the Graduate School. To be considered for a Teaching or Research Assistantship, complete an application form that is sent to students upon admission to the MPH program. The completed application must be returned to [publichealth@temple.edu](mailto:publichealth@temple.edu) to be considered.

The College of Public Health has a limited number of scholarship opportunities available for MPH students, as shown at <https://cph.temple.edu/admissions/scholarships>. Students may also be eligible for financial support through the Office of Student Financial Services.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

All applicants to the MPH program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with academic competence. If the applicant has been out of school for more than 5 years, ensure that letters are provided by professional colleagues who can discuss your relevant academic skills, including critical thinking, research and writing.

**Coursework Required for Admission Consideration:** Applicants' files are reviewed for undergraduate coursework in mathematics and/or statistics, social sciences and writing.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0. No prerequisites must be met to apply to the MPH program at Temple University, but applicants with a GPA of 3.25 or greater in mathematics/statistics courses and strong grades in writing are preferred.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** Write a well-considered 500- to 1,000-word statement of purpose that articulates your interests in public health and our program in particular. Craft your statement to specifically address the following questions:

- Why are you pursuing the MPH in Environmental Health, and what are your particular areas of interest in public health?
- How does the MPH in Environmental Health best fit your public health interests?
- What are your career goals, and how will this degree help you to achieve these goals?
- What are your plans in the first few years after graduation?

### Standardized Test Scores:

GRE: Optional. While the program takes a portfolio approach to admissions, standardized tests provide important insight into quantitative and verbal abilities. If submitted, scores above the 50th percentile on both the verbal and quantitative sections of the test are desired. Official GRE scores should be sent to SOPHAS using code 0151. If GRE scores are not submitted, it is recommended that the applicant's GPA

is 3.25 or greater in mathematics and statistics courses. This provides important information on the applicant's quantitative abilities required for the program. Applications that do not include GRE scores and do not meet the mathematics/statistics GPA must provide some evidence of quantitative abilities either through prior experiences, the personal statement and/or letters of recommendation

Standardized tests considered in lieu of the GRE include DAT, GMAT, LSAT, MCAT, OAT, and PCAT.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an MPH program accredited by the Council on Education for Public Health (CEPH) may be transferred into the MPH. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The MPH program director approves the transfer of credits based on a review of course materials provided by the student. The maximum number of credits a student may transfer is 9.

**Clearances:** The MPH program requires students to complete fieldwork education. In the MPH program, it is the fieldwork site that determines the clearances, such as criminal background check and FBI fingerprinting, needed by a student. The results of these clearances determine whether a student may be onboarded at a respective site.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 42

*Required Courses:*

Code	Title	Credit Hours
<b>College Core Course</b>		
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions	0
<b>Public Health Core Courses</b>		
ENVH 5004	Environmental Health	1.5
EPBI 5006	Biostatistics and Applied Analysis of Health	4.5
EPBI 5201	Epidemiological Research Methods I	3
HPM 5006	Political and Economic Aspects of Health	3
SBS 5001	Fundamentals of Public Health	3
SBS 5002	Program Planning, Theory, and Practice	3
<b>Environmental Health Core Courses</b>		
ENVH 8016	Human Health Risk Analysis	3
ENVH 8207	Environmental Epidemiology	3
EPBI 8012	Multivariable Biostatistics	3
<b>Environmental Health Elective <sup>1</sup></b>		
Select one from the following:		3
ENVH 5013	Global Environmental Health	
ENVH 5309	Water, Sanitation and Public Health	
ENVH 8019	Environmental Policy and Regulation	
ENVH 8206		
ENVH 8306		
EPBI 5003	Spatial Analysis in Public Health	
<b>Electives <sup>2, 3</sup></b>		
Select two from the following:		6
ENVH 5013	Global Environmental Health	
ENVH 5309	Water, Sanitation and Public Health	
ENVH 8019	Environmental Policy and Regulation	
ENVH 8206		
ENVH 8306		
EPBI 5003	Spatial Analysis in Public Health	
EPBI 8204	Multilev Mod in Int Res	
EPBI 8213	Cancer Epidemiology	
<b>MPH Fieldwork Experience</b>		
ENVH 9289	MPH Fieldwork I	3
ENVH 9389	MPH Fieldwork II	3
<b>Total Credit Hours</b>		<b>42</b>

1

Other electives may be taken with approval.

2

Courses not taken to fulfill the Environmental Health Elective above may be selected to fulfill one or both of these general electives.

3

Other electives may be selected with approval.

**Minimum Grade to be Earned for All Required Courses: B-**

#### Culminating Events:

##### Fieldwork Practicum:

Students are required to synthesize and integrate the knowledge acquired in coursework and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice through an internship or practicum experience

with a public health agency, health services organization, or under the supervision of a faculty preceptor. The MPH fieldwork experience serves as the applied practice experience as required by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health, for completion of the Master of Public Health degree. In addition, this applied practice experience provides the student with the opportunity to develop expertise in a topic area and to contribute original and independent observations to a body of knowledge.

Part-time fieldwork experiences are available for students who work full-time.

#### Evaluative Paper:

For the applied practice experience to fulfill the requirements of ENVH 9289 and ENVH 9389, MPH in Environmental Health students are expected to complete a fieldwork experience. The required deliverable for the MPH fieldwork requirement is a final evaluative paper. Students must demonstrate their proficiency and the application of theory and principles in the paper.

## Environmental Health MS

COLLEGE OF PUBLIC HEALTH

## About the Program

This program is not accepting applications for the 2023-2024 academic year.

## Epidemiology MPH

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Public Health in Epidemiology.

### About the Program

The Master of Public Health in Epidemiology is a professional degree program for students who desire fundamental and applied training in the public health sciences with a focus on epidemiological study design, disease surveillance methods, bioethics of population-based research, and core biostatistical methods. This practice-oriented program prepares students to successfully work in public health and applied epidemiology agencies, including conducting disease surveillance within government public health agencies; directing community demonstration and clinical trials research; and evaluating and running screening programs and other preventative health services in the broad areas of public health practice and health policy. The program is grounded in the core MPH competencies and disciplines of public health with an emphasis on epidemiological techniques. It covers the application of epidemiological research methods with an emphasis on developing research and methodological skills and critically evaluating current epidemiological studies.

The Department of Epidemiology and Biostatistics also offers a small research-intensive MS in Epidemiology, which is a research-oriented degree intended for students who desire to learn the advanced concepts and methods of epidemiology and apply those concepts to a unique population-based study through the completion of a master's-level thesis project.

Applicants to the MPH in Epidemiology can choose between our on-campus and online programs, both of which adhere to the same competency-based curriculum and content. Only the delivery formats differ:

- The on-campus format is designed for students who prefer live interaction with instructors and fellow students, access to campus activities, and the opportunity to choose local Philadelphia fieldwork placements with the assistance of our fieldwork coordinator. Students can enroll full-time or part-time. While some courses may be offered online or in hybrid formats, most of the coursework is delivered in person over a full 16-week academic term during evening hours.
- The online format is designed for working professionals interested in completing their degree remotely with courses that include both synchronous classes held via Zoom and asynchronous activities. Students can enroll full-time or part-time. A fieldwork coordinator works with students to find appropriate placement in their preferred geographic location.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main for in-person instruction or Online

**Full-Time/Part-Time Status:** Students can complete the degree program through evening classes and online courses. Full-time students usually

complete the program within two academic years. Part-time students usually take three to four years to complete their degree.

**Interdisciplinary Study:** Interdisciplinary MPH coursework, research and interactions with students and faculty in other departments are encouraged to give students as broad a perspective as possible to excel in the complex, diverse and dynamic state of public health. Through associations with the Center for Obesity Research and Education, Center for Women's Health, and others, students have access to over 100 faculty at Temple University and additional regional scholars who are actively involved in programs, research and teaching in public health. Further, as with other MPH degree programs offered by the College of Public Health, the MPH in Epidemiology can be undertaken as part of these dual MPH degree programs:

- DMD/MPH with Temple University's Kornberg School of Dentistry
- JD/MPH with Temple University's Beasley School of Law
- MD/MPH with the Lewis Katz School of Medicine at Temple University
- MHA/MPH with Temple University's Fox School of Business and Management
- MPP/MPH with Temple University's College of Liberal Arts
- MS Health Informatics/MPH within the Temple University College of Public Health
- MSW/MPH with the Temple University School of Social Work

For more information, visit <https://www.temple.edu/academics/dual-degree-programs>.

**Affiliation(s):** Locally, the program has long-standing research affiliations with The Food Trust, Fox Chase Cancer Center, Health Federation of Philadelphia, Philadelphia Department of Public Health, Public Health Management Corporation (PHMC), School District of Philadelphia, Temple University Health System, and numerous other community health agencies. These partnerships allow us to offer students a wide range of fieldwork opportunities to translate skills learned in the classroom to actual practice in the community.

**Study Abroad:** Short-term intensive study abroad courses are offered as part of the MPH program of study. These courses are offered during the Summer and are open to both undergraduate and graduate students.

**Accreditation:** The MPH is fully accredited by the Council on Education for Public Health (CEPH). Achieving accreditation in 1985, Temple's MPH program is one of the longest established accredited MPH programs in the country.

**Areas of Specialization:** The MPH degree program is offered in six specialty fields of study:

- Applied Biostatistics (APBIO)
- Environmental Health (EH)
- Epidemiology (EPI)
- Health Policy and Management (HPM)
- Nutrition (NUTR)
- Social and Behavioral Sciences (SBS)

Students in the MPH program may complete transcripted College of Public Health certificate programs by taking their 9 credits of electives in the relevant coursework. For questions about certificates, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

**Job Prospects:** Graduates with an MPH in Epidemiology have positions in a wide range of health-related settings, including state and local public health departments, community-based organizations, voluntary health agencies, health maintenance organizations, pharmaceutical companies, hospitals, clinics, schools and other public health-related work sites. Graduates are employed as HIV/AIDS coordinators, infection control coordinators, project directors, program evaluation specialists, research directors, prevention specialists, environmental health specialists, protocol directors, senior health educators and consultants. Virtually all students are placed within three to six months of graduation.

**Licensure/Certification:** Students who complete an MPH at Temple University are eligible to sit for the Certified in Public Health (CPH) exam offered by the National Board of Public Health Examiners and the Certified Health Education Specialist (CHES®) exam offered by the National Commission for Health Education Credentialing, Inc. (NCHEC). For more information about credentialing in public health, visit <https://www.nchec.org/>.

**Non-Matriculated Student Policy:** Non-matriculated students are required to speak with an advisor before registering for classes and to obtain the permission of the professor, whether the coursework is taken in the on-campus or online format. If accepted to the program, a maximum of three courses (9 credits) may be applied toward the degree program. Exceptions to this policy relate to formal certificate programs. For more information, contact Natasha Benoit, Senior Academic Advisor, at [nbenoit@temple.edu](mailto:nbenoit@temple.edu).

**Financing Opportunities:** The Graduate School awards fellowships on a competitive basis only to students with outstanding academic records who are admitted to Temple University for the Fall term. Applicants who wish to be considered for fellowships must apply no later than January 26 for consideration for the Fall term. The Admissions Committee of the Department of Epidemiology and Biostatistics nominates outstanding students for these awards, but the Graduate Board's Fellowship Committee makes all award decisions.

Limited Teaching and Research Assistantships are available in the College of Public Health. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Students whose Fall applications are complete prior to or at the application deadline are reviewed for eligibility for Teaching Assistant (TA) positions. TAs can work 5 to 20 hours per week in any combination of teaching assignments made by the department and must meet the English Language Proficiency standards set by the University and the College. Students who hold Teaching or Research Assistantships are not permitted to hold other employment without the written prior approval of their advisor, the Director of Graduate Programs, and the Graduate School. To be considered for a Teaching or Research Assistantship, complete an application form that is sent to students upon admission to the MPH program. The completed application must be returned to [publichealth@temple.edu](mailto:publichealth@temple.edu) to be considered.

The College of Public Health has a limited number of scholarship opportunities available for MPH students, as shown at <https://cph.temple.edu/admissions/scholarships>. Students may also be eligible for financial support through the Office of Student Financial Services.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

All applicants to the MPH program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liaisoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215-204-5200.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with the applicant's academic competence. If the applicant has been out of school for more than 5 years, ensure that letters are provided by professional colleagues who can discuss your relevant academic skills, including critical thinking, research and writing.

**Coursework Required for Admission Consideration:** Applicants' files are reviewed for undergraduate coursework in mathematics and/or statistics, social sciences and writing.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0. No prerequisites must be met to apply to the MPH program at Temple University, but applicants with a GPA of 3.25 or greater in mathematics/statistics courses and strong grades in writing are preferred.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** Write a well-considered 500- to 1,000-word statement of purpose that articulates your interests in public health and our program in particular. Craft your statement to specifically address the following questions:

- Why are you pursuing the MPH in Epidemiology, and what are your particular areas of interest in public health?
- How does the MPH in Epidemiology best fit your public health interests?
- What are your career goals, and how will this degree help you to achieve these goals?
- What are your plans in the first few years after graduation?

### Standardized Test Scores:

GRE: Optional. While the program takes a portfolio approach to admissions, standardized tests provide important insight into quantitative and verbal abilities. If submitted, scores above the 50th percentile on both the verbal and quantitative sections of the test are desired. Official GRE scores should be sent to SOPHAS using code 0151. If GRE scores are not submitted, it is recommended that the applicant's GPA is 3.25 or greater in mathematics and statistics courses. This provides important information on the applicant's quantitative abilities required for the program. Applications that do not include GRE scores and do not meet the mathematics/statistics GPA must provide some evidence of quantitative abilities either through prior experiences, the personal statement and/or letters of recommendation.

Standardized tests considered in lieu of the GRE include DAT, GMAT, MCAT, OAT and PCAT. The LSAT, which is also considered for some

MPH specialties, is not accepted when applying for Applied Biostatistics or Epidemiology.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an MPH program accredited by the Council on Education for Public Health (CEPH) may be transferred into the MPH. The credits must be equivalent to coursework offered at Temple, and the grade must be a "B" or better in order to transfer. The MPH program director approves the transfer of credits based on a review of course materials provided by the student. The maximum number of credits a student may transfer is 9.

**Clearances:** The MPH program requires students to complete fieldwork education. In the MPH program, it is the fieldwork site that determines the clearances, such as criminal background check and FBI fingerprinting, needed by a student. The results of these clearances determine whether a student may be onboarded at a respective site.

SBS 5001	Fundamentals of Public Health	3
SBS 5002	Program Planning, Theory, and Practice	3

### Epidemiology Core Courses

EPBI 8012	Multivariable Biostatistics	3
EPBI 8202	Epidemiological Research Methods II	3
EPBI 8205	Chronic Disease Epidemiology	3
or EPBI 8206	Infectious Disease Epidemiology	

### Epidemiology Elective <sup>1</sup>

Select one from the following: 3

ENVH 8207	Environmental Epidemiology
EPBI 5205	Surveillance, Epidemics and Outbreaks
EPBI 8011	Social Epidemiology
EPBI 8207	Reproductive and Perinatal Epidemiology
EPBI 8209	Epidemiology of HIV/AIDS
EPBI 8213	Cancer Epidemiology

### Electives <sup>2</sup>

Select two from the following: 6

EPBI 5003	Spatial Analysis in Public Health
EPBI 5204	Mental Health Epidemiology
EPBI 5206	Risk Assessment and Preparedness Decision Making
EPBI 5500	Seminar in Current Issues in Public Health <sup>3</sup>
EPBI 8301	Clinical Research Methods in Public Health
EPBI 8303	Behavioral Epidemiology
EPBI 8307	Systematic Reviews

### MPH Fieldwork Experience

EPBI 9289	MPH Fieldwork I	3
EPBI 9389	MPH Fieldwork II	3

**Total Credit Hours** 42

1

Other electives may be taken with approval.

2

Courses not taken to fulfill the Epidemiology elective above may be selected to fulfill one or both of these general electives. Other electives may be taken with approval.

3

Approval required.

### Minimum Grade to be Earned for All Required Courses: B-

### Culminating Events:

*Fieldwork Practicum:*

Students are required to synthesize and integrate the knowledge acquired in coursework and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice through an internship or practicum experience with a public health agency, health services organization, or under the supervision of a faculty preceptor. The MPH fieldwork experience serves as the applied practice experience as required by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health, for completion of the Master of Public Health degree. In addition, this applied practice experience provides the student

with the opportunity to develop expertise in a topic area and to contribute original and independent observations to a body of knowledge.

Part-time fieldwork experiences are available for students who work full-time.

*Evaluative Paper:*

For the applied practice experience to fulfill the requirements of EPBI 9289 and EPBI 9389, MPH in Epidemiology students are expected to complete a fieldwork experience. The required deliverable for the MPH fieldwork requirement is a final evaluative paper. Students must demonstrate their proficiency and the application of theory and principles in the paper.

## Contacts

### Program Web Address:

## Epidemiology MS

COLLEGE OF PUBLIC HEALTH

Learn more about the Master of Science in Epidemiology.

### About the Program

The conduct of epidemiological research involves the study of the distribution of disease and/or injury in human populations. The MS in Epidemiology degree is designed specifically for students interested in in-depth training and knowledge of the research techniques

appropriate to conducting epidemiological studies in a particular concentration of health research. Master's-level epidemiologists work in applied settings conducting disease surveillance and outbreak investigations or in research settings developing and evaluating research hypotheses generated to understand the effects of behavioral, biological, environmental and social factors on human health. Since epidemiology is the principal science underlying disease prevention and control programs, this training is also a basic component for other degree and training programs in public health and preventative medicine.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The program is designed to accommodate both full- and part-time students. Full-time students can earn their degree within 2 years, while part-time students typically complete the degree in 3 years.

**Interdisciplinary Study:** Students are encouraged to develop programs of study that are interdisciplinary in nature, involving coursework across departments, schools and colleges. Research in affiliated units is encouraged.

**Affiliation(s):** Locally, the program has long-standing research affiliations with The Food Trust, Fox Chase Cancer Center, Health Federation of Philadelphia, Philadelphia Department of Public Health, Public Health Management Corporation (PHMC), School District of Philadelphia, Temple University Health System, and numerous other community health agencies. These partnerships allow us to offer students a wide range of fieldwork opportunities to translate skills learned in the classroom to actual practice in the community.

**Study Abroad:** Temple University has campuses in Tokyo, London and Rome where independent research can be pursued under advisement.

**Accreditation:** The program is accredited by the Council on Education for Public Health (CEPH).

**Areas of Specialization:** Areas of specialization can be dictated through the area of concentration pursued by the student in their thesis research.

**Job Prospects:** Graduates of the MS in Epidemiology program are prepared to be researchers in colleges and universities or to hold research-related positions in a wide range of organizations. Graduates are employed in health systems, hospitals and clinics, public health departments, and public health and other healthcare and human service agencies. Some graduates are employed by schools at the local, state and federal levels. Graduates also work in pharmaceutical companies, nonprofit and for-profit corporations, foundations and consulting firms.

**Non-Matriculated Student Policy:** Students are permitted to take up to 9 credits of coursework before matriculation. If a student is accepted into the program, those courses may be applied toward the degree requirements. Course selection should be made in consultation with an advisor, and students should be aware that completion of coursework does not ensure admission into the program.

**Financing Opportunities:** Limited Teaching and Research Assistantships are available in the College of Public Health. The Graduate School website details the types of graduate student support. Assistantships are awarded on a term or annual basis. Students whose Fall applications are complete prior to or at the application deadline are reviewed for eligibility for Teaching Assistant (TA) positions. TAs can work 5 to 20 hours per week in any combination of teaching

assignments made by the department and must meet the English Language Proficiency standards set by the University and the College. Students who hold Teaching or Research Assistantships are not permitted to hold other employment without the written prior approval of their advisor, the Director of Graduate Programs, and the Graduate School. To be considered for a Teaching or Research Assistantship, complete an application form that is sent to students upon admission to the MPH program. The completed application must be returned to [publichealth@temple.edu](mailto:publichealth@temple.edu) to be considered.

The College of Public Health has a limited number of scholarship opportunities available for MPH students, as shown at <https://cph.temple.edu/admissions/scholarships>. Students may also be eligible for financial support through the Office of Student Financial Services.

## Admission Requirements and Deadlines

### Application Deadline:

*Fall:* March 1

All applicants to the MS in Epidemiology program must apply via the Centralized Application Service for Public Health (SOPHAS). The system can be accessed at <https://sophas.liasoncas.com/>.

Applicants should check their application status on the SOPHAS portal often and inquire directly of SOPHAS about receipt of materials. For other questions, please contact the CPH Office of Admissions at [cph@temple.edu](mailto:cph@temple.edu) or 215- 204-5200.

### Letters of Reference:

*Number Required:* 3

*From Whom:* Letters of recommendation, which are completed electronically through the SOPHAS system, should be obtained from college/university faculty members familiar with the applicant's academic competence and, if appropriate, research supervisors or mentors.

**Coursework Required for Admission Consideration:** Proficiency in statistical programming and a minimum of 6 credits of undergraduate quantitative and/or analytical methods (statistics, research design, etc.) are required.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of an accredited baccalaureate degree. The minimum acceptable undergraduate GPA is 3.0.

A WES evaluation is required for applicants who completed their bachelor's degree outside of the United States. This can be requested at <https://www.wes.org/> and submitted through SOPHAS.

**Statement of Goals:** Write a well-considered 500- to 1,000-word statement of purpose that articulates your interests in public health and our program in particular. Craft your statement to specifically address the following questions:

- Why are you pursuing this master's degree program, and what are your particular areas of interest in public health?
- How does the MS in Epidemiology best fit your public health interests?

- What are your career goals, and how will this degree help you to achieve those goals? What are your plans in the first few years after graduation?

### Standardized Test Scores:

GRE: Required. While the program takes a portfolio approach to admissions, standardized tests provide important insight into quantitative and verbal abilities. Scores above the 75th percentile on both the verbal and quantitative sections of the test are desired. Official GRE scores should be sent to SOPHAS using code 0151.

Standardized tests considered in lieu of the GRE include DAT, GMAT, MCAT, OAT and PCAT.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79 (send officially to SOPHAS using the SOPHAS-specific TOEFL code 5688)
- IELTS Academic: 6.5
- PTE Academic: 53
- Duolingo: 110

**Resume:** Current resume or CV required.

**Interview:** An interview may be required.

**Laptop:** All incoming students in the College of Public Health are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

**Transfer Credit:** Graduate credits from an accredited institution are considered for transfer into the MS in Epidemiology degree program. Such courses are reviewed by the MS Graduate Program Director to determine whether they are equivalent to coursework offered at Temple and fulfill any degree requirements. The grade must be a "B" or better in order to transfer and have been earned within five years of applying to the program. The maximum number of credits that may be transferred into the MS program is 6.

## Program Requirements

### General Program Requirements:

*Number of Credits Required Beyond the Baccalaureate:* 36

*Required Courses:*

Code	Title	Credit Hours
<b>Core Courses</b>		
ENVH 5004	Environmental Health	1.5
EPBI 5002	Biostatistics	3
EPBI 5005	Applied Analysis of Health	1.5
EPBI 5201	Epidemiological Research Methods I	3
EPBI 8012	Multivariable Biostatistics	3
EPBI 8202	Epidemiological Research Methods II	3
HRPR 5001	Current and Emerging Issues in Public Health and Health Professions <sup>1</sup>	0
<b>Advanced Quantitative Methods Courses</b>		
Select two from the following:		6
EPBI 5003	Spatial Analysis in Public Health	
EPBI 8201	Structural Equation Modeling	
EPBI 8204	Multilev Mod in Int Res	
EPBI 8302	Behavioral Measurement	
EPBI 8307	Systematic Reviews	
EPBI 8402	Intermediate Concepts and Methods in Health Research	
EPBI 8403	Applied Concepts and Methods in Health Research	
GUS 5062	Fundamentals of Geographical Information Systems
